# Q. How do I 'BRIDGE knowledge gaps'?

Localized South African colloquial knowledge

Make connections between people

By promoting economic prosperity around the world through good policies.

I bridge knowledge gaps by learning.

get connections to other Wikimedians with the same interests

Edit with the Black Lunch Table project on Wiki!

Empathy. By listening to other people, understanding their context. Understanding that our current rules may not be valid and need to change

Changing rules about notability to accommodate other nonwestern contexts

Listen. Learn. Share my experience. Consciously bring diverse views and voices to every discussion

With time, effort, and more importantly, love

by liberating sources and teaching / partnering with others in that

Being understanding about notability of women when they have been invisibilized forever.
