MR. HO
delightf

HENRY JAMES JR.'S first chapters of his capital new Novel, *The American*.

MRS. KEMBLE'S entertaining *Old Woman's Gossip*, describing the first nights of her dramatic career; and

CHARLES FRANCIS ADAMS JR.'S able and valuable paper upon *The State and the Railroads*.

All of the above writers, and others of recognized prominence and ability, will contribute to the ATLANTIC during the summer of 1876.

IN THE JULY NUMBER

MR. HOWELLS will describe his *Days at the Centennial Exhibition*.

GENERAL HOWARD will have a noteworthy account and description of *The Battle of Gettysburg*;

CHARLES DUDLEY WARNER will write of Oriental Travel, *From Jaffa to Jerusalem*; and

MES RUSSELL LOWELL and T. B. ALDRICH will contribute *Poems*.

If you wish the best reading for leisure moments of travel,
On the Railroad or Steamer,
At the Mountains or the Lakes,
Or by the Seaside,

BUY THE ATLANTIC,

Which is for sale at all the news-stands and book-stores.

PRICE: 35 cents a number; \$4.00 a year; with a superb life-size portrait of the poet Longfellow, \$5.00. The Publishers prepay all postage.

THE INTERNATIONAL EXHIBITION OF 1876.

THE Congress of the United States, by an act approved March 3d, 1871, provided that the centennial anniversary of the promulgation of the Declaration of American Independence in Philadelphia should be celebrated in that city "by holding an International Exhibition of Arts, Manufactures, and Products of the Soil and Mine." The preparation of the Exhibition was, by the act, confided to the United States Centennial Commission, composed of a commissioner and alternate commissioner nominated by the governor of each State and Territory, and confirmed by the President of the United States. A subsequent act, approved June 1st, 1872, created the Centennial Board of Finance, charged with the financial conduct of the Exhibition.

A proclamation by the President of the United States, dated July 3d, 1873, announced the International Exhibition, and commended it to all nations. An act of Congress, approved June 5th, 1874, requested the President, in the name of the United States, to invite the governments of foreign nations to participate in the Exhibition. The invitation thus extended was accepted by the governments of

Argentine Republic,	Queensland,	Netherlands,
Austria-Hungary,	New Zealand,	Norway,
Belgium,	New South Wales,	Orange Free State,
Brazil,	Victoria,	Peru,
Canada,	South Australia,	Portugal,
Chili,	India,	Russia,
China,	Cape Colony,	Spain,
Denmark,	Bermuda, and	Sweden,
Egypt,	Jamaica,	Switzerland,
France, with Algeria,	Hawaii,	Tunis,
Germany,	Italy,	Turkey,
Great Britain, with colonies, viz.	Japan,	Venezuela.
	Mexico,	

The Centennial Commission provided for the classification of the objects to be exhibited in seven departments, which were referred to five exhibition buildings in this manner:

DEPARTMENT.	BUILDINGS.	ACRES COVERED.
I. Mining and Metallurgy,	Main Building,	21.47
II. Manufactures,		
III. Education and Science,		
IV. Art,	Art Gallery	1.5
V. Machinery,	Machinery Building,	14.
VI. Agriculture,	Agricultural Building,	10.
VII. Horticulture,	Horticultural Building,	1.5
Total,		48.47

The applications for exhibiting space, however, both at home and from abroad, so exceeded the calculations that had been made as to necessitate the erection of annexes supplementing the capacity of each of these buildings. Enumerations of these additional structures will be found on subsequent pages. The classes of objects grouped in the several departments are indicated in the following synopsis of the classification of the Exhibition.

SYNOPSIS OF THE CLASSIFICATION.

LOCATION.	DEPARTMENTS.	CLASSES.	GROUPS.
MAIN BUILDING.	I. MINING AND METALLURGY.	100—109	Minerals, Ores, Stone, Mining Products.
		110—119	Metallurgical Products.
		120—129	Mining Engineering.
	II. MANUFACTURES.	200—205	Chemical Manufactures.
		206—216	Ceramics, Pottery, Porcelain, Glass, etc.
		217—227	Furniture, etc.
		228—234	Yarns and Woven Goods of Vegetable or Mineral Materials.
		235—241	Woven and Felted Goods of Wool, etc.
		242—249	Silk and Silk Fabrics.
		250—257	Clothing, Jewelry, etc.
		258—264	Paper, Blank Books, Stationery.
		265—271	Weapons, etc.
272—279		Medicine, Surgery, Prothesis.	
280—284		Hardware, Edge Tools, Cutlery, and Metallic Products.	
285—291		Fabrics of Vegetable, Animal, or Mineral Materials.	
292—296	Carriages, Vehicles, and Accessories.		
III. EDUCATION AND SCIENCE	300—309	Educational Systems, Methods, and Libraries.	
	310—319	Institutions and Organizations.	
	320—329	Scientific and Philosophical Instruments and Methods.	
	330—339	Engineering, Architecture, Maps, etc.	
	340—349	Physical, Social, and Moral Condition of Man.	
ART GALLERY.	IV. ART.	400—409	Sculpture.
		410—419	Painting.
		420—429	Engraving and Lithography.
		430—439	Photography.
		440—449	Industrial and Architectural Designs, etc.
		450—459	Ceramic Decorations, Mosaics, etc.
MACHINERY BUILDING.	V. MACHINERY.	500—509	Machines, Tools, etc., of Mining, Chemistry, etc.
		510—519	Machines and Tools for working Metal, Wood, and Stone.
		520—529	Machines and Implements of Spinning, Weaving, etc.
		530—539	Machines, etc., used in Sewing, Making Clothing, etc.
		540—549	Machines for Printing, Making Books, Paper Working, etc.
		550—559	Motors, Power Generators, etc.
		560—569	Hydraulic and Pneumatic Apparatus.
		570—579	Railway Plant, Rolling Stock, etc.
		580—589	Machinery used in Preparing Agricultural Products.
		590—599	Aerial, Pneumatic, and Water Transportation. Machinery, and Apparatus, especially adapted to the requirements of the Exhibition.
AGRICULTURAL BUILDING.	VI. AGRICULTURE	600—609	Arboriculture and Forest Products.
		610—619	Pomology.
		620—629	Agricultural Products.
		630—639	Land Animals.
		640—649	Marine Animals, Fish Culture, and Apparatus.
		650—662	Animal and Vegetable Products.
		665—669	Textile Substances of Vegetable or Animal origin.
		670—679	Machines, Implements, and Processes of Manufacture.
		680—689	Agricultural Engineering and Administration.
690—699	Tillage and General Management.		
HORTICULTURAL BUILDING.	VII. HORTICULTURE.	700—709	Ornamental Trees, Shrubs, and Flowers.
		710—719	Hot Houses, Conservatories, Graperies.
		720—729	Garden Tools, Accessories of Gardening.
		730—739	Garden Designing, Construction, and Management.

The full text of the classification of the several Departments will be found at the commencement of the enumeration of objects shown in each. The distribution of the departments and buildings through the four volumes of the catalogue, is as follows:

VOLUME I.—DEPARTMENT I. *Mining and Metallurgy*. II. *Manufactures*; III. *Education and Science*. Main Building and Annexes.

VOLUME II.—DEPARTMENT IV. *Art*. Memorial Hall and Annexes.

VOLUME III.—DEPARTMENT V. *Machinery*. Machinery Building and Annexes. Buildings of United States government and foreign governments, of State governments, and of individual exhibitors.

VOLUME IV.—DEPARTMENT VI. *Agriculture*; VII. *Horticulture*. Agricultural and Horticultural Buildings and Annexes.

INTERNATIONAL EXHIBITION.

THE MAIN EXHIBITION BUILDING. No. I.

Size, 1880 by 464 feet.

Engineers and Architects, HENRY PETTIT & JOS. M. WILSON.

Contractor, R. J. DOBBINS.

Wrought and Cast Iron Manufactured by WM. SELLERS & CO., *Moor Iron Works.*

Wrought Iron Furnished by A. & P. ROBERTS, *Pencoyd Rolling Mills.*

Cast Iron Furnished by MORRIS, TASKER, & CO., *Pascal Iron Works.*

Erector of Iron Work, WATSON MANUFACTURING CO.

THE Main Exhibition Building, containing Departments I, II, III of the Exhibition, is in the form of a parallelogram, extending east and west 1880 feet in length, and north and south 464 feet in width.

The larger portion of the structure is one story in height, and shows the main cornice upon the outside at 45 feet above the ground, the interior height being 70 feet. At the centre of the longer sides are projections 416 feet in length, and in the centre of the shorter sides or ends of the building are projections 216 feet in length. In these projections, in the centre of the four sides, are located the main entrances, which are provided with arcades upon the ground floor, and central facades extending to the height of 90 feet.

The East Entrance forms the principal approach for carriages, visitors being allowed to alight at the doors of the building under cover of the arcade. The South Entrance is the principal approach from street cars, the ticket offices being located upon the line of Elm Avenue, with covered ways provided for entrance into the building itself. The Main Portal on the north side communicates with the Art Gallery, and the Main Portal on the west side gives the main passage way to the Machinery and Agricultural Halls.

Upon the corners of the building there are four towers, 75 feet in height, and between the towers and the central projections or entrances there is a lower roof introduced, showing a cornice at 24 feet above the ground. In order to obtain a central feature for the building as a whole, the roof over the central part, for 184 feet square, has been raised above the surrounding portion, and four towers, 48 feet square, rising to 120 feet in height, have been introduced at the corners of the elevated roof.

The areas covered are as follows :

	SQUARE FEET.	ACRES.
Ground floor,	872,320	20.02
Upper floors in projections,	37,344	.85
“ “ in towers,	26,344	.60
	936,008	21.47

The general arrangement of the ground plan shows a central avenue or nave 120 feet in width, and extending 1832 feet in length. This is the longest avenue of that width ever introduced into an exhibition building. On either side of this nave there is an avenue 100 feet by 1832 feet in length. Between the nave and side avenues are aisles 48 feet wide, and on the outer sides of the building smaller aisles 24 feet in width. In order to break the great length of the roof lines, three cross avenues or transepts have been introduced of the same widths and in the same relative positions to each other as the nave and avenues running lengthwise, viz.: a central transept 120 feet in width by 416 feet in length, with one on either side of 100 feet by 416 feet, and aisles between of 48 feet. The intersections of these avenues and transepts in the central portion of the building result in dividing the ground floor into nine open spaces, free from supporting columns, and covering in the aggregate an area of 416 feet square. Four of these spaces are 100 feet square, four 100 feet by 120 feet, and the central space or pavilion 120 feet square. The intersections of the 48 feet aisles produce four interior courts 48 feet square, one at each corner of the central space. The main promenades through the nave and central transept are each 30 feet in width, and those through the centre of the side avenues and transepts 15 feet each. All other walks are 10 feet wide, and lead at either end to exit doors.

The following table gives the principal dimensions of the different parts of the building:

DIMENSIONS.

Measurements taken from centre to centre of supporting columns.

Length of building,	1880 feet
Width of building,	464 "

Ground plan,	24 "
Height to roof,	75 "

The foundations consist of piers of masonry. The superstructure is composed of wrought iron columns, which support wrought iron roof trusses. These columns are composed of rolled channel bars, with plates riveted to the flanges. Lengthwise of the building the columns are spaced at the uniform distance apart of 24 feet. In the entire structure there are 672 columns, the shortest being 23 feet and the longest 125 feet in length. Their aggregate weight is 2,200,000 pounds. The roof trusses

are similar in form to those in general use for depots and warehouses, and consist of straight rafters with struts and tie-bars. The aggregate weight of iron in the roof trusses and girders is 5,000,000 pounds. This building being a temporary construction, the columns and trusses are so designed that they may be easily taken down and erected again at another site.

The sides of the building, for the height of seven feet from the ground, are finished with brickwork in panels between the columns; above the seven feet, with glazed sash. Portions of the sash are movable for ventilation. The roof covering is of tin upon sheathing boards. The ground flooring is of plank upon sills resting upon the ground, with no open space underneath.

The building stands nearly due east and west, and is lighted almost entirely by side light from the north and south sides. Louvre ventilators are introduced over the central nave and each of the avenues. Skylights are introduced over the central aisles.

Small balconies, or galleries of observation, have been provided in the four central towers of the building at the heights of the different stories.

A complete system of water supply, with ample provision of fire cocks, etc., is provided for protection against fire, and for sanitary purposes.

Offices for foreign commissions are placed along the sides of the building, in the side aisles, in proximity to the products exhibited.

The ground was graded and foundation laid for this building in the autumn of 1874. The erection of iron work at the site commenced on May 8th, 1875; the erection of the iron work was finished December 2d, 1875; and the building was accepted from the contractor February 14th, 1876. The cost of the building was \$1,580,000.

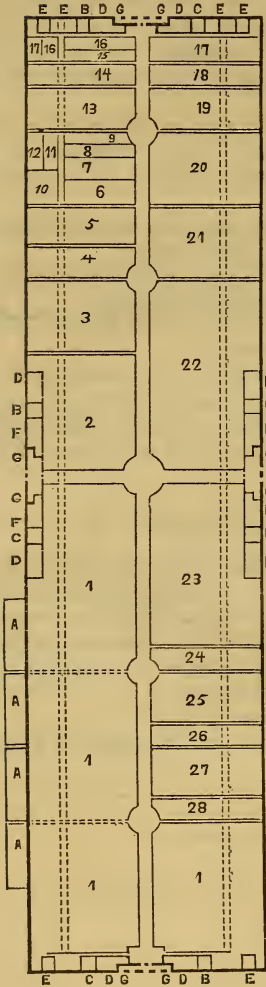

KEY TO THE NOTATION.

THE location of objects in the Main Building is shown by a letter and figure, indicating the nearest column of the building. The letters—A, B, C, to U—designate the successive ranges of columns, proceeding southward from the northern wall across the width of the building; the figures, the number of the column in each range, counting eastwardly from the western wall, the entire length of the building, from 1 to 79. Thus C 5 is the column in the third range from the north, and the fifth from the western end of the building. The southeasternmost column is U 79.

The class of the classification to which each exhibit belongs is indicated by the small figures at the end of the line.

CLASSIFICATION.

DEPARTMENT I.—MINING AND METALLURGY.

MINERALS, ORES, STONE, MINING PRODUCTS.

- CLASS 100.—Minerals, ores, etc. Metallic and non-metallic minerals, exclusive of coal and oil. Collections of minerals systematically arranged; collections of ores and associated minerals; geological collections.
- CLASS 101.—Mineral combustibles. Coal, anthracite, semi-bituminous, and bituminous, coal-waste and pressed coal; albertite, asphalt, and asphaltic limestone; bitumen, mineral tar, crude petroleum.
- CLASS 102.—Building stones, marbles, slates, etc. Rough, hewn, sawn, or polished, for buildings, bridges, walls, or other constructions, or for interior decoration, or for furniture.
Marble—white, black, or colored—used in building, decoration, statuary, monuments, or furniture, in blocks or slabs not manufactured.
- CLASS 103.—Lime, cement, and hydraulic cement, raw and burned, accompanied by specimens of the crude rock or material used, also artificial stone, concrete, beton.
Specimens of lime mortar and mixtures, with illustrations of the processes of mixing, etc. Hydraulic and other cement.
Beton mixtures and results, with illustrations of the processes.
Artificial stone for building purposes, building blocks, cornices, etc.
Artificial stone mixtures, for pavements, walls, or ceilings.
Plasters, mastics, etc.
- CLASS 104.—Clays, kaolin, silex, and other materials for the manufacture of porcelain faience, and of glass, bricks, terra cotta and tiles, and fire brick. Refractory stones for lining furnaces, sandstone, steatite, etc., and refractory furnace materials.
- CLASS 105.—Graphite; crude and refined; for polishing purposes; for lubricating, electrotyping, photography, pencils, etc.
- CLASS 106.—Lithographic stones, hones, whetstones, grindstones, grinding and polishing materials, sand quartz, garnet, crude topaz, diamond, corundum, emery in the rock and pulverized, and in assorted sizes and grades.
- CLASS 107.—Mineral waters, artesian well water, natural brines, saline and alkaline efflorescences and solutions. Mineral fertilizing substances, gypsum, phosphate of lime, marls, shells, coprolites, etc., not manufactured.

METALLURGICAL PRODUCTS.

- CLASS 110.—Precious metals.
- CLASS 111.—Iron and steel in the pig, ingot, and bar, plates and sheets, with specimens of slags, fluxes, residues, and products of working.

CLASS 112.—Copper in ingots, bars, and rolled, with specimens illustrating its various stages of production.

CLASS 113.—Lead, zinc, antimony, and other metals, the result of extractive processes.

CLASS 114.—Alloys used as materials, brass, nickel, silver, solder, etc.

MINING ENGINEERING—MODELS, MAPS, AND SECTIONS.

CLASS 120.—Surface and underground surveying and plotting. Projection of underground work, location of shafts, tunnels, etc. Surveys for aqueducts and for drainage.

Boring and drilling rocks, shafts, and tunnels, etc. Surveys for aqueducts, and for ascertaining the nature and extent of mineral deposits.

Construction. Sinking and lining shafts by various methods, driving and timbering tunnels, and the general operations of opening, stoping, and breaking down ore, timbering, lagging, and masonry.

Hoisting and delivering at the surface, rock, ore, or miners.

Pumping and draining by engines, buckets, or by adits.

Ventilation and lighting.

Subaqueous mining, blasting, etc.

Hydraulic mining, and the various processes and methods of sluicing and washing auriferous gravel and other superficial deposits.

Quarrying.

CLASS 121.—Models of mines, of veins, etc.

UNITED STATES.—STATISTICAL PREFACE.

THE United States of America occupy the entire width of the central portion of North America, between latitude $24^{\circ} 30'$ and 49° north, and from longitude $66^{\circ} 50'$ and $124^{\circ} 30'$ west. They are bounded, north, by New Brunswick, Canada (from which they are separated by the river St. Lawrence and the great lakes), and British Columbia; on the south, by Mexico and the Gulf of Mexico; east, by the Atlantic; and west, by the Pacific Ocean. Their greatest breadth, from Cape Cod, on the Atlantic, to the Pacific, near the parallel of latitude 42 degrees, is about 2600 miles. Their greatest length, from the northern boundary of Maine to Key West, in Florida, is about 1600 miles. Their mean length, from east to west, is about 1600 miles, and from north to south about 1300 miles. Their area, according to calculations founded on the report of the Commissioner of the General Land Office, for 1867, is 3,957,407 square miles, or 1,956,740,480 acres. This, however, is exclusive of the district of Alaska, in the extreme northwest of the continent, purchased from Russia, and comprising 577,390 square miles, or 369,529,600 acres. Including Alaska, the entire area of the United States and territories is 3,634,797 square miles.

Three mountain ranges, the Appalachian chain towards the east, the Rocky Mountains in the centre, and the Sierra Nevada in the west, divide the United States into four great regions. The first of these is the Atlantic slope, or all that portion lying east of the Appalachian or Alleghany range; the second, lying between the Appalachian and the Rocky Mountains, is known as the basin of the Mississippi and Missouri; the third is the country between the Rocky Mountains on the east and the Sierra Nevada on the west; the fourth extends from the Sierra Nevada to the Pacific Ocean, and is known as the Pacific slope.

The Appalachian or Alleghany mountains extend from the State of Mississippi northeast through the States of Alabama, Georgia, Tennessee, North Carolina, Virginia, Pennsylvania, New York, and Vermont, for about 1200 miles, at a variable distance of from 70 to 300 miles from the Atlantic coast, and with an average breadth of about 100 miles. Their mean height is from 2000 to 3000 feet, half of which consists in the elevation of the mountains over the adjacent plains, and the rest in the elevation of these plains above the sea. The White Mountains of New Hampshire, belonging to this chain, reach a height of 6226 feet, and the Black Mountain, of North Carolina, is 6732 feet above the level of the sea. The Rocky Mountains are a prolongation of the Mexican Cordillera, and some of their highest peaks attain to between 12,000 and 15,000 feet above the level of the sea. Their average altitude is about 8500 feet. The Sierra Nevada, or Snowy Mountains, are 10° to 12° west of the Rocky Mountains. Under different names, and with different altitudes, this range extends from the peninsula of lower California to Alaska, some of its passes being about 9000 feet, and its highest summits about 16,000 feet above the level of the sea.

The rivers of the United States are of great magnitude and importance. Of those flowing east and south the principal are the Mississippi and Missouri, which, with their tributaries, the Ohio, Arkansas, Red, Yellowstone, and Nebraska rivers, give to the interior an extent of inland navigation and a facility of communication unequalled on any other continent. Among the principal rivers flowing into the Atlantic, are the Hudson, Delaware, Susquehanna, Potomac, Savannah, and St. Johns. The Columbia, Sacramento, and Colorado flow into the Pacific Ocean. The Mississippi,

Alabama, Colorado (of Texas), and Rio Grande (the last named forming the boundary between Texas and Mexico), empty into the Gulf of Mexico. The area of the water-basins has been estimated as follows: Rivers flowing into the Pacific, 644,040 square miles; into the Atlantic, 488,877; into the Gulf of Mexico, 1,683,325 square miles, of which 1,257,457 are drained by the Mississippi-Missouri rivers. The coast-line on both oceans has a length of about 13,200 miles, excluding the numerous bays and sounds, besides 3600 miles on the great northern lakes.

The following table shows the area and population of each State and Territory:

STATES.	POPULATION IN 1870.	AREA IN SQUARE MILES.
Alabama,	996,992	50,722
Arkansas,	484,471	52,198
California,	560,247	188,981

TERRITORIES NOT ORGANIZED.		
Alaska,		577,340
Indian,		68,991
Total,	38,558,351	3,602,424

In a country extending through 24° of latitude, and nearly 60 of longitude, the climate varies considerably. In the north, along the British frontier, the winter is very severe; during this season the snow is sufficiently abundant in New England to admit the use of sleighs, and the ice on the rivers strong enough to bear the passage of horses and wagons. As far south as Pennsylvania and New Jersey, the thermometer falls, in winter, below zero; rising, in summer, to nearly 100° Fahr. Along the Atlantic coast, between latitude 41° and 45°, the climate is colder in winter and warmer in summer, by nearly 10°, than in those parts of Europe which lie under the same parallels. Snow, however, rarely falls south of latitude 30°; nor is it frequently seen south of the Potomac, except on mountains. The mean annual temperature of Albany is about 49°; of New York and Cincinnati, about 51°; of Philadelphia, 54°; of Natchez, 65°, and of Cantonment Brooke, in Florida, 72°. The temperature along the Pacific is much higher than in corresponding latitudes on the eastern coast.

The Mississippi valley is very fertile. In the Eastern States there still exist large forests of valuable timber, such as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and, in the South, live-oak, water-oak, magnolia, palmetto, tulip tree, cypress, etc., remnants of the wooded region which formerly extended over the whole Atlantic slope, but into which great inroads have been made by advancing civilization. Apples, pears, cherries, and plums flourish in the North; peaches, melons, and grapes in the Middle States; pineapples, pomegranates, figs, almonds, and oranges in the South. Maize is grown from Maine to Louisiana, and wheat throughout the Union; tobacco as far north as Connecticut, and in the Western States south of Ohio. There is not much cotton raised north of 37°, though it grows as far north as 39°. Rice is cultivated in South Carolina, Georgia, Louisiana, and as far north as St. Louis, Mo. The sugar-cane grows as high as 33°, but does not thoroughly succeed beyond 31° 30'. The vine and mulberry tree grow in various parts of the Union; oats, rye, and barley throughout the North and the mountainous parts of the South; and hemp, flax, and hops in the Western and Middle States. The following figures, taken from the report of the ninth census (1870), will convey an idea of the extent of the annual productions of agriculture:

Spring wheat,	112,549,733	bushels
Winter wheat,	175,195,893	"
Rye,	16,918,795	"
Indian corn,	760,944,549	"
Oats,	282,107,157	"
Barley,	29,761,305	"
Buckwheat,	9,821,721	"
Rice,	73,635,021	pounds
Tobacco,	262,735,341	"
Cotton,	3,011,996	bales
Peas and beans,	5,746,027	bushels
Irish potatoes,	143,337,473	"
Sweet potatoes,	21,709,824	"
Wine,	3,092,369	gallons
Hay,	27,316,048	tons
Clover seed,	639,657	bushels
Grass seed,	583,188	"
Sugar (from cane),	87,043	hhds
Maple sugar,	28,443,645	pounds
Molasses,	23,564,469	gallons
Dairy Products.—Butter,	514,092,683	pounds
Cheese,	53,492,153	"
Milk sold,	235,500,599	gallons
Wool,	100,102,387	pounds
Wax,	631,129	"
Honey,	14,702,815	"

The same report gives the cash value of farms in the United States at \$9,262,803,861; of farming implements and machinery, at \$336,878,429; live stock, at \$1,525,276,457.

Total estimated value of all farm productions, including betterments and additions to stock, \$2,447,538,658. Value of orchard products, \$47,335,189; products of market gardening, \$26,719,229.

There were, at the same time, 8,690,219 horses, 28,074,582 cattle, 28,477,951 sheep, and 25,184,540 hogs.

Except a few small isolated fields, all the bituminous coal in the United States lies west of the Appalachian chain, where a vast series of coal beds stretch from the mountains west through Ohio, Indiana, and Illinois, parts of Kentucky and Alabama, into the State of Missouri, and as far as two hundred miles beyond the Mississippi. Anthracite coal is found most extensively in Pennsylvania; also in Western Virginia and the eastern portion of Ohio and Illinois. The oil-wells of northwestern Pennsylvania contain apparently inexhaustible stores of mineral oil or petroleum. Numerous salt-springs exist in New York, Virginia, Pennsylvania, and the Western States. Iron is distributed most abundantly through the coal measures in Pennsylvania, Ohio, Virginia, and Tennessee, the ore containing from 25 to 33 per cent. of metal. Iron ore also abounds in the Northwestern States; and that found in one part of Vermont yields 78 per cent. of iron. A large proportion of the ore found in this part of the Union is magnetic. Lead is found in various places, but more especially in Missouri, Wisconsin, and Illinois. In some parts of Wisconsin this ore yields from 60 to 70 per cent. of lead. Large deposits of copper have been found in Michigan, in the Lake Superior region. Gold, in large quantities, and silver, have been found in the States and Territories west of the Rocky Mountains. Gold has also been found in Virginia, the Carolinas, Georgia, and Tennessee. Quicksilver, zinc, manganese, with lime and building stone, are the other chief mineral products. The following figures are from the Statistics of Mining, Table VIII, Report of the Ninth Census (1870):

	VALUE OF PRODUCTS.
Anthracite coal,	\$38,495,745
Bituminous coal,	35,029,247
Copper,	5,201,312
Gold, placer mined,	7,266,613
" hydraulic mined,	2,508,531
Quartz, gold and silver bearing,	16,677,508
Iron ore,	13,204,138
Lead,	736,004
Petroleum,	19,304,224

The mechanical and manufacturing establishments of the Union, in 1870, numbered 252,148, using steam-engines of 1,215,711 horse-power and 1,130,431 horse-power in water-wheels, and employing 2,053,996 hands. The amount of capital invested is \$2,118,208,769; annual wages, \$775,584,343; material used, \$2,488,427,242, and the total products \$4,232,325,442. The chief manufacturing States are Pennsylvania, New York, Massachusetts, Ohio, Illinois, New Jersey, Connecticut, and Rhode Island.

The importations for the year ending June 30th, 1875, were:

Merchandise,	\$533,005,536
Gold and silver,	20,894,217
Total,	<u>\$553,899,753</u>
Foreign exports, merchandise,	\$14,157,611
Gold and silver,	8,275,013
Total,	<u>\$22,432,624</u>

The gold value of domestic exports, during the same period, was \$583,141,229.

In the length of miles of railway open to traffic, the United States exceeds all other nations, although in the proportion of miles of railway to miles of area, it ranks below some of the smaller and more densely populated states of Europe. The following figures, from Poor's "Railway Manual," illustrate the growth of the railway system in the United States:

In 1830, there were	23 miles in operation.
" 1840, " "	2,818 " " "
" 1850, " "	9,021 " " "
" 1860, " "	30,635 " " "
" 1870, " "	52,898 " " "
" 1874, " "	72,623 " " "

During the year 1874, the gross earnings were \$520,466,016, of which \$379,466,935 was for freight, and \$140,999,081 for passengers. Net earnings, \$189,570,958; dividends paid, \$67,042,942.

The government of the United States is, by the Constitution, intrusted to three separate authorities, the executive, the legislative, and the judicial. The executive power is vested in a President, who is elected every four years, and is eligible for re-election. The legislative power is vested in two houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of both houses. Two senators from each State are elected by the legislature thereof, for the term of six years; and representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population, one for each 135,239.

The supreme judicial authority is vested in a Chief Justice and eight Associate Justices, who are appointed for life by the President, by and with the consent of the Senate.

The government of each State is on the same model as that of the general government. There is a governor chosen by popular vote, and a State legislature, similarly chosen, composed of two houses. Each State also has a constitution which prescribes its form of government.

The following statistics apply to the army and navy of the United States in 1875: The army consisted, July 1st, 1875, of 2204 commissioned officers, and 25,000 enlisted men; the navy of 175 vessels, with an armament of 1282 guns, 8500 men, 1254 commissioned, and 490 non-commissioned officers on the active list.

The postal service is conducted by the general government. During the fiscal year ending June 30th, 1875, it carried 601,921,520 letters, 117,215,850 stamped wrappers, 13,956,750 newspapers, and 31,094,500 postal cards. The money orders amounted to \$75,425,854.

The telegraph lines belong to private corporations. Their total length, in January, 1875, was 75,000 miles; length of wires, 165,000 miles; number of offices, 6172; number of messages transmitted during the year 1874, 13,700,000.

Education is conducted by the separate States. In general the primary schools are supported by a property tax, and nearly all the States have school funds in addition, the income of which is distributed among the towns in proportion to the number of pupils educated. The gifts with which, during late years, private individuals have endowed institutions of learning, prove a growing appreciation of the claims of the higher education.

The following statistics are collated from the report of the ninth census, 1870:

PUBLIC SCHOOLS.

NUMBER OF SCHOOLS.	TEACHERS EMPLOYED.			PUPILS IN ATTENDANCE.		
	MALE.	FEMALE.	TOTAL.	MALE.	FEMALE.	TOTAL.
125,059	74,174	109,024	183,198	3,120,052	3,108,008	6,228,060

The schools "Not Public" are arranged under two headings: "Classical, Professional, and Technical," and "Other Schools."

"NOT PUBLIC" SCHOOLS (Classical, Professional, and Technical).

NUMBER.	TEACHERS.			PUPILS.		
	MALE.	FEMALE.	TOTAL.	MALE.	FEMALE.	TOTAL.
Classical, etc., 2,545	7,766	5,001	12,767	148,810	106,380	255,190
Other Schools, 14,025	11,389	13,688	25,077	353,134	373,554	726,688

INCOME.

PUBLIC.	NOT PUBLIC.		
	CLASSICAL, PROFESSIONAL, AND TECHNICAL.	OTHERS.	
From Taxation of Public Funds,	\$58,855,507	\$2,320,250	\$570,282
" Endowments,	144,533	3,356,003	163,249
" Other Sources, including Tuition,	5,030,633	11,999,654	12,962,615
	\$64,030,673	\$17,675,907	\$13,696,146

The total number of libraries returned was 163,353, containing 44,539,184 volumes. Of these, 107,673 were private libraries, containing 25,571,503 volumes. In the opinion of the superintendent of the census, these results are "manifestly far below the truth."

The newspaper and periodical press comprised, in 1875, 7870 publications, divided as follows: Daily, 1718; tri-weekly, 80; semi-weekly, 107; weekly, 5957; bi-weekly, 24; semi-monthly, 106; monthly, 802; bi-monthly, 8; quarterly, 68.

"STAR" ALPACA BRAIDS.

S. B. & M. FLEISHER,
MANUFACTURERS, PHILADELPHIA.

WHY ARE THEY THE BEST?

ANSWER:

As a strong and conclusive evidence of the superior quality of the "STAR" ALPACA BRAIDS, is the preference that is given them over all competitive makes.

Having been subjected to rigid tests for the past ten years, and wherever introduced, they at once became the desired article.

They are made of the very best materials, with the greatest care and efficient workmanship, and upon the most improved machinery.

With these appliances, and a determination to go ahead, the manufacturers have made the "STAR" Alpaca Braids the most popular Braid of the country.

GROS GRAIN DRESS SILKS in Black and Colors of all Shades.

FIGURED AND TWILLED SILKS for the Millinery Trade.

FLORENTINES AND MARCELLINES, of all colors, qualities, and widths, for the use of Manufacturers of Parasols, Hats, Caps, and Furs.

SILK HANDKERCHIEFS AND MUFFLERS, Plain or with Woven or Printed Borders.

SILK FLAGS of various sizes, from 7 x 10 to 30 x 48 inches, hemmed and boxed in dozens for the trade.

BONNET RIBBONS, Black and Colored, of all widths and shades.

SASH AND BELT RIBBONS.

MACHINE TWIST AND SEWING SILK.

ORGANZINES, TRAMS, AND FINE PATENT SPUN SILKS, for Silk Mixture, Cassimeres, and for all other fabrics in which Silk is used.

Particular attention given to orders for special kinds of Silk used by manufacturers.

Specimens of all the above-mentioned fabrics and threads can be seen in the show-case of **Cheney Brothers**, in the American Silk Department of the Centennial Exhibition in the Main Building.

UNITED STATES.

Minerals, Ores, Stone, Mining Products.

- Minerals, Ores, Stone, Mining Products.**
- 1 Cambria Iron and Steel Co., Johnstown, Pa. T 65.
 - a Carbonate, fossil, and hematite ores from Johnstown, Frankstown, Marklesburg, Yellow Creek, Levant, Henrietta, and Springfield mines; specular, magnetic, red hematite, Lake Superior, and Lake Champlain ores; manganiferous Iron Mountain ores. 100
 - b B, C, D, and E, coal from Johnstown and Bennington mines; Belgian, pit, and oven coke. 101

GREAT BRITAIN.—STATISTICAL PREFACE.

THE following brief table is given (approximately) of the area, population, revenue, and commerce of the British Empire. It is not possible to give the exact figures, but for all practical purposes those now given will be sufficient. The colonies which exhibit are treated under their proper names.

NAME OF COUNTRY.	AREA IN SQUARE MILES.	POPULATION.	REVENUE.	PUBLIC DEBT.	IMPORTS AND EXPORTS.
Great Britain and Ireland,	122,518	31,857,338	\$389,600,000	\$3,555,100,000	\$3,262,900,000
Indian Possessions, etc., .	1,558,254	240,000,000	243,500,000	550,310,000	472,390,000
Other Eastern Possessions,	25,264	3,150,000	10,714,000	8,766,000	160,710,000
Australasia,	3,087,000	2,105,000	53,570,000	219,150,000	365,250,000
North America,	3,620,500	4,000,000	21,915,000	107,140,000	209,410,000
Africa,	250,000	1,400,000	4,870,000	7,792,000	43,830,000
West Indies,	12,707	1,075,000	535,700	4,870,000	48,700,000
European Possessions, .	120	160,000	1,022,700	1,217,500	73,050,000
Various settlements, . .	96,171	200,000	2,678,500	3,105,500	24,350,000
Totals,	8,772,534	283,947,338	\$728,405,900	\$4,457,511,000	\$4,660,590,000

The *United Kingdom of Great Britain and Ireland* is the full designation of the country more generally known as Great Britain or the United Kingdom. It includes the two large islands of Great Britain and Ireland, and the adjacent smaller islands, together with the Channel Islands and the Isle of Man.

The following table exhibits the area, in English square miles, and population, according to the last census of the several constituent parts:

	AREA.	POPULATION.
England,	50,922	21,495,131
Wales,	7,397	1,217,135
Scotland,	31,324	3,360,018
Great Britain,	89,648	26,072,284
Ireland,	32,481	5,411,416
Isle of Man, and Channel Islands,	394	144,638
Army and Navy, and Merchant Seamen,	122,518	229,000
		31,857,338

The island of Great Britain lies between latitude $49^{\circ} 57' 30''$ and $58^{\circ} 40' 24''$ north, and between longitude $1^{\circ} 46'$ east, and $6^{\circ} 13'$ west, and is the largest island in Europe, It is bounded on the north by the Atlantic, on the east by the North Sea, and on the south by the English Channel, and on the west by the Atlantic, the Irish Sea, and St. George's Channel. Its greatest length is about 608 miles, and its greatest breadth (from Land's End to the east coast of Kent), about 300 miles.

England, which may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the Rivers Tyne and Solway, and from Wales by the Severn

and Dee, is, except on the west and north, for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, as iron, tin, lead, copper, and coal, which make abundant amends for the poverty of their surface. Wales is generally mountainous, and also has great mineral wealth.

The greater part of the surface of Scotland is irregularly distributed into mountains and valleys, a very small proportion spreading into level plains. The eastern coast forms a waving, continuous, and rarely broken line; the western is extremely irregular, being deeply indented with bays and arms of the sea, and exhibiting steep promontories and mountainous islands. The whole country is physically divided into *Highlands* and *Lowlands*—the former comprehending the northwest, west, and central portions; the latter, generally speaking, the east coast and the country south of the Forth and Clyde.

Ireland is an island lying between $51^{\circ} 26'$ and $55^{\circ} 23'$ north latitude, and $5^{\circ} 20'$ and $10^{\circ} 26'$ west longitude. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west 120 to 180 miles. Ireland is divided into the four provinces of Ulster, Leinster, Munster, and Connaught, which are again subdivided into 32 counties.

The geology of Great Britain is of peculiar importance. British geologists have given to the world the names whereby the various strata are known, and British rocks form the typical series of the earth's strata. The whole recognized series of stratified deposits occur in Britain, one or two only being more fully developed elsewhere; and it is only in these singular cases that the foreign equivalents are taken as the types. British geology is no less important from the influence it has had in the development of the country, its mineral wealth, especially the coal and iron, being the real sinew of Britain's wealth and power.

In the year 1874, there was produced from the ore nearly 6,000,000 tons of pig iron, value £16,476,372; and 385 ounces of gold were raised, value £1540. Copper, tin, lead, zinc, silver, and other metals brought the total value of metals produced up to £19,539,070. The aggregate value of all the minerals, metals, coal, etc., obtained in the United Kingdom in 1874, was £67,834,313. Included in this were 125,043,257 tons of coal, value £46,849,194.

The climate of Great Britain is mild and equable in a remarkable degree, the winters being considerably warmer and the summers colder than at places within the same parallels of latitude. The mean temperature of England is 49.5° , and of Scotland 47.5° .

Very few species of plants or animals are peculiar to Great Britain. The flora, for the greater part, resembles that of Germany; but in the south of England there is, as might be expected, a closer correspondence with that of the northwest of France; and some plants found in the Channel Islands and on the French coast appear nowhere in Britain but on the southwest coast of England. The mountains of Wales, Cumberland, and Scotland have a vegetation resembling that of Scandinavia more than that of the mountains of central or southern Europe. The state of the case is much the same as to the fauna. There are, however, many remarkable instances both of plants and animals, which, from these apparent relations to continental Europe, might be expected in Great Britain, and which are not indigenous to it; as, for instance, among plants, the Norway spruce, and among animals, the lemming, both common in Scandinavia. The progress of civilization and of cultivation has completely banished from Great Britain many of the animals which were once numerous, as bears, wolves, etc. On the other hand, many plants which were unquestionably introduced by man, have become thoroughly naturalized.

For administrative purposes, Great Britain with its surrounding islands (excepting the Channel Islands and the Isle of Man, which are under peculiar jurisdiction) is divided into 84 counties or shires.

The soil of Great Britain is almost exclusively devoted to the production of the two primary necessities of society,—breadstuffs (chiefly wheat, barley, and oats) and grass, roots, etc., as food for domestic animals. The annual value of the pastures and meadow hay is immense. The total extent of land returned in 1872, as being under all kinds of crops, bare fallow and grass, was 31,004,173 acres in Great Britain, 15,746,547 acres in Ireland, 88,573 in the Isle of Man, 18,026 acres in the island of Jersey, and 12,007 acres in the islands of Guernsey, Alderney, etc., making a total for the United Kingdom of 46,869,326 acres. The number of horses included in the agricultural returns was 1,808,259; the number licensed in Great Britain was 857,045; the number of others than agricultural horses exempt from license duty, was probably about 35,000; and the number belonging to the army at home may be stated at 15,000, which would bring the total number of horses in the United Kingdom up to 2,715,000. The total number of cattle returned for the United Kingdom in 1872, was 9,718,000; sheep, 32,246,000; pigs, 4,178,000.

Constabulary returns, based upon information obtained from farmers and others and received by the Boards of Guardians, show that in the year 1873, Ireland produced 469,563 quarters of wheat, 6,912,765 quarters of oats, 1,016,339 quarters of barley, 25,576 quarters of bere and rye, 48,375 quarters of beans and peas, 2,683,060 tons of potatoes, 4,429,967 tons of turnips, 515,690 tons of mangold wurzel, 278,923 tons of cabbage, 19,843 tons of flax, and 3,306,163 tons of hay. At the end of 1873, Ireland had 4,142,400 head of cattle, 4,482,053 sheep, 532,146 horses and 1,042,244 pigs.

The following table shows the condition* of the textile industries of the United Kingdom, 1874:

	NO. OF FACTORIES.	HANDS EMPLOYED.
Cotton,	2,655	479,515
Woolen,	1,800	135,605
Worsted,	692	142,097
Flax,	449	128,459
Silk,	818	45,559
Shoddy,	125	3,431
Hemp,	61	5,211
Jute,	110	37,920
Hair,	27	1,211
Hosiery and other factorys,	557	27,667
Total,	7,294	1,006,675

The government of Great Britain is of the kind known as a "constitutional monarchy," in which the sovereign accepts of his dignity under an express agreement to abide by certain prescribed conditions. The sovereignty is hereditary in the family of Brunswick, now on the throne, and in the person of either a male or a female. The executive government of the United Kingdom is vested nominally in the crown, but practically in a committee of Ministers, commonly called the Cabinet, which has come to absorb the functions of the ancient Privy Council, the members of which, bearing the title of Right Honorable, are sworn "to advise the king according to the best of their cunning and discretion," and "to help and strengthen the execution of what shall be resolved." Though not the offspring of any formal election, the Cabinet is virtually appointed by Parliament, and more especially by the House of Commons, its existence being dependent on the possession of a majority in the latter body.

The powers of Parliament are politically omnipotent within the United Kingdom, its colonies and dependencies. It can make new laws, and enlarge, alter, or repeal those existing. Its authority extends to all ecclesiastical, temporal, civil, or military matters, as well as to altering or changing the constitution of the realm. Parliament is the highest court of law, over which no other has jurisdiction.

The budget estimates for the financial year 1875-76, laid by the Chancellor of the Exchequer before the House of Commons, April 15th, 1875, was as follows:

Total revenue,	£75,685,000
“ expenditure,	75,266,000
“ estimated surplus,	£419,000

The following figures show the numerical strength of the military force in the United Kingdom in 1875:

Cavalry,	13,358
Artillery,	19,418
Engineers,	4,020
Infantry,	55,590
Total,	92,386

The army estimates of March 31st, 1876, contain votes of money for four classes of reserves, as follows:

	MEN.
Militia,	139,018
Yeomanry cavalry,	15,130
Volunteers,	161,150
Enrolled pensioners and army reserve force,	32,000

The total force of the British army in India was stated, in the estimates of 1875-76, to amount to 63,197.

On the 1st of December, 1874, the navy consisted of 233 steamers and sailing vessels, manned by crews aggregating 60,000.

The following are the statistics for the year 1874 of the tonnage of British and foreign vessels (sailing and steam) entered and cleared at ports in the United Kingdom from and to foreign countries and British possessions:

	ENTERED.	CLEARED.	TOTAL.
British,	14,833,644	15,256,039	30,089,683
Foreign,	7,534,866	7,804,408	15,339,274
Total,	22,368,510	23,060,447	45,428,957

There were, in 1874, 20,872 vessels, with crews aggregating 203,606, and of a registered tonnage of 5,864,588.

On the 1st of January, 1875, there were 16,448 miles of railway open in the United Kingdom. The statistics of capital, passengers, receipts, and working expenses for the year 1874 were as follows: Total capital paid up (shares, loans), \$2,970,456,106; number of passengers, 478,316,701; total of traffic receipts, \$277,109,238; working expenses, \$158,040,397.

The number of letters delivered in 1874 was, in England and Wales, 804,000,000, in Scotland, 90,000,000, and in Ireland, 73,000,000. Of postal cards there were 66,000,000 delivered in England and Wales; 9,000,000 in Scotland; and 4,000,000 in Ireland; total for the United Kingdom, 79,000,000.

The number of newspapers and book packets delivered in 1874 was 207,000,000 in England and Wales, 29,000,000 in Scotland, and 23,000,000 in Ireland; total, 259,000,000. The number of money orders in 1874, in the whole of the United Kingdom was 15,900,562, of the aggregate value of £26,296,441. At the end of the year the total amount of deposits held by the Post Office Savings Bank was £24,030,711.

There were 19,116,634 telegraph messages forwarded from postal telegraph stations in the year 1874. The number of post offices at the end of 1874 was 12,950. The total number of telegraph offices, at the same date, was 5600, including 1800 railway telegraph offices. The total length of the postal telegraph wires at the end of 1874 was 107,000 miles.

In England, the chief institutions for education are the ancient national universities of Oxford and Cambridge; the more recent institutions of London, Durham, and Lampeter, in Wales; the classical schools of Eton, Westminster, Winchester, Harrow, Charter House, and Rugby; Owens College, Manchester, and other colleges and schools, chiefly for physical science; the various military schools; the colleges of the dissenting denominations; the middle class schools, either started by individual teachers or by associated bodies acting as directors, to whom the teachers are responsible; and the schools of design.

For primary education, a national system has now been established. Under the Elementary Education Act for England, 1870, a popularly elected school board is established in any district where the existing schools are deficient. Schools under the act are supported by school-rates and fees, and by parliamentary grants, varying according to the number of pupils, and their proficiency, as tested by different standards of examination. They are at all times to be open to government inspection. It is left to the discretion of school boards to make education compulsory.

Scotland possesses four universities for the higher branches of education, viz.: Edinburgh, Glasgow, St. Andrew's, and Aberdeen, besides a variety of other minor colleges. The Scotch education act, 1872, is modelled after the English act, but differs from it by enacting that a school board is to be elected in *every* parish and burgh; by making it illegal for parents to omit educating their children, between five and thirteen, in reading, writing, and arithmetic; and by comprehending higher class schools.

The number of the day-schools in Great Britain, inspected in 1871, was 10,700; the daily average attendance throughout the year was 1,434,488; 1,724,689 scholars were present at inspection; 875,298 were examined; and 598,203 passed the prescribed tests. On the registers of the inspected day-schools were 2,055,312 children, of whom 517,344 were under six years of age, 1,332,229 between six and twelve, and 205,739 above twelve; 2709 night-schools, were inspected, having an average attendance of 86,206 each night. In December, 1871, there were in Great Britain 15,605 certificated teachers, 1196 assistant teachers, and 21,854 pupil teachers.

Ireland is well supplied with educational establishments, having three universities, a large number of endowed schools, and an admirable system of mixed schools.

Commission from GREAT BRITAIN and COLONIES to the International Exhibition :

HIS GRACE THE DUKE OF RICHMOND AND GORDON, K. G.,
Lord-President of the Council.

THE RT. HON. SIR EDWARD THORNTON, K. C. B., Minister of the Court of St. James at Washington, Special Commissioner to represent Great Britain at Opening Ceremonies.

Executive Staff :

NEW SOUTH WALES.—STATISTICAL PREFACE.

NEW SOUTH WALES, a British colony in the southeastern portion of Australia, is bounded on the north by a line which, beginning at Point Danger, in latitude $28^{\circ} 8'$ south, follows several lines of heights across the Dividing Range till it meets the 29th parallel, which forms the rest of the boundary westward; on the west by the 141st meridian; on the east by the Pacific Ocean; and the line separating it from Victoria on the south runs from Cape Howe, at the southeast of the island, northwest to the source of the Murray, and then along that stream, in a direction west by north, to the western boundary of the two colonies.

Its area is 323,437 square miles, and its population in 1871 was, exclusive of aborigines, 503,981. At the same date the population of Sydney, the capital, was 134,755. Within the colony of New South Wales, the mountain range, which girdles nearly the whole island, is most continuous and elevated, and is known as the Dividing Range. The section of this mountain system on the southern boundary of the colony, called the Australian Alps, rises in Mount Kosciusko to 6500 feet. From this the range extends northward, the water-shed being from 50 to 150 miles distant from the east coast, and thus divides the colony into two slopes, with two distinct water systems. The rivers on the eastern side descend with great rapidity, and in oblique tortuous courses, their channels often forming deep ravines. Many of them are navigable in their lower course for sea-going steamers. The principal are the Richmond, Clarence, McLeay, Manning, Hunter, Hawkesbury, and Shoalhaven. The numerous streams that rise on the west side of the water-shed within the colony, all converge and empty their waters into the sea through one channel within the colony of South Australia. The southern and main branch of this great river system is the Murray. The other great trunks of the system are the Murrumbidgee, which is navigable, the Lachlan, at times reduced to a string of ponds, and the Darling. The Macquarie, passing through the rich district of Bathurst, is a large tributary of the Darling, but it reaches it only in the rainy seasons. The coast line from Cape Howe to Point Danger is upwards of 700 miles long, and presents numerous good harbors formed by the estuaries of the rivers. Owing to the great extent of the

colony, stretching as it does over eleven degrees of latitude, the climate is very various. In the northern districts, which are the warmest, the climate is tropical, the summer heat occasionally rising in inland districts to 120°, while on the high table-lands weeks of severe frost are sometimes experienced. At Sydney, the mean temperature of the year is about 65°. The mean heat of summer, which lasts here from the beginning of December to the 1st of February, is about 80°, but it is much modified on the coast by the refreshing sea breeze. The annual fall of rain is about 50 inches. Rain sometimes descends in continuous torrents, and causes the rivers to rise to an extraordinary height. Sometimes the rains almost fail for two or three years in succession. Along the coast, for 300 miles from the northern boundary, the soil and climate are admirably adapted for the growth of cotton, and that plant has already been cultivated as far south as the river Manning (latitude 32° south). Further south the climate is more temperate, and is fitted to produce all the grain products of Europe. Immense tracts of land, admirably adapted for agriculture, occur in the southwestern interior; while in the southeast coast districts, the soil is celebrated for its richness and fertility. In the north, the cotton and tobacco plants, the vine, and sugar-cane are grown; and pineapples, bananas, guavas, lemons, citrons, and other tropical fruits are produced. In the cooler regions of the south, peaches, apricots, nectarines, oranges, grapes, pears, pomegranates, melons, and all the British fruits are grown in perfection, and sometimes in such abundance that pigs are fed with them. Wheat, barley, oats, and all the cereals and vegetables of Europe are also grown.

In June, 1872, New South Wales had 5,615,054 sheep, 2,271,923 horned cattle, 233,220 horses, and 146,091 pigs. The total area of land under cultivation, at the same date, embraced 297,575 acres, of which there were under wheat, 154,030 acres, under barley, 3462 acres, under oats, 13,795, under rye, 1342, under maize, 119,956.

New South Wales is believed to be richer in coal than the other territories of Australia. In 1873, there were 26 mines worked, producing in the year 1,192,861 tons of coal, valued at £665,746.

The gold mines of New South Wales cover a vast area, extending chiefly over the districts called the Western Fields, the Northern Fields, and the Southern Fields. Of these the Western Fields are the most important, furnishing three-fourths of the total supply. The gold exports of 1873 consisted of 200,134 ounces, value £773,439, of gold dust and bar, and of 490 boxes, value £2,151,168, of gold coin. The yield from the copper mines, in 1873, was 6027 tons.

The total exports during the year 1874 were £8,668,113; imports, £9,259,816.

The constitution of New South Wales vests the legislative power in a Parliament of two houses, the first called the Legislative Council, and the second the Legislative Assembly. The Legislative Council consists of not less than 21 members, nominated by the crown, and the Assembly of 72 members, elected by sixty constituencies. To be eligible a man must be of age, a natural-born subject of the Queen, or, if an alien, he must have been naturalized for five years, and resident for two years before election. There is no property qualification for electors, and the votes are taken by secret ballot. The executive is in the hands of a governor, nominated by the crown.

The public revenue during 1874 was £4,200,827, the expenditure, £3,506,780. The public debt, chiefly incurred for railways and other public works, amounted, at the end of 1874, to £10,842,415.

New South Wales possesses 396 miles of railways. Of electric telegraph, there were in the colony 6114 miles of wire, at the end of 1874. Number of paid messages transmitted during 1874, 385,000; number of telegraph stations, 105.

The post office of the colony transmitted 9,300,000 letters, 4720 newspapers, and 250,000 packets in 1874.

The number of schools, public and private, in 1872, was 1464, with 106,691 pupils.

VICTORIA.—STATISTICAL PREFACE.

VICTORIA comprises the southeast corner of Australia, at that part where its territory projects furthest into cool southern latitudes. Wilson's Promontory, to the southeast, the most southerly headland, just passes the 39° of south latitude, while the most northern point, which is at the opposite or northwest extreme, is in south latitude 34°. The longitude comprises 9°,—between 141° and 150° east of Greenwich. To the west is the colony of South Australia, separated by the 141° of east longitude, to the north is New South Wales, separated by the line of the Murray river eastwards from 141° east longitude to its source, and thence by a straight line southeast to Cape Howe, and from Cape Howe to South Australia again the colony is bounded on the south by Bass's Strait. The extreme length is east and west, and

is about 500 miles, by an extreme width north and south of 300 miles. But a remarkable indentation of both the north and south boundaries opposite each other, about the middle of the colony, reduces the breadth between the head of the Port Phillip inlet and the Murray to only 120 miles. The superficial area is 88,198 English square miles.

Although Victoria may be called mountainous, as compared with the general flatness of Australia, it has much of the quiet and peculiar scenery characteristic of that division of the world. The highest mountain in Australia, Mount Feathertop, is 6303 feet in height. The largest river, which runs throughout its entire course in Victoria, is the Gouldbourn, 230 miles long. The Murray, which winds for a distance of 630 miles along the northern boundary of Victoria, rises in New South Wales, and falls into the sea in South Australia, so that it can scarcely be called a Victorian river.

The climate is on the whole healthful and agreeable, but subject to frequent and sudden change in condition and temperature. The average temperature of Melbourne is 57.6°, about the same as that of Marseilles, Bordeaux, Bologna, Nice, and Madrid. The common summer heat is from 65° to 80°, with an occasional advance to 90°, and even to 100°, during hot winds and a dry season. The winter range is mostly from 45° to 60°. Ice occurs in the midwinter of July, but it rarely, except on elevated ground, survives the noonday sun.

The estimated population of Victoria, on the 31st of March, 1875, was returned at 810,442 by the Registrar-general.

In 1875 there were 1,011,776 acres under crops, including 332,936 acres of wheat, 114,921 of oats, 29,505 of barley, 35,183 of potatoes, 119,031 of hay, and 253,129 of green forage. The gross produce was: wheat, 4,850,165 bushels; oats, 2,121,612 bushels; barley, 619,896 bushels; potatoes, 124,310 tons; hay, 157,261 tons; wine, 577,493 gallons. The total number of horses was, in 1875, 180,254; milch cows, 241,137; horned cattle, 717,251; sheep, 11,221,036; pigs, 137,941. The manufactures of Victoria employed 25,000 persons, and the capital invested in machinery and plant was £5,000,000. The number of persons at work in the gold fields, December 31st, 1874, was 45,151, of whom 12,180, or 27 per cent., were Chinese.

The total value of the imports and exports of Victoria, including bullion and specie, for the year 1874, was as follows: Imports, £16,953,985; exports, £15,441,109. The most important, in value, of the imports are woollens, live stock, sugar, cotton, apparel and haberdashery, and tea. The two staple articles of export are wool and gold. The total exports of wool in 1874 amounted to 88,662,311 pounds, of the value of £6,373,641. The exports of gold, exclusive of specie, was 1,012,153 ounces, of a declared value of £4,053,288.

The number of mercantile vessels on the register of Victoria, at the end of 1874, was 429, with a total tonnage of 70,696, and crews of 3229 men. Of these vessels 47 were steamers.

The constitution of Victoria was established by an act passed by the legislature of the colony in 1854, and subsequently confirmed by the crown. The legislative authority is vested in a parliament of two chambers—the Legislative Council, composed of 30 members, and the Legislative Assembly, composed of 78 members. A property qualification is required both for members and electors of the Legislative Council. No electoral property qualification is required for graduates of British universities, matriculated students of the Melbourne university, religious ministers of all denominations, certificated schoolmasters, lawyers, medical practitioners, and officers of the army and navy. Six members, or a fifth, of the Legislative Council must retire every two years, so that a total change is effected in ten years. The members of the Legislative Assembly are elected by universal suffrage, for the term of three years. The executive is vested in a governor appointed by the crown. The revenue for the year 1874-75 was £4,406,906; the expenditure, £4,425,277. The public debt, incurred mainly in the construction of public works, amounted to £12,485,432 on January 1st, 1875.

Victoria has a more extensive system of railways than any other of the Australasian colonies. On the 1st of January, 1875, there were 457½ miles opened for traffic, and 427 more in course of construction. There were, in 1874, 148 telegraph stations, 4464 miles of wires. Number of telegrams forwarded during the year, 701,080. The work of the post office during the same year, 15,732,888 letters, 6,866,913 newspapers, and 1,269,322 packets. Number of post offices, 802.

The following table shows the educational condition of the population above five years of age:

	MALES.	FEMALES	TOTAL.
Able to read and write,	264,665	209,898	474,665
Able to read only,	30,049	36,336	66,385
Unable to read,	25,462	26,315	51,077

The state of education among the children, between 5 and 15, showed that 846 children out of 1000 could read, 640 could read and write, and only 154 were totally uneducated. Education in Victoria is gratuitous, secular, and compulsory, and the legislature has voted large sums for the primary education of the people.

The total number of schools is 1867, including 908 "common" schools, with an attendance of 154,353 pupils. (Furnished, in part, by the Victoria Commission.)

Commission from VICTORIA to the International Exhibition:

SIR REDMOND BARRY, Acting Chief Justice of the Supreme Court, President.

NEW ZEALAND.—STATISTICAL PREFACE.

NEW ZEALAND, a British colony in the South Pacific Ocean, consists of three principal islands, called, respectively, the North, South, and Stewart Islands. There are several small islets—mostly uninhabited—dependent on the colony; the chief of them are the Chatham Islands and the Auckland Islands. The New Zealand group is situated about 6500 miles west of South America, and about 1200 miles east of Australia. The entire group lies between 34° and 48° south latitude and 166° and 179° east longitude. The three principal islands extend in length 1100 miles, but their breadth is extremely variable, ranging from 46 miles to 250 miles; the average breadth being about 140 miles. The North and South Islands are separated by Cook Strait, which is crossed by steamers in about two hours.

The total area of New Zealand is about 100,000 square miles, or 64,000,000 acres.

According to a census taken March 31st, 1874, the population (exclusive of the aborigines) numbered 299,514 souls. It is estimated that the present white population (April, 1876) is about 400,000. The Maori population, according to an approximate census taken on June 1st, 1874, was 45,470.

The aborigines, called Maoris, who formerly caused much trouble, though a large number have always sided with the British, are now peacefully settling down to agricultural pursuits, and, since 1871, permanent tranquility appears to have been established.

The New Zealand Islands are of volcanic origin, and a great portion of the entire area is occupied by mountains, among which are many extinct and a few active volcanoes. The mountains are mostly clothed with evergreen forests of luxuriant growth, interspersed with fern-clad ranges, and occasionally with treeless grassy plains. Extensive and rich valleys and sheltered dales abound in the North Island; and in the east of the South Island there are many extensive plains of rich meadowland, admirably adapted either for agriculture or cattle-breeding. Water and water-power are found in great abundance in the colony, and the numerous rivers are

subject to sudden floods from the melting of the mountain snows. As a rule, however, the streams are short, and are not navigable for more than 50 miles above their mouths. The chief is Waikato river, in the North Island, which, issuing from the Taupo lake (30 miles long by 20 broad), flows in a northern direction for 200 miles, and reaches the sea on the west coast. In the South Island, the rivers Clutha, Mataura, and Waiau, all flowing south, are among the chief.

In the North Island, around Lakes Rotomahana and Rotorua, are a number of grand and beautiful geysers, which throw up water heated to two degrees above the boiling point. The southwest coast of the South Island is indented with a number of deep sounds, of which Milford Sound is the chief. In this sound the water is unfathomable; the only way of securing a ship being to moor it, stem and stern, to the trees which overhang the water. Steamers of 2000 tons have been thus moored. The geology of New Zealand is remarkable in a high degree. The mountains, which are of every variety of outline, are chiefly composed of the lower slate-rocks, intersected with basaltic veins, primary sandstone, and limestone. Extensive beds of coal and lignite exist; the former have been to some extent worked, and are at present being largely developed by the construction of railways and harbor works in their vicinity.

Of the whole surface extent of New Zealand, one-fourth is estimated to consist of dense forest tracts, one-half of excellent soil, and the remainder of waste lands, scorix hills, and rugged mountain regions. Nearly 40,000,000 acres are supposed to be more or less suitable for agriculture and cattle-breeding. The soil, though often clayey, has in the volcanic districts more than a medium fertility; but the luxuriant and semi-tropical vegetation is perhaps as much due to excellence of climate as to richness of soil. Owing to the prevalence of light and easily worked soils, all agricultural processes are performed with unusual ease. The climate of New Zealand is one of the finest in the world. The country contains few physical sources of disease; the average temperature is remarkably even at all seasons of the year, and the atmosphere is continually agitated and freshened by winds that blow over an immense expanse of ocean. In the North Island, the mean annual temperature is 57°; in the South Island, 52°. The mean temperature of the hottest month at Auckland, in the northernmost province, is 68°, and at Dunedin, in the most southern province, 58°; of the coldest month, 51° and 40° respectively. The air is very humid, and the fall of rain is greater than in England, but there are more dry days. All the native trees and plants are evergreens. Forests, shrubberies, and plains are clothed in green throughout the year, the results of which are, that cattle, as a rule, browse on the herbage and shrubs of the open country all the year round, thus saving great expense to the cattle-breeder; and that the operations of reclaiming and cultivating land can be carried on at all seasons. The seasons in New Zealand are the reverse of ours; January is their hottest month, and June the coldest. All the grains, grasses, fruits, and vegetables grown in England are cultivated in the colony with perfect success, being excellent in quality and heavy in yield; while, besides these, the vine is cultivated in the open air, and maize, the taro (*Caladium esculentum*), and the sweet potato are cultivated with success in the sunny valleys of the North Island.

The entire average under crop, in February, 1875, was 1,788,800. Of the crops, the principal were wheat, oats, barley, potatoes, and sown grass. At the same date, the number of holdings was 16,092, the population being 296,018. The average yield of wheat was, in 1875, over 28 bushels per acre.

The live stock of the colony consisted, at the census of March 1st, 1874, of 99,859 horses, 494,917 cattle, 11,704,853 sheep, 123,921 pigs, and 1,058,198 head of poultry.

Large gold fields were discovered in the spring of 1857. In the year 1874, there were 376,388 ounces of gold, of the declared value of £1,505,331, exported from New Zealand, being little more than half the amount and value exported in 1871, while

from April 1st, 1857, to December 31st, 1874, the total quantity of gold exported was 7,599,973 ounces, valued at £29,577,016 sterling.

The principal produce of the colony is wool, 46,848,735 pounds, valued at £2,834,695, having been exported in 1874.

The total imports of the colony during the year 1874 were £8,121,812; the total exports, £5,251,269.

The temperature, it will be thus observed, is very equable, for while the summers are as cool as those of England, the winters are as warm as those of Italy. The mean annual temperature of Auckland is nearly the same as at Rome; at Wellington, nearly the same as at Milan; at Dunedin, nearly the same as at London. The official reports of the British Army Medical Department shows that, where the annual mortality from all diseases out of every 1000 British soldiers quartered in the United Kingdom was 16, it was only 5 out of every 1000 in the troops quartered for more than 25 years in New Zealand. In other words, this colony appears to be peculiarly favorable to the duration of human life.

In connection with this, it may be mentioned, in order to show the redundancy of the population in New Zealand, that in 1874 the births were 40.05 per 1000 of the population, and the death rate was only 12.97 per 1000, while the marriages were 8.81 for every 1000 people.

The class of people most required in New Zealand are farmers with a small capital, carpenters, who can earn, according to their skill, from 11 shillings to 15 shillings per diem, and single women, who always gain good wages, and rarely stop in service for a long time, being greatly in demand in the matrimonial market. All classes of laborers find ready employment at remunerative rates.

By an imperial statute, passed in 1852, the legislative power is vested in the Governor and a Parliament of two chambers; the first called the Legislative Council, and the second the House of Representatives, and collectively, the General Assembly. The Legislative Council consists at present of 49 members, nominated by the crown for life; and the House of Representatives of 83 members, elected by the people for five years. Two Maoris sit in the Legislative Council, and 4 in the House of Representatives. Two of the latter also are members of the Executive Council. The Governor is assisted by an Executive Council, composed of the responsible ministers for the time being, and any others he may appoint. Members of both branches receive pay at the rate of 150 guineas for the session, which generally lasts three months. Every owner of a freehold worth £50, or tenant householder, in the country at £5, in the town at £10 a year rent, is qualified to vote for members of the House, and is eligible for membership. The seat of government is at Wellington, a town of about 12,000 people, and centrally situated.

The colony is divided into nine provinces; four in the North, and five in the South Islands. Each of these provinces is governed by an elected Superintendent and Provincial Council. In 1875, the General Assembly passed a bill declaring that the provincial governments should cease to exist after the close of their next session. The form of local government which is to take the place of provincial government has not been decided upon, but will probably take the shape of legislative powers.

In the year 1874, the total ordinary revenue (including provincial) was £1,873,448, and the territorial revenue, £1,150,900, which, with incidental receipts of £44,264, makes the total general revenue—ordinary, territorial, and incidental—amount to £3,068,612. The total ordinary expenditure by general and provincial governments was £2,960,711.

Beyond the ordinary expenditure, a sum of £2,725,893 was spent, which is charged to the loan account. The public debt of New Zealand amounted, at the end of 1874, to £13,366,936, and as a loan expenditure is still proceeding, it is estimated that the total debt will shortly amount to about £19,000,000. Against this there is a sinking fund already amounting to £1,000,000, and, moreover, a large amount has been

spent on reproductive works. In 1870, the sum of £4,000,000 was authorized to be borrowed for the purposes of emigration and public works (such as railways, roads, telegraphs, water-races, bridges, etc.), besides £1,000,000 for defence and other purposes. Since then, further large loans have been contracted for public works. To assist in the development of these works, a vast number of emigrants have been brought into the country, receiving either free passage from England or a grant of land. Railways are now being constructed throughout the islands, 260 miles being open for traffic; 420 miles under construction, of which a good deal is near completion; and 330 miles are authorized to be constructed.

Under the stimulus of the public works and emigration policy, no less than 43,965 emigrants arrived in New Zealand in 1874.

On the 31st of December, 1874, the colony had 2632 miles of telegraph lines, and 5284 miles of wires. The number of telegrams during the year was 844,301, of which total 724,582 were private, and the remainder government messages.

During the year 1874, the post office received 4,339,165 letters, and dispatched 4,719,291. The total number of newspapers received was 3,872,668, and dispatched, 2,434,024. Money orders to the number of 62,712 and the amount of £263,164 were issued during 1874.

Grammar and free schools, endowed from the public revenues of the various provinces, several colleges, and two universities, one being established in Otago and the other a corporation endowed by the general government, are the principal educational institutions.

The shipping entered in 1874 consisted of 856 vessels, with a tonnage of 399,296. Of these, 237 vessels, measuring 201,017 tons, were British; 552, measuring 170,303 tons, colonial; and 67, measuring 27,976, were foreign. Of the foreign vessels entered, 50 were American. Coasters are not included in the above statistics. In 1874 the number of vessels entered coastwise was 14,351, and their tonnage 1,353,085.

Commission from NEW ZEALAND to the International Exhibition:

THE HON. WALTER BALDOCK DURANT MANTELL, M. L. C., Chairman.

THE HON. WILLIAM SISBORNE.

WILLIAM HORT LEVIN, ESQ.

DANIEL MCINTYRE, ESQ., Consular Agent of the United States Government at Wellington.

JAMES HECTOR, ESQ., C. M. G., M.D., F. R. S., Resident Commissioner.

ARTHUR THOMAS BOTHAMLEY, Secretary.

CANADA.—STATISTICAL PREFACE.

THE Dominion of Canada consists of the provinces of Ontario, Quebec—formerly Upper and Lower Canada—Nova Scotia, New Brunswick, Manitoba, British Columbia, and Prince Edward's Island. The two principal provinces, Quebec and Ontario, are almost entirely embraced within the basin of the river St. Lawrence, but occupy only those portions north of the great lakes, and of the river as far as the town of Cornwall (45° north latitude and 74° 45' west longitude), whence eastward they occupy both banks, and are bounded on the south by the United States. The most westerly limit is the heads of the Pigeon and Arrow rivers, which debouch in Lake Superior. The eastern or maritime provinces embrace no portion of the basin of the great river.

The following table shows the area and population of the various provinces :

	AREA, ENG. SQ. MILES.	POPULATION (1871).
Ontario,	121,260	1,620,851
Quebec,	210,020	1,191,516
Nova Scotia,	18,660	387,800
New Brunswick,	27,105	285,594
Manitoba,	2,891,734	11,953
British Columbia,	213,000	10,586
Prince Edward's Island,	2,173	94,021
Total,	3,483,952	3,602,321

The principal river of Canada is the St. Lawrence. Its most important tributaries are all from the left. The St. Lawrence drains an area of 565,000 miles. The Ottawa, 450 miles long, forms the boundary between Ontario and Quebec. The St. Maurice is nearly 400 miles in length, and the Saguenay, noted for its fine scenery, is 225 miles long. The only affluents from the right worth naming are the Richelieu, the St. Francis, and the Chaudiere.

A great part of Canada, more especially the shores of Lake Superior, is valuable only for mineral resources, such as iron, zinc, lead, copper, silver, gold, cobalt, manganese, gypsum, marl, granite, sandstone, limestone, slate, and marbles of nearly every imaginable color. Considerable portions, also, though heavily timbered, chiefly with pine, are yet but little adapted to settlement and cultivation. Towards the Gulf of the St. Lawrence, again, a considerable section derives importance mainly from the fisheries, being, with partial exceptions in Gaspé, comparatively worthless for every other object. Thus the area for the profitable production of ordinary cereals cannot materially exceed 40,000 square miles, containing, however, within this space a singularly small portion of irreclaimable surface. This cultivable block increases regularly in width and fertility, from its commencement on the lower St. Lawrence to the shores of Lake Huron. Below Quebec—to say nothing of the precarious nature of the crops—there may always be seen, on one or on both sides, the primeval forest. Between that city, again, and the basin of the Ottawa, a gradual improvement shows itself, even on the north side; and towards the south there stretches away to the frontier of the United States a broad belt of generally undulating character, probably the best field in the country for the blending of pasturage and agriculture. From the basin of the Ottawa inclusive, the parallel of the south end of Lake Nipissing may be said to cut off, towards the southwest, the entire residue of the practicable soil, in the shape of a roughly defined triangle, which, as a whole, is at least equal, in the growth of grain in general and of wheat in particular, to any region of the same extent in North America.

The climate of Canada is subject to great extremes of heat and cold, the thermometer ranging between 102° above and 36° below the zero of Fahrenheit.

As Canada slants southwards eight or nine degrees from the mouth of the St. Lawrence to that of the Detroit, which communicates between Lakes St. Clair and Erie,

the climate of the west must be warmer than that of the east. Besides, the lakes of Upper Canada appear, in a good measure, to neutralize and mitigate the extremes of a Canadian climate. While Quebec in winter ordinarily enjoys five or six months of sleighing, the corresponding season in Toronto ranges from five or six days to five or six weeks. As to summers, the difference in favor of Toronto is rather in point of duration than of intensity. As indications of the climate of Canada, it may be stated that the isle of Orleans, immediately below Quebec, is famous for its plums, and the island of Montreal for its apples; and from the neighborhood of Toronto to the head of Lake Erie, grapes and peaches ripen without any aid whatever. Melons, again, of large size, come to maturity, through the settled parts of the province, in the open air; and pumpkins and squashes attain enormous size, some of them near Toronto having weighed 300 pounds.

The following statistics of the mining, agricultural, and manufacturing industries are taken from the Official Report of the Canadian Census of 1871. They refer only to the provinces of Ontario, Quebec, New Brunswick, and Nova Scotia.

RAW MINERAL PRODUCTS.

Côal,	671,008 tons.	Gold,	22,941 oz.
Iron ore,	129,363 "	Silver,	69,197 "
Copper ore,	13,310 "	Phosphate of lime,	1,980 tons.
Pyrites,	2,800 "	Mica,	4,010 lbs.
Manganese,	635 "	Crude petroleum,	12,969,435 galls.
Other ores,	14,063 "	Grained marble,	8,870 cub. ft.
Peat,	14,772 "	Building stone for dress-	
Plumbago,	270 "	ing,	5,206,796 "
Lump gypsum,	114,433 "	Roofing slate,	6,013 sqs.

The statistics of agriculture are as follows:

Spring wheat,	10,355,912 bushels.	Beans,	220,644 bushels.
Winter wheat,	6,367,961 "	Buckwheat,	3,726,484 "
Barley,	11,496,068 "	Corn,	3,802,830 "
Oats,	42,489,463 "	Potatoes,	47,330,187 "
Rye,	1,064,354 "	Turnips,	24,339,476 "
Peas,	9,905,720 "	Grass and clover	
Hay,	3,818,641 tons.	seed,	348,605 "

The principal items of furs are 488,182 muskrats, 49,799 minks, 48,151 beavers, 19,271 moose, cariboo and deer, 17,582 martens, 37,402 seals, 12,861 foxes, 6132 otters, and 2553 bears.

The following are the statistics of manufactures:

Capital invested,	\$77,964,020
Number of hands employed,	187,942
Amount of yearly wages,	40,851,009
Value of raw material,	124,907,846
Total value of products,	221,617,773

The statistics of the fisheries are as follows: Vessels, 991, men, 6984; boats, 16,876, men, 25,876; shoremen, 4647; fathoms of nets, 1,879,435.

The leading items of the product of the fisheries were 682,631 quintals of cod, 120,213 quintals of haddock, 417,300 barrels of herring, 77,925 barrels of mackerel, 2491 gallons of cod-liver oil, and 676,403 gallons of other fish oils.

The foreign trade, during 1874, was, including bullion and specie, as follows: Imports, \$128,213,582; exports, \$89,851,928. The trade of the Dominion of Canada is chiefly with the United States and Great Britain.

The "British North American Act, 1867," orders that the constitution of the Dominion shall be "similar in principle to that of the United Kingdom;" that the executive authority shall be vested in the sovereign of Great Britain and Ireland, and carried on in her name by a Governor-general and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the Senate and the House of Commons. Provision is made in the act for the admission of Newfoundland, still an independent province of British North America, into the Dominion of Canada. The seven provinces forming the Dominion have each a separate parliament and administration, with a Lieutenant-governor at the head of

the executive. They have full power to regulate their own local affairs, dispose of their revenues, and enact such laws as they may deem best for their own internal welfare, provided only they do not interfere with, and are not adverse to, the action and policy of the central administration under the Governor-general.

The public debt of the Dominion, incurred chiefly on account of public works, and the interest on which forms the largest branch of the expenditure, was \$116,082,917 on the 1st of July, 1875. The total revenue during the year ending June 30th, 1874, was \$39,930,791; the total expenditure during the same period, \$36,524,876.

The strength of the troops maintained by the imperial government, and forming the garrison of Halifax, was reduced, in 1871, to 2000 men. Besides these, Canada has a large volunteer force, and a newly organized militia. By the terms of the act passed in March, 1868, "to provide for the defence of the Dominion," the militia consists of all British subjects between the ages of 18 and 60, who are called out to serve in four classes, namely: 1st class, 18 to 30, unmarried; 2d, from 30 to 45 unmarried; 3d, 18 to 45, married; 4th, 45 to 60. A general order from the Militia Department, issued in 1874, reduced the active militia force, for the purposes of drill and pay, for the years 1874 and 1875, to 30,000 officers and men. Two schools of military instruction for infantry are established in each of the provinces of Ontario and Quebec, and one in each of the provinces of New Brunswick and Nova Scotia.

The naval forces of Canada consisted, in 1875, of 8 screw steamers, carrying 18 guns. Besides these, the government owned two fast steamers, employed on coast service, not fitted with guns, but available as gunboats.

The total shipping registered on the 31st of December, 1874, was 6930 vessels of a burthen of 1,158,363 tons. Included in this were 634 steamers, of 76,487 tons.

At the end of October, 1874, Canada had a network of railways of a total length of 4022 miles. There were, at the same period, lines of a total length of 1120 miles in course of construction, and 3000 miles more had been surveyed and concessions granted by the government.

On June 30th, 1875, there were in the Dominion, 3943 post offices. The number of letters and post-cards sent through the mails, during the year, was 34,750,000; of newspapers, 25,480,000.

The provinces of Quebec and Ontario have separate school laws, adapted to the religious element prevailing in either. Each township in Ontario is divided into several school sections, according to the requirements of inhabitants. The common schools are supported partly by the government and partly by local self-imposed taxation, and occasionally by the payment of a small fee for each scholar. All teachers must pass an examination before a county board of educators, or receive a license from the provincial normal school, empowering them to teach, before they can claim the government allowance.

Commission from CANADA to the International Exhibition:

SENATOR LUC LETELLIER DE ST. JUST, Minister of Agriculture, President.

Honorary Commissioners.

HON. ADAM CROOKS, Provincial Treasurer.	HON. J. J. FRAZIER, Provincial Sect'y.
HON. P. A. GARNEAU Minister of Agriculture.	HON. L. C. OWEN, Attorney-General.
HON. P. CARTERET HILL, Provincial Secretary.	HON. W. J. ARMSTRONG, Minister of Agriculture.
	HON. MR. NOLIN, Minister of Agriculture.

Executive Commissioners.

HON. E. G. PENNY, Senator Montreal.	D. MACDOUGALL, ESQ., Berlin.
HON. R. D. WILMOT, Senator Sanbury.	J. PERRAULT, ESQ., Secretary.

CANADA.

THE SUNDAY SCHOOL TIMES

H. CLAY TRUMBULL, Editor.

GEO. A. PELTZ, Associate Editor.

JOHN WANAMAKER, Publisher.

A weekly paper of news and help for Sunday-school workers. 16 page quarto.

SUBSCRIPTION RATES.

(PAYABLE IN ADVANCE.)

ONE COPY, ONE YEAR, - - - - - \$2.15.

It gives the most complete lesson helps. The best normal helps. The freshest Sunday-school intelligence. The choicest home reading.

Subscriptions will be taken for any portion of a year at yearly rates, and specimen copies sent free on application.

From *The Christian at Work*, New York.—“THE SUNDAY SCHOOL TIMES is worth to each of its readers about fifty dollars a year, instead of the paltry two dollars which is charged for it.”

TO ADVERTISERS.

WHAT THE PAPER IS.—It is a 16-page weekly newspaper. It stands in the first rank of American journals both in point of character and circulation.

It is *not* a children's paper, as the name might seem to indicate; but it is for pastors, superintendents, teachers, and Christian families. It contains the choicest family reading, together with lesson helps for Sunday-school teachers.

WHERE IT GOES.—Few religious newspapers in the United States have so large a circulation. It reaches all Christian denominations in every state and territory—in fact, in every principal city and town—in the land. It goes to the very best class of families from Maine to California. Its circulation far exceeds that of any other religious paper in Philadelphia.

A SPECIAL ADVANTAGE.—That its lesson notes may reach subscribers seasonably on the Pacific Coast and in Europe, they are published two weeks in advance. Therefore, instead of being hurriedly read and thrown away, as many other papers are, this paper is kept before the family for reference at least two weeks.

The card of an advertiser is, in consequence, not only seen once but *many times*.

ADVERTISING RATES.

ORDINARY ADVERTISEMENTS: Per line (12 lines to an inch), for each insertion, 25 cents.
SPECIAL NOTICES: Per line (as above), 30 cents.
READING MATTER: Per line (leaded), 50 cents.

DISCOUNTS on the above rates as follows:

5 per cent. on 4 insertions.	20 per cent. on 26 insertions.
10 “ “ “ 8 “	25 “ “ “ 52 “
15 “ “ “ 13 “

FRANCE.—STATISTICAL PREFACE.

FRANCE is the most westerly state of Central Europe, extending from $42^{\circ} 20'$ to $51^{\circ} 5'$ north latitude, and from $7^{\circ} 45'$ east to $4^{\circ} 45'$ west longitude. It is bounded on the north by the Channel and the Straits of Dover, which separate it from England, by Belgium, the grand duchy of Luxembourg; on the east by Germany, Switzerland, and Italy, on the south by the Mediterranean and Spain, from which it is separated by the Pyrenees, and on the west by the Atlantic Ocean (the Bay of Biscay). The greatest length of France, from Dunkirk, in the north, to the Col de Falguere, in the south, is about 620 miles; its greatest breadth from east to west, from the boundary line in the Vosges to Cape St. Matthieu, in Finisterre, is about 550 miles. The superficial area of France, including the two Savoy provinces and Corsica, is reckoned at about 201,600 square miles. The possessions of France, which are situated in the non-European parts of the world, have a total superficial area of 463,827 square miles, and the largest is Algeria, with an area of 258,310 square miles. France is divided into 86 departments. The total population, exclusive of Algeria and the colonies, was given (in 1872) at 36,102,921.

The colonies and foreign possessions of France in Africa are Algeria, Senegambia, the islands of Bourbon (Reunion), St. Marie, Mayotte, and Nussi-be, in the Indian Ocean, and Gaboon, on the coast of Guinea. The total possessions in Africa cover an area of about 270,000 square miles, with a population of 2,840,000 souls. In America are the islands of Martinique and Guadeloupe in the West Indies, French Guiana, or Cayenne, with St. Pierre and Miquelon, near Newfoundland; forming together an area of 45,000 square miles, with a population of 345,000. In Asia, the Indian settlements of Pondicherry, Mabe, Karikal, Yanaon, and Chaudernagore, comprise 19,600 square miles, with a population of 265,000. A settlement has also

been made in Cochin China, embracing 21,700 square miles and 1,336,000 inhabitants, and a protectorate declared over the Empire of Anam. In the Pacific Ocean are two groups, the Marquesas and Tahiti, and New Caledonia, with the Loyalty Isles, the whole forming an area of 11,182 square miles, with 87,000 inhabitants.

The following table gives the population, in 1872, of some of the largest cities in France:

Paris,	1,850,000
Lyons,	323,000
Marseilles,	313,000
Bordeaux,	194,000
Lille,	158,000
Toulouse,	125,000
Nantes,	119,000
St. Etienne,	111,000
Rouen,	102,000

There are four great mountain chains belonging to France—the Pyrenees which separate the French territory from Spain; the Cevenne-Vosgian range, running north and south between the Moselle and the new boundary line; the Alps, which separate the Swiss territory from the provinces of Savoy and Nice; and the Sardo-Corsican range which belongs, as the name implies, to the islands of Sardinia and Corsica. The highest peaks in the Pyrenees are the Maladetta and Mont Perdu (10,886 feet and 10,994 feet); in the Cevenno-Vosgian range, the greatest height (the Widderkalm) does not greatly exceed 7000 feet. The French portion of the Alps now includes several of the highest mountains and most elevated passes of the ranges, as Mont Blanc, 15,744 feet; Mont Iseran, 13,272 feet; Mont Cenis, 11,457 feet; and the pass of Little St. Bernard, 7190 feet, etc. In Corsica, the highest peak rises to an elevation of 9000 feet. The grand water-shed of France is the Cevenno-Vosges chain, which determines the direction of the four great rivers, the Seine, the Loire, the Garonne, and the Rhone; the first three of which flow north-west into the Bay of Biscay and the English Channel, and the fourth into the Gulf of Lyons.

The entire extent of river navigation in France amounts to 5500 miles, or 8,900,000 metres, while the 99 larger canals, which have been constructed either to connect the various river courses or to supply entirely new channels of water communication, extend over a length of 2900 miles, or 4,700,000 metres. The most important of these works are the canals connecting Nantes and Brest, and the Rhone with the Rhine, and those of Berry, Nivernais, and Bourgogne.

France is peculiarly rich in mineral springs, of which there are said to be nearly 1000 in use. Of these, more than 400 are situated in the group of the Pyrenees, where there are 93 establishments for their systematic use. It is estimated that there are, moreover, fully 4000 springs not hitherto employed.

According to M. Maurice Block's estimate, the physical and agricultural character of the soil of France may be comprised under the following heads:

	HECTARES.*
Mountainous districts, heaths, and commons,	9,944,839
Rich land,	7,276,399
Chalk, or lime districts,	9,788,197
Gravel, stony and sandy,	15,951,618
Clay, marshy, miscellaneous,	9,807,577
	52,768,600

* The hectare is equal to about 2.47 English acres.

The same writer further subdivides the soil of France, according to its actual employment, under the following heads:

	PER CENT. OF THE WHOLE ACRE.
Arable lands,	43.3
Meadow lands,	9.7
Vineyards,	3.7
Cultivated lands,	17.8
Roads, streets, public walks, etc.,	3.7
Forest and unproductive lands,	16.8

France possesses one of the finest climates in Europe, although, owing to its great extent of area, very considerable diversities of temperature are to be met with. The mean annual temperature of different parts of France has been estimated as follows, by Humboldt: Toulon, 62° F.; Marseilles, 59.5°; Bordeaux, 56°; Nantes, 55.2°; Paris, 51.2°; Dunkirk, 50.5°.

The following are the statistics of agricultural productions for the year 1869:

	HECTOLITRES.*
Wheat,	103,000,000
Rye,	24,000,000
Barley and oats,	90,000,000
Maize,	10,000,000
Potatoes,	100,000,000

The production of beet-root sugar in 1872-73 amounted to 418,000 tons. The average yearly produce of the vineyards of France is estimated at about 50,000,000 of hectolitres (about 1,000,000,000 of gallons). Of this about one-seventh is made into brandy.

The principal forest trees are the chestnut and beech on the central mountains, the oak and cork tree in the Pyrenees, and the fir in the Landes. The destruction of the national forests has been enormous within the last two centuries, but measures have been taken in recent years to plant wood, in order to protect those mountain slopes which are exposed to inundations from mountain torrents, and to provide a supply for the ever-increasing demand for fuel. About one-seventh of the entire territory of France is still covered with wood. Turf taken from the marshy lands is extensively used, more especially in the rural districts, for fuel.

According to the census of 1866—the most recent in regard to animals—there were in France 3,312,637 horses, 518,000 asses, 350,000 mules, 12,733,000 horned cattle, 30,386,000 sheep, 5,500,000 swine, and 1,680,000 goats. There were, according to the *Statistique Agricole* for 1858, about 3,000,000 of beehives, valued at rather more than 24,000,000 of francs; the mean annual returns are, for honey, 6,670,000, and for wax, 1,620,000 kilogrammes.† Poultry constitutes an important item of farm produce in France, estimated at 45,500,000 of francs, while the eggs and feathers yield 35,250,000 of francs.

The following figures show the condition of the merchant navy of France on the 31st of December, 1873:

		TONNAGE.	MEN.
Sailing vessels,	15,043	832,866	88,541
Steam vessels,	516	185,165	10,448
	15,559	1,068,031	98,989

The *cabotage*, or internal coasting traffic, is a great source of financial wealth to the State, to which all rivers and canals belong. In 1873, it employed 2776 vessels, with a tonnage of 122,850 and an equipment of 19,871.

* The *hectolitre* equals 2.75 bushels.

† The *kilogramme* equals 2.2 pounds avoirdupois.

FIRE ARMS, Etc.

PRICES quoted, description given, and some SAMPLES shown, of the following Manufacturers' Goods, now on exhibition in the Main Building of the Centennial Exposition.

JOS. C. GRUBB & CO.,

Manufacturers' Agents.

712 Market St., PHILADELPHIA.

J. RUPERTUS, Empire Revolvers.
 " C. SHARPS, Pat. 4 Shot Repeaters.
 F. WESSON, Breech-Loading Rifles.
 " " Target Pistols.
 WINCHESTER, Reptg. Rifles and Cartridges.
 SHARPS, Target and Sporting Rifles.
 FOREHAND & WADSWORTH, Revolvers.
 COLT'S Patent Firearm Mfg. Co. "

SMITH & WESON, Revolvers.
 WHITNEY, Rifles and "
 REMINGTON, " " and Breech-loading Double Guns.
 AMERICAN FLASK AND CAP Company.
 AMERICAN PERCUSSION CAP Association.
 WM. G. RAWBONE, Patent Creasers.
 PARKER BROS., American Breechloading Guns.

JAMES PURDEY, London, Breechload'g Guns
 JOHN RIGBY & CO., " "
 E. M. REILLY & CO., " "
 J. LANG & SONS, " "
 ALBERT LANCASTER " "
 CHAS. LANCASTER, " "
 ALEX. HENRY, Edinburgh, " "
 Harpoon and Bomb Lance Guns.
 W. & C. SCOTT & SON, Bir-
 mingham, " "

P. WEBLEY & SON, Birmingham, Breech-loading Guns.
 W. W. GREENER, Birmingham, Breechloading Guns
 ELEY BROS., London, Shells, Wads, Caps, etc
 PIGOU, WILKS & LAURENCE, London, Gunpowder
 SELLIER & BELLOT, Percussion Caps.

BAEDER, ADAMSON & CO.,

MANUFACTURERS OF

GLUE, SAND PAPER,

GROUND FLINT AND EMERY,

EMERY PAPER AND EMERY CLOTH,

CURLED HAIR AND STUFFING HAIR,

MOSS, COW-HIDE WHIPS, FELT HAIR, AND FELTING.

FACTORIES:

PHILADELPHIA, Pa.
 NEWARK, N. J.
 WOBURN, Mass.

STORES:

Philadelphia, 730 Market Street.
 New York, 67 Beekman Street.
 Boston, 143 Milk Street.
 Chicago, 182 Lake Street.

C. B. KEOGH & CO.,

MANUFACTURERS OF

DOORS,

Sashes, Blinds, Mouldings,

CUT GLASS, ETC.,

254 and 256 Canal Street,

NEW YORK.

Our Illustrated Catalogue will be sent to any one on receipt of ten cents for postage.

THE GREATEST DISCOVERY OF THE AGE

IS
DR. TOBIAS'

Celebrated Venetian Liniment

TWENTY-NINE YEARS BEFORE THE PUBLIC.

Warranted to cure Colic, Diarrhoea, Spasms, and Vomiting, taken internally, and Croup, Chronic Rheumatism, Cuts, Bruises, Insect Stings, Sore Throats, Toothache, Old Sores, and Pains in the Back, Chest, and Limbs, externally.

IT HAS NEVER FAILED, NOR HAS ONE BOTTLE BEEN RETURNED,

ALTHOUGH MILLIONS ARE SOLD ANNUALLY

No one once using it is ever without it.

\$1000 REWARD

Has for years been offered for any certificate which he has published in the newspapers or on his circulars proving false!!

No one should go to sea without it. It cures sea-sickness; and a few drops put in a tumbler of water entirely corrects the impurities, and makes it invaluable on land as on the sea.

Thousands of certificates can be seen at the Depot,

10 PARK PLACE, NEW YORK.

Sold by all Druggists. Price, 50 Cents and One Dollar.

The chief mineral products of France are coal and iron, in the excavation of which nearly 250,000 men were employed in 1868. The production of coal in 1868 was 132,000,000 of quintals, the quintal being equal to 1.97 hundredweight. During the same year, there were 150 iron mines in operation, yielding 34,500,000 of quintals, more than half of this quantity being obtained from the five departments of Haute-Marne, Haute-Saone, Cher, Moselle, and Nord. Argentiferous galena, a little silver and gold, copper, lead, manganese, antimony, and tin occur, but hitherto their working has not proved very productive. The department of Charento-Inferieure yields the largest amount of salt, the mean annual produce being 1,500,000 of quintals (2,500,000 of francs), which is fully one-third of the entire annual produce of the whole country. France derives about 41,000,000 of francs from its quarries of granite and freestone, its kaolin, marbles, sands, lithographic stones, millstones, etc. Granite and syenite are found in the Alps, Vosges, Corsica, Normandy, and Burgundy; porphyry in the Vosges; and basalt and lava, for pavements, in the mountains of Auvergne. Marble is met with in more than 40 departments; alabaster occurs in the Pyrenees; the largest State quarries are near Cherbourg and St. Lo.

The following list gives an approximate estimate of the value of the chief products of French industry :

	MILLIONS OF FRANCS.
Linen fabrics,	250
Cotton fabrics,	650
Woolen fabrics,	950
Silk fabrics,	1000
Mixed fabrics,	330
Jewelry, watchmaking,	35
Gilt wares,	12
Minerals, mines, salt, etc.,	600
Articles of food, as sugar, wines, etc.,	364
Skins, leather, oils, tobacco,	556
Bone, ivory, isinglass, etc.,	30
Chemical products,	80
Ceramic arts,	86
Paper, printing,	60
Forests, fisheries,	98

The total imports, for 1873, were 4,576,000,000, and the total exports, for the same year, 4,822,000,000 of francs.

France was proclaimed a republic on the 4th of September, 1870. According to the law of February 25th, 1875, the legislative power is vested in the two Houses, the Chamber of Deputies and the Senate. The Chamber of Deputies is elected by universal suffrage. The Senate is composed of 300 members, 225 of whom are elected by the departments and the colonies, and 75 by the National Assembly. The President of the republic is elected by a majority of the votes of the Senate and Chamber of Deputies, united as the National Assembly. His term of office is for seven years, and he is eligible for re-election.

According to the budget for 1876, the estimated receipts for the year are put down at 2,575,028,582 francs, and the expenditures at 2,570,505,513. The public debt is 23,403,000,000 francs.

The nominal strength of the army, on a peace footing, is given in the latest government returns as 490,332 men; on a war footing, 1,750,000.

The navy of France was composed, at the end of 1873, of 62 ironclads, 264 unarmored screw steamers, 62 paddle steamers, and 113 sailing vessels.

According to the official report for December, 1874, the railways in operation measure 20,711 kilometres, or about 12,866 miles. With the exception of less than 500 miles, the railways of France are held by six companies, which are under the superintendence of the State.

The number of letters forwarded by the post office, in 1874, was 341,068,000; newspapers, postal cards, and parcels, 331,786,000.

At the end of 1873, there were 45,942 kilometres of lines of telegraphs, comprising 123,669 kilometres of wire. The number of messages sent, in 1873, was 6,225,000, of which nearly one-fourth were international messages. There were annual deficits since the establishment of the public telegraph department, in March, 1851. There were 2206 telegraph offices at the end of 1873.

Public instruction is presided over in France by a special ministry. Nearly half the expenses connected with it are defrayed by the State, and the remainder by the departments. There are 15 academies, located in the following towns: Aix, Besancon, Bordeaux, Caen, Clermont, Dijon, Douai, Grenoble, Lyon, Montpellier, Nancy, Paris, Poitiers, Rennes, Toulon. These academies are divided into the five faculties of theology, law, medicine, sciences, and literature, and supplemented by various superior and preparatory schools. The professors are paid partly by the State and partly by fees. Secondary instruction has received an immense impetus during the present century. The different departments share very unequally in the diffusion of education, and it may be generally observed that the proportion of the educated is highest in the northern and eastern districts of France. France supports numerous colleges and schools for instruction in special branches of knowledge. There are also numerous agricultural, forest, farming, and veterinary schools, besides the Ecole Polytechnique, specially designed to prepare youths for the public services; and military and naval colleges at St. Cyr, Saumur, Paris, Vincennes, Brest, Toulon, and St. Denis.

Paris possesses several libraries belonging to, and supported by, the State, but freely opened to the public. There are 338 public libraries in the provinces, to all of which access is afforded in the most liberal spirit. France is rich in public galleries of painting, statuary, and articles of *vertu*. The expenses of secondary and primary education, literary and scientific institutions, etc., are charged in the budget for 1876 at 44,912,545 francs.

(Detailed information as to the colonial dependencies of France will be found under the appropriate headings in other portions of the catalogue.)

Commission from FRANCE to the International Exhibition :

M. M. OZENNE, Counsellor of State, Secretary-General of the Ministry of Agriculture and Commerce, Commissioner-General of International Exhibitions.

DU SOMMERARD, Director of the Museums of Thèrmes and Cluny, Commissioner-General of International Exhibitions.

Committee.

Organized under the Presidency of the Minister of Agriculture and Commerce.

M. DUCLERC, Vice-President of the National Assembly, Member of the Committee on International Exhibitions.

MARQUIS DE TALHOUET, Deputy.

BARON DE SOUBEYRAN, Deputy.

MR. WOLOWSKI, Deputy.

MARQUIS DE LAFAYETTE, Deputy.

M. BONNET, Deputy.

M. FLOTARD, Deputy.

M. LABOULAYE, Deputy.

M. DIETZ-MONIN, Deputy.

M. COUNT DE BOUILLE, Deputy.

VISCOUNT D'HAUSSONVILLE, Deputy.

M. DE CHABROL, Deputy.

M. JULLIEN, Deputy.

The Secretary-General of the Ministry of Agriculture and Commerce.

The Director-General of Customs.

The Director of the Academy of Fine Arts.

The Director of Consulates and Commercial Affairs, at the Ministry of Foreign Affairs.

M. OUTREY, Minister Plenipotentiary.

M. DU SUMMERARD, Director of the Museum of Thermes and Cluny.

The Assistant Director of Foreign Commerce.

The President of the Paris Chamber of Commerce.

M. GUILLAUME, Member of the Institute.

MARQUIS DE ROCHAMBEAU.

BARON ALPHONSE DE ROTHSCHILD.

M. SIEBER.

M. ALFRED MAME.

M. JULES LAVEISSIERE, Dealer in Metals.

M. ROULLEAUX DUGAGE, Secretary.

M. DE FALLOIS, late Chief of Bureau, Ministry of Public Works, Assistant Secretary.

Resident Commissioners.

MR. DE LAFOREST, Consul-General of France, Commissioner-General.

MR. RAVIN D'ELPEUX, Vice-Consul.

CAPT. ANFRYE, Military Attache, French Legation.

MR. A. FREDIN, Consular Agent.

MR. A. IMBERTE GOURBEYRE, Secretary.

The French exhibits in Mining and Metallurgy are installed in the Agricultural Building, and catalogued in Volume IV.

GERMANY.—STATISTICAL PREFACE.

THE German Empire occupies the central portion of Europe, and extends from 6° to 22° 40' east longitude and 49° 7' to 55° 50' north latitude. It is bounded on the north by the German Ocean, the Danish Peninsula, and the Baltic; on the east by Russia and Austria; on the south by Russia, Austria, and Switzerland, and on the west by France, Belgium, and the Netherlands. The population (1871) is about 41,000,000. Its area is estimated at 208,000 square miles, or about one-sixteenth of that of all Europe. The coast line measures about 950 miles.

Germany is composed of an aggregation of 26 different States. The following list gives the names of these States, their population, area, and the number of members representing each in the Bundesrath, or Federal Council, and the Reichstag, or Imperial Diet:

STATES.	POPULATION IN 1871.	AREA IN SQUARE MILES.	NO. OF MEMBERS IN BUNDESRATH.	NO. OF DEPUTIES IN REICHSTAG.
Kingdoms:				
1. Prussia,	24,691,307	139,751	17	236
2. Bavaria,	4,863,450	29,280	6	48
3. Saxony,	2,556,244	5,780	4	23
4. Wurtemberg,	1,818,539	7,532	4	17
Grand Duchies:				
5. Baden,	1,461,562	5,850	3	14
6. Hesse,	852,894	2,962	3	9
7. Mecklenburg-Schwerin,	557,897	5,136	2	6
8. Saxe-Weimar,	286,183	1,403	1	3
9. Mecklenburg-Strelitz,	96,982	1,130	1	1
10. Oldenburg,	314,777	2,470	1	3
Duchies:				
11. Brunswick,	311,764	1,425	2	3
12. Saxe-Meiningen,	187,884	955	1	2
13. Saxe-Altenburg,	142,122	510	1	1
14. Saxe-Coburg-Gotha,	174,339	760	1	2
15. Anhalt,	203,437	896	1	2
Principalities:				
16. Schwarzburg-Rudolstat,	75,523	367	1	1
17. Schwarzburg-Sondershausen,	67,191	332	1	1
18. Waldeck,	56,224	438	1	1
19. Reuss (altere Linie),	45,994	123	1	1
20. Reuss (jungere Linie),	89,032	320	1	1
21. Schaumburg-Lippe,	32,059	170	1	1
22. Lippe-Deimold,	111,135	438	1	1
Free Towns:				
23. Lubeck,	52,158	110	1	1
24. Bremen,	122,402	97	1	1
25. Hamburg,	338,974	158	1	3
26. Alsace-Lorraine,	1,549,459	5,590		
	41,058,632	208,613	58	382

The *Almanac de Gotha*, for 1876, divides the population of the German Empire, in regard to nationality, as follows: Germans, 37,820,000; Poles, 2,450,000; Wends, 1,40,000; Czechs, 50,000; Lithuanians and Courlanders, 150,000; Danes, 150,000; French and Walloons, 210,000. The Germans admit of being divided into high and low Germans; the phraseology of the former is the cultivated language of all the German States; that of the latter, known as *Platt-Deutsch*, is spoken in the north and northwest. The Poles are found exclusively in the east and northeast of Prussia; the Czechs in Silesia, about Appeln and Breslau; the Wends, in Silesia, Brandenburg, and Prussian Lusatia; the Lithuanians and Courlanders in east Prussia; the Danes, in Schleswig; the Walloons, about Aix-la-Chapelle, in Rhenish Prussia, and the French, partly in the same region, and in Alsace and Lorraine.

Germany presents two very distinct physical formations. First, a range of high table land, occupying the centre and southern parts of the country, interspersed with numerous ranges and groups of mountains, the most important of which are the Harz and Teutoburger in the north, the Taunus and Thuringerwald in the middle, and the Schwarzwald and Raube Alps in the south, and containing an area, including Alsace and Lorraine, of 110,000 square miles. Second, a vast sandy plain, which extends from the centre of the empire north to the German Ocean, and including Schleswig-Holstein, contains an area of about 98,000 square miles. This great plain, stretching from the Russian frontier on the east to the Netherlands on the west, is varied by two terrace-like elevations. The one stretches from the Vistula into Mecklenburg, at no great distance from the coast of the Baltic, and has a mean elevation of 500 to 600 feet, rising in one point near Danzig to 1020 feet; the other line of elevations begins in Silesia, and terminates in the moorlands of Luneberg, in Hanover, its course being marked by several summits from 500 to 800 feet in height. A large portion of the plain is occupied by sandy tracts, interspersed with deposits of peat; but other parts are moderately fertile, and admit of successful cultivation.

In respect of drainage the surface of Germany belongs to three different basins. The Danube, from its source in the Schwarzwald to the borders of Austria, belongs to Germany, and through this channel the waters of the greater part of Bavaria are poured into the Black Sea, thus opening up communication with the east. The greater part of the surface, however (about 185,000 square miles), has a northern slope, and belongs partly to the basin of the North Sea, and partly to the basin of the Baltic. The chief German streams flowing into the North Sea are the Rhine, the Weser, and the Elbe; into the Baltic, the Oder and the Vistula.

The most important of the numerous canals of Germany are the Ludwig's canal, in Bavaria, connecting the Danube and Main, and thus opening a communication between the Black Sea and the German Ocean; the Finow and Friedrich Wilhelm's canals, in Brandenburg; the Plaue canal, connecting the Elbe and the Havel; and the Kiel and Eyder canal, uniting the Baltic and the German Ocean. Numerous lakes occur both in the table-land of southern Germany, and in the lowlands of the northern district, but few of them are of any great size. Mineral springs occur principally in Nassau, Wurtemberg, Baden, Bavaria, and Rhenish Prussia. Many of these springs have retained their high reputation from the earliest ages.

The climate of Germany presents less diversity than a first glance at the map might lead one to infer, for the greater heats of the more southern latitudes are considerably modified by the alpine character of the country in those parallels, while the cold of the northern plains is mitigated by their vicinity to the ocean. The average decrease in the mean temperature is in going from south to north, about 1° F. for every 52 miles; and in going from west to east, about 1° F. for every 72 miles. The line of perpetual snow varies from 7200 to 8000 feet above the level of the sea. The mean annual fall of rain is 20 inches.

The following table shows the mean temperature at different points :

	MEAN ANNUAL TEMPERATURE.	SUMMER.	WINTER.
Hamburg,	47.	64	30
Dresden,	48.	67	29
Frankfort-on-the-Main,	48.5	66	31
Berlin,	46.5	66	27
Hanover,	48.	63	33
Königsberg,	43.	62	24

Germany is rich in mineral products, among which the most important are silver, found in the Hartz mountains; iron in numerous mountain ranges; salt in many parts of the country; coal in Rhenish Prussia, Silesia. Cobalt, arsenic, sulphur, salt-petre, alum, gypsum, bismuth, pumice-stone, tripoli-slate, kaolin, emery, ochre, and vitriol, are all among the exports of Germany.

The following figures show the product of the principal mining industries of Germany (exclusive of Alsace and Lorraine) for the year 1870 :

	NO. OF WORKS.	PERSONS EMPLOYED.	PRODUCT IN CWT.	VALUE IN THALERS.
Coal (including brown coal),	1362	145,782	680,060,074	61,863,399
Iron ore,	1258	24,793	58,550,539	7,116,828
Zinc ore,	72	9,797	7,335,603	2,315,429
Lead ore,	174	18,057	2,111,810	5,511,235
Copper ore,	3	6,156	4,147,627	1,619,938

The yield of salt, for the same year, was 14,658,990 hundredweight, from 69 works, employing 4610 persons, and valued at 3,926,650 thalers.

The leading products of the metallurgical industries are given as follows :

	WORKS.	PERSONS EMPLOYED.	AMOUNT PRO- DUCED IN CWT.	VALUE IN THALERS.
Cast iron,	631	39,525	29,942,264	49,251,650
Wrought iron (including wire, bars, and manufactured iron of various kinds),	354	43,849	17,437,766	57,490,284
Steel,	216	12,892	3,399,027	22,747,626
Zinc,	53	6,256	1,727,570	10,212,259
Silver,	10	1,601	(lbs.) 185,847	5,549,943
Lead (products of),	17	1,513	1,195,753	6,951,164
Copper,	28	1,971	174,687	4,667,535

The entire production of mines, furnaces, salt works, etc., is given as 824,965,732 hundredweight, valued (including 186,270 pounds of gold and silver) at 246,482,099 thalers.

The vegetable products comprise a very large proportion of the European flora. All the ordinary cereals are extensively cultivated in the north, and largely exported, chiefly from Wurtemberg and Bavaria; hemp and flax, madder, woad, and saffron grow well in the central districts, where the vine, the cultivation of which extends in suitable localities as far north as 51°, is brought to greater cultivation—the best wine-producing districts being the valleys of the Danube, Rhine, Main, Neckar, and Moselle, which are, moreover, generally noted for the excellence of their fruits and vegetables. Tobacco is grown in sufficient quantities for extensive exportation on the Upper Rhine, the Werra, and Oder. The hops of Bavaria have a high reputation, and the chicory grown in that country and in the district between the Elbe and

the Weser finds its way all over Europe as a substitute for coffee. The average annual product of cereals is approximately as follows:

Rye,	89,000,000 hectolitres.*
Oats,	87,000,000 "
Wheat,	34,000,000 "
Barley,	30,000,000 "

The average annual potato crop amounts to 272,000,000 hectolitres. The production of beets, in 1872, was over 61,000,000 hundredweight. A fair yield of wine is about 4,500,000 hectolitres, and of tobacco, about 700,000 hundredweight.

The most extensive forests are found in central Germany, and in some parts of Prussia, while the northwestern parts of the great plain are deficient in wood, the place of which is in some degree supplied by the abundance of turf yielded by the marshy lands. Germany has long been noted for the good breed of horses raised in the northern parts of the continent, while Saxony, Silesia, and Brandenburg have an equal reputation for their sheep-flocks, and the fine quality of the wool which they yield. The rich alluvial flats of Mecklenburg and Hanover are celebrated for their cattle; the forests of northern and central Germany abound in swine, and in small game of various kinds; while the Bavarian Alps afford shelter to the larger animals, as the chamois, the red deer and wild goat, the fox, marten, and wolf.

According to the last enumeration of live stock, there were in Germany 3,500,000 horses, 15,000,000 cattle, 30,000,000 sheep, 8,000,000 swine, and 2,000,000 goats. The wool crop for 1869 amounted to 750,000 hundredweight.

Among the fishes of Germany, the most generally distributed are carp, salmon, trout, and eels; the rivers contain also crayfish, pearl-bearing mussels, and leeches. The oyster, herring, and cod fisheries constitute important branches of industry on the German shores of the Baltic and North Seas.

The preservation and cultivation of woods receive almost as much attention in Germany as agriculture, and, like the latter, are elevated to the rank of a science. The larger woods and forests in most of the states belong to the government, and are under the care of special boards of management, which exercise the right of supervision and control over all forest lands, whether public or private. The value of the forests of Germany was, in 1873, estimated at 666,000 thalers.

The oldest and most important of the German industrial arts are the manufactures of linen and woolen goods. The chief localities for the cultivation and preparation of flax, and the weaving of linen fabrics, are the mountain valleys of Silesia, Lusatia, Westphalia, the Harz, and Saxony (for thread laces); while cotton fabrics are principally made in Rhenish Prussia and Saxony. The same districts, together with Pomerania and Bavaria, manufacture the choicest woolen fabrics, including damasks and carpets. Toys, wooden clocks, and wood-carvings, which may be regarded as almost a specialty of Germany industry, are carried to the greatest perfection in the hilly districts of Saxony, Bavaria, and the Black Forest. The best iron and steel manufactures belong to Silesia, Hanover, and Saxony. Silesia probably possesses the finest glass manufactories; while Saxony and Prussia stand pre-eminent for the excellence of their china and earthen wares. Augsburg and Nuremberg dispute with Munich and Berlin the title to pre-eminence in silver, gold, and jewelry work, and in the manufacture of philosophical and musical instruments; while Leipzig and Munich claim the first rank for type foundries, printing, and lithography. The trading cities of northern Germany nearly monopolize the entire business connected with the preparation of tobacco, snuff, etc., the distillation of brandies, and the manufacture of sugar from the beet, potato, and other roots; while vinegar and oils are prepared almost exclusively in central and southern Germany.

The constitution of the empire is confederate, under the presidentship of the King of Prussia, who bears the hereditary title of German Emperor. He has the right

* The hectolitre equals 2.75 bushels.

and duty of representing the empire in all respects of international law, of declaring war in the name of the empire, making peace and treaties, etc. For a declaration of war the consent of the Bundesrath is necessary. He is the commander-in-chief of the whole army and navy, in peace as well as in war, except the military powers of Wurtemberg and Bavaria, which—in times of peace only—form separate corps under the command of their respective kings. He names and dismisses the officers and functionaries of the empire. His orders, issued in the name of the empire, must be countersigned by the Chancellor, who, as the first minister of the empire, is by his signature responsible for them.

The legislative powers lie in the *Bundesrath* and the *Reichstag*. The former consists of the delegates of the confederate governments, representing in all fifty-eight votes. The Reichstag has 382 members directly elected by the secret ballot of the people. The bills promulgated by these two assemblies in accordance are compulsory on all governments of the empire, and annul *eo ipso* all possible institutions contradictory to them in the several States.

The empire has no debt. The debts of the separate States amounted, in 1873, to 1,093,800,000 thalers, 589,300,000 of which sum was for railways.

The army consists, on a peace footing, of about 400,000 men; on a war footing, of about 1,300,000. The navy comprises 51 vessels, of which number 47 are steamers, of 77,130 horse-power, 64,198 tons burthen, and carrying 321 guns; and 4 sailing vessels (1 frigate and 3 brigs) mounting 36 guns.

The multiplicity of small States into which Germany was long broken up, opposed great obstacles to the development of commerce; but the difficulty has to some extent been obviated by the establishment of the *Zollverein*, or "Customs confederation." The Hanse Towns, Hamburg and Bremen, do not belong to it, being free ports; but it comprises all the other states of the empire and the grand duchy of Luxembourg.

The estimated value of goods exported, imported, and in transit (by the customs lines) for 1873 was as follows:

Imports,	4,257,300,000 marks.
Exports,	2,489,000,000 "
In transit,	1,233,000,000 "

The merchant navy comprised, in 1873, 4748 vessels, including 253 steamers, with a total of 1,201,358 tonnage.

The railways measured, in 1871, about 13,310 English miles; but these figures represent the length, not of the lines within the limits of the German Empire, but of those which are under German administration, though extending some way into neighboring States.

The various telegraphic lines of the empire (excepting those of Bavaria and Wurtemberg) are now under a central administration, and, in 1874, the whole measured 42,571 kilometres; length of wires, 149,410 kilometres; number of messages, 13,422,511; number of offices, 4992.

The post office forwarded in 1874:

Private letters,	521,900,000
Postal cards,	47,900,000
Official letters,	37,700,000
Parcels, etc.,	89,700,000
	<hr/>
	697,200,000

Newspapers,	349,600,000
Number of offices,	7,900

"THE COMMERCIAL," Pittsburgh, Pa.

least four or five years, is made compulsory in nearly all the German States, and hence the proportion of persons who cannot read and write is exceedingly small in Germany.

The elementary schools are 60,000 in number, and are attended by 6,000,000 pupils between the ages of six and fourteen. Of the middle schools, including 330 gymnasia and 214 pro-gymnasia and Latin schools, there were in 1873 over 1000, attended by 177,379 pupils. There are 21 universities, with (in 1873) 1620 instructors and 17,858 students. Of polytechnic schools there are ten, with 360 instructors and 4500 students. Besides these there are numerous special schools of technology, agriculture, commerce, mining, metallurgy, military science, navigation, trades, etc. The German academies of art and sciences and conservatories of music enjoy a world-wide reputation. Public libraries—of which there are more than one hundred and fifty—museums, botanical gardens, art collections, and picture galleries are to be met with in most of the capitals and many of the country towns.

Commission from the GERMAN EMPIRE to the International Exhibition:

- DR. JACOBI, Royal Prussian Actual Privy Superior Government Counsellor and Ministerial Director, President.
 DR. STUVE, Royal Prussian Privy Government Counsellor and Counsellor in the Ministry of Commerce.
 DR. WEDDING, Royal Prussian Counsellor of Mines.

AUSTRIA.—STATISTICAL PREFACE.

THE Austrian Empire forms, on the whole, a compact territory with a circumference of about 5349 miles. It is included between 42° to 51° north latitude, and between 8° 20' to 26° 20' east longitude. The body of the empire lies in the interior of the European continent, though, by means of the southern projection of Dalmatia, it has about 1200 miles of sea-coast on the Adriatic. With the rest of its circumference, it borders on the States of the Church, Modena, Parma, Italy, Switzerland, Bavaria, Saxony, Prussia, Russia, Moldavia, Wallachia, Servia, Turkey, and Montenegro. Its present provinces embrace an area of 241,123 square miles, and a population which, in 1869, amounted to 35,904,435.

The following table gives the area, number of civil inhabitants, and total population, civil and military, of the various provinces of the empire—distinguishing its two great political divisions, the German monarchy, or Cisleithan Austria, and the Hungarian kingdom, or Transleithan Austria, together with the so-called military frontier, placed under the administration of the ministry of war for the whole empire—according to the official returns for 1869:

PROVINCES.	AREA IN ENGLISH SQ. MILES.	CIVIL POPULATION.	TOTAL POPULATION.
GERMAN MONARCHY.			
Lower Austria,	7,658	1,954,251	1,990,708
Upper Austria,	4,634	731,579	736,557
Salzburg,	2,768	151,410	153,159
Styria,	8,674	1,131,309	1,137,990
Carinthia,	4,007	336,400	337,694
Carniola,	3,858	463,273	446,334
Coast Land,	3,085	582,079	600,525
Tyrol and Vorarlberg,	11,321	878,907	885,789
Bohemia,	20,763	5,106,069	5,140,544
Moravia,	8,579	1,997,897	2,017,274
Silesia,	1,988	511,581	513,352
Galicia,	39,320	5,418,016	5,444,683
Bukowena,	4,037	511,964	513,404
Dalmatia,	4,942	442,796	456,961
Total German Monarchy,	116,634	20,217,531	20,934,980
KINGDOM OF HUNGARY.			
Hungary,	82,867	11,117,623	11,118,502
Croatia and Slavonia,	7,445	1,160,085	1,164,806
Transylvania,	21,222	2,101,727	2,115,024
Military Frontier,	12,956	1,037,892	1,041,123
Total Hungary,	124,490	15,417,327	15,509,455
Total Austro-Hungary,	241,124	35,634,858	35,904,435

Three-fourths of Austria is mountainous or hilly, being traversed by three great mountain chains—the Alps, Carpathians, and Sudetes, whose chief ridges are of primitive rock. The Alps are accompanied, north and south, by parallel ranges of calcareous mountains, covering whole provinces with their ramifications. The Carpathians are lapped on their northern side by sandstone formations; mountains of the

same character also occupy Transylvania. Springing from the northwest bend of the Carpathians, the Sudetes run through the northeast of Moravia and Bohemia, in which last the range is known as the Riesen gebirge, or Giant mountains. Continuous with this range, and beginning on the left bank of the Elbe, are the Erzgebirge, or Ore mountains, on the confines of Saxony; and veering round to nearly southeast, the range is further prolonged in the Bohemian Forest mountains, between Bohemia and Bavaria. The chief plains of the Austrian empire are: the great plains of Hungary (the smaller of these is in the west, between the offsets of the Alps and Carpathians, and is about 4200 square miles in extent; the other, which is in the east, and traversed by the Danube and the Theiss, has an area of 21,000 square miles), and the plains of Galicia.

From the south point of Dalmatia to the boundary of Italy, Austria has a sea-line of about 1000 miles, not counting the coasts of the numerous islands, the largest of which is Veglia, 23 miles by 12. The chief lakes are: the Platten See, and the Neusiedler See, both in Hungary. The first is navigable by steamers, and both are rich in fish, and have fruitful vineyards around them. The Alps and Carpathians inclose numerous mountain lakes, which are surrounded with wood and rock, and all the other attributes of picturesque scenery. The Long lake in the Tatra mountains lies at an elevation of 6000 feet. The most remarkable of all is the Zirknitz lake, in Illyria. There are extensive swamps or morasses in Hungary. One connected with the Neusiedler See covers some 80 square miles. A good deal has been done in the way of reclaiming lands by draining morasses.

The leading rivers that have navigable tributaries are: the Danube, which has a course of 849 miles within the Austrian dominions, the Vistula, the Elbe, and the Dniester. The Rhine bounds Austria for about fourteen miles above Lake Constance.

The climate of Austria is on the whole very favorable; but from the extent and diversity of surface, it presents great varieties. In the warmest southern region, between 42° to 46° latitude, rice, olives, oranges, and lemons ripen in the better localities; and wine and maize are produced everywhere. In the middle temperate region from 46° to 49°, which has the greatest extent and diversity of surface, the vine and maize still thrive in perfection. In the northern region, beyond 49°, except in favored spots, neither the vine nor maize succeeds; but grain, fruit, flax, and hemp, thrive excellently. The mean temperature of the year is, at Trieste, 58° F.; at Vienna, 51°; at Lemberg, in Galicia, 44°.

The raw products of Austria are abundant and various; and in this respect it is one of the most favored countries in Europe. Its mineral wealth is not surpassed in any European country; it is only lately that Russia has exceeded it in the production of gold and silver. Mining has been a favorite pursuit in Austria for centuries, and has been encouraged and promoted by the government. Bohemia, Hungary, Styria, Carinthia, Salzburg, and Tyrol, take the first place in respect of mineral produce. Except platina, none of the useful metals is wanting. The mines are partly State property, and partly owned by private individuals. Gold is found chiefly in Hungary and Transylvania, and in smaller quantity in Salzburg and Tyrol. The same countries, along with Bohemia, yield silver. The discovery of quicksilver at Idria first brought this branch of mining industry into importance. This metal is now also found in Hungary, Transylvania, Styria, and Carinthia. Copper is found in many districts—tin, in Bohemia alone. Zinc is got chiefly in Cracow and Carinthia. The most productive lead mines are in Carinthia. Iron is found in almost every province of the monarchy, though Styria, Carinthia, and Carniola are chief seats. The production, though great, is not yet equal to the consumption. Antimony is confined to Hungary; arsenic is found in Salzburg and Bohemia; cobalt in Hungary, Styria, and Bohemia; sulphur in Galicia, Bohemia, Hungary, Venice, Salzburg, etc., though not enough to supply home consumption. Graphite is found abundantly in Bohemia, Moravia, Carinthia, etc.

The useful earths and building-stones are to be had in great profusion ; all sorts of clay up to the finest porcelain earth (in Moravia, Bohemia, Hungary, Venice), and likewise marble, gypsum, chalk, etc. Of precious and semi-precious stones are the Hungarian opal, which passes in commerce as oriental, Bohemian garnets—the finest in Europe—cornelians, agates, beryl, amethyst, jasper, ruby, sapphire, topaz, etc.

The following table shows the principal metals and minerals produced in Austria in 1867, and their average value in florins at the place of production :

	WEIGHT.	VALUE IN FLORINS.
Gold (Austrian pound),	3,562	2,406,041
Silver "	81,378	3,655,643
Quicksilver (Austrian hundredweight),	5,944	723,958
Tin " "	591	33,812

Austria is peculiarly rich in salt. Rocksalt exists in immense beds on both sides of the Carpathians, chiefly at Wieliczka and Bochnia, in Galicia, and in the country of Marmaros in Hungary, and in Transylvania. The annual produce of rock-salt is greatly above three million hundredweight. Salt is also made at State salt-works by evaporating the water of salt-springs. The chief works are those at Hallstadt, Ischl, Hallein, and Hall in Tyrol. From two to three millions hundredweight are thus produced annually. A considerable quantity is also made from sea-water on the coast of the Adriatic. Of other salts, alum, sulphate of iron, and sulphate of copper are the chief. Austria has abundance of mineral springs, frequented for their salubrity ; 1600 are enumerated, some of them of European reputation, as the sulphurous baths of Baden, in lower Austria, the saline waters of Karlsbad, Marienbad, and Ofen, etc.

The vegetable productions, as might be expected from the vast diversity in the soil and position of the different provinces, are extremely various. Although three-fourths of the surface is mountainous, more than five-sixths is productive, being used either for tillage, meadows, pasture, or forest. Grain of all kinds is cultivated most abundantly in Hungary and the districts south of it on the Danube, in Bohemia, Moravia, Silesia, and Galicia. Agriculture is not yet far advanced ; the prevailing system is still what is called the three-field system, introduced into Germany by Charlemagne, in which a crop of winter wheat is followed by one of summer grain, and that by fallow.

In Hungary, the Magyar adheres to his primitive husbandry ; the German and Slave are adopting improved methods. Rice is cultivated in the Banat, but not enough for the consumption. Potatoes are raised everywhere ; and in elevated districts, are often the sole subsistence of the inhabitants. Horticulture is carried to great perfection ; and the orchards of Bohemia, Austria proper, Tyrol, and many parts of Hungary, produce a profusion of fruit. Great quantities of cider are made in upper Austria and Carinthia, and of plum brandy in Slavonia. In Dalmatia, oranges and lemons are produced, but not sufficient for the requirements of the country ; twice as much olive oil is imported as is raised in the monarchy.

In the production of wine, Austria is second only to France. With the exception of Galicia, Silesia, and upper Austria, the vine is cultivated in all the provinces ; but Hungary stands first, yielding not only the finest quality of wine, but four-fifths the amount of the whole produce of the empire. The average produce of the whole empire is estimated at about 680 millions of gallons.

Of plants used in manufactures and commerce, the first place is held by flax and

hemp. Flax is cultivated almost universally; white hemp in Galicia, Moravia, Hungary, etc. Tobacco is raised in great quantities, especially in Hungary, which also is first in the cultivation of rapeseed. Bohemia raises hops of the first quality, which are partly exported, though other provinces import from abroad. The indigo plant has lately been successfully acclimatized in Dalmatia. More than a third of the productive surface is covered with wood (75,000 square miles), which, besides timber, yields a number of secondary products, as tar, potash, charcoal, bark, cork, etc.

As to animals, bears are found in the Carpathians, Alps, and Dalmatia; wolves, jackals, and lynxes in these same districts, and also in the Banat, Croatia, Slavonia, and the military frontiers. The marmot, otter, and beaver are also found in Dalmatia. Game has of late sensibly diminished. The wild goat lives in the highest, the chamois and white Alpine hare in the middle regions of the Alps and Carpathians. More productive than the chase are the fisheries of the Danube, Theiss, and numerous streams, lakes, and ponds. The chief sea-fishing is in Dalmatia. Leeches, procured chiefly in Hungary and Moravia, form an article of considerable trade. For foreign commerce, the most important branch of rural industry is the rearing of silk.

Austria produces about a quarter a million of silk cocoons annually. The silk trade is very extensive on the Tyrol—the yearly supply of cocoons in that country being about 32,000.

In 1851, the number of horses in the monarchy was stated at 3,229,884 (not including 75,000 belonging to the army); cattle, 10,410,484; sheep, 16,801,545; goats, 2,275,900; and swine, 7,401,300. Nearly three-fourths of the population are engaged in husbandry, so that Austria is decidedly an agricultural State, though its capabilities in this respect have by no means been fully developed.

The annual value of its manufactures—not including small trades—is estimated at 1000 to 1200 millions of florins, while that of its husbandry may reach 3000 millions. Bohemia takes the lead in this industry; then follow Austria proper, Moravia and Silesia, Hungary. Vienna is the chief seat of manufacture for articles of luxury; Moravia, Silesia, and Bohemia for linen, woolen, and glass wares; Styria and Carinthia for iron and steel wares. The chief manufactured articles of export are silken and woolen; the only others of consequence are linen, twist, glasswares, and cotton goods. The yearly value of manufactured iron is about fifty-four millions of florins. The glasswares of Bohemia are of special excellence. The hemp and flax industry is one of the oldest and still most important.

No branch of industry has risen more rapidly than that of cotton. The annual value of the silk industry is estimated at about sixty millions of florins. The manufacture of tobacco is a State monopoly, and produced a revenue in 1873 of 58,126,000 florins. The salt monopoly secured 18,720,000 florins.

The imports for the year 1874 were 565,600,000 florins; the exports were 452,200,000 florins. This is exclusive of Dalmatia—not within the imperial line of customs. The figures for Dalmatia were, during the same year: 9,600,000 florins imports, and 6,600,000 florins exports.

The merchant navy, at the beginning of 1875, comprised 7203 vessels, with a tonnage of 332,005, and an equipment of 27,381 seamen. Of great importance for the commerce of the empire is the Austrian Lloyds. This company owned, on the 1st of January, 1874, a fleet of seventy-six steamers, of 15,800 horse-power.

Since the year 1867 Austria has been a twofold empire, consisting of a German or "Cisleithan" monarchy—Austria proper; and a Magyar or Transleithan kingdom—Hungary. Each of the two countries has its own laws, parliament, ministers, and government; and the formal tie between them is a body known as the Delegations. These form a parliament of 120 members; one-half is chosen by the legislature of Austria, and the other by that of Hungary, the upper house of each returning twenty, the lower house forty delegates. The delegations have jurisdiction over all

matters affecting the common interests of the two countries, especially foreign affairs, war, and finance. The acts of the delegations require to be confirmed by the representative assemblies of their respective countries.

The administration of Austria proper is divided among nine ministries—Foreign Affairs, Police, Public Education, Agriculture and Public Works, Finance, Interior, War and Navy, Commerce, and Justice. The Reichsrath consists of an upper and a lower house. The upper house is constituted by princes, nobles, archbishops, bishops, and life members nominated by the emperor. To give validity to bills passed by the Reichsrath, the consent of both chambers is required, as well as the sanction of the emperor.

The executive of Hungary is carried on in the name of the king by a responsible ministry.

The budget for 1875 gives, for Austria proper,

Total expenditures,	382,231,049
“ receipts,	373,089,899
	9,141,150 florins.
For Hungary—Total expenditures,	233,804,075
“ receipts,	212,138,518
	21,665,557 florins.

The public debt of Austria, on the 1st of January, 1875, was 2,649,484,475 florins; that of Hungary, January 1st, 1873, was 488,717,380 florins.

According to official returns, Austria possessed, in 1875, a standing army numbering 284,435 men on the peace footing, and 785,649 on the war footing.

The naval forces consisted of sixty-nine vessels, of a tonnage of 115,380, carrying 263 heavy and 87 light guns. Of this fleet, 47 vessels were steamers, of 100,260 tons burthen, carrying 263 heavy and 87 light guns.

The length of railways, at the close of 1875, was

In Austria,	9,823 kilometres.
“ Hungary,	6,415 “
	16,238 “

The work of the post office in Austria-Hungary for 1874 was as follows :

Letters,	253,909,000
Postal cards,	28,741,000
Parcels,	31,959,000
Newspapers,	82,085,000
Number of post offices,	6,296

The statistics of telegraphs for the year 1874 are as follows :

Length of lines (Austria-Hungary),	45,441 kilometres.
“ “ wires “ “	129,171 “
Number of offices,	2,923 “
“ of dispatches,	5,797,492 “

Education, since 1849, is under the care of a Minister of Public Worship and Instruction. In the major part of German Austria the law enforces the compulsory attendance in the “ Volksschulen,” or National Schools, of all children between the ages of six and twelve, and parents are liable to punishment for neglect. It is rarely, however, that cases occur in which penalties for non-attendance at school have to be enforced. The cost of public education mainly falls on the communes, but of late

years the State has come forward to assist in the establishment of schools for primary education.

There are seven universities in the empire. Four of these, the high schools at Vienna, Prague, Graz, and Innsbruck, are called German universities, and were attended as follows, in 1872 :

	PROFESSORS AND TEACHERS.	STUDENTS.
Vienna,	200	3881
Prague,	97	1709
Graz,	70	926
Innsbruck,	58	612

Of the other universities, Pesth, the high school of Hungary, had 2500 students at the end of 1873, and Cracow and Lemberg, the high schools for Galicia and the other Slavonian provinces, had, at the same date, together, 1900 students.

Commission from AUSTRIA to the International Exhibition :

RUDOLF ISBARY, Vice-President of the Chamber of Commerce, President.

FRANZ RITTER VON LIEBIG, Member of the Chamber of Commerce, First Vice-President.

MICHAEL MATSCHEKO, Manufacturer, Second Vice-President.

SWITZERLAND.—STATISTICAL PREFACE.

SWITZERLAND is an inland country of Europe, situated between $45^{\circ} 48'$ and $47^{\circ} 49'$ north latitude, and $5^{\circ} 55'$ and $10^{\circ} 30'$ east longitude. Its greatest length from east to west is 180 miles, and its greatest width from north to south, 130 miles.

The following table gives the area and population of each of the 22 cantons, according to the census returns of 1870:

	ENGLISH SQUARE MILES.	POPULATION.
Graubunden,	2,968	91,782
Bern,	2,561.5	506,465
Wallis (Valais),	1,661.6	96,887
Vaud (Waadt),	1,181.9	231,700
Ticino (Tessin),	1,034.7	119,619
St. Gallen,	747.7	191,015
Zurich,	685.3	284,786
Luzern,	587.4	132,338
Fribourg (Freeburg),	563.9	110,832
Aargau,	502.4	198,873
Uri,	420.8	16,107
Schwyz,	338.3	47,705
Neuchatel (Neuenburg),	280.2	97,284
Glarus,	279.8	35,150
Thurgau,	268.3	93,300
Unterwalden,	262.8	26,116
Solothurn,	254.6	74,713
Basle,	184.6	101,887
Appenzell,	152.8	60,635
Schaffhausen,	119.7	37,721
Geneve (Genf),	91.3	93,239
Zug,	85.4	20,993
Total,	15,233.0	2,669,147

Switzerland is the most mountainous country of Europe. Its principal chains are the Alps and the Jura. The former run from east to west along its southern or Italian frontier. Their ramifications fill more than one-half the country, and terminate along a line which may be traced from Vevey, on the lake of Geneva, to Mount Moleson and Mount Napf, across Lake Zug, to the southern shores of the lakes of Zurich and Wallenstadt, and Sargans on the Rhine. The mean elevation of the highest chain is from 8000 to 9000 feet. The Jura run northeast from the western corner of Switzerland. They consist of a series of parallel ridges inclosing long and narrow valleys, and their mean elevation does not exceed 4000 feet. In the angle formed between them and the Alps lies the plain of Switzerland, a table-land 100 miles in length, and from 20 to 30 miles in width, with a mean elevation of about 1400 feet above the sea. It is not absolutely level, but covered with elevations which seem very unimportant when contrasted with the huge masses of the Alps and Jura. The communication between the plain of Switzerland and the German valleys of the Danube and Rhine is not continuous. The plain terminates in the east in a third hilly tract, the Thur hill country, which lies between the lakes of Zurich and Constance, and, to some extent, forms a barrier between the plain of Switzerland and Germany. The Jura, the plain, and the hill country, are the three great divisions of northern Switzerland. The divisions in the Alpine region are more strongly marked

in nature. They isolate and inclose (1) the valleys drained by the Rhone which connect Switzerland with southern France; (2) Ticino, drained by streams which descend to the Po, and bring this section into communication with Italy; (3) the Grisons, the most sequestered valleys of Switzerland, drained by the tributaries of the Rhine and Danube, and shut out by mountains from the lower basins of these rivers; (4) Bernese Oberland, which slopes towards the western extremity of the Swiss plain; (5) the district of the Forest Cantons, Schwyz, Uri, and Unterwalden, surrounding the Lake of Lucerne.

In Switzerland the climate chiefly varies with the elevation above the sea level. At a height exceeding 9500 feet the mountains are covered with perpetual snow, which descends along the glaciers to a much lower level, and thus covers the elevated part of the country with a vast sea of ice. Below the level of perpetual snow the surface of Switzerland has been divided into a series of belts, characterized by different climates and productions. The highest of these, lying between the snow and the level of 6900 feet, has been called the Upper Alpine region. In it the glaciers fill the valleys, but plants clothe the scanty soil of the ridges. The second or Lower Alpine belt descends to 4800 feet, and is a country of pastures in which shrubs, but no trees, are seen. In the third belt, which descends to 4350 feet, meadows still abound, but forests of firs and maples, in many parts, replace them. The fourth belt sinks to 3000 feet. Here forests still abound, the beech being the prevailing tree; the meadows are excellent, and rye and barley are successfully cultivated. The fifth belt descends to 1800 feet. In it the oak and walnut are the characteristic forest trees. Spelt and the best wheat are cultivated. The last belt sinks to 750 feet. In it the chestnut is the characteristic tree; the mulberry and vine are extensively cultivated, and wheat is the grain chiefly grown. This belt includes the greater part of the Swiss plain, and sinks to its lowest level in the valley of the Rhine, between Constance and Basle, and the banks of Lake Zurich and Lago Maggiore. In the last district the vegetation is that of northern Italy. The most populous part of Switzerland lies between 1250 and 2150 feet. The temperature of this region is fairly represented by that of Zurich, which averages, for the year, 47.95°.

The German language is spoken by the majority of the inhabitants in sixteen cantons, the French in four, and the Italian in two. It is reported in the census returns of 1870 that 384,561 families speak German, 134,183 French, and 30,293 Italian. According to the same returns there were but five towns in Switzerland with more than 20,000 inhabitants, namely, Geneva, seat of the watch and jewelry industry, with 46,783; Basle, centre of the silk industry, with 44,834; Bern, political capital, with 36,001; Lausanne, with 26,520; and Zurich, with 21,199 inhabitants. The soil is pretty equally divided among the population, it being estimated that four-fifths of the inhabitants are land owners. Of every 100 square miles of land 20 are pasture, 17 forest, 11 arable, 20 meadow, 1 vineyard, and 30 uncultivated, or occupied by lakes, rivers, and mountains.

According to the census of 1870 there are 1,095,447 individuals supported, either wholly or in part, by agriculture. At the same date, the manufactories employed 216,468 persons, the handicrafts 241,425. In the canton of Basle the manufacture of silk ribbons employs 6000 persons, with a total annual production valued at \$7,000,000. In the canton of Zurich silk stuffs, to the value of about \$8,000,000, are made by 12,000 operatives. The manufacture of watches and jewelry in the cantons of Neuchatel, Geneva, Vaud, Bern, and Solothurn, employ 36,000 workmen, who produce annually 500,000 watches—three-sevenths gold, four-sevenths silver—valued at \$9,000,000. In the cantons of St. Gall and Appenzell, 6000 workers make \$2,000,000 worth of embroidery annually. The printing and dyeing factories of Glarus turn out goods to the value of \$30,000 per annum. The manufacture of cotton goods occupies upwards of 1,000,000 spindles, 4000 looms, and 20,000 operatives, besides 38,000 hand-loom weavers.

The Federal custom house returns classify all imports and exports under three chief headings, namely, live stock, *ad valorum* goods, and goods taxed per quintal. No returns are published of the value of imports or exports: only the quantities are given. The following table shows the imports and exports during the year 1871:

IMPORTS.

Live stock,	256,851 head.
Agricultural instruments, carts, and railway carriages for travelers and merchandise, <i>ad valorum</i> ,	1,043,991 francs.
Goods taxed per quintal, including loads reduced to quintals,	25,450,359 quintals.

EXPORTS.

Live stock,	127,490 head.
Wood and coal, <i>ad valorum</i> ,	5,351,941 francs.
Goods, per load and quintal,	4,086,646 quintals.

The present constitution vests the supreme legislative and executive authority in a parliament of two chambers, a Standerath, or State Council, and a Nationalrath, or National Council. The first is composed of 44 members, chosen by the 22 cantons—2 for each canton. The Nationalrath consists of 135 representatives, chosen by popular vote, at the rate of one deputy for every 20,000 souls. A general election for representatives takes place every three years. Both chambers united are called the Bundesversammlung, or Federal Assembly, and as such represent the supreme government of the republic. The chief executive authority is deputed to a Bundesrath, or Federal Council, consisting of seven members elected for three years by the Federal Assembly. The president and vice-president of the Federal Council are the first magistrates of the republic. Both are elected by the Federal Assembly for the term of one year, and are not re-eligible until after the expiration of another year. Independent of the Federal Assembly, though issuing from the same, is the Bundes-Gericht, or Federal Tribunal, consisting of eleven members, elected for three years. The Federal Tribunal decides, in the last instance, on all matters in dispute between the various cantons, or between the cantons and the Federal government, and acts in general as a high court of appeal. Each of the Swiss cantons and demi-cantons has its local government, different in organization in most instances, but all based on the absolute sovereignty of the people.

In the budget estimates for the year 1875 the total revenue is set down at 39,516,000 francs,* and total expenditure at 39,266,000 francs. The public debt of the republic amounted, at the commencement of 1875, to 30,635,552 francs, as a set-off against which there was a so-called Federal fortune, or property belonging to the State, valued at 31,783,303 francs.

The fundamental laws of the republic forbid the maintenance of a standing army within the limits of the confederation. The troops are divided into three classes: 1, the Bundes-Auszug, or Federal army, consisting of all men able to bear arms from the age of 20 to 30; 2, the army of reserve, consisting of all men who have served in the first class, from the age of 31 to 40; 3, the Landwehr, or militia, comprising all men from the 41st to the completed 44th year. The strength of the armed forces of Switzerland, at the end of 1874, was as follows:

Staff,	841
Bundes-auszug,	84,369
Reserve,	50,069
Landwehr,	65,981
Total,	201,260

* One franc == 19.3 cts. gold.

From official returns it appears that the railways open for public traffic in Switzerland had, at the end of 1874, a total length of 1024 English miles.

The post office of Switzerland forwarded, during the year 1874, 63,252,884 letters; 19,925,200 packets, and 45,651,344 newspapers.

At the end of September, 1875, there were 3736 miles of telegraph lines and 9538 miles of wires. The number of messages sent, in the year 1874, was 2,625,104; number of offices, 815. The entire telegraph system belongs to the State.

In no country is elementary instruction more widely diffused. Parents are compelled to send their children to school from five to eight, but not above that age. There are universities on the German model at Basle, Bern, and Zurich, and academies on the French plan at Geneva and Lausanne. The number of clubs for scientific, literary, musical, and social purposes, is remarkable. There are few pursuits to which any class of men can devote themselves which are not represented in Switzerland by societies.

Commission from SWITZERLAND to the International Exhibition:

BELGIUM.—STATISTICAL PREFACE.

BELGIUM lies between latitude $49^{\circ} 27'$ and $51^{\circ} 30'$ north, and between longitude $2^{\circ} 33'$ and $6^{\circ} 5'$ east. It is bounded on the north by Holland; on the east by Dutch Limbourg, Luxembourg, and Rhenish Prussia; on the south and southwest by France; and on the northwest by the North Sea. Its greatest length, from northwest to southeast, is 173 English miles; and its greatest breadth, from north to south, 112 English miles. The whole area is 11,313 square miles. The following table gives a list of the provinces in Belgium, with the area, population, and chief town of each :

PROVINCES.	AREA IN SQ. MILES.	POPULATION (1870).	CHIEF CITIES.
Antwerp,	1,094	492,482	Antwerp.
West Flanders,	1,243	668,976	Bruges.
East Flanders,	1,154	837,726	Ghent.
Hainault,	1,430	896,285	Mons.
Liege,	1,111	592,177	Liege.
Brabant,	1,260	879,814	Brussels.
Limbourg,	929	200,336	Hasselt.
Luxembourg,	1,695	205,784	Arlon.

Belgium is the most densely populated country in Europe, the population being about 404 to the square mile; and in the particular provinces of East Flanders, Brabant, Hainault, and West Flanders, respectively, not less than 675,594,537, and 502 to the square mile. The mural population bears to that of the towns a proportion of about 3 to 1. About 58 per cent. of the inhabitants are Flemish, the rest Walloon and French, with 39,000 Germans in Luxembourg. Belgium is, on the whole, a level and even low-lying country; diversified, however, by hilly districts. In the southeast, a western branch of the Ardennes highlands makes its appearance, separating the basin of the Maas from that of the Moselle, but attains only the moderate elevation of 2000 feet. In Flanders the land becomes so low that in parts where the natural protection afforded by the downs is deficient, dikes, etc., have been raised to check the encroachments of the sea. In the northeast part of Antwerp, a naturally unfertile district named the Campine, and composed of marshes and barren heaths, extends in a line parallel with the coast. The once impassable morasses of the *Morini* and the *Menapii*, which stayed the progress of Cæsar's legions, are now drained, and converted into fertile fields, surrounded by dense plantations, which make the land at a distance look like a vast green forest—though, when more closely regarded, we see only numerous dwellings interspersed among fields, canals, and meadows.

The abundant water-system of Belgium is chiefly supplied by the rivers Scheldt and Maas, both of which rise in France, and have their embouchures in Holland. At Antwerp, the Scheldt, which, like the Maas, is navigable all through Belgium, is 32 feet deep, and about 480 yards wide. Its tributaries are the Lys, Dender, and Rupel. The Maas, or Meuse, receives in its course the waters of the Sambre, the Ourthe, and the Roer. These natural hydrographical advantages are increased by a system of canals which unite Brussels and Louvain with the Rupel, Brussels with Charleroi, Mons with Conde, Ostend with Bruges and Ghent, and this last place with Terneuse. The climate of Belgium, in the plains near the sea, is cool, humid, and somewhat unhealthy; but in the higher southeast districts, hot summers alternate with very cold winters. April and November are always rainy months. The geological formations

of Belgium are closely associated with France and Britain. The greater portion of the country is covered with tertiary deposits. A line drawn across the course of the Scheldt, by Mechlin, along the Demer and Maas, will have on its northern and northwestern aspect a tract of tertiary deposits, bounded northwards by the sea. In these tertiary strata the different geological periods are fully represented; but only the second, containing the Pleiocene deposits, is rich in fossils. The secondary deposits occupy an extensive tract in the centre of Belgium, between the Scheldt and the Demer. The most important district, economically, is the southwestern, consisting of palæozoic rocks—Silurian, Devonian, and Carboniferous. These beds have a very complicated structure, from the numerous and extensive flexures and folds they have undergone, and these are often accompanied with great upward shifts, by which beds of many different ages are brought to the same level. Belgium is rich in minerals, which, next to its abundant agriculture, constitute the chief source of its national prosperity. The four provinces in which they are found are Hainault, Namur, Liege, and Luxembourg. They include lead, copper, zinc, calamine, alum, peat, marble, limestone, slate, iron, and coal. Lead is wrought, but only to a small extent, in Liege; copper in Hainault and Liege; manganese in Liege and Namur; black marble at Dinant; slates at Herbeumont; and calamine principally at Liege. But these products are insignificant compared to the superabundance of coal—from anthracite to the richest gas coal—and iron.

In the year 1871, the total coal production of Belgium amounted to 13,733,176 tons, of a total value of 153,803,000 francs. Number of hands employed in the coal mines of Belgium, 94,186. The average daily pay of the workmen, in 1871, was $2\frac{3}{4}$ francs per day; average cost of production, $9\frac{1}{2}$ francs per ton of coal. The Ardennes districts yield a large supply of wood; while the level provinces raise all kinds of grain—wheat, rye, barley, oats, etc., leguminous plants, hemp, flax, colza, tobacco, hops, dye-plants, and chicory. Belgium contains upwards of 7,000,000 acres, of which one-half is arable, rather more than one-fifth in meadow and pasture, the same in woods and forests, and not above 500,000 acres lying waste. Some hundreds of acres are devoted to vineyards, but the wine produced is of an inferior quality. The forests of Ardennes abound in game and other wild animals. Good pasturage is found on the slopes and in the valleys of the hilly districts, and in the rich meadows of the low provinces. Gardening occupies not less than 130,000 acres; indeed, it has been said that the agriculture of Belgium is just gardening on a large scale, so carefully and laboriously is every inch of soil cultivated. The spade is still the principal instrument used. In the Campine, the care of bees is very productive, and the cultivation of the silkworm is encouraged. There are valuable fisheries on the coast, which, in 1871, employed 263 boats, with a tonnage of 8963. Belgium is famous for its horses, and in one year contained 294,537 of these animals, 1,203,891 horned cattle, and 662,508 sheep.

Wool is the object of an immense industry, the woolen manufactures of Verviers and its environs alone employing a population of 50,000 operatives. Flannels, serges, camlets, carpets, flax fabrics, silks, velvets, fine laces, ribbons, hosiery, hats, paper, etc., are extensively and profitably manufactured. The working of metals, as iron, copper, and tin, is very important; the manufacture of cannon, firearms, and locomotive engines being an especial feature of the metallurgical industry of Belgium.

The foreign trade of Belgium is officially divided into "general commerce," including the sum total of all international mercantile intercourse, and "special commerce," comprising such imports as are consumed within and such exports as have been produced in the country. The following table gives the value of both the general and special exports for the year 1873:

General imports,	2,424,800,000 francs.
" exports,	2,164,900,000 "
Special imports,	1,422,700,000 "
" exports,	1,158,600,000 "

Belgium is a constitutional, representative, and hereditary monarchy. The legislative power is vested in the King, the Chamber of Representatives, and the Senate. The Chamber of Representatives is composed of deputies chosen directly by all citizens paying a small amount of direct taxes. The number of deputies is fixed according to the population, and cannot exceed one for every 40,000 inhabitants. The Senate is composed of exactly one-half the number of members composing the other chamber, and are elected by the same citizens who appoint the deputies. The public expenditures of Belgium, for 1875, were 238,281,441 francs; receipts during the same year, 243,032,600 francs. The total public debt, in 1875, was 1,127,040,009 francs. The standing army is formed by conscription, to which every able-bodied man, who has completed his nineteenth year, is liable. Substitution is permitted. The actual number of soldiers under arms, on the 1st of January, 1875, was 103,893.

In Belgium the State is a great railway proprietor, and the State railway is one of the largest sources of national revenue. As each conceded railway lapses gratuitously to the State in 90 years from the period of its construction, the entire system will in time become national property. There were, at the end of 1875, 1953 kilometres of railways owned by the State, and 1479 worked by companies; in all 3432 kilometres. (The kilometre = 1093 yards.)

The work of the post office for 1874, was—

Number of offices,	479
Private letters,	58,036,628
Official "	6,035,861
Newspapers,	58,825,598
Packets (printed matter, etc.),	30,094,027

There were, on the 1st of January, 1875, telegraph lines of a length of 4909 kilometres; length of telegraph wires, 20,512 kilometres; telegraph stations, 574.

Elementary education is not yet generally diffused among the people. The schools are supported by the communes, the provinces, and the State combined. Education is not compulsory. In the budget for the year 1874, the sum voted by the Chamber of Representatives for public education amounted to 9,701,628 francs.

Commission from BELGIUM to the International Exhibition :

- BARON GUSTAVE DE WOELMONT, Senator, President.
- ALEXANDER ROBERT, Historical Painter, Member of the Belgium Academy of Fine Arts, Letters, and Sciences, Vice-President.
- CH. DE SMET-DE SMET, Manufacturer, President of the Industrial and Commercial Society, Vice-President.
- I CLERFEYT, Chief of Bureau, Ministry of the Interior, Secretary of the Upper Consul of Industry and Commerce, late Secretary of the Belgium Commission and Juries of the International Exhibition of Paris, London, and Vienna, Secretary.
- ALFRED ANCIEN, Manufacturer of Arms.
- A. J. BELPAIRE, Inspector-General of Railways and Telegraphs.
- L. DE CURTE, Architect, Member of the Royal Commission of Monuments and Council for the Improvement of the Arts of Design.
- FELIX DUHAYON, Lace Manufacturer, Judge of the Tribunal of Commerce, and Member of the Chamber of Commerce.

- E. DUISBERG, Director of the Paper Manufactories of Messrs. Godin & Co., at Huy,
Member of the Chamber of Commerce.
- JOS. FAYN, Mining Engineer, Consul of the Netherlands.
- P. F. GHYS-BRUNEEL, Lace Manufacturer.
- JULES HAVENITH, Shipowner, Consul of Austria-Hungary.
- J. KINDT, Inspector-General of Industry, Minister of the Interior.
- EUGENE MEEUS, Manufacturer, Member of the Chamber of Representatives.
- ALPH. MOREL, Director of the Glass Works, Lodelinsart.
- HENRI MOREL, Flax Manufacturer.
- REMY PAQUOT, Director of the Company of Bleyberg-es-Montzen.
- EDM. PARMENTIER, Manufacturer.
- FERDINAND PAUWELS, Historical Painter.
- AUG. RONNBERG, Director-General of Agriculture and Manufactures, Ministry of
the Interior.
- E. SADOINE, Director-General of Works.
- JULES SAUVEUR, Director-General of Public Instruction, Ministry of the Interior.
- E. E. A. SCHAAR, Chief Engineer, Director of the Arsenal and Railways of the State.
- ALFRED SIMONIS, Cloth Manufacturer, Member of the Chamber of Representatives.

Resident Commissioners in Philadelphia.

- COUNT D'OULTREMONT, Director-General.
- MR. J. VAN BREE, Chief of Fine Art Department.

NETHERLANDS.—STATISTICAL PREFACE.

THE Kingdom of the Netherlands lies between $50^{\circ} 43'$ and $53^{\circ} 36'$ north latitude and $3^{\circ} 22'$ and $7^{\circ} 16'$ east longitude, is bounded on the north by the North Sea, east by Hanover and the western part of Prussia, south by Belgium, west by the North Sea. Its greatest length, from north to south, is 195 English miles; its greatest breadth from the west, on the North Sea to the extremity of Overysse, on the east, 110 English miles. It contains 12,637 square miles, including the grand duchy of Luxembourg (which, although possessed of a separate administration, is connected with the kingdom in the person of the sovereign). The entire population, in 1872, was 3,835,111.

The following table gives the population (1872) and area of the provinces, including the reclaimed Haarlem Lake:

	AREA IN SQUARE MILES.	POPULATION.
North Brabant,	1,985	435,262
Gelderland,	1,972	436,029
South Holland,	1,176	700,499
North Holland,	966	591,338
Zeeland,	642	181,532
Utrecht,	531	175,037
Friesland,	1,267	300,257
Overysse,	1,308	256,681
Groningen,	907	228,883
Drenthe,	1,029	106,713
Limburg,	854	225,352
	12,637	3,637,583
Grand Duchy of Luxembourg,	990	197,528
	13,627	3,835,111

The land is generally low, much of it being under the level of the sea, rivers, and canals, especially in North and South Holland, Zeeland, the southern part of Gelderland, and Friesland. Along the west coast the low lands are protected from the sea by a line of sand-hills, or dunes, and where that natural defence is wanting strong dykes have been constructed to keep back the waters, and are maintained at great expense. The greatest of these dykes are those of the Helder and of West Kapell, on the east coast of Walcheren. Engineers, called the officers of the Waterstaat, take special charge of the dykes and national hydraulic works. A hilly district stretches from Prussia through Drenthe, Overysse, the Veluwe, or Arnhem district of Gelderland, the eastern part of Utrecht, into the Betuwe or country between the Maas and the Waal. This tract has many pretty spots, is of a light sandy soil, well watered, and when not cultivated, is covered with heath or oak-coppice. The greater portion of the north is very fertile, the low lands and drained lakes, called Polders, being adapted for pasturing cattle, and the light soils for cereals and fruits; but in some districts there are sandy heath-clad plains, extensive peat-lands, and undrained morasses, which industry is rapidly bringing under cultivation.

The islands may be divided into two groups, of which the southern, formed by the mouths of the Schelde and Maas, contains Walcheren, South and North Beveland, Schouwen, Duiveland, Tholen, St. Philipsland, Goeree, Voorne, Putten, Beyerland, Ysselmonde Rozenburg, and the island of Dordrecht. The northern group

contains the islands at the entrance of the Zuyder Zee and along the coast of Groningen and Friesland, as Wieringen, Texel, Vlieland, Terschelling, Ameland, Schiermonnikoog, and Rottum. In the Zuyder Zee are Marken, Urk, and Schokland. The chief rivers are the Rhine, Maas, and Scheldt. Important branches of these are the Waal, Lek, Yssel, Roër, etc.

Water ways are more numerous than in any other European country, the immense tracts of meadow-land and the fertile polders being girdled by large canals, and cut in all directions by smaller ones for drainage and communication. Those of most importance to the national trade are, the North Holland canal, constructed 1819-1825, to connect the port of Amsterdam with the North Sea; the Voorne canal, from the north side of Voorne to Hellevoetsluis, which shortens the outlet from Rotterdam; the South Willemsvaart, through North Brabant, Dutch and Belgian Limburg, from Hertogenbosch to Maastricht, being $71\frac{1}{2}$ English miles in length, and having 24 locks. Besides these, there are numerous important canals, connecting rivers, and cutting the kingdom into a network of water-courses. To improve the entrances to the Maas, the Hock, of Holland, has lately been cut. The new canal through the Y will be nowhere less than 80 yards broad, with sluices nearly 400 feet in length, and a depth of nearly 23 feet. It will reduce the distance from Amsterdam to the sea to about 15 miles, and gives a safe way for large ships.

The climate of the Netherlands is variable, chilly colds often closely succeeding high temperatures, inducing various forms of fever and ague, and requiring peculiar care as to clothing, etc. In summer, the thermometer sometimes rises above 80° , and even to 90° F. in the shade, and a winter of great severity usually occurs every fifth year, when carriages and heavily laden wagons cross the rivers and the Y on the ice, and thousands enjoy the national pastime of skating.

The farms are generally small and well cultivated. The leading agricultural products of Zeeland are wheat and madder; in South Holland, madder, hemp, butter, and cheese; in North Holland, butter and cheese are extensively made, and cattle, sheep, and pigs reared and exported. The horses of Friesland, Zeeland, and Gelderland are of first-rate quality. The exportation of butter from Holland and Friesland, and of Edam, Leyden, Gonda, and Frisian cheese, is quite large. Fruit is abundant, and in several provinces, as Gelderland, Utrecht, and Drenthe, much attention is paid to bees. In Haarlem and neighborhood, tulips and hyacinths are much cultivated, realizing a large annual amount. Wild ducks, snipes, plovers, and hares are plentiful; and there are also conies, partridges, pheasants, and deer—game forming an article of export.

The Netherlands are of recent formation, and consist of an alluvial deposit, chiefly of a deep, rich clayey soil, superimposed on banks of sand, marine shells, and beds of peat and clay. It appears that at some distant period there has been a depression of the land below its former level, enabling the sea to burst through its sand-banks, submerge the land, and form new deposits. The higher districts are composed of sand-drift mingled with fertile earths, and resting on a bed of clay. Coal is worked in Limburg; and a soft sandstone, which becomes fit for building purposes after having been some time exposed to the atmosphere, is quarried in the southern part of that province, which has also pipe and other clays. Valuable clays for pottery, tile, and brick making, abound in the various provinces.

The chief manufactures are linen, woolen, cotton, and silk fabrics; paper, leather, glass, etc. Leyden and Tilburg are famed for woolen blankets, wool-dyed pilot, fine cloths, and friezes; Hertogenbosch for linens and rich damasks; calicoes, shirtings, drills, tablecloths, striped dimities are made at Almelo, Amersfort, and in the leading towns of Overijssel. Good imitation Smyrna and Scotch carpets, and carpets of hair and wool, are manufactured at Deventer, Delft, Arnhem, Hilversum, Utrecht, and Breda; Turkey-red yarns, dyed silks, and silk stuffs at Roermond, Utrecht, Haarlem, etc.; leather, glass, firearms, at Maastricht and Delft; iron-founding, rolling and hammering of lead and copper, cannon-founding are carried

on at the Hague, etc.; and powder-mills at Muiden; Oudenkerk, Middelburg, Hertogenbosch, Amsterdam, Nymegen, etc., have important breweries. Waalwyk, Heusden, and surrounding districts, manufacture boots and shoes, of which Heusden sends to North and South Holland 1,000,000 pairs annually. Gin is distilled at Schiedam, Delft, Rotterdam, and Weesp. Amsterdam has the largest diamond-cutting trade in the world, 10,000 persons depending on that branch of industry. Sugar refining is largely carried on at Amsterdam, Rotterdam, and Dordrecht, from all of which sugar is exported to Russia, the Levant, and countries of Europe. Paper is chiefly made in Holland and Gelderland. The leading letter-type foundries are at Amsterdam and Haarlem. Manufactures of every kind are being rapidly increased in number, and adding to the material prosperity of the Netherlands. The chief motive power is the windmill, which forms a never-failing element in the scenery; but of late years steam is becoming more general.

Fishing, not only in the inland waters, the coasts and bays of the North Sea, but also on the coast of Scotland, is vigorously pursued. In 1872 the total value of the herrings taken in the North Sea was about \$450,000, 108 vessels having been employed; on the Netherland coasts, to the value of about \$250,000, and in the Zuyder Zee, additional, 18,052,000 herrings were taken. The anchovy take, almost exclusively in the Zuyder Zee, amounted to 9000 anker, valued at about \$90,000. There are productive oyster beds, besides extensive fishings of cod, ling, turbot, flounders, soles, shrimps, haddock, etc.; and from the rivers, salmon, eels, perch, etc.

The foreign commerce of the Netherlands, during the year 1873, was as follows:

	IMPORTS. IN GUILDERS.	EXPORTS. IN GUILDERS.*
Europe,	533,390,000	459,799,000
America,	39,838,000	8,125,000
Asia,	23,207,000	435,000
Africa,	2,747,000	890,000
Other countries,	298,000	1,000
	599,480,000	469,250,000

COLONIAL POSSESSIONS.

Java,	82,485,000	45,083,000
West Indies,	119,000	302,000
	682,084,000	514,635,000

The Guinea coast is not included in the above, the statistics for 1873 not being at command. During 1872, the imports 26,000, the exports 137,000 guilders. At the end of 1874 the merchant navy numbered 1827 vessels of 511,982 tons.

The constitution vests the whole legislative authority in a parliament composed of two chambers, called the States-General. The Upper House, or First Chamber, consists of 39 members, elected by the provincial states, from among the most highly assessed inhabitants of the various counties. The Second Chamber of the States-General, elected by ballot, at the rate of one deputy to every 45,000 souls, numbered 80 members in 1875. All citizens, natives of the Netherlands, not deprived of civil rights, and paying assessed taxes to the amount of not less than 20 guilders, are voters. Clergymen, judges of the High Court of Justice, and governors of provinces, are debarred from being elected. Every two years one-half the members of the Second Chamber, and every three years one-third of the members of the Upper House, retire by rotation. The Second Chamber has the initiative of new laws, and the functions of the Upper House are restricted to either approving or rejecting them, without the right of inserting amendments. The king has full veto power, but it is rarely, if ever, exercised. The executive authority is, under the

* The guilder equals 40 cents gold.

sovereign, exercised by a responsible council of ministers. The budget estimates for the year 1874, were as follows: Total revenue, 93,742,144 guilders; total expenditure, 93,742,144; estimated deficit, 6,244,740 guilders. The financial estimates are always framed with great moderation, generally showing a deficit, which, in the final account, becomes a surplus. There is a separate budget for the great colonial possessions in the East Indies. The Netherlands East India estimates, for 1874, are thus summarized :

	GUILDERS.
Revenue from receipts in the Netherlands,	48,958,967
" " " in India,	74,639,232
	<u>123,598,199</u>
Expenditure in the Netherlands,	17,956,922
" " India,	95,096,698
	<u>113,053,620</u>
Contribution in aid of the Home Government, for 1874, . .	10,544,579
	<u>123,598,199</u>

At the commencement of the year 1874, the national debt was represented by a capital of 927,320,076 guilders. The regular army stationed in the Netherlands comprised, on the 1st of July, 1875, 1935 officers and 59,491 men. The colonial army, on the 1st of January, 1875, comprised 27,475 men, 12,310 of whom were Europeans, and 15,165 natives. The navy, on the 1st of July, 1875, consisted of 88 steamers, carrying 474 guns, and 27 sailing vessels, with 195 guns. At the beginning of the year 1875, there were 1668 kilometres of railway opened for traffic. Of these, 853 belonged to private companies and 815 to the State. The number of post offices at the commencement of 1875 was 1241; the number of letters carried during the year, 44,396,330. The length of telegraph lines, January 1st, 1875, was 3431 kilometres; the length of wires, 12,365 kilometres; the number of offices, 328. During the year 1874 the number of telegrams carried was 2,084,121. Under the working of the primary instruction law, there were, in January, 1871, according to government returns, 2608 public schools, with 6538 schoolmasters and 477 schoolmistresses, and 1119 private schools with 2332 schoolmasters and 1565 schoolmistresses. At the same date the pupils in the public schools numbered 390,129, and the pupils in the private schools, 111,762. There were, also, in 1871, 81 schools of middle instruction, with 7047 pupils, and 55 Latin schools, with 1128 pupils. There are three universities, Leyden, Groningen, and Utrecht, with 1339 students in January, 1871, and a polytechnic institution, at Delft, with 171 pupils.

COLONIES.

The colonial possessions of the Netherlands embrace an area of 666,756 English square miles. The total population, according to the last returns, was 24,386,991.

The East Indian island of Java, possessing, with the adjoining Madura, an area of 51,336 English square miles, and a population, at the end of 1872, of 17,298,200, is by far the most important of the colonial possessions of the Netherlands. The whole of the other Netherlands possessions in the East Indies are administered as dependencies of Java.

Almost the entire trade of Java and Madura is with the Netherlands, and there is comparatively little commercial intercourse with other countries. The total imports, including specie, for 1873, were 108,304,000 guilders; total exports, including specie, 155,881,000 guilders. The principal articles of export from Java are sugar, coffee, rice, indigo, and tobacco. The imports of the other East Indian possessions, during 1873, were 42,486,000 guilders; the exports, 41,869,000 guilders.

The Dutch West India Islands, of which Curacoa is the most important, have a total population of 36,160, and an area of about 400 square miles. Surinam, with an area of about 45,000 square miles has a population of 69,834.

Commission from the NETHERLANDS to the International Exhibition :

- DR. E. H. VON BAUMHAUER, Honorary Professor, Secretary of the Dutch Society of Sciences, Director of the Society for the Advancement of Industry in the Netherlands, President.
- F. DE CASEMBROOT, Rear Admiral, Aid-de-camp in Extraordinary Service to His Majesty the King of the Netherlands, and member of the States-General, 2d Chamber.
- A. H. EIGEMAN, Industrial President of the Society of Dutch Industrials.
- P. HARTSEN, Chairman of the Amsterdam Board of Commerce.
- J. E. VAN HEEMSKERCK VAN BEEST, Dutch Royal Navy.
- DR. W. T. A. JONCKBLOET, President of the Committee of Superintendence of the Academy of Imitative Arts.
- D. VAN DER KELLEN, JR., Member of Administration Society Arti et Amicitia.
- L. C. VAN KERKWKYK, Pensioned Lieutenant-colonel, Corps of Engineering, Member of the Council of Administration of the Royal Institution of Engineers.
- M. M. DE MONCHY, President of the Board of Commerce.
- DR. J. TH. MOUTON, Vice-President of the Society to Promote Manufactures and Trade Industry in the Netherlands.
- C. T. VAN DER OUDERMEULEN, President of the Dutch Society of Agriculture.
- BARON W. G. BRANTSEN VAN DE ZYP, LL.D., Lord in Waiting to His Majesty the King of the Netherlands.
- DR. M. W. C. GORI, Doctor of Medicine, late Medical Officer of the Netherlands Army, Ophthalmic Surgeon.
- R. C. BURLAGE, Consul-general of the Netherlands.
- L. WESTERGAARD, Consul of the Netherlands.
- H. D. KRUSSMAN VAN ELTEN.
- C. MUYSKEN, Civil Engineer, Secretary.

NETHERLANDS.

SWEDEN.—STATISTICAL PREFACE.

SWEDEN and Norway (Sverige and Norge), two independent kingdoms, but under a common king, form the Scandinavian peninsula, whose shores are washed by the waters of the Gulf of Bothnia, the Baltic, the Sound, the Kattegat, the Skager-Rack, the North Sea, the Atlantic and Arctic Oceans, and is thus completely separated from the mainland, with the exception of its northeastern part. The length of its coast, which is indented with numerous bays and fiords, and protected from the brunt of the sea by innumerable islands and rocks, may be estimated at about 3200 English miles, each kingdom possessing about one-half. The Scandinavian peninsula, of which Sweden forms the eastern and southern part (58 per cent.), while Norway makes up the rest (42 per cent.), embraces an area of 13,830 geographical square miles (294,000 English square miles). The united kingdoms have a population of rather more than six millions, of which 70 per cent. belong to Sweden, and 30 per cent. to Norway. The statistics of Norway are given elsewhere in this catalogue.

Although Sweden extends northward to latitude $69^{\circ} 3' 21.1''$, thus passing beyond the Arctic circle, it reaches southward to latitude $55^{\circ} 20' 18''$, coming within the latitude of its neighboring state, Denmark, and even further south than that part of Prussia which projects northward along the eastern shore of the Baltic. The total length of Sweden, from north to south, is about 950 English miles, and the width from 200 to 250 English miles. The observatory of Sockholm lies $18^{\circ} 3' 29.85''$ east of Greenwich.

The läns (governments or departments) are the largest administrative divisions of the country, and frequently have two names, one of which is derived from the seat of government, the other usually from the old division of the provinces. The geographic division of the kingdom into three parts stands in intimate relation with the old provincial division. The three geographical divisions are as follows: Svealand (the central), Götaland (the southern), and Norrland (the northern); and though the boundaries of the läns and the provinces do not quite correspond, the following may on the whole be stated as correct:

Svealand has six provinces: Uppland, Södermanland, Westmanland, Nerike, Vermland, and Dalecarlia (or Dalarne).

Görland has nine provinces: Ostergötland, Westergötland, Dalsland, Småland, Gottland, Blekinge, Scania or Skåne, Halland, and Bohuslän.

Norrland comprises Gestricksland, Helsingland, Medelpad, Angermanland, Jemtland, Herjedalen, and Westerbotton, together with Lapland.

Lapland, the most northern part of Sweden, bordering on Norway, has an area of about 40,000 English square miles, and, together with Norrland, forms more than one-half the whole area. This vast territory is, of all the Swedish provinces, the least adapted to agriculture, and is but sparsely populated.

In 1874, the population of Sweden was divided among the different läns, as follows:

NAMES.	POPULATION.	NAMES.	POPULATION.
The town of Stockhom,	150,446	Län of Elfsborg,	285,217
Län of Stockholm,	134,620	“ Skaraborg,	250,257

MINTON'S TILES,

As exhibited in the British Section, Main Building, by

Messrs. MINTON, HOLLINS & CO.,

(The Founders of the Manufacture in 1840) and as laid by us in the CAPITOL
AT WASHINGTON.

A Large Stock of all kinds on hand, imported and
for sale by

MILLER & COATES, Agents,

279 PEARL STREET, NEW YORK.

BAILEY'S

CELEBRATED

PURE RYE WHISKEY.

HUEY & CHRIST,
SOLE PROPRIETORS,

121 North Third St., Philadelphia.

Dealers are cordially invited to call or write for price-list.

REPUBLICAN PRESS ASSOCIATION,

CONCORD, N. H.,

PUBLISH

“The Concord Daily Monitor”

AND THE

WEEKLY “INDEPENDENT STATESMAN.”

(Circulation, 10,000.)

The STATESMAN is a large eight-page paper, is the only Republican paper at the capital, is the organ of the party for the whole State, and goes into the very best families in every town within its limits. Its circulation is greater than that of any other political paper in this part of New England, and it is therefore exceedingly valuable as an advertising medium.

COUNSELORS IN
PATENT CAUSES.

UNITED STATES AND FOREIGN PATENTS SOLICITED.

No. 239 BROADWAY,

(P. O. Box 1648.)

NEW YORK.

THE
SAFE DEPOSIT CO. OF NEW YORK,

140, 142, and 146 Broadway.

FRANCIS H. JENKS, President.

THE FIRST ESTABLISHED IN THE WORLD.

For the safe-keeping of Valuables, Bonds, Stocks, Plate, Jewelry, Wills, etc. (at one dollar a year for \$1000 of Bonds), and the Renting of Safes (at from \$15 to \$200 a year) in its Fire and Burglar Proof Vaults.

ROOMS FOR LADIES, with every convenience, separate desks, etc., are provided.

STAR LOCK WORKS,

Established 1836,

110 South Eighth St., and Sansom between 8th & 9th,
PHILADELPHIA.

HILLEBRAND & WOLF,

Patented TRUNK LOCKS, PADLOCKS, DEAD LATCHES, DOOR SPRINGS, ETC.

OVER 500 DIFFERENT STYLES, EXCLUSIVELY OUR OWN INVENTIONS.

N. B.—In our show case, located P 69, No. 2108, Main Building, we only display some specialties of our own manufactured goods.

SOLID TRUNK LOCK.

PADLOCK.

The area is stated at 171,749 English square miles.

Sweden is generally less mountainous than Norway, and the highest mountains are found just on the border of that country. The boundary line itself is supposed to run along a mountain chain, which is called by geographers the Kölen, though in reality there is no mountain of that name. The highest mountain in Sweden, Sulitelma (6315 Swedish feet above the level of the sea), lies in Lapland, and is the only alpine elevation in Sweden where, as far as is known, glaciers are found, but there are other mountains in these districts, and still further south along the frontier of the kingdom, in Jemtland and Herjedalen, with an elevation of from 4000 to 5000 feet, whose peaks are dotted with patches of snow the whole year round.

About eight per cent. of the area of Sweden is considered to lie upwards of 2000 feet above the level of the sea. Those parts which sometimes extend beyond the tree-line are exclusively in Norrland and Dalarne, and border upon Norway. The coast-line along the Gulf of Bothnia, and the whole of the central and southern parts of Sweden, lie, with few exceptions, lower than 800 feet above the level of the sea. Of the whole area of the kingdom, a third part does not lie 300 feet above the level of the sea, and it is within these lower lying districts that the most highly cultivated parts of the country are found, as well as the largest plains, such as the Uppland, the Ostgöta, the Westgöta, and the Skane plains. With the exception of these, the plains are neither numerous nor large, for, though there are extensive tracts of land which attain a height of only a few hundred feet above the level of the sea, these are generally intersected by numerous hills and valleys.

Sweden, next to Finland, is the best irrigated country in Europe, as her lakes and rivers cover an area of 14,428 English square miles, or 8.4 per cent. of her whole territory, while she has a sea coast of 1500 English miles. The water of the Swedish lakes, as well as that of the rivers, is generally clear and drinkable. Lake Wetter is especially known for its clear, but at the same time turbulent, body of water, as well as for its great depth—420 feet. Of the numerous rivers (or elfs) which flow into the Gulf of Bothnia, the Angerman elf is the best known, not only for its volume, but for its natural beauty. The Dal elf, which is usually considered as the dividing line between Norrland and the southern part of Sweden, empties further to the south. On the west coast flows the Göta elf, the outlet of Lake Wener, famed for the Trollhätta waterfall.

Almost every river or stream forms a foaming current or roaring cataracts, and there are thousands of them. Even the Trollhätta finds a rival in the Njommelsaska (Hare's Leap), in Lapland. One of the peculiarities of these lakes is that they are sometimes interrupted by an almost perpendicular fall—the water then spreading out, forming a second part of the lake. The nation possesses in these numerous falls an almost inexhaustible water power, which has not, as yet, been utilized to that extent which it might be. This character of the Swedish rivers carries with it, however, the disadvantage of rendering them innavigable, many of the rivers (the Dal elf, for instance) being barred at their very mouths by a fall; and, as a rule, they are navigable only for a mile or two, except for rafts and small boats, unless, as in the case of the Göta elf, they are provided with canals.

The climate of Sweden is mild in comparison to its high latitude, a fact which is attributed to the influence of the Gulf Stream. There are dense forests; and barley and rye mature in the province of Norrland, while its most southern part lies in the same latitude as the ice fields of Greenland, and its northern in that of barren Iceland. The country, extending through so many degrees of latitude, has a great variety of climate. The mean yearly temperature of the northern parts along the coast is 34° F., while that of the southern is 44° to 46° F. The mean yearly temperature of Stockholm is 41° F. The wells which serve as a measure of the earth's temperature, give about the same figures, the average temperature of a deep well in central Sweden being 43° F., while it is not unusual in Lapland to find a deep well covered with ice in midsummer, or a bog, 5 to 6 feet deep, frozen at its bottom; nevertheless,

the cereals and potatoes mature in these districts, for although the summer is short, it is very warm and clear. There can scarcely be said to be any night here during the summer, only a twilight, so that vegetation, even in this high latitude, receives the light and heat necessary for its ripening. The temperature of the southern parts is also subject to very great changes.

The farmers' worst enemy in Sweden is the frost, which in a single clear night, perhaps, after a warm summer day, will destroy his brightest prospects; but it is hoped that the increase of tillage, the draining of the bogs, and like causes, will at least mitigate its severity, if not altogether prevent it. Such severe frosts are very rare in the central and southern parts of Sweden.

(The greater portion of the foregoing was furnished by the Swedish commission.)

Mining is one of the most important departments of Swedish industry, and the working of the iron mines in particular is making constant progress by the introduction of new machinery. There were raised, in the year 1873, 19,458,339 hundredweight of iron ore from mines, besides 126,147 hundredweight from lake and bog. The pig iron produced amounted to 7,987,646 hundredweight, the cast goods to 501,350 hundredweight, the bar iron to 4,125,915 hundredweight, and the steel to 1,290,907 hundredweight. There were also raised, in the same year, 1660 pounds of silver, 26,152 hundredweight of copper, and 645,631 hundredweight of zinc ore. There are large veins of coal in various parts of Sweden, but no systematic working of them has as yet taken place.

The principal articles of cultivation are, in addition to the various cereals, potatoes, hemp, flax, tobacco, and hops, which are generally grown in sufficient quantities for home consumption. The forests are of great extent, covering nearly one-fourth of the whole surface, and, in some spots, rising to an elevation of 3000 feet above the level of the sea. The birch, fir, pine, and beech are of great importance, not only for the timber, tar, and pitch which they yield, but also for their supplying charcoal and firewood. The common fruit trees, as cherries, apples, and pears, grow as far north as 60°, but the fruit seldom comes to great perfection except in the southern provinces; cranberries and other berries abound in all parts of the country.

In 1870, there were in Sweden, 428,446 horses, 1,965,800 horned cattle, 1,780,000 sheep and goats, and 354,303 swine.

In 1873, there were 2549 factories, with a production valued at 146,869,000 crowns.* Mines and mining establishments are not included in these figures. Ship building forms an extensive branch of industry.

According to the "Statesman's Year Book for 1876," the commercial navy of Sweden, at the end of 1873, numbered 1865 registered vessels for foreign trade, of a total burthen of 366,370 tons. The total imports, for the same year, were 271,440,000 riksdalers,† and the exports, 221,904,000.

Sweden is a constitutional monarchy, based on the fundamental law of 1809, by which it was decreed that the succession should be in the male line; that the sovereign should profess the Lutheran faith, and have sworn fidelity to the laws. The diet, which meets every year, and remains sitting for three or four months, is composed of two chambers, which are both elected by the people. The members of the first chamber serve for nine years, and those of the second for three. The diet exercises a strict control over the expenditure of the revenue, fixes the budget, and has power to take cognizance of the acts of the ministers and crown officers. The king's person is inviolable, and he can exercise a veto on the decrees of the diet. He is assisted by a Council of State, composed of ten members, who are responsible to the diet.

The budget estimates for 1875 place the receipts at 64,775,900, and the expenditures at 71,885,798 riksdalers. At the end of October, 1875, the public liabilities of the kingdom were 130,477,920 riksdalers.

* The Swedish crown equals 26.8 cents.

† One riksdaler equals one crown.

The total strength of the armed forces of Sweden, at the end of September, 1875, was 132,775. The navy consists of 131 vessels, of 3183 horse-power, carrying 394 guns, and with crews aggregating 4693.

At the end of September, 1875, the total length of railways opened for traffic was 2237 English miles, of which 938 miles belonged to the State. All the telegraphs, with the exception of those of private railway companies, belong to the State. The total length of telegraph lines, at the end of 1874, was 4981 English miles; the total length of wires, 10,980 English miles. The total number of dispatches sent, in the year 1874, was 986,397.

The Swedish post office carried 16,711,100 letters in the year 1873. The number of post offices, at the end of the year, was 641.

Education is well advanced in Sweden. Public instruction is gratuitous and compulsory, and children not attending schools under the supervision of the government must furnish proofs of having been privately educated. In the year 1871 nearly 97 per cent. of all the children between eight and fifteen years visited the public schools.

Commission from SWEDEN to the International Exhibition :

- P. A. BERGSTROM, late Minister of Interior, President Board of Domains, President.
 C. O. TROILIUS, Director-General of Public Railways, Vice-President.
 F. L. VON DARDEL, Director-General Board of Public Buildings
 CH. DICKSON, M.D.
 BARON A. H. E. FOCK, Chief of Board of Controls.
 F. W. SCHOLANDER, Professor, Academy of Fine Arts.
 C. F. LUNDSTROM, Manufacturer.
 N. H. ELFVING, Consul-General.
 S. STENBERG, Professor, Carolinian Medico-Chirurgical Institution.
 J. BOLINDER, Manufacturer.
 J. LENNING, Manufacturer.
 C. L. LUNDSTROM, Manufacturer.
 CH. G. BREITHOLTZ, Colonel of Artillery.
 K. PEYRON, Captain in the Navy, Chamberlain.
 E. WIDMARK, Chief of the Board of Public Education.
 H. WIDEGREN, Superintendent of Fisheries.
 P. E. SIDENBLADH, Secretary of the Central Board of Statistics.
 V. NORMAF, Captain of Engineers, Secretary.

Resident Commissioners in Philadelphia.

- C. JUHLIN DANNFELT, Commissioner-General.
 CHARLES BILDT, Chamberlain, Assistant Commissioner.
 L. WESTERGAARD, Consul, Assistant Commissioner.
 DR. J. LINDAHL, Ph., Secretary.
 M. ISÆUS, Architect.
 W. HOFFSTEDT, Engineer.
 COUNT FR. POSSE, Engineer.
 E. BRUSEWITZ, Engineer, Metallurgical Department.

Special Commissioners.

- W. J. ANDERSSON, Professor, Superintendent of Primary Schools, Educational Department.
 C. J. MEIJERBERG, Assistant of Educational Department.
 G. W. BERGMAN, Army Department.
 BARON O. HERMELIN, Fine Art Department.

NORWAY.—STATISTICAL PREFACE.

NORWAY, the western portion of the Scandinavian peninsula, is situated between $57^{\circ} 58'$ and $71^{\circ} 10'$ north latitude, and between 5° and 28° east longitude. It is bounded to the east by Sweden and Russia, and on every other side is surrounded by water, having the Skagerrak to the south, the German Ocean to the west, and the Arctic Sea to the north. Its length is about 1100 miles, and its greatest width about 250 miles; but between the latitudes of 67° and 68° it measures little more than 25 miles in breadth. The area is given as 121,779 square miles, and the population as 1,800,000. Only 1.6 per cent. of the whole area can be cultivated; natural pastures occupy about 1.5 per cent; forests, about 20.2 per cent.; mountains, glaciers, lakes, rivers, and land, etc., about 76.7 per cent. The whole of the Scandinavian peninsula consists of a connected mountain mass, which, in the southern and western parts of Norway, constitutes one continuous tract of rocky highlands, with steep declivities dipping into the sea, and only here and there broken by narrow tracts of arable land. South of Trondjem (63° north latitude) the rocky ridge expands nearly the entire breadth of Norway. The northern portions of the range, known as the Kiöllen

Fielle, occupy a space of about 25 miles in width, and form, as far north as 69° , the boundary line between Sweden and Norway. South of 63° north latitude the range of the Scandinavian mountains is known as the Norske, or Dovre Fielle, although the latter name belongs properly only to the part immediately in contact with the Kiöllen. This range, about 360 miles in length, attains its greatest elevation at the Sogne Fjord, where it is known as the Hurungerne. Here the highest summits are 8000 and 8400 feet above the sea, while the contiguous snowfields of Justedal, the largest in Europe, and covering an area of 600 square miles, have probably an elevation of nearly 7000 feet. From these and other vast snowfields, averaging more than 10 miles in width, vast glaciers descend to within 2000 feet above the sea, where they often terminate in deep lakes, some of which are very extensive. The upper valleys of this range, although generally too high for cultivation, contain the best timber that is exported from Norway, and afford good pasturage in the height of the summer, when the flocks and herds are driven thither from the lowlands near the entrance of the fjords. The general elevation of the Norska Fielle does not rise above the line of perpetual snow, whose average height in these latitudes is 5000 feet, but it ranges above that of the growth of trees, which may be stated to lie 1000 feet lower. The most northern part of the Norska Fielle, which is known as the Dovrefield, and includes Sneehätten, nearly 7500 feet above the sea, presents a broken surface, rent with ravines and narrow valleys, which admit of cultivation, but are difficult of access from the configuration of the land around them.

The Scandinavian range consists principally of primitive and transition rock, and exhibits almost everywhere the effect of glacial action, the glaciers and moraines presenting the same appearances as in the Swiss alpine district. The numerous islands which skirt the coast of Norway, and must be regarded as portions of the range, present the same characters as the continental mass. Some of these, as the islands of Alsten and Dunnoe, rise perpendicularly from the sea with peaks penetrating beyond the snowline, which lies here at an elevation of 4000 feet. Norway abounds in lakes and streams; according to some topographers, there are upwards of 30,000 of the former, of which the majority are small, while none have an area exceeding 400 square miles. The chief rivers of Norway are the Glommen, Lougen, Louven, Drammen, Otter, and Wormen. The first of these has a course of 400 miles, but the majority of the Norwegian streams, all of which rise at great elevations, have a comparatively short course, and are unfit for navigation, although they are extensively used to float down timber to the fjords, whence the wood is exported in native ships to foreign ports. These fjords, or inlets of the sea, which form so characteristic a feature of Norwegian scenery, and give with their various sinuosities a coast-line of upwards of 8000 miles, form the outlet to numerous rapid streams and waterfalls, which leap or trickle down the edges of the treeless fields or mountain flats above.

The peculiar physical character of Norway necessarily gives rise to great varieties of climate in different parts of the country. The influence of the sea and of the Gulf Stream, and the penetration into the interior of deep inlets, greatly modify the severity of the climate on the western shores, and render it far superior to that of the other Scandinavian countries in the same latitude. In Norway proper, the winters, as a rule, are long and cold, and the summers, which rapidly follow the melting of the snows in April and May, are warm and pleasant. On the islands, however, the heats of summer are often insufficient to ripen corn.

Norway had, in 1875, 150,000 horses, 950,000 oxen and cows, 1,710,000 sheep and goats, 110,000 pigs, and 102,000 reindeer. The value of the annual product is about \$25,000,000.

The principal cereals cultivated in Norway are oats, barley, corn, rye, and wheat; the yearly produce is about 11,160,000 bushels, besides 14,100,000 bushels of potatoes. The value of the harvest amounts to about \$16,000,000 per annum.

The products of agriculture and cattle-breeding being insufficient to supply the wants of the country, considerable quantities are imported.

Forestry is of great importance. As stated above, the forests of Norway cover more than one-fifth of its entire area. They supply considerable quantities of timber, both for home consumption and exportation. The average annual exports of timber amount to about \$16,000,000.

The fisheries of Norway employ about 27,000 men, and yield about \$16,000,000 per annum. They are of great importance, and not only yield one of the most important articles of home consumption, but at the same time constitute one of the most profitable sources of foreign export. Fish are caught in almost every stream and lake of the interior, as well as in the fjords of the coast, and in the bays and channels which encircle the numerous islands skirting the long sea-line of Norway. These fish are principally cod and herring. Cod, prepared as stock-fish or dried salt fish, is exported to Spain and Italy; herring to the Baltic ports.

The merchant marine of Norway had, in 1875, a tonnage of 1,220,000, and was manned by 53,000 seamen.

The following statistics apply to the exports and imports of Norway in 1873:

Value of goods exported,	\$33,000,000	
Gross freight of goods carried in Norwegian vessels,	28,400,000	
Receipts from various sources,	800,000	
	<hr/>	\$62,200,000
Value of goods imported,	\$45,800,000	
Expenses of Norwegian vessels in foreign countries,	11,400,000	
Other expenses,	2,400,000	
	<hr/>	59,600,000
Balance,		\$2,600,000

The principal articles of export were, in 1873: Products of the fisheries, \$11,600,000; of forestry, \$15,500,000; of agriculture and cattle-breeding, \$1,300,000; metals and minerals, \$1,800,000; textile fabrics, \$660,000.

The imports were principally: Articles of food, \$13,500,000; coffee, \$3,500,000; liquors, \$1,000,000; textile fabrics and dry goods, \$8,300,000; hardware, \$3,300,000; hides, \$1,200,000; coal, \$1,700,000; vessels, \$4,400,000.

Manufactures have made some progress during the last few years, but are, as yet, inconsiderable. About 32,000 persons are employed, mainly in sawmills, planing mills, brick factories, shipbuilding, and metallurgical and textile industries.

The mineral products comprise silver, copper, cobalt, iron, chrome, ironstone, etc., and yield an annual income of nearly \$1,000,000.

Education is compulsory, parents being bound to let their children, between the ages of seven and fourteen, receive public instruction; 241,000 children attend the common schools, and 16,500 receive a higher instruction. The expenses of the higher schools were, in 1873, \$827,000.

The public revenue, in 1873, was \$6,870,000, and the expenditures \$7,277,000, of which amount \$865,000 was for the construction of railways. The public debt amounts to \$9,200,000.

Norway has 12,432 miles of highways and district roads, 304 miles of railways, and 147 miles of canals. There are 719 post offices, which distribute 7,500,000 letters per annum.

(The foregoing statistics are furnished by the Norwegian Commission.)

According to "Martin's Year Book," there were, at the end of 1873, telegraph lines of the length of 3745 miles, and wires of the length of 5845 miles.

The government of Norway is a constitutional monarchy. The executive is represented by the king, who exercises his authority through a Council of State, composed of one minister of state and nine councillors. The legislative power of the realm is the Storting, or Great Court, the representative of the sovereign people.

On the 1st of January, 1874, the troops of the land numbered 13,000 men. The reserve forces at the same time numbered 19,000, and the landwaern 11,000 men. The naval force comprised, at the same date, twenty vessels, all steamers, with an armament of 149 guns.

ITALY.—STATISTICAL PREFACE.

THE geographical territory comprised under the name of Italy consists of a considerable stretch of peninsular mainland, besides several islands, situated in Southern Europe, between latitude $36^{\circ} 35'$ and 47° north, and between longitude $6^{\circ} 35'$ and $18^{\circ} 35'$ east. From the southern extremity of Sicily to the Alps its maximum length is about 600 miles, its utmost breadth being 300 miles. Its boundaries on the north are Austria and Switzerland, on the south the Mediterranean, on the west France and the Mediterranean, and on the east the Ionian and Adriatic seas, while its natural limits are strongly defined by the Alps and the sea.

The first general census of the kingdom of Italy was taken by the government on the 31st of December, 1871, on which date the population numbered 26,796,073 souls, living on an area of 296,013 square miles, or 112,677 English square miles. The density of population was 237 per English square mile.

The kingdom of Italy is administratively divided in 69 provinces, as follows :

	POPULATION.	
PIEDMONT AND LIGURIA.		
1. Alessandria,	683,361	
2. Cuneo,	617,232	
3. Genoa,	716,284	
4. Novara,	624,969	
5. Porto Maurizio,	127,042	
6. Turin,	972,988	
	3,741,876	
ISLAND OF SARDINIA.		
7. Cagliari,	392,981	
8. Sassari,	243,274	
	636,255	
LOMBARDY.		
9. Bergamo,	368,152	
10. Brescia,	456,023	
11. Como,	477,642	
12. Cremona,	300,595	
13. Milan,	1,009,794	
14. Pavia,	448,357	
15. Sondrio,	111,240	
	3,171,803	
EMILIA.		
16. Bologna,	439,232	
17. Ferrara,	216,545	
18. Forli,	234,090	
19. Massac Carrare,	161,944	
20. Modena,	273,231	
21. Parma,	264,509	
22. Piacenza,	225,775	
23. Ravenna,	220,801	
24. Reggio,	240,635	
	2,276,762	

	POPULATION.	
THE MARCHES.

NEAPOLITAN PROVINCES.		
37. Aquila,	332,782	
38. Avellino,	375,237	
39. Bari,	604,540	
40. Benevento,	232,012	
41. Campobasso,	364,843	
42. Caserta,	695,754	
43. Catanzaro,	412,226	
44. Chisti,	340,299	
45. Cosenza,	440,272	
46. Foggia,	322,754	
47. Lecce,	493,574	
48. Naples,	908,029	
49. Potenza,	509,202	
50. Reggio,	353,606	
51. Salerno,	541,739	
52. Teramo,	245,684	
	<hr/>	7,171,553
SICILY.		
53. Caltanissetta,	230,066	
54. Catania,	495,240	
55. Girgenti,	289,018	
56. Messina,	420,649	
57. Palermo,	617,660	
58. Siracusa,	294,915	
59. Trapani,	236,388	
	<hr/>	2,583,936
VENETIA.		
60. Belluno,	175,370	
61. Mantua,	288,942	
62. Padua,	364,355	
63. Rovigo,	200,835	
64. Treviso,	352,538	
65. Udine,	481,787	
66. Venezia,	337,539	
67. Verona,	367,426	
68. Vicenza,	363,161	
	<hr/>	2,931,953
69. ROME,		836,291

According to the old political division, the population is divided as follows :

Piedmont and Liguria,	3,741,876
Island of Sardinia,	636,255
Lombardy,	3,171,803
Emilia,	2,276,762
The Marches,	915,443
Umbria,	549,833
Tuscany,	1,980,368
Neapolitan Provinces,	7,171,553
Sicily,	2,583,936
Venice,	2,931,953
Rome (States of the Church),	836,291
	<hr/>
	26,796,073

The physical aspect presented by the surface of Italy is diversified in the extreme. Northern Italy is, for the most part, composed of one great plain—the basin of the Po, comprising all Lombardy and a considerable portion of Piedmont and Venice, bounded on the northwest and partly on the south by different alpine ranges. Throughout Central Italy, the great Apennine chain gives a picturesque irregularity to the physical configuration of the country, which in the southern extremity of Italy assumes still wilder forms. In the highland districts of Naples in which the Apennine ridge reaches its maximum elevation (10,000 feet), the scenery exhibits a savage grandeur. Along the extensive coast plains, as well as in the sub-Apennine valleys, the rural charms of this portion of Italy are extreme, while the brilliant flora and vegetation impart to it a novel character of beauty. The chief mountain system of Italy is the frontier ridge of the Alps, and their noble continuation, the Apennines.

Italy likewise comprises a considerable stretch of volcanic zone, which traverses the peninsula from the centre to the south in a line parallel with that of the Apennines, and of which the most remarkable active summits are Vesuvius, adjoining Naples, *Ætna* in Sicily, and *Stromboli* in the Lipari Isles.

The great plains of Italy are those of Lombardy, which stretch from the Mincio to the Ticino and the Po; of Piedmont; the Venetian plains; the plain of the Roman legations; the plain of the Campo Felice, on which stands Vesuvius; the Apulian plain; the long, narrow Neapolitan plain of the Basilicata, 100 miles in length, and 24 miles in breadth, stretching along the Gulf of Tarento.

The great majority of the rivers of Italy are only navigable for small coasting boats or barges. By far the most important is the Po, which rises on the borders of France, and flows into the Adriatic. It has numerous tributaries. Among the others may be mentioned the Adige, Brenta, Piave, Tagliamento, Aterno, Sangro, Metauro, Ofanto, Bradano, also belonging to the Adriatic basin; the Arno, the Tiber, the Ombrone, the Garigliano, and the Volturno, which belong to the Mediterranean basin.

The canal system of Italy is most extensive in the north. Nine principal canals in Lombardy administer to the irrigation of the plains and to the purposes of commercial communication, contributing in no small degree to the prosperity of the district. The Naviglio Grande or Ticinello is the finest hydraulic construction in Italy; it communicates between the Ticino and Milan, and has a course of 28 miles, navigable for vessels of large size. It was begun in 1179. The Naviglio Martesana, 38 miles long, unites Concesa on the Adea with Milan; the Naviglio di Pavia is 18 miles in length; the bifurcated Naviglio d'Ostiglia unites the Po with the Adige. 253 canals intersect Piedmont, extending over a length of 1932 kilometres. Venice comprises 203 navigable, and 40 minor canals. Numerous canals have been constructed for the drainage of the Pontine Marshes. This system of water communication was early carried to a high degree of efficiency in Italy, and is of incalculable service in the agricultural districts.

The mountain lakes of Italy are famed for their picturesque beauty. They are mostly in the northern provinces of Lombardy and Venetia. The principal are Maggiore, Lugano, Como, Iseo, and Garda. The Roman lakes of Perugia, Bolseno, and Bracciano, that of Castiglione in Tuscany, and Celano in Naples, also deserve mention.

The mineral and thermal springs of Italy are innumerable, and possess a great variety of curative and sanitary properties.

In the northern provinces, the climate is temperate, salubrious, and frequently severe in winter; in the centre, it assumes a more genial and sunny character: while the heat of the southern extremity is almost of a tropical intensity. The singular clearness of the atmosphere sets off the landscape and monumental beauties of Italy with brilliant effect. The drawbacks of Italy's climate are the piercing tramontana or mountain winds; the deadly sirocco, which blights all nature at seasons along the western coast; and the malaria or noxious miasmata which issues from the Maremma of Tuscany, the Pontine Marshes, and the Venetian lagoons, generating pestilential fevers and aguish diseases in the summer season. The mean temperature of the leading divisions of the country throughout a whole year was as follows: Milan, 55° 4' of Fahrenheit's scale; Rome, 59°; Palermo, 62° 5'; and in Sardinia, 60° 5'. The highest temperature at Rome rises to 95°, and in Sicily from 97° to 104°.

The staple products of Italy are corn, wine, oil, raw silk, rice, olives, and fruits. Hemp, flax, and cotton are also largely grown. The sugar-cane is successfully cultivated in the two Sicilies. Agriculture, except in the north, is in a very backward condition. It is calculated that only two-thirds of the area of the kingdom capable of production are cultivated, and that the rest lies waste. The superficial extent of the productive soil of Italy is 23,017,096 *ellaras*,* divided thus:

	ELLARAS.
Arable land,	11,003,061
Meadow land,	1,173,436
Rice ground,	144,903
Olive plantations,	554,767
Chestnut plantations,	585,132
Woods and forests,	4,158,349
Pastures,	5,397,448
Total,	23,017,096

There are, besides, 3,997,059 *ellaras* of rock and marsh. Of the land capable of cultivation, more than half is devoted to the growth of cereals, mainly wheat. The average crop is insufficient for the supply of the country. The wines of Naples are esteemed the best, small quantities of the famous *Lachrima Christi* and the *Vind d'Asti* being exported, while the Sicilian wines of Marsala form a considerable item of export. The best oil and olives are furnished by Tuscany, Lucca, and Naples. Silk is chiefly manufactured in the northern provinces, the cultivation of the mulberry and the rearing of the silkworm forming, in Lombardy, a most important interest. The best manufactured silk comes from Piedmont, Tuscany, and the Roman provinces. The fruits of the two Sicilies are exquisite in flavor, and embrace several tropical species. Oranges, lemons, almonds, figs, dates, melons, and the pistachio nut, are common to all orchards, and are largely exported. A considerable cheese trade exists in the northern provinces.

The sea and fresh water fisheries of Italy are considerable, the Mediterranean furnishing immense quantities of tunny, anchovies, sardines, mullets, pelchards, and mackerel. The export of anchovies and of sardines is of immense extent. The

* One *ellara* equals 2.47 acres.

river fisheries yield salmon, trout, sturgeon, lampreys, tench, barbel, etc. The crustaceans and shell fish of the Italian seas are of great variety and delicate flavor, and are a favorite article of Italian consumption.

The total exports of the kingdom, during the year 1874, were 1,304,994,328 lire;* the imports, during the same year, 985,458,532 lire.

The number and tonnage of merchant vessels belonging to the kingdom, on January 1st, 1874, were as follows: 17,562 sailing vessels, aggregating 925,337 tons burthen; and 103 steamers, of a total burthen of 24,476 tons. Of the sailing vessels, 9074 were under 6 tons each.

According to the present constitution of Italy, the executive power belongs exclusively to the sovereign, and is exercised by him through responsible ministers. The legislative authority vests conjointly in the king and parliament, the latter consisting of two chambers, a Senate and a Chamber of Deputies. The Senate is composed of the princes of the royal house who are of age, and of an unlimited number of members, above forty years old, who are nominated by the king for life; a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation: or, finally, should pay taxes to the annual amount of 3000 lire. The members of the Chamber of Deputies are elected by a majority of all citizens who are twenty-five years of age and pay taxes to the amount of 40 lire. A deputy must be thirty years old, and must have the requisites demanded by the electoral law, among them a slight property qualification. Neither senators nor deputies receive any salary.

The following are the budget estimates for 1875:

Estimated revenue,	1,344,164,158 lire.
Estimated expenditures,	1,575,487,190 "

The entire public debt, at the end of 1873, was 9,757,613,267 lire.

The actual strength of the army, at the end of December, 1873, was:

Number of men under arms (peace footing),	199,557
Number of men on unlimited furlough,	244,952
Total (war footing),	444,509

The navy, at the commencement of 1875, consisted of 95 ships of war, carrying 1256 guns. Of these, 9 were ironclads, carrying 346 guns, 46 were screw steamers, carrying 693 guns, and 32 paddle steamers, carrying 113 guns.

The total length of railways opened for traffic, at the end of 1874, was 4607 English miles.

The number of post offices at the commencement of 1874 was 2709. In the year 1873 the post office carried 504,402,431 letters and 94,402,596 printed parcels.

The length of telegraphic lines, on the 1st of January, 1874, was 12,622 English miles, nearly two-thirds of the whole belonging to the government. There were, at the same date, 1408 telegraphic offices. The number of private telegrams during 1873 was 4,670,090, and of official telegrams, 163,852.

Under the new Italian government, a great part of the property confiscated from the monastic establishments has been devoted to the cause of public education. In addition to this, the Parliament votes an annual credit of 15,000,000 lire for the same purpose. Since the commencement of the year 1860 there were opened throughout the kingdom thirty-three model schools. Notwithstanding these important aids to instruction, education still stands very low. According to the census of 1864, out of a total population of 21,703,710 souls, there were about 17,000,000 who could neither read nor write. Piedmont occupied the first place, Sicily the last, on the register of knowledge. In the Basilicata, Calabria, and Sicily, more than nine-tenths of the population could neither read nor write.

* One lire equals 19.3 cents gold.

There are twenty-two universities in Italy, many of them of ancient foundation. By a decree of the Minister of Public Instruction, issued in 1871, six high-schools—Naples, Pavia, Turin, Bologna, Florence, and Parma—were declared first-class universities of the kingdom. The number of students at all the universities was returned as 10,524 in 1871.

Commission from ITALY to the International Exhibition :

H. E. BARON BLANC, Minister Plenipotentiary.
 COUNT B. LITTA, First Secretary of Legation.
 CHEVALIER ALONZO M. VITI, Vice-Consul.

BRAZIL.—STATISTICAL PREFACE.

BRAZIL is the most extensive state of South America. Towards the interior, it borders on all the other states of that continent except Chili and Buenos Ayres—on Uruguay, the Argentine Confederation, Paraguay, Bolivia, Peru, Ecuador, New Granada, Venezuela, and English, Dutch, and French Guiana; while its seaboard, beginning about 200 miles to the north of the Amazon, and reaching to within the same distance of the Plata, projects into the Atlantic fully 1000 miles to the east of the direct line between its two extremes. This immense country extends between latitude $4^{\circ} 30'$ north and 33° south, and between longitude 35° and 70° west, being, in round numbers, 2600 miles long and 2500 broad. The area, according to official accounts, is 3,100,000 square miles, with a population, in 1872, of 10,196,328 including 1,683,684 slaves, and consisting of aboriginals, Africans, and Europeans, the first being proportionately fewer than in most parts of America.

Brazil differs in many respects from most of the other divisions of the new continent. It knows nothing of the volcanoes and earthquakes of the Pacific coast; with winds blowing constantly from the Atlantic Ocean, it is exempted from those droughts which are always blighting one or other of the slopes of the Andes, the remoter slope in Peru and Chili, and the nearer in Buenos Ayres and Patagonia; its mines, again, are as famous for gold and diamonds as those of the western Cordilleras for silver. In its hydrography, Brazil contrasts unfavorably with the other divisions. While the Amazon and the Plata, the Mississippi and the St. Lawrence—not to mention countless rivers of inferior magnitude on both shores—are for the most part practicable almost to their sources, the streams of Brazil, with the exception of the Amazon, are mostly impeded throughout by cataracts and shallows, thus counterbalancing, as it were, its matchless seaward facilities by the deficiencies of its inland communications. Further, the most navigable of these streams, instead of entering the open sea, mingle their waters with those of the Plata or of the Amazon—the Parana and the Uruguay joining the former, and the Madeira, the Tapojos, the Zingu, and the Tocantins, the latter; and even among those that do send their tribute at once to the ocean, a similar direction is sometimes impressed by the dividing ridges—the San Francisco, for instance, by far the largest of them, running to the northward parallel with the southeast coast through 11° of latitude, and leaving only 4° of longitude for its remaining course to the Atlantic. These hydrographic peculiarities must be the more strongly felt, inasmuch as a humid surface and a luxuriant vegetation conspire to render ordinary roads all but impossible.

Among the mineral treasures, besides gold and diamonds, already mentioned, iron of superior quality is abundant; and salt, also, is extensively produced in saline marshes by the alternate processes, according to the season, of inundation and evaporation. The productions of the soil are, of course, equally various and rich. The cotton is naturally excellent, and the tea-plant of China has been introduced, though hitherto with indifferent success. The exports necessarily vary in different sections of the country. From the north, they are coffee, cotton, cocoa, sugar, and tobacco; from the south, hides, tallow, horns, etc.; and from the middle, drugs, diamonds, gold dust, dyes, rice, manioc, tapioca, spirits, and rosewood.

The total value of the imports into Brazil, including bullion and specie, averaged about \$91,000,000 in the five years, 1869-1873, and that of the exports during the same period, likewise including bullion and specie, about \$110,000,000.

The executive authority is vested in the Emperor, who, besides being aided by a council of state, must act through responsible ministers. The legislature consists of two chambers, which sit four months every year. Both the deputies and the senators, who must have annual incomes respectively of 800 milrees and 1600, are indirectly elected by voters who must possess 200 milrees per annum—the former for four years, and the latter for life. The senate, however, appears to represent the crown as well as the people, inasmuch as each constituency merely nominates three individuals for his majesty's choice of one. Justices of the peace, also, are appointed by the respective communities; and in the courts generally, whether civil or criminal, there prevails trial by jury.

The budget for the year ending June 30th, 1876, calculates the receipts at 107,133,070 milrees, and the expenditures at 102,634,053 milrees.* The public debt, on the 1st of April, 1875, was, including paper money, 664,739,395 milrees.

In a vote passed by the House of Congress, June, 1869, the strength of the standing army was fixed at 30,000 on the peace footing, and at 60,000 on the war footing. There were actually under arms, according to official reports, at the end of April, 1874, 28,933 troops, of which number 2397 were in garrison in Paraguay.

The imperial navy consisted, in 1875, of 61 men-of-war, carrying 230 guns, and crews aggregating 4136.

The empire possessed, at the end of 1873, railways of a total length of 714 English miles, open for traffic. There were railways of an aggregate length of 397 miles in course of construction at the end of June, 1874. There were, at the beginning of the year 1874, telegraph lines to the extent of 3375 miles. The number of offices was 74 at the same date. The post office carried 12,251,000 letters in the year 1873, of which number 6,548,000 came from or to Rio de Janeiro, the capital.

Commission from BRAZIL to the International Exhibition:

HIS HIGHNESS, GASTON D'ORLEANS, Conde d' Eu, Marshal of the Army, President.
VISCOUNT DE JAGUARY, 1st Vice-President.

VISCOUNT DE BONN-RETIRO, 2d Vice-President.

HIS EXCELLENCY, A. P. DE CARVALHO BORGES, Envoy Extraordinary and Minister
Plenipotentiary of His Majesty the Emperor of Brazil.

VISCOUNT DE SOUZA FRANCO.

JOAQUIN ANTONIO DE AZEVEDO.

ARGENTINE REPUBLIC.—STATISTICAL PREFACE.

THE Argentine Republic—the confederation of the Rio de la Plata, or River of Silver, South America—is a federal union of fourteen provinces and three large territories, covering an almost unbroken plain of 1,200,000 square miles, with a population of about 2,000,000 inhabitants. It extends from 22° south latitude to the straits of Magellan, and from 59° west longitude to the Andes.

Each province has its own legislature, courts of justice, and political government; but civil, penal, and commercial laws are common to all the provinces, codes of such laws having been issued by the congress of the confederation.

The President of the republic is elected for a term of six years by the representatives of the provinces, and is not eligible for re-election. The Vice-president, elected in the same manner, fills the office of chairman of the Senate, but has otherwise no political power. The President is commander-in-chief of the troops, and appoints to all civil, military, and judicial offices; but he and his ministers are responsible for

their acts, and liable to impeachment before the Senate by accusation of the House of Representatives. Legislative power is vested in a Senate, of members elected by the provincial legislatures, two from each province, and a House of Representatives, elected by the people, and apportioned to each province according to population. The senators hold their office for nine years, and the representatives for three.

The chief exports of the country are wool, hides, salt beef, and tallow; but its resources embrace all the products of the tropical and temperate zones, as may be seen by the catalogue of its exhibits.

The farming stock of the republic is estimated at 15,000,000 horned cattle, 4,000,000 horses, and 80,000,000 sheep, whose aggregate value cannot fall short of \$200,000,000, gold, yielding about \$50,000,000 of export produce per annum.

The total trade may be estimated at \$100,000,000 per annum. In 1874 the imports amounted to \$55,961,117, against over \$71,000,000 in the previous year. The exports amounted to \$43,104,712, against \$45,869,314 in 1873. The decrease in imports and exports was caused by a severe commercial crisis, from which the country is just recovering.

The annual revenue amounted to \$20,217,231 in 1873, but the crisis reduced it in 1874 to \$16,090,661, or over \$2,000,000 less than in 1872, and nearly \$4,500,000 less than in 1873. The general expenditures in 1874 reached the sum of \$28,596,006. The total debt in January, 1875, was \$68,416,043.

The regular army numbers 10,807 men, divided as follows: cavalry 4800, infantry 4400, artillery 400, and 1173 special troops. The navy is composed of 26 vessels, among them 2 ironclads and 6 gunboats, with crews amounting in all to 900.

The capital of the republic is provisionally situated at the city of Buenos Ayres, capital of the province of the same name.

(The statistics given above have been furnished by the commission of the Argentine Republic.)

A network of railways, constructed mainly at the expense of the State, has been in progress for several years. At the end of the year 1873 there were 664 miles open for traffic, and 642 miles of State railways in course of construction. There were besides, at the end of 1873, railways of a total length of 1997 miles, sanctioned by the government, including an international line from Buenos Ayres to Chili, of 894 miles.

At the end of September, 1873, there were 4170 miles of telegraph lines in operation. The total length of telegraph wires at the same date was 8267 miles. The number of telegraphic dispatches during the same year was 170,079.

The post office, in the year 1873, carried 1,493,700 parcels and packets, and 4,574,188 letters. The number of letters carried doubled in the five years from 1869 to 1873.

- 120 Tula, Nabor, Province of Catamarca.—Copper. 112
- 121 Galindez, Clásico, Province of Catamarca.—Copper and silver. 112

The first part of the history of the United States is the period of discovery and settlement. The second part is the period of the American Revolution and the formation of the Constitution. The third part is the period of the expansion of the United States to the Pacific Ocean. The fourth part is the period of the Civil War and Reconstruction. The fifth part is the period of the Gilded Age and the Progressive Era. The sixth part is the period of the World Wars and the Cold War. The seventh part is the period of the modern era, from the end of the Cold War to the present.

The history of the United States is a story of a young nation that grew from a small group of settlers on a remote island to a global superpower. It is a story of the struggle for freedom and self-determination, and of the challenges of building a new society in a new world. The history of the United States is a story of the triumph of the American dream, and of the power of the American people.

CLASSIFICATION.

DEPARTMENT II.—MANUFACTURES.

CHEMICALS.

CLASS 200.—Chemicals, pharmaceutical preparations.

Mineral acids, and the methods of manufacture. Sulphuric, nitric, and hydrochloric acids.

The common commercial alkalies, potash, soda, and ammonia, with their carbonates.

Salt and its production. Salt from deposits—native salt. Salt by solar evaporation from sea water. Salt by evaporation from water of saline springs or wells. Rock salt. Ground and table salt.

Bleaching powders and chloride of lime.

Yeast powders, baking powders.

CLASS 201.—Oils, soaps, candles, illuminating and other gases.

Oils from mineral, animal, and vegetable sources. Refined petroleum, benzine, naphtha, and other products of the manufacture. Oils from various seeds, refined, and of various degrees of purity. Olive oil, cottonseed oil, palm oil. Animal oils, of various kinds, in their refined state. Oils prepared for special purposes besides lighting and for food. Lubricating oils.

Soaps and detergent preparations.

Candles, stearine, glycerine, paraffine, etc., spermaceti.

Illuminating gas and its manufacture.

Oxygen gas, and its application for heating, lighting, metallurgy, and as a remedial agent.

Chlorine and carbonic acid.

CLASS 202.—Paints, pigments, dyes, colors, turpentine, varnishes, printing inks, writing inks, blacking.

CLASS 203.—Flavoring extracts, essences, perfumery, pomades, cosmetics.

CLASS 204.—Explosive and fulminating compounds; in small quantities only, and under special regulations, shown in the building only by empty cases and cartridges. Black powder of various grades and sizes. Nitro-glycerine and the methods of using and exploding. Giant powder, dynamite, dualin, tri-nitroglycerine.

CLASS 205.—Pyrotechnics, for display, signaling, missiles.

CERAMICS—POTTERY, PORCELAIN, ETC.

CLASS 206.—Bricks, drain-tiles, terra cotta, and architectural pottery.

CLASS 207.—Fire clay goods, crucibles, pots, furnaces. Chemical stoneware.

CLASS 208.—Tiles, plain, enameled, encaustic; geometric tiles and mosaics. Tiles for pavements and for roofing, etc.

CLASS 209.—Porcelain for purposes of construction. Hardware trimmings, etc.

- CLASS 210.—Stone china, for chemists, druggists, etc., earthenware, stoneware, faience, etc.
- CLASS 211.—Majolica and Palissy ware.
- CLASS 212.—Biscuit-ware, parian, etc.
- CLASS 213.—Porcelain for table and toilet use, and for decoration.

GLASS AND GLASSWARE.

- CLASS 214.—Glass used in construction and for mirrors. Window glass of various grades of quality and of size. Plate glass, rough, and ground or polished. Toughened glass.
- CLASS 215.—Chemical and pharmaceutical glassware, vials, bottles.
- CLASS 216.—Decorative glassware.

FURNITURE AND OBJECTS OF GENERAL USE IN CONSTRUCTION AND IN DWELLINGS.

- CLASS 217.—Heavy furniture.—Chairs, tables, parlor and chamber suits, office and library furniture, vestibule furniture. Church furniture and decoration.
- CLASS 218.—Table furniture.—Glass, china, silver, silver-plate, tea and coffee sets, urns, samovars, epergnes.
- CLASS 219.—Mirrors, stained and enameled glass, cut and engraved window-glass, and other decorative objects.
- CLASS 220.—Gilt cornices, brackets, picture frames, etc.
- CLASS 221.—The nursery and its accessories; children's chairs, walking chairs.
- CLASS 222.—Apparatus and fixtures for heating and cooking,—stoves, ranges, heaters, etc.
- CLASS 223.—Apparatus for lighting,—gas fixtures, lamps, etc.
- CLASS 224.—Kitchen and pantry,—utensils, tinware, and apparatus used in cooking (exclusive of cutlery).
- CLASS 225.—Laundry appliances, washing machines, mangles, clothes-wringers, clothes-bars, ironing-tables.
- CLASS 226.—Bath-room and water closet, shower bath, earth closet.
- CLASS 227.—Manufactured parts of buildings,—sash, blinds, mantels, metal work, etc.

YARNS AND WOVEN GOODS OF VEGETABLE OR MINERAL MATERIALS.

- CLASS 228.—Woven fabrics of mineral origin.—Wire cloths, sieve cloth, wire screens, bolting cloth.
Asbestos fibre, spun and woven, with the clothing manufactured from it.
Glass thread, floss, and fabrics.
- CLASS 229.—Coarse fibres, of grass, rattan, cocoanut, and bark.
Matting, Chinese, Japanese, palm-leaf, grass, and rushes.
Floor cloths of rattan and cocoanut fibres, aloe fibre, etc.
- CLASS 230.—Cotton yarns and fabrics, bleached and unbleached.
Cotton sheeting and shirting, plain and twilled.
Cotton canvas and duck. Awnings, tents.
- CLASS 231.—Dyed cotton fabrics, exclusive of prints and calicoes.
- CLASS 232.—Cotton prints and calicoes, including handkerchiefs, scarfs, etc.
- CLASS 233.—Linen and other vegetable fabrics, uncolored or dyed.
- CLASS 234.—Floor oil cloths, and other painted and enameled tissues, and imitation of leather, with a woven base.

WOVEN AND FELTED GOODS OF WOOL AND MIXTURES OF WOOL.

- CLASS 235.—Card wool fabrics.—Yarns, broadcloth, doeskins, fancy cassimeres.
Felted goods.
- CLASS 236.—Flannels.—Plain flannels, domets, opera and fancy.

JOHN DEWHURST & SONS,
Cotton Spinners,
AND MANUFACTURERS OF
SEWING COTTON,

Remarkable for its strength, pliability, evenness, and freedom from knots. It meets all the requirements of the different kinds of Sewing Machines, and is equally suitable for hand use.

JOHN DEWHURST & SONS,
BELLE-VUE MILLS,
SKIPTON, YORKSHIRE

COTTON SPINNERS FROM A.D. 1794.

SEWING COTTON MANUFACTURERS FROM A.D. 1870.

AGENTS IN THE UNITED STATES,

MESSRS. WILSON & MERRILL, BOSTON.

CLASS 237.—Blankets, robes, and shawls.

CLASS 238.—Combined wool fabrics.—Worsted, yarns, dress goods for women's wear, delaines, serges, poplins, merinoes.

CLASS 239.—Carpets, rugs, etc.—Brussels, melton, tapestry, tapestry Brussels, Axminster, Venetian, ingrain, felted carpetings, druggets, rugs, etc.

CLASS 240.—Hair, alpaca, goat's hair, camel's hair, and other fabrics, mixed or un-mixed with wool.

CLASS 241.—Printed and embossed woolen cloths, table covers, patent velvets.

SILK AND SILK FABRICS, AND MIXTURES IN WHICH SILK IS THE
PREDOMINATING MATERIAL.

CLASS 242.—Cocoons and raw silk as reeled from the cocoon, thrown or twisted silks in the gum.

CLASS 243.—Thrown or twisted silks, boiled off or dyed, in hanks, skeins, or on spools.

CLASS 244.—Spun silk yarns and fabrics, and the materials from which they are made.

CLASS 245.—Plain woven silks, lustrings, sarsnets, satins, serges, foulards, tissues for hat and millinery purposes, etc.

CLASS 246.—Figured silk piece goods, woven or printed. Upholstery silks, etc.

CLASS 247.—Crapes, velvets, gauzes, cravats, handkerchiefs, hosiery, knit goods, laces, scarfs, ties, veils, all descriptions of cut and made up silks.

CLASS 248.—Ribbons, plain, fancy, and velvet.

CLASS 249.—Bindings, braids, cords, galloons, ladies' dress trimmings, upholsterers', tailors', military, and miscellaneous trimmings.

CLOTHING, JEWELRY, AND ORNAMENTS, TRAVELING EQUIPMENTS.

CLASS 250.—Ready-made clothing, knit goods and hosiery, military clothing, church vestments, costumes, waterproof clothing, and clothing for special objects.

CLASS 251.—Hats, caps, boots and shoes, gloves, mittens, etc., straw and palm leaf hats, bonnets, and millinery.

CLASS 252.—Laces, embroideries, and trimmings for clothing, furniture, and carriages.

CLASS 253.—Jewelry and ornaments worn upon the person.

CLASS 254.—Artificial flowers, coiffures, buttons, trimmings, pins, hooks and eyes, fans, umbrellas, sunshades, walking-canes, pipes, and small objects of dress or adornment, exclusive of jewelry. Toys and fancy articles.

CLASS 255.—Fancy leather work, pocketbooks, toilet cases, traveling equipments, valises, and trunks.

CLASS 256.—Furs.

CLASS 257.—Historical collections of costumes, national costumes.

PAPER, BLANK BOOKS, AND STATIONERY.

CLASS 258.—Stationery for the desk, stationers' articles, pens, pencils, inkstands, and other apparatus of writing and drawing.

CLASS 259.—Writing paper and envelopes, blank-book paper, bond paper, tracing paper, tracing linen, tissue paper, etc., etc.

CLASS 260.—Printing paper for books, newspapers, etc.

Wrapping paper of all grades, cartridge and manilla paper, paper bags.

CLASS 261.—Blank books; sets of account books, specimens of ruling and binding, including blanks, bill heads, etc., book binding.

CLASS 262.—Cards; playing cards, cardboard, binders' board, pasteboard, paper or cardboard boxes.

CLASS 263.—Building paper, pasteboard for walls, cane fibre felt for car-wheels, ornaments, etc.

CLASS 264.—Wall papers, enamelled and colored papers, imitations of leather, wood, etc.

MILITARY AND NAVAL ARMAMENTS, ORDNANCE, FIREARMS, AND
HUNTING APPARATUS.

- CLASS 265.—Military small-arms, muskets, pistols, and magazine guns, with their ammunition.
- CLASS 266.—Light artillery, compound guns, machine guns, mitrailleuses, etc.
- CLASS 267.—Heavy ordnance and its accessories.
- CLASS 268.—Knives, swords, spears, and dirks.
- CLASS 269.—Firearms used for sporting and hunting, also other implements for the same purpose.
- CLASS 270.—Traps for game, birds, vermin, etc.

MEDICINE, SURGERY, PROTHESIS.

- CLASS 272.—Medicines; officinal (in any authoritative pharmacopœia), articles of the materia medica, preparations, unofficinal.
- CLASS 273.—Dietetic preparations, as beef extract and other articles intended especially for the sick.
- CLASS 274.—Pharmaceutical apparatus.
- CLASS 275.—Instruments for physical diagnosis, clinical thermometers, stethoscopes, ophthalmoscopes, etc. (except clinical microscopes, etc., for which see Class 324).
- CLASS 276.—Surgical instruments and appliances, with dressings, apparatus for deformities, prothesis, obstetrical instruments.
- CLASS 277.—Dental instruments and appliances.
- CLASS 278.—Vehicles and appliances for the transportation of the sick and wounded, during peace and war, on shore or at sea.

HARDWARE, EDGE TOOLS, CUTLERY, AND METALLIC PRODUCTS.

- CLASS 280.—Hand tools and instruments used by carpenters, joiners, and for wood and stone in general. Miscellaneous hand tools used in industries, such as jewellers', engravers'.
- CLASS 281.—Cutlery, knives, penknives, scissors, razors, razor straps, skates, and implements sold by cutlers.
- CLASS 282.—Emery and sand paper, polishing powders, polishing and burnishing stones.
- CLASS 283.—Metal hollow ware, ornamental castings.
- CLASS 284.—Hardware used in construction, exclusive of tools and implements. Spikes, nails, screws, tacks, bolts, locks, latches, hinges, pulleys. Plumbers' and gas fitters' hardware, furniture fittings, ships' hardware, saddlers' hardware, and harness fittings and trimmings.

FABRICS OF VEGETABLE, ANIMAL, OR MINERAL MATERIALS.

- CLASS 285.—India rubber goods and manufactures.
- CLASS 286.—Brushes.
- CLASS 287.—Ropes, cordage.
- CLASS 288.—Flags, insignia, emblems.
- CLASS 289.—Wooden and basket ware, papier mache.
- CLASS 290.—Undertakers' furnishing goods, etc.
- CLASS 291.—Galvanized iron work.

CARRIAGES, VEHICLES, AND ACCESSORIES.

(For farm vehicles and railway carriages, see Departments of Agriculture and Machinery.)

- CLASS 292.—Pleasure carriages.
- CLASS 293.—Traveling carriages, coaches, stages, omnibuses, hearses, Bath chairs, velocipedes, baby coaches.
- CLASS 294.—Vehicles for movement of goods and heavy objects, carts, wagons, trucks.
- CLASS 295.—Sleighs, sledges, sleds, etc.
- CLASS 296.—Carriage and horse furniture, harness and saddlery, whips, spurs, horse blankets, carriage robes, rugs, etc.

HAND AND
MACHINE USE.

BROOK'S
Royal Patent
ONLY FIRST
LONDON AND PARIS
EXHIBITION
Prize Thread.

Lengths

Warranted.

FOR
HAND AND
MACHINE USE.

BROOK'S PATENT GLACÉ THREAD, IN WHITE, BLACK, AND COLORS.

The extraordinary strength, smoothness, and durability obtained by this invention have secured for it great popularity, and it is consequently much imitated in inferior qualities. This Cotton is always labelled BROOK'S PATENT GLACÉ THREAD, and without their name and crest (a GOAT'S HEAD), the words "Glacé," or "Patent Glacé," do not denote that it is of their manufacture.

BROOK'S PATENT NINE AND SIX CORDS will be found of very superior quality, and are strongly recommended wherever a SOFT COTTON is preferred.

EXHIBITION PRIZES.

Only Medal London, 1851. | Only First Class Medal, Paris, 1855.
Prize Medal London, 1862. | Gold Medal Paris, 1867.

ONLY DIPLOMA OF HONOUR, VIENNA, 1873.

Established 1790.

GREAT BRITAIN.

(North of Nave, Columns 23 to 38.)

Chemicals, Oils, Soap, Candles.

Chemical Manufactures.

- 1 Hutchinson, John, & Co., Widnes, Lancashire.—Soda ash, soda crystals, caustic soda, bicarbonate of soda, salt cake, bleaching powder, and sulphur recovered from vat waste. 200
- 2 Corbett, John, Stoke Prior Salt Works, Worcestershire.—Refined salt. 200
- 3 Richards, Kearne, & Gasquoine, Mal-kins Bank Alkali Works, Sandbach, Cheshire.—Brine, sulphate of ammonia, soda ash, bicarbonate of soda. 200
- 4 Gaskell, Deacon, & Co., Widnes, Lancashire.—Carbonated soda ash, and refined alkali, bleaching powder, soda crystals, bicarbonate of soda, and chloride of calcium. 200
- 5 Brunner, Mond, & Co., Northwich, Cheshire.—Alkali and bicarbonate of soda. 200
- 6 The Desoto Alkali Co. (limited), Widnes, Lancashire.—Caustic soda, and black ash or ball soda. 200
- 7 Weldon, Walter, Merton, London.—Samples and models of apparatus, illustrative of the manufacture of chlorine. 200
- 8 Runcorn Soap and Alkali Co. (limited), Liverpool.—Bleaching powder, soda ash, crystals of soda, caustic soda, and refined resin. 200
- 9 Muspratt Brothers, & Huntley, Liverpool.—Soda ash, caustic soda, bleaching powder, soda crystals, and bicarbonate of soda. 200
- 10 Muspratt, James, & Sons, Liverpool.—Soda ash, cream caustic soda, bleaching powder, chlorate of potash, salt cake, and brimstone. 200
- 11 Tyne Vale Chemical Co., Northumber-land Works, Newcastle-on-Tyne.—Pure and methylated ether, pure and methylated chloroform, sweet spirit of nitre, pure and commercial chemicals. 200
- 12 Spence, Peter, Manchester.—Cry-stallized alum, in block and crystals, and a new aluminio-ferric compound for precipi-tating sewage and for paper making. 200
- 13 Higgin, Thomas, & Co., Liverpool.—Salt. 200
- 14 The Newcastle Chemical Works Co. (limited), Newcastle-on-Tyne.—Soda ash, alkali, bleaching powder, crystals and bicarbonate of soda, caustic soda, chloride of calcium. 200
- 15 White, John & James, Shawfield Works, Glasgow.—Bichromate of pot-ash. 200
- 16 Liver Alkali Works Co. (limited), Liverpool.—Caustic soda. 200
- 17 Young, James, Kelly, Wemyss Bay, N. B.—Illustrations of manufacture of carbonate of soda, chlorate of potash, pro-ducts from petroleum, coal, and shale, pre-servation of iron ships. 200
- 18 Greenbank Alkali Co., St. Helen's, Lancashire.—Chemical products, pure caustic soda, chlorate potash. 200
- 19 Liver Alkali Works Co. (limited), Liverpool.—Caustic soda. 200
- 20 Jennings, T., Brookfield Chemical Works, Cork.—Carbonate and calcined magnesia. 200
- 21 Calvert, F. C., & Co., Bradford, Manchester.
 - a Carbolic and cresylic acids and deriva-tives. 200
 - b Carbolic acid soaps. 201
- 22 Parkinson Bros., Burnley.—Baking powder. 200
- 23 Morson & Son, London, W. C.—General chemicals and specialities, crea-sote, pepsine, gelatine, etc. 200
- 24 Allen & Hanburys, London.—Paté de jujube and analogous articles. 200
- 25 Gerrard, Alfred William, London.—Pharmaceutical preparations. 200
- 26 Kinmond & Co., Leamington.—Fluid magnesia, and effervescing fluid citrate of magnesia. 200
- 27 Wyndham, F., & Co., London.—“Esprit des Œufs” (spirit of eggs), a medicinal compound. (*In Agricultural Hall*.) 200
- 28 Price's Patent Candle Co. (limited), Belmont Works, London.—Candles, night-lights, glycerine, fatty acids, ma-chinery oils; toilet, household, and mill soaps, glycerine, paraffine, stearine, and tapers. 201
- 29 Field, J. C., & J., London.—Candles, toilet soaps, beeswax, and refined yellow wax, white wax, dyers' soaps, sealing wax, and fancy ornamental candles. 201
- 30 Pears, A., & F., Lanadron Soap Works, Isleworth, near London.—Trans-parent soap. 201
- 31 Marrison, Robt. D., Norwich, Nor-folk.—Soap powder. 201
- 32 Cohné, Sigismund, London.—Chem-ical and medical soaps. 201
- 33 Craig & Rose, Caledonian Oil and Color Works, Edinburgh.
 - a Oils. 201
 - b Paints and colors. 202

Oils, Pigments, Ink, Perfumery, Explosives, Ceramics.

- 34 Williams, Miles, Britannia Varnish Works, Wigan, Lancashire.
a Gas carburetter and drawings; improvement in manufacture of gas and liquid fuel. 201
b Varnishes, varnish paints, enamels, lacquers, and specimens of work. 202
- 35 Hickisson, Mrs. M. A., London.—Marking ink, pens, linen stretcher, and framed specimens. 202
- 36 Turner, Chas., & Son, London.—Varnishes, fine colors, gums. 202
- 37 Adams, John, Victoria Park, Sheffield.—Polishes for furniture, brass, and plate. 202
- 38 Lyons, William, Manchester.—Writing and copying fluids and inks, marking ink, ink powders, paper dye tablets. 202
- 39 Bowman, Charles, London.—Solid ink, stencil plates, stencil brushes, etc. 202
- 40 Rawlins & Son, Brook Works, Prescott.—Ultramarine and smalts, with raw materials. 202
- 41 Chambers, T. F., Hull.—Black varnish. 202
- 42 Johnson Brothers, Hull.—Colors, varnishes, machinery oils, and locomotive and anti-friction greases. 202
- 43 Sands Brothers, & Co., Salford Chemical Works, Manchester.—Writing inks, aniline dyes, and blacking inks for leather work. 202
- 44 Rowney, George, & Co., London.—Pigments, colors, varnishes, artists' materials. 202
- 45 Storer, David, & Sons, Glasgow.—Colors, pigments, and wood stains; Venetian, Indian, and other reds; drop black, greens, and other pigment colors. 202
- 46 Cooper & Co., London.—Writing register, and japan inks, copying and fluid ink; red, scarlet, blue, and violet inks. 202
- 47 Silicate Paint Company, Liverpool.—Silicate paints and colors; petrifying liquid for damp walls; enameling and anti-fouling paints; cement for steam joints, anti-incrustation fluid, nitre killer, etc. 202
- 48 Blackwood, John, & Co., London.—Writing, copying, and indelible marking inks. 202
- 49 Mackay, John, Edinburgh.
a Spirit varnishes and polishes for coating wood of all colors, white, mahogany, oak, or ebony. 202
b Fluid flavoring essences from spices, fruits, and vegetables. 203
- 50 Stephens, Henry Charles, London.—Writing fluids and copying inks, ink powders, machine ruling and indorsing inks; stains for wood. 202
- 51 Crown Perfumery Company, London.—Perfumes and toilet requisites. 203
- 52 Sturges Montserrat Company (limited), Birmingham.—West India goods. 203
- 53 Atkinson, J., & E., London.—Perfumery and toilet articles. 203
- 54 Jaap, John, Glasgow.—Flavoring essences and other preparations. 203
- 55 Low, Son, & Haydon, London.—Perfume extracts, toilet soaps. 203
- 56 Perks, Samuel, Hitchin Herts.—Essential oil of lavender, extract lavender flowers, etc. 203
- 57 Thiellay, Eugene Henry, London.—Hair tincture, dyes, and bleaching liquid, tonics, and cultivators. 203
- 58 Rimmel, Eugene, London.—Perfumery and toilet articles; perfume vaporizers, etc. 203
- 59 Evans, Sons, & Co., Liverpool, and Evans, Lescher, & Evans, London.—Perfumery. 203
- 60 Bryant & May, Fairfield Works, London.—Safety matches, wax vestas and vesuvians, decorated metal and other boxes. 204
- 61 Eley Brothers (limited), London.—Paper and metal cartridge cases (empty), sporting and military percussion caps, gun waddings. 204
- 62 Bickford, Smith, & Co., Tuckingmill, Cornwall.—Safety fuses for blasting operations. 204
- 63 Pigou, Wilks, & Laurence (limited), London.—Military, sporting, African, and mining powders of every description. 204
- 64 Lacey, Richard George, Coast Guard Station, Leigh, Essex.—Rocket apparatus for throwing lines from one ship to another; alarm signal box for ships; fisherman's block. 204
- 65 Gage, Thomas, London.—Rockets, and tube for firing; danger signal and distance plate; rockets and hand lights, fired without the aid of heat, light, or fire; friction tubes and reflectors; fog signals for railways. 205
- Ceramics—Pottery, Porcelain, Glass, etc.**
- 66 Peake, Thomas, The Tileries, Tunstall, Staffordshire.—Paving and facing bricks; ridge, roofing, and flooring tiles; ornamental tiles for garden borders, skirting, and mural decorations. 206
- 67 Hamblet, Joseph, Piercy Blue Brick Works, West Bromwich, Staffordshire.—Vitrified blue bricks, copings, plinths, stable floor bricks, quarries, ridges, roofing tiles, and every variety of terra metallic pavings. 206
- 68 Wood & Ivery, Albion Brick Works, West Bromwich, Staffordshire.—Blue terra metallic building and fancy bricks; mouldings, copings, footpath paving bricks, grooved stable floor bricks, terminals; terra metallic vases, trusses, etc. 206
- 69 Johnson & Co., Ditchling Potteries, Sussex.—Terra cotta as applied to building purposes; terminals, vases, ridge tiles, and general terra cotta work. 206
- 70 Matthews, John, Royal Pottery, Weston-super-Mare, Somerset.—Terra cotta vases, fountains, and baskets; garden pottery, etc. 206
- 71 Watcombe Terra Cotta Company (limited), Watcombe, South Devon.—Terra cotta, painted vases and plaques, statuettes, etc.; frescoes for mural adornment, and architectural terra cotta specimens. 206
- 72 Brooke, Edward, & Sons, Fieldhouse Fire Clay Works, Huddersfield, Yorkshire.
a Sanitary tubes. 206
b Fire bricks and clay for furnaces; sewer ventilators' silica fire bricks for furnaces. 207

Bricks, Stoneware, Terra Cotta, Porcelain, Glass.

- 73 **Stiff, James, & Sons, London.**
a Terra cotta jars, bottles, tiles, vases, medallions, water filters, refrigerators, air bricks, stoves, and stove linings, tablets with figures in bas-relief, figures for church and other decorations, etc. 206
b Stoneware jugs, etc., in decorated Lambeth ware, chemical apparatus, sanitary ware, sewer traps, drain pipes, etc. 210
- 74 **Jennings, George, London.**—Appliances for ventilation, terra cotta bricks, etc.; stoneware drain pipes, gully traps. 206
- 75 **Holland, William Thomas, Yrismudw, South Wales.**—Ceramic goods, earthenware or faience, in table, tea, toilet services, etc.; architectural terra cotta, ornamental bricks and tiles, fire bricks and fireproof cements, sanitary pipes and ware. 206
- 76 **Lindsay & Anderson, Lilliehill Fire Clay and Terra Cotta Works, Dunfermline, Scotland.**—Fountain in terra cotta, bust and pedestal of Sir Walter Scott, statuette of Sir James Y. Simpson, nymphs at fountain, garden vases and pedestals, gas stove in terra cotta, sewage pipes and sanitary appliances, fire clay bricks, chimney cans, collection of terra cotta. 206
- 77 **Doulton, Hy., & Co., London.**—Terra cotta goods for architectural and horticultural purposes; sanitary pottery in salt-glazed stoneware, queensware; colossal group of America, by John Bell, on pedestal, ornamented with art pottery; vitrified metallic bricks and pavings. 206
- 78 **Brownhills Pottery Co., Tunstall.**—Earthenware, dinner, dessert, and toilet ware, jugs, etc.; enameled vases, etc.; terra cotta and black glazed ware, floor and roof tiles, ridge ornaments, etc. 206
- 79 **Dean, Henry, Rugby, Warwickshire.**—Stoneware drain traps and yard gullies of different patterns. 206
- 80 **Tinworth, George, London.**—Panels in terra cotta, illustrative of Scripture, and articles in colored stoneware. 206
- 81 **Harper & Moores, Stourbridge.**—Fire clays, prepared clays, fire bricks, crucibles, melting pots, bricks for smelting furnaces, etc. 207
- 82 **Cliff, John, Runcorn, near Liverpool.**—Fire brick. 207
- 83 **Patent Plumbago Crucible Co., Battersea Works, London.**—Portable furnaces, dental work, etc.; skittle pots for glass melting; crucibles for jewelers, assayers, dentists, etc.; founders' blacking. 208
- 84 **Price, J., & C., & Brothers, Bristol.**—Ale bottles, spirit jars, barrels, preserve jars, water filters, feet warmers, etc.; stoneware. 207
- 85 **Bates, Walker, & Co., Dale Hall Works, Burslem.**—Dinner, dessert, toilet, and tea ware; general earthenware goods; ironmongers', artists', and gardenware; stick, parasol, and umbrella handles; spirit barrels, signboard letters, porcelain slates, menu tablets, etc. 207
- 86 **Doulton & Co., London.**—Mantel-pieces, stoves, hearth, and fenders of clay; crucibles, furnaces, muffles, in fire clay and plumbago. 207
- 87 **King Brothers, Stourbridge.**—Fire brick, gas retorts, etc. 208
- 88 **Reynolds, John George, London.**—Pipe clays and pipes, terra cotta and fire clays; gas stoves in terra cotta, backs and cheeks for close stoves, fuel economizers, gas shades, fire bricks, water paint. 207
- 89 **Davidson, T., jr., & Co., Caledonian Pipe Works, Glasgow.**—Clay tobacco pipes; white clay pipes, fitted with fancy mouthpieces and cases. 207
- 90 **The Campbell Brick and Tile Co., Stoke-upon-Trent.**—Encaustic, geometric, majolica, and all kinds of glazed tiles and mosaics, bricks, and roofings. 208
- 91 **Craven, Dunill, & Co., Jackfield Works, near Ironbridge, Shropshire.**—Tiles for pavements and hearths; ornamental splays for fireplaces; tiles for walls and furniture. 208
- 92 **Minton's China Works, Stoke-upon-Trent.**—Enameled tiles. 208
- 93 **Maw & Co., Benthall Works, Broseley, Shropshire.**—Geometrical mosaic, encaustic, and majolica tiles, architectural majolica and terra cotta. 208
- 94 **Minton, Hollins, & Co., Stoke-upon-Trent.**—Tiles, tile-mosaic, tile fender, chimney piece, fire grate, flower vases, etc. 208
- 95 **Stanley Bros., Midland Tile Works, Nuneaton, Warwickshire.**—Perforated tiles for malt kiln floors. 208
- 96 **Brown-Westhead, T. C., Moore, & Co., Cauldon Place, Staffordshire Potteries.**—China, earthenware, statuary porcelain and majolica ware; dinner, dessert, tea, and toilet services; druggists' and perfumers' goods, tiles, and sanitary ware. 208
- 97 **Daniell, A. B., & Son, London.**—Porcelain and pottery, ornamental vases, candelabra, etc.; dinner, dessert, tea, and coffee services; toilette services, fountains, jardinières, garden seats, vases, etc. 210
- 98 **Powell & Bishop, Hanley, Staffordshire.**—Dinner, dessert, tea, and toilet services, white granite, etc. 210
- 99 **Brownfield, Wm., & Son, Cobridge, Staffordshire Potteries.**—China, majolica, ironstone china, parian, earthenware, stoneware, etc. 210
- 100 **Doulton & Watts, Lambeth Pottery, London.**—Tile decorations, stoneware for domestic and manufacturing purposes, and chemical works; pulpit and font, in fine art pottery faience. 210
- 101 **Mortlock, John, Pottery Galleries, London.**
a Decorative art pottery. 211
b Porcelain. 213
- 102 **Edwards, John, Fenton, Staffordshire.**—Ironstone china and porcelain de terre tea, dinner, toilet, and jug services. 213
- 103 **Bailey, W., & J. A., Alloa, Scotland.**—Roxingham earthenware teapots. 213
- 104 **Hetley, J., & Co., London.**—Glass shades; glass used for photographic, building, and horticultural purposes. 214
- 105 **Chance Bros., & Co., Glass Works, near Birmingham.**—Glass for optical instruments. 214
- 106 **Kilner Bros., London.**—Glass bottles and glass for useful and scientific applications. 215

Glass, Furniture, Lighting and Heating Apparatus.

- 107 Aire and Calder Glass Bottle Co., London.—Glass bottles, combination stoppers, packing cases, corks, straw envelopes. 215
- 108 Green, James, & Nephew, Thames Cut Glass Works, London.—Table glass, cut and engraved table decorations and flower stands, glass chandeliers, and lustre candlesticks. 216
- 109 Millar, John, & Co., Edinburgh.—Engraved and cut glass. 216

- 114 Government Printing Office, Sydney.—Orchids of Australia. 712

THE SUN NEWSPAPER

Is printed and published every day in the year, at 166, 168, and 170 Nassau Street, New York City. Its regular edition on secular days now (April, 1876) averages about **140,000**; its weekly edition over **88,000**; and its Sunday issue is nearly **100,000**. It thus prints and sells more than a million copies a week, which are read all over the United States. This is a circulation unprecedented in American journalism, and it is constantly on the increase. In proof of this, let the following figures testify. They show the number of copies of THE SUN printed every week during the year ending March 11, 1876.

WEEK ENDING	COPIES PRINTED.	WEEK ENDING	COPIES PRINTED.

SOUTH AUSTRALIA.—STATISTICAL PREFACE.

THE colony of South Australia embraces 25 degrees of latitude through the centre of the continent of Australia, from the Southern to the Indian Ocean, and is bounded on the east by the colonies of Victoria, New South Wales, and Queensland, and on the west by the colony of Western Australia. Its area is 914,730 square miles, or 585,427,200 acres; being about a third of the area of the United States of America, or ten times that of Great Britain. Its population is 210,699.

Its chief exports are wool, wheat, and copper. In 1875 the exports were valued at £4,442,100—namely: of wool, £1,778,297; of agricultural produce, £1,688,035; of metals, £758,664; and of other products, £217,104. Its revenue in 1875 was £1,143,312, its people not being taxed at a higher rate than 25 shillings a head. The people have purchased land of the government to the extent of 4,634,711 acres, of which 1,400,000 are under cultivation; and the average price paid since 1845 is £1 5s. 2d. per acre. The public debt is about £3,000,000; but, as an offset, is a sum of £2,225,000 due for lands sold to occupiers, and payable within six years.

The natural wealth of the colony in healthy climate, fruitful soils, and abundant minerals, has been greatly augmented by useful and substantial improvements. In addition to numerous ports made serviceable for coasting trade, inland traffic is facilitated by 884 miles of excellent macadamized roads, which have cost over £2,000,000; and by railways of nearly an equal further cost. The public and private buildings, both in towns and country, are mostly of well-built stone, with slate or iron roofs. Gardens and orchards, pasture and arable fields cover the more settled portions of the colony, whilst over hundreds of miles outside of these some 6,000,000 sheep, 200,000 head of horned cattle, many thousands of horses, and a few hundred camels, thrive at large on the native vegetation, save that their ranches, or runs, are mostly inclosed in areas of from 5 to 50 square miles with good post and wire fencing.

The best of meat and bread, fruit and vegetables, grow in abundance in South Australia. People there live well at little cost. Labor is well rewarded. There are not, or ought not to be, any able-bodied paupers in the colony. At the savings' banks, which are guaranteed by government, the small deposits of the poorer classes approximate £800,000, on which four to five per cent. interest is paid. Immigration is promoted by annual money votes, which, through Mr. F. S. Dutton, C. M. G., Agent-General for the colony in London, supplies free or assisted passages for eligible persons.

The government, the laws, and the social institutions, like the people of South Australia, have an Anglo-Saxon character. There is the fullest civil and religious freedom under a vice-regal governor, whose ministers are chosen by, and are responsible to, a majority of two houses of parliament elected by ballot, as to the larger house, of manhood suffrage alone, and, as to the smaller house, by a slightly restricted property qualification. These organizations have worked harmoniously to the contentment of the people.

Churches and schools are numerous. The facilities for acquiring real property in the colony are great, and laws well secure its quiet enjoyment. The public lands are mostly sold on credit: one-tenth per cent. is paid down as interest on the purchase money, which is not less than twenty shillings per acre. The balance is deferred to the sixth year, a second ten per cent. on the purchase money having been paid on the third year as interest. At the sixth year half the

balance may be renewed for four years at four per cent. if needed; but that the State may secure certain benefit from the sale of its lands under a credit system, the purchaser is bound to effect annual improvements. All metals, precious or other, go to the purchaser. The title to real estate from the crown is by registration, of which the purchaser gets a certificate in simple form. This system is popular, for it is ready and inexpensive at the outset, and is returnable to the registration office for record on it of all subsequent dealings, or for substituted certificate, or certificate as needed, in the court of sales. At the close of 1874 the value of landed property, which had passed under it, amounted to £9,260,186. Adjoining colonies have adopted this law.

The settled portions of the colony of South Australia are sectioned off into counties, and these counties, when arable cultivation requires it, are subdivided into hundreds, whose municipal governing bodies can be elected for local public works and education. Outside the hundreds, in the southern portion of the colony, the public lands are left for purely pastoral occupation, for which fourteen or twenty-one years' leases can be procured at moderate rents, regulated much by distance from ports of shipment, except that, both as to public lands inside or outside the hundreds, rights to search for and work minerals are readily granted. The rent of a mining lease is fixed at ten shillings an acre per annum, and fourteen years' term, renewable.

For the northern territory of South Australia, with its tropical climate, the land laws are modified. Land there is open for selection and sale at 7*s.* 6*d.* per acre, or for lease over ten years at 6*d.* per acre per annum. And, for the special growth of sugar, cotton, tea, rice, and tobacco, selections varying from 320 to 1280 acres can be made at a rental of 6*d.* per acre per annum for five years, when, if the land has been inclosed and one-half under cultivation, a free grant is procurable.

In 1872 South Australia erected 1973 miles of telegraph wire across her territory, and, at a cost of £350,000, connected Australia with India and Europe.

Commission from SOUTH AUSTRALIA (ADELAIDE) to the International
Exhibition:

HIS EXCELLENCY, SIR ANTHONY MUSGRAVE, C. M. G., Chairman.

HON. W. EVERARD, Commissioner of Crown Lands.	GEORGE MCEWEN, ESQ., J. P.
HON. H. E. BRIGHT, M. L. C., J. P., Commissioner of Public Works.	DR. SCHOMBURGH, D. P., J. P.
HON. JOHN CROZIER, M. L. C., J. P.	CALEB PEACOCK, ESQ., J. P.
HON. WENTWOOD CAVANAUGH, ESQ., M. P., J. P.	R. D. ROSS, ESQ., M. P., J. P.
JOSIAH BOOTHLY, ESQ., J. P.	W. E. SMITH, ESQ., M. P., J. P.
E. W. ANDREWS, ESQ., J. P.	WALTER HACKETT, ESQ.
S. DAVENPORT, ESQ., J. P., Special Com- missioner.	I. A. HOLDEN, ESQ., J. P.
	S. V. PIZEY, ESQ.
	F. G. WATERHOUSE, ESQ.
	C. J. COATES, ESQ., Commissioner and Honorary Secretary.

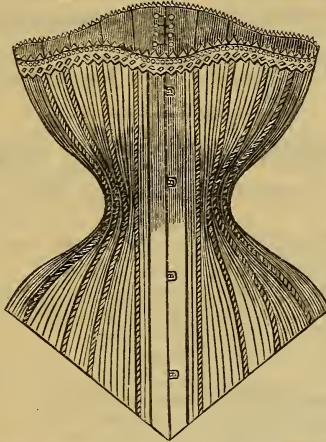

Our weaving capacity is now **5,500 CORSETS** daily, or a yearly aggregate of

1,700,000.

These Corsets have met the demand of the times in giving a perfect and Substantial Corset at Panic Rates. Their eminently superior quality has been more and more appreciated, and without question they are now the most popular corsets made.

The Loom can be seen weaving these Corsets in Machinery Hall.

The Loom can be seen weaving these Corsets in Machinery Hall.

1st. Because they are perfect in fit, while flexible to the natural movements of the form. 2d. They are stylish, durable, and luxurious to wear. 3d. Being woven without seam, and in perfect symmetry of shape, their stay properties are unapproached. Our new improved qualities have one of the labels here printed in Gold and Black—take no other—cut these out and compare—beware of counterfeits—The perfect form which our goods have was never produced by weaving until the invention of our

Wonderful PATENT Loom, while their superiority is attested by the Gold and Silver Medals awarded us, as well as the continually increasing demand. If your dealer does not keep them, send for our circular.

CAPE OF GOOD HOPE.—STATISTICAL PREFACE.

THE colony of the Cape of Good Hope is bounded north and northeast by the Orange river, which divides it, in parts of its course, from the Free State; east and northeast by the Tees, a small tributary of the Orange, the Stormbergen Mountains, and the Indwe and Great Kei, which two rivers separate the Cape Colony from Kaffirland; on the south it is bounded by the Indian Ocean, and on the west by the Atlantic. Latitude 28° 10' to 34° 51' south; longitude 16° 20' to 28° 20' east. The breadth on the greatest meridian is about 450 miles, the length on the largest parallel about 600 miles, and the total area is about 201,000 square miles. The colony is generally considered as forming two sections, the Western and Eastern Provinces, each divided into 16 electoral divisions, which are again subdivided for fiscal and magisterial purposes. The first regular census (1865) gave the following result as to the numbers of the population:

White, or European,	181,592
Hottentot,	81,598
Kaffir,	100,536
Other colored,	132,655
	496,381

Since the census, the annexation of British Kaffraria, Basutoland, Fingoland, and Normansland, added 5847 whites and 273,930 colored to the population, making the total, 776,158.

Hydrographically, the country, as a whole, is decidedly superior to most parts of Africa. The seaboard presents several comparatively safe and commodious harbors. Of these, however, two—Table Bay in the Western Province, and Algoa Bay in the Eastern—absorb nearly the whole of the foreign trade. Hardly any of the ports command navigable communication with the interior.

The highest range of mountains within the colony is 9000 feet above the sea. The dividing ridge runs parallel with the coast at a distance of 100 miles. Between the principal range and the sea, on the east, there are two other ranges, less continuous and regular; the intermediate one generally more distant from the first than they are from each other.

The prevalent winds—the southeast in summer, and the northeast in winter—mitigate each the rigor, whether heat or cold, of its own season; and, in spite of occasionally sudden and great changes, render the temperature, as a whole, one of the most salubrious and delightful in the world. The mean temperature of the year at Cape Town is about 68° F.; that of the coldest month being 57°, and of the hottest, 79°.

The value of the total exports and imports of the Cape Colony, including British Kaffraria, was, in 1873, as follows:

Imports,	£5,451,927
Exports,	4,011,327

Among the articles of export, wool is the most important, forming nearly nine-tenths of the total. Among the other leading items are copper ore, feathers, and sheepskins.

There were, at the end of 1865, in the colony, 692,514 head of cattle and 9,836,065 sheep. The sheep farms are often of very great extent, comprising from 3000 to 15,000 acres and upwards. Those in tillage are comparatively small. The graziers are, for the most part, proprietors of the farms they occupy, paying a quit rent to government, as the original owner of the soil.

There were lines of railways of a total length of 134 miles at the end of 1874, and a system of other main lines, as well as of telegraphs, was under consideration by the government.

The constitution vests the executive in the Governor and an Executive Council, composed of certain officeholders appointed by the crown. The legislative power rests with a Legislative Council of 21 members, and a House of Assembly of 66 members.

The income and expenditure of the colony, during 1873, were as follows:

Revenue,	£2,078,220
Expenditure,	2,159,658

Included in the above receipts is a loan of £859,000 for public works. The public debt, on the 1st of January, 1875, amounted to £1,723,144.

Commissioner from the CAPE OF GOOD HOPE to the International Exhibition:

MR. H. CRAWFORD COATES, Executive Commissioner.

CAPE OF GOOD HOPE.

(North of Nave, Columns 10 to 17.)

COLLECTIVE EXHIBIT.

Metallurgy, Furniture, Aboriginal Utensils, Maps, Books.

Minerals, Ores, Stone, Mining Products.

- 1 Cape Copper Mining Co. (limited), Cape Town.—Copper ores from Ookiep, Spectakel, Narap, Karolusburg, and Kilderman mines, Little Namagualand. 100
- 2 Bright, H. C. R., Mowbray, near Cape Town.—Copper ores and collection of minerals. 100
- 3 Dickson, W. W., Cape Town.—Black oxide of manganese, from Hercules mine. 100
- 4 Barry & Herdon, Mossel Bay.—Diamonds and associated rocks. 100
- 5 Wise, G., Stormberger.
 - a Saltpetre from the Stormberger. 100
 - b Coal from the Stormberger. 101
- 6 Wilson, A., Gas Works, Cape Town.—South African coals, cokes, and ashes. 101

Metallurgical Products.

- 7 Cape Copper Mining Co. (limited), Cape Town.—Copper. 111

Chemical Manufactures.

- 8 Smithers, J. & G., Cape Town.—Soaps. 201

Furniture, and Objects of General Use in Construction and in Dwellings.

- 9 Moulton, R., Suellendam.—Work-box constructed of South African woods. 217
- 10 Lesar, W., Cape Town.—Table constructed of various colonial timbers. 217

Clothing, Jewelry, and Ornaments, Traveling Equipments.

- 11 Perry, Mrs., Cape Town.—Melon seed necklaces, bracelets, etc. 252
- 12 Gladwin, J. P., Kafirland.—Hair of Pandomise, surmounted by ring of Euphobia sap; ivory earrings of Pandomis balon skin; dress of witch doctor. 253
- 13 Local Committee, Cape of Good Hope.—Native articles of dress—necklaces, armlets, aprons, head-dress earrings, etc. 253

Weapons, etc.

- 14 Barry & Herdon, Mossel Bay.—Kafir assegais. 268
- 15 Local Committee of Cape of Good Hope.—Knobe kerie of rhinoceros horn. 268
- 16 Vigers, P., Cape Town.—Native weapons, Kafir assegais, Bushman axe. 268

Medicine, Surgery, Prothesis.

- 17 Auret, W. H., Paarl.—Vegetable drugs and medicines. 272
- 18 Barkly, Sir H., Governor of Cape Colony.—Bitter barks used by Kafir doctors in fever cases. 272

Fabrics of Vegetable, Animal, or Mineral Materials.

- 19 Local Committee of Cape of Good Hope.—Kafir beer and milk pots, Kafir and basuto baskets. 289

Educational Systems, Methods, and Libraries.

- 20 Salomon, C., Cape Town.—Map of South Africa. 300
- 21 Barry & Herdon, Mossel Bay.
 - a Map. 300
 - b Specimens of ornamental bookbinding. 306
- 23 Salomon, Saul, & Co., Cape Town.—Specimens of bookbinding. 306
- 24 Local Committee of Cape of Good Hope.—Catalogue of South African Public and Sir G. Grey's libraries; University calendar; reports of South African Museum, Public Library, and Botanic Gardens; Dr. Blerk's Bushman Researches. 306
- 25 Juta, J. C., & Co., Cape Town.—Books. 306
- 26 Mabelle, A., Morija, Basutoland.—Books printed, bound, and published at Morija Mission Station, Basutoland. 306
- 27 Stewart, G., Lovedale, Kafirland.—Books printed, bound, and published at the Lovedale Kafir Mission Institution. 306

Art, Agricultural, Animal, Vegetable Products, Textile Substances.

Engineering, Architecture, Maps, etc.

- 28 Local Committee of Cape of Good Hope.—Models of harbor works and dry docks at Cape Town. 330
- 29 Dunn, E. I., Cape Town.—Geological sketch map of Cape Colony. 335

Paintings.

- 30 Hermann, W., Cape Town.—Oil paintings. 410
- a View in Kryсна Forest, Cape Colony.
- b View of Three Anchor Bay, near Cape Town.
- 31 Coppen, F., Cape Town.—Water color sketches. 411
- a Sketch of Hangklip, a spur of the Stormbergen, Queenstown Division.
- b Sketch of the Mac Mac Falls, Lydenburg gold fields, South African Republic.
- 32 Hays, Miss Anna, Cape Town.—Water color sketch of the native population of Cape Town. 411
- 33 Hermann, W., Cape Town.—Six water color sketches of colonial scenery. 411
- 34 Thwaites, Miss F. C., Cape Town.—Six water color drawings of indigenous Cape flowers. 411

Engraving and Lithography.

- 35 Barry & Herdon, Mossel Bay.—Pictures and photographs. 430
- 35 a Bruton, C. I., Cape Town.—Photographs. 430
- a Views in Cape Town.
- b View of Kloof Lodge, near Cape Town.
- c Views of scenery ground.
- 35 b Barnard, S. B., Cape Town.—Photographs of Cape Town, natives, etc., in a book. 430
- 35 c Fenneysey, C. D., George.—Photographs of colonial scenery. 430

Arboriculture and Forest Products.

- 36 Carson, E. J., Ookiep, Namagualand.—Ebony. 601
- 37 Holland, B. H., Alexandria, Cape Colony.—Specimens of timber from the Alexandria brown forests, with articles made from various woods. 601
- 38 Mossop & Garland, Cape Town.—Barks in the rough and ground. 602
- 39 Smithers, J. & G., Cape Town.—Vegetable wax. 603
- 40 Dale, Dr., Cape Town.—Vegetable wax. 603

Agricultural Products.

- 41 Barry, Arnold, & Co., Cape Town.—Wheat. 620
- 42 Myburgh, N., Meerlust, Erisle River.—Wheat. 620
- 43 Barry & Herdon, Mossel Bay.—Aloes. 623
- 44 Barry & Nepheus, Cape Town.—Aloes. 623
- 45 Jongh, S. J. de, Cape Town.—Snuff. 623
- 46 Powrie, E., Mossel Bay.—Leaf tobacco and snuff. 623

- 47 Gibbon, J. M., Cape Town.—Cochineal, grown and dried in the Botanic Gardens, Cape Town. 638

Water Animals, Fish Culture, and Apparatus.

- 48 Merriman, John, Cape Town.—Preserved crayfish from Table Bay. 643
- 49 Modie, D., Suellendam.—Pearl oyster shells from the south coast of the colony. 645

Animal and Vegetable Products.

- 50 Dier & Diets, Port Elizabeth.—Skins. 652
- 51 Mossop & Garland, Cape Town.—Leather. 652
- 52 Local Committee, Cape of Good Hope.—Skins of the blackbacked jackal and aard wolf. 652
- 53 Dickson, W. W., Cape Town.—Skins of the lion and cheelat or hunting leopard. 652
- 54 Vigors, P., Cape Town.—Lion and leopard skins, head of a leopard, antelope and rhinoceros horns. 652
- 55 Local Committee of Cape of Good Hope.—Ostrich feathers and eggs. 653
- 56 Barry & Herdon, Mossel Bay.—Ostrich incubator, with stuffed ostriches and eggs. 653
- 57 Powrie, E., Mossel Bay.—Beeswax. 654
- 58 Barry & Nepheus, Cape Town.—Beeswax. 654
- 59 Toit, A. L. du, Rondolbosch.—Grapes in brandy. 656
- 60 Merve, J. H. von der, Robertson.—Grapes in brandy. 656
- 61 Falck, J. A. H., Montaga.—Peaches in brandy. 656
- 74 Ryn, J. H. Ivan, Cape Town.—Pontac, red, and white wines. 660

BROOK'S PATENT GLACE SPOOL COTTON,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

Brook's Six Cord Soft Finish Spool Cotton,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

BROOK'S PATENT GLACE THREAD. IN WHITE, BLACK, AND COLORS.

The extraordinary strength, smoothness, and durability obtained by this invention have secured for it great popularity, and it is consequently much imitated in inferior qualities. This Cotton is always labeled **BROOK'S PATENT GLACE THREAD**, and without their name and crest (a **GOAT'S HEAD**), the words "Glace," or "Patent Glace," do not denote that it is of their manufacture.

BROOK'S PATENT NINE AND SIX CORDS

Will be found of very superior quality, and strongly recommended wherever a **SOFT COTTON** is preferred.

EXHIBITION PRIZES.

Only Medal, London, 1851.

JAMAICA.—STATISTICAL PREFACE.

JAMAICA, one of the West India Islands, and by far the most important of those belonging to Great Britain, is about 90 miles to the south of Cuba, and stretches in north latitude between $17^{\circ} 40'$ and $18^{\circ} 30'$, and in west longitude between $76^{\circ} 15'$ and $78^{\circ} 25'$. Area, 6900 square miles; population (in 1871), 506,154, of whom less than three per cent. were white. The greatest length of the island is 150 miles, and its greatest breadth, 50 miles. It is traversed from east to west by a heavily timbered ridge called the Blue Mountains, which rises to about 7000 feet. From this range at least 70 streams descend to the north and south shores; one of these, the Black river, affords for small craft a passage of about 30 miles into the interior. The others, owing to the shortness and declivity of their course, are not navigable. Excellent harbors are everywhere to be found. The best of these is formed by a deep and capacious basin, in the southeast quarter of the island, which washes the most spacious and fertile of the plains between the hill country and the coast. Around this inlet, and within a few miles of each other, are all the considerable centres of population, Port Royal, Kingston, and Spanish Town.

The climate varies considerably, the torrid belt of the coast gradually passing into the temperate region of the central heights. The latter is said to be remarkably favorable to longevity; and, after having long been a retreat for the residents themselves, it has lately begun to attract invalids from the United States. To contrast two positions—the one near Kingston harbor, the other at an intermediate elevation of 4000 feet—their annual mean temperature are stated to be respectively 81° F. and 68° F.

In 1871 the chief exports were in value as follows: Sugar, £502,193; rum, £271,267; coffee, £147,562; logwood, £115,423; while the chief imports were: Flour, £135,500, and salt-fish, £92,801. During the same year the revenue amounted to £434,564; the expenditure to £430,154.

The sum of £19,403 was devoted to the support of the schools during the year 1872.

JAMAICA.

SMITH & WESSON, Springfield, Mass., U. S. A.

VIENNA,

1873.

NEW MODEL "38."

WITH AUTOMATIC EJECTOR,

The Celebrated Smith and Wesson Revolvers

Have won for themselves a world-wide reputation for the superior quality of their workmanship and material, their accuracy and force of firing, and the rapidity with which they may be charged and fired. These Revolvers are provided with an automatic cartridge shell ejector, which expels all the exploded cartridge shells by the act of opening the pistol for charging, and although performing this work automatically, are not liable to derangement, making them the most desirable weapon for any purpose for which a revolver is used.

More than 100,000 of these Revolvers are in use by the Russian government. They are also used to a less extent by the governments of five other nations, our own among them, and everywhere are giving perfect satisfaction.

Particular attention given to government contracts. We have facilities for the manufacture of 150 of our Army Revolvers per day.

All orders addressed to us or to our agent in New York, M. W. ROBINSON, No. 79 Chambers Street, will receive prompt and careful attention.

SMITH & WESSON, SPRINGFIELD, MASS., U. S. A.

INCORPORATED 1835.

DELAWARE

MUTUAL

ESTABLISHED 1838.

FIELD FLOWER
AND
GARDEN SEEDS

HENRY A. DREER

TREES, PLANTS
AND
GARDEN TOOLS

HENRY A. DREER,
SEEDSMAN AND FLORIST,

714 CHESTNUT STREET, Philadelphia, Pa.

Seed Farm and Nursery, Riverton, New Jersey.

OFFERS THE LARGEST AND BEST SELECTED STOCK OF

VEGETABLE AND FLOWER SEEDS

To be found in America, embracing all the Home-grown as well as New and Rare Foreign Varieties.

The AMATEUR GARDENER and FLORIST will find all the Novelties as they appear, obtained from reliable sources, and offered at fair and reasonable rates. The MARKET GARDENER may also obtain every variety suited to his wants, at a moderate price.

THE GREENHOUSE AND ORNAMENTAL DEPARTMENT

contains a large and well selected stock of Plants, occupying over Sixty Thousand square feet of Glass, for Hothouses, Greenhouses, and Propagating Frames.

BULBOUS FLOWER ROOTS.

We annually import a large collection of the finest Double and Single Hyacinths, Tulips, Narcissus, Crocus, Jonquils, and other Bulbs for planting in the Autumn, a full descriptive catalogue of which is published on the first of August.

DREER'S GARDEN CALENDAR is published annually on the first of December, and contains select lists of Vegetables and Flower Seeds, Plants, Roses, Verbenas, Dahlias, Carnations, Geraniums, etc., with brief and practical directions for their culture, mailed to all applicants inclosing two 3-cent stamps for postage.

Wholesale Price List, for Dealers only, mailed on application.

1876.

PRESBYTERIAN BANNER,

PITTSBURGH, PA.

OLDEST RELIGIOUS NEWSPAPER.

ESTABLISHED JULY 5, 1814.

BEST MEDIUM FOR FIRST-CLASS ADVERTISING WEST OF NEW YORK.

WISCONSIN STATE JOURNAL.

Daily, Tri-Weekly, and Weekly.

EXTENSIVE PRINTING HOUSE. STANDARD WORKS STEREOTYPED.

Connected with the WISCONSIN STATE JOURNAL Office, located at *Madison, the Capital of the State*, is one of the most extensive Publishing and Printing Establishments in the Northwest. From it have been issued during the past year a large number of volumes, embracing Law, History, Biography, etc., which have found large sales, and have been universally pronounced superior specimens of typography. These have been standard publications, and have all been Stereotyped at the STATE JOURNAL Establishment. This department is the largest and best that can be found in the Northwest, not excepting Chicago. Law Books from Ohio, Michigan, Illinois, Iowa, Mississippi, Arkansas, Texas, and Wisconsin have been printed here during the past year.

Orders solicited from all parts of the country, and satisfaction, in every respect, guaranteed Address,

THE METROPOLITAN NEWSPAPER OF THE M. E. CHURCH.

The Christian Advocate.

Office of Publication,

805 Broadway, N. Y.

Methodist Publishing and Mission Buildings.

ONE of the greatest *wonders* of the last hundred years of our country's *wonderful* history is the extraordinary development of the Methodist Episcopal Church, from but a few and feeble membership at the beginning of the century to be the largest and most powerful religious denomination in the land at its close. One reason of the Church's progress under the hand of God, aside from the indefatigable labors of her ministry, both clerical and lay, is the untiring industry with which she kept her entire membership alive to all their and her best interests through the medium of the printing press. Aside from the thousands of bound volumes of books, fitted for Sunday-school, family, and theological libraries, which emanate from her presses every year, the Church, through its Book Concerns, publishes ten weekly newspapers, besides several semi-weekly, monthly, and quarterly magazines and serials, whose average circulation each issue is considerably over one million copies.

The "**LEADING OFFICIAL CHURCH PAPER,**" whose name heads this page, is justly acknowledged to be the ablest and best religious weekly in the country, and now in its fiftieth year, is still rapidly gaining in popularity, not alone in the families of the Church whose interests it represents, but among the membership of sister denominations. Notwithstanding the great competition on every side, its patronage is increasing at home, and extends into every Christian country. It is not only the oldest and most widely circulated weekly Methodist journal in the world, but also has the largest subscription list of any one of the great denominational weeklies.

A large number of leading "*Banking,*" Mercantile, Manufacturing, and Publishing Houses in the principal cities have been steady patrons of its advertising columns, and recommend it highly as a first-class medium of communication between buyers and sellers of the better class, and prove their faith in it by their constant patronage.

A SPECIMEN COPY OF THE ADVOCATE,

With the rates of advertising, will be sent free to any address on application to

DENMARK.—STATISTICAL PREFACE.

DENMARK is situated between $53^{\circ} 23'$ and $57^{\circ} 44' 50''$ north latitude, and $8^{\circ} 5'$ and $12^{\circ} 45'$ east longitude, excepting the small island of Bornholm in the Baltic, about ninety miles east of Seeland, which lies in 15° east longitude. Denmark is bounded on the north by the Skager Rack, a gulf of the North Sea; on the east by the Cattogat, the Sound, the Baltic, and Mecklenburg-Schwerin; on the south by the Elbe; and on the west by the North Sea, which the Danes call the "Western Ocean."

The kingdom of Denmark has an area of 14,553 English square miles, and a population (in 1874) of about	1,860,000
Faroe Islands,	}
Iceland,	
Greenland,	
Danish possessions in the West Indies,	
Total,	1,988,000

The chief pursuits are agriculture, cattle-breeding, navigation, and fishing, about one-half of the population being engaged in these industries.

The annual yield of grain may be calculated at about 100,000,000 bushels, beside 200,000,000 barrels of potatoes, beans, etc. About three-fourths of the whole country is under cultivation. The raising of horses and cattle is quite an important interest; the statistics of live stock are, approximately, as follows: horses, 350,000; cattle, 1,250,000; sheep, 1,900,000; hogs, 450,000.

The exports consist mainly of grain, flour, horses, cattle, hogs, meat, pork, butter, wool, hides and skins, beer, brandy, train oil, etc. The principal imports are iron, coal, salt, sugar, coffee, tea, wood, cotton cloth, tobacco, rice, etc.

Of manufactures, the most important are china ware, terra cotta, tiles, crockery, glass, tobacco, linen, cloth, paper, and soap. There are large woolen mills, sugar refineries, iron foundries, machine shops, dockyards, distilleries, tanneries, etc.; flour mills can be found in all sections of the country. The commerce is not inconsiderable, and Danish joiners' work, gold and silver ware, watches, gloves, terra cotta, etc., find ready sale abroad.

The merchant navy consisted, in 1875, of 2766 sailing vessels of 183,740 registered tons; 114 steamships of 24,323 registered tons, making a total of 2880 vessels of 208,063 registered tons.

The national wealth of Denmark is estimated at 4500 millions of crowns,* of which 3400 millions is real estate and 1100 millions capital, or about 2200 crowns to each individual.

In the 350 savings banks of the country, there were deposited, at the end of 1874, 194,308,902 crowns.

The army numbers, in all, 52,000 men. The navy consists of three iron-clad frigates and eight iron-clad corvettes, carrying 79 guns; three frigates, three corvettes, and five schooners, carrying 136 guns; twelve iron gunboats, carrying 17 guns. Also, transports, etc.

The budget for 1876-77 estimated the revenue at 50,008,843 crowns against an expenditure of 46,885,045 crowns. The public debt, April 1st, 1876, was 181,117,700 crowns against 262,034,296 crowns in 1869. The debt has, in five years, been reduced by more than 80,000,000 crowns.

(The foregoing statistics are furnished by the Danish Commission.)

* The Danish crown = 26 4-5 cents, gold.

The length of railways in the kingdom, at the end of 1874, was 1024.5 kilometres, of which 665 belonged to the State and 359.5 to companies.

The work of the post office for the year 1873-74 was 16,487,777 letters, and 15,134,812 newspapers.

The length of telegraph lines, 2545 kilometres; length of wires, 7049 kilometres; number of offices, 174; messages in 1874, 762,609.

Elementary education is widely diffused in Denmark, attendance at schools being obligatory from the age of seven to fourteen. Instruction is furnished gratuitously in the public schools to children whose parents cannot afford to pay for their teaching. Besides the university of Copenhagen, there are thirteen public gymnasia in the principal towns of the kingdom, which afford a classical education, and under them are a large number of middle schools, for the children of the trading and higher working classes. Instruction at the public expense is given in the parochial schools, of which there were, in August, 1869, 28 in Copenhagen, 132 in the towns, and 2780 in the rural districts.

Denmark is a constitutional monarchy. The people are efficiently represented, and have a voice in all public matters. The press is virtually free, and only answerable to law. The national assembly consists of the Folksting and Landsting, and is invested with very extensive powers; it meets annually for two months, but the deputies are elected triennially, and receive a fixed allowance during their sittings. The several colonies are governed by governors or high bailiffs, nominated by and alone responsible to the crown. The king has a privy council, in which there are associated with him the heir-apparent and eight members.

Commission from DENMARK to the International Exhibition :

- JACOB HOLMBLAD, Manufacturer, President.
 OLAF HANSEN, United States Vice-Consul, Vice-President.
 JOH HANSEN, Austrian Consul-General, Treasurer.

PITTSBURGH

DAILY "EVENING CHRONICLE."

ESTABLISHED 1841.

The only Evening Paper in Pittsburgh receiving the
Associated Press Dispatches.

Circulating chiefly among families of Western Pennsylvania, Eastern Ohio,
and Western Virginia, no better medium for reaching the purchasing community
can be selected.

The Daily National Republican

PUBLISHED BY

W. J. MURTAGH, Washington, D. C.

Has a large and permanent circulation in the cities of Washington, Georgetown, and Alexandria and the surrounding country, and is steadily increasing.

It supports the Principles and Policy of the Republican Party, gives particular attention to local affairs, and has the latest Telegraphic, Commercial, and Financial News.

Advertisers and Business Men will find it a valuable and reliable means of communication with the public.

Terms, \$8 per year; five copies, one year, \$35.

THE

WEEKLY NATIONAL REPUBLICAN

PUBLISHED BY

W. J. MURTAGH & CO., Washington, D. C.,

Is issued in an enlarged form, consisting of eight pages, twice the size of the Daily Edition.

In addition to usual Political and General News and Literary Matter to be found in a first-class Weekly, it also prints the current OFFICIAL ANNOUNCEMENTS of the prominent Bureaus of the several Executive Departments of the Government, as well as such announcements as may be made from time to time by the respective heads of those departments. It is designed by this method to furnish to officers of the Civil, Military, and Naval Service of the Government, in a convenient and reliable form, a complete compendium of such proceedings of their superiors as may be of direct interest to them.

Terms, \$2 per year, invariably in advance.

As an advertising medium it has no superior. Specimen copies sent free on application to the publishers.

Clothing, Stationery, Weapons, Medical Appliances, Tools.

RHEUMATIC

LIMBMENT.

FOREHAND & WADSWORTH,

WORCESTER, MASS., U. S. A.,

MANUFACTURERS OF

Holster and Pocket Revolvers.

The cut represents our Army or Holster Revolver.

The Frame of this Pistol is Forged of the Best Wrought Iron, in One Piece without Hinge or Joint. Weight $2\frac{1}{2}$ lbs.

The cylinder has six chambers, 44-100 calibre, using centre-fire cartridges. The material in this pistol is of the best quality, and the workmanship and finish is not surpassed by any maker. It is the most simple in construction,

least complicated, and less liable to get out of order than any Holster pistol made in the country. They are only to be compared with other arms to confirm what we say. We also make Pocket Revolvers, both Single and Double-Action, Rim and Centre-fire. These arms are also made with the same care and excellent finish. Samples of all can be seen at our agents,

JOS. C. GRUBB & CO.,

56-60 SUDBURY ST., BOSTON.

EGYPT.—STATISTICAL PREFACE.

—♦—

THE territories under the rule of the sovereign of Egypt, including those on the Upper Nile and Central Africa, are vaguely estimated to embrace an area of 4,777,830 square kilometres, and to be inhabited by a population of 16,952,000, of whom about one-third are in Egypt proper. The following tabular statement gives the area and population of the various divisions of the kingdom, and its recent annexation, according to government estimate, of the year 1875:

DIVISIONS.	AREA, SQ. KILOMETRES.	POPULATION.
Egypt proper,	550,630	5,252,000
Nubia,	864,500	1,000,000
Former kingdom of Ethiopia,	2,918,000	5,000,000
Darfur, and other annexed territories,	444,700	5,700,000
	4,777,830	16,952,000

The great physical peculiarity of Egypt is the absence of rain, the land being only irrigated by the annual overflow of the Nile. The climate is remarkably mild and sound, especially south of the Delta; and in the desert, from Cairo to Alexandria, the air contains more moisture than to the south. From the middle of August to December, west winds prevail; east winds from that time till March; after that, unhealthy south winds or Khamsin till June; and from June till August the north or Etesian winds. Earthquakes are occasionally felt, and the temperature varies from 84° F. to 32°. The most remarkable phenomenon is, however, the regular increase of the Nile, fed by the fall of the tropical rains, which commence in 11° north latitude, in the spring; and falling first into the White, and then Blue Nile, reach Egypt in the middle, and the Delta in the end of June. In the middle of July, the red water appears, and the rise may be dated from that time—it attains its maximum at the end of September, and begins to decline visibly in the middle of October, and subsides to its minimum in April. At the end of November, the irrigated land has dried, and is sown, and is covered with green crops, which last till the end of February. In March is the harvest. The state of the Nile, in fact, marks the season more accurately than the variation of temperature. Egypt is by no means remarkably healthy, as, in addition to the visitations of plague and cholera, ophthalmia, diarrhœa, dysentery, and boils often prevail, and European, and even Nigritic races cannot be acclimatized.

Many of the European trees and plants are found in Egypt; the date-palm, the doom-palm, the sycamore, acacias, tamarisks, etc., are among its more peculiar botanical productions; also the papyrus, which anciently supplied material for paper, and the lotus or water-lily of the Nile. The extensive culture of papyrus has been, in modern times, replaced by that of the sugar-cane, cotton, indigo, and tobacco, and the plant has almost disappeared. Gourds and melons have always abounded. To the wheat and barley of antiquity have been added maize and durra. Egypt is very deficient in timber trees. The rocks of Egypt afforded the stones used in its edifices and sculptures; granite, syenite, basalt (at Assouan), breccia (in the Cossier Road), porphyry (from the quarries of Gebel Doshan, opened in the

reign of the Emperor Claudius), sandstone, and limestone. Alabaster (found at Cel-el-amarna) has been used from the earliest periods to the present day. Emeralds are produced by the mines of Gebel Zabara; salt, natron, and—since 1850—sulphur, are among the other mineral productions of Egypt.

Egypt proper is divided into three great districts, namely: Masr-el-Bahri, or Lower Egypt; El-Wustani, or Middle Egypt; and El-Said, or Upper Egypt—designations drawn from the course of the river Nile. These three geographical districts, subdivided into eleven administrative provinces, had, according to an enumeration made by the government in March, 1872, a rural population of 4,603,660, and an urban population of 648,340, dispersed over six towns, as follows:

Cairo,	349,983	Tanta,	28,500
Alexandria,	212,054	Rosetta,	15,002
Damietta,	29,383	Suez,	13,498

The Khedive is absolute sovereign or king. The administration is carried on by a Council of State of four military and four civil dignitaries.

The revenue of Egypt for the financial year ending September 10th, 1874, was calculated in the official budget at 1,982,394 purses,* the expenditures at 1,763,128 purses.

The public debt of Egypt consists chiefly of foreign loans. These are divided into two classes, namely, general loans, contracted by the State, and loans of the Khedive, as greatest of land-owners, raised on his individual responsibility.

The following table shows the actual state of the debt:

Funded debt,	£49,270,380
Floating debt,	7,600,000
	£56,870,380
Personal debt of the Khedive,	13,174,360
Total,	£70,044,740

The army is raised by conscription. It consisted, in January, 1875, of four regiments of infantry, of 3000 men each; of a battalion of chasseurs, of 1000 men; of 3500 cavalry, 1500 artillery, and two battalions of engineers, of 1500 each. There are, besides, two regiments of black troops, of Sudan, numbering 5000 men.

The Egyptian navy comprised, in 1875, 7 ships of the line, 6 frigates, 9 corvettes, 7 brigs, 18 gunboats and smaller vessels, and 27 transports.

The commerce of Egypt is very large, but consists, to some extent, of goods carried in transit. The total exports for the year 1873 amounted to about 1,450,000,000 piastres the imports to about 600,000,000 piastres. The merchant navy, in 1872, comprised 585 vessels of a total burthen of 59,874 tons.

The commerce of the world has been greatly benefited by the Suez Canal, which connects the Mediterranean with the Red Sea. Starting from Port Said, forty miles east of the Damietta mouth of the Nile, it proceeds across the isthmus and through lakes Menzaleh, El Ballah, and Timsah, on the shores of which latter stands the new town of Ismailia, and through the Bitter lakes to Suez. Its total length is 92 miles. Its actual width over the greater part of its length, does not permit of two vessels passing or crossing each other in the canal itself; but there are numerous sidings, by which vessels are enabled to cross one another; vessels measuring 430 feet in length and drawing 25 feet 9 inches of water have passed safely through the canal. Its actual cost, according to the report for the year 1875, was £17,518,729, exclusive of £1,360,000 bonds issued to pay for coupons on shares in arrear during part of the period of construction.

* 1 purse = 500 piastres = \$25 gold

The number and tonnage of vessels which passed through the canal in each of the five years, 1870 to 1874, were as follows :

YEAR.	VESSELS.	TONNAGE.
1870,	491	436,618
1871,	761	761,875
1872,	1082	1,439,169
1873,	1171	2,085,270
1874,	1264	2,423,672

Egypt had, on the 1st of January, 1875, a railway system of a total length of 955 English miles, open for traffic, with 502 miles under construction. With the exception of a short line of about 5 miles, all of the Egyptian railways are State property.

The telegraphs of Egypt were, at the commencement of 1875, of a total length of 4094 miles, the length of wires being 8690 miles. The whole of the telegraphs are State property.

Commission from EGYPT to the International Exhibition :

- HIS HIGHNESS, PRINCE MOHAMMED TAWFIC PACHA, President.
- HIS EXCELLENCY, CHERIF PACHA, Minister of Commerce, Vice-President.

TUNIS.—STATISTICAL PREFACE.

TUNIS, a country of Africa, and one of the Barbary States, is bounded on the north by the Mediterranean, on the west by Algeria, on the south by the Desert, and on the east by Tripoli and the Mediterranean. Its greatest length from north to south is about 440 miles; its average breadth, 160; area, upwards of 75,000 square miles; population, according to latest authorities, 1,200,000. Tunis is traversed by branches of the great Atlas range, which, in fact, has its proper termination here. The northern coast is rocky and steep, with numerous bays, of which the largest is the Gulf of Tunis; and two of its promontories, Capes Blanco (Ras-el-Abid) and Bon, are the most northern in Africa. The eastern coast, on the other hand, is flat, sandy, and infertile, like that of Tripoli, but has two large gulfs, Hammamet and Cabes. The southern part of Tunis belongs to the desert steppe known as Belud-el-Jerid. There is only one fresh water lake, of any consequence, that of Biserta or Bensart, near the north coast. The brooks and torrents of Tunis either lose themselves in the sand, or find their way to the sea after a short course. None are navigable. The longest is the Mejerdah, which flows in a generally northeastern direction into the Gulf of Tunis. Other streams are the Ved-el-Milianah and the Ved-el-Kebir. There are several mineral springs in the country. The climate of Tunis is fine, and the soil exceedingly fertile, so that, in spite of a very poor knowledge of agriculture, wheat, barley, maize, dhurra, pulse, olives, oranges, figs, grapes, pomegranates, almonds, and dates are abundantly produced. The culture of oil is more attended to, and is very lucrative. Great herds of cattle are fed on the plains; the sheep are famous for their wool; and the horses and dromedaries are no less celebrated. The chief mineral products are sea-salt, saltpetre, lead ore, and quicksilver. In the vicinity of the sea-coasts, considerable manufacturing and trading industry is manifested, more particularly in the cities of Tunis and Susa. Wool, olive oil, wax, honey, soap, hides, coral, sponges, dates, wheat, and barley are the principal exports. Cloth, leather, silks, muslins, spices, cochineal, and arms are transported by means of caravans to the interior of Africa, whence in exchange are brought for exportation to European and other countries, senna, gums, ostrich feathers, gold, and ivory. Total exports in 1874, valued at 28,815,358 francs; imports, 25,193,785 francs. During the same year the entries at the port of Tunis (Goulette) were 779 vessels, 116,927 tons burthen; departures, 768, of 108,031 tons burthen.

The Bey of Tunis receives his investiture from Constantinople; without the Sultan's authority he can neither declare war, conclude peace, nor cede territory; the Sultan's name must appear on all the coinage; the army must be at the disposal of the Sublime Porte. In internal matters the power of the Bey remains absolute.

The Tunisian army comprises about 4000 regulars, 5000 Karouglis (descendants of the Turkish janissaries), 5000 Zouaves (infantry), and 1500 spahis (cavalry). In

time of war the irregular cavalry can be increased to about 3000. The navy consists of two vessels, carrying 10 guns, and crews aggregating 250 men. The merchant navy comprises 300 vessels, ranging from 10 to 150 tons burthen.

There are about forty miles of railways in operation. There is at Tunis, a French, and also an Italian post office.

French telegraph lines connect the city of Tunis with various towns within the borders of the regency, as well as with Algiers and Europe.

Commission from TUNIS to the International Exhibition :

HIS EXCELLENCY SIDI HEUSSIM, General of Division, Minister of Instruction and Public Works, President.

G. H. HEAP, U. S. Consul, Resident Commissioner.

ORANGE FREE STATE.—STATISTICAL PREFACE.

THE republic of the Orange Free State is situated on the northeast boundary of Cape Colony, and is bounded as follows: On the west and northwest by the territory claimed for the chief, Nicholas Waterboer, under the name of Griqualand West, and by Betchuanaland, respectively, on the north and northeast by the Transvaal republic, on the east by the colony of Natal, and on the south by British Basutoland, the Native Reserve Lands, and the Cape Colonial divisions of Albert and Colesberg.

Its area is roughly taken to be about 70,000 square miles, but no accurate computation has hitherto been made, and the probability is that the actual extent will be found considerably greater.

The country consists of extensive undulating plains, which slope from the great Watershed, northward and westward, respectively, to the Vaal and Orange rivers, and is intersected at varying intervals by the Wilge, Rhenoster, Valsch, Vet, and Riet rivers, all of which empty their waters into the Vaal river, and the Caledon river, which empties into the Orange river. The courses of the large rivers are extremely tortuous and hollow, their banks being for the greater part very precipitous, and generally lined with water-willow, mimosa, and other trees indigenous to this country. The streams are usually fordable; during the rainy season, however, they become swollen and impassable.

The Orange Free State is, for the greater part, a grazing country, and though agriculture is everywhere attended to on a larger or smaller scale, according to the natural capabilities of the farms, still it is chiefly in the southern and eastern districts that it is carried on as the principal source of production, and it is almost exclusively from the districts of Rouxville, Lady Brand, Winburg, Bethlehem, and Harrismith, that grain is brought into the markets of the other districts.

Neither is it altogether without mineral wealth, as diamonds, rubies, and other precious stones have been discovered in various parts of the country. Coal also of a very good quality, and in paying quantities, has been found in the Winburg district, as well as on farms in the Lady Brand and Harrismith districts.

In the early days of this republic the distribution of animal life was a subject of great interest, from the fact of the immense variety of wild animals inhabiting the country. Even now the lion still frequents some sections of it. But, owing to the advance of civilization and human industry, all the larger animals, as the elephant, rhinoceros, hippopotamus, and giraffe, have retreated far away. Upon its vast undulating plains, however, a large and splendid variety of the antelope tribe roams in countless numbers. The country being favorable for the rearing of horses, cattle, and woolled sheep, the number of the latter contained therein may be estimated by millions.

Birds abound in great variety, particularly those of the larger kinds, among which might be enumerated the ostrich, eagle, vulture, pelican, hawk, and various species of crane.

The staple articles of export from the Orange Free State are wool and skins, and of late years diamonds and other precious stones, while owing to the mining population in the disputed territories along the Vaal river, a large trade in grain and other agricultural produce has been productive of great wealth to the country.

From the same cause, although more indirectly, trade in all articles of import, such as ironware implements, and manufactures in woolen, cotton, and silk goods, and articles for consumption, either as necessaries or luxuries, has received a great stimulus, and the commercial community is to all appearance in a healthy and prosperous condition.

The average height of the Orange Free State above the level of the sea is about 5000 feet, and the climate is generally salubrious. The winter here is cold but dry, the summer usually warm and moist, though droughts are sometimes experienced in the summer months. The air, however, is healthy and dry, as a rule, and this is particularly felt at Bloemfontein and its vicinity; consequently numbers of invalids suffering from pulmonary affections resort to Bloemfontein, and experience much benefit from a residence in this part of the country.

In other respects it has been noticed that the changes of the seasons are to a greater or less degree, according to their duration, accompanied by a greater liability to colds and fevers, generally of a typhoid type, and inflammatory affections, especially amongst children.

The government of the Orange Free State is republican, and its constitution vests the legislative powers in the Volksraad, the members of which are elected by their constituents for four consecutive years. The whole number of representatives (there being one for each chief town of a district, and one for each field cornetcy) is fifty-two. Of this number, the half retire by rotation every two years, and a new election takes place to fill up the vacancies.

The educational department of the country is only now receiving that vital attention which a subject of so vast importance to any country ought to have; and the legislature has only of late years been impressed with the absolute necessity of placing this department on the best possible footing. Accordingly, a fund is gradually being raised for educational purposes, which in 1876 will place at the disposal of the government an amount of £56,000.

Meantime, in accordance with an order made in 1872, an inspector of education has been appointed, who has already entered upon the task of remodeling the whole educational system. It is only right, nevertheless, to state that a government allowance of £90 a year has for years past been given to each district town, on condition of its subscribing at least one-half more, and attempts to establish good schools have everywhere been made by the district school committees, comprising the Landdrost, Dutch Reformed Church, and three elected members, with varying success in some places, but in others only to meet with failure, which is principally to be attributed to the defective system hitherto pursued.

The principal support hitherto afforded by the government consists in the liberal allowances made for the salaries of teachers in the Grey College; but owing to the short time that has elapsed since the arrival of one of them, and various other circumstances beyond the control of the government, the desired results are still to be looked for. Very praiseworthy efforts have also been made on behalf of education by the Anglican Church, in schools established at Bloemfontein and at Smithfield, and this latter has already shown very satisfactory results.

The revenue of the State, for the year 1872-73, was £112,040; the expenditure, during the same year, £102,142.

The government lands of the Orange Free State are still very considerable, though as nought compared with their original size, owing to the sales of farms which have been held from time to time. The value of fixed property of all kinds has increased greatly within the last few years. Even in the districts of Harrismith and Kroonstad, where land formerly was almost valueless, farms are now eagerly sought after, and change hands at very high rates. The average price of land throughout the whole State may now be fixed at 10s. per morgen. A rough estimate fixes the number of farms throughout the country as between 6000 and 7000. Fixed property changes ownership by registration. The population of the State is estimated at about 75,000 white, and 25,000 colored or native.

HEALTH! BEAUTY!!

Strong, Pure, and Rich Blood, Increase of Flesh and Weight, Clear Skin, and Beautiful Complexion secured to all through

DR. RADWAY'S SARSAPARILLIAN RESOLVENT

Every drop of the Sarsaparillian Resolvent communicates through the Blood, Sweat, Urine, and other fluids and juices of the system the vigor of life, for it repairs the wastes of the body with new and sound material. Scrofula, Consumption, Glandular Disease, Ulcers in the Throat, Mouth, Tumors, Nodes in the Glands and other parts of the system, Sore Eyes, Strumous Discharges from the Ears, and the worst forms of Skin Diseases, Eruptions, Fever Sores, Scald Head, Ring Worm, Salt Rheum, Erysipelas, Acne, Black Spots, Worms in the Flesh, Tumors, and all Weakening and Painful Discharges and Night Sweats are within the curative range of this wonder of Modern Chemistry, and a few days' use will prove to any person using it for either of these forms of disease, its potent power to cure them. If the patient, daily becoming reduced by the wastes and decomposition that are continually progressing, succeeds in arresting these wastes, and repairs the same with new material, made from healthy blood, and this the Sarsaparillian will and does secure, a cure is certain; for, when once this remedy commences its work of purification and succeeds in diminishing the loss of wastes, its repairs will be rapid, and every day the patient will feel himself growing better and stronger, the food digesting better, appetite improving, and flesh and weight increasing. Not only does the SARSAPARILLIAN RESOLVENT excel all known remedial agents in the cure of Chronic, Scrofulous, Constitutional, and Skin Diseases, but it is the only positive cure for Kidney, Bladder, and Urinary Diseases, Gravel, Diabetes, Dropsy, Stoppage of Water, Incontinence of Urine, Bright's Disease, Albuminuria, and in all cases where there are brickdust deposits, or the water is thick, cloudy, mixed with substance like the white of an egg, or threads like white silk, or there is a morbid, dark, bilious appearance, and white bonedust deposits, and when there is a pricking, burning sensation when passing water, and pain in the Small of the Back along the Loins.

Tumor of 12 years' growth cured by Radway's Resolvent.

BEVERLY, MASS., July 18th, 1869.

DR. RADWAY: I have had Ovarian Tumor in the ovaries and bowels. All the doctors said "there was no help for it." I tried everything that was recommended, but nothing helped me. I saw your Resolvent, and thought I would try it, but had no faith in it, because I had suffered for TWELVE YEARS. I took six bottles of the Resolvent, one box of Radway's Pills, and used two bottles of your READY RELIEF, and there is not a sign of a tumor to be seen or felt, and I feel BETTER, SMARTER, and happier than I have for twelve years. The worst tumor was in the left side of the bowels, over the groin. I write this to you for the benefit of others. You can publish if you choose. * * * * *

HANNAH P. KNAPP.

R. R. R.

RADWAY'S READY RELIEF

Cures the worst pains in from one to twenty minutes. Not one hour after reading this advertisement need any one suffer with pain. Radway's Ready Relief is a cure for every pain. It was the first and is *THE ONLY PAIN REMEDY* that instantly stops the most excruciating pains, allays Inflammations, and cures Congestions, whether of the Lungs, Stomach, Bowels, or other glands or organs, by one application, *in from one to twenty minutes*. No matter how violent or excruciating the pain the Rheumatic, Bedridden, Infirm, Crippled, Nervous, Neuralgic, or prostrated with disease may suffer,

RADWAY'S READY RELIEF

Will afford instant ease. Inflammation of the Kidneys, Inflammation of the Bladder, Inflammation of the Bowels, Congestion of the Lungs, Sore Throat, Difficult Breathing, Palpitation of the Heart, Hysterics, Croup, Diphtheria, Catarrh, Influenza, Headache, Toothache, Neuralgia, Rheumatism, Cold Chills, Ague Chills. The application of the READY RELIEF to the part or parts where the pain or difficulty exists will afford ease and comfort. Twenty drops in a half tumbler of water will, in a few moments, cure Cramps, Spasms, Sour Stomach, Heartburn, Sick Headache, Diarrhoea, Dysentery, Colic, Wind in the Bowels, and all Internal Pains. Travelers should always carry a bottle of RADWAY'S RELIEF with them. A few drops in water will prevent sickness or pains from change of water. It is better than French Brandy or Bitters as a stimulant.

FEVER AND AGUE.

FEVER AND AGUE cured for FIFTY CENTS. There is not a remedial agent in this world that will cure Fever and Ague and all other Malarious, Bilious, Scarlet, Typhoid, Yellow, and other Fevers (aided by RADWAY'S PILLS) as quick as RADWAY'S READY RELIEF. Fifty cents per bottle.

DR. RADWAY'S PILLS,

Perfectly tasteless, elegantly coated, for the cure of all Disorders of the Stomach, Liver, Bowels, Kidneys, Bladder, Nervous Diseases, Headache, Constipation, Costiveness, Indigestion, Dyspepsia, Biliousness, Bilious Fever, Inflammation of the Bowels, Piles, and all Derangements of the Internal Viscera. Warranted to effect a Positive Cure. RADWAY'S PILLS will free the system from all the above-named disorders. Price, 25 cents per box.

CHINA.—STATISTICAL PREFACE.

The following table gives the area and population of the various divisions comprising the Chinese empire :

	AREA IN ENGLISH SQ. MILES.	POPULATION.
China proper,	1,534,953	405,213,152
DEPENDENCIES.		
Mandchuria,	362,313	3,000,000
Mongolia,	1,288,035	2,000,000
Thibet,	643,734	6,000,000
Corea,	90,300	8,000,000
Lieukhien Islands,	2,310	
Liaotong,	2,982	1,000,000
Total,	3,924,727	425,213,152

China proper is included between $18^{\circ} 15'$ and $43^{\circ} 15'$ north latitude and 98° and $122^{\circ} 40'$ east longitude. Its coast-line exceeds 2500 miles, and its land frontier 4400 miles. It is divided into eighteen provinces, and includes the two large islands of Formosa and Hainan. The administration of the empire is parceled out into separate governments, corresponding with the provincial divisions, each of which has a complete organization, exchequer, army, and naval force of its own. Besides providing for the cost of its own administration, each province is required to remit annually to Peking a certain portion of its revenue to meet the expenses of the court, central government, and garrison of Peking, as well as to provide for exigencies arising in other provinces, and for the requirements of the garrisons in Turkestan, Mongolia, and Mandchuria, which are administered by military governors.

According to the latest reports, the imperial army comprises a total of 850,000 men, including 678 companies of Tartar troops, 211 companies of Mongols, and native Chinese infantry, a kind of militia, numbering 120,000 men. The native soldiers do not live in barracks, but in their own houses, mostly pursuing some civil occupation.

The Chinese are pre-eminent for their indefatigable industry. Of the immense territory peopled by them, there is scarcely a rood of arable ground that is not assiduously cultivated. Unfortunately, however, their husbandry is, to a great extent, nullified by the rude and ill-adapted implements employed therefor. Scientific agriculture is but slightly advanced in China, although the Chinese system of land irrigation is superior to that of any other people. As a manufacturing nation the Chinese are highly distinguished; porcelain originated entirely with them, and the art of spinning silk they also gave to the West. The lacquered ware produced in China, though very beautiful, must be considered inferior to that of Japan, but in the more minute arts of carving and inlaying, the Chinese have no superiors. Their ivory and mother of pearl industry is too well known to need description. Gunpowder, though a Chinese invention, is little manufactured, and that little of indifferent quality. Paper is ingeniously made of various material; it is, in general, thin, silky, and highly absorbent of ink.

Chinese trade has the peculiarity of being, for the most part, internal, the country supplying most articles of subsistence or luxury, and is carried on by means of canal and river navigation. The principal exports are tea, porcelain, raw and spun silk,

sugar, rhubarb, embroidery, lacquered wares, and carved articles of domestic ornament. The imports consist mainly of cotton and woolen goods, opium, raw cotton, furs, and edible birds' nests, which form an expensive luxury, and are held in high esteem. The total value of commodities exported from China, in 1865, reached the figure of \$173,609,085, as against imports of \$238,504,520. Of the exports, tea is the chief, showing a total quantity of 223,679,182 pounds shipped. The export of raw silk for the same year aggregated 40,726 bales, and of cotton, 35,855,792 pounds.

The grand canal, about 700 miles in length, has greatly facilitated the internal trade of the country. China is traversed in all directions by 20,000 imperial roads, most of which are badly kept. There is a postal service, but of a very rude kind.

Education, as the high road to official employment, to rank, wealth, and influence, is eagerly sought by all classes. Literary proficiency commands everywhere respect and consideration, and primary instruction penetrates to the remotest villages. Self-supporting day-schools are universal throughout the country, and the office of teacher is followed by a great number of the *litterati*. Government provides state examiners, but does not otherwise assist in the education of the people.

The Chinese executive system is based on those noteworthy competitive examinations which are intended to sift out from the millions of educated Chinese the best and ablest for the public service.

JAPAN.—STATISTICAL PREFACE.

JAPAN proper comprehends four large islands, viz.: Nippon (the Japanese mainland), Sikok or Sikopf, Kiusiu, and Yesso, and extends from 31° to 45° 30' north latitude. The empire of Japan includes about 3800 small islands and islets besides the four larger ones, and is situated between 26° and 52° north latitude, and 128° and 151° east longitude. It is bounded on the north by the Sea of Okotsk, on the east by the north Pacific Ocean, on the south by the eastern Sea of China, and on the west by the Sea of Japan. The islands of Japan appear to be of volcanic origin, and that part of the Pacific on which they rest is still intensely affected by volcanic action. Earthquakes occur very frequently in Japan, although certain parts of the country are exempt. Japan has been called the land of mountains: but though these are very numerous, and many of them volcanic, they are of moderate elevation, and rarely attain the limits of perpetual snow. The country generally is of moderate elevation, with fertile valleys, picturesque landscapes, and a coast indented with magnificent harbors; the soil is productive, rich in mineral wealth, and teeming with every variety of agricultural produce. Springs, lakes, and rivers are numerous; but the last, being sand-choked, are valuable chiefly for the purposes of irrigation.

Our knowledge of the climate of Japan is yearly increasing. June, July, and August are the months of rain, which sometimes descends in unceasing torrents. The months of October and November are the pleasantest and most genial of the twelve, when fine weather is enjoyed without the scorching heat of summer. The summers are very hot, and the winters in the northern parts almost Siberian; the thermometer rising to 96° in the shade in the former, and sinking to 18° below zero in the latter season. Alcock says: "The thermometer in the shade (during the summer) ranges from 70° to 85°, and averages 80° between the morning and the evening, while it is sometimes below 70° at night." Hurricanes and waterspouts are frequent; dense fogs hide the sun, sometimes for four or five days together; and about the change of the monsoons, typhoons and equinoctial gales frequently sweep the Japanese seas.

The following figures are furnished by the Japanese commission:

Area,	23,740 ris (the ri equals 2¼ miles).
Population.—Male,	16,891,729
Female,	16,408,946
Total,	33,300,675
Imports,	22,841,166.93 yens.*
Exports,	18,367,259.29 "
Revenue,	81,552,294. "
Expenditure,	79,881,820. "
Army,	42,073 men

The navy consists of 20 vessels, manned by 3757 men.

The country is rich in minerals, gold, silver, iron, sulphur, and especially copper abound. There are also large quantities of coal. Amongst the most remarkable of its vegetable productions is the camphor tree, the varnish or lacquer tree, the paper mulberry tree, the vegetable wax tree, the tea shrub, the tobacco plant, and the rice plant. The principal manufactures are those of silk and cotton. The internal trade is very extensive, and rigid regulations are in force to protect and encourage home industry. In the mechanical arts the Japanese have attained great excellence, especially in metallurgy, and in the manufacture of porcelain, lacquer ware, and silk fabrics. In some of these departments works are produced so exquisite in design and execution, as to more than rival the best products of Europe

* The yen equals 99.7 cents gold.

The Japanese government is organized on a basis which is partly European. The Mikado is supreme in temporal and spiritual matters, but the work of government is carried on by the Great Council, which is divided into three sections, denominated Centre, Right, and Left. The Centre is composed of the Prime Minister, Vice Prime Minister, and five advisers. The left is made up exclusively of the Council of State, the functions of which are analogous to those of the French Conseil d'Etat, so far as the preparation and discussion of laws is concerned. The Right includes all the ministers and vice-ministers of eight departments into which the administration is divided. The ministers, either individually or united in a Cabinet, decide all ordinary questions; but points of real importance are reserved for the Great Council, presided over by the Mikado. The local administration in the provinces is in the hands of prefects, one of them residing in each of the 75 districts into which Japan is divided.

Education is very general in Japan. In 1871 a Ministry of Instruction was created, and as a result of its efforts, public primary schools are increasing rapidly, especially in the towns; but the movement is far more marked in the western provinces and on the coast than in the interior. Private schools are more abundant still, and any person being at liberty to establish them,—subject to a permission, which is always given,—they spring up with facility wherever wanted. In order to facilitate the acquirement of foreign languages, the government has engaged European professors, and has also sent, at public expense, a large number of students to America and Europe. The first line of railway, from Yokahama to Yeddo, 17 miles long, was opened for traffic on the 12th of June 1875, and other lines were in progress at that date.

The post office carried 17,095,842 letters in 1874. The number of post offices at that date was 3244.

Commission from the JAPANESE EMPIRE to the International Exhibition :

HIS EXCELLENCY OKUBO TOSHIMICHI, Minister of the Interior and Privy Counsellor, President.

HIS EXCELLENCY LIEUTENANT-GENERAL SAIGO YORIMICHI, Imperial Army, Vice-President.

MR. KAWASE HIDEHARU, Vice-President Bureau of Agriculture and Industry, Commissioner-General.

MR. TANAKA YOSHIO, Ministry of the Interior.

MR. SEKIZAWA AKEKIO, Bureau of Industry.

MR. YAMATAKA NOBUAKIRA, Bureau of Industry.

MR. SHIODA MASASHI, Bureau of Industry.

MR. ISHIHARA TOYOYASU, Bureau of Industry.

MR. ISHIDA TAMETAKE, Bureau of Industry.

MR. YAMAO TSUNETARO, Bureau of Industry.

MR. KUBO HIROMICHI, Ministry of the Interior.

MR. NOTOMI SKEJIRO, Bureau of Industry.

MR. SHIBATA HIRUSHI, Bureau of Industry.

MR. MAKIYAMA KOHEI, Bureau of Industry.

MR. ISHII YOSHITAKA, Bureau of Industry.

MR. ASAHI NOBORI, Ministry of the Interior.

MR. KAWARA NORITACHI, Bureau of Industry.

MR. SASASE MOTO AKIRA, Bureau of Industry.

MR. TAKEDA, Bureau of Agriculture and Industry.

MR. SUGIYAMA KATZUNARI, Bureau of Industry.

MR. HITAKA GIRO, Lieutenant of Imperial Army.

MR. OMORI ICHIU, Bureau of Agriculture and Industry.

MR. ASAMI TADATSUNE, Bureau of Agriculture and Industry.

MR. FUKUI MOKOTO, Bureau of Agriculture and Industry.

MR. FRITZ CUNLIFFE OWEN, Attache.

MR. TAWARA WAKICHIO, Attache.

Textile Substances, of Vegetable or Animal origin.

- 142 Steam Manufactory at Tomioka, near Tokio, owned by the Imperial Ministry of Commerce and Industry.—Cocoons and raw silk. 668

HAWAII.—STATISTICAL PREFACE.

THE islands forming the kingdom of Hawaii are eight in number, exclusive of one or two small islets. The chain runs from southeast to northwest, and lies in the middle of the Pacific Ocean, in latitude 19° — 22° north, and longitude 155° — 160° west. Area 7400 square miles; population (1872), 56,897, of whom 2539 were Europeans. The names; with the areas, of the respective islands are: Hawaii (formerly Oghyhee), 4850 square miles; Maui, 750; Oahu, 700; Naui, 780; Molokai, 170; Lanai, 170; Nuhauf about 110; and Kahoolau, about 40 square miles.

Situated near the middle of the Pacific Ocean, about half the distance from San Francisco in North America that they are from Melbourne in Australia and Canton in China, the Sandwich Islands form an oasis in the middle of a wide ocean waste, and offer convenient stations for the refreshment and repair of the merchantmen and whalers that traverse the Pacific. They are of volcanic origin, and contain the largest volcanoes, both active and quiescent, in the world. The most prominent physical features of the group are the two lofty mountain peaks of Hawaii, Mauna Kea and Mauna Loa, each of which is 14,000 feet in height, or within 1860 feet of the loftiest of the Alps. Besides those two chief peaks, which stand apart from each other, and one of which is covered with perpetual snow, the island is traversed by other mountains, which give it a rugged and picturesque outline, and in some cases front the sea in bold, perpendicular precipices, from 1000 to 3000 feet in height. In general, the islands are lofty—the small islet of Lehua is 1090 feet high, and the upland regions of Kauai are, on an average, 4000 feet above sea level. Within the coral reefs, which, in single, and more rarely in double ridges, skirt portions of the coasts, sandy shores, leading up to rich pasture-lands, and occasionally to productive valleys, are frequently seen. Everywhere, however, the configuration of the surface betrays the volcanic origin of the islands. Extinct and partially active volcanoes occur in most of the islands. Kilauea, on the Mauna Loa mountain in Hawaii, the largest active volcano in the world, has an oval-shaped crater nine miles in circumference, and is 6000 feet above sea level. In the centre of this immense caldron is a red sea of lava, always in a state of fusion. At intervals, the lava is thrown to a great height, and rolls in rivers down the mountain sides. On Maui, the crater of Mauna Haleakala (House of the Sun), by far the largest known, is from 25 to 30 miles in circumference, from 2000 to 3000 feet deep, and stands 10,000 feet above sea level. Within this huge pit, about 16 basins of old volcanoes, whose ridges formed concentric circles, have been counted. Good harbors are few. The chief is that of Honolulu, in Oahu, with $22\frac{1}{2}$ feet of water in its shallowest parts. On the same island is Ewa, an immense basin, with 12 feet of water at low tides. During the

THE ORIGIN OF CO-OPERATIVE NEWSPAPER ADVERTISING.

Co-operative newspaper printing, as now practised, originated in Wisconsin twelve years ago. It is termed *co-operative* for the reason that one side of each of the newspapers is printed at a central office, and the paper sent in its half-printed state to the home office, where it is completed with editorials, local news, and other matter prepared by the editor or publisher. In December, 1846, the idea of co-operation, *with advertisements*, occurred to Mr. Aikens, while yet serving his time as an apprentice, in printing the message of President Polk on one side of a country newspaper of New England at Boston, and the other half being printed at the local office.

Mr. A. J. Aikens, a practical printer and business man, conceived the idea of reducing the cost of ready-printed paper, as it is now termed, to country publishers, by making an agreement with them to use a certain space in each of their papers for advertisements that he might procure. This plan of co-operation he put into practice twelve years ago, at the office of Cramer, Aikens & Cramer, Milwaukee. It at once became successful, leading to the establishment of co-operative newspaper printing-offices in Chicago, New York, St. Louis, Cincinnati, Memphis, St. Paul, and other places. There are now over two thousand newspapers printed upon the co-operative plan in the United States and Canadas, and the number is constantly increasing, it having more than doubled in the last five years. The enterprise is no longer an experiment, but an established success, and the system is one yielding manifold advantages to advertisers as well as to local publishers.

The American Newspaper Union

Is essentially national. The papers represented in it are located in all the States of the Union and in nearly five hundred county seats. They circulate over the whole area of the country from Maine to Colorado, distributing at least *one hundred copies every year to each square mile of the settled portions of the United States.*

Although, as a whole, the Union List is national, covering all sections, it is so made up of different members as to be susceptible of easy division into sections—East, Middle, West, South. The distribution of the papers is as follows:

New England 78	Illinois 117	Nebraska 15
New York 101	Michigan 86	Missouri 17
New Jersey 27	Wisconsin 98	Georgia 10
Pennsylvania 65	Tennessee 29	Alabama 32
Virginia 24	Kentucky 29	Louisiana 11
No. and So. Carolina 24	Minnesota 79	Mississippi 29
Ohio 122	Iowa 85	Other States 46
Indiana 81		

AGGREGATE CIRCULATION.

The circulation of these papers is large and constantly increasing. It is larger than the circulation of any other lists or combinations of country papers in the United States—the last aggregate weekly circulation being *seven hundred thousand seven hundred and thirty copies (700,730).*

SEND TO EITHER OFFICE FOR A CIRCULAR.

prevalence of the trade wind, which blows southwest for about nine months of the year, the south shores of the islands afford safe anchorage almost everywhere.

At Honolulu, the extremes of temperature in the shade during the 12 months are 90° and 50°, and the diurnal range is 12°. Rains brought by the northeast trade-wind are frequent on the mountains; but on the leeward side of the islands little rain falls, and the sun is rarely obscured by the clouds. The soil, the constituent parts of which are mainly scoriæ, decomposed lava, and sand, is generally thin and poor. This, however, is not universally the case. At the bases of the mountains and in the valleys, where abrasion, disintegration, and the accumulation of vegetable mould have gone on for ages, there are extensive tracts as fertile as they are beautiful. The islands produce fine pasturage in abundance, and large herds are bred and fattened to supply meat to the whalers and merchant ships. The upland slopes of the mountains are clothed with dense forests; and lower down are grassy plains and sugar and coffee plantations. Basalt, compact lava, coral rock, and sandstone are used for building purposes. No metals occur. Several of the islands, especially Hawaii and Kauai, are well supplied with rivers, which, from the size and conformation of the group, are necessarily small, but afford great facilities for irrigation. Vast numbers of semi-wild horses roam the islands, and while they consume the pasturage and break down the fences, are of little use. The indigenous fauna is small, and consists mainly of swine, dogs, rats, a bat that flies by day, birds of beautiful plumage, but for the most part songless. Among the indigenous trees and plants are the sugar-cane, banana, plantain, cocoanut, candle-nut, various palms, the taro, a succulent root which formed the staple of the food of the natives, and is still generally used, the cloth-plant, and the *ti*, the roots of which were baked and eaten, while the leaves were used for thatching huts. Cattle and other useful and foreign animals and plants were introduced by Vancouver and other navigators. In 1860 there were 30,000 mules and semi-wild horses in the kingdom.

The government of Hawaii is a constitutional monarchy.

The public revenue during the year ending March 31st, 1874, was 1,136,524 dollars; the public expenditure, 1,192,512 dollars. The public debt, at the same date, 355,050 dollars.

The principal exports during the year 1874 were: Sugar, 24,567,000 pounds; rice, 1,188,000 pounds; coffee, 75,000 pounds; pulu, 418,000 pounds; tallow, 126,000 pounds; wool, 400,000 pounds; hides, 94,575. Total value, 1,839,000 dollars. The imports during the same year amounted in value to 1,310,000 dollars.

Of 115 vessels that entered the port of Honolulu during 1874, 64 were American, 30 English, 15 Hawaiian, etc.

SUMMER EXCURSIONS.

THE PENNSYLVANIA RAILROAD CO.

Have arranged for the Centennial Year a system of
SUMMER EXCURSION ROUTES,

More comprehensive and complete than was ever before presented to the American people. These Routes reach EVERY PLACE OF INTEREST OR ATTRACTION IN THE EASTERN, MIDDLE, AND SOUTHERN STATES, AND THE DOMINION OF CANADA, including

NIAGARA FALLS, THE THOUSAND ISLANDS, WATKINS GLEN, SARATOGA, THE WHITE MOUNTAINS, NEWPORT, LAKE GEORGE, ALL THE VIRGINIA SPRINGS, and many others.

VISITORS TO THE CENTENNIAL EXHIBITION

Will find the lines of this Company available for reaching, within a few hours' time and at very small outlay, such famous resorts as

CAPE MAY, LONG BRANCH, THE DELAWARE WATER GAP, BEDFORD SPRINGS, GETTYSBURG, MINNEQUA SPRINGS, KANE, RENOVO,

And hundreds of beautiful villages and towns in the mountains of Pennsylvania, where the accommodations are excellent and the scenic attractions all that can be desired.

THE PENNSYLVANIA RAILROAD CO.

Devote special attention to this Summer Travel. The construction and equipment of their lines render travel over them thoroughly enjoyable, and the tickets issued afford every facility for recreation, recuperation, and pleasure.

PAMPHLETS OF ROUTES can be had gratuitously at the offices of the Company in New York, Boston, Philadelphia, Baltimore, Washington, Harrisburg, Altoona, and Pittsburg, and also a handsomely illustrated book describing all prominent resorts.

FRANK THOMSON,
General Manager.

L. P. FARMER,
Ass't Gen. Pass. Agent.

D. M. BOYD, JR.,
Gen. Passenger Agent.

CLASSIFICATION.

DEPARTMENT III.—EDUCATION AND SCIENCE.

EDUCATIONAL SYSTEMS, METHODS, AND LIBRARIES.

CLASS 300.—Elementary instruction. Infant schools and kindergartens, arrangements, furniture, appliances, and modes of training.

Public schools, graded schools, buildings and grounds, equipments, courses of study, methods of instruction, text-books, apparatus, including maps, charts, globes, etc.; pupils' work, including drawing and penmanship; provisions for physical training.

CLASS 301.—Higher education. Academies and high schools.

Colleges and universities. Buildings and grounds; libraries, museums of zoology, botany, mineralogy, art, and archeology; apparatus for illustration and research, mathematical, physical, chemical, and astronomical courses of study; text-books, catalogues, libraries, and gymnasiums.

CLASS 302.—Professional schools, theology, law, medicine, and surgery, dentistry, pharmacy, mining, engineering, agriculture, and mechanical arts, art and design, military schools, naval schools, normal schools, commercial schools, music.

Buildings, text-books, libraries, apparatus, methods, and other accessories for professional schools.

CLASS 303.—Institutions for instruction of the blind, deaf, and dumb, and the feeble-minded.

CLASS 304.—Education reports and statistics.

National bureau of education.

State, city, and town systems.

College, university, and professional systems.

CLASS 305.—Libraries, history, reports, statistics, and catalogues.

CLASS 306.—School and text-books, dictionaries, encyclopædias, gazetteers, directories, index volumes, bibliographies, catalogues, almanacs, special treatises, general and miscellaneous literature, newspapers, technical and special newspapers and journals, illustrated papers, periodical literature.

INSTITUTIONS AND ORGANIZATIONS.

CLASS 310.—Institutions founded for the increase and diffusion of knowledge. Such as the Smithsonian Institution, the Royal Institution, the Institute of France, British Association for the Advancement of Science, and the American Association, etc., their organization, history, and results.

CLASS 311.—Learned and scientific associations. Geological and mineralogical societies, etc. Engineering, technical, and professional associations. Artistic, biological, zoological, medical schools, astronomical observatories.

CLASS 312.—Museums, collections, art galleries, exhibitions of works of art and industry. Agricultural fairs, state and county exhibitions, national exhibitions. International exhibitions.

Scientific museums and art museums.

Ethnological and archeological collections.

CLASS 313.—Music and the drama.

SCIENTIFIC AND PHILOSOPHICAL INSTRUMENTS AND METHODS.

CLASS 320.—Instruments of precision, and apparatus of physical research, experiment, and illustration.

Astronomical instruments and accessories, used in observatories.

Transits, mural circles, equatorials, collimators.

Geodetic and surveying instruments. Transits, theodolites, needle compasses. Instruments for surveying underground in mines, tunnels, and excavations.

Nautical astronomical instruments. Sextants, quadrants, repeating circles, dip-sectors.

Leveling instruments and apparatus. Carpenters' and builders' levels, hand levels, water levels, engineers' levels.

Instruments for deep-sea sounding and hydrographic surveying.

Meteorological instruments and apparatus.

Thermometers, pyrometers.

Barometers.

Hygrometers and rain gauges.

Maps, bulletins.

Blanks for reports, methods of recording, reducing, and reporting observations.

CLASS 321.—Indicating and registering apparatus, other than meteorological; mechanical calculation.

Viameters, pedometers, perambulators.

Gas meters.

Water meters, current meters, ships' logs, electrical logs.

Tide registers.

Apparatus for printing consecutive numbers.

Counting machines, calculating engines, arithmometers.

CLASS 322.—Weights, measures, weighing and meteorological apparatus.

Measures of length; graduated scales on wood, metal, ivory, tape, or ribbon; steel tapes, chains, rods, verniers, rods, and graduated scales for measuring lumber, goods in packages, casks, etc., gaugers' tools and methods.

Measures of capacity for solids and liquids.

Weights. Scales and graduated beams for weighing; assay balances, chemical balances. Ordinary scales for heavy weights; weighing locomotives and trains of cars. Postal balances. Hydrometers, alchemeters, lactometers, etc.; gravimeters. (*See Class 571.*)

CLASS 323.—Chronometric apparatus.

Chronometers. Astronomical clocks. Church and metropolitan clocks. Ordinary commercial clocks. Pendulum and spring clocks. Marine clocks. Watches. Ciepsydras, hour glasses, sun dials. Chronographs, electrical clocks. Metronomes.

CLASS 324.—Optical and thermotic instruments and apparatus.

Mirrors, plane and spherical.

Lenses and prisms.

Spectacles and eyeglasses, field and opera glasses, graphoscopes and stereoscopes.

Cameras and photographic apparatus.

Microscopes.

Telescopes.

Apparatus for artificial illumination, including electric, oxyhydrogen, and magnesium light.

Stereopticons.

Photometric apparatus.

Spectroscopes and accessories for spectrum analysis.

Polariscopes, etc.

Thermotic apparatus.

CLASS 325.—Electrical apparatus.

Friction machines.

Condensers and miscellaneous apparatus to illustrate the discharge.

Galvanic batteries and accessories to illustrate dynamical electricity.

Electro-magnetic apparatus.

Induction machines, Rumkorff coils, etc.

Magnets and magneto-electrical apparatus.

CLASS 326.—Telegraphic instruments and methods.

Batteries and forms of apparatus used in generating the electrical currents for telegraphic purposes.

Conductors and insulators, and methods of support, marine telegraph cables.

Apparatus of transmission; keys, office accessories, and apparatus.

Receiving instruments, relay magnets, local circuits.

Semaphoric and recording instruments.

Codes, signs, or signals.

Printing telegraphs for special uses.

Electrographs.

Dial or cadran systems.

Apparatus for automatic transmission.

CLASS 327.—Musical instruments and acoustic apparatus.

Percussion instruments, drums, tamborines, cymbals, triangles.

Pianos.

Stringed instruments other than pianos.

Automatic musical instruments, music boxes.

Wind instruments of metal and of wood.

Harmoniums.

Church organs and similar instruments.

Speaking machines.

Vocal music.

ENGINEERING, ARCHITECTURE, CHARTS, MAPS, AND GRAPHIC REPRESENTATIONS.

(For Agricultural Engineering, see Class 680.)

(For Mining Engineering, see Class 120.)

CLASS 330.—Civil engineering. Land surveying, public lands, etc.

River, harbor, and coast surveying. Construction and maintenance of roads, streets, pavements, etc. Surveys and location of towns and cities, with systems of water supply and drainage. Arched bridges of metal, stone, brick, or beton. Trussed girder bridges. Suspension bridges. Canals, aqueducts, reservoirs, construction of dams. Hydraulic engineering and means of arresting and controlling the flow of water.

Submarine constructions, foundations, piers, docks, etc.

CLASS 331.—Dynamic and industrial engineering. Construction and working of machines; examples of planning and construction of manufacturing and metallurgical establishments.

CLASS 332.—Railway engineering. Location of railways, and the construction and management of railways.

CLASS 333.—Military engineering.

CLASS 334.—Naval engineering.

CLASS 335.—Topographical map. Marine and coast charts.

Geological maps and sections.

Botanical, agronomical, and other maps, showing the extent and distribution of men, animals, and terrestrial products. Physical maps.

Meteorological maps and bulletins. Telegraphic routes and stations.

Railway and route maps. Terrestrial and celestial globes. Relief maps and models of portions of the earth's surface. Profiles of ocean beds and routes of submarine cables.

PHYSICAL, SOCIAL, AND MORAL CONDITION OF MAN.

CLASS 340.—Physical development and condition.

The nursery and its accessories.

Gymnasiums, games, and manly sports. Skating, walking, climbing, ball-playing, acrobatic exercises; rowing, hunting, etc.

CLASS 341.—Alimentation. Markets; preparation and distribution of food.

CLASS 342.—The dwelling. Sanitary conditions and regulations. Domestic architecture.

Dwellings characterized by cheapness, combined with the conditions essential to health and comfort.

Fire-proof structures.

Hotels, club-houses, etc.

Public baths.

CLASS 343.—Commercial systems and appliances.

Mercantile forms and methods, counting-houses and offices.

Banks and banking.

Saving and trust institutions.

Insurance; fire, marine, life, etc.

Commercial organizations, boards of trade, merchants', produce, and stock exchanges.

Corporations for commercial and manufacturing purposes.

Railway and other transportation companies.

Building and loan associations.

CLASS 344.—Money. Mints and coining.

Collections of current coins.

Historical collections.

Tokens, etc.

Bank notes and other paper circulating mediums.

Commercial paper, bills of exchange, etc.

Securities for payment of money, stocks, bonds, mortgages, ground rents, quit rents.

Precautions against counterfeiting and misappropriation of money.

CLASS 345.—Government and law. Various systems of government.

Departments of government. Revenue and taxation, military organization, executive powers, legislative forms and authority, judicial functions and systems, police regulations, government charities.

International relations; international law; diplomatic and consular service, etc., allegiance and citizenship; naturalization.

Codes.

Municipal government.

Protection of property in inventions.

Postal system and appliances.

Punishment of crime.

Prisons and prison management and discipline; police stations; houses of correction; reform schools; naval or marine discipline; punishment at sea.

CLASS 346.—Benevolence. General hospitals.

Special hospitals for the eye and ear, for women, etc.

Hospitals for contagious and infectious diseases.

Hospitals for the insane—under State control, and private asylums.

Quarantine systems and organizations.

Sanitary regulations of cities.

Dispensaries.

Inebriate asylums.

Lying-in asylums.

Magdalen asylums.

Asylums for infants and children. Foundling and orphan asylums, children's aid societies.

Homes for the aged and infirm; homes for aged men and women; soldiers' homes; homes for the maimed and deformed; sailors' homes.

Treatment of paupers. Almshouses, feeding the poor, lodging houses.

Emigrant aid societies.

Treatment of aborigines.

Prevention of cruelty to animals.

CLASS 347.—Co-operative associations.

Political societies and organizations.

Military organizations and orders.

Trade unions and associations.

Industrial organizations.

Secret orders and fraternities.

CLASS 348.—Religious organizations and systems. Origin, nature, growth, and extent of various religious systems and faiths. Statistical, historical, and other facts.

Religious orders and societies, and their objects.

Societies and organizations for the propagation of systems of religion by missionary effort.

Spreading the knowledge of religious systems by publications.

Bible societies, tract societies, colportage.

Systems and methods of religious instruction and training for the young.

Sunday-schools, furniture and apparatus.

Associations for religious or moral improvement.

Dispensing charities, church guilds.

CLASS 349.—Art and industrial exhibitions. Agricultural fairs, state and county exhibitions, national exhibitions, international exhibitions, international congresses, etc.

UNITED STATES.

School Books, Furniture, Apparatus, Statistics.

Educational Systems, Methods, and Libraries.

- 1 Barnes, A. S., & Co., New York, N. Y.—School books, maps, charts, etc. T 73 to 78. 300
- 2 New York Silicate Book Slate Co., New York, N. Y.—School book slates, liquid blackboard slating, blackboards on wall, cloth, and paper. T 68. 300
- 3 Smith, J. L., Philadelphia, Pa.—Maps, map rollers and cases, drawing paper, map work. T 73 to 78. 300
- 4 Moeller, Peter W., New York, N. Y.—Adjustable blackboard frame. Q 78. 300
- 5 Nims, H. B., & Co., Troy, N. Y.—Terrestrial and celestial globes. P 77. 300
- 6 Bancroft, J. A., & Co., Philadelphia, Pa.—School desks, seats, and merchandise; Sunday-school and church furniture. T 51. 300
- 7 Mitchell, S. A., Philadelphia, Pa.—Atlases, maps, engravings, etc. T 73 to 78. 300
- 8 Schermerhorn, J. W., & Co., New York, N. Y.—Books, charts, and modern school material. T 73 to 78. 300
- 9 Peirce, I. Newton, Philadelphia, Pa.—Combination desks, seats, settee, blackboard, model of a log cabin school house, maps. (*Pennsylvania Educational Building.*) 300
- 10 Steiger, E., New York, N. Y. T 73 to 78.
- a* Kindergarten material. 300
- b* French and German school books, reading charts, automatic tellurian, globes, relief maps. T 73 to 78. 306
- 11 Cowperthwait & Co., Philadelphia, Pa. T 73 to 78.
- a* Text books and wall maps for schools. 300
- b* Illustrated works. 306
- 12 Sower, Potts, & Co., Philadelphia, Pa. T 73 to 78.
- a* Outline wall maps. 300
- b* Normal school books. 301
- c* Publications of five generations of Sower family. 306
- 13 Ditson, J. E., & Co., Philadelphia, Pa.—Sheet music. T 73 to 78. 302
- Stevens Institute of Technology, Hoboken, N. J.—Models, drawings, apparatus of engineering, etc.; testing machines for lubricants, autographic testing machine for materials of construction. T 67. 302
- 15 Hampton Normal and Agricultural Institute, Hampton, Va.—Views, oil paintings, ground plan of building and of experimental farm; photographs of building and of students, examination papers. (*South Gallery.*) 302
- 16 State of Indiana Educational Department (by S. H. Smart, Indianapolis).—Bound volumes of examination manuscripts, by pupils of schools at Indianapolis, Evansville, Terre Haute, Fort Wayne, Logansport, Richmond, Goshen, Plymouth, Bedford, Huntington, Elkhart, Lawrenceburg, Mishawaka, Kokomo, Vevay, Delphi, Franklin, Bartholomew county, Martinville, Salem, Vanderburg county, and Wayne county.
- Reports and works of Indiana authors.
- Drawings from schools.
- "Indiana School Journal," plans of buildings, maps of cities, school blanks, etc.
- Herbariums and botanical specimens prepared by pupils of schools at Bedford and Indianapolis.
- School apparatus from Terre Haute.
- Specimens from Owen cabinet.
- Mineral collection by pupils of Huntington schools.
- Electrical apparatus for weighing under glass, invented by Prof. H. W. Wiley, Purdue University.
- Chemical products by pupils of Purdue University.
- Indiana fishes prepared by Prof. Cope-land, of Indianapolis High School.
- Zoological specimens prepared by pupils of Indianapolis High School.
- Native woods of Huntington county, by pupils of Huntington city schools.
- Drawings from Fort Wayne, Indiana-apolis, and La Fayette schools.
- Photographed blackboard work, specimens of penmanship and written music from Indianapolis schools.
- School law of the State, condensed.
- Photographed blackboard work from La Fayette, Fort Wayne, and Terre Haute schools.
- Photographs of prominent educators.
- Primary work of Indianapolis and Fort Wayne schools.
- Models of Ward and High School buildings at Indianapolis, Fort Wayne, Evansville, Muncie, Terre Haute, and La Fayette.
- Model of log school house, the first built in Delaware county, Indiana.
- Charts, exhibiting school system and its growth, and the college system of the State.
- Banners, exhibiting school system, statistics, distribution of school houses, and the

School Books, Furniture, Apparatus, Statistics.

- growth of the system in twenty years by semi-decades.
- Banners showing Purdue, Asbury, and State Universities, Wabash, Union, Christian, and Eastham Colleges.
- Banners showing State and Northern Indiana normal schools, and Indianapolis and Huntington city systems. (*South Gallery.*) 304
- 17 State of Michigan** (F. W. Noble, Secretary, Detroit, Mich.)—Michigan school system, its history, statistics, plans, elevations, interior views, and students' work in public, primary, graded, and high schools, universities, and colleges. Rare birds and marine and land animals from museum of Michigan University. (*South Gallery.*) 304
- 18 State of Wisconsin Educational Department** (by Edward Searing, Superintendent of Public Instruction).—Students' work, photographs of school buildings, educational map, books, etc. (*South Gallery.*) 304
- 19 Educational Exhibit of Ohio** (by Chas. S. Smart).—Statistical and documentary history of education in Ohio. (*South Gallery.*) 304
- 20 State of Rhode Island Board of Education**, Providence, R. I. (by L. B. Stockwell).—History and statistics, school work, school houses. (*South Gallery.*) 304
- 21 State of New Hampshire, Department of Public Instruction** (by John W. Simonds, State Superintendent, Franklin, N. H.)—Kindergarten school—Specimens of kindergarten work. Public schools—Slates covered with work of primary pupils; specimens of scholars' written work, and examinations, compositions, drawings, penmanship; maps and plans; photographs and plans of school buildings and rooms; photographs of school superintendents and teachers; illustrated school register; wooden model of school-house.
- Academies, seminaries, and high schools—Photographs and plans of buildings and rooms; photographs of teachers and students; students' written work, drawings, etc.
- Dartmouth College—Manuscript history of college; bound catalogues and pamphlets, students' examination papers, drawings, illustrated programme, map of grounds, portraits of faculty and class of 1876; plans and views of buildings and rooms.
- State Normal School—Reports; students' written work, photographs of buildings and rooms.
- Thayer School of Engineering—Model Pratt truss railroad bridge.
- Chandler Scientific School—Drawings, surveying papers, railroad map, models in plaster, examination papers and abstracts, essays.
- Agricultural College—Geological map.
- Educational chart and history of education in the State; history of education in towns and cities.
- State school laws, reports, and registers; town school reports, history and catalogue of academies, etc.; records of normal school; Bouton's provincial papers.
- Educational publications; histories of towns; text-books used 100 years ago; text-books in present use. (*South Gallery.*) 304
- 22 State of Connecticut Educational Department** (by B. G. Northrop, Secretary,
- Hartford, Conn.)—Work by scholars and Chinese students; photographs of school-houses; works by former members of Yale College. (*South Gallery.*) 304
- 23 State of Illinois, Department of Public Instruction** (by S. M. Etter, Superintendent).—Reports of the department, and history of education in the State.
- Public schools.—Pupils' work.
- Colleges and Seminaries.—Work of students, museums, etc.
- Industrial University, Champaign, Ill.—Books, portfolios, and charts, containing work of students.
- Illinois Normal Schools.—Work of students, museums, etc. (*South Gallery.*) 304
- 24 State of Maine, Educational Department** (by Warren Johnson, State Superintendent, Augusta, Maine).
- Kindergarten school, Lewiston; public schools in Portland, Bangor, Bath, Lewiston, Calais, Augusta, and various other cities and towns; private schools; Johnson Home School for Boys; Abbott School for Boys; St. Catharine's School for Girls, and others. School furniture from Doyle Bros., Bangor.
- Bowdoin College, Colby University, Bates College.
- Maine Wesleyan Seminary and Female College, Westbrook Seminary, Waterville Classical Institute, Maine Central Institute, Hallowell Classical Institute, and others; Western Normal School; Farmington and Eastern Normal School, Castine.
- State collection of agriculture and mechanical arts. (*South Gallery.*) 304
- 25 State of Iowa, Educational Department** (by Alonzo Abernethy, Des Moines).—Collective exhibit of the public schools of Davenport, Des Moines, Atlantic, Muscatine, Ottumwa, Maringo, Boone, Sigourney, Winterset, Lyons, Indianola, Wheatland, Clarence, and Osceola, and of Oskaloosa and Western Colleges, Iowa. Reports, charts, drawings, and examination manuscripts.
- Iowa School Furniture Co.—School desks and seats. (*South Gallery.*) 304
- 26 State of Tennessee Educational Department**, collective exhibit.
- Trousdale, Leon, State Superintendent of Schools, Nashville, Tenn.—Reports and school-banner.
- Dean, John R., County Superintendent, Shelbyville, Tenn.—Manuscripts of pupils of the schools, and school banner.
- Presnell, H., County Superintendent of Schools, Jonesboro, Tenn.—Photographs of Colored Training School and South Normal School buildings.
- Pickett, A., City Superintendent of Schools, Memphis, Tenn.—Examination manuscripts and principles of instruction; geographical drawings.
- Caldwell, S. Y., City Superintendent, Nashville, Tenn.—Examination manuscripts, drawings, school banner, and annual reports.
- Perkins, W. H., Principal Peabody Graded School, Powell's Station, Tenn.—Examination manuscripts of classes D and C, second grade.
- Tennessee Medical Society, Nashville, Tenn.—Transactions of the session, 1845.
- Lindsley, J. Berrian, Nashville, Tenn.—Life and works of Philip Lindsley.
- Giers, C. C., Nashville, Tenn.—Photographs of educators. (*South Gallery.*) 304

School Books, Furniture, Apparatus, Statistics.

27 Commonwealth of Massachusetts, Department of Education.—Mineralogical specimens for common schools; drawing and work on slates from common and primary schools; industrial drawing; scholars' work other than drawing; regulations and reports from Boston, New Bedford, Greenfield, Newton, Lowell, Fitchburg, Cambridge, Taunton, Worcester, Fall River, Springfield, Brookfield, Clinton, Essex, Waltham, Kingston, Lennox, Leominster, Spencer, Lancaster, Northampton, Stoneham, Pittsfield, and South Egremont. Writing copy books and charts from J. W. C. Gilman; books, music charts, and globe from Ginn Bros.; kindergarten apparatus from Milton, Bradley & Co.; school furniture from A. G. Whitcomb and J. L. Ross; Chauncy Hall and other school furniture from W. O. Haskell & Sons; crayons from Parmenter & Walker; charts, models, plates, and text-books from S. Edward Warren; art toys for kindergarten from W. C. Brigham; arithmetical cards from Miss M. H. Faxon and Miss Annie E. Walcutt; amateur drawing by Charles L. Adams, Dorchester.

Views, plans, and sites of State Normal schools, with stereoscope and stereoscopic views. Drawings from high schools and academies; photographs of Springfield, Waltham, and Grafton high schools; architectural drawings of Lawrence, Spencer, Peabody, and Salisbury high schools; photographs from Harvard University; photographs from Amherst College, catalogue of colleges and library, history of college and student life; catalogues, list of officers, and photographs from Williams College; photographs and catalogues from Boston College, and pamphlets from Boston University; view of Wellesley College, ground plans and site, interior views and reports; catalogues from Tufts College; views from College of the Holy Cross; photographs and architectural drawings from Agricultural College at Amherst; architectural illustrations, special reports, and documents from Laselle Female Seminary; architectural illustrations from Worcester Academy; documents, military equipments, special reports, and scholars' work from Chauncy Hall School; catalogues from Warren and Pierce Academies; reports from South Egremont Academy; photographs and historical report from Mount Holyoke Female Seminary; catalogue from Lawrence Academy, Groton.

Drawing, painting, and modeling from State Normal Art School; drawings from Worcester County Free School of Industrial Science, mechanical products of scholars, theses, and illustrations of buildings; documents from Andover Theological Seminary; materials for instruction in industrial drawing, books, models in wood and plaster, instruments, etc.; drawings and designs from Peter Roos and E. Whitfield; anatomical preparation of the human brain by Dr. Denny; osseous anatomy of the ear, by Dr. Clarence J. Blake; annual reports and memoirs of Peabody Academy of Science, Salem; musical publications from Oliver Ditson & Co.

Books and apparatus from Perkins Institution for the Blind; photographs and historical reports from Clark Institution for the Dumb, Northampton; visible speech,

charts, and designs from A. Graham Bell.

Annual reports of the Board of Education; annual reports of school committees from the eighteen cities and three hundred and twenty-three towns of the commonwealth; school reports from Paxton.

Supplement to report on ichnology; gas inspectors' reports; catalogues, documents, and tablet from Boston public library; history, catalogues, and pamphlets from Brighton public library; history and architectural illustrations from Concord public library; catalogues from Brookline, Haverhill, and Belmont public libraries; photographs and architectural drawings from Framingham, Lynn, and Worcester public libraries; catalogue from Paxton public library.

Periodical literature of the State. Drawing of the birthplace of Whittier; school text-books, from Brewer & Tileston and G. C. Merriam; life of Horace Mann, lectures and reports; genealogical works from J. M. Hawks; works on insects and animals, from A. S. Packard, jr.; bust and works of Nathaniel Bowditch, from H. I. Bowditch; book from Dr. Henness; tablet of metric system, from J. Pickering Putnam; philosophic works, from Francis Bowen; problem of health, from Reuben Green; work on the eye, from B. J. Jeffreys; book of zoology and scientific pamphlets, from Prof. E. S. Morse; *Psyche* Advertiser; text-books, from Schoenhof & Moeller; books from W. T. Adams, W. F. Draper, Sampson Davenport & Co., Greenough Co., Dean Dudley, Richard Briggs; text-books, from Taggard & Brown; work on trees of Massachusetts, from George B. Emerson; publications from Women's Education Society.

Publications from Medical Improvement Society and Natural History Society; pamphlets from Numismatic Society; register and memoirs from New England Historic Genealogical Society.

Bust of Prof. Agassiz, and architectural illustrations of Agassiz Museum; reports from Worcester Lyceum and Natural History Society; illustrations and description of mastodon from Warren Museum.

Historical reports from Handel and Haydn Society; philosophical instruments from N. M. Lowe; astronomical drawings from L. Trouvelot; astronomical instruments from Prof. Dolbeare; astronomical lantern from James Freeman Clarke; maps of the State of Massachusetts.

Computers with keys from J. E. Fuller. Health lift from W. A. Knight.

Reports of the Board of Health and State Charities; harbor commissioners' and gas inspectors' reports; reports from insurance and savings bank commissioners; pamphlet on life insurance from Elizur Wright; annual report from Boston Board of Trade.

Registration reports, public documents, acts, and resolves; reports of commissioners on in landfisheries; tax commissioners' report; views and plans of new state prison for women; photographs and reports from Westboro Reform School; architectural illustrations and reports from School for Neglected Children, Deer Island.

Reports, view, and plans of new state hospital at Danvers; architectural drawings, reports, and statistics from Northampton state lunatic hospital.

School Books, Furniture, Apparatus, Statistics.

- Reports from the House of the Angel Guardian.
Photographs from Hoosac tunnel.
Geological maps. (*South Gallery.*) 304
- 28 State of New Jersey, Department of Public Instruction (by Ellis A. Apgar, Trenton, N. J.).—Work by school children, viz.: maps drawn from memory; mathematical operations; analysis and parsing; compositions; spelling; primary and miscellaneous work; artistic drawing in crayon, indian ink, and lead pencil; mineral and natural history collections; mechanical contrivances; photographic views, exterior and interior of school-houses, and decennial exhibit of their improvements, showing condition in 1866 and 1876; kindergarten work; penmanship; history of schools in New Jersey; works written by alumni of Princeton and Rutgers colleges, and photographic views of the same. (*South Gallery.*) 304
- 29 State of Pennsylvania.—Educational exhibit shown in Pennsylvania Educational Hall.
- 30 Bartlett, John R., Providence, R. I.—Catalogue of the library of the late John Carter Brown, relating to America. T 73 to 78. 305
- 31 Lippincott, J. B., & Co., Philadelphia, Pa.—Various publications. T 72. 306
- 32 Porter & Coates, Philadelphia, Pa.—Books. T 73 to 78. 306
- 33 Baker, Davis, & Co., Philadelphia, Pa.—Zell's Encyclopedia, Hand Atlas, Cyclopaedia of American Literature, and United States Business Directory. T 73 to 78. 306
- 34 Burley, S. W., Philadelphia, Pa.—Historical, descriptive, and statistical books. T 73 to 78. 306
- 35 Holman, A. J., & Co., Philadelphia, Pa.—Bibles and photograph albums. T 73 to 78. 306
- 36 Presbyterian Board of Publication, Philadelphia, Pa.—Theological, practical, and Sabbath-school books, and periodicals. T 73 to 78. 306
- 37 Kohler, Ignatius, Philadelphia, Pa.—German classic, theological, and miscellaneous books. T 73 to 78. 306
- 38 Allen, Henry S., New York, N. Y.—History of America. T 73 to 78. 306
- 39 Wilson, Hinkle, & Co., Cincinnati, Ohio.—Educational books. T 73 to 78. 306
- 40 Calmann, Chas., Philadelphia, Pa.—Book of business firms in the United States. T 73 to 78. 306
- 41 Ivison, Blakeman, Taylor, & Co., New York, N. Y.—School and college text-books; Spencerian system of penmanship. T 73 to 78. 306
- 42 Graham, Andrew J., New York, N. Y.—Phonographic works. T 73 to 78. 306
- 43 Butler, J. H., & Co., Philadelphia, Pa.—Educational text-books and outline maps. T 73 to 78. 306
- 44 Wood, Wm., & Co., New York, N. Y.—Medical books. T 73 to 78. 306
- 45 National Temperance Society, New York, N. Y.—Temperance books, tracts, pamphlets, papers, diagrams, etc. T 73 to 78. 306
- 46 Bicknell, A. J., & Co., New York, N. Y.—Books for builders. T 73 to 78. 306
- 47 Anglim, James, Washington, D. C.—Biographical annals of the civil government of the United States. T 73 to 78. 306
- 48 Claxton, Remsen, & Haffelfinger, Philadelphia, Pa.—Books, games, historical charts, Centennial Guide and map of Philadelphia. T 73 to 78. 306
- 49 Kelly, Thomas, New York, N. Y.—Catholic prayer books and bibles. T 73 to 78. 306
- 50 Sheldon & Co., New York, N. Y.—School and college text-books; theological, religious, miscellaneous, and juvenile books; "Galaxy" magazine. T 73 to 78. 306
- 51 Burlock, Saml. D., & Co., Philadelphia, Pa.—Photograph albums, bibles, T 73 to 78. 306
- 52 Potter, John E., & Co., Philadelphia, Pa.—Bible Encyclopedia, bibles, testaments, and standard miscellaneous books. T 73 to 78. 306
- 53 Baird, Henry Carey, & Co., Philadelphia, Pa.—Practical, scientific, and economic books. T 73 to 78. 306
- 54 Orange Judd Co., New York, N. Y.—"American Agriculturist" and rural books. T 73 to 78. 306
- 55 American Sunday-school Union, Philadelphia, Pa.—Evangelical publications for Sunday-schools and families. T 73 to 78. 306
- 56 Appleton, D., & Co., Philadelphia, Pa.—Books. T 73 to 78. 306
- 57 Gebbie & Barrie, Philadelphia, Pa.—Fine art publications. N 71. 306
- 58 Roberts, Rev. H. Floy, Williamsburgh, N. Y.—Manuscript interlinear New Testament; the original Greek text, verbally translated, compared with our English version. T 73 to 78. 306

- 13 Scott, Robson John, London.—Blocks used for wood engravings; compound and bolted blocks of box and other woods. 306
- 14 Stephenson, Blake, & Co., Sheffield.—Specimens of printing, types, book of specimens. 306
- 15 Johnson, Edmund, London.—Catalogues and other works having reference to international exhibitions. 306

- 16 Palmer, Samuel, London.—Index to the Times newspaper, a quarterly publication. 306
- 17 Loth, John Thomas, Edinburgh.—Educational books and illustrations of the thirty-three degrees of the ancient and accepted Scottish rite. 306
- 18 Lockwood, Crosby, & Co., London.—Books, rudimentary, scientific, educational, and classical series. 306
- 19 Cassell, Petter, & Galpin, London.—Illustrated books, publications, serials; educational books and appliances; electrotypes of engravings on wood. 306
- 20 Smith, David, Halifax, Yorkshire.—The "Dyer's Instructor." 306
- 21 Dowson, Sutherland, & Co. (limited), London.—Complete file of "Iron," a weekly newspaper. 306
- 22 Potts, Roberts, Trinity College, Cambridge.—Educational books. 306
- 23 Murray, Andrew, London.—Illustrations and specimens of galls produced by mites, aphides, flies (cecidiomyia), sandflies, cympidæ. 306
- 24 Proprietors of the "Illustrated London News," London.—Specimens illustrating the art department of the Illustrated London News. 306
- 25 Rola, Vincent, Bayswater.—Method for the piano, with diagrams and specimens of music. 306
- 26 Proprietors of the "Graphic," London.—Process of producing an illustrated newspaper, from the receipt of sketches to the final issue of printed sheets to the public. 306
- 27 Holdsworth, Edmund William Hunt, London.—Work on deep sea fishing and fishing boats. 306
- 28 Johnson, J. M., & Sons (limited), London.—Printing in color, show tablets. 306
- 29 Day & Son, London.—Chromolithography. 306
- 30 Rundell, Joseph Benjamin, South Kensington Museum, London.—Short-hand alphabet; maps, plans, etc., for educational atlases and other purposes; lithographic printing as applied to maps. 306
- 31 Paul, William, Waltham Cross, Herts.—Works on horticulture. 306

Scientific Instruments.

- 32 Siemens, Charles William, London.—Pyrometers. (*In Machinery Hall.*) 320
- 33 Lyon, Washington, London.—Calculating table for rapidly multiplying numbers above 12. 321

Watches, Scientific and Musical Instruments.

- 34 Wier, M. A., & Co., London.—Hydro-gyrometer or revolution indicator. 321
- 35 Morton, George, London.—Chronometer and watch balance springs, wire, and gauge. 322
- 36 Smith, Borthwick, London.—Watches and chronometers, cases, dials, and movements; rink and parlor skates; tools and machinery for watch manufacture. 323
- 37 Sewill, J., Liverpool.—Marine chronometers and watches. 323
- 38 Mercer, Thomas, London.—Marine chronometers. 323
- 39 Kullberg, Victor, London.—Marine chronometers, watches, chronographs, repeaters, etc. 323
- 40 Dent, M. F., London.—Marine chronometers, watches, chronometer clocks, etc. 323
- 41 Whittaker, Richard, London.—Keyless watches. 323
- 42 Poole, James, & Co., London.—Marine chronometers and watches. 323
- 43 Nicole, Nielsen, & Co., London.—Watches, chronometers, complicated watches, and chronographs. 323
- 44 Claxton, Robert, London.—Chronometer jewelings in all stages. 323
- 45 Frodsham, Charles, & Co., London.—Watches, clocks, and chronometers for astronomical purposes; pocket and marine chronometers. 323
- 46 Swift, James, London.—Microscopes and apparatus. 324
- 47 Middleton, Thomas John, London.—Magic lanterns, dissolving view apparatus, dissolving top for the oxyhydrogen lime light, lantern slides, etc. 324
- 48 Beck, R. & J., London.—Microscopes, telescopes, race glasses, surveying and meteorological instruments and tools. 324
- 49 Wheeler, Edmund, London.—Specimens for the microscope. 324
- 50 Dallmayer, John Henry, London.—Astronomical and terrestrial telescopes, microscopes, photographic lenses, cameras, and apparatus. 324
- 51 Ross & Co., London.—Microscopes, monocular and binocular apparatus, object glasses, telescopes, and photographic lenses. 324
- 52 Crouch, Henry, London.—Microscopes, binocular, and with complete accessories for every class of scientific investigation; cabinets, lamps. 324
- 53 India Rubber, Gutta Percha, and Telegraph Works Co. (limited), Silver-town, Essex.—Telegraph cables, insulated telegraph wires. 325
- 54 Siemens Brothers, London.—Cable samples, and gutta percha as applied to the manufacture of cables. 325
- 55 Heaps, John Knowles, Holbeck, Leeds.—Violin and violoncello. 327
- 56 Smith, George, South Hackney.—Portable finger organ. 327
- 57 Boosey & Co., London.—Musical wind instruments, percussion instruments for bands; band, choral, and household music. 327
- 58 Brinsmead, John, & Sons, London.—Grand, semi-grand, upright, and studio pianos; check repeater action for upright and grand pianos. 327
- 59 Collmann, Leonard W., London.—Cottage piano. 327
- 60 Besson, F., & Co., London.—Brass musical instruments. 327
- 61 Browne, H. Justin, London.—Upright cottage piano fortes. 327
- 62 Rudell, Carte, & Co., London.—Gold, ebonite, cocoa wood, and silver cylinder flutes. 327
- 63 Cochrane, Robert C. E., Athlone, Ireland.—Drawings illustrating the application of concrete to the erection of an improved construction of dwellings. 342

NEW SOUTH WALES.

(North of Nave, Columns 10 to 17.)

Educational and Statistical Publications, Photography, etc.

Educational Systems, Methods, and Libraries.

- 1 Mechanics' School of Arts, Sydney.—Wax seal impression of corporate seal. 302
- 2 Government Printing Office, Sydney, New South Wales.
 - a Meteorological results, and report on education. 305
 - b Government gazettes, statutes, statute index, specifications of patents, parliamentary hand book, blue book and statistical register, census, reports on railways, Rae's poems, newspapers, Australian languages. 306

Institutions and Organizations.

YORKSHIRE RELISH.

THE MOST DELICIOUS SAUCE IN THE WORLD.

This cheap and excellent Sauce makes the plainest viands palatable, and the daintiest dishes more delicious. To Chops and Steaks, Fish, &c., it is incomparable. Sold by Grocers, Oilmen, Chemists, &c., in Bottles, 6d, 1s., and 2s. each.

Prepared by GOODALL, BACKHOUSE & CO., LEEDS.

GOODALL'S QUININE WINE.

The best, cheapest, and most agreeable tonic yet introduced. The best remedy known for Indigestion, Loss of Appetite, General Debility, &c. Restores delicate invalids to health and vigour. Sold by Chemists, Grocers, &c., in 1s, 1s. 1½d., 2s., and 2s. 3d. each Bottle.

Prepared by GOODALL, BACKHOUSE & CO., LEEDS.

DR. HASSALL'S FOOD FOR INFANTS, CHILDREN, AND INVALIDS.

DR. ARTHUR HILL HASSALL, M.D., the inventor, recommends this as the best and most nourishing of all Infants' and Invalids' Foods which have hitherto been brought before the public. It contains every requisite for the full and healthy support and development of the body, and is, to a considerable extent, self-digestive. Recommended by the "Lancet," and Medical Faculty, &c. Sold by Druggists, Grocers, Oilmen, &c., in Tins, 6l., 1s., 2s., 3s. 6l., 6s., 1s., and 2s. each. A Treatise by Arthur Hill Hassall, M.D., London, on the "Alimentation of Infants, Children, and Invalids, with hints on the general management of children," sent post free on application to the

Manufacturers, GOODALL, BACKHOUSE & CO., LEEDS.

The following PRIZE MEDALS have been awarded—

- Nismes, 1863; Cologne, 1865; Paris, 1872;
- Havre, 1868; Beauvais, 1869; Marseilles, 1874;
- Paris, 1875;

AND SEVERAL HONOURABLE MENTIONS.

MACHINERY HALL. No. 50.

Size, 360 by 1402 feet; annex, 208 by 210 feet.

Engineers and Architects, HENRY PETTIT, JOSEPH M. WILSON, Philadelphia.

Contractor, PHILIP QUIGLEY, Wilmington, Del.

Wrought and cast iron furnished by PUSEY, JONES, & Co., Wilmington, Del.

MACHINERY HALL is located west of the intersection of Belmont and Elm avenues, at a distance of 542 feet from the west front of the Main Exhibition Building, and 274 feet from the north side of Elm avenue. The north front of the building is upon the same line as that of the Main Exhibition Building, thus presenting a frontage of 3824 feet from the east to the west ends of the exhibition buildings upon the principle avenue within the grounds.

The principal portion of the structure is one story in height, showing the main cornice upon the outside at 40 feet from the ground, the interior height to the top of the ventilators in the avenues being 70 feet, and in the aisles 40 feet. To break the long lines upon the exterior, projections have been introduced upon the four sides, and the main entrances finished with facades, extending to 78 feet in height. The east entrance forms the principal approach from street-cars, from the Main Exhibition Building, and from the Pennsylvania Railroad depot. Along the south side are the boiler houses and other buildings for special kinds of machinery. The west entrance affords the most direct communication with George's Hill, which point affords the best view of the entire exhibition grounds.

The arrangement of the ground plan shows two main avenues 90 feet wide by 1360 feet long, with a central aisle between, and an aisle on either side. Each aisle is 60 feet in width; the two avenues and three aisles making the total width of 360 feet. At the centre of the building is a transept of 90 feet in width, which at the south end is prolonged beyond the Main Hall. This transept, beginning at 36 feet from the Main Hall and extending 268 feet, is flanked on either side by aisles of 60 feet in width, and forms the annex for hydraulic machines. The promenades in the avenues are 15 feet in width, in the transept 25 feet, and in the aisles 10 feet. All other walks extending across the building are 10 feet in width, and lead at either end to exit doors.

The foundations consist of piers of masonry. The superstructure consists of solid timber columns supporting roof trusses, constructed with straight wooden principals and wrought iron ties and struts. As a general rule, the columns are placed lengthwise of the building, at the uniform distance apart of 16 feet. The columns are 40 feet high to the heel block of the 90 feet span roof trusses over the avenues, and they support the heel of the 60 feet spans over the aisles at the height of 20 feet. The outer walls are built of masonry to a height of five feet, and above that are composed of glazed sash placed between the columns. Portions of the sash are movable

for ventilation. Louvre ventilators are introduced in continuous lengths over both the avenues and the aisles. The building is lit entirely by side light.

The motive power is furnished by a Corliss engine of 1400 horse power. There are eight main lines of shafting, extending almost the entire length of the structure, and countershafts are introduced into the aisles where needed. The hangers are attached at the height of 20 feet from the floor.

The annex for hydraulic machines contains a tank 60 feet by 160 feet, with depth of water of 10 feet. In this hydraulic machinery is exhibited in full operation. At the south end of this tank is a waterfall 35 feet high by 40 feet wide, supplied from the tank by the pumps upon exhibition.

The contract in the erection of Machinery Hall was made January 27th, 1875, and the building was begun forthwith, and finished October 1st, 1875. The cost was \$542,300. The exhibition area covers about 14 acres.

KEY TO THE NOTATION.

THE location of objects in the Machinery Building is shown by a letter and figure, indicating the nearest column of the building. The letters—A, B, C, to F—designate the successive ranges of columns, proceeding northward from the southern wall across the width of the building; the figures, the number of the column in each range, counting westwardly from the eastern wall, the entire length of the building, from 1 to 88. Thus C 5 is the column in the third range from the south, and the fifth from the eastern end of the building. The northwesternmost column is F 88.

The class of the classification to which each exhibit belongs is indicated by the small figures at the end of the line.

MACHINERY HALL.

Machines and Implements of Spinning, Weaving, etc. Machines, etc., used in Sewing, Making Clothing, etc. Machines for Printing, Making Books, Paper Working, etc. Motors, Power Generators, etc. Hydraulic and Pneumatic Apparatus. Railway Plant, Rolling Stock, etc. Machinery used in Preparing Agricultural Products. Aerial, Pneumatic, and Water Transportation. Machinery, and Apparatus, especially adapted to the requirements of the Exhibition.
AGRICULTURAL BUILDING.	VI. AGRICULTURE.	600—609 610—619 620—629 630—639 640—649 650—662 665—669 670—679 680—689 690—699	Arboriculture and Forest Products. Pomology. Agricultural Products. Land Animals. Marine Animals, Fish Culture, and Apparatus. Animal and Vegetable Products. Textile Substances of Vegetable or Animal origin. Machines, Implements, and Processes of Manufacture. Agricultural Engineering and Administration. Tillage and General Management.
HORTICULTURAL BUILDING.	VII. HORTICULTURE.	700—709 710—719 720—729 730—739	Ornamental Trees, Shrubs, and Flowers. Hot Houses, Conservatories, Graperies. Garden Tools, Accessories of Gardening. Garden Designing, Construction, and Management.

CLASSIFICATION.

DEPARTMENT V.—MACHINERY.

MACHINES, TOOLS, AND APPARATUS OF MINING, METALLURGY, CHEMISTRY, AND THE EXTRACTIVE ARTS.

CLASS 500.—Rock drilling.

CLASS 501.—Well and shaft boring.

CLASS 502.—Machines, apparatus, and implements for coal cutting.

CLASS 503.—Hoisting machinery and accessories.

CLASS 504.—Pumping, draining, and ventilating.

CLASS 505.—Crushing, grinding, sorting, and dressing. Breakers, stamps, mills, pans, screens, sieves, jigs, concentrators.

CLASS 506.—Furnaces, smelting apparatus, and accessories.

CLASS 507.—Machinery used in Bessemer process.

CLASS 508.—Chemical manufacturing machinery. Electroplating. Paint and powder mills. Blacking and soap-making machinery.

CLASS 509.—Gas machinery and apparatus.

MACHINES AND TOOLS FOR WORKING METAL, WOOD, AND STONE.

CLASS 510.—Planing, sawing, veneering, grooving, mortising, tonguing, cutting, moulding, stamping, carving, and cask-making machines, etc., cork-cutting machines.

CLASS 511.—Direct acting steam sawing machines, with gang saws. Bark mills.

CLASS 512.—Rolling mills, bloom squeezers, blowing fans. Rivet, nail, bolt, and tack making machinery.

CLASS 513.—Furnaces and apparatus for casting metals, with specimens of work.

CLASS 514.—Steam, trip, and other hammers, with specimens of work, anvils, forges, bellows.

CLASS 515.—Planing, drilling, slotting, turning, shaping, punching, stamping, cutting, and coining machines. Wheel cutting and dividing machines, emery wheels, drills, taps, gauges, dies, etc. Grindstones.

CLASS 516.—Stone-sawing and planing machines, dressing, shaping, and polishing, sand blasts, Tilghman's machines, glass-grinding machines, etc.

CLASS 517.—Brick, pottery, and tile machines. Machines for making artificial stone.

CLASS 518.—Furnaces, moulds, blowpipes, etc., for making glass and glassware.

CLASS 519.—Tools, implements, etc., for working metal, wood, and stone.

MACHINES AND IMPLEMENTS OF SPINNING, WEAVING, FELTING, AND PAPER MAKING.

CLASS 520.—Machines for the manufacture of silk goods.

CLASS 521.—Machines for the manufacture of cotton goods.

CLASS 522.—Machines for the manufacture of woolen goods, carpets, and tapestry.

CLASS 523.—Machines for the manufacture of linen goods.

CLASS 524.—Machines for the manufacture of rope and twine, and miscellaneous fibrous materials.

CLASS 525.—Machines for the manufacture of paper and felting.

CLASS 526.—Machines for the manufacture of india-rubber goods.

CLASS 527.—Machines for the manufacture of mixed fabrics.

CLASS 528.—Machines for the manufacture of wire cloth.

MACHINES, APPARATUS, AND IMPLEMENTS USED IN SEWING AND MAKING CLOTHING AND ORNAMENTAL OBJECTS.

CLASS 530.—Machines used in the manufacture of lace, floor-cloths, fancy embroidery, hair, ribbons, etc.

CLASS 531.—Sewing and knitting machines, clothes, corset, hat, and bonnet making machines.

CLASS 532.—Machines for preparing and working leather.

CLASS 533.—Machines for making boots and shoes.

CLASS 534.—Machines for ironing, drying, scouring, and cleaning.

CLASS 535.—Machines for making clocks and watches.

CLASS 536.—Machines for making jewelry.

CLASS 537.—Machines for making buttons, pins, needles, etc.

CLASS 538.—Pipes for smoking.

MACHINES AND APPARATUS FOR TYPESETTING, PRINTING, STAMPING, EMBOSSEING, AND FOR MAKING BOOKS, AND PAPER WORKING.

CLASS 540.—Printing, stamping, embossing, and lithographing presses.

CLASS 541.—Typecasting machines, apparatus of stereotyping.

CLASS 542.—Types and typesetting machines. Type-writing machines.

CLASS 543.—Printers' furniture.

CLASS 544.—Bookbinding machines.

CLASS 545.—Paper-folding machines.

CLASS 546.—Paper and card cutting machines, paper box machines.

CLASS 547.—Envelope machines.

MOTORS AND APPARATUS FOR THE GENERATION AND TRANSMISSION OF POWER.

CLASS 550.—Boilers and all steam or gas generating apparatus for motive purposes.

CLASS 551.—Water-wheels, water engines, hydraulic rams, windmills.

CLASS 552.—Steam, air, or gas engines, electro-magnetic engines.

CLASS 553.—Apparatus for the transmission of power, shafting, belting, cables, transmission of power by compressed air, etc., gearing, cables.

CLASS 554.—Screw propellers, wheels for the propulsion of vessels, and other motors.

CLASS 555.—Implements and apparatus used in connection with motors, steam gauges, manometers, etc. Anti-friction metals.

HYDRAULIC AND PNEUMATIC APPARATUS, PUMPING, HOISTING, AND LIFTING.

CLASS 560.—Pumps and apparatus for lifting and moving liquids.

CLASS 561.—Pumps and apparatus for moving and compressing air or gas.

CLASS 562.—Pumps and blowing engines, blowers and ventilating apparatus.

CLASS 563.—Hydraulic jacks, presses, elevators, lifts, meters, cranes.

CLASS 564.—Fire engines, hand, steam, or chemical, and fire extinguishing apparatus, hose, ladders, and fire-escapes, etc.

CLASS 565.—Beer engines, soda-water machines, bottling apparatus, corking machines.

CLASS 566.—Stop valves, cocks, pipes, etc.

CLASS 567.—Diving apparatus and machinery.

CLASS 568.—Ice machines.

RAILWAY PLANT, ROLLING STOCK, AND APPARATUS.

CLASS 570.—Locomotives, models, drawings, plans, etc.

CLASS 571.—Carriages, wagons, trucks, cars, etc. Scales.

- CLASS 572.—Brakes, buffers, couplings, and snow-plows.
 CLASS 573.—Wheels, tires, axles, bearings, springs, etc.
 CLASS 574.—Permanent ways, ties, chairs, switches, etc.
 CLASS 575.—Station arrangements, signals, water-cranes, turn-tables.
 CLASS 576.—Miscellaneous locomotive attachments.
 CLASS 577.—Street railways and cars.

MACHINES USED IN PREPARING AGRICULTURAL PRODUCTS.

- CLASS 580.—Flour mills.
 CLASS 581.—Sugar refining machines.
 CLASS 582.—Confectioners' machinery.
 CLASS 583.—Oil-making machinery.
 CLASS 584.—Tobacco manufacturing machines.
 CLASS 585.—Mills for spices, coffee, etc.
 CLASS 586.—Machines for preparing fancy goods.
 CLASS 587.—Machines for preparing malt and spirituous liquors.

AERIAL, PNEUMATIC, AND WATER TRANSPORTATION.

- CLASS 590.—Suspended cable railways.
 CLASS 591.—Transporting cables.
 CLASS 592.—Balloons, flying machines, etc.
 CLASS 593.—Pneumatic railways, pneumatic dispatch.
 CLASS 594.—Boats and sailing vessels. Sailing vessels used in commerce. Sailing vessels used in war. Yachts and pleasure boats. Rowing boats of all kinds. Life boats and salvage apparatus, with life rafts, belts, etc. Submarine armor, diving bells, etc. Ice boats. Models and drawings.
 CLASS 595.—Steamships, steamboats, and all vessels propelled by steam.
 CLASS 596.—Vessels for carrying telegraph cables and railway trains, also coal barges, water boats, and dredging machines, screw and floating docks, and for other special purposes.
 CLASS 597.—Steam capstans, windlass, deck-winches, and steering apparatus, fans.

MACHINERY AND APPARATUS ESPECIALLY ADAPTED TO THE REQUIREMENTS OF THE EXHIBITION.

Boilers, engines, cranes, pumps, etc.

ESTABLISHED, 1821.

- 71 Crossley, Harry A., Cleveland, Ohio.—Stair jointer. B 67. 510
- 72 Silver & Deming Manufacturing Company, Salem, Ohio.—Hub boxing machines, adjustable hollow auger, spoke tenoning machines. F 54. 510
- 73 Graham, J. S., & Co., Rochester, N. Y.—Planing, tonguing and grooving machines, circular re-sawing machine, moulding machine, matching heads, and cutters. B 44. 510
- 74 Moseley, Jerome S., Syracuse, N. Y.—Scroll saw machine, boring machine. B 63. 510
- 75 Griffiths, John W., New York, N. Y.—Wood bending machines. B 74 and E 5. 510
- 76 Battle Creek Machinery Company, Battle Creek, Mich.—Reverse motion paneling, variety moulding, and dove-tailing machine, moulders' solid steel cutters. B 55. 510
- 77 Lane Manufacturing Co., Montpelier, Vt.—Saw mills, frames and attachments, bed-planing machines, matching and jointing machines. A 35-37. 510
- 78 Marston, J. M., Boston, Mass.—Combined circular sawing, boring and mitering machines. E 77. 510
- 79 Chase Turbine Manufacturing Co., Orange, Mass. (*Saw mill annex.*)
a Machine for sawing staves, spool stock, box boards, etc. 510
b Leverset and circular saw mill. 511
- 80 Beach, Henry Lloyd, Montrose, Pa.—Scroll-sawing machines. A 29. 510
- 81 Fay, J. A., & Co., Cincinnati, Ohio.—Patent wood-cutting machinery. B 62. 510

Machines and Tools for Working Metal, Wood, and Stone.

- 58 Riehle Bros., Philadelphia, Pa.—Mortising machines. E 54. 510
- 59 Douglass Manufacturing Co., Seymour, Conn.—Mechanics' edge tools and boring implements. A 43. 510
- 60 Lane & Bodley, Cincinnati, Ohio.—Stroke power mortisers. A 50. 510

Wood and Metal-working Machines.

- 82 Clark Thread Co., Newark, N. J.—Spool-turning machine. C 33, and A 34. 510
- 83 Holmes, E., & B., Buffalo, N. Y.—Machines for making kegs, barrels, staves, and shooks. B 50-52. 510
- 84 Bush & Smith, West New Brighton, N. Y.—Wood-working machinery. B 77. 510

- 175 Nichols, Pickering, & Co., Philadelphia, Pa.—Portable punches for punching spike holes in rails. E 71. 515
- 176 Prentice & Co., Worcester, Mass.—Lathes, slide rests, drills. C 31. 515
- 177 Van Hagen, C., & Co., Philadelphia, Pa.—Rotary shapers, iron planers, drill sharpeners, drills, and boring tools. C 30. 515

The Acme Patent Pipe Cutter.

MANUFACTURED ENTIRELY OF SOLID CAST STEEL.

Is adapted to widely varying classes of work, and will be found to operate equally well on

Wrought Iron Gas and Steam Pipes,
Boiler Tubes, Oil-Well Tubes,
Round Iron, Bolts, Shaft-
ing, Brass and Cop-
per Pipes, etc.

IT IS AS CLAIMED AN ACTUAL CUTTER, and does not depend on force of pressure to indent the pipe until it can be BROKEN OFF; but cuts out a regular chip precisely similar to the action of a lathe tool, leaving the end of pipe perfectly square and true, entirely devoid of any burring inside or outside, and ready for the die without being touched with a file.

The knives are of such simple construction that any blacksmith can replace them. This will often be found an advantage by mechanics working at a distance from their shops.

The knife may be ground on any ordinary grindstone, and so be kept constantly in good order.

For DESCRIPTIVE PRICE LISTS, address

PANCOAST & MAULE,

PHILADELPHIA, PA., U. S. A.

THE GREATEST DISCOVERY OF THE AGE

IS

DR. TOBIAS'

Celebrated Venetian Liniment

TWENTY-NINE YEARS BEFORE THE PUBLIC.

Warranted to cure Colic, Diarrhœa, Spasms, and Vomiting, taken internally, and Croup, Chronic Rheumatism, Cuts, Bruises, Insect Stings, Sore Throats, Toothache, Old Sores, and Pains in the Back, Chest, and Limbs, externally.

IT HAS NEVER FAILED, NOR HAS ONE BOTTLE BEEN RETURNED,

ALTHOUGH MILLIONS ARE SOLD ANNUALLY.

No one once using it is ever without it.

\$1000 REWARD

Has for years been offered for any certificate which he has published in the newspapers or on his circulars proving false!!

No one should go to sea without it. It cures sea-sickness; and a few drops put in a tumbler of water entirely corrects the impurities, and makes it invaluable on land as on the sea.

Thousands of certificates can be seen at the Depot,

10 PARK PLACE, NEW YORK.

Sold by all Druggists. Price, 50 Cents and One Dollar.

THE HULL AND BELDEN CO.

DANBURY, CONN.

WROUGHT IRON AND STEEL DROP AND HAMMER FORGING
OF EVERY DESCRIPTION, AT REASONABLE PRICES.

The "DEAD STROKE" POWER HAMMER
OVER 300 IN SUCCESSFUL OPERATION.

IMPROVED FUR AND WOOL HAT MACHINERY.

SPECIAL MACHINERY TO ORDER. VISITS AND CORRESPONDENCE SOLICITED.

THE NEW YORK DAILY BULLETIN

IS THE

Leading Commercial Paper of the United States.

NON-POLITICAL, AND DEVOTED EXCLUSIVELY
TO TRADE AND FINANCE.

SUBSCRIPTION PRICE, \$11 PER ANNUM.

NOTICE TO COTTON AND WOOLEN MANUFACTURERS.

THE BRIDESBURG MANUFACTURING COMPANY

Offices, 65 and 67 North Front Street, Philadelphia,

IS THOROUGHLY REORGANIZED.

It builds none but the best machinery. It builds machinery strictly to specifications. It puts any of its machinery in on competition. It furnishes machinery in contract time, under forfeiture. It furnishes repairs promptly and at moderate prices. It can build ten Looms a day. It can build ten Spinning Frames a week. It can build five sets of Cards in a fortnight. It can build five self-acting Mules in a month. It can build Hand Mules, Cotton Cards, Twisters, Drawing Frames, Railway Heads, Pickers, Feeders, Renovators, Bobbin Winders, Beaming Machines, Warping Mills, Spreaders, Reels, &c., in any quantity required. It asks no pay until efficiency is demonstrated. It quotes low prices, and uniform to all.

House Furnishing Goods

A GOOD SELECTION OF

FURNISHING GOODS,

ALWAYS ON HAND.

TABLE LINENS IN GREAT VARIETY

CRASH, NAPKINS, MARSEILLES QUILTS,

HUCKABACK AND DIAPER TOWELINGS,

BLANKETS, SHEETINGS, SHIRTINGS,

PILLOW CASES, MUSLINS, &c.

Best Lighted Store in Philadelphia.

No. 1017 MARKET STREET

Between 10th and 11th, North Side,

PHILADELPHIA.

LINENS OF OUR OWN IMPORTATION

AT A SMALL ADVANCE.

The Acme Patent Pipe Cutter.

MANUFACTURED ENTIRELY OF SOLID CAST STEEL.

Is adapted to widely varying classes of work, and will be found to operate equally well on

Wrought Iron Gas and Steam Pipes,
Boiler Tubes, Oil-Well Tubes,
Round Iron, Bolts, Shaft-
ing, Brass and Cop-
per Pipes, etc.

IT IS AS CLAIMED AN ACTUAL CUTTER, and does not depend on force of pressure to indent the pipe until it can be BROKEN OFF; but cuts out a regular chip precisely similar to the action of a lathe tool, leaving the end of pipe perfectly square and true, entirely devoid of any burring inside or outside, and ready for the die without being touched with a file.

The knives are of such simple construction that any blacksmith can replace them. This will often be found an advantage by mechanics working at a distance from their shops.

The knife may be ground on any ordinary grindstone, and so be kept constantly in good order.

For DESCRIPTIVE PRICE LISTS, address

PANCOAST & MAULE,

PHILADELPHIA, PA., U. S. A.

Pumps, Blowers, Elevators, Presses, Fire Engines.

PURE IRISH LINENS.

ESTABLISHED 1830.

YORK STREET

Flax Spinning Co., Limited,

BELFAST, IRELAND,

Flax Spinners, Power-Loom Weavers,

BLEACHERS, AND MERCHANTS,

MANUFACTURERS OF

DRESS LINENS,

CLOTHING GOODS, AND HOUSEHOLD LINENS.

MANUFACTURES.

DRESS LINENS.

Irish Linen Brocade,
Natural Dress Linen,

Viennese Dress Linen,
Grenadines,

Printed Lawns.

CLOTHING.

Brown Diagonal Drills, *Plain*,
Brown Diagonal Drills, *Fancy Stripe*,
Brown Diagonal Tweeds,
Bleached Drills and Ducks,
Brown Ducks and Duck Coatings,
Canvas and French Elastic Ducks,
Pale Hollands,
Blay Linens.

HOUSEHOLD.

Light Shirting Linen,
Light Fronting Linen,
Super Fronting Linen,
Medium Family Linens,
Heavy Family Linens,
Sheetings,
Interlinings,
Drawer Linens.

BRANCHES AND AGENCIES.

NEW YORK,	164 Church Street.
NEW ORLEANS,	Messrs. Anderson & Simpson.
PARIS,	38 Rue des Jeuneurs.
LONDON,	2 Russia Row, Milk Street.
MANCHESTER,	12 Piccadilly.

JOHN DEWHURST & SONS,

Cotton Spinners,

AND MANUFACTURERS OF

SEWING COTTON,

Remarkable for its strength, pliability, evenness, and freedom from knots. It meets all the requirements of the different kinds of Sewing Machines, and is equally suitable for hand use.

John Dewhurst & Sons,

BELLE-VUE MILLS,

SKIPTON, YORKSHIRE,

COTTON SPINNERS FROM A. D. 1794.

SEWING COTTON MANUFACTURERS FROM A. D. 1870.

AGENTS IN THE UNITED STATES:

Messrs. WILSON & MERRILL, BOSTON.

Railway Plant, Machines for Agricultural Products.

- 923 Nashua Iron and Steel Co., Nashua, N. H.—Steel plates, tires, axles, shaftings, bars, and forgings; iron axles, bars, plates, car wheels, and forgings. E 66. 573

GREAT BRITAIN.

(South of North Avenue, Columns 6 to 17, A to E; also in Pump Annex.)

Metal, Wood, Stone, Cloth-Working Machines.

Machines, Tools, and Apparatus of Mining, Metallurgy, Chemistry, and the Extractive Arts.

- 1 Holmes, Joseph E., Payton, Walter, and Taylor, Fenner, B., London.—Coal and rock-cutting machine; cylinder engine; rock-boring machines; revolving steam engine and air compressor. 500
- 2 Baird, William, & Co., Gartsherrie Iron Works, Coatbridge, Scotland.—Coal-cutting machine. 500
- 3 Hurd, Frederick, & Co., Wakefield.—Coal-cutting machine; ratchet wedge shovel; air compressor. 500
- 4 Macdermott, Martin, London.—Rock and coal perforators; machines for undercutting coal; screw wedge for breaking down coal. 500
- 5 Hardy Patent Pick Co. (Limited), Sheffield.—Implements for coal, ironstone, gold, and silver mining, for quarrying and excavating; cast steel picks. 502
- 6 Cooke, Joseph, & Co., Midland Davy Lamp Works, Birmingham.—Miners' safety lamps. 502
- 7 Bainbridge, Emerson, Duke of Norfolk's Collieries, Sheffield.—Miners' safety lamp. 502
- 8 Pickering, Jonathan, Globe Works, Stockton-on-Tees.—Pulley blocks; hoists; steam and water cylinder; steam pump. 503
- 9 The Dunston Engine Works Co., Gateshead-on-Tyne, Durham.—Stone breaker; combined stone breaker and bone cutter. 505
- 10 Kimberley, Nathan Gold, London.—Centrifugal pulverizing mills. 505
- 11 Siemens, Charles William, London.—Models of furnaces for metallurgical operations, glass melting, etc. 506
- 12 Smith, Dillwyn, Liverpool.—Mechanical stokers and fire bars. 506
- 13 Sugg, William, Vincent Works, London.—Gas burners; a new illuminating power meter. 509
- 16 Wright, Peter, & Sons, Constitution Hill Works, Dudley, Worcestershire.—Anvils; vices; tools of various kinds; hammers. 514
- 17 Brooks & Cooper, Mousehole Forge, Sheffield.—Anvils, vises, hammers, shear steel, etc. 514
- 18 Beesley & Sons, Abbey Road Boiler Works, Barrow-in-Furness.—Punching, shearing, and angle-cropping machine for iron, steel, or other metals. 515
- 19 Heap, Joshua, & Co. (Limited), Oldham.—Tools and machines, taps, hobs, pipe; bolt-screwing and nut-tapping machines. 515
- 20 Nussey & Leachman, Leeds.—Hydraulic pressing machine; hydraulic punching, shearing, and riveting machine. 515
- 21 Shearer, Hugh, London.—Machine for dressing stone. 516
- 22 Lavers, Alfred Hamilton, London.—Testing machine to show strength of cement. 517

Machines and Implements of Spinning, Weaving, Felting, and Paper Making.

- 23 Fleming, Thomas, & Son, West Grove Mill, Halifax.—Card clothing for carding machines, etc.; needle-point teeth. 520
- 24 Ambler, William, Bradford, Yorkshire.—Machine for making paper cop tubes used in spinning; machine for cleaning the teeth of wheel castings. 520
- 25 Mackenzie, Duncan, London.—Self-acting reader for the Jacquard loom. 520
- 26 Ingham, John, & Sons, Croft Head Works, Thornton, near Bradford.—Case of shuttles, etc., for weaving; tacking, shuttle pikes, stocks, and bowls for weaving. 520
- 27 Platt Bros., & Co. (Limited), Hartford Works, Oldham, Lancashire.—Cotton gin. 521
- 28 Gadd, Thomas, Manchester.—Printing machine for large size garment rollers, angular engine; combined engraving and punching machine; setting-out table, with micrometer; combined varnishing and ruling machine; machine for setting out; ruling machine, clams, engravers' block, and lathe. 521
- 29 Lancaster, William, Willow Iron Works, Accrington, Lancashire.—Yarn-sizing dressing machine; self-stopping beaming machines; loom. 521
- 30 Booth, H., & Co., Preston, Lancashire.—Cotton-spinning machinery. 521

Machines and Tools for working Metal, Wood, and Stone.

- 14 Roberts, William, Bootle, near Liverpool.—Self-acting painting machine for venetian blinds, laths, hoop iron, etc. 510
- 15 Massey, B., & S., Openshaw, Manchester.—Steam hammers; steam stamps; circular saw for cutting hot iron and steel; models of steam hammers; samples of forgings. 511

BALDWIN LOCOMOTIVE WORKS,

GUARANTEED

LOCOMOTIVE ENGINES,

ADAPTED TO EVERY VARIETY OF SERVICE, INCLUDING

Narrow Gauge Locomotives, Mine Locomotives, Steam Street Cars,

ETC., ETC.

Works on Broad St., from Pennsylvania Ave. to Spring Garden St.

THE PENNSYLVANIA RAILROAD

IS THE

**Best Constructed and Best Equipped Railway
on the American Continent.**

THE ENTIRE LINE between New York and Pittsburg is laid with a double track of steel rails, weighing sixty-seven pounds to the yard. These rails are secured to oak ties, averaging 2600 to the mile of single track, and are connected between the ties, thus preventing all jarring or jolting.

THE ENTIRE LINE is ballasted with broken stone eighteen inches in depth, securing firmness and freedom from dust.

OVER ONE HUNDRED MILES of third track is laid at suitable intervals, affording facilities for keeping freight and way trains entirely out of the way of Express Trains.

ALL BRIDGES are of iron or stone, and are the most substantial structures of the kind on the continent.

THE BLOCK-SIGNAL SYSTEM, operated by telegraph, extends over the entire line and renders accidents almost impossible.

THE LOCOMOTIVE ENGINES AND PASSENGER CARS run are built according to standards established by the Company, of the very best materials, and are recognized models of efficiency, strength, and comfort.

ALL PASSENGER TRAINS are equipped with the Westinghouse Automatic Vacuum Brake, which has been pronounced by competent authorities in Europe and America the best safeguard ever introduced on railways.

THE HOTELS AND REFRESHMENT FACILITIES on the line are unexcelled.

THE SYSTEM of governing the business of the Company is perfect.

THE COMFORT AND CONVENIENCE of travelers are paramount considerations.

FRANK THOMSON,
General Manager.

D. M. BOYD, Jr.,
General Passenger Agent.

Cloth and Paper-Working Machines, Motors and Appliances.

- 31 Carter, John, Halifax, Yorkshire.—Spinning frame. 521
- 32 Coats, J., & P., Ferguslie Thread Works, Paisley.—Spooling machine; thread-winding machine; machine for ticketing. 531
- 33 Gimson & Coltman, Leicester.—Rib top machine; circular machines. 521
- 34 Gimson & Coltman, Leicester.—Knitting machines. 522
- 35 Smith, John, & Samuel, Low Bridge Works, Keighley, Yorkshire.—Engineers' and machinists' tools and worsted machinery. 522
- 36 Lawson, Samuel, & Sons, Hope Foundry, Leeds.—Machinery for carding, preparing, and spinning jute; cop-winding machine. 524
- 37 Fairbairn, Kennedy, & Naylor, Leeds.—Machinery for preparing and spinning jute, hemp, flax, tow, and similar fibres. Carding engine; drawing, roving, and spinning frames. 524
- 38 Marshall, T. J., & Co., Campbell Works, Kingsland.—Dandy rolls and wire cloth, for paper making, and pulp strainer. 525

Machines, Apparatus, and Implements used in Sewing and Making Clothing and Ornamental Objects.

- 39 Smith & Starley, Trafalgar Works, Coventry.—Sewing machines; needles and attachments; stocking-darning machines; button-hole sewing machines; automatic work holders; electric motors; bicycles and suspended wheels. 531
- 40 Newton, Wilson, & Co., London.—Sewing machines, their appliances and apparatus. 531
- 41 Kimball & Morton, Anderston.—Sewing machines. 531
- 42 Greenwood & Batley, Albion Works, Leeds.—Bolt-forging machines; machine for tying in warps for looms; printing machine. 531
- 43 Sanson, Robert Bell, London.—Spring arm endless band knife; cloth-cutting machine; parallel pressing machine for tailors' use. 531
- 44 Air Burning Co. (Limited), Glasgow.—Ironing table. 534
- 45 Broadbent, Thomas, Chapel Hill, Huddersfield.—Hydro extractor, for extracting water from wool, cotton, etc. 534

Machines and Apparatus for Type-Setting, Printing, Stamping, Embossing, and for Making Books, and Paper Working.

- 46 Beatty, Francis S., Dublin.—Lithographers' manifold transfer machines, for the reproduction of printed matter of enlarged or reduced dimensions from that of the original. 540
- 47 Lilly, John, & Co., London.—Perfecting and single cylinder printing presses. 540
- 48 Walter, John, London.—Printing press. 540
- 49 Shaw, William, London.—Logotypes and cases, shown in operation; printing press. 540

Motors and Apparatus for the Generation and Transmission of Power.

- 50 Green, Edward, & Son, Manchester.—Fuel economizer for heating the feed water for steam boilers. 550
- 51 Davey, Paxman, & Co., Colchester, Essex.—Portable steam engine; vertical boiler and engine; steam corn dryer; water heater. 550
- 52 Galloway, W., & J., & Sons, Knott Mill Iron Works, Manchester.—Steel boilers, for use in the British section. 550
- 53 Moy, Thomas, London.—Small steam engines for tramways, etc. 550
- 54 Ransomes, Sims, & Head, Orwell Works, Ipswich.—Portable steam engines, with apparatus for burning straw, reeds, sticks, etc. 550
- 55 Wright, William, Vulcan Foundry, Coatbridge.—Hot water boilers for heating dwellings, conservatories, etc. 550
- 56 Moncrieff, John, North British Glass Works, Perth, Scotland.—Steam boiler water gauge glasses. 551
- 57 Wier, Marshall Arthur, London.—Pneumatic motor, water meter, hydro-gyrometer, locomotive speed indicator, pneumatic gyrometer, reciprocating counter. 551
- 58 Thermo Electric Generator Co. (Limited), London.—Thermo batteries worked by gas, charcoal, or coke, in nature approaching the appearance of a gas stove. 552
- 59 Turner, Charles, Southampton.—Couplings for propeller shafts and other purposes. 553
- 60 Hewitt, William, Bristol.—Models of improved screw propellers; model of an improved principle for driving machinery; gun carriage; breech-loader gun. 553
- 61 Vansittart, Henrietta, Mrs., Twickenham.—Screw propeller. 554
- 62 Browne, John Collis, London.—Working model of steamship and patent propeller. 554
- 63 Moncrieff, John, North British Glass Works, Perth.—Gauge glasses for indicating height of water in steam boilers. 555

Hydraulic and Pneumatic Apparatus, Pumping, Hoisting, and Lifting.

- 64 Gwynne, John, & Henry, Hammersmith Iron Works, London.—Models of compound surface-condensing engines. 560
- 65 Gwynne & Co., London.—Centrifugal pumps and engines; gas exhaustor and engine. 560
- 66 Ellis, William Irlam, Manchester.—Blower or exhaustor for air or gas. 562
- 67 Appleby Brothers, London.—Steam cranes. 563
- 68 Wallace & Tucker, Belfast.—Fire annihilator. Model of turret system of life preservation in case of shipwreck. 564
- 69 Haynes, Thomas, & Sons, London.—Platform pump; garden syringe; water bringer, for overcoming friction caused by drawing water through long lengths of hose; self-acting hose coiler. 564

Agricultural Machines, Railway Plant, Marine Appliances.

- 70 Needham & Kite, Phoenix Iron Works, London.—High pressure filter press. 565
- 71 Lawrence & Co., London.—Refrigerators; mashing machines, spargers, etc. 565
- 72 Dennis, T. H. P., & Co., Anchor Iron Works, Clemsford.—High pressure valves for steam, hot or cold water, or gas. 566
- Railway Plant, Rolling Stock, and Apparatus.**
- 73 Welch, Alfred, London.—Railway cattle wagons. 571
- 74 Williams, Richard Price, London.—Continuous railway crossings; switches for doing away with facing points on railways. 574
- 75 Brierley, Sons, & Reynolds, London.—Railway signal model of railway junction. 574
- 76 Seaton, William, London.—Saddle rail and permanent way construction. 574
- 77 Saxby & Farmer, London.—Railway signals; models of railway switches; junction, with switches and signals; railway level crossing gates. 574
- Machines used in preparing Agricultural Products.**
- 78 Sutcliffe, James S., Bacup, Lancashire.—Middlings flour separator. 580
- 79 Mirlees, Tait, & Watson, Glasgow.—Machinery in motion, consisting of sugar mills, valveless engine working an air pump for a vacuum pan, and driving centrifugal machines. 581
- 80 Collier, Luke, Rochdale.—Confectioners' machines. 582
- 81 Andrew, J. E. H., Stockport.—Machines for spinning tobacco; samples of twist tobacco from Europe. 584
- Aerial, Pneumatic, and Water Transportation.**
- 82 Siebe & Gorman, London.—Diving apparatus for two divers; figure of diver in diving suit, with the helmet and speaking apparatus. 594
- 83 Cruickshank, A. B., Dundee, Scotland.—Self-acting safety cleats for boats and yachts. 594
- 84 Logan, John Maxwell, Cambridge.—Model of four-oared racing boat, to take to pieces for convenience in traveling. 594
- 85 Inman Steamship Company (Limited), Liverpool.—Full rigged model and oil painting of the steamer "City of Berlin." 594
- 86 Hill & Clark, London.—Boat disengaging hooks. 594
- 87 Clark, Standfield, & Co., London.—Models of floating and gridiron depositing docks. 596
- 88 Roby, George, Wigan.—Hydro-pneumatic and other vessels for the storage of gunpowder, etc. 596
- 89 Bradford, William Henry, Great Saughall, near Chester.—Model of life boats; lateen rig; life or salvage boat; model of a ship's course indicator. 597
- 90 Wood, John William, Harwich, Essex.—Iron self-adjusting shot hole, rivet hole, and leak stopper. 597
- 91 Martin, Claude, London.—Self-canting anchors; chain cables; model of H. M.'s turret ram "Alexandra." 597
- 92 Gümpel, Charles Godfrey, London.—Ship's rudder. 597

CANADA.

(Central Aisle, Columns 1 to 7.)

Metallurgical, Chemical, Wood-Working Machines.

Machines, Tools, and Apparatus of Mining, Metallurgy, Chemistry, and the Extractive Arts.

Blake's Patent Steam Pump.

SINGLE OR DUPLEX, HIGH PRESSURE, LOW PRESSURE,
AND
COMPOUND ENGINES FOR WATER WORKS.

PATENTED IN UNITED STATES, ENGLAND, FRANCE,
AUSTRIA, BELGIUM, PRUSSIA, and CANADA.

MORE THAN 10,000 BLAKE PUMPS IN USE.

The GEORGE F. BLAKE MANUFACTURING CO.'S
FACTORY is turning out, under the numerous Patents
owned by the Company, every variety of Steam
Pumps, as follows:

WATER WORKS PUMPS, Pumping Direct into the Main or Reservoir.

BOILER-FEED PUMPS.

TANK OR LIGHT-SERVICE PUMPS.

SPECIAL FIRE PUMPS.

MINING PUMPS.

TANNERY PUMPS.

BREWERS' MASH AND BEER PUMPS.

WRECKING PUMPS.

BREWERS' WATER AND AIR PUMPS.

OIL REFINERY PUMPS.

MARINE BILGE AND FIRE PUMPS.

OIL LINE PUMPS.

MARINE CIRCULATING PUMPS.

BLOWING ENGINES.

MARINE AIR PUMPS.

SUGAR HOUSE PUMPS.

PLANTATION PUMPS.

VACUUM PUMPS.

COMBINED BOILER AND PUMP.

LOCOMOTIVE PUMPS.

LOW PRESSURE PUMPS.

PLUNGER PUMPS.

AIR PUMPS.

HYDRAULIC PUMPS.

ACID PUMPS.

GAS WORKS PUMPS.

LARD OR SOAP PUMPS.

BLEACHERY PUMPS.

DRAINAGE AND IRRIGATING PUMPS.

QUARRY PUMPS.

SEND FOR ILLUSTRATED CIRCULAR.

NEW YORK.—86 and 88 Liberty Street.

BOSTON.—Causeway and Friend Streets.

CHICAGO.—50 South Canal Street.

SCHENCK'S BUILDING,
Cor. Sixth & Arch Sts., Philadelphia.

SCHENCK'S PULMONIC SYRUP,
A POSITIVE CURE FOR CONSUMPTION.

SCHENCK'S SEAWEED TONIC,
FOR DYSPEPSIA AND DEBILITY.

SCHENCK'S MANDRAKE PILLS,
FOR ALL BILIOUS DISORDERS.

S. M. PETTENGILL & CO.,

Advertising Agents,

701 CHESTNUT STREET, PHILADELPHIA,

37 PARK ROW, NEW YORK,

Desire to call the attention of business men who wish to reach the reading public to the following

FACTS:

1. They have been in the Advertising business for nearly thirty years, and given it constant attention and study during that time.

2. They have had, and continue to have, cordial business relations with all the newspapers and other periodicals in the United States and Canada.

3. Their record with all these publications is one of fair treatment, honorable dealing, and prompt settlements.

4. In consequence of this, they can always have advertisements inserted at the publisher's lowest rates.

5. They are so acquainted with the entire press of the country that they can select the best mediums for any given purpose.

6. Having done advertising for all kinds of business, and noted the results to their customers, they can give valuable suggestions as to the size, style, and position which will make the most effective advertisement for the object to be attained.

7. Having frequent orders for a large number of papers, they can, in most cases, get the work done for less cost than the advertiser would have to pay if he sent the order direct.

8. They examine all papers, note all omissions or irregularities, secure the strict fulfilment of every stipulation of the order, and submit full files for the inspection of the advertiser.

9. They give the advertiser the full benefit of their facilities and of their supervision without charge, all commissions being paid by the publishers.

10. They submit estimates for any given list of papers, or for properly covering any given district.

11. For a systematic working up of any large enterprise, they assist in the preparation of circulars, pamphlets, and general reading matter, in addition to newspaper advertising.

They invite a call from any parties who contemplate advertising in any way or for any amount.

37 PARK ROW, NEW YORK.
10 STATE STREET, BOSTON.

AGENTS FOR THE

OFFICIAL CATALOGUE.

OFFICE AT THE CENTENNIAL GROUNDS,

Just north of Machinery Hall, where all Advertisers are invited
to call.

Hydraulic, Pneumatic Apparatus, Railway Plant.

- 35 Gehrckens, C. Otto, Hamburg.—
Stuffing boxes. 555
- 36 Wertheim, Louis, Bornheim, near
Frankfort-on-Main.—Steam packing. 555

Hydraulic and Pneumatic Apparatus.

- 37 Alléoud, Emanuel, Metz.—Siphon
pumps. 560
- 38 Weyhe, Wilh., Bremen.—Rotary
pumps. 560
- 39 Royal Saxon Fire Extinguisher Co.,
Leipzig.—Fire extinguishing appara-
tus. 564
- 40 Schultz, Ernst, Aschaffenburg.—At-
mospheric apparatus. 564
- 41 Gassen, J. B., Coblenz.—Gauge. 566

Railway Plant, Rolling Stock, etc.

- 42 Glöckner Bros., Tschirndorf, near
Halbau.—Blocks for brakes. 572
- 43 Camozzi & Schlösser, Frankfort-on-
the-Main.—Railway switch. 574

Aerial, Pneumatic, and Water Trans-
portation.

- 44 Dücker, Baron F. F. von, Bückeberg.
—Drawing of a wire-rope railway. 590
- 45 Cordes, H. G., Bremerhaven.—Gun
for saving shipwrecked persons. 594
- 46 Hamburg-American Joint Stock
Steamship Co., Hamburg.—Model of a
mail steamship. 595

AUSTRIA.

(South of South Aisle, Columns 1 to 5.)

Machines and Motors.

Machines, Tools, etc., of Mining,
Chemistry, etc.

- 1 Rosenegger, Joseph, Oberalm, near
Hallein, Salzburg.—Model of a glass-
melting furnace, cylinder furnace. 506
- 2 Noback Bros. & Fritz, Prague.—
Models and apparatus for arrangement of
breweries and malt-houses. 508

Machines and Implements of Spin-
ning, Weaving, etc.

- 3 Schram, Willibald, Vienna.—Jac-
quard machines. 521
- 4 Surber, I. Jacques, Vienna.—Weav-
ers' reeds. 527

Motors, Power Generators, etc.

- 5 Hock & Co., Julius, Vienna.—Pet-
roleum and steam engines and boilers. 550
- 6 Popper, Joseph and David, Vienna.
—Patent boiler incrustation preserver,
boiler fittings. 505

Railway Plant, Rolling Stock, etc.

- 7 Tagleicht, Karl, Vienna.—Locomo-
tive spark guard. 575

Machinery used in Preparing Agri-
cultural Products.

- 8 Vojtěchovsky & Reznicek, Prague.
—Machines for candy production. 582

SWITZERLAND.

(Pump Annex.)

Motors, Railway Appliances.

Motors, Power Generators, etc.

- 1 Sulzer Brothers, Winterthur, Ct.
Zurich.—Model of a new system of re-
versing gear for valve engines. 555

Railway Plant, Rolling Stock, etc.

- 2 Swiss Manufacturing Co., Neuhaus-
sen, near Schaffhausen.—Model of an
apparatus for heating railway cari-
riages. 571

*Machines pertaining to Watchmaking are exhibited in Swiss Section, Main Building, and
catalogued in Volume 1.*

BELGIUM.

(South of North Aisle, Columns 6 to 17.)

Metal, Wood, Cloth-Working Machines, Motors.

Machines, Tools, and Apparatus of Mining, Metallurgy, Chemistry, and the Extractive Arts.

- 1 Dubois, Wm. & Francis Joseph, Seraing, near Liège.—Drilling machine for mines, tunnels, etc. 500
- 2 Chaudron, Joseph, Brussels.—Models and plans of shafts sunk in Belgium. 501
- 3 Libotte, Nicholas, Gilly, near Charleroi.—Cages with system of parachute, wagons with overthrowers. 502
- 4 Muller & Co., Clermont, near Liège.—Safety wicks for miners. 502
- 5 Sonheur, Arnold, Seraing, near Liège.—Safety lamps for fire-damp mines. 502
- 6 Van Flaecht, Emile, Haeren, near Brussels.—Models of fat-rendering works, with samples of stearine and oleine. 508

Machines and Tools for Working Metal, Wood, and Stone.

- 7 De Tombay, Auguste, Marcinelle, near Charleroi.
 - a Model of a trip-hammer. 514
 - b Model of steam shears. 515
- 8 Jullien & Jennar, Bomereé, near Charleroi.—Vise, blast-pipe, axle. 514
- 9 Nicaise, Ch., & Co., and Gobert, Aug., La Louvière.—Machinery for making bolts. 516

Machines and Implements of Spinning, Weaving, and Paper Making.

- 10 Bède & Co., Verviers.—Wool cleaning machine. 522
- 11 Delrez, Felix, Verviers.—Cards. 522
- 12 Dethiou, Gilles, & Co., Verviers.—Cards. 522
- 13 Horstmans Brothers, Liège.—Cards.
- 14 Martin, Célestin, Verviers.—Looms, mechanical winder, cards. 522
- 15 Martin, Th. J., Pisseroule-Dison, near Verviers.—Cards. 522

Machines, Apparatus, and Implements used in Sewing and Making Clothing and Ornamental Objects.

- 16 Turner, B. B., & Co., Brussels.—
 - a Festooning and embroidering machines. 530
 - b Sewing machines for gloves, straw hats, button-holes, etc. 531
- 17 Joint Stock Society for the Manufacture of Machines and Tools of Precision, Saint Josse-ten-Noode.—Screwing, sewing, and knitting machines. 531

Machines and Apparatus for Type-setting, Printing, Stamping, Embossing, and for Making Books, and Paper-working.

- 18 Derkx-Schlopfer, I. F., Anderlecht, near Brussels.—Wooden printing types 542

Motors, Power Generators, etc.

- 19 Van den Kerchove, P., Ghent.—Corliss engines and Rider machine. 552
- 20 Dolne, L., & Co., Verviers.—Belting. 553
- 21 Horstmans Bros., Liège.—Belting. 553
- 22 Versé-Spelmans, Briclot, Ant., & Co., Brussels.—Belting. 553
- 23 Dervaux, Alfred, Brussels.—Feeding apparatus for boilers. 555

Hydraulic and Pneumatic Apparatus.

- 24 Moreau, Léon, Brussels.—Fire-engine, pumps. 560

Railway Plant, Rolling Stock, etc.

- 25 Durieux & Co., Louvain.—Wheels for cars, carriages, etc. 573
- 26 Mabile, Valère, Mariemont.—Railway stock. 573
- 27 Legrand, Achille, Hyon, near Mons.—Sleepers and cushions for mixing railway. 573
- 28 Léonard, F. L. J., Fayt, near Seneffe.—Railway brake, signals and gates, and ovens. 575

NETHERLANDS.

Machines and Motors.

Machines and Tools for Working Metal, Wood, and Stone.

- 1 Haverkamp, Begemann, Helmond.—Gutter bore machines. 515

Machines, Apparatus, and Implements used in Sewing and Making Clothing and Ornamental Objects.

- 2 Rennes, D. W. van, Utrecht.—Sewing machine. 531

Motors, Power Generators, etc.

- 3 Prakke, J. E. & H., Eibergen.—Leather straps; belting. 553
4 Haeff, G. & M., Lochem.—Leather straps; belting. 553

Hydraulic and Pneumatic Apparatus.

- 5 Rennes, D. W. van, Utrecht.—Machine for moving liquids by heat. 560
6 Rietschoten, van, & Houwens, Rotterdam.—Model of engine for deepening rivers, etc. 563
7 Bickers & Zoon, Rotterdam.—Fire extinguishers. 564
8 Burger, H., Deventer.—Velocipedes. 571
9 Heshuijsen, W. F., Sandpoort.—Railroad switch. 572
10 Bens, A., Deventer.—Coffee and bean mills. 585

SWEDEN.

(North of North Aisle, Columns 6 to 15.)

Mineral, Metal, Cloth, and Paper-Working Machines.

Machines, Tools, and Apparatus of Mining, Metallurgy, Chemistry, and the Extractive Arts.

- 1 Nilson, G., Eskilstuna.—Jacks. 503
2 Alsing, J. R., Stockholm.—Model of cylinder for crushing hard materials. 505
3 Robertson, D., Goteborg.—Machine for making peat bricks. 505
4 Roos, J. J., Norrköping.—Machine for making peat bricks. 505
5 Samuelson, S. H., Foskefors, Rada.—Machine for making hollow peat bricks. 505
6 Soderqvist, R., Goteborg.—Gas apparatus. 509

Machines and Tools for Working Metal, Wood, and Stone.

- 7 Boethius, Emil, Stockholm.—Cork-cutting machines. 510
8 Bolinders, J. & C. G., Machine Manufacturing Stock Co., Stockholm.—Sawing machines. 510
9 Von Essen, H. H., Baron, Tidaholm.—Iron for turning veneer. 510
10 Stridsberg & Bjork, Thorstrålla.—Saws, planing irons, etc. 510

- 11 Fagersta Manufacturing Co., Westaufors.—Saws. 510
12 Sandvikens Iron Works, Sandviken.—Piston rod for steam hammer. 514
13 Bolinders, J. & C. G., Stockholm.—Machines for making metal cartridges; emery wheels. 515
14 Brehmer, E. F. A., Stockholm.—Drilling machine. 515
15 Kopings Machine Manufacturing Stock Co., Köping.—Turning machine. 515

Machines, Apparatus, and Implements used in Sewing and Making Clothing and Ornamental Objects.

- 16 Hedlund, Joh., Eskilstuna.—Sewing machines. 531
17 Husqvarna Arms Manufacturing Co., Jönköping.—Sewing machines. 531
18 Procope, Maria, Stockholm.—Sewing machine. 531

Machines for Printing, Making Books, Paper Working, etc.

- 19 Brehmer, E. F. A., Stockholm.—Paper-cutting machine. 546

Motors, Engines, Railway Plant, Marine Models.

Motors, Power Generators, etc.

- 20 Atterberg, A. J., Hagforsen, Rada.—
Drawings of turbines. 551
- 21 Wenstrom, W., Orebro.—Drawing
of a turbine. 551
- 22 Asplund, Harald, Kristinehamn.—
Marine steam engine. 552
- 23 Kockums Machine Manufacturing
Co., Malmö.—Steam engines. 552
- 24 Kopings Machine Manufacturing
Co., Köping.—Cast iron cylinders for a
sixty horse-power propeller steam en-
gine. 552
- 25 Laurenius, Engberg, & Co., Jönkö-
ping.—Rotatory steam engine. 552
- 26 De Laval, G., Falun.—Motors on a
new system. 552
- 27 Runqvist, C. R., Stockholm.
a Steam engine. 552
b Oscillating steam engine governor. 555
- 28 Winterros, C. E., Stockholm.—
Model of a steam engine. 552
- 29 Sandvikens Iron Works Stock Co.,
Sandviken.—Axles for propellers. 553

Hydraulic and Pneumatic Apparatus.

- 30 Morthin, P., Osthhammar.
a Model of an apparatus for pumping
water. 560
b Fire engine. 564
- 31 Atterberg, H. J., Hagforsen, Rada.—
Drawing of blowing engine. 562
- 32 Mendelson, O. & J., Stockholm.—
Fire-escaping apparatus. 564
- 33 Mobergs Machine Manufacturing
Co., Stockholm.—Fire engine. 564

Railway Plant, Rolling Stock, etc.

- 34 Bjorkman, C. R., Kristinehamn.—
Drawing of a narrow-gauge locomotive. 570

35 Motala Machine Co., Motala.

- a* Locomotive. 570
b Locomotive axles. 573
- 36 Nilsson, N. W., Christianstad.—Au-
tomatic railway couplings. 572
- 37 Sandvikens Iron Works Stock Co.,
Sandviken.—Railway tires and axles. 573
- 38 Adelskold, C. A., Stockholm.—Mo-
del of an axle box for railway cars. 573
- 39 Arboga Foundry and Machine Man-
ufacturing Co., Arboga.—Railway
wheels, tires and axles. 573
- 40 Asplund, Harald, Kristinehamn.—
Railway wheels. 573
- 41 Ekman, Carl, Finspang.—Railway
wheels. 573
- 42 Fagersta Bruks Aktiebolag, West-
anfors.—Railway axles and springs. 573
- 43 Kopings Machine Manufacturing
Co., Köping.—Axles. 573
- 44 Surahammar Works, Surahammar.
—Railway wagon wheels and axles. 573
- 45 Ankarsrums Works, Ankarsrum.—
Railway switches. 574
- 46 Ostrand, Herrman, Helsingborg.—
Drawing of a railway switch. 574

Aerial, Pneumatic, and Water Trans-
portation.

- 47 Lesjofors Stock Co., Filipstad.—
Wire cables. 591
- 48 Abrahamson, A. F., Ryda, Orsunds-
bro.—Sailing boat. 594
- 49 Royal Centennial Commission.—
Models of fishing boats. 594
- 50 Trygger, Alfred, Goteborg.—Models,
drawings, etc., of sailing vessels, made
by the pupils of the school for navigators
in Gotenburg. 594
- 51 Kockums Machine Manufacturing
Co., Malmö.—Models of steamers, and
torpedo boat. 594
- 52 Motala Machine Manufacturing Co.,
Motala.—Steamboat. 595

NORWAY.

(North of North Aisle, Columns 19 to 21.)

Machines, Motors, Ships' Models.

Machines and Implements of Spin-
ning, Weaving, Felting, and Paper
Making.

- 1 O. Jacobsen's Mechanical Works,
Christiania.—Mechanical mangle. 524

Motors, Power Generators, etc.

- 2 Gjerdrum, Otto, Christiania.—Model
of self-acting smoke-consuming apparatus
for boilers. 550
- 3 Klem Hansen & Co., Trondhjem.—
Belting. 553

- 4 Roed Works, near Sandefjord.—Ro-
tating steam-engine with boiler and feed-
water heater. 554

Hydraulic and Pneumatic Apparatus.

- 5 Blunck, C., Christiania.
a Pumps. 560
b Fire-engines. 564

Aerial, Pneumatic, and Water Trans-
portation.

- 6 Arentz, Hjalmar, Christiania.—
Models and drawings of iron ships. 594

SHOE AND LEATHER BUILDING.—GROUND PLAN.

SPECIAL BUILDINGS.

SHOE AND LEATHER BUILDING. No. 57.

Architect, A. B. BARRY.—Size, 300 feet by 160 feet.

Constructed of wood, one story high, and situated south of Machinery Hall, between it and the barrier. Its name indicates its purpose.

KEY TO THE NOTATION.

THE location of objects in the Shoe and Leather Building is shown by a letter and two figures, indicating the nearest column of the building. The letter and first figure designate the section of the building, the second figure the column within that section. The system of numbering is shown on the annexed ground plan.

The class of the classification to which each exhibit belongs is indicated by the small figures at the end of the line.

THE WEST PHILADELPHIA Passenger Railway Company

MARKET STREET LINE.

Shortest and quickest route to the Centennial Buildings. Runs within a short distance of Zoological Gardens, also connects directly with all Railroad Depots, Ferries, and Steamboat Landings. Passes both ways Pennsylvania Railroad Depots (for New York and the West).

CENTENNIAL GROUNDS.

Passengers can take any of the cars of this Company on Market Street for the Centennial Grounds.

First cars leave the depot at 4.30 A. M.

Last car leaves the depot at 11.45 P. M.

First car leaves Front and Market Streets at 5.15 A. M.

Last car leaves Front and Market Streets at 12.30 A. M.

RATES OF FARE.—For adults, seven cents; children under 12 years of age, four cents. Coupon Tickets, sold by the Conductor, four for twenty-five cents, good on any Philadelphia City Railway. Exchange Tickets, nine cents, good on any Railway running across Market street except the Union Line. On cars connecting with arriving trains after midnight, ten cents.

The Market street cars convey passengers to and from the ferries on the Delaware River for Camden, New Jersey, and the depots at the foot of Market street, of the Cape May, Millville, Bridgeton, Salem, Burlington County, Pemberton, and Hightstown, and Amboy Railroads; also, to and from the Pennsylvania Central Railroad Depots, at Thirty-first and Market streets, for New York and the East, or for Pittsburgh and the West and South.

They also pass Independence Hall (within one block), Bingham House, Farmers' Market, Masonic Temple, New Public Buildings, U. S. Mint, and the Pennsylvania Hospital for the Insane, and within one square of Merchants', Continental, Girard, La Pierre, St. Cloud, St. Stephens, West End, and Colonnade Hotels, and the West Chester and Philadelphia Railroad depot, at Thirty-first and Chestnut streets, and within a block of nearly all Places of Amusement.

HEALTH! BEAUTY!!

Strong, Pure, and Rich Blood, Increase of Flesh and Weight, Clear Skin, and Beautiful Complexion secured to all through

DR. RADWAY'S SARSAPARILLIAN RESOLVENT

Every drop of the Sarsaparillian Resolvent communicates through the Blood, Sweat, Urine, and other fluids and juices of the system the vigor of life, for it repairs the wastes of the body with new and sound material. Scrofula, Consumption, Glandular Disease, Ulcers in the Throat, Mouth, Tumors, Nodes in the Glands and other parts of the system, Sore Eyes, Strumous Discharges from the Ears, and the worst forms of Skin Diseases, Eruptions, Fever Sores, Scald Head, Ring Worm, Salt Rheum, Erysipelas, Acne, Black Spots, Worms in the Flesh, Tumors, and all Weakening and Painful Discharges and Night Sweats are within the curative range of this wonder of Modern Chemistry, and a few days' use will prove to any person using it for either of these forms of disease, its potent power to cure them. If the patient, daily becoming reduced by the wastes and decomposition that are continually progressing, succeeds in arresting these wastes, and repairs the same with new material, made from healthy blood, and this the Sarsaparillian will and does secure, a cure is certain; for, when once this remedy commences its work of purification and succeeds in diminishing the loss of wastes, its repairs will be rapid, and every day the patient will feel himself growing better and stronger, the food digesting better, appetite improving, and flesh and weight increasing. Not only does the SARSAPARILLIAN RESOLVENT excel all known remedial agents in the cure of Chronic, Scrofulous, Constitutional, and Skin Diseases, but it is the only positive cure for Kidney, Bladder, and Urinary Diseases, Gravel, Diabetes, Dropsy, Stoppage of Water, Incontinence of Urine, Bright's Disease, Albuminuria, and in all cases where there are brickdust deposits, or the water is thick, cloudy, mixed with substance like the white of an egg, or threads like white silk, or there is a morbid, dark, bilious appearance, and white bonedust deposits, and when there is a pricking, burning sensation when passing water, and pain in the Small of the Back along the Loins.

Tumor of 12 years' growth cured by Radway's Resolvent.

BEVERLY, MASS., July 18th, 1869.

DR. RADWAY: I have had Ovarian Tumor in the ovaries and bowels. All the doctors said "there was no help for it." I tried everything that was recommended, but nothing helped me. I saw your Resolvent, and thought I would try it, but had no faith in it, because I had suffered for TWELVE YEARS. I took six bottles of the Resolvent, one box of Radway's Pills, and used two bottles of your READY RELIEF, and there is not a sign of a tumor to be seen or felt, and I feel BETTER, SMARTER, and happier than I have for twelve years. The worst tumor was in the left side of the bowels, over the groin. I write this to you for the benefit of others. You can publish if you choose. * * * * *

HANNAH P. KNAPP.

R. R. R.

RADWAY'S READY RELIEF

Cures the worst pains in from one to twenty minutes. Not one hour after reading this advertisement need any one suffer with pain. Radway's Ready Relief is a cure for every pain. It was the first and is *THE ONLY PAIN REMEDY* that instantly stops the most excruciating pains, allays Inflammations, and cures Congestions, whether of the Lungs, Stomach, Bowels, or other glands or organs, by one application, *in from one to twenty minutes*. No matter how violent or excruciating the pain the Rheumatic, Bedridden, Infirm, Crippled, Nervous, Neuralgic, or prostrated with disease may suffer,

RADWAY'S READY RELIEF

Will afford instant ease. Inflammation of the Kidneys, Inflammation of the Bladder, Inflammation of the Bowels, Congestion of the Lungs, Sore Throat, Difficult Breathing, Palpitation of the Heart, Hysterics, Croup, Diphtheria, Catarrh, Influenza, Headache, Toothache, Neuralgia, Rheumatism, Cold Chills, Ague Chills. The application of the READY RELIEF to the part or parts where the pain or difficulty exists will afford ease and comfort. Twenty drops in a half tumbler of water will, in a few moments, cure Cramps, Spasms, Sour Stomach, Heartburn, Sick Headache, Diarrhoea, Dysentery, Colic, Wind in the Bowels, and all Internal Pains. Travelers should always carry a bottle of RADWAY'S RELIEF with them. A few drops in water will prevent sickness or pains from change of water. It is better than French Brandy or Bitters as a stimulant.

FEVER AND AGUE.

FEVER AND AGUE cured for FIFTY CENTS. There is not a remedial agent in this world that will cure Fever and Ague and all other Malarious, Bilious, Scarlet, Typhoid, Yellow, and other Fevers (aided by RADWAY'S PILLS) as quick as RADWAY'S READY RELIEF. Fifty cents per bottle.

DR. RADWAY'S PILLS,

Perfectly tasteless, elegantly coated, for the cure of all Disorders of the Stomach, Liver, Bowels, Kidneys, Bladder, Nervous Diseases, Headache, Constipation, Costiveness, Indigestion, Dyspepsia, Biliousness, Bilious Fever, Inflammation of the Bowels, Piles, and all Derangements of the Internal Viscera. Warranted to effect a Positive Cure. RADWAY'S PILLS will free the system from all the above-named disorders. Price, 25 cents per box.

Read FALSE AND TRUE. Send one letter stamp to RADWAY & Co., No. 32 Warren Street, New York. Information worth thousands will be sent you.

EXHIBITION MADE BY THE UNITED STATES GOVERNMENT.

CONTRIBUTING DEPARTMENTS.

WAR DEPARTMENT.—Hon. ALPHONSO TAFT, Secretary of War.

NAVY DEPARTMENT.—Hon. GEORGE M. ROBESON, Secretary of the Navy.

TREASURY DEPARTMENT.—Hon. B. H. BRISTOW, Secretary of the Treasury.

INTERIOR DEPARTMENT.—Hon. Z. CHANDLER, Secretary of the Interior.

POST-OFFICE DEPARTMENT.—Hon. MARSHALL JEWELL, Postmaster-General.

AGRICULTURAL DEPARTMENT.—Hon. FREDERICK WATTS, Commissioner of Agriculture.

SMITHSONIAN INSTITUTION.—Prof. JOSEPH HENRY, Director of Smithsonian Institution.

COMMISSION OF AMERICAN FOOD FISHES.—Prof. S. F. BAIRD, Commissioner.

BOARD ON BEHALF OF U. S. EXECUTIVE DEPARTMENTS AT THE INTERNATIONAL EXHIBITION OF 1876.

Col. S. C. LYFORD, Ordnance Corps, U. S. Army, Chairman of the Board, and Representative of the War Department at the Exhibition.

Rear Admiral THORNTON A. JENKINS, U. S. Navy, Representative of Navy Department.

Hon. R. W. TAYLER, First Comptroller Treasury, Representative of Treasury Department.

Hon. JOHN EATON, Commissioner of Education, Representative of Interior Department.

Dr. C. F. MACDONALD, Superintendent Money Order Bureau, Representative of Post-Office Department.

WILLIAM SAUNDERS, Superintendent Propagating Garden, Representative of Agricultural Department.

Prof. S. F. BAIRD, Assistant Secretary Smithsonian Institution, Representative of Smithsonian Institution, and Commissioner of American Food Fishes.

WM. A. DECAINDRY, Secretary of the Board.

UNITED STATES GOVERNMENT BUILDINGS.

MAIN BUILDING, No. 100.

Architect, JAS. H. WINDRIM.—Size, Floor Area, 102,840 sq. ft.

This structure is situated at the intersection of Belmont and Fountain Avenues, is built in the form of a Latin cross, and is of framed white pine, unplanned, with two tiers of windows. It contains for exhibition contributions from the different Executive Departments of the United States Government.

ORDNANCE LABORATORY BUILDING, NO. 102.

Architect, Col. T. T. S. LAIDLEY, Ordnance Corps, U. S. A.—Size, 53 ft. x 23 ft.

This building is located north of Main Building, and is built of wrought iron, rivetted, covered with a light casing of wood. It is designed with the view of preventing the great loss of life that usually results from the demolition of a building of ordinary construction, by the explosion of even a small amount of powder. In the event of an explosion in this building, the roof and sides fall at once, and the iron frame is left standing, in order to shield the inmates from being crushed beneath the ruins. The building, as well as its contents, is on exhibition.

UNITED STATES ARMY POST HOSPITAL, NO. 101.

Size, 35 ft. x 39 ft., and Addition of 40 ft. x 14 ft.

This Hospital is situated north of the Main Building, is two stories in height, and is intended to hold twenty-four beds. It is built of wood, and contains medical appliances of all kinds, including medicines, instruments, hospital stores, clothing, books, and furniture, models of hospitals, cars, boats, ambulances, etc., microscopical and other specimens. The construction of the building and its contents are on exhibition.

TRANSIT OF VENUS BUILDINGS, NO. 104.

This structure is situated southwest of Government Building, consisting of,—

1. Transit House.—Dimensions, 10 ft. x 8 ft.
2. Photographic House.—Dimensions, 12 ft. x 10 ft.
3. Equatorial House.—Dimensions, 11 ft. in diameter.

All the instruments employed in observing and recording the phenomena of the late transit of Venus are so placed on exhibition that the various processes will be exemplified by practical workings.

WAR DEPARTMENT.

Signal Section.

SIGNAL SECTION.

The instruments exhibited in the Signal Service Section of the United States Army are all of American manufacture, and only such as have been devised for the signal service of the army by officers or enlisted men of the corps.

METEOROLOGICAL INSTRUMENTS.

The display of self-recording instruments consists of barographs, anemographs, thermographs, rain-gauges, and evaporator. Some of these are worked by electrical batteries, others by mechanical means. Those recording the velocity and direction of the wind, the amount of rainfall and changes of temperature, are connected with their respective wind-cups, wind-vanes, rain-receivers, and thermometers, exposed upon an artificial glass roof, beneath which the recording apparatus is placed, each electrical instrument having its own battery. Artificial currents of air and water are used to obtain uninterrupted working.

UNITED STATES SIGNAL STATION.

This department consists of a model United States signal service station, similar to those established in different sections of the United States. Here are exhibited the meteorological instruments used on station; the manner

of taking, recording, and transmitting to the central office at Washington the observations upon which the weather reports, storm warnings, etc., are based; the method of publishing and distributing the predictions forwarded from the office of the Chief Signal Officer of the army, as well as the various means adopted to furnish at the earliest practicable moment all weather information which would be of benefit to commerce and agriculture. Specimens of the publications, charts, and maps of the office of the Chief Signal Officer are also exhibited.

PRINTING DEPARTMENT.

Here are exhibited in detail the printing of "weather maps" and "farmers' bulletins."

FIELD WORK.

This portion of the exhibition comprises a complete United States field-telegraph train, with capacity to erect 50 miles or more of portable telegraph line; portable signal tower 75 feet high, with its wagon; semaphore, signal flags, torches, rockets, bombs, and mortars, colored lights, heliographs (for communicating by means of sun flashing), and international flags, and other apparatus used in communicating with troops in the field or with vessels.

Quartermaster, Medical, Engineer Sections.

MODEL DEPARTMENT.

The model department comprises models of the different instruments used in field signaling, models of station meteorological instruments and portable instrument shelter, and a new electrical instrument for transmitting by telegraph the isobarometric and isothermal lines of the Signal Service weather maps.

QUARTERMASTER SECTION.

Uniforms.—Revolutionary uniforms, and those of succeeding years; present uniforms of the army.

Camp and Garrison Equipage.—Tents, flags, cooking utensils and tools; field music—drums, bugles, etc.; bunks, blankets, and bedsacks.

Means of Transportation.—Wagon and harness; ambulance and harness; aparajo; pack saddle; historic wagon; portable and traveling forges.

Machines.—For cutting out clothing; for brass screwing shoes; for testing fabrics.

Farriers' and Saddlers' Tools.

Standard Horse Shoes.

Veterinary Chest.

Kiernan's System of Horse Shoeing.

MEDICAL SECTION.

This display represents the character of the work of the medical staff of the United States army in peace and war. Four classes of objects are exhibited by the objects themselves, by models, or by photographs.

1. Hospitals for Sick and Wounded Soldiers.

a Post hospital of 24 beds of full size.

b Four full-sized hospital tents, with furniture representing the tent ward which served as the unit of the "tent field hospital" used during the civil war of 1861-65.

c Models of the barrack "General Hospitals" used during the war of 1861-65, viz.: a model of the form of barrack ward for 60 beds, on the scale of half an inch to the foot; and four ground-plan models showing combinations of such wards in general hospitals.

2. Medical and Hospital Supplies.

Samples of articles on the medical supply table of the army; medicines; hospital stores; surgical instruments and dressings; hospital furniture, bedding, clothing, and appliances; books, blank forms for reports, and stationery; medical panniers and medicine wagons, and samples of the artificial arms, legs, trusses, and other apparatus issued by the medical department to disabled soldiers.

3. Transportation of Sick and Wounded.

Stretchers, litters, and ambulances, full size and models; models of hospital railroad cars, hospital steamboat, and hospital ocean steamship, illustrating mode of transporting sick and wounded during the late war.

4. Treatment of Diseases and Injuries of Soldiers.

Army medical museum, represented by medical, surgical, anatomical, and microscopical specimens, photographs of specimens, and catalogue of museum; catalogue of Surgeon-General's office; photographed title pages of rare books on military medicine and surgery, etc.; medical and surgical publications of Surgeon-General's office.

The Post Hospital, for twenty-four beds, constructed from plans approved by the War

Department, contains the greater part of the display of the Medical Department, as follows:

Room 1, 45x25, a ward with twelve beds, furniture, bedding, clothing, etc.

Room 2 (the other ward, same size), models of hospitals, ambulances, hospital cars, boats, and ships, specimens from museum, etc.

Room 3, the dispensary, samples of medical supplies.

Room 4, the office, samples of surgical instruments, medical and surgical books, blanks, etc.

Room 5, dining room, table ware, mess furniture.

Room 6, kitchen, cooking apparatus.

Room 7, office of officer in charge of the display.

Rooms on second floor, stretchers, litters, medicine chests, and panniers; artificial legs and arms, trusses for rupture, and other apparatus.

Tent ward, full-sized hospital tents, pitched in the rear of the post hospital.

Ambulances, medicine wagons, and carts, full-sized, parked near the tent ward.

ENGINEER SECTION.

Maps and Drawings.

Map of the United States, showing work done by corps of engineers, 1776-1876.

Drawing of Rock Island bridge.

Map of canal and locks, Des Moines rapids.

Map of Mississippi river, from Le Claire, Iowa, to Rock Island, Illinois.

Drawings of improvements of Mississippi river between mouths of the Illinois and Ohio.

Plans of improvements on Hudson river, near Albany.

Drawing of iron landing pier, Delaware breakwater harbor.

Drawing of foundation of Fort Delaware.

Drawing of dynamometer for determining force required to screw down iron piles of Lewes pier.

Drawing of Delaware breakwater, with details of breakwater and ice barrier.

Map of shore of Delaware harbor, including Cape Henlopen.

Chart of Schuylkill river, from mouth to Chestnut Street bridge, showing improvements made by United States in its navigation from 1870 to 1875.

Drawing of dredge-boat "Henry Burden."

Drawing of mortar mill and concrete mixer.

Map of flood plain of Minnesota and Mississippi rivers, showing connection with basin of Red River and Lake Winnepeg.

Drawings of snag boat.

Chart of Galveston entrance.

Detailed drawings and photographs, illustrating experimental works at Galveston entrance.

Chart of Indianola harbor.

Detail drawings of end dock.

Charts of Lake Survey.

Lighthouse drawings, Eleventh district.

Drawing of river and harbor works.

Plans of cribs and pile pier at Chicago.

Maps and hydrographs of Ohio, Monongahela, and Great Kanawha rivers.

Drawings of crib work for piers on Lake Ontario.

Special map of region west of Mississippi river.

Special triangulation map of region west of Mississippi river.

Detailed topographical sheets of above region.

Specimen copies of photolithographic atlas,

Engineer, Ordnance Sections.

crayon topographical atlas, and geological atlas.

Models of Harbor Improvements.

Work at Hallet's Point, N. Y. (Hellgate.)
Northern extremity of Cape Cod.

Section of iron landing pier of Delaware breakwater harbor.

Iron ice barrier proposed for Horse Shoe of Delaware river.

Breakwater at Dunkirk, N. Y.

Crib and lighthouse on Spectacle reef, Lake Huron.

Angle crib and lighthouse at Harbor of Refuge, Lake Huron.

Model showing shore lines and breakwater at Harbor of Refuge, Lake Huron.

Crib and pier at Chicago, Illinois.

Crib work for piers on Lake Ontario.

"Mattress" or "apron" used in improvements of harbor at mouth of Cape Fear river, N. C.

Models of Machinery and Appliances.

Steam drilling scow.

Capstan-head and machinery for screwing down iron piles at Delaware breakwater landing pier.

Derrick for landing shafts.

Eccentric clamp or "nipper" for sustaining piles.

Snag boat, showing hull.

Dredge-boat "McAlester."

Large grapple.

Photographs.

Views of Hallet's Point, N. Y.; snag boat; Red river; cribs and piers at Chicago, Ill.; country west of Mississippi river (Wheeler expedition).

Materials, Specimens, and Samples.

Specimens of borings at site of landing pier of Delaware breakwater; of iron used in construction of landing pier; of timber piles taken from between tides at Reedy Island; ice barrier; of building stone, concrete, and woods, collected from various parts of the United States; of fossil trees; of large cypress stump, taken from mouth of Cape Fear river, N. C.

Miscellaneous.

United States bridge equipage, pontoon wagons, loaded; tool wagon; forge; model of bridge train, wagons, and loads; reserve and advance guard bridges; siege and mining tools; field photographic outfit; reconnaissance instruments; bridge model; models of torpedoes; models of apparatus for measuring subaqueous explosions, in glass tank; torpedoes, full size, models, 1874-75; ground mine; cable stop; junction boxes; torpedo cables, multiple and single; operating box; electrical apparatus used with torpedoes; iron plate from torpedo target, showing effects of thirty pounds of dynamite exploded under water at thirty feet distance; models of King, De Russey, and Hunt self-depressing gun carriages; models of mortar carriage and muzzle-pivoting gun carriage; surveying, astronomical, and barometrical instruments for field work; publications of the engineer bureau.

ORDNANCE SECTION.**Sea Coast Guns.**

20 in. Rodman gun, on carriage and chassis, with hydraulic buffer, on platform; implements.

12 in. Thompson b. l. rifle, experimental, under Laidley's gun lift.

9 in. Sutcliffe b. l. rifle, experimental, on carriage and chassis, with Sinclair's friction-brake, mounted on platform; implements.

10 in. Woodbridge gun, experimental; in slings, under Laidley sling cart.

8 in. m. l. converted rifle, experimental, on 10 in. casemate carriage and chassis, with pneumatic buffers, mounted on platform in model of casemate; implements.

Mann's 8 in. b. l. rifle, wrought iron, experimental, mounted on top carriage and chassis.

8 in. siege howitzer, mounted on wooden siege carriage.

Siege Guns.

4.5 in. siege rifle gun, mounted on Benton's experimental iron siege carriage, with limber; implements.

Field Guns.

Light 12 pdr. gun, 4.62 in. wooden carriage, with limber; implements.

Sutcliffe 3.9 in. b. l. rifle, experimental.

Hotchkiss 3.9 in. b. l. rifle, experimental.

Moffat 3.15 in. b. l. rifle, experimental.

Mann's 3 in. b. l. rifle, experimental.

3 in. wrought iron, m. l. rifle, mounted on Benton's experimental iron 12 pdr. field carriage, with limber and caisson; implements; model horse harnessed to limber, with mounted driver.

10 pdr. Parrot rifle, mounted on Watervliet arsenal experimental iron field carriage, with limber.

3 in. Whitworth field piece, on carriage.

2.5 in. Woodbridge gun, experimental; fired 1327 times.

Hotchkiss field cannon, experimental.

Rebel b. l. pieces, field and boat, experimental skids.

Lyman's multicharge rifle, cal. 6 in., experimental skids.

Bomford and Wade perforated gun, experimental; used to determine experimentally exterior lines of heavy cannon, by means of pressure at different points of bore.

Mountain howitzer, mounted on carriage.

Mountain howitzer battery, on stands.

Volley and Repeating Guns.

Gatling gun, short barrel, cal. 45, on cavalry carriage; model horse in harness.

Hotchkiss revolving cannon, on carriage, experimental.

Union repeating (coffee-mill) gun, on carriage, experimental.

Regua battery, on carriage, experimental.

Guthrie & Lee gun, on carriage, experimental.

Vandenburgh volley gun, on carriage, experimental.

Revolutionary Guns.

6 pdr. French guns, bronze, presented by Lafayette; forming enclosure around models of modern gun plant.

12 pdr. siege gun, bronze, mounted on wooden carriage, with limber.

8 in. howitzer, bronze, mercer.

24 pdr. howitzers, Byer's; cast in Philadelphia.

Anthony Wayne howitzers, intended to be used on horseback; cast in Germantown, Philadelphia, by D. King.

Mortars.

13 in. sea-coast mortars, on bed, with centres, pintles, chassis mounted, on platform; implements.

24 pdr. Coehorn mortars, on beds.

Carriages.

New cavalry forge cart.

Projectiles.

Shot, shells, grape, canister, etc., for various weapons and calibres; smooth-bored and rifled; fired and unfired; hand-grenades,

Established A. D. 1858.

MORDECAI D. EVANS,

INSURANCE ROOMS

S. W. Corner

FOURTH AND LIBRARY STS.

PHILADELPHIA.

Insurance negotiated in responsible companies to any amount.

Navigation, Observatory, Docks, Engineering, Etc.

manufacture; other musket cartridges and cartridge inventions in possession of the navy.

Rifle projectiles for heavy guns; inventions of Dahlgren, Holroyd, Dana, Parrot, Hotchkiss, James, Brooks, and other inventors.

Sub-calibre and elongated projectiles for smooth bore guns; solid shot, shell, incendiary shell, grape, canister, shrapnel, as used at present, and as previously used or proposed.

Projectiles which have been fired at iron targets; models of projectiles; model gun-carriages; war rockets, hand grenades; leather work of navy ordnance; sponges, rammers, and scrapers of different styles and inventions; fuses, cannon primers, and caps, cannon locks, night signals, impressions from guns, vent impressions; gun sights; breech, reinforce, and trunnion.

Figures of sailors, showing the dress and arms at different periods.

Miscellaneous articles and naval relics.

NAVIGATION BRANCH.

Navy bunting and navy flags, illustrating the present state of the bunting manufacture in the United States, as shown in the bunting made for the navy and known as "navy bunting," and also the mode of making flags by dyeing in pattern.

Bunting testing machine.

Navy sounding machines and auxiliary apparatus, showing the improvements in Sir William Thomson's sounding machine, and the various devices for detaching sinkers, and bringing up specimens of bottom, water, etc.

Navy signal apparatus, showing the colored lights (Coston's), with specimens.

Navy compasses and compass-testing instruments, showing specimens of the navy compass, azimuth circle, tell-tale, boat, and monitor compasses.

Portable compass-testing instrument, with specimens to illustrate development of the hand compass.

Specimens of the old dry or air compass of American makers, illustrating the progress of improvement.

Adjustable binnacle.

NAVAL OBSERVATORY.

Publications.

Photographs of astronomical and other objects.

Chronometers.

Objects illustrative of American Arctic explorations.

Buildings and instruments used in the observations of the transit of Venus, December 8, 9, 1874.

HYDROGRAPHIC OFFICE.

Nautical charts, books, etc., published by the Hydrographic Office.

NAUTICAL ALMANAC OFFICE.

Publications of the office.

YARDS AND DOCKS BRANCH.

Plans of navy yards at Portsmouth, N. H.; Boston, Mass.; New York, N. Y.; Washington, D. C.; Norfolk, Va.; Pensacola, Fla., and Mare Island, Cal.

Plans of machinery at Boston navy yard; plans of dry docks at Boston, Mass., and Norfolk, Va.

Photographs of buildings, etc., at Portsmouth, N. H.; New York, N. Y.; Norfolk,

Va.; League Island, Pa.; Boston, Mass., and Mare Island, Cal.

Models of dry docks at Boston, Mass.; New York, N. Y.; Norfolk, Va., and Mare Island, Cal.

Pyramid of blocks of wood taken from naval vessels.

STEAM ENGINEERING BRANCH.

Machinery of the "Nipsic."

The machinery of the various sizes of steam launches.

The engines of the "Epervier."

Part of the original machinery of the torpedo boat "Spuytten Duyvel," a steam launch, with the first torpedo machinery used in the United States Navy.

Detail drawings of compound engines.

Photographs of machine shops, foundries, etc., showing improved tools used in the manufacture and construction of steam machinery.

Two compound boilers.

Baird's distiller, illustrating the method of making fresh water on board ship at sea.

EQUIPMENT AND RECRUITING BRANCH.

Young's ship's galley, with utensils for cooking for 500 men.

Hemp, manila, and wire rope; cable, blocks, chain cables, etc.

CONSTRUCTION AND REPAIR BRANCH.

Models of the "Constitution;" "Mississippi;" "Jamestown;" "St. Mary's;" "Portsmouth;" "Constellation;" "Niagara;" "Merrimac;" "New Ironsides;" "Hartford;" "Monitor;" "Kearsage;" "Vandalia;" "Constitution;" "President;" "Ohio;" "Enterprise;" "Washington;" and "Fulton."

Full-rigged model.

MEDICAL AND SURGICAL BRANCH.

Medicines and Hospital Stores used in the Navy.

Surgical instruments and appliances usually supplied in the service; additional case of surgical instruments occasionally supplied in lieu of the standard operation case.

Cots and stretchers for transportation of wounded in action.

Model of a sick bay; the part of the ship usually allotted for hospital accommodation.

Model of hospital ship.

Fan for ventilating the hold of a ship in hot climates.

Starting funnel arrangement for aerating distilled water.

Set of record and account books for a naval hospital.

Fracture bedstead, for elevating the patient and changing position.

Bed with woven wire mattress.

Photographs and plans of naval hospitals.

PAY, PROVISION, AND CLOTHING BRANCH.

Articles and materials of clothing issued in the navy.

Package, showing the manner of packing clothing for sea.

Navy rations in glass jars, and packages of the same as prepared for sea.

"Small stores," articles for mess use: pans,

Patents, Pensions, Lands, Indians, Education, Census.

spoons, knives, etc., tobacco, soap, needles, thread, and other small articles.

Packages of tobacco and soap as packed for sea use.

Paymasters' books and blanks for a ship with complement of 200 men; paymasters' sta-

tionery; stewards' stores, scales, and tools used in issuing provisions.

Iron safe; locks used on paymasters' store-rooms, three in number.

Specimen of candles.

TREASURY DEPARTMENT.

(Owing to want of sufficient appropriation by Congress for defraying the expense of the participation in the Exhibition by the Treasury Department, no definite arrangements have yet been made for contributions from it.—March 31, 1876.)

INTERIOR DEPARTMENT.

PATENT OFFICE.

Publications.—Annual reports; official gazette; indexes to patents, general and yearly; volumes of patents, monthly and weekly; decisions of Commissioner of Patents; mechanical dictionary; official classification.

Drawings of Models.—Selected series (6,000), intended to serve in the illustration of the Patent Office work, from the classes given below.

Models.—Selected series (5000), intended to serve in the illustration of the Patent Office work, from the following classes: agriculture; harvesters; mills and presses; architecture; civil engineering; railways; navigation; metallurgy; metal working; wood working; steam; hydraulics; pneumatics; mechanical movements; hoisting; horse powers; journals and bearings; vehicles; fire arms; textile; printing and stationery; stone; clay; glass; leather; light; heat; electricity; household; chemistry; gas; ice, and fine arts.

Miscellaneous Collections of Interest.—The original Declaration of Independence; Gen. Washington's commission from the Continental Congress; personal effects of Gen. Washington, such as furniture, porcelain, clothing, cane, sword, traveling escritoire, surveying compass, camp equipage, including tent, mess-kit, money-chest, etc.

Weapons of historical interest, such as bayonets from General Braddock's line of march; muskets presented by the Emperor of Morocco to Mr. Jefferson; war saddle of Baron De Kalb; sabres of honor presented to United States officers by sovereigns and beys; model of invention by President Lincoln.

PENSION OFFICE.

Publications.—Annual reports; graphic illustrations; wall maps; wall charts; portfolios of diagrams, etc.; collections of historical interest; selections from the archives of the office relative to the Revolutionary war.

GENERAL LAND OFFICE.

Publications.—Annual reports; digests, and other documents.

Graphic Illustrations.—Maps, charts, and atlas of surveys; miscellaneous collections; instruments and processes employed in the land survey.

INDIAN OFFICE.

Publications.—Reports and other publications.

Illustrations.—Portraits, photographs, maps of reservations, etc.

Models.—Wigwams, communal houses, canoes, etc.

Miscellaneous Collection of Interest.—Costumes, male and female, adult and others; weapons of war and the chase; tents, wigwams, canoes, etc.; domestic utensils; specimens of food; toys, games, and festivals; arts and manufactures of the tribes; ethnological collections, etc.

EDUCATION OFFICE.

Publications by the Office.—Annual and special reports, and circulars of information.

Publications by other Offices or Persons.—Foreign reports on American education; foreign educational reports and documents; treatises on pedagogy; and educational journals.

Graphic Representations.—Wall maps and charts; portfolios of engravings, drawings, and photographs; busts; paintings, and other portraits.

Models of Educational Buildings.—The primitive log school-house; country school-house of to-day; city graded school-house; college buildings; details as to dormitories, ventilative apparatus, school-rooms, etc.; models of adobe and sod school-houses.

Specimens of School Furniture, Apparatus, and text-books.—Historic collection, showing progress in text-books; specimens and models of school desks, seats, black boards, school maps, charts, etc.; specimens of modern slates, globes, natural history cabinets, chemical and philosophical apparatus, chemical appliances, etc.

Miscellaneous Collections of Interest.—Selected volumes of state and city educational reports; catalogues of private schools, academies, seminaries, colleges, and professional schools, selected series; catalogues and reports of orphan, reformatory, and charitable schools for the young, etc.; catalogues and reports of institutions for the deaf mute, blind, etc.; catalogues and reports of libraries; catalogues and reports of museums of art, of science, and of natural history.

These miscellaneous collections, some bound and others in their original condition, will be exhibited as showing specimens of the materials for the study of education, which are published by the systems and corporations themselves.

Volumes of manuscript returns made to the Bureau of Education by educators and school officials of every grade, and used in the preparation of its annual and special reports.

CENSUS OFFICE.

Publications.—Decennial censuses; statistical atlas, 1870.

Surveys, Post-Office, Agriculture.

Graphic Illustrations.—Maps, charts, and diagrams.

Miscellaneous Articles of Interest.—Original schedules of the census of 1790; selected volumes of schedules of subsequent censuses.

GEOLOGICAL AND GEOGRAPHICAL SURVEY OF THE TERRITORIES.**1st Division.**

Publications.—Reports, bulletins, etc.

Graphic Illustrations.—Topographical and geological atlases; wall maps and charts; panoramic photographs; stereoscopic views; photographic portfolios; photographic transparencies; paintings, landscapes, portraits, etc.

Models and Reliefs.—Topographical and geographical relief maps; relief sections; models of displacement; models of ancient

ruined cliff habitations; models of same restored.

Collections of Interest.—Geological and mineralogical cabinets; pottery, costumes, weapons, implements, toys, etc.

2d Division.

Publications.—Reports; bulletins; monographs, etc.

Graphic Illustrations.—Topographical and geological atlases; wall maps and charts; panoramic and stereoscopic views; portfolios, albums, and transparent photographs.

Models and Reliefs.—Topographical and geological relief maps; geological structural sections; models of displacement.

Miscellaneous Collections.—Geological and mineralogical specimens arms, clothing, etc.

POST-OFFICE DEPARTMENT.

The exhibition of this Department is classed under the following general heads:

A MODEL WORKING POST-OFFICE.

This is a branch office or station of the Philadelphia office, and shows the practical workings of the following divisions of this Department, viz.: Box and general delivery system; system of carrier delivery and collections; registered letter system; money-order system; foreign mail system, etc.

RAILWAY MAIL SERVICE DIVISION.

Two railway post-offices or postal cars, equipped with mail-bag catchers, and all other first-class appointments of that service, under charge of railway post-office clerks, by whom the mailing and distribution of outgoing mails is performed. Several models of mail catchers are also exhibited under this head.

Model mail cars, small size,—exhibiting the practical working of the mail-bag catcher upon a miniature truck inside the building.

STAMPS, STAMPED ENVELOPE, AND POSTAL CARD DIVISION.

Machine in operation manufacturing stamped envelopes; machine in operation manufacturing postal cards; specimens of all stamps, stamped envelopes, and postal cards; specimens of registered-letter envelopes and post-office official envelopes; specimens of all United States post-office stamps and stamped envelopes, formerly used and now out of date.

MAIL EQUIPMENT DIVISION.

Leather pouches for letter mails; canvas bags for printed and miscellaneous matter; also registered-letter mail bags; mail locks, now in use; mail locks, out of use.

TOPOGRAPHICAL DIVISION.

Railway and general postal-route maps, and money-order office maps.

DIVISION OF BOOKS AND BLANKS.

Specimens of all books, blanks, etc., used by the Department; letter scales; marking and rating stamps.

AGRICULTURAL DEPARTMENT.

The exhibit from the Agricultural Department embraces as follows:

BOTANICAL DIVISION.

A collection of all the timber trees of the United States, in sections, showing interior and exterior surfaces; specimens of flowers, leaves, and fruits; herbarium specimens of grasses and other specialties.

STATISTICAL DIVISION.

Large outline maps of the United States, showing forest areas, extent, and value of farming lands, and amount of production, by counties; arrangement of charts and diagrams detailing amount of special products, by sections; statistics of farm animals, and illustrated statistics of industrial education; statistical album of miscellaneous details, with charts, diagrams, etc.

ENTOMOLOGICAL DIVISION.

Collections of fruit and vegetable models; birds beneficial and injurious to farmers and

orchardists; poultry types, illustrated by stuffed specimens; collection of grains and cereals; collection of textile fibres of the United States, with specimens of their manufacture; specimens of tobacco, from different tobacco-producing sections of the United States; mounted collection of beneficial and injurious insects.

MICROSCOPICAL DIVISION.

Series of water-color drawings illustrating typical genera of microscopic fungi; preparations illustrating the characteristics of poisonous and edible mushrooms common to the United States; illustrations displaying the varied character of the starch granules of plants; drawings and illustrations explaining method of distinguishing vegetable and animal fibres, their kind and quality; drawings displaying vegetable and animal cellulose and starches, and illustrating methods of detecting them in organizations.

CHEMICAL DIVISION.

Fertilizers.—Mineral—including phos-

BRANCHES IN ENGLAND, CANADA, FRANCE, BELGIUM, ETC., ETC.

Horticulture, Animals, Fish, Ethnology.

phates, apatite, coprolites, and all minerals and materials yielding potash, etc.; vegetable—muck, peat, sea-weed, and other products of vegetable decomposition; animal—including guanos, bones, refuse from abattoirs, fisheries, oil manufactures, cancerine, etc.; agricultural products and materials obtained by chemical processes from flour, meal, bran, hominy; methods of preserving, etc., with special products of manufacture, viz.: starch, dextrine, sago, sugars, gums, glucose; products obtained by fermentation: wine, beer, ale, etc.; products of acetous fermentations;

tanning materials of the United States: barks, leaves; tanning solutions, with modes of manufacture; dyes of the United States; resins and products of distillation of resinous materials; oils, vegetable, fixed, and others; products of milk, classified according to methods of production.

HORTICULTURAL DIVISION.

Specimens of economic and utilizable plants, showing methods of growth, culture, etc., grapes, cotton, tobacco, flax, broom corn, jute, corn, sorghum, yucca fibres, etc.

SMITHSONIAN INSTITUTION, AND COMMISSION ON AMERICAN FOOD FISHES.

The Smithsonian Institution makes the following exhibits:

Publications of the Institution.

Smithsonian contributions to knowledge; miscellaneous collections; annual reports, and other publications.

Meteorological work of the Institution: Charts showing the mean temperature, rainfall, and barometric pressure of the United States.

International exchanges; statistics of number of correspondents; extent of distribution by exchange.

General condition; financial statement.

COLLECTION TO ILLUSTRATE THE ANIMAL RESOURCES OF THE UNITED STATES.

IN CHARGE OF G. BROWNE GOODE.

Animals Beneficial or Injurious to Man—Mammals; birds; reptiles; amphibians; fishes; elasmobranchiates; marsipobranchiates; leptocardians; insects; arachnians; crustaceans; worms; mollusks; radiates; protozoans and marine products not of animal nature.

Means of Pursuit and Capture.—Hand-implements; implements for seizure of objects; missiles; baited hooks; angling tackle; nets, and traps.

Apparatus for Wholesale Destruction.—Hunting animals; decoys and disguises; pursuit—its methods and appliances.

Means of Utilization.—Preparation and preservation of foods; manufacture of textile fabrics, felts and stuffings; preparation of the skin and its appendages; the hard materials; oils, glues, drugs, perfumes, chemical products, fertilizers and lime; preservation of the animal for scientific uses.

Animal Products and their Applications.—Food; clothing; materials employed in the arts and manufactures.

Protection and Culture of Useful Animals.—Investigation; protection, and propagation.

COLLECTION TO ILLUSTRATE THE FISHERY RESOURCES OF THE UNITED STATES.

This is covered to a considerable extent by the preceding group, in connection with which it is arranged. The special features will embrace the following:

Fishing vessels, boats, etc., life size and models.

The apparatus and dories used in the whale fisheries.

Nets, traps, and pounds.

Hooks, lines, baits, etc.

Casts, photographs, and drawings of fish and other aquatic animals.

Prepared or living specimens of aquatic animals.

Products of the waters.

Economical applications of the above products.

E.—COLLECTION TO ILLUSTRATE THE ETHNOLOGY OF THE UNITED STATES.

IN CHARGE OF DR. CHARLES RAW.

(This exhibition is made conjointly with the Indian Bureau of the Interior Department.)

Objects of Stone.

Flaked and chipped stone; raw material (pieces of flint, etc.); flakes and cores of flint, obsidian, etc.; rude or unfinished implements; arrow and spear heads; perforators and scrapers; cutting and sawing implements; dagger-shaped implements; leaf-shaped implements; digging implements, and wedge or celt-shaped implements.

Pecked, ground, and polished stone; wedges or celts; chisels; gouges; adzes; grooved axes; hammers; ceremonial weapons; cutting tools; scraper and spade-like implements; pendants and sinkers; discoidal stones, etc.; pierced tablets and boat-shaped objects; grinding and polishing stones; stone vessels; mortars; pestles; tubes; pipes; ornaments, and sculptures.

Objects of Copper.

Implements and ornaments.

Objects of Bone.

Implements, weapons, and ornaments.

Objects of Shell.

Utensils, implements, and ornaments.

Objects of Clay.

Mound pottery and terra cottas.

Objects of Wood.

Fragmentary objects and carvings of an early date.

Ethnological Series.

Man.—Skulls, mummies, etc.

Culture.—Aliments, food (mineral and vegetable), drinks, narcotics, and medicines.

Habitations.—Models of houses, tents, etc., and appurtenances.

Furniture.—Cradle boards, mats, etc.

Vessels and other utensils of household use.—Earthenware; carved horn and wooden ware; stone ware; wicker work; bladders and boxes.

Utensils for smoking, etc.—Pipes; tobacco pouches; snuff apparatus, etc.

Receptacles used as means of transportation.—Pouches, bags, raw-hide cases, burden-nets, etc.

Ethnology, Minerals.

Clothing.—Raw material; complete suits; head, body, hand, leg, and foot clothing; parts of dress.

Personal adornment.—Skin ornamentation; head, neck, breast, body, and limb ornaments; toilet articles.

Implements of general use of war and the chase, and of special crafts.—Implements for cutting, drilling, etc.; lances, bows and arrows, clubs, tomahawks, etc.; shields, body armor, etc.; implements for fire-making, arrow-making, pottery, for procuring and manufacturing food; agricultural implements; implements used in spinning, weaving, sewing, and embroidery.

Means of locomotion and transportation.—Snow shoes, ice creepers, etc.; balsas, dug-outs, bark canoes, hide boats, etc.; saddles, bridles, halters, harness, etc.; sleighs, etc.

Games and pastimes.—Gambling implements; masks, etc., used in dancing; rackets, balls, etc.; toys.

Music.—Drums, rattles, whistles, flutes, etc.

Art.—Pictorial representations and carvings.

Superstition.—Charms, mythological figures, etc.

COLLECTION TO ILLUSTRATE THE MINERAL RESOURCES OF THE UNITED STATES.

IN CHARGE OF W. P. BLAKE.

The principal objects of this collection of the useful ores and minerals of the country have been to illustrate: 1st. The nature and variety of the mineral resources of the United States; 2d. The geographical distribution and geological associations of the minerals; 3d. The extent to which they have been utilized; 4th. The mechanical, metallurgical, and chemical processes by which they are extracted or converted into useful products; 5th. The inherent and comparative qualities of the extractive products. A portion of the collection is arranged according to the nature of the objects, irrespective of locality, but the bulk of the Exhibition is grouped geographically by States. There is also a section devoted to models and drawings, and one to geological maps and graphic charts. This collection occupies the northeast portion of the Government Building, upon the right of the main aisle.

I. SYSTEMATIC SERIES, GROUPED IRRESPECTIVE OF LOCALITY, IN THE FOLLOWING ORDER:

a Crystalline minerals, chiefly for scientific and educational purposes.

b Fuels and petroleum.

c Ores, metals, and their immediate derivatives.

d Ornamental stones and gems.

e Building stones; marbles, etc.

f Artificial stones; lime; mortars; cement.

g Fictile materials and direct products, including refractory materials, etc.

h Pigments; colors; detergents.

i Grinding, abrading, and polishing substances.

k Fertilizing substances.

l Sulphur, salts, and minerals chiefly used in chemical manufactures.

II. ORES, MINERALS, AND METALLURGICAL PRODUCTS, GROUPED BY STATES.

Maine.—Iron ores, limestone and pig iron; granite for buildings and monuments.

New Hampshire.—Granitic and metamorphosed rocks; granite; geological map of the State.

Vermont.—Marble; slate of various colors; roofing slate, etc.; iron ores and limonite; chilling pig iron; spiegel Eisen; kaolin and fire brick; sand for glass making; copper ores, copper, and metallurgical products; scythe stones.

Massachusetts.—Iron ore, siderite; magnetic iron ore, and steel produced from it; iron and steel wire; emery, massive and associate; corundum, corundophyllite, diaspore, red oxide of titanium, and ilmenite; argenteriferous lead ore, galenite; copper ore; syenite and porphyry; porphyry, a series of polished specimens; granite; sand for glass making; glass, cut and pressed; pearl ash and red lead; kaolin; potters' clay, brick clay, etc.; potters', paper, and alum clay; marble and limestone; geological map of the State.

Rhode Island.—Granite, for building and monumental purposes; magnetite; anthracite and graphitic coal, in large mass and in lumps.

Connecticut.—Granite and building stone; marble and limestone; serpentine marble, verd antique; barytes (sulphate of barytes); kaolin, brick clay, and products; iron ores, limonite, etc.; pig iron; iron ore, spathic and associates; cement steel; mining picks and hammers; copper and alloys, nickel silver, etc.; feldspar, siliceous, etc., for pottery purposes; geological map of the State.

New York.—Magnetic iron ores, building stones, etc.; fluxes, fuels, and iron; Bessemer steel; hematite, magnetite, etc.; malleable cast iron; puddled iron and muck bar; limestone and lime; hydraulic limestone, hydraulic cement, and cement drain-pipe; kaolin, crude and washed; "incombustible mineral wool," or nitrous fibre "slag felting;" lead and tin foil; fire clay and fire clay goods, refractory materials, etc.

New Jersey.—Magnetic iron ores; iron ore; massive and granular willemite; zinc ores and franklinite; zinc; spiegel iron, "franklinite iron"; calamine (silicate of zinc); potters' and brick clay and iron-stone china ware; refractory furnace materials, fire brick, etc.; fire-brick clay and fire brick, etc.

Pennsylvania.—Iron ore, flux, and fuel; coal and coke; kaolin; limestone; iron ores, limonite, specular iron, etc.; copper ores; copper and copper products; petroleum and petroleum products; glass, and materials for its manufacture; window glass and materials; pig iron and ores; nickel and cobalt ores and products; cast steel; sheet iron; chromite.

Maryland.—Iron ore, flux, and fuel.

Virginia.—Zinc ores, calamine; lead ores, galena, cerussite, etc.; gypsum; barytes; kaolin; iron ores, magnetite, hematite, limonite, and fossil ore; coal and coke; copper ores; salt brine, fossil salt, and prepared salt; gold-bearing quartz; manganese; granite.

West Virginia.—Bituminous coal; coke; iron ores, black band, brown hematite, and fossil ores.

North Carolina.—Gold and silver ores; copper ores; marble; corundum and the associate minerals; iron ores and iron; muscovite (mica); geological map of North Carolina.

South Carolina.—Phosphatic fossils, mineral fertilizers, etc.; minerals and ores.

Alabama.—Ores and coal; spiegel Eisen and ores; geological map of Alabama.

Minerals, Geological Maps and Publications.

Tennessee.—Iron ores, coal and mineral products; copper pyrites and vein stone; refined copper; geological map of Tennessee.

Georgia.—Auriferous gravel; gold-bearing quartz, etc.

Kentucky.—A series of specimens illustrating the mineral resources of the State.

Louisiana.—Rock salt; sulphur.

Ohio.—Open hearth steel; iron ores, flux and fuel; pig iron; potters' clay and pottery; crude and manufactured plaster; building stone.

Indiana.—Specimens of block coal, and iron ores; potters' clay; "Indianite."

Missouri.—Lead ores, galena, cerussite, etc.; pig lead; zinc ores; barytes, associated with lead ores; marble, limestone, and granite; iron ores, magnetite, specular iron, hematite; pig iron; copper ore; coal and coke; fossil plants, etc.; porphyry.

Michigan.—Iron ores, flux, and Bessemer pig iron; specular and magnetic; native copper, crystallized; mass and stamp work, with silver and associate minerals, and in amygdaloid and "ash bed;" building stone;

native silver; copper and "copper conglomerate."

Colorado.—Gold and silver ores; gold, and ores containing tellurium silver and copper ore.

Utah.—Silver ores.

Idaho.—Gold and silver ores.

Montana.—Silver ores; argentiferous galena.

Arizona.—Copper ores; gold quartz, and other minerals.

Nevada.—Silver and gold ores.

California.—Gold and silver ores; auriferous gravel, "cement" with gold; quicksilver ores, cinnabar and native quicksilver; copper ores; tin ores and tin.

III. MODELS AND DRAWINGS.

IV. GEOLOGICAL MAPS AND GRAPHIC CHARTS.

Geological Map of the United States and Territories.

Geological and other Maps of the State of New Hampshire.

Geological Reports and Publications.

BROOK'S PATENT GLACE SPOOL COTTON,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

Brook's Six Cord Soft Finish Spool Cotton,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

BROOK'S PATENT GLACE THREAD, IN WHITE, BLACK, AND COLORS.

The extraordinary strength, smoothness, and durability obtained by this invention have secured for it great popularity, and it is consequently much imitated in inferior qualities. This Cotton is always labeled BROOK'S PATENT GLACE THREAD, and without their name and crest (a GOAT'S HEAD), the words "Glance," or "Patent Glance," do not denote that it is of their manufacture.

BROOK'S PATENT NINE AND SIX CORDS

Will be found of very superior quality, and strongly recommended wherever SOFT COTTON is preferred.

WAGON AND CARRIAGE BUILDING. No. 5.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 346 feet by 231 feet.

An annex to the Main Building, situated opposite to it on the Avenue of the Republic. It is built of wood, one story in height.

CENTENNIAL NATIONAL BANK. No. 6.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 72 feet by 40 feet.
E. A. ROLLINS, President.

Situated at the northwest corner of the Main Exhibition Building, and east of the Centennial Commission Office. It is one story high, built of wood, and is the medium for transacting the financial affairs of the Exhibition.

SWEDISH SCHOOL HOUSE. No. 8.

Architects, ISÆUS & JACOBSSON.—Size, 40 feet by 50 feet.

Situated in the Swedish Government grounds, north of the Main Exhibition Building. A one story frame house, containing school rooms and the interior arrangements of a Swedish school house. The framework for the building was imported from Sweden, and is on exhibition by G. O. Wengstion, of Stockholm.

THE PENNSYLVANIA EDUCATIONAL HALL. No. 9.

Architects, PETERS & BURGER.—Size, 148 feet by 100 feet.

The object of this Hall is the exhibition of the educational interests of the State of Pennsylvania. It is situated north of the Art Gallery, fronting on the Lansdowne drive. The building is octagonal in shape, and contains thirty-two alcoves for the display, a large assembly room, and a reception room. The following summary represents the exhibits:

1 Representations of kindergarten, primary, grammar, and high schools, with their appropriate furniture, fittings, text-books, apparatus, and work.

Systems of graded schools, with views and models of buildings, charts of statistics, specimens of apparatus, and volumes of scholars' work.

Schools of counties, with county and township maps of school-houses, photographs of buildings, charts of statistics, and scholars' work; plans of school buildings, with systems of heating, lighting, and ventilating, and designs.

Department of Public Instruction charts, showing statistics and outline of public school system, reports, forms, certificates, and laws.

Text-books, school furniture and merchandise, school apparatus and philosophical apparatus; school ornamentation, consisting of a fountain, a series of Rogers' groups, vases, hanging baskets, statues, engravings, etc. 300

2 Academies and Seminaries, with pictures of buildings, specimens of apparatus, cabinet collections, drawings, and paintings.

Universities and colleges, with pictures of buildings, maps of grounds, views of in-

terior rooms, charts of history and statistics, courses of study, text-books, and productions of professors and alumni.

Technical schools and departments, with drawings, casts, models of bridges, specimens of apparatus, etc. 301

3 Normal Schools.—Views of buildings and grounds, models, courses and methods of study, catalogues and reports, charts of statistics, and students' work.

Schools of Design.—Drawings, models, etc.

Commercial Schools.—Specimens of penmanship, etc. 302

4 Institution for the Blind.—Apparatus for teaching, intellectual and industrial work done by the blind.

Institution for the Deaf and Dumb.—Apparatus and methods of teaching. 303

5 Orphan Schools.—Views of buildings, scholars' intellectual and industrial work, books of record, forms and charts.

School for the Feeble-minded.—Text-books, apparatus, methods, etc. 346

6 Sunday-Schools.—Collections of Sunday-school material, incentives, maps, charts, forms, and models. 348

SINGER SEWING MACHINE BUILDING. No. 10.

Architect, JAMES VAN DYKE, Elizabeth.—Size, 81 feet by 56 feet.

SINGER MANUFACTURING CO., New York City.

Contains an exhibit of every style of machine manufactured by the Singer Manufacturing Company, and samples of work. It is constructed of wood, and is located on Lansdowne drive, north of the Art Gallery.

FRENCH RESTAURANT, LAFAYETTE. No. 11.

Architect, H. J. SCHWARZMANN.—Size, 130 feet by 30 feet.

PAUL SUDREAU, Philadelphia.

This is a two story wooden building, located northwest of the Art Gallery, between Lansdowne drive and the brook. It is conducted on the French plan.

HUNTER'S CAMP. No. 12.

"FOREST AND STREAM" PUBLISHING Co., N. Y., WM. C. HARRIS, Manager.

This camp illustrates sportsmen's life in the backwoods, and contains what is known as a permanent camp, built of logs and bark, with all the appurtenances of hunting and fishing, including portable boats, sporting firearms, rods and fishing tackle ready for use, portable cooking apparatus, specimens of game birds, a kennel of sporting dogs, etc., etc. An additional feature will be a lake or pond stocked with game fish, and a running stream containing brook trout. It is located in the ravine south of Horticultural Hall.

THE DAIRY ASSOCIATION BUILDING. No. 13.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 76 feet by 25 feet; pavilion, 80 feet by 30 feet.

Situated on the north side of Lansdowne Valley, southwest of Horticultural Hall. It is a two-story rustic building, and the surrounding grounds are laid out as a garden in which is a pavilion for the additional accommodation of visitors.

PENNSYLVANIA BIBLE SOCIETY PAVILION. No. 14.

Architect, I. C. SIDNEY.—Size, 17 feet by 23 feet.

Located near Lansdowne Valley, south of Horticultural Hall, close to the Bridge; oval in shape, and surmounted by a carved roof with a projecting cornice. It bears the inscription, "The Bible without note or comment." In front is an open Bible, and over it the text from Jeremiah xxii. 29: "O earth, earth, earth, hear the word of the Lord." Only Bibles and Testaments will be sold.

PHILADELPHIA PAVILION. No. 16.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 88 feet by 66 feet.

For the accommodation of the municipal government of the City of Philadelphia. It contains a hall and parlors, and a room devoted to the use of the Park Commission. It is a one story frame building, situated on Lansdowne drive east of Horticultural Hall.

GERMAN EMPIRE PAVILION. No. 19.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 83 feet by 33 feet.

Constructed of stone, one story high, furnishing accommodations for the Imperial Commissioners as well as German visitors. It is located on Lansdowne drive, between Belmont and Agricultural Avenues.

BRAZILIAN GOVERNMENT BUILDING. No. 20.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 56 feet by 70 feet.

Situated on Agricultural Avenue between Fountain Avenue and Lansdowne drive; two stories high, built of wood, and surmounted by a cupola. It contains reception rooms and offices for the Commissioners and visitors from the empire of Brazil.

PHILADELPHIA "TIMES" PAVILION. No. 23.

Architects, WILSON BROS. & Co., Philadelphia.—Size, 28 feet by 17 feet.

A. K. McCLURE, Editor.

The Centennial business office of the "Times," a daily paper, issued morning and

evening, and printed on a Hoe perfecting press in Machinery Hall. It is a one-story frame building, located on Belmont Avenue, opposite and east of the Lake.

GLASS MAGAZINE. No. 24.

Architect, H. J. SCHWARZMANN.—Size, 40 feet by 40 feet.

KLAUTSHECK, THOMAS, & STUART, Philadelphia.

This magazine is erected adjoining the Photographic Association Building, opposite the Lake. It is constructed mainly of glass from the factories of the above firm, and contains a full assortment of plate and window glass, and glass shades for the accommodation of exhibitors; is two stories high, and is connected by a bridge with Belmont Avenue.

CIGAR PAVILIONS. Nos. 25, 36, 103, 108, 165, 166.

Architect, HENRY A. MACOMB.—Size, 70 feet square.

W. A. FLEMING & Co.

These pavilions, six in number, are located in different parts of the grounds. They are frame buildings, one story high, with observatories.

AMERICAN FUSEE COMPANY'S BUILDING. No. 26.

Size, 14 feet by 14 feet.

W. R. DAVENPORT, New York.

Situated on Lansdowne drive, north of the Judges' Building.

CENTENNIAL PHOTOGRAPHIC ASSOCIATION BUILDING.

No. 27.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 150 feet by 30 feet.

The Photographic Association have erected a one-story frame building, located north of the Main Exhibition Building on the east side of Belmont Avenue. It contains one room for the exhibition of photographs, and three rooms for photographers for working purposes.

PENNSYLVANIA RAILROAD OFFICE. No. 28.

Architect, J. M. WILSON, Engineer of Bridges and Buildings, Pennsylvania Railroad Co.—Octagon, 75 feet in diameter.

A two-story frame building, situated on the northeast corner of Belmont Avenue and the Avenue of the Republic, adjoining the Judges' Hall. It is designed for the general ticket office of the four great trunk lines, viz.: N. Y. Central, Erie, Baltimore and Ohio, and Pennsylvania Railroads. Tickets are sold to all points, and information is furnished regarding routes of travel.

MEDICAL DEPARTMENT. No. 29.

Architect, H. J. SCHWARZMANN.—Size, 65 feet by 32 feet 6 inches.

This department is instituted for the immediate gratuitous relief of accidents and sudden cases of illness occurring within the Exhibition grounds. It is located in Lansdowne ravine, equidistant from the Main Building and Horticultural Hall, and will contain two wards of three beds each, for male and female patients. An ambulance is provided for the removal of patients to their homes or to city hospitals.

Officers.

WILLIAM PEPPER, M.D., Medical Director.

THEODORE HERBERTE, M.D., Secretary and Resident Physician.

JACOB ROBERTS, M.D., Member of Staff.

S. W. GROSS, M.D., Member of Staff.

H. C. WOOD, M.D., Member of Staff.

R. G. CURTIN, M.D., Member of Staff.

HAMILTON OSGOOD, M.D., Member of Staff.

DE FORREST WILLARD, M.D., Member of Staff.

JUDGES' HALL. No. 30.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 152 feet by 113 feet.

A two-story frame building, situated north of the Main Exhibition Building, containing ten committee rooms and four private rooms for the judges; also one large hall in the centre, and a smaller hall in the rear. It is intended for the accommodation of the international jury.

TELEGRAPHIC BUILDING. No. 31.

Architects, BALDERSTON & HUTTON, Philadelphia.—Size, 80 feet by 75 feet.

DEPARTMENT OF PUBLIC COMFORT COMPANY, Limited.

W. MARSH KASSON, Chairman, Philadelphia.

The reception room of the Public Comfort Building opens from the east into the telegraphic department, which furnishes communication with every portion of the world. Is a one-story frame building opposite the northwest corner of the Main Exhibition Building, fronting the Esplanade. All of the instruments and appliances of the latest design are on exhibition and in use.

1 Philips, Wm. J., Philadelphia, Pa.—Printing telegraph instrument, combining the bell, dial, and printing telegraph in one instrument.

2 Phillips, Eugene F., Providence, R. I.—Covered wire for telegraphic purposes.

3 Gray, Elisha, Chicago, Ill.—Electro-harmonic telegraph, including apparatus for transmitting tunes and eight or more messages simultaneously.

4 Atlantic and Pacific Telegraph Co., Philadelphia, Pa.—Automatic and duplex telegraph apparatus.

5 Gray & Barton, Western Electric Telegraph Co., Chicago, Ill.—Printing telegraph instrument, with unison attachment.

6 Frost & Hanline, Philadelphia, Pa.—Automatic thermostat for fire-alarm telegraph.

7 Brooks, David, Philadelphia, Pa.—Underground cables for telegraph wires.

8 Gamewell, J. N., & Co., New York, N. Y.—American fire-alarm telegraph, with non-interference repeaters and signal-boxes, and mechanical gong apparatus.

9 American District Telegraph Co., Philadelphia, Pa.—District telegraph signal-boxes, with self-starting registers for messengers, guides, and interpreters.

JAPANESE DWELLING—A HOTEL. No. 33.

Architect, MATSUO-EHE, Tokio.—Size, 80 feet by 15 feet, and two wings each 21 feet by 15 feet.

Erected by a joint-stock company as a hotel and restaurant for the convenience of Japanese visitors. The wood of which it is constructed, as well also as the nails and tiles, were imported from Japan. The odor arising from the wood is regarded as a peculiar feature. It was built entirely by native workmen sent hither by the Japanese Government, and is situated in the neighborhood of the British Buildings, north of Machinery Hall.

DEPARTMENT OF PUBLIC COMFORT. No. 35.

Architects, BALDERSTON & HUTTON, Philadelphia.—Size, 264 feet by 112 feet.

DEPARTMENT OF PUBLIC COMFORT COMPANY, Limited.

W. MARSH KASSON, Chairman, Philadelphia.

Located on the corner of the Avenue of the Republic and Agricultural Avenue, opposite the northwestern corner of the Main Exhibition Building, and fronting the Esplanade. It is a two-story frame building, containing a reception room and ladies' parlor, free to all; barber shop; coat and baggage room; lunch counter and lavatories. Tickets for places of amusement are on sale, and a daily register of all visitors is kept. The western section of the building is occupied by the President of

THE SUN NEWSPAPER

Is printed and published every day in the year, at 166, 168, and 170 Nassau Street, New York City. Its regular edition on secular days now (April, 1876) averages about 140,000; its weekly edition over 88,000; and its Sunday issue is nearly 100,000. It thus prints and sells more than a million copies a week, which are read all over the United States. This is a circulation unprecedented in American journalism, and it is constantly on the increase. In proof of this, let the following figures testify. They show the number of copies of THE SUN printed every week during the year ending March 11, 1876.

THE ORIGIN OF CO-OPERATIVE NEWSPAPER ADVERTISING.

Co-operative newspaper printing, as now practised, originated in Wisconsin twelve years ago. It is termed *co-operative* for the reason that one side of each of the newspapers is printed at a central office, and the paper sent in its half-printed state to the home office, where it is completed with editorials, local news, and other matter prepared by the editor or publisher. In December, 1846, the idea of co-operation, *with advertisements*, occurred to Mr. Aikens, while yet serving his time as an apprentice, in printing the message of President Polk on one side of a country newspaper of New England at Boston, and the other half being printed at the local office.

Mr. A. J. Aikens, a practical printer and business man, conceived the idea of reducing the cost of ready-printed paper, as it is now termed, to country publishers, by making an agreement with them to use a certain space in each of their papers for advertisements that he might procure. This plan of co-operation he put into practice twelve years ago, at the office of Cramer, Aikens & Cramer, Milwaukee. It at once became successful, leading to the establishment of co-operative newspaper printing-offices in Chicago, New York, St. Louis, Cincinnati, Memphis, St. Paul, and other places. There are now over two thousand newspapers printed upon the co-operative plan in the United States and Canadas, and the number is constantly increasing, it having more than doubled in the last five years. The enterprise is no longer an experiment, but an established success, and the system is one yielding manifold advantages to advertisers as well as to local publishers.

The American Newspaper Union

Is essentially national. The papers represented in it are located in all the States of the Union and in nearly five hundred county seats. They circulate over the whole area of the country from Maine to Colorado, distributing at least *one hundred copies every year to each square mile of the settled portions of the United States.*

Although, as a whole, the Union List is national, covering all sections, it is so made up of different members as to be susceptible of easy division into sections—East, Middle, West, South. The distribution of the papers is as follows:

New England 78	Illinois 117	Nebraska 15
New York 101	Michigan 86	Missouri 17
New Jersey 27	Wisconsin 98	Georgia 10
Pennsylvania 65	Tennessee 29	Alabama 32
Virginia 24	Kentucky 29	Louisiana 11
No. and So. Carolina . . . 24	Minnesota 79	Mississippi 29
Ohio 122	Iowa 85	Other States 46
Indiana 81		

AGGREGATE CIRCULATION.

The circulation of these papers is large and constantly increasing. It is larger than the circulation of any other lists or combinations of country papers in the United States—the last aggregate weekly circulation being *seven hundred thousand seven hundred and thirty copies (700,730).*

SEND TO EITHER OFFICE FOR A CIRCULAR.

the Centennial Commission. Office desk room is afforded to exhibitors. The centre portion of the building is surmounted with an open-air gallery, giving a view of the grounds.

STAND PIPE FOR WATER-WORKS. No. 37.

Architect, FREDERICK GRAFF, Philadelphia.—Height, 133 feet.
J. MILLER, Brooklyn, N. Y.

Used for distributing through the Centennial grounds the water from the works on the river bank. It is constructed of wrought iron, and through it the water is carried to the height of 208 feet above the Fairmount dam. A 16-inch main conveys the supply to different localities.

FRENCH GOVERNMENT PAVILION. No. 38.

Architect, DE DARTEIN, France.—Size, 100 feet by 50 feet.
DEPARTMENT OF PUBLIC WORKS, France.

Is constructed of brick and iron, and exhibits models in relief and designs of all the public works of France executed during the last few years; also a collection of books and publications relative thereto. It is situated west of the Art Gallery, on Lansdowne drive.

VIENNA BAKERY, OR COMPRESSED YEAST BUILDING. No. 40.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 146 feet by 105 feet.
GAFF, FLEISCHMANN, & CO., Blissville, Long Island, N. Y.

Designed to exhibit the advantages of using compound yeast in baking. It also contains a coffee house.

BANKERS' EXHIBIT. No. 41.

Architect, JAMES H. WINDRIM, Philadelphia.—Size, 69 feet by 41 feet.

Erected by the banks, bank officers, and bankers of the country for the exhibition of coins and currency. It is located east of the Art Gallery, and between the Photographic Gallery and the Vienna Bakery.

EMPIRE TRANSPORTATION COMPANY'S BUILDING. No. 42.

Architects, WILSON BROS. & CO., Philadelphia.—Size, 70 feet by 60 feet.
EMPIRE TRANSPORTATION CO., Philadelphia.

This structure is located north of the eastern end of the Main Exhibition Building, and exhibits by models the method of transportation used by the Empire Transportation Company and its auxiliaries in the United States.

CENTENNIAL FIRE PATROL. No. 43.

Architect, H. J. SCHWARZMANN.—Size: 1. 60 feet by 58 feet. 2. 84 feet by 74 feet.

The Fire Patrol is accommodated in two buildings, built of wood, one story high, containing halls for the engines, stalls for the horses, and dormitories for the firemen. The smaller house is at the northeast corner of the Main Exhibition Building, and the larger at the intersection of Lansdowne drive and Belmont Avenue. They are supplied with steam fire engines, hose trucks, ladders, and patent fire extinguishers.

PORTUGUESE GOVERNMENT BUILDING. No. 44.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 55 feet by 51 feet.

A one story wooden structure, with cupola, located on the northeast corner of Agricultural Avenue and Lansdowne drive, and used to accommodate Commissioners and visitors from Portugal.

BURIAL CASKET BUILDING. No. 46.

Size, 40 feet by 20 feet.

Is intended to exhibit various designs of funeral caskets, and is situated north of Extension to Art Gallery, on Lansdowne drive, near the bridge. A one story frame building, with turrets.

COAT AND BAGGAGE SERVICE BUILDINGS. No. 47.

Architects, BALDERSTON & HUTTON, Philadelphia.—Size, 25 feet by 30 feet.

DEPARTMENT OF PUBLIC COMFORT COMPANY, Limited.

W. MARSH KASSON, Chairman, Philadelphia.

Contains conveniences for checking small baggage, wearing apparel, baskets, umbrellas, bundles, etc., which are retained until called for, or delivered at designated points within the grounds. The chief offices are located as follows: One at the north entrance of Belmont Avenue; another on Lansdowne drive near the entrance from the Reading Railroad, and the third at the southeast corner of the Main Exhibition Building; are one-story frame structures. In connection with these are spaces within the principal Exhibition buildings, devoted to the same purposes. All of these offer for sale newspapers, periodicals, photographs, stationery, etc. Umbrellas are furnished both for sale and hire. At these points are facilities for transmitting messages by telegraph or messenger boys, and for obtaining rolling chairs.

ENGLISH BOILER HOUSE. No. 52.

Size, 24 feet by 71 feet.

A composite wood and stone building, furnishing steam to English and other foreign exhibitors in Machinery Hall, and situated to the south of it.

CORLISS BOILER HOUSE. No. 54.

Architects, PETTIT & WILSON, Philadelphia.—Size, 40 feet by 80 feet.

CORLISS STEAM ENGINE COMPANY, Providence, R. I.

Is built of composite stone and wood, and furnishes steam for the Corliss engine in Machinery Hall from twenty vertical tubular boilers, aggregating 1400 horsepower. It is situated south of Machinery Hall.

LIPPINCOTT'S SODA-WATER FOUNTAINS.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size: two 20 feet in diameter; one 24 feet in diameter.

CHARLES LIPPINCOTT & Co., Philadelphia.

These pavilions, three in number, are situated in different parts of the grounds.

STOKES & PARRISH MACHINE SHOP, etc. No. 57.

Size, 112 feet by 60 feet.

STOKES & PARRISH, Philadelphia.

Constitutes a part of Annex No. 2 to Machinery Hall, and is intended to execute repairs and machine work for the exhibitors. It is located south of Machinery Hall.

NEVADA QUARTZ MILL. No. 59.

Size, 60 feet by 43 feet.

STATE OF NEVADA.

Exhibits the process of manipulating ores and precious metals. It is a one story frame building, situated south of Machinery Hall.

GAS MACHINE. No. 60.

Octagonal, 15 feet in diameter.
J. C. TIFFANY, Boston, Mass.

Exhibits the mode of generating a fixed illuminating gas. A one story frame structure, situated south of Machinery Hall.

STARR'S IRON WORKS. No. 66.

JESSE W. STARR & SON, Camden, N. J.

The space allotted to Messrs. Starr & Son is occupied with gas works, pipes, special castings, stop-valves, lamp-posts, and fire hydrants. It is located southwest of Machinery Hall, close to the barrier.

GUNPOWDER PILE DRIVER. No. 67.

Size, 35 feet by 12 feet.

GUNPOWDER PILEDIVING CO., Philadelphia.

Is built in the open air to exhibit the operation of pilediving by means of gunpowder. It is situated southwest of Machinery Hall, between it and the barrier.

AUTOMATIC RAILROAD. No. 68.

Size, 20 feet by 150 feet.

CHARLES W. HUNT, New York.

Illustrations of the mode of unloading vessels by means of a railroad worked by a self-acting apparatus. Is situated west of Machinery Hall.

ENGLISH LOCOMOTIVE "JOHN BULL." No. 70.

Size, 10 feet by 121 feet, track.

PENNSYLVANIA RAILROAD COMPANY, Altoona, Pa.

The first locomotive that ran on the New Jersey Railroad in 1831.

GILLENDER & SONS' GLASSWARE BUILDING. No. 73.

Architect, JAMES H. WINDRIM.—Size, 60 feet by 90 feet.

GILLENDER & SONS, Philadelphia.

A one story frame house, situated west of Machinery Hall, on the walk to the Fifty-second Street entrance.

SAWMILL. No. 74.

Architects, PETTIT & WILSON, Philadelphia.—Size, 276 feet by 80 feet. Boiler house, 48 feet by 30 feet.

UNITED STATES CENTENNIAL COMMISSIONERS.

Exhibits direct-acting steam saw machines and gang saws. Is on Fountain Avenue, west of Machinery Hall, and consists of a one story frame open building, with a boiler house attached.

SAWMILL. No. 75.

Size, 22 feet by 36 feet.

E. W. ROSS & Co., Fulton, N. Y.

Is situated southwest of Machinery Hall, near Fountain Avenue. Is a one story frame building, with boiler house, and exhibits a direct-acting circular saw.

CAMPBELL PRINTING PRESS BUILDING. No. 76.

Architect, ALEXANDER B. BARY.—Size, 88 feet by 144 feet.

CAMPBELL PRINTING PRESS AND MANUFACTURING CO., Brooklyn, N. Y.

The various printing presses manufactured by this company are exhibited in operation; the power is furnished by a thirty (30) horse-power engine and boiler. Speci-

mens of type printing from the date of the invention, and of sunlight printing, are shown, and a complete printing office just as it was in 1776 is also in operation..

FULLER, WARREN, & CO.'S STOVE BUILDING. No. 77.

Size, 60 feet by 45 feet.

FULLER, WARREN, & CO., New York city, Chicago, Ill., Cleveland, O., and Troy, N. Y.

Located at the east end of Machinery Hall, and facing the Fountain of the Catholic Total Abstinence Society. It contains samples of stoves, heaters, and ranges in operation; is built of wood, one story high, surmounted by a cupola.

LIBERTY STOVE WORKS. No. 78.

Architect, C. C. PHILLIPS.—Size, 45 feet by 34 feet.

CHARLES NOBLE & CO., Philadelphia.

A one story frame building, located west of Machinery Hall, and south of the Catholic Total Abstinence Fountain, on Fountain Avenue; containing different varieties of heaters, stoves, and ranges manufactured by Noble & Co.

BOSTON "HERALD," AND BOSTON "DAILY ADVERTISER." No. 79.

Size, 29 feet by 16 feet.

A one story frame building, situated on Fountain avenue opposite northwest corner of Machinery Hall; used as the headquarters of the correspondents and attaches of the newspapers erecting it.

CATHOLIC TOTAL ABSTINENCE FOUNTAIN. No. 80.

Architect, HERMAN KIRN, Philadelphia.

Situated at the junction of Fountain Avenue and the Avenue of the Republic, at the northwestern corner of Machinery Hall. In design it is a circular platform, with four arms projecting at right angles, terminating in four smaller circular platforms. From the centre of the large circle rises a marble rockwork sixteen feet high, with a diameter of eighteen feet at base, on which stands a statue of Moses smiting the rock. The water descends from numerous fissures into a basin forty feet in diameter. On each of the circular platforms is a drinking fountain, twelve feet in height and eight feet eight inches in diameter, surrounded with statues nine feet high, representing Father Mathew, Charles Carroll, Archbishop John Carroll, and Commodore John Barry. It has been erected by contributions made by the numerous societies forming the Catholic Total Abstinence Union of America.

TURKISH CAFÉ. No. 82.

Architect, PIERRE MONTANI.—Size, 51 feet by 65 feet.

TURKISH COMMISSION.

An octagonal building, with a coffee-room, parlors, and bazaars. Is a one story frame building, situated on a walk between Fountain Avenue and the Avenue of the Republic, near their junction north of Machinery Hall.

PENNSYLVANIA STATE BUILDING. No. 83.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 97 feet by 55 feet.

A two story frame building, with a tower, of Gothic style. It faces the Lake, between Fountain Avenue and the Avenue of the Republic; contains reception-rooms and offices for the use of the State Commissioners and visitors.

POP CORN BUILDINGS. Nos. 84, 164.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 41 feet by 32 feet each.
J. A. BAKER, Dayton, Ohio.

One of these buildings is situated on Fountain Avenue opposite the northern extremity of the Lake; the other is on Agricultural Avenue, east of and opposite the New England Farmers' Home and Modern Kitchen. They are devoted exclusively to the sale of pop corn; are built of wood, one story high.

AMERICAN NEWSPAPER EXHIBITION. No. 85.

Architect, M. J. MORAILL, Brooklyn, N. Y.—Size, 70 feet by 46 feet.
GEO. P. ROWELL & CO., New York City.

A two-story frame structure of Swiss architecture, on Fountain Avenue, near the Lake. It contains a large hall, and a reading-room supplied with newspapers from all parts of the United States.

COLONEL LIENARD'S GEORAMA. No. 86.

Designer, COL. LIENARD, Paris.—Size, area 1250 square feet.

An open-air exhibit, models of the cities of Paris and Jerusalem, in gypsum. The contour of the ground is shown, and the streets appear fully delineated. It is in the centre of Fountain Avenue, at the head of the Lake.

NEW YORK "TRIBUNE" BUILDING. No. 89.

Architect, E. E. RATH.—Size, 30 feet by 21 feet.
NEW YORK TRIBUNE, New York.

A small octagonal wooden building, with verandas and a high tower-like roof. It is located close to the French Restaurant and the Lake, and is used as an office for the correspondents and reporters of "The Tribune."

"TROIS FRÈRES PROVENÇAUX" RESTAURANT. No. 90.

Architect, LEHMAN, of Paris.—Size, 177 feet by 110 feet.
LOUIS GOYARD, Proprietor.

A two story frame structure, situated on the corner of Belmont and Fountain Avenues. It has large garden surroundings, and is a duplicate of the restaurant of the same name in Paris as regards its management.

SONS OF TEMPERANCE FOUNTAIN. No. 91.

Size, 25 feet in diameter.

This fountain is built of wood, the structure enclosing it being circular in form, and it is situated at the junction of Fountain and Belmont Avenues.

WORLD'S TICKET OFFICE. No. 93.

Architect, H. J. SCHWARZMANN.—Size, 60 feet square.
COOK, SON, & JENKINS, London, New York, and Philadelphia.

Situated immediately north of the eastern end of Machinery Hall. It is hexagonal in form, and contains a main hall and four private offices. Tickets to all parts of the world are offered for sale, and ornamental articles manufactured in Palestine are exhibited.

PRESSED FUEL COMPANY'S BUILDING. No. 95.

Polygon, 24 feet in diameter.
E. F. LOISEAU, Philadelphia.

Constructed of iron and situated in a garden plot on the Avenue of the Republic, west of the Lake and opposite to Machinery Hall. It exhibits the fuel in a state of combustion, to demonstrate its economy and adaptability.

CENTENNIAL BOARD OF FINANCE OFFICE. No. 96.

Architect, H. J. SCHWARZMANN.—Size, 140 feet by 212 feet.

A one story frame building, situated on the left hand side of the main entrance to the Exhibition grounds, and occupied by the Board of Finance for the transaction of daily business.

U. S. CENTENNIAL COMMISSION OFFICE. No. 97.

Architect, H. J. SCHWARZMANN.—Size, 192 feet by 140 feet.

Located on the right hand side of the main entrance to the Exhibition grounds. It is built of wood, one story high, and is used as a business office by the Centennial Commission.

BARTHOLDI'S FOUNTAIN. No. 98.

Architect, BARTHOLDI, of Paris.—Size, basin, 26 feet in diameter; height, 30 feet, statue, 11 feet.

Situated in the Esplanade in front of the main entrance to the grounds.

JERUSALEM BAZAAR. No. 99.

Architects, NACHLY & BROS., Jerusalem.—Size, 12 feet by 8 feet.

NACHLY & BROS., Jerusalem.

The proprietors are Syrian Christian natives, who exhibit fancy work made from olive wood, the trees having grown on the Mount of Olives, Mount Hebron, Valley of the Jordan and Jericho. It is a one story building, situated on Fountain Avenue at the northern extremity of the Lake.

BISHOP RICHARD ALLEN'S MONUMENT. No. 106.

Size, base 6 feet by 6 feet; height, 16 feet.

Erected in memory of the Rev. Richard Allen, founder and first bishop of the African Methodist Episcopal Church; situated between Fountain and State Avenues, west of the United States Government Buildings.

CANADIAN LOG HOUSE. No. 109.

Size, 40 feet by 64 feet.

CANADIAN COMMISSION.

Is one story high, constructed of logs, and located close by the British Government Buildings.

ARKANSAS STATE BUILDING. No. 110.

Architect, ALEXANDER B. BARY.—Octagonal; 82 feet in diameter, 5000 square feet in area.

One story high, constructed of wood, with cupola, located north of the Catholic Total Abstinence Fountain, and will contain an exhibition of State productions, relics, and descriptions of ancient works.

WEST VIRGINIA STATE BUILDING. No. 112.

Size, 115 feet by 40 feet.

Northwest of the Catholic Total Abstinence Fountain, built of wood, two stories high. Headquarters for State Commissioners and visitors from West Virginia.

SPANISH GOVERNMENT BUILDING. No. 113.

Decagonal; 50 feet in diameter.

A one story frame building, situated on the Avenue of the Republic, west of the Catholic Total Abstinence Fountain. Intended as headquarters of the Spanish officers and soldiers, and a resort for Spaniards visiting the Exhibition.

SPANISH EXHIBITION BUILDING. No. 114.

Architect, ALEXANDER B. BARY.—Size, 80 feet by 100 feet.

Constructed of wood, in a style similar to Machinery Hall; adjacent to Spanish Government Building.

JAPANESE BAZAAR. No. 115.

Architect, MATSUO-EHE, Tokio.—Size, 102 feet by 48 feet.

This building, usually called the Japanese Government Building, is intended to represent the bazaars or shops of Tokio. The wood and other articles that enter into its composition, and also the vases and flowers in the surrounding garden, were imported from Japan, and all the work has been done by Japanese artisans. It is situated on Agricultural Avenue, east of the Judge's Hall, and north of the Public Comfort Building.

MISSISSIPPI STATE BUILDING. No. 116.

Size, 42 feet by 25 feet.

Situated on State Avenue, opposite and west of the Japanese Dwelling.

GEORGE'S HILL RESTAURANT. No. 117.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 112 feet by 72 feet.

TALMAN & KOHN, Philadelphia.

Located in the western portion of the grounds, on George's Hill, in the vicinity of the State buildings. It is a one story structure, built of wood, and is also called the Hebrew Restaurant.

CALIFORNIA STATE BUILDING. No. 118.

Size, 55 feet by 105 feet.

A two story frame building, situated on State Avenue, opposite the British Government Buildings. It contains accommodations for the State Commissioners and visitors, also a large hall for the purpose of exhibiting specimens of the agricultural productions of California.

NEW YORK STATE BUILDING. No. 119.

Architects, CROFF & CAMP.—Size, 60 feet by 34 feet.

The Commissioners of the State of New York have offices in this building. It is a two story structure, surrounded by about half an acre of grounds.

BRITISH GOVERNMENT BUILDINGS. Nos. 120, 121, 122.

Architect, THOMAS HARRIS, of London.—Size, No. 1, 5000 sup. feet; No. 2, 1200 sup. feet.

These edifices have been erected for the use of the members of the Royal Commission. The large one is the residence of the Commissioners and delegates, while the smaller furnishes accommodations for the members of the staff. They are built in a picturesque, half-timbered style, essentially English, and are located north of Machinery Hall. A bake house and laundry is also attached to the above.

OHIO STATE BUILDING. No. 126.

Architects, HEARD & SONS, Cleveland, O.—Size, 45 feet by 44 feet, and annex, 60 feet by 40 feet.

A two story stone pavilion, located at the junction of State and Belmont Avenues. It supplies accommodation for the State Commissioners.

1 Hoffman, A. O., Thompson, Wm., and others, Springfield, O.—Springfield limestone, course No. 16. 102

2 McNally, Wm. G., Cleveland, Ohio.—Coat of arms of Ohio carved from Berea stone. 102

3 Berea Stone Co., Berea, Ohio.—Berea sandstone, course Nos. 1 and 2. 102

4 Hurst, J. R., Cleveland, Ohio.—Independence sandstone, course No. 4. 102

5 Ford, O. D., Cleveland, Ohio.—Euclid sandstone, course No. 3. 102

- 6 Halderman, L., & Son, Cleveland, Ohio.—Amherst stone, course No. 5, and window No. 4. 102
- 7 Wagner, John, Cleveland, Ohio.—Independence sandstone, course No. 6. 102
- 8 Amherst Stone Co., Cleveland, Ohio.—Amherst stone, course No. 7. 102
- 9 Black River Stone Co., Cleveland, Ohio.—Stone from Grafton, Ohio, course No. 8 and window No. 10. 102
- 10 Paul, John, & Co., Massillon, Ohio.—White sandstone from Massillon, Ohio, course No. 9. 102
- 11 Wilson & Hughes Stone Co., Cleveland, Ohio.—Amherst stone, course No. 10 and window No. 9, and Independence stone, course No. 19. 102
- 12 Clough Stone Co., Amherst, Ohio.—Amherst stone, course No. 11, and one-half front entrance. 102
- 13 Worthington & Sons, Amherst, Ohio.—Amherst stone, course No. 12, and one-half front entrance. 102
- 14 Ohio Stone Co., Cleveland, Ohio.—Amherst stone, course No. 13. 102

- 17 Stitt, Price, & Co., Columbus, Ohio.—Columbus limestone, course No. 16. 102
- 18 Finnegan, M., Cincinnati, Ohio.—Cincinnati stone, window No. 3. 102
- 19 Finnegan, J. H., Cincinnati, Ohio.—Cincinnati stone, course No. 18. 102
- 20 Montgomery, R. M., Youngstown, Ohio.—Sandstone, part of course No. 20. 102
- 21 Caldwell & Tod, Youngstown, Ohio.—Stone from Tod quarry, part of course No. 20. 102
- 22 Byers & McIlhainy, Youngstown, Ohio.—Stone from Youngstown, part of course No. 20. 102
- 23 Mauser & Haid, Youngstown, Ohio.—Stone from Youngstown, part of course No. 20. 102
- 24 Hamilton, Homer, Youngstown, Ohio.—Stone from Youngstown, part of course No. 20. 102
- 25 Warthorst & Co., Massillon, Ohio.—Stone from Massillon, course No. 21. 102
- 26 Stocking, Z. S., Mansfield, Ohio.—Red sandstone from Mansfield, two vestibule windows. 102
- 27 Bosler, Marcus, Dayton, Ohio.—Dayton limestone, part of gable end and three windows. 102
- 28 Huffman, Wm., Dayton, Ohio.—Dayton limestone, part of front gable and three windows. 102
- 29 Diamond Glass Co., Ravenna, Ohio.—Double-thick glass, from ground white sandstone, in windows. 214
- 30 American Inlaid Wood Co., Cleveland, Ohio.—Inlaid wood floor, ladies' parlor. 227
- 31 Garry Iron Roofing Co., Cleveland, Ohio.—Sections of corrugated iron roof. 227
- 32 American Sheet and Boiler Plate Co., Cleveland, Ohio.—Section iron roofing tile. 227
- 33 House & Davidson, Cleveland, Ohio.—Pair front doors. 227
- 34 Champion Fence Co., Kenton, Ohio.—Wrought and malleable iron fence and gate. 283
- 35 Buringer Bros., Dayton, Ohio.—Ohio coat of arms of galvanized iron, in gable. 291
- 36 Heard & Sons, Cleveland, Ohio.—Architectural design of building. 441

INDIANA STATE BUILDING. No. 127.

Size, 50 feet by 42 feet.

A two-story frame building, on State Avenue, opposite the United States Government Buildings, containing accommodations for the State Commissioners and for visitors from Indiana.

ILLINOIS STATE BUILDING. No. 128.

Architects, WHELOCK & THOMAS.—Size, 60 feet by 40 feet.

Situated on State Avenue, north of the United States Government Buildings; the headquarters of the Illinois Commissioners.

WISCONSIN STATE BUILDING. No. 129.

Size, 50 feet by 40 feet.

For the accommodation of the State Commissioners. Located on State Avenue, north of the United States Government Exhibition Buildings.

MICHIGAN STATE BUILDING. No. 130.

Size, 50 feet by 44 feet.

On State Avenue, opposite the United States Government Buildings. Contains reception rooms and offices for the Commissioners and visitors.

NEW HAMPSHIRE STATE BUILDING. No. 131.

Size, 30 feet by 40 feet; two projections 9 feet by 15 feet each.

In the style of an Italian villa, two stories in height, and containing ten rooms, the roof protected by an awning and used for an outlook.

CONNECTICUT STATE BUILDING. No. 132.

Architect, DONALD G. MITCHELL.—Size, 30 feet by 40 feet.

This cottage is erected in the old Colonial style, somewhat modified, and is designed for the use of the citizens and exhibitors of the State of Connecticut. It is situated on State Avenue, not far distant from the United States Government Exhibition Buildings.

MASSACHUSETTS STATE BUILDING. No. 133.

Size, 85 feet by 56 feet.

Situated on State Avenue, opposite the New York State Building; is built of wood, two stories high, and contains offices and rooms for Commissioners and visitors.

DELAWARE STATE BUILDING. No. 134.

Size, 54 feet by 34 feet.

Built on the Swiss-Gothic style, from native woods of the State. It is occupied by the State Commissioners, the first floor being used for reception rooms, while the second floor is devoted to business purposes. Is situated on State Avenue, north of the British Commission, opposite the New York State Commission.

MARYLAND STATE BUILDING. No. 135.

Size, 92 feet by 60 feet.

For the use of the State Commissioners and visitors. Situated on State Avenue, north of the British Government Buildings, and is built of wood two stories high.

IOWA STATE BUILDING. No. 137.

Size, 40 feet by 60 feet.

Located on State Avenue, opposite the California State Building. A frame house, two stories high, accommodating the State Commissioners.

MISSOURI STATE BUILDING. No. 138.

Architect, L. C. MILLER, St. Louis.—Size, 58 feet by 48 feet.

Headquarters of the Missouri Commissioners. Constructed of wood, two stories high. Located on State Avenue, opposite George's Hill Restaurant.

BREWERS' BUILDING. No. 153.

Architect, H. J. SCHWARZMANN.—Size, 272 feet by 96 feet.

G. BERGNER, Philadelphia.

Constructed of wood in the style of Machinery Hall, and situated on Lansdowne drive, opposite the northeast corner of Agricultural Hall. It contains a model brewery, and exhibits the several processes of manufacturing malt liquors.

BUTTER AND CHEESE FACTORY. No. 154.

Size, 100 feet by 116 feet.

A model factory, three stories high, built of wood, and situated east of the Agricultural Building, between it and Lansdowne drive.

TEA AND COFFEE PRESS EXTRACT BUILDING. No. 155.

Architects, HAYES & MCLIVOR, Elmira, N. Y.—Size, 100 feet by 45 feet.

A two-story frame building, composed of four observatories connected by verandas. Located opposite the southeast corner of the Agricultural Building; and devoted to the exhibition of the process of making coffee, tea, and other extracts, by means of pressure caused by the expansion of the materials used.

THE AMERICAN RESTAURANT. No. 156.

Architects, H. J. SCHWARZMANN, HUGH KAFKA.—Size, 300 feet by 200 feet.

TOBIASON & HEILBRUN, Philadelphia.

Situated between Agricultural and Horticultural Halls. The seating capacity is five thousand. The banquet room accommodates six hundred guests. The waiters speak various languages. There is a pavilion devoted to ice cream, etc. A bill of fare will be served either *à la carte* or *table d'hôte*.

KANSAS STATE BUILDING. No 157.

Architect, E. F. KARR.—Size, 132 feet square.

This structure is intended for the accommodation of the Commissioners from the State of Kansas, and also for exhibition purposes. It is a two story wooden building, containing an exhibition hall, private rooms and offices, and is situated opposite the Women's Pavilion.

THE "SOUTH" RESTAURANT. No. 158.

Architect, H. J. SCHWARZMANN.—Size, 182 feet by 92 feet.

E. MERCER, Atlanta, Ga.

Situated on the northwest corner of State and Belmont Avenues, and is a one story frame building.

NEW JERSEY STATE BUILDING. No. 159.

Architect, CARL PFEIFFER, New York.—Size, 56 feet by 82 feet.

A two story wooden building erected for the accommodation of the New Jersey State Commissioners, containing offices and private rooms. It is erected on Belmont Avenue, adjacent to the Women's Pavilion. Messrs. Hall & Son, of Perth Amboy, N. J., furnished the brick in the chimney, and Messrs. Maurer & Brevier, of Perth Amboy, the tiles used in the roofing of the building.

WOMEN'S SCHOOL HOUSE, OR KINDERGARTEN. No. 161.

Architect, JAS. P. SIMS.—Size, 35 feet by 18 feet.

Situated northeast of the Women's Pavilion. Contains specimens of school work, and illustrates the operation of Kindergarten teaching.

NEW ENGLAND FARMER'S HOME AND MODERN KITCHEN. No. 163.

Size, 49 feet by 35 feet.

MISS E. B. SOUTHWICK, Boston.

A representation of a New England farmer's home 100 years ago, combined with a modern kitchen, thus illustrating 1776 and 1876. It is one story high, and situated on the corner of State and Agricultural Avenues.

GERMAN RESTAURANT. No. 170.

Architect, H. J. SCHWARZMANN.—Size, 200 feet by 150 feet.

PHILIP J. LAUBER, Philadelphia.

Contains three acres for garden arrangements, and is situated north of Horticultural Hall, on Lansdowne drive.

CENTENNIAL WATER-WORKS.

Architect, FREDERICK GRAFF, Philadelphia.—Size, 70 feet by 39 feet; chimney 80 feet high.

Located on the banks of the Schuylkill River, near the Belmont steamboat landing; a one-story brick building, containing a Worthington duplex engine, on exhibition, which is capable of pumping 6,000,000 gallons per day; and a smaller one with the capacity of 1,000,000 gallons per day.

BOOT-BLACKING PAVILIONS.

Architects, BALDERSTON & HUTTON, Philadelphia.—Octagon, 25 feet in diameter.
DEPARTMENT OF PUBLIC COMFORT COMPANY, Limited.
W. MARSH KASSON, Chairman, Philadelphia.

Five one story frame buildings, located in different portions of the grounds. Newspapers, periodicals, photographs, umbrellas for sale and hire, stationery, fruits, etc., are on sale. There are also telegraph and messenger stations and rolling chairs.

CLARK & COMPANY'S BUILDING.

Size, 40 feet square.

CLARK & Co.

Built for the purpose of exhibiting self coiling shutters, and situated between Belmont Avenue and Lansdowne drive. It is a one story frame building surmounted by a tower.

WARREN FOUNDRY AND MACHINE SHOP.

Size, 25 feet by 25 feet.

PHILLIPSBURG, N. J.

Represents cast iron gas and water pipes, unprotected from the weather, no building being considered necessary. The exhibit is located southwest of Machinery Hall, between it and the barrier.

TUFT'S SODA-WATER PAVILIONS.

Architect, F. H. SHEPHERD.—Size, first, 24 feet by 14 feet. Second, 36 feet square.
JAS. W. TUFTS, Boston.

These pavilions, three in number, are located in different parts of the grounds, and are built of wood, one story high; used for the sale of soda-water.

MINERAL ANNEXES.

Architects, HENRY PETTIT & JOS. M. WILSON, Philadelphia.—Size, 40 feet by 576 feet; 35 feet by 312 feet.

Contain minerals from all parts of the country. Are two in number, built of wood, and are located on the south side of the east end of the Main Exhibition Building.

POLICE STATIONS.

Architect, H. J. SCHWARZMANN.—Size (5), 82 feet by 37 feet; (1) 167 feet by 80 feet.

Five of these stations are one story frame buildings, and one is two stories high. They are similar in construction, containing offices and dormitories for the members of the police force, and cells for prisoners. The largest station house has a courtroom and alderman's office. They are located in different portions of the grounds.

INDEX OF EXHIBITORS.

DEPARTMENT V. AND SPECIAL BUILDINGS.

 Catalogue.

MAKERS OF

Special Machinery for the manufacture of Guns and Gun Carriages, Small Arms and Ammunition of all descriptions, including Cartridges, Shot and Shell, Fuzes, Rockets, Bullets, Percussion Caps, &c.; also of Gunpowder and Powder Cask Machinery, as well as of all kinds of Machinery used in the production of War Material and Implements.

MAKERS OF

Machinery on the latest system for Dressing, Preparing, and Spinning Silk, Silk Waste and China Grass; and of Special and General Tools for Engineering and Railway Work, and Wood-Working Machinery.

Agent for China and Japan—Mr. JAMES DAVIDSON, Shanghai.

PARIS,

1867.

SCANLAN, JUNR., & CO.,

WALSALL, STAFFORDSHIRE, ENGLAND,

Proprietors of the Patterns and Goodwill of Messrs. Best & Co.'s PLUMBING AND ENGINEERING FOUNDRY WORK, from Birmingham (Trade Mark as above).

MANUFACTURERS OF PATENTED NOVELTIES.

IMPORTERS OF SPECIAL AMERICAN TOOLS.

Contractors for Railway, Telegraph, Colliery, & Iron Works Stores, Gas & Water Pipes, Apparatus, Metals.

MACHINERY INSPECTED. MANUFACTURED IRON EXPORTED.

IMPORTANT TO CAPITALISTS.

FOR SALE,

THE AMERICAN PATENTRIGHT OF THE

AUTOMATIC FIRE EXTINGUISHER & ALARM

A MOST VALUABLE INVENTION—IS ENTIRELY SELF-ACTING.

Sole Patentees { SANDERSON & PROCTOR, at the EXHIBITION (MACHINERY BUILDING);
 or SANDERSON & PROCTOR, Electric Engineers and Lightning Conductor
 Manufacturers, SHORE WORKS, HUDDERSFIELD ENGLAND.

Gold Medal,

MCKAY'S EQUILIBRIUM DRILL,

Paris, 1875.

For Boring Tube Plates, Drilling Rivet Holes, and every description of Engine Work with perfect accuracy.
 Only requires true centre pop to guide cutters.

MENZIES & BLAGBURN,
 NEWCASTLE-ON-TYNE, ENGLAND.

AMERICAN PATENT FOR SALE.

H.W. JOHNS' PATENT
ASBESTOS
MATERIALS

Asbestos is a mineral possessing fibres like Silk or Flax, and cannot be destroyed by fire. It is found abundantly in various parts of this and other countries. Its uses are patented for the following and other materials for structural and mechanical purposes.

Roofing—Any color, for steep or flat roofs, in rolls ready for use.

Paints—All colors, ready for use, unexcelled in richness of color and unequalled in durability.

Steam Pipe and Boiler Coverings—The most effective non-conductors in use.

Steam Packing—Flat and round, all sizes—Indestructible, Self-lubricating.

Roof Coating for old tin, felt, and shingle roofs. **Fireproof Coating** for wooden buildings, boiler rooms, shingle roofs, etc. **Roof Paint** for tin roofs, iron and wood work. **Cements** for steam and gas fittings, repairing leaky roofs, etc. **Vermin-proof Lining** for carpets, deadening floors, sheathing felts, etc., etc.

All of these materials are prepared ready for use, and can be easily applied by any one. Liberal inducements to General Merchants, Dealers, and large consumers. ☞ Send for Samples, Illustrated Pamphlets, Price Lists, etc.

H. W. JOHNS, 87 Maiden Lane, N. Y.

ESTABLISHED 1858.

Patentee and Manufacturer.

☞ A full line of Asbestos Materials can be seen and full information obtained at Section No. F 9, Columns 64-65, Machinery Hall.

The following, among thousands of well-known Manufacturers and others, have our Goods in use:

Denison Paper Manuf'g Co., Mechanic Falls, Maine. Robinson Manuf'g Co., Woolen Goods Oxford, Maine. Hon. E. A. Straw (Amoskeag Co.), Manchester, N. H. Ford & Kimball, Iron Manufacturers, Concord, N. H. Old Colony Iron Co., Taunton, Mass. Boston Rubber Shoe Co., Malden, Mass. A. & W. Sprague & Co., Manufacturers, Providence, R. I. Cheney Brothers, Silk Manufacturers, So. Manchester, Conn. T. Kingsford & Son (Oswego Starch Factory), Oswego, N. Y. Garner & Co., Print Works, Haverstraw, N. Y. E. Remington & Sons, Fire Arms, Iliion, N. Y. A. Walker, Warden (State Prison), Sing Sing, N. Y. Passaic Zinc Co., New York City. Henry Clausen, Brewery, New York City. Harper Brothers, Publishers, New York City. Manhattan Gas Co., New York City.

ART GALLERY. No. 2.

Size 365 by 210 feet.

Architect, H. J. SCHWARZMAN.

Contractor, R. J. DOBBINS.

Iron work furnished by EDGEMOOR IRON CO., PENCOYD ROLLING MILLS.
KITTREDGE CORNICE CO.

Stone work furnished by SARGENT & CO., WESTHAM GRANITE CO., CONSHOCKEN STONE CO., S. F. PRINCE & CO., EXCELSIOR BRICK CO.

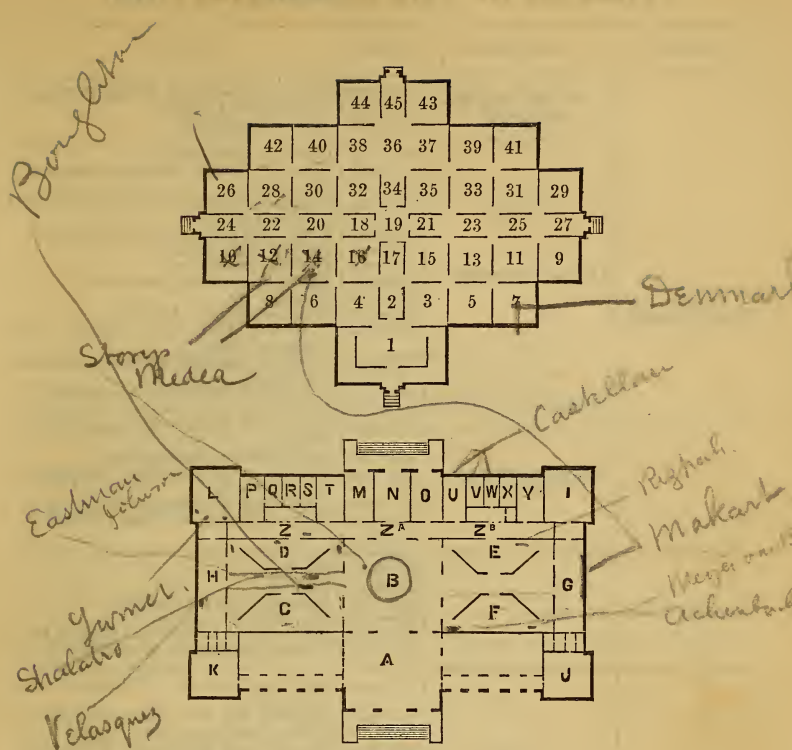

Glass furnished by SHOEMAKER & CO., WARD & CO., and J. M. ALBERTSON.

MEMORIAL HALL, built at a cost of \$1,500,000, by the State of Pennsylvania and City of Philadelphia, is placed at the disposal of the Centennial Commission, to be used during the Exhibition as an Art Gallery, after which it is designed to make it the receptacle of an Industrial Art Museum, similar to the South Kensington Museum, at London. The design is modern renaissance, and the structure is fire-proof. It covers an acre and a half, and is 365 feet long, 210 feet wide, and 59 feet high, over a basement 12 feet high. A dome, rising 150 feet above the ground, surmounts the centre, capped by a colossal ball, from which rises the figure of Columbia. The main front of this building looks southward, displaying a main entrance in the centre consisting of three arched doorways, a pavilion on each end, and two arcades connecting the pavilions with the centre. The entrance is 70 feet wide, to which there is a rise of 13 steps. Each of the doorways is 40 feet high and 15 feet wide, opening into a hall. In each pavilion there is a window 12½ feet by 34 feet, eight in all, which will be used for the display of stained glass, glass paintings, etc. The arcades designed to screen the long walls of the galleries each consist of five groined arches, and form promenades looking outward over the grounds and inward over open gardens extending back to the main wall of the building. These garden-plots are each 90 feet by 36 feet, ornamented in the centre with fountains, and intended to display statuary. The rear or north front of the building is of the same general character as the main front, but, in place of the arcade, has a series of arched windows, twelve in number, with the entrance in the centre. Between the pavilions is the grand balcony, a promenade 275 feet long and 45 feet wide, elevated 40 feet above the ground, and overlooking to the northward the grounds of the Park. On each front of the buildings the entrances open into halls, 82 feet long, 60 feet wide, and 53 feet high. These, in turn, open into the centre hall, 83 feet square, the ceiling rising over it 80 feet in height. From the east and west sides of this central hall extend the galleries, each 98 feet long, 48 feet wide, and 35 feet high. These galleries have temporary divisions for the better display of paintings, and, with the central hall, form a grand hall 287 feet long, and 83 feet wide, capable of comfortably accommodating 8000 persons. From the galleries

doorways open into two smaller galleries, 89 feet long and 28 feet wide. These open north and south into apartments connecting with the pavilion rooms, and forming two side-galleries 210 feet long. Along the whole length of the north side of the main galleries and central hall extends a corridor 14 feet wide, opening on its north line into a series of rooms, twenty-three in number, designed for studios and smaller exhibition rooms. All the galleries and the central hall are lighted from above; the pavilions and studios from the sides. The pavilions and central hall are designed especially for the exhibition of sculpture. This building gives 75,000 square feet of wall space for painting, and 20,000 square feet of floor space for statues, etc. The skylights throughout are double, the upper being of clear glass and the under of ground-glass.

The erection of the building was begun July 4th, 1874, and finished March 1st, 1876.

Great as is the space afforded in the Memorial Hall, the applications from American and foreign artists have proved so greatly in excess of its capacity as to require the erection of a much more spacious building. This, though only of brick, harmonizes architecturally with the Memorial Hall, and is to be permanent. It stands just in the rear of the original Art Gallery, and communicates with it. It affords 60,000 square feet of wall space available for paintings, and contains 30 galleries, each 40 feet square, besides 4 galleries, each 100 feet long by 54 feet wide, and two transverse central corridors, 20 feet wide.

MACHINERY.	500—509 510—519 520—529 530—539 540—549 550—559 560—569 570—579 580—589 590—599	Machines, Tools, etc., of Mining, Chemistry, etc. Machines and Tools for working Metal, Wood, and Stone. Machines and Implements of Spinning, Weaving, etc. Machines, etc., used in Sewing, Making Clothing, etc. Machines for Printing, Making Books, Paper Working, etc. Motors, Power Generators, etc. Hydraulic and Pneumatic Apparatus. Railway Plant, Rolling Stock, etc. Machinery used in Preparing Agricultural Products. Aerial, Pneumatic, and Water Transportation. Machinery, and Apparatus, especially adapted to the requirements of the Exhibition.
AGRICULTURAL BUILDING.	VI. AGRICULTURE.	600—609 610—619 620—629 630—639 640—649 650—662 665—669 670—679 680—689 690—699	Arboriculture and Forest Products. Pomology. Agricultural Products. Land Animals. Marine Animals, Fish Culture, and Apparatus. Animal and Vegetable Products. Textile Substances of Vegetable or Animal origin. Machines, Implements, and Processes of Manufacture. Agricultural Engineering and Administration. Tillage and General Management.
HORTICULTURAL BUILDING.	VII. HORTICULTURE.	700—709 710—719 720—729 730—739	Ornamental Trees, Shrubs, and Flowers. Hot Houses, Conservatories, Graperies. Garden Tools, Accessories of Gardening. Garden Designing, Construction, and Management.

CLASSIFICATION.

DEPARTMENT IV.—ART.

SCULPTURE.

- CLASS 400.—Figures and groups in stone, metal, clay, or plaster.
CLASS 401.—Bas-reliefs, in stone or metal; electrotype copies.
CLASS 402.—Medals, pressed and engraved; electrotypes of medals.
CLASS 403.—Hammered and wrought work—*repoussé* and *rehaussé* work, embossed and engraved relief work.
CLASS 404.—Cameos, intaglios, engraved stones, dies, seals, etc.
CLASS 405.—Carvings in wood, ivory, and metal.

PAINTING.

- CLASS 410.—Paintings in oil on canvas, panels, etc.
CLASS 411.—Water color pictures; aquarelles, miniatures, etc.
CLASS 412.—Frescoes, cartoons for frescoes, etc.
CLASS 413.—Painting with vitrifiable colors. Pictures on porcelain, enamel, and metal.

ENGRAVING AND LITHOGRAPHY.

- CLASS 420.—Drawings with pen, pencil, or crayons.
CLASS 421.—Line engravings from steel, copper, or stone.
CLASS 422.—Wood engravings.
CLASS 423.—Lithographs, zincographs, etc.
CLASS 424.—Chromo-lithographs.

PHOTOGRAPHY.

- CLASS 430.—Photographs on paper, metal, glass, wood, fabrics, or enamel surfaces.
CLASS 431.—Prints from photo-relief plates, carbon prints, etc.
CLASS 432.—Photo-lithographs, etc.
CLASS 433.—Photographic apparatus and supplies.

INDUSTRIAL AND ARCHITECTURAL DESIGNS, MODELS, AND DECORATIONS.

- CLASS 440.—Industrial designs.
CLASS 441.—Architectural designs; studies and fragments, representations and projects of edifices; restorations from ruins and from documents.
CLASS 442.—Decoration of interiors of buildings.
CLASS 443.—Artistic hardware and trimmings, artistic castings, forged metal work for decoration, etc.

DECORATION WITH CERAMIC AND VITREOUS MATERIALS, MOSAIC AND INLAID WORK.

- CLASS 450.—Mosaic and inlaid work in stone.
CLASS 451.—Mosaic and inlaid work in tiles, tessaræ, glass, etc.
CLASS 452.—Inlaid work in wood and metal, parquetry, tables, etc.
CLASS 453.—Stained glass.
CLASS 454.—Miscellaneous objects of art.

FOR SALE BY

JAMES M. SHAW & Co.,

(OF NEW YORK,)

At Store under United States Hotel,

ADJOINING CENTENNIAL GROUNDS,

PHILADELPHIA, PA.

BAILEY'S

CELEBRATED

PURE RYE WHISKEY.

HUEY & CHRIST,

SOLE PROPRIETORS,

121 North Third St., Philadelphia.

Dealers are cordially invited to call or write for price-list.

THE GREATEST DISCOVERY OF THE AGE

IS

DR. TOBIAS'

Celebrated Venetian Liniment

TWENTY-NINE YEARS BEFORE THE PUBLIC.

Warranted to cure Colic, Diarrhœa, Spasms, and Vomiting, taken internally, and Croup, Chronic Rheumatism, Cuts, Bruises, Insect Stings, Sore Throats, Toothache, Old Sores, and Pains in the Back, Chest, and Limbs, externally.

IT HAS NEVER FAILED, NOR HAS ONE BOTTLE BEEN RETURNED,

ALTHOUGH MILLIONS ARE SOLD ANNUALLY.

No one once using it is ever without it.

\$1000 REWARD

Has for years been offered for any certificate which he has published in the news papers or on his circulars proving false!!

No one should go to sea without it. It cures sea-sickness; and a few drops put in a tumbler of water entirely corrects the impurities, and makes it invaluable on land as on the sea.

Thousands of certificates can be seen at the Depot,

10 PARK PLACE, NEW YORK.

Sold by all Druggists. Price, 50 Cents and One Dollar.

JOHN DEWHURST & SONS,

Cotton Spinners,

AND MANUFACTURERS OF

SEWING COTTON,

Remarkable for its strength, pliability, evenness, and freedom from knots. It meets all the requirements of the different kinds of Sewing Machines, and is equally suitable for hand use.

John Dewhurst & Sons,

BELLE-VUE MILLS,

SKIPTON, YORKSHIRE,

COTTON SPINNERS FROM A. D. 1794.

SEWING COTTON MANUFACTURERS FROM A. D. 1870.

AGENTS IN THE UNITED STATES:

Messrs. WILSON & MERRILL, BOSTON.

THE PRESBYTERIAN JOURNAL.

Rev. ALFRED NEVIN, D. D., LL.D., }
Rev. J. FORD SUTTON, } *Editors.*

Rev. J. FORD SUTTON,
Proprietor and Publisher.

THE CHEAPEST OF RELIGIOUS PAPERS.

TERMS: \$1.50 per year, invariably in advance.

NO EXTRA CHARGE FOR POSTAGE.

It is just such a paper as the age demands, in *terms, tone, freshness, and for.e.*

It is a *pure* paper, designed expressly for the FAMILY and SABBATH-SCHOOL.

It *excludes* all advertisements of *Patent Medicines* and of all other unworthy things and schemes. It has no *reviews of sensational literature* or secular news, or anything which Christians and their children may not read on the Sabbath, without *profaning* the day.

Its INTERNATIONAL LESSONS are said, by leading Sabbath-school men, to be the *very best* published, and *worth the price of the paper.*

A most valuable feature of the Journal, and one in which it is *superior to all other religious papers*, is its NOTES ON THE ASSEMBLY'S SHORTER CATECHISM. These valuable aids to Catechetical Instruction in the family and Sabbath-school are prepared with *great labor and care*, expressly for the *Journal*. They will be continued on one question each week, until all are commented upon, which will require about two years.

In addition to these valuable papers, there will be contributions from *leading men* in the Church, and a full and fresh account of all the Church news.

In excellence and beauty of material and workmanship, the JOURNAL is *without a rival.*

My aim has been to make a paper *so cheap* (less than 3 cts. per week) that *every* family may have it, and so beautiful and *so good* that *all* will desire it.

Specimen copies sent free of charge, upon application.

SPECIAL OFFER No. 1.

Four copies of the *Journal* will be sent (without extra charge for postage) on receipt of three yearly subscriptions (\$4.50).

SPECIAL OFFER No. 2.

The *Journal* will be sent 3 *months* on trial (without extra charge for postage), on receipt of 25 cents.

NO CLUB RATES.

Local Agents and Canvassers wanted in *every church* and congregation, to whom a *very liberal cash* commission will be allowed. Persons desiring to act, will please send for terms.

Address,

THE PRESBYTERIAN JOURNAL,
Rooms 22 and 23 Press Building,
Corner 7th and Chestnut Streets, Philadelphia.

MANUFACTURERS OF

SEWING, CROCHET,

AND

EMBROIDERING COTTON.

DEPOTS:

49 Cannon Street, London, E. C.

10 Garthland Street, Glasgow.

36 Fountain Street, Manchester.

93 Boulevard de Sebastopol, Paris.

WM. H. SMITH & CO., 32 Greene Street, New York, Sole Agents
for the United States.

BROOK'S PATENT GLACE SPOOL COTTON,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

Brook's Six Cord Soft Finish Spool Cotton,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

BROOK'S PATENT GLACE THREAD, IN WHITE, BLACK, AND COLORS.

The extraordinary strength, smoothness, and durability obtained by this invention have secured for it great popularity, and it is consequently much imitated in inferior qualities. This Cotton is always labeled BROOK'S PATENT GLACE THREAD, and without their name and crest (a GOAT'S HEAD), the words "Glance," or "Patent Glance," do not denote that it is of their manufacture.

BROOK'S PATENT NINE AND SIX CORDS

Will be found of very superior quality, and strongly recommended wherever a SOFT COTTON is preferred.

EXHIBITION PRIZES.

Only Medal, ... London, 1851. | Only First Class Medal, Paris, 1855.

Prize Medal, ... London, 1862. | Gold Medal, ... Paris, 1867.

Only Diploma of Honor, Vienna, 1873.

These Cases and Medicines are sent by express or mail, free on receipt of the price.

THE SUN NEWSPAPER

Is printed and published every day in the year, at 166, 168, and 170 Nassau Street, New York City. Its regular edition on secular days now (April, 1876) averages about 140,000; its weekly edition over 88,000; and its Sunday issue is nearly 100,000. It thus prints and sells more than a million copies a week, which are read all over the United States. This is a circulation unprecedented in American journalism, and it is constantly on the increase. In proof of this, let the following figures testify. They show the number of copies of THE SUN printed every week during the year ending March 11, 1876.

WEEK ENDING	COPIES PRINTED.	WEEK ENDING	COPIES PRINTED.

EXHIBITION
Prize Thread

BROOK'S PATENT GLACÉ THREAD, IN WHITE, BLACK, AND COLORS.

The extraordinary strength, smoothness, and durability obtained by this invention have secured for it great popularity, and it is consequently much imitated in inferior qualities. This Cotton is always labelled BROOK'S PATENT GLACÉ THREAD, and without their name and crest (a GOAT'S HEAD), the words "Glacé," or "Patent Glacé," do not denote that it is of their manufacture.

BROOK'S PATENT NINE AND SIX CORDS will be found of very superior quality, and are strongly recommended wherever a SOFT COTTON is preferred.

EXHIBITION PRIZES.

APPLETON'S AMERICAN CYCLOPEDIA.

REVISED EDITION, ILLUSTRATED.

"A library of Universal Information."

"A panoramic view of all human knowledge."

PRICES AND STYLES OF BINDING.

Price, per Vol., in Cloth	\$5.00
Price, per Vol., in Leather	6.00
Price, per Vol., in Half Turkey	7.00
Price, per Vol., in Half Russia	8.00
Price, per Vol., in Full Russia	10.00
Price, per Vol., in Full Turkey	10.00

THE publishers respectfully give notice to the public that the above-named work is not sold by them or their Agents to any one at less than the prices printed on this page, and is sold only by subscription and not in bookstores.

THE BEST CYCLOPEDIA EVER PUBLISHED, one that will supersede all others, is now offered to the public at a *very moderate price*, considering the immense cost to the publishers of producing the work.

Every one that reads, every one that mingles in society, indeed every intelligent adult, needs a Cyclopaedia for constant reference. Just think! A saving of *ten cents per day*, the price of a cigar, or many other expenditures for luxuries or frivolities of a like amount, would pay for a *complete set* of the Cyclopaedia by a bimonthly subscription. Then there will be something substantial saved, and a storehouse of knowledge, indeed a universal library in itself, secured, with but *little effort or sacrifice*.

D. APPLETON & CO., Publishers, 549 and 551 Broadway, New York.

The cost to Subscribers for this Work is less than ONE CENT per page.

AGRICULTURAL HALL. No. 150.

Size, parallelogram, 820 by 540 feet.

Architect, JAMES H. WINDRIM, *Philadelphia*.

Contractor, PHILIP QUIGLEY, *Wilmington, Del.*

Wrought iron furnished by ALLISON & SONS, *Philadelphia*.

Erectors, BELL BROTHERS.

THE Agricultural Exhibition Building stands north of Horticultural Hall, on the eastern side of Belmont avenue. A novel combination of materials is illustrated in its construction. It consists of a long nave crossed by three transepts, all composed of Howe truss arches of Gothic form. The four courts inclosed between the nave and transepts, as also the four spaces at the corners of the building, having the nave and transepts for their sides, are roofed in and form spaces for exhibits. The building covers an area of above ten acres. Stock yards for the exhibition of horses, cattle, sheep, swine, poultry, etc., are in the vicinity of the exhibition grounds.

The contract was made July 26th, 1875, and the building was begun in September 1875, and finished in April, 1876. It cost \$260,000.

KEY TO THE NOTATION.

THE location of objects in the Agricultural Building is shown by a letter and figure, indicating the nearest column of the building. The letters—A, B, C, to T—designate the successive ranges of columns, proceeding eastward from the western wall across the width of the building; the figures, the number of the column in each range, counting northwardly from the southern wall, the entire length of the building, from 1 to 28. Thus C 5 is the column in the third range from the west, and the fifth from the southern end of the building. The northeasternmost column is T 28.

The class of the classification to which each exhibit belongs is indicated by the small figures at the end of the line.

CLASSIFICATION.

DEPARTMENT VI.—AGRICULTURE.

ARBORICULTURE AND FOREST PRODUCTS.

- CLASS 600.—Timber and trunks of trees, entire or in transverse or truncated sections, with specimens of barks, leaves, flowers, seed vessels, and seed.
Masts, spars, knees, longitudinal sections of trees, railway ties, ship-timber, lumber roughly sawn; as planks, shingles, lath, and staves.
Timber and lumber prepared in various ways to resist decay and combustion; as by injection of salts of copper and zinc.
- CLASS 601.—Ornamental woods used in decorating and for furniture; as veneers of mahogany, rosewood, ebony, walnut, maple, and madrona.
- CLASS 602.—Dyewoods, barks, and galls for coloring and tanning.
- CLASS 603.—Gums, resins, caoutchouc, gutta percha, vegetable wax.
- CLASS 604.—Lichens, mosses, fungi, pulu, ferns.
- CLASS 605.—Seeds, nuts, etc., for food and ornamental purposes.
- CLASS 606.—Forestry.—Illustrations of the art of planting, managing, and protecting forests. Statistics.
- CLASS 607.—Fruit trees and shrubs.

POMOLOGY.

- CLASS 610.—Fruits of temperate and semi-tropical regions; as apples, pears, quinces, peaches, nectarines, apricots, plums, grapes, cherries, strawberries, and melons.
- CLASS 611.—Tropical fruits and nuts, oranges, bananas, plantains, lemons, pine-apples, pomegranates, figs, cocoanuts.

AGRICULTURAL PRODUCTS.

- CLASS 620.—Cereals, grasses, and forage plants.
- CLASS 621.—Leguminous plants and esculent vegetables.
- CLASS 622.—Roots and tubers.
- CLASS 623.—Tobacco, hops, tea, coffee, spices, condiments, herbs.
- CLASS 624.—Seeds and seed vessels.

LAND ANIMALS.

- CLASS 630.—Horses, asses, mules.
- CLASS 631.—Horned cattle.
- CLASS 632.—Sheep.
- CLASS 633.—Goats, alpaca, llama, camel.
- CLASS 634.—Swine.
- CLASS 635.—Poultry and birds.
- CLASS 636.—Dogs and cats.
- CLASS 637.—Wild animals.
- CLASS 638.—Insects, useful and injurious. Honey bees, cochineal, silk-worms.

MARINE ANIMALS, FISH CULTURE, AND APPARATUS.

- CLASS 640.—Marine mammals.—Seals, cetaceans, etc., specimens living in aquaria, or stuffed, salted, preserved in alcohol, or otherwise.
- CLASS 641.—Fishes, living or preserved.
- CLASS 642.—Pickled fish, and parts of fish used for food.
- CLASS 643.—Crustaceans, echinoderms, beche de mer.
- CLASS 644.—Mollusks, oysters, clams, etc., used for food.
- CLASS 645.—Shells, corals, and pearls.
- CLASS 646.—Whalebone, shagreen, fish-glue, isinglass, sounds, fish-oil.
- CLASS 647.—Instruments and apparatus of fishing.—Nets, baskets, hooks, and other apparatus used in catching fish.
- CLASS 648.—Fish culture.—Aquaria, hatching pools, vessels for transporting roe and spawn, and other apparatus used in fish breeding, culture, or preservation.

ANIMAL AND VEGETABLE PRODUCTS.

(Used as food or as materials.)

- CLASS 650.—Sponges, seaweed, and other growths used for food or in the arts.
- CLASS 651.—The dairy.—Milk, cream, butter, cheese.
- CLASS 652.—Hides, furs, and leather, tallow, oil, and lard, ivory, bone, horn, glue.
- CLASS 653.—Eggs, feathers, down.
- CLASS 654.—Honey and wax.
- CLASS 655.—Animal perfumes; as musk, civet, ambergris.
- CLASS 656.—Preserved meats, vegetables, and fruits. Dried, or in cans or jars. Meat and vegetable extracts.
- CLASS 657.—Flour; crushed and ground cereals, decorticated grains.
- CLASS 658.—Starch and similar products.
- CLASS 659.—Sugar and syrups.
- CLASS 660.—Wines, alcohol, and malt liquors.
- CLASS 661.—Bread, biscuits, crackers, cakes, confectionery, cocoa, chocolate, etc.
- CLASS 662.—Vegetable oils, oil cake.

TEXTILE SUBSTANCES OF VEGETABLE OR ANIMAL ORIGIN.

- CLASS 665.—Cotton on the stem, in the boll, ginned, and baled.
- CLASS 666.—Hemp, flax, jute, ramie, etc., in primitive forms and in all stages of preparation for spinning.
- CLASS 667.—Wool in the fleece, carded, and in bales.
- CLASS 668.—Silk in the cocoon and reeled.
- CLASS 669.—Hair, bristles.

MACHINES, IMPLEMENTS, AND PROCESSES OF MANUFACTURE.

- CLASS 670.—Tillage.—Manual implements, spades, hoes, rakes. Animal power machinery, plows, cultivators, horse-hoes, clod-crushers, rollers, harrows. Steam power machinery, plows, breakers, harrows, cultivators.
- CLASS 671.—Planting.—Manual implements, corn-planters and hand-drills. Animal power machinery, grain and manure drills, corn and cotton planters. Steam power machinery, grain and manure drills.
- CLASS 672.—Harvesting.—Manual implements; grain-cradles, sickles, reaping-hooks. Animal power machinery, reapers and headers. Mowers, tedders, rakes, hay elevators, and hay loaders. Potato diggers.
- CLASS 673.—Preparatory to marketing.—Thrashers, clover-hullers, corn-shellors, winnowers, hay, cotton, flax, jute, ramie, wine, oil, and sugar making apparatus. Cleaners and smutters. Horse powers.

CLASS 674.—Applicable to farm economy.—Portable and stationary engines, chaffers, hay and feed cutters, slicers, pulpers, corn mills, farm boilers and steamers, incubators, edged tools, mills, meat choppers.

CLASS 675.—Dairy fittings and appliances.—Churns for hand and power, butter-workers, cans and pails, cheese-presses, vats, and apparatus, ice-cream freezers, cedar-ware.

AGRICULTURAL ENGINEERING AND ADMINISTRATION.

CLASS 680.—Laying out and improving farms.—Clearing (stump extractors), construction of roads, draining, irrigating, models of fences, gates, drains, out-falls, dams, embankments, irrigating machinery, stack building and thatching.

CLASS 681.—Commercial fertilizers, phosphatic, ammoniacal, calcareous, etc.

CLASS 682.—Transportation.—Wagons, carts, sleds, harness, yokes, traction engines, and apparatus for road making and excavating.

CLASS 683.—Farm buildings.—Models and drawings of farm houses and tenements, barns, stables, hop-houses, fruit-driers, ice-houses, windmills, granaries, barracks, apiaries, cocooneries, aviaries, abattoirs, and dairies.

TILLAGE AND GENERAL MANAGEMENT.

CLASS 690.—Systems of planting and cultivation.

CLASS 691.—Systems of draining and application of manures.

CLASS 692.—Systems of breeding and stock feeding, training.

CLASS 693.—Veterinary surgery and appliances.

SCHENCK'S BUILDING,
Cor. Sixth & Arch Sts., Philadelphia.

SCHENCK'S PULMONIC SYRUP,
A POSITIVE CURE FOR CONSUMPTION.

SCHENCK'S SEAWEED TONIC,
FOR DYSPEPSIA AND DEBILITY.

SCHENCK'S MANDRAKE PILLS,
FOR ALL BILIOUS DISORDERS.

THE GREATEST DISCOVERY OF THE AGE

IS

DR. TOBIAS'

Celebrated Venetian Liniment

TWENTY-NINE YEARS BEFORE THE PUBLIC.

Warranted to cure Colic, Diarrhœa, Spasms, and Vomiting, taken internally, and Croup, Chronic Rheumatism, Cuts, Bruises, Insect Stings, Sore Throats, Toothache, Old Sores, and Pains in the Back, Chest, and Limbs, externally.

IT HAS NEVER FAILED, NOR HAS ONE BOTTLE BEEN RETURNED,

ALTHOUGH MILLIONS ARE SOLD ANNUALLY.

No one once using it is ever without it.

\$1000 REWARD

Has for years been offered for any certificate which he has published in the newspapers or on his circulars proving false!!

No one should go to sea without it. It cures sea-sickness; and a few drops put in a tumbler of water entirely corrects the impurities, and makes it invaluable on land as on the sea.

Thousands of certificates can be seen at the Depot,

10 PARK PLACE, NEW YORK.

Sold by all Druggists. Price, 50 Cents and One Dollar.

Cast Iron Gas & Water Pipes, Stop Valves, Fire Hydrants, Gas Holders, &c.

Office, Philadelphia, No. 6 North Seventh St.

THE PHILADELPHIA LAWN MOWERS.

WIDTH.	POWER REQUIRED.	WEIGHT.	PRICE.
10 inch,	A Lady,	28 lbs.	\$15.00
12 "	"	34 "	18.00
14 "	A Youth,	37 "	20.00
16 "	One Man,	41 "	22.00
18 "	"	46 "	24.00

WIDTH.	POWER REQUIRED.	WEIGHT.	PRICE.
20 inch.	*One Man,	50 lbs.	\$26.00
15 "	"	51 "	22.00
30 "	Light Horse,	300 "	90.00
30 "	"	345 "	110.00

These Lawn Mowers being but little over half the weight of the old style machines, they are far easier handled and very much lighter draft. They are on exhibition in Agricultural Hall, Columns L and 13 and 14.

HEALTH! BEAUTY!!

Strong, Pure, and Rich Blood, Increase of Flesh and Weight, Clear Skin, and Beautiful Complexion secured to all through

DR. RADWAY'S SARSAPARILLIAN RESOLVENT

Every drop of the Sarsaparillian Resolvent communicates through the Blood, Sweat, Urine, and other fluids and juices of the system the vigor of life, for it repairs the wastes of the body with new and sound material. Scrofula, Consumption, Glandular Disease, Ulcers in the Throat, Mouth, Tumors, Nodes in the Glands and other parts of the system, Sore Eyes, Strumous Discharges from the Ears, and the worst forms of Skin Diseases, Eruptions, Fever Sores, Scald Head, Ring Worm, Salt Rheum, Erysipelas, Acne, Black Spots, Worms in the Flesh, Tumors, and all Weakening and Painful Discharges and Night Sweats are within the curative range of this wonder of Modern Chemistry, and a few days' use will prove to any person using it for either of these forms of disease, its potent power to cure them. If the patient, daily becoming reduced by the wastes and decomposition that are continually progressing, succeeds in arresting these wastes, and repairs the same with new material, made from healthy blood, and this the Sarsaparillian will and does secure, a cure is certain; for, when once this remedy commences its work of purification and succeeds in diminishing the loss of wastes, its repairs will be rapid, and every day the patient will feel himself growing better and stronger, the food digesting better, appetite improving, and flesh and weight increasing. Not only does the SARSAPARILLIAN RESOLVENT excel all known remedial agents in the cure of Chronic, Scrofulous, Constitutional, and Skin Diseases, but it is the only positive cure for Kidney, Bladder, and Urinary Diseases, Gravel, Diabetes, Dropsy, Stoppage of Water, Incontinence of Urine, Bright's Disease, Albuminuria, and in all cases where there are brickdust deposits, or the water is thick, cloudy, mixed with substance like the white of an egg, or threads like white silk, or there is a morbid, dark, bilious appearance, and white bonedust deposits, and when there is a pricking, burning sensation when passing water, and pain in the Small of the Back along the Loins.

Tumor of 12 years' growth cured by Radway's Resolvent.

BEVERLY, MASS., July 18th, 1869.

DR. RADWAY: I have had Ovarian Tumor in the ovaries and bowels. All the doctors said "there was no help for it." I tried everything that was recommended, but nothing helped me. I saw your Resolvent, and thought I would try it, but had no faith in it, because I had suffered for TWELVE YEARS. I took six bottles of the Resolvent, one box of Radway's Pills, and used two bottles of your READY RELIEF, and there is not a sign of a tumor to be seen or felt, and I feel BETTER, SMARTER, and happier than I have for twelve years. The worst tumor was in the left side of the bowels, over the groin. I write this to you for the benefit of others. You can publish if you choose. * * * * *

HANNAH P. KNAPP.

R. R. R.

RADWAY'S READY RELIEF

Cures the worst pains in from one to twenty minutes. Not one hour after reading this advertisement need any one suffer with pain. Radway's Ready Relief is a cure for every pain. It was the first and is *THE ONLY PAIN REMEDY* that instantly stops the most excruciating pains, allays Inflammations, and cures Congestions, whether of the Lungs, Stomach, Bowels, or other glands or organs, by one application, *in from one to twenty minutes*. No matter how violent or excruciating the pain the Rheumatic, Bedridden, Infirm, Crippled, Nervous, Neuralgic, or prostrated with disease may suffer,

RADWAY'S READY RELIEF

Will afford instant ease. Inflammation of the Kidneys, Inflammation of the Bladder, Inflammation of the Bowels, Congestion of the Lungs, Sore Throat, Difficult Breathing, Palpitation of the Heart, Hysterics, Croup, Diphtheria, Catarrh, Influenza, Headache, Toothache, Neuralgia, Rheumatism, Cold Chills, Ague Chills. The application of the READY RELIEF to the part or parts where the pain or difficulty exists will afford ease and comfort. Twenty drops in a half tumbler of water will, in a few moments, cure Cramps, Spasms, Sour Stomach, Heartburn, Sick Headache, Diarrhoea, Dysentery, Colic, Wind in the Bowels, and all Internal Pains. Travelers should always carry a bottle of RADWAY'S RELIEF with them. A few drops in water will prevent sickness or pains from change of water. It is better than French Brandy or Bitters as a stimulant.

FEVER AND AGUE.

FEVER AND AGUE cured for FIFTY CENTS. There is not a remedial agent in this world that will cure Fever and Ague and all other Malarious, Bilious, Scarlet, Typhoid, Yellow, and other Fevers (aided by RADWAY'S PILLS) as quick as RADWAY'S READY RELIEF. Fifty cents per bottle.

DR. RADWAY'S PILLS,

Perfectly tasteless, elegantly coated, for the cure of all Disorders of the Stomach, Liver, Bowels, Kidneys, Bladder, Nervous Diseases, Headache, Constipation, Costiveness, Indigestion, Dyspepsia, Biliousness, Bilious Fever, Inflammation of the Bowels, Piles, and all Derangements of the Internal Viscera. Warranted to effect a Positive Cure. RADWAY'S PILLS will free the system from all the above-named disorders. Price, 25 cents per box.

Read FALSE AND TRUE. Send one letter stamp to RADWAY & Co., No. 32 Warren Street, New York. Information worth thousands will be sent you.

Nature's Great Remedy

JONAS BROOK & BROTHERS,

Meltham Mills, near Huddersfield,

MANUFACTURERS OF

SEWING, CROCHET,

AND

EMBROIDERING COTTON.

DEPOTS:

49 Cannon Street, London, E. C.

10 Garthland Street, Glasgow.

36 Fountain Street, Manchester.

93 Boulevard de Sebastopol, Paris.

WM. H. SMITH & CO., 32 Greene Street, New York, Sole Agents
for the United States.

BROOK'S PATENT GLACE SPOOL COTTON,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

Brook's Six Cord Soft Finish Spool Cotton,

LENGTHS WARRANTED,

FOR HAND AND MACHINE USE.

BROOK'S PATENT GLACE THREAD. IN WHITE, BLACK, AND COLORS.

The extraordinary strength, smoothness, and durability obtained by this invention have secured for it great popularity, and it is consequently much imitated in inferior qualities. This Cotton is always labeled BROOK'S PATENT GLACE THREAD, and without their name and crest (a GOAT'S HEAD), the words "Glace," or "Patent Glace," do not denote that it is of their manufacture.

BROOK'S PATENT NINE AND SIX CORDS

Will be found of very superior quality, and strongly recommended wherever a SOFT COTTON is preferred.

EXHIBITION PRIZES.

Only Medal, ... London, 1851.

THE SUN NEWSPAPER

Is printed and published every day in the year, at 166, 168, and 170 Nassau Street, New York City. Its regular edition on secular days now (April, 1876) averages about 140,000; its weekly edition over 88,000; and its Sunday issue is nearly 100,000. It thus prints and sells more than a million copies a week, which are read all over the United States. This is a circulation unprecedented in American journalism, and it is constantly on the increase. In proof of this, let the following figures testify. They show the number of copies of THE SUN printed every week during the year ending March 11, 1876.

WEEK ENDING	COPIES PRINTED.	WEEK ENDING	COPIES PRINTED.
March 20.....	849,382	September 18.....	860,358
27.....	845,802	25.....	858,778

Month, in packages of
12 ounces each.

THIS TRULY POPULAR AND CELEBRATED CATTLE POWDER

Is recommended to the FARMER, HORSEMAN, OR DAIRYMAN as a most reliable cure for all the ordinary diseases to which Horses, Cattle, Hogs, or Sheep are subject, keeping them in a healthy and thrifty condition. It is a Vegetable Compound, made up almost entirely of Roots, Herbs, and Barks, and therefore free from all mineral substances, which do an animal decided injury.

In the Horse it will cure Coughs, Distemper, Farcy, Fevers, Gripes, and Colic Inflammation, Hide Bound, Glanders, Staggers, Kidney Disease, Lung Disease, Scours, Loss of Appetite, etc., all depending more or less on a bad state of the blood.

In the Cow it will cure Jaundice or Yellows, Bloody Urine, Bloody Milk, Hollow Horn or Wolf Disease, Garget, etc.

In Hogs it shows its good effects sooner than in any other animal. It keeps them clear of disease, particularly when congregated together in distilleries.

More especially, the **VEGETABLE CATTLE POWDER** claims what no other Horse or Cattle Powder dare claim, viz.: It will, by its chemical qualities, enable a Cow, upon the same amount of food, to yield an increase of Milk and Butter, the latter in quantity of from one to two pounds per week, or it will aid the fattening of stock in general, to the amount of from 20 to 25 per cent. It is a sure cure for Chicken Cholera or Gapes.

The Powder comes in large packs, at 25 cents, or five packs for a dollar.

FRED. A. MILLER, Sole Manufacturer, 147 N. Third St., Philadelphia, Pa.

Wholesale Agents appointed on especial terms in all large cities. Retailers make large profits.

1876.

THE ORIGIN OF CO-OPERATIVE NEWSPAPER ADVERTISING.

Co-operative newspaper printing, as now practised, originated in Wisconsin twelve years ago. It is termed *co-operative* for the reason that one side of each of the newspapers is printed at a central office, and the paper sent in its half-printed state to the home office, where it is completed with editorials, local news, and other matter prepared by the editor or publisher. In December, 1846, the idea of co-operation, *with advertisements*, occurred to Mr. Aikens, while yet serving his time as an apprentice, in printing the message of President Polk on one side of a country newspaper of New England at Boston, and the other half being printed at the local office.

Mr. A. J. Aikens, a practical printer and business man, conceived the idea of reducing the cost of ready-printed paper, as it is now termed, to country publishers, by making an agreement with them to use a certain space in each of their papers for advertisements that he might procure. This plan of co-operation he put into practice twelve years ago, at the office of Cramer, Aikens & Cramer, Milwaukee. It at once became successful, leading to the establishment of co-operative newspaper printing-offices in Chicago, New York, St. Louis, Cincinnati, Memphis, St. Paul, and other places. There are now over two thousand newspapers printed upon the co-operative plan in the United States and Canadas, and the number is constantly increasing, it having more than doubled in the last five years. The enterprise is no longer an experiment, but an established success, and the system is one yielding manifold advantages to advertisers as well as to local publishers.

The American Newspaper Union

Is essentially national. The papers represented in it are located in all the States of the Union and in nearly five hundred county seats. They circulate over the whole area of the country from Maine to Colorado, distributing at least *one hundred copies every year to each square mile of the settled portions of the United States.*

Although, as a whole, the Union List is national, covering all sections, it is so made up of different members as to be susceptible of easy division into sections—East, Middle, West, South. The distribution of the papers is as follows:

New England	78	Illinois	117	Nebraska	15
New York	101	Michigan	86	Missouri	17
New Jersey	27	Wisconsin	98	Georgia	10
Pennsylvania	65	Tennessee	29	Alabama	32
Virginia	24	Kentucky	29	Louisiana	11
No. and So. Carolina	24	Minnesota	79	Mississippi	29
Ohio	122	Iowa	85	Other States	46
Indiana	81				

AGGREGATE CIRCULATION.

The circulation of these papers is large and constantly increasing. It is larger than the circulation of any other lists or combinations of country papers in the United States—the last aggregate weekly circulation being *seven hundred thousand seven hundred and thirty copies (700,730).*

- 356 Zorrilla, Benjamin, Province of Salta.—Llama skin. 652

RANDOLPH'S HAND SEED SOWER,

For Sowing all kinds of Garden Seeds, from Peas down to the smallest Seeds, with accuracy and dispatch.

It is easily operated by a lady or a child of ordinary intelligence, with a little practice. Highly recommended by some of our most experienced gardeners and farmers.

FIG. 1 shows a side view of the implement, with the manner of holding it in the hand, and position of the finger; A, hopper for containing the seeds to be sowed, inside of which is an agitator for discharging the seeds, connected with the lever D, to be kept in constant motion by the finger while in use; F, earth opener, by means of which a furrow is made for the seed; the removable sides H are perforated with holes of various sizes, adapted for the different varieties of seeds to be sown; B, cover or lid; C, handle; D, finger lever; E, spiral spring to assist in the operation of the agitator.

Its cost is trifling compared with the advantages resulting from its use. The saving in time and seeds will undoubtedly repay the outlay in the planting of a single week. \$1.25 each. Sent by mail, post-paid, to any address in the United States upon the receipt of \$1.50.

A LIBERAL DISCOUNT TO THE TRADE OR TRAVELING AGENTS.

B. K. BLISS & SONS, Sole Proprietors,

EXHIBITIONS OF LIVE STOCK.

1. The live stock display at the International Exhibition will be held within the months of September, October, and November, 1876; the periods devoted to each family being as follows: Horses, mules, and asses, from September 1st to 14th. Dogs from September 1st to 8th. Horned cattle, from September 21st to October 4th. Sheep, swine, and goats, from October 10th to 18th. Poultry will be exhibited from October 27th to November 6th.

2. Animals to be eligible for admission to the International Exhibition must be, with the exception of trotting stock, walking horses, matched teams, fat and draught cattle, of such pedigree that the exhibitor can furnish satisfactory evidence to the Chief of Bureau, that as applied to thorough-bred horses, as far back as the fifth generation of ancestors on both sides, they are of pure blood and of the same identical breed. As to short-horned cattle, they are registered in either Allen's, Alexander's, or the English herd-books. As to Holssteins, Herefords, Ayrshires, Devons, Guernseys, Brittanys, Kerrys, and other pure breeds, they are either imported or descended from imported animals on both sides. As to Jerseys, they are entered in the Herd Register of the American Jersey Cattle Club, or in that of the Royal Agricultural Society of Jersey. As to sheep or swine they are imported or descended from imported animals, and that the home-bred shall be of pure blood as far back as the fifth generation.

3. The term breed, as used, is intended to comprehend all family divisions, where the distinction in form and character dates back through years of separation; for instance, it is held that the progeny of a pure-blood Jersey and a pure-blood Guernsey is not a thorough-bred but a cross-bred animal, and, as such, is necessarily excluded.

4. In awarding prizes to animals of pure blood, the judges will take into consideration chiefly the relative merits as to the power of the transmission of their valuable qualities; a cardinal object of the Exhibition being to promote improvement in breeding stock.

5. In case of doubt relative to the age of an animal, satisfactory proof must be furnished or the animal will be subject to examination by a veterinary surgeon; and should the state of dentition indicate that the age has not been correctly stated, the person so entering as an exhibitor will be prohibited from exhibiting in any class.

6. The forms of classification for awards, as given under each head, are intended (except in the case of trotting stock, walking horses, matched teams, fat and draught cattle) to apply to the animals of any pure breed that are entered for competition.

7. The Exhibition being open to the world, it is of the first importance that the best of their kind only be brought forward, as the character of the stock will be judged by the general average of those exhibited.

8. Exhibitors will be expected to furnish their own attendants, on whom all responsibility of the care of feeding, watering, and cleaning the animals, and also of cleaning the stalls, will rest.

9. Forage and grain will be furnished at cost prices, at depots conveniently located within the grounds. Water can be had at all hours, ample facilities being provided for its conveyance and distribution throughout the stock yards.

10. Exhibitors must supply all harness, saddlery, vehicles, and other appointments, and all such must be kept in their appointed places.

11. The Commission will erect ample accommodation for the exhibition and protection of live stock, yet contributors who may desire to make special arrangements for the display of their stock, will be afforded facilities at their own cost. Fractious animals, whether stallions, mares with foals, or bulls, will be provided with stalls of suitable character.

12. All stalls will be regularly and distinctly numbered; corresponding numbers on labels of uniform character will be given to each exhibitor, and no animal will be allowed to pass from its stall without its proper number attached.

13. Numbers alone will distinguish stock in the show yards, preceding the awards of prizes.

14. The judges of live stock will make examination of all animals on the opening day of each serial show, and will for that day have exclusive entrance to the show yard.

15. No premium will be awarded an inferior animal, though there be no competition.

16. All animals will be under the supervision of a veterinary surgeon, who will examine them before admission, to guard against infection, and who will also make a daily inspection and report. In case of sickness the animal will be removed to a suitable inclosure especially prepared for its comfort and medical treatment.

17. When animals are taken sick, the exhibitors may either direct the treatment themselves, or allow the veterinary surgeon appointed by the Commission to treat the case. In this latter event the exhibitor will be charged for all expenses incurred. All possible care will be taken of animals exhibited, but the Commission cannot be held responsible for any injury or accident.

18. A ring will be provided for the display and exercise of horses and cattle.

19. On the last day of each serial show, a public auction may be held of such animals as the exhibitors may desire to sell. Animals may be sold at private sale at any time during their exhibition. During the period of a serial show, no animal, even in the event of being sold, will be allowed to be definitely removed.

20. An official catalogue of the animals exhibited will be published.

21. Exhibitors of thoroughbred animals must, at the time of making their entries, file with the Chief of the Bureau a statement as to their pedigree, affirmed or sworn to before an officer authorized to take affidavits, and the papers so filed shall be furnished to the Jury of Experts.

22. The ages of live stock must be calculated up to the opening day of the exhibition of the class to which they belong.

23. Sheep breeders, desiring to exhibit wool, the produce of the flocks, will display not less than five fleeces.

24. All animals must be entered according to the prescribed rules as given in forms of entry, which forms will be furnished on application to the Chief of the Bureau of Agriculture.

BREEDING HORSES.

Mares entered as breeding animals must have had foals within one year of the show, or if in foal, certificates must be furnished to that effect.

All foals exhibited must be the offspring of the mare with which they are at foot.

Awards will be made to respective breeds for pure bred turf stallions, six years and over; pure bred turf stallions, over four years and under six years; pure bred turf stallions, over two years and under four years; pure bred turf mares, six years and over; pure bred turf mares, over two and under six years.

Awards will be made for trotting stallions, six years and over; trotting stallions, over four years and under six; trotting stallions, over two years and under four; pure bred draught stallions, six years and over; pure bred draught stallions, over four years and under six years; pure bred draught stallions, over two years and under four years; pure bred draught mares, six years and over; pure bred draught mares, over two and under six years; trotting brood mares, six years and over; trotting fillies, over four years, and under six; trotting fillies, over two years and under four.

RUNNING AND TROTTING HORSES

Shall be judged according to their record up to August 15th, 1876, due regard being had to present condition.

Awards will be made for running horses having made fastest record; trotting stallions having trotted a mile within two-thirty; mares and geldings having trotted a mile within twenty-five.

WALKING HORSES.

Fast-walking horses, whether bred for agricultural purposes or the saddle, will compete in the ring for awards.

MATCHED TEAMS.

Awards will be made for matched teams having trotted a mile in two-thirty-five; matched stallions for heavy draught, over sixteen hands high, and over fifteen hundred pounds weight each; matched geldings for heavy draught, over sixteen hands high, and over fifteen hundred pounds weight each; matched mares for heavy draught, over fifteen hands high, and over fourteen hundred pounds weight each, matched mules for heavy draught, over fifteen and a half hands high, and over thirteen hundred pounds weight each.

BREEDING ASSES.

Awards will be made to respective breeds of pure bred jacks over six years; pure bred jacks over three years and under six; pure bred she-asses over six years; pure bred she-asses over three years and under six.

NEAT CATTLE.

No cow will be eligible for entry unless accompanied with a certificate that, within fifteen months preceding the show, she had a living calf, or that the calf, if born dead, was born at its proper time. No heifer entered as in calf will be eligible for a prize unless accompanied with a certificate that she had been bulled before the first of April, or presents unmistakable proof of the fact to the judges. No bull above one year old can be entered unless he have a ring in nose, and the attendant be provided with a leading stick, which must be used whenever the animal is taken out of stall.

Awards will be made for the best herd of each respective breed, consisting as follows: one bull, four cows, none under fifteen months.

Neat cattle, of each respective breed, will compete individually for awards: bulls, three years and over; bulls over two years and under three years; bulls over one year and under two years; cows four years and over; cows over three and under four years; cows or heifers in calf, over two years and under three years; yearling heifers. A sweepstake award will be made for the best bull of any breed. A sweepstake award will be made for the best cow of any breed.

FAT AND DRAUGHT CATTLE.

Animals entered as fat and draught cattle need not be of pure blood, but will compete on individual merits. Fat cattle must be weighed, and in general those will be judged best which have the greatest weight with the least surface and offal.

Awards will be made for best fatted steer of any age and breed; best fatted cow of any age or breed; most powerful yoke of oxen; most rapidly walking yoke of oxen; most thoroughly trained yoke of oxen; most thoroughly trained team of three or more yokes of oxen.

BREEDING SHEEP.

All sheep offered for exhibition must be accompanied with certificate to the effect that they have been shorn since the first of April, and the date given. If not fairly shorn, or if clipped so as to conceal defects, or with a view to improve the form or appearance, they will be excluded from competition.

Awards will be made to respective breeds for the best pen of five animals of same flock and including one ram, the ewes all having had living lambs the past spring.

Awards will be made to respective breeds for rams two years and over; shearling rams.

A sweepstake award will be made for the best ram, respectively of long, middle, and fine woolled breeds.

Awards will be made to respective breeds for ewes in pens of three, all having had living lambs; shearlings in pens of three.

A sweepstake award will be made for the best pen of three breeding ewes, respectively of long, middle, and fine woolled breeds.

FAT SHEEP.

Fat sheep entered for competition must be weighed, and in general those will be judged best which have the greatest weight, with the least surface and offal.

Awards will be made for pen of three best fatted sheep of each breed; pen of three best fatted sheep of any breed.

BREEDING SWINE.

Every competing sow above one year old must have had a litter, or be in pig, and the owner must bring proof of these facts if required. If a litter of pigs be sent with a sow, the young pigs must be sucklings, the offspring of the sow, and must not exceed the age of three months.

Awards will be made to respective breeds for the best pen of one boar and two breeding sows; for pen of sow and litter.

Awards will be made to respective breeds for boars two years old and over; boars one year old and under two years; boars between nine months and one year; breeding sows two years old and over; breeding sows one year old and under two years; pen of three sow pigs between nine months and one year.

A sweepstake award will be made for the best boar of any breed. A sweepstake award will be made for the best sow of any breed.

FAT SWINE.

Fat swine entered for competition must be weighed, and, in general, those will be judged best which have the greatest weight, with the least surface and offal.

Awards will be made for pairs of best fatted hogs of each breed; pairs of best fatted hogs of any breed.

DOGS.

Benches will be furnished free of charge. Exhibitors may themselves assume the cost of attendance upon their animals, but to provide for them who cannot conveniently attend the Exhibition, the Commission will assume the expenses of feeding and daily care, upon the payment of an attendance charge of three dollars upon each animal.

Awards will be made to respective breeds for dogs of two years and over; dogs of one year and under two; pups.

A sweepstake award will be made for the best dog of any breed displayed by a foreign exhibitor. A sweepstake award will be made for the best home-bred dog of any breed.

Awards will be made to respective breeds for bitches of two years and over; bitches of one year and under two; bitch pups.

A sweepstake award will be made for the best bitch of any breed displayed by a foreign exhibitor. A sweepstake award will be made for the best home-bred bitch of any breed.

POULTRY.

Poultry can only be exhibited in coops made after specifications furnished by the Bureau of Agriculture. The Commission will furnish coops and attendance upon payment of one dollar on each bird of the gallinaceous division, and two dollars on each pair of the aquatic division.

Awards will be made to respective breeds for pairs of one year and over, of chickens, turkeys, ducks, geese, swans, pigeons, guineas, and ornamental birds; for pairs under one year.

FISH.

Living fishes will be displayed in both fresh and salt water aquaria.

Awards will be made for largest display of fish of each species; largest display of fish of all species.

DEPARTMENT OF HORTICULTURE.

HORTICULTURAL HALL.

HORTICULTURAL HALL. No. 160.

Size 383 by 193 feet.

Architect, H. J. SCHWARZMAN.

Contractor, JOHN RICE, Philadelphia.

Wrought iron furnished by KEYSTONE BRIDGE COMPANY, Pittsburgh, Pa.

Cast iron furnished by SAMUEL J. CRESSWELL, Philadelphia.

Painting by JOSEPH CHAPMAN, Philadelphia.

Masonry by MOORE & SCATTERGOOD, Philadelphia.

APPROPRIATIONS of the City of Philadelphia have provided the Horticultural Building, which is to remain in permanence as an ornament of Fairmount Park. It is on the Lansdowne Terrace, a short distance north of the Main Building and Art Gallery, and has a commanding view of the Schuylkill river and the northwestern portion of the city. The design is in the Moorish style of architecture of the twelfth century, the principal materials externally being iron and glass. The main floor is occupied by the central conservatory, 230 by 80 feet, and 55 feet high, surmounted by a lantern 170 feet long, 20 feet wide, and 14 feet high. Running entirely around this conservatory, at a height of 20 feet from the floor, is a gallery 5 feet wide. On the north and south sides of this principal room are four forcing houses for the propagation of young plants, each of them 100 by 30 feet, covered with curved roofs of iron and glass. Dividing the two forcing houses in each of these sides is a vestibule 30 feet square. At the centre of the east and west ends are similar vestibules, on either side of which are the restaurants, reception room, offices, etc. From the vestibules ornamental stairways lead to the internal galleries of the conservatory, as well as to the four external galleries, each 100 feet long and 10 feet wide, which surmount the roofs of the forcing houses. These external galleries are connected with a grand promenade, formed by the roofs of the rooms on the ground floor, which has a superficial area of 1800 square yards.

The east and west entrances are approached by flights of blue marble steps from terraces 80 by 20 feet, in the centre of each of which stands an open kiosque 20 feet in diameter. The angles of the main conservatory are adorned with eight ornamental fountains. In the basement, which is of fireproof construction, are the kitchen, storerooms, coal-houses, ash-pits, heating arrangements, etc.

The ground was graded and the foundations of Horticultural Hall laid on May 1st, 1875. The building was finished April 1st, 1876. It covers an area for exhibition purposes of 122,500 square feet, and cost about \$300,000. This building will be permanent.

HORTICULTURAL HALL.

Scale, 80 ft. to 1 in.

A Floral Hall.
B Greenhouse.

C Restaurant.
D Ladies' Room.

E Gentlemen's Room.
F Offices.

G Kiosque.
H Vestibule.

Total Length, 350 ft. Width, 160 ft. Height, 65 ft.

CLASSIFICATION.

DEPARTMENT VII.—HORTICULTURE.

ORNAMENTAL TREES, SHRUBS, AND FLOWERS.

- CLASS 700.—Ornamental trees and shrubs, evergreens.
CLASS 701.—Herbaceous perennial plants.
CLASS 702.—Bulbous and tuberous rooted plants.
CLASS 703.—Decorative and ornamental foliage plants.
CLASS 704.—Annuals and other soft-wooded plants, to be exhibited in successive periods during the season.
CLASS 705.—Roses.
CLASS 706.—Cactacea.
CLASS 707.—Ferns, their management in the open air and in ferneries, wardian cases, etc.
CLASS 708.—New plants, with statement of their origin.
CLASS 709.—Floral designs, etc.—Cut flowers, bouquets, preserved flowers, leaves, seaweeds. Illustrations of plants and flowers.—Materials for floral designs. Bouquet materials, bouquet holders, bouquet papers, models of fruits, vegetables, and flowers.

HOTHOUSES, CONSERVATORIES, GRAPERIES, AND THEIR MANAGEMENT.

- CLASS 710.—Hothouse and conservatory plants.
CLASS 711.—Fruit trees under glass.
CLASS 712.—Orchids and parasitic plants.
CLASS 713.—Forcing and propagation of plants.
CLASS 714.—Aquatic plants under glass, or in aquaria, etc.
CLASS 715.—Horticultural buildings, propagating houses, hotbeds, etc., and modes of heating them. Structures for propagating and forcing small fruits.
CLASS 716.—Portable or movable orchard houses and graperies, without artificial heat. Frames, beds.

GARDEN TOOLS, ACCESSORIES OF GARDENING.

- CLASS 720.—Tools and implements.—Machines for the transplanting of trees, shrubs, etc. Portable forcing pumps, for watering plants in greenhouses and methods of watering the garden and lawn.
CLASS 721.—Receptacles for plants.—Flower pots, plant-boxes, tubs, fern cases, jardinieres, etc. Window gardening. Plant and flower stands, ornate designs in iron, wood, and wire.
CLASS 722.—Ornamental wirework, viz.: fences, gates, trellis bordering of flower beds, porches. Park seats, chairs, garden statuary, vases, fountains, etc. Designations, labels, numbers.

GARDEN DESIGNING, CONSTRUCTION, AND MANAGEMENT.

- CLASS 730.—Laying out gardens.—Designs for the laying out of gardens, and the improvement of private residences. Designs for commercial gardens, nurseries, graperies. Designs for the parterre. Books on gardening.
CLASS 731.—Treatment of water for ornamental purposes, cascades, fountains, reservoirs, lakes.
CLASS 732.—Formation and after-treatment of lawns.
CLASS 733.—Garden construction, buildings, etc.—Rockwork, grottoes. Rustic constructions and adornments for private gardens and public grounds.
CLASS 734.—Planting, fertilizing, and cultivating.

UNITED STATES.

Trees, Shrubs, Flowers, Hot-House Plants.

Ornamental Trees, Shrubs, Flowers, and Floral Designs.

- 1 Wharton, Joseph, Philadelphia, Pa.—*Eucalyptus globulus*. 700
- 2 Lovering, Joseph S., Philadelphia, Pa.—Decorative foliage, plants, etc. 703

LONDON.

BY ROYAL LETTERS PATENT.

PARIS,

1873.

CORRY & Co.'s
GOLD MEDAL GINGER ALE,
And other Pure Aerated Waters,
CROMAC SPRINGS, BELFAST, IRELAND.

Original Manufacturers (for exportation) of the world-renowned Ginger Ale, and proprietors, in perpetuity, of the celebrated Cromac Spring. Established 1850. Beware of spurious imitations.

SEE STAND IN AGRICULTURAL HALL.

1875.

HIGGIN'S FACTORY FILLED SALT,

Which is prepared expressly for Dairy purposes, is admitted by all Curers and Packers who use it, to preserve Hams and Bacon in the finest possible condition, and to impart an unusually fine color and appearance to the fat; and its great purity makes it especially valuable for the curing of Butter and Cheese. It never cakes in the sack. Sample bags may be had gratis on application to Messrs. GEO. RAPHAEL & Co., Philadelphia.

Works—Northwich, Cheshire, Eng and. Office Address—THOMAS HIGGIN & Co., 33, Tower Buildings West, Liverpool, England. Orders received by LOGAN & PRESTON, New York, and GEO. RAPHAEL & Co., Philadelphia.

Prize Medal

CLEEVE HOOPER, Junr.,

London 1874.

H.W. JOHNS' **ASBESTOS** PATENT
MATERIALS

Asbestos is a mineral possessing fibres like Silk or Flax, and cannot be destroyed by fire. It is found abundantly in various parts of this and other countries. Its uses are patented for the following and other materials for structural and mechanical purposes.

Roofing—Any color, for steep or flat roofs, in rolls ready for use.

Paints—All colors, ready for use, unexcelled in richness of color and unequalled in durability.

Steam Pipe and Boiler Coverings—The most effective non-conductors in use.

Steam Packing—Flat and round, all sizes—Indestructible, Self-lubricating.

Roof Coating for old tin, felt, and shingle roofs. Fireproof Coating for wooden buildings, boiler rooms, shingle roofs, etc. Roof Paint for tin roofs, iron and wood work. Cements for steam and gas fittings, repairing leaky roofs, etc. Vermin-proof Lining for carpets, deadening floors, sheathing felts, etc., etc.

All of these materials are prepared ready for use, and can be easily applied by any one. Liberal inducements to General Merchants, Dealers, and large consumers. ☐ Send for Samples, Illustrated Pamphlets, Price Lists, etc.

H. W. JOHNS, 87 Maiden Lane, N. Y.

ESTABLISHED 1858.

Patentee and Manufacturer.

☐ A full line of Asbestos Materials can be seen and full information obtained at Section No. F 9, Columns 64-65, Machinery Hall.

The following, among thousands of well-known Manufacturers and others, have our Goods in use:

Denison Paper Manuf'g Co., Mechanic Falls, Maine. Robinson Manuf'g Co., Woolen Goods Oxford, Maine. Hon. E. A. Straw (Amoskeag Co.), Manchester, N. H. Ford & Kimball, Iron Manufacturers, Concord, N. H. Old Colony Iron Co., Taunton, Mass. Boston Rubber Shoe Co., Malden, Mass. A. & W. Sprague & Co., Manufacturers, Providence, R. I. Cheney Brothers, Silk Manufacturers, So. Manchester, Conn. T. Kingsford & Son (Oswego Starch Factory), Oswego, N. Y. Garner & Co., Print Works, Haverstraw, N. Y. E. Remington & Sons, Fire Arms, Ilion, N. Y. A. Walker, Warden (State Prison), Sing Sing, N. Y.
