ROCHESTER INSTITUTE OF TECHNOLOGY

ROCHESTER, NEW YORK

TECHMILA 1957

CONTENTS

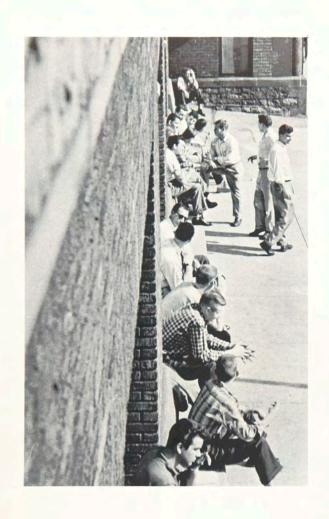

The men and women of RIT exemplify, by their own individuality, the spirit which guides this institution. To be part of RIT is to be part of the challenge of difficult classes, the excitement of campus organizations and athletics and the fun and experience of making and keeping friendships.

In this edition of "Techmila," we attempt to portray student life at RIT through the medium of a pictorial essay. Come with us then, as we recall some of the familiar scenes around the "asphalt" campus that is RIT.

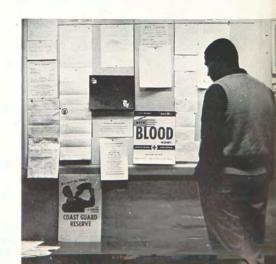

Many ideas and opinions are exchanged by students possessing different backgrounds and interests. Perhaps it is this individuality which gives RIT its luster. Being from all parts of the world and from many different states, their courses of study within the various departments of the Institute lead them on widely differing paths of knowledge. Here is a maze of classrooms and laboratories, the student begins his journey into the technological world. He gains the experience of putting theory into practice. Equipment becomes not an idle form but the tools for him to command.

From the classrooms we go to the swift pace of campus life. Here the students are thrown into constant jarring contact with new ideas and the thoughts and goals of their fellow students. Here we receive our social education.

It is my privilege on behalf of the faculty and staff of the Rochester Institute of Technology, to congratulate and extend best wishes to the members of the Class of 1957. As we look into the future, we are confident that each of you will find opportunities for constructive careers in your chosen occupations.

During the years of your student life at the Institute, you have witnessed many changes, both in the expansion of educational facilities and in the extension of our educational program. Amid such changes, educational institutions have peculiar and unique functions. They must lead the way into tomorrow, helping their students to achieve the knowledge and the skills that will best fit them for command in their chosen occupations. At the same time they must guide the students to an understanding and appreciation of human value. Without such understanding, technical accomplishments would lack significance.

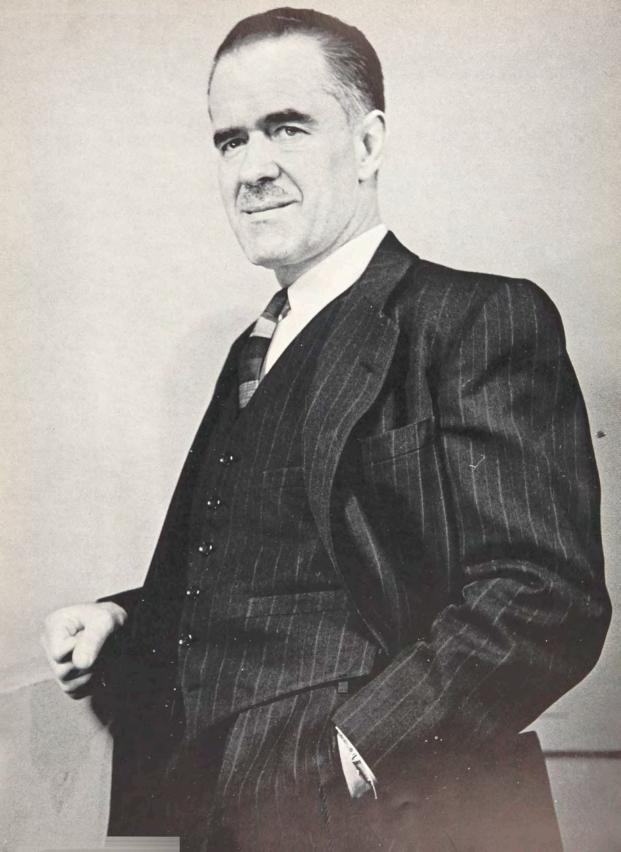

We at the Rochester Institute of Technology are proud of the record of our institution in fulfilling these responsibilities. We are prouder still of your active participation in our forward-moving program. As Alumni I urge you to take responsibility for adding to your personal stature and that of the Institute by becoming creative and productive citizens of your community. The worthiness of the Institute's program will in the future, as in the past, be judged by your competence and by your participation in worthwhile activities. I know that we can count upon you for fine performance in all of these areas. I would like to extend my very best wishes to you as you enter new fields of endeavor.

President's Message

Dr. Leo F. Smith Dean of Instruction

The administration is represented by many people in varied jobs, all with the purpose of seeing that the students of RIT are adequately prepared to meet the challenges offered in competitive society.

Our administrators are people who are active and do not merely sit at their desks behind closed doors; they eat in the same cafeteria, walk the same halls and give the same friendly greetings that students give to each other.

Frederick J. Kolb Bruce J. Partridge

Burton E. Stratton

ADMINISTRATION

Margaret S. Vetter Robert H. Tollertan

Harry E. Rider

Marion C. Steinmann Thomas Strader

In their search for better teaching techniques and a fresh approach to education, they engage in conferences and discussions with educators from different educational institutions. This helps to broaden their outlook and keep abreast of the changing times.

This department is constantly confronted with problems that have great bearing on the lives of the students of RIT. The decisions, policies, and procedures that eminate from this department have a unifying effect. They help to provide the proper balance to an educational system that has proved its results by the school's present high caliber of student.

No doubt we have seen some of these people at the various activities on campus and at the freshmen assembly where the meaning and the functions of RIT were explained. Perhaps it was then that we realized these educators are our friends and show a warmth and understanding that will not fade from our memory. We appreciate the closeness of our administration between our faculty and students.

Robert F. Belknap

DEPARTMENTS

GENERAL EDUCATION

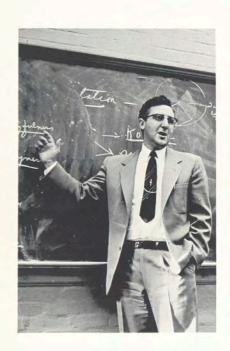

In our departments we learn specific occupational skills. In the General Education Department we expand these skills to cope with the non-technical problems which occur in every-day life.

If we are to participate effectively and satisfactorily in a democratic and technological society, we must be more than mere technicians — we must develop proper attitudes, responsibilities and the capacity for intelligent and effective thinking. We become familiar with such varied and diversified subjects as economics, psychology, effective speaking, sociology, and a host of other general education subjects, all aimed at emphasizing the importance of social understanding and capability of expression. From our study emerges an awareness of the significant aspects of our modern society. We become more fully aware of the economic and social currents of our culture. We understand the forces that have given rise to and directed these currents and can more fully appreciate the present rivers of thought which are carving out new channels.

General education is not merely a meaningless term applied to an aggregate of seemingly unrelated subjects—it is the tool whereby every student in the technical departments is aided and guided in developing fully the resources he has acquired in those fields.

It has been said, "No man lives unto himself alone."

Every individual labors with his fellow millions in the great human community, sharing in the fruits of the past—striving with them to improve the future. In order to reap the greatest benefits from our labors and contribute significantly to the good of the group, each of us must realize the role we play in the vast cooperative effort that is progress.

Although we have chosen specific areas of study and are eager to become proficient in these areas, we are nonetheless, part of a group society. We soon begin to realize that the world is more than a place of technicalities — it is a multitude of many things that help integrate our technical knowledge into comprehension. This will shape our future.

If we are to exert our fullest influence, we must express our thoughts and opinions with vigor, clarity, and the precision that is not possible by merely possessing technical knowledge.

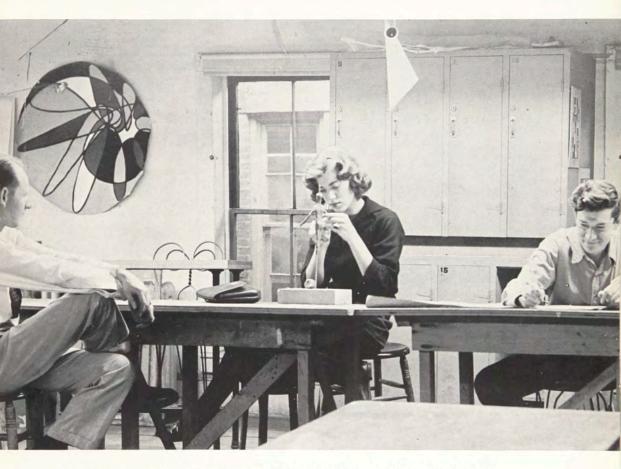

AMERICAN CRAFTSMEN

The School for American Craftsmen possesses many hands belonging to students who are learning the intricate skills required by exacting trades. These are sensitive hands, strong sure hands, quick deft hands — all learning the thrill that comes from creating objects of beauty and utility. There are within the confines of this school, a wide range of activities that reveal a great variety of methods and uses for materials. The finished products show a consistency of esthetic appeal, a devotion to craftsmanship and an expert knowledge in the handling of materials that is the hallmark of any craft or trade.

Possibly more than any other factor, it is a devotion to craftsmanship that has prompted these people to give original expression to their creations so that lifeless pieces of material may be transformed into works of art. Whether it is in the hand arts of woodworking, textiles, ceramics or metalcrafts, no higher level of distinction may be found.

Daniel Mortell, Richard Gibson, Lois Young, Grace Quimby, Pat Banks, Christiana Mayer, Curtis Ivey, Sam Ciccia, Michael Jerry.

ART and DESIGN

Artists – utilizers of color, line, form, texture, shape. Integration of these elements by imaginative minds creates masterful patterns that convey meaning. The creative artist executes these elements with competent, well trained hands thoroughly indoctrinated with the various techniques available to him. Through the various mediums at his disposal, the creative artist is able to convey his hopes, his theories, his aspirations, his desires. Through such expression he may well ignite a train of new thought, help to sell a piece of merchandise or satisfy the innermost longing of millions. Raw materials are integrated with an innate esthetic sense and appreciation of good design to create favorable reactions. The human eye is the main physical avenue through which we comprehend all objects. Through this avenue, the creative artist is able to lend expression to impressions, reactions and ideas created in the mind. Through the mind he is able to envision new concepts, the success of which does not always depend upon the use of implements.

In the Art and Design Department the student receives skillful and effective instruction in the fundamentals of illustrative and advertising art, as well as in attractive design. Instruction in these areas leads to the development of the student's fullest potentials for artistic expression. Through his designs, we see proof of the artist in action. A feeling of accomplishment permeates the annual exhibit where acknowledgment is given for a job well done.

CHEMISTRY

Chemists are people who take the raw elements of mother nature and rearrange them to enrich the life of all mankind and help fill its needs. In pursuing the goals of his earliest ancestors, the chemist has achieved myriad compounds of infinite worth. There is hardly an area of human existence that is not enhanced by the accomplishments of these people who are constantly searching for positive results in their labors.

In the Chemistry Department, we may witness students actively engaged in experiments amid a maze of complex glass tubing and bubbling flasks—in an atmosphere of strange odors—delving into the wonders that nature has provided for us, seeking to substantiate the theory that has been expounded upon in lectures. The chemistry major possesses great curiosity. This desire to delve into the realm of the unknown is stimulated by expert instructors in the field who provide the impetus for continued study that finally results in success for the student.

The many activities represented in the field of commerce touch closely upon our every day lives. Millions of transactions are consummated daily by men and women of far-sightedness and decision. There is a never-ending flow of goods and services that make up our industrial and economic system and this flow must be speeded by competent people who utilize modern business techniques. The world's commerce is strongly competitive and highly complex in nature. It depends upon thousands of people possessing special skills and managerial talents. In all of these people there must be alertness, speed, accuracy — an understanding of the economic roots of which the tree grows. Above all they must understand the human values which sustain and nourish the tree.

Efficient, smooth operation of office procedures contributes substantially to the success of every type of business and profession. The Commerce Department provides the student with the highest caliber of training aimed at surmounting the great responsibilities encountered in the complex world of business.

ELECTRICAL

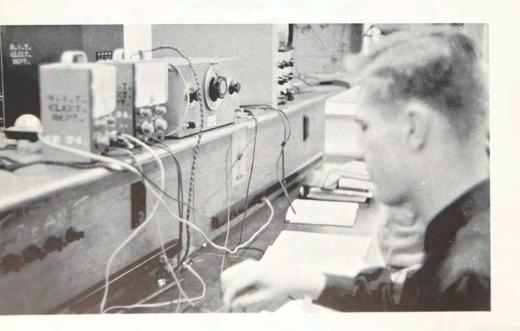

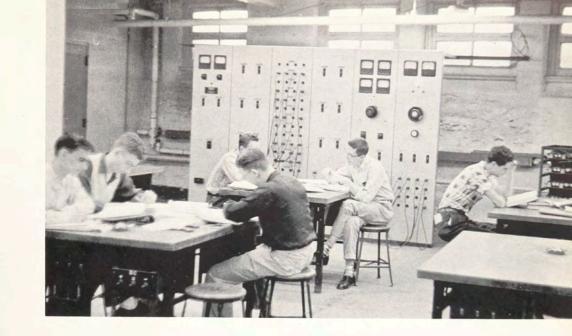

From research to finished product, electricity serves us in virtually thousands of ways every day. Electricity powers our mighty industrial machines, illuminates our progress, helps us to communicate with the speed of light, solves the most complex and intricate mathematical problems and aids mankind in untold ways.

From the early discovery of magnetism in Asia Minor, man has constantly strived to add to his knowledge of this universal force. Although we do not fully understand electricity, we use it familiarly and have built a vast technology upon it. We have learned how to control it accurately in varying quantities, how to send it where we will, how to manipulate it to do our bidding. Thus the infinite field of electronics is one of the most challenging and possibly the most rewarding areas of science. The Electrical Department has developed a tradition of serving the future — of stimulating and developing students to question, to experiment, to explore beyond what is already known.

FOOD ADMINISTRATION

Most of us realize the importance of food for the preservation of the human body's energy and growth. We recognize it as the prime necessity of life. But few of us realize that to a large extent, our health is in the hands of dieticians, chefs, food managers, stewards and a large army of people who prepare food for consumption outside of the home. There are thousands of restaurants, cafeterias, clubs, hospitals, schools, and other establishments in this country that cater to the appetites of millions daily. From this we begin to realize that it is a tremendous responsibility to plan menus that are nutritionally adequate, to procure foodstuffs that are of satisfactory quality and to prepare the food in such a manner so as to preserve its vital elements.

The Food Administration Department meets these challenges by preparing students for these large responsibilities. Their proving ground is the school cafeteria and a well-fed faculty and student body attests to their success.

MECHANICAL

Machines are devices by which we multiply our own physical powers — the hallmark of our modern age. Machines that are massive and small, delicate and rugged, automatic or hand powered; precise instruments capable of measuring infinite light waves or the weighing of tons.

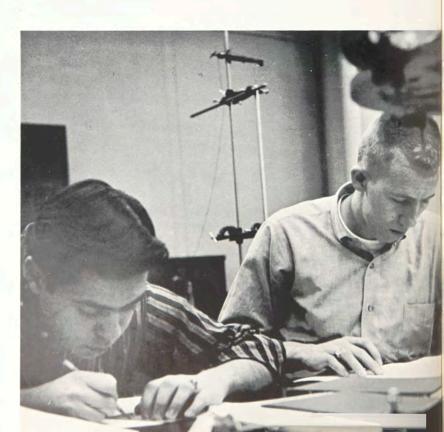

From these static and seemingly lifeless machines comes the knowledge that builds better machines firmly tested by experience of the past. Here then, fertile imagination that applies the performance to the present combines with a courage that will shape the course of the future.

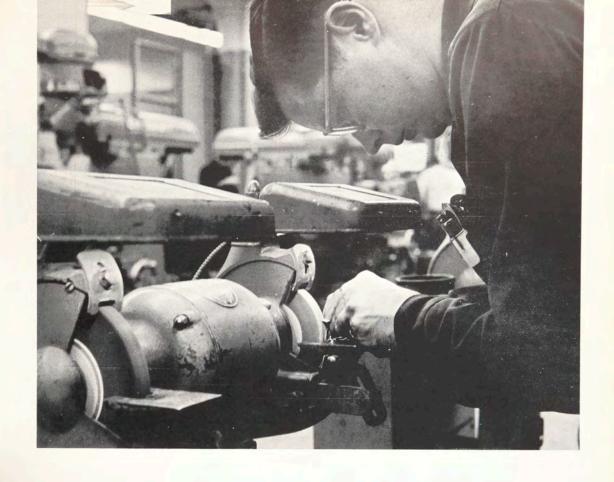

The students in the Mechanical Department are occupied in learning the "tricks" of their trade so that they may become the technological leaders of tomorrow. Impressive is the role that the equipment in this department plays. More impressive yet is the role that skillful instructors play in insuring that these students will take their places as far-sighted engineers of the future in an industrialized society — a society possessing newer and greater achievements in the realm of mechanics.

PHOTOGRAPHY

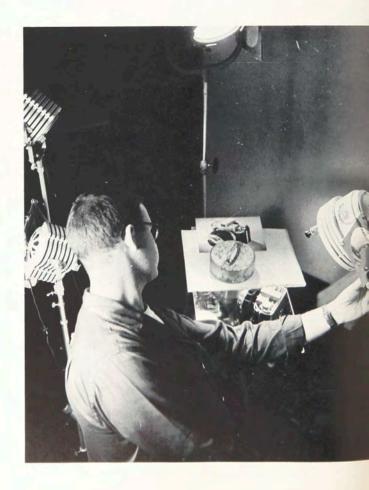

Photography is far more than a way of getting a picture of a baby. It is a means of recording and reproducing an image of anything that our eyes can see and many more that our eyes cannot detect—all captured in the light sensitive grains of a photographic emulsion to form a permanent record. The photographic student requires the sensitive eye of the artist and the technical ability of the scientist if he is to achieve outstanding proficiency in his chosen field. This department is fortunate in the fact that it is located in the photographic center of the world. It can, therefore, provide unparalleled facilities for the development of those talents.

Whether the student ventures into professional photography or photographic technology, he can be assured that he will have opportunity to learn, at first hand, the most recent developments. These developments may be applied under the tutelage of many outstanding instructors and experts in the field.

PRINTING

Benjamin Franklin once spoke of a printer's apprenticeship as "the poor man's college." The work of the printer is very interesting, very exacting, and very important. No other achievement has contributed more to the advancement of mankind. No other art serves more universally in all the activities of modern human endeavor. The development of commerce, the sciences, the arts, religion and government — all are made articulate through the assembled types of the printer. Although there may be some disagreement as to which process is the best, printers all agree that this ancient craft offers a secure and rewarding future. The demand for more, better and cheaper printing seems limitless. In keeping with modern industry, printing methods, materials and techniques are all in a constant ferment of progress. The Department of Printing houses the most modern presses, type casters and other equipment available to keep the student abreast of the latest developments in this, one of the largest of all industries.

RETAILING

It has been estimated that retail stores supply ninety per cent of all the things we need for the homes we live in, the clothes we wear and the food we eat. With this in mind it becomes apparent that buying, selling, layout and advertising, identifying fabrics, matching colors and hiring sales people can be an exacting and exciting occupation that makes critical demands upon qualified people.

To satisfy these demands and to cater to the needs of the public, the retail student must constantly be alert to the varied influences that affect trade. These young men and women must possess poise, self-confidence and a spirit of good nature so that they will be able to cope with the pulsating activity that exemplifies the retailing field. The Retailing Department has integrated a knowledge of the varied elements in the field so that the end result is a graduate possessing a rich source of knowledge for future advancement in a progressive industry.

ORGANIZATIONS

A college yearbook is a traditional thing. A college yearbook is a compilation of many traits including foresight, cooperation, careful planning, coordination of specific skills and above all, plenty of patience. Even though our delivery date was set for May, the editors met and planned Techmila during the summer months, at which time the organization of the book was outlined and preliminary work on the layout was

begun.

The tasks of the editors were defined early in the school year along with the basic design for Techmila. This afforded relative smoothness in operations through a visualization by each editor of where and how his function would fit into the scheme of the book. Difficulties were encountered in meeting our production deadlines but the problems that were encountered were solved with the firm belief that a yearbook is for the student body and should consequently, reflect their opinions and desires.

Many innovations were incorporated into Techmila, among them the use of the Duotone process of reproducing photographs and a special section dealing with social highlights of the year.

With subdued pride, the staff of the 1957 Techmila presents this latest contribution to the growing tradition that is RIT. We have earnestly attempted to show herein a capable use of the modern techniques in photography, art, and writing — devices which, when fused with the proper taste, make for sound graphic art.

Techmila

Joanne Taylor

A newspaper is a myriad composite of sounds. Giant presses roaring, typewriters clacking, telephones ringing, and the sound of the reporter walking his beat, all are part of disseminating information, thought, and entertainment via the printed word.

On the "asphalt campus," this unique position is filled by the "RIT Reporter." During the school year it has become an integral part of campus life. It has not only kept the students informed, it has become the conscience of a student body continuously searching for new activity on which to expend its energies.

In covering the Institute scene, the "Reporter" was capably directed by Rodney G. Brower. Through his efforts the paper found purpose and expanded to become a valuable asset to student life. His patience and long hours of work gave the staff an example for future years. During his editorship, he had the capable assistance of Arnost Blobstein who devoted a great deal of work to coordinating the efforts of the staff into a solid unit. The passing year saw many innovations in the "Reporter." Twelve-page issues with expanded pictorial coverage, a campus cartoon, press conferences with Institute notables, an election night party, and greater use of color emerged as outstanding features.

It has been a progressive year for the "RIT Reporter."

Student Council

The call, "Will the meeting please come to order," was sounded many times from September through May on Monday afternoons. In each case, it meant that the Student Council was meeting to discuss and debate issues concerned with the welfare of the Student Association. Many of the issues were the perennial ones: the student parking lot, the election system and the budget, to mention a few.

In an effort to bring the Student Council closer to the Student Association, members of the Council studied the social life of the Institute and took steps to strengthen it. Spring Weekend, the highlight of the social calendar, was again a successful project but with an added significance. As a result of the foresight of this year's Council, the proceeds of Spring Weekend were used to establish a Student Association Scholarship. Deserving students of the future will have the opportunity to gain a valuable education which might otherwise be unavailable to them. It was a zealous group who met each Monday afternoon and with the guidance of our faculty advisor, Mr. Robert Belknap, handled each and every issue in a mature manner.

126

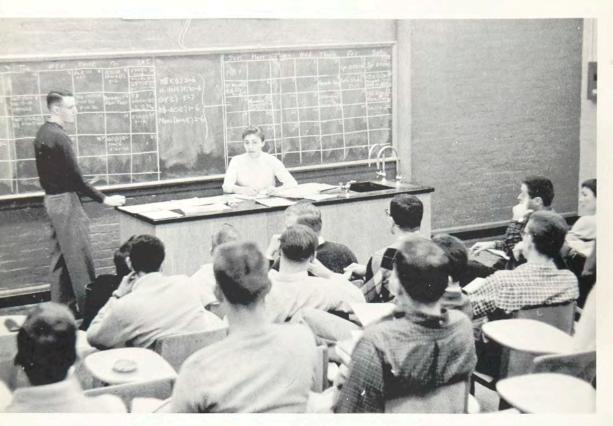

As this Council steps down and turns over the reigns to our successors, it is our hope that they will continue the high ideals which we have set forth. With this, "The chair will entertain a motion to adjourn."

Officers for the past Student Council year were: Robert D. Ball, president; Jane White and Olga Vangel, secretaries; and Mr. Robert Belknap, faculty advisor. Ably assisting the Council this past year was a group of Committee Chairmen, including: Frank Kowalski, Roger Anderson, Richard Bult, Roxanne Petersen, Donald Rickert, Mike Gotz, Al Rosetto, Joseph Ehasz, John Moore and Mike Schwartz.

Inter-organizational

Interorg is the main tool of communication between all of the organizations which make up the complex society of the Institute. Composed of representatives of the dorms, Greek letter and religious organizations, special interest clubs and departmental clubs, the Council met regularly throughout the year to cope with the social activity problems.

The responsibility of self-discipline was accepted by the Council this year, a vital part of democratic rule. The newly formed Advisory Board was a helpful guide to the Council during the year. This year, the organizations represented on the Council are to be complimented for their efforts in presenting a co-curricular program which was both interesting and rewarding.

The officers of this year's Council were: Bob Ball, chairman; Dorothy Mitchell, secretary. Members of the Advisory Board were: Roxanne Peterson, Zale Koff, Dick Baade, Jay Thompson, Roger Anderson, Pete Commanday, Connie DeCamp, Lewis Warner and Rod Brower.

Council

Barracks Association

From the beginning of school in the spring, the activity of the Barracks Association is centered around its newly decorated lounge which is maintained by the Association. It is here that the residents of 140 Spring Street may enjoy a relaxing moment in their busy schedules by watching a favorite television program, participating in a game of billiards, cards or just talking over a soft drink. Twice a year the welcome mat at the door of the lounge is shined up for an "open house."

This year's Barracks Association officers were: Lewis Warner, president; Alfred Olson, vice-president; Sal Schifano, secretary; Herman Peek, treasurer; and Bernard Marcus, Head Proctor.

Women's Residence Hall

Happy New Year in September? Well, at Kate Gleason Hall, the new year does start in September, accompanied by all of its typical confusion—loud "Hellos," as we saw old friends and met new friends and changed the building into our "home away from home" once again.

Life at Kate Gleason Hall is never dull and this past year saw the fruition of many activities of mutual interest for all Kate Gleason residents. From the beginning of the first quarter and continuing throughout the school year, functions such as pajama parties, frequent open house events, the annual "Dorm Formal," the dorm Christmas party, picnics and many other social events all helped to enliven and strengthen the bonds of community living.

Men's Residence Hall

The Men's Residence Hall, located at 102 Spring Street has been housing RIT male students since September, 1950. In these six years many men have roomed in the dorm under the capable supervision of the Men's Residence Hall director, Mr. Howard Simmons.

The constitution has been the main guide in the functioning of the dorm. With the acceptance by Student Council of our constitution we have become an active organization on campus. Some of the past functions have been: picnics, dances, song fests and coffee hours. This year, to discover the interests and desires of the students, the Student Interest Survey has been organized. The results will guide the leaders of the dorm for future plans.

The overall dorm operation is based on cooperation and council, designed by the Director, his assistant, proctors, and the dorm council.

Edgerton Park

Forty-nine apartments constitute the housing for married students at Edgerton Park. The problem of children and their relaxation has resulted in the formation of a nursery for the pre-school children, with the mothers taking their turns in the supervision of this two hour daily playtime. Baby sitting among the couples is usually a give-and-take proposition. Summertime offers weekend picnics; Winter ushers in basement parties and coffee breaks give the necessary relaxation from the routine of study. All in all, the residents of 9 Backus Street are a bustling, energetic community based on a great deal of cooperation. Only after the last bedtime story has been told; however, is it safe to bring out the textbooks and prepare for the next assignment.

The membership of the Religious Activities Association consists of the entire study body of RIT. Its purpose is to promote religious activities on the campus, create a better understanding of the different religions, and to promote social work and similar service to the community.

With the aid of our advisor, the Reverend Murray A. Cayley, RAA achieved new heights in success this year. A large part of our achievements is credited to the success of the Orientation Week Rally Supper at which the students were introduced to the religious life on campus and in Rochester.

In October, representatives attended the World University Service Conference at Cornell University. The third annual Brotherhood Week assembly was another activity of the Association. A Lox and Bagel breakfast opened the week long observance and a quarterly supper meeting, which met with increased success this year, was held at its closing.

The officers for this year were: Richard Baade, president; Michael Agrecky, vice-president; and Barbara Berber, secretary.

Religious Activities Association

Newman Club

COR AD COR LOQUITOR—heart really does speak to heart in the spiritual, educational, and social activities of Newman Club. At our first mass we packed the center aisle of Immaculate and even had fun cleaning up after communion breakfasts. Activities such as bowling, dancing, cabin, and skating parties; the impressive initiation ceremony, the tears at Communion Sunday when Father Zimmer celebrated his last mass as our chaplain; our anticipation while awaiting the appointment of our new chaplain, the excitement of meeting Father Hohman at a reception in his honor; the bulging eyes of little tots when Santa appeared; planning for National Cardinal Newman Day; the spring picnic and our meetings every other Monday all helped to fulfill our aims and enrich our memories.

Hillel

Hillel had a very successful and memorable year. Its membership doubled that of last year, as well as its activities. Hillel lived up to its program to provide a religious, cultural, inter-faith and social program for RIT's Jewish students.

On the religious front, bi-weekly Sabbath Services were held; while on the cultural side, the talks by Catholic, Protestant and Jewish clergymen were supplemented by movies and discussions. The Lox and Bagel Brotherhood Breakfast and an RAA dinner were our contribution to Brotherhood Week and to RIT's inter-faith program.

The social season began with a freshman picnic, followed by the Chanukah and Purim dances, the Travelogue and Latke party, cabin and swimming parties.

The RIT Hillel is one of 207 chapters sponsored by B'nai B'rith, the Jewish service organization. At RIT the group was headed by President Murray Merl, assisted by Tom Gutman, Sharla Klein, Ed Gross, Gary Lefkowitz, and Sy Wildhorn; with Mike Blobstein, Barbara Berber, and Phylliss Hinderstein, RAA representatives. Rabbi Joel Dobin served as counselor.

Broadened horizons of activity was a by-word throughout the year for the members and officers of the Student Christian Fellowship. This Protestant student organization's purpose is to promote Christian attitudes and to stimulate critical religious thinking. To this end, weekly supper meetings at the RIT Chapel included a worship service and a discussion program designed to provide answers to problems common to the college student. Guest speakers such as Dr. Dixon from the Colgate Rochester Divinity School and our chaplain, the Reverend Murray A. Cayley, helped us to discover our social responsibilities. The SCF was host to the fall dinner meeting of the Religious Activities Association. This event was attended by an overflow crowd from three campus religious organizations. The organization also participated in the sponsoring of the Brotherhood Week assembly and is affiliated with the Student Christian movement of New York State.

Weekend retreats at Silver Lake in the fall and spring for study of ourselves with respect to our Creator were well attended, as were all other activities of a strictly social nature, such as the successful weekly bowling parties, a hay ride, a square dance, and Sunday picnics when the weather permitted. The annual Christmas party and carol sing for shut-ins proved to be popular features in a most successful and rewarding year.

Student Christian

Fellowship

This chapter, organized in 1954 and reorganized this past year, is professional in nature and national in character. It has been said, we are "chips off the old block," three hundred chips in all, the block being the American Chemical Society. Our objective is to provide an opportunity for the students in the Chemistry Department to become better acquainted, to secure intellectual stimulation from professional association, to acquire experience in preparing and presenting technical material before chemical audiences, to foster professional spirit among the members, and to instill pride in chemistry and chemical engineering.

This past year, the Chapter initiated the presentation of a scholastic award to those graduating chemistry students who we felt should be given some form of recognition for their excellent work at the Institute.

Throughout the year, lectures, demonstrations and movies presented by guest speakers from industry and nearby educational institutions bring to light some of the more recent achievements in chemical technology.

Joint meetings with the affiliate chapters of neighboring colleges serve not only to increase the fellowship within the profession but also offer an opportunity for an exchange of ideas in programs and services.

Student-faculty meetings which have taken place for the last two years provide opportunities to discuss mutual educational problems.

Despite the technological aims of the group, the social amenities were not neglected and the successful year was concluded with a well-attended outing. Our officers for the past year were:
Robert M. White, chairman; Theresa M. Olsezewski, vice-chairman; Charles A. Bishop, social chairman; LeMoyne I. Day, secretary and Ernest R. Allan, treasurer.

American Chemical Society

This fall after an absence of three years, the Art Students League, with an approved constitution by Student Council, returned to the campus scene with renewed vigor.

One of the highlights of the year was the bus trip to the Buffalo Art Gallery with a tour and discussion of contemporary art. The Art Students League annual Christmas Party was a festive occasion with readings of favorite selections of appropriate poems by Milton Bond. With efforts to expand and to encourage a more active membership of all students, the League will continue to introduce a new outlook on activity in the art field. By broadening interests and introducing out-of-class participation in the activities of the League, the art student may gain a wider view of art in all of its phases—from advertising through the fine arts.

As the Art Students League grows in popularity it will gain a stronger foothold on our campus, bringing with it cultural appreciation to social events.

Art Students League

The R.I.T. Camera Club inaugurated its school year with the annual corn roast and ball game at Genesee Valley Park. The future photographers and technicians found a chance to experiment with their chosen vocation, to compete with others and to have fun with fellow classmates. Supplementing their school curriculum at various times during the year, the members heard lectures and saw motion pictures on the life of Edward Weston, opportunities in the illustrative field, the newest color materials and processes, portrait photography and other educational features.

A Christmas party was held which shall hold a prominent place in the minds of the photo students for many years to come. The starring attraction of the afternoon was the portrayal of the modern "creative" photographer and lab technician by the tech instructors and the illustrative instructors. Our thanks go again to Mr. Hattersley for his inspired efforts.

Later in the school year the Camera Club sponsored their annual "salon" and prominent men in the photographic field participated in the judging. Concluding the year's activities was the annual Camera Club Banquet at which time awards for the salon were given. A fine speaker addressed the group and entertainment was given to round out the evening.

Our thanks go to Mr. Bagby and Mr. Wilson for their guidance and assistance as faculty advisors. The officers for the past year were: Peter Bunnell, president; Eugene Lentz, vice-president; Joanne Taylor, secretary; and Arthur Pavelle, treasurer. Serving the committee heads were: Bob Porterfield, program; Richard Springs, entertainment; Robin Watson, refreshments and Richard Schmidt, publicity.

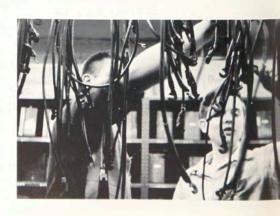

Electrical Students'

Although the Electrical Students Association is primarily a technical organization, it sponsors a general interest noon movie every Wednesday in the Eastman Assembly Hall which is open to all students. Each year the organization tries to bring to the Institute several demonstrations or lectures of a technical nature which will be of special interest to the electrical students. For the members there were two field trips, one in the power field and one in the electronics field. Monthly meetings are supplemented by group attendance at I.R.E. and A.I.E.E. meetings.

Future plans of the Electrical Students Association include the co-sponsoring of an annual event to be known as the "Engineers Ball" and an affiliation of the Association with one of the national electrical societies.

Ably directing the Association in the past year's activities were: Edward L. Martin, president; Dick Bauer, vice-president; William Ongley, treasurer; and Calvin Bailey, secretary.

Association

A new fledged member to the R.I.T. social scene arrived on campus this year — The Modern Jazz Society. In eight brief but swinging, music packed months, this Society has brought to the campus some of the coolest jazz ever heard in the environs of R.I.T. The members have attended some of the local "jazz corners" of the Rochester area and have thrilled to the playing of many of the best jazz musicians in the world.

The Society plans to bring top names in the jazz field, along with more of the local talent, to R.I.T. in the following years. As well as bringing jazz to the campus, the Modern Jazz Society will make numerous trips to see and hear these musicians at their public engagements.

The most important objective of the future is membership: membership of jazz enthusiasts who are interested in studying the finer aspects of this medium and who will be representative of this great American tradition.

Modern Jazz Society

Pi Club

With its membership among the largest on the RIT campus, the Pi Club has passed another milestone in its steady growth. The past year has seen renewed interest and an increase in the scope of social and academic activities. The two-fold objective of providing social activities and supplementary information to the students of the Department of Printing is reached through the holding of the annual freshman mixer which affords an opportunity for freshmen, faculty and upperclassmen to become acquainted; the annual Printing Week banquet; talks by leading personalities in the printing industry; demonstrations of new innovations; and through field trips to printing and publishing plants both locally and in other cities.

In the past year under the able direction of Willard MacCalla and Marvin Polzin, the Pi Club constitution was written, accepted and published in booklet form. To augment the treasury, bookplates were designed by Don Lenhard and sold to the student body with Charles Reiner and Donald Volk as chairmen. Spring Weekend activities were enthusiastically participated in by the membership to make this year's event the most successful in Pi Club history.

The club officers for the year were: Howard Thompson, president; Bernie Lazorchak, vice-president; Charles Preston, recording secretary; Laurence Gould, corresponding secretary; Don Lenhard, treasurer; Dick Nally, education chairman; Dan Miller, social chairman; Bob Pazda, publicity chairman; and Mr. Richard E. Beresford, advisor.

Forensic Society

The Forensic Society finished its first year in a blaze of glory and out maneuvered its opponents verbally and logically to secure three tournament trophies and outstanding speaker's awards.

In October, the gavel called to order the annual Western New York Forensic League Tournament which was held at R.I.T. The classrooms resounded with the new national debate topic: "Resolved, that the United States should discontinue direct economic aid to Foreign Countries." The tournament activities for the R.I.T. society have increased markedly over last year, expanding our activities to include tournament competition with over one hundred twenty colleges and universities. In addition to these activities, R.I.T. debaters acted as judges for the various Forensic events in our local secondary schools. We wish to thank our officers and coach, Mr. Joseph Fitzpatrick, for a successful year, and we wish to express our appreciation to our graduating President, Robert Ball, for his outstanding accomplishments for the past two years.

Choraliers

"Alma Mater day by day
We strive to hold thine honor bright"
These familiar strains are heard at the opening
of the Christmas and the Spring Concerts
presented by the Choraliers.

This year the Choraliers not only worked for the concerts, but also did choral work for the various clubs, organizations, and civic events in Rochester. Thus, the Choraliers which is the official singing group of RIT, is not only becoming a well-known name in the community but is constantly striving to "hold thine honor bright."

Every Tuesday and Thursday at five o'clock the members, representing students from all of the departments, gather to express themselves through music, which may be in a solemn, religious, or gay festival mood. Whatever a person's preference in music, he will find a number of songs which he especially likes.

Dr. Philip D. Kaufman accompanied by his wife, Mrs. Olivia Kaufman directed this group. The large interest and participation of students coupled with the friendly guidance of Dr. and Mrs. Kaufman has been responsible for the success of the Choraliers, for they have truly shown that there is a place for music in our school.

One of the musical organizations on campus is the RIT Band. This group, a newer member of the Student Council, is under the able direction of Dr. Philip Kaufman.

Regardless of block changes and of the smallness of the organization, the band has a large repertoire of music ranging from classical to popular music. A few of the numbers include: "My Fair Lady," "The Student Prince," "Deep Purple," "Bugler's Holiday," "Stars and Stripes," "Thunder Song" and many other well-known and not so well-known pieces. The enthusiasm and the determination of the members and of the director keeps this group functioning smoothly.

This year, the band has played for basketball games and numerous assemblies, as well as their presentation of the annual Spring Concert and the performance of the group in spring week-end activities. When the band participates in any activity they proudly wear their white sweaters emblazoned with blue music-lyres emblems and white RIT letters.

Included in the band are five baton twirlers including Terry Pipitone, Dawn Harris, Sue Gardner, Kay Lee and Carol Taylor, all of whom performed their routines for the basketball games.

Band

Masquers Guild

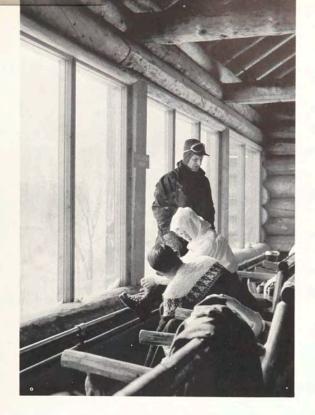

The Masquers Guild, RIT's dramatic society, steps forth in an effort to recapture experiences of the past for the appreciation of the student body.

The Guild, one of the newer organizations on campus, sets out on a two-fold purpose; the promotion of student interest in dramatics and the introduction of dramatics into student activity. With a lack of facilities, the group has undergone very successful efforts in producing the necessary staging and lighting equipment required for the productions.

Among the Guild's recent presentations are such literary classics as: "Sorry Wrong Number," "The Monkey's Paw," and "Bury the Dead." It is their ambition to present three productions throughout the year, one during each quarter, to help round out the social activity on campus. To add a taste of variety to their program, the group, with the support of Student Council, recently presented a Masquerade Ball. Proceeds from the dance went to the RIT Scholarship Fund.

Ski Club

Along with the coming of the snows could be found many avid enthusiasts of that perennial winter sport-skiing. Members of the Ski Club shared many pleasant memories of long white trails when the days were cold and there was plenty of fast skiing; of warm cabins and delicious food; of song filled bus trips and of that familiar hazard-aching bones. On our ski trip to Whiteface Mt. at Wilmington, forty-two enthusiastic amateur skiers learned and practiced the techniques of their sport. The Club's officers for the past season were: Bob Tornberg, president; Bob Glinski, vicepresident; Chris Mayer, secretary-treasurer; Boyd Reynolds, trip chairman; and William Toporcer, faculty advisor. Guided by the enthusiasm of these capable people, the Ski Club went on record as being one of the most successful organizations on campus.

International Students Club

A few hours by plane across the ocean; a telephone call around the world is but a few minutes away. A change in international relations brings both these devices into full operation. At such times the International Students Club has found that instead of interfering with the diplomats, it is more convenient to gather under one roof and have an open discussion.

Often new light is shed on the questions and ideas we hold by the wonderful personalities and thought of the foreign student. Those American students who have participated with the group have found it to be a rewarding experience both culturally and intellectually.

The group was closely coordinated by our faculty advisor, Mr. Joseph McGurn and our president, Jerry Uselsmann.

Topics which were of interest to students who held differing views were presented at the numerous and successful meetings and coffee hours.

Lettermens Club

DEPT 1

The Lettermens Club of RIT is a fraternal organization for athletes, the purpose of which is to combine the members of all sports organizations into one group and to further the interest of sports in general.

Its members receive awards of letters, sweaters, trophies, and blankets, according to their participation.

At their annual Sports Banquet, the Junior or Senior athlete of the year is awarded the Outstanding Athlete Trophy. Last year Frank Silkman, president of the club and captain of the baseball team, was the recipient of the trophy.

Functions sponsored by the Lettermens Club include the annual Sports Night. This year there was a basketball game between the faculty and students, a tumbling exhibition and many other interesting features. Other activities held during the year were swimming parties and dances.

The officers for the past season were: Fred Moss, president; Ken Rhodes, vice-president; Ed Baucum, treasurer; June Johnson, secretary; and Lou Alexander, Jr., faculty advisor.

SMPTE

The Society of Motion Picture and Television Engineers is an association of film and television engineers and technicians organized in 1916. Its purpose is to aid in the advancement of the theory and practice of engineering in motion pictures, television, and the allied arts and sciences and to disseminate scientific knowledge of these advancements. The Society is composed of about six thousand members and includes four student chapters. On January 25 of this year, the RIT group was granted a charter as the third student chapter in the country. The organization has had an extremely successful and eventful first year. Since this past October, it has held five meetings ranging from a lecture on Cinemascope optics as used in Hollywood, to a lecture and tour of the WROC-TV studios and laboratories.

These activities have resulted in a great deal of interest shown the society by students and faculty in the Photographic and other departments.

The interest shown towards the organization during its first year of operation indicates that steady growth and success should continue in the future.

Alumni Association

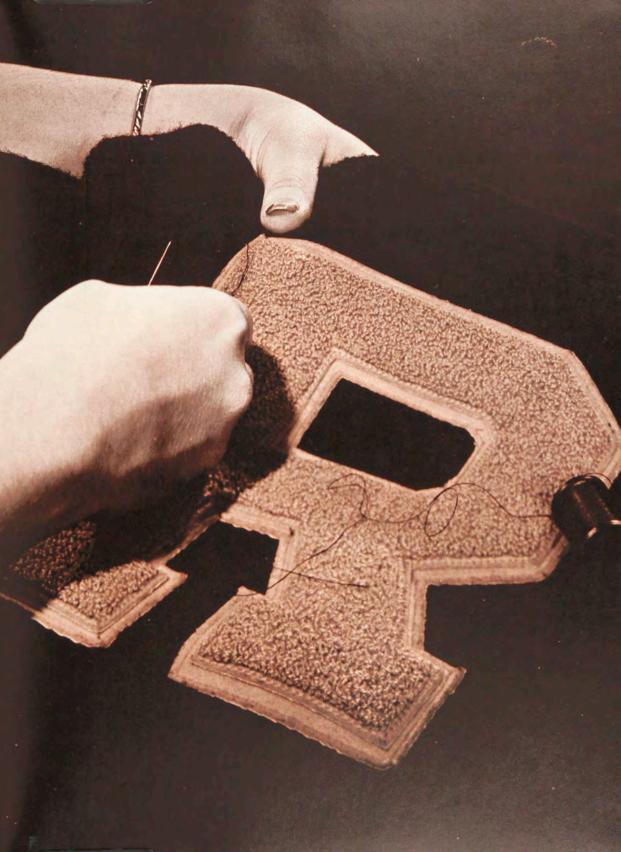

Graduates of the class of 1957 are welcomed to an energetic and active Alumni Association with over 11,000 members. The steadily growing and expanding program is directed by an Executive Council.

The Association has two purposes. The first of these is supporting and strengthening RIT and helping its students. The second involves helping members maintain and renew friendships and associations begun during school days.

Part of the money raised annually by The Greater Alumni Fund is used for scholarships. But most of it is used for general RIT operations. In addition, some help is given students for Spring Weekend, purchasing furniture and equipment for student lounges, providing magazines for various student centers, and other student activities. The annual Alumni Homecoming on May 18th, 1957 in the Ritter-Clark Memorial Building highlighted renewed friendships and associations for all alumni. The RIT Reporter, mailed to every alumnus, brings spot news of alumni and their activities, vital information about the Institute and its operations, and about student activities.

RIT, facing a critical demand for expansion and growth turns, as do most colleges and universities, to its alumni for financial and moral support and policy suggestions. Your help as an alumnus is vital.

SPORTS

V-I-C-T-O-R-Y for the Tigers was the cry this season as Karen Smith, Bev Partridge, Pat Callahan, Sandy Tyrell, Elvira DeMaio, Barb Lubelle, Laurice Tederous, and Marilyn Fox bounded off the bench to cheer the team on.

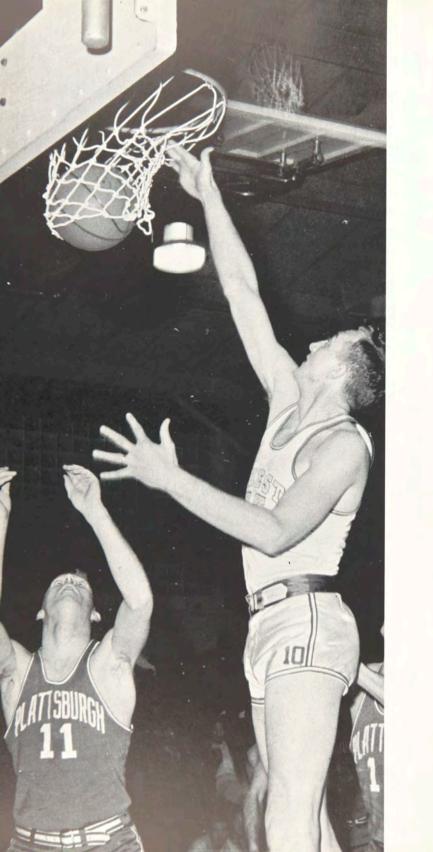

Pat Young, Delia Pendergast, Joan Morris, Brenda Armstrong, Deanne Pannello, and Pat Tillinghast were also in there rebounding for the junior varsity.

This year was a great success due to the support and enthusiasm shown by the student body. Next year we hope to see just as encouraging a showing and many more willing "wits" participating from the stands.

Cheerleaders

Basketball

The RIT basketball team completed its 1956-57 season with one of the best records in New York State having won 16 games while losing only three. Over a period of two years the Tigers have compiled a 33-3 record and have justly supported their claim of being one of the outstanding quintets in the small colleges of the east.

The losses were to Brockport State in the opener at Brockport, Oswego State Teachers, and Utica. Brockport and Utica were beaten in rematches during the season.

Led by their high scoring center, Ed Baucum, 6'5" printing student from Mayfield, Kentucky, the Tigers set a record of having won 23 consecutive victories on their home court. This streak was halted in the final game of the season by Utica College.

The starting five, captained by Fred Moss, boasted four men who completed the season with averages in the double figures. Baucum led the squad with a 21 points per game average, and was followed by Arnie Cardillo, 14 points per game; Ken Rhoades, 10 points per game; and Don McCaughey, 11 points per game.

Next year coach Lou Alexander, Jr. will be able to floor the same team with the exception of McCaughey who has completed his fourth year of varsity competition.

The '56-'57 schedule was improved by the addition of Plattsburgh, Toronto, Buffalo State, and Mansfield, all of whom were defeated by the Tigers. Next year's schedule will be further improved as RIT will meet Alfred and Clarkson.

The remainder of the squad consisted of George Cook, Ken Eybers, Marlin Siegwalt, Ken Johnson, Bob Barnett, and John Albiston. Laverne Atkinson was manager.

The freshman basketball team also finished the season with a winning record, having won 11 of their 17 games. Ron Milko led the baby Tigers with an average of 26 points per game.

Wrestling

The Tech wrestlers went into the past season with one of the strongest teams ever assembled in the history of RIT. Tech had such established stars as Jim Modrak, who was undefeated in twenty-nine previous collegiate bouts, Dave Smith, Hans Dotzler, and Tony Palmiere. From this group, only Palmiere escaped injury.

Modrak severely damaged his leg after the second match and was unable to wrestle for the remainder of the year. Hans, Dotzler, who wrestled in the 137 lb. class in 1955-56, moved up to the 147 lb. class to replace Modrak. There was no replacement for Dotzler in his former division and this resulted in forfeiting the 137 lb. weight class to all opponents. This proved a determining factor in a number of bouts during the season.

Smith wrestled until the Christmas holidays at which time he was struck with an acute case of appendicitis. Palmiere compiled a 10-1-1 record and along with Bob Lehmann, came in second in their respective weight divisions in the post season Individual Invitational Intercollegiate Tournament. Palmiere received the Theta Gamma Trophy which is given annually to the most outstanding wrestler of the year.

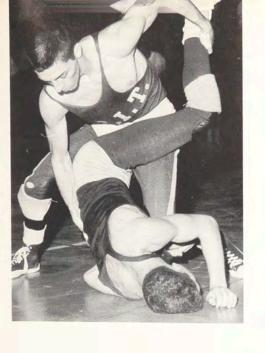

The Frosh wrestlers posted a 6-3 record for the season. It was a good season for the freshmen and should do much to strengthen the varsity next year.

The varsity coach was Earl Fuller and the Freshman coach, Ed Grain. Coach Fuller has handled the Tech wrestlers for a number of prosperous seasons.

1956-57 RECORD

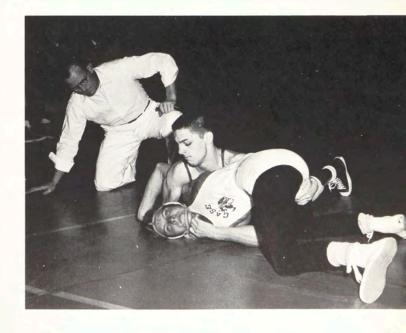

RIT			RIT		
12	Colgate University	14	26	Toronto University	5
18	Oswego State	18	11	Cortland State	21
24	Case Institute of Technology	8	7	Lockhaven State College	24
26	Clarkson College	6	16	University of Buffalo	18
3	Waynesburg	23	14	Alfred University	16
13	Ithaca College	16	14	Baldwin Wallace	16

Fencing

This season proved to be a successful one for the Men's Fencing Team as they finished with a seven win and five loss record.

The team, bolstered by a few able freshmen, compiled wins over Syracuse University, the University of Toronto, Utica College, and St. Lawrence University. The five losses were to the University of Buffalo twice, the University of Toronto, Case Institute of Technology, and the University of Detroit.

The epee team proved to be Coach Plouffe's strongest point-getter as they ended the season with a total of 67 wins and 36 losses. The foil team had a year of ups and downs and finished with 57 wins while dropping 46 bouts. The sabre team completed the season winning a total of 53 bouts while dropping 50.

As of this writing, the Women's Fencing Team has successfully competed three times. Against Elmira College, the girls won 11 bouts and lost 5. The University of Toronto and composite team of amateur fencers of Toronto were added to the schedule this year, and were in turn, defeated by 13-3 and 7-2 scores respectively.

For the first time, the girls will invade the metropolitan New York area in regular scheduled intercollegiate competition. Hunter College, Jersey City State Teachers, Fairleigh Dickinson College and Temple University will attempt to break the 23 match winning streak built up in the past four year span for the local team.

Two years ago, the RIT team won the Intercollegiate Women's Fencing Association Championship, which they regained this year when RIT played host to the Championship Tournament in April.

Baseball

The Tiger nine faced the 1957 baseball season with the aid of eleven returning lettermen. Missing from the team was centerfielder Frank Silkman who captained the team four consecutive years and had a batting average of .415. Another position that had to be filled was left field, vacated by Harry Hinman who batted .324 in the 1956 season.

In the ever-important pitching department, the big winners returned. In the 1956 season Gene Dondero and Hal Slavny each won two games while losing none. Ralph Van Peursem duplicated the two wins but dropped one.

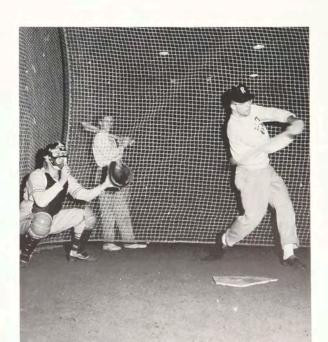

Heading the list of returning lettermen was the 1956 Tiger batting champion Fred Moss, who hit for a .433 average. He returned with George Cook, Jim Chappel, Frank Renaldi, Paul Dickinson, Harry Barnes, George Brown and Gordy Taillie.

Oswego State, Utica College and Buffalo State were the three teams that were added to the schedule which includes Roberts Wesleyan, the University of Buffalo, Brockport State, Geneseo State and Potsdam State.

1956 Record

RIT		
14	Roberts Wesleyan	0
14	Fredonia State	5
6	Geneseo State	5
6	University of Buffalo	5
8	Brockport State	6
10	Roberts Wesleyan	0
7	Geneseo State	9
0	Potsdam State	3
14	Paul Smith	4

Tennis

The RIT Tennis team, taking advantage of the excellent indoor facilities offered at the Ritter-Clark gymnasium, started practice early in March in preparation for the opening match with Brockport State on April 26.

The team boasted three returning lettermen in Captain Ed Meyers, Bob Gelder, and Dick Greene.

Due to the lack of proper facilities, the team played a reduced schedule in '55-'56 and finished the season with a 2-2 record. This year, with facilities more accessible, the squad faced an improved schedule of eight matches against powerful opponents.

Tennis is one of the oldest sports at RIT and due to the use of indoor courts, the game is quickly taking its place among the major sports at RIT.

1956-57 SCHEDULE

For the past thirty-five years Alpha Psi has instilled in its members the idea of working towards a unity of friendship. Its beginning, with only thirteen girls, proved that a group regardless of size must be united in order to fulfill its ideals and forward its purpose. Today we strive to work together with a strong sense of unity and organization. Active participation of our members on freshmen orientation has proved that we feel an alert sense of responsibility toward our school as well as toward each other.

This has been a busy year with rush teas, pledging, Spring Weekend and various activities. We shall never forget the fun or the close bond of companionship always present within our group whether preparing for a bake sale or just having an informal get-together. We have had many pleasant associations this past year and another addition to the records of Alpha Psi Officers has been made as the work of President Bobbie Gray, Vice-President Barb Adams, Secretary Celia Morgenberger, and Treasurer Janet Robinson was completed.

Under the leadership of our new advisor, Miss Pierpont, this sorority is looking forward to an increasingly successful future both scholastically and socially. We stand united in our beliefs of Truth, Sisterhood, and Loyalty and above all, Alpha Psi, we shall always "honor, love you true."

Our sisters inaugurated the school year with an enjoyable evening at the Crescent Beach Hotel and since then we have embarked on a successful year of many and varied activities, among them the staging of a jitterbug contest at the D. O. Mixing Bowl and entertaining freshmen at the annual rush tea. In a more serious vein, our sisters delivered food to a needy family and sung Christmas carols for their enjoyment. About this time of the year, many witnessed the Delta Omicron pledges around campus, neatly attired and topped with black and orange caps. At our annual Minstrel show the members could be found laughing with Mister Interlocutor in their setting "down south."

During Spring Weekend we all worked hard to help make it a success and closed out our school year at the annual Installation dinner where the sisters rejoiced over what they feel was an excellent year and gave incentive to next season's officers and members. As the school year ends, we wish to thank the brothers of Gamma Phi for giving us their aid and support in our activities throughout the year.

Although Eve was not the first girl to wear a Phi Up pin, Phi Upsilon Phi was the first Greek letter social sorority to be founded at RIT.

"Let friendship, unity, fidelity and scholarship be your guide . . ." is a passage from the pledge initiation speech which outlines the objectives that prevail from the constructive pledge period through the years in sisterhood with Phi Up. ". . . by helping with the numerous sorority activities, among them charity work." This year saw the sorority transform its almost completely social activities into a charity program including such events as: a March of Dimes collection, a blood drive, Christmas food baskets, contributions to Hillside, and guidance work with the underprivileged children of Rochester.

This heartwarming program, however, was sprinkled with diversified social events for both the students of RIT and the sisters. Such events included the Dawn Dance, the Battle of the Bands, another first with Phi Up; the initiation dinner, Spring Weekend and the annual installation dinner.

Lending their guidance to a most successful season were the officers for the past year, including: president, Sara Lynn Read; vice-president, Karen Smith; secretary, Jan Carlson; treasurer, Doty Mitchell; chaplain, Phyl Lader; and social chairman, Jackie Purcell.

Inter-Sorority

The Inter-Sorority Council is composed of representatives from each of the three sororities on campus. The purpose of this organization is to unite the sororities in matters of common interest. Any matter affecting the welfare or good will of any sorority is brought before the council for discussion and advice.

A very important part of the activities carried on by the council is the setting of dates for the Inter-Sorority Council rush tea and the individual sorority rush teas. Dates for upperclass pledging and freshmen pledging are also set by the council.

During the past year, which was an exceedingly busy one, the members from each sorority joined together to find a more workable and efficient method of pledging. Research was also done concerning the preference list used by most national sororities in choosing pledges. For the first time rules governing pledging were defined and listed to prevent difficulties in the future. With the retirement of Mrs. Hugh McNair from her duty as council advisor, the Inter-Sorority Council welcomed Mrs. Shaw, Assistant Director of Kate Gleason Hall, as its new council advisor. Organizations are not complete without a certain amount of social activity. This year the social life of the council began with a tea given in honor of the freshmen coeds. The event was October 17 in the Eastman Assembly Hall. This annual tea gives the new coeds an opportunity to meet the members of all the sororities on campus.

The biggest social event of the Inter-Sorority Council's year was the semi-ball that took place in March. As has been customary, a scholastic trophy was awarded to the sorority having attained the highest scholastic average. All sororities look forward to this highlight of the year.

Inter-Fraternity

Inter-Fraternity Council is a group of people working together, "To provide a medium of exchange and interchange of ideas, programs and purposes between all fraternal groups looking toward the continual improvement and advancement of fraternal life."

I.F.C. is now out of its infancy and working with confidence and a great deal of success. There are many activities of fraternal life in which the council has been well represented. For the second consecutive year, the Council has sponsored the Variety Showcase, held at the Ritter-Clark Gym, for the student body as well as for fraternities. This show is comprised of talent found throughout the school. The Inter-Fraternity Council presents, as an added incentive to scholastic and sport achievements, the Scholastic Trophy and the Neil French Trophy. The Scholastic Trophy is awarded to the fraternity with the highest scholastic average for the school year.

In years to come the Council has planned pledge parties, for the purpose of acquainting the prospective brothers with the Council, its being, and its purpose. A spring party and picnic is also held annually with Inter-Sorority Council.

This year, there has been a great increase in the social life at the Institute, with the Council working long and hard for the opportunity to keep social life on an active basis.

A variety of situations have confronted I.F.C. throughout the year and have been met with the greatest deliberation and sincerity. We hope to continue in our attempts to increase our objectives and standards in the future.

Gamma Phi

Gamma Phi Fraternity was originated in October, 1950, therefore being the youngest fraternity on the RIT campus. Since its origin, Gamma Phi has grown to a great extent and has become alive with tradition and custom that lives in the memories of all its alumni. The ultimate goal of Gamma Phi is to create brotherhood, not only between the brothers but between all the people in the school and the community.

The brothers realize that only those who put their full cooperation and spirit into the fraternity are the ones that will reap its benefits. Similarly, the brothers of Gamma Phi put their hearts into all they do in the name of Gamma Phi. They are sincere in all that they endeavor to achieve, striving to reach this ultimate and worthwhile goal.

The words which came back from our National Convention were these:

"Wherever men may work Together or apart

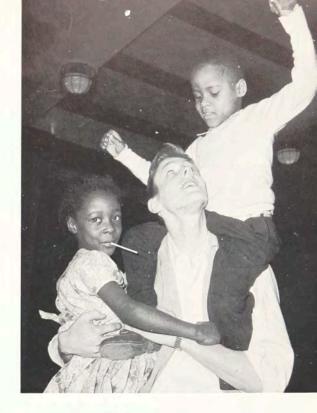

They work better

When they work from the heart"
These are the words that have led the brothers of
Kappa Sigma Kappa, New York Beta Chapter,
through the year of fraternity work.

Kappa Sigma Kappa is an organization which seeks to teach men how to live and work together, striving for the personal development of the individual in training the mind and the body.

We regard ourselves as an integral part of the Institute, in which we share in the responsibilities of maintaining a social atmosphere for the students. In the chapter we develop the social graces and the art of good living. The development of courtesy and kindness will always be a leveling influence for the brothers of Kappa Sigma Kappa.

The brothers have always tried to develop the qualities of human understanding, of companionship, and of kindness, with the knowledge and training of the basic values of life, which will lead us all to a better understanding of our fellow men.

The Sigma Chapter of Theta Gamma fraternity was organized in 1912 as Phi Sigma Phi fraternity. Along with its affiliation with the national organization in 1952 at which time its name became known as Theta Gamma, it pledged itself wholeheartedly to the promotion of those more kindly instincts of mankind. Theta Gamma finds it quite easy to fulfill its pledge by offering its service in several of many functions which occur throughout the year.

Along with this work, Theta Gamma is very active in the social life of the school. The annual "Snowball" semi-formal in January is the highlight of the black and gold's social year, being climaxed by the selection of the Sweetheart of Theta Gamma.

A successful fraternal year came to end amid the pleasant grandeur of our May Dinner Dance. Throughout the year we have been guided by competent officers including Richard Carlson, president; Robert Hooker, vice-president; Richard Clark, secretary; Dave Smith, treasurer; Peter Witte, chaplain; Richard Steffan, social chairman; Philip Brody, historian; and Gerald Antos, sergeant-at-arms.

Delta Lamda Epsilon

Throughout the four years of Delta Lambda Epsilon's existence, its main intention has been to promote success and dignity in and among photographic circles. We look with pride upon our graduate members who have entered various phases of the photographic industry throughout the country.

The letters D.L.E. are used as being representative of a phase of photographic calculation and thus the name more readily applies to the fraternity. This year, a new design was adopted for the fraternity emblem, incorporating both the ideas of an honorary fraternity and a technical one as well.

Strict scholastic requirements have been written into the constitution to develop an intellectual basis for D.L.E. so as to place its members foremost in the business world. Pledging this year brought in many members, enlarging the organization to an all time high.

Although Delta Lambda Epsilon is primarily a technical and professional organization, its members enjoy activities such as picnics, banquets and after-meeting socials at times throughout the year. These picnics, held at various places throughout the state, are looked forward to with great anticipation by the members. Noteworthy among the year's events was the sponsoring of the Brehm Memorial Lecture, open to all Institute faculty and students.

One of the fraternity's major goals was accomplished this past fall when the fraternity became an incorporated organization under the laws of New York State. This will provide the groundwork for the building of a larger, nationwide organization.

The officers for the past school year have been: Robert Meibaum, president; Jim Hunt, vicepresident; Calvin Besore, secretary; Gayle Smalley, corresponding secretary; and David Engdahl, faculty advisor.

Gamma Epsilon Tau

Zeta Chapter of the international honorary professional graphic arts fraternity, Gamma Epsilon Tau, has had another successful year. Our second year, here at the Institute, has brought us an enlarged and active membership whose concentrated efforts have put forth excellent educational and social programs with the accomplishment of many of the goals for the advancement of knowledge and brotherhood in the graphic arts industry.

Gamma Epsilon Tau stands for the science and knowledge of the art and craft of letters but in addition, this organization also serves as a criteria for craftsmanship of the highest order; a craftsmanship which its members have sworn to uphold.

Although we have stressed the professional aspect in our activities, we have had a rewarding social program with the members, officers, and advisor all participating in the activities in order to assist each other in his future career in the printing craft. The officers for the past school year have been: Raymond Hites, president; John Tierney, vice-president; Dwight French, Jr., secretary; Donald Rollo, treasurer; Albert Cetta, librarian-historian; and Alexander S. Lawson, faculty advisor.

SOCIAL HIGHLIGHTS

The tradition of holding major dances and affairs along with choosing a queen for these affairs is not new; nor is it likely to become extinct, especially at RIT where much success was achieved during the past year.

Gamma Phi fraternity's Harvest Festival was climaxed by the Harvest Moon Ball held Saturday, November 10, in the Ritter-Clark Memorial Building. Under a ceiling of deep blue and black streamers, set off by a harvest moon, pumpkins and corn stalks, couples danced and later chose Miss Donelda Choate as queen of the Harvest Festival.

The new year was just ahead and the student body anxiously awaited the coming year's major events.

January is the time of New Year's resolutions, snow ball throwing and the annual Snowball, highlight of Theta Gamma fraternity's big Winter Weekend. The dance was held on the Starlight Roof of the Hotel Sheraton on Saturday evening, January 19, at which time, Nancy Kennedy was crowned queen of the winter festival.

On February 9, the setting was again the Ritter-Clark Building where festive decorations, a glittering chandelier, and flags of many nations provided atmosphere for the Masquers' Guild benefit dance, Carnival Internationale. The dance was sponsored by the Masquers' Guild, the campus dramatic group, and took the form of a costume ball. Couples danced to the music of the "Commanders" under the direction of Warren Covington, with proceeds going to the scholarship fund. Following this event, Institute students had only to wait a few weeks for another traditional event, the Sweetheart Ball.

Music filled the air as well over two hundred couples danced to the melodies of Eddie Williams and his orchestra. Thus on March 2 at the Rochester Country Club, the annual Sweetheart Ball was ushered onto the RIT social scene. At 11:15 p.m., Miss Marcia Crowley was named the new Sweetheart of Kappa Sigma Kappa fraternity.

Theme of this year's Spring Weekend festivities was the anxiously awaited, "Caribbean Cruise." Students were "Caribbean Bound" on Friday afternoon at the pep rally and parade that officially opened Spring Weekend. In the evening, a modern 20th century miracle transformed the Ritter-Clark Building into a gala and panoramic, "Callypso Carnival." Saturday evening found couples dancing to the rhythmic strains of Duke Ellington and his orchestra at the picturesque "Night in Trinidad" formal dance. A Jazz Concert on Sunday highlighted "Jamaica Farewell" and a fitting. close to a memorable weekend.

ROCHESTER CLUB OF PRINTING HOUSE CRAFTSMEN

A MEMBER OF THE INTERNATIONAL ORGANIZATION DEDICATED TO THE ADVANCEMENT OF KNOWLEDGE IN THE GRAPHIC ARTS FIELD

THE 1957 TECHMILA STAFF

wishes to thank all the organizations, individuals, and Student Council for their congenial cooperation in this year's Technila. Your support was needed and appreciated.

3

Acknowledgements

An editor with an idea is nothing without the support of his staff. The 1957 Techmila has been a success, and you, the staff have made it so.

Many long hours of effort went into the formulation of this book. Paul Hassenplug, my right hand man, did a tremendous job by helping in nearly every phase of the book. He picked up the loose ends that I overlooked and came up with the right answers at the right times, whenever they were needed.

Roger Sliker did what we all consider an outstanding job in laying out the pages and creating the working dummy for the entire publication. Neva Hansen and Roger Remington were his capable assistants and put in long, hard hours helping Rog with the formulation of the final layouts. The cover idea is the result of the cooperative efforts of these three people and evolved into something new and completely different as far as Techmila is concerned. My sincere thanks to these three people for an outstanding job.

Dan Dour did a remarkable job in writing and rewriting nearly every pica of copy which appears in this yearbook. It is some of the finest writing that I have seen from a student. I feel certain that whoever takes his place on next year's staff will have high standards to guide him. Dick Bult and his staff aided Dan in handling the sports copy and did an excellent job.

Charlie Reiner not only did a top-flight job as coadvertising manager with John Moore, but spent many long weekends cropping photographs, marking up type and coordinating final prints with their appropriate positions. As far as the advertising section is concerned, these two men and the advertising staff acquired more revenue than any previous edition of Techmila.

Roger Hammarlund, with literally thousands of photographs to be taken, did a good job and came through in fine shape. Pete Bunnell was his capable assistant and through the efforts of these two men and their staff, every imaginable area was covered by a photographer to bring you the pictures which are the body of this year's Techmila.

My appreciation also to Mary Ann Smilnak, who as our executive secretary, scheduled over a thousand upperclass photographs and was always on hand wherever we needed her assistance. Thanks also to a fine staff of secretaries and typists, including: Ann Logory, Irene Cherkauer, Doris Pesko, Adrienne Balzer, Beverley Weimer and Monica Roberts.

I would like to thank Dr. Warren Davis and Mr. Joseph Bowles who aided us as business and financial advisors. Also, Mr. Alexander Lawson, Miss Ruth Gutfrucht, Mr. Raymond Werner, Mr. Robert Bagby and Mr. Ralph Hattersly, who aided us in Technical matters.

To the book's printer, William J. Keller Inc., of Buffalo and Mr. Donald Messinger, Mrs. Jewell Gates and the rest of their staff, I would like to extend my sincere gratitude for outstanding service and a high quality printing job.

Thanks also to Mrs. Ethel Perry for the donation of the corsage used in the social highlights divider.

Miss Mary Aldrich did an excellent job of handling the upper class photographs while under considerable pressure.

I would like to thank June for putting up with my varying moods when each deadline was approaching and for her assistance in helping to key photographs and typing material.

To the many people that I have not named, I would like to extend my appreciation to all of you for your loyal help.

I sincerely hope that whoever succeeds me will be fortunate enough to find a staff as cooperative as the one which helped to make the 1957 Techmila a success.

Best Wishes

RICHARD P. CRUWYS
Editor-in-Chief

Production

Throughout many hours of labor, the staff of Techmila '57 has endeavored to produce for the student body a record of the activity on the "asphalt campus" during the past year.

The design of the book was meant to express the fast tempo of campus life through the use of a contemporary format.

Production problems offered by Techmila '57 were multiple but through the imagination of the staff, the advice of our advisors and the invaluable aid of Mr. Donald J. Messinger of William J. Keller Inc., they were met and overcome.

Techmila was produced by the "Velvatone" offset lithographic process of the William J. Keller company, printers and lithographers of Buffalo, N. Y. In selecting the printer for this edition of Techmila, we attempted to find a firm that would offer the highest degree of craftsmanship available. We obtained this, and also received excellent cooperation from the Keller staff.

To accompany our contemporary format, we selected Fortune Bold by Bauer Alphabets Inc. for the typographic treatment of the display type. Text type is the transitional Baskerville face in 10 pt. Linotype.

Techmila is printed on S. D. Warren's 100 lb. "Cellokote" and bound in silk screened natural monk's cloth.

Color dividers were produced by the true duotone process.

Richard P. Cruwys Editor-in-Chief Paul C. Hassenplug Printing Editor
