PREFACE

SOME justification seems needed for the publication of this Catalogue so soon after the appearance of Mr. R. B. Whitehead's *Catalogue of the Coins of the Mughal Emperors in the Panjab Museum* (1914) and Mr. H. Nelson Wright's *Catalogue of the Mughal Coins in the Indian Museum* (1908).

As it was represented to me that, with these two works available, and with little fresh matter to record, there could be little general demand for this Catalogue, I consulted the leading numismatists in India with regard to their views in the matter. They cordially responded to my application, and their opinions may be generally stated as follows: that the Catalogue should be published as soon as possible, for the value of such a work lay in its being a Catalogue, and not in the amount of fresh original matter it contained; and that among specialists there would be a certain and continuous demand for it. At the same time they gave some valuable suggestions as to the form the Catalogue should take, most of which have been adopted. For example, it was obviously unnecessary to increase the bulk of the volumes by reprinting the Mint notes which appear both in Mr. Nelson Wright's and Mr. Whitehead's Catalogues. I have, therefore, merely given a list of mints, indicating the coins of the several emperors to be found in this collection, and in short notes marked as exactly as possible the periods during which the various honorific titles were used. Fresh matter of numismatic or historical interest has been incorporated in foot-notes.

Volume I has been devoted to introductory matter and plates, and contains a list of all known Mughal couplets with reference to this and other collections. It also contains a list of words and phrases used on the coins, with their meanings, and also a list of denominational epithets and terms

used in connexion with Mughal numismatics. In addition to the plates of coins at the end of the volume there are four plates of ornaments, and an index has been added giving references to the coins on which they appear.

In compiling this Catalogue, which comprises Volume II, I have attempted throughout to further the object which students of the Mughal series have now chiefly in view—a complete corpus of Mughal coins based on the Mint system. It did occur to me that, in cataloguing this collection, an arrangement by mints instead of by reigns might be adopted; but valuable as, in my opinion, this would have been, it would have detracted seriously from its usefulness as a work of reference. It was also suggested that changes in type might be marked more definitely by printing the number of the first coin, exhibiting each such change in thicker characters: but it seemed to me that this would be premature before numismatists have agreed upon what constitutes a type. An attempt has, however, been made to furnish data as far as possible towards this end by marking alterations in style and ornament perhaps more minutely than has been done hitherto. The determination of what constitutes a type, and the determination of the different types of the several emperors, is, as Mr. R. Burn has pointed out, a most necessary preliminary to the compilation of a corpus. But the determination of mint marks and ornaments, and the allotting of fixed numbers to these, as well as to the couplets, are equally necessary; and in all these directions I trust that this Catalogue shows some advance.

In one respect the collection of Mughal coins in the Lucknow Museum¹ stands apart from all similar collections: the bulk of the coins which it comprises have been, as will be seen later, derived from treasure trove. The United Provinces, situated as they are in the very centre of the Mughal dominions, and including within their territory some of the most important centres of Mughal government, have

¹ The collection in the Nagpur Museum has been derived in the same way, but as no printed Catalogue exists it is impossible to determine how it compares with other collections.

been far more prolific in 'finds' of the coins of that dynasty than any other province in India. Not only have most of the rare coins been acquired in this way in the past, but the collection is being yearly augmented from the same source.

The collection of coins in the Provincial Museum, Lucknow, originated in 1868; but coins were amassed in a more or less haphazard fashion until in December, 1898, the first Coin Committee, consisting of the late Mr. Vincent A. Smith, Mr. H. N. Wright, the late Mr. J. Hooper, the late Dr. W. Hoey, Capt. (now Lt.-Col.) W. Vost, and Mr. R. Burn (Secretary) was constituted. The functions of this Committee are to advise Government on the acquisition and distribution of treasure trove in the United Provinces, and on the acquisition of other coins for the Museum. The Secretary compiles a complete list of coins in each find, and places these on record. A mass of information is thus accumulating which in time will be of the greatest value. For ancient and mediæval coins it will give a clue to the strikers. In the case of Pathān and Mughal coins it will help us to estimate the volume of coinage at different dates and places. Statistics of the total number of finds and lists of rarities included in them are published in the annual reports of the Museum.

At the time of the constitution of the first Committee the Pathān, Sūrī, and Mughal coins together numbered 1390. From this time, owing to the enthusiasm of the Committee and particularly of its Secretary, the collection, especially the Mughal section, rapidly enlarged. The figures for Mughal coins alone examined and distributed among various Indian Museums for the next five years gives an idea of the wealth of the treasure trove of the United Provinces: for 1900, 1,055 coins; 1901, 566; 1902, 622; 1903, 1,475; 1904, 502. It may be of interest to mention in a little more detail three of the richest finds. In 1899 at Kāshīpūr in the Nainī Tāl district was discovered a hoard of 491 silver coins of Akbar and Jahāngīr in perfect condition: among these was an Aḥmadnagar Ilāhī rupee of Akbar (No. 262), and most of the fine coins of Jahāngīr which the Museum possesses, including the two fine couplet rupees of Ajmer (1198, 1199), and the

unique rupee of Urdū dar rāh-i-Dakkan (1280). In 1905 a find at Durgāpūr (Bāra Bankī district) of 859 copper coins of the Sūrīs and the Emperor Akbar contained most of the early Akbar copper coins in the collection, including the dāms of Akbarpūr Tānda (850-853), Khīṭa Awadh (876-880), Bahrajeh (881-884), Khairābād (913-917), Lakhnau (1068-1073), the rare dām of Jaunpūr, with the geometrical device (905), and many others. The richest hoard¹ from which the Museum has benefited was the magnificent find of 1388 silver coins from Jhānsi in September, 1907. These were largely of Akbar's early years, and among them were coins of the following mints: Akbarpūr Tānda (No. 271), Anahr-wāla Pattan (319), Elichpūr (321), Bālāpūr (323), Bangāla (362), Bhakkar (365 a), Ḥiṣār Fīroza (475), Gadraula (547), Lakhnau (704), besides some undeciphered coins.

In 1904, largely through the exertions of Mr. Burn, the collection of Mughals of the late Mr. R. W. Ellis, of Jubbulpore, was secured for the Lucknow Museum. It consisted of 84 gold, 1670 silver, and 533 copper coins. It was strong in the silver and copper issues of Akbar, and contained particularly fine silver and copper coins of Shāh 'Ālam II; thence came also the muhr of Bedār Bakht (5300) and one of the rupees of Bahādur Shāh.

In 1899 Mr. Burn undertook to arrange and catalogue the Mughal coins with a view to publication. A large number of coins were arranged and catalogued by him, but as the coins increased and his official duties became more onerous he was reluctantly compelled to abandon the idea, and the task in 1914 devolved upon me.

The total number of coins included in this Catalogue is 5,802—224 gold, 4,895 silver, and 683 copper. The silver alone exceed the total number of coins (3,283) in the Lahore Mughal collection, but a large number are duplicates. Out of the 206 known mints 132 are represented here. Except for the pretenders Dāwar Baksh and 'Azīmu-sh-Shān, all the Mughal emperors are represented. The collection is very weak in rare gold coins: it possesses but three of Jahāngīr's

¹ For this find see *J.A.S.B.*, Num. Suppl. XI, p. 323, an article by Col. Vost.

zodiacal mohars, and no specimen of his Bacchanalian coins. Niṣārs and small pieces are poorly represented, and several fairly common mints such as Dera and Derajāt are unrepresented. On the other hand, it is particularly strong in Akbar's silver and copper series, and in the silver issues of the later Mughals: but the 618 silver coins of Jahāngīr are the glory of the collection. Again, it is specially strong in series of coins, which are to be found in every reign; I may instance the Aḥmadābād silver of Akbar and Jahāngīr, the Dehlī rupees of Jahāngīr, and the 'Ālamgīrpūr silver of Aurangzeb. In Mr. Whitehead's *Mint Towns of the Mughal Emperors of India*,¹ and in his supplement to the same in N.S. xxv, § 147, there occur nineteen entries of coins from this collection as being either unique or known for the first time to exist in this collection: three of these, however, are wrongly so entered. In addition there are seven other entries under the figures XI² and XXII, which refer to coins in the Museum.

I have made use of the transliteration adopted by the Council of the Asiatic Society of Bengal, and published in their Journal for 1895, except that for چ I write ch. To take two examples, عظیم آباد is transliterated 'Aẓīmābād. چھچھڑولی, Chhachraulī.

I have already indicated how much I owe in the compilation of this Catalogue to Mr. R. Burn, who, in addition to the work that he had already done on the Lucknow Collection, has been continually helpful in giving advice.

I am in a special measure indebted to Messrs. H. Nelson Wright, I.C.S., and Mr. R. B. Whitehead, I.C.S., who have allowed me to use certain features of their Catalogues of the Mughal coins in the Indian Museum and the Panjab Museum, with the consent of the Trustees of the Indian Museum and the Panjab Government. The present Catalogue is indeed based upon those admirable works. In

¹ *J.A.S.B.* N. S., vol. VIII 1912, No. 11, § 44, p. 425.

² XI and XXII refer to articles in those numbers of the Numismatic Supplement, *J.A.S.B.*

addition I have constantly consulted them on numerous points. Dr. Geo. P. Taylor, of Ahmadābād, very generously put at my disposal a manuscript list of Persian couplets which he had prepared, and thereby considerably curtailed my labour.

I cannot conclude without mentioning the work of Lt.-Col. W. Vost, Messrs. W. E. M. Campbell, I.C.S., and H. Nevill, I.C.S., who have acted as secretaries to the Lucknow Coin Committee: their reports on coins derived from treasure trove have been of the greatest assistance. I am also much indebted to Babu Rayag Dayal, Assistant Curator of the Lucknow Museum, for continual help in arranging the Collection, and in many other ways.

In a work of this kind in spite of every precaution there must I fear be a number of defects, but certain blemishes in this Catalogue need an explanation. The work was complete and ready for the press early in 1917, when the special conditions imposed by the war stopped its publication. When in February of this year, with the advent of happier times, the project of printing was revived it was found that during the last two years about five hundred fresh Mughal coins, mostly from treasure trove, had been added to the Collection. To re-write the Catalogue entirely would have caused undue delay, and so the 408 additional coins have been inserted in the work as it then stood; this explains a number of rather unsightly entries such as No. 1924 a, 5086 k, &c.

For a similar reason two numbers, 5191 and 5192, have dropped out of the Catalogue, in consequence of the mint name Pūna being settled subsequently to 1917, and the two coins removed to their correct position: lastly, it has been impossible to assign coins Nos. 4851 a-4855 their right position, as the coins with the readings giving the clue to their correct place turned up too late to enable this to be done without serious disfigurement. Every attempt has nevertheless been made to bring the Catalogue into line with the most recent information on Mughal numismatics, in which connexion one cannot help expressing gratitude

for the admirable series of articles which have appeared during the past two years in the *Numismatic Supplements to the Journal of the Asiatic Society of Bengal* from the pen of Mr. S. H. Hodivāla.

I must, in conclusion, make a last acknowledgement, the greatest of all, to Messrs. W. E. M. Campbell and John Allan, who have taken upon themselves the arduous duty of seeing these volumes through the press; and the Clarendon Press I must thank for the accuracy and excellence of their work.

By order of Shāh Jahāngīr the coin of Lāhor

From the name of Nūr Jahān Bādshāh became full of light.

A. 1036: 21 R. Capricornus (Editor's Cabinet and Berlin Museum).

NOTE. In the *Tāzūk-i Jahāngīrī* we are told that Āṣaf Khān was ordered to make the following couple of baits on large gold coins, one on the obverse, and one on the reverse:

نخط نور بر زر کلک تقدیر } Obverse
رقم زد شاه نورالدین جهانگیر }

In letters of light on gold the pen of destiny
Engraved the entry Shāh Nūru-d-dīn Jahāngīr.

شد چو خور زین سکه نورانی جهان } Reverse.
افتاب مملکت تاریخ آن }

By this coin the world became bright like the sun
Aftāb-i-mamlakat is the date.

[افتاب مملکت = Sun of the Kingdom.]

'Between the lines of the obverse inscription the Kalima was written, while between the lines of the reverse were to come the name of the mint and the year of julūs and the hijrī year. These gold coins were of 100, 50, 20, and 10 tolas. I have never seen and never heard of one being in existence. The words *Āftāb-i-mamlakat* give the date 1014 A.H., the date of Jahāngīr's first year,' Rodgers, *J.A.S.B.* vol. lvii, Part I, No. 1, 1888, pp. 19-20.

SHAH JAHĀN

AURANGZEB 'ALAMGĪR

- (58) سکه زد در جهان چو مهر منیر
شاه اورنگ زب عالم گیر

Struck money through the world like the shining sun
Shāh Aurangzeb 'Alamgīr.

(58 a) For the silver coinage بدر (moon) was substituted for مهر (sun).

A. (2458). *R.* (2491).

These couplets came into use at different dates but they may be said to have come into general use for all mints after the 4th regnal year. The coins of Akbarābād are, however, an exception. The couplet (58 a) is sometimes found on gold coins, cf. *P. M. C.* No. 1486, probably owing to error.

The couplet (58), for gold, on the other hand, seems to have been regularly used for silver during the earlier years of the reign, for examples cf. Nos. 2756 (Bhilsa), 2768 (Patna), 2849 (Jahāngīrnagar), 3009 (Shāhjahānābād), 3111 ('Alamgīrpūr), 3138 (Katak), 3215 (Lāhor), 3343 (Multān). But examples of its use late in the reign are the result of an error on the part of the die-striker—No. 3135 (Kābul) may be one of these. On the coins of Akbarnagar the gold couplet is used on rupees up to the 41st regnal year.

NOTE. Henceforward unless otherwise stated, the couplets are used for all mints and during the whole reign.

Struck coin in the seven climes the shadow of the divine favour,
The defender of the faith of Muḥammad, the emperor Shāh 'Ālam.

AV. (4488). AR. (4516).

¹ See note on the coin in the P. M. C.

This couplet starts from the first year of the reign (4667), and in the case of the following mints runs all through the regnal years Arkāt, Balwantnagar, Banāras, Raviṣhṇagar Sāgar, Sahāraupūr.

On coins of Shāhjahānābād and Akbarābād it is replaced by No. 76 in 1218: 46 R.

On coins of Barelī and Farrukhābād it is replaced by No. 76 in 1208: 31 R. in case of the former and 1204: 31 R. in case of the latter. The couplet occurs on all but a small number of mints, such as Itāwa, Jaipūr, Deogarh, Nāgor.

(79) سکه زد صاحب قرانی ز تأیید اله
حامی دین محمد شاه عالم بادشاه

Struck coin like the Ṣāhib-i Qirān by the help of God
Defender of the faith of Muḥammad, the Emperor Shāh 'Ālam.

A. Akbarābād, Shāhjahānābād (4495), Farrukhābād (4497).

R. Akbarābād (4560), Orchha (4593), Barelī (4621), Shāhjahānābād (4967), Farrukhābād (5022), Muzaffargarh (5110).

NOTE. The series of Orchha coins begins in 1211 and of Muzaffargarh in 1209.

BEDAR BAKHT.

(80) سکه زد بزر وارث تاج و تخت
شاه جهان محمد بیدار بخت

Struck coin on gold the heir of crown and throne
Lord of the world, Muḥammad Bedār Bakht.

A. (5300). R. (I.M. No. 2499, B.M. 1209).

AKBAR II

The following is given by the author of the *Muḥtaṣir sīr Gulshān-i-Hind* as a couplet of Akbar II.

سکه زد در جهان ز فضل اله
حامی دین محمد اکبر شاه

Struck coin in the world by the divine favour
The defender of the faith Muḥammad Akbar Shāh.

This couplet seems to appear on a coin, No. 3277, in the Lahore Museum, but the date 1203 makes it difficult to assign. Cf. note in *P. M. C.* p. 430.

LIST OF WORDS AND PHRASES USED ON THE COINS

Ardibihisht, see **Months**.

Āzar, see **Months**.

Bāhman, see **Months**.

Bait = couplet. Persian couplets are employed by nearly all the Mughal emperors on their coins. Cf. List of Persian Couplets.

Dām. A large thick copper coin first employed by Sher Shāh Sūr, and continued by Akbar, Jahāngīr, and in some instances by later emperors, cf. N. S. XXVIII, § 175, esp. Note on p. 65. The *Ā'in-i Akbarī* gives the weight of the dām as 1 tolah 8 māshas 7 ratis, and this, taking the māsha = 15·5 grains, gives the standard weight as 323·5 grains. The same work gives the ratio of 40 dāms = 1 rupee. Mr. S. H. Hodivālā in the article quoted above has shown that during the early years of Aurangzeb's reign, owing to a rise in the price of copper, the weight of the dām was reduced to 14 māshas = 217 grains in certain mints, but this reduction was not uniformly observed. The name 'dām' occurs only once on a Mughal coin, Akbar's nīm dām of Srīnagar. Cf. *P. M. C.*, No. 706.

Damrā. Occurs only on certain mintless copper coins of Akbar of the regnal year 33 = $\frac{1}{4}$ dām : so it is equal to the 'Paulah' of Ābu-l-Fazl.

Damrī = $\frac{1}{8}$ th dām. So given by Abu-l-Fazl, and the name occurs on mintless coins of that value of the 33rd year.

Darb = half a jalāla (q.v.). The term occurs on some Sitpūr Ilāhī rupees of Akbar; its meaning there is obscure.

Dī. See **Months**.

Dīnār. (Derived from denarius aureus.) The general term for the gold coins of Arabian and Muhammadan Asiatic currencies : weight 67 grains. The term 'dīnār-i jalālī' occurs on a gold coin of Āgra of Akbar's 50th year. Cf. Couplet No. 2 in List of Couplets.

Dirham. (From Greek drachma.) The thin silver pieces of the Arabian and Central Asian Muhammadan dynasties : this standard was employed by Bābur, Humāyūn, and very rarely by Akbar in his earliest years. Weight of dirham 47 grains.

Dirham Shar'ī. In the light of Mr. S. H. Hodivālā's article in the N. S. XXVIII, § 171, p. 45, Mr. Whitehead's explanation of this coin in *P. M. C.* Appendix C. p. 437, must, I think, now be rejected. Mr. Hodivālā

has shown fairly conclusively that these coins were issued by Aurangzeb and Farrukhsiyar for use in payment of the Jizyā or Poll Tax. Weight about 44 grains.

These coins are usually square, bearing the name **درهم شرعى** on one side and the name of the mint on the other. One is known of Farrukhsiyar's reign (*P. M. C.*, No. 2271). The following mints are known to have struck these coins—Agra, Ilahābād, Patna, Shāhjahānābād, Katak, Lāhor, Multān.

Farwardīn. See **Months.**

Fulūs = 'copper money', plural of Arabic 'fals': occurs often in the combination **سکر فلوس** on the copper coins of most emperors. After the reign of Jahāngīr there is great variation in the weight of copper coins, probably in accordance with local conditions and demand.

Hijrī. The Muhammadan era, dating from the migration of the Prophet from Mecca in A. D. 622. This era is used on the majority of Mughal coins.

Ilāhī = The Divine, an era invented by Akbar, and starting from 27th Rabi'ū-ṣ-ṣānī in the first year of his reign. It was regularly employed on his coins after the 36th year, and coins are known dated 30 r. It was computed according to solar reckoning, and along with it were used the names of the old Persian months. Jahāngīr, Shāh Jahān, and Murād Bakhsh also sometimes employ the Ilāhī era for their regnal years, often along with the hijrī date; cf. *I. M. C.*, Appendix D, p. 355, and N. S. XVI, § 100, p. 705.

Imām. The four Imāms were the four orthodox khalīfas, Abū Bakr, 'Umr, 'Uṣmān, and 'Alī. Their names with their epithets occur on the obverse of coins of Bābur, Humāyūn, Akbar, Shāh Jahān I, Murād Bakhsh, Shāh Shujā', and on one of 'Alamgīr II.

Jalāla. The Ilāhī square rupee of Akbar, so called from the formula inscribed upon it.

Kalima. The Muhammadan profession of faith:

لا اله الا الله محمد رسول الله

'There is no god but God: Muhammad is the prophet of God.'

The Kalima is used on the coins of Bābur, Humāyūn, Shāh Jahān I, Murād Bakhsh, Shāh Shujā', and on some of Akbar, Jahāngīr, and 'Alamgīr II.

Khair qabūl. Lit. = 'may these alms be accepted.' A small silver coin minted only by Jahāngīr, generally mintless, but one or two pieces of Lāhor mint are known, and one of Aḥmadābād. It is mentioned in the *Tūzūk-i Jahāngīrī* (Rogers and Beveridge Trans., vol. I, p. 11) among the silver coins.

Khalifa. See **Imām.**

Khūrdād. See **Months.**

Laqab. A 'surname' or 'title', such as those adopted by the Mughal emperors, i. e. Jalālu-d-dīn = 'Glory of the faith', by Akbar.

Mihr. See **Months.**

Months. For his Hāhī era Akbar employed the names of the months used by the old Persians in their solar year, i.e.

1. Farwardīn	5. Amardād	9. Āzar
2. Ardībihisht	6. Shahrewar	10. Dī
3. Khūrdād	7. Mīhr	11. Bahman
4. Tīr	8. Ābān	12. Isfandārmuz

These names appear on the coins of Akbar, Jahāngīr, Murād Bakhsh, and some of Shāh Jahān I.

Muhr or **Ashrafī**. The ordinary term for the gold coin introduced by Akbar, and weighing ordinarily 170 grains. Some of Akbar's square issues rise to 187 grains, and Jahāngīr's muhrs during the first five years of his reign vary between 202–211 grains. All other emperors conform to the 170-grain standard. The word *مهر* occurs in many of the couplets. Cf. List of Couplets.

Nīm rā'ij = half a rā'ij, q.v.

Niṣār. Small coins in gold and silver (one or two broad thin pieces of Shāh Jahān I of the mints Shāhjahānābād and Akbarābād are known) used as largesse money. Jahāngīr in the *Tūzūk-i Jahāngīrī* gives the niṣār as being equal to a quarter of a rupee, and the commonest specimens are of that value, but others are half the value of a rupee (the broad thin pieces), and others only one-eighth. They are known of the emperors Jahāngīr, Shāh Jahān I, Aurangzeb, Jahāndār, and Farūkhshiyar; and from the following mints: Itāwa, Ajmer, Aḥmadābād, Aḥmadnagar, Urdū Zafar Qarīn, Akbarābād, Akbarnagar, Āgra, Burhānpūr, Patna, Chīnāpattan, Daulatābād, Shāhjahānābād, Kābul, Kashmīr, Lāhor.

Nisfi. Persian = 'half' = $\frac{1}{2}$ dām occurs on a rare mintless copper coin of Akbar.

Nūr Afshān = 'light scattering': the name is probably derived from Jahāngīr's *laqab* Nūru-d-dīn. They are small silver pieces equal to $\frac{1}{20}$ th rupee in value, and are known from the Ajmer, Agra, and Lāhor mints. They were apparently used as largesse money.

Nūr Jahānī = 'light of the world'. Jahāngīr's name for a gold coin one tolā in weight: occurs on a coin of Mandū. See List of Couplets, No. 50.

Rā'ij (رأج) = current. Occurs on copper coins of Jahāngīr equal to a quarter of a dām—nīm rāij occurs on his copper coins of half the weight of a rāij.

Rawānī = 'current'. Occurs on copper coins of Jahāngīr equal in weight to a dām (323.5 grains).

Rupee or **Rupiya**. The general term for the silver coin of 180 grains instituted by Sher Shāh, and continued by all Mughal emperors. Jahāngīr, however, during the first few years of his reign issued heavy rupees of 220 grains, but soon returned to the original standard. Shāh 'Alam Bahādur also in the first year of his reign issued an order that the ashrafī and the rupee should be made equal in weight to a tolā, and there are a few rupees in the British Museum of Patna mint weighing 184 and 185 grains. This experiment was also unsuccessful and soon

relinquished; cf. N. S. XXVIII, § 176, p. 67. The word رويده occurs on the coinage only once, on a coin of Akbar of Āgra mint 47 R. Khūrdād in the Bodlician collection (Cat., No. 683); cf. *P. M. C.*, pl. xxi, iv.

Shahrewar. See **Months**.

Sikka = 'stamp' in the formula سكه مبارك occurs on a large number of silver and gold coins from the reign of Shāh 'Ālam Bahādur. For the combination *sikka fulūs*, see **Fulūs**.

Tankā. A denomination employed by Akbar in his Ilahī copper coinage after the 40th year. The coinage consisted of the full tankā with its half, quarter, eighth, and sixteenth parts. The full tankā was double the weight of the dām, i. e. about 640 grains. Cf. N. S. XXVIII, § 181, 'The Murādi Tankā', by S. H. Hodivālā.

Tankī. At the end of Akbar's reign pieces of four, two, and one tankī or tankī were issued from the Aḥmadābād, Āgra, Kābul, and Lāhor mints. Mr. S. H. Hodivālā in N. S. XXVII, § 169, has shown that the tankī was equal to $\frac{1}{5}$ th of a dām or $\frac{1}{10}$ th of a tankā, weight about 64 grains.

Tir. See **Months**.

The form Ūjain occurs on some of the llāhī rupees of Akbar, on the unique rupee of Jahāngīr No. 1341, on some of the early rupees of Shāh Jahān, on some rupees of Aurangzeb (without epithet), on A'zam Shāh's rupees (with epithet), and on the copper coins of Shāh Jahān and Aurangzeb.

Balulat occurs as epithet on some of Shāh Jahān's earliest coins.

Dāru-l-fatḥ occurs for the first time in Aurangzeb's reign, and with the exception noted above continues throughout the reigns of all succeeding emperors on gold and silver.

The form Ujjainpūr occurs on certain small square local copper coins of Akbar (cf. No. 804). Mr. Hodivālā has recently shown that Akbar's dāms hitherto attributed to Khairpūr are really coins of Ujjainpūr.

Āgra. *Dāru-l-khilāfat* occurs on copper coins of Bābur of 935–936 A. H., on copper coins of Humāyūn 937–941 A. H., on Akbar's gold and silver 976–985 A. H., on Shāh Jahān's gold and silver of the first regnal year, and on Akbar's copper from 965–989 A. H.

Dāru-ṣ-ṣarb Qil'a appears in Bābur's copper of 936–937 A. H.

Dāru-l-'adl occurs on Humāyūn's copper of 943, and *Dāru-l-āmān* on his copper of 942–943 A. H.

Baldat occurs on Akbar's mihrabi mulr of 981.

In 1038 A. H. Akbarābād is substituted for Āgra, and the epithet *Dāru-l-khilāfat* was retained for a year, and then reappears on a few mohars and rupees of 1068 A. H.

Mustaqirru-l-khilāfat was adopted by Aurangzeb in his 29th year and continues till the end of the Mughal series, except for a short interval from the latter part of the first regnal year of Shāh 'Ālam Bahādur till the fifth year of Farrukhsiyar, when *Mustaqirru-l-mulk* was substituted.

Baldat occurs on the silver niṣārs of Shāh Jahān : it may also occur on Nos. 360, 361, Ilāhī rupees of Akbar. See note to No. 360.

Baldat Fākhirā, 'the sumptuous town', occurs on the first silver issue of Aurangzeb, cf. *P. M. C.*, No. 1617.

Dāru-s-sarūr occurs first on the coins of Shāh 'Ālam Bahādur, silver and gold, and continues to the end of the series.

Dāru-s-salṭanat occurs on a muhr of Jahāndār, cf. *N. S. VI*, p. 264.

Dehlī. *Dāru-l-mulk Hazrat* appears on Humāyūn's copper coins, on gold coins of Akbar from 977–979 A. H., and on dāms of 981; cf. No. 965. *Hazrat* alone occurs on early gold coins of Akbar, on silver coins up to 986 A. H., and copper dāms 962–988 A. H.

Copper coins of Dehlī are known as late as Shāh Jahān's twelfth regnal year, and rupees of the year 1049. Shāhjahānābād coins begin apparently from 1058, and in 1069 A. H. appears the epithet *Dāru-l-khilāfut*, which is associated with this mint on silver and gold coins to the end of the series. Copper coins are all without epithet.

Dāru-l-khilāfat occurs on Humāyūn's copper. It reappears on Akbar's gold in 976, and perhaps in 984, or earlier on silver. In 985 appeared the square muhrs and rupees, and on them the title becomes *Dāru-s-sultānat*. It had appeared on copper in 976. It disappears with the Ilāhī coins; reappears on Shāh Jahān's earliest coins; is again removed, to appear once more on Aurangzeb's silver and gold coins, from which time it continues to the end of the series.

A NOTE ON ORNAMENTS

FOLLOWING Mr. H. Nelson Wright in his *Catalogue of the Mughal Coins in the Indian Museum* these marks on Mughal coins have been called ornaments, but they are to be distinguished from any devices which form part of the general ornamental designs which appear on many coins. What the exact purpose of these special marks was has not yet been determined, but that the changes in these marks had some special significance in connexion with the mint seems obvious, and we have one piece of evidence showing what in Shāh 'Ālam's reign in the Bareilly mint the significance of some of these marks was. In Mr. Thurston's article in the *J. A. S. B.*, 1893, 'Note on the History of the East India Company Coinage', p. 66, occurs this passage: 'It appears from a report by Mr. Seton that the system of farming the Baraillī mint was abolished in 1802. No alteration was introduced into the standard of the rupee, except that, to mark the period at which the change of system took place, the Persian letter چ (the first letter of the late Sūtah Ḥusain 'Alī Khān) was discontinued and و (w) substituted in compliment to the Lieutenant-Governor' (*sic*); cf. coins Nos. 4643-4645.

Certain marks have long been recognized as relating to special dynasties or communities. M 80, the ankūs, for example, is a Mārāṭhī mark.¹ M 268, M 102 show the control of the Nawāb Wazīrs of Awadh. Other marks were adopted by certain mints for long periods irrespective of changes in the mint management, M 96, 97 for example by Shāhjahanābād, M 81 by 'Aẓīmābād. Another use of these marks may have been to protect the coinage against forgery by continually changing them. The East India Company we know employed private marks for this purpose.² But without wishing to over-emphasize the importance of these ornaments, it has seemed advisable to make the accompanying list as complete as possible, for the use of the future student, and also for the general help they give in deciphering defective coins.

Owing to the fact that Mughal die-cutters cut each die by hand there exist numberless varieties of some mint marks; in long series of coins bearing the same mark this mark is very liable to degenerate

¹ Cf. N. S. XXII, § 125. The Post-Mughal Coins of Aḥmadābād.

² Thurston, *ibid.*, p. 62.

in form, for example, No. 227 on the Muḥammadābād Banāras series. In preparing the plates typical marks have as far as possible been represented in each case. Sometimes it has been rather difficult to decide whether two marks are distinct or merely variants of one form; in these cases all that is possible is to rely on one's own judgement. Sometimes it may have happened that an ornament as represented in the plates is imperfect, where only one or two coins exist on which the ornament is represented, and where part of it has missed the disk of the coin, but such cases it is hoped are few.
