To Col Payton
D/—

TOKYO-TO HEADQUARTERS
NATIONAL RURAL POLICE March 23, 1951

To : ~~Lt. Todd, Counter Intelligence Corps~~
: Lt. Johnson, Kanto Civil Affairs Region
: ~~Mr. Sumida, Office of the Special Investigation~~

Subject : On the Preventive Measure and the Condition of the Smallpox.

1. Sourse

1. SAITO, Asaichi, 19, a factory worker of Kitasuna-machi, Koto-ku, contracted the disease on March 13, and his case was diagnosed as black smallpox on 18th. He died at 17:30, on that day.
(The sourse of the disease are not revealed yet.)

2. Measure for the disease.

Fukagawa and Joto Health Center immediately gave preventive vaccination to residents in the vicinity where the victim had lived. Compulsory vaccination has been ordered for all residents of the ward.

3. Foreseen.

Around the end of March is the time when ~~the~~ smallpox possibly occurs. If any, only one are expected to ~~be~~ contracted the disease.

2. Another sourse of the infection.

1. U.S. fright "Virginia" had left Oakland and came to Shibaura on March 3. All crews landed, and 2 of them had felt headache. One of the 2 walked around Ginza Street, and March 7, he was diagnosed as smallpox by Yokohama 155th Station Hospital, and the victim died on March 9. ~~Both~~ the others ~~are~~ unknown.

2. Measure for the disease.

Residents in the jurisdiction of Chuo, Shiba, Shinagawa, and Omori Health Center are compulsorily vaccinated.

3. Foreseen of the infection.

Now is the time when the 2nd victim is expected to be infected. But no reports are submitted yet, as of March 20.

Remarks : Saito's case has nothing to do with the "Virginia".

Welfare Ministry instructed to the governors of all the prefectures on March 3, as follows:

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

1. Vaccinations shall be enforced to the followings preferentially.

A. Those who have connection with imigration affairs from the continents.

B. Street girls.

c. Those who living in Yokohama, Maizuru, Kobe, Fukuoka, and Nagasaki city.

The number of the victims infected and died are as follows:

(as of March 20, '51)

Name of prefecture	No. infected	No. died
Fukuoka	31	4
Hyogo	13	1
Tottori	3	1
Aichi	1	
Okayama	1

KYO-HO-TATSU NO. 17

DATE : January 30, 1951

TO : Chief of Civil Education Section, KCAR

FROM : KAWASAKI, Shuichi, Superintendent of Education, Tokyo-To Board of Education

SUBJECT : Report on the Mass TB Cases in the Itabashi 4th Primary School

This is to report to you on the facts disclosed by investigations conducted concerning the reported mass TB cases in the Itabashi 4th P.S.

1. Conditions of the school:

Itabashi 4th P.S. is a war-damaged school with 1628 children and 38 teachers and it is still having a double session system for the children under 4th grade.

2. Development of the case:

(1) All the pupils of the school had a tuberculin test, July 12, 1950, under the supervision of school physician HATTORI, Isamu. Following is the percentages by grade of those having ~~the~~ positive reactions:

1st grade	12.3%
2nd "	25.7%
3rd "	27.0%
4th "	28.9%
5th "	38.7%
6th "	40.5%

To compare the 5th class of the 2nd grade which is said to have shown an abnormally high percentage of positive reaction the percentage of each class of the 2nd grade will be given below.

Class	Enrollment	No. of children showing positive	Percentage of the positives
1	47	9	19.1
2	47	9	19.1
3	46	12	26.1

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Class	Enrollment	No. of children showing positive	Percentage of the positives
4	48	9	18.8
5	45	23	51.1
6	43	9	20.9
Total	276	71	25.7%

Those children that showed the negative reaction in the test got BCG inoculation.

(2) As the percentage of the children having the positive reactions was so abnormally high that each of those 23 children of 2-5 class took a X-ray indirect examination at a health center.in July 1950, and they were all reported to have nothing wrong with their bodies. However, it was later found that TAKEDA, Noriaki escaped the physician's notice.

(3) Sometime in November, 1950, the pupils all took a X-ray indirect examination and a total of 48 pupils were found questionable, 32 of which needed more close examination while 16 others needed constant care. In the 2-5 class in question 7 were found questionable, 4 of which required thorough examination and the remaining three constant care. It was at that time that TAKEDA, Noriaki was found to be a TB (open) patient.

In December 1950 each of the 7 questionable pupils of the 2-5 class had his or her X-ray picture taken at the health center, results of which will be given in the following table.

	Name	Age	TB conditions	Steps taken
1.	SUGIE, Yoshimi	7	TB of hilum lymphatic gland	Under treatment at home
2.	TAKEDA, Noriaki	7	Open TB with a cavity	"
3.	SATSUKIME, Setsuko	7	TB of apex	"
4.	OMARU, Tatsuo	7	Needs constant care	Present at school
5.	YAMADA, Kazuko	7	"	"
6.	TAWARA, Toshie	7	Not examined because of his parents' lack of understanding	"
7.	SUDO, Sakae	7	Needs constant care	"

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

In addition to those mentioned in the preceding paper the following two pupils have been absent for a long time.

8.	KATO, Yoshi	7	Pleurisy	Absent since last August.
9.	SAIDA, Mitsu-nobu	7	"	Absent since last December.

3. Teachers' physical conditions:

All the teachers took the TB test in November 1950.(at the expense of the Metropolis), but no one was found questionable. There is one TB teacher who has been away from school since January 1949. She is MIZUTA, Tatsue, 26 years old, and before she left school she had been taking charge of 6th grade pupils who were already graduated.

IRIE, Shigeko,21, who is in charge of 2-5 class showed a positive reaction in the tuberculin test and nothing wrong was found with her body in the last TB test. She has been taking charge of the said class since 1st grade.

4. Concerning TAKEDA, Noriaki:

According to the teacher of his class he looked fine and cheerful, and did not show any sign of sickness, taking active participation in the study, too. His father keeps a macaroni-shop. He has father, mother, and three sisters, and they are all in good health.

5. Comments:

That the 2-5 class showed an abnormally high percentage as many as 48.9% of positive reaction in the tuberculin test and has 5 TB patients and 3 requiring constant care shows clearly that some of the pupils caught TB in class. There is no room for argument that the case is mainly attributed to the fact that a child of open-type TB was left unnoticed among the healthy children. It is worthy of notice that almost all the pupils whose seats were near the patient showed strong positive reaction in the tuberculin test.

6. Countermeasures (plan):

An adequate anti-TB program for school children is the key to the solution of national TB issue; there is no question about it. Spread of TB since the end of the war has been beyond our imagination. We are afraid that such a very unfortunate case as seen in the case of the Itabashi 4th P.S. will break out again in another school. We should take appropriate measures immediately to protect school children

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

from TB attack, for they are most sensible to it. We should carry out the follwwing measures at the expense of the Metropolis.

(1) TB test to pupils and students

a. Tuberculin reaction test
b. Inoculation of BCG
c. X-ray examination
d. Other close examination

(2) Teachers should undergo thorough medical examinations and TB test.

(3) Improvement of medical facilities.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

教保発第　号

昭和26年7月　日

関東民事部教育課長　殿

東京都教育委員会教育長　川崎周一

板橋第四小学校における結核調査について

報告

板橋区立板橋第四小学校において児童の集団的結核発生があるとの聞込みで調査を行つた結果を次の通り報告する

一、学校の概況　児童数1628人　職員数38人を有する単式学校で全校一部授業を行つている

二、事件の経過

一、昭和26年6月20日全児童のツベルクリン反応検査を実施した　実施に当つては事前に

その結果学年別ツベルクリン陽性率は次のような成績であつた

1学年 20.3%　4学年 28.9%

2学年 20.7%　5学年 37.7%

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

3歳年 2%台 6歳年 40.5%

特に0歳年令組の児童に陽性者が多かったということで
2年児童について比較すると次の通り

組	人員	陽性者	陽性率
1	41	9	19.1%
2	47	9	19.1
3	46	12	26.1
4	48	9	18.8
5	45	23	51.1
6	43	9	20.9
計	276	71	25.7

「3」陽性者ノ1ニ人に対してもBCGを接種した

(2) 昭25.7. 2歳年令組の陽性率が異常に高いので
陽性者23名に対して特にレントゲン間接撮影を実施
した(保健所) ところが保健所の判定で全員
異常なしと報告された しかし当時武田紀明昭
学園に異常が有ったり保健所で見落したことが
後で分ったのである

(3) 昭25.11. 全児童のレントゲン間接撮影を実施した
(保健所) その結果 精密検査を要する者32人

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

(要注意者16人、計42人の有訴見者が発見された
その中で3学年5組からは更に精密検査を
要注意者3人 計9人の有訴見者があり この時はじ
めて武田純昭の結核が見出されたのである
(4)昭25.10.3学年5組の上記9人について特にレントゲン
直接撮影を実施した(保健所) その結果次の通り
である

1. 杉江淑美(9才) 肺門淋巴腺結核 自宅休養中
2. 武田純昭(9才) 開放性結核 定期有 〃
3. 五月女節子(9才) 肺炎疑陽 〃
4. 大熊重夫 (9才) 要注意の程度 出席
5. 山口和子 (9才) 要注意程度 〃
6. 田原利夫 (9才) 家庭の都合により未検査 〃
7. 須永栄 (9才) 要注意程度 〃

以上のほかに長期欠席者が2人ある
8. 加藤よし (9才) 肋膜炎 5月以降欠席
9. 富田光信 (9才) 肋膜炎 4月以降欠席

3. 教職員の健康状況
昭25.11. 教職員結核検診(精密検診)を実施した
が全員異常を認めなかった

東京都教育庁

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

長期休養教員(病名 肺浸潤)休養前の役持は6学年で現在は学業している

2学年5組の担任教諭入江繁子(21才)は「ツベルクリン」反応は説陽性で結核検診の結果レントゲン所見に異常を認めなかったが又この組は1学年の時から持上りで担任している

4. 武田紀昭(12才)

平素は短る元気な子供で学習活動も明朗で病気と思わせる陰影は全く見られなかったと担任教諭が物語っている 又家庭は零細な加工業でうどん屋を営業している. 家族は両親と姉2人妹2、で5名共に健康であるという(保健所で推薦)

5. 考察

2学年5組の「ツベルクリン」陽性率は5.9%は異常に高率であるばかりでなく結核と診断される児童が5名と要注意若干名が見出されたことは明らかに教室内感染のあったことを思わせるもので又これが原因は5この組だけを有する前校地結核患者が発見されずに健康児童と混在していたことが

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

No.

最大の影響であったことは疑いの余地がなく
とかくこの患者の席に近い周囲の者がツベルクリン」強陽性を示していることは注目すべき事実であろう。

6、対策(案)

学校結核対策は国民結核を解決する重要な鍵であることは今更論ずるまでもないところである、
敗後の結核蔓延は想像以上のものがある 杉村
牙田小学校で発見されたような不幸な事例が他の学校でも起るであろう危惧がある。
結核に対して最も感受性の強い児童を保護するために早急に対策を講ずべきである
対策としては次の諸事項について都費負担をもって実施すべきであると考える

1、児童生徒に対する結核検診の実施
a「ツベルクリン」反応検査
B BCGの接種
C レントゲン検診
d その他の精密検査

2、教職員結核検診の強化徹底

File D

Mass Occurence of Dysentery Cases in Suginamai

Location: SANYA-CHO, Suginamai-ku

Number of Patients up to 20th of June: 23

under 9 years old	8
10 - 19	3
over 20 years old	12
	23

Male	12
Female	11

Source of Infection:

1. After investigation it was found that a fish store in Sanya-cho, TANAKA, Kanjiro, has sold "Sashimi" to the people.
2. Most of the patients have eaten the "Sashimi" bought from the fish store.
3. However the fecal examination of the fish store family was negative. Now the 2nd examination was under investigation.
4. The most of the patients have bought the "Sashimi" from the fish-store about 10th or 11th of June and claimed diarrhea on 12th to 20th of June.
5. Dr. Okuyama, who has investigated the cases, thinks that the fish was contaminated.

Hospitalization:

Up to now 16 patients were hospitalized in TOYOTAMA Hospital
and 7 " " " " KAWAKITA "

Type of Bacteria:

Up to now it was found only 1 case of KOMAGOME B3 at Toyotama Hospt.
and 1 " " Kawakita "

Control Measure:

1. The fish store was instructed to close for 1 week
2. The wells in the vicinity were disinfected.
3. Disinfection of Toilets of the patients houses.

Through: Liaison Office, Tokyo-to
Subject: On-the-street TB Examination for TB Prevention Week

1. Competent Authorities

Sponsored by: Anti-TB Association
Supported by: Preventive Medicine Section, Health Bureau, Tokyo-to

2. Date

October 25 - 31, 1950(10 a.m. - 4:30 p.m.)

3. Where On-the-street TB Examination Performed

Sukiyabashi Park

4. Detail

On-the-street TB examination, designed for anti-TB public education as well as for TB prevention and early case-finding, was performed as the main function for the week. The examination includes:

(a) Tuberculin tests(with 232 persons tested)
(b) BCG immunization(with 40 immunized)
(c) Sedimentation tests(with 126 tested)
(d) X-ray photographing(direct and indirect; with 374 exmined)

5. Results

Refer to the attached sheets.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Curo

Report about two T. B. cases.

Dr. Koda, Shitaya Hospital reported to-day (30 Oct. 50) as follows:

So far no germ is found in sputum of Mr. Tanaka Yoshiro and Mr. Kitayama, Hisayuki.

Blood sedimentation rate:

Tanaka		10 M. M. per 1 hour
Kitayama	1.25	" " " " "

Both have a permission to leave the hospital. After leaving the hospital they have to have pneumothoro~~x~~ once a week.

Their X-ray pictures were taken on 25 and 26 of Sept. '50. Fluroscopic diagnosis were done on 26 Oct. Nothing wrong was found.

This message relayed to Capt. St. Paulo, General Dispensary Tel. 57-8243 on 30 Oct. 1950. Two patients are employed by General Bock.

30 Oct. 1950

KCAR PH Form S-2

Special Campaign Report

August 24, 1950

To : Public Health Section, KCAR
From : Health Bureau, Tokyo-to
Through: Liaison Office, Tokyo-to
Subject: Execution of Mass Examination for Areas of Prevalence of Trachoma Cases

1. Jointly sponsored by:
Health Center 2nd Division, Preventive Medicine Section, Health Bureau, Tokyo-to and Edogawa Health Center

2. Under:
Article 4, Trachoma Prevention Law

3. Date: August 14 and 15

4. Where examination performed:
Kasai 2nd and 3rd Primary Schools in Kasai Detachment district of Edogawa Health Center

5. Purpose:
Prevention of further prevalence of trachoma cases

6. Results:

a. Kasai 2nd Primary School August 14

Group	Severe	Slight	Suspect	OK	Total
School (primary)	8	27	19	130	184
" (secondary)	1	5	4	15	25
Industrial	0	1	0	3	4
General public	4	10	8	33	55
Total	13	43	31	181	268

b. Kasai 3rd Primary School, August 15

Group	Severe	Slight	Suspect	OK	Total
School (primary)	15	44	5	78	142
" (secondary)	7	8	1	20	36
Industrial	2	15	7	98	122
General public	21	54	11	167	253
Total	45	121	24	363	553

7. Total results:

Group	Severe	Slight	Suspect	OK	Total
School (primary)	23	71	24	208	326
" (secondary)	8	13	5	35	61
Industrial	2	16	7	101	126
General public	25	64	19	200	308
Total	58	164	55	544	821

Morbidity.....33.73% (277/821)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Date: 31 July 1950

From: Tokyo-to Preventive Medical Section

To: P.H. Section, K.C.A.R.

Subject: Mass Outbreak of Dysentery

Place: 10-1, Minami-Senju, Arakawa-ku, Tokyo

Dormitory of Dai Nippon Spinning Mill, Tokyo Factory

Number of Patient: Female mill-hand 54

Male " 1

Date of Outset: Became clear on 25th July 1950

Confirmed on 27th July 1950

Source of Contact Tracing: The water used is drawn up to a tank from a well and comes out from the mouthpiece. The toilets are flush type ones. The land is generally low and was oftenly covered by the sea-water. And this seems to cause the corrosion of the tube. The water-supply was cut off on the 23rd, 24th of July. And the water seems to be contaminated.

The Preventive Measure:

a) The patients were isolated to Toshima Hospital

b) Disinfection was done to the dormitory

c) We are inspecting the water quality

d) Disinfection of the water (by Cl_2)

e) Research of bacilli-carrier done by inspecting the feces of lodging people.

The Oversight of the Future: More outbreaks expected.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Date: 31 July 1950

From: Tokyo-to Preventive Medical Section

To: P.H. Section, K.C.A.R.

Subject: Mass Breakouts of Typhoid

Place: No.18, Sumiyoshi-cho, Nakano-ku, Tokyo,
Dormitory of Mitsukoshi (1st and 2nd floor are specially used for families. There are 30 families containing 150 persons.)

Number of Patient: 16

The First Outbreak:

Name of the Patient: Tanikawa Miyoko ..... 26 years old

Outset: 17 June 1950

Confirmed: 24 June 1950

Source of contacting trace:

Situation of the building: The water is drawn up to a tank from well, and supplied. The tdlets are flushing type (type of the Department of the Home Affairs.) The cause of the outbreak seem to be that the lodging peoples were using the same lavatory, cooking place and etc. during the incubation term of the disease.

Preventive Measure: a) Isolated to Toyotama Hospital

b) By cooperating with Nakano Health Center, disinfection of the dormitory, preventive injection, disinfection of the water, researches on the bacilli-carrier was done.

Oversights in the Future: There are dangers of outbreak yet.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775 013

Translation Tokyo to file

Subject: Report about a outbreak of scarlet fever.

1. Location

The Hanabata Primary School,
3689, Hanabata Town, Adachi Ward.

2. Number of Patients

11 cases: from 1 May to 3 June

3. Recent condition of the school

1) Number of The Pupils

boy	494
girl	499
Total	993

2) The Last School Excursion

On 14th, May	6th year class	To Nikko
On 19th, May	5th year class	To Enoshima
On 22nd, May	1st year class	To Matsudo
On 26th, May	2nd year class	To Shinjuku-Ghoen
On 29th, May	3rd and 4th year class	To Yazu

4. Condition of occurrence.

The first patient was Miss Yoshie Yoshida, 10 years, 1st class of 5th year. Her onset was 1st, May. After it, no case was reported for 17 days. On 18th May, the second case occurred and since then, as attached note, many cases occurred scatteredly in children of every year class but 6th year class by a few days. Till 3rd, June, the number of the case counted 11. The symptom is not serious and first case was discharged on 22nd, May already. There are 4 cases in Hanabata Town and neighbour Town and they are not school-children.

5. Summary of the symptoms.

Generally speaking, sysmptoms are slight. In a few days, after the onset, the eruption run its course. The fever drops to normal after 4 - 5 days' and disquomation is fine and powdery in all regions of body. Many cases show pharyngial symptoms and characteristic strawberry tongue. There is no case that complains stomach-pain, diarrhea, vemitting or such symptoms of disturbance of digestive organ. No case complain of myalgia nor arthrogia. Streptococcus haemolyticus is position in all patient.
