## FOREWORD

What's What at Illinois is published with three separate ends in view:

1. To interest outsiders in the University and inform them about its history, enrollment, administration, equipment, entrance requirements, etc.

2. To supply Illinois students and Alumni with a handbook of ready reference pertaining especially to Illinois athletics and student activities.

3. To advertise Champaign as an ideal and attractive college town.

The editors wish to thank Mr. R. C. Swope and Mr. C. M. Ferguson for their kindness in turning over for their use the records of scores which appear in the athletic section. A portion of the material which appears in Part II was obtained from the University's Annual Register.

## PART I

## THE CITY OF CHAMPAIGN

## THE SECRET OF INDUSTRIAL PROGRESS

The secret of industrial progress for any city is to find enterprises which will succeed, not by taking business away from establishments already existing, but by creating new business for themselves.

In trying to select and build up new businesses in a city, promoters, whether Chambers of Commerce or individuals, should give attention to the matter of adaptation or fitness. That is to say, they should, if possible, choose industries for which the community has some special facilities, or which have some particular relation to the general life of the community. Everybody sees that it would be foolish to locate a zinc smelter on the prairies of central Illinois. It is equally foolish to try to locate there an industry whose raw materials require transportation over long distances, or whose market is far away from the place where the plant is located, especially if competing establishments are more advantageously situated. Therefore the first question which should be asked is, What do the economic conditions of the place point to as the most suitable industry? In answering the question for Champaign one remembers that it is in the heart of the corn belt. This fact suggests that industries which use corn as their raw material would at any rate be near the source of supply. Located as it is Champaign also has good transportation facilities, and therefore has access to markets for such products.

In this situation probably the most likely industry that could be established would be one that could use the particular kind of corn that this county produces. This would imply mats, mattresses, possibly corn cob pipes, and perhaps rough wrapping paper.

Champaign, too, is a good convention city. But in trying to

get gatherings here some attention should be paid again to the kind of gatherings that can be taken care of. There are attractions for people who are interested in educational matters in the broadest sense. Gatherings of bodies organized to promote civic improvement, whether political, social, educational, religious, or any other aspect of life; societies for scientific purposes; and industrial and commercial organizations, etc., could well be asked to meet in this community. That is to say, there are attractions to induce such bodies to come provided the necessary conveniences can be furnished. Such an attempt of course would have to be well planned, so as to evenly distribute meetings through as many months of the year as possible.

DAVID KINLEY,

Vice President, University of Illinois.

### THE CITY OF CHAMPAIGN

Champaign, one of the progressive cities of the state, the gateway to the great University of Illinois, is situated in the heart of the richest agricultural region of the world. It is 128 miles south of Chicago, 118½ miles west of Indianapolis, and is within easy reach of a number of thriving towns. Champaign is the larger of the Twin Cities, Urbana and Champaign, whose combined population is 25,000. It is a city of homes, all of which present a peaceful, prosperous, homelike appearance. There are 85 miles of streets, of which 25 miles are paved; and the city is lighted by a newly installed lighting system.

The city is maintained in a thoroughly modern, sanitary way. Water, gas, electric light, city heat and street car service are furnished by well-controlled companies. For drainage there is the powerful assistance of natural conditions, for Champaign is located upon the ridge of a prominent water-shed. It has an efficient sewerage system and is furnished with an inexhaustible supply of excellent water. In all these things the city has the great essentials furnished by a healthful environment, and they are supplemented by a general cleanliness due to the strong civic pride of the community.

Citizens of Champaign are proud of their home town and are loyal to her interests; and their greeting to the stranger coming to this community of beautiful homes and comfortable, healthful surroundings convinces one of a real welcome.

This city is widely known as an educational center, and there is a standing invitation to bring the young people here to be fitted for the work which must bring them happiness and the living which is the lot of the contented and competent.

Supplementary to the University training in the various colleges which compose the state institution, Champaign has a most excellent school system, designed to accommodate an increase in the enrollment and adjustable to the requirements which may become necessary. The grade schools are placed advantageously and the location of the new \$225,000 high school, with a five-acre athletic field within a few blocks, places it within reach of every high school student within the district; and the enrollment is increased by tuition students coming from neighboring cities and villages. The equipment of the new building is such that it practically replaces the preparatory college formerly operated by the University of Illinois, a few years ago.

Socially, the citizens of this city are pleasant and inclined to accept the new arrival on his merits. Churches of almost every denomination offer religious training and welcome the stranger cordially. The secret organizations provide for sociability and other features which bind groups of citizens into harmonious societies working, not only for the welfare of the members, but also for the interest of the community as a whole. These factors, creating as they do a strong desire on the part of the new comer to become a permanent resident of Champaign, are important and influential in producing a city where the home owners are in the majority.

Industrially, Champaign furnishes a class of working men and women in the many trades and professions which is far above the average; and this high grade of producers aids greatly in maintaining the standard of citizenship and the quality and volume of products of the various industries. Being centrally located as to raw materials of various demands—especially th/

agricultural products, cheap fuel, an abundant supply of wholesome water, steam and electric transportation facilities, electric current for light and power at low rates, an up-to-date gas plant and other advantages—makes this city a desirable one in which the industries of the cleaner sort might locate to their profit.

One of the most active agents in promoting the interests of the city and county and working for the benefit of the citizens, is the Chamber of Commerce, an organization of 398 active members (the membership being drawn from the ranks of the mercantile, professional, industrial lines, the citizens in general, and the farmers of the county). This association has done much for the city and more than justified its position as the leading power for community good. Its work is daily making this better by improving the conditions under which her citizens must live.

To the industry seeking a location where it may grow, the Chamber of Commerce offers a cordial invitation to investigate Champaign. Make your needs known. Tell what you have and what you want, and your inquiries will be given prompt attention. Communications should be addressed to Chamber of Commerce, Champaign, Illinois.

## PART II

### THE UNIVERSITY

#### HISTORY OF THE UNIVERSITY OF ILLINOIS

1862. THE MORRILL LAND GRANT.—By this act the national government donated to each state in the Union public land scrip, in quantity equal to 30,000 acres for each senator and representative in Congress, "for the endowment, support, and maintenance of at least one college, whose leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanical arts, \* \* \* \* in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life."

On account of this grant the State pays the University, semi-annually, interest at the rate of five per cent on about \$610,000 and deferred payments on land contracts amounting approximately to \$35,000.

LOCATION CHOSEN.—To secure the location of the University several counties entered into competition by proposing to donate to its use specified sums of money or their equivalent. Champaign County offered a large brick building in the suburbs of Urbana, erected for a seminary and nearly completed, about 1,000 acres of land, and \$100,000 in county bonds. To this the Illinois Central Railroad added \$50,000 in freight.

1867. INCORPORATION.—The institution was incorporated February 28, 1867, under the name of the Illinois Industrial University. It was placed under the control of a Board of Trustees, consisting of the Governor, the Superintendent of Public Instruction, and the President of the State Board of Agriculture, *ex officio* members, and twenty-eight citizens appointed by the Governor. The chief executive officer was called the Regent, and was made an *ex officio* member of the Board and the presiding officer of both the Board of Trustees and the Faculty. (See also 1873 and 1887 below.)

1867. DR. GREGORY (FIRST REGENT).—On March 12, 1867, John Milton Gregory, LL.D., was elected Regent of the University. On May 7, 1867, Dr. Gregory accepted the position and entered upon his duties. He served as Regent until September 1, 1880.

1868. THE UNIVERSITY OPENED.—The University opened on March 2, 1868. The number of students enrolled was about fifty; the faculty consisted of the Regent and two professors. During the first term another instructor was added, and the number of students increased to 77—all young men.

During the first term instruction was given in algebra, geometry, physics, history, rhetoric, and Latin. Work on the farm and gardens or about the buildings was at first compulsory for all students. In March of the next year, however, compulsory labor was discontinued, save when it was to serve as a part of instruction.

1868-9. THE FIRST LABORATORIES.—During the autumn of 1868 a chemical laboratory was fitted up; and laboratory work in botany was begun the following year.

1870. PIONEER SHOP INSTRUCTION.—In January, 1870, a mechanical shop was fitted up with tools and machinery, and here was begun the *first shop instruction* given in any American university. In the summer of 1871 the Wood Shops and Testing Laboratory (burned on June 9, 1900) were erected and equipped for students' shop work in both wood and iron.

1870. WOMEN ADMITTED.—On March 9, 1870, the Trustees voted to admit women as students. In the year 1870-71 twenty-four availed themselves of the privilege. Since that time they have constituted from one-sixth to one-fifth of the total number of students.

1873. FIRST REORGANIZATION OF THE BOARD OF TRUSTEES.—At this time the number of members was reduced from thirty-one (see 1867 above) to eleven—the Governor and the President of the State Board of Agriculture, *ex officio*, and nine others, who were still appointed by the Governor. Beginning at this time also, the President of the Board has been chosen by the members from among their own number for a term of one year. (See also 1887 below.)

1877. AUTHORITY TO CONFER DEGREES RECEIVED.—According to the original State law, the usual diplomas and degrees could not be granted by the University; certificates showing the studies pursued and the attainments in each were given instead. The certificates proved unsatisfactory to the holders, and in 1887 the legislature gave the University authority to confer degrees and issue diplomas.

1880-81. DR. PEABODY (SECOND REGENT).—In June 1880, Regent Gregory's resignation was accepted to take effect September 1, 1880, and Selim Hobart Peabody, A.B., Ph.D., Professor of Mechanical Engineering and Physics, was made Regent *pro tempore*. At the next annual meeting, in March, 1881, he was elected Regent.

1885. CHANGE OF NAME.—In this year the General Assembly changed the name of the institution from the *Illinois Industrial University* to the *University of Illinois*.

## TRY THE EASY, VELVETY TOUCH

— of the —

ROYAL TYPEWRITER No. 10,  
at 612 E. Green, Champaign.

1885. THE STATE LABORATORY OF NATURAL HISTORY TRANSFERRED TO THE UNIVERSITY

1887. SECOND REORGANIZATION OF THE BOARD OF TRUSTEES.—In 1887 a law was passed making membership in the Board elective, at a general State election, and restoring the Superintendent of Public Instruction as an *ex officio* member. There are now, therefore, three *ex officio* and nine elective members. (For the previous organization of the Board see 1867 and 1873 above.)

1887. THE AGRICULTURAL EXPERIMENT STATION ESTABLISHED AT THE UNIVERSITY

1890. ADDITIONAL FEDERAL ENDOWMENT.—In 1890 the Congress of the United States made further appropriations for the endowment of the institutions founded under the act of 1862.

Under this enactment each such college or university received the first year \$15,000, the second year \$16,000, and in each succeeding year a sum larger by \$1,000 than the amount of the preceding year, until the amount reached \$25,000; this sum was to be paid yearly thereafter.

1891. DR. BURRILL, ACTING REGENT (THIRD REGENT).—In June, 1891, Regent Peabody's resignation was accepted, to take effect September 1, and in August Thomas Jonathan Burrill, A.M., Ph.D., Professor of Botany and Horticulture, was appointed Acting Regent. Dr. Burrill served in this capacity until September, 1894.

1892. THE GRADUATE SCHOOL.—Beginning, with this year graduate work was undertaken under the name of the Graduate School, but without the organization of a separate faculty.

1894. THE SUMMER SESSION.—The first Summer Session of the University was authorized by a vote of the Trustees on March 13, 1894, and was opened in June of that year.

1894. DR. DRAPER (FOURTH [REGENT] PRESIDENT).—On April 13, 1894, Andrew Sloan Draper, LL.D., was elected Regent. He accepted May 10, 1894. On August 1 his title was changed to President. Dr. Draper entered upon his duties at the beginning of the school year 1894-95. He served until June, 1904.

1896. THE SCHOOL OF PHARMACY.—On May 1, 1896, the Chicago College of Pharmacy, founded in 1859, became the School of Pharmacy of the University of Illinois.

1897. THE COLLEGE OF MEDICINE.—Negotiations looking to the affiliation of the College of Physicians and Surgeons of Chicago with the University, which had been going on for several years, were concluded by the Board of Trustees March 9, 1897. Accordingly, the College of Physicians and Surgeons became, on April 21, 1897, the College of Medicine of the University of Illinois. (The College of Medicine was discontinued on June 30, 1912, but was re-opened on February 12, 1913.)

1897.—THE SCHOOL OF MUSIC.—By vote of the Trustees on June 9, 1897, the department of music, which had been reorganized and enlarged in 1895, was erected into the School of Music, with a separate faculty and organization.

1897. THE STATE WATER SURVEY AUTHORIZED

1897. THE LIBRARY SCHOOL.—In 1897 the School of Library Economy, which had been established in 1893 at the Armour Institute of Technology in Chicago, was transferred to the University, the Director of that School was appointed Librarian of the University Library, and the Library School was opened.

1897. THE COLLEGE OF LAW.—Pursuant to an action of the Board of Trustees, taken December 8, 1896, the School of Law was organized, and was opened September 13, 1897. The course of study covered two years, in conformity with the then existing requirements for admission to the bar of Illinois. In the following November, however, the Supreme Court of the State announced rules relating to examinations for admission to the bar which made three years of study necessary, and the course of study in the Law School was immediately rearranged on that basis. On February 9, 1900, the name of the School of Law was changed, by vote of the Board of Trustees, to *College of Law*.

1899. THE STATE ENTOMOLOGIST'S OFFICE PERMANENTLY ESTABLISHED AT THE UNIVERSITY

1900. COURSES IN BUSINESS ADMINISTRATION.—In 1900 the General Assembly made an appropriation for the establishment of courses of training for business life, and, in accordance with that action, the Trustees approved the organization of the Courses in Business Administration.

1901. THE COLLEGE OF DENTISTRY.—In accordance with an action taken by the Board of Trustees on March 12, 1901, a School of Dentistry was organized as a department of the College of Medicine. The School was opened October 3, 1901. The name was changed to *College of Dentistry* on April 27, 1905. (The College of Dentistry was discontinued on June 30, 1912, but was re-opened on October 1, 1913.)

1903. THE BOARD OF EXAMINERS IN ACCOUNTANCY CREATED

1903. THE ENGINEERING EXPERIMENT STATION ESTABLISHED

1904. DR. JAMES (FIFTH [REGENT] PRESIDENT).—On March 8, 1904, President Draper's resignation was accepted, to take effect July 1. On August 23, 1904, Edmund Janes James,

Ph.D., LL.D., was elected President. He accepted on August 26, 1904, and entered upon his duties in the fall of that year.

1905. THE SCHOOL OF EDUCATION.—By a vote of April 27, 1905, the Board of Trustees established the School of Education, to provide for the professional training of teachers.

1905. THE STATE GEOLOGICAL SURVEY ESTABLISHED

1906-7. THE SCHOOL OF RAILWAY ENGINEERING AND ADMINISTRATION.—On January 30, 1906, the Board of Trustees created in the College of Engineering a department of railway engineering; on January 22, 1907, supplementing that action, it established the School of Railway Engineering and Administration.

1906-7. THE GRADUATE SCHOOL ORGANIZED AS A SEPARATE FACULTY.—The General Assembly appropriated \$50,000 for the Graduate School, and the Executive Faculty of that school was organized.

1909. A MINE RESCUE STATION ESTABLISHED AT THE UNIVERSITY

1911. THE MILL TAX.—The General Assembly passed a law providing that in the year 1912, and annually thereafter, the proceeds of a tax of one mill for each dollar of the assessed valuation of the taxable property of the State should be set apart as a fund for the maintenance of the University.

1912. THE COLLEGES OF MEDICINE AND DENTISTRY DISCONTINUED.—The Colleges of Medicine and Dentistry were discontinued on June 30, 1912.

1913. THE COLLEGES OF MEDICINE AND DENTISTRY REOPENED.—On February 12, 1913, the Board of Trustees accepted the gift of the capital stock of the College of Physicians and Surgeons, donated to the University by the alumni and other friends of medical education in Chicago, and the College of Medicine was reopened.

The College of Dentistry was reopened on October 1, 1913.

1913. THE COLLEGE OF LIBERAL ARTS AND SCIENCES.—In this year the College of Literature and Arts and the College of Science were united to form the College of Liberal Arts and Sciences.

## LOCATION

The University of Illinois is situated in Champaign County, about fifty miles northeast of the geographical center of the State. It is 128 miles south of Chicago, 118 miles west of Indianapolis, 164 miles northeast of St. Louis.

The campus of the University lies just within the corporate limits of the city of Urbana and is bounded on the west by the city of Champaign. These two municipalities, locally known as the "Twin Cities," form in fact one community of about twenty-four thousand inhabitants. The city halls of the two towns are about two miles apart, the campus half way between. The railway, express, telegraph, and telephone services of both cities are, therefore, equally available for the University. Mail for the institution itself should be directed to Urbana to insure prompt delivery. The Urbana post-office maintains a sub-station at the University, located in the Library Building.

## URBANA-CHAMPAIGN

The cities of Urbana and Champaign are in the heart of the "Corn Belt" and form the business and social center of a rich farming community.

Both cities are well paved, well drained, and provided with good water supply. In matters pertaining to health, conditions are excellent. There is a hospital within three blocks of the campus, in which students may be cared for at moderate expense.

The University has no dormitories, but the number of boarding houses is large, and there are forty-two residence halls erected by fraternities, sororities, and local clubs. The material needs of the student body are, therefore, provided for.

The moral and religious conditions of the University community are favorable to the welfare of the students. There are thirty churches, representing eleven denominations, and a number of students' religious associations, leagues, and guilds, including strong Young Men's and Young Women's Christian Associations.

Under a special State law, the liquor traffic has been barred

from all territory within a radius of four miles from the University.

#### RAILWAY CONNECTIONS

The University is connected with neighboring cities in Illinois, including Bloomington, Danville, Decatur, Peoria, and Springfield, and also with St. Louis, by the electric interurban lines of the Illinois Traction System. It will shortly be connected by other interurban lines with Kankakee and Chicago.

It may be reached from Chicago and the north and from points in the south by the Illinois Central Railroad (time from Chicago by express trains, three hours and ten minutes), being on the direct line from Chicago to Cairo and New Orleans. It is joined to the east and the west by the Peoria & Eastern Division of the "Big Four" Route (Cleveland, Cincinnati, Chicago, and St. Louis Railway), as well as by the division of the Wabash Railway which connects Kansas City and St. Louis with Detroit and Buffalo. It is also reached from the west by the

---

## THE MACHINE OF RAPID-FIRE ACTION

### THE ROYAL STANDARD TYPEWRITER No. 10.

---

Havana branch of the Illinois Central Railroad and from Decatur by another branch of the same system.

The time from New York by way of the Wabash and "Big Four" routes is twenty-six hours, by way of Chicago and the Illinois Central, twenty-four hours. Washington and Philadelphia are about equally distant in time. Pittsburg, Buffalo, Kansas City, and Omaha may be reached in fifteen, fourteen, thirteen, and seventeen hours respectively.

The station of the Illinois Central Railroad is in Champaign. The Wabash and "Big Four" have stations in both Champaign and Urbana. These several stations are each a little more than a mile distant from the University campus. There are several hotels in Champaign and Urbana within easy reach of the University, the Beardsley in Champaign and the Columbian in Urbana being the largest.

## EQUIPMENT

## BUILDINGS AND GROUNDS

The land occupied by the University and its several departments embraces 225 acres, besides a farm of 855 acres. There are at the present time some forty-five buildings on the campus.

## LIBERAL ARTS GROUP

UNIVERSITY HALL (erected 1873) is the "old main building" of the University. It occupies three sides of a quadrangle, and is five stories in height. It is devoted to class rooms and offices.

LINCOLN HALL (erected 1911) has a frontage of 230 feet. The exterior is brick, stone, and terra cotta. This building provides for the advanced work of the departments of the classics, English, Romance languages, Germanic languages, history, economics, political science, sociology, and philosophy. The first three floors provide, in addition to the ordinary class and consultation rooms, seminar libraries and conference rooms. On the fourth floor are research rooms and two museums, the Museum of Classical Art and Archaeology, and the Museum of European Culture.

THE COMMERCE BUILDING (erected 1912) is a fire-proof building three stories high, 153 feet on the front and 60 feet deep, with a one-story annex containing a lecture room 48 feet square. The building has a total floor area of about 29,000 square feet and is to house the work in business administration with its various class rooms, offices, and laboratories. The exterior first story finish is buff Bedford stone; the second and third stories are of brick with carved stone trimmings and cornice. The roof is of tile, and the interior trim is of dark oak throughout.

## GENERAL SCIENCE GROUP

NATURAL HISTORY HALL (old part erected 1892; addition 1909) is the largest building on the campus, covering a ground area 135 feet by 275 feet. It is occupied by the departments of botany, entomology, zoology, physiology, geology, and mathematics, together with the offices and equipment of the State Geolog-

ical Survey, and the State Natural History Survey, and the office of the State Entomologist. The offices of the President, the Registrar, and the Dean of Men, and the Business Office, are also housed in this building. A fire-proof museum 51 feet by 63 feet in size, equipped with fireproof and dustproof cases, occupies the center of the building.

THE LABORATORY OF PHYSICS (erected 1909) is a three-story fireproof brick building trimmed with Bedford limestone. The length is 178 feet and the depth of the wings is 125 feet. The large lecture room has a seating capacity of two hundred sixty-two. A one-story annex, 78 by 28 feet, contains the ventilating and heating fans and the machine shop of the department. The total available floor area, exclusive of the basement, is about 60,000 square feet. The large laboratories and the recitation rooms are mostly in the west wing. The east wing is of heavy construction and contains about 30 smaller laboratories for advanced experimental work. The blue print department of the University occupies rooms on the top floor of the building. Gas, distilled water, compressed air and vacuum, and direct and alternating electric currents of a wide range in amperes and in volts are available in all parts of the building.

THE CHEMICAL LABORATORY (erected 1901-2) is a three-story building, the ground plan of which is shaped like the letter E. The extreme dimensions are 230 feet along the front and 116 feet along the wings. The middle rear wing contains the lecture amphitheater, which seats 350. The end wings contain the general laboratories. The central part of the building is occupied by offices, museum, class and seminar rooms, supply rooms, and a number of special rooms for research work. There is a basement, which contains the ventilating plant and rooms for assaying and metallurgy. In this building are located also the general office and laboratories of the State Water Survey.

THE ASTRONOMICAL OBSERVATORY (erected 1896) is a brick building with extreme dimensions of 75 by 55 feet. It has three wings and is surmounted by a dome 25 feet in diameter.

THE CERAMICS LABORATORY (erected 1910) is a two-story brick building in which are provided a general laboratory, plas-

ter room, pottery room, rough grinding room, machine room, drawing room, library, recitation rooms, chemical laboratory, and office. (See also the Mining and Ceramics Laboratory under "Engineering Group" below.)

THE ENTOMOLOGY BUILDING, for the use of the State Entomologist and his staff, is a two-story building 48 by 20 feet, with basement storerooms, and with two insectary wings of greenhouse construction, each 25 by 20 feet. It contains the office of horticultural inspection, a stenographer's room, rooms for the assistant inspectors and insectary assistants, and a large fireproof vault. The glass-covered wings are equipped for experimental entomology and life-history studies.

#### ENGINEERING GROUP

ENGINEERING HALL (erected 1894) is a four-story building, with a frontage of 200 feet, a depth of 76 feet on the wings and 138 feet on the center, and a floor area of 47,000 square feet. The first and second floors are occupied by the offices, the recitation rooms, and the instrument and drafting rooms of the departments of civil engineering and municipal and sanitary engineering. The engineering lecture room, on the second floor, has a seating capacity of two hundred twenty-five. The third floor is occupied by the offices of the Dean of the College of Engineering and Director of the Engineering Experiment Station and by the office, recitation, and drafting rooms of the department of mechanical engineering. A portion of the third floor and all of the fourth floor is occupied by the department of architecture.

---

THE ELECTRIC ENGINEERING LABORATORY (erected 1898) is a two-story brick building with floor area of 18,000 square feet. The basement contains the departmental shop, the storage battery room, the electric furnace room, and rooms for electrical research. The first floor contains the undergraduate laboratory, the instrument room, the high potential laboratory, and the drafting, lecture, and recitation rooms. The second floor contains the photometric laboratory, the offices, the departmental library, and a room used by the Electrical Engineering Society.

THE MECHANICAL ENGINEERING LABORATORY (erected 1905) is a brick building with a frontage of 120 feet, a total depth of 182 feet, and a floor area of 24,000 square feet. The front section is two stories high, and contains offices, lecture and computation rooms, and an instrument room. Back of this are three bays. The middle bay is provided with a concrete testing floor and a 10-ton three-motor traveling crane of 38-foot span. The north bay contains a 5-ton traveling crane and is used for laboratory work in connection with the department of civil engineering and theoretical and applied mechanics.

THE LABORATORY OF APPLIED MECHANICS (erected 1901-2) is a brick building having a floor area of 16,000 square feet. The front part contains the material testing laboratory, and the rear wing contains the hydraulics laboratory.

THE MINING AND CERAMICS LABORATORY (erected 1912) is a one-story building with a floor area of 11,200 square feet. It contains a kiln room for the department of ceramics having an area of 4,300 square feet, a mining engineering laboratory of 3,600 feet area, and a chemical laboratory for the department of mining engineering. There are also offices and class rooms for the department of ceramics and a Mine Rescue Station equipped with Yeager helmets and arranged for training men in the methods of mine rescue work.

THE LOCOMOTIVE TESTING LABORATORY (erected 1912) is a fireproof building with brick walls 117 feet long and 42 feet wide, connected by a spur with the Illinois Traction System tracks. It houses a locomotive testing plant, which consists of

supporting wheels on which rest the drivers of the locomotive to be tested, a dynamometer to which the locomotive drawbar is attached, and which measures the tractive force exerted by the locomotive, water brakes for absorbing the power developed by the locomotive, and other auxiliary apparatus. The exhaust gases pass through a "transite" (or asbestos board) duct to a large fan which forces them through a reinforced concrete cinder separator; the separator removes the cinders and discharges the gases into the air through a brick stack eight feet in height.

THE TRANSPORTATION BUILDING (erected 1912) is a three-story fireproof building of brick trimmed with stone. The general dimensions of the building are 65x189 feet and the total floor area is 34,225 square feet. The first and second floors of the building are occupied by the departments of railway and mining engineering, and the third floor is occupied by the department of general engineering drawing.

THE METAL SHOPS (erected 1902) occupy a one-story brick building with a floor area of 12,000 square feet, containing a lecture room, two office rooms, a machine shop, and a forge shop. The machine shop is 48 by 140 feet. Power is supplied by a 20 horse-power electric motor. A three-ton traveling crane of 12 foot span covers the center of the floor for the entire length.

THE WOOD SHOP (erected 1901-2) and the *Foundry* (added 1904) occupy a brick building which has a floor area of 16,000 square feet. The part of the building devoted to the wood shop contains a bench room, lathe room, machine room, and various smaller rooms for lectures, exhibition purposes, etc. The part devoted to the foundry has a molding floor, 35x80 feet, traversed by a 5-ton traveling crane, and a basement room for the storage of materials.

#### AGRICULTURAL GROUP

THE AGRICULTURAL BUILDING (erected 1900) consists of four separate structures, built around a court and connected by corridors. The main building, three stories in height, contains offices, class rooms, and laboratories for the departments of

agronomy, animal husbandry, dairy husbandry, horticulture, and veterinary science; the chemical laboratory of the Experiment Station; administration rooms; and an assembly room (Morrow Hall) with a seating capacity of 500. The other three buildings are two stories high; one is for dairy manufactures, one for farm crops, and one for veterinary science and stock judging. These buildings are of stone and brick, roofed with slate, and contain 113 rooms and a total floor space of about two acres. An adjacent glass structure serves the departments of agronomy and horticulture. There are, in addition to these buildings, three dwellings, three barns, and a greenhouse.

THE AGRONOMY BUILDING (erected 1904-5) is 50 by 100 feet in size, of brick and slate, trimmed with stone. It contains a field laboratory for crop work in which yields of experimental plats are studied, sample seeds stored, and specimens preserved.

THE FARM MECHANICS BUILDING (erected 1906-7) is a three-story brick structure containing class rooms, offices, lecture rooms, drafting room, library, laboratories, and tool and storage rooms. The third floor, which is reached by an elevator, furnishes storage room for the greater part of \$16,000 worth of farm machinery loaned the College by various manufacturing companies and used for laboratory work. The facilities afforded by this building, with its equipment, make possible the assembling, testing, and adjusting of all the important machines used in farm operations.

THE STOCK PAVILION (erected 1913) is a fireproof building 54 feet high on the front and 148 feet deep with circular ends 92 feet in diameter and 20 feet high. The total ground area is 30,000 square feet, and the show arena is 216 feet long and 65 feet wide. Seats of concrete provide accommodations for 2,000. Arrangements are to be made providing for a division of the arena into three parts giving three separate judging rooms for instructional purposes. The building also contains class rooms and offices. Stabling will be provided in a separate structure. The exterior is of brick and terra cotta, renaissance in design, the frieze being enriched with medallions of animals' heads.

THE ANIMAL HUSBANDRY CATTLE FEEDING PLANT has a capacity for feeding 150 steers at a time. It consists of open and closed sheds with paved lots adjoining, with a storage barn 44 by 72 feet and an experimental silo.

THE BEEF CATTLE BUILDING (erected 1904-5) is a one-story structure of brick and slate, trimmed with stone, 217 feet across the front, with a wing at either end 33 by 49 feet; the central portion rises two stories and is used for the storage of feed. Other portions of the building are used as quarters for the breeding herd, and will accommodate about 100 head of cattle.

THE SHEEP BARN is a wooden structure consisting of a main barn 36 by 90 feet, and a shed, opening to the south, 25 by 100 feet in size. A 6-foot aisle, lined by pens on each side, runs through the center of the barn. This building besides accommodating the University flock is used for experimental work. Its location and construction insures dry footing and ample light and ventilation throughout the year.

---

## BUILT FOR BIG BUSINESS

The ROYAL No. 10 thrives under "heavy" office work..and plenty of it.

---

Other buildings for the accommodation of live stock are the horse barn, the piggery, and two large barns on the South Farm.

THE EXPERIMENTAL DAIRY BARNs (erected 1912) comprise a round barn 70 feet in diameter with a reinforced concrete silo in the center, a semi-detached rectangular structure 40 by 70 feet with a Grout silo adjacent, and a small dairy house and shop 26 by 32 feet. The barns are of frame construction on brick walls with solid floors of the mill type of construction, and contain feed rooms, hay lofts, and other accommodations for the experimental dairy herd. The dairy house is of frame construction, two stories in height, and contains office, shop, coal room, dairy room, and four sleeping rooms for employees.

THE HORTICULTURAL BUILDING (erected 1904-5) is a structure of brick and slate trimmed with stone, approximately 50 by 100 feet in size. It is used as a field laboratory for horticultural

tests, and contains sorting rooms, storage rooms, and a laboratory for the mixing of spraying materials and other operations in connection with the horticultural work.

THE HORTICULTURAL GREENHOUSE GROUP (erected 1912-13) includes (1) a floricultural group and (2) a vegetable and plant breeding group.

(1) THE FLORICULTURE GREENHOUSE GROUP (erected 1912-13) consists of a two-story and basement service building 93 by 37 feet, and the following glass structures: four houses each 105 by 28 feet, three houses each 105 by 35 feet, one corridor house 139 by 10 feet, one storage house 50 by 12 feet, and a palm house 80 by 40 feet. The service building is of hollow tile and cement construction, and contains laboratories, lecture room, herbarium room, offices, and seminar room, as well as potting, storage, and work rooms.

(2) THE VEGETABLE AND PLANT BREEDING GREENHOUSE GROUP (erected 1912-13) consists of a glass house for vegetable growing 105 by 28 feet, two houses for plant breeding each approximately 80 by 30 feet, a wire house 80 by 30 feet, and a two-story and basement service building 82 by 36 feet, containing laboratories, work rooms, class rooms, offices, and storage rooms. The type of construction of this building is the same as that of the floriculture service building.

#### LAW BUILDING

THE LAW BUILDING (erected 1878; remodeled 1902 and 1912) is the second oldest building in the University group. It has two stories and a basement. The upper floor contains the Law Library, the students' conference room, the private offices of the members of the law faculty, and the Moot Court Room, a model court room with a seating capacity of four hundred. On the main floor are the recitation rooms, the Dean's offices, and the faculty room. In the basement are the lockers, the students' reading room, and a court room for the Law Clubs.

#### BUILDINGS FOR GENERAL UNIVERSITY USE

THE LIBRARY BUILDING (erected 1896-7) is modern Romanesque in style, is built of Minnesota standstone, and measures

167 by 113 feet, with a tower 132 feet high. The first floor, or basement, contains the rooms of the catalog and order departments, the bound newspapers, and the University Station Post-office. The second, or main floor, contains the general reference room, the periodical reading rooms, a small conference room, and the delivery room, which opens into the second story of the stack. The third floor contains the study room, lecture rooms, and office of the Library School, faculty study room, and the office of the librarian and assistant librarian. The five-story book stack is a rear wing to the building, separated from it by a fireproof wall. The delivery room is open to the roof and is lighted by a dome of art glass; the lunettes are decorated with frescoes symbolic of the four older colleges of the University—Literature and Arts, Science, Agriculture, and Engineering.

THE AUDITORIUM (erected 1907-8) is a brick and stone building for general meeting purposes. It contains an auditorium seating about 2,200 and a memorial vestibule. All general University exercises, including convocations and the commencement gatherings, are held in this building.

THE MEN'S GYMNASIUM (erected 1901) is a three-story building of stone and pressed brick, 100 by 150 feet. On the first floor there is a swimming pool, 26 feet wide, 75 feet long, and 8 feet deep at the lower end, lined with white enamel bricks. This floor contains, also, the general locker room, which is fitted up with all-metal lockers, and with shower bath, and steam baths; rooms for the University athletic teams; a room for visiting teams; a special dressing room for members of the faculty; and offices for the physical director and instructors in athletics. The entire second floor is one large room, which is fitted up with all the modern appliances for gymnastic exercises. The third floor contains an elevated running track, 15 laps to the mile, which is properly banked on the turns to secure the greatest speed and comfort in running.

THE ARMORY (erected 1889-90) has a clear floor space of 15,000 square feet in one hall. It is equipped with racks for 1,200 stands of arms. An annex provides for two pieces of field artillery.

THE NEW ARMORY (under construction 1913-14) comprises a drill room with a clear area 200x400 feet and a height of 98 feet at the center, the roof being carried by fourteen three-hinged steel arches. The sides are of hollow tile and the ends, supported by columns, are of steel, glass, tile, and concrete with wood frames and sashes. The drill floor is of sufficient area to permit the maneuvering of an entire battalion of the cadet regiment. Provision has been made for the addition of a balcony around the drill floor with seats for 3,000 and for the addition of three-story facades along the sides, flanked by towers at each end. This will provide space for company rooms, lockers rooms, shooting tubes, and class rooms.

THE WOMAN'S BUILDING (erected 1905) is in the New England colonial style of architecture, of reddish brown brick, with white stone trimmings. The central part of the structure is the woman's gymnasium. On the lower floor there are a swimming tank, lockers, dressing rooms, and baths. The upper floor is devoted to the main gymnasium, which is 92 by 50 feet. The north wing of the building is given to the department of household science, and the south wing provides rooms for the social life of the women students. The addition to the Woman's Building (erected 1912) is a three-story fireproof building with basement. It is 200 feet long on the front and 83 feet on each connecting wing, having 43,000 square feet of floor area. It has a large colonade with towers on the front and two smaller colonades on the north and south of the inner court. The addition is similar to the old building in finish and supplements the working space of the departments using it. It has two halls for literary societies and a modern flat on the upper floor, and an institutional kitchen and large dining room on the second floor. There are also offices for the Dean of Women and the Director of the Courses in Household Science, laboratories, social rooms, and space for the expansion of gymnasium work.

#### THE PRESIDENT'S HOUSE

THE PRESIDENT'S HOUSE (erected 1896) is a three-story frame building, in the colonial style. The first story is designed pri-

marily for entertaining; large reception and dining parlors are so arranged as to open together into a central corridor. The second and third stories provide library and living rooms.

#### SERVICE BUILDINGS

THE CENTRAL HEAT AND POWER PLANT (erected 1902; addition 1910) is 55 by 120 feet. It contains boilers aggregating 1,800 horse-power. A supplemental boiler and power plant, designed ultimately to carry the load of the present station, is equipped with boilers of 1,000 horse-power. These two stations furnish steam for heating and power to all buildings on the campus. A power plant containing a 250-kilowatt Allis-Chalmers direct connected steam engine and dynamo, a 125-kilowatt direct connected Westinghouse engine and generator, and a 100-kilowatt Curtiss turbo-generator, together with the accessories necessary to a complete power station, supplies current for light and power to all parts of the grounds. The pipe-lines of the heating system and the circuits for distributing electricity are carried from the central plant to the several buildings through brick and concrete tunnels and clay and concrete conduits. Altogether there are now 6,275 feet of tunnels and 3,800 feet of conduit for the distribution of steam and 7,000 feet of conduit for the distribution of electricity. The new boiler and power plant provides temporary quarters for the electric test car of the department of railway engineering.

THE PUMPING STATION of the University water-works is a brick building, 38 by 73 feet, connected with the central heating station. Four 8-inch wells, 145 feet deep, and one 12-inch well, 148 feet deep, supply the University with water. A masonry reservoir provides for a fire-reserve supply. The pumps, tanks, and connections are arranged to give opportunities for experimental work, and also to vary the working conditions in the adjacent hydraulics laboratory. In this building is kept the equipment of the University fire department, including an electric automatic hose and chemical wagon.

## THE UNIVERSITY OF ILLINOIS TODAY

The University is a part of the public educational system of the state. The governing body of the constitution is a Board of Trustees elected for terms of six years by popular vote.

For the purpose of administration, the University is divided into several colleges and schools. These are not educational separate, but are interdependent and form a single unit.

The colleges and schools are as follows:

- I. The College of Liberal Arts and Sciences
- II. The College of Engineering
- III. The College of Architecture
- IV. The Graduate School
- V. The Library School
- VI. The School of Music
- VII. The School of Education
- VIII. The School of Railway Engineering and Administration
- IX. The College of Law
- X. The College of Medicine
- XI. The College of Dentistry
- XII. The School of Pharmacy
- XIII. The Summer Session

Beginning about the middle of January, two week courses, called "Short Courses" are given in Agriculture, Ceramics, Highway Engineering, and Household Science.

## COUNCIL OF ADMINISTRATION

EDMUND JANES JAMES, Ph.D., LL.D., *President*

DAVID KINLEY, Ph.D., LL.D., *Vice President, Dean of the Graduate School, Director of the Courses in Business Administration, and Professor of Economics*

EUGENE DAVENPORT, M.Agr., LL.D., *Dean of the College of Agriculture and Professor of Thremmatology*

OLIVER ALBERT HARKER, A.M., LL.D., *Dean of the College of Law and Professor of Law*

 GOVERNMENT

The government of the University is vested by law primarily in a Board of Trustees, consisting of twelve members. The Governor of the State, the Superintendent of Public Instruction, and the President of the State Board of Agriculture are members *ex officio*. The other nine members are elected by the people of the State for terms of six years; the terms of three members expire every second year.

The administration of the University is vested by the Board of Trustees in the President of the University, the Senate, the Council of Administration, the Faculties of the several colleges, and the Deans of the colleges and Directors of the schools.

The President is the administrative head of the University.

The Senate is composed of the full professors and those other members of the faculty who are in charge of separate

departments of the various colleges and schools. It is charged with the direction of the general educational policy of the University.

The Council of Administration is composed of the President, the Dean of the Graduate School, the Deans of Men and Women, and the Deans of the several colleges. It constitutes an advisory board to the President, and has exclusive jurisdiction over all matters of discipline. The Council does not determine educational policy; but when any matter arises which has not been provided for by common usage or by rule of the Senate and cannot be conveniently laid over until the next meeting of the Senate, the Council may act upon the same according to its discretion.

The Faculties of the colleges and schools of the University, composed of the members of the corps of instruction of these colleges and schools, have jurisdiction, subject to higher University authority, over all matters which pertain exclusively to these organizations.

The Dean of the Graduate School, the Deans of the several colleges, and the Directors of the schools are responsible for the carrying out of all University regulations within their respective departments.

## LIBRARIES

The University Library includes all the books belonging to the colleges and schools of the University which are situated in Urbana and also the libraries of the College of Medicine and School of Pharmacy in Chicago.

On January 1, 1914, the several libraries contained the following numbers of bound volumes and pamphlets:

	Volumes	Pamphlets
General library, including departmental collections .....	251,000	28,000
State Laboratory of Natural History Library* .....	8,100	30,000
State Geolical Survey library.....	1,500	4,000
College of Medicine library.....	15,150	.....
Pharmacy library .....	2,500	.....

The Library receives about 2,000 serial publications.

\*Resigned, January 21, 1914.

†Elected, January 21, 1914.

## ADMISSION

---

### GENERAL STATEMENT

An applicant for admission to any of the colleges or schools of the University must be at least sixteen years of age. Candidates for admission to the College of Dentistry must be eighteen and for the School of Pharmacy (Chicago) must be seventeen years of age.

Women are admitted to all departments under the same conditions and on the same terms as men.

Students may be admitted at any time, but should enter if possible at the beginning of the fall semester (in 1914, September 23) or at the beginning of the spring semester (in 1915, February 10). Students can seldom enter the College of Engineering to advantage except at the opening of the school year in September.

The entrance requirements for the undergraduate departments, including the colleges of Liberal Arts and Sciences, Engineering, and Agriculture, and the School of Music, amount in each case to 15 units of high school work.

*The College of Law* requires, in addition to 15 units of high school credit, one year of college work in arts, letters, and science in an institution having standards equal to those of the University of Illinois. For 1915-16 and thereafter two years of college work will be required.

*The Library School* requires a bachelor's degree in arts, letters, or science from an institution having standards equal to those of the University of Illinois.

*The College of Medicine (Chicago)* requires, in addition to 15 units of high school credit, two years (60 semester hours) of college work in an institution having standards equal to those of the University of Illinois.

*The College of Dentistry (Chicago)* requires an applicant for admission to present a certificate of graduation from an accredited high school or the equivalent; which equivalent is inter-

preted to mean 15 units of preparatory work in an accredited high school or academy or a state normal school.

*The School of Pharmacy (Chicago)* requires for admission to its shorter course, leading to the degree of Graduate in Pharmacy, two years of high school work or the full educational equivalent; and for admission to its longer course, leading to the degree of Pharmaceutical Chemist, graduation from an accredited high school or the equivalent.

#### METHODS OF ADMISSION

The credits required for admission to the undergraduate departments may be secured:

- (a) By examination.
- (b) By certificate from an accredited high school or other secondary school.
- (c) By transfer from another university or college of recognized standing.

#### CONDITIONED FRESHMEN

A student who lacks not more than 2 of the 15 units required for matriculation may be entered as a conditioned freshman, provided the deficiencies are not in work which should precede the prescribed courses of the first semester, and provided that all his entrance conditions are such as can be made up during his first year.

A conditioned student is not matriculated and must pay a tuition fee of \$7.50 a semester in addition to the regular incidental fee of \$12.00 a semester.

#### ADMISSION AS SPECIAL STUDENTS

Persons over twenty-one years of age may be admitted as special students, provided they secure (1) the recommendation of the professor whose work they wish to take, and (2) the approval of the dean of the college concerned. They must give evidence that they possess the requisite information and ability to pursue profitably, as special students, their chosen subjects, and must meet the special requirements of the particular colleges in which they wish to enroll, as stated below.

A special student is not matriculated and must pay a tuition

fee of \$7.50 a semester in addition to the regular incidental fee of \$12.00 a semester.

### AVERAGE ANNUAL EXPENSES

The following are estimated average annual expenses for undergraduate students attending at Urbana, *exclusive* of books, clothing, railroad fare, laboratory fees, if any, and small miscellaneous needs:

*Semester fees .....	\$ 24.00	to	\$ 24.00
Room rent for each student (two in room).....	72.00	"	80.00
Table board in boarding houses and clubs.....	144.00	"	180.00
Washing .....	20.00	"	30.00
Total .....	\$260.00	to	\$314.00
Board and room in private house, a week.....	5.50	"	6.50

In addition to the foregoing, freshmen pay a matriculation fee of \$10.00, and the men are required to buy a cadet uniform, which costs \$16.20. Freshmen engineering students will need to buy a set of drawing instruments at a cost of about \$18.00.

Other necessary expenses will need to be taken into consideration. For all the necessary expenses of the year the average student is likely to need not less than \$375.00 to \$450.00. Most students spend more than this amount.

### BOARD AND ROOMS

The University does not provide dormitories nor furnish board, but the numerous rooming and boarding houses near the campus are to a certain extent under the supervision of the University. The Young Men's and Young Women's Christian Associations of the University will aid new students in securing rooms and board.

### GENERAL FEES

*All University fees are payable each semester in advance.*

COLLEGES OF LIBERAL ARTS AND SCIENCES, ENGINEERING, AND AGRICULTURE, AND LIBRARY SCHOOL

*Matriculation Fee.* Each student not holding a scholarship, upon satisfying the requirements for admission to the University, pays the matriculation fee of.....\$10.00

<i>Incidental Fee.</i> All students, excepting those holding scholarships, pay, each semester, an incidental fee of.....	12.00
<i>Tuition Fee.</i> Students conditioned on entrance requirements, and special students, except special students holding scholarships, pay, each semester, a tuition fee of .....	7.50
<i>Laboratory Fees.</i> Each student working in laboratories, or in the drafting or engineering classes, is required to pay a fee varying from \$1.00 to \$10.00, to cover materials and apparatus used and brakages or damages.	
<i>Listener's Fee.</i> Persons not connected with the University who attend classes as listeners, or for credit, pay for each course, each semester.....	7.50
<i>Late Registration Fee.</i> A former student who enters after the Registration Days in either semester must pay a late registration fee of.....	1.00
<i>Change Fee.</i> For every change of study-list made later than the tenth day of instruction in either semester, there is charged a fee of.....	1.00
<i>Special Examination Fee.</i> For any special examination, the fee is.....	5.00
<i>Diploma Fee</i> .....	5.00

PART III  
ATHLETICS  
THE ATHLETIC ASSOCIATION

All students, faculty and alumni are eligible to membership in the Athletic Association. The membership dues are seven dollars (\$7). Members are admitted to all athletic events free of charge excepting only the Interscholastic Circus. Memberships may be procured at places of registration and receipts will be given which may be exchanged later for a coupon ticket book and a pin.

The officers of the association are president, secretary, and the managers of football, baseball, track, interscholastic, and inter-class athletics. The athletic Board of Control is composed of three members of the faculty, three alumni, and the officers of the Association.

All officers of the Association and the various managers of teams are chosen by competition. This competition is open to any student who has full sophomore standing. All candidates must write an examination which covers all phases of athletic activity, after which those whose examination papers, scholastic standing, and general character and ability are most acceptable to the Board of Control are selected for competition. This competition lasts throughout the sophomore year. At the end of the sophomore year the managers of the various sports report the record of each candidate to the Board of Control. From the records submitted the Board of Control appoints two Junior assistants in each sport. In the same manner two assistants to the president are chosen. These assistants continue in competition throughout their junior year, at the end of which time the Board of Control appoints the best man to the position of manager of his respective sport or president of the Association as the case may be. Record of work in the department, character, general ability, and scholastic standing are the considerations in making the choice. The unsuccessful assistant may become manager of freshman varsity in his sport if he so desires.

The Board of Control reserves the right to select any of the

twelve assistants for any of the six positions if they deem his work better than that of the candidates who are registered for that position.

In class athletics a team represents each class in football, track, swimming, tennis, and bowling. In basketball and baseball a team represents each class in each college. Championships are determined on the percentage basis. The winning team in each of the major sports is entitled to class numerals in orange and blue, while the other teams receive numerals in class colors. The schedules and referees for these games are furnished by the Association, and it is the hope of the athletic management that an increasing number of men will come out and try for the various teams.

#### OFFICERS OF THE ASSOCIATION

1913-1914

President .....	E. B. Hopkins, '14

## VARSITY "I"

The Varsity "I" is awarded to men in the several sports as follows:

FOOTBALL—Playing in three Conference games, at least one full half in two of the games, or playing in two games a year for three years.

---

**WHAT'SWHAT**

**THAT'S WHAT**

**DYKE'S CAFETERIA**

606-608 South Sixth St.

*Where the knowing ones eat---Self Service---moderate Price and CLEAN*

---

BASEBALL—Playing in seven Conference games. Pitchers, five innings in two games and part of another.

TRACK—Ten points against two different Conference teams, one point in the Conference meet, or a first or second in the indoor Conference meet.

BASKETBALL—Twelve full halves against Conference teams.

SWIMMING—Ten points against two Conference teams, or a first or a second in the indoor Conference meet.

WATER POLO—Three full halves and part of a fourth game, or a full game on a team winning the championship at the indoor Conference meet.

“I” caps may be awarded to men not meeting the full requirements for a sweater.

### CONFERENCE RULES

#### ELIGIBILITY (Nov. 10, 1913)

1. Students to participate in any Conference sport must be regularly enrolled, matriculated and doing full work as defined by the department he is in.

2. Students must reside one year at a school after changing schools and fulfill the above requirements before being allowed to participate. This also applies to new students.

3. Graduation, playing under an assumed name, playing more than three years in one or more colleges, delinquency in studies, each and all bar a man from intercollegiate athletics.

The number of games allowed during season with any and all colleges: Football, 7; Baseball and Basketball, 12.

#### EASTERN MEETS.

Entrances into such by Conference teams are allowed under rules of eligibility of such meets.

It is “competent” for any athletic Chairman of any institution if he believes that any institution is violating the letter or spirit of the Conference rules to take the matter up with said institution and start an investigation.

On April 15 and October 15 of each year it shall be the duty of each Chairman of all Athletic Boards of Control to mail to all the other Chairmen of such boards a complete list of candidates for all athletic teams, stating in such report the full name,

residence, class and course of study, number of years of participation in intercollegiate athletics, and in case of migrant athletes the school from which they came, of all such candidates.

The Intercollegiate Conference of Faculty Representatives grew out of a meeting of the presidents of seven universities of the Middle West, held in Chicago on January 11, 1895, for the purpose of considering the regulation of intercollegiate athletics. The first meeting of the present Conference was held on February 8, 1896. At the time of its organization, it was composed of seven members, as follows:

- The University of Chicago.
- The University of Illinois.
- The University of Michigan.
- The University of Minnesota.
- Northwestern University.
- Purdue University.
- The University of Wisconsin.

On December 1, 1899, Indiana University and the State University of Iowa were admitted to membership. Ohio State

## MIGHTY STRONG AT ILLINOIS

The Master Models Nos. 5 and 10 of the Royal Typewriter.

— See Them at —  
612 E. GREEN, CHAMPAIGN.

University was admitted April 6, 1912, and the University of Michigan withdrew from the Conference on the 14th of January, 1908.

It is agreed that the following shall be tolerated as legitimate expenses for the athletic association to bear:

- (a) Traveling expenses.
- (b) Expenses for uniforms, shoes, and other articles of clothing.
- (c) Medical expenses connected with training or disabilities incurred in practice or in contests.
- (d) Expenses incurred in providing players with inexpensive souvenirs, such as watch charms, sweaters, photographs, etc.,

provided there shall be no element of compensation for services rendered in the giving of any such souvenirs.

#### RULE 13. SUMMER GAMES

A student shall be ineligible to represent his college in athletic contests who engages in such contests as a representative of any athletic organization not connected with his college, whether in term time or vacation.

Occasional games during vacation on teams not professional or semi-professional, and having no permanent organization, are not prohibited.

In the administration of the Rule it is expressly understood that a semi-professional team is one any member of which receives remuneration for his services; and proof of this fact shall not devolve on the person making the investigation, but he may accept common report as a basis for action.

In the opinion of the Conference, student membership in athletic clubs is demoralizing to amateur college sport and should be discouraged, and students are hereby prohibited from competing in term time or vacation for any athletic club.

#### GAMES WITH NON-CONFERENCE INSTITUTIONS

No Conference university shall compete with any non-Conference institution in the Middle West of similar rank athletically—that is, one which competes with any member of the Conference upon the basis of athletic equality—unless both compete under Conference rules of eligibility. (Minutes, April 13, 1907.)

Note.—In the administration of the above regulation it was decided that the following institutions are to be regarded as competing on terms of athletic equality with the Conference Colleges:

The members of the Missouri Valley Conference—Ames, Drake, University of Kansas, University of Missouri, University of Nebraska and Washington University; also Marquette, Michigan Agricultural College, Notre Dame, and St. Louis University.

The following colleges are required to observe Rule 3 (one year residence rule) as a condition to competition with Confer-

ence colleges: Armour Institute, Beloit, De Paul, DePauw, Knox, Lake Forest, and Wabash. (Minutes, June 5, 1909.)

### CONFERENCE TRACK AND FIELD MEET

An annual track and field meet is held under the auspices of the Conference at the close of the college year. The meet is managed by the Intercollegiate Conference Athletic Association (incorporated), and the Board of Directors of this latter body is composed of one alumnus from each of the Conference colleges. This Board is now constituted as follows:

William S. Bond, University of Chicago.

S. T. Henry (Sec'y-Treasurer), University of Illinois.

Warren D. Howe, University of Indiana.

Edward R. Johnson (President), University of Iowa.

George R. Horton, University of Minnesota.

Harry I. Allen, Northwestern University.

Vernon C. Ward, Jr., Ohio State University.

Macy S. Good, Purdue University.

Joseph L. McNab, University of Wisconsin.

#### (a) TEAMS FROM NON-CONFERENCE COLLEGES

The track team of any non-Conference college will be allowed to compete in the annual meet upon a certificate by the proper authority that each competitor is eligible under the rules of eligibility of the Conference applicable to individuals. (Minutes, June 1, 1907.)

The Board of Directors is authorized to initiate investigations of candidates' eligibility, and all non-Conference colleges desiring to enter Conference meets shall be required to give the athletic history of all candidates in accordance with a form to

---

Lawder  
Champaign

---

be submitted by the Board of Directors. (Minutes, December 3, 1910.)

#### (b) ELIGIBILITY RULES

It is the duty of the Secretary of the Conference to send to the Secretary of the alumni committee, and also to the members of the Conference, before April 1st of each year, the rules of eligibility which shall govern the track meet of that year. (Minutes, June 1, 1907.)

#### (c) CERTIFICATION

The preliminary certificate of eligibility for the Conference meet does not include the question of scholarship except as regards entrance conditions; but the final certificate which accompanies the entry list for the meet shall certify that the candidates are eligible in all respects. (Minutes, June 1, 1906.)

#### CROSS-COUNTRY RUN

On November 30, 1907, the following resolution was passed:

"Resolved, That the Conference take under its control the sport of cross-country running; that the annual Conference cross-country meet be held in Chicago each year on the Saturday before Thanksgiving; and that the Board of Directors of the Intercollegiate Conference Athletic Association be requested to manage and conduct the meet."

The above resolution has not been strictly followed in every instance. The Conference is now accustomed to decide each year upon the time and place of the meet.

#### INDOOR TRACK MEET

An annual indoor track and field meet is held, usually on the last Saturday evening in March, at a place designated by the Conference. This meet is also conducted by the Board of Directors of the Intercollegiate Conference Athletic Association.

#### TENNIS TOURNAMENT

An annual Tennis Tournament is held on the last Thursday, Friday, and Saturday of May, but the Board of Directors, under whose supervision the tournament is held, has power to change this date when conditions seem to make it necessary.

## ILLINOIS INTERSCHOLASTIC MEET

As a means of developing an interest in state high school and academic track work the annual interscholastic meet, under the direction of the Illinois Athletic Association, is held on Illinois Field about the middle of May. It is the purpose of the meet also to advertise the University throughout the state. Four medals—gold, gold and silver, silver, and bronze—are given to the leaders in each event. Two cups are given for the two relay races, and a cup to the individual point-winning star is presented by Ma-Wanda, the honorary senior society.

Following is a list of the winning schools: 1893, Peoria; 1894, Urbana; 1895, Englewood; 1896, Rockford; 1897, Englewood; 1898, East Aurora; 1899, Biggsville; 1900, Biggsville; 1901, Englewood; 1902, South Division; 1903, Hyde Park; 1904, Pontiac; 1905, Englewood; 1906, Wendell Phillips and West Aurora, tied for first; 1907, Oak Park; 1908, Oak Park; 1909, University High; 1910, University High; 1911, University High; 1912, Lane Tech.; 1913, Oak Park.

## ILLINOIS CONFERENCE GAMES FOR 1914

- October 10—Indiana at Urbana.  
 October 17—Ohio State at Urbana.  
 October 24—Northwestern at Evanston.  
 October 31—Minnesota at Minneapolis.  
 November 7—Open date.  
 November 14—Chicago at Urbana.  
 November 21—Wisconsin at Madison.

## PART IV

STUDENT ACTIVITIES  
GENERAL ORGANIZATIONS

UNIVERSITY OF ILLINOIS UNION.—The University of Illinois Union is an association of the men of the University, having for its general object the promotion of college spirit and good fellowship. The Union has purchased a house which is open to all university men. All male students are eligible to active membership in the Union; alumni and members of the faculty may become associate members. The Union elects annually a Student Council, consisting of eight seniors and seven juniors, which takes charge of certain student activities.

THE WOMAN'S LEAGUE.—The Woman's League was organized to further the spirit of unity among the women of the University and to be a medium for the maintenance of high social standards. The administrative power is vested in an Advisory Board and an Executive Committee composed of representatives from the various women's organizations. Every woman in the University is, by virtue of her registration, a member of the League. The League manages a loan fund, supports a room in the Burnham Hospital, and provides the magazines for the Woman's Building.

HOSPITAL ORGANIZATION.—The Hospital Association is an organization of students to provide a fund for hospital care in case of sickness. The members of the Association pay a fee of one dollar each semester, and the fund thus raised is used to pay the hospital expenses of members who may need such care. The fund is under the control of a committee of the Council of Administration. During the past ten years the Association has rendered valuable aid to a considerable number of members. Students are advised to join the Association.

LITERARY SOCIETIES.—The ADELPHIC, IONIAN, and PHILOMATHEAN societies for men, and the ALETHENAI, ATHENIANN, ILLIOLA, and GREGORIAN societies for women, meet weekly, on

Fridays, and the JAMESONIAN on Tuesdays, throughout term time.

THE CHRISTIAN ASSOCIATIONS.—The present membership of the Young Men's Christian Association is 1066—believed to be the largest paid membership of any Student Y. M. C. A. in the world. The Association building furnishes free, for the use of all students, lounging room and library, parlors, organization rooms for committee meetings, correspondence tables, check room, etc. The building also contains game rooms, bowling alleys, and dormitories to accommodate ninety men. A cafeteria, whose manager is on the pay roll of the Association, serves 450 to 500 persons daily. Religious meetings for men are held occasionally on Sunday afternoon. Thursday evening meetings are addressed by prominent faculty members on ethical topics. Student-led classes in Bible Study are promoted, the teachers receiving training in normal groups. In 1912-13 there were 750 men enrolled in voluntary Bible Study and 280 enrolled in Mission Study. An employment bureau managed by a special

---

secretary, who maintains office hours every afternoon in the Association building, endeavors to help needy students to find work.

The Y. W. C. A. is spending its first year in its new home, the Hannah McKinley building, recently dedicated. Dormitory space is provided for fifty young women. There are parlors on the first floor for use of the women rooming in the house, a large assembly room, and free use of pianos, organization rooms, and correspondence tables. A bowling alley and modern dining room are in the basement. There are 500 members of the Y. W. C. A. at present, which is twice the number previously enrolled. In 1912-13 there were 360 young women enrolled in

voluntary Bible Study and 112 in Mission Study. An employment bureau is maintained at the Y. W. C. A. to assist needy young women in finding employment.

At the opening of the college year the Association endeavored to help new students to find desirable rooming and boarding places. A copy of the Students' Handbook, giving information about Urbana and Champaign, the University, and the various college organizations and activities will be sent free to prospective students. For this handbook or for further information address the general secretary of either Association.

THE COSMOPOLITAN CLUB.—The Cosmopolitan Club is an organization devoted to the promotion of social and intellectual intercourse among persons of different nationalities at the University. Public meetings are held in University buildings, to afford the University community information about the customs peculiar to the various countries of the world. The clubhouse on Daniel street affords a home to many foreign students and to a limited number of native students.

MA-WAN-DA.—*Ma-Wan-Da* is a senior society formed in 1912 by the consolidation of the two former senior societies, Shield and Trident and Phenix.

HONORARY SOCIETIES.—The honorary societies or fraternities named below are private intercollegiate organizations of students and graduates, having for their primary purpose the recognition and encouragement of excellence in scholarship in various departments of study. Election is in all cases made by the societies themselves in accordance with their own rules. The University assumes no responsibility for their elections.

PHI BETA KAPPA.—Each year a certain number of the ranking students of the senior class are elected to membership in the Phi Beta Kappa Society. The number is ordinarily limited to one-fifth of the total membership of the graduating class.

SIGMA XI.—Members of the senior class who give "promise of marked ability" in scientific investigation are eligible to membership in the Sigma Xi Society, which was founded to encourage research in pure and applied science.

## CLUBS AUXILIARY TO COURSES OF STUDY

In addition to the associations and societies of a general character described above, there are in each college a number of societies and clubs devoted to outside work of a literary, scientific, or technical nature auxiliary to the work of various departments of that college. Among these are the following:

In the COLLEGE OF LIBERAL ARTS AND SCIENCES: The Botanical Club, the Ceramic Club, *le Cercle Français*, *el Circulo Español*, the Chemical Club, the University of Illinois Section of the American Chemical Society, the Classical Club, the Commercial Club, *der Deutsche Verein*, the English Journal Club, the Geological Journal Club, the History Club, the Mathematical Club, the Oratorical Association, the Pen and Brush Club, the Philological Club, the Political Science Club, the Romance Journal Club, the Scandinavian Club, the Zoological Club.

In the COLLEGE OF ENGINEERING: The Architect's Club, the Civil Engineers' Club, the Electrical Engineering Society, the Urbana Section of the American Institute of Electrical Engineers, the Mechanical Engineering Society, the Urbana Student Branch of the American Society of Mechanical Engineers, the Mining Engineering Society, the Urbana Student Branch of the American Institute of Mining Engineers, the Physics Club, the Railway Club.

In the COLLEGE OF AGRICULTURE: The Agricultural Club, the Horticultural Club, the Household Science Club, the Landscape Gardeners' Club.

IN THE COLLEGE OF LAW: The Fuller, John Marshall, Witensgemot, and Van Twiller Law Clubs.

IN THE SCHOOL OF MUSIC: The University Choral and Orchestral Society, the University Glee and Mandolin Club, the University Military Band.

In the LIBRARY SCHOOL: The Library Club.

## OTHER ORGANIZATIONS

OTHER STUDENTS' SOCIETIES include the following: Students' Club; Dixie Club; Easterners' Club; Egyptian Club; H. H. Club; Ivrim; Kansas Club; Komenian Society; Lincoln

League; Mask and Bauble (Dramatic); Motorcycle Club; Scribblers' Club; Sewanee Circle; Shomeez (Interfraternity Missouri Club); Treveri.

OTHER HONORARY SOCIETIES—Alpha Rho Chi (Architecture) 1914; Alpha Chi Sigma (Chemical) 1908; Alpha Gamma Rho (Agricultural) 1908; Alpha Zeta (Agricultural) 1902; Beta Gamma Sigma (Commercial) 1910; Comed (Commercial) 1912; Delta Sigma Rho (Oratorical) 1906; Eta Kappa Nu (Electrical Engineering) 1904; Gamma Alpha (Scientific) 1908; Kappa Delta Pi (Educational) 1910; Order of the Coif (Law) 1912; Phi Beta Kappa (Literary) 1907; Phi Alpha Delta (Law) 1904; Phi Delta Phi (Law) 1901; Phi Lambda Upsilon (Chemical) 1889; Scarbbard and Blade (Military) 1909; Scarab (Architectural) 1909; Sigma Delta Chi (Journalistic) 1912; Sigma Xi (Scientific) 1904; Tau Beta Pi (Engineering) 1897; Triangle (Civil Engineering) 1907.

Fraternities established in connection with the departments of the University in Chicago: Alpha Kappa Kappa (Medical) 1899; Alpha Omega Alpha (Medical) 1902; Chi Zeta Chi (Medical) 1907; Delta Sigma Delta (Dental) 1901; Kappa Psi (Medical) 1910; Phi Delta (Medical) 1904; Psi Omega (Dental) 1903; Nu Sigma Nu (Medical) 1892; Xi Psi Phi (Dental) 1902.

## PAN-HELLENIC COUNCIL

For several years the necessity of some kind of organization to regulate interfraternity affairs has been felt by those directly connected with the fraternities at Illinois. After much discussion several senior fraternity men got together and laid plans for a permanent council or governing body known as the Pan-Hellenic Council. This Council, which is made up of a representative from each of the recognized national fraternities, has the supervision over interfraternity athletics, recognition of new fraternities, and rules in regard to rushing and pledging, and also controls other affairs relating to national fraternities at the University of Illinois.

The following rule has been adopted in regard to the initiation of freshmen:

No freshman may become a member of any fraternity until the end of the first semester, and then not until he has procured from the Dean of Men a statement certifying that he has successfully completed at least eleven (11) hours of the work in which he was registered.

A student entering the University the second semester, or a student failing in the first semester requirements, may be initiated on or after the first of May, provided he procures from the Dean of Men a statement certifying that he is reported satisfactory in eleven (11) hours of the work in which he is registered.

No student entering from another college may be initiated into any fraternity until he has procured from the Dean of Men a statement certifying that he has credit in not less than twenty-five (25) hours of University work.

## PUBLICATIONS

*The Daily Illini.* The official student newspaper is published every morning except Monday. It contains news articles on events of passing interest on the campus, and its editorial columns are used to bring about various reforms of a more or less serious nature. It was established in 1871.

*The Illio.* The annual student year book is devoted to undergraduate affairs, with the bulk of the material dealing with the departing senior classes. It is published in the spring by the Junior Class.

*The Illinois Magazine.* This publication is issued monthly by the Undergraduates of the University, and aims to print the best literary productions of the campus.

*The Agriculturist.* This periodical is published by the students in agriculture in the interest of agricultural subjects.

*The Technograph.* *The Technograph* is published in the interest of technical subjects.

*The Alumni Quarterly.* A periodical which fosters a spirit of loyalty and fraternity among the graduates and former students of the University.

*The Siren.* The student humor magazine is published monthly. It contains cartoons, jokes, and comic feature articles.

*The Students' Directory.* The Directory contains the names, addresses, and telephone numbers of students, faculty members and University officers. It is issued in the fall.

*The University Calendar.* The University Calendar is published weekly, giving a list of the events for the week.

The statement that graduates of engineering schools do not follow the engineering profession is shown to be erroneous in the case at least of the College of Engineering of the University of Illinois. Data recently collected by the College show that of the 2,165 graduates, 1,933 or 89 per cent are engaged in one way or another in engineering work, and that only 173 or about 8 per cent have gone into other fields. The occupations of the graduates of the College of Engineering are tabulated as follows:

A.—Non-engineering	No.	Percentage
1. Farmers and Ranchmen.....	52	2.39
2. Merchants .....	31	1.42
3. Executive officers of mercantile com- panies .....	19	.88
4. Editors .....	19	.88
5. Real Estate and Insurance.....	15	.68
6. Salesmen .....	10	.46
7. Army officers .....	8	.36
8. Bankers .....	6	.28
9. Physicians .....	5	.24
10. Lawyers .....	5	.24
11. Miscellaneous .....	3	.13
	<hr/>	
Total .....	173	7.96
B.—Engineering		
1. Employees of Engineering Compa- nies .....	1370	63.2
2. Architects .....	318	14.6
3. Executive Officers of Engineering Companies .....	130	6.
4. Teachers .....	95	4.6
5. Consulting Engineers .....	20	.92
	<hr/>	
Total .....	1933	89.32
Deceased .....	59	2.72
	<hr/>	
Grand total .....	2165	100.00

The above statement is a part of the Alumni Register, soon to be issued by the College of Engineering of the University of Illinois. The book will contain the present address and occupations of all graduates of the College.
