

WIKI WAY OF PROFOUND KNOWLEDGE

WIKIMEDIA
EDUCATION

WIKIMEDIA

EDUCATION

WikiClassroom

A lesson that is prepared and conducted by the students.

How is it done?

Students

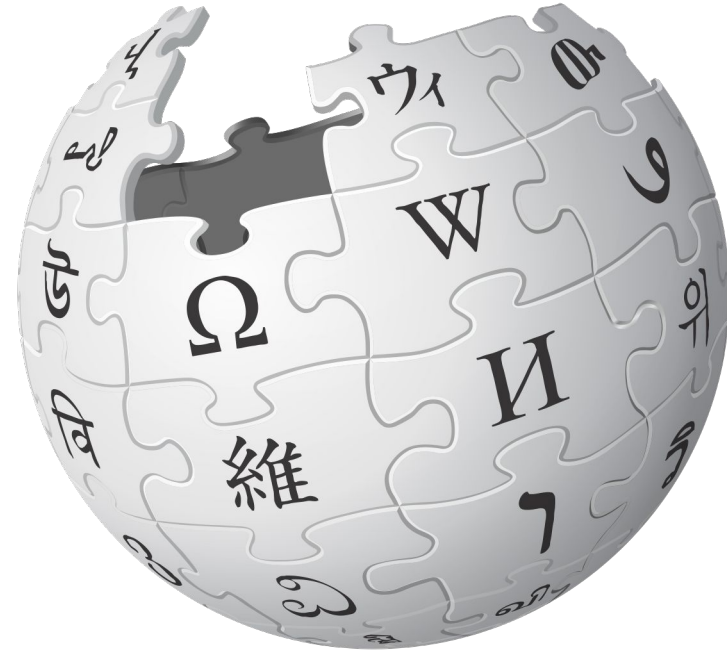

- Choose a topic according to curriculum
- Divide it into parts
- Translate the corresponding article from Wikipedia
- Prepare a presentation
- Run the lesson
- Sum up what they have learned

What will students get?

- ★ Getting profound knowledge about the topic
- ★ Students' integration into the process
- ★ Feeling of importance and responsibility as they become a part of the educational process

Project's impact on Wikipedia

Since the translated articles **are checked** and **improved** by a teacher, the content of articles in Wikipedia will have higher quality.

What are the results?

The project

- ★ Will **increase** interest among the teachers
- ★ Will **intensify** the inflow into WikiClubs
- ★ Will **inspire** another teacher to organize a similar activity in a completely different part of Armenia

Thank you!
