DIRECTIONS.

Open the can at the LETTERED END by cutting the tin nearly around and let it remain partly open.

To remove the Milk, use a *dry spoon*. For Custards Puddings, &c., add water in the proportion of three pints to the pound, to suit the taste; it can be used in Tea and Coffee without diluting.

For Ice Cream, dilute with water in such proportions as to suit the taste, and it is ready for the Freezer.

SUGAR OF MILK may appear granulated or crystallized in lumps; it dissolves in warm or cold water. This proves the Milk is pure and not having undergone any change before or during the process; the crystals readily dissolve.
