

Analysis of user preferences proved that 23% of registered users in Greek Wikipedia are female. Biographies in Greek wikipedia are 12.5 % for female persons, no difference with other wikipedias.

69

20 people contributed in an Edit-a-thon that lasted more than 4 hours and created and improved 69 articles related to women. At least half of the participants were female. Awards were given to the top 3 contributors.

Collaborating with female oriented tech groups is good way to decrease the gender bias in content and gender gap participation.
