### Thrips

1. Keep a little naphthalene (tar camphor flakes, or moth balls) among the bulbs at all times in storage.

2. Soak in some insecticidal solution before planting. Bichloride of Mercury will do.

3. It is better to begin spraying before infestation starts. Use any good plant spray as directed. We have heard of the success of a solution of brown sugar and Paris green.

4. Burn all infested flower spikes.

5. Burn the plant tops after digging.
