2. OPERATIONAL CONDITION

A. As a result of the inspection made by Mr. Ludis, GHQ Inspector on Feb. 1st, the production of Automatic lathe for watch parts, which had been verbally permitted to produce by means of using released machines, was prohibited.

Therefore, we stopped the production right away on and after Feb. 2, 1949.

B. On Feb. 22, we applied for the permission to use temporarily the indispensable 15 items, out of 25 items, of electric sub-station which were inventoried for reparation claim on and after Dec. 10, 1948.

On Feb. 26, we additionally submitted an application for

MITSU SEIKI KOGYO KAISHA, LTD.

putting back this inventoried electric sub-station to "EX" equipment.

As it is our eagerest desire to get back this electric sub-station to "EX" equipment, we would ask your-kind consideration upon this matter.

H. Komori

H. Komori,

MANAGER,

2. OPERATIONAL CONDITION

=====

1. We submitted an application to your Headquarters, on March 25th, for recognizing the electric sub-station, boilers and water supply and air conditioning equipments, which were originally installed as spinning mill equipments, as "EX" equipment. We would ask this application be approved at your earliest convenience.
2. We decided to close our plant after Mar. 31, 1949 for the purpose of recovering the business management of the company under the amicable agreement of the labor union. Out of 490 employees 70 will be transferred to our Okegawa Works in Saitama Prefecture and 420 will resign.
3. We wish to assemble the reparation machines to a part of the building through the permission of your Headquarters and cutting down the area of charge we will fulfill the perfect custody

MITSUI SEIKI KOGYO KAISHA, LTD.

and control of the reparation machines.

The land and buildings of the factory are intended to be sold back to Toyo Rayon Company and will be utilized as spinning mill again.

M. Takeuchi
for H. Komori, Manager,
Mitsui Seiki Kogyo K.K.,
Seta Works.

12
Oct. 14th 1948

To: Shiga Military Government Team.
From: Chief of Com.& Ind. Sect. Shiga Ken.
Subject: Report on Withdrawal of Unncessary Building within
the Reparation Factory.

With reference to above mentioned matter, I have
receipt the report from Mitsui Seiki Kogyo K.K. Seta Factory,
regarding withdrawal of unnecessary building within this Factory,
being recogniged by M.G.T. in accordance with OD21, clouse2 (2).

Hereby I submit it to you as per attached papers.

R. Kitayama

Chief of Com. & Ind. Sect.
Shiga Ken

MITSUI SEIKI KOGYO KAISHA, LTD.

To: Capt. Wenner,
Military Government Team,
Shiga Prefecture

October 8, 1948

Through: Shiga Pref. Government

From: Mitsui Seiki Kogyo K.K.,
Seta Works, 1234, Ohe, Seta-cho, Kurita-gun,
Shiga-ken.

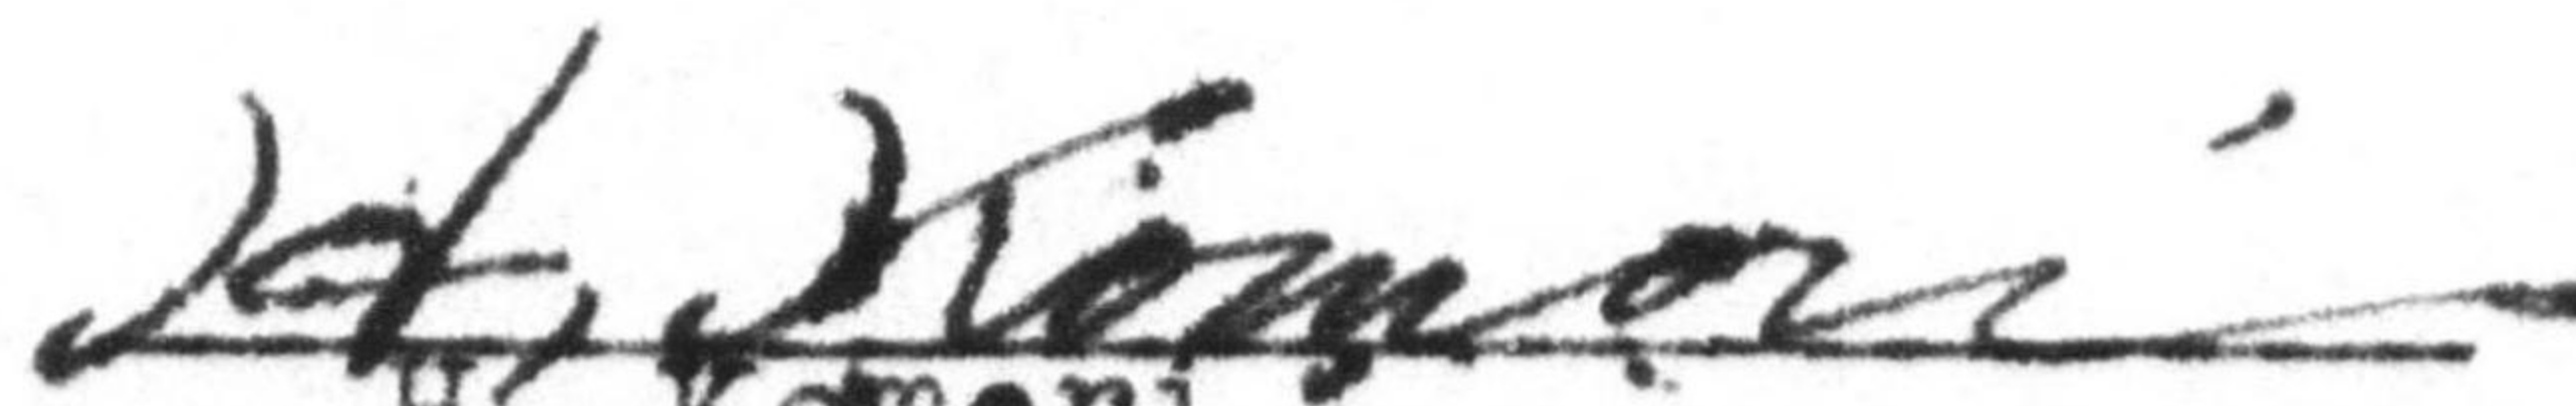

Sir:

Re: Taking away huttings.

Please be informed that we have started the work of removing five (5) huttings, in our plant, for which we submitted application dated Aug. 20, 1948 and your verbal permission was granted. The removing work is expected to be completed toward the end of this month.

We thank you again for your kind attention to this matter.

Yours truly,

H. Komeri,

Manager,
Mitsui Seiki Kogyo K.K.,
Seta Works.

-----**2. Exempted Equipment Decided**

In regard to the exempted equipment (EX) in our plant, ninety six (96) machines were concluded as the EX machines after the inspection made by Your Headquarters' Officials on April 15.

So we submitted immediately a report on the details of those machines to Your Headquarters.

2. Application for the exemption of our machines from reparations

We submitted an application dated on March 13 to Your Headquarters for the exemption from reparations program of our 33 machines indispensable for the production of civilian commodities out of the present 735 machines designated for reparations.

And we have acknowledged with thanks that Your Headquarters kindly accepted our application and took promptly necessary steps for it. We heartily desire that Your Headquarters may hereafter give us kind help on this matter and grant it.

2. Operational Condition

As we mentioned in the previous report, we started recently the manufacture of the textile machine parts under Your Headquarters' permission and in the first place we have succeeded to realize such an actual production of the needles for knitting machine during this month as listed above. It is scheduled that the output of the said item will hereafter be increased month by month.

On the other hand, we have received the order of 100 pcs of rayon spinning pumps from Toyo Rayon K.K. and started manufacturing.

3. Reparations Machines Released Partially

We have received with thanks Your Headquarters' information dated on February 22 through Shiga Prefectural Government that out of our reparations machines 320 machines which were transferred from our Numazu Factory were released from reparations claim. We heartily thank you on one hand for Your Headquarters' kind consideration to this matter and on the other determined to devote ourselves to the rehabilitation of Japanese industry by making the most of these released machines as well as we did heretofore.

As for the remaining 735 machines, we pledge that we will attend to the perfect custody and control.

We would like to submit again an application to Your Headquarters before long for the exemption of some machines indispensable for our present production out of the abovementioned remaining machines. So we earnestly desire that we may be favored with your kind help to this matter.

2. Permission granted for the production of TEXTILE MACHINE PARTS

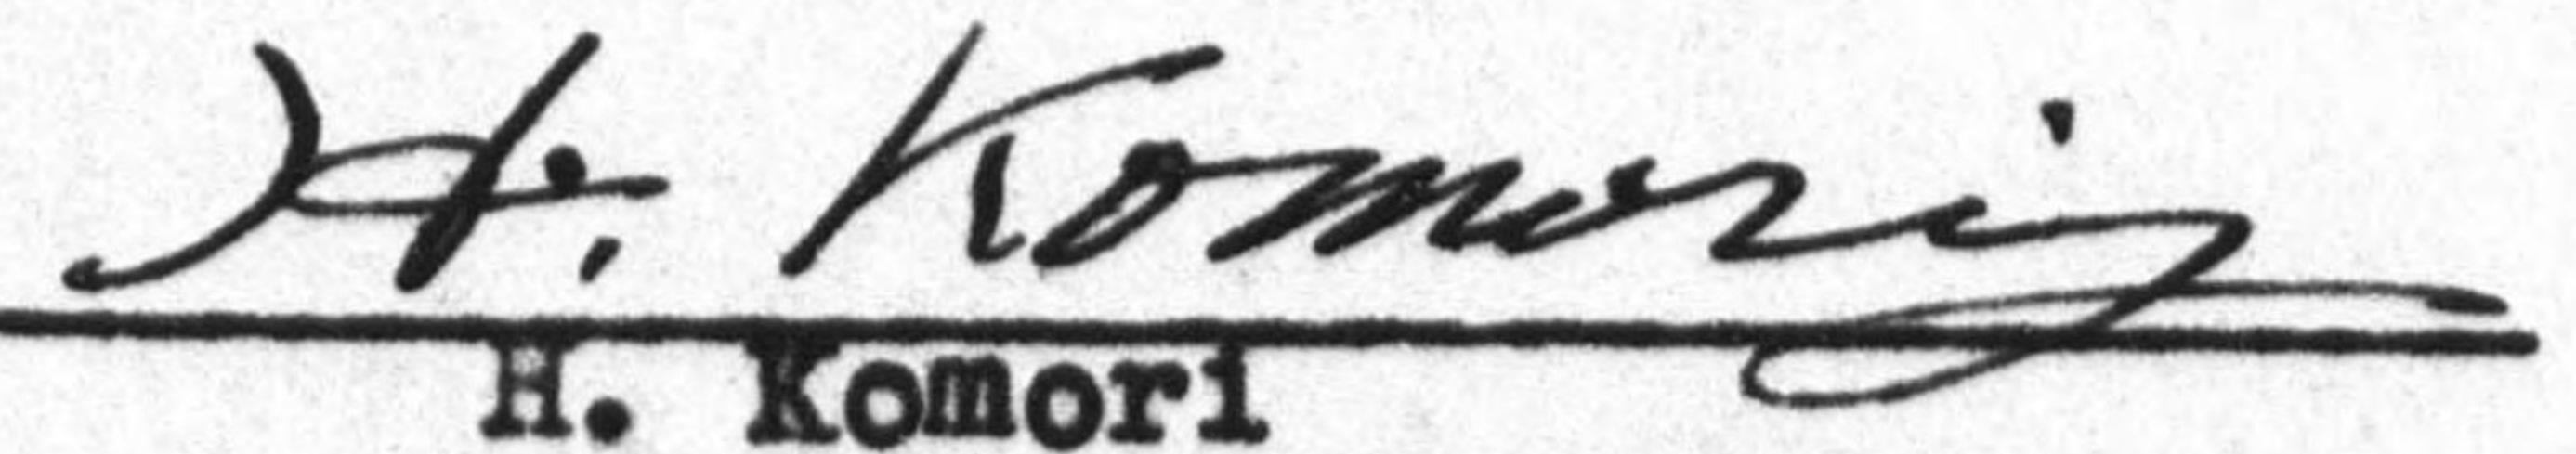

Intending to undertake the production of such TEXTILE MACHINE PARTS as the needles for knitting machine, spinning pumps for rayon machine and others to meet eager request from various spheres of our domestic textile industry and recommendation of the Commerce and Industry Ministry, we applied recently to Your Headquarters for the permission of manufacturing the said items and have acknowledged with thanks that Your Headquarters paid kind consideration to this matter and granted the permission.

We, therefore, have immediately commenced the research and trial production about these items and in the first place started to manufacture the needles for knitting machine.

As we intend to pay henceforth our efforts to this aspect of production and devote ourselves to the rehabilitation of textile industry which is most important for our country at present, we earnestly hope that we may be favored with Your Headquarters' kind direction and help.

3. Manager of this works transferred

Mr. S. Yamanaka, the manager of this works, has been transferred to our head office assuming the post of managing director of this firm, and Mr. Hikoze Komori, the vice-manager of this works, succeeded the post of works manager on January 28.

MITSUI SEIKI KOGYO KAISHA, LTD.

2. Operational Condition

A. The Second Greater Production Campaign

The trade union in this plant held a greater production Campaign for four months from December last year to March this year, gaining a success. They have launched again the same campaign from this month, taking the first aim at promoting the percentage of attendance and are endeavouring to accomplish the aim. On the other hand, an attendance-contest among each section (divided in 13) of our plant is being held.

Thus we are paying utmost efforts altogether for the rehabilitation of our industry.

B. Repairing and Cleaning of Reparation Machines

The repairing and cleaning work of the reparation machines, which was undertaken from the previous month in accordance with the directive issued by the Commerce and Industry Ministry, is advancing as scheduled, and we have done 57% of cleaning work and 16% of repair up to the end of this month.

2. Operational Condition

Same to the previous month, the electric power condition was placed in a difficult situation, but due to our efforts the production in our plant for this month has showed favourable result increasing the output about 10 per cent compared with the previous month.

* On the other hand, it was decided by the officials concerned

MITSUI SEIKI KOGYO KAISHA, LTD.

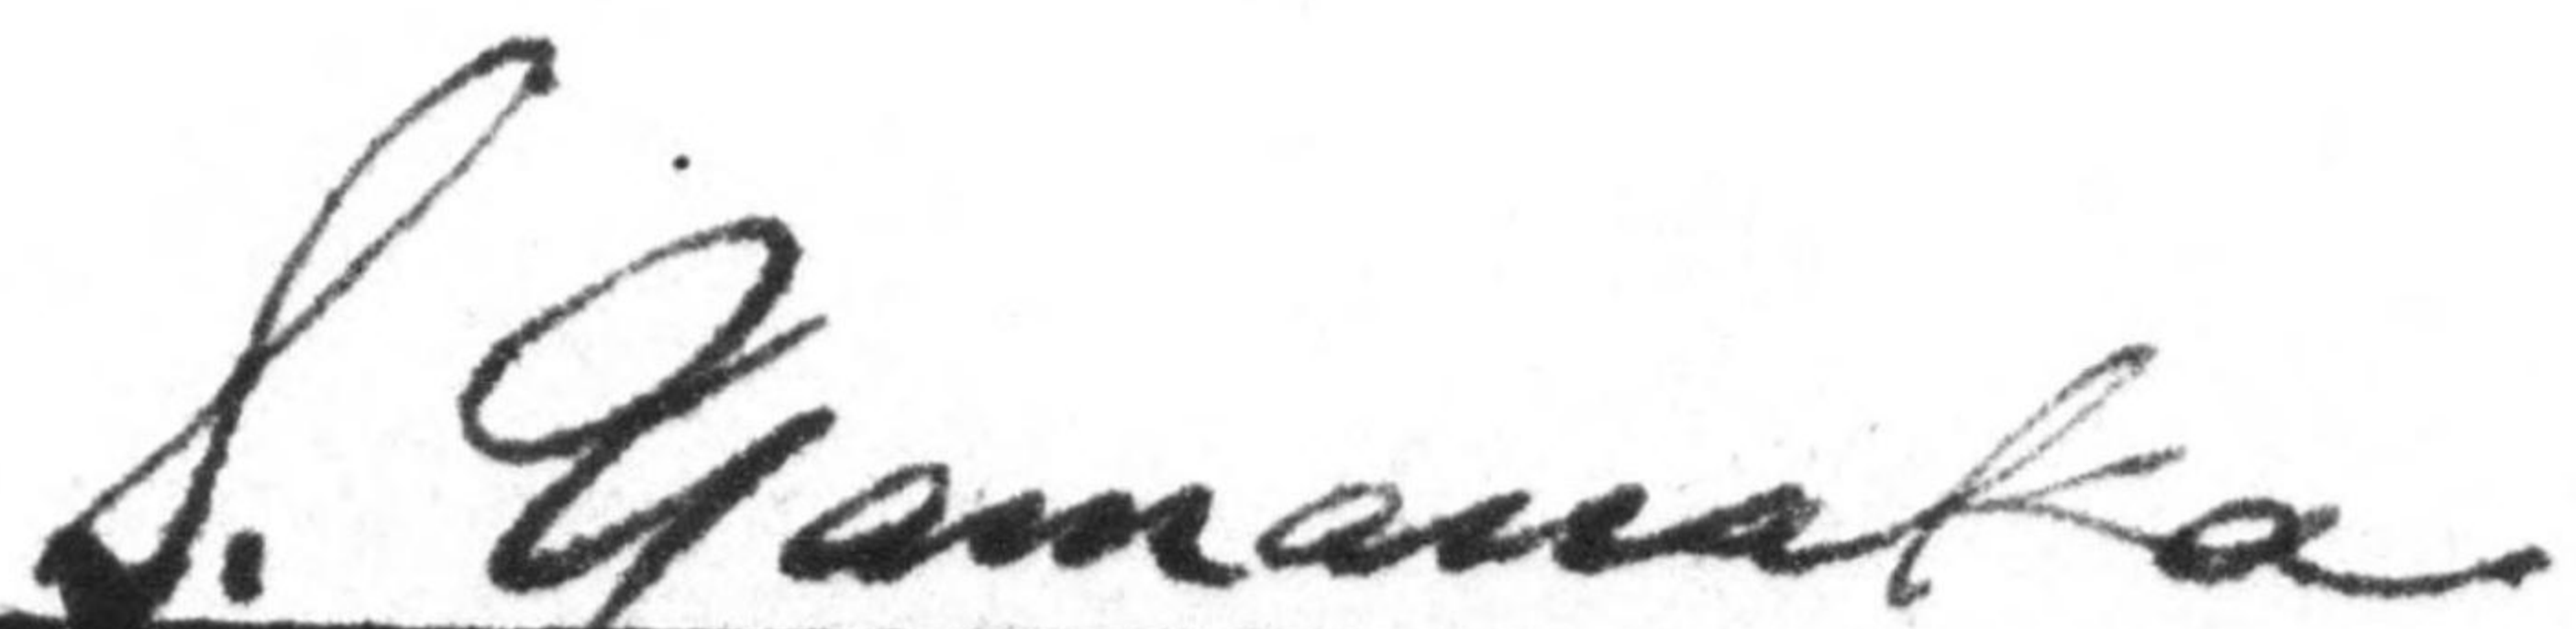

that the workers in our factory will be provided with the special rationing of rice starting from this month. Owing to this special favour, it seems that the workers were encouraged and stimulated to increase productional intention.

3. Repair of Designated Machines for Reparation Undertaken.

In accordance with the decision made by the Reparation Plants Conference which was held at the Kyoto Pref. Gov't Office on March 11, we have determined to undertake the repair of those machines designated for reparation. Committees for this purpose have been chosen in our plant and they have immediately started their practical business.

4. Custody and Control of Plant

In order to discharge our obligation for the custody and control of this plant more sufficiently, Mr. Tajima, a policeman of Kusatsu Police Station, was appointed for the full-time attention to our plant on March 24, and several members of the Guard of Seta-cho are being attached to our plant for the same service respectively.

		Grand Total	¥ 1,320,741

MITSUI SEIKI KOGYO KAISHA, LTD.

2. Operational Condition

Although the production in our plant for this month was affected considerably by the strengthening of the power control, we all members of this works paid utmost efforts to overcome the difficulties due to the shortage of power. Consequently, the output for this month reached to the abovementioned amount, renovating the record since the establishment of this works.

We believe that the restoration of the production in our plant has been already placed on the normal course, and are resolutely endeavouring for the greater deal of production moreover.

3. Visits paid by U.S. Engineering Mission for the survey of Reparation Plants

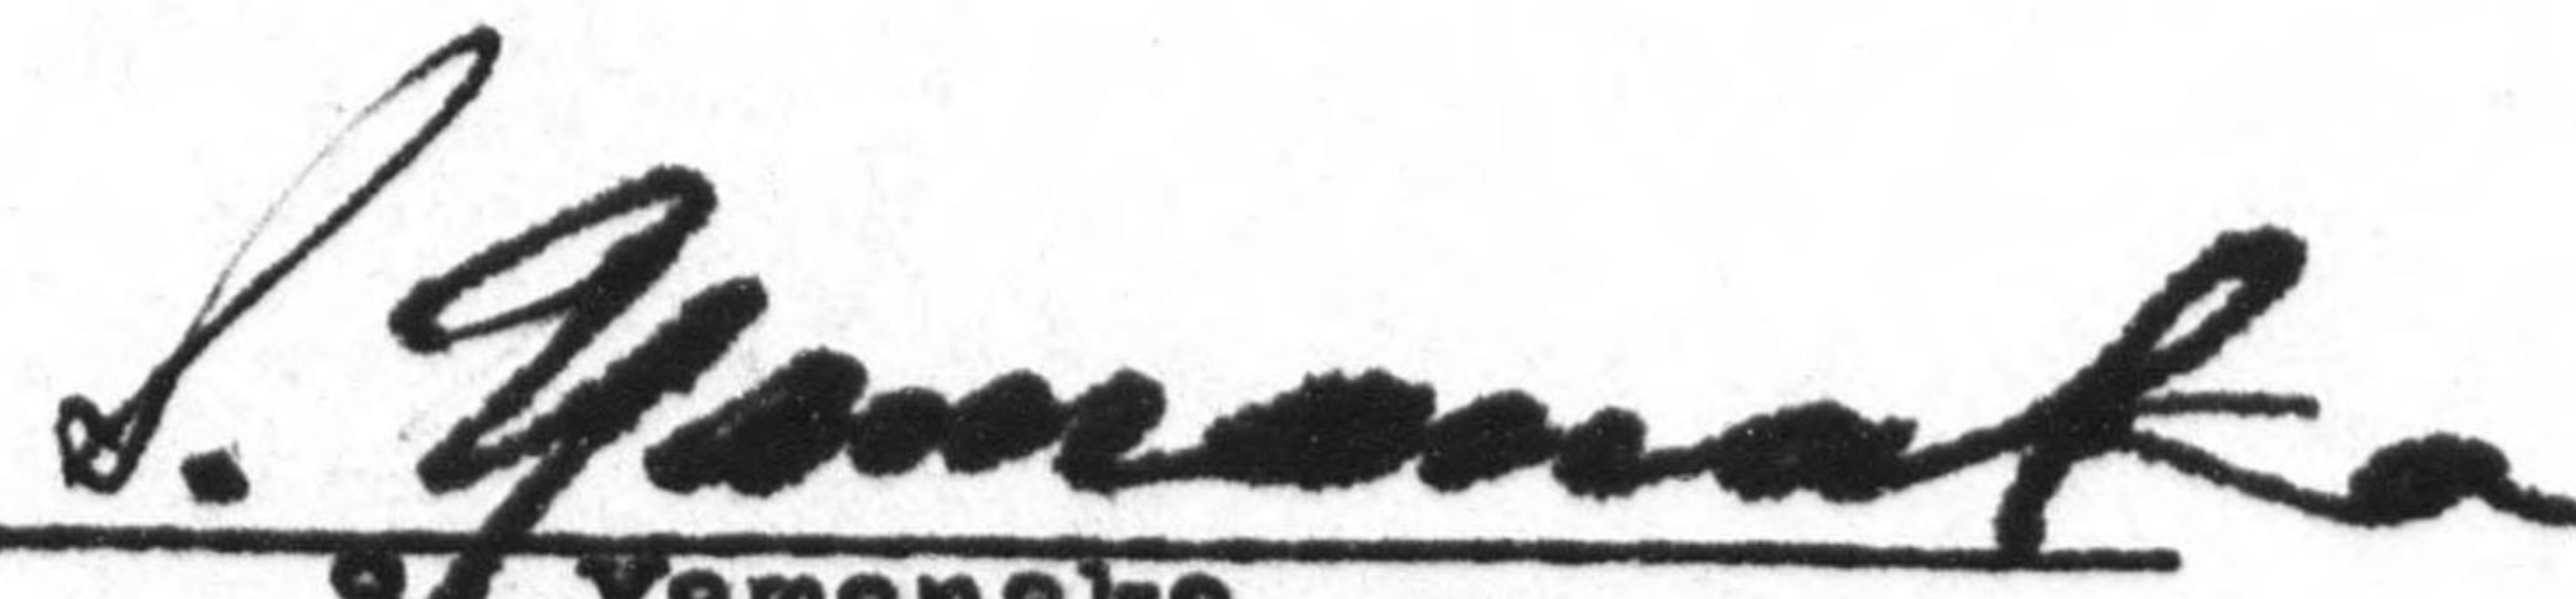

Mr. Clifford Strike and other three representatives of machine tool industries in America, Mr. Meiklejohn, GHQ, Lt. Col. Papem, the Eighth Army, Lt. Col. Nelson, I Corps, and Mr. Leif, Shiga Military Government Team, paid the visits to our works and surveyed the condition of the equipments designated for the reparation on February 10.

4. Application for the exemption of our Numazu Works from Reparation List

Regarding to the machineries and equipments which were used for the production of precision measuring machines and measuring tools in our Numazu Works, including 320 machines which were transferred into Seta Works, our company submitted an application to Shizuoka Military Government Team for the exemption of our Numazu Works from reparation program on February 21.

The production of civilian commodities in our plant, as you are aware of, entirely depends upon the retention of the abovementioned machines, so it is most desirable to us that the above application will be granted.

We earnestly beg your deep understanding and kind help on this matter as well as our application for the exemption of our works from reparation.

2. Operational Condition

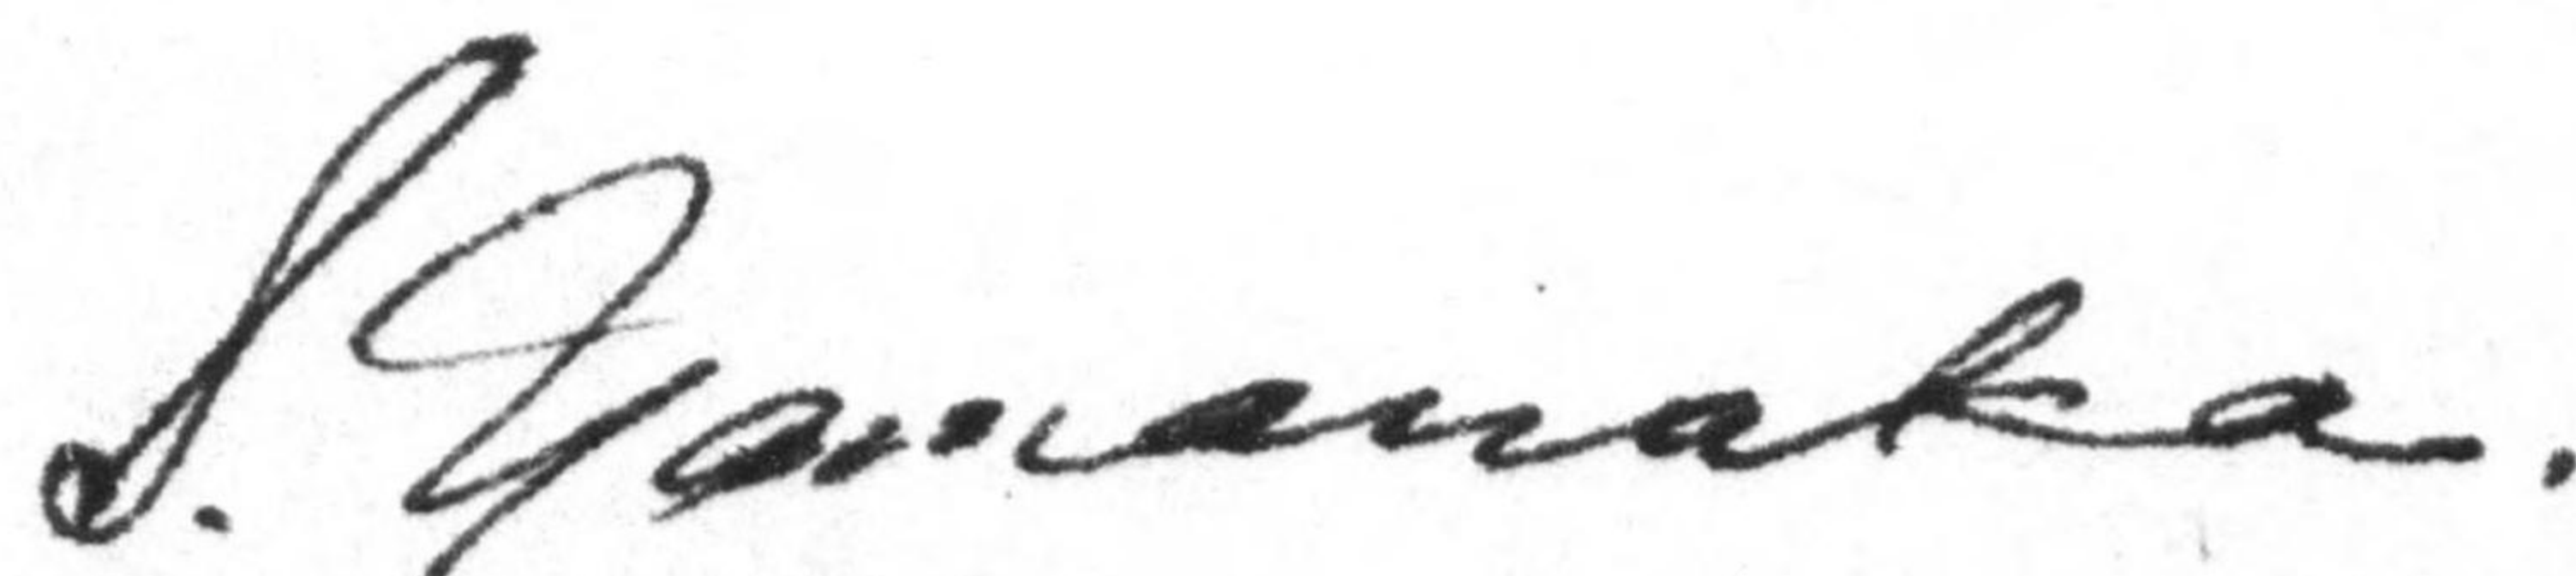

In succession to the previous month, we have exerted utmost efforts to increase output, but the production in this month, regret to say, could not be reached to the scheduled amount owing mainly to the unfavourable delivery of the semi-finished parts from our subsidiary factories into our plant on account of the year end and New Year holidays.

Number of employees at the end of this month counts 519, and average percentage of attendance through this month indicates 94.5 % .

3. Directors Changed

Fumio Tone, the president of this company, Futaki Nobu, the managing director, and Takenosuke Tateno, the managing adviser, resigned on January 2. Succeeding them, Teisuke Hayashi was appointed by the directors' meeting as the president, and Chisato Okada as the managing director on January 14. Simultaneously, S. Yamanaka, the manager of this works, and T. Sawai, the pre-manager of this works, were appointed by the shareholders' meeting as directors.

On the occasion of these managing staffs' change, we are determined to pay greater efforts to increase our production and to realize the rehabilitation of Japanese industry.

2. Operational Condition

Taking aim at overcoming the industrial crisis and reconstruction of Japanese economy, the trade union in our plant launched positively a greater production campaign starting from the beginning of this month.

Our managing staff and trade union, co-operating with each other, endeavoured to achieve the planned production which was decided by the management council of labor and capital in this plant.

Consequently, the output for this month was favourable, showing an all-time high record since our reconversion, or it reached 111 per cent of planned amount.

The greater production campaign will be continued until the end of March this year in order to conquer the "March Crisis".

Number of employees at the end of this month counts 528, and average percentage of attendance through this month indicates 96.1 %.

2. Operational Condition

Operational condition has showed favourably in general, and output in this works increased about 38 % in comparison with the previous month. Productional percentage of each item counts as follows.

Precision measuring machines	32 %
Measuring tools	31 %
Rolling-stock parts	36 %
Automobile parts	1 %

In the cause of the electric power control order issued at the end of this month, the production in this works was hindered considerably. It is anticipated that our production will be restrained to our anxiety in future by strengthening of the said control.

3. Recommended improvement

Visit paid to this plant by Mr. Meikeljohns

We were honoured by the visit of Mr. Meikeljohns, G H Q, Lt. Col. Papen, 8th Army, and Maj. Page, Mr. Leif and Mr. Innbe, Shiga Mil. Gov't Team, on 20 inst., who inspected minutely the condition of custody of equipments and machinery, and of production of civilian commodities in this plant.

We would earnestly beg in further, your kind consideration, so as to enable to hear prompt and favourable result in regard to our appli-

6) Our ranking promoted regarding to electric power control

In accordance with our application for promoting our ranking in regard to the electric power control in compliance with the importance of our plant, the Commerce and Industry Ministry, Kinki Regional Office decided to promote it to the second grade of A class (Ko-Ro) recently.

By this determination, we believe, the effect to our production by the electric power control will extremely be reduced in future.

2. Operational Condition

The arrangement of machinery equipments completed, the necessary employees fulfilled, the permitted products items finally made clear, and our managing staffs are active, and the state of production is pretty fair, especially that of precision measuring machines is holding more than 50 % to that of our works in the aggregate.

3. Recommended Improvement

a) Inventory Sheets submitted

By instruction of your Military Government Office, on August 7, we had been, with zeal, making inventory sheets of machineries of this works. And by kind direction of your Office, we could finish up inventory sheets of 1015 machineries and equipments, thus could submit whole of our inventory sheets, without fail, to your Military Government Office on August 31.

We thank you again for your kind direction to this matter.

b) Application for deletion from Reparation List

As we mentioned in our previous monthly report, we submitted to you an application for deletion of our plant from Reparation List, with recommendation of Kinki Regional Office attached, on 15 August.

We earnestly ask you, again, for your investigation and solicit your deep understanding and kind support on this matter.

c) Main visitors to this works

We were honoured by the visits of Captain Wilkenfeld on 19 August and of Mr. Leif on 29 August from your office to this works. They inspected existing condition of custody of machines and equipments, and of production of civilian commodities, who expressed deep satisfaction for them.

Mr. L. Kreaugel, a civilian attached to ESS, GHQ, Tokyo, paid a visit to this works on 8th August, inspecting the existing condition of production of precision measuring machines and measuring tools. He seemed to be especially interested in lapping technique of Block gauges, one of the most characterized products of this works.

2) Operational Condition

In succession to previous month, operational condition has showed favourable in general.

Besides measuring tools which so far has been the main products of this works, output of measuring machines, our characterized products, and rolling-stock parts, which being included in the permission for additional products items, have showed remarkable increase in this month.

3) Recommended Improvement

a) Application for deletion from Reparation List

Japanese Government, in view of importance of the experiences and superior techniques of this works in producing precision measuring machines and measuring tools, for the establishment of Japan's future Precision Machine Industry, has selected us as one of the most essential plants listed in the application that will be submitted to SCAP for deletion from reparation purposes.

We are at present preparing for the documents in respect of equipments and others in this works, which is necessary for the application of deletion from reparation list, and which we would like to submit to you formally through Japanese Government Organs concerned.

We beg earnestly for your investigation and solicit your deep understanding and kind support on this matter.

b) Arrangement of Optical Shop is about to complete

Arrangement of Optical Shop, in which indispensable items for precision machine, such as microscope and others are to be produced, is going on simultaneously to advance of production of precision measuring machines.

Arrangement of Optical Shop has almost been completed before the end of this month, and preparation for operation of the Shop is going on at present.

c) Second advertisement for employment of workers

As the installation of machines transferred from Numazu into this works has almost completed, and permission for the additional products items have been granted on 24 June that we are now in the position to assume the whole operation of this works.

In order to maintain operation satisfactory, however, it is necessitated to have more than 350 workers to be added.

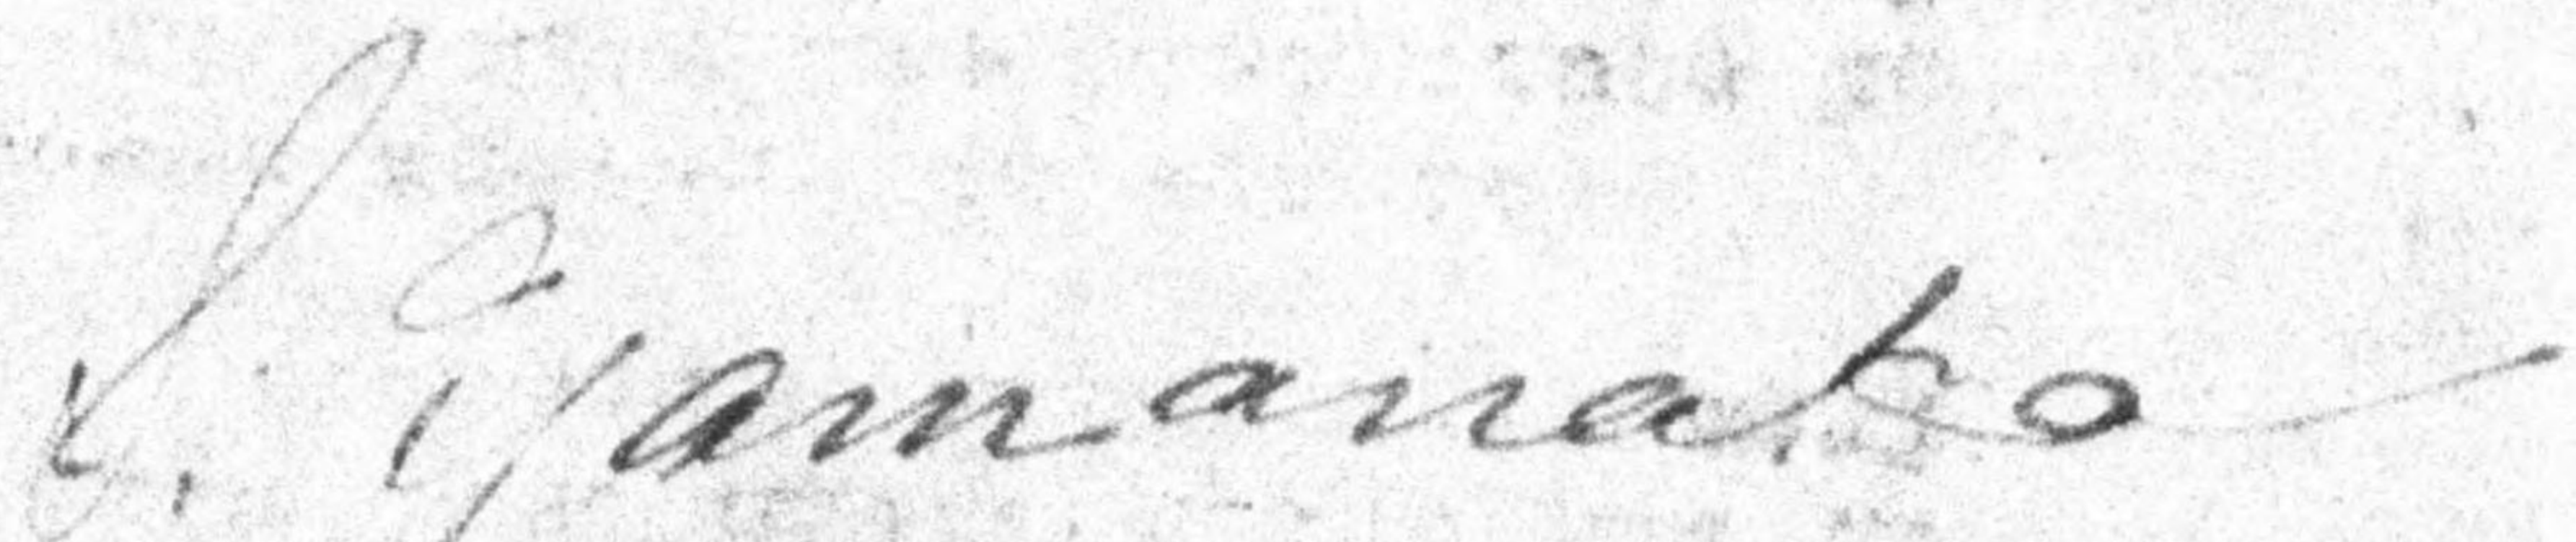

For this, we have begun second advertizement~~es~~ for employment of workers on newspaper in this month.

Number of employees at the end of this month counts 413.

d) Manager of this works transferred

Mr. T. Sawai, manager of this works has been transferred his post as manager to our Okegawa Works, Saitama-ken, and Mr. Shogoro Yamanaka, who was the chief of General Affairs Department, Tokyo Head Office, was named as the manager of this works, and arrived here on 25th July.

B) Operational Condition

a) In succession to previous month, operational condition has showed favourable in general. We are convinced that the production of civilian commodities in this works, at length, seem to have been placed on the normal course .

b) Numazu Works have been designated for reparation purposes

In conformity with the instruction and by the memorandum of Allied Forces's Headquarters, complying with the custody and management of aircraft and weapon production plants, the Numazu Works, our sister works, have been designated for custody of the works.

This works, however, having granted the permission from both of the Headquarters, 30th Military Government Group and the Yamanashi Detachment of the 30th Military Government Company, transferred the machines from Numazu and Minobu works to this works , and which have been installed with the machines originally owned by this works. Which at present, are in full drive for production of essential civilian commodities.

Among our present output, exchange goods for imports are produced by order of Department of Commerce and Industry. We, however, are in intention to continue operation of this works in the future as standing, and it is our earnest desire to meet your kind approval and beg your deep understanding and support on this matter.

c) Production of exchange goods for imports are in progress

Department of Commerce and Industry have given us an order, in the previous month, for the production of exchange goods for imports. Production of which continued successively in this month.

As to the products items, which were stated in our last monthly report, we have further submitted an additional application for the products of exports goods to the said authorities.

The number of machines finished in this month are as follows.

Description	Quantity ordered	Quantity additionally applied	Total	Quantity completed in this month	Total

3. Recommended Improvement

a) The first visit to this works by Military Government Officer

Your first time visit to this works on 21 June, was received with our hearty welcome and was treated as a great honour and a memorial event in the history of this works.

Especially, your speech addressed to our employees has contributed a great courage to them, which, we believe, will show remarkable effects upon the future results of production in this works.

b) Permission granted for the items of additional application

We have received a letter from you advising us that Headquarters I Corps have granted us permission for our additional application for the products of essential civilian commodities, which had been presented by us through your good offices, to the said Headquarters on 4 March 1946.

We would like to express our hearty thanks to you for your great help rendered upon us in connection with this matter.

We are in determination to say that in paying best of our effort for the production of the permitted items, especially for the products of rolling-stock parts, we will strive for to contribute to the rehabilitation of industry of Japan.

c) Permission granted for the transfer of 40 Bench Lathes located in our Tokyo Works into this works

In order to fill up the necessity of production of precision measuring machines by this works, we presented our application for the permission of transfer of 40 bench lathes located in our Tokyo works into this works to Headquarters 32nd Military Government Company and we have received the permission granted for that by the said Headquarters dated June 4, 1946.

We will, however, strictly observe the provisions described in the permission, and to utilize the machines most effectively for the purpose of producing essential civilian commodities.

d) Labour Union Organized

A Labour union has been organized among the workers of this works, and inaugural ceremony of which was held on June 8. It is our desire that the union will grow up in sound and smooth, and by keeping close touch with the union we expect to bring a democratic development of the enterprise.

(4) Condition of custody and control of the plant

Same as previous week. No accidents.

(5) Condition of custody of machines

All machines are generally in good condition.

(6) Second advertizement for employment of workers

As the installation of machines transfered from Numazu into this works has almost completed, and permission for the additional products items have been granted that we are now in the position to assume the whole operation of this works.

In order to maintain operation satisfactory, however, it is necessitated to have more than 350 workers to be added.

For this, we have begun second advertizement for employment of workers on newspapers from this week, for which our staffs are busily occupied for the examination of applicants.
