SUBJECT: Request for Analysis of Radioactive Ore

TO : Director of Intelligence, General Staff, United States Army,  
Washington 25, D. C.  
ATTENTION: Scientific Branch

1. We are forwarding to you by registered mail this date a sample of radioactive ore received from G-2, XXIV Corp.
2. Preliminary analysis here indicates that sample contains Furgusonite.
3. It is requested that sample be analyzed and results furnished this office.

For the Assistant Chief of Staff, G-2:

E. H. P. SVENSSON  
Colonel, GSC  
Director, DAI Div

MEMO FOR RECORD

1. Ltr Hq XXIV Corps, subject: "Shipment of Ore Reported to Contain Uranium", 29 Oct 48, forwarded ore sample to G-2, FEC. Ltr requested analysis of ore sample and stated that PAK Je Bong, who previously (15 Oct 48) had brought in an ore sample, had delivered it to G-2, XXIV Corps.
2. Ore received by G-2, FEC, 4 Nov 48; preliminary analysis by TID indicates presence of Furgusonite and Ilminite.
3. Our 1st Ind reply to G-2, XXIV Corps, 29 Oct ltr, notified him that sample was being forwarded to ZI for analysis and that preliminary analysis indicated presence of radioactive Furgusonite; that upon receipt of analysis from DA, information would be furnished to G-2 XXIV Corps.
4. This letter to CSGID requests analysis of ore being transmitted this date by registered mail.

SUBJECT: Request for Analysis of Radioactive Ore

TO : Director of Intelligence, General Staff, United States  
Army, Washington 25, D. C.  
ATTENTION: Scientific Branch

1. We are forwarding to you by Registered Mail this date a sample of radioactive ore received from G-2, USAFIK.
2. Preliminary analysis here indicates that the sample is an artificial mixture containing small amounts of columbotantalite, samaskite, fergusonite and monazite.
3. It is requested that sample be analyzed and results furnished this office.

For the Assistant Chief of Staff, G-2:

E. H. F. SVENSSON  
Colonel, GSC  
Director, DAI Div

MEMO FOR RECORD

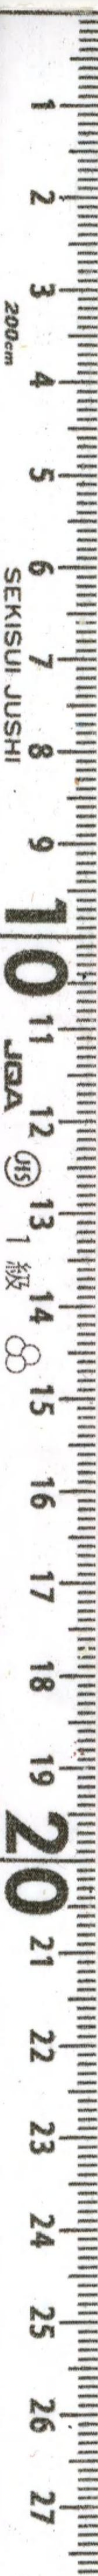

1. Ltr USAFIK, subject: "Shipment of Ore Reported to Contain Uranium", 15 Oct 48, forwarded ore sample to G-2, FEC. Ltr requested analysis of ore sample in order to pass to a Korean National, one Je Bong PAK, who had brought ore to G-2, USAFIK.
2. Ore received by G-2, FEC 22 Oct 48; preliminary analysis made by TID.
3. USAFIK Rad ZGBI 1715, 20 Oct 48, asked when report of analysis could be expected.
4. Our Rad C-64801, 25 Oct 48, in reply advised G-2, USAFIK that ore sample is radioactive; that complete analysis will take some time; that information recently received from DA indicates radioactive deposits in Korea of little value.
5. This letter to MID requests analysis of ore being transmitted this date by Registered Mail.

SUBJECT: Transmittal of NRS Report on Korean Radioactive Minerals

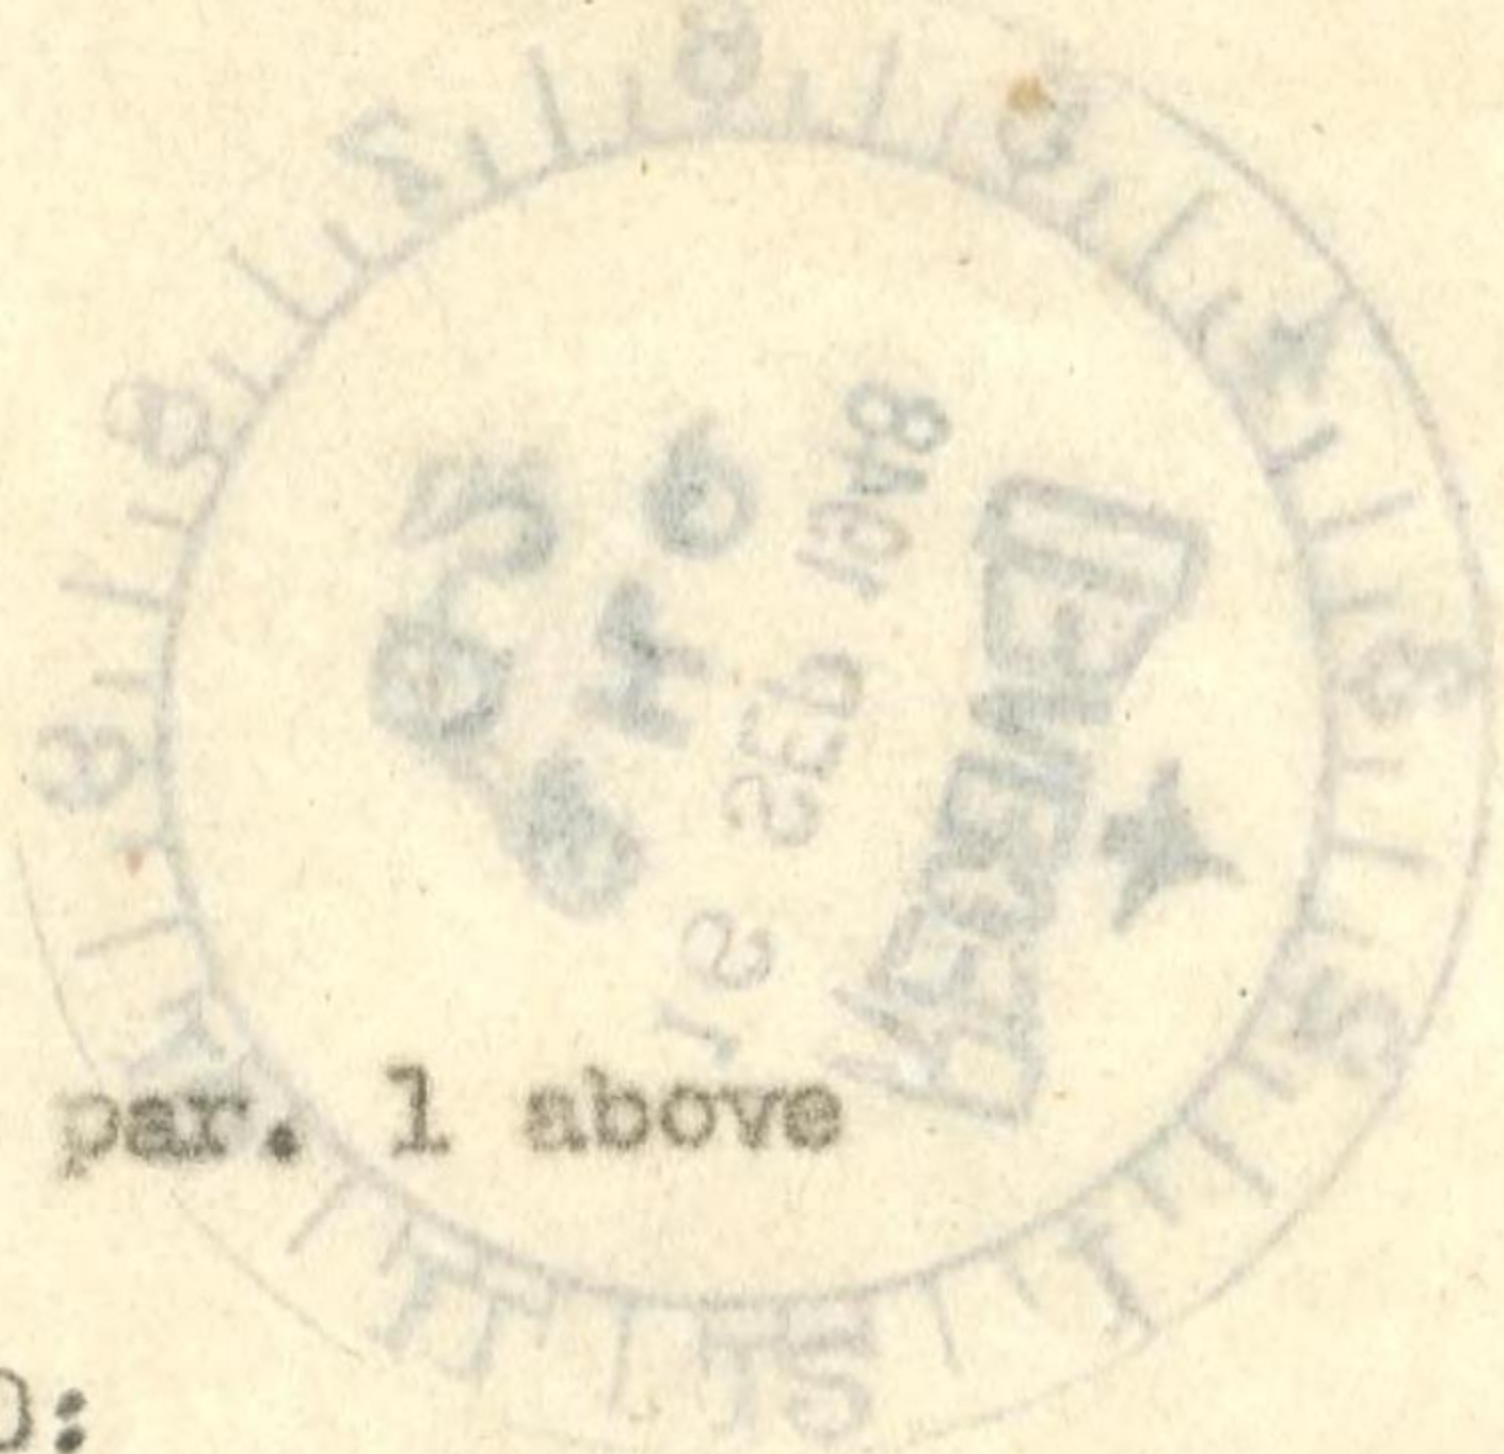

TO: Assistant Chief of Staff, G-2  
XXIV Corps  
APO 235

1. Forwarded herewith for your information is one copy of Natural Resources Section Memorandum for Record, subject: "Korean Radioactive Minerals," dated 7 September 1948.

2. This report was prepared by Mr. J. F. Harrington, Scientific Consultant, following the recent return from Korea of technical investigators who conducted, at the request of your headquarters, a survey of uranium deposits in South Korea. This report is preliminary in nature; a more detailed report on this subject will be forwarded to your office at a later date.

For the Assistant Chief of Staff, G-2:

E. H. F. SVENSSON  
Colonel, GSC  
Director, DAI Div

1 Incl:  
As stated in par. 1 above

MEMO FOR RECORD:

1. Mr. J. F. Harrington, Scientific Consultant, NRS, was member of G-2 FEC technical investigating team (Donnelly, Steinoff and Harrington) which was in Korea for period 22 June 48 to 5 Aug 48 at request of G-2, XXIV Corps.

2. Mr Harrington has prepared a preliminary report on his recent investigation re radioactive minerals in Korea. A copy of this report, together with samples of the ore obtained, has been handcarried to MID by Lt Col W. J. Allen, Jr., of ESS/ST. Three (3) copies forwarded to MID via regular channels; one (1) copy (info) to TID. This intelligence channel letter forwards info copy to G-2, USAFIK, agency which requested survey.

12 August 1948

SUBJECT: Sample Ore from Matsuturu Mine

TO : Assistant Chief of Staff, G-2  
Eighth Army  
APO 343

1. Lt BRAZZEL of Shiga MG Team, Kinki MG Region, furnished this office with the following information and samples of ore said by the Japanese owners to contain radio-active material:

a. Name of Mine: Matsuturu Mine

b. Owners: Masanari Masuda  
Jugaburo Masuda  
Yujiro Masuda  
Masajiro Masuda

Owners can only be located through Shimogamo Police Station, Kyoto, since their place of residence is located in a remote area.

c. Location of mine: (1098.5 - 1323.0)  
Map: Southern Honshu 1:50,000  
Kyoto Southeast Sheet 5251 - I

2. This mine was given permission to operate in 1941, by the Japanese Government, and is owned by the original operators. Initial digging started in 1942, for gold or silver ore. When no gold or silver ore was discovered the owners took a sample of the ore to the Director of Physics, Kyoto University, for an analysis. The name of this person could not be obtained. The owners were told that the ore contained a radio-active substance. Soon after this, in 1943, a representative of Mitsubishi Co. took sample ore from the mine. Early in 1944 the mine area and building was destroyed by fire. There has been no operation since.

3. The owners state that they had not reported the mine as it appeared to be of no value to them. Recently they heard a radio report that the American government was in quest of such material and immediately reported it to Lt BRAZZEL, who obtained sample ore and above information.

4. This office has samples of ore which can be forwarded if desired.
