**SUMMARY
FISCAL YEAR
1966**

UNITED STATES DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

WASHINGTON, D.C.

INTRODUCTION

This publication combines data which were previously issued in separate publications. It brings together data collected by county and State Agricultural Stabilization and Conservation Committees relative to conservation measures performed on farms participating in the Agricultural Conservation Program, for the periods July 1, 1965, through June 30, 1966, and July 1, 1964, through June 30, 1965.

The Agricultural Conservation Program shares with individuals the cost of carrying out soil and water conservation measures intended to (1) protect land from wind and water erosion, (2) improve the productivity of the Nation's soil resources, and (3) protect and improve the source, flow and use of water for agricultural purposes. Through this program, the Federal Government offers to share with farmers the cost of conservation practices authorized for use as a means for achieving the above purposes. Costs are shared for those approved conservation practices on individual farms, for which cost-sharing is requested, and for which the work is performed according to recognized standards.

For the period July 1, 1965, through June 30, 1966, summaries are presented on a state-by-state basis in accordance with practice groupings that correspond to program administration and operations. Additional tables are included to permit analysis of the various conservation practices and program provisions, as well as information with respect to participation, assistance, and pooling agreements. Also included are data for the period July 1, 1964, through June 30, 1965, for those conservation measures which were paid from 1965 program funds. The amount of assistance does not include any funds for SCI and technical services.

Information for previous years has been published in separate issues of the Agricultural Conservation Program Summary by States and Statistical Summary, in "Agricultural Statistics", and in annual reports of the Chief of the Agricultural Adjustment Agency and the Administrator of the Production and Marketing Administration and other Agricultural Conservation Program publications.
