THORBURN'S SPECIAL COLLECTIONS OF CHOICE BULBS

THESE ASSORTMENTS ARE MADE UP OF THE FINEST STANDARD SORTS,
AND MAY BE RELIED UPON TO GIVE SATISFACTION.

NO. 1. Collection of Choice Bulbs for House Culture.

PRICE, \$2.50.

12 White Roman Hyacinths,	30 Mixed Crocus,	12 Mixed Spanish Iris,
6 Fine Named Dutch Hyacinths,	6 Polyanthus Narcissus,	6 Campernelle Jonquils,
6 Fine Mixed Dutch Hyacinths,	6 Trumpet Narcissus Princeps,	6 Scilla Sibirica,
12 Fine Mixed Single Tulips,	6 Double Narcissus Van Sion,	6 Freesia refracta.
12 Fine Mixed Double Tulips,	6 Poet's Narcissus,	

NO. 2. Collection of Choice Bulbs for House Culture.

PRICE, \$4.75.

Consists of the same varieties as Collection NO. 1, but with double the number of each sort.

NO. 3. Collection of Choice Bulbs for House Culture.

PRICE, \$9.

Consists of the same varieties as Collection NO. 1, but with four times the number of each sort.

NO. 4. Collection of Hardy Bulbs for Outdoor Culture.

PRICE, \$2.

6 Mixed Double Red Hyacinths,	50 Mixed Crocus,	6 Double White Narcissus,
6 Mixed Single Blue Hyacinths,	12 Mixed Double Anemones,	6 Butter and Eggs Narcissus,
6 Mixed Single White Hyacinths,	1 Crown Imperial,	6 Scilla campanulata,
24 Mixed Early Tulips,	12 Spanish Iris,	3 Bulbocodium vernum.

NO. 5. Collection of Hardy Bulbs for Outdoor Culture.

PRICE, \$3.75.

Consists of the same varieties as NO. 4, but with double the number of each sort.

NO. 6. Collection of Hardy Bulbs for Outdoor Culture.

PRICE, \$7.

Consists of same varieties as NO. 4, but with four times the number of each sort.

NO. 7. CASE OF ASSORTED BULBS.

Suitable for Outdoor Planting or the Greenhouse, containing

100 FINE NAMED HYACINTHS, as follows:

15 Double Named Red and Pink in 6 sorts.	20 Single Named Red and Pink in 8 sorts.
10 Double Named White in 4 sorts.	10 Single Named White in 4 sorts.
10 Double Named Blue in 4 sorts.	20 Single Named Blue in 8 sorts.
5 Double Named Yellow in 2 sorts.	10 Single Named Yellow in 4 sorts.

200 FINE MIXED HYACINTHS, as follows:

30 Double Mixed Red Hyacinths.	30 Double Mixed Blue Hyacinths.	70 Single Mixed White Hyacinths.
30 Double Mixed White Hyacinths	20 Single Mixed Red Hyacinths.	20 Single Mixed Blue Hyacinths.

500 FINE TULIPS, as follows:

200 Mixed Early Tulips.	50 Due van Thol Tulips, Scarlet.	30 Single White Tulips.
100 Mixed Double Tulips.	30 Single Yellow Tulips.	40 Single Red Tulips.
50 Mixed Parrot Tulips.		

OTHER BULBS, as follows:

500 Assorted Crocus, 5 colors.	50 Mixed Double Ranunculus.	100 Campernelle Jonquils.
25 Mixed Polyanthus Narcissus.	25 English Iris.	100 Scilla Sibirica.
100 Single Poet's Narcissus.	100 Mixed Spanish Iris.	50 Scilla campanulata.
50 Mixed Double Anemone.	10 Mixed Crown Imperials.	

PRICE, \$25 PER CASE.

CATALOGUE OF

Bulbs and Flowering Roots for Fall Planting

AUGUST 20, 1898

OUR WELL-KNOWN STORE in John street—a landmark in the history of New York—which we had occupied for the past 65 years, had served its time. We have therefore removed to the larger and more commodious building which we now occupy, at **36 Cortlandt Street.**

The growing of Bulbs for winter and spring-flowering is very interesting and very easy. If the directions given in this Catalogue are observed, there need be no disappointment with the results. Many of our most beautiful flowers are produced from bulbs, and they may be grown indoors in the winter months, when flowers are most appreciated. By successive plantings a constant supply of flowers may be had from December till May. The finest outdoor displays of the early spring months are also from bulbs planted in the autumn. There is nothing more refreshing than the first Snowdrop of spring. It appears before the snow is right off the ground, and is quickly followed by the Chionodoxa, or "Glory-of-the-Snow," the bright and variously colored Crocuses and Seillas and the lovely Daffodils. Then come the gorgeous lawn displays of Hyacinths and Tulips. All these are produced from bulbs planted in the fall.

We invite special attention to the collections of bulbs offered on the second page of cover, both for indoor and outdoor cultivation. They contain only sorts that will insure satisfaction. The cultural directions found under the respective headings are also worthy of careful attention.

Our Bulbs are all selected, and from the best growers, and should not be confounded with the cheap "case" bulbs sent to this country on speculation and often sold at auction, and otherwise, at very low prices.

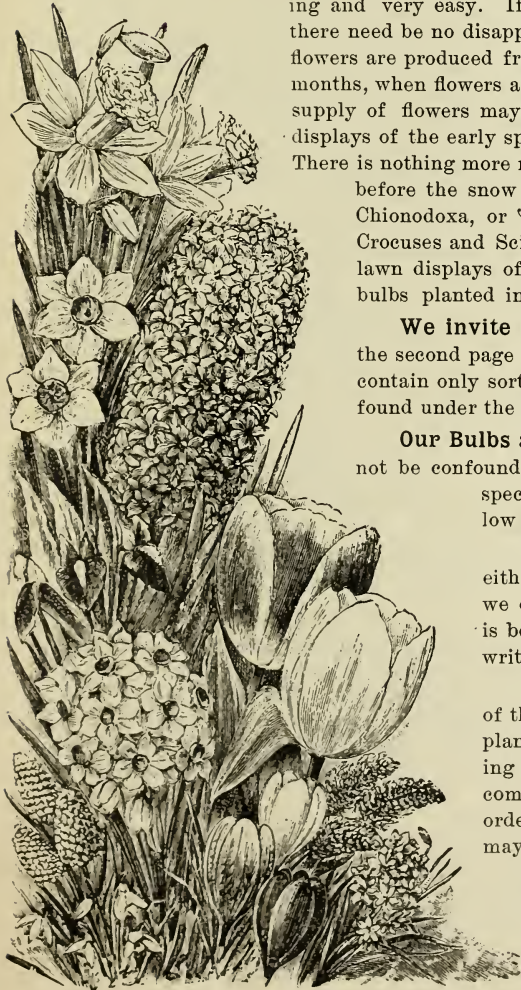

NAME and ADDRESS. We often receive orders with either the name or the address of the sender omitted. As we can do nothing with them, the customer thinks his order is being neglected. We therefore beg our correspondents to write on each order their name and full address.

ORDERS should be sent as soon as possible after receipt of this Catalogue. The bulbs will be sent in proper time for planting. They are ready from August to October, according to the time of ripening and the country from which they come. Orders booked earliest are surest of being filled as ordered. If left too late, the supply of some of the varieties may be exhausted.

Please address all orders and remittances to

J. M. THORBURN & CO.

36 CORTLANDT STREET, NEW YORK

HYACINTHS.

Hyacinths are ready for delivery in September.

The **Hyacinth** is one of the most popular and beautiful of spring-flowering plants for indoor and outdoor decorations. By careful management in keeping up a succession, they may be had in flower from the beginning of winter to the end of May. For a spring display in the open ground they are unexcelled. Brilliant effects can be obtained by massing different colors in varieties that grow about the same height and bloom at the same time. We furnish very large numbers for this purpose to public parks and cemeteries, and we shall be pleased to recommend to anyone suitable sorts, when desired.

Group of Hyacinths.

OUTSIDE CULTURE.—October is the month to plant Hyacinths outside. They succeed best in a light soil and in a sunny situation. If the soil is naturally heavy some sand should be mixed with it; and if the beds have been occupied with other plants throughout the summer, some well-rotted cow manure should be added. The soil should be well dug to a depth of 14 inches, and raised from 2 to 4 inches above the level of the walk. The bulbs should be planted evenly, about 6 inches deep to the bottom of the bulb, and from 6 to 7 inches apart; if planted at uneven depths they

will not bloom at the same time, but irregularly. Care must be taken not to press the earth too firmly around and over the bulbs; some successful gardeners follow the plan of setting each bulb in a handful of clean sand, which insures proper drainage. After the ground has become frozen in early winter, cover with a few inches of dry litter, evergreen boughs or coarse manure. If this covering be applied before freezing weather, it renders the bulbs liable to the predations of field mice, which may burrow in it. On the inside of the back cover of this Catalogue we give suggestions for a few designs suitable for Hyacinth beds. They are all designs in which we have seen splendid effects produced.

CULTURE IN POTS. For growing in pots, large, selected, named varieties should be used. They should be potted singly in 5-inch or 6-inch pots. Three bulbs in a 7-inch pot are very effective. The best potting compost is fibry loam and manure in about equal parts, with some river sand intermixed. The pots should be filled lightly, and the bulb pressed into the soil so that its base is firmly fixed. About one-third of the bulbs should remain above the soil. The pots should then be buried in the open ground to the depth of six inches, and left there for five or six weeks, until the pots are well filled with roots. They may then be taken into the house, where the warmth will soon bring them into flower. Where a succession is desired, it is best to pot at intervals from September till the end of November. Plenty of water should be always applied, and manure-water is beneficial after the flower-spikes appear.

CULTURE IN GLASSES. Single varieties are better adapted for culture in glasses than double ones. The bulb should be placed so that the base is just in contact with the water. Soft rain-water should be used, and a little charcoal might be placed in it to keep it pure. The glasses should be kept in a cool, dark closet for ten or twelve days, until roots are formed, and then exposed to the light and air as much as possible. Do not place them near gas light. In very cold weather the glasses should be removed from the window, as the bulbs cannot stand frost. The water should never be allowed to freeze, and it should be changed every two or three days.

Persons unacquainted with the different varieties will do well to leave the selection to us, only specifying in their orders whether the bulbs are wanted for pot, glass or garden culture.

We invite special attention to the assortments of named Hyacinths of our selection offered on page 4, and to the Hyacinth Glasses which are described at the end of the Catalogue.

The names of our Hyacinths and Tulips are those given to them by the originators in Holland.

SELECT NAMED HYACINTHS.

The Single-flowered varieties are generally more effective than the Double ones. They also, as a rule, succeed better in glasses. The Double varieties are distinguished by an asterisk (*), and those of them that do well in water by two asterisks (**).

The sorts printed in **boldface type** are most largely used for bedding.

If ordered by mail, please add 15 cents per dozen for postage.

NAMED BLUE HYACINTHS.

MIXED HYACINTHS IN SEPARATE COLORS.

Suitable either for Forcing or Bedding.

Our Mixed Hyacinths should not be confounded with the small-sized, low-priced mixtures often sold. Our bulbs are all large size, measuring 6 inches and over in circumference. Being furnished in so many separate colors, splendid bedding effects may be produced with them. They are also admirably adapted for forcing in the greenhouse for winter cut-flowers.

If ordered by mail, add 15 cents per dozen for postage.

ROMAN HYACINTHS.

Extensively used by florists for forcing for cut-flowers. The flowers are pure white, delightfully fragrant, and each bulb will throw up from three to four spikes. For forcing, three or four bulbs are generally planted in a suitable pot, in good soil (as recommended for other varieties). The pots must be kept in a cool and dark place until filled with roots, when the flower-spikes can be rapidly developed by exposure to light and moderate heat. They are very easily grown and extremely early; and by making successive plantings they may be had in flower all through the winter. The blue and rose Roman Hyacinths flower from one to two weeks later than the white variety.

For this purpose they are the best and most popular of

Single Blue Roman		05	50 2 50

WHITE ITALIAN HYACINTHS.

These are, like the Roman Hyacinths, also grown largely by florists for cutting. The flowers are pure white, single, very graceful and fragrant, and produced abundantly. They are hardier than the Romans, and may be planted outside in the fall for flowers for early spring cutting. 8 cts. each, 60 cts. per dozen, \$3 per 100.

MINIATURE HYACINTHS.

These are also known as "Dutch Romans" and "Pan Hyacinths." They are very suitable for growing in groups in pots or earthen pans, as shown in the illustration on page 2. We offer them in separate colors, and also mixed, as follows:

Pure White,	Dark Red,	Dark Blue,
Cream White,	Rosy Red,	Light Blue.
Mixed, all colors.		

Price 40 cts. per dozen, \$2.25 per 100.

TULIPS.

 Tulips are Ready for Delivery in September.

For beauty of form and brilliancy of coloring, Tulips are unequalled. For bedding they are the most popular and effective of all hardy bulbous plants. In our descriptions we give the color and average height to which they grow, so that purchasers can select suitable sorts for forming display beds in design. The most gorgeous effects can be produced by harmonious massing of contrasting colors. For pot-culture and forcing for winter cut-flowers, they are also invaluable.

Single Tulips.

CULTURE. The cultural directions given for Hyacinths on page 2 are equally applicable to Tulips, except that the bulbs, being smaller, must not be planted quite so deep. Four inches to the bottom of the bulb is deep enough, and a distance of 5 or 6 inches between the bulbs is sufficient. They may be planted in October or November, before the ground freezes. A little sand around each bulb is generally recommended, but in light, sandy soil this may be dispensed with. For pot-culture a compost of two parts loam to one part of light manure, with some sand intermixed, is suitable. From 3 to 5 bulbs, according to size, in a 5-inch pot, are very effective. The pots should be buried until the bulbs are well rooted, in the manner recommended for Hyacinths. Most of the varieties named below are equally well adapted for pot-culture or the open border.

SINGLE EARLY TULIPS.

 Six of a kind at dozen rates, 25 at 100 rates.

Single Late Tulip.

SINGLE LATE-FLOWERING TULIPS.

These are all tall-growing, May-flowering Tulips, with very large, most brilliantly colored flowers of perfect form. They will be found invaluable for garden work. The named Bizarres and Bybloems are the sorts grown by florists for show purposes.

		Per doz.	100
Bizarres. Crimson, violet-purple, etc., on yellow ground (25 named varieties)	each 6c.	\$0 50	\$3 00
Bybloems. Purple, violet and maroon, on white ground (25 named varieties)	each 6c.	50	3 00
“ Rosy on white (25 named varieties)	each 6c.	50	3 00
Breeders. Assorted, separate colors.	each 8c.	75	5 00
Mixed Bizarres, Bybloems and Breeders, see under head “Mixed Tulips,” page 10.			
Bouton d'Or. The only late pure deep yellow; very beautiful; fine for cutting.	each 5c.	40	2 50
Gesneriana. Dazzling scarlet, black center; very effective in beds, also fine for cutting.	.3 for 10c.	30	1 50
Golden Crown. Deep yellow, edged red; fine for cutting	.3 for 10c.	25	1 25
Golden Eagle or Yellow Gesneriana. Deep yellow, with narrow orange-red fringe.	each 5c.	35	2 00
Isabella. Rose and white; very fine.	each 10c.	1 00	
Picotee (Maiden's Blush). Pure white, faintly edged pink. Flowers long, narrowing to the center and reflexing at the top	each 10c.	1 00	

DOUBLE TULIPS.

The Double Tulips come into bloom a little later than the single varieties. They are splendid for bedding, and the flowers last longer in bloom than the single sorts. Some of the sorts are quite dwarf.

If ordered by mail, add 6 cents per dozen for postage.

Double Tulips.

	Height, inches	Per doz.	100
Agnes. Very brilliant red; early; quite dwarf	.5	each 5c.	\$0 35 \$2 00

DARWIN TULIPS.

These belong to the class of single late-flowering Tulips (page 8), being in fact modern forms of *Gesneriana*. They grow very tall, with large flowers of fine form. Being borne on very long stems, they are excellent for cutting to put in vases for house decoration. They are all single, self-colored, and surpass all others in brilliancy and variety of coloring. They are also most effective for bedding. Besides the mixture, we offer the following named sorts:

	Each	Doz.	Each	Doz.
Beauty. Dark red.....	\$0 08	\$0 60	\$0 08	\$0 60
Bessonia delle Torre. Lilac-violet.....	08	60	08	60

Prima Donna. Dark brown-red.....	08	60	08	60
Salvreda Taxadra. Light violet.....	08	60	08	60
William III. Cerise.....	08	60	08	60
Zeno. Brown-red.....	08	60	08	60
Mixed, all colors. 35 cts. per doz., \$2.25 per 100, \$20 per 1,000.				

PARROT TULIPS.

For outdoor cultivation. The petals of these have feathered edges, and in addition to other colors combine shades of green—a peculiarity confined to this class. The flowers are very singular and picturesque, of large size and brilliant color, and form very effective groups for the flower border. *Very late in flowering.*

If ordered by mail, add 6 cents per dozen for postage.

MIXED TULIPS.

For bedding. Planted in large masses, these make a magnificent show, and, being inexpensive, should be largely used. Our special mixtures of Early Single and Early Double Tulips are made up of the finest bulbs and the brightest colors. If planted in large beds they will produce an exceedingly beautiful and lively effect.

If ordered by mail, add 6 cents per dozen for postage.

Bed of Tulips.

TULIP BEDS.

It is to be regretted that the gorgeous displays presented by the Tulip beds of our public parks should so seldom be seen on our private lawns. Tulips are so hardy and of such easy culture that failure to obtain satisfactory results is possible only by selecting unsuitable *sorts*. In order to obviate this difficulty, we give the following groups of sorts that bloom at the same time and are of equal height. Any of these groups will form an effective combination. After the Tulips have flowered, the beds can be used for bedding plants, such as Geraniums, etc., to full advantage. Rich soil is necessary.

It is advisable to order as soon as possible after receipt of this Catalogue, as later on in the season we may be sold out of some varieties, owing to an unusual demand for them. In that case we shall substitute equally fine sorts of same color and time of bloom.

GROUPS OF TULIPS THAT WILL FORM EFFECTIVE COMBINATIONS.

SINGLE TULIPS.

- { Duc van Thol Scarlet.
- { La Reine.
- { L'Immaculee.
- { Duc van Thol Scarlet.
- { Rose Gris-de-lin.

Hermetii grandiflorum. Makes a splendid pot-plant for winter blooming in the house, the handsome, large, pure white flowers being produced abundantly and for a long time; largely used by florists for forcing for cut-flowers.....	05	30	1 50

Types of Narcissi.

NARCISSUS.

Narcissi are Ready for Delivery in September.

The very beautiful species and varieties of Narcissus are among the most popular and largely grown of spring-flowering bulbs, and that deservedly, too, for they are certainly "the fairest among them all." Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them. To know them is to love them, and to love them is a liberal education.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, or lakes, or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs. With the exception of the Polyanthus section, they are all perfectly hardy.

Narcissi are also very suitable for growing in pots, requiring about the same treatment as hyacinths, with 3 or 4 bulbs in a 5-inch pot. Some of the varieties are grown in large numbers by florists for winter cut-flowers.

SINGLE NARCISSUS, or DAFFODILS.

If ordered by mail, add 13 cents per dozen for postage.

	Each	Per doz.	100
Achilles. Long yellow trumpet; handsome; very early	\$0 05	\$0 50	\$3 00

Silver Jonquil (<i>Narcissus tenuior</i>).....	08	75	4 50

LILIES.

For stateliness of habit, beauty of form, and variety of coloring, the Lily is without a rival among bulbous plants. Many of the species are delightfully fragrant. Though they may nearly all be called hardy, it is well to protect them against frost in winter by a covering of ashes or litter. They are easily grown, and require little care. With the exception of *L. candidum* and *L. tigrinum*, which prefer a rich, deep loam, they all do best in a light, well-drained soil. Some peat or leaf mould may be used to advantage. *L. auratum* cannot bear manure, but thrives in ordinary light soil. They all prefer a partial shade, and the taller sorts must have protection from high winds. Many of the stronger-growing kinds are well-adapted for planting among shrubs. Most of them make splendid conservatory plants. For pot-culture, a compost of loam and peat in equal parts, with the addition of some sand, is recommended.

Lilium Harrisii and *Candidum* ready in August; all others not till November.

If ordered by mail, add 3 cents each for those marked (*); others from 1 to 2 cents each for postage.

Lilium Washingtonianum.

	Each	Per doz
* Atrosanguineum (<i>Fulgens</i>). Dark crimson, black spots; very handsome	\$0 25	\$2 50

LILIUM HARRISII.

(BERMUDA EASTER LILY.)

Bulbs Ready Now.

The Bermuda Easter Lily is perhaps the finest and most popular of winter-blooming plants. The large, handsome, pure white, trumpet-shaped flowers are very sweet-scented and of great substance, and last a long time after cutting. Its stately and graceful habit renders it a perfect pot-plant for table or window decorations. It gets its popular name from the fact that it is so largely used for church decoration at Easter. It is easily grown and can be forced into flower in a remarkably short time. It is also well adapted to garden culture, but in this latitude the bulbs should have a good covering of ashes or litter to protect them over winter.

If ordered by mail, add from 10 to 20 cents per dozen for postage, according to size.

	Each	Per doz.	100

Lilium Harrisii.

CHINESE SACRED LILY.

(THE WATER-FAIRY FLOWER.)

Ready in September.

12 cts. each, \$1.25 per dozen.

If ordered by mail, add 30 cents per dozen for postage.

A variety of the Polyanthus Narcissus, imported from China. The Chinese have the following interesting fable connected with this flower:

“Once upon a time a father left his property to his two sons, with the understanding that it should be equally divided; but the elder son seized all the tillable land and left the younger nothing but an acre covered with rocks and water. The younger son, failing to obtain justice, sat at the water’s edge bemoaning his misfortune. A benevolent fairy appeared, and, giving him these Narcissus bulbs, told him to drop them into the water. Shortly afterward their flowers were developed, and the neighbors crowded to see the fairy’s gift. In the course of a few years the badly treated brother accumulated a fortune by the rapid increase and sale of his bulbs. Then the elder brother, envious of the prosperity of the younger, bought up great numbers of the bulbs—hoping to get a monopoly by getting all of them—at so heavy a price that he was obliged to mortgage his property to procure funds for the purpose. He planted all his good land with bulbs, but they soon began to die, as they cannot live long out of water. He was ruined, while his brother, who had bought the mortgage, foreclosed it, and became possessed of the whole estate in time to plant some of the dying bulbs in the watery acre.”

The bulbs should be placed from 3 to 6 in a bowl or glass dish of water which has been partly filled with pebbles, some of which place over the bulb so as to prevent them from floating. The water should be tepid and changed every two days. Submerge the bulb entirely, and place in a sunny window in a cool room.

12 cts. each, \$1.25 per dozen.

Chinese Sacred Lily.

LILIES, continued—BEAUTIFUL JAPAN LILIES.

These do not generally arrive till NOVEMBER. We import our supply direct from Japan every year. Every garden should have some of these most beautiful and easily-grown Lilies.

Lilium Auratum.

☞ Postage on these varies from 2 cents to 10 cents on each, according to size.

Auratum (Golden-Banded Lily). The grandest of all hardy Lilies; flowers white, spotted with maroon, having a bright yellow band through the center of each petal. The plant grows from 3 to 6 feet high.

7 to 9 inches in circumference. 10 cts. each, \$1 per dozen, \$6 per 100.

9 to 11 inches in circumference. 15 cts. each, \$1.50 per dozen, \$10 per 100.

11 to 13 inches in circumference. 25 cts. each, \$2.50 per dozen, \$14 per 100.

Auratum macranthum, or platyphyllum. A splendid variety of the above, with much larger flowers; of perfect form and great substance; 5 to 8 feet. 40 cts. each, \$4 per doz.

Auratum rubro vittatum. Enormous flowers, sometimes measuring 10 inches across; pure white, beautifully spotted, and with a deep crimson stripe through center of each petal; very fragrant. 75 cts. each, \$8 per doz.

Auratum pictum. Flowers like those of the common Auratum, but with larger spots; very beautiful. Has larger dots of red than the common Auratum. 50 cts. each, \$5 per doz.

Auratum Wittei. Very large, pure white flowers, with raised spots of satiny white; a grand Lily; 4 to 6 feet. 75 cts. each, \$7.50 per doz.

	Each	Per doz.
Auratum Virginale. Very large, pure white flowers, with yellow band through center of each petal; a magnificent variety, growing from 4 to 6 feet high.....	\$0 75	\$7 50
Speciosum album præcox. Beautiful, pure white flowers, of large size; 2 to 4 feet high; one of the handsomest and easiest grown Lilies we have	25	2 50

Krameri. White, slightly tinged with red; sweet-scented.....	15	1 50
Leichtlinii. Orange-red, with crimson spots; 2 to 3 feet high.....	25	2 50
“ Canary Yellow. Like above, but in color pure canary yellow.....	40	4 00

LILY-OF-THE-VALLEY. (CONVALLARIA MAJALIS.)

Ready in November.

One of the most beautiful and admired spring-flowering plants, and universally sought for its neat and chaste outline and delicate odor. The growth is close, dwarf and compact, and the plant is hardy and permanent. It is now a most popular plant for forcing, which is easily done by planting the pips in pots, from 6 to 12 in each, watering freely, keeping in a cold cellar, and starting from week to week, to keep up a succession. They generally flower in three or four weeks after planting. They require a considerable amount of heat to start them.

Convallaria majalis. White flowers; fine, large clumps, with 15 or more flowering pips on each. Fine for planting outside in shaded positions, and for naturalizing by the side of streams or wood walks. 30 cts. each, \$3 per doz.

“ “ Strong pips for forcing. 50 cts. per bundle of 25, \$1.75 per 100, \$14 per 1,000.

ARUMS.

Ready for shipment in September and October.

A genus of curious and ornamental perennials, with peculiar and distinct foliage and flowers. They make handsome pot-plants, and are also very effective in sub-tropical gardening. *A. Dracunculus* is hardy, and may be left in the ground over winter, with a little covering. The others should be potted in the autumn and kept dormant till spring. They are all of easy cultivation, requiring rich soil and plenty of water during the growing season. A compost of rich loam, with a third of well-rotted manure and some sand, is very suitable.

If ordered by mail, add 3 cents each for postage.

	Each	Per doz.
Crinitum. Marble stems; broad, flesh-colored, spotted flowers, covered with hairs.....	\$0 40	\$4 00
Cornutum (Red Calla). Flowers red, spotted black; stems mottled; a handsome pot-plant	10	1 00
Dracunculus (Dragon-flower). A striking and very ornamental plant for pots or garden. It grows to a height of 3 feet, with mottled stem and handsome foliage, and very large brownish black flowers; hardy.....	15	1 50
Italicum. A hardy species from the Channel Islands, with creamy white flowers	08	75
Maculatum. A fine decorative plant; flowers white; green foliage, spotted black.....	10	1 00
Palæstinum sanctum. The new <i>Black Calla</i> from the Lebanon Mountains; a splendid pot and chamber plant, with fine, dark green foliage, large black spathe and black spadix	15	1 50

Arum Dracunculus.

AMARYLLIS.

Ready in October.

Extremely ornamental greenhouse plants, with large fragrant, beautifully colored flowers. The most suitable soil is good loam, with one-fourth part of leaf-mould or pulverized manure, and some sand. Good drainage is very important. The growing season is from early spring until about September, when the plants should be kept cool and allowed to rest until February. They require plenty of sunshine, but in the flowering season a light shading tends to preserve the blossoms longer. Frequent disturbance of the roots is to be avoided. Established bulbs in large pots should have a top dressing each year when starting, and manure water during the growing season.

Amaryllis.

	Each	Per doz.
Aulica (Lily-of-the-Palace). Very large, handsome flowers; crimson, shaded with green.....	\$1 25

Mixed . All sorts.....	05	30	1 50

CROCUS.

For pots and borders. A universal favorite, being one of the earliest flowers seen in the spring. They are neat, dwarf and compact in growth, and the blooms are of bright colors. If planted close—say 2 inches apart—and in close rows, they make a very pretty display immediately after the snow goes off in the spring. Do not disturb for several years.

For flowering in pots, hedge-hogs, baskets, etc., they should be plunged in the open ground for three weeks after planting, precisely in the same manner as directed for hyacinths.

If ordered by mail, add 15 cents per 100 for postage.

	Per doz.	100	1,000		Per doz.	100	1,000

HYBRID NAMED CROCUS.

Composed of the most beautiful varieties; remarkable for richness of color and immense size. These varieties are best for forming letters or designs on the lawn, for which purpose they may be planted without disturbing the grass, by the use of a dibble or narrow trowel. The flowers are produced very early, and the mowing later on will not seriously injure the Crocus bulbs.

If ordered by mail, add 25 cents per 100 for postage.

CYCLAMEN.

Most of them ready in September.

When well grown, it is difficult to find a more useful plant than this for greenhouse, room and window decorations. The various species produce flowers varying from deep red to pure white, and of much elegance of form in flower and plant. The *C. giganteum* is an improved strain of the old *C. Persicum*, having much larger and more brilliantly colored flowers, and producing them more abundantly. We offer seed of our superb strain of these at the end of this Catalogue.

Cyclamen giganteum.

CROWN IMPERIALS.

(FRITILLARIA IMPERIALIS.)

A stately-growing plant, with dark green foliage, and flowers of all intermediate shades between yellow and crimson; effective for centers of beds; hardy and permanent, and not so generally planted as they should be.

Their flowers are produced quite early in spring, and are very ornamental and decorative in the center of a bed of other bulbous plants. The old dull red variety, while handsome, does not give anything like the effect that the newer sorts do. The double varieties are especially conspicuous and desirable in every respect. They are all the better for being planted in good, rich, well-drained soil; the flowers will be larger and of finer coloring, as well as more enduring.

Ready in September.

If ordered by mail, add 3 cents each for postage.

FRITILLARIAS.

Ready in September.

Graceful, hardy, spring-flowering bulbous plants, thriving in good, rich, well-drained soil. The name is from *fritillus*, a chess-board, in allusion to the chequered flowers of some of the species. Some are interesting from their peculiar coloring, and others are really beautiful. They are very effective in mixed flower borders, and they also make excellent pot-plants.

	Each	Per doz.	100

Fritillaria recurva.

FREESIA.

The justly popular *Freesias* are greatly prized for the delightful fragrance of their delicately colored flowers, which, when cut, will remain in good condition for a long time in water. They are easily grown or forced in a light, sandy soil, in a frame or greenhouse, and are excellent for window culture in winter; one plant will perfume a large room, but not in the persistent manner of a tuberose. The plant has tooth-shaped bulbs and flat, spreading leaves. For the information of all not acquainted with these bulbs, we may say that they are quite small, and produce very large blooms in comparison to their size.

Freesia refracta alba.

Freesia refracta alba. Pure white, and sweet-scented; very largely forced. It is one of the prettiest bulbous plants known. The flowers are 2 inches long, and about the same in width, shaped like miniature gladioli, and in clusters of 6 to 10, on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. There is a peculiar delicacy and beauty about this flower that is all its own; the fragrance is remarkable and very lasting.

Monster Size Bulbs. 30 cts. per doz., \$1.50 per 100, \$12 per 1,000.

First Size Bulbs. 20 cts. per doz., \$1 per 100, \$8 per 1,000.

Second Size Bulbs. 15 cts. per doz., 75 cts. per 100, \$6.50 per 1,000.

Freesia Leichtlinii. Creamy white, shading to yellow; a pretty sort; distinct in color. 35 cts. per doz., \$2 per 100.

GLADIOLUS.

Ready in November.

The following varieties are the sorts generally to be had at this season of the year, and they are usually planted in pots in autumn, and require to be kept in

a warm room or greenhouse, except those prefixed with an asterisk (*), which are hardy, and may be planted out; it is best, however, to give them a slight protection. Some varieties are successfully forced.

The French Hybrids, for spring planting, will be in by November. These form a family of bulbs of rare beauty. Every year is now adding varieties of most exquisite tint and shade; and from the time of year during which these bloom, and the long continuance of their flowers in perfection, they become one of the greatest ornaments of the garden at a season when flowers of vivid tints are scarce. They are valuable for bedding.

Named varieties will be found in our General Catalogue, published January 1.

If ordered by mail, add 5 cents per dozen for postage.

GLOXINIAS.

Ready in November.

Gloxinias are among the most beautiful of greenhouse plants, the flowers being remarkable for the intensity and variety of their coloring, and the exquisite manner in which they are often blotched, mottled, pencilled and blended. The plants are extremely floriferous, and, by making successive pottings, they may be had in bloom the greater part of the year. They thrive best in a soil composed of leaf-mould and peat in equal parts, with a little sand added. When growing, plenty of water should be supplied, but it should always be tepid. The bulbs we offer are large-sized, and of the erect-flowering strain. 12 cts. each, \$1.25 per doz., \$7 per 100.

IRIS. (FLEUR-DE-LIS.)

Ready in October and November.

Iris, the Greek name for the rainbow, was applied to this flower in allusion to the manner in which many beautiful colors are blended together in the flowers. Irises are of easy culture, requiring very little attention after once being planted. They do best in a light, rich, sandy soil, and in a sunny situation. Good drainage is very important. The newer varieties of *Iris Kämpferi*, recently introduced from Japan, are remarkable for the beauty of their colors and their stateliness of habit. Some of these send up 10 or 12 flower spikes 3 feet high, each bearing 2 to 4 enormous blossoms, measuring 8 to 10 inches across, and of the most delicate and beautiful colors, markings and combinations. These require a liberal supply of water when growing. With the exception of *Morea pavonia* and *Tuberosa*, all the varieties are hardy.

Iris.

IXIAS.

Ready in October.

The Named Hybrid Ixias are so beautiful and rich in tints that no lover of flowers should be without them. They are equally adapted for pots or the open ground, exceedingly free-flowering, and invaluable for cutting. If planted out, they require rather more covering during winter than Hyacinths. In pots their culture is the same as that usually recommended for other bulbs. By reason of their curious forms and strange coloring, the Ixias attract much attention.

ERYTHRONIUMS. (DOG'S-TOOTH VIOLETS.)

Ready in September.

Very ornamental, hardy, bulbous plants, of neat and dwarf habit. They succeed in almost any light soil, but prefer a mixture of loam and peat. They should be planted in groups, and do well in sheltered positions on rockeries, or in mixed flower or shrubbery borders. They may also be grown in pots in coldframes for house decoration when in flower.

They succeed in almost any light soil, but

	Each	Per doz.	100
Grandiflorum (Giant Dog's-Tooth Violet) Very large, straw-colored flowers, with orange center, borne on long, slender stems; the foliage is richly mottled in dark brown, and its elegant habit makes it a very attractive pot-plant for window decoration.....	\$0 05	\$0 40	\$2 50
Hartwegii. Fine new variety; light yellow flowers, like those of <i>E. giganteum</i> , but each borne on a separate stalk; the bulbs being thick and of great vitality, this is the easiest of all the sorts to grow.....	05	45	3 00

Dens-canis (Dog's-Tooth Violet). Mixed colors; very pretty; leaves blotched in brown and white.....	05	30	1 50

Erythronium.

LACHENALIAS.

Ready in September.

Very pretty, spring-flowering greenhouse bulbous plants, with brightly colored flowers and elegant habit. They should be grown in pots, 4 to 6 bulbs in a 5-inch pot, in a compost of two parts loam, two parts leaf-mould and one part each of peat, sand and well-rotted cow manure. Apply but little water until growth is somewhat advanced, but give more freely as the foliage develops; give them plenty of light and air, and keep near the glass to insure sturdy growth. Lachenalias are also excellent subjects for hanging-baskets.

MONTBRETIAS.

Ready in November.

Hardy, summer-flowering, bulbous plants that are becoming more popular every year. Their brightly colored flowers are borne on long, graceful spikes in the greatest profusion, and they are most valuable for cutting and general decorative purposes. They should be planted in groups and left undisturbed. Ordinary garden soil and a sunny position suit them. The following are the handsomest and most distinct varieties:

Bouquet Parfait. Large, bright vermilion flowers,	Each	Perdoz.	100

NERINE.

Ready in October and November.

Very beautiful greenhouse bulbous plants, succeeding best in pots, in light soil—say a compost of loam, leaf-mould and sand. Frequent repotting is not advisable, but an annual top-dressing of new soil before the flowering season is recommended. During the growing season they succeed best in a frame with some bottom heat. After the leaves die they should be kept quite dry in a cool place until they begin to grow again.

Buttercup Oxalis.

PAEONIES.

Ready in October.

The old-fashioned double Pæonies are too well known to require description. Their popularity is due to their great merits—their easy culture, the handsome appearance of the plants, and the brilliant and striking effect of their massive, finely formed, richly colored flowers. Among hardy herbaceous perennials, the Chinese Pæonies rank about first for lawn, or flower-border, or shrubby decoration. They are all hardy. See next page for varieties.

RICHARDIAS, or CALLAS.

Ready in September and October.

Tall-growing, bulbous perennials of exceedingly graceful habit and very handsome foliage and flowers. They are easily cultivated in pots, requiring only a rich soil and plenty of water. A compost of one part good loam and one part cow manure is recommended. It is a good plan to plant them out in the garden each summer, in rich, well-manured soil, giving them plenty of water, taking them up and carefully re-potting in September.

- | | | | |
|---|--------|----------|---------|
| | Each | Per doz. | 100 |
| White Calla , or <i>Lily-of-the-Nile</i> (<i>Calla Æthiopica</i>). Large, white, trumpet-shaped flowers of great substance. One of the most popular and ornamental of house and greenhouse plants | \$0 20 | \$2 00 | \$15 00 |

SNOWDROPS. (GALANTHUS NIVALIS.)

Ready in September.

Perhaps no spring flower is a more general favorite than the Snowdrop. The earliest-flowering of its varieties is the common single sort, which is also very graceful and beautiful, commencing to bloom before the snow is fairly off the ground in the spring. This is succeeded by the double-flowered variety, with its elegant drooping, snow-white blossoms.

If ordered by mail, add 3 cents per dozen or 25 cents per 100 for postage.

SPIRAEA or ASTILBE.

Ready in November.

Tall, graceful, branching, herbaceous perennials, thriving in rich soil and damp positions. Those we list are extensively used for forcing for winter decorative purposes, for which they are eminently adapted, either as cut-flowers or in pots for window and table decoration. They should be potted when received and buried outside till they begin to form roots. They may then be taken in and forced as required. They require abundance of water.

Japonica (Hoteia). Excellent pot-plant for winter blooming. Large, branching panicles of pure white, feathery flowers; fine for cutting. Clumps for forcing or outdoor planting. 10 cts. each, \$1 per doz., \$5 per 100.

Japonica fol. aurea reticulata. Beautiful gold-striped foliage; large panicles of pure white flowers. 15 cts. each, \$1.50 per doz., \$10 per 100.

Japonica compacta multiflora. Its neat, compact habit and profusion of large, handsome, pure white flowers make it a most elegant pot-plant. 15 cts. each, \$1.50 per doz., \$8 per 100.

Aruncus. Pure white; grows 4 feet high. 20 cts. each, \$2 per doz., \$14 per 100.

Astilboides floribunda. Very large, pure white plumes; neat habit; very abundant bloomer. 15 cts. each, \$1.50 per doz., \$8 per 100.

Palmata. Crimson; strong clumps. 20 cts. each, \$2 per doz., \$14 per 100.

Spiraea Astilboides floribunda.

TUBEROSES.

Ready in December.

	Each	Per doz.	100
Dwarf Double Pearl	\$0 05	\$0 35	\$1 50
"Albino." Early single white	05	40	2 00
Variegated-leaved Single	05	40	2 00

Trillium Sessile Californicum.

TRILLIUMS.

(AMERICAN WOOD LILY, or INDIAN SHAMROCK.)

Hardy, herbaceous perennials, succeeding best in a deep, well-drained soil and in a somewhat shady situation. They require plenty of water during summer. All are natives of North America, and are known by various common names in different localities. They have violently emetic roots.

	Each	Per doz.	100
Grandiflorum ("Giant American Wood Lily," or "Wake Robin"). Large, white flowers, changing to rose; quite hardy, and easily grown in shaded positions	\$0 05	\$0 50	\$3 00
Erectum ("Birth Root"). Dark, purple flowers; erect habit; about one foot high	05	50	3 00
Erectum album. A white-flowered variety of the above.....	08	60	4 00
Ovatum. White, changing to purple....	10	75	5 00
Sessile Californicum. Handsome, pure white flowers; prettily mottled foliage.....	10	1 00	6 00
Sessile rubrum. Deep reddish purple	10	1 00	6 00

MISCELLANEOUS BULBS AND ROOTS.

	Each	Per doz.	100
Achimenes , Mixed. Tender greenhouse bulbs; very beautiful, brightly-colored flowers	\$0 10	\$0 75	\$4 00
Aconite . See Eranthis, below.			
Allium . See page 11.			
Alstrœmeria , Mixed Colors. Tall, handsome plants, with beautiful flowers; excellent for pots or for frames; bright-colored	10	1 00	
Amorphophallus Rivieri. A species of Arum, with very ornamental leaves	20	2 00	
Androstephium violaceum. Very pretty, dwarf, hardy, bulbous plant from Texas. Plant in rich, sandy soil and in a sunny situation	12	1 25	7 00
Anomatheca cruenta. Rich crimson flowers; neat, dwarf habit; excellent for window-garden or pot culture; half-hardy	05	25	1 25
Anthericum —Very ornamental border plants, and also excellent for pot culture. They do best in light, rich soil, and require plenty of water while growing.			
“ Liliago (St. Bernard’s Lily). Pure white flowers; 1½ feet high	12	1 25	8 00
“ Lilium majus (St. Bruno’s Lily). Much larger flowers than the above; flowers white, with petals delicately tipped green; 2 feet high	10	1 00	
“ ramosum Of branching habit; white flowers; 2 feet high	10	1 00	
Antholyza , Mixed. Like Gladioli; take up in fall	08	75	5 00
Apios tuberosa. Hardy climbers; flowers deep purple, very fragrant	08	75	5 00
Asphodelus ramosus. Hardy perennial; large, white flowers; very pretty	08	75	4 50
Babiana . Mixed colors; charming for pots	08	65	4 00
Bessera elegans (Coral Drops). Bright coral-scarlet, with white cups	05	50	3 50
Bloomeria aurea. Very pretty; light yellow; easily grown	05	45	3 00
Bravoa geminiflora. Orange and scarlet; twin-flowered	30	3 00	
Bulbocodium vernum. A very pretty little bulbous plant, with rosy purple, crocus-like flowers; it is one of the earliest-flowering of spring plants, blooming even before the crocus	05	40	2 50
Caladium esculentum (Elephant’s Ear). Large size bulbs	20	2 00	
Callas . See Richardia, page 30.			
Camassia Cusickii . Superb new variety, with very large leaves and lovely, pale sky-blue flowers, produced in racemes 2 to 3 feet long	35	3 50	
“ esculenta . Pretty violet-blue flowers; fine for cutting	05	30	1 50
Chionodoxa gigantea. Very large, lilac-blue flowers, with large white eye	05	35	2 00
“ Lucillie (“Glory of the Snow”). Porcelain-blue, white eye	05	25	1 25
“ Sardensis . Lovely deep blue flowers, produced in great numbers	05	30	1 50
Chlorogalum pomeridianum (Soap Root). Tall, many-branched stem, bearing a great many little, white, star-shaped flowers. The bulb is large, and was used by the Indians for soap.	15	1 50	
Clematis coccinea. A herbaceous, hardy perennial climber; flowers rich scarlet	15	1 50	10 00
Colchicum autumnale (Meadow Saffron)	08	60	4 00
“ Mixed. Many bright colors	08	60	4 00
Cooperia Drummondii (Evening Star). White; take up in fall	05	45	3 00
“ pedunculata . Beautiful white fragrant flowers	05	45	3 00
“ Oberwetteri . New; bright green	05	45	3 00
Crinum . Mixed. 20 cts. each, \$2 per doz.			
Crocasmia aurea (Tritonia). Half hardy; orange flower. 5 cts. each, 45 cts. per doz., \$3 per 100.			
Cyclobothra flava (Yellow Shell-flower). Golden yellow cup, with fine black dots; very pretty. 5 cts. each, 40 cts. per doz., \$2.50 per 100.			
Cypella Herberti. Bright orange-yellow; half hardy. 25 cts. each, \$2.50 per doz.			
Dicentra spectabilis (Dielytra, Bleeding-Heart). Hardy; also for forcing	\$0 20	\$2 00	\$12 00
Dodecatheon Meadia (American Cowslip). Purple	10	75	5 50
Eranthis hyemalis (Winter Aconite). Yellow	05	25	1 00
Galanthus Elwesii (Asia Minor Giant Snowdrop) per 1,000, \$8.	05	15	1 00
Hæmanthus albidus. White; fine for pots	1 25		
“ coccineus . Scarlet; for pots	1 50		
“ puniceus . Orange-red; for pots	1 50		
“ tigrinus . Crimson; for pots	2 00		
Helleborus niger major (Christmas Rose). Perfectly hardy, but most valuable for forcing for cut blooms	30	3 00	
Hemerocallis (Day Lily), in six varieties	15	1 50	
Hyacinthus candicans. A snow-white summer-flowering giant Hyacinth	05	40	2 50
Imantophyllum miniatum. Rich cluster of orange-crimson flowers; for pots	1 50		
Ismene calathinum. White; sweet-scented; hardy	20	2 00	
“ Macleana . White, marked green; 2 feet high; half hardy	20	2 00	
“ undulata . Fragrant white flowers, with beautifully fringed petals	20	2 00	

Cyclobothra flava.

Tigridia.

Tricyrtis hirta.

HARDY FLOWER SEEDS.

For Autumn Sowing.

Many varieties of Flower Seeds, ANNUALS as well as BIENNIALS and PERENNIALS, may be sown in the open ground in the autumn. We give here a list of such as will succeed in this latitude and southward. The plants from autumn-sown seed become larger and more robust, flowering earlier and more numerous, than if sown in spring.

Grass Seeds for Autumn Sowing.

MIXTURES FOR GOLF LINKS.

We have always on hand all the valuable natural grasses of Europe and America, and we are familiar with the habits and merits of each. We shall be glad to prescribe for whatever the requirements of the Links may be, for poor land or rich, high and dry, or low and wet.

Golf Links Mixture. For the grounds in general. Per bushel of 20 lbs., \$2.50.

Putting-Green Mixture. A mixture of extra fine grasses, that will make a close, firm, green and lasting turf, which will improve the more it is tramped on. Per quart, 30 cts.; peck, \$1.50; bushel of 24 lbs., \$5.

LAWN GRASS MIXTURES.

CENTRAL PARK MIXTURE. For lawns of any extent, we recommend this, our best mixture, to be sown from three to five bushels to the acre. (15 lbs. to bushel.) Per quart, 25 cts.; ½ peck, 65 cts.; peck, \$1; bushel, \$3.50. (We can also make special good mixtures at lower prices.)

THORBURN'S LAWN-RESTORING GRASS SEED. A mixture of grasses peculiarly suited to take firm hold and grow quickly on hard, worn-out or burned spots. To restore a lawn that is partially worn-out or burned, the best time is very early in spring, as soon as the frost is entirely out of the ground. The bare spots should be well scratched or raked up, and this seed sown liberally. Cover the seed very thinly with earth, and then roll or press down firmly with the back of the spade. Some **Lawn-Restoring Grass Seed** should be kept always on hand, and before each rain during the summer some of it should be sown on any parts that may appear thinner than the rest. Seed may be sown in fall, as late as from September 1 to October 1, according to the weather. Price, per quart-box, 30 cts.; per bushel of 24 lbs., \$5.

GRASS SEEDS.

 These prices are subject to change.

	Per lb.	100 lbs.
Agrostis canina (<i>Rhode Island Bent Grass</i>). True. Valuable grass for lawn; sow three or four bushels to the acre for lawns. (12 lbs. to bus.).....	\$0 35	\$30 00
Agrostis stolonifera (<i>Fiorin</i> , or <i>Creeping Bent Grass</i>). Valuable in mixture, as it will thrive in moderately moist land; useful for croquet grounds. Same quantity as the preceding. (15 lbs. to bus.)	35	30 00
Agrostis vulgaris (<i>Red-top Grass</i>). A valuable permanent grass as a mixture in either meadows, pastures or lawns. Same quantity per acre as above. (14 lbs. to bus.)	15	11 00
FANCY HEAVY RED-TOP GRASS. Absolutely clean and free from chaff	30	25 00
Alopecurus pratensis (<i>Meadow Fox-tail Grass</i>). One of the very best grasses for permanent pasture. 25 lbs. to acre.....	30	25 00
Anthoxanthum odoratum (<i>True Perennial Sweet Vernal Grass</i>). Valuable for a mixture with pasture grasses; continues to throw up root foliage until late in the autumn. From 2 to 5 lbs. to the acre with other sorts	45	40 00
Anthoxanthum odoratum puellii (<i>Annual Sweet Vernal Grass</i>). Much smaller than the perennial. 20 to 25 lbs. to the acre	20	16 00
Avena elatior (<i>Tall Meadow Oat Grass</i>). Valuable for pastures. 50 lbs. to the acre.....	25	18 00
Avena flavescens (<i>Yellow Oat Grass</i>). Sown with other species is desirable for dry meadows and pastures. About 25 lbs. to the acre	1 00	85 00
Blue Grass, Canada , see <i>Poa compressa</i> ; English , see <i>Festuca pratensis</i> ; Kentucky , see <i>Poa pratensis</i> .		
Bromus inermis (<i>Awnless Brome Grass</i>). A valuable forage plant for light, dry soils. About 35 to 40 lbs. to the acre	25	18 00
Bromus Schraderi (<i>Rescue Grass</i>). Thrives in any soil, but does best in wet or moist lands. 30 lbs. to the acre.....	30	25 00
Cynosurus cristatus (<i>Crested Dog's-tail Grass</i>). Valuable grass for sheep pastures, on dry, hard soils and hills. 25 lbs. to the acre	40	35 00
Dactylis glomerata (<i>Orchard Grass</i>). Will endure considerable shade; blossoms about the same time as Red Clover, and is one of the very best pasture grasses. 3 bus. to acre. (14 lbs. to bus.)	20	15 00
Dog's-tail. See <i>Cynosurus cristatus</i> .		
Elymus arenaria (<i>Lime, or Beach Grass</i>). For sandy seashores, canal and railroad banks, etc.	45	38 00
Festuca duriuscula (<i>Hard Fescue</i>). Of a very fine quality, and thrives well in dry situations. 30 lbs. to the acre	25	18 00
Festuca elatior (<i>Tall Fescue</i>). Best on moist, alluvial and strong clay soils. 40 lbs. to the acre..	25	20 00
Festuca fluitans (<i>Floating Fescue</i>). A perennial, with long, creeping roots; often introduced on the margins of ponds and rivers, to afford nourishment for trout and wild ducks.....	35	30 00
Festuca ovina (<i>Sheep's Fescue</i>). For sheep pasture; occupies land which better grasses refuse. 35 lbs. to the acre	25	20 00
Festuca pratensis (<i>Meadow Fescue, or English Blue Grass</i>). Valuable for permanent grass land.	20	15 00
Festuca tenuifolia (<i>Slender Fescue</i>). Flourishes on dry and sterile soils. 30 lbs. to the acre.....	30	22 00
Holcus lanatus (<i>Meadow Soft Grass</i>). Inferior to many others, but of easy culture, and accommodates itself to all soils. 4 bus. to the acre. (7 lbs. to the bus.).....	25	20 00
Hungarian Grass. See <i>Panicum Germanicum</i> .		

GRASS SEEDS, continued.

		Per lb.	100 lbs.
Lolium Italicum (<i>Italian Rye Grass</i>)	Recommended for use in pasture mixtures.	50 lbs. to acre.	\$0 15
Lolium perenne (<i>English Rye Grass</i>).	The staple grass of Great Britain.	60 lbs. to the acre.	15 7 50
Orchard Grass.	See <i>Dactylis glomerata</i> .		
Panicum Germanicum (<i>Hungarian Grass</i>).	One of the most valuable annual soiling plants.	1 ½ bus. to the acre.	Price variable
Phleum pratense (<i>Timothy</i>).	A grass so well known needs no description.	½ bushel to the acre.	Market price.
	(45 lbs. to the bus.)		
Poa compressa (<i>Canada Blue Grass</i>).	Thrives well on clay or hard trodden and poor soil.	18	12 00
Poa nemoralis (<i>Wood Meadow Grass</i>).	Recommended strongly for pastures.	30 lbs. to the acre.	35 30 00
Poa pratensis (<i>Kentucky Blue Grass</i>).	Valuable for the southern states, and also a most valuable grass for the lawn. Three to four bushels to the acre. (14 lbs. to bus.) Fancy cleaned seed...	20	12 00
Poa trivialis (<i>Rough-stalked Meadow Grass</i>).	Favorite pasture grass for moist, rich soils.	20 lbs. to the acre.	30 25 00
Red Top.	See <i>Agrostis vulgaris</i> .		
Rescue Grass.	See <i>Bromus Schraderi</i> .		
Rye Grass.	See <i>Lolium Italicum</i> and <i>Lolium perenne</i> .		
	Rhode Island Bent Grass. See <i>Agrostis canina</i> .		
	Sweet Vernal Grass. See <i>Anthoxanthum odoratum</i> .		
	Timothy. See <i>Phleum pratense</i> .		

GRASS SEED MIXTURES.

FOR MEADOW AND PASTURE.

For every different kind and condition of soil there is a large number of grasses, either indigenous or introduced, which are especially suitable. Some sorts do best on high ground and in dry weather; others prefer plenty of moisture. Some mature so early, and others so late, that from the beginning of spring until winter sets in, there is no time when one species or another is not at its best. From these considerations the importance of sowing many varieties for pasture and meadow purposes will be apparent.

MEADOW OR PASTURE MIXTURES FOR ONE ACRE.

Price per acre, \$5.25.</p>
---	---	--

CRIMSON or SCARLET CLOVER.

(TRIFOLIUM INCARNATUM.)

An annual, with beautiful, long crimson flowers. Sown late in the summer, it furnishes an early green fodder the following season; largely sown in Virginia and North Carolina for improving poor soil by turning under when still green, thus adding much nitrogen to the ground through its decomposition. 15 to 20 lbs. to the acre. Per lb., 15 cts.; per 100 lbs., \$6.

Insecticides and Remedies for Plant Diseases.

COPPERDINE.

A remedy for grape anthrax and mildew, pear-leaf blight, pear and apple scab, celery, carnation and violet rust. Mix 1 pint to 10 gallons of water; apply with bellows vaporizer. Per 1-quart tin, 50 cents each; per 1-gallon jug, \$1.50 each.

FIR-TREE OIL.

For greenhouse and house plants. It destroys all plant insects without injuring the plant. It is the best insecticide for scale, aphids, red spider, mealy bug, thrip and worms. Dilute in the proportion of 1 pint to 20 gallons of water. Apply with vaporizer or syringe. $\frac{1}{2}$ -pt., 40 cts.; pt., 75 cts.; qt., \$1.25; $\frac{1}{2}$ -gal., \$2.25; gal., \$4.

FIR-TREE OIL SOAP.

This is the same as the Fir-Tree Oil, but in soap form. It is useful for the same purposes. Mix at rate of one ounce to a gallon of water, and apply with bellows or syringe. $\frac{1}{2}$ -lb. tin, 25 cts.; 2-lb. tin, 75 cts.; 5-lb. tin, \$1.75.

DALMATIAN INSECT POWDER.

Effective against almost all kinds of insects. Per $\frac{1}{2}$ -lb. box, 30 cts.; per 1-lb. box, 50 cts.

GISHURST'S COMPOUND.

A certain remedy for greenfly, scale, mealy bug, etc. Excellent for greenhouse use. Full directions for use on each box. Per 1-lb. box, 50 cts.

HAMMOND'S GRAPE DUST.

For the prevention of mildew on roses, grapes, gooseberries, etc. Apply with bellows. 5-lb. package, 35 cts.; 10-lb. package, 60 cts.; 100-lb. keg, \$5.

HELLEBORE, POWDERED.

An excellent protection from currant worms, grape slugs, caterpillars, etc. May be applied dry or mixed in water—1 oz. to 3 gallons. Per 1-lb. box, 30 cts.; $\frac{1}{2}$ -lb. box, 20 cts.; $\frac{1}{4}$ -lb. box, 15 cts.

PARIS GREEN.

Mixed at the rate of 1 lb. to 200 gallons of water, it will prove effective against all chewing insects. Per 1-lb. can, 35 cts.; $\frac{1}{2}$ -lb. can, 20 cts.; $\frac{1}{4}$ -lb. can, 15 cts. This article is liable to fluctuate in price.

LITTLE'S ANTI-PEST.

A sure destroyer of all insect pests. It is non-poisonous and harmless to vegetation. Mixed with

water as follows, it is effectual against—greenfly, 1 pt. to 10 gals. of water; mealy bug, 1 pt. to $1\frac{1}{2}$ gals.; red spider, 1 pt. to 2 gals.; ants, wireworms and slugs, 1 pt. to 1 gal. $\frac{1}{2}$ -gal. can, \$1.50; gal. can, \$2.50.

SLUG SHOT (HAMMOND'S).

Excellent for destroying cabbage, turnip and beet fly, potato bugs, currant worms, etc. Prepared, ready for use. 5-lb. package, 30 cents; 10-lb. package, 50 cents; 100 lbs., \$4.

SULPHUR, POWDERED.

Valuable for protecting against mildew on grapes, roses, etc. Per lb., 10 cts.; 10 lbs., 60 cts.; 100 lbs., \$4.

SULPHO-TOBACCO SOAP.

Dissolve in proportion of 2 ounces to a gallon of water, and apply with a syringe or atomizer. It will destroy rose slugs, aphides, greenfly, bark-lice, etc. Per $\frac{1}{2}$ -lb. tin, 25 cts.

TOBACCO DUST.

If dusted on *while the foliage is moist*, it destroys rose lice, cabbage and turnip fleas, etc. Spread upon the ground, it keeps off all earth insects, and also acts as an excellent fertilizer. Per 1-lb. box, 10 cts.; 5-lb. package, 30 cts.; 10-lb. package, 50 cts.; per 100 lbs., \$2.50.

TOBACCO STEMS.

For fumigating plants infested with greenfly. Per bale of about 100 lbs., \$1.50; per bale of about 200 lbs., \$2.75; per bale of about 400 pounds, \$4.50.

"ROSE LEAF" TOBACCO EXTRACT.

A perfectly pure, highly concentrated extract of tobacco, most effective for destroying all insects and scale on plants. Our "Rose Leaf" pamphlet gives full directions for applying. Pint can, 35 cts.; qt., 60 cts.; gal., \$1.75.

WHALE-OIL SOAP.

For washing trees and destroying all insects on the bark. Mixed at the rate of 1 lb. to 4 gallons of water, it will rid cabbage, rose bushes, peach trees, etc., of the aphides that so often infest them. Per 1-lb. box, 18 cts.; 5 lbs., 70 cts.; 10 lbs., \$1; 20 lbs., \$1.75; 100-lb. keg, \$7.

NIKOTEEN.

A powerful insecticide, specially prepared for use in greenhouses and conservatories. Per pint bottle, \$1.50.

"Jadoo" Fibre and "Jadoo" Liquid.

JADOO FIBRE is a new growing substance for plants of all kinds. It was invented by Col. Thompson, of the Royal Army and Fellow of the Royal Horticultural Society of England, and it is highly recommended by gardening authorities there. It suits all kinds of plants, is only half as heavy as earth and cleaner to handle, requires no soil to mix with it and no manure. It increases the size and the brilliancy of flowers. Seeds germinate, and cuttings root in it, quicker than in earth. Owing to its spongy nature, it retains water much longer than earth. Plants transplanted in Jadoo Fibre do not flag, even if in full bloom.

JADOO LIQUID revives drooping plants, increases the size and profusion of bloom. It is both meat and drink to plants of all kinds. It can be used on plants that are grown in earth or in Jadoo Fibre.

Price of the Jadoo Fibre. 5-lb. box, 30 cts.; 10-lb. box, 50 cts.; 25-lb. box, \$1.10; per bag of 120 to 130 lbs., \$3.75; per ton, \$50.

Price of the Jadoo Liquid. Pint bottle, 25 cts.; 2-gallon can, \$1.50; 5-gallon can, \$3.75; 10-gallon can, \$7.50.

Palm Tub.

PALM TUBS.

Made of white cedar, painted green, and bound with extra iron hoops. Drop handles of special pattern, serving as hooks for carry-poles. Strong iron legs and perforated removable bot. tom.

No.	Diameter	Length of stave	Each
0	27 in.	24 in.	\$6 50
1	25 in.	22 in.	5 50
2	23 in.	20 in.	4 75
