SUBJECT: Basic Training Test for National Police Reserve Recruits

TO: Chief
Civil Affairs Section
GHQ, SCAP
APO 500
ATTN: Training Section

1. In compliance with basic communication the inclosed proposed basic training test has been examined and is believed feasible for giving to NPR enlistees.

2. At the present time no suitable date can be offered for giving the test as NPR units are now in the process of arriving in this Region and the degree of their training has not yet been ascertained. The date(s) on which the test could be given can only be determined after the arrival of all units here.

SUBJECT: Basic Training Tests

TO : Civil Affairs Section (Annex)
APO 500
ATTN: Operations Section

1. All tests examined and it is believed that all NPR personnel who have completed their thirteen weeks basic training should be sufficiently trained to pass any or all of these tests.

2. This headquarters has on hand sufficient Physical Fitness Tests as they were reproduced at an earlier date.

3. Request that a time limitation be placed on each examination.

4. These tests can be administered during the last two weeks of the transition period between completion of thirteen weeks training and 13 Jan 1951, except in case of 2nd Bn 2nd Regt which will not complete Basic Training until 13 January 1951. Tests can be administered to them during normal training hours in Basic Course.

5. It is suggested that only those who are below commissioned rank be required to take tests.

Basic - Ltr, Civ Aff Section (Anx), GHQ, SCAP, Subj: Basic Training Test for National Police Recruits, dtd 28 Nov 50

353 (28 Nov 50) 1st Ind

Tohoku Civil Affairs Region, APO 547, 7 December 1950

TO: Chief, Civil Affairs Section (Annex), GHQ, SCAP, APO 500
ATTN: Operations Division

1. Training test referred to in the basic communication is well prepared and should give the information needed to indicate whether the instruction has been satisfactorily retained. The tests give the policemen an opportunity for selection of questions which is believed to be very desirable.

2. Upon completion of the 13-week basic training, it is believed desirable to allow one week for each camp to catch up on the various subjects that may be needed for those individuals who may have lost out on some of the instructions. As soon as that week of instruction has been finished, the test should be given.

Summary of Comments on Training Tests

Region	Comment	Suggested Date to be given
Hokkaido	Time limitation on each examination. Below commissioned rank to take.	2 - 13 January 1951
Tohoku	Desirable	Upon completion of 13 week training period
Kanto	A few questions controversial. ~~To~~ be given orally in rotation.	First two weeks in January
Tokai-Hokuriku	Good - Feasible	No Date
Chugoku	Well suited	No Date
Shikoku	Satisfactory	Before 15 January 1951
Kyushu	Feasible - Valuable	2 - 13 January 1951

Report from Kinki Region not received at this time.

DEC 6. 1950

SUBJECT: Basic Training Test for NPR Recruits

TO: Chief
Civil Affairs Section (Annex)
General Headquarters
Supreme Commander for the Allied Powers
APO 500

1. In compliance with letter, Headquarters Civil Affairs Section, General Headquarters, Supreme Commander for the Allied Powers, 28 November 1950, file and subject as above the following is submitted.

2. Recommend that the Proposed Basic Training Test be modified as follows:

a. Eliminate the following questions which are either controversial or capable of being misinterpreted:

(1) Scouting and Patrolling: Questions 9, 12 and 13.

(2) Maintenance of Clothing and Equipment: Question 9.

(3) Guard Duty: Questions 1, 2, 20, 22, 23.

(4) Riot and Field Formations: Question 6.

(5) Carbine, Instruction: Question 40.

b. Field Fortifications: Questions 20, 21 and 22 to be performed only by certain individuals selected at random by the testing officer. The shortage of intrenching tools and lack of suitable area will make it impracticable to have every man in the group being tested construct the fortifications called for.

c. Add questions on Dismounted Drill.

3. After modification as suggested above, it is recommended that the test be administered as follows:

U.S. ARMY
DEC 1 1950
KANTO CIVIL AFFAIRS REGION

11.

KNPR 353, subj: "Basic Training Test for NPR Recruits", dated 6 Dec 1950

a. The Physical Fitness Test be given as a separate test, allowing one half day per company for completion.

b. The balance of the test be given orally to men in platoon-size groups, one testing officer to each group. Questions to be put to men in rotation, with no answers by volunteers permitted. In this manner, each man in a platoon of about 40 men would answer about four (4) questions and a good over-all picture of the effectiveness of training would be obtained. Allowing one half day to each group, a testing team of six (6) officers could administer the test to two (2) large companies or four (4) small companies per day.

4. It is believed that the most suitable time for giving the test is the last week of the Basic Training cycle except for those companies which will finish the 13 week cycle prior to 15 January 1950. In the latter case, the period between the end of the Basic Training cycle and the start of small unit training on 15 January is considered the most suitable.

1. The proposed basic training tests appear to cover the subjects adequately and it is recommended that they be given. It is further recommended that they be given immediately after the completion of the 13 week training program.

2. Since the object of a test is to determine the knowledge gained by the student during the course, it is recommended that police trainees be required to answer all questions. This will give the local training personnel an idea of the points that need review during the period from the end of the basic training cycle to the beginning of the next phase of training.

Training Branch
16 October 1950

SUBJECT: Weapons and Tactics Training Program.

1. Problem. To recommend a program of training for NPR Trainees upon completion of basic training and before starting unit training.

2. Discussion.

a. (1) The present planned flow of trainees into training camps will extend over a period of eight (8) weeks, thus trainees will complete their 13 week basic training program during the period 24 November 1950 - 13 January 1951.

(2) T/E's have not been completed and distributed to camps. Necessary weapons and equipment, other than carbines and some personal equipment, has not been received and distributed to trainees. Information on types and date of receipt of other weapons is not presently firm.

(3) Trained officer and enlisted cadres are not available for conducting training, but are being trained concurrently with trainees, which will retard the training to some extent. Higher headquarters and supervisory personnel have not been secured or organized.

(4) The basic training program was purposefully made very basic and weighted in physical conditioning, riot, and guard duty. It has not covered all the training the recruit should receive in his basic training period.

b. (1) Experience has indicated and Mobilization Training Programs have required that unit officer and NCO cadre be trained and that trainees have successfully completed their basic training prior to entering unit training.

(2) It is good training procedure to have the subordinate units of an organization, as the companies of the battalion, start their unit training on the same date and be equipped and organized under their respective T/O&E.

c. The following conclusions can be drawn:
(1) Unit training could not be started by all units of a battalion or higher headquarters on same date at completion of present basic training program.

(2) Unit officer and NCO personnel and higher headquarters personnel will not be sufficiently trained and grounded to start the unit on unit training immediately upon completion of basic training program.

(3) Organizations may not be organized and equipped under the appropriate T/O&E.

3. Action Recommended.

a. Units be organized and equipped under appropriate T/O&E prior to entering unit training phase of instruction.

b. That Annex A, Weapons and Tactics Training Program be approved.

c. That annex B, Field Manuals to be Translated and printed to Japanese, be approved for translation by CAS Regions and authorization granted to expend NPR funds to print on basis of ten (10) copies per company or similar unit.

ROBERT L. WEBB
Lt Col., Infantry
Chief Training Branch.

Annexes: Annex A, Weapons and
Tactics Training Program.

Section 11. Weapons and Tactics Training Program.		
Training Program	11	
References	12	

Section 1.

General

1. Purpose -- The purpose of this program is to prescribe a course of training for trainees of the National Police Reserve who have completed their Basic Program prior to 15 January 1951.

On this date, 15 January 1951, they will enter their Small Unit Training Program.

2. Scope -- The program is designed for progressive individual training in basic subjects. Emphasis is placed on weapons instruction, physical conditioning, riot and field formations, and the development of the qualities necessary in the National Police Reserve.

3. Modification -- a. The program may be modified to make the best use of existing facilities and training conditions. The general sequence of subjects, and the allocation of time to subjects will be preserved.

b. The training week will consist of 48 hours; this is based on 6 days of 8 hours each. Hours consumed in night training will be included in the 48 hour week, and time off will be allowed during daylight hours of the week.

c. Units that finish their Basic Training Program, and which will not complete the full 8 weeks program of the Weapons and Tactics Training Program, may start their Weapons and Tactics Program during that week which will best fit their Weapons Training needs; i. e. Field Artillery, Tank or AA units, who have only 4 or 5 weeks remaining, may start with the 4th or 5th week, where Infantry Rifle units would start with 1st week.

4. Methods of Instruction -- a. Emphasis will be placed on practical work as opposed to theoretical instruction. Every effort will be made to insure that instruction is carefully prepared and presented in an understandable, interesting, and dynamic manner.

b. Throughout all training periods the necessity for the training and the application of prior instruction to current training should be stressed. Instruction in a subject once completed must not be forgotten, but should be applied whenever possible concurrently with other training. Likewise, to the fullest extent, the actual application of the subject and the importance of teamwork and cooperation will be stressed. Every effort should be made to introduce realism into training. Maximum use will be made of competition to stimulate interest in training and for the attainment of the best possible standards of performance.

5. References -- a. As listed in paragraph 12.

b. Several methods of instruction are employed, but it must be borne in mind that application by the student is the most effective way to drive home instruction and must be utilized wherever and whenever possible. The coach and pupil method of instruction will be applied in all instruction.

c. Graphic Training Aids are easily adapted to a variety of training purposes. Many are designed for use in conferences and demonstration, others can be posted for review purposes and for self-instruction by individual trainees.

6. Supervision -- a. The quality and thoroughness of training is directly proportioned to the amount of active and personal supervision rendered by all supervisors and their staff. Continuous observation of instruction should determine how well training is being accomplished and insure only the best methods of instruction.

b. All supervisors and their staffs will exercise constant and active supervision of instruction in the training areas. Administrative work will not be permitted to interfere with the primary mission of training.

7. Progress Records -- A record of the status of training of individuals will be kept as prescribed later by this Headquarters.

8. Inspections and Tests -- There is a close relationship between inspections and standards. Inspections determine the progress of training and should indicate the training which must be stressed to attain the desired standards. Progress of the individual in attaining minimum standards will be determined by observation of training and by tests. In subjects such as marksmanship and physical training, the tests are included in the scope of training.

9. Safety -- Realism in training can be achieved without sacrifice of essential safety factors. Common sense is the basis of safety in any training program. Most accidents attributed to training can be prevented by proper supervision and inspection of equipment and training facilities. The firing of weapons

will be governed by provisions contained in instructions published by this Headquarters and disseminated to the units.

10. Training Missed -- a. Training missed by trainees will be made up only insofar as to permit such trainees to attain the minimum objectives set forth for those particular subjects. If an individual has missed part of a subject, he need not be required to take makeup training if he can attain the necessary minimum objective without this additional training.

b. References -- The paragraph references listed in paragraph 12, for each subject, are listed as a guide only, and should not be considered as being an ironclad sequence for instruction, but may be varied according to the conditions under which the instructional material is presented.

Section 11

WEAPONS AND TACTICS TRAINING PROGRAM

11. Master Schedule

SUBJECT	TOTAL HOURS	HOURS PER WEEK

12. a. Inspections (32 hours)

(1) Scope

(a) Inspection of personnel, clothing, equipment, and quarters. Training inspections may be conducted in conjunction with these inspections.

(2) Minimum Objectives

(a) Pass inspections by having all inspected items in the proper state of maintenance and appearance.

(b) 1/2 hour inspection each day, Monday through Friday, with a 1-1/2 hour inspection each Saturday.

(3) References: FM 21-15, Individual Clothing and Equipment

Paragraphs: 29, 31.

FM 22-5, Leadership, Courtesy and Drill

Paragraphs: 180-183

b. Dismounted Drill (48 hours)

(1) Scope

(a) School of the Police with and without arms, squad platoon and company drill for foot troops; cermonies.

(2) Minimum Objectives

(a) Ability to execute movements in school of police with precision and smartness.

(b) One hour per day will be devoted to Dismounted Drill in 1/2 to 1 hour periods.

(3) References: FM 22-5, ~~Leadership, Courtesy and Drill~~ DRILL AND CEREMONIES dated June 1950

Paragraphs: 3-6, 15-57, 67-132, 155-165, 172-175.

c. Guard Duty (6d 32 hours)

(1) Scope

(a) Purpose, composition and operation of interior guards to include duties of personnel, formations, orders and prisoner guards.

(b) Duties and function of the war sentinel.

(2) Minimum Objectives

(a) Satisfactory performance as a member of the guard, on post, both day and night.

(b) Solution of practical problems involving situations that could be confronted by a member of the guard.

(c) Whole units will be placed on guard duty for 2d 12 hour periods in which 8 hours credit will be taken, utilizing personnel not on post in patrols or practical problems to carry out the guard training problem.

(d) Officers and NCO's must use the utmost initiative in this training and the problems used.

(e) Scheduled time on Master Schedule for Guard Duty and Road Marches may be shifted between weeks to accomplish guard duty for each day of the week.

(3) References: FM 26-5, Interior Guard Duty

Paragraphs: 7-16, 18, 20-29, 41, 44-45,

appendix 1 and 111.

d. Physical Training and Strength Test (48 hours)

(1) Scope

(a) Physical training to include strength course, combatives, 5 mile walk-run and athletics.

(2) Minimum Objectives

(a) Pass the prescribed physical fitness test.

(b) Individual stamina will be maintained executing the 5 mile walk and run in 50 minutes maximum.

(3) References: FM 21-20, Physical Training
Paragraphs: 29-30, 49-58, 67-75, 140-145.
FM 21-150, Unarmed Defense
Paragraphs: 8-112.

e. Maintenance Clothing, Equipment, and Quarters (16 hrs)

(1) Scope

(a) Care, cleaning, marking and adjustment of clothing and equipment, personal hygiene and supply discipline.

(2) Minimum Objectives

(a) Proficiency in care, cleaning, marking and adjustment of clothing and equipment; cleanliness of quarters and person; and a thorough understanding of supply discipline.

(b) The marking of all clothing and equipment as directed. Regulations will be prepared and furnished from this Headquarters.

(c) May be carried out in conjunction with weekly 1 1/2 hour inspection.

(3) References: FM 21-15, Individual Clothing and Equipment
Paragraphs: 29, 30.

FM 23-7, US Carbine Cal 30.

Paragraphs: 12-21.

Regulations for marking clothing and equipment from Headquarters NPR later.

f. Tatics (92 hours)

(1) Riot and Field Formations (38 hours)

(a) Scope

(1) Basic formations to include movement, control, signals, security, and fire and maneuver for both Riot Control and Domestic Disturbances and Field Combat Formations.

(b) Minimum Objectives

(1) Ability to operate as a member of a small unit or in company strength, executing combat drill, riot drill and riot maneuvers and control of domestic disturbances.

(2) Unit will be trained to function at night as well as day.

(c) References: FM 19-15, Domestic Disturbances.
Paragraphs; 44-61.
FM 7-10, Rifle Company, Inf.
Regiment.
Paragraphs: appendix 11 and 111.

(2) Bivouacs and Field Problems (22 hours)

(a) Scope

(1) Company tactical training limited to a few simple problems to provide background for small units; squad, platoon and company.

(b) Minimum Objective

(1) Ability to operate as a small unit or in company strength, in approach march, attack and defense positions, and outpost.

(2) Day and night training will be conducted, under assumed enemy conditions.

(6) References: FM 5-15, Field Fortifications

319-327.

appendix 11 and 111

(3) Road Marches (32 hours)

(a) Scope

(1) March Technique, Discipline, Hygiene and Sanitation.

(2) March conditioning so that trainee can complete a 24 mile march in satisfactory condition.

(3) The approach march.

(B) Minimum Objectives

(1) Familiarity with March Technique, Discipline, Hygiene and Sanitation.

(2) Ability to complete a 24 mile march in satisfactory condition.

(3) 8 hour march preparing his own meal, during the half way break in the march, under field conditions.

(4) The approach march formations and training will be accomplished by combining this subject with bivouac and field problems during the 8th week.

(c) References: FM 7-10, Rifle Company, Infantry Regiment
Paragraphs: 20-28, 52-56

Paragraphs: 191-194, 207-208.

g. Weapons (116 hours)

The weapons course is divided into two groups, Individual weapons and Crew served weapons. Personnel who are not members of a crew served weapons team will devote 116 hours to instruction in their individual weapon to include Mechanical Training, Nomenclature, Preparatory Marksmanship and record firing. Personnel who are members of a crew served weapon will devote 66 hours to instruction in their individual weapon to include mechanial training, nomenclature, preparatory marksmanship and familiarization firing. In addition they will devote 50 hours to instruction in their crew served weapon to include mechancial training, nomenclature, functioning, care and cleaning, preparatory marksmanship, and familiarization firing.

5 October 1950

MEMORANDUM FOR: Colonel KOWALSKI

SUBJECT: Carbine Training of NPR

1. The following plan for completion of Carbine training of JNPR is submitted:

a. Upon completion of the Sendai area, on or about 21 October 1950, the team will be split four ways to cover areas as follows:

AREA	OFFICERS	EM	NPR	INTERPRETER	STRENGTH
Tokyo	1	8	16	1	3906
McKnight					(885)
Kurihama					(3021)
Kinki	2	15	30	2	16,370
Gifu					(6030)
Maizuru					(5909)
Nara					(1600)
Shinodiyama					(1456)
Okubo					(1375)
Shikoku Island					
Chugoku	1	8	16	1	3999
Mizushima					(2000)
Kadaichi					(1000)
Zentsugi					(999)
Kyushu	2	15	30	2	16859
Fukuoka					(4218)
Bofu					(3313)
Kurume					(3354)
Hario					(3950)
Okuki					(1168)
Crouch					(756)

2. It is estimated that all carbine training can be completed by 18 November 1950 with the following provisions:

a. That all personnel are available to receive training upon arrival of the team.

b. That all weapons and ammunition are available and ready for immediate use upon arrival of the team.

c. That 1000 inch ranges are ready for use in each camp. Fifty points recommended.

d. That sufficient targets, rifle A 1000', are available at each camp.

e. That additional training aids be provided at each camp to supplement those carried by the team.

(1) At present the carbine team is equiped with only 250 sets of training aids. These include sighting bars and triangulation sets. This amount will take care of only 4000 per week. We will need approximately 2h00 additional sets distributed as follows:

(a) Tokyo Area 250

(b) Kinki Area 1000

(c) Kyushu Area 1150

(d) Shigoku and Chugoku Area, we can use the 250 sets carried by the team.

f. That amplification sets be provided on ranges consisting of fifty points or more.

Remarks: Study and proposed training program for JNPR Trainees. Webb.
15 Oct

Col Webb:
Approved with changes indicated.
WMA

5

16 Oct Training Branch
8 September 1950

SUBJECT: Weapons and Tactics Training Program.

1. Problem. To recommend a program of training for JNPR Trainees upon completion of basic training and before starting unit training.

2. Discussion.

a. (1) The present planned flow of trainees into training camps will extend over a period of eight (8) weeks, thus trainees will complete their 13 week basic training program during the period 24 November 1950 - 13 January 1951.

(2) T/O&ES have not been completed and distributed to camps, ~~neither has there been a firm station list for activitation and organization of units under these T/O&ES.~~ Necessary weapons and equipment, other than carbines and some personal equipment, has not been received and distributed to trainees. Information on types and date of receipt of other weapons is not presently firm.

(3) Trained officer and enlisted cadres are not available for conducting training, but are being trained concurrently with trainees, which will retard the training to some extent. Higher headquarters and supervisory personnel have not been secured or organized.

(4) The basic training program was purposefully made very basic and weighted in physical conditioning, riot, and guard duty. It has not covered all the training the recruit should receive in his basic training period.

b. (1) Experience has indicated and Mobilization Training Programs have required that unit officer and NCO cadre be trained and that trainees have successfully completed their basic training prior to entering unit training.

(2) It is good training procedure to have the subordinate units of an organization, as the companies of the battalion, start their unit training on the same date and be equipped and organized under their respective T/O&E.

c. The following conclusions can be drawn:
(1) Unit training could not be started by all units of a battalion or higher headquarters on same date at completion of present basic training program.

(2) Unit officer and NCO personnel and higher headquarters personnel will not be sufficiently trained and grounded to start the unit on unit training immediately upon completion or basic training program.

(3) Organizations may not be organized and equipped under the appropriate T/O&E.

3. Action Recommended.

a. Units be organized and equipped under appropriate T/O&E prior to entering unit training phase of instruction.

b. That annex A, Weapons and Tactics Training Program be approved.

c -

Robert L Webb
ROBERT L. WEBB

Section 11. Weapons and Tactics Training Program.

Training Program	11	
References	12	

Section 1.

General

1. Purpose -- The purpose of this program is to prescribe a course of ~~basic~~ training for trainees of the National Police Reserve who have completed their Basic Program prior to ~~29~~ 15 January 1951. On this date, ~~29~~ 15 January 1951, they will enter their Small Unit Training Program.

ANNEX - "A"

2. Scope -- The program is designed for progressive individual training in basic subjects. Emphasis is placed on weapons instruction, physical conditioning, riot and field formations, and the development of the qualities necessary in the National Police Reserve.

3. Modification -- a. The program may be modified to make the best use of existing facilities and training conditions. The general sequence of subjects, and the allocation of time to subjects will be preserved.

b. The training week will consist of 48 hours; this is based on 6 days of 8 hours each. Hours consumed in night training will be included in the 48 hour week, and time off will be allowed during daylight hours of the week.

c. Units that finish their Basic Training Program, and ~~who~~ which will not complete the full 8 weeks program of the Weapons and Tactics Training Program, may start their Weapons and Tactics Program during that week which will best fit their Weapons Training needs; i. e. Field Artillery, Tank or AA units, who have only 4 or 5 weeks remaining, may start with the 4th or 5th week, where Infantry Rifle units would start with 1st week.

4. Methods of Instruction -- a. Emphasis will be placed on practical work as opposed to theoretical instruction. Every effort will be made to insure that instruction is carefully prepared and presented in an understandable, interesting, and dynamic manner.

b. Throughout all training periods the necessity for ~~such~~ the training and the application of prior instruction to current training should be stressed. Instruction in a subject once completed must not be forgotten, but should be applied whenever possible concurrently with other training. Likewise, to the fullest extent, the actual application of the subject and the importance of teamwork and cooperation will be stressed. Every effort should be made to introduce realism in to training.

Maximum use will be made of competition to stimulate interest in training and for the attainment of the best possible standards of performance.

5. References -- a. As listed in paragraph 12.

b. Several methods of instruction are employed, but it must be borne in mind that application by the student is the most effective way to drive home instruction and must be utilized wherever and whenever possible. The coach and pupil method of instruction will be applied in all instruction.

c. Graphic Training Aids are easily adapted to a variety of training purposes. Many are designed for use in conferences and demonstrations, others can be posted for review purposes and for self-instruction by individual trainees.

6. Supervision -- a. The quality and thoroughness of training is directly proportioned to the amount of active and personal supervision rendered by all supervisors and their staff. Continuous observation of instruction should determine how well training is being accomplished and insure only the best methods of instruction.

b. All supervisors and their staffs will exercise constant and active supervision of instruction in the training areas. Administrative work will not be permitted to interfere with the primary mission of training.

7. Progress Records -- A record of the status of training of individuals will be kept as prescribed later by this Headquarters.

8. Inspections and Tests -- There is a close relationship between inspections and standards. Inspections determine the progress of training and should indicate the training which must be stressed to attain the desired standards.

Progress of the individual in attaining minimum standards will be determined by observation of training and by tests. In subjects such as marksmanship and physical training, the tests are included in the scope of training.

9. Safety -- Realism in training can be achieved without sacrifice of essential safety factors. Common sense is the basis of safety in any training program. Most accidents attributed to training can be prevented by proper supervision and inspection of equipment and training facilities. The firing of weapons will be governed by provisions contained in instructions published by this Headquarters and disseminated to the units.

10. Training Missed -- a. Training missed by trainees will be made up only insofar as to permit such trainees to attain the minimum objectives set forth for those particular subjects. If an individual has missed part of a subject, he need not be required to take makeup training if he can attain the necessary minimum objective without this additional training.

b. References -- The paragraph references listed in paragraph 12, for each subject, are listed as a guide only, and should not be considered as being an ironclad sequence for instruction, but may be varied according to the conditions under which the instructional material is presented.

12. a. Inspections (~~36~~ 32 hours)

(1) Scope

(a) Inspection of personnel, clothing, equipment, and quarters. Training inspections may be conducted in conjunction with these inspections.

(2) Minimum Objectives

(a) Pass inspections by having all inspected items in the proper state of maintenance and appearance.

(b) 1/2 hour inspection each day, Monday through Friday, with a 1-1/2 hour inspection each Saturday.

(3) References: FM 21-15, Individual Clothing and Equipment

Paragraphs: 29, 31.

FM 22-5, Leadership, Courtesy and Drill

Paragraphs: 180-183

b. Dismounted Drill (~~54~~ 18 hours)

(1) Scope

(a) School of the Police with and without arms, squad platoon and company drill for foot troops; cermonies.

(2) Minimum Objectives

(a) Ability to execute movements in school of the police with precision and smartness.

(b) One hour per day will be devoted to Dismounted Drill in 1/2 to 1 hour periods.

(3) References: FM 22-5, Leadership, Courtesy and Drill dated June 1950

Paragraphs: 3-6, 15-57, 67-132, 155-165, 172-175.

c. Guard Duty (32 hours)

(1) Scope

(a) Purpose, composition and operation of interior guards to include duties of personnel, formations, orders and prisoner guards.

(b) Duties and function of the war sentinel.

(2) Minimum Objectives

(a) Satisfactory performance as a member of the guard, on post, both day and night.

(b) Solution of practical problems involving situations that could be confronted by a member of the guard.

(c) Whole units will be placed on guard duty for 12 hour periods in which 8 hours credit will be taken, utilizing personnel not on post in patrols or practical problems to carry out the guard training problem.

(d) Officers and NCO's must use the utmost initiative in this training and the problems used.

(e) Scheduled time on Master Schedule for Guard Duty and Road Marches may be shifted between week's to accomplish guard duty for each day of the week.

(3) References: FM 26-5, Interior Guard Duty

Paragraphs: 7-16, 18, 20-29, 41, 44-45,

appendix 1 and 111.

d. Physical Training and Strength Test (~~54~~ 48 hours)

(1) Scope

(a) Physical training to include strength course, combatives, ~~log exercises~~, 5 mile walk-run, and athletics. ~~and swimming when facilities and weather permit.~~

(2) Minimum Objectives

(a) Pass the prescribed physical fitness test.

(b) Individual stamina will be maintained executing the 5 mile walk and run in 50 minutes maximum.

(3) References: FM 21-20, Physical Training

Paragraphs: 29-30, 49-58, 67-75, 140-145.

FM 21-150, Unarmed Defense

Paragraphs: 8-112.

e. Maintenance Clothing, Equipment, and Quarters (~~28~~ 16 hours)

(1) Scope

(a) Care, cleaning, marking and adjustment of clothing and equipment, personal hygiene and supply discipline.

(2) Minimum Objectives

(a) Proficiency in care, cleaning, marking and adjustment of clothing and equipment; cleanliness of quarters and person; and a thorough understanding of supply discipline.

(b) The marking of all clothing and equipment as directed. Regulations will be prepared and furnished from this Headquarters.

(c) May be ~~held~~ carried out in conjunction with weekly 1 1/2 hour inspection.

Paragraphs: 29, 30.

FM 23-7, US Carbine Cal 30.

Paragraphs: 12-21.

Regulations for marking clothing and equipment from Headquarters NPR later. (check G-4?)

f. Tatics (~~100~~ 92 hours)

(1) Riot and Field Formations (38 hours)

~~(a)~~ Scope

(1) Basic formations to include movement, control, signals, security, and fire and maneuver for both Riot Control and Domestic Disturbances and Field Combat Formations.

(b) Minimum Objectives

(1) Ability to operate as a member of a small unit or in company strength, executing combat drill, riot drill and riot maneuvers and control of domestic disturbances.

(2) Unit will be trained to function at night as well as day.

(c) References: FM 19-15, Domestic Disturbances.
Paragraphs: 44-61.
FM 7-10, Rifle Company, Inf. Regiment.
Paragraphs: appendix 11 and 111.

(2) Bivouacs and Field Problems (22 hours)

(a) Scope

(1) Company tactical training limited to a few simple problems to provide background for small units; squad, platoon and company.

(b) Minimum Objective

(1) Ability to operate as a small unit or in company strength, in approach march, attack and defense positions, and outpost.

(2) Day and night training will be conducted, under assumed enemy conditions.

(c) References: FM 5-15, Field Fortifications

appendix 11 and 111

(3) Road Marches (~~40~~ 32 hours)

(a) Scope

(1) March Technique, Discipline, Hygiene and Sanitation.

(2) March conditioning so that trainee can complete a 24 mile march in satisfactory condition.

(3) The approach march.

(b) Minimum Objectives

(1) Familiarity with March Technique, Discipline, Hygiene and Sanitation.

(2) Ability to complete a 24 mile march in satisfactory condition.

(3) 8 hour march preparing his own meal, during the half way break in the march, under field conditions.

~~(c)~~ (4) The approach march formations and training will be accomplished by combining this subject with bivouac and field problems during the 8th week.

Training Branch
8 September 1950

SUBJECT: Weapons and Tactics Training Program.

1. Problem. To recommend a program of training for JNPR Trainees upon completion of basic training and starting of unit training.

2. Discussion.

a. (1) The present planned flow of trainees into training camps will extend over a period of eight (8) weeks, thus trainees will complete their 13 week basic training program during the period 24 November 1950 - 19 January 1951.

(2) T/O&ES have not been completed and distributed to camps, neither has there been a firm station list for activitation and organization of units under these T/O&ES. Necessary weapons and equipment, other than carbines and some personal equipment, has not been received and distributed to trainees. Information on types and date of receipt of other weapons is not presently firm.

(3) Trained officer and enlisted cadres are not available for conducting training, but are being trained concurrently with trainees, which will retard the training to some extent. Higher headquarters and supervisory personnel have not been secured or organized.

(4) The basic training program was purposefully made very basic and weighed in physical conditioning, riot, and guard duty. It has not covered all the training the recruit should receive in his basic training period.

b. (1) Experience has indicated and Mobilization Training Programs have required that unit officer and NCO cadre be trained and that trainees have successfully completed their basic training prior to entering unit training.

(2) It is good training procedure to have the subordinate units of an organization, as the companies of the battalion, start their unit training on the same date and be equipped and organized under their respective T/O&E.

5n

c. The following conclusions can be drawn:
(1) Unit training could not be started by all units of a battalion or higher headquarters on same date at completion of present basic training program.

(2) Unit officer and NCO personnel and higher headquarters personnel will not be sufficiently trained and grounded to start the unit on unit training immediately upon completion of basic training program.

(3) Organizations may not be organized and equipped under the appropriate T/O&E.

3. Action Recommended.

a. Units be organized and equipped under appropriate T/O&E prior to entering unit training phrase of instruction.

b. That annex A, Weapons and Tactics Training Program be approved.

ROBERT L. WEBB
Lt Col., Infantry
Chief Training Branch.

Annexes: Annex A, Weapons and
Tactics Training Program.

Section 1.

General

1. Purpose -- The purpose of this program is to prescribe a course of basic training for trainees of the National Police Reserve who have completed their Basic Program prior to 29 January 1951. On this date, 29 January 1951, they will enter their Unit Training Program.

RESTRICTED

ANNEX-"A"

2. Scope -- The program is designed for progressive individual training in basic subjects. Emphasis is placed on weapons instruction, physical conditioning, riot and field formations, and the development of the qualities necessary in the National Police Reserve.

3. Modification -- a. The program may be modified to make the best use of existing facilities and training conditions. The general sequence of subjects, and the allocation of time to subjects will be preserved.

b. The training week will consist of 48 hours; this is based on 6 days of 8 hours each. Hours consumed in night training will be included in the 48 hour week, and time off will be allowed during daylight hours of the week.

c. Units that finish their Basic Training Program, and who will not complete the full 9 weeks program of the Weapons and Tactics Training Program, may start their Weapons and Tactics Program during that week which will best fit their Weapons Training needs; i. e. Field Artillery, Tank or AA units, who have only 5 or 6 weeks remaining, may start with the 4th or 5th week, where Infantry Rifle units would start with 1st week.

4. Methods of Instruction -- a. Emphasis will be placed on practical work as opposed to theoretical instruction. Every effort will be made to insure that instruction is carefully prepared and presented in an understandable, interesting, and dynamic manner.

b. Throughout all training periods the necessity for such training and the application of prior instruction to current training should be stressed. Instruction in a subject once completed must not be forgotten, but should be applied whenever possible concurrently with other training. Likewise, to the fullest extent, the actual application of the subject and the importance of teamwork and cooperation will be stressed. Every effort should be made to introduce realism in training.

Maximum use will be made of competition to stimulate interest in training and for the attainment of the best possible standards of performance.

5. References -- a. As listed in paragraph 12.

b. Several methods of instruction are employed, but it must be borne in mind that application by the student is the most effective way to drive home instruction and must be utilized wherever and whenever possible. The coach and pupil method of instruction will be applied in all instruction.

c. Graphic Training Aids are easily adapted to a variety of training purposes. Many are designed for use in conferences and demonstrations, others can be posted for review purposes and for self-instruction by individual trainees.

6. Supervision -- a. The quality and thoroughness of training is directly proportioned to the amount of active and personal supervision rendered by all supervisors and their staff. Continuous observation of instruction should determine how well training is being accomplished and insure only the best methods of instruction.

b. All supervisors and their staffs will exercise constant and active supervision of instruction in the training areas. Administrative work will not be permitted to interfere with the primary mission of training.

7. Progress Records -- A record of the status of training of individuals will be kept as prescribed later by this Headquarters.

8. Inspections and Tests -- There is a close relationship between inspections and standards. Inspections determine the progress of training and should indicate the training which must be stressed to attain the desired standards.

Progress of the individual in attaining minimum standards will be determined by observation of training and by tests. In subjects such as marksmanship and physical training, the tests are included in the scope of training.

9. Safety -- Realism in training can be achieved without sacrifice of essential safety factors. Common sense is the basis of safety in any training program. Most accidents attributed to training can be prevented by proper supervision and inspection of equipment and training facilities. The firing of weapons will be governed by provisions contained in instructions published by this Headquarters and disseminated to the units.

10. Training Missed -- a. Training missed by trainees will be made up only insofar as to permit such trainees to attain the minimum objectives set forth for those particular subjects. If an individual has missed part of a subject, he need not be required to take makeup training if he can attain the necessary minimum objectives without this additional training.

b. References -- The paragraph references listed in paragraph 12, for each subject, are listed as a guide only, and should not be considered as being an ironclad sequence for instruction, but may be varied according to the conditions under which the instructional material is presented.
