

COMMERCIAL HISTORY AND REVIEW OF 1875.

In continuation of the Series commenced with 1863, we shall, at an early date, issue a Supplement under the above title, containing a careful Digest of the leading Merchants and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the year, \$c, the objects of the Supplement being to place in possession of our readers a Commercial History of 1875 worthy of preservation and adapted for reference.

On November 27, was Published No. 11, Vol. V., New Series, Price 8d ; by post, 9d,

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for November gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to November 24.

Advertisements for the next number, to be published on December 25, must be sent, to insure insertion, on or before December 23.

The December Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1874 (so as to indicate the Exact Movement during the Twelve Monihs), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1875 (including a Tabulated Chronicle of Events), besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railboays, &c., &c. A new feature will be introduced into the December Number, as it is intended, in addition, to furnish the Names of the Chairman and Secretaries, or Managers, of the various Companies. A copious Index will be added for purposes of reference. Price 1s 4d; by post, 1s 6d. OFFICE—340 Strand.

must in themselves be costly, and which may end in a con-quest more costly still. But an eager, half-cultivated ruler, like the Khedive, is not at all likely to follow such a policy. Such rulers always believe that an increase of territory is an increase of force, and are apt to spend on the conquest of barren highlands and barbarous tribes large sums extorted from richer provinces, and which those provinces could ill spare. In matter of fact, the Khedive is doing so. Though his exchequer is empty, he lately sent a considerable force into Abyssinia, which met with much re-sistance, and was routed. He is now sending one greatly stronger. The number of troops is large, steamers have been taking men down the Red Sea, and the whole preparations are very elaborate. Of course, under ordinary circumstances this would not matter in the least to us in England; if the Khedive chooses to invest his money in expensive expeditions, on fruitless errands, it would be no matter to us, though much to his subjects. But we fear we may drift-perhaps we are drifting -into a position in which this policy may concern us very early. We have taken the Khedive under our financial panearly. tronage, and that financial patronage will find him the money. Rightly or wrongly, the idea has run through the world that England means for the present to watch over Egypt, and, if necessary, to take Egypt. All the speculative finance of Europe is therefore excited ; there cannot be a better speculation than to lend to Egypt, with England—in fact, though not in name—behind to pay the money; the present rate of in-terest is high, and the ultimate security the best which there is in the world. The Khedive will be able to have as many Abyssinian wars as he likes upon our tacit endorsement. Or the matter may be put the other way. It may be said, "The English Government is looking after the Khedive; it "will not let him run into any foolish enterprise; his credit " is all safe." And at this instant the argument is being " is all safe." And at this instant the argument is being used. The latest telegram from Egypt states that, "At the de-"mand of the English Government, the Egyptian ships have been recalled from Zanzibar, and the expedition to Abyssinia will be confined to the exaction of satisfaction, or even to a " military demonstration, after which the Egyptian army will Upon the reception of which Egyptian stocks rose Nothing can show more clearly the extent of the return." at once. political tutelage in which it is believed that we now hold the Khedive, and the financial advantage which he derives from it.

THE ECONOMIST.

We much fear that Mr Cave's mission may be used in the same way. We fear that something like what has happened in the case of Turkey may happen again. Lord Palmerston and Lord Clarendon eulogised Turkey and the credit of Turkey in strong words, which had much influence, and which enabled her to borrow the millions on which she is now making default. There is a great temptation to do much the same now with Egypt. A few words from our statesmen would enable her to borrow on easy terms to reduce her interest, and to postpone at least the insolvency with which she is threatened now. But our statesmen will incur a great responsibility if, after so great and so recent a warning, they use language by which English lenders may be impoverished.

The essence of the matter is that, in consequence of the policy of the Government, and in the absence of any explanation of it, we are believed in every money market in Europe to be drifting upon a policy which entails on us liability without control, and responsibility without power, and which must, therefore, be very dangerous.

THE FRENCH SENATORIAL ELECTIONS.

IT will be a curious illustration of the irony of events if it should turn out, as it now very well may, that the French Senate, so much relied upon by the extreme Conservatives as a constitutional balance-weight devised to counteract the dangerous Democratic forces of the Republican party, should prove decidedly more Republican than the Lower Chamber, and if the most decidedly Republican element in that Assembly should be furnished by the body of seventy-five Senators named by the present National Assembly, though the object of securing to that Assembly so anomalous a right to participate in the nomination of the Senate, obviously was to guarantee that a considerable section of that body should share the views of the majority of the existing Legislature. Certainly what the National Assembly proposes it does not seem at all able to dispose, or it would never have proposed at all to secure seventy-five members of the Senate, only to give the Republicans a majority probably of thirty-five or forty at the very least in the group of the seventy-five men of its deliberate choice. No one can reasonably doubt that a very fair number of Imperialists will be returned to the Lower Chamber after the dissolution. Should it be so, and should the system by which the other members of the Senate are to be elected result in securing, as seems likely in the great majority of cases, true representatives of the timid peasantry and timider *bourgeoisie* of France, the result of *this* Conservative guarantee, at all events, may very probably be that it will secure a much more deliberately and stolidly Republican majority in the future French Senate than the Liberals will be able to obtain in the future Chamber of Deputies. We do not suppose that even if it turns out so, it will sicken the French statesmen of their very elaborate and body of statesmen in the world who have so much confidence in the effect of theoretic provisions, or have so little reason for that confidence. There is perhaps hardly a political precaution tried in all the varieties of French constitution-making which have flourished during the last eighty-five years, which has really answered the purpose of its contrivers. And now even if one of the careful provisions made for a monarchically-inclined Upper Chamber ends in producing one fixedly Republican, it is most probable that these theoretic-minded persons, whose hopes are disappointed, will only prove to a demonstration that the sole cause of the failure was the omission of some minute proviso or other which they had urged, but which others had overlooked. However, the real truth is that constitution-makers hardly ever know how the complex provisions they propose will really be worked out by creatures so little understood by human beings as their own kind. What is intended to produce one effect, produces-why, it is hard to say -just the contrary ; and unless the measures adopted be very simple, and have been very often tested by the experience of a variety of States, there is hardly any reliance to be placed on their answering the purposes for which they were intended.

Only look, for instance, at the way in which this elaborate provision for securing to the Right a considerable influence in the new Senate, was frustrated. Directly the Right came to vote, the various members of that party had to consider whether they would rather combine for the Monarchical principle, or do their best for the particular monarch whom they themselves favoured. Of course, the latter policy seemed

to many the best, and especially to the Legitimists. There is no monarch whose chance of being freely accepted as head of the French nation is so absolutely imperceptible as the Count de Chambord. He will yield nothing; the the traditions of his family are bad; the political associations connected with his family are despotic associations; he will not even consent to accept the flag which is so popular in France; in short, there is nothing in the world to be said for his claim, except that of descent, which is quite as much against it as in its favour. Had then the Legitimists combined with the other Monarchists, they might have secured a Monarchical element in the Senate, but hardly a Legitimist element. It would have been either the Orleanist element, or the Imperialist element ; and both of them are hateful to the Legitimists. The Republicans, on the other hand, are not afraid of the Legitimists. They know them to be too unpopular in France to be feared, and have no objection to see so impracticable and sterile a party fairly represented under the new Constitution so long as they can gain their own end by virtue of the concession. And this, of course by favour of the obstinacy and folly of the Legitimists, the Republicans were able to do. In return for a dozen or so Legitimist elections to the Senate, the Left have got an enormous majority of the senators with nominee seats for the Republican while the really formidable Monarchists, the lists and the Orleanists, are left completely party, Imperialists and in the cold. Of these we may expect that the Imout perialists will recover their ground in the Lower Chamber but that the Orleanists will probably find themselves nowhere under the new Constitution. They are neither sufficiently mo-narchical to be satisfactory to the Monarchists, nor sufficiently constitutional to be satisfactory to the Republicans. They hit that just medium which merely reasonable persons care about, and, as reasonable persons are always in a minority, the Orleanists will probably find themselves cleverly eliminated from the political powers of the new Constitution. The race is not always to the swift, nor the battle to the strong ; but the race is hardly ever to the equable, or the battle to the middling. In France especially, colourless parties always go to the wall.

We may probably draw a very safe inference from the way in which affairs have gone in the election of the seventy-five life members of the Senate, to the way in which they will go at the popular elections of the Senate, and of the Lower The colourless parties will lose ground everywhere ; Chamber. only the Republicans and the Imperialists will gain ground. If this has happened in the very territory of conservatism, where guarantees had been taken against its happening, we may be pretty sure that it will happen on the better-defined ground of popular election. On the whole, we shall expect to see a very definitely Republican Assembly and a very definitely Republican Senate, but in the Assembly at least, a large group of Buonapartists, representing very weighty constituencies, and combining the advantages of a showy though chequered tradition with a democratic creed. The combination which has kept the Buonapartists out of the Senate cannot be expected to succeed in that greater fight which will begin for France early in the ensuing year.

THE TURKISH REFORMS.

THE Imperial firman which was published at Constantinople on Tuesday would probably have produced a considerable political effect if it had been promulgated when the troubles in Bosnia first broke out, before the Porte had plunged into the gulf of bankruptcy, and before the great Powers had committed themselves to any projects or promises of intervention. It may well be doubted whether, even at that time, any permanent tranquillisation of the disturbed provinces could have been hoped for by a renewal of pledges that, at least twice in the recent history of Turkey, had been as formally made and had been allowed to fall hopelessly into abeyance. Nevertheless, the course of European politics might have been smoothed if the admissions and the offers of the Imperial firman had been made public before the Herzegovinian insur-rection had drawn to itself the notice of European diplomacy. It would have been important to understand upon the authority of the Sultan's Government itself, what were the real defects of Turkish rule as recognised by the Turks then -selves. The Sultan is served by many able ministers who are perfectly well aware of what modern civilisation demands from an organised Government. He has no lack of diplomatic

[Dec. 18, 1875.

THE ECONOMIST.

advisers to tell him what Christian Europe thinks of the imperfections of his rule. But for an Oriental Potentate to accept advice of a disagreeable sort either from his own ministers or from the representatives of foreign Powers without compulsion would be little short of a moral miracle. From the outset the Porte denied the existence of any serious grievances, bluntly rejecting at first, and afterwards attempting to evade, all proposals of reform. The compulsion, however, has been applied, and the Imperial firman now admits, and promises to amend, all the principal grievances of which the Rayahs made complaint, and to which the great Powers drew the attention of the Porte in repeated remonstrances.

If the firman was needed, which unfortunately there is no " Cassation and Appeal, and magistrates of the Civil Tribunals " of First Instance, will be immediately appointed. They are " to be chosen from persons having the capacity and integrity " to merit general confidence, and will not be dismissed without " lawful cause. The firman then proceeds to declare that all "subjects of the Porte without distinction are authorised to " elect themselves the judges and the members of the tribunals " and administrative provincial councils, who may be Mussul-"men or non-Mussulmen. No person may be detained "in custody without trial, and no ill-treatment of ac-"cused persons will be permitted." In the same way, when we turn to the subject of taxation we see how real must have been the grievances of the Rayahs. According to the firman, " Taxation will be applied in just proportion, and those " taxes which may burden the population too heavily will be "lightened. A mode of equalising taxation will be estab-"lished, and, independently of a fourth part of the tithes, " measures will be taken to prevent arbitrary procedure in the "collection of tithes by the persons to whom they are "farmed. The police will no longer be employed to collect "the taxes. The Mussulman or non-Mussulman population "will itself elect the collectors." A more general, and even more elementary, principle of civilised society is amusingly guaranteed in the article announcing that "right of property "will be assured to all subjects of the Porte." Some old-world oppressions, of which Western Europe has known nothing since the French Revolution, still need reform in Turkey. Thus, we are told, "The abolition " of forced labour (corvée) is confirmed. The system of con-" tributions for works of public utility will be amended, in "order that it may cease to be of a vexatious character." Again, it is necessary to assure the Sultan's subjects that the officers of police and other public functionaries will be chosen from among men of good character. Also, "the law must "be respected by all people, great or small," and all the subjects of the Porte are to be allowed to address their representations of grievance to the Sultan himself. It is not quite easy to reconcile these large promises with the concluding limitation of the firman, which says : " All these favours will " only benefit those fulfilling their duties as faithful subjects. " Others will be excluded from them."

But, in addition to these general concessions of popular rights, the particular grievances of the Christian subjects of the Sultan The Porte " conare dealt with exhaustively in the firman. " firms all the powers granted to the patriarchs and other "spiritual authorities for managing the affairs of their communities, and for the free profession of their religious belief. " Every facility will be afforded for establishing their churches " and schools. Every official rank, and all public functions, will " be accessible to non-Mussulman subjects. The tax for exemp-"tion from military service will only be paid by non-"Mussulman subjects between the ages of 20 and 40 years, " and will be reduced to a just proportion with the general " amount of taxation paid by the individual. The collection " will be effected by the taxpayers themselves. Invalid per-" sons will be exempt. All non-Mussulman subjects in the " provinces may acquire landed or house property, and their " testamentary dispositions will be respected." These concessions, we are told, go far beyond the promises even of the Imperial decree of 1856, or, according to some of the Vienna newspapers, beyond the demands of the Bosnians. But Rayahs as well as bondholders have learned that it is idle to place confidence in the unsupported promises of a Turk. It is apparent from the firman that some of the simplest rights of

men living in civilised societies have been denied to the mass of the population in Turkey, and that the Christians have been subjected to special disabilities and exactions. The firman promises civil justice and freedom to all, and a measure of social equality to the Christians. Is it probable that these promises will bear fruit, not only in the ultimate improvement of the condition of the Turkish peoples, but in the immediate pacification of the disturbed provinces? There is no reason to doubt the sincerity of the Turkish Government, so far as Mahometans can ever be sincere, in offering to live on terms of peaceful equality with the Infidels. Even the Sultan himself, and certainly his ablest advisers, perceive that the only remaining chance of maintaining the fabric of Ottoman Government is to make a serious effort to carry out voluntarily those reforms on which, if any longer delayed, the great Powers are certain to insist. The question is whether it is not now altogether too late to entertain such propositions as those put forward at the eleventh hour by the Porte. The prevailing view at Vienna during the week was that "the firman would prove abortive without Euro-"pean control." But whether the action of the three Powers be suspended or not we can hardly hope that at any time it will be possible for the Porte, however sincere in its terror, to carry out the improvements it promises. It does not possess either the moral motives or the administrative means. Its functionaries are almost to a man corrupt, and could not, if they would, dispense pure justice from tainted sources. The populations between whom they are bidden to establish social equality and order, are separated by broad chasms of traditional hatred, deepened by contemporary wrongs and revenge. No good intentions inspired by political panic will enable a central Government so feeble as that of the Porte, to bridge over the social gulf, or to purify agents infected with the same moral epidemic that palsies its own powers.

BARRISTERS AND CLIENTS. [COMMUNICATED.]

A DISCUSSION took place in the House of Commons some time ago upon the subject of barristers' duties and rights and rate of pay. It is equally to the advantage of the Bar, as of the public, that people should have the true bearings of this question placed before them. Whenever a definite proposal to make the retaining of barristers a simple contract, for the fulfilment of which they are liable, on which they can also take legal means of redress, is definitely brought forward, it will be time enough to discuss the measure without reverting now, with any particularity, to that which Mr Norwood proposed in the above-mentioned debate. The legal result of making the relationship between advocate and client one of a simple contract will not materially alter either the responsibilities or the rights of a barrister or of his In certain cases, a barrister will be enabled, if he is client. not paid by his client, to bring an action for the recovery of his fees. At the present moment, the remedy which barristers practically have is not to take work from clients of whose respectability they are not sure without receiving the fee beforehand. Though their pay is theoretically a simple honorarium, they have thus a means of securing the payment of their fees. There are, it is true, some men who are supposed not always so to secure themselves, and if they do not get paid to make the best of a bad bargain. But it is quite certain that a man who would now work for a client on the chance of being paid would seldom put his legal remedy in force, because he would thereby ruin the chance of having work from this client again, who on the next occasion will very likely pay his fees bonestly enough. As regards the rights of a barrister, therefore, we think that such a law of contract would have very little practical effect. As regards the interest of the client we also believe that its value would be small. The possibility of proving negligence in the conduct of a case, either in Court or in its preliminary stages, would be so small—unless it were negli-fact, ever be employed. It may be said, however, that such a law would stop the present practice of a man with little employment holding briefs or doing work for the man who has more than he can well do himself, and also that it would prevent men of the highest reputation at the Bar making perhaps

1479

THE ECONOMIST.

an opening speech, and then leaving the rest of the trial to be watched over and conducted by their junior. The fact is, that if the public do not like the present system the remedy is even now in their own hands, and if they choose to employ men who have more to do in the day than they can manage, they must bear the natural consequences of this. The practical result, however, of a measure such as Mr Norwood recommended would only be this, it would make eminent lawyers tell their clients that they are unable to promise that they can attend to each individual case for its entire length. We believe that clients would still flock to the leading men, who by this provision would be enabled to attend just as much, or quite as little, to their cases as they please, without any fear of legal actions for negligence, should a case be really lost through their non-attendance. In some few cases, indeed, a client might prefer an inferior advocate upon whose attendance he can rely to a superior one who may or may not earn his fee. But it is now perfectly well understood by clients, who retain a barrister in large practice, that very likely he will not attend throughout the case. If the litigant party is not made aware of this by his attorney, and the attorney, as attornies will do, gives a brief to a man who can only give it, as the attorney is well aware, his limited attention, the client has certainly a legal right to bring an action against his attorney for negligence if the result is unfavourable through the absence or other cause of the advocate. There are always plenty of men of good legal minds to choose from, and there are also some very eminent practitioners to whom clients simply flock, but whether a barrister is liable for negligence or not, the clients will certainly continue to flock to the able and distinguished lawyer, and endeavour to obtain a small portion of his time rather than none at all. The result, therefore, of passing an Act to make barristers liable for negligence in the course of their duties and to give them the power of suing for their fees need in no way be feared by the legal profession. It will very little, if at all, benefit litigants, who will still patronise the most distinguished members of the profession, who will be guarded by special provisions when they take a brief. Another question, which was also raised in the debate, was that of barristers' fees. Some members of the house seemed to think barristers' fees are now too large, and that they should take whatever fee a client chooses to offer. This last contention is simply nonsense : a man has a perfect right to value his services as he chooses, and to charge a fee such as, in his opinion, will fairly remunerate him for the labour he expends upon a case. But this point is complicated by the question, whether or not a barrister having once accepted a brief, marked with a certain fee, or even a set of papers, has a right to require that that fee shall be raised. It appears to us that, speaking generally, a barrister should be satisfied with the fee marked when he accepts a case, unless he finds, upon coming to consider the state of facts contained in his instructions, that the original fee does not properly remunerate him for the labour he must give to the case before him. In such an instance there can be no possible doubt that a barrister is fairly and justly entitled to demand a larger fee.

With regard to the rate of a barrister's pay, it certainly, except in two instances, is not too great. These two instances are in railway compensation cases, and in the Parliamentary practice. It is impossible to see that, as compared with other cases and other branches of practice, It is impossible to see that, barristers in these two instances may be said to be overpaid. But take a barrister's general average rate of pay, sometimes great and sometimes small, it will be found to be no more than a fair remuneration for a great deal of hard and anxious work. The public are unaware of the labour and thought which are spent in chamber practice, and only see, as a general rule, the large and showy cases, with often large fees attached, and remain ignorant of much of the more important work transacted by the legal profession. The English Bar have no cause to fear any Act which shall introduce a system of con-tract between them and their clients more in harmony with the modern manner of business. But as a matter of fact, the actual result of such a change will be almost imperceptible.

BUSINESS NOTES.

THE DEMONETISATION OF THE GERMAN THALER-COINAGE .-The following is the text of the Project of Law laid before the

German Reichstag by the Federal Council, relating to the

one-thaler coinages :--Art. 15 of the Coinage Law of 9th July, 1873, is amended by the following addition being made to it: The Federal Council is authorised to determine that the one-thaler pieces of German coinage, as also the convention thalers coined in Austria up to the close of the year 1867, are to pass current until their withdrawal only in place of Imperial silver money, at the rate of three marks per thaler. Such a regulation must be published in the Imperial Book of Laws, and only comes into force, at the sconest, three months after publication. The following is also the text of the "motives" prefixed to this Project of Law :--

this Project of Law :-

The fundamental idea of the German coinage reform-to introduce The fundamental idea of the German coinage reform—to introduce the pure gold valuation in place of the various provincial valuations— still remains inoperative, even after the introduction of the gold valuation throughout the Empire. on the 1st of January next, according to the Imperial Ordinance of 22nd September last (Imperial Book of Laws, S. 303), so long as the regulation in Art. 15, No. 1 of the Coin-age Law of 9th July, 1873 (Imperial Book of Laws, S. 233) remains in force. According to this regulation the one and two-thaler pieces of German coinage as wall as the convention thelars and double thalers force. According to this regulation the one and two-thaler pieces of German coinage, as well as the convention thalers and double thalers coined in Austria down to the close of the year 1867, are to pass current until demonstiation in the whole territory of the Con-federation in place of all Imperial monies,—in place, therefore, of Imperial gold monies,—at the rate of three marks per thaler. And in consequence of this stipulation, the thaler and two-thaler pieces are assimilated to Imperial gold monies, whereas, according to the prin-ciple of the pure gold valuation, they engel to be lowered to the rank ciple of the pure gold valuation, they ought to be lowered to the rank of silver token money, and like these be subject to the regulation in Art. 9 of the Coinage Law, according to which no one is obliged to obliged to take Imperial silver money in payment for more than twenty marks. So long, however, as holders of bills upon places in Germany are not So long, however, as holders of bills upon places in Germany are not in all circumstances sure of receiving payment in gold money as the international standard (vollwerthig) instrument of payment in Ger-many, the German valuation cannot enjoy that full confidence at home and abroad, which was one of the chief objects of the coinage legisla-tion. If the regulations of the Coinage Law remain unchanged, this condition of things will last until the demonetisation of the thaler pieces, according to Art. 8. The demonstisation of the two-thaler pieces, is in prospect at an early date, as the withdrawal of the same, now in progress with good results, will soon have reduced the amount at pre-sent in circulation to a limit which will render its quick withdrawal unimpertant. On the other side, it is yet impossible to foresee when the demonetisation of the one-thaler pieces will be possible, because the the demonetisation of the one-thaler pieces will be possible, because the extent of their circulation is still very considerable, and its premature extent of their circulation is still very considerable, and its premature demonetisation would most sensibly injure business. The transition to the pure gold valuation is nevertheless attainable, avoiding the dangers attendant upon the sudden and complete demonstisation of the one-thaler pieces, by means of the Federal Council being empowered to assimilate the one-thaler pieces remaining in circulation to the In-perial silver monies. By such a regulation, not only will the gold valuation come directly into force, but it will at the same time furnish the opportunity of fixing, without dangerous experiments the effective the opportunity of fixing, without dangerous experiments, the effective amount of Imperial silver required, of re-coining the one-thaler pieces into Imperial silver money to the extent of these requirements, and of withdrawing only the amount in excess. The date when this regulation will come into force will afterwards be subject to the careful considera-tion of the Federal Council.

debate has taken place this week in the Reichstag on the A subject, but as we have only yet received a telegraphic account, we must defer the discussion of it. The bill has also passed the second reading with this alteration, that the notice to be given of the partial demonstisation of the one-thaler coinage has been altered from "three" months to "one."

THE ABERDARE IRON COMPANIES' ARRANGEMENT .- It has been announced this week that the creditors of the Aberdare and Plymouth Iron Companies, whose suspension in May last was the determining cause of the commercial crisis of this year, have at length arranged a settlement with their debtors, which will permit the business to go on. The arrangement is that the friends of the debtors find 36,000l working capital to carry on the business ; that the interest of that sum, and the annual charges of two mortgages for 310,000l, amounting together to about 25,000l, are to be first paid out of the profits the undertaking; and that any surplus profits shall be of applied to redeeming the debts proved in the liquidation, for which debenture certificates not carrying interest are issued. The undertakings are formally purchased by a new limited liability company, which undertakes the liability for the mortgages, for the above sum of 36,000l, and for the new debenture certificates in the way thus described. It is probable that no better arrangement can be made for the creditors in such a case. The only asset they have is a very unsaleable one for money in hand, and if the business can go on at all there is nothing for them but to submit to the lock-up of their money, and take what they can get out of the yearly-accruing profits. It is stated that the works have been carried on at a profit since the suspension, and if this is the case in a very dull time, and while the iron works are idle, only the coal being worked, the prospect of the creditors getting something in more prosperous

years is not altogether hopeless. The amount of proved is considerable - about 900,0001, reduced to debts 850,000l by a first instalment of 1s per £ obtained from the most available assets of the company-and it will be interesting to see how the experiment answers, and how long it takes to pay that sum. There is one point in the constitution of the new company which seems peculiar. The share capital is nominally 1,250,0001, but shares to that amount are not issued at once. They will only be issued to the shareholders for amounts equivalent to the debts of the company paid off, and they will then be issued as fully paid-up. But can such shares be really "fully paid ?" The articles of association have no doubt been carefully advised upon; but considering what the decisions of the Courts have been as to the necessity of money or value being paid by the shareholder, we think the point of some interest. If fully-paid shares can be issued in this way, any company having the necessary powers in its , there is a similar decline. articles of association will be able to give fully-paid shares as the equivalent of undivided profits, or of debts extinguished by means of such profite, and so enlarge its capital indefinitely, without money being actually paid in by individual shareholders. And as it is easy to make "paper "profits," this might lead to great abuses in the way of watering capital which the Courts would be jealous of.

THE MINERAL STATISTICS OF THE UNITED KINGDOM .- The keeper of the Mining Records is somewhat later this year than last with his usual interesting introduction to the annual statistics of the mineral production of the United King-The "trade" complains greatly that even at best dom. these statisticts have been late, and the additional delay this year-there being no doubt of the ability and energy of the department-would certainly suggest that a force should be added at some point or other, so that the statistics might be published sooner after the close of the year. The statistics now published are for 1874, and the following is the general summary :-

GENERAL SUMMARY of the RETURNS of the MINERAL PRODUCE of the UNITED KINGDOM for 1874.

| Minerals. | Quantities | 8. | Values. | |
|---------------------------------|-------------|-------|----------------|--|
| | tons. | ewts. | £ | |

about three millions, or over 4 per cent. As regards quantity, the most striking fact is that the quantity of coal As regards raised fell from 127,016,747 tons in 1873, to 125,043,257 tons last year, such a diminution being most unusual in the history of the coal trade. The value, as might be surmised, from the known reduction of wages, fell in even greater proportion, viz., from 47,631,2801 in 1873, to 45,849,1941 last year. The production of iron ore, which exhibited a dimi-nution in 1873 as compared with 1872, now exhibits a still year. farther diminution, the totals being 15,577,499 tons, valued at 7,573,6761, raised in 1873, against 14,844,936 tons, valued at 7,318,169/, raised in 1874. In pig iron there is also a corresponding diminution, the amount produced having been 6.566,451 tons, valued at 18,057,739l in 1873, and only 5,991,408 tons, valued at 16,476,372l in 1874. In most of the other metals and minerals, except "clay" and "salt,"

THE RECENT RAILWAY TRAFFICS .- The railway traffics have been increasingly unsatisfactory as the year has progressed. In the first half of the year, as we showed from time to time, there was a very fair increase, which was all the more promising because it was mainly in goods. But in the first twelve weeks of the current half-year, as we showed in a note in our issue of 25th September last, this rate of increase was not maintained, and what increase there was was no longer mainly in goods, but in passengers. Out of a total increase of 285,000l on the principal lines then selected for comparison, 155,000l belonged to passengers, and only 130,000l to goods. A continuation of the table to Dacember 11, that is for twleve weeks, or an equal period, shows that the total increase has only been half that of the first twelve weeks of the current half-year; and although the proportions of goods and passengers are reversed the aggregate in each case is much less than in the earlier part of the half-year. The total increase is 134,000*l*, of which 60,000*l* is from passengers and 74,000l from goods, the following being the details :-

INCREASE OF DECREASE OF RAILWAY TRAFFIC RECEIPTS for the past Twelve Weeks, from September 19 to December 11, dis inguishing the Receipts from Passengers and from Goods. Total. Passengers. Goods.

| | Total. | F | Passenger | s. | Goods. |

1481

From this it is plain that what has lately fallen off, or increased least, is passenger traffic, and if goods continue to progress as they are now doing, there is still some promise for the future. Next spring, however, it must be remembered comparison will have to be made with a period of very considerable increase.

RAILWAY COMPANIES AND MANUFACTURING .- In the course of their development our great railway companies have found it convenient to become builders and repairers of their own rolling-stock, but it has just been decided by the Master of the Rolls in a case against the London and North-Western Railway Company, that they are not to build and repair for other companies. The suit was brought by the Attorney-General at the relation of the Secretary to the Locomotive Manufacturers' Association, on the ground that the North-Western Company had been manufacturing locomotives and other rolling-stock for sale or hire, and had been repairing them for other companies; and as the defendants admitted having built some engines for the Lancashire and Yorkshire Railway, the plaintiff at once moved for an injunction, which the Master of the Rolls granted. The North-Western Company is ordered not to manufacture or repair rolling-stock except to be used by themselves on their own line, or any line worked by them; nor are they to let such rolling-stock on hire, except "in extraordinary emergencies." The decision obviously follows from the necessary conditions of a monopoly company established by Act of Parliament. Such a company, if allowed to do any business outside what its Act authorises, would be in the position of a company subsidised by the State com-peting with ordinary traders. It would be able to use the profits of its monopoly to carry on the ordinary business so as to beat out competitors; and this is undesirable, although the public superficially may seem to be no losers. The injunction, however, does not extend to prevent the company letting engines or rolling-stock to contractors or colliery proprietors using its own line, nor to prevent it making rolling-stock for the Manchester South Junction and Altrincham Railway, of which it is joint proprietor along with the Sheffield Railway Company.

CROSSED CHEQUES .- Mr Hubbard, in a long letter to the Times, has criticised the recent judgment, in Smith v. the Union Bank, on the subject of "Crossed Cheques." We have already expressed the opinion that the judgment, whether good law or not, is entirely in disagreement with the mercantile belief as to the protection given by crossing ; and Mr Hubbard expresses very forcibly, and in an authoritative way, what that belief is. The following is an extract from his letter :-

Judge Blackburn, indeed, observed :-- "The customer of the London and Westminster Bank must be assumed to be the *bond fide* holder from his having given full value for it, unless the crossing prevents him from taking it *bond fide*, and to hold that would be to restrain the negotia-bility of cheques."

bility of cheques." This remark contains the entire argument of the judgment, which, first, rests the proof of the lawful ownership on the fact of full value having been given; and, secondly, disregards the restraints of the crossing lest negotiability be restrained. I submit as to the first posi-tion, that a proof of full value having been given must be most un-certain: and, further, that if proven it could not involve a lawful owner-ship in the face of the crossing. As to the second position, I deny that the unrestrained negotiability of cheques is an attribute intended for them by legislation, or required for them by commercial usage. There is, I contend, a misconception of the nature of a cheque to order in the attempt to subject it to the law

for them by commercial usage. There is, I contend, a misconception of the nature of a cheque to order in the attempt to subject it to the law regulating the ownership of banknotes on the one side, or of bills of exchange on the other. The object of the drawer of a cheque to order is defined upon its very face, and neither his interests nor public policy demand that it be invested with the character of spurious currency, or is not a bill of orcharacter.

demand that it be invested with the character of spurious currency, or of an illegitimate bill of exchange. If C. acted ignoranly, yet in good faith, he must have known and trusted Thurger, from whom he received the cheque, and from Thurger he should have sought compensation if the cheque had been, as it ought to have been, refused by the London and County Bank. The London and Westminster Bank erred, though inadvertently, in taking from their customer a draught payable through the London and County Bank, and the Union Bank of London erred in paying the cheque irregularly presented. The judgment does not justify either bank abstractedly for their disregard of the Statute Law, but it refuses to compensate Mr Smith, the innocent sufferer, lest it impair the negotiability of cheques or disregard the claim of a so-called lawful owner. The judgment suggests that C. "might have gone to the drawers and exchanged the cheque for a new one not crossed, or he might have

opened an account with the London and County Bank and paid the cheque in, or got some friend to do so, and then the defendants must have paid or dishonoured it." I submit that, instead of either of there results, the drawers in the first case, and the London and County Bank in the second, would more probably have impounded the cheque as

In the second, would more probably have impounded the cheque as stolen property. The judgment affirms that the plaintiff Smith "could not maintain an action for the wrongful disposition of the cheque, for he had no property in it," or, as Mr Justice Blackburn put it, "the plaintiff cannot recover because he was not possessed of the cheque," but is not the unlucky Smith in the dilemma of every one who has been robbed, but seeks to recover the value of his property precisely because "he is no lenger possessed." Possession has been said to be nine points of the law. This judgment would seem to surrender to possession all that remains of law.

After the strongly-expressed opinion of the mercantile world, it is quite certain that the law, as laid down, must be altered, and the protection supposed to be given by crossing made real.

THE SUPPLY OF GOLD .- M. Victor Bonnet, in an able article in the Journal des Economistes for the present month, urges the French Government very strenuously to adopt the single gold standard, on the ground that it will soon be isolated among civilised nations if it continues the double standard. The single gold standard, as he points out, is not only adopted, or being adopted, in England, Portugal, Germany, Holland, and the Scandinavian Union, among European States, but Russia evidently shows an intention of adopting the same standard in resuming specie payments, the bullion reserve in the Imperial State Bank being now almost exclusively in gold instead of largely in silver as formerly, and Austria, too, has a liking for the gold standard. Among non-European countries, the United States are also proposing to resume specie payments on a gold basis. We think these and other reasons which he states, give him a good case, but we doubt if we can quite agree with him as to the existing annual supplies of gold being on a sufficient scale to prevent an appreciation in the standard of valuethat is a general fall in prices. Assuming the total supply to be 20,000,000l annually, he thinks that after providing 2,480,000l for wear and tear of the existing stock of precious metals, and 4,000,000l additional for the arts, &c., the remaining sum of 13,520,000l will suffice for the various demands of the world for new coinage in proportion to the growth of population and wealth. He is of opinion that the various countries of the world are now "saturated" with gold, and that the situation is thus quite different from what it was at the epoch of the Australian and Californian gold discoveries. But we confess we do not quite follow the learned writer in this opinion. In England, at least, there is no "saturation" of the precious metals, the minimum required for the daily wants of life being all that is kept in circulation, whether in the hands of banks, or individuals. An increase of wealth and population, assuming the wants to continue of the same nature, will require an increased amount of coin in daily use, amounting to about 5,000,000l a year, according to the best estimate that can be formed from past experience. If this cannot be supplied, and if the demands of the other gold-using countries, now so much increased in number, are proportionate, we do not see how a supply of 20,000,000l a year will suffice. Prices must either be adjusted to the diminished supply, that is, they must gradually fall, or the supply itself must be in-creased. Even if there should be a general and gradual fall of prices, however, we do not think that would be a sufficient reason against a gold standard. No such change is likely to equal in importance in a short time the temporary fluctuations of every commercial cycle, when prices rise or fall in a few years 30 to 50 per cent., or even more. The chronic change will be obscured altogether by these temporary fluctua-We are bound also to notice that there is now some tions. reason to believe, contrary to what promised a few years ago to be the case, that the supply of gold annually will be considerably more than 20,000,000l. As M. Bonnet very properly states, the production in Russia augments annually, and the supply from America is also likely to increase. There is no such gold famine in prospect, therefore, as to deter the civilised world from adopting the single gold standard

on exporting gold. The Paris rates on the other continental places are: Vienna, 218 the 100 florins; St Petersburg, 327 the 100 roubles; Madrid, 499 the 100 plastres, all at three months; Italy, at sight, 84 dis.

The movements in the stock and share market during the week have been confined to narrow limits, but the general tendency has been towards lower rates. The Three per Cents. had been buoyed up by the approach of the date for taking off the quarterly coupon, and this having been done to-day, 20 centimes were immediately lost. The Fives are heavy and are almost abandoned by speculators, their price above par leaving only a small margin for the rise. Italian Fives are firm, being kept up by the cash purchases. With the improvement in the Italian finances this Rente has returned to favour with small capitalists for investment. Even at the present price, and after deduction of the tax of nearly 14 per cent., it still pays over 6 per cent. interest. The arrival of Sadyk Pacha in Paris, which was vaguely supposed to be favourable to the Turkish fundholders, had sent up Ottoman Fives to 25½, but they have since gone back to their previous quotation. The 1873 bonds are offered at 137f 50c. The charges for carrying over at the fortnightly settlement to-day were easy; the contango on Turkish Fives was 6 centimes, or under 5 per cent.; Italian Fives, 10 centimes to 12; Suez Canal shares, 1f 25c. The wide fluctuations in these last have ceased, and the changes from day to day have not exceeded from 2 to 5 francs. The last weekly reture of the receipts on the railway companies show an increase of 77,000f on the same period of last year. The Lombards have an augmentation of 230,000f. Nothing is yet known of the terms of the purchase by the Italian Government. Egyptian bonds of 1870 and 1873 are to-day at 365, a small recovery from the depreciation which followed the unfavourable news from the war in Abyssinia. Messageries shares closed to-day at 617f 50c; Transatlantic at 330. Subjoined are to-day's prices for the account :—

The excitement caused by the purchase of the Suez Canal shares has now calmed down, and barring the brief mention of any incidental facts that may occur, the French press has generally abandoned the subject, which has been superseded by the senatorial elections as a topic of discussion. The presence of Lord Lyons at a soirée given by M. de Lesseps at the end of last week, and a long conversation which then took place between the British Ambassador and M. de Lesseps could not fail to be remarked, and the more so that this visit was followed by a second one, believed to be of an official character, with the object of repeating to the director of the company the friendly assurances already made by Lord Derby to the French Ambassador in London, and acknowledging the efficient manner in which the service through the canal was performed. Such testimony will no doubt go far to compensate M. de Lesseps for the scanty justice done to him recently in some of the English daily papers. The success of the undertaking being now beyond dispute a spirit of depreciation has been manifested towards the company, and suggestions have been put forward that it should be deprived of the management, on the ground of the canal being unsafe and insufficient. No definite facts are alleged in support of those allegations, which are not borne out by the results obtained. The company's returns show that down to the end of October last, during the six years the canal has been open, the passage has been made by 6,032 vessels, and 11,587 barges and small craft, ard without a single accident. Vessels do indeed frequently if und, but this has never occurred from their touching the bottom of the channel, although ships of a draft of 244 feet of water have made the transit. The width of the canal is 100 metres, or nearly 330 feet, and vessels of greater length, driven out of their course by the wind have frequently touched [Dec. 18, 1875.

the sloping banks with their bows or stern. Such cases had, however, been expected and provided for by posts fixed along the bank for hauling the vessels back into the channel. Those casualties have never, in fact, caused more than a momentary interruption in the traffic. There are besides technical difficulties which render any widening of the canal inadvisable, and no increase of the width formed part of the improvements, in which M. de Lesseps proposed to expend a sum of 40 millions of francs. The objection has been put forward that the depth of eight metres does not extend the whole width of the canal. This is undoubtedly true, for no engineer would think of making a canal through a sandy country, with perpendicular banks. With the present means vessels perform the distance of about one hundred miles between Port Said and Suez in sixteen hours, and as many as thirty-five have passed through, in opposite directions, in a single day. Such calls on the capabilities of the canal are, however, rare, but the fact that they have occurred, and been met, show that the traffic must increase in a very large proportion before the canal in its present condition becomes insulicient.

The Journal Officiel gives as follows the general value of the foreign trade of France in the first eleven months of the year. The detailed Customs tables are still in the press:-IMPORTS.

The month of November taken alone gives 330 millions of imports, and 363 millions of exports, against 297 millions and 359 millions respectively in October. The balance of exports over imports in the eleven months of 1875, was 297 millions, against 62 millions only in 1874.

The statistics of the corn crops in France for more than half a century, issued by the department of Agriculture and Commerce, and of which I gave an abstract last week, have been followed by a table giving additional details. This return shows for each year the average price of wheat per hectclitre $(2\frac{3}{4}$ bushels) and per quintal (2 cwt), the extent of crop, the surplus, or deficit of the production, compared with the consumption, the imports, and exports. The consumption of wheat, which was 53,941,409 hectolitres in 1820, including the quantity required for seed, reached the maximum of 96,641,961 hectolitres in 1869; no returns are given for 1870, the year of the war, but in 1871 the loss of territory caused the consumption to fall to 90,855,939 hectolitres; in 1874 it had, however, recovered to 94,873,938 hectolitres. The balance of imports and exports are only registered during the last forty-six years, but the returns present this anomaly, that while the production exceeded the consumption in 35 years, the exports only exceeded the imports in 19.

If the last ten years are taken together, the production is shown to have exceeded the consumption by 36 millions of heetolitres, while every year the imports were larger than the exports, the surplus for the period forming a total of 53 millions of heetolitres. If the returns are correct, the stocks in the country would consequently have increased by more than a whole year's consumption, but it is more probable that there is some disturbing element which has not been taken into calculation. The highest price per hestolitre recorded was in 1856, when it reached 30f 75c, after averaging in the two preceding years over 29f. Those unfavourable years had come just after a series of years of low prices, the maximum and minimum rates between 1848 and 1852 having been 17f 23c and 14f 32c only. The table shows that the market is much more sensible to any cause producing a rise than a fall. After five years of abundance, a single bad season, in 1853, drove up the average price per hectolitre from 17f 23c in 1852, to 28f 82c in 1854; and, although the deficit in 1853 was made up by the surplus in 1854, no immediate reduction of prices followed. Again, in 1873, although in the preceding year there had been a surplus of production over consumption of nearly 30 millions of hectolitres, a deficit of 8 millions, reduced by importations to 4 millions only, was sufficient to raise the average price per hectolitre from 23f 15c to 25f 62c, a rise of 2f 47c; while a surplus of 38 millions of hectolitres, added to 84 millions of imports, in 1874, only reduced the average price by 51 centimes. It has generally been supposed, and has, indeed, been asserted by many writers, that France was greatly assisted in the payment of the Prussian war indemnity by the abundant wheat crop of 1872, which had

produced a large commercial balance in her favour; yet, if these returns are correct, the exports of wheat and flour have

nct exceeded the imports in any year since 1866. A suit in which both plaintiffs and defendants were mem-bers of the Syndicate for the Turkish loan of 1873, has just bers of the Syndicate for the Turkish loan of 1873, has just been heard before the Paris Tribunal of Commerce. The plaintiffs, the Société de Credit et de Commission of Con-stantinople participated for a sum of 550,000 pounds in the loan of 27,777,780 pounds sterling, the 42 per cent. of which taken firm, was to be paid in twelve monthly instalments, the contractors having the right to pay the first six instalments in matured Treasury bonds, and the last six at bonds of all dates. A committee of delegates of the Ottoman Credit General, Banque of Constantinople, and French Credit Mobi-lier, was formed to carry out the details of the convention; but those three establishments, two months later, made an independent contract for an advance of three millions of independent contract for an advance of three millions of pounds to the Ottoman Treasury, one of the conditions of which was the abandonment of the right to make the first six payments of the first loan in Treasury bonds. The Société de Credit et de Commission had already procured at a low price sufficient Ottoman Treasury bonds to meet the other instalments, the first two had been paid and accented but instalments; the first two had been paid and accepted, but on offering the third it was refused. That establishment, in on offering the third it was refused. That establishment, in consequence, brought an action against the three other banks, claiming damages for the prejudice it had suffered from being deprived of the right conceded by the first contract, and which the Société de Credit pretended had been surrendered in their own interest. It was, however, shown that the plaintiffs had suffered no prejudice by the transaction, as the Treasury bonds they had held were reimbursed from the proceeds of the loan of three millions, and a verdict was given for the defendants with costs.

proceeds of the loan of three millions, and a verdict was given for the defendants with costs. A bill is now before the Assembly to ratify a contract between the town of Calais and the Ministry of Public Works to enlarge the harbour of Calais. The Chamber of Commerce undertakes to raise a sum of 15 millions of francs for the purpose, to be paid off in twelve years by a charge of 45 centimes per ton on trading vessels using the port, and 10 centimes ner ton on passenger vessels

10 centimes per ton on training vessels using the port, and 10 centimes per ton on passenger vessels. The principle of progressive taxation appears to be now definitively adopted for the house tax in Paris. The Minister of Finance has again authorised for the coming year a scale of rates commencing at 7 per cent for rents under 600f a year, and increasing 1 per cent. for each 100f until the maximum of 19 per cent for rents of 1000f and until the maximum of

and increasing 1 per cent. for each 100f until the maximum of 12 per cent. for rents of 1,000f and upwards is reached. Apartments under 400f are exempt. GERMANY AND AUSTRIA. (FROM, OUR OWN CORRESPONDENT.)

VIENNA, December 14.

During the whole of last week the Austrian Reichsrath was occupied with the discussion of the Budget. This subject was of special interest this time, on account of the announcement of a deficit, and the proposal of means to cover it. The final triumph remained on the side of the Minister of Finances, De Pretis, for not one of the proposals of his opponents con-tained a single idea which could be considered preferable to tained a single idea which could be considered preferable to his own propositions. The Minister of Finances ended the general debate with a long speech, in which he ex-plained the whole history of the finances during the last ten years, giving his hearers a clear view of the present position of finances in Austria. Minister De Pretis is generally reproached with extreme optimism; we, however, think this reproach without foundation, having remarked that he takes careful notice of all material facts. Besides, there is surely some merit in not considering the black side of everything alone, when at present some branches Besides, there is surely some merit in not considering the black side of everything alone, when at present some branches of industry carry their pessimism so far that it may almost be called marasmus, and when it is generally known that the State's business has been kept up much better in these hard times than private business has been. Before the outbreak of the crisis De Pretis had several times warned the public against putting too many hopes in over-speculation. He has by these anticipatory warnings acquired the right to demand

that the public should not give itself up to despair. He never believed in a duration of the hausse-movement before the crisis, and will not at present believe that the consequent baisse movement can last long.

movement can last long. In the question of the Budget he calls attention to the fact, that the next year's deficit is not that unexpected and sur-prising occurrence that some believe it to be. It exceeds the deficit of the year 1873, which was, it is known, a very favourable year indeed, only by two million gulden. If the amortisation of debts is taken into account, the deficit of 1873 amounted to 45 million gulden, and that for 1876 to 47 million gulden. The difference between these two deficits The difference between these two deficits million gulden. consists chiefly in this, that the deficit of the former year was filled up from the State's property, whilst for the present one new taxes must be raised and credit must be resorted to. one new taxes must be raised and credit must be resorted to. It must, however, be noted that the present deficit is caused for the most part by productive investments, which will increase the population's power of production for the future. Within the last eight years great expenditures have been made for railways, for instruction, and other purposes, which in no country could have here the States marked in a country could have been met by the States regular income. The only unproductive expense for next year is the acquirement of cannons; it can, however, by no means be avoided. From its regular income the State has amortised 68 million gulden of its debt, before 1873, without it can be acquired and the state has either resorting in any extraordinary manner to its credit, or imposing new taxes from the year 1868 up to the present moment. A proof that the Minister is not too sanguine on too sanguine on moment. A proof that the Minister is not too sanguine on the subject, is given by his mentioning the direct taxes. Since the normal year 1871 they have yearly increased. In the year 1871 their produce amounted to 87,471,000 gulden; in the year 1874, to 91,610,000 gulden. The deposits in savings' banks have also augmented in the years 1870-1874, by 254 million gulden, that is to say, by 88 per cent. This enormous increase was of course caused by the fear of dangerous enterprises imbied during the crigit. The following is mother enterprises imbibed during the crisis. The following is another proof that industry is not as badly off everywhere as in Vienna, where articles of luxury form the chief business. The number of taxed trades, which in 1872 amounted to 616,776, in 1874 had increased to 630,000, and has at present reached the number of 644,000. The minister protests against reached the number of 044,000. The minister protests against the possible supposition that this result might have been caused by greater severity on the part of tax-collectors. He mentions that the difficulties caused by the crisis have been very much increased by two years' unlucky harvests, and by the consequences of the mistakes made in Germany at the time of the first introduction of the Currency Law, which were deeply felt in Austria's money market. With regard to the means of meeting the deficit, De Pretis laid down a remarkable principle, which prescribes that a country's credit may never be used for covering the interests of a country's debt. be used for covering the interests of a country's debt. Interest must always be paid by the product of taxes. To raise direct taxes at the present moment is quite impracticable, he therefore proposes raising two duties, by which means four millions can be gained. First, stamp duty for courts of justice, which is up to the present moment lower in Austria than anywhere else; secondly, a better regulation of the duty on having property registered when it is transferred. Austria has an arrangement for this sort of business which is to be found in no other country. If a property is re-sold within a period of less than ten years the duty for having the re-sale period of less than ten years the duty for having the re-sale registered is much lower than when the property is sold after a longer space of time. This is a sort of premium on the repeated sale of property, and encourages speculation, and besides, the State's coffers suffer a loss by this measure of the law. The Minister of Finances has presented a Bill in which this measure is done away with, and by this means not only an increase of income is obtained, but property also has a chance of remaining for a longer time in the hands of the same proprietor. same proprietor.

The German Federal Council has brought a Bill before the Reichsrath which contains an alteration of Section 15 of Currency Law, by which this Act would at last be completed. The Reichstag is being demanded to vote an addition to Section 15, which authorises the Federal Council to declare that henceforth the one-thaler pieces of silver coinage of the German States, as well as the one-thaler pieces of Austria coined before the end of the year 1867, are to be considered equal to the new Imperial silver coins. This measure, if voted, is to be put into force three months after it has been published in the official paper of the Empire. By putting the thalers on an equal footing with the new Imperial coins, the acceptance of thaler pieces becomes limited to 20 marks. The entire with-drawal of two-thaler pieces may very soon be expected to take place. Gold standard thereby becomes a fact, and the de-

place. Gold standard thereby becomes a fact, and the de-mands of experts in this line are acceded to. It may be taken for granted that this proposal will pass in the Reichsrath. The Reichsrath has also received a publication, in which some very interesting facts are mentioned concerning the putting into action of the new Currency Law. Of the old gold coins circulating in Germany, and which amount to 539,276,416 marks, but 98,651,021 marks' worth have been pre-

THE ECONOMIST.

sented for withdrawal. The rest of more than 440 million marks are therefore either melted down, or have been ex-ported, or they have disappeared in some other manner. Of old German silver coins 295,438,865 marks' worth had been withdrawn by the end of September, 1875, of which 153,210,211 marks were in old thaler currency; 129,004,410 marks were in gulden currency. It must be noted that of 44 million two-gulden pieces but 30 million were presented for withdrawal. All the gold coins withdrawn have been coined into new, the silver has been melted to bullion, and sold. This sale has brought with it a loss of 8 per cent. Still the busi-ness of coining produces a residue of 144 million marks down to the accounts of 1875.

The total of pieces coined in German mints, up to the 4th December, 1875, amounted to-

The German Reichstag has, as we supposed, passed over the petition of German iron manufacturers to the regular order of the day. Protectionists have heard such bitter truths on this occasion, as, perhaps, never have been spoken in a parliamentary assembly. The attempt to make the public pay for losses in single branches of industry is most likely after this, not going to be repeated.

Correspondence.

CROSSED CHEQUES. S MITH. V. UNION BANK. TO THE EDITOR OF THE ECONOMIST.

-Of the numerous letters relating to the above case SIR,which have appeared lately, there are hardly any in which the writers appreciate, if they consider at all, either the effect of the recent decision of the Court of Appeal, or the parties whom it will affect. It is of small importance to bankers, they being rather benefited than otherwise; for while they can still return a specially-crossed cheque if presented by any banker excepting the one named thereon, they are exempted from liability, either to drawer or payee, in the event of their paying it to the wrong banker. That is to say, they are exempted from all liability, the drawer and payee being the only persons who could saffer through such a cheque being exempted from all liability, the drawer and payee being the only persons who could suffer through such a cheque being paid improperly. The so-called *bon'a fide* holder is, under any circumstances, protected from loss. According to the judg-ment a *bon'a fide* holder of a cheque may be defined as any person who has given full value for it, whether to a thief or to a lawful owner, no matter how that cheque may have been drawn, or what precautions may have been taken by the drawer or payee to ensure its safety. Throughout this letter I shall adopt this definition in speaking of a *bon'a jide* holder. It may be said, in like manner, that any person who has given full value for a dog, whether to a thief or to a lawful owner, is a *bon'a fide* owner of that dog, and entitled to retain it. Probably in the event of the dog having been stolen, and there being no reason for the purchaser to suppose such to be the case, he would be entitled to retain it or to receive back his money before giving it up. But, it or to receive back his money before giving it up. But, It or to receive back his money before giving it up. But, supposing that the dog, at the time of purchase, had on a collar bearing the name and address of the owner; the case would then, I think, be quite different, and the purchaser would be compelled to deliver up the dog to its former owner without receiving back his money. Why should not the same principle apply to a specially-crossed cheque? The special crossing is direct evidence of the intention of the drawer or purchast the theorem cheruld not net does form hand to hand in crossing is affect evidence of the intention of the drawer or payee that the cheque should not pass from hand to hand, in spite of what is said on that point in last week's Saturday *Review*. The writer of the article to which I refer, seems to imply that such is not their intention in crossing a cheque to a specified banker. The case, however, which he gives in illustration of this view fails altogether. A cheque entrusted by the helder to a friend for the number of getting it paid by the holder to a friend for the purpose of getting it paid, does not pass from hand to hand, because the friend does not give value for the cheque, and is at no time the owner of it. It might as well be said that a cheque passes from hand to hand when the drawer sends his servant to get it changed. In the case in question, had the Union Bank done their duty, and returned the cheque, the proper course for the holder would have here to even the proper course for the holder and returned the cheque, the proper course for the holder would have been to sue the previous holder, not to claim payment of the drawer. It is this point which seems to have puzzled the lawyers. They could not understand how a man could be entitled to retain possession of a cheque, and yet not be able to obtain payment of it. The explanation, however, is easy: The cheque in question had become merely the instrument on which the holder might sue the previous holder; it had no intrinsic value, and being payable neither to the London and Westminster Bank, who presented it, nor to the London and County, to whom it was originally crossed, had become unnegotiable; in fact, it no longer represented that portion of the drawer's balance against

which it was drawn. If, therefore, the cheque had been re-turned by the Union Bank, and the holder resorted to his proper remedy (supposing him to have no claim upon the drawer), the original owner (the payee) could have obtained a fresh cheque from the drawer, and would not have lost his money. In that case the action of the Union Bank, in paying the cheque improperly, was the direct cause of the payee's loss. The only ground, therefore, on which the judgment can be maintained, is that the drawer of a cheque is liable to any bana fide holder of that cheque in the event of its being rebona fide holder of that cheque in the event of its being re-turned by the banker on whom it is drawn. Therefore the judgment has established the claim of any bona fide holder on judgment has established the claim of any bonh fide holder on the drawer. Such being the case, it can make no difference to the drawer whether the holder of the cheque obtain pay-ment indirectly from him, or directly from the banker. To quote the words of the judgment, "whatever might be done indirectly may be done directly;" and the drawer could not say that he had been injured by his banker's having paid a cheque contrary to his direction, if he would have been compelled to pay it him-self had they refused it. It was held that the payee could not maintain an action against the Union Bank on the ground that he was not damnified by their improper payment of the that he was not damnified by their improper payment of the cheque, and the same argument applies to the drawer. Any holder of a cheque, not being a boua fide holder, would be a fraudulent holder; and it may fairly be assumed that no fraudulent holder would attempt to obtain payment of a cheque through a banker. If, as I have shown above, neither the drawer nor the payee can maintain an action against a banker for paying a specially-crossed cheque to the wrong banker, provided it be in the hand of a bona fide holder; and if, as I have just observed, it is highly improbable that a cheque presented through a banker would be in the hands of any but a bona fide holder; it is clear that a banker so paying a cheque is exempt from liability in any case that is likely to arise. We have, then, a statute distinctly declaring that a specially-crossed cheque may only be paid to the banker to whom it was origi-nally crossed, but attaching no penalty to the infringement of that distinct declaration. It is absurd to suppose that such could have been the intention of the framers of the statute. The result is that if the judgment is to be maintained, the statute of 1858 is rendered null and void, so far as it relates to specially-crossed cheques; if the statute is to be enforced, the judgment cannot be maintained.—I am, Sir, your obedient servant. G.

December 16, 1875.

Reviews.

THE RATIONALE OF MARKET FLUCTUATIONS. By a CITY

EDITOR. London: Effingham Wilson. 1876. THIS little essay is a compendium of shrewd observations on the nature and causes of fluctuations in market prices, whether they arise from market influences or more general causes. The writer is evidently acquainted practically with business principles and detail, as well as a theoretical student of these subjects, and the work for this reason is the more valuable. As popularising theories which are to be found only valuable. As popularising theories which are to be found only in the more difficult and least read books of political economy, it will also be a useful publication. Tables are included showing the principal fluctuations in prices in the eading markets for securities and commodities, and the reasons for them, for many years past; and these are drawn up with the intelligence of form necessary to construct tables which are easy of comprehension, and with a care and accuracy extremely essential, but not altogether usual, in statistical compilations.

POST OFFICE LONDON DIRECTORY FOR 1876. London: Kelly and Co.

As there is no metropolis so large and so important in many ways as London, so there is no directory larger and of greater general importance than the volume so well-known under the above name, nor one which better corresponds to the vast organism it dissects. The present edition contains the kind of information which is so indispensable to commercial men, and of which that part of the public have long known how to avail themselves; but, as with previous editions, it not only represents on paper the business section of London, but also avail themselves; but, as with previous editions, it not only represents on paper the business section of London, but also reflects it as a political, a professional, a legal, a parliamen-tary, and a banking centre, and does not leave out useful directions on the subject of that great and miscellane-ous traffic which converges here, and which converts London into a universal terminus. An idea of the extra-ordinary amount and variety, and the fully as extraordinary system of the information given in the Post Office Directory, can hardly be imparted in words: we would venture to recomcan hardly be imparted in words; we would venture to recom-mend even those in the habit of using it to read carefully over the index at its commencement as the best means of getting a due appreciation of its utility.

| Clearing-house return | | 126,625,000 | 135,483,000 | 132,826,000 | 113.519,000 |

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1865, a deficiency of 7,355,7481; in 1872, a deficiency of 521,7881; in 1873, a deficiency of 116,2941; and in 1874, a deficiency of 517,8891. In 1875, there is an excess of 1,434,9721.

In 1865, the bullion reserve in the Bank of England was so low that, as was then feared by the ECONOMIST, an accident might easily occur to tighten the money market. The nalfyear had, however, been a prosperous one on the surface, especially as compared with the year previous, when bad debts had been largely made. King Leopold of Belgium died,

In 1872, money returned from internal circulation, and the foreign exchanges were favourable. There had been some isolated failures at Manchester.

In 1873, money was in increased demand, owing to the usual preparations on the approaching close of the year, but rates of discount were only firm for the time.

In 1874, the high Bank rate had checked the further efflux of gold, and although the demand from Germany was liable to a revival and the end of the year was bringing its usual pressure, the money market was easy in tendency.

The account of the Bank of France for the week ending December 16 shows the following changes :--

| Assets. | Dec. 16. £ | | Dec. 9. £ | | Increase. | | Decreane. |

Converting the reichs-marc at 1s; the Austrian form at 2s; the Durch form at 1s 8d; and the frame at 25f per 1l. American currency is reduced into English money at 3s 8d per dol, the item specie being taken at 4s 2d per dol. Net deposits are left in dols on account of the mixture of currency and specie.

DISCOUNT AND MONEY MARKET .- There was rather more firmness in the money market for a few days at the beginning of the week, than for some time previous, in consequence of the preparations for the close of the year, assisted by a renewed demand for bullion in the open market, and farther withdrawals from the Bank for export. But there was no quotable change in rates, the preparations for the close of the year being of course only temporary, and the belief still being that the demand for bullion being mainly for Germany will not lead to any material advance of rates, although the Bank reserve will probably be very low during the next three weeks. After that the large influx of coin and notes from the country, and the probable increase of arrivals from abroad, will compensate any withdrawals for export. To-day, under the influence of this feeling, rates have even fallen off as compared with what they were last week, and the minimum for the best short Bank bills is only $2\frac{3}{8}$, instead of $2\frac{1}{2}$, which was the rate last week. The rate at call on English Government securities, on the Stock Exchange, is nominally 2 per cent., but it is difficult to employ money.

The German exchanges have been firmer during the week, so that the German demand for gold is exclusively on Government account. The New York exchange remains high, and an advance of one or two points higher would now bring gold from New York. The specie in the New York banks has also of late largely accumulated. The Paris Exchange was also firm early in the week, but has since relapsed, and there is a good demand for gold for Paris, which seems likely to continue for a short time.

The changes in the Bank return show the great effect of the return of coin and notes from the country. The bullion has increased 205,000*l*, notwithstanding the withdrawal of 264,000*l* for export, and as the active circulation has also diminished 275,000*l*, there is finally an addition of 480,000*l* to the reserve. The private securities have increased 176,000*l*, and the public securities 17,000*l*, while the public deposits have increased 1,056,000*l*, and the private deposits have diminished 412,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :---

THE STOCK MARKETS.—There is now so little doing, owing to the near approach of the Ohristmas holidays, that there is little new feature to record. At the arrangement of the settlement prices were generally steady, for the reason we stated when we wrote last—the scarcity of stock apparent. This led to re-purchases by operators for the fall, which caused a momentary improvement, especially in English railways; but the rally was only partially sustained, owing to the want of business, though the tone has subsequently been steady. There is again a more assured feeling as to inter-

national politics, at least to this extent, that the Great Powers in Eastern Europe, as it is their obvious interest, refrain from pushing matters to extremity in their negotiations with Turkey. To-day the markets have continued without animation generally, although the tone is still steady. An improvement of prices in the better class of stocks is looked forward to in some quarters as not improbable even during the holiday season, the recent course of business having been such as to indicate an accumulation of money awaiting investment. Profits during the year have not been large, but there have been few new issues whether of companies or of loans, and a good deal of money realised by the sale of depreciated and discredited securities has still to be reinvested. Such an opinion, however, can only be taken quantum valeat, and it remains to bee seen whether the actual default of Turkey in January, and the anticipated default of Peru, will not again produce distrust.

ENGLISH GOVERNMENT SECURITIES.—Consols have been steady with the other markets, but with singularly little fluctuation as compared with the rapid movements a few weeks ago.

COLONIAL GOVERNMENT SECURITIES.—Beyond a fall of 1 per cent. in Cape of Good Hope stock, on the issue of the new loan alluded to elsewhere, there is still a tendency upwards in these securities, but little movement for the week.

FOREIGN GOVERNMENT SECURITIES .- The balance of movement in this department, shows, on the whole, a preponderance of sales among the more speculative securities, which are still the principal market. Turkish and Peruvian stocks have continued in disfavour, and the improvement last week seems to have had, for effect, to bring out a good deal of stock, and raise the rates for carrying over, resulting in a renewed dulness. Egyptian stocks have also been depressed for a similar reason, the engagements for the rise entered into being on a large scale, and advantage being taken of this condition of things to offer stock by counter-operators, who have been assisted greatly by the Egyptian war with Abyssinia proving to be a serious affair. Yesterday and to-day, however, there has been some improvement of tone, though there is still not much business, and to-day there was a relapse in both Turkish and Peruvian stocks in the afternoon. The non-speculative and investment stocks, here as in the other departments of the Stock Exchange, remain steady.

Notwithstanding the near approach of the date of payment, there is still no "advertisement" of the Peruvian January coupons, and late this evening the Peruvian Government has officially intimated its inability to meet them, though expressing its intentions to make sacrifices to do so. Nothing also has yet been officially or unofficially announced as to provision having been made for half the Turkish coupons due on 13th January, although those due on the 1st are stated to be provided for.

ENGLISH RAILWAYS.—In this department, until Tuesday, there was a good deal of firmness, in consequence of the scarcity of stock and light rates for carrying over speculative purchases for the account. Sheffield, Midland, Great Western, Caledonian, and North British ave been most in demand. On Wednesday, in the absence of business, stock was again offered, an almost general decline taking place which was continued yesterday morning; but the reaction from the earlier advance brought in purchasers, and the tone has since been steady. The traffic returns published this week, allowing for the weather, mostly exhibit a satisfactory increase. Brighton stocks were at one time a good deal depressed on announcements that the board of the new competing line had been formed and statements as to the terms of the Bill, but they have recovered partially to-day along with the Southern and lighter lines generally.

The following shows the principal changes for the week in the quolations of ordinary stocks, comparing the latest unofficial prices :--

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending December 11 to 908,060*l*, being an increase of 8,723*l* as compared with the corresponding week of last year. The aggregate receipts for the half-year to date are now 23,455,963*l*, showing an increase of 539,951*l* on the corresponding period of last year. General traffic was evidently again obstructed by the snow drifts and severe weather of last week, but the following lines appear to have escaped the effects to a great extent.

North British shows an increase of 3,8561; Caledonian, 3,2571; and Lancashire and Yorkshire, 2,0307.

In these cases the aggregate is calculated from the beginning of August.
 The aggregates published are one day less this year than for last.

FOREIGN AND COLONIAL RAILWAYS.—Business here has been of late of much the same character as in other departments, viz., a closing of accounts open for the rise or fall, as the case might be. The most marked instance of the effect of such transactions is to be seen in Canadian railway securities, speculation for a fall being now considered unsafe, in view of the growing trade of the Western districts of the colony and the United States. The following are the changes for the week :—

AMERICAN SECURITIES.—Capital continues to be invested in United States Government bonds, the country being evidently in a fairly sound condition economically, while political uneasiness about the long-continued disturbances in Cuba has only a latent existence. To-day Erie shares fell on a reported plan, which is to levy a tax on them for purposes of re-organisation, and the bonds on the side rose. The following are the changes for the week :—

III CAR

TELEGRAPHS.—The breakage in the Direct United States Company's Cable, reported last Saturday, has had the chief effect in depressing that company's securities to the extent of 1 for the week, and of raising Anglo-American stock $4\frac{1}{2}$ per cent. Globe Trust shares are also $\frac{1}{3}$ better; Western Union,

1489

THE ECONOMIST.

Dec. 18, 1875.

2; ditto Sterling Bonds, 1; Hooper's Works, 3; and Telegraph Construction, $\frac{1}{2}$. Eastern shares are $\frac{1}{4}$ down, and the Deben-tures 1 higher on balance. There is a fall of $\frac{1}{4}$ in Western and Brazilian, and 1 in India Rubber Works.

MINES .- In the market for foreign mining shares there is some movement, St John del Rey having advanced 10; Cape Copper 1; Eberhardt, $\frac{1}{2}$; Flagstaff, $\frac{1}{4}$; Scottish Australian, Rio Tinto shares have fallen 1; but the 7 per Cent. bonds are 1 higher.

MISCELLANEOUS .- Among bonds, &c., there is a rise. Boston City have advanced 1; City of Brisbane, 1; Ottawa, 1; Quebec, 1; Delaware and Hudson Canal, 1. But Francis 1; Quebec, 1; Delaware and Hudson Canal, 1. Canal preference stock is 2 lower; Suez Canal shares, 2. Among land shares, Australian Agricultural are 1 higher; Among land shares, Australian Agricultural are l'higher; British American, 1; Peel River, 1; Van Dieman's Land, $1\frac{1}{2}$; but Hudson's Bay are 1 lower. The following have advanced :—National Discount, $\frac{1}{4}$; Royal Mail Steam, 1; London General Omnibus, 1. On the other side, General Steam Navigation are 1 lower; Crystal Palace, 2.

BULLION .- The following is taken from the circular of Messre Pixley and Abell on the transactions in bullion during the week :

Gold.—A demand for Germany and France has existed during the week; orders for the former country have been filled up by the amounts received here, and 387,000l in bars and coin have been with-drawn from the Bank for Paris. The arrivals comprise 4,000l, per Archimedes, from River Plate; 14,000l, per Lotosi, from Pacific; 31,000l, per Durham, from Melbourne; 168,000l, per Nizam, from China; 33,800l, per Nile, from West Indies; 24,000l, per Countess of Kintore, from New Zealand; 8,500l, per Douro, from Brazils—total, 283,300l. The Peninsular and Oriental steamer takes 29,000l in sovereigns to Malta and Alexandria.

Silver has again declined in value. At the beginning of the week Silver has again declined in value. At the beginning of the week sales were made at $56\frac{1}{2}$ d per oz, and subsequently a few small arrivals were placed at $56\frac{1}{16}$ d per oz, which may be taken as the quotation for to-day. The orders for Spain have, for the present, been filled, the existing demand being for Paris; there is, however, but little now offering. The receipts during the past few days have been small, con-sisting only of 23,000l from America, 28,000l from the Pacific, and 24,000l from the West Indies.

Mexican Dollars.—The amount of this coin offering at the date of our last circular (9th inst.) was sold at 55d per oz, showing a reduction of 2d from previous arrivals. They were taken chiefly for China, and the Peninsular and Oriental steamer leaving to-day will have 53,600/ for the East.

Exchange on India for banks' drafts at 60 days' sight is 1s 9³/₈d per rupee. Tenders for the India Council bills were received yesterday. The amounts allotted were—to Calentta, 400,100*l*; and to Bombay, 299,900*l*. Applications on both Presidencies at 1s 9⁷/₇ed per rupee, receive 13 per cent.

Quotations for Bullion.-Gold-Bar gold, 77s 93d per ez atd; ditto fine, 77s 93d per ez atd; ditto, rofinable, 77s 113d per oz atd. Silver-Bar silver, fine, 567d per oz atd, last price flat; bar silver, contain-ing 5 grs gold, 567d per oz atd ditto; Mexican dollars, 55d per oz ditto. Quickeilver, 13/ per bottle. Discount, 3 per cent.

According to the Gazette return of this evening the movement in the precious metals during the week ended Dec. 15 has been as follows:-Gold-Import, 248,696l; export, 343,196. Silver-Import, 87,111l; export, 393,314l. Today 95,000l in gold was withdrawn from the Bank for export, chiefly to France.

FAILURES AND EMBARRASSMENTS .- Messrs A. A. Morlet and Co., merchants, of 11, Billiter square, London, and Man-chester, have suspended payment. The liabilities are estimated at 110.0001.

NOTICES AND REPORTS.

STOCKS.

Cape of Goed Hope New 4⁴/₂ per Cent. Debentures.—The Crown Agents for the Colonies invite applications on behalf of the Cape Government, for debentures to the amount of 1,000,000*l*, as the first instalment of a lean for 4,000,000*l*, authorised by an Act of the Colonial Parliament, for the construction of railways. The debentures will bear interest from 1st January railways. The debentures will bear interest from 1st January at the rate of 4½ per cent. per annum, and will be allotted to the highest bidders, provided the rates offered are not below the minimum price. The loan is secured on the general revenues of the Cape Government, and will be repaid at par by annual drawings. From 1870 to 1874 the revenue (exclusive of loans) of the colony increased from 661,392l to 1,518,008l; and the expenditure (including public works) from 625,874l to 1,114,485l; the actual surplus increasing from 35,518l in 1870 to 403,523l in 1874. Chinese Imperial Government 8 per Cent. Loan, 1874.—The Hong Kong and Shanghai Banking Corporation notify that they have received a portion of the definitive bonds, signed by the Imperial Commissioner, and they are now prepared to deliver the same to the holders of provisional certificates in

deliver the same to the holders of provisional certificates in London.

Tunisian General Debt .- The Tunisian Financial Commission notifies that the coupon due 1st January will be paid at

maturity. Turkish 6 per Cent. Loan, 1858.—The numbers are published of bonds amounting to 127,000/, which have been drawn for redemption. Neither the date nor the price of redemption, however, are mentioned. Turkish 9 per Cent.

however, are mentioned. Thirkish 9 per Cent. Treasury Bonds, 1872.—The following official notice has been issued with reference to the conversion into 5 per cent. General Debt :— "Holders of the Imperial 9 per Cent. Treasury Bonds, 1872, series 'A,' 'B,' and 'C,' who desire to avail themselves of the right to convert these bonds into 5 per Cent. Bonds of the General Ottoman Debt, in the proportion of 55t of the former against 100t of the latter, can deposit their bonds at the office of Messrs R. Raphael and Sons, 25, Throgmerton street, from 13th December to 13th January next, inclusive. inclusive.

"The bonds will be kept four days, for the purpose of being stamped, and the 5 per Cent. Bonds of the General Debt, bearing the coupon due 1st July, 1876, will be delivered two months after decontron due Int Convert." claring the option to convert." RAILWAY COMPANIES.

Great Eastern.—At a meeting of preference stockholders authority was given to raise money for improvements and additions to stations and sidings, and some other necessary works. It is proposed to raise 450,000l by preference stock, and 150,000l by loan. It was stated that it is the intention of the heard to consider a scheme for the consolidation of the the board to consider a scheme for the consolidation of the different stocks.

H. H. the Nizam's State Railway.—The first general, meeting will be held on 21st inst., to confirm the appointment of trus-

tees and the committee. Illinois Central .- The directors have declared a dividend of 4 per cent. for the half-year. Madras.—The net receipts for the half-year ended June were

92,471*l*, against 102,246*l* at the corresponding period of last year. The expenses were equal to 68.66 per cent. of the revenue, but included the outlay on several bridges damaged by floods in October, 1874. The report of the commission appointed by the Government to inquire into the falling off in the traffic has lately been received, and contains, it is stated, many valuable practical suggestions. The requisite calls have been made for the payment in full on the new shares, and the money thus raised will suffice to pay off the debentures falling due 1st January, leaving about 200,000*l* for future outlay on capital account.

capital account. Metropolitan and Brighton Railway.—The Times states :—" The Bill for the new Brighton line, called the Metropolitan and Brighton Railway, just issued, proposes a capital of 2,100,000, in 105,000 shares of 20l each, which has been found. Tickets will probably be issued at any one of the Metropolitan or Metropolitan District stations, also from Cannon street, Charing cross, Ludgate hill, and Victoria. The Bill also con-templates the formation of connections with the Midland and Great Northern Railways. The names of the first directors Great Northern Railways. The names of the first directors are as follows:—Benjamin Whitworth, William Walker, Eli Lees, James Sydney Walker, John Rowson Lingard, James Shepherd, Patrick George Carvill, John Broomhall, Donald Larnach, James Wyllie, John Henry Puleston, Edmund Alfred Pentifex, Edward Wimble, and Frederick Augustus Du Crox."

Severn and Wye .- The company's line to Coleford, the chief town in the Forest of Dean, has been opened for passenger traffic. This nearly completes the railway system for the Forest which the company undertook to supply.

BANKS.

Bank of British North America.—The directors have declared an interim dividend for the current half-year of 2l 10s per share, being at the rate of 10 per cent. per annum, free of

share, being at the table of a property of the first state state of the first state sta increase of capital by the issue of 10,000 new shares has been confirmed.

Bank of Constantinople.-The bank announces an interim dividend of 6 per cent. per annum for the year ending 31st December.

London and River Plate.—After providing for bad debts, the directors recommend a dividend of 5 per cent. for the half-year ended 30th December, which, with that paid in June, makes a distribution of 10 per cent. for the year, carrying forward 4.1281.

Merchants' Bank of Canada (Montreal) .- The directors have declared a dividend for the half-year ended 30th November, at

the rate of 8 per cent. per annum. National of New Zealand.—An interim dividend is announced at the rate of 6 per cent. per annum, free of income tax, for the six months ended 30th September. Provincial Bank of Ireland.--The directors have declared a half-yearly dividend at the rate of 18 per cent. per annum.

MISCELLANEOUS COMPANIES.

Aberdare and Plymouth Iron Companies .- At a meeting of creditors, a scheme for carrying on the concern as a limited company, and for immediately discharging the debtors, was adopted. The new company will work under a committee of control, seven in number, including five of the largest creditors, one representative of the mortgage holders, and one

representative of the subscribers of the working capital. Anglo-Italian Pulp and Paper Making, Limited,—Creditors are required by 21st February to send details of their claims to Mr J. Cooper, the official liquidator, the 10th April being appointed for the adjudication. Auckland Harbour 7 per Cent. Loan and 6 per Cent. Loan, 1875 The Bark of New Zeeland notify that the debentures of

Auckland Harbour 7 per Cent. Loan and 6 per Cent. Loan, 1875 —The Bank of New Zealand notify that the debentures of the 7 per Cent. Loan, maturing January 1, 1876 (when all interest thereon will cease) will be redeemed at their office on that date. They will also pay, on 10th proximo, the coupon then due of the 6 per Cent. Loan. Brazilian Submarine Telegraph.—The directors have declared an interim dividend of 2s 6d per share, or 5 per cent. per annum, free of income tax, for the quarter ended 30th September.

September.

Cape Breton, Limited .- A meeting is called for the 11th prox., to take into consideration a proposed arrangement between the company and the debenture holders, with a view to suspending the liquidation, and carrying on the undertaking. *Ceylon Campany*.—It is stated that nearly the whole of 1874-75 crop of coffee has been sold, and realised a satisfactory

profit; but as the 1875-76 crop will be comparatively short, and an unusually dry period in Mauritius has prejudicially affected the sugar-canes, the directors propose to declare an interim dividend at the rate of only four per cent. per annum. The sale of the Naveena Estate in Ceylon has been completed.

Conservative Land.—At the annual meeting, it was stated that the number of shares in progress at the quarter ended Michaelmas was 32,141, and the shares completed numbered 8,411, making a total of 40,552. The receipts for the four quarters ending Michaelmas were 114,905*l*, and the total receipts of the society up to that period had been 2,196,215*l*. The total withdrawals had amounted to 667,052*l*, and the receipts of any fund may 7 500*l* and the reserve, or surplus fund, was 7,500l.

Continental Union Gas.—At the annual meeting, the available balance was stated at 48,534*l*, out of which an interim dividend at the rate of 5 per cent. per annum has already been paid; and it was decided to declare a second half-yearly distribution at the rate of 6 per cent. per annum, leaving 2,2411 to be carried forward.

Crystal Palace.—After providing for the dividends and in-terest for the past half-year on the Seven per Cent. Preference and Six per Cent. Debenture Stock, amounting to 30,847*i*, there will be a balance of 4,759*i*, which the directors recommend to be carried forward. The ordinary shareholders, therefore, get nothing. At this time last year a 1½ per cent. dividend was declared on the ordinary stock.

Direct United States Cable .- The company have announced that their cable has again been broken near Newfoundland.

Dolgelly Ironstone, Limited .- A meeting will be held on 5th January, to confirm the resolution in favour of winding up the company voluntarily.

Eastern Extension, Australasia, and China Telegraph.—The directors propose, with reference to duplicating the Madras-Penang cable, to carry the new line to Rangoon instead of Madras, at an estimated cost of 170,000!. To meet this outlay there is in hand between 70,000! and 80,000! from the existing reserve fund, and a further sum of about 20,000! balance of reserve rund, and a rurther sum of about 20,000 balance of unissued debentures, authorised for the construction of the New Zealand cable. It is estimated that by reducing the cur-rent half year's dividend to the rate of 3 per cent. a further sum of about 50,000*l* will be available, and it is proposed to provide for the balance, at the commencement of the ensuing year, from the amount which it is stated will be available for reserve. The dividend will thus he 51 per cent for the year reserve. The dividend will thus be 51 per cent. for the year.

Foreign and Colonial Government Trust .- It is notified that 418 certificates of 100/ each of the fifth issue have been drawn for repayment at par on 1st January.

Georgetown (British Guiana) Gas .- The available balance is 803/, and a dividend is recommended for the half-year at the rate of 5 per cent. per annum. The rental is stated to be increasing. Great Northern Telegraph.-The interest on the shares, at the

Great Northern Telegraph.—The interest on the shares, at the rate of 5 per cent. per annum, will be paid by Messrs. C. J. Hambro and Son on 1st of Japuary. *Hooper's Telegraph Works.*—The necessary amount of 25,000*l* having been subscribed, the directors proceed to issue letters of allotment of the 6 per Cent. First Mortgage Debenture Loop Loan.

Italian Irrigation Canal.—The half-yearly interest will be paid by Messrs C. J. Hambro and Son on 1st proximo. It is mentioned that after deducting Italian tax, the payment will be 21 10s 5d per coupon of the 190l bonds to other than Italian

subjects. Lebong Tea.—A dividend is recommended at the rate of 6 per cent. per annum, free of income tax. The crop of tea for the season just closed will be in excess of the estimate. The out-turn from the estates will be more than that of last year from the same gardens, but the season in Darjeeling has been from the same gardens, but the season in Darjeeing has been unfavourable to quality, and the sales have proved unsatisfac-tory, especially for the lower qualities of tea, the general im-port of which has this year been unprecedentedly large. It is, however, mentioned that should the remainder of the crop meet an improved market the dividend to be declared at the Mid-Midsummer meeting may be increased.

London and Colonial Company, Limited.—The liquidators have announced an eighth and final dividend of 4d in the pound (making a total of 15s 1d) to unsecured creditors.

[CONTINUED FROM PAGE 1491.]

National Safe Deposit.-It is stated that, although the development of the business has been checked by the depres National Safe although the trade, regular and steady progress has been made. sion of 5,376 safes of various sizes, designed to yield an aggregate rental of 29,798l, have been completed, and form the first tier, provision having been made in the second and third tiers for such additional number, and of such sizes as may be hereafter required. The rents of safes, &c., received from the 1st July to the 30th ult. were 1,480*l*, but no revenue is included from the upper floors of the building, which are still unlet.

Parkfield Iron.-At a meeting of creditors it was resolved to wind up the undertaking. The liabilities amount to 35,539l,

and the assets to 3,6271. Patent Riband Telegraph Post, Limited.—The Master of the Rolls has appointed Mr David Smith, of Manchester, official

liquidator. Phoenix Bessemer Steel, Limited.—Creditors are required to send particulars of their claims to the liquidators, at Sheffield,

by 13th January. Southwark and Vauxhall Water.—A dividend is recommended, after payment of preference charges, at the rate of 4½ per cent. per annum, and a balance of 3,500l is carried forward to provide for losses. Capital received, 1,790,404l, and expended 1,766,904l, leaving a balance of 23,500l. Received Linear Limited The liquidation is almost

Woolwich Steampacket, Limited.—The liquidation is almost completed, and the shares of 6l each have been exchanged for cash shares or debentures in the London Steamboat Company to the amount of 9l each. In addition to this 9l, it is probable there will be a further small sum divisible when the accounts are closed.

MINING COMPANIES.

Eberhardt and Aurora.—At the meeting, it was stated that the profits for the six months ended June was 8,996/, but with a view to explore the mines in depth, it was resolved not to deelare a dividend. It was mentioned that this time last year the company was 24,000l in debt, which, however, has been wiped out, and the profit for the half-year ended December 7 was 43,200/. With regard to the debenture debt, now standing at 20,850/, it was resolved to offer to each debenture holder of 10l an ordinary share at par, and a cash bonus of 2l 10s in addition to the interest due.

22 10s in addition to the interest due. Richmond Consolidated.—The report for the half-year ended 31st August states that the profit for five months, as the furnaces were shut down from the 7th April to 5th May, was 34,106/, from which has been deducted 2,272l for payments made in London, making, with some sundry receipts, a balance of 31,990/. For the previous half-year the balance was 80,310/, which makes a total of 112,300/ for the year. With the amount brought forward and deducting 15 212/ for With the amount brought forward, and deducting 15,212l for

With the amount brought forward, and deducting 15,212' for expenditure on capital account, there is an available balance of 39,592!. Out of this a dividend of 7s 6d per share was paid in June, leaving 19,343'. The directors propose to declare a divi-dend of 7s 6d per share as soon as possible. • Rio Tinto.—The company notify the payment on the 1st January of the six per cent. interest on their shares (amount-ing to 6s per share), and of the coupons, due same date, of their 5 per Cent. Mortgage (Spanish Coupons) Bonds, and also of the coupons of the 7 per Cent. Mortgage Bonds. Russia Copper.—At the meeting, it was stated that the loss in the year had been 6,905', against 18,105' in the previous year. The only addition to capital had been 212!. The cost of production of copper had been diminished by 23! per ton. The total liabilities on 30th June were 90,103!, and the floating assets 82,486!, the excess liabilities being 7,616!, against this there is the property of 445,000 acres, the mines, the works at

assets 82,4867, the excess habilities being 7,6167, against this there is the property of 445,000 acres, the mines, the works at Voskresensky and Preobrajensky, and the Orenburg establish-ment. After some opposition the report was adopted. Silkstone Fall Colliery.—At the meeting, it was stated that of the capital of 50,0007, only some 2007, or 2507 would be left after paying all debts. It was agreed to wind up the under-taking, and Mr Baker, the chairman, was appointed liqui-dator. dator.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

POST OFFICE ANNOUNCEMENTS. On the 1st January, 1876, the present exceptional arrangement for charging letters for France by the scale of one-third of an ounce will cease, and from that date the provisions of the Postal Union Treaty will, be extended to correspondence from the United Kingdom for France, the rates of postage to be levied in this country being as follows :— Letters, 2gd per half ounce ; post cards, 1¹/₂d each ; newspapers, 1d per 4 onnees ; printed papers, legal and commercial documents, and pat-terns of merchandise, 1d per 2 ounces ; registration fee, 4d. Unpaid letters from France will be charged 5d per half ounce on delivery. Simultaneously with this reduction of postage as regards France itself, the higher charges which have hitherto been levied on letters, &c., for Italy, Spain, Portugal, Gibraltar, Malts, Greece, and Turkey, and on newspapers and printed papers to Germany and Egypt, via France, to cover the cost of conveyance by that route, will be abolished ; and correspondence from this country for the entire continent of Europe,

and for Malta, Gibraltar, and Egypt will be subject to the uniform rates

and for Malta, Gibraltar, and Egypt will be subject to the uniform rates of postage specified above, by whatever route it may be forwarded. Under the International Telegraph Convention recently concluded at St Potersburg, the following changes have been made in the rules re-lating to foreign telegrams. These changes will come into force on and from the 1st January, 1876 :--1. Foreign telegrams will be divided into two groups—European and extra-European ; *i.e.*, those for places within Europe and those for places out of Europe. In the former the old principle of charge will be maintained, the minimum rate being for 20 words, and the charge progressing by steps of half a rate for every within Europe and those for places out of Europe. In the former the old principle of charge will be maintained, the minimum rate being for 20 words, and the charge progressing by steps of half a rate for every additional 10 words. In the latter (with some few exceptions) the system of charging for each word will be adopted. 2. The maximum length of a single word will be fixed at 15 letters in European telegrams and 10 letters in extra-European telegrams, instead of at 7 syllables, as formerly. 8. The repetition (or collation) of cypher telegrams will be compulsory; a cypher telegram being defined as one containing series, or groups, of figures or letters having a secret mea ing, or con-taining words not to be found in any dictionary or gazetteer. 4. The bar of division between shillings and pence will be counted like a bar in fractions. Thus 44/2, meaning 44s 2d, will count as one word, instead of three words, as formerly. 5. It will no longer be compulsory for the sender of a telegram from the office at which it was handed over by the cable company to the department will be a full inland rate, instead of only a half rate, as formerly. 7. The following affixes will be accepted and charged for as one word each : " R P " (Reply paid), " T C " (Repetition pid), " C R " (Acknowledgment of Receipt paid), and " F S " (To follow). 8. The amount paid by the addressee for the repetition of a foreign telegram will not, as hitherto, be refunded to the addressee if it is found that an error bas occurred in transmission, unless the original telegram was a repeated (or collated) telegram, *i.e.*, one the repetition of which the sender had prepaid.

COMMERCIAL EPITOME. FRIDAY NIGHT.

Trade, on the approach of Christmas, with the attendant stock-taking, holiday-making, and general interruption of mercantile habits, can scarcely be said to show any tendency either towards activity or dulness. There is, however, in more than one industry a feeling that an improvement will occur when the new year begins; the ground for such hopes is not very apparent, but they may be included in the general market reports as meaning something because of their reitera-tion. As far as can be seen, consumption of all goods, except iron, is good, but that is not everything; consumption—at home at least—has been good all along, and not the less so of

late because of the low prices now ruling. What is wanted among manufacturers and merchants is a better price for their wares, and a good steady consumption will hardly bring that about so long as the supplies are relatively so large as they appear to be in almost every market for raw material we can turn to. For instance, the price of coal is low throughout the country, and drooping still on the whole, not from a decrease in communition by the public on the factories other decrease in consumption by the public, or by factories, other than those for iron, but because of the larger supply which has accumulated. Owing less to active consumption than to recent floods, some of the manufacturing districts report a scarcity of coal, but the markets for fuel is not yet at its lowest; and until the turn occurs in it, a rise in other markets is almost out of the question.

In the grain trade business is very quiet; sales of wheat, however, have not been pressed, notwithstanding the large arrivals from abroad, which continue to swell the supplies actually impending over the market, and the less severe weather, which, besides opening ports again to some extent, has a bearing on future prospects because of the opportunity now afforded of getting forward with sowing. The decline this weak is therefore not very marked and each as it is is this week is, therefore, not very marked, and such as it is, is partly due to the inferior sample of wheat which is brought forward. The backward state of seeding operations is also very apparent in France, and the general state of affairs in that country is worth attention as the best key to the position here as regards the grain market. The value of French wheat is evidently in a condition of entire reaction; large speculative purchases were made during a temporary scare in July and August, to be delivered in the last four months of the year; those deliveries have long been in progress, to the discomption of an englators who makes and an electric deficient discomfiture of speculators, who reckoned on a deficient harvest and a rise in price, while the markets are of course depressed the more as they come forward. Instead of rising in consequence of the deficient harvest this year in France, prices have been kept down by the surplus from that of the previous season.

Cotton is dearer, and a hardening tendency has been apparent continuously during the week. It is not clear whether the rise is due to decreased estimates of supply, or of increased demand, but we think it arises from both kinds of influence. On the one side, it is pointed out that the American crop is very forward, and that the supply is likely soon to fall off as compared with previous seasons; one day's small receipts has been sufficient to raise a fear that the falling off may be at hand. The opinions favouring a low crop, and an early one, are, therefore, gaining ground, and, as it is believed, the prices are not remunerative to the grower, a permanent tendency towards a rise has been thus prepared for. And then con-sumers no longer hold off from the market in the hope of buying small lots to suit current requirements; on the contrary, the fear seems to have become very general that con-tracts should be covered in view of a further rise. In effect, all the difference between a rising market now, and a falling one a week or two ago, is apparent as regards the raw material. The change of tone is less remarkable at Manchester, but though not active the demand for cotton goods has latterly been steady and satisfactory. Demand is reported more been steady and satisfactory. Demand is reported more general, and the special complaints concerning the Eastern trade are less loud.

The conclusion of the London sales has left the wool trade in a less depressed condition than was apparent at their commencement, not from any increased consumption but rather on news that the new clip will not be an early one either in Australia or at the Cape. Stocks are believed to be light in consumers' hands; and, although the imports of wool will be in all some 50,000 bales in excess of those of last year, yet the commencement of the February sales is expected to be well attended by buyers, who will need to replenish the stocks, which a continuance of steady consumption must have reduced which a continuance of steady consumption must have reduced by that time. It is stated generally that manufacturers are still complaining of the want of accord between the cost of the raw material and their goods; that there is, however, a fair consumption going on, that stocks of wool are not above an average for this season, and by the time fixed for the com-mencement of next sales (15th February) they are likely to be generally used up. Another report on the result of the sales in London states, however, that, " on the whole, the result confirms the opinion generally entertained at the end of last sales, viz., that the fall then experienced was not a temporary fluctuation, but a legitimate decline necessary to the trade, and not likely to be recovered before a general and marked im-provement in the condition of the industry." At Bradford, spinners are reported well engaged, especially for the home spinners are reported well engaged, especially for the home trade.

The great depression, leading to actual distress amongst unemployed operatives in some districts in the iron trade, shows employed operatives in some districts in the non trace, shows no sign of disappearing. The reduced productive power of blast furnaces is just now more active, apparently in conse-quence of a desire to deliver pig iron before stock-taking. Prospects are nowhere reported cheering, and in the North of England are stated to be "most miserable," as regards the

1495

finished iron trade. No rails of any kind were shipped last month from that district, but pig iron continues to be largely taken from it, chiefly for the purpose of underselling producers in neighbouring centres.

ducers in neighbouring centres. The produce markets are especially dull, as usual towards the end of the year. In sugar little business has been done. Coffee has been steady in price, with moderate supplies on offer. Tea also quiet; Messrs Goddard and Co. report that arrivals have been considerable, but importers have only shown samples to a very small extent. Both importers and dealers seem to be now holding off for the turn of the year. In the oil and seed trades business is also limited on the approach of Christmas. Among metals, copper is steady at an improvement in price, but tin, though fluctuating, has hardly maintained its value.

EXTRACTS FROM TRADE CIRCULARS.

(From Messrs Ellison and Co.'s Monthly Cotton Report, dated Liverpool, Dec. 9.)—The sales for the month have only averaged about 11,000 bales per day. The American crop accounts have favoured increased estimates of yield rather than otherwise, and this has caused buyers both here and in Man-chester to confine their operations to the supplying of immediate wants; especially as the state of trade in general, and of the cotton trade in particular, at home and abroad, has been diate wants; especially as the state of trade in general, and of the cotton trade in particular, at home and abroad, has been so lifeless—present and prospective - that anything like ener-getia-business has been quite out of the question. The Man-chester market opened quietly, but improved later on. and in the course of the fortnight subsequent to the issue of our last report a good business was done at full prices. Prices show very little change, but in some instances the final rates are rather lower than those of a month since. The deliveries to home consumers since the opening of the year have reached 1,013,220,000 lbs, against 1,212,012,000 lbs; the average weight being about 390 lbs, and 393 lbs respectively. It should be borne in mind, however, that the annual count of stock in Liverpool at the end of last year disclosed an excess of 88,630 bales. The correct comparison of deliveries for home con-sumption is, therefore, 2,847,000 bales this year, against 2,995,000 last year; a reduction of 148,000 bales. As pointed out in previous reports, part of this reduction is due to the stoppage of machinery at Oldham, &c., part to the reduction of stock held by spinners, and part to the operations of the New Factory Act. Continental consumption—2,148,129 bales, or 45,705 bales per week. Last year the deliveries were 2,145,720 bales, or 45,642 bales per week. The prospects of supply and demand remain pretty much where they stood a month ago. There is still the same difference of opinion re-specting the probable outturn of the American crop; the same want of activity in the leading markets throughout the world; and the same dulness in the general state of trade that existed at the date of our last report. and the same dulness in the general state of trade that existed at the date of our last report.

at the date of our last report. (From Messrs Hazard and Caldecott's Report on the London Colonial Wool Sales, dated December 14.)—The fourth and concluding series for the present year commenced on 23rd ultimo and closed this day :—Catalogues contained : Cape of Good Hope, 37,095; Sydney and Queensland, 23,456; Port Phillip, 20,410; New Zealand, 18,400; Adelaide, 3,263; Van Diemen's Land, 1,822; Swan River, 402—total, 104,848 bales. The attendance has been larger than usual for the last sales of the year, although foreign buyers have not mustered in large numbers; the biddings have generally been fairly spirited. About 28,000 bales have been taken for export. The selection of Australian wool was irregular and for the most part poor. Cape wool, which was in large supply, showed at opening a decline, which was further increased as the sales progressed, particularly for seedy and faulty scoured wool, of which there was a very large preponderance, some of which had to be was a very large preponderance, some of which had to be withdrawn from time to time, offers for such being particularly low. As the sales drew to a close, there was for a few days rather a better demand for scoured and snow white, which, however, was not maintained to the end, as compared with the rates current at the termination of the previous sales; we quote Cape wool lower by 1d to 1½d on fleece washed; ½d to 1d on grease, and 1½d to 2d on scoured and snow white, the most sensible depreciation being on seedy and faulty lots; this decline, added to that established at the August-September auctions, makes a heavy total from the earlier part of the year, rather than submit to which some importers have re-frained from offering their wool, reports from the Cape seem-ing to indicate a delay in the clip, and consequent short supply next February, while prices current in the colony, according to last mail's reports, are an advance of those now obtainable here. The Australian clip is reported later than at first expected, so that it is probable the next sales, which are to commence on 15th February will not be particularly heavy to commence on 15th February, will not be particularly heavy. The general reports from the various manufacturing districts indicate a fair consumption of the raw material going on, but nothing particularly brisk in any quarter. The demand for Germany is still very restricted, as also for America; from the latter it is reported that there is some indication of a better demand, owing to the lightness of stock of wool

there. The import of wool this year will, we expect, show an

increase of about 52,000 bales over last year will, we expect, show an increase of about 52,000 bales over last year. (From Messrs Schmidt, Son and Co.'s Havana Report, dated Havana, November 6.)—After the 7th ultimo the sugar market continued to rule quiet up to about the latter part of the past month, when, with a good disposition on the part of helder to all and the simple account of more sugar holders to sell, and the simultaneous receipt of more encouraging news from Europe, quite important transactions were effected, especially in common clayed descriptions, Nos. 11 to 13 at prices, varying from 15 to 15⁴/₂ rs bills; No. 12, according 13 at prices, varying from 15 to 15 rs only; No. 12, according to quality. Sugars of good quality are scarce, and not be obtained below these prices, whereas soft sugars below No. 12, which are abundant, can be bought comparatively cheap. The stock here amounts to 134,260 boxes and 3,616 hhds, against 88,341 boxes and 2,501 hhds at same period last year. The weather continues to be favourable to the crop, which so far

promises to be an early and abundant one. (From Messrs J. Berger Spence and Co.'s Weekly Chemical Report, dated December 11.)—Manufacturers are gradually beginning to evince a greater amount of firmness, and seem less disposed than ever to contract forward, and in one or two instances have positively refused to entertain offers made at no inconsiderable advance. While we cannot reasonably an-ticipate much actual improvement in the position of our trade during the remainder of the month, on account of the inter-ruption of the approaching holidays, nevertheless we think that on the whole it will be found to have closed without any serious departure from the rates ruling at its commencement. Bleaching Powder-Makers continue extremely firm for forward delivery, also a tendency to firmness for present has de-clared itself. Soda Ash—Although prices remain unchanged, a fair amount of business has been done. Cream and white caustic denote a slight advance on last week's prices, and close firm. Sulphate of ammonia has many inquiries, and con-siderable business has been transacted at firm prices, prin-cipally for prompt delivery, makers declining all offered for-ward contracts at present prices.

THE COTTON TRADE.

MARKETS IN THE MANUFACTURING DISTRICES.

MANCHESTEE, Dec. 16.—A more general demand has prevailed in our market during the past few days, and, in sympathy with the activity in cotton, prices exhibit a hardening tendency. In goods a larger business has resulted. Shirtings have sold to a fair extent. Jacconetts, mulls, and madapollams have also been in good request. Printing cloths quiet, but owing to reduced production, values remain exceedingly steady. T cloths, long cloths, domestics, and drills sell slowly; prices, however, are quite firm. Yarns have been decidedly better to quit. In export descriptions, an average business has been done for India, China, and Japan. For the continent the trade reported is unimportant. Home trade qualities remain unchanged. In medium counts a moderate inquiry prevails; there is likewise a better demand for fine spinnings, more especially for the Glasgow market. Coarse numbers are still neglected, and only saleable at miserably low prices.

BRADFORD.—The improved tone recently manifested in the wool market has subsided. There is a moderate consumptiv demand, principally in Irish, Kent, and other demi-lustr^e wools of quality, at late quotations, but any attempt to obtai e an advance in price prevents business. The same absence on

animation so apparent in the wool market has characterised the yarn market. Spinners generally are well engaged on orders recently taken, and maintain quotations with firmness. In some instances where spinners are not so fortunately situated, a slight concession may be secured on actual business. Merchants, however, are not in a position to do much business; they receive fewer orders from abroad as the end of the year approaches, and these are offered at lower rates, which are not frequently accepted.

which are not frequently accepted. LEEDS.—Merchants are winding-up the year's affairs, and approach the task in a sanguine spirit. Manufacturers of all classes of cloth, especially of low fancies and unions, but also of fine hair iists and superior and medium coalings, are satisfactorily employed, though some of the former have not been so for months past.

BIRMINGHAM.—Very few orders are stirring at present in any department of the local iron trade, but mills and forges are for the most part in steady operation still, with a view to the completion of current contracts before the Christmas holidays. There is increasing depression in the pig department. The pressure of competition from other districts is keenly felt by Staffordshire smelters. In the finished iron trade the makers of sheets are tolerably well off for employment. In other departments there is great scarcity of orders. Coal is firm.

WOLVERHAMPTON.—Coal has become scarce, as well for ironmaking as for domestic purposes. Pigs of a good quality were dearer in proportion. Finished iron was less in request, and some kinds might have been bought at 2s 6d under last week.

MIDDLESBOROUGH.—With the holiday season and stocktaking, very little additional business will probably be done for the remainder of the year. There are some inquiries for rails pending. Messrs Jones Brothers' works have made a fresh start at Middlesborough this week, and one of the Stockton works is also likely to be again put in operation. The Darlington Iron Company, however, stopped a number of puddling furnaces. The improvement noticed in the plate trade lately continues. The bar trade, however, is slack. As the wages question remains in statu quo, there is no final arrangement yet made for arbitration. In the Cleveland ironstone wages question, the employers ask the reduction of 2d per ton, to which the men have given no answer. The pigiron trade showed a great deal of firmness.

BELFAST.—Business in all branches of the linen trade has been very quiet, the temporary disturbance caused by the recent failures having checked transactions. A better feeling is again beginning to spring up. Linen goods have been moving slower for the past few days. Prices, however, show no change, manufacturers being generally well employed. The continental demand is very dull at present, but there are some indications of improvement in trade with the United States of America.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK-December 3.

The flour market this week has been quiet, and prices have There has been gradually an developed some weakness. accumulation of stocks at this point, and holders show some anxiety to effect a reduction. It is expected that the close of inland navigation at the North and West, together with a considerable advance in rail freights Eastward, will materially reduce receipts at this point; but the present needs of sellers, and the check upon exportation which is imposed by the dull foreign advices, and the scarcity and high rates of ocean freights, are the ruling influences at the moment. The wheat market has not varied to any important extent. The stock here is unusually large, and receipts at the West have continued on a liberal scale, showing a large increase over last year; but large quantities have been detained on the canal and river, by their sudden closing, and it is believed that high rail freights will prevent any considerable supplies coming forward during the winter. The demand has been limited, whether for export or milling. Foreign advices have been dull, and ocean freights scarce and higher; and there has consequently been some disposition to operate at the West for a decline. Indian corn declined early in the week, and several boat loads of prime sail mixed sold on Wednesday at 73c to 73½c, from which there was a recovery yesterday to 74½c. The demand has not been active, but receipts and stocks are com-paratively small at all points, and holders feel much confidence.

The following are the closing quotations :- Flour: Superfine State and Western, \$4.65 to \$5.00; extra State, &c., \$5.30 to \$5.50; Western spring wheat extras, \$5.25 to \$5.60

THE ECONOMIST.

Peas, Canada, \$1.07 to \$1.25 per bushed \$1.25 per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING.

The condition and prospects of the wheat trade have not varied much since last week. Influenced, partly by the ad-vanced period of the year, but more by the heavy supplies of foreign in stock and arriving, millers and dealers continue to pur-chase as sparingly as possible, and business, in consequence, is extremely dull. Holders, at the same time, look for a better demand later on, and consequently do not press sales so as to prejudice values materially; as usually is the case, however, in dull markets the tendency is downwards. Farmers' deliveries are still very light, and fall considerably below the average of preceding years. Of foreign, the imports are rather less this week than last, but there have been numerous arrivals off coast. In some of the provincial markets wheat prices have slightly given way, say to the extent of 6d to 1s per qr, and slightly given way, say to the provincial markets wheat prices have slightly given way, say to the extent of 6d to 1s per qr, and at Mark lane rather easier rates have occasionally been ac-cepted for ex ship parcels, to save landing charges, but not to establish any quotable reduction. Cargoes off the coast have, however, been offered at 1s per qr less than on last Friday, without meeting ready buyers. The sales during the week have included Odessa and Nicolaieff Ghirka at 46s 3d; Marianopoli at 48s 6d per 492 lbs; American spring from 49s 6d down to 49s; and white winter from Montreal at 51s 6d per 480 lbs usual floating terms. In flour there is very 51s 6d per 480 lbs usual floating terms. In flour there is very little passing, and prices continue to droop, although the change is hardly noticeable in quotations. Barley is very dull of sale, and prices weak, the market being affected by the large supplies of English coming forward from time to time, and the deliveries, according to the Board of Trade Returns, show no indications of falling off. Foreign arrivals have slightly increased, but are not heavy. For choice qualities of malting, which comprise but a very small portion of the supplies, rates are steady, but middling and inferior grades are very difficult to sell, even on lower terms. Feeding descriptions also hang on hand, and are cheaper to sell. Floating cargoes have sold at reduced rates, and Galatz off the coast at 24s 10³d; Smyrna at 27s 6d; and on passage, Danubian at 24s 9d per 400 lbs, tale quale, cost freight and insurance to the United Kingdom. There have ag ain been large imports of oats, chiefly Russian, 51s 6d per 480 lbs usual floating terms. In flour there is very There have again been large imports of oats, chiefly Russian, and prices have ruled in favour of buyers. Maize has supported late value, but meets only a limited demand, either on the spot or flo ating. Beans are firm, and clear off readily on arrival. Peas sell steadily without change in value.

COLONIAL AND FOREIGN PRODUCE MARKETS TRANSACTIONS OF THE WEEK. FOR REPORT OF THIS DAY'S MARKETS SEE POSTSCRIPT.

MINCING LANE, FRIDAY MORNING.

MINCING LANE, FRIDAT MORNING. SUGAR.—The few sales made in refining qualities of West India have been at about former rates, and the market generally is rather quiet. Some purchases of Jaggery of the new crop for arrival have been the principal features of importance this week. Other low brown sugars attract a little more attention. The crystalised Demerara by auction met eager buyers at 6d advance, as the grocers hold low stocks. Middling to very fine yellow, 27s to 29s; pale and grey, 25s 6d to 26s 6d. The Barbadoes withdrawn. Including these parcels, 902 casks West India sold to yesterday. 2,634 bags found buyers. Demerara as above. Low yellow Barbadoes at 19s 6d. Trinidad Usine at the re-duced price of 25s per cwt. The stocks of sugar in the four chief ports of the kingdom on the 11th inst. were below those of last year, with a continuance of large deliveries. Estimated increase to present date about 79,000 tons com, ared with 1874, and about 124,000 tons contrasted with 1873. IMPORTS and DELIVERIES of SUGAR into LONDON to Dec. 11, with Stocks on hand.

Jaggery.—The sales of new crop to arrive have so far amounted to about $1,500 \pm 2,000$ tons at 14s 3d to 14s 6d. 2,657 bags by auction were taken in above the value. By private contract 2,000 bags are reported sold at about 14s.

Mauritius .--- 283 bags sold at 17s to 17s 6d for low yellow. Privately 750 bags grainy at 21s.

Penang .- About 2,500 bags native brown sold at 15s 6d to 15s 9d. Natal .- 251 bags concrete at 15s 6d to 16s.

Bourbon .- 904 bags brown at 14s to 16s 6d.

Minila.-About 700 tons Zeba sold to arrive at 14s 6d. At auction 316 bags concrete were taken in at 16s per cwt. Cargoes .- One of 2,075 boxes Havana for the Clyde, No. 124, at

22s 71d per cwt. Refined.-Foreign loaves have sold for delivery at some decline. Say's quoted 27s 9d to 28s, f. o. b. Dry goods here are unchanged owing to the reduced make. Pieces and Clyde crystals staady.

TREACLE .--- Of 298 casks Egyptian by nuction, a small portion only

sold at 9s per cwt.

COCOA.—At Tuesday's public sales 806 bags Trinidad about three-fourths sold, and in some cases at barely previous rates, from 50s to 62s for grey and mixed; 63s to 78 for middling to good, and a few fine up to 90s. 244 bags of Grenada, about two-thirds sold at 52s 6d to 56s 6d. 601 bags Caraccas were taken in at 80s to 82s, and the chief part of 97 bags Surinam at 66s to 68s.

Rum.—The business has been chiefly restricted to Demerara at late prices, ranging from 2s 1d to 2s 4¹/₂d per proof gallon, according to quality and package. No further transactions reported in Mauritius rum, which is quiet; also other descriptions.

TEA.—A quiet tone pervades the market. The public sales have been small, and prices do not show any decided change since last Friday. Medium to good grades of Congou are tirm. All common kinds remain dull. Good green teas have met a steady demand, but there is not any improvement in the lower classes. Arrivals are rather large during

the last week. The public sales to yesterday comprised only 3,800 packages. Of Indian 4,130 packages sold at about steady rates for good qualities.

RICE .- Transactions on the spot have been too small to quote. The Weekly Circular of the Rice Brokers' Association reports two cargoes Necrancie Arracan sold. One 1,012 off the coast at 7s, London ex ship terms; one of 1,638 tons June sailing at 7s 1gd, same terms; one Ran-goon, 1,462 tons, off the coast, at 8s 6d Liverpool ex quay terms; one 746 tons, at 8s 12d, continental terms, or 12d per owt less if for ditto the United Kingdom.

TAPIOCA.-186 bags pearl chiefly sold at 17s 6d to 18s per cwt for addium. 303 bags Singapore flake sold at $1\frac{2}{3}$ d to 2d per lb.

BLACK PEFFER.—By private contract sales of some extent are reported in Penang, chiefly at 4¹/₂d for common. Singapore sold to arrive at 4³/₂d. 933 bags of the latter by anotion yesterday, part sold at 5d for common quality. Sea-damaged in proportion. 511 bags Penang common quality. 'Sea-dar withdrawn above the value.

WHITE PEPFER has been unsettled, but 1.075 bags Singapore in

WHITE PEPPER has been unsettled, but 1,075 bags Singapore in yesterday's sales about three-fourths sold, and met with ready buyers at a decline of 4d; common to middling, 7d to 7⁴/₈ per lb. OTHER SPIGES.—Cloves are dull. 120 packages Amboyna were only partly sold at 1s 5⁴/₂d to 1s 6d. 603 rackages Zanzibar were chiefly withdrawn. A few lots low and ordinary sold at 1s 1d to 1s 2³/₂d. 1,374 bags pimento, part found buyers at inregular prices, from 3⁵/₂d to 4d per lb. 25 packages nutmegs part sold at 1 revious rates. 4 cases mace were chiefly taken in. 100 bags African ginger bought in at 47s to 48s; 98 bags Benga' at 41s 6d. 40 barrels Jamaica withdrawn ; also 51 cases 99 bags Cochin. 'A few cases fair scraped sold at 80s per owt.

per cwt. SALTPETRE.-The market is quiet, and there have not been any sales

ported during the week. DRYSALTERY GOODS.—Bengal turmeric is firm. Sales at 28s 3d to bs. 307 bags Madras by auction were taken in at 30s. Gambier 20a. quiet. Bales have sold at 26s 4gd ex quay. No alteration to report in outch.

quiet. Bases have sold at 2005 430 ex quay. No alteration to report in outch. SHELLAC.-247 chests by auction part sold: fine orange at 9/ 15s to 9/ 17s 6d; reddish second orange at 7/ 10s; A C garnet at 6/. Some of the mark I (in a diamond) sold privately at 6/ 10s ex last week's sole. METALS. The transactions generally have been of moderate extent this week, and the tone of the markets steady. Copper is firmer, with sales at about 1/ recovery on the lowest prices of last. Chili, 81/ 10s to 82/ for current qualities. Australian quoted 89/ to 91/. No change in British. 120 tons sheet zinc, rolled at the London mills, brought to auction yesterday, about half sold at 29/ 10s per ton. The iron markets do not recover from the late depression. Rails quoted 6/ 10s to 6/ 15s at the works. Scotch pig cheaper. Latest sales at 62s 3d to 62s 44d cash. A considerable quantity of Straits tin has seld this week. In the early part 82/ to 82/ 10s paid; subsequently, business at 81/ to 81/ 10s; for delivery the same. Sales of Australian at 79/ 10s to 81/, according to terms and quality. English tin, 85/ per ton. Speiter is firm. P H to arrive has sold at 25/ 15s per ton. Quicksilver, about 11/ 10s per bottle 11/ 10s per bottle

-Since last Friday amoderate business has been done, chiefly JUTE. for arrival, at firm prices. Latest sales at 14/ 10s to 17/. The de-mand for jute on the spot is steady, but the public sales on Wedweeday went off slowly, and 8,938 bales less than one-fourth part sold in the room at irregular prices. Dundee goods have metha fair inquiry.

room at irregular prices. Dundee goods have met a fair inquiry. MANILA HEMP. — There are not any public sales declared for next week. 1,000 bales fair quality recently sold by private contract at 29/ to 29/ 108. 40 tons Russian, &c., by auction, part sold, including some Polish outshot at 35/; pass., 33/ to 33/ 108; damaged in propertion. LINSEED. — Prices of Calcutta on the spot are rather lower. Several sales reported, the latest at 528 3d to 528 6d ex ship, and 538 3d paid to arrive, December to January shipment. A large steamer cargo of Azov, about 8,000 quarters, on passage, sold for the United Kingdom at 568 6d; one coast cargo at 568 9d per quarter. PERCOLEUM OIL is firmer, at 1s to 1s 0¹/₄d; for delivery, 10²/₄d to 11²/₄d 16. gallon.

10 gallon.

SFIRITS TURPENTINE steady. American, 25s 6d; January to April, 26s per cwt.

26s per owt. OLS.—A limited business done in olive at former rates. Sperm has sold at the advanced pice of 98/, owing to the rise in the American market. Pale seal and pale Southern, 34/ 10s per tan. Low qualities dull. Linseed oil is again rather lower, with a quiet market: present quotation, 24/ 15s to 25/; January to April, 25/ 10s to 25/ 15s. At one time during the week English brown rape touched 38/ 10s; subse-quently a firmer tone, and 38/ 15s to 39/ paid; January to April delivery, about 38/; retined, 40/ 10s to 40/ 15s. No change in cocca-nut, the sales being of moderate extent. Ceylon, 38/ 10s to 39/ 5s, according to package; to arrive, 38/ 15s; Cochin, 40/ to 42/. Palm dull. Fine Lagos, 39/ per tun. TALLOW.—The market is firm, but quiet, and the public sales to day (the last of the year) are small. A further reduction in stock has oc-curred, and it "is already far below anything on record at this time of year for 50 years." Petersburg, 53s; old, 50s 6d to 51s per cwt. "Farricenears of Tallow-Monday, December 13.

POSTSCRIPT FRIDAT EVENING.

SUGAR.-The market continues dull, and business in West India has been suspended. Transactions in other kinds also limited. Coffee.-50 casks 3 barrels 8 bags plantation Ceylon sold at steady rates, including a few lots of the new crop. 629 bags Singapore were taken in. 329 bags African part sold at 84s. 354 bags other foreign were chiefly bought in.

Rice. $-\Lambda$ cargo of Bassein off the const sold at 8a 41 d ex quay. One of 750 tons Siam to arrive at 7s 6d United Kingdom.

SHELLAC .--- Of 441 chests about 350 sold : livery orange, 6/ 5s to 7/; a few dark button, at 5/10s. DRYEALTERT GOODS.-177 bales Bengal safflower part sold at 3/ 5s to 4/ 12s 6d for new crop, being lower. A few lots low old crop at 50s

per owt. METALS .--- Chili copper firm at an advance. Tin steady at previous quotations. OILS .- 210 puncheons, &c., Cochin, and 367 casks, &c., Ceylon, by

auction withdrawn.

TALLOW .- No alteration in town or Petersburg. 517 casks Australian by auction went rather dearer for beef, from 46s to 47s 6d; mutton sold up to 50s 6d; finest, worth 51s to 51s 6d. 195 pipes South American beef part sold at 47s 6d to 49s per cwt.

ADDITIONAL NOTICES.

TEA.—The market continues in a dull state, the damp and foggy weather interfering with business. Black-leaf Congous were sold on easier terms at the auctions. Common green teas are still pressed, and bring very low prices; but fine uncoloured kinds meet with rather better inquiry.

FRUIT .- The report of Messrs Keeling and Hunt GREEN FRUIT.—The report of Messrs Keeling and Hunt states market for oranges is well sustained, more particularly those of good quality. Lemons dearer; Barcetona nuts in good demand; not any black Spanish nuts here. French chesnuts and walnuts selling freely. More inquiry for Almeria grapes and Brazil nuts. Few Oporto onions of good quality realise high prices. ENGLISH WOOL.—There is but little change to report this week, either in fleece wools or skin wools. Prices rule firm with a moderate turn over. GREEN

turn over. FLAX.—Not any sales made this week, prices unaltered. HEMP.—Russian clean rather quieter, very little business doing; in Manila some pressing sellers have accepted a reduction of from 10s

to 15s per ton for fair to good fair qualities. SiLK.—Market very dull, chiefly in consequence of the forced sales daily taking place in Lyons and Milan by importers who have imported in excess of demand. On this market, however, holders are firm and refuse any decided concession. TOBACCO.---The past week has been one of unusual dulness, and no

transactions of importance have taken place in American tobacco, the home-trade buyers having taken only what they needed for their immediate need. For export there has been but little demand, and with the present limited state, the sales have been triffing. In substitutes there has been a fair inquiry for the better classes, which con-tinue to bring fair rates. Further supplies would meet a steady sale. Segar tobacco continues in good domand.

LEATHER.—The leather trade of the past week, and at Leadenhall on Tuesday, has been on the usual small scale of the season of the year. The supplies have also been limited; prices show scarcely any change, former rates being generally paid for the small quantities to which buyers are now restricting their purchases.

METALS, -A dearth of business prevails, without change in values, opper has been rather sluggish in demand, but news of small Chilian Copper has be mall Chilian charters for the first half of this month has somewhat stiffened prices of that kind. Iron is getting a trifling better demand for some kinds. Tin is quiet, and last week's values barely maintained. Spelter steady. Lead rather firmer. Tin plates continue flat.

THE GREAT CHRISTMAS CATTLE MARKET.

THE GREAT CHRISTMAS CATTLE MARKET. The display of stock, excepting the arrivals from Scotland, has not come up to the average of previous years. Nor, indeed, has such a result been wondered at. During the early part of the year certainly pro-pects were tolerably satisfactory; but extraordinarily unsettled weather prevailed, not only here but on the continent, and by greatly damaging the growing crops materially enhanced the value of feeding stuffs, and increased in a corresponding ratio the expenses of graziers and traders. In consequence, the rearers of cattle, foreseeing the pro-bability of future difficulties were indiposed to keep their varies too and traders. In consequence, the rearers of cattle, foreseeing the pro-bability of future difficulties, were indisposed to keep their yards too fully stocked, and instead preferred to forward earlier in the season numbers of half-fattened stock. The failure of the hay crop was natu-rally a great blow to farmers. The abundant moisture necessarily wrought a great improvement in the roots, and the heavier returns from them in some measure counterbalanced the losses in other quarters; but it is admitted that the past season has not been one on which graziers and breeders will look with complacency. At this time last year the best hay was selling at 110s, and the best clover at 120s per load; but now the choicest samples of hay are making 144s and clover 155s, being an advance of 34s and 35s per load respectively. Although a falling off in condition may be noticed, a degeneration in quality or breed cannot for a moment be admitted. With the reduction of bone has succeeded a greater production of flash, and although the stature has not been so large, the meat has been much less coarse, and therefore necessarily more valuable. The Souch breeds have been therefore necessarily more valuable. The Scotch breeds have been more numerous than usual, and their condition has been excellent, and the numerous bids which were received for them testified to the public stimation in which they were held. The Scotch breads certainly carry preed. estimation in which they were held. The Socieh breads certainly carry off the palm so far as regards excellency of quality and purity of bread. Cross-bred stock is of course, in favour, owing to its undoubted utility, the greater profit attending its rearing, and the universal satisfaction afforded to consumers. A fair number of Devons and Herefords have come to hand, but the old Sussex breads have been poorly represented. Owing to the sanitary restrictions still in force, the show of continental

THE ECONOMIST.

10

[Dec. 18, 1875.

breeds has not been so numerous. Still, the endeavour to rival our excellence is evidently kept thoroughly in view by our foreign competitors.

STATE OF TRADE .- Throughout there has been a great want of anima-STATE OF TRADE.—Throughout there has been a great want of anima-tion. The market is held rather too early to please the butchers; hence there is a dragging trade. As regards beasts the inquiry runs princi-pally for the choicest small stock, heavy breeds being difficult to move. The extreme quotation for the best Scots is 6s 6d per 8 lbs. Sheep have been in short supply, and have experienced a dull demand. For the best Downs and half-breds 7s 2d per 8 lbs has been an outside price, the more general rate being 7s per 8 lbs. Calves have changed hands quietly, at previous rates. Pigs have been dull. METROPOLITAN CATTLE MARKET, December 14, 1874. Dec. 13, 1875. Dec. 14, 1874. Dec. 13, 1875.

NOTICE CONCERNING THE CONSTRUCTION OF BONDING WAREHOUSES.

In Budapest, the Hungarian capital, the erection of bonding warehouses on the lower banks of the Danube is intended, the construction and management of which is to be submitted to contractors. The following terms and guarantees have been laid down for parties wishing to make BIDS:— 1. The bonding warehouses are to be built on the left bank of the Danube in the capital, on the grounds below the Custom-house. 2. The bonding warehouses must have room for 1.200,000 (eventually more) toll hundred-weight of row modupe and other goods capacity grain

90 years

4. The bonding warehouses will be connected with the freight depôt, the chief Custom-house, and the Junction Railway at the cost of the State, and without expenses to the con-

tractor. 5. The Royal Government will procure for the business of these bonding warehouses the exemption from the income tax for 30 years, and from stamp duty for the shares, by way of legislation

6. The capital will, in a like manner, grant a remission of the additional city tax for the

6. The capital will, in a like manner, grant a remission of the additional city tax for the same term of years.
7. The remission of the municipal passage toll for the building material and other communal taxes will also be granted by the community.
8. The metropolitan community is willing, if desired by the contractor, to deviate from the existing building regulations, and to grant such facilities in building as may be agreed u pon by the contracting parties; and, furthermore, to grant this bonding warehouse enterprise, besides the above-mentioned, still further material aid, the extent and nature of which is reserved for the agreement with the contractor.

is reserved for the agreement with the contractor. All those who are willing to enter into negotiations on the basis of the above said are hereby requested to send in their Tenders, together with plan-sketch and description of the interior arrangement, on or before the 1st of February, 1876, to the office of the Burgomaster of Budapest (IV. Bezirk, altes Stadthaus, ersten Stock), where further particulars concerning situation, &c., may be obtained. Budapest. — Extract from the records of the general meeting of the Metro-politan Municipal Council, held on the 17th, and continued on the 18th and 19th of November, 1875.

polita 1875.

KARL KAMMERMAYER, Burgomaster.

HUBBUCK'S PATENT WHITE ZINC PAINT Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper in use than White Lead Each Cask of Pure White Zinc is stamped—"HUBBUCK'S, LONDON, PATENT."

HUBBUCK'S PALE BOILED OIL

Being much purer than raw linseed oil, is the only boiled oil that can be used for White and delicate coloured Paints. It dries quick and hard, never blisters, and is more durable.

HUBBUCK'S ANTI-OXIDATION COMPOSITION

For Coating Iron and Wood Ships' Bottoms: a preservative against fouling and corrosion. This composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S WHITE LEAD, COLOURS, OILS, AND VARNISHES Are the best and therefore the Cheapest, and are properly packed for Exportation to all Climates.

THOMAS HUBBUCK AND SON, 24 LIME STREET, LONDON.

L'ÉCONOMISTE FRANÇAIS, JOURNAL HEBDOMADAIRE.

REDACTEUR-EN-CHEF-M. PAUL LEROY-BEAULIEU.

PRINCIPAUX COLLABORATEURS-MM. MICHEL CHEVALLER, WOLOWEKI, LEONCE DE LAVERGNE (Membres de l'Institut), CLEMENT JUGLAR, MAURICE BLOCK, DE MALARCE, MICHEL ALCAN, DE FOVILLE, A. MANGIN, ETC.

L'ECONOMISTE FRANCAIS, fondé depuis deux ans et demi, traite toutes les questions économiques et administratives, budgets, impôts, douanes, marine, colonies, régime des chemins de fer, questions monétaires, progrès industriels, questions sociales, instruction publique, statistique, etc.

Il reproduit les discussions de la Société d'Economie Politique de Paris et il analyse les travaux de la Société des Ingénieurs Civils, de la Société de Legislation comparée, de la Société d'Encouragement pour l'Industrie Nationale, des Chambres de Commerce et des Chambres Syndicales de l'Industrie Parisienne. Il analyse et il étudie tous les documents officiels français et étrangers sur les finances, le commerce, l'industrie, les questions sociales, etc.

Il contient des correspondances particulières des principaux pays de l'Europe, de l'Orient, et de l'Amérique.

A la suite de sa partie économique, L'ECONOMISTE FRANCAIS publie une partie commerciale très-étendue et une partie financière qui fait autorité.

L'ECONOMISTE FRANCAIS a acquis une situation considérable en France et à l'Etranger. Journal à la fois scientifique, financier, et industriel, il se recommande pour la variété des matières qu'il traite, l'abondance et la sûreté de ses informations. Constamment cité dans la Presse, il l'a été aussi plúsieurs fois à la tribune de l'Assemblée Nationale, où un Député bien connu, M. Leurent, disait de lui, "Un journal dont tout le monde reconnait l'autorité et le mérite."

On s'abonne au Bureau de L'ECONOMISTE FRANCAIS, 17, rue du faubourg Montmartre, à Paris; chez Delizy, Davies, and Co., 1 Finch lane, Cornhill, à Londres; et chez tous les Principaux Libraires.

Prix de l'abonnement: France-40 francs par an, 20 francs pour 6 mois. Pour Etranger, le port en plus. Les abonnements partent du ler et du 15 de chaque mois.

 III.-FOODS. By EDWARD SMITH, M.D., LL.B., F.R.S. Third Edition, profusely illustrated, price 5s.
 "Dr Smith discusses, with much minuteness, the economical and sanitary value of the various kinds of animal and vegetable food which are commonly in use, and of drinks, both alcoholic and other."-SPECTATOR.
 "Few men have so fully and carefully studied the action of foods as Dr Edward Smith, and the number of experiments which he has made is quite astoniabing. The book contains a very large amount of useful information in a small space."-ACADEXX.

Dook contains a very large amount of useful information in a small space. —ACADEMY.
IV. —MIND AND BODY: The Theories of their Relation. By ALEXANDER BAIN, LL.D. Fourth Edition, with four illustrations, 4s.
⁴⁴ The work before us seeks to complete the doctrine of the relation between con-sciousness and bodily organism by noting and classifying the normal instances. It proposes to show not how curiou by disease or any sudden change in bodily function affects the brain, snd through the train the mind, but how completely all the familiar processes of sensation, thought, and emotion flow, so to speak, upon the surface of nervous currents, which sustain and fashion their ever-varying shapes."—SATURDAY REVIEW

V .- THE STUDY OF SOCIOLOGY. By HERBERT SPENCER.

"There is no lack of interest even to those who are not inclined to concers them " It contains, Average is no lack of interest even of those who are interacted concerns inter-lives with the projected social science." - ACADENCL. " It contains, as any writing of Mr Spencer's needs must, a great amount of interest-ing and suggestive matter." - SATURDAY REVIEW.

Ing and suggestive matter."-SATURDAY REVIEW.
 VI.-ON THE CONSERVATION OF ENERGY. By BALFOUR STEWART, M.D., LL.D., F.R.S. Third Edition, with fourteen engravings, 5s.
 "Thorough and simple......A boon to science and the world at large.......Even the uneducated can obtain an accurate knowledge, provided they are taught by as sympathetic and suggestive s teacher as Professor Stewart."-SATURDAY REVIEW. _____ "A lucid and extremely simple exposition of the laws involved in the general state-ment that energy is indestructible."-EDINBURGH MEDICAL JOURNAL.
 VII.-ANIMAL LOCOMOTION . on Working Science 1.

VII.—ANIMAL LOCOMOTION ; or, Walking, Swimming, and Flying. By J. B. PETTIGREW, M.D., F.R.S. Second Edition, with 119 illustrations, 5s.

illustrations, 5s. "It is a char and comprehensive résume of the present advanced stais of our moviedge of animal locomotion, as shown by the most recent successful experiments ad discoveries."—STANDARD. "By those interested in anival locomotion Dr Pettigrew's new volume will be relocated. We have great pleasure in recommending it as in every way worthy a serusal. The reader will find it replete with bold, original, and it teresting matter. The chapter on Aeronaudes cannot fail to rivet the attention."—LANCET. perusal. The chapter

The enapter on Aeronautics cannot tail to rivet the attention. —LARCET.
VIII.—RESPONSIBILITY IN MENTAL DISEASE. By HENRY MAUDSLEY, M.D. Second Edition, äs.
"This volume contains in a clear and popular form the results of all the most recent investigations into the nature of iosanity. The volume is altogether one of the best of the International Scientific Series which has yet appeared, and will add to its author's high literary reputation."—ACADEMY.

IX.—THE NEW CHEMISTRY. By Professor J. P. COOKE, of the Harvard University. Second Edition, with thirty-one illustrations, 5s. "Many portions of the book are eminently suggestive to the sudent."—ACADEMY. "The science it contains is popular science in the best sense of the term. The great ideas of modern chemistry are presented with singular clearness and with very varied illustration."—LANCET.

X .- THE SCIENCE OF LAW. By Prof. SHELDON AMOS.

X.—THE SOLUTION: Second Edition, 5s. "Mr Sheldon Amos has written a work on the Science of Law in a style adapted to the ordinary reader who wi-hes to become familiar with the landmarks of jurispru-dence......Much would remain unsaid though we discussed the author's very interest-ing volume at far greater length; but this we can say, that it does 'open out to novices an unsuspected region of interest,' and that we hope with Mr Amos it will 'whet their curiosity and stimulate them to further research."—Law Trugs. **TECH ANISM**: a Treatise on Terrestrial and

XI.-ANIMAL MECHANISM: a Treatise on Terrestrial and Ariel Locomotion. By Professor E. J. MAREY. Second Edition, with 11/ illus-

Artel Locomotion. By Professor E. J. MAREY. Second Edition, with 11/ illus-trations, price 5s. "It is not only to a passage here and a passage there that we have had to refer, but to the thorough exposition of intricate problems of mechanica' physiology, which have been worked out with a degree of ability rarely to be found in a single author." --NATURE. XII

NATURE.
 II.—THE DOCTRINE OF DESCENT AND DARWINISM. By Professor OSCAR SCHMIDT (Strasburg University). Second Edition, with twenty-six illustrations, 5s.
 ⁴ The book is one of very conspicuous ability, and will be read with profit even by ose who may take occasion to dissent from its special conclusions."—ScoteMAN.

those who may take occasion to dissent from its special conclusions."—SCOTMAN. **XIII.—THE HISTORY OF THE CONFLICT BETWEEN** RELIGION AND SCIENCE. By Professor J. W. DRAPER. Fifth Editon, 5s. "Certaioly it is long since a book with such an important bearing on society, and so thoroughly scientific, and therefore impartial, was placed in the hands of this British public as that of Professor Draper's 'Conflict between Religion and Science.' And assuredly very few men could have been found so thoroughly able to criticise the scientific side, and yet to enter freely upon the literary, as the learned Professor of Physiology in the University of New York."—POFULEE SCIENCE REFIEW.

Fuynology in the University of New York. - FOFULE SCIENCE REFIEW.
 XIV. -- FUNGI: their Nature, Influences, Uses, &c. By M. C. COOKE, M.A., LL D. - Edited by the Rev. M. J. BERKELEY, M.A., F.L.S., Second Edition, crown Syo, with illustrations, 5s.
 "Mr Cooke, whose numerous works on botany have been gratefully received by a large number of students, has done well to put a mass of valuable facts about Fungi into purtable shape. His book is in all respects useful and satisfactory." -- PALL MALL GAZETTE.

ape. His book is in all respects useful and satisfactory. — TALL MALL GAZETTE, T. — THE CHEMICAL EFFECTS OF LIGHT AND PHOTOGRAPHY, in their Application to Art, Science, and Industry. By Dr HERMANN VOGEL (Polytechnic Academy of Berlin. Third Edition. The translation thoroughly revised. With 100 illustrations, including some beauti-ful specimens of photography, 5s. "To all who wish full information regarding the scientific aspects of photography, "The all who wish full information regarding the scientific aspects of photography," XV.-

h's volume will be welcome."-BRITISH QUARTERLY REVIEW. XVI.-THE LIFE AND GROWTH OF LANGUAGE. By W. D. WHITNEY, Professor of Nanskrit and Comparative Philology in

By W. D. WHARMAN, A. Second Edition, 5a. I.—MONEY AND THE MECHANISM OF EXCHANGE. By W. STANLEY JEVONS, M.A., F.R.S., Professor of Logic and Political Economy in the Owen's College, Manchester. Second Edition, XVII.-

price 5s. ⁴⁴ A very readable and interesting—we may almost say amusing—treatise on what is usually a very dismal and bewildering subject."—SATURDAT BEVEW. ⁴⁵ It is what it purports to be, a collection of facts relative to the past and present monetary systems of the world."—ATHENAUM. ⁴⁶ It abounds in information which every one ought to possess."—ACADEMT.

"It abounds in information which every one ought to possess."-ACADEMY. **XVIII.-THE NATURE OF LIGHT**; with a General Ac-count of Physical Optics. By Dr EUGENE LOMMEL, Professor of Physics in the University of Erangen. Second Edition, with 188 illustrations, and a count of Physics the University plate of spectra

the University of Erangea. Second Edition, with 188 illustrations, and a plate of spectra in Chromo-lithography, 5s.
 XIX. - ANIMAL PARASITES AND MESSMATES. By Monsieur Van BENEDEN, Professor of the University of Louvain, Correspondent of the Institute of France. Crown Sve, with 83 illustrations, 5s.

HENRY S. KING AND CO., 65 CORNHILL, AND 12 PATERNOSTER ROW.

LONDON :- Printed and published for the Proprietors by THOMAS HARPEN MEREDITH. of 340 Strand. at the Economier Office, 340 Strand, in the Parish of St Mary-le-Strand, County of Middlesex.-Saturday, December 18, 1875.
