It's 'Most as Easy to Prepare an Outing Meal With Heinz Foods as to Eat It!

No fussing and stewing—no *delays*. The work has been done for you in Heinz Pure Food Kitchens.

The foods and relishes come to you just as pure and delicious as when freshly put up—and you've only to open the packages and serve. One day you may want to serve Heinz *Baked Beans* smoking hot. That means a few minutes heating in the tin. Another time you can serve them cold.

Heinz Cooked Kraut with pork in tins is also a convenience. Ready

to serve and very dainty and appetizing.

Heinz Peanut Butter is just the thing for out-of-door meals—great for sandwiches. Heinz Tomato Ketchup—you can't well be without that, and Heinz Pickles (Sweet and Sour) and Heinz Select

Olives are needed appetizers. Almost everybody has a sweet tooth, so Heinz Strawberry Preserves, Apple Butter, and Currant Jelly are most appropriate. Heinz 57 Varieties are sold by leading grocers everywhere.

Heinz 57 Varieties

H. J. Heinz Company

Member of Association for the Promotion of Purity in Foods

Supplement to Game Laws in Brief

SO many and important changes have been made in fish and game laws in a number of States, during the past winter, that we have found it necessary to issue an eight page supplement of these changes. Paste these eight pages in the back of your copy of GAME LAWS IN BRIEF and you will have complete and correct laws to June 1st, 1912, governing fishing and shooting in every part of the United States and Canada.

Ten Cents is the price of this addenda. Mailed to any address upon receipt of price.

Canoeing

A. C. A. Western Division.

For the first time in the history of the American Canoe Association the Western Division will hold its annual summer encampment on the shores of Lake Michigan July 3, 4, 5, 6, 7 and 8. Camp opened officially Wednesday, July 3, 2 P. M. and closes Monday, July 8, 2 P. M.

Carpenter's Point, at the intersection of Sheridan road and Chestnut street, on the shore of Lake Michigan, midway between Wilmette and Kenilworth.

The Camp Site Committee leased a desirable site situated on a nicely wooded bluff about twenty-five feet above the lake level, sufficiently isolated to afford unexcelled camping facilities. A nominal charge for rental, \$1.50 for the entire camp, or twenty-five cents for the first night, is to be made in addition to the camp dues. Address A. W. Friese, Chairman, Camp Site Committee, Kenilworth, Ill., for reservations.

Members desiring to mess will find fire wood and water handy. Meals may be had at the Carpenter University School at \$1.75 per day.

Dealers will call twice daily to take orders and deliver groceries, meat, ice and other supplies.

A member will be appointed each day as "Officer of the Day."

Pickets will be selected from the different camps when required to protect property and prevent abuses.

Flags will be raised at 8 A. M. and lowered at 7 P. M.

Members will be registered at the purser's tent and obtain their camp badges.

Guests may be invited to the camp. They must be registered and badges provided for them. Guests spending more than one night in camp shall pay camp dues as provided in the by-laws.

Visitors will not be expected in camp before 10 A. M. or after 6 P. M., except on invitation for functions posted on the bulletin board, or with special permission from the "Officer of the Day."

Tents may be located by owners subject to the approval of the camp site committee. All camps must be in order at 10 A. M. No firearms will be permitted in camp.

Reveille, 7 A. M. Colors, 8 A. M. Colors, 7 P. M. Taps, 10 P. M. After 10:30 P. M. quiet must be maintained in the camp.

Divine service will be held at headquarters, Sunday, July 7, 4 P. M.

The prizes will be awarded at headquarters, Saturday evening, July 6, at 7:30 P. M.

1. Western Division trophy, sailing triangular course, half mile on a side, twice around.

2. Gardner cup No. 2, sailing triangular course, half mile on a side, once around.

3. Gardner cup No. 1, paddling, one man, single blade, half mile straightaway.

4. Rockford cup, paddling upset, one man, single blade—upset at signal, climb into canoe and paddle across line—one-eighth mile.

5. Tandem paddling, single blade, half mile straightaway.

6. Double blade paddling, one man, half mile straightaway.

7. Bow end paddling one man, one-eighth mile straightaway.

8. Hurry Scurry, one man, run fifty yards, swim fifty yards, paddle fifty yards.

9. Tilting tournament.

10. Swimming race, seventy-five yards.

11. Consolation sailing, triangular course, half mile on a side, once around. Open to anyone who has not won an event at this meet.

Condition and time of various races will be posted on the bulletin board.

Regatta Committee is composed of Henry C. Morse (Chairman), C. E. Tyson, John Deneau.

**Out
in the
wild-wood**

Whether work or pleasure calls you far from man's habitation, you need never be separated from the luxury, comfort and refreshment of a cup of *delicious* coffee, the nourishment afforded by rich, pure milk—or the good things good milk will make, if you take a good supply of

**CARNATION
MILK**

From Contented Cows

Long journeying, even in the heat or intense cold, if need be, won't hurt Carnation Milk.

It is the best milk nature can produce. Nothing is added to the milk; part of the water is taken out by evaporation at low temperature. When sealed in the cans, it is sterilized to insure its keeping quality—that is all, but only milk of superior quality and perfect freshness will endure the severe test of the Carnation process. Carnation Condenseries are only located where ideal dairying conditions are to be found.

Try Carnation Pancakes—cooked on a flat, hot stone over the camp fire—and coffee, containing plenty of Carnation Milk. Just delicious.

Any man can make delicious dishes out in camp—just like the "home edition"—if you use Carnation Milk and follow the simple directions given in our

FREE RECIPE BOOK, telling how to make more delicious all dishes in which milk is used. Drop a postal for the book.

Order a case of **CARNATION MILK**—the *Modern Milkman* for the outing trip.

WOODCRAFT

By "NESSMUK"

Cloth, 160 pages. Illustrated. Price, \$1.00.

A book written for the instruction and guidance of those who go for pleasure to the woods. Its author, having had a great deal of experience in camp life, has succeeded admirably in putting the wisdom so acquired into plain and intelligible English.

FOREST AND STREAM PUBLISHING CO.

The Entertainment Committee, Mr. J. K. Hand, Chairman, provides entertainment for each day and evening in camp. Members owning musical instruments are requested to bring them, and those who can provide any kind of entertainment are requested to get in touch with Mr. Hand.

The annual meeting of the Division for the election of officers and the transaction of other business will be called Saturday, July 6, 8 P. M. As business of importance will be transacted, it is urged that there be a large attendance.

F. B. HUNTINGTON,
Vice-Commodore, Chicago.

Don'ts for Canoeists.

BRUCE RIDPATH, who knows much of canoeing, says to novice canoeists: Don't go in a canoe unless you can swim. Don't invite a nervous person for a paddle. Don't try to change places in a canoe. Don't reach over the side of a canoe. Don't go out if the weather looks threatening. Don't take four persons in a 16-foot canoe. Don't go out without an extra paddle. Don't drop your paddle and catch the gunwale; if you lose your balance grip the water with the flat of your paddle and straighten yourself up. Don't take a chance. Don't give a false danger alarm.

FISHING IN SEA OF GALILEE.

BIBLE students may be interested to know that there is still good fishing in the Sea of Galilee. Dr. Ernest W. Gurney Masterman, who has practiced medicine in Galilee, made a special study of the fishes found there, and in a recent book says that he found forty-three varieties, twice as many as can be found in the British Isles.

**Williams'
Shaving
Powder**

Williams' Shaving Powder not only has the incomparable qualities of Williams' Shaving Stick, the same creamy, soothing, antiseptic lather, but it is also put up in the patented, quick, handy, nickeled, Hinged-cover box.

The **Holder Top** is the newest form of Williams' Shaving Stick. It enables you to grasp the stick firmly until the last fraction is used. The fingers need not touch the soap.

Williams' Shaving Stick also comes in the familiar patented Hinged-cover nickeled box as formerly.

A trial sample of either Williams' Shaving Stick or Shaving Powder mailed for 4 cents in stamps.

The Winter Sleep of Brute Creation

By LEONARD K. HIRSCHBERG, A.B., M.D., ETC.

TO be as sleepy as Ludlum's dog, to have our eyes begin to draw straws, to woo Morpheus, are longings that all of us poor mortals, afflicted at intervals with insomnia, seek as sedulously as a bride does her absent spouse. The busy bee probing the dahlia, improving each shining hour, obtains in return months of winter torpor. Not so man, poor man.

Man, it is true, in the Congo, has the lethal sleeping lethargy that lingers for many weeks. But that is a sleep worse than death. It is that fatal malady inoculated by the deadly tsetse fly, the insect that harbors a micro-parasite, whose entrance into the human blood by a bite is in the light of our present ignorance inevitable death. Since the tsetse fly bites for the most part by night, the old saw, "Early to bed, early to rise, makes a man healthy, wealthy and wise," seems substantiated by science.

As a rule, the human machine requires eight hours sleep in the twenty-four. Mortal man often obtains less. One of my old instructors, Professor Paul Haupt, of Johns Hopkins, has been for years satiated with four hours' sleep. I, myself, feel unrefreshed without nine.

The long winter nap of animals inhabiting the globe above and below the tropics of cancer and capricorn, that strange comatose snooze that endures throughout cold months, those forty

winks for forty days and forty nights, known to naturalists and pundits as "hibernation," never occurs under healthful conditions. It may on no account be admitted that those East Indian fakirs, that type of mad Mullah who, at Lahore, bury themselves in deep slumber for months at a time, are in a human state of physical equilibrium.

Vastly different, however, are the flocks and herds, the fauna of field and farm. In early autumn, certain varieties of animals begin already to go into winter quarters. They retire to caves, somber crevices, smoked-out trees, subterranean passages, mines, pits, or any hollow shaft of quartz or hidden herbage.

The fledermaus, or common bat, either migrates to the south land, or seeks out a warm green wood niche. Here, with others of his tribe, clustered like California grapes, head downward, they hang together, their hind claws clutched like tiny monkeys upon some grateful forest branch.

Curiously enough, such sluggard beasts as the marmot, ground squirrels and similar rodents, though they might be, because of their native laziness, expected to awaken from their bleak and algid nap, still sleek and fat, that is not the case.

The bear, on the other hand, though she ob-

tains no food whatever during the winter of her none content, brings forth her young, suckles them from February to April, and emerges from her somnolent state as big and gargantuan as a behemoth.

Scientists are now somewhat doubtful about the perfect torpidity of the grizzly bear while hibernating. The grizzly may be any color, and is, therefore, often confused with the black bear whose Siberian sleep lasts longer. The common "brown" or cinnamon bear is a color type of the black bear.

The badger rarely falls into complete hypnosis in its slumber of the long night. The ground hog, in this country, educates the mass of Americans about the relation of hibernation to the weather. Folk lore and superstitions about it fill the daily press for days. It is popularly supposed to emerge from its snow-covered home on Feb. 2. If the day be sunshiny and bright, the woodchuck or aardvark, as zoologists name it, rubs his eyes with his fore paw, wheels face about, and hastily curls up like a Rugby football and resumes his narcotized position.

In most American towns there has never been a groundhog. His appearance then on a cold, gleaming day is purely academic. Should such be the case, the prophesy is accepted by the benighted that six weeks of bleak winds, blizzardly snows, sleety rains and sloppy weather generally may be expected. Should groundhog day, however, dawn blemished by bleary clouds and the mad driving of Mother Cary's chickens, should Eolus drive his wild snow chariot before imperial Phoebus, the folk then shout: "The groundhog failed to see his shadow; we shall have six weeks of clear weather."

Is it necessary to add that this prevalent superstition depends upon that well known fallacy in logic that negative inferences are always ignored by careless observers, that positive inferences are unconsciously emphasized in the ignorant mind? Francis Bacon first called attention to this mental defect in all untrained minds. He ascribed the false notion about the transmission of maternal impressions to the unfortunate human faculty of always recording on the cerebral negative one positive inference, while losing simultaneously the twenty other negative ones. Supreme Court Justice Hughes said it was this fallacy that made book makers rich and prosperous on the race track.

The hedgehog enters into a deep sleep comparable to that of mosquitoes and fireflies. It retires to some rocky crevice, beneath some gnarled roots or intertwining vines and twigs.

GETTING READY FOR BED.

Perhaps it is lucky and finds a disused cellar or water pipe. Here it maintains a foodless slumber until far into the spring. In the South, and even some spots of Canada, the hedgehog awakens at periods and seeks food.

Though the chipmunk and ground squirrels become more or less quiescent in winter, the true squirrels never do. The hare has also crept into the vernacular with reference to his March madness. The common species burrows out a hole no larger than its body, and has been known to lie there sheltered by snow and slush for more than a month.

Last year's birds' nests have other uses than

for political epigrams. The dormouse that obtains its name from its heavy dormant condition throughout the long gray days, makes its favorite couch within an old robin's nest. Old moss, loose feathers or soft, downy leaves massed together prove the dormouse a fastidious rodent.

It usually appeals with less interest to the great majority to learn that frogs enter mud at the bottom of slimy pools, that tortoises bury themselves in the soil. Most country-raised boys are aware that toads, lizards, snakes, snails and insects, not to mention their eggs and larva, remain torpid until spring. For does not another of those false observations tell us that

"the first thunder storm wakes up the snakes"? Every school child knows the tradition about Cleopatra warming the viper to her bosom.

Like the state of resistance to destruction by cold or heat, known in bacterial life as "spore formation," the somnolent rest throughout the winter weather, of these higher forms of life are protective. Most hibernating mammals and amphibians could not otherwise avoid complete extinction. Bacterial immunity and opsonic investigations made in my laboratory indicate that the agglutination, lytic, opsonic and antibody production of hibernating mammalia is markedly raised.

Log of a Fishing Cruise on the East Coast of Florida

By ROBERT SEDGWICK (THE SCRIBE)

In Three Parts—Part III.

ON Wednesday, the 27th, we went out in the launch for anything we could get and we got it. Sighting some porpoises we stalked them and the captain harpooned one as the creature crossed the bow at lightning speed. It was a fine shot, the iron sinking in deep, two inches behind the heart. Such a wound would have doubtless proved fatal eventually, but the porpoise, with the blood gushing in warm, crimson spouts, started off at speed, towing our heavy launch containing five men and two rowboats astern. Little by little we hauled up on her, and when she rolled to the surface the gunman did good work, putting seven shots into her in the circumference of a saucer, one so close to the harpoon wound that it broke off an arm of the iron. When it is considered that the gunman stood on the gunwale of a rolling launch in lumpy water, the quarry towing it fast and only showing herself for a moment at intervals, this was good shooting. To prove her tenacity of life, it was twenty-five minutes before she went

into her flurry, when she executed a remarkable movement, dashing blindly about in short circles and finally burrowed head first deep into the bottom, stirring up sand and roily water, dyed with blood and oil. One more short, speedy sprint and she turned belly up. The yacht scales weighed only up to 300 pounds, but she was 9 feet 6 inches long, thick through and very fat. We estimated her weight at 600 pounds and this was probably within the mark. None of us have tasted the excitement of whaling, but that porpoise certainly gave us some idea of what it is like, for a gamier fish never lived. She carried one young one, which unfortunately was borne away by the tide after hauling her up to the davits and opening her. It is interesting, by the way, to sight a mother porpoise, scooting along in shoal water, with the young one clinging to her back. We added an extra large logger-head turtle to the bag, then steaming to our old anchorage at the mouth of Angel Fish Creek, enjoyed a gorgeous sunset, in which salmon,

mauves, pinks and crimsons succeeded themselves in a bewildering orgie of color.

We had meant to devote Thursday, March 28, to a last fishing day on the reef, but while warm and sunny, thermometer 84 degrees, a stiff southeasterly breeze was blowing, which kicked up a smother on the reef and prevented going outside in comfort. So we took to bone fishing when flood tide began to make about 11:30 and met with small measure of success. They are taken on an eight-ounce rod of greenheart, or split bamboo, and twelve thread line. They feed on crustaceans on the bottom, their tails sticking up above water, and move hither and thither across the flats, for all the world like a herd of cattle drifting across a pasture. The angler's boat is noiselessly paddled as near to a school as possible and anchored by sticking an oar in the sand, taking a half hitch round it. The two hooks are baited with crabs. There is a light sinker on the line, which is cast toward the approaching fish, and the hooks repose on the grassy bottom. When a fish takes the hook he cannot go down, as the water is so shallow, and he dashes straight away with a lightning rush, which takes 100 yards of line off the reel before one can think. The first startled run of a lusty nine-pound fish produces a sensation which is in a class by itself. The best time to get them is when the flood makes early in the morning. They have then rested all night and are out on the banks hunting for breakfast, but when the flood tide does not begin to come in until the middle of the day, the fish have fed and often move over the bait without touching it. Many anglers prefer bone fishing to tarpon fishing and devote themselves to it exclusively. Oddly enough the fish look quite black under water, but in the boat are of a beautiful silvery color. They make fine eating. That afternoon the captain harpooned a huge, spotted whip-tail ray, with wide wing-like fins, with which they skim over the bottom at great speed, very much like a bird flying. They have a queer, parrot-shaped head with two holes or vents in the top two inches across, through which they blow out the shells of mollusks and crustaceans on which they feed. This ray weighed 250

BOAT HOUSE AND DOCK, COCOANUT GROVE.

pounds and its tail was nine feet long. We also annexed an extra large logger-head turtle, out of which the men cut steaks for their supper. The meat looked coarse and fibrous, and we were not attracted.

Friday, March 29, was our last day on the Samoa, and as if in sympathy with our feelings it was a dark, murky morning, thermometer 81 degrees, with spits of rain, looking, as the gunman remarked, "like the north Atlantic." Sailed from our anchorage at Angel Fish Creek for Miami at 7:30 and the boat flew up the Hawk Channel before a strong southerly blow as if she longed to get home. She was tied up to Tuttle's dock in the early afternoon. We entrained for the North on Sunday night and arrived five hours late on Tuesday afternoon, without accident or any excuse for such tardiness. The fact was emphasized in the beginning that we arrived at Miami exactly on time, which shows the roads can conform to their schedule, and there seems no adequate reason for the frequent delays which passengers are obliged to endure.

The best month for tarpon fishing on the East Coast in the scribe's judgment is April, before the flies become troublesome and the heat severe. The tarpon's favorite food is mullet, which fish, in April, desert the channels, and go up to spawn in the shallow water of rivers and creeks where tarpon cannot follow, consequently the latter are particularly hungry in April and more ready than in any month of the year to take miscellaneous bait and especially mullet, if the angler can succeed in netting them. One finds that the guides frequently advise fishing by night, and we ourselves are of the opinion that the angler gets more strikes after dark than during the daylight, but personally the scribe does not recommend night fishing except possibly on very bright moonlight nights, for one loses the pleasure of seeing the magnificent fish leap in the air, his silver scales glistening in the bright sunlight and his immense head dashing from side to side in his effort to disgorge the hook. Fishing on a dark and windy evening in a small boat in the fierce running Florida tides does not appeal to the scribe as a jovial occupation. One is always out of sight, and often out of hail of one's companions and loses the pleasure of seeing them play their fish which, to the true sportsman, is almost as great as playing his own. With plenty of time and with still, clear weather, the angler can land by daylight enough tarpon to satisfy any reasonable ambition.

HOUSE ON PLANT NURSERY GROUNDS.

The scribe would advise sportsmen to have their yacht meet them at Long Key Fishing Camp and to proceed direct to Bahia Honda, which he believes to be the point where large tarpon are most numerous late in the season. It is advisable to have two fifteen-ounce rods, an ample supply of No. 27 thread tarpon line, a large gaff and accurate scales weighing up to 600 pounds, as there is much pleasure in knowing the exact weight of your catch.

Personal equipment consists of the fewest clothes possible. One can now buy excellent trousers for fishing purposes for \$1 a pair in Miami. Two pairs of those, with one old coat for cool evenings, one-half dozen flannel shirts and necessary underwear constitute all one needs with the addition of a couple of pairs of sneakers, purchasable at Miami at fifty cents per pair.

Expenses vary according to the requirements and resources of the party, but it may be said in general terms that a trip of one month, with seven mouths to feed, will cost in the neighborhood of \$2,000, including railway fares, sleeping accommodations and meals en route from and to New York, charter party, supplies, tips to the crew and all incidentals. It is well to keep a vigilant eye on supplies, of which even the best stewards are sometimes very wasteful. Perishable stuff, like meats and ice, is sent down

from time to time by rail from Miami in response to telegraph requests. The ice is packed in sawdust covered with burlap and somewhat resembles a cotton bale in size and shape. The waste is not as great as one would expect in such a hot climate, but nevertheless the item for ice runs up into high figures, and fishermen should see that the steward does not crack up a huge painful every time that they want a small lump for a Scotch and soda. It is advisable to put one of the party in charge of all these little details, and if he exercises close supervision, expenses for supplies may be materially curtailed. The scribe would suggest that a very clear understanding should be had with the captain before starting, as to what extras, if any, he intends to charge for, over and above charter party. We understood, for instance, that we were paying \$25 a day for the yacht fully equipped with three boats, but when settling up time came, found an unexpected additional charge of \$100 for the launch. Such "extras" can only be avoided by having everything written out and signed in advance.

In conclusion it may be said that it is delightful to escape from the abominable Northern spring, and that no trip offers more healthful recreation and finer sport than a fishing cruise among the Florida Keys.

A Mississippi Deerless Deer Hunt

By AMOS BURHANS

"MARSE WALLACE, oh, Marse Wallace!" came the negro call from outside the big shanty-boat in which we were sitting about the fire on that snappy November night. "Marse Wallace, can you all come to de doah?"

My friend winked at me, said that he was about to be touched for a two bit loan, hitched up his trousers and felt of his pistol pocket and went to the side door, where he emerged from a darkened room into the black night, feeling his way along the guard-walk of the shanty craft.

"Who is it, out there?" Wallace queried.

"Hit's me, Marse Wallace—Jake," answered heavy black voice.

"Come to the front end and up the plank. I'll bring a lamp," answered Wallace, and he reentered the shanty. I have forgotten now just how many miles it was to the closest white neighbor—only two white families in a large radius—and they never took chances, self-preservation being a first law here along the Mississippi River bottoms in the State.

Jake strode up the gang plank, shielding his eyes with his hands and feeling the way, cautiously. A fall into the soft mud along the bank at this time of the year was not good for the general health. Into the lamplit cabin he came with news of a buck and doe having been seen in the "cawnfield" out near the point.

The Wanderlust, on which I and my family were cruising down the Mississippi, had picked up a "two-legged 'coon" hunter of the Caucasian complexion who was seeking the thief of his

new fishing skiff. The man had hailed us at the Midway Post Office landing, and to accommodate him, we had taken him on for the run to Helena, Ark., where he was sure the thieves would try to sell their booty. From him we had a word of introduction to the owner of the big houseboat or shantyboat, hence dropped anchor near it a couple of days after. The season was open and a deer hunt was a welcome change from constant cruising.

Mrs. Wallace and the family were friends from the start. They visited the little negro store and post office at the landing, bought small articles from the mammies who presided over the slab-roofed one and two-roomed negro cabins and otherwise stretched their limbs and imaginations.

Mr. Wallace had succeeded in getting the negro Jake to agree to guide us where the deer had been seen, and the following morning we set off early. As I have indicated before in the sketches of Mississippi River travel, the river is very crooked, and in every bend there is a sandbar, the latter sometimes covered with sandburrs, grass and accumulated trash. This bar is on the short side of the waterway bend, having been gradually deposited by the various stages of water as they swirled about. Deer often graze out on to the bars during the night and get water or lie in the sand.

We made down the high bank of the inside of the bend and traveled parallel to the river for five miles. It seemed like ten. Working back into the canebrakes here and there and over into small patches of corn, studying the whole floor of Mother Nature's wonderful bower of giant sycamore and cypress for sign and tracks that might lead to quarry. Leaving the timber and underbrush often we went into the corn but could find no tracks. Even Jake's particular field of maize, where the deer had been seen the evening before, failed to yield the tracks. If ever a certain piece of ground was covered thoroughly we did it on that soil. And the plainer it was that nothing resembling deer had been in the field, the more positive Jake was that he had seen them. This reminded me of the phantom covey I pursued one fall.

Once I left Jake, who had been piloting me about through the jungle. Down through a piece of tangle I snooped about and found some tracks. Gradually I drew away from Jake. Once in a while I could hear him breaking down a bit of cane. He had been cautioned not to make a noise with his big mouth. A negro shines on a deer hunt when he can shout and ring a bell on a drive with a pack of curs or hounds with pot-hook tails. I was sure Jake would be able to find his way out, though about myself I was as yet undecided. The sky was overcast and I had nothing to lead me out save the moss on the tree trunks, the general leaning of the vegetation toward the south and to follow the river if I should happen to strike it in my ramblings.

After a couple of hours of fruitless hunting, I came upon a series of deer tracks among those of some stray cattle, young things that roamed over the point at their own will, and as the tracks were apparently made that morning, my pursuit was immediate. Through a long draw that led to the river the cattle, with the deer following, trekked along. Once I was sure that I could hear the tinkle of the bell on the critter that led the herd. On listening for it again, I failed to catch it. Thinking that the deer were at the rear of the bunch, as indeed their tracks showed, I was careful not to make the slightest noise, following as carefully as I would in still-hunting in the woods of the North.

The draw's end was in sight. It was running out to meet the bar, though I doubted if the deer would be on the sand at this time of the day, even if the cattle were. The more I studied the problem, the more it seemed that the whole herd had moved along the route I was following very early in the morning. I might be miles behind them. The trail ran out on the bar to the water's edge and then along it for a few hundred yards. I could see with my glasses that it again entered the timber on the bank further down, and hastened along, under cover as much as possible, to again take it up if the deer had stayed behind the cattle.

They had. Their tracks were apparently as fresh as those of the cattle they followed. Deer hunting North had taught me that they like to seclude themselves during the day and lie about in thickets, after having spent the night feeding. I traveled therefore with greater caution again after entering the timber and brakes. The trail led through deeper tangles than before, and into wet bottoms. Soon I was able to catch the tinkle of a bell on the neck of an animal that was brushing flies off its sides presumably at rest. It was by no means distinct. I figured that the cattle had dropped to their bellies for the day and thought the deer might be with the

bunch. But I kept to the trail. Often I thought I was approaching the tinkling bell, yet sometimes I was sure it was growing more indistinct. Then taking the trail again, I traveled as noiselessly as possible, hoping to get at least a running shot at game if it should get up ahead in the brush. A snapping of the dry twigs ahead arrested my attention. I hid behind a large sycamore, peered to the right and left, watching all angles of the open spots on all sides.

Ahead and to the right the woods noises increased. Something was walking toward me, and I doubted if any pair of deer could have made as much noise had they tried. Suddenly the head of a bay mare showed itself among the bushes and she approached me, walking slowly and coming right for me. Then almost as suddenly she stopped, seemed to make a survey of the dangers and raised her head, snorted, doubled on her tracks and ran as if Satan himself was in pursuit. She had scented me I was sure. As she made away, she ran into the bunch of cattle and stampeded them. I could hear the sound of the bell diminish in the distance. Then I went on further and found where the deer and cattle had been lying in the brakes.

Feeling disgusted that I should have been so close upon the deer and not get a shot, I took my bearings as best I could and headed for a levee that crossed that section and started for the shantyboat and cruiser. I had steadily been working back from the point, due north, and came upon higher ground, on which, just over the levee, were fields of corn and cotton and patches of weeds. I crossed the levee and dropped into the weeds, making for a cattle trail I knew was further on. Just as I came to it, I stopped. I was sure Wallace and Jake had gone home, but thought it would not be foolish to call once to make sure, though I make it a rule never to call out when in the woods.

Lifting my rather heavy voice, I sang out like the leader of a chanty carrying the catch-word for a crew of leathern-lunged Norsks. Instantly a crash in the scrub oaks ahead startled me, and down came my rifle, pointing in that direction. Doubting my eyes when I saw two brownish forms leap across the opening in some brush, I did not even fire a snap shot. But they fled with safety between themselves and me, and no more did I see of them than a couple of white flags flapping as they cleared the worm fence along the field and entered the corn. The hunting had been splendid, but the game possibilities were otherwise. Anyhow, I would rather have a deerless hunt than kill the seed. The chase is the thing!

Correction.

CHICAGO, Ill., June 25.—*Editor Forest and Stream:* In the absence of Secretary Swisher we call your attention to the erroneous caption in your issue of the 22d inst. wherein you credit the scores made in our invitation tournament of May 26 to the Newark Casting Club, and failed to give either heading or Secretary's Swisher's signature, and request that you kindly make correction.

MOONLIGHT ON THE MISSISSIPPI.

Experiences with Wolves in Algonquin Park

By MARK ROBINSON

OVER thirty years ago my parents moved to the Nottawasaga Valley, Simcoe county, Ontario. It was there, as a small boy, I heard wolves howling for the first time. The earlier settlers told blood-curdling stories about the slaughter of their sheep and cattle, also of encounters after dark, of nights spent in trees with a howling mob of wolves on guard at the roots of the trees, etc. As a child I listened to the stories and firmly believed them. But I never saw any evidence of their work and only heard them howling once in that locality.

About five years ago I was appointed ranger on the Algonquin National Park staff. On reporting for duty I was informed that one of my duties would be to destroy wolves. I was detailed to travel with the veteran ranger, Robert Balfour. We set out upon our mission, traveling on snowshoes, drawing our blankets and provisions on light hand sleighs. On our arrival at Boundary Lake shelter house, we at once got things in shape for the night, enjoyed our supper and settled down to read. After a short time a great howling commenced, apparently right outside of our tent. Ranger Balfour picked up his rifle and went outside. I did likewise and thought there must be fully a hundred wolves. I was excited, cold shivers ran up and down my back, and I expected we were in for a good stiff fight. This was my first real experience; I had much to learn. Seeing nothing, we went inside and retired for the night. Many times during the night we were awakened by the howling.

Next morning my companion said we must shoot a deer and get bait, which we did during the forenoon. In walking through the woods I was surprised to find that the wolves were fully a quarter of a mile away from our shelter house. Another strange thing we noticed was that numbers of deer we saw were all traveling toward where the wolves were during the night. Later experience has proven that deer invariably do this.

The following evening the wolves were around again, but we went to bed and slept soundly. In the morning we saw their tracks quite close to our hut. Leaving early, we crossed the rough country via Provoeking Lake to Whitefish Lake and Shelter Hut. On the trail we found where one lone wolf had followed the trail for about seven miles. Later on I was to learn much of this old scamp. We arrived at the shelter almost worn out. After a hearty supper we retired early. Next day we set several baits on Whitefish and Kearney lakes. We saw wolf tracks everywhere, also the track of the lone wanderer.

All winter we saw this lone track following our snow shoe trails from lake to lake. Around the lakes he fed upon bodies of deer killed by other wolves. On several occasions we saw where he had made short dashes after deer, but failed to come up with them; in fact, we never found a deer slaughtered that we could charge to his account. If we placed poison in the carcasses of deer we found killed, this old scamp knew it, and would leave evidence of his supreme contempt on our baits. Later on Dr.

Long, the American naturalist, had a trial after the old scamp, with no better results, and named him the Lou Garou. Shortly after placing our first baits I grew impatient to visit them, feeling sure we would kill a dozen or more. Alas, I had to learn many things about the wolf.

It was a full month afterward before we got one. It was a monster, measuring seven feet three inches from tip to tip (a female). While many baits were taken, this was the only wolf I got all winter, during which time I found thirty-one carcasses of deer killed by wolves, the greater number being does killed in the yards toward spring.

The following winter I was stationed at Canoe Lake. There I saw the first pack of wolves—fourteen in number—come out on the lake at mid-day. They were following four deer that had made a dash across the ice to an island. The wolves were walking quite slowly and had begun to surround the island upon which the deer had taken refuge. I opened fire at 500 yards, wounding one at the first shot. The rest of the pack scattered in all directions, until the wounded wolf gave a peculiar howl, when the greater number returned to him and remained there until they reached the woods. I fired several more shots, but none took effect; evidently I was suffering from buck fever.

After lunch I left a note for my companion, who had not returned from his morning patrol, then I set out fully expecting to find my wounded wolf lying near where they entered the woods. I followed their trail all afternoon, only to find the other wolves had neither deserted nor eaten their wounded companion, who was going much stronger at dusk. I was some distance from the Shelter Hut, so turning toward the full moon rising over the hills, I retraced my steps home to find my companion preparing to come to my assistance.

A few days afterward this entire pack took some of our bait. We were surprised to find where they all had convulsions, tearing up the snow and ground in every possible manner. A number of the wolves had lain upon the snow until fully six inches had melted under their bodies, until they lay upon the ground. Yet the entire pack got up and moved across a small lake where several of them had more fits. They all appeared to recover as we followed their trail for two and a half days, at which time they were traveling and hunting deer as usual. We

were astonished at the results. Our poison (strychnine) was good, as other wolves and foxes were easy victims, yet we had two similar experiences from the same poison with foxes afterward.

About a month afterward several packs of wolves visited our section. We had orders to get a deer and get out more bait, consequently we got busy. Going down Canoe Lake we noticed the lone track of a medium sized wolf that had visited our old baits, showing his contempt in the usual manner. Reaching the foot of the lake I was to follow a ravine to the top of a large hill covered with hardwood timber, while my companion was to follow around the base of the hill and come up from the other side. He followed the trail of the lone wolf

RANGERS BRINGING IN A WOLF.

which was going in his direction. I walked slowly up the ravine until near the crest of the hill, when I heard a scutter in the snow. Looking around I saw an object move and drop out of sight. Hurrying to the top of the hill I saw a deer raise its head and drop it again. I walked over and found it just dead. It had been killed by the lone wolf. From about 200 yards distance my companion called to me, saying the wolf had jumped a deer. I replied that it had killed it where I was standing. We came back together and found the wolf had been about forty paces from the deer when it commenced to rush at it. The deer had at first apparently jumped up into the air, and did not appear to run well until about fifty yards were covered, then they ran side by side for about a hundred and twenty yards, when the wolf hamstringed the deer, making a cut almost as clean as a knife. A few more short bounds and the wolf sprang upon the deer's back, breaking the back at one bite, tearing the flesh so that the kidney could be seen, then he had attacked the throat, when, no doubt, he scented danger and

quickly made his escape into the deep hemlocks.

The deer was a fine healthy young buck about three years old. As far as we could see everything was in favor of the deer traveling fast—good bottom, about eight inches loose snow and slightly down grade. We took the deer home and showed it to a number of residents. Two or three of them recalled similar experiences.

The wolves in Algonquin Park and Northern Ontario are the gray timber wolf. Some have almost black backs. They never have in my experience attacked any person. They will follow a person in the woods, keeping out of sight. Should a person retrace his steps, the wolf will retire to a respectful distance. This is not cowardice on their part. They are a very cunning animal, possessing more than the usual amount of caution and intelligence, and there is no animal that can adapt itself to the surroundings and conditions better than the wolf. He has learned by hard experience that man is his great enemy, hence the caution. Repeating rifles, traps and baits have educated the wolf almost beyond belief. How many times have I read of a howling pack of wolves driving deer ahead of them! I have never noticed anything of the kind here.

In this land of lakes and streams if a wolf howled, all the deer would be ready to take refuge in the water, consequently the wolf in these parts is the most skilful still-hunter. When their quarry is being pulled down and killed, they howl and growl much after the manner of many dogs. Should a deer escape into the water after a hard chase, the young wolves will howl with disappointment for a few

moments over their great loss, then all is silent.

Wolves do a great deal of howling during the mating season in early spring months. During this period the males fight fiercely with each other. We have found where they have fought and moved on with their band, leaving a trail of blood for a mile or more. We have followed these trails, fully expecting to find them unable to travel, but they always appear to travel on as though nothing had occurred. Just as the snow is breaking up, wolves go into the deer yards, and traveling on the deer paths, put up many does and kill them, leaving them lying in the cool, deep woods where the deer yard for winter. These are to provide food for a time when the young wolves leave their den. A female wolf usually has a litter of from five to nine pups. They have no regular dens in these parts, a bed being selected in a hollow log or under a root of upturned tree, or in niches in rocks. These places form a home for the little chaps for a few weeks, after which they follow the mother, living upon the carcasses of deer previously slaughtered.

When old enough to hunt they are led by the mother and hunt most of the time. After the mating season the male usually travels alone, joining the packs at a kill, when they gorge themselves and retire to a quiet place to sleep until hunger calls them into action again. Deer is the natural food of the wolf, but they kill a great many rabbits, beaver, muskrat, woodchucks, etc. Venison is about the only bait they will take. Sometimes, if very hungry, they will take a bait of beef or horse flesh.

Every season we get many pointers from wolf

hunters who claim great success for their methods, but we have found nothing to equal venison and strychnine, and have given all reasonable methods a fair trial. I have taken great care not to handle bait except with gloves prepared for the work; then I have taken a single bait and carried it in my bare hand to where I wished to set it, handled it carelessly and have had it taken at once by the wolves, while the other baits were untouched, and vice versa.

Last season rangers killed forty-seven wolves in Algonquin Park that were accounted for. Fully as many more must have fallen victims to poison from the amount of bait taken. Two-thirds of the number brought in were females. This season, to date March 15, about thirty-five pelts, mostly of males, have been brought in. During the early part of the winter the park was almost clear of wolves, owing to the unceasing efforts of the rangers to destroy them. Poison baits are the most effective method of destroying the wolf. These have to be set with care only during winter months, or many other animals would be destroyed.

Trapping is proving to be quite effective, but like setting bait requires considerable experience and patience to accomplish anything like success. About Christmas one of our rangers, a most reliable man, counted over fifty wolf tracks entering the park from the headwaters of the Magnetawan River, and only two tracks going out. Within the park is an abundance of deer, and where the deer are the wolf will go. This shows what Superintendent G. W. Bartlett and his staff have to contend with, and that they are capable their record shows.

Moose and Men

By J. C. PHILLIPS

IF American sportsmen enjoy being led about by the nose over easy portages and the extremely dirty camp grounds, in a country that is mostly burned, then Lake Edward, Quebec, is the place to go.

My experience there suggests jotting down a few lines on the subject of guides. We started out last fall taking four men, as we wished to travel comfortably. My wife having been recently ill, Rowley Bros., our outfitters, had promised us a good cook, but we soon found we had no cook at all, not even the pretense of one. Our crew were drunk, especially the head man, but we remained cheerful and hoped for the best.

After about two hours, the sky looking slightly gray, it was suggested that we camp in a mud-hole. We did not. This sort of thing kept up for two days, and they were might easy ones at that.

On the third day we gave the outfit a rest and told them we wanted to start early on the morning of the fourth.

Morning came, a fine, clear day. I had to call the men and later came down to ask where my oatmeal was. I was told it would be hung on the fire as soon as the men had finished their own breakfast, at which they were then busily

engaged. I repeated my request with perhaps a somewhat different inflection, but a like result, and then waded into their tent after the collar of the head man. Considerable confusion, much noise and the promise of a knife was the result, so being one to four and having my wife to think of, I hung on my oatmeal and swallowed the gall of defeat. My mouth tasted bitter for some time, I can tell you. In less than five minutes the victorious four were gone, bag and baggage, leaving me one canoe. My wife and I shook hands and began to have a good time. For myself I never was so glad to see the last of any crew I ever traveled with. Right here let me say that Joe, the head of this crew, was immediately re-engaged by the Rowley Bros. and sent on another trip.

One of our men, however, turned out to be a fine fellow after all. Incidentally, he had never worked for the Rowley Bros. before. He took no part in the trouble and came back with two other men. His name was Olésime Nepton (or something close to it), a fine type of trapper breed from the Indian reserve at Roberval. He spoke no English and was better for it. Of the other two he brought, one was a boy, also from the reserve, a trapper raised in the woods and a strong and willing packer.

The other, Tom Tremblé by name, was a regular railroad Indian. He looked as if he had been leaning up against the station for a month, and the whole back of his waistcoat fluffed in the wind, worn off probably on the shingles. Tom got lost on the first portage and we had to go and look him up. He walked directly by a lake that was not twenty yards from the trail. This sort of thing was a common habit of his. We finally lowered him to menial duty and gave him the job of mail carrier, and he made a pretty plain menial at that.

None of our men had been in that section before, but we shook the dirty camp grounds, had a good trip and enjoyed ourselves, especially when we could invent a pretext to send Tom away. We would give him a gun and tell him to get us a partridge. He was apt to get about one, which he usually hung in a bush, and forgot to bring back with him. It took longer to find that bush next day than it did to shoot a pair of fresh birds. However, perhaps he was smiling in his sleeve all the time.

One night soon after Tom's arrival, and before we had penetrated the depths of his uselessness, he had the luck to call down four moose by a series of the most doleful sounds ever emitted by the mouth of man or mammal.

The moose came with a rush and gave us a lively few seconds. Tom lost his head and begged me to shoot at them, one and all, backing desperately away with his paddle and trembling with fright. As a matter of fact the animals, two of which were bulls, had horns about the size of a buck. Most of that night Tom sat on the bank of the lake blowing terrific blasts from his horn until finally we told him as discreetly as possible that we thought he ought to rest from his exertions.

Now this prolonged digression from the subject in hand was started to show that a great many sportsmen must enjoy being bossed by filthy breeds and they must like to eat dirt and camp in dirt, for a short time at least. If they didn't, there would be several Indians missing around Lake Edward. Haven't we all noticed greenhorns in the woods who were dirtier and slacker in their habits than the guides who were with them. As Leacock says in his "Literary Lapses": "Men are only animals anyway. They like to get out in the woods and growl round at night and feel something bite them." That is all very well, but it is poor fun on an extended trip.

I met an Englishman up there. He said he could only stand it five days. The temptation to commit murder was too great and he had to leave. This gentleman was over here especially after moose, and he had hunted in India and traveled extensively in the Soudan. He was perfectly astonished at the filth and laziness he encountered.

Now, of course, an Englishman expects, as a rule, a little more than he can even get in this country, but it seems to me it is up to our sportsmen to set a little higher standard, to boss, to a certain extent, their own outfits, and to insist on a measure of order and cleanliness.

Perhaps it is the short vacation sportsman who doesn't care to make trouble, and often doesn't know good from bad that lowers the standard. In a way you cannot blame him. He is out for two weeks and he must make the most of it. He will have a "good time" at any cost.

Leacock says: "They (the sportsmen) get back to the city dead fagged for want of sleep, sogged with alcohol, bitten brown by the bush flies, trampled on by moose and chased through the brush by bears and skunks—and they have the nerve to say that they like it." There is some truth in this.

NOT A LEAF TO TEMPER THE WIND.

The Rowley Bros., of Lake Edward, told me, and still tell me that Joe, who left us on the Rat River, was one of their best hunters and always got lots of moose. They seemed surprised that no brotherly affection had been wasted between us, and here another trouble suggests itself—the great American moose in the calling season is apt to breed a type of hunter that knows it is just as well to sit in camp and let the game walk in, as it is to go foraging for it. This is unfortunate. Too many moose are killed by merely chance encounters, practically by accident.

Personally, I would rather have a mooseless trip with a willing crew than a sixty-mile trip with Joe or any of his ilk, but I may be hippy on this point.

In a place like Lake Edward the trip is gauged entirely by the spread of the head you

get. If it is forty inches you have had a medium trip; if sixty, a fine one, etc. No attention whatever is given to contributing causes.

I think again that this state of affairs has been brought about mostly by American sportsmen bound on ten-day trips, with full rations of whiskey and the characteristic attitude of not wishing to find fault. Add to this the petting and perhaps bribing of men who, unlike the best type of Maine and Adirondack white guide, must be kept on a less intimate footing, and you have the inevitable result.

Now, I do not doubt that if we had allowed the pampered and rum-fed Joe to sleep in the morning and look carefully after his own stomach, we should have seen more moose and got a larger trophy. Would we have had a more enjoyable trip? I do not think so.

Zoological Expedition to Altai Mountain Region

By RALEIGH RAINES

THROUGH the liberality of a friend, the Smithsonian Institution will be enabled to participate in a zoological expedition to the Altai Mountain region of the Siberian-Mongolian border, Central Asia, an exceedingly interesting territory, from which the United States National Museum at present has no collections. Ned Hollister, assistant curator of the National Museum, will represent the institution and make a general collection of the birds and mammals. He will have as a field assistant Conrad Kain, of Vienna, Austria, a noted Alpine guide. The party has gone direct to London, whence the field will be reached by way of St. Petersburg

and the Siberian railway. The scene of the survey and exploration, the Altai Mountain region, is a particularly wild country and quite unsettled, although it is well stocked with game, and especially rich in its fauna. These mountains are inhabited by the largest of the wild sheep, which with the ibex will form the principal big-game animals sought by the party, but a complete and general collection of smaller mammals and birds will also be made. At present it is the expectation of the party to remain in the field for four months, hunting and collecting, returning to the United States next October.

Another Smithsonian expedition is now

under way for Borneo, under the direction of H. C. Raven, who will make a collection of vertebrates and ethnological material for the National Museum. The field work will be carried on in East Dutch Borneo, the natural history of which is practically unknown. Nothing relating to it has been published, and there are no collections from this region in the United States, although the National Museum has a few specimens from the west and south coasts of Borneo. It is understood that a friend of the institution is also financing this expedition, which is fortunate in having this opportunity to study a country which is practically unknown to

zoologists. Mr. Raven, who will carry out the field work, is a young and enthusiastic naturalist with considerable experience. He hopes to procure a quantity of interesting material, including the characteristic mammals of the country, such as oranges, deer, wild pigs, squirrels and smaller rodents with possibly other native animals. It was Mr. Raven's intention to proceed by way of Singapore, Strait Settlements, from whence he sails directly to Batavia, Java, where he will confer with the Dutch authorities and the American consul in regard to his credentials, after which he will sail for Samarinda, Borneo. At Samarinda he hopes to secure a native houseboat and be towed up the Mahakan or Koti River by one of the small trading steamers which follow the streams for nearly 200 miles. Arriving at the end of the course, he will float down in the houseboat, stopping whenever and wherever he desires to make his collections. The trip will probably take up the greater part of the year, and if successful will provide much scientific information and many extremely interesting specimens for the National Museum.

The third expedition to be sent out during the present year by the Government was to make a biological survey of the Panama Canal Zone and the isthmus. Four scientific representatives of the Government, who spent a part of last year on a similar expedition on the isthmus, have sailed for the zone, and include E. A. Goldman, of the U. S. Biological Survey; Prof. S. E. Meek, of the Field Museum of Chicago; Prof. S. M. Hildebrand, of the U. S. Bureau of Fisheries, and Prof. C. Dwight Marsh, of the Bureau of Plant Industry of the Department of Agriculture. The scientists were greatly aided in their work last year by the Canal Commission, and similar assistance will be extended to them during the present expedition. In the early part of 1911, while engaged in the Smithsonian Biological Survey of the Canal Zone, and the adjacent parts of Panama, Prof. Goldman made a collection of 368 mammals. This collection representing between forty and fifty genera includes twelve new species and sub-species. Nine of the new forms are from the Canal Zone, and the others were collected by the author when he was on a trip to the mountains near the headwaters of the Chagres River, Panama. The new animals include two opossums from near Gatun, two squirrels, of which one is known as a pigmy squirrel; four rice rats, a yoke tooth rat, which was found to be one of the most abundant rats in the grassy clearings of the Canal Zone; three spiny rats, including one known as an octodont, and named after Colonel Goethals, chairman of the Canal Commission. Among the interesting birds collected by Prof. Goldman are two new species of nun birds. These birds of the genus *Monasa* are so-called from the somber black or slaty plumage, which, however, is somewhat relieved by the bright red or yellow bill, and in some cases white feathers at the bend of the wing and about the bill. These specimens were collected on the base of Cerro Azul, northwest of Chepo. Only single specimens of the two new forms were obtained; in fact, none others were seen during the entire season in the Canal Zone and adjacent territory. One of the new forms, Goldman's nun bird, is named after the collector, while the other, Cerro Azul nun bird, gets its name from the location of discovery.

The specimens described are deposited in the national museum for scientific study.

A further study of the mammals collected by the Smithsonian party that accompanied the Alpine Club of Canada in the Jasper Park and Mount Robson region of the Canadian Rockies last summer has resulted in the discovery of several previous unrecognized forms. The hoary marmot and the caribou from the vicinity of Moose Pass prove to be new species. In connection with the identification of the caribou, a thorough study of the specimens in the United States National Museum collections showed the necessity of recognizing additional forms of this interesting game mammal. A new species from the barren grounds of the Arctic coast of Alaska and one from Kamtchatka are named. The type specimen of the Rocky Mountain caribou came from the head of the Moose Pass branch of Smoky River, Alberta, and although its horns are not especially large, the measurements of

the animal itself excel all authentic measurements of caribou on record.

Two new species of birds were discovered, both being of the sparrow family, one a song sparrow and the other a fox sparrow. A new chipmunk, a mantled ground squirrel and two bats were also secured. The chipmunk is a new species and comes from the region along the boundary line between British Columbia and Alberta, from Yellowhead Pass northward. The ground squirrel is a beautifully marked and highly colored form of the genus, and was found living in the Alpine meadows and rocks of the snow-covered region above the timber line. The head and shoulders are rich and glossy Mars brown, and the sides are marked by conspicuous lateral stripes. While the two new species of bats resemble some well known forms externally, they are distinct and distinguishable by the shape of the skull. One of them most resembles a species only known in Mexico.

Newfoundland Notes

By W. J. CARROLL

HERE is an item clipped from this morning's News, calculated to make the ordinary angler restless when business compels him to stick to his desk and pretend that his head is not moidered with the insistence of the call of the wild that latterly has come between him and his work, and his food and his night's rest:

"Mr. G. Morris and Mr. P. Morrissey, who were trouting at the nine mile post, returned to town by last night's train, with a catch of more than twenty dozen. The ponds in the vicinity are overflowed, the water in places being several feet above the usual height."

The evening papers recently reported that salmon and sea trout are running in myriads in some of the Western rivers. The probabilities are that this will be the most successful season ever, as the weather conditions are more favorable than for many years, and the streams will be better protected than ever before.

The Fish and Game Commission has about completed the wardening of nearly ninety rivers for this season, thus continuing the protection given the last few years, and without doubt the results will show that of late there has been an increase in the number and size of fish in various streams.

American anglers will be glad to learn that a daily service is now run between this island and Sydney. This is a great boon to sportsmen, as it is easy to make a start for Newfoundland on any day of the week, with the surety of getting direct to the island without any vexatious delay at any point. Through tickets may be had from New York, Boston or any of the principal American cities.

The new Bruce makes alternate trips with the S. S. Invermore, and the Reid Newfoundland Company are making every effort to cater

to the comfort of American sportsmen, so that visitors may rely on it that the service will be first class in every particular.

Besides the rivers usually protected there will be several other good rivers in Newfoundland and Labrador added to the list this season. We have fishes and fishing here on this island enough to accommodate 100 per cent. more visitors that we are likely to get for many years, but there are anglers who like to tread the untrodden ways, and for such the Labrador rivers will be a great boon.

Parenthetically it may be mentioned that several applications have been made to the Fish and Game Commission for leases of rivers on this island and Labrador, but up to the present public opinion is strongly against creating monopoly on any stream. Our boast heretofore has been that we offer the best fishing in the world, free and unrestricted, to any visitor who comes and pays a nominal price for a license to fish.

Thus it is that the rivers of this island and Labrador are yet free to all-comers, and we rely largely on the honor of visiting sportsmen that the privileges afforded be not abused. Visiting anglers will not be hampered by any vexatious restrictions, but will have the utmost liberty to fish when and where they like.

Although the Newfoundland streams are noted for their great number in proportion to the size of the island, and also for the variety of fishing which they so abundantly furnish, many anglers are turning their eyes Labradorward, influenced by recent reports of the fishing in that region.

There are many rivers in which a net fishery was conducted for years that will be protected henceforth and will yield famous fishing for rod

and fly. Among the best known are the Forteau, Pinware, Red Bay, Mary's River in St. Lewis Bay, N. E. River, White Bear Arm, Partridge Bay, Black Bear and several rivers in Los Water Bay.

Anglers who have fished the Mary's River, Alexis and Gilbert rivers speak very highly of the number and size of the salmon, sea trout and mud trout to be had there.

Most of these rivers have been visited annually by the officers of the British warships, and with this exception very few, outside an occasional venturesome British or American angler, have ever been there.

They are easily accessible by coastal steamer

or yacht for anglers who desire remoteness from the busy haunts of man, but as it is so much easier to fish our local streams, very few go that way. Reports from these rivers show that the fishing must be great. One man with a friend filled a canoe in four hours, fishing with a fly, with immense mud trout, while L. Mott, a noted American yachtsman and angler, describes in glowing terms the capture of a 36½-pound salmon by Mrs. Mott after a gallant struggle of an hour's duration.

The scenery here is described as being most majestic in its rugged grandeur, and those competent to judge say there is nothing in Norway to equal it, but the greatest attraction of all to

American visitors is the summer climate of Labrador. It is warm without being hot, and bracing, and the cool night breeze insures refreshing sleep.

I feel confident that if Americans only realized how cheap and easy it is to enjoy ideal summer weather, we would have thousands of visitors to the tens that come now.

When one cannot "go a-fishing" it is a great relief even to talk about it to someone else. The weather here is beautiful now, ideal summer conditions existing, and the temptation to drop everything and hie away to wander through woodland glades to the music of singing waters is almost too great to be resisted.

Angling for Whirling Dun

By THEODORE GORDON

WHIRLING DUN asks a question in the last issue of FOREST AND STREAM and mentions my name, so I feel in duty bound to answer it as best I may.

I do not think that I am far from the truth when I reckon that the yellow-winged fly he mentions, as being imported with other patterns, was a "yellow Sally." The natural fly is quite common upon some English waters in its season, even having been reported in great clouds upon London's River, the Thames. The fly was very possibly tied by Cummins, of Bishop Auckland, North Britain. That is, I judge so from the description of the wings, the color of which seems to be its chief merit in this country.

If the yellow fly seen flitting up stream is the one most common upon our streams at that time and later, it is one of the caddis flies and often appears in considerable numbers. It is very active and flutters on the water; at times often disappointing a trout that has risen at it in a leisurely manner. There are several ways of imitating it, but if one has the color of the body and legs and wings of a light shade, he can usually rise the fish that are taking it.

The trout have a better time and rise more surely at other species which float steadily upon the current. The fish can then poise themselves a few inches under the surface and suck in every fly that floats over them if they want it. If well on the feed, they usually stuff themselves, yet can go without food for a considerable time. I opened trout last summer that had no trace of food in their stomachs and apparently had not fed at all, or very little, during the long drouth.

The insect life of the streams in this region has certainly recovered to a considerable extent from the floods and heavy ice of the year 1908. I noticed this the first time I went fishing, although at that time the water was high. This was most encouraging, not only from the angler's, but from the trout's, point of view. With an abundance of insects and larva the trout soon get into good condition. The dry-fly man would not be very apt to enjoy himself if there was nothing but bottom food to attract the attention of the trout.

With the rapidly growing army of trout fishers it would be well if the trout could enjoy

a meal in peace occasionally, and this they are enabled to have where fly-fishing only is the rule.

Not long ago I had a day on a well known stream, and the very few good trout killed on the floating fly were full of minnows and other bottom food. As I did not pursue them with bait of any sort, my sport was poor, but they came on to surface food again in a few days.

The supply of small trout in the streams is very satisfactory, and shows that the little fish distributed by the State hatcheries have made themselves at home. If we could protect the watersheds of the streams and their small tributaries, allow a few trees to grow instead of removing every one that can be sold for any purpose, we might check the ravages of floods which more and more tend to make of them torrents at one season and wide beds of stones at another. No one who has not visited these mountain rivers at intervals for many years can quite realize what changes have been wrought, and the damage done in many of the best reaches.

I believe that in time (of course it would be lengthy) we can convert this country into something resembling the Sahara—just what has been done in portions of Spain and other countries. Tripoli is said to have supported a population of 20,000,000 at the time when Rome was master of the ancient world. Now the inhabitants number something like 4,000,000, I believe. Where forests once grew there is now nothing but drifting sands and the ruins of palaces, villas and towns.

Fishing Lines.

THE organization of the Joliet (Ill.) Fishing Club has been completed with a membership of two hundred. Fishing preserves with facilities for camping have been secured along the Du Page River between Minooka and Joliet.

All city and county clerks of Illinois were supplied with the new seining licenses last week. They went into effect on July 1, which marks the end of the spawning season, and when seining is permissible until May 1. The new permits carry instructions for seiners and revised fish law. Seiners are prohibited from obstructing more than one-half of a stream at one time.

"TRY A YELLOW SALLY."

Fishermen, Hunters' and Dealers' Ass'n. Montana Mammals and Spotted Fever.

NEW ORLEANS, La., June 26.—*Editor Forest and Stream:* The fishermen, Hunters' and Dealers' Association has been organized here with more than one hundred members for the purpose of protecting themselves against hostile legislation. M. Broges was elected president with several vice-presidents, secretaries and treasurer. It is announced that a permanent organization will be perfected at the next meeting on July 1. It is expected that the membership will be fully 500. All fishermen, hunters and dealers are invited to join the organization. Committees will be appointed to go to Baton Rouge to present the views of the association to the committee in charge of game laws in the Legislature. It has not been announced yet precisely what the organization will ask for, but it is known that most of the members are opposed to any laws regulating the catching of fish from salt waters and also opposed to the present high license for seining. The members appear to favor a reduction of the hunting license from one dollar to fifty cents, and also a reduction of the charges made for non-resident hunting license. Some of the members favor an extension of the open season for killing deer in many of the parishes.

A number of professional hunters are outspoken in the opposition to a proposed law, which may be introduced in the Legislature prohibiting the resale of game, including ducks. It is pointed out that professional hunters, if the law is adopted, will have to sell their ducks and other game direct to consumers and not to the markets and stallkeepers. Hunters on the coast or gulf portion of Louisiana will oppose any law restricting the sale of game, and it is not believed that the Legislature will adopt such a drastic measure.

Predatory Animals Killed.

THE United States forestry service reports that 7,971 animals harmful to live stock and to game animals were killed during the past year on the national forest reservations, compared to 9,103 killed during 1910. The total number killed was 12.5 per cent. less than during 1910, which shows a falling off of 21 per cent. in the number of bears, 10 per cent. in mountain lions, 53.5 per cent. in the number of wolf pups, 11 per cent. in the number of coyotes, 25 per cent. in the number of wildcats and 45 per cent. in the number of lynxes. There was, however, an increase of 25 per cent. in the number of grown wolves killed. These reductions are probably due to the general reduction in the number of predatory animals infesting the national forests and adjacent ranges. The work has served as an example and as a stimulus to the settlers within and adjacent to the forests who have themselves killed many thousands of these animals. Of the total number of animals killed during the past year, there were 213 bear, 88 mountain lions, 172 wolves, 69 wolf pups, 6,487 coyotes, 870 wildcats and 72 lynxes.

LAST autumn we called attention to the investigations of the Bureau of Biological Survey, of which Henry W. Henshaw is chief, noticing a circular issued by the Survey on "The Mammals of Bitterroot Valley, Montana, in Their Relation to Spotted Fever." An amplification of this circular by Clarence Birdseye has just been issued by the Survey, entitled "Some Common Mammals of Western Montana, in Relation to Agriculture and Spotted Fever."

It has been demonstrated that the Rocky Mountain spotted fever is a germ disease, which is communicated from wild animals to human beings by the bite of a certain tick. The tick carries the germ which it communicates to the wild animals, or to a man by the bite, and the infected female tick transmits the disease to its offspring and in some experiments the disease has actually been communicated by the injection into a healthy guinea pig of a few crushed eggs of an infected tick. It is believed that the spotted fever, like malaria, is contracted only by blood infection and not through the digestive system like typhoid fever, although the belief is held locally that the fever may be contracted by drinking impure or very cold water.

The life history of the tick consists of four stages—the egg, the seed or larva, the nymph and the adult. The adults as a rule are found chiefly on the larger animals, while the two younger forms attach themselves to small animals, pass a short time on them, and then drop off to molt and assume the next older stage.

Besides the danger to human health, caused by the fact that these small native animals—chiefly rodents—act as hosts for the young forms of these ticks, they do an enormous damage to agriculture by the destruction of crops. The present enlargement of the previous circular is a continuation of the efforts so long put forth by the Biological Survey to assist the farmer to compete with his worst enemies.

In many cases poisoning is the most effective and least expensive means of destroying these rodents, and strychnine, arsenic and phosphorus are the three poisons most commonly used. Strychnine in either of its forms is quick and effective, though much more expensive than either of the others. The chief objection to it is that its bitterness, unless disguised, causes certain rodents to refuse to eat the poisoned grain. Yellow phosphorus is dangerous to persons using it, and causes slow and painful death, while white arsenic is not always to be depended on. There are other poisons which for various reasons are objectionable. Strychnine is recommended and a number of formulæ are given for administering it to different animals. Poison should be put out in the spring as soon as possible after the animals cease hibernation, and before any green thing has started. At this time they eat more readily than at any other. Co-operation in rodent poisoning is recommended since a landowner, who by effort and expense has cleared his own land of injurious rodents, is likely soon to have it invaded by

other rodents bred on adjoining farms. Besides, a campaign undertaken by all the people in a community will destroy most of the injurious mammals on the land at far less expense than if the work was done individually.

The Columbian ground squirrel is perhaps the most injurious rodent in Western Montana, and is one of the most important hosts for the younger stages of the fever tick. W. V. King and Mr. Birdseye counted the seed and nymphal wood ticks on 341 specimens and found no less than 2,075, an average of 6.09 to the animal. These ground squirrels eat growing grain, carrots, potatoes, beans, peas and other garden truck and grass, and also destroy young trees in orchards. They should be gotten rid of.

Poisoning, trapping and fumigation with carbon bisulphide are the most effective methods of getting rid of these animals, and all these methods should be employed at the same time.

Chipmunks, pine squirrels, woodchucks, white-footed mice, house mice, meadow mice, woodrats and pocket gophers and rabbits are extremely injurious, and can all be effectively destroyed.

The paper recommends that poison should be prepared in bulk by State experiment stations, counties, chambers of commerce, farmers' unions or other organizations, and then distributed to individuals at cost. There are many common proprietary poisons, but some of them are quite ineffective and cost more than the preparations recommended by this paper.

Readers interested in this subject should write to the United States Department of Agriculture, Washington, D. C., for Farmers' Bulletin, 484, issued March 9, 1912.

National Archery Association.

THE twenty-fourth annual tournament of the National Archery Association of the United States will take place on the 13th, 14th, 15th and 16th of August, 1912, on Soldiers' Field, Harvard University, Cambridge. Present indications point to the largest and most closely contested tournament in the history of the association, and certain radical changes in the program give promise of making it the most enjoyable.

LADIES' PROGRAM.

Day.	Morning.	Afternoon.	Number of Arrows.
1.	1st Columbia.....	2d Columbia....	144
2.	1st National.....	2d National....	144
3.	Team Shoot.....	H'cap Columbia.	168
4.	Handicap National..	Wand Shoot....	72+x Flight

GENTLEMEN'S PROGRAM.

1.	1st American.....	2d American....	180
2.	100 yards.....	80 yds.; 60 yds..	144
3.	100 yards.....	80 yds.; 60 yds..	144
4.	Team Shoot.....	H'cap American.	186 Flight Shooting

Besides the regular prizes for the York, handicap prizes will be given for the 80 yards and 60 yards of the 2d York, based on the scores made at those distances in the first. The prizes will go to the highest scores (possibly to the second highest), and hits will decide in case of a tie.

The York is the great event, the real championship contest of the meeting. It ought, therefore, to come as the climax and culmination of the tournament rather than to end in the middle of it. The shooting of the American Round will

give a knowledge of the quality of the light, the point of aim and the wind that will serve to improve the scores in the York. Moreover, the short range archers will have something to interest them from the first, and for the spectators always more interested in the number of hits than in the distance at which they are made, the opening will be more lively.

To those archers for whom attendance at the tournament is necessarily a part of their annual vacation trip, no city offers greater inducements than Boston. In addition to its objects of historic, literary and artistic interest, it has magnificent beaches within half an hour's ride or an hour's sail; a park system that embraces thousands of acres and includes every variety of landscape from densely wooded highlands to long stretches of seashore, and a group of outlying cities of such peculiar and varied interest as Cambridge, Concord, Lexington, Salem, Marblehead and Gloucester.

Soldiers' Field, the magnificent Athletic ground of Harvard University, is as fine a place for a national archery tournament as could be imagined. The space is more than ample for even the flight shooting. The surface of the field is as level as a billiard table and as green.

The annual dues are \$2, payable not later than Aug. 1. As long as the money remains in your pocket, it is doing nothing for the promotion of the success of the coming tournament. The moment we receive it we shall put it at work in that excellent cause. Send it as soon as you can, please; the sooner the better. Those who are not members, but desire to join the association, will please remit the membership fee of \$3, together with the dues of \$2; \$5 in all.

From most points in the Middle West, special vacation rates to Boston are granted during the summer months.

HENRY B. RICHARDSON, Pres.

BURTON PAYNE GRAY, Sec'y-Treas.

For the Executive Committee.

Tremont Bldg., Boston, Mass.

Raising Venison for Market.

Editor Forest and Stream:

It is a matter of satisfaction to me that a law permitting the raising and sale of any member of the deer family has been passed by the Maryland Legislature and signed by the Governor. The business of marketing venison may be tried out in this State, where one-third of our lands are in forest and scrub. Land can be purchased from \$3.00 an acre up.

The Agricultural Department is much interested in having the experiment made with elk and other varieties, and I hope that the Maryland Agricultural Station will be instructed to undertake some experiments in this line.

The owners of overstocked preserves in Pennsylvania and New York might well look into the conditions here and transport some of their herds to Maryland, where our markets will be open to their product.

W. M. ELLICOTT.

ROY WILSON, of Sterling, Ill., shot and killed a large gray eagle which he surprised in the act of devouring a calf which it had killed in a field near his home. The eagle measured seven feet three inches from tip to tip of its wings.

NATURAL HISTORY

Hunting Wild Flowers at Tenafly, N. J.

By W. G. BOWDOIN

NOTWITHSTANDING the lowering skies and the frequent light rains on the coldest June 15 we have had in sixteen years, there was an enthusiastic band of wild flower hunters journeyed to Tenafly, N. J., under the leadership of Charles Ericson.

The geology of Tenafly is very different from that of Queens, L. I., and is the result of an ingenious outbreak, from which we also have the famous Palisades. Queens, on the other hand, belongs to the ice age and the glacial period. It is a terminal moraine, while Tenafly owes a debt to volcanic action.

The first flower observed was the iris in full flower. Some persons call it blue flag, while others speak of it as fleur-de-lis. It is cross fertilized by bees and other insects. Some angelica that was found belongs to the plants that once had certain domestic vogue as remedies. Angelica in large doses is emetic. Its very name is a tribute to its supposed angelic medicinal virtue. At one time angelica was in much request for confectionery. The old herbals give it as a wine ingredient. In Lapland, where it is also found, it is used to crown poets who fancy themselves inspired by its agreeable odor. In the language of flowers it signifies inspiration. It has been eaten after the fashion of celery.

A large dock that grew nearby was surmounted with tall seed stalks that were far advanced and almost ready for seed dispersal. The seed stalk was red in color instead of the usual green.

A touch of sentiment lurked in the next flowers to be found which were forget-me-nots. The flowers themselves were exceedingly small, but quite blue and carried much of the symbolic with them as they went into the botany boxes. There are some melancholy myths connected with this flower.

The elderberry bushes were reporting progress as well as they could.

A small unobtrusive insect observed on one of the wayside plants turned out to be a fire-fly. The wonderful phosphorescence of the insect, at once the wonder and the despair of scientists, with its 100 per cent. of efficiency, of course made no manifestation in the sunlight.

Some flowering dogwood was among the botanical spoil. Medicinally dogwood is tonic, astringent and slightly aromatic.

Several ferns were found including the royal fern, the marsh fern, the lady fern, and the interrupted fern. The interrupted fern gets its name from the fact that its leaves seem to be interrupted by the spores which come in between them on the stems. It was an old legend that if a person should eat or swallow fern seed, this process would induce invisibility.

The yarrow was in bloom. Its botanical name is *Achillea millefolium* after Achilles, who is said to have discovered its healing qualities. Yarrow tea has had a reputation in many coun-

tries among certain people for medicinal virtues. The flowers are small and white.

A rare milkweed was found with curious curly leaves. It was not identified by any of the experts on the trip. Then came a regular forest of the Solomon's Seal in magnificent bloom. Solomon's Seal has been repeatedly found on these trips, but never in such masses nor in such wild luxuriance.

Sheep laurel in fine bloom was found. The blossoms are in pink with the flower stamens half hidden in little pockets. When an insect alights upon one of these flowers, one or more of these sex instruments are released and minute clouds of pollen are thrown about, some of which accomplishes the fertilization it is intended to accomplish. If the stamens are touched with a pin, the pollination process takes place immediately under the eye of the pin holder.

Wild roses, frail, but beautiful, were in bud.

Much of the district penetrated at Tenafly was more or less marshy. Many of the scouring rushes grew profusely. These plants secrete silicic acid abundantly, and it was from this fact that the old-time housewives used them as the antecedents of the more modern scouring powders that are now in favor. The garden Deutzia also secretes silicic acid that is formed into the most beautiful of crystals, particularly upon the under side of the leaves. These show with surprising beauty under the microscope.

A toxic flower that was met with is variously named water hemlock, spotted cowbane, musquash root or beaver poison. The portion drunk by Socrates and other philosophers and criminals at Athens is thought to have been a decoction made from the roots of this plant. Another toxic plant found was bitter sweet.

Some of the plant galls observed in passing, according to Dr. Erwin Smith, of the Bureau of Plant Pathology, Department of Agriculture, at Washington, are analogous to cancer in the human family. Dr. Smith has made a long study of the galls and has just announced this discovery.

A single example of the ox-eye daisy or farmer's curse was found. This flower is a favorite with children and with artists in spite of its name. Some cat-tails were in the growing by moist places. Only the reedy parts are yet observable. Some pepper grass, such as Lincoln used to subdue the bully with whom he wrestled, grew nearby. Its taste is by no means pleasing. Its smart is still less so.

Some bindweeds were met with, resembling morning glories, like which they open with sunlight and close with dark. Other plants have similar habits, but open at varying hours, and it is thus possible to construct a flower clock by means of which the approximate time of day is indicated by the opening of the flower masses of which such a clock must be composed. The return home began with the flower hunters laden with wild azalia, tulip blooms, sundry ferns and a ladybug.

Published Weekly by the
FOREST AND STREAM PUBLISHING COMPANY,
 CHARLES OTIS, President.
 W. G. BEECROFT, Secretary. S. J. GIBSON, Treasurer.
 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

MARKET HUNTERS' DAYS ARE NUMBERED.

IN another column appears an article from our New Orleans correspondent, its subject being the organization of an association to fight against a proposed bill to prohibit the sale of game. The association also fights to have the hunting license fee reduced from one dollar to fifty cents, and the extension of the open season on deer. In other words, these market hunters pray for permission to kill off all the game in the State of Louisiana at the lowest possible cost to the killer. This surely is an extension of the game hog. Louisiana, like her sister States in the South, has come to realize that from an unlimited supply of game, good shooting is confined to certain localities, and there are very few of these. The market hunter says it will hurt his business if he has to sell to the consumer instead of to the market. The law should forbid him selling game to anybody.

Section 1 of the bill recently passed in Massachusetts is a model Louisiana lawmakers should pattern after. It reads:

"It shall be unlawful, except as hereinafter provided, to buy, sell, barter, exchange, or in any manner deal in or trade with respect to, the dead or living bodies, or any part thereof, of wild birds or game quadrupeds, except hares and rabbits, protected by law in any part of the United States, whenever and wherever taken or killed."

One State after another is taking up the important work of retiring the market hunter. It has come to pass that every market hunter shall buy himself a hoe, rake and plow and take to market gardening. It is more profitable than market hunting and much more useful. Let him turn his gun into a plow share and his powder horn will become a horn of plenty. Let him turn his address of command to his ox instead of

to his dog. His "steady" and "hie on" must be transformed to "gee-haw," while he cultivates the habits of rice, potatoes and other vegetable edibles instead of the habits and haunts of animal foods. Verily his days are numbered.

FOREST PRODUCT STATISTICS.

THE forest product statistics for the year 1911, gathered by the Conservation Commission, show that the lumber and pulpwood output exceeded that of the preceding year, but that there was a falling off in wood used for alcohol, excelsior and cooperage.

The output of the forests in 1910 showed a decrease of 25 per cent. from that of 1908, a decline of about 300,000,000 feet in three years. The annual removal of about one billion feet of wood material from the forests and woodlands of the State cannot go on indefinitely without reforestation on a large scale.

Following are the figures for the lumber cut of the State for 1911 in board feet:

Spruce	81,841,173
Hemlock	132,941,586
Pine	79,189,015
Maple	66,396,012
Birch	29,005,135
Beach	42,128,494
Basswood	29,637,603
Oak	28,947,157
Chestnut	17,506,409
Elm	14,239,789
Ash	11,161,001
Poplar	1,751,461
Hickory	1,301,318
Cherry	3,581,193
Cedar	378,960
Butternut	95,960
Cucumber	84,130
Tamarack	64,875
Sycamore	15,883
Apple	25,000
Locust	36,668
Willow	18,800
Black walnut	7,070
Ironwood	3,060
Gum	259
Total	540,358,005

The total board feet for 1910 was 519,215,500. The pulpwood cut in 1911 was as follows:

	Cords.
Spruce	403,983
Balsam	43,378
Hemlock	71,392
Pine	466
Poplar	30,050
Basswood	2,960
Total	552,229

In 1910 the output in the same line was:

	Cords.
Spruce	392,680
Hemlock	46,259
Pine	2,607
Basswood	3,085
Poplar	43,292
Balsam	39,820
Total	526,744

In 1911 wood used for alcohol, excelsior,

cooperage, kilns, etc., totaled 235,091 cords, as compared with 217,915 cords in 1910.

Other forest products as shingles, lath, heading, staves, ties, posts and poles for 1910 were 170,606,646 pieces as against 149,353,201 pieces in 1911.

The Conservation Commission is increasing the number of nurseries, is improving the efficiency of forest protection and preservation, and in many ways encouraging reforestation on private lands, in addition to replanting denuded State lands. It is confidently expected that the taxation relief feature of the new conservation law relating to lands and forests will give an important impetus to the work of restoring the forests on lands which are better adapted to tree growing than to any other economic purpose.

PROGRESSIVE YACHT DESIGNING.

OUT of the West came the challenge. Into the West went the cup, all of which is an attest to the prowess of Chicago Y. C. and its syndicate of capitalists who made possible the racer Michigan. Chicago has in yacht racing, as in all things else, a snappy, no argument sort of way of going about things. Chicago knew Gardner was about the best designer of sail racing yachts. Chicago knew that Woods, of City Island, could not be improved upon as a constructor. Chicago knew that to sail on Long Island Sound a native sailor was essential. Chicago raised no point of State or Western patriotism—she wanted a boat to defend successfully the Richardson cup, incidentally and equally important being the taking home of the Manhasset trophy. Decisively she put away Cara Mia, holder of the coveted trophy, and Joyant, the winner of it, and now she is ready for Canada and all comers. The race for Manhasset cup proves emphatically the strides made each year in race boat designing. Last year Joyant was the fastest thing in her class; this year a new, practically untried boat, runs away from her, and as there is little to choose between the skippers of the two boats in the recent races, design is the winner. Chicago's enterprise is to be congratulated.

QUAIL DISEASES.

WEST HAVEN, Conn., June 12.—*Editor Forest and Stream:* The Storrs Agricultural Experiment Station, address Storrs, Connecticut, is undertaking general research work in the propagation, nutrition and disease of game birds and wildfowl. One special line of research is a scientific study of the diseases of quail, which seems to be the key to the artificial propagation of the species. An expert bacteriologist and assistant are now engaged and are at work. Specimens of diseased quail are needed, not those killed by accident, but such as have died of disease. If any of your readers are so unfortunate as to have quail thus die during the present summer, they will help on the cause and receive diagnosis of their birds if they will kindly send them to the station as above. Express charges should be prepaid. The only way to ship is to put the specimens into a small box, say a tin can, and in a larger box surround it with ice packed in sawdust. In this way we may the more quickly gain information on this difficult and important problem.

HERBERT K. JOB,
 State Ornithologist of Connecticut.

YACHTING

Ticks from the Ship's Clock.

It is probable that six of the fastest speed boats of Europe will be brought to Detroit to race in the Cadillaqua races for motor boats against the American made craft for the \$500 Cadillaqua cup on July 23, 24 and 25.

New York Y. C. has opened a new station at Martha's Vineyard, Mass. It is the old No. 7 in a new location.

Louise, owned by H. Mugler, had to retire from the Albany power boat race. She cracked her crank shaft about an hour after the start.

The squall of last Saturday struck the Sound with great force only within a radius of three miles of Execution Rocks Light. It was the severest and least expected blow thus far recorded as occurring during a regatta on Long Island Sound. That no lives were lost seems almost miraculous.

EIGHT large power boats, led by Rear-Commodore Roger Upton's division flagship, left Marblehead for the second cruise of the power boat division of the Boston Y. C. last Saturday.

New Rochelle Y. C.

WHAT proved a disastrous and almost fatal squall broke toward the finish of last Saturday's regatta, creating havoc among the ninety contestants. Eleven yachts were capsized, three sinking almost instantly. Hazen Morse, one of the best amateur sailors on the Sound, whose numeral Kitties have won many fast events, was caught in the sheet of Chinook when she sank and almost turned his last mark. Festina and Robin Hood also went to the bottom. This was the biggest regatta ever held by the New Rochelle Y. C., and even without the accidents recorded it was exciting throughout.

Istalena beat Winsome by 36s., while Cara Mia won handily in Class P. Nepsi, Alicia, Sue, Amada, Suelow, Marzola, Hamburg II., Robin Hood II., Ogeemah, Scylla, Turquoise, Argus, Snug, Loon and Go Go won in their classes. The summaries:

Manhasset Bay Cup.

It took three races to settle the question of supremacy between Chicago's new yacht Michigan and Joyant from Indian Harbor Y. C. The first race Michigan won by 2m. 15s. (described in last week's issue). In the second race Joyant won by 5m. 29s. Scores follow:

	Finish	Elapsed
Second Race.		
Joyant, Indian Harbor Y. C.....	4 49 24	2 39 24
Michigan, Chicago, Y. C.	4 54 53	3 44 53
Cara Mia, American Y. C.	4 58 32	3 48 32
Corinthian S. C. Y. C.	5 02 42	3 52 42
Windward, Larchmont Y. C.	5 07 27	3 57 27

	1st.	2d.	3d.	4th.	5th.	6th.
The elapsed times over each leg of the course were:						
Joyant	54 36	21 29	37 01	51 36	20 19	34 23
Michigan ..	55 22	21 31	47 57	52 10	20 41	37 12
Cara Mia ..	54 40	22 03	39 12	54 26	20 50	37 21
Corinthian ..	56 21	21 06	38 06	55 05	21 09	39 55
Windward ..	55 08	21 23	38 45	56 40	21 23	44 08

With each boat having a credit of 9 points, the last race, June 27, was full of excitement. It was won by Cara Mia, trophy holder, but as both Joyant and Michigan were so far ahead in points, the cup had to be won by either of those two. Joyant finished last, with the Chicago boat 1m. 15s. ahead of her, thus giving the Western yacht enough points to enable her to take home the trophy that has caused enough

dissension among Long Island Sound yachtsmen to make its departure almost a relief.

Cara Mia was first at the windward mark, followed by Windward, Corinthian, Michigan and Joyant. Each set light sails for the run home. No change was made in the order down the wind, and the time taken at the end of the first round were: Cara Mia, 3.19.16; Windward, 3.26.36; Corinthian, 3.30.11; Michigan, 3.30.55; Joyant, 3.32.22.

On the second round Cara Mia led the procession. Windward held Corinthian and increased her lead, and Michigan kept ahead of Joyant. The wind was a little better on the second round, faster time being made. Cara Mia finished first, 8m. 18s. ahead of Windward. Windward was 4m. 28s. ahead of Corinthian. Then came Michigan 2m. 54s. further astern and 1m. 15s. ahead of Joyant. The summary:

Third Race for Manhasset Challenge Cup—Course to Windward and Return, 16 Miles—Start, 1:40.

	Finish	Elapsed
Cara Mia, American Y. C.	4 49 06	3 09 06
Windward, Larchmont Y. C.	4 57 20	3 17 20
Corinthian, S. C. Y. C.	5 01 52	3 20 52
Michigan	5 04 46	3 24 46
Joyant, Indian Harbor Y. C.	5 06 01	3 26 01

The points scored were: Michigan, 11; Joyant and Cara Mia, 10 each; Windward, 8; Corinthian, 6.

Atlantic Y. C.

NEAR the end of the Atlantic Y. C. regatta last Saturday a fearful squall broke, threatening capsizes and calling for real seamanship which was forthcoming to the elimination of accidents. The summaries:

Dick, E. H. Pentecost	Withdraw.

MORTON F. PLANT'S schooner Elena won a second leg on the gold cup offered by ex-Commodore F. Lewis Clark, of the Eastern Y. C., in the annual ocean race around Cape Cod on June 30, making the run in less than sixteen hours. Enchantress, owned by William E. Iselin, was second, finishing 54m. 45s. later. The boats ran into a violent squall off Cape Cod. Elena and Enchantress were far ahead of the other craft when the wind shifted to northeast suddenly at 12:30 A. M., being at that time to the northward of Highland Light. Elena and Enchantress

stripped their canvas to forestaysails and mainsails, under which rig they planed across the Massachusetts Bay to the finish. Irolita was compelled to run into Gloucester Harbor, Muriel taking shelter in Provincetown. Princess won the cup offered by ex-Commodore Washington B. Thomas for schooners of the second division, and Acushla II. won the cup offered by Capt. Henry A. Morss for sloops and yawls. The summary:

First Division Schooners, Clark Cup.		
	Elapsed.	Corrected.
Elena, Morton F. Plant	15 40 45	15 40 45
Enchantress, Wm. E. Iselin	16 35 15	16 35 15

Gloucester (Mass.) Y. C.

THE Gloucester Y. C. opening event had sixteen boats sailing over the new course just adopted, the western mark being a spar buoy in range of Bakers Island.

The first class, Edjarko, finished 25s. ahead of Nereid on actual time. In the second class Osprey finished 40s. ahead of Elizabeth. In the 18-foot class with six starters the race was not finished. Tid, Petrel and Arrow had the best of it until they struck the calm. In Class 3, Weasel had a walkover and Oleta in the 15-footers showed Meave and Pewtom getting second place. The summary:

First Class.		
	Elapsed.	Corrected.
Edjarko, S. E. Raymond	2 20 15	2 15 35
Nereid, C. H. Lunt	2 20 40	2 20 40
Second Class.

Beverly Y. C.

THE fourth club race of the Beverly Y. C. was held in Buzzard's Bay on June 29. In the 21-foot class D. L. Whittemore again won with Foraminifer three minutes ahead of Terrapin, which was about three minutes in front of Saracen. The sonder class was taken by Seacoon, owned by J. Lewis Stackpole. Sally VIII. was second by only 20s. Joyant was third.

There were two classes of 15-foot boats, seven Herreshoffs and ten Cranes. The Crane boats appeared to have more speed as a class than their older rivals, six of the Crane design finishing the No. 18 course of 5¾ miles to Dry Ledge and Abiels Ledge and return in better time than the leader of the Herreshoff class.

Vim led the Herreshoff class, being 2m. in front of Pronto, owned by Miss Esther Hosmer. The first two boats in the Crane 15-foot class finished near together, the Niobe having 42 seconds on Pioneer. The summary:

21-Foot Class.		
Foraminifer, D. L. Whittemore	2 02 30	
Terrapin, F. L. and G. B. Dabney	2 05 13	
Saracen, R. Winsor, Jr.	2 08 40

Manitou, Charles Molineaux	4 45 12	1 20 12

Glen Cove Y. C.

THE schedule for the midweek races is as follows: July 3, American Y. C.; July 10, Glen Cove; July 17, Glen Cove; July 24, Larchmont Y. C.; July 31, Aug. 7, 14, 21, 28, Sept. 4 and 11, all at Glen Cove.

The 1912 series of championship races follows: June 29, New Rochelle Y. C.; July 6, Riverside A. C.; July 13, Indian Harbor Y. C.; July 20, Larchmont Y. C.; July 27, Larchmont Y. C.; Aug. 3, Horseshoe Harbor Y. C.; Aug. 10, Hempstead Harbor Y. C.; Aug. 17, Hempstead Harbor Y. C.; Aug. 24, New Rochelle Y. C.; Aug. 31, Seawanhaka-Corinthian Y. C.; Sept. 7, Indian Harbor Y. C.; Sept. 14, Manhasset Bay Y. C.

Interlaken Regatta Meet.

FOLLOWING is a list of events which will take place during the Interlaken regatta meet:

Monday, July 15, Morning.—Other sports committee baseball game; catboat race. Afternoon—Other sports committee swimming events. Evening—Annual banquet at Hotel Commodore.

Tuesday, July 16, Morning.—Sail yacht races, all classes; 8:30 A. M., warning gun, 2:30 P. M., power boat races, all classes. Evening—Smoker and vaudeville entertainment, Palm Garden, Hotel Commodore.

Wednesday, July 17, Morning.—Sailboat races, all classes; 8:30 A. M., warning gun; 2:30 P. M., power boat races, all classes; 5 P. M., other sports committee on shore for ladies. Evening—Venetian night.

Thursday, July 18, Morning.—8:30 A. M.,

other sports committee, canoe events, water baseball; 2:30 P. M., squadron sail; 4:30 P. M., other sports committee, ladies' catboat race.

Friday, July 19, Morning.—8:30 A. M., sailboat races, all classes. Evening—Distribution of prizes.

A feature that at least is unique will be pulled off. It will be the chase after the 18-foot launch which is to be started out into the lake with its wheel tied and engine going, but with nobody aboard. The contestants will be handicapped and the chap lucky enough to first reach the wild boat will own her.

New York Y. C.

ON June 27 C. Ledyard Blair, commodore of the New York Y. C., held the fourth general meeting of the club on the flagship the steam yacht Diana, at anchor off East Twenty-third street. There were present besides the commodore, Rear Commodore George F. Baker, steam yacht Viking; A. C. James Clark, Aloha; James B. Ford, schooner Katrina; Ernestus Gulick, steamer Nomad; Irving T. Bush, steamer Admiral; Cornelius Vanderbilt, sloop Aurora; Secretary George A. Cormack, Fleet Captain Franklin Plusner and H. de B. Parsons, chairman of the regatta committee.

Glen Cove Cups.

ON July 6 the New York Y. C. will hold a regatta for Glen Cove cups. A cup is offered for every class.

Entries for these races will be received by the regatta committee up to the time the warning signal at noon. Several of the big yachts will then be with the Eastern Y. C. on its cruise to the eastward, but the 65-footers, Avenger and Medora, the 31-raters, the 30-footers and the small schooners will take part in the races. The committee is H. de B. Parsons, chairman; J. M. Macdonough and Frederic O. Spedden.

Yachts Change Hands.

A BOSTON agency has sold the speedy motor boat Fidgei, owned by Richard Hutchinson, of Boston, to Percy C. Stuart, of New York.

The same agency has sold the champion 21-foot centerboard sloop Little Haste to a Connecticut yachtsman; the Hull one-design class 15-foot knockabout Eagle, owned by George H. Brazer, of Boston, to Dr. Lincoln Davis, of Boston; the knockabout Polyp, owned by H. R. Page, of Boston, to Henry O. Cutter, of Cambridge, Mass., and the knockabout Dormie, owned by L. W. Chapin, of Rochester, N. Y., to Mrs. A. P. Hartshorn, of Taunton, Mass.

COX & STEVENS report the following yacht sales and charters made through their firm:

The 200-foot steam yacht Owera, chartered for F. A. Stevens, to Senator Nelson W. Aldrich.

The 200-foot steam yacht Emmeline, chartered for Charles Sweeney, to a Boston yachtsman.

The 200-foot English steam yacht Surf, chartered for Mr. Lambert, her owner, to Mr. Harkness, of New York.

The 170-foot express steam yacht Flying Fox, chartered to a member of the New York Y. C.

The 140-foot steam yacht Cavalier, chartered for R. E. Proctor, to J. S. Barney.

The 130-foot steam yacht Parthenia, chartered for H. E. Converse to a Boston yachtsman for the season.

The 120-foot motor yacht Alacrity, chartered for W. A. Bradford, to Sherwood Aldridge.

The 105-foot motor yacht Heather, chartered for E. R. Dick, to a New York yachtsman for a portion of the season.

The 98-foot auxiliary schooner Seneca, sold for Demerest Lloyd, of Boston, to Archibald McNeil, of Bridgeport.

The 80-foot auxiliary schooner yacht Harbinger, sold for J. R. White, of Rochester, to M. W. Strong.

The 90-foot cruising motor yacht Ednada

III., sold for George C. Thomas to Charles Van Bergen, who has changed the name of this vessel to Zianetta.

The 70-foot cruising motor yacht Mao II., sold for the estate of I. J. Merritt to Julius Weinheimer.

The 100-foot motor yacht Mona, chartered for a portion of the season from W. Campbell Clark, to a member of the New York Y. C.

The 60-foot motor yacht Snipe, sold for Charles Morgan to Thomas Friant, Grand Rapids, Mich.

The 60-foot motor yacht Waywassimo, sold for D. R. Sortwell, of Boston, to Lawrence Solomon, of Toronto.

A 60-foot raised deck cruiser sold to J. J. Harty, of Kingston.

The 65-foot motor yacht Weow, chartered for the season by E. E. Gray, of Boston, to a member of the New York Y. C.

The 65-foot houseboat Mary Anna, chartered for H. A. Little, of Philadelphia, Pa., to a New York yachtsman.

The 50-foot raised deck cruiser Graham, sold for Gabriel Reeves, of Yonkers, to E. J. Thomas, of Mamaroneck.

Motor Boating

Ocean Race for Power Boats.

AN ocean race for power boats over a course that should prove popular will be held by the New Rochelle Y. C. on July 20. The course will be from New Rochelle through the East River and New York bays, outside of Long Island to West Harbor, Block Island and back through the Sound to New Rochelle. This course combines sound, harbor and ocean navigation.

There will be a control at Block Island. Cruising boats from 30 to 60 feet overall will be eligible, running in two divisions, one division comprising boats from 30 to 45 feet in length and the other from 45 to 60 feet. The conditions are:

Start.—Saturday, July 20, 1912. Warning signal, 1:50 P. M. Preparatory, 1:55 P. M. Starting signal, 2 P. M.

Course.—From line drawn between committee boat and red spar buoy off Premium Point, down the East River, through the Narrows around the south side of Long Island to West Harbor, Block Island, and thence through Long Island Sound to the finishing line between the committee boat and red spar buoy off Premium Point. Distance about 245 nautical miles.

Classes.—The race will be run in two classes, Class I. being for cruising boats from 45 to 60 feet overall length; Class II., cruising boats from 30 to 45 feet overall length.

Crew.—The crew of Class I. shall consist of not less than four persons on each boat, and in Class II. three persons on each boat. In the event of the owner not being on board, he must be represented by a member of a recognized yacht club.

Power.—Boats must be propelled by internal combustion engines, operated by gasoline, kerosene or alcohol.

Fuel.—All fuel must be carried in fixed tanks permanently piped and connected. Any boat using kerosene will be allowed two gallons of gasoline in cans for use in starting the engine.

Speed Trials of Dixie Junior III.

Oct. 3.—Elkton (Md.) G. C. H. L. Worthington, Mgr.
Oct. 15-18.—Cincinnati, O.—The Interstate Association's Post-Season tournament, on the grounds of the Cincinnati G. C.; \$1,000 added money. Elmer E. Shaner, Sec'y-Treas., Pittsburgh, Pa.
Oct. 18.—Adams (Neb.) G. C. H. K. Mitton, Sec'y.

1913.
Jan. 22-25.—Pinchurst (N. C.) Country Club. Leonard Tauts, Pres.

DRIVERS AND TWISTERS.

The date of the Celina (O.) tournament has been changed from Aug. 29 to Sept. 3.

There were 150,500 targets trapped at the recent Grand American Handicap tournament.

Officers of Canandaigua Sportsmen's Club for 1912 are: President, A. A. Sterling; Vice-President, C. A. Soule; Secretary-Treasurer, W. J. Kibbe; Executive Committee, A. A. Sterling, W. J. Kibbe, C. A. Soule, F. C. Smiley and G. R. Ellis. President Sterling also is the Shooting Master.

In the round on the first day of the clay target shooting, June 29, at the Olympic games, Stockholm, the American team led by one target, scoring 108; Germany, 107; Great Britain, 104. In the second "stage" the American scored 161; Great Britain, 160; Germany, 156; Sweden, 148.

Blue Wing Gun Club.

St. Louis, Mo., June 24.—Two days' good shooting, fellowship and scores ended to-day, with a pretty good list of shooters from the G. A. H. over at Springfield. Among those who slipped over from the big boom in Illinois was one Harry Kahler, from Ben Franklin's town. This same lad copped the kale as it were with one fine young score. He missed only five out of 300, tying Spencer and being one behind Les. German, those two rattling pros. Clay took second joy with 292, followed by Eaton, who lost one bird more.

Idaho State Sportsmen's Association.

Boise, Idaho, June 19.—An ideal tournament was that held here during yesterday and to-day. Attendance good, weather excellent, scores generally well up. L. A. Lehrbas took high gun for two days' average, cracking 382 out of 400 rocks. Lee Barclay won high professional honors with the same score, 382. The scores:

Idabel Gun Club.

IDABEL, Okla., June 20.—Brother Butler, secretary of the Idabel Gun Club, may be an expert with a Remington or an L. C. Smith shotgun, but he needs a great deal of practice on the typewriter of the same name. He must have been shooting doubles, for on our copy of the score he got two names into each day's compartment, the net result being that I don't know who won. No matter who won, the score was good—most of them appear to have been high. In the professional department (written a la Spencer), A. D. Mermod cracked 391 out of 420. The scores:

	Shot at.	Broke.	Shot at.	Broke.
	First Day.		Second Day.	
W P Alston	210	176	210	194

Orange Gun Club.

ORANGE, N. J., June 29.—Out of 1,250 targets thrown yesterday afternoon at the traps of the Orange Gun Club, 1,152 were broken by the nine gunners. Von Lengerke shot at 175 of the targets and broke 173, missing none until he was on his sixth string of 25. Thomas Dukes broke 124 out of 125. The first 100 shot by Von Lengerke was on the Unger cup, and he won with a clean score. Dukes was second in that event with 99. Dukes had also a clean score for the du Pont trophy, of 25. Von Lengerke, missing his first in that string, making a score of 24.

Joseph Taylor, a coffee planter of the East Indies, who never handled a gun till he visited this country a few months ago, broke 210 out of 225. Other scores:

Shot at.	Broke	Shot at.	Broke		
Thompson	150	140	Lane	100	87
Lockwood	125	111	Michell	50	37
Wickes	200	190	Rockwell	100	80

The scores for the Unger cup were: Von Lengerke 100, Dukes 99, Taylor 90, Lockwood 92, Lane 87, Rockwell 80, Thompson 94, Wickes 94.

On the Du Pont trophy these scores were made: Dukes 25, Thompson 24, Taylor 23, Lockwood 25, Wickes 23, Von Lengerke 24, Lane 23.

Du Bois Gun Club.

Du Bois, Pa., June 26.—Fred Guinzberg ran off with the two-days' average with 289 out of 300. Elliott missed four more, while the Junior Mallory found 281. M. Hawkins was top professional, with Day close up. The scores:

REMINGTON
UMC

The Remington Cubs pick the only easy single loader

AUTOLOADING SHOTGUN

For singles—trap or field—just toss in a shell, press the button and—"PULL." The side bolt makes it easy. You don't have to tug at the barrel or watch an on-and-off device. The action stays open after each single shot is fired,—It always stays open when the magazine is empty. Five shots—three to get the cripples—each under absolute control of the trigger finger. The recoil reloads for you—kicks another shell in; takes the strain off the gun—the discomfort out of the kick—all without diminishing the drive behind the shot.

And a friction brake feature found only on the **Remington-UMC** Autoloading Shotgun, slows down the rearward motion of the barrel and bolt. The greater the recoil, the more force taken up by this ring. The shooter's shoulder does not have to stand the difference in kick between a blank and a 3 1/2—1 1/4 load. Simple take-down—a few turns of the readily handled magazine screw-cap makes cleaning, carrying and interchange of barrels quick and easy.

Try the **Remington-UMC** Autoloading Shotgun at your dealer's. Pick out shells with badly battered crimps. Watch how readily the action will handle them. Have you any questions about the mechanism? Send to-day for a booklet completely explaining the action.

Remington Arms-Union Metallic Cartridge Co.

299 Broadway

New York City

Worcester Sportsmen's Club.

WORCESTER, Mass., June 22.—The tournament personally conducted by A. E. Sibley, of the American Powder Mills, and G. H. Chapin, of the Winchester Repeating Arms Co., was held here to-day. "Chape" did not seem to mind the work and it certainly did not interfere with his hitting them. The scores:

IOWA CITY GUN CLUB.

Analostan Gun Club.

WASHINGTON, D. C., June 30.—Following are the scores made by the Analostan Gun Club members yesterday. Dr. A. B. Stine and Phil. Steubener tied for high in the singles, each scoring 92 out of 100, and W. E. Ford and Walter Ferguson tied in the doubles on 20 out of 24. Steubener missed only two out of his first 50, while Stine scored 49 out of his last 50, running 45 straight.

Shot at. Broke		Shot at. Broke	
Stine	100 92	Green	65 53
Steubener	100 92	Barnes	50 42

MILES TAYLOR, Sec'y.

take place in the near future, the date not being decided yet, but will be published in the sporting columns of your most valuable paper as soon as we find that the corn is ripe.

There was a dead heat for high gun honors between Dave Engle (who always manages to keep near the top of the score sheet) and Doc Groll (the man that is always looking for a little side bet to make things interesting), each man scoring 83 out of the 100 targets that count in the club averages. Jack Williams was second with 79 per cent.

The morning was cool and pleasant; in fact, an ideal day for trapshooting, with just wind enough to make the targets travel a little faster than the traps could throw them, and which accounts in a way for some of the poor scores.

Our next shoot will be held on July 14, and everybody is welcome to shoot along with us, so come out and pay us a visit.

Targets:	25	25	25	25	25
D D Engle	21	21	21	20	19
J H Williams	19	20	18	18	21

WINCHESTER

Repeating Shotguns and Shotgun Shells

Do the Most Wonderful Shooting at

Grand American Handicap

A striking feature of the Grand American Handicap for 1912 was the wonderful shooting throughout all the events of Mark Arie, of Thomasboro, Ill., with a Winchester Repeating Shotgun. Note the summary of his winnings given below, which, however, falls far short of describing his remarkable work:

AMATEUR DOUBLE CHAMPIONSHIP

High Amateur for all Single Targets. Score 657 x 700.

High Over All for All Targets. (Singles and Doubles) Score 746 x 800.

High Over All for All Handicap Targets. Score 281 x 300.

High Over All for All Program Targets. (Singles and Doubles) Score 558 x 600.

THE CONSOLATION HANDICAP

Mark Arie made high score in this event. Score, 96 x 100 from 20 yards.

PRELIMINARY HANDICAP

Lee Stockley, of Chicago, shooting a Winchester gun and Winchester shells; J. G. Gray, of Bloomington, Ill., shooting Winchester shells, and C. E. Orr, of East Alton, Ill., shooting a Winchester gun, tied the winner with a score of 94.

W. R. Crosby made the highest score in this event— 95 x 100, from 23 yards, shooting Winchester shells.

GRAND AMERICAN HANDICAP

H. D. Duckham, of Kenton, O., shooting Winchester shells, tied the winner with a score of 96 x 100.

C. A. Young made the High Professional score in this event—95 x 100, shooting from 22 yards, with a Winchester gun.

PROFESSIONAL CHAMPIONSHIP AT SINGLES

Won by W. R. Crosby, with Winchester Factory Loaded Shells, score 198 x 200. Fred Gilbert was runner-up with 195, also shooting Winchester Factory Loaded Shells.

PROFESSIONAL CHAMPIONSHIP AT DOUBLES

Won by Fred Gilbert with Winchester Factory Loaded Shells.

In addition to the above, W. R. Crosby, with Winchester shells, won High Professional Average for all Single Targets on the program, scoring 477 x 500. W. R. Crosby and Fred Gilbert tied for High Professional Average on all Single and Double program targets, scoring 550 x 600, with Winchester shells.

W. R. CROSBY

FRED GILBERT

The declaration was made above that Winchester Shotguns and Shotgun Shells did the most wonderful shooting at the Grand American Handicap. The evidence, which has now been submitted, speaks for itself, and proves conclusively that

The Red W Combination Is Superior To All Others

Peters Shells

Win a Great Victory at the GRAND AMERICAN HANDICAP At Springfield, Ill., June 18-21

- PRELIMINARY HANDICAP** - - - - - won by W. S. Hoon, 94 x 100 and 18 x 20 in shoot off.
- AMATEUR CHAMPIONSHIP** - - - - - Wm. S. Hoon tied for 1st place, 192 x 200.
- GRAND AMERICAN HANDICAP** - - - C. A. Young made high professional score, 95 x 100 from 22 yards.
- PROFESSIONAL DOUBLES CHAMPIONSHIP** - - J. S. Day and Walter Huff tied for 1st, 84 x 50 pairs.
- AMATEUR DOUBLES CHAMPIONSHIP** - - - - - Harry W. Kahler, 2d, 88 x 50 pairs.
- HIGH AMATEUR AVERAGE—All Single Targets** - - - - - W. S. Hoon, 380 x 400.

A fitting climax to a wonderful succession of winnings. The superior quality of "steel where steel belongs" shells absolutely proven.

Birmingham Gun Club.

BIRMINGHAM, Ala., June 23.—Fourteen shooters were present at the weekly shoot of the Birmingham Gun Club. John Warren did most phenomenal shooting, breaking all of the single targets shot at, making a perfect score of 100. He was followed closely by R. R. Skinner and E. R. Holt, with but 3 down out of 100. Mr. Armstrong, for some reason, is shooting away below his average.

There will be but one more shoot on the Du Pont badge, with several tied for it.

Shooting at 12 pairs doubles, Warren broke 20 targets, Skinner 19, Holt 17, Moody 15.

Cleveland Gun Club.

CLEVELAND, O., June 23.—The regular weekly club shoot of the Cleveland Gun Club was held Saturday afternoon, June 22, at Shooting Park, Mayfield road, and was something of a contest—much more than was expected after two weeks of hard shooting, the State shoot and the Grand American Handicap, which has been hard work for those who attended. The weather

conditions were good, just enough wind to keep the targets on a jump. Mr. Williams, a come-back, was the big gun of the day, breaking 147 out of 150 in the four events, which shows that if it is in the blood it will come out. C. B. Haycox, who has been a very sick man since the first of the year, is with us again, and everybody was glad to see Charley; but with all of his sickness, he has not lost his eye, as he turned in a score of 48 out of 50 in the first event, and 43 in the second—91 out of 100 is not so bad for a sick man.

The Fourth of July contest is open to all lovers of the sport. The shoot will be at 200 targets per man; the first 100 targets will be shot in five 20-target events. Entrance for the five events, \$5. Twelve cash prizes, running from \$2.50 to \$10 each, and a silver loving cup will be awarded to high gun in each event, but no contestant to win more than one cup. The second 100 targets will be handicap contest; three beautiful trophies will be awarded in this shoot; the entrance fee will be price of targets only, and is open to all, so if you don't want to shoot for money, get into this contest and be a helper in keeping the good work on the move.

F. H. WALLACE, Mgr.

Sikeston Gun Club.

SIKESTON, Mo., June 28.—Out of 50 pigeons, the following scores were made to-day: Dan McCoy 42, Clem. Marshall 41, W. H. Tanner 38, C. H. Yanson 37, L. R. Bowman 36, Shields 36, H. A. Smith 29.

WM. H. TANNER, Sec'y.

Delaware—New England.

In one of the greatest matches of the year on the grounds of the Du Pont Gun Club, Saturday, June 29, the All-Delaware team tied with a team representing All-New England. The total score on each side was 919 out of 1,000. Thirteen men competed on each side, each man shooting at 100 targets. The scores of the ten highest men were taken in computing the result.

The feature of the day was the shooting of E. A. Staples, of Franklin, Mass., who broke 100 straight—local record this season.

The match was interesting from start to finish. When All-New England had finished it looked like a defeat for Delaware. The local men took a brace, however.

The individual scores of each team and the order in which the men finished were:

All-New England.	All Delaware.

Professional Trophy in the Grand American Handicap Event, won by C. A. Young, 95 x 100, from 22 yards, with BALLISTITE

PRELIMINARY HANDICAP

W. S. Hoon, L. Stockley, J. S. Gray, C. E. Orr, tied at 94 x 100. Mr. Hoon won in shoot-off with DUPONT.

PROFESSIONAL CHAMPIONSHIP

Won by W. R. Crosby, 198 x 200, with SCHULTZE.

CONSOLATION HANDICAP

J. R. Lieb, shooting DUPONT and C. A. Galbraith, shooting BALLISTITE, tied at 94 x 100. Mr. Lieb won in shoot-off.

AMATEUR CHAMPIONSHIP

E. W. Varner and W. S. Hoon, tied at 192 x 200, shooting DUPONT. Mr. Varner won in shoot-off.

PROFESSIONAL CHAMPIONSHIP ON DOUBLES

Won by Fred Gilbert, 84 x 100, shooting DUPONT.

LONG RUN TOURNAMENT

103 straight, from 18 yards, made by Fred Gilbert, shooting DUPONT.

Further Conclusive Evidence of the Superiority of

SMOKELESS POWDERS

WON Forty-five of the fifty-eight moneys (65% of entire purse) in Grand American Handicap.

WON Thirty-two of the forty-eight moneys (78% of entire purse) in the Preliminary Handicap.

WON Nineteen of the twenty-two "first moneys" in Grand American Handicap.

WON 60% of purse in the Amateur Championship at Singles, 67% in the Professional Championship at Singles, 84% in the Professional Championship at Doubles and 75% in the Consolation Handicap.

No Shortcomings—Not One

ANY shortcoming in a shot gun, which seems almost trifling, may cause the gun to go wrong in the field, and spoil a long-planned expensive hunting trip.

The Smith Gun has no shortcomings—not one. The six Hunter Brothers with inventions, precision workmanship, and experience, kept after the shortcomings for 22 years, until the last and least important one was wiped out.

"6 times 22 years' experience" gives the shooter of a Smith Gun the fullest possible pleasure in the field, and the maximum game in his bag. A Smith Gun is "two guns in one," bored to meet the combined requirements of field, blind, and trap.

Ask your dealer to show you the new L. C. Smith 20-gauge. It is 20-gauge from butt to muzzle. Write for catalogue of Smith Guns—every grade from \$25 net to \$1500 list.

Illustration shows \$102.50 grade. Net price, with ejector, only \$75; with Hunter One-Trigger, \$100 net.

L. C. SMITH GUNS

HUNTER ARMS COMPANY, 76 Hubbard St., FULTON, NEW YORK

THE BLACK SHELLS WIN G. A. H. High Amateur Average

At the Grand American Handicap, Springfield, Ill., Mark Arie, shooting **THE BLACK SHELLS**, from 20 yards, won the Amateur High Average on all targets during the shoot, breaking 746 x 800.

Mr. Arie, shooting **THE BLACK SHELLS** in a pump gun, from 20 yards, also won the Doubles Championship, defeating professionals and amateurs, with a score of 89 x 100.

These splendid records were made possible by the uniformity of pattern, instantaneous ignition and absolute reliability of **THE BLACK SHELLS**.

Canandaigua Sportsmen's Association.

THE tenth annual all-day tournament of Canandaigua Sportsmen's Association, at Lakeside Park, June 28, was eminently successful, the attendance large, and the weather fine.

In the regular events, C. J. Dalley, of Baldwinsville, with a score of 141 out of 150, took high honors; Green, of Avon, and Vanderhoff, of Watkins, each with 140, divided second and third.

There were 39 shooters in one or more events, and 55 in the merchandise event.

Mulberry Grove Gun Club.

MULBERRY GROVE, Ill., June 26.—One more shooter won over for trapshooting in this little village. They are coming rather fast now. The newest addition to the game answers to the name of J. J. Bingham, and is one of the most well-to-do farmers of this vicinity. When asked for his opinion of the game, he replied: "Bully! Great sport! Count me in as a club member and a regular shooter just as soon as I can change my address to this burg." Fred Ellis, who had been only partially successful in previous attempts at the elusive targets, celebrated the initial tryout of a new Remington pump gun by pulverizing 45 out of 50, thereby winning high honors for the day. The scores:

Events:	1	2	3	4	Events:	1	2	3	4

American Rifle Team Wins.

THE American rifle team, comprised of Capt. C. L. Burdette, of West Virginia; Sergt. A. E. Jackson, of Iowa; Sergt. H. L. Adams, U. S. A.; Capt. A. L. Briggs, U. S. A.; Hospital Steward W. A. Sprout, U. S. N.; Lieut. C. T. Osborn, U. S. N.; Capt. F. N. Hird, Iowa, and Ensign H. N. Bartlett, U. S. N., won the international army rifle shooting match at Olympic games, at Stockholm, June 29, with the score of 1,688. Great Britain was second with 1,600; Sweden third, 1,575; Africa, 1,531; France, 1,517; Norway, 1,476; Greece, 1,439; Denmark, 1,412; Russia, 1,401, and Hungary, 1,334. Fifteen shots were fired by each man, the arms used being the national military weapon of each country.

The score of the American team was: 200 meters, 438; 400 meters, 444; 500 meters, 424; 600 meters, 382. Total 1,688.

The aggregate individual scores of the American team were: Burdette 288, Briggs 284, Adams 283, Jackson 279, Osborn 278, Sprout 276.

A. P. Lane, United States, won the dual shooting individual competition at 30 meters, with 287. Palen, of Sweden, was second with 286, and Vouholst, another Swedish entry, third with 284. John Dietz, United States, fourth with 282.

Kennel Department

Cure For Distemper.

For years Thomas J. Deaken has been at work on a cure for distemper in dogs, and while he claims that the cure was perfected five years ago, it differed so radically from all other anti-toxins that the young enthusiast was never allowed a chance to prove the wonderful healing powers of his discovery. Finally in despair, says the New York Sun, Mr. Deaken went to one of the best known veterinarians in New York city and begged to be allowed to vaccinate an animal in the hospital, only asking that he be believed when the dog was cured. When he was refused this chance, as a last resort, he offered to buy the dog of the veterinarian, and stated that if he did not cure the dog which was in the last stages of distemper, the loss would be his alone. If he did succeed in curing him, the veterinarian was to buy the dog back again.

It was only a question of a few moments when the transaction was made, and poor Fido felt the sharp prick of a needle in his jugular vein. Then cubic centimeters of the life-giving fluid flowed through his little body, and in a few hours he began to sit up and take notice. If the distemper is further complicated by paralysis or chorea, one or more treatments are necessary, but it is always successful. While Mr. Deaken has at last received the recognition he deserves, he evidently believes that "a prophet is not without honor save in his own country," and he has accepted a very flattering offer to demonstrate his cure in Kansas City.

Not long ago Mr. Deaken saved the life of one of the wonderful Eskimo dogs which Peary brought with him from the pole. The dog had been sold to an artist for \$500, and shortly after this he developed distemper in its worst form. When Dr. Deaken reached him he was paralyzed and his case seemed hopeless, but after receiving the treatment the little sufferer recovered miraculously, and in a few days seemed as well as when he left his frozen home.

All over the city might be found little canines of different breeds who, if they could speak, would gladly tell how the kind gentleman had saved their lives. Mrs. Varman's old English sheep dog and Mrs. Taylor's French bull are among Mr. Deaken's recent convalescents.

Mr. Deaken started as a medical assistant, but his heart always was with the canines and particularly with the under dog. From what he had observed he did not believe that distemper in dogs was due to a bacillus, but an entirely different organism. With this in view he started to work and just what he did nobody knows, but it is true that he discovered the real germ of the disease while others were groping in the dark.

To produce the vaccine Mr. Deaken uses a

The Old Reliable Parker Gun

At Springfield, Ill., June 17-22, 1912,

Won The Following Important Events—More Than Any Other Two Guns Combined.

THE AMATEUR CHAMPIONSHIP OF AMERICA, by E. W. Varner, of Adams, Neb., from the 18 yard mark, score 192 x 200.

THE PROFESSIONAL CHAMPIONSHIP AT DOUBLES, by Fred Gilbert, of Spirit Lake, Ia., from the 16 yard mark, score 84 x 100. Mr. Gilbert shot off three ties, and finally won the event.

THE PROFESSIONAL CHAMPIONSHIP AT SINGLES, by W. R. Crosby, of O'Fallon, Ill., from the 18 yard mark, score 198 x 200.

Gilbert and Crosby tied for HIGH GENERAL AVERAGE for the four days' shooting, each breaking 550 x 600 targets shot at.

N. R. DAVIS @ SONS, Lock Box 707 Established 1853 ASSONET, MASS., U. S. A.

YOU know mallards—wisest and wariest of all ducks—Solomons of the air. You can't knock down mallards with a paddle nor can you get them with a gun that plasters its shots all over the face of creation.

A mallard shot is generally a long shot, and long shots require a hard-shooting, close-shooting gun.

That's why the long-headed man who goes to a mallard country takes a Lefever. When he swings it on a towering pair of mallards he does not question the result. He knows it—

TWO CLEAN KILLS

The reason a Lefever kills clean and sure and far is Lefever Taper Boring.

But if you buy a Lefever for the taper boring alone, you will get more than your money's worth. For instance, you will never be handicapped with looseness at the hinge joint. The exclusive Lefever screw compensates for a year's wear by a trifling turn that you make yourself with a screwdriver.

LEFEVER SHOT GUNS

Sixteen other exclusive Lefever features and Lefever simplicity and strength make the \$28 gun the peer of any \$50 gun on the market. Upwards to \$1,000. Send for free catalog and get Lefever wise. LEFEVER ARMS CO., 23 Maltbie St., Syracuse, N. Y.

Durston Special
20 Gauge. Price \$28.00

The Small Game Rifle That's Big Enough For Deer

Price \$15

New Model 27
.25—20 or .32—20 calibres

Marlin
REPEATER

RABBIT, woodchuck, hawk, fox, wolf and deer fall ready prey to its high velocity smokeless or black and low pressure smokeless loads. For target work it is unexcelled.

Built with the famous Trombone Action and Smokeless Steel Barrel, unobtainable in any other rifle of its calibre. Its solid top and side-ejection protect shooter's face and eyes, and prevent dirt from entering action.

The desirable take-down construction and Ivory Bead sight cost extra in other .25—20 and .32—20 rifles. You pay nothing additional for these in the *Marlin*.

See this hard-hitting, accurate shooting, perfectly-balanced rifle at your dealer's today.

Send 3c in postage for new catalog showing the complete line of *Marlin* repeaters, rifles and shotguns.

The Marlin Firearms Co. 27 Willow Street, New Haven, Conn.

media similar to the following: Agar, 5 grams; gelatine, 80 grams; Liebig's meat extract, 5 grams and distilled water, 1,000 grams. Here is where old Dobbin is called upon to assist his canine friends, and he is inoculated with thirty-five centimeters of the dead organism, and then in one week he receives 500 cubic centimeters of the live organism, and so on for four weeks, when he is ready to produce the fluid which gives life to the dogs. This operation is not at all painful, and in fact the faithful old horse does not know that anything unusual is going on. It is simply taking the germ of distemper from the dog, injecting it into the horse, and then in a certain length of time, taking it from the horse again and putting it back into the dog. This sounds simple enough, but so far Mr. Deaken is the only man who has discovered the proper organism to use with the media.

In cases where the disease is only slightly marked, Mr. Deaken is satisfied with putting the fluid under the skin. It is only in severe cases where the anti-toxin goes into the jugular vein. Although the youthful discoverer has not disclosed his secret, he has made it possible for others to use the anti-toxin, and when he leaves the city he will leave behind him able disciples, so that every little dog who is suffering from the dread disease, distemper, may have a chance for his life.

Picking the Best in the Litter.

NOTHING is more difficult for the undogmatic than to try to judge the merit of pups, and even those who can classify at a glance the full grown, fail where the embryonic champions are concerned.

Some breeds are more difficult to select than others on account of possessing certain points which are not fully revealed until a fairly late age. The ears of a collie or terrier or hound will probably be carried wrong until the permanent teeth have grown. So, too, with many breeds in which color is of importance. Age alone determines whether this is going to be correct or the reverse. The collie, however carefully he is fed, exercised and groomed, may disappoint his owner as regards the quantity of coat he possesses on reaching adult age, and one that did not look so well at weaning time may come along nicely.

Yorkshire terriers are among the most difficult to pick, as they are born black. A litter of Airedale terriers will, to those unused to the dogs, resemble a litter of black and tans.

A litter of West Highland white terriers is about as prepossessing as a nest of guinea pigs. The toy breeds are pitfalls for the unknow-

"KOILA"

12 miles east of Chetek on Potato Lake. The finest view in this part of the state. 120 feet above the lake. The fishing is great for Bass and Muskies and Pike. Chain Lake only 3/4 mile by trail, has Muskies and Bass; and Pine Lake, 1/4 mile, has Bass and Lake Trout and Pickerel. Lots of shade, spring water, and the best of food. Large rooms. Boats on all lakes. Minimum rates by the week, 2 persons to a room, \$12 each; 1 person to the room, \$15. Roads fine. No charge for ice or boats to guests. Limited to 20 guests. 6 trout streams within 10 miles.
W. E. BARDEN, Chetek, Wis.

ing. They will remain small up to a certain point and then suddenly decide to assume the proportion of a foxhound. It is difficult to set down any fixed rule for selecting a puppy. The most one can do is to select a man who ought to know and abide by his decision.

Southport Successor.

THE collie illustration herewith printed shows a recently imported collie with a remarkable record of wins in Europe, with several to his credit since crossing to this side of the

SOUTHPORT SUCCESSOR—OWNED BY DUNDEE COLLIE KENNELS

pond. His family tree shows the bluest of the blue blood found in collie families, coming lineally direct from Ch. Squire of Tyton, Ch. Southport Sample, and Ch. Southport Sculpture. Successor is sable and white, heavily coated and handsome. He is owned by Dundee Collie Kennels.

Newport Show Judges.

THE date for the Newport dog show has not yet been decided, but the prizes have been selected.

James Mortimer, of Hempstead, L. I., will judge St. Bernards, Russian wolfhounds, Irish wolfhounds, pointers, collies, chows, Dalmatians, bull terries, toy bull terriers, Welsh terriers, Sealyham terriers, West Highland white terriers, Schipperkes, black and tan Manchester terriers, miscellaneous and unclassified specials.

The Scottish terriers will be judged by Miss M. Brigham. William J. Green, of Philadelphia, will handle Boston terriers. Harry Loes, of Boston, will handle bloodhounds, foxhounds, harriers, setters, poodles, pinschers, Old English sheep dogs, dachshunds, Bedlington terriers, Skye terriers, Belgian or German sheep dogs, Samoyedes and Dandy Dinmont terriers. Mrs. R. F. Mayhew will handle fox terriers, Pomeranians, English toy spaniels, Japanese spaniels, Pekingese, Yorkshire terriers, toy black and tan terriers, toy poodles, Griffons and Maltese terriers.

Bulldogs, English and French, will be in charge of Arnold Lawson. Winthrop Rutherford will judge Airedale terriers and Irish terriers. Rev. T. Moore Smith will handle spaniels and Thomas Shallcross greyhounds, beagles, whippets and Italian greyhounds.

Soudan Swiveler Not Sold.

RUMORS to contrary notwithstanding, Soudan Swiveler will not be sold. Before his death George W. Batson gave the famous Airedale to Mrs. Batson who will continue to exhibit him.

Fine large camp fully equipped. Fish abundant and large. Season last of June to middle of August. Price, \$18,000, including land, buildings and full equipment. Apply to H. W., care Forest & Stream.

Albany Motor Boat Race.

FIFTEEN motor boats of the cruiser class started in the New York Motor Boat Club's race to Albany and return on June 29, but mishap turned back half the number. Respite, owned by V. C. Pederson, won. She finished at 4:41:30 Sunday afternoon, defeating Thistle, owned by J. H. Wallace, by 2h. 57m. 13s., with handicap allowance of 6h. 3m. 18s.

Thistle finished first and broke the record for the course of 235 miles on actual time by 20m. 35s. Last year's time, made by Excelsior, was 27h. 56m. Thistle's total elapsed time was 27h. 35m. 25s. Oeyesee was second, her total elapsed time being 30h. 41m. 30s.

The third boat, Marinette, owned by H. B. Freeman, finished at 5:47:36. Her elapsed time was 31h. 47m. 36s. and corrected 26h. 37m. 1s.

Bunk III., owned by C. Firth, won the open boat class. She covered the course in 29h. 22m. 42s.

An All-Around Open Launch.

BY E. T. KEYSER.

"AND I'll put a cabin on it for \$60 extra," said the builder. "That's just exactly what you will not do," said the skipper. "There is such a thing as getting too much for one's money and getting it on too short an over-all length. When I want to do a hurdle race, I'll take my hurdles in the open and not in the form of extension transoms on a 6-foot 4-inch boat."

So the Sandpiper remained an open craft, in spite of an obliging builder's desire to add more top hamper to both the bill and the boat simultaneously.

The Sandpiper is 26 feet 6 inches long, 6 feet 4 inches beam and of the whale boat type. The cockpit is 18 feet long, because, as the skipper observed, he wanted room to move around in and a place to put afternoon guests where they wouldn't get mixed up with the machinery.

The cockpit is divided into two sections by a thwartship bulkhead, which materially strengthens the craft.

Forward of the bulkhead is the engine, a two-cylinder two-cycle, 4½x4½ Monarch, so installed that there are 6 feet 4 inches clearance between the forward face of the flywheel and the after face of the forward bulkhead.

It took considerable persuasion to induce the builder to install the engine in just this position, but it was worth all the effort, as there is room to drop a couple of cushions on the floor, on which the skipper can sleep when night overtakes him on a lonely trip.

The forward cockpit is 10 feet in length, with locker seats running along each side, and the boat cushions are so divided that they may be laid upon wooden strips reaching across from side to side, and fill in, as a bed, the entire width of the cockpit forward of the engine.

The after cockpit is 8 feet in length with a wide lazy-back seat across its after end and with all the rest of the floor free for the accommodation of chairs.

Instead of the raised deck cabin which the builder wished to inflict on the hull, there is a 10-ounce khaki spray hood, built by the Pneumatic Mfg. Co., which covers the entire forward cockpit and gives 5 feet 7 inches headroom—something that couldn't be had in a cabin on so small a boat without making her unduly top-heavy.

On the aft end of the spray hood are curtains with glove fasteners, so that when the hood is snugged down and the curtain snapped, there is a 10-foot cabin on the boat.

And in this cabin the engine is protected and the boat is as dry and comfortable as a cabin craft in rough and wet weather.

On hot days, the sides and front and back of the spray hood are brailed up, making a snug awning, while, if desired, the whole spray hood may be shoved forward and dropped on the forward deck, leaving everything open.

An apron of 10-ounce waterproof khaki runs from the aft end of the spray hood to the aft deck of the boat and snaps to the side combings, keeping the boat absolutely dry.

For Sale.

You sleep o' nights. For campers and Chautauquans, cabin, houseboat, tent or home. 35 cents a box, three boxes \$1.00, by mail, or at all Druggists and Sporting Goods Dealers. Money back if wanted. Guaranteed.
MUSKEETOPUNK CO., Dept. F, PEKIN, ILLINOIS.

There are samson posts forward and aft, stepped into the keel, so that it is the cable or anchor flags that will have to give way instead of cleat or decking.

There is an adjustable automobile type of steering wheel forward, which can be raised or lowered, giving a choice of positions—a big comfort on a long run.

The rudder head comes up to the deck just under its deck plate, and, in event of anything going wrong with the tiller lines, an ordinary tiller may be dropped over it and the boat steered from the after lazy-back seat. But one of the chief features of the boat is the upright wooden steering lever—just aft of the bulkhead, which divides the cockpit, and which allows one man, seated alongside the engine, to handle the boat with the greatest of ease.

Reverse gear, lever, throttle, spark control, switch, master vibrator, Klaxon button, grease cups and power bilge pump, are so grouped that, without rising from his seat, the engineer can control them all. Under the locker seats, at the rear end of the forward cockpit, there are two Stanley & Patterson waterproof 12-cell dry battery holders. The one on the port side furnishes current for ignition and the Klaxon, while that on the starboard side, connected up into three fours in series multiple, furnishes current for the four sailing lights and also for a couple of four-candlepower incandescent bulbs fastened to the bow of the spray hood. The lighting battery can also be switched on to the ignition system, if it is desired, in an emergency.

The Perfex vibrator box is installed on the bulkhead, just aft of the engine and the wires from same lead forward on the plugs on the cylinders. All wiring from batteries is carried along the same bulkhead and the exhaust piping drops down under the flooring, passes under the after cockpit, to the muffler under the after deck, so that no piping or wiring is in the way when moving forward and aft in the boat.

The Sandpiper was intended for an afternoon boat, for fishing trips and yet so arranged that two or three fellows could go on an extended cruise aboard of her. It will be seen that she has quite comfortable headroom under the spray hood, which has never leaked in the heaviest rains, and that she boasts of the convenience in passenger carrying capacity of an open boat, with many of the good points of a small cruiser, and she certainly gives more freedom and room in which to move around than could be obtained in a cabin craft of less than 10 feet greater over-all length.

She is very completely constructed, all the bright woodwork being of oak, with deck seams payed with marine glue. The brasswork on engine and fittings is reduced to a minimum, and after three seasons' use, her owner would not swap her for anything of her size in the market.

It is true she only makes nine miles an hour, but she is a mighty weatherly craft and has stood some heavy blows in the Tappan Zea, Long Island Sound, and the Lower Bay, and although her whale-boat stern prevents her from making very great speed, it's the most comfortable sort of a stern when you are running away from the big white horses.

For a dinghy she tows a little 10-foot dory skiff, whose tendency toward crankiness is compensated for by the fact that you cannot possibly capsize it when you "snap the whip" with it on the end of a long painter.

The Sandpiper has a mess chest, which serves as a seat and opens up as a table and holds cooking utensils and enough grub for a four days' cruise, and four fellows have lived on her for a week at a time, cooking, eating and sleeping aboard her, while eighteen people can be accommodated comfortably on an afternoon run.

This type of craft is far better for the average man than the very small cabin cruiser, for, when you come right down to brass tacks, the man who can habitually go away for cruises of a week's duration at a sufficient number of times during the season to make it worth while, is usually so fixed financially that he's apt to be in the market for something about 50 to 60 feet in length.

GAME LAWS IN BRIEF

The accepted authority for the
Game and Fish Laws of the
United States and Canada

Illustrated

Price 25 Cents

Revised to June 1, 1912

This is the size of book. Made to fit the pocket. It contains no anecdotes, fiction or short stories, but has absolutely accurate Fish and Game Laws, digested so as to be found at a glance and comprehended at sight.

You want 'em now as there have been lots of changes this spring.

Published now and for past 25 years by
FOREST AND STREAM PUBLISHING CO.

SINCLAIR
COPYRIGHT, 1911, BY FOREST AND STREAM PUBLISHING CO.

A PARADISE FOR BIRDS.

HENDERSON county, Ky., which was the former home of the naturalist, John James Audubon, deserves to be called a bird paradise. The Lynchburg News some weeks ago called on the farmers in this section to feed the birds and keep them alive while the ground was covered with snow, and they were unable to help themselves. Similar conditions prevailed elsewhere and the same appeal was made to the farmers and with good results in some quarters at least. We quote the following from the Gleaner, published in Henderson county, Kentucky:

"The farmers of Henderson county are ahead of any in any other county in the State in humane treatment of the birds. The Gleaner, in an article just at the beginning of the cold weather this winter, made an appeal that was nobly responded to without delay, and the result is that few of the little feathered friends of the farmer went hungry during the period that snow covered the earth.

"Farmers everywhere in the county made provisions for the birds to get grain around the corn cribs. Some left the door open at certain times of the day, so that the birds could go in and gorge themselves with grain.

"One prominent farmer said that there was a covey of quail on his place, and that they took up quarters in the gangway between his corn barn and stock barn and he gave orders that the door be left open so that the little birds could get scattered grain, and that they should not be molested.

"Others tell of birds that come in the yard and feed with the chickens. One farmer said he realized and believed that other farmers had the same opinion, that the birds were the best friends the farmer had; that they destroyed worms and bugs that were a menace to farm products, and that without the birds to help exterminate the pests they would become worse than Pharaoh's plague."

There is an example worthy of imitation. The action of the Henderson county farmer is both wise and humane. Game laws are all well enough in their way, but they are not sufficient to protect our feathered friends while the weather conditions are so unfavorable. The birds will be needed next summer, not only to add a charm to the rural scenery by the beauty of their plumage and the music of their songs, but to make incessant war upon the myriads of insects which prey upon the farmers' crops. Without their help the farmer would be at great disadvantage in the contest with the insect plague. To take a lower view of this matter the sportsmen of the next season would find themselves out of a job if the birds this winter were permitted to perish through cold and starvation.

RUSSIAN STATE FORESTS.

WHILE the privately owned woodland of Russia is being annually reduced in area, the extensive State forests, generally less accessible and farther away from well-developed trade routes, are but gradually being brought into use, and for a long time to come they will continue a welcome and important reserve timber supply for the world. In round numbers these forests cover 937,000,000 acres, a fair proportion of which is well stocked.

The increasing utilization of the State forests is shown by the growth of gross receipts therefrom. In 1885, the gross receipts amounted to \$7,176,010; in 1890, \$9,486,300; 1895, \$14,915,945; 1900, \$28,838,455; 1904, \$31,132,780; 1909, \$34,343,290; 1910, \$38,610,580; 1911, \$42,525,610; yet even this last total is only about 24 kopecks per dessiatine (12 cents per 2.7 acres).

Much of the timber apportioned for cutting can not be placed. This remains standing and harms the new growth. Measures are now contemplated for bringing this timber into the world's markets. Roads will be made, and over 1,000 new officials will be added to the staff of foresters, and many more keepers. Much is also intended to be done for the improvement of the condition of the forests.—Consul John H. Grout, Odessa, Russia.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth. 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose; Mountain Sheep; Game Refuges, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00. An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00. A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50. This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth. 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00. A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

The Angler's Workshop

ROD MAKING FOR BEGINNERS

By Perry D. Frazer

Every practical angler has some room, or corner of a room, that he calls his workshop, and he obtains almost as much pleasure in working in it during the winter as he derives from his summer's fishing. He may not make rods, but he likes to "fuss over them," altering them to suit his pet ideas, making necessary repairs or renewing frayed windings. Others, who have a few suitable tools—and very few are needed—make excellent fishing rods. It is really surprising how many such rods have been produced in this way since Mr. Frazer's book has been on the market.

"Rodmaking for Beginners" was not "written over the heads" of beginners. Anybody who knows how to manipulate a plane can follow the instructions, and every old angler finds useful hints in it.

Besides being the first book on practical split-bamboo rodmaking, it contains chapters on rods of all sorts, for fresh and salt water fishing, and is of value in repair work.

Cloth, 180 pages, several full-page illustrations and 60 working drawings. Postpaid, \$1.00.

Swordfishing off Martha's Vineyard

By HORACE WINSTON STOKES

Photographs and Drawings by the Author.

WE hoisted sail at dawn one August morning and with sail and engine driving us alike we spun through Vineyard Sound before an easterly breeze and a fair tide. The cliff so aptly named Gay Head was soon abeam, its banks of saffron, white and crimson marvelous in the flame of the early sun. Noman's Land was passed—a solitary islet shared by a single family, a flock of sheep, two cows and a vast multitude of gulls. Our little vessel's head was pointed southeast, and we made our way into the open sea. In number we were three, two veterans and a novice at the trade. Our ship was an able catboat, fast, strong, seaworthy and quick in answering her helm. In addition to a sail of goodly size, the thrust of a ten horsepower Lathrop engine was behind us.

Swordfishing, as the reader doubtless knows, resembles whaling in many points, as the fish are caught always in the open ocean, are sighted from aloft, harpooned, and then approached and captured from a dory, this last partly to save time and partly to eliminate the danger of an attack on the main vessel. The sword of an average sized fish of this species is a spur of bone from three to four feet in length, covered with tough skin, sharp edged, pointed and with a penetrating power that will drive it through the planking of a sloop or catboat. With the thrust and impetus of two or three hundred pounds game weight behind it, this sword becomes a weapon to be treated with respect, and

the fishermen prefer to risk their dories rather than to invite the attention of their sometimes belligerent quarry to the sides of their main vessel.

The home of the swordfish is said to be the Mediterranean, but it is found in considerable numbers along the north Atlantic coast, in the bay of Fundy and on the Georges. Fish of unusually large size, weighing from five to six hundred pounds, are sometimes taken as far north as Newfoundland, but the greater number are well to the south of this point. Block Island is well known as a favorite resort of swordfishermen, but many vessels put out from New Bedford and Martha's Vineyard taking fish within a radius of thirty miles.

The harpoon and gear with which swordfish are captured are both simple and ingenious. A strong light rope about 100 feet in length runs from the barb of the harpoon along the shaft, and leading back from the "pulpit" in front of the bow where the harpooner stands, is firmly attached to a small keg around which it is wound with the utmost care. When a fish is struck the pole and shank of the harpoon can be freed from the loosely fitting socket of the barb, the barb hitherto being held in place by drawing taut the harpoon rope attached to it, and fastening the rope in a simple eight or quarter hitch in a leather strap that is nailed to the pole for the purpose. The keg around which the harpoon rope is wound is now tossed overhead, the rope

unreeling as the swordfish darts away with the barb imbedded in its flesh. When the end of the rope is reached, the keg is often pulled completely under water and the strain of its resistance causes the barb to turn as on a pivot at right angles in the wound. This turn is produced by fastening the harpoon rope to the middle of the barb, and greatly lessens the danger of the barb's tearing from the flesh where it is held.

The keg is now being towed by the fish at a more or less rapid rate over the water. It is pursued by the main vessel, and when overhauled is picked up from the dory in which one man plays the swordfish on the rope as a tarpon would be played on rod and reel with a possibility beyond that of tarpon fishing, however, in the chance of being "plugged," as the fishermen term it, by their occasionally dangerous opponent.

To bring a fish alongside the dory and slip a noose over the powerful fluke is a matter of from twenty minutes to several hours, and usually requires a long period of strenuous and careful hauling, taking heed the while never to allow the line to slacken, which might cause the fish to turn and deliver his knockout punch, and never to become entangled in the coils of the harpoon rope that is likely to be whipped back over the gunwale by an unexpected rush at any minute. A half turn about a wrist or ankle in one of these rushes would send the fisherman to Davy Jones. The danger, however, with an

"A 250-POUND CATCH."

experienced man tending the rope is less than it would seem, and casualties are infrequent, although about one fish in ten will try to charge the dory. The process of capture is extraordinarily exciting and never to be forgotten. The pull of the straining fish will tow the dory over the water, and the braces and smother of spray in adjusting the fluke rope have possibilities beyond the gaffing of the liveliest salmon in a rocky stream.

As we sailed through the blue and gold of early morning, the wind died down, and the sun beat hot upon our deck. The sea became a flat expanse of burnished steel, the long heave of the ground swell running through it, and we rose and fell with measured regularity on water that seemed like oil. A hot day with no wind will bring the swordfish to the surface, where they bask in the warm sunshine or glide slowly in search of food, impelled by the sail-like power of their sickle-shaped fin and fluke. And such a day, ideal in all conditions, was upon us. Harpoons and gear were carefully examined, the captain of our vessel climbed into the "pulpit" at the bow. The first mate, with more skill than grace, clambered aloft, and the crew, consisting of the novice, took the helm, where it was thought that he could do least damage.

After slowing down the engine we cruised in long reaches over the fishing grounds, backward and forward in five-mile circles, triangles and quadrilaterals, allowing not a single foot of

the gleaming water to escape the notice of the keen-eyed lad aloft. The tin pan beat of the exhaust was sleep producing and monotonous; the novice, whose sole duty was to mind the helm and dose the engine with cylinder oil, detected himself nodding at the wheel. After several hours swordfish began to take on a mythical unreality that made the waste of quart on quart of gasolene seem futile and extravagant, when—"Luff!" was bellowed from aloft, and in a yell, "Luff hard!"

With the tail of his eye the novice caught sight of a black fin "cut out" swiftly to starboard and disappear as the boat swung sharply in its direction. But the tip of the harpoon, by which the man at the helm must steer at such a time, still pointed to starboard, then ahead, then lowered, down it plunged. "We have him!" was the cry, and "Shut her off!" came in the same breath from aloft.

Fumbling in excitement the novice nearly tore the switch from its fastening.

"Toss your keg" came double voices. He tossed, and the line running aft was caught in the propeller. A two-pronged pitchfork lay on deck. The novice by dint of jumping over the engine, and upsetting a quart of cylinder oil as he did so, reached it and cleared the line, while from the keg now thirty feet astern the line unreeled with stately slowness. The motion quickened, spray began to fly, the keg spun like a top upon the water. It disappeared bobbed up again some fifty feet further on, and danced along over the waves as fast as a man could row.

"Start her up," said the captain, and the mate bent to the fly-wheel. "Whish!" said the engine. "Drat the engine," said the mate.

The engine back-fired resonantly, but snapping the switch, the mate caught the explosion and we forged ahead once more at top speed, soon overhauling the skipping keg that was doing a skirt dance all its own some 200 yards away. Into the dory jumped the mate, the novice scrambling after, and the oars creaked.

"Got to see the end of this!" exclaimed the novice with a nonchalance that he was far from feeling.

"May be you'll see the end of something else," remarked the mate to cheer his spirits. "Charging elephants," he said, "if I don't believe he's going to run us!"

The keg was in the dory by this time, and the line, running outward almost horizontally, showed that Mr. Swordfish was on top of the water seeking that which he might punch with his proboscis. The novice elevated his frame from the bottom of the dory where he had been squatting. He disliked the thought of being taken for a target.

"A man was plugged right through the thigh the other day," remarked the mate. "He's in the hospital now with six trained nurses. Honor bright," he added, with a grin.

"What did he do until the main boat came alongside?" ventured the novice.

"Bailed, hung on to his leg and prayed," said the mate tersely. "There she goes," he added; "we're all right now."

"LUFF HARD."

The line was again running deep, lower and taut, and the danger of being charged eliminated. The dory moved with unction over the rippling heave of the ground swell, and finally the novice looking overboard caught a vague, blue-green, torpedo-like shape that turned sideways for an instant giving forth a flash of silver.

"Better attend to business," said the mate. "He'll be up in a jiffy. Get your fluke rope ready. Now then!" A giant of blue and silver, with eyes that might have looked upon the fall of man, was alongside. "Oh, good Lord!" exclaimed the novice. His exclamation stopped, however, when the fish, with a swift motion of its fluke, drenched him with a bucket or two of water, and struck the dory a blow that made it quiver.

"Over she goes!" sputtered the mate, who was also drenched. The fluke rope was attached and with yells and hosannas the occupants of the dory signalled the main vessel which was cruising slowly back and forth about 300 yards away.

The throat halyard used as a tackle made quick work of hoisting the fish aboard, where it was quieted with a hammer, and again we resumed the cruise, while the novice gazed with gloating ecstasy on the 250-pound monster now wrapped carefully in oilskins to preserve it from the sun. On that trip we took six fish ranging from one to three hundred pounds in weight, and to lovers of excitement and the sea the advice within this article is brief and to the point—go swordfishing.

Quail Shooting in Central Italy

By L. DeB. HANDLEY

THERE is probably not a race, even among the pleasure-loving Latins, that knows so well how to enjoy sport as does the Italian. His fondness for shooting is proverbial, and he makes a regular holiday of his days afield, which does not prevent his being an exceptionally good sportsman.

Anyone visiting Rome during the month of May, which marks the flight of the European quail from its tropical winter haunts to the far north, can enjoy a delightful outing, with the prospect of a good bag, by running down for a day's shooting to any of the nearby villages along the coast.

The passage of the birds usually begins late in April and extends to early June, being heaviest in May. The game little fellows leave the southern shores of the Mediterranean during the night, cross the sea, and land on Italian soil between dark and noon, according to weather conditions. Wind has much to do with the direction and the size of the flight. Any breeze from the north or west will swing the flocks to the lower peninsula, and Sicily and Calabria will receive the bulk, but a blow from the south or east and Central Italy is the favored locality. When you set out of a morning you never know whether you are going to return with a bag of fifty, one hundred or more birds, or draw a blank.

Many of the fortunate have shooting boxes at the seashore and spend the entire season there. Others, men engaged in business and unable to be absent for long periods, take only occasional trips, but they have in a very clever manner solved the problem of ascertaining when best to go.

Reliable agents are posted at all the neighboring sea stations with instructions to send daily wires to the leading sporting goods houses, telling of conditions. By 5 o'clock in the morning these bulletins begin to appear in the shop windows, and a crowd is always on hand to see them exhibited. The telegrams will read possibly: Anzio—small flight; Fiumicino, no birds early, a few beginning to arrive; Maccarese, shooting below Camp Salino, moderate pass; Furbara, fair flight, nothing great. Under the circumstances the majority will wait patiently for later news, but a few may decide to take a chance and go off on the first train to Maccarese or Furbara from where come the best reports. If a notice reads, "Big flight" you might think the crowd had suddenly gone mad as it disperses at a run in every direction. Men will rush home, jump into their shooting clothes, hail a cab and drive to the station in a frenzy to catch the next train, for they all know that if the pass is good, there will be birds aplenty for everyone.

At the depots a hurrying, scurrying mob of excited and vociferating individuals will soon collect, guns a-shoulder, baskets and bags in hand, and from one to half a dozen canines of every breed trailing along on chains and leashes, growling and snapping at one another.

In droves the human cattle pour into the third class carriages, dogs and men tumbling in together, then comes a great ringing of bells and crying of "Pronti! Partenza!" by the guards

and the train rumbles out. At destination it is a race for the grounds, and soon the regiment deploys, mingling with the more lucky mortals who have been on the spot since early morning.

When the flight is really good, the firing is incessant. Men hunt by side. The territory is literally covered, and it speaks well for the skill and sportsmanship of the gunners that accidents are rare, and that the right of way is respected even in such close quarters.

The most friendly feeling and a fine spirit of democracy prevail in the field. The prince and the cobbler will fraternize if chance throws them together. Men who have never met will pass with a word of greeting, and the sports-

larly have passed the century line and quite a few have exceeded the 200 mark.

The writer had the good fortune the year of Scorzone's feat to secure with three companions the shooting box of Prince Borghese, near Tor Astura, ten miles south of Nettuno. Leader of the quartet was Louis Sindici, one of Italy's greatest game shots, and two artillery officers, Captain Garofalo and Lieutenant Cerchiari, completed the outfit.

The lodge was a primitive stone cottage with one floor and a cellar. The former was divided into two large rooms, one used as bed chamber the other as kitchen, dining and living room. A peasant and a boy attended to our wants.

FAMOUS QUAIL POINT FOR MAY SHOOTING.

man's salutation, "In bocca al lupo" (In the wolf's mouth) is bandied back and forth on every side. This form is "de rigueur" in Italy. Woe to the uninitiated who tenders a "Buona caccia" (a good day's shooting). This phrase is believed to convey bad luck and is often bitterly resented.

The life at the seashore is most enjoyable during the quail season. The villages of Ladispoli, Furbara, Maccarese, Fiumicino, Ostia, Anzio and Nettuno harbor hundreds of enthusiastic nimrods who go out after birds in the early morning, and if the pass is small, return before noon and spend the rest of the day fishing, riding, sailing, playing tennis and golf, or indulging in other pastimes. The more rabid, however, flee civilization and camp out in the wilderness, making a shooting box, a lonely farm house, a shepherd's hut, or a tent their headquarters. These are the ones who make the biggest bags that at times reach sensational figures. The authentic record for one day to one gun stands to the credit of Scorzone, a man in the employ of Mr. Ferri, a well known civil engineer. Scorzone shot 342 quail in thirteen hours on his employer's property near Tor Vaianica, a historical old watch tower half way between Fiumicino and Anzio.

This is of course a phenomenal and exceptional kill, but most Romans who shoot regu-

larly have passed the century line and quite a few have exceeded the 200 mark. One rose before dawn. The sea, not fifty yards away, provided ample accommodation for ablutions, and if it was rough, we used a stream running beside the house. Breakfast was on the table by the time we were dressed and three of us partook of coffee and rolls, but Cerchiari, a giant in size, always made it a course meal and washed it down with a quart of burgundy. Imagine, at 3 o'clock in the morning!

At the first sign of breaking in the east each one of us took his gun and a camp stool, freed one of his dogs and repaired to a little hill a few rods away, overlooking the sea. Here the four of us sat and chatted awaiting daylight and the birds.

Sometimes the little immigrants would begin to arrive while it was still dark, and only a whirr of wings told of their landing, but an experienced ear could detect the sudden check when they alighted, and the spot was marked for search as soon as the sky cleared.

And such sunrises as were witnessed on a cloudless morning! It was wonderful to see the warm tints, almost tropical in their glory, slowly rise on the horizon, paint the sky in riotous colors, then fringe with gold the tops of the tall umbrella pines and creep down over the dunes to illumine the mirror-like waters which lapped the white beaches with soft murmur.

But watch those three little black specks close to the surface rapidly approaching. See them flicker and swerve? They are birds; they are the vanguard of an army of quail. It is Sindici who points them out to us, and following the rules of sport they are his when they land. Gradually they increase in size, until their wings and heads are plainly discernible. Then they reach shore and plunge headlong into a clump of reeds. They are tired out; the journey has been a long one.

Sindici sees them drop, but waits a few minutes to allow them to settle, then motions to his dog to search and follow him over. Brill has not been asleep and goes for the quarry as straight as an arrow. In a moment he falls to a point, edges up, and crouches immobile. His master walks up and kicks the tall grass. Immediately a little brown beauty arises in a flurry and strikes swiftly inland, but up goes the gun, a sharp report, and it tumbles into the sand. At the noise of the shot the other two hurriedly take flight, but only one gets away, the rearmost crumples up suddenly when the infallible sixteen speaks, and our companion returns with the first prizes of the day.

It is Cerchiari who marks the next arrival, a lone traveler coming straight for us with the velocity of the wind. Totally oblivious of our presence it passes within ten yards without shifting its course and heads for the hills but the lieutenant has arisen, and at the crack of his gun the bird is flung to the ground.

A flock of about a dozen is spotted soon after, again by Sindici, and it spreads in some tamarack bushes not a hundred yards away.

"Come," says the veteran; "there are enough for us all," so we stroll over together and account for six of the birds.

Not another quail is sighted for over an hour and by 6 o'clock Garofalo stirs himself.

"Looks like an empty day," he says. "I

think I'll work the brush to the point and turn in. Who's with me?"

I volunteer and we set out side by side, the dogs quartering before us, while Sindici and Cerchiari start in the opposite direction. Game is scarce, however, and 8 o'clock finds us back at the lodge with less than a dozen pair to the four guns. Breakfast number two awaits us and we do justice to it with an appetite to which the tramp has given a keen edge.

Then Sindici unhitched a fishing seine from the wall and proceeds to overhaul it.

"Don't forget that we are to have guests to dinner," he warns us. I'll undertake to provide the fish course—I saw a lot of white mullet in the creek this morning—but you will have to attend to the rest. If Garofalo will take a run to Astura for lobsters, and you two will uproot some dandelion for salad and gather a few flowers for table decorations, we'll be ready for them. Ciccio has already gone to the woods to pick strawberries."

The dinner party in question was one of many we enjoyed. We held open house and it was not infrequent for us to receive notice from some of our friends that they would drop in on us either by yacht or by carriage on such a day. At times we had as many as twenty men and women to cater for. Luckily we did not have to look for provisions. The sea and the brook gave us many delicious varieties of fish, and lobsters and clams were always to be had at Astura, about a mile away. Quail we seldom failed to shoot, and there was our chicken coop to fall back upon in case of no pass, while salad and dessert were provided by the nearby fields and woods.

The various duties allotted us on this occasion did not prevent our hunting at the same time. Sindici had his gun beside him while he fished, and kept his eye open for late arrivals. Garofalo beat the brush all the way to Astura

and back, and Cerchiari and I allowed our dogs to run around at will while we were busy in the fields, casting an occasional glance at them and running up if we saw one pointed.

To a stranger some of the customs obtaining at the seashore during the quail season are odd and interesting. For instance, a miss, never mind by whom, is generally saluted by every sportsman in the vicinity, and when the place is crowded, the scene is most amusing. As soon as a dog falls to a point, everyone stops to watch, and it may be imagined the nerve that it takes not to get rattled in the face of such a critical audience. Even good shots often suffer an attack of stage fright, with the result that both barrels are pumped ineffectively. The din which follows is indescribable. From almost every pocket comes a tin horn, the discordant blasts of which rend the air, while from many throats issue at top voice the stentorian cry "p-a-s-s-a-p-o-r-t-o," indicating that the lucky flyer has received its passport to the dead line, beyond which shooting is forbidden.

The most curious and entertaining spectacles, however, are the executions of bad sportsmen which occur once or twice at least each year. In the eye of the Italian it is an unpardonable sin to try to win glory by padding the bag; that is, by reporting a larger number of birds than one has killed. Let a man be convicted of the crime and he is virtually ostracized from the fraternity.

When a gunner is suspected of "flying," the term applied to padding the bag, either his boy is bribed to keep tabs on him, or a committee approaches him afield, and after inquiries concerning his luck asks him without ceremony to produce the birds. A regular offender is soon caught, for the disease is chronic, with some, and then the fun begins.

A tribunal is immediately formed; judge, jury and attorneys are appointed and court is held. The place is jammed when the case comes up for examination, for the battle of lawyers is usually extremely witty and amusing, even though the culprit is condemned in advance, no action being taken until undisputable proof is in the hands of the accusers. Eventually the death sentence is passed.

The execution follows in due course, the date being set for the first clear day on which there is no pass, and it generally takes place on the village square. It is an imposing ceremony.

All sportsmen in the neighborhood are invited to participate and most of them do. They collect in force, in full regalia, and form in procession. Then, led by a band playing funeral marches, and followed by a working cart on which is seated a mannikin of straw, bearing the name of the condemned in large letters, they solemnly parade through the streets. Useless to say, by the time the village square is reached the populace has swarmed into line.

In the center of the square the procession comes to a stand. From the top of the cart a herald reads aloud the findings of the court. The effigy of the criminal is stood up against a wall, and order is given for the firing squad to form. Amid impressive silence the command to fire rings out, a double volley awakens the echoes, and the deed is done. Ready hands bundle the sprawling scarecrow into the wagon again, and thus it is borne to a nearby field, where a pyre has already been built. The match is applied, flames rise high in the air, and in a few minutes

SPORTSMAN'S HUT.

the combustible remains of the pseudo corpse lay in smoldering ashes.

Not infrequently the doomed sportsman assists at his own execution, and he is seldom seen in the field thereafter. He knows he is a marked man and the first train available generally hurries him back to town.

A day that will ever remain a vivid memory to me was that memorable May 4th, on which Scorzone established his extraordinary record of 342 birds, probably the greatest flight day ever witnessed in Central Italy.

To an ugly night of storm followed a dawn wet, chilly and blowy. We rose as usual at break of day, but one look outside was enough to send us back to bed. Even enthusiasm has its limitations. We had not been long under covers, however, when the sound of shooting toward Nettuno began to reach us, and it soon became so insistent that it caused us to dress hastily and prepare for the fray.

The morning was gray and dark. A blustering wind blew in angry puffs from the south and rain fell in torrents. It was the very negation of a pass day. Nevertheless we had hardly poked our noses outside the door when a regular cloud of birds, several hundred in all, prob-

ably swept by with the speed of a cyclone and were soon lost in the mist.

With a concerted movement every gun was broken and shells inserted, but even before we had had time to look, another big flock whizzed by, and from that moment until nightfall the barrels of our shooting pieces hardly had chance to grow cold.

It was not sport; it was plain butchery. Yet such an opportunity occurs but once in a life time, and the man must be forgiven who, in the craze of attaining a record, loses for a while all sense of moderation and kills for the sake of number. It is wrong; it is most reprehensible, but it is human nature.

That day I saw more than one, whose fine sportsmanship was a byword, go stark mad with fever of slaughter. The spirit of rivalry seemed paramount in every breast. It was bitter competition instead of sport.

Drenched to the skin, unmindful of hunger, fatigue and discomfort, everyone hunted from dawn to dusk. We four tramped all day in a circle, with the lodge as our meeting point, but we paused there only long enough to leave our birds, change dogs, get more cartridges and gulp down a glass of wine.

At night came the reaction. Famished, exhausted and aching in every bone we sat down to survey the day's catch, and gazing on the mound of dead, now an ugly mess of wet feathers, gore and sand, we felt the blush of shame rise to our temples. But it was done; the kill had passed into history; it was too late to regret.

And this was the one and only black mark of the season. Usually there was no attempt to excel; on the contrary I have often seen an old-timer insist on giving first shot to a less experienced companion whenever chance permitted.

Bags ranging from ten to thirty birds were the rule throughout May, but four or five times over fifty went to every gun.

Alarmists are constantly crying out that the European quail is being decimated by the spring shooting in Italy, and that it will soon become extinct. But there is no immediate danger of it. The wise action of the authorities in forbidding the use of nets, one prevalent from Tuscany to Sicily, and in confining the shooting to one kilometer from shore, has done much to preserve the specie, and the supply does not seem to diminish very rapidly. Doubtless good sport will be enjoyed by Italians at the seaside for many years to come.

Dog Sledding in the Wilds

By ARTHUR SANTMIER

A Missionary's Trip in Mid-Winter—The Traits of the Dogs—Equipment—An Indian Feast

Photographs by the Author.

WITH a jingle of the bells, the crack of the whip and the explosive command, "Marche Bob," we were off on the trip to faraway Norway House. It was in the depths of a sub-arctic winter and Norway House lay distant 200 miles. At the time I was laboring as a missionary at God's Lake, a remote post of the great Hudson's Bay region. Owing to an early freeze-up, my goods had been delayed at the foot of Lake Winnipeg, and this rendered necessary the long trip by dog train.

The dog is the beast of burden of the North. Where no horse could go, and where no other draught animal could survive, the faithful dog does double duty as a hauling dog and as a companion to man. Travelers are wont to say that the dog is by far the best company one could well have. He is loving, patient, uncomplaining and faithful unto death.

The sled dog is a mixture of several breeds. He has at last become a mongrel. He pulls well, endures starvation without complaint, is unmercifully beaten and otherwise abused by his Indian master, and finally when his services are no longer required, he is turned loose to shift for himself. In company with three or four of his kindred he is harnessed to a flat sled or toboggan and together they haul a load of three or four hundred pounds twenty-five to sixty miles a day, depending upon the condition of the trail, the state of the weather and the degree of strength of the dogs.

On this journey I had a team of four, a set

of "web" harness and a very poor sled. My leader, "Bob," was a large, black dog of great intelligence and strength. His comrade of similar build and color was named "Cariboo." Cariboo was a first-class sled dog, but a constant fighter. He was either being lamed or laming some other dog at every opportunity. "Carlo" was a runaway. He was a long-haired red or yellow animal with small body and heavy fur.

He did not haul well and had to be watched all the time to prevent his running away. "Cubre" was a "Husky" or Eskimo puppy, but ten months of age and gave promise of a brilliant future as sled dogs go.

I started alone, but found that I might have company if I so desired, for an Indian by the name of Namaygoose was going as far as Oxford House with a boy to run ahead of the dogs.

FEEDING THE DOGS.

As I had a very large load, Namaygoose offered to carry two pieces of baggage for me to the end of his journey. With lightened loads we sped rapidly on our way. The start was made at mid-day, and at night we camped on the muskeg near Knee Lake, having accomplished a distance of twenty miles. Bob was very lame and Carlo was sick. Considering these disabilities, we did very well. At this place wood for the fire and spruce boughs for the camp were more than ordinarily scarce, and so this could not be reckoned among the most comfortable of my camps. Namaygoose manufactured a loaf from snow-water and flour and called it "bannock." I succeeded in devouring it after several attempts.

Leaving camp long before daylight we dashed across the portage at full speed. The low hanging branches slapped us in the face; fallen trees caught our feet; short sticks and stumps gouged us. The trailing sled rope seemed bound to entangle itself about my limbs, and the ups and downs of the trail, which could not be calculated in that gloomy hour before dawn, seemed to mock all efforts to preserve the balance, and finally at a turn in the trail the dogs stopped abruptly and my headlong flight carried me over the sled into a heap near my sled dog. He immediately wagged his tail by way of showing sympathy. This is a fair sample of early morning travel 'ere old Sol aids the traveler by his friendly rays.

At a little after noon we arrived at Oxford House where my dogs for safe keeping were placed in the dog yard belonging to the Hudson's Bay Company. During the hours of night Carlo could be heard making a fearful outcry. He had already caused me considerable trouble by his home-seeking proclivities, and he now seemed determined to get out of that yard and go home. Early in the morning I hastened to the dog yard and found a small piece of wood chewed from one of the upright logs that formed the inclosure. Through this aperture Cubre and Carlo had effected their escape. But two of my dogs remained in the yard. It was surprising to note through how small a space the dogs had managed to drag their bulk.

Immediately men were sent off to search for the escaped canines that were so necessary for our trip. Several days later Cubre was brought back. He had followed an Indian dog train down Oxford Lake for thirty miles and had there made his home until recaptured. Two or three days after this a sled came in from God's Lake and there in the harness was Carlo, my runaway dog. Upon effecting his escape he had made for his home at God's Lake with as much speed as was possible. He bore the marks of having been whipped severely, but I did not resent such treatment at this time, as I otherwise would have done knowing that he needed punishment.

I was delayed still longer at Oxford House endeavoring to engage a dog train and driver to accompany me to Norway House. Finally an English-speaking fellow whose name for various reason I will not give, was engaged for the trip. He was the only available man at the time, possessing a fairly good dog train.

As the mail packet from York Factory, known as the "York Packet," was soon to arrive and Mr. Campbell the trader with his several dog trains was to accompany it to Norway House, I decided to wait until after Christmas

and enjoy their company. It saved me the expense of employing a guide, as both the "Packet" and Mr. Campbell's teams had men to run ahead of the dogs.

On Tuesday, Dec. 27, my sled was early packed, and after waiting two hours for my man he came up hurriedly to inform me that he could not go to Norway House. I demanded a reason for thus breaking a contract and leaving me in the lurch. He replied: "You white men change your minds and I change my mind, too." I was unable to convince him of the difference between a man's engagement of his own private affairs and the sacredness of a contract that involved the interests of others. The man had a special dislike for Norway House, and the vicinity of the police barracks, as he had been accused of "borrowing" a gun without the owner's permission and of taking a cross fox from a man's trap and selling it as his own.

On a former trip to Norway House this recreant dog driver had been given an order for five dollars in goods at the company's store. To the figure "5" he had prefixed a "1," thus making the sum of "15." To increase this amount still more he had used a different pencil to alter the "5" to an "8" and then presented finally an order for eighteen dollars. For this, as well as for his other misdoings, he was wanted by the police, and so I did not wonder at his reluctance to go thither.

As the company's trains were not ready for the start I boldly launched forth upon the frozen lake. The cold was intense. As I had but a fair-sized load, I was able to keep from freezing by the exercise of running and driving. All went well for the first ten miles, when upon coming to a fork in the trail I was obliged to leave the dogs for a moment to ascertain which road I was to take. This brief stop sufficed to chill me thoroughly. To add to the dangers I found that Carlo, anxious to be freed from his traces, had cut two of them with his teeth. Things appeared rather dismal for a time, as I had nothing with me with which to repair the damage. After giving Carlo the punishment he deserved, there was nothing left to do but to await Mr. Campbell's arrival. He quickly repaired the traces and lending me his warm bear skin mittens for my half frozen hands, he made me drive hard toward the far distant shore. He led the way at a rapid pace and I was obliged to fasten the sled rope to my benumbed body to avoid being left behind. Not until after many miles did I again become warm and regain the proper use of arms and limbs. This experience taught me a lesson. After this I always carried twine or deer skin along with me on my journeys, as well as an awl with which to mend broken harness or sled.

A heavy fall of snow the first night that continued until noon of the following day rendered traveling very laborious. With the York Packet were two trains of "Husky" dogs, very slow and hard-pulling animals. Mr. Campbell had with him three trains and these with mine made a procession of six long dog trains. We had a very good chance to compare the "Husky" with the ordinary Indian dog of the country. Of course the Eskimo dog, or Husky was the hardier of the two, the strongest haulers, the most enduring and the least particular about their food. We however found our dogs to be much speedier and in traveling behind the Packet we were

obliged many times to stop and permit the Huskies to go ahead for a mile or two after which our trains rapidly came up again.

On the third morning the start was made while the sky was still studded with stars. While descending a very steep hill, my sled upset and dogs, driver and sled were precipitated into the soft depths of a great snowdrift at the foot of the hill. Before dogs and harness could be extricated and rearranged, and the snow shaken from my clothing, the other trains were far away across the lake. My dogs were able to follow the trail, however, and were eager to catch up. We crossed the four-mile portage at such a rapid rate that several times in the darkness I was thrown violently to the ground. After a twelve or fifteen-mile run we came up to the other sleds.

Hearing that the mail had been carried as far as an Indian house a mile or two ahead and left there, Mr. Campbell suddenly became very energetic in breaking a road, and hastened on ahead to get his mail. Previously he had found it more convenient to stay behind with his much vaunted train of five fresh dogs, and leave the road making and the road breaking to the tired dogs of the Packet, which had already experienced a ten or twelve days' trip. But for this mile or two he generously went ahead. After reading his mail and eating his dinner he took his original position behind the Packet.

It soon became my duty to lead the way, and despite the fact that I had one lame dog, one sick animal, and a third was a puppy, my train did splendidly for some time. When the dogs began to lag, another train took their place. We had been joined by this time by three Indian dog trains and presented an interesting sight as the nine trains followed the windings of the crooked trail across the muskegs and lakes. At night two large camps were made to accommodate the party.

While carelessly felling trees one of the men dropped a large spruce tree full upon Carlo's back. With a yelp he was buried in the snow and I heard Mr. Campbell exclaim in Cree: "Surely, he is killed!" But when the tree was lifted poor Carlo staggered forth in a dazed condition and wandered off in the woods. I followed him for a distance, and after throwing him a few spruce boughs for a bed, I left him until the morning. He did recognize me and I fully expected to find him dead in the morning. However, he had so far recovered that I put him in the harness and he made forty miles that day.

At this camp a thrilling experience befell us. During the night we were awakened by a choking sensation to find that the wind, which had greatly increased in force, had also changed direction, and the embers of the fire had been blown into activity and sparks were being showered over our bedding and equipment. Hastily throwing our belongings to the other side of the fire, we jumped through the flame and made haste to place ourselves beyond its reach. There in the cold and snow we rearranged the camp and searched for our several possessions. For some time I looked in vain for my moccasins and cup, and to this day I have not found my knife, fork and spoon, and a number of the belongings of the party were consumed in the flames.

On the last day of the trip we were astir

at three in the morning, and for the first ten miles went at a rapid pace. We then ate breakfast, and with my train well in the lead, we traveled so rapidly that at times it required my entire stock of energy to keep pace with the dogs. When near the mission while crossing the last portage my sled slipped sideways over an embankment and upset. With a wave of the hand comfortably seated in his cariole, Mr. Campbell passed me, and thus was first into Norway House after the many miles I had taken the lead.

As I passed an Indian house my dogs swerved toward the doorway and the sled was hurled against the threshold. I aimed a terrific blow at my leader with the heavy dog whip, but a man appearing in the doorway at this critical moment received the greater force of it across his shins. I was traveling too fast to stop and apologize, but later found that my victim was none other than William Crait, the mission interpreter, and he often laughed at my spectacular entrance into the mission village of Rossville.

The other trains went on over to the Hudson Bay Company's post, a little more than two miles further on, while I put my dogs in an empty stable and made myself at home at the mission where, as always, I was warmly welcomed.

And now approached the happiest time of the year to the northern Indian, the day of the great feast—New Year's day! At this important time are gathered together at Norway House nearly all the Hudson's Bay Company's traders in the district. From far-off Split Lake and Nelson House to the north and west; from Oxford House, God's Lake and Island Lake on the east, came the sleds of the fur traders. It so happens that many of the missionaries find this a convenient time to trip to Norway House for provisions. As all the Indians that are able to walk or to be carried are brought together at this time, there is an interesting gathering on New Year's day.

I arrived just in time to take part in the festivities of the occasion. The Indian agent, the Rev. Mr. Gilmore, had recently been appointed, with headquarters at Norway House, and was now on duty. This gentlemen wished to attend the feast given at the chief's house on the Jack River, and I offered to convey him by dog train to the feast. Accordingly soon after dinner we started.

For a sled I used the old heavy covered cariole, formerly used by Mr. McTavish, the chief factor of the company on his long journey. It proved too heavy for this work, and Mr. Gilmore purchased it for the Indian department. It was nearly covered over with a red parchment cover, and after carefully packing the passenger inside the remainder of the sled could be protected by means of a sliding cover that worked on wires. Thus he could be protected from the wildest storms.

The roads were hard and smooth, and we traveled briskly. Occasionally Mr. Filmore would call out to know if I was running and how I managed to maintain such a pace. I replied that running was an easy matter. All it requires is health and perseverance. We made the six or seven miles in forty-five minutes, and on the return trip gained five minutes on this record.

I had informed Mr. Gilmore of the custom

THE FAMOUS YORK PACKET.

of the Indian women at this feast to each one separately kiss every white man appearing on the scene. At this news he straightened up in defiance and declared that no Indian woman would kiss him. He would walk rapidly through the crowd and allow them no opportunity. As I fancied but little this promiscuous kissing, I determined to do likewise and to keep close to Mr. Gilmore for protection.

As soon as my dogs were cared for, we faced the music. The women were already assembled in pleased anticipation, while the young girls were audibly giggling. They would now add to their conquests, for had not they already vanquished the officers of the honorable company, including the Chief Factor? But, behold! With the mien of a soldier about to die for his country, with form erect and eyes flashing, with moustache waxed and pointed, and with his Yankee attendant treading at his heels, he marched through the assembly, and on up the

stairs with the air of a conquerer. Thus the first onset was avoided.

The feast comprised many varieties of meat, vegetables, various tinned or dried fruits, tea and coffee, and the usual cakes and puddings. It was truly a feast that was greatly enjoyed.

And then we were obliged to once more run the gauntlet, for the women have the right of way at New Year's time. With elbows akimbo and with as much speed as comported with dignity, we made our exit. As quickly as possible I arranged dogs, sled robes and passenger, and with all speed we returned to Rossville where another great feast was in progress. Here I relinquished my charge and my dog driving for the day was done.

Sad to relate the journey to Norway House was the last I was able to take in company with my noble dogs. Three of them were seized with a dangerous form of distemper, and when I returned to Oxford House I was obliged to leave them behind.

“Now, that Reminds Me”—III.

By O. W. SMITH

“**N**OW, that reminds me’ of bait-fishing for rainbow trout after nightfall, and if it be, as has been intimated, ‘unsportsman-like,’ then I must plead guilty to being a transgressor of the ‘high ethics’ of angling. Yes, I do angle for rainbow at night and am not ashamed of the practice. Furthermore, to make my sin more pernicious, I am going to tell my brethren of the angle how to do likewise. Perhaps I cannot better describe the *modus operandi* of night bait-fishing for rainbow than by simply telling you how I fell from piscatorial grace.

“You see, a party of us city anglers were camping on the Peshtigo River, out in Wisconsin, a stream which has more than local fame as a *Salmo irideus* water. We elected to camp

at Caldron Falls, some twenty-five miles or so from Ellis Junction, a station on the C. M. & St. P. Had we wanted speckled trout, we would have camped at the mouth of the Little Eagle, some eight miles below Caldron Falls, for there was wonderful fishing in that stream. I know, for while camped at Caldron Falls I made three trips to the Little Eagle, and some large rainbow have been taken from the Peshtigo just below the mouth of the Eagle. Then there is the Big Eagle, but when one begins to talk of speckled trout fishing, there is no end of opportunities in that section of the Badger State. I am under the impression that Caldron Falls is sixty-eight feet high, though owing to the tortuous gorge through which the angry water plunges, one sel-

dom realizes their height. Of course there is a wide, deep pool below the falls, with great white drifts of foam circling and eddying upon the surface of the unquiet water. A rainbow fisherman need not be told that large rainbows are sure to be found in such a deep and well aerated pool.

"Manifestly fly-fishing is well nigh impossible; that is, unless one uses a boat, a practice fraught with great danger and not to be recommended. However, on close, mizzling days, one can have considerable sport fly-fishing, providing he is possessed of more than a little skill with the rod and can 'lay a long line.' But with bait-fishing the case is different. There is no necessity for a long cast, the strong current taking the line out usually as far as the fisherman cares to have it go, and unless he keeps one eye upon the spool, the current will tease more line from the reel than he is aware, the result being that he may face a battle with an empty spool.

"We had been fishing for several days before we discovered that not until after sunset did the large rainbow begin to feed. Oh, we had taken a number of fish, both speckled trout and rainbow, fishing early in the morning and again in the afternoon, but the glimpses of broad tails we semi-occasionally caught made us dissatisfied with our successes, for we knew that the fishes of our dreams were feeding right before us day after day. Some of us took to invoking the fates, others cursed, while we all invented new flies and baits. Some two and one three-pound rainbow were taken, but either we were unable to reach the large fish, or they would have nothing to do with our lures. As a rule we had found grasshoppers the best live bait, though shiner minnows were a close second.

"Then one afternoon my fishing mate and I put our heads together, the result being that we determined to try night-fishing, which for some unknown reason none of the party had thought of doing. We provided ourselves with a couple dozen large shiner minnows, then just as the full moon rose, stole out of camp without exciting the suspicions of our companions. We made our way along the piled-up rocks to the foot of the falls, where we took positions only a few feet apart, so that we could make one another hear, and began to pay out our lines. We had fished so continuously that we were intimately acquainted with every eddy and current, and knew just about what our baited hooks would do. By watching our spools we were able to judge quite accurately the amount of line we had out. So we waited, each on the *qui vive*, expecting the first sharp tug which usually announces the presence of a rainbow.

"My companion, more fortunate than I, hooked the first fish; a good one, I judged, from the manner in which his rod bent to the strain. Shouting something which was lost in the roar of the falls, he dashed away along the rock-strewn shore, seeking to draw the fish out of the heavy current. Fortunately the angler had plenty of line on his large multiplying reel, so that he was able to successfully accomplish the maneuver. I would like to have seen the battle, but there were two reasons why I was unable to act the rôle of spectator. First, the drifting mist concealed him for the greater part of the time; then, too, he was standing in the shadow of the bluff; secondly, I had hooked a fish which required my undivided attention. Just when my

fish struck I am unable to say, for I was more occupied with the scrambles of my companion than I was with my own line, the wily rainbow seizing the opportunity to swallow my minnow and sneak to the other side of the pool. When I became aware of the fact that I was fast to a fish, my enemy was on the far side of the pool, between us a raging, seething torrent. Of course there was but one thing to do, attempt to drag him through the swift water by main strength, trusting that tackle and hook would hold. But why prolong the story? The weight of the water was too great, the hook tore out, and I reeled in glad to escape with so light a toll.

"While I was rebaiting, my companion came clambering over the rocks, bearing in his hand a fine four-pound rainbow which he had landed, and over which he gloated exceedingly. I told him to give me the inside position and I would go him a pound better, but in spite of my boast he hooked the next fish and I reeled in so that he might get down the shore into quieter water, for to attempt to land a fish where it would have the advantage of the heavy current was suicidal. While my companion was playing his capture, I hooked a fish, and keeping away from the current, led him into quiet water and fought the battle to a successful finish. My fish was larger than my companion's second, but not so large as the first, a fact which gave him great pleasure.

"Well, we fished until 11 o'clock, when we fastened on our last brace of minnows, the moon directly overhead, making the gorge almost as light as day, save when the gentle breeze would waft the ever-present cloud of vapor between us and her smiling face. It was a never-to-be-forgotten experience, and if such fishing be not sport, I do not know what is.

"With his last minnow my companion hooked and lost what he insisted was the largest fish of the evening, but I shouted in his ear something about the largest fish always escaping, which he took with poor grace. Then I hooked a real fish and he took the minnow with a rush, the 'feel' of the rod indicating that he was well hooked. Sprinting away over the rocky beach I reached the edge of the still water, where, gently but firmly, I coaxed my antagonist out of the mael-

strom into a more quiet portion of the pool where we fought the battle. Again and again the rainbow leaped, but always the hook held. I have been tempted to assert after certain rainbow expeditions that small fish are more active than the large, which if true simply proves that the last fish that night was an exception to the rule. How long the struggle continued I am unable to say, perhaps fifteen minutes, maybe half an hour, for under such circumstances each moment is an eternity long, and no watch records correct time. At last the battle was over, the fish netted and killed. My companion said that he would easily weigh six pounds, but I wishing to be conservative, placed him at five pounds, though I am positive that the real weight was somewhat more.

"Sitting on the bare rocks, there in the moonlight we took stock of the evening's sport. Seven fish, of which my companion had taken four, while I had to be content with three; however, I was satisfied, for I had taken the largest fish of the evening. We estimated that the string, one cannot say basket, would have weighed in the neighborhood of nineteen or twenty pounds, which if true would have averaged out three pounds apiece; not so bad, was it?

"After our experience, night-fishing became the regular thing, and always with greater or less success, though no two anglers ever did so well in a single evening as did my companion and I on the first night. Since that time I have resorted to night-fishing with bait, live minnows or grasshoppers, when seeking rainbow in various waters, and always with marked success. One will need a rather heavy fly-rod, say a seven-ounce, and a large multiplying reel. I know some of my friends use a bait-rod for the work, but I like the action of a fly-rod and always use one. Some time I am going to try the sport with a large automatic reel; then if I can 'keep my head' I am sure that royal fun will be my portion."

The FOREST AND STREAM may be obtained from any newsdealer on order. Ask your dealer to supply you regularly.

THE PESHTIGO.

SEA AND RIVER FISHING

California Notes.

WHAT is declared to be the largest sturgeon ever landed in Northern California was taken from the Pitt River recently by four fishermen. The fish measured ten feet in length and weighed 546 pounds.

C. MARCUS, a supervisor of Santa Cruz, Cal., who is deeply interested in fish and game matters, has suggested that when trout fry are planted in some of the small streams in that locality, temporary dams be erected and the large fish removed from the reservoirs thus created. By the time these dams are washed out next winter, the young trout will be large enough to care for themselves, and the present heavy loss will be minimized.

Fishing in California.

BY GOLDEN GATE.

IN spite of the fact that since the opening of the trout fishing season in the sierras, indications have been for very early sport, it may now be said that the very best fishing of the year is at hand. The snowfall in the mountains was exceptionally light last winter and it was predicted that as soon as this was off the ground, streams would fall rapidly, and the best trout fishing would speedily come to an end. Numerous rains have occurred from time to time since the 1st of April, and the water in many streams is still as high as it was then. These late rains have kept streams in a muddy condition and have prevented many people from making early visits to the mountain regions. In the large streams, such as the Feather and Klamath rivers, anglers have been compelled to depend largely upon bait fishing to fill their creels up to the present time, but now splendid fly-fishing is in order. In the lake country back of Blairsden there is still considerable snow, but summer camps are being opened there and the fishing season is commencing. Within a radius of a few miles from Gold Lake there are to be found thirty or more lakes, and these are all well stocked with trout. Fishing has been especially good at Smith's Lake, and Fred J. Goble and wife, of Berkeley, who have recently returned from a trip there, found no trouble in taking the limit whenever desired. In this section Poplar, Long Valley, Grizzly and Gray Eagle creeks have been affording good sport, as well as the Middle Feather from Cromberg to Blairsden. In the Big Meadows country fly-fishing is now good, but the lack of accommodations there is keeping many away who would otherwise make the trip.

The open season for black bass commenced on June 1 and some fine sport has been enjoyed on the Sacramento and San Joaquin rivers of late. In Prospect Slough and Cache Creek some splendid catches are being made as well as in the vicinity of Newman. This fish has propagated in a wonderful manner in California streams, and some very large bass are now being taken.

Striped bass fishing is still rather indifferent

and has been decidedly off color for several months. Not only do the fish seem to be very scarce; but those taken are quite small. Some fish of this variety are being taken in the vicinity of Oroville, and on the upper stretches of the San Joaquin. Leading local anglers believe that the fish are in the rivers instead of in the sloughs in the Bay district. With the advent of real warm weather, striped bass fishing is expected to show an improvement.

Following the heavy run of salmon experienced several weeks ago in Monterey Bay, several lighter runs have occurred and some fine sport has been enjoyed there. A few fish have been taken by trollers outside the heads at San Francisco, and several salmon have been taken in the San Joaquin River near Mendota, the run there being the heaviest in several years.

Illinois Casting Club.

CHICAGO, Ill., July 2.—*Editor Forest and Stream:* Our contest scheduled for June 29 was run off in regular order with the exception of the quarter-ounce distance event, postponed because of the wet condition of the lawn; showers just before and threatening weather necessitating a delay in starting the game. The weather during the accuracy bait event was cloudy, light south wind and almost calm; during the accuracy bait event, clear sky, light north wind; during the delicacy and accuracy fly event, cloudy and calm; during the light tackle dry fly event, cloudy. Following are the scores in the order cast:

Quarter-ounce accuracy, bait:			
	Score.	Re-entry.	
Humphreys	98.6	97.9	
Amman	98.5	
Jamison	99.1	
Tournier	98.3	98.9	
Wehle	98.4	
Ball	99.2	99.3	
McCandless	97.9	
De Garmo	99.2	99.5	
Bauer	98.2	99.1	
McFarlin	97.8	
Spencer	97.8	98.0	
Hornstein	96.7	
*Kleinfeldt	98.8	
Huntley	98.3	94.6	
Nicholson	98.6	97.9	
Stoltz	93.8	97.5	
Kerr	97.6	
Kernaghan	99.2	98.3	
Blodgett	94.6	97.8	
Pierson	99.2	
Delicacy and accuracy, fly:			
Jamison	96 19-30	De Garmo	98 5-30
Ball	97 3-30	Amman	96 20-30
Stanley	97 24-30		
L. T. dry fly, accuracy:			
	Score.	Re-entry.	
Jamison	97 14-15	98 7-15	
De Garmo	99 1-15	99 4-15	
Stanley	99 7-15	99 1-15	
Amman	98 2-15	99	
Pierson	98 9-15	99	
Heston	99 5-15	..	

Attention is called to the large number of scores over 98 and 99 per cent., there being eight of the latter.

Herewith we are handing you copy of letter received from H. Wheeler Perce, referring to the first contest of the inter-club tournament to be held on the grounds of the Anglers' Casting Club, at Douglas Park, on July 21. It is hoped all members will remember the date, and that the Illinois will be largely represented and do all possible to "boost the game."

Our practice events every Saturday and the "day following" on days other than and after regular contests are growing more popular, as is evidenced by the attendance, twenty-six members out last Sunday. These events are run off and judged from the large target and offer excellent opportunity for good practice work. Members may be found on the grounds each evening through the week.

As the next event will complete the first half of the season, members are cautioned to keep close tab on their re-entries. Hereafter the club score cards will be brought to the grounds on regular contest days, and members having any doubt as to their re-entries will consult the secretary or captain.

Whose name will be engraved first on the Chicago Fly-Casting Club's "Friendship Trophy"? Why not yours?

O. C. WEHLE, Secretary Pro Tem.

Mr. Perce says in his letter:

Dear Sir—The committee having in charge the arrangements for the Chicago inter-club tournament have instructed me to advise the secretary of each of the four clubs that the first event of said tournament will occur on Sunday, July 21, 1912, at 10 A. M., on the grounds of the Anglers' Casting Club of Chicago, at Douglas Park, and will consist of quarter-ounce accuracy bait and light tackle dry-fly accuracy.

Numbers will be drawn at random and those holding even numbers will constitute a team to play the team made up of those holding odd numbers.

The second contest of this series will be held on the grounds of the North Shore Casting Club at a date to be later decided upon.

H. WHEELER PERCE,
Acting Chairman.

Aransas Pass Tarpon Club.

AKRON, Ohio, June 25.—*Editor Forest and Stream:* The past week has been one of the greatest in the history of tarpon fishing at Port Aransas, Texas. The waters have been literally alive with tarpon.

A total of thirty-three tarpon was caught on June 4. A. W. Hooper, of Boston, Mass., thus far holds the record for the season's largest fish and greatest number. His best fish measured 6 feet 5 inches long. H. W. Brannock, of St. Louis, Mo., holds second place with a 6 foot 2¾ inch fish. J. W. Seafert, of Houston, Tex., caught the one hundredth tarpon, winning a prize for so doing. Many big catches of Spanish mackerel have also been recorded thus far.

The Tarpon Club members had a meeting at Port Aransas, Tex., last Wednesday, at which the following officers were re-elected for the ensuing year: President, A. W. Hooper, Boston, Mass.; First Vice-President, L. G. Murphy, Converse, Ind.; Second Vice-President, Henry Wilcox, Denver, Colo.; Third Vice-President, W. E. Jones, Houston, Tex.; Secretary and Treasurer, J. E. Cotter, Port Aransas; Corresponding Secretary J. E. Pfluger, Akron, Ohio; Governing Board, A. W. Hooper, L. G. Murphy, Henry Wilcox, W. E. Jones, J. E. Pfluger, J. E. Cotter, W. C. Boschen, L. P. Streeter.

J. E. PFLUEGER, Cor. Sec'y.

GAME BAG AND GUN

WHITE-TAILED PTARMIGAN ON NEST.

A Perfect Blend

By CHARLES S. MOODY

LOOK out! Do not step on that bird!" I called to my companion who was slightly in advance as we were climbing the steep side of a western mountain one day in June.

He halted and looked in surprise. "What bird?" he asked.

"The one right beneath your feet."

He looked again, saw nothing and started forward. I seized him by the arm and pointed to where a brownish bird flecked with gray, sat upon her nest in the grass not two feet from where we stood.

"That is wonderful!" he exclaimed. "What is it?"

"That is a white-tailed ptarmigan in her housekeeping dress," I explained.

The white-tailed ptarmigan of the western mountains is one of the most striking examples of "protective harmony" in coloration. The birds frequent the higher mountains above or near timber line. During the winter season they are nearly snow white, well nigh invisible against the background of snow. This change does not take place suddenly, but by regular gradations. In October the summer dress begins to moult the feathers, giving place to white. By the time the first snows come in November, the plumage is in perfect harmony with the half snow-covered rocks. When the ground is entirely covered with snow, the birds are almost white. As the snows begin to melt in the spring, the birds take on their summer dress, and by the time the ground is bare, are brown blotched with gray.

The female ptarmigan chooses her nesting site more with an idea of outwitting her enemies than for its attractive outlook. The nest is always placed somewhere on the talus of slide rock where the vegetation is either stunted or entirely

wanting. In the one event the grass soon becomes parched and brown, perfectly blending with her plumage; in the other, the red earth and gray rocks afford a like perfect setting. Once located on her nest, and it requires a keen eye to detect her. Her own sharp black eyes are the only betrayal. She cannot keep from closing the lids, and the glint of the sunlight discovers her presence. The bird is a close sitter, clinging to her treasures what though your next step will crush her. Many times I have lifted a sitting ptarmigan off her eggs the same as you might lift old Biddy in the hay loft, and with about the same resistance, a vicious peck. The ptarmigan is naturally more wary than this would seem to indicate, and beyond doubt the nesting bird depends upon her neutral color to protect her from discovery. The eggs carry out the deception, being dark brown blotched with umber, so nearly the color of the ground upon which they lie, that it is next to impossible to locate them unless by accident.

Hunting in California.

BY GOLDEN GATE.

THE open season for deer hunting commenced on July 1 in Districts No. 2, 4 and 5, except in such counties as have passed ordinances shortening the season. Reports that have come from the mountain sections of Central California, in which these three game districts are located, are to the effect that the deer are in very poor condition, the bucks being still "in velvet" and the fawns too young to care for themselves. Conditions are worse than they were last season when the Fish and Game Commission received letters from more than 250 persons who had found fawns wandering alone. So

numerous have been these complaints that it is considered likely that the game law will be amended at the next session of the Legislature, making the opening of the season a month or so later. It was anticipated that the supervisors of Alameda county would shorten the season in that county by two weeks this year, this having been decided upon last May, but at the last moment the regular opening date was decided upon.

Last season the State realized about \$150,000 from the sale of hunting licenses, and this amount is expected to be considerably larger this year. In the sale of hunting licenses this State is led by but two other States in the Union, New York and Illinois. The entire cost of maintaining the Fish and Game Commission and conducting its work is met from this revenue and from the fines imposed for violations of the law. Formerly the State was compelled to appropriate as much as \$80,000 a year from the public funds for this work. This year there have been printed 171,000 licenses, the value of these being in excess of \$200,000.

The Alameda County Fish and Game Protective Association held its annual meeting at Livermore, Cal., and elected officers as follows: President, C. L. Crellin, of Pleasanton; Vice-President, C. W. Heyer, Mayor of Hayward; Secretary, Earl Downing, Pleasanton; Treasurer, C. E. Beck, Livermore; Directors, John McGlinchey, of Livermore; C. A. Gale, of Pleasanton; C. W. Riser, of Centerville, and Fred G. Hoyt, of Hayward. Hayward was selected as the place for the annual barbecue which will be held early in the fall. At the recent meeting a silver cup was presented to E. T. Ellis as a reward for killing the largest number of bluejays during the past year.

A beautiful specimen of the scarlet ibis killed in Southern California, near the border line of Mexico, has been received by the museum curator at Golden Gate Park, and is now on exhibition. This bird is now very rare, having been almost exterminated by the Indians who are fond of its rich scarlet plumage.

Hatching Pheasants in Illinois.

BLOOMINGTON, Ill., June 6.—*Editor Forest and Stream:* E. H. Werner and Wm. McCarthy, well-known sportsmen of Will county, paid a visit to the State game farm at Auburn this week and were promised a consignment of game birds during the coming summer. The State hatcheries will distribute 70,000 English ring-necked pheasants. Eight hundred Plymouth Rock hens are assisting the pheasants in hatching the pheasant eggs, and it is hoped to give each county in the State a supply of the young birds. The State commissioner is conducting a series of experiments with various species of the birds, and the hardiest and those best adapted to Illinois will be given the preference next year.

E. E. P.

Two unusual bird incidents were reported in Central Illinois recently. Mrs. J. P. Daniels, of Clinton, was attacked by a woodpecker and so severely injured about the head that it was necessary to call a physician to dress her wounds. At Minonk, a bluejay was detected killing and eating young chickens. Ornithologists assert that such a cannibalistic trait was unsuspected, as the jays usually subsist only upon insects.

YACHTING

Larchmont Y. C.

THE thirty-third annual regatta of the Larchmont Y. C. was held on July 4, eighty-six yachts competing. It took one hour and ten minutes to get the entire fleet over the line. The 65-footers were the first over. Aurora led, with Winsome crossing next up to windward. Down to leeward was Istalena. At the home mark the times were: Winsome, 2.25.00; Istalena, 2.26.18; Aurora, 2.29.55. Winsome won, beating Istalena 1m. 58s. and Aurora 4m. 25s. Joyant was second and Cara Mia took the lee end of the line. In Class P Joyant won. Corinthian crossed the finishing line on the wrong side of the stake boat. In correcting she let Cara Mia into second place. Alera led the 30-footers at the start. Phryne and Caprice were close up with the leader and Nepsi and Dahinda won handily, with J. P. Morgan, Jr.'s, Phryne second. The summaries:

Sloops, Class K—Course, 30½ Miles—Start, 12:45.		
	Finish.	Elapsed.
Winsome, E. Trowbridge Hall.....	3 58 56	3 13 56
Istalena, G. M. Pyncheon	4 00 54	3 15 54

American Y. C.

FIFTY-ONE yachts crossed the line in the annual regatta of the American Y. C. on July 3. The three 65-footers, Winsome, Aurora and Istalena, were the first over. On signal Winsome crossed first, and in the windward position Istalena was at the lee end of the line and Aurora was last. At the end of the first round the times were: Istalena, 2.40.03; Winsome, 2.44.35; Aurora, 2.46.17. The wind freshened considerably, and the yachts sailed with their lee rails down close to the water's edge. All three jibed around the home mark. On the second round Istalena kept increasing her lead and won by 5m. 17s. Winsome beat Aurora by 2m. 14s. The Class P yachts, 30-footers and first two divisions of the handicap class sailed once around the long course. Windward led across the line with Cara Mia and Corinthian in the 31-rater class. Corinthian won from Cara Mia by 25s. Windward came in 11s. later.

In the race for the 30-footers there were six starters. Caprice crossed the starting line first down to leeward. Juanita, Carlita, Rowdy, Alera and Phryne followed. Caprice won by 27s. and Phryne, second, beat Rowdy by 2m. 12s. The four Sound schooners made a pretty race. Daffodil won by 53s. Vandalia was second. Interim, Red Wing and Natoma won in the handicap classes. Bela won in the inter-club class and Scylla in the Manhasset Bay S class. Topaz took the jewels. There were seven stars among which George Corey's Little Dipper won from start to finish. Argus was second. Skylark won with Curlew second, and each skipper entered a protest. In the Bayside bird class, Tautog won in the dory event. The summaries:

Sloops, Class K—Course, 33 Miles—Start, 12:15.		
	Finish.	Elapsed.
Istalena, G. M. Pyncheon	4 39 26	4 24 26

Corinthian Y. C.

THE Corinthian Y. C. held a club race last Saturday, eighteen boats entering in the five classes. The wind was fresh from the southeast and Classes P and Q and the sonders were sent over a triangular course to Southeast breakers, to mark 3 and home, giving a reach, beat to windward and run home. The smaller boats were sent over the inside course.

In Class P Amoret sailed a pretty race and won out over Sayanora by 52s. Tabasco III., in Class Q, sailed over the course alone. In the sonder class Ellen had it all her own way, winning by nearly five minutes.

Lolita won by nearly 1m. in the Eastern Y. C. one-design class, and Picayune in the Corinthian one-design class. Bon Soir, in the Corinthian one-design class, was struck by a squall off Grays Rock and capsized and sunk. The crew escaped with nothing worse than a ducking. The summary:

Class P.		Class Q.	
	Elapsed.		Elapsed.
Amoret	2 03 02	Italia	2 06 51
Sayanora	2 03 54	Timandra	2 07 30
Class Q.			
Tabasco III.	2 38 44		
Sonder Class.			
Ellen	2 15 48	Dorothy	2 21 26
Cima	2 20 39		
Corinthian Y. C. One Design.			
Picayune	1 40 56	We Three	1 47 44
Half Moon	1 46 20	Bon Soir	Capsized
E. Y. C. One Design.			
Lolita	1 25 48	Moslem II.	1 29 20
Atlanta	1 26 34	Viva	1 31 36
Searob	1 27 03	Sharnia	1 31 40

Knickerbocker Y. C.

EIGHT yachts sailed on July 4 in the regatta of the Knickerbocker Y. C. in the first race of a series of three for the Kayak cup. The course was from off the club house and took the yachts to Execution Rock, Hempstead Harbor, Scotch Caps and back to Execution and home. Paiute, owned by W. Beam, won with Lynx second. The summary:

First Race for Kayak Cup—Start, 10:15.		
	Finish.	Elapsed.
Paiute, W. Beam	1 28 50	3 13 50
Lynx, A. E. Aigeltinzer	2 13 48	3 58 48
Ouananiche, Rodman Sands	2 22 56	4 07 56
Echo, J. S. Whitmore	2 35 31	4 20 31

Alice, J. R. Strong	2 23 30	4 08 30

Published Weekly by the
FOREST AND STREAM PUBLISHING COMPANY,
 CHARLES OTIS, President.
 W. G. BEECROFT, Secretary. S. J. GIBSON, Treasurer.
 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL
 will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

THE AVIATRIX.

How useful in other walks of life would be the woman with sufficient courage to become an aviatrix! The death of Miss Harriet Quimby leads us to ask if it were not better to leave the struggle for mastery of the air to men of courage, who outnumber courageous women many to one. The game of air flying requires not only skill, courage and a cool head, but strength as well. Women often excel in all but the latter, in which they are so far inferior as to preclude any chance of their ever being of any value in the struggle against her, whose toll will number thousands before she will allow her paths to be navigated to any degree of safety. Granting of aviators' licenses by the body at present in control of flyers places a tremendous responsibility upon that body. Have they not the right to discriminate against women flyers? We think that under the existing circumstances they have such a right and should exercise it.

PRACTICE MAKES PERFECT.

NEVER was the adage "practice makes perfect" exemplified more emphatically than in the winning of the clay target team and individual championship by the Americans at the Olympic games. In America clay target shooters indulge in trapshooting almost to the exclusion of all other sports. Such experts as went to Stockholm, to represent America, shoot at the traps at least once a week during the season, while some of them average two or three times every week. In Europe trapshooting is not practiced to any such extent. Clay-bird shooting abroad is taken up as a substitute for and an adjunct to field shooting; "to get the hand in before the week end on the moors."

Clay target clubs are the exception rather than the rule abroad, and the man who shoots

at the traps is found more or less prominently among those interested in cricket, golf, tennis, riding, driving and sports of like nature. This incidental interest in the clay-bird game shows clearly in the fact that America took all clay target shoots. We are not belittling the excellent work of Mr. Billings and his team mates, nor that of Individual Champion J. R. Graham, for they have done well, and deserve all credit. Beyond doubt, however, practice made them more perfect than their foreign competitors, who were more or less without practice.

To those who know trapshooting, no word is necessary. To those who do not know this great sport, which is almost as much the national game as is baseball, we say, try it and you will learn why Americans practice and become perfect.

THE COMMON CAT.

IF city parks came within the jurisdiction of the Conservation Commission, how useful they would be as breeding places for game birds. As an instance take Pelham Bay Park, New York city. In this park at the present time are ring-neck and Chinese pheasants, quail, woodcock and a few partridge. These birds nest, lay and hatch each year, but then what happens? The common or garden cat comes along and takes its toll from among the progeny as well as the progenitors. The result is that instead of thousands of game birds in this great park, we have thousands of cats and few game birds. Park Commissioner Higgins, than whom there is no more conscientious and active commissioner, knows little about conservation of game birds, consequently a great opportunity is lost. A law should be passed by all city governments, and if city governments will not take care of it, the Conservation Commission should take it in charge, forbidding all residents on park property from owning or housing cats. City authorities should order all cats in city parks destroyed. If this is not done, all unboxed game birds in city parks soon will be wiped out. Why not a bounty on the scalp of the ex-house cat? When it was a house cat it had a mission; now that it has ceased to be a house cat, it should have a dismissal.

THE PLATFORM.

IN Chicago a President was nominated. In Baltimore ditto. We all know that either the Chicago or the Baltimore nominee must be elected, reports à la "progressive party" notwithstanding. In the platform of neither party do we find anything referring to conservation of natural resources. Political planks are imaginary, hence easily conserved. What we all want is a President who will see to it that the forests are conserved so that real planks will be available upon demand. There are many thousand votes awaiting the nominee announcing a desire to give the sportsman a chance.

THE CALL OF THE WILD.

THE call of the wild again has played its magnetic tattoo upon the ear drums of Paul Rainey, Harry Whitney and some other big-game hunters. The call must have been auricular, or how poor are acoustics at Sagamore Hill.

STOVER.

Most of us have read "Stover at Yale" and been amused at his idiosyncrasies. Many of us have been through much the same humorous feeling about Stover at Central Park. In one case we pay fifteen cents a copy for our entertainment; in the other case we pay \$5,000, and the destruction of one of the finest parks in this country. We all admire Mayor Gaynor for his policy of giving each of his subordinates an opportunity to make good—or bad. Isn't it true though that he listened to such men as Gutzon Borglum, who has made a study of the park situation and knows whereof he speaks when he condemns the present administration of Central Park, New York city? Hasn't Mayor Gaynor sufficient evidence that Mr. Stover has made bad?

VACATION.

WHEN you begin to slow up in your work, get irritable and want to find fault, where ordinarily you smiled, get out your fishing tackle. You need a vacation. When the office boy peeves you by lagging a bit, don't try to figure why. Get out your charts and lay out a two weeks' cruise. If your mind refuses to concentrate on a business proposition, it is time you let it wander on a pleasure trip. Get out your canoe and take to the stream. If you have none of these symptoms, take a vacation, anyhow.

PRAIRIE CHICKEN EGGS.

J. F. McCool, a farmer of Macon county, Ill., while mowing hay this week, discovered a nest of prairie chicken eggs. Knowing that the hen would never return, the eggs were transferred to the nest of a hen in the poultry house where a few days later ten chicks were hatched. Owing to the great scarcity of these game birds the ten were sent to the State game farm at Auburn, where they will be raised to maturity if possible, and used to propagate their kind. Despite the efforts of the game department, it is feared that the prairie chicken is doomed to extinction.

At Break of Day.

BY SADIE ELIZABETH MYERS.

Day danceth through the eastern skies,
 So fair to see,
 So glad to be;
 Traileth rare colors as she flies
 Both eagerly
 And happily;
 Stretched afar her arms of light,
 Lifteth from earth the gloom of night,
 Biddeth all life, with laughter bright,
 To joy awake
 And music make.

Hope trippeth with her friend, the morn,
 Blithe as you find,
 And on the wind,
 Lo, at their coming there is borne
 To every mind
 This message kind:
 "The past is dead—all things are new
 Naught is to fear, for skies are blue,
 Hope lives again, some hearts are true,
 And God is love,
 In His heaven above."

Squantum Y. C.

THE Squantum Y. C. held its annual open regatta last Saturday at Quincy. The class winners were: Class A, Nutmeg, A. C. Jones; Class B, Lethe, Hollis Burgess; Class C, Eleanor, W. L. Jefferson; Class D, Dartwell, I. M. Whittemore; Class H, Dorsyl, S. L. Gooin; Class I, Scaler, E. W. Murphy; Class S, Maritza II., C. H. Porter; Class X, Barbara, J. J. Blaney; cabin power boats, C. U. Later; open power boats, Pegasus.

Nutmeg, last year's champion and a consistent winner this season, had a sensational finish in Class A with Frizzell & Swenson's Chewink, Nutmeg barely nosing out a winner, cutting off Chewink by 10s.

Hollis Burgess and his Lethe found things to about suit them, the little Buzzard's Bay 21-footer feeling right at home in Buzzard's Bay weather. This makes the third race won by Lethe in three days and puts her in the running for the class championships despite her late entry this season.

Barracouta, owned by G. W. Glover, did better than before this year and showed her form of last season when she cleaned up the class.

But for real excitement, Class I, 18-foot knockabouts, gave the sport of the day, ten of the little fellows knocking around the course under full sail, half the time showing their fins way down to the lead. All the boats finished in hair-raising fashion within a space of ten minutes.

Louise, owned by A. E. Whittemore, was disqualified by the judges as she was coming in fourth boat for fouling the mark, her boom tip just hitting the flag. Seconds only separated Dorchen, Louise, Cheroot, Aurora and Bonitwo, the second, third, fourth, fifth and sixth boats. Sealer, owned by E. W. Murphy, came into her own at last, winning the race in weather and sea, for which she was built.

The Cape cats had good sport, but Commodore I. M. Whittemore, of the Quincy Y. C., merely repeated his customary stunt of winning, the big sailboats being reefed down as no mortal could hold them down in the wind with full sail.

The double-finned Maritya repeated her stunt at Hingham by tilting in on her side, a winner in Class S, G. W. Sergeant's Wamenock being defeated on time allowance.

The little dories had their athletic crews with them, serving as the best kind of movable ballast increasing the leverage of their weight by hanging far out over the weather rail. J. J. Blaney's Barbara proved her sour weather qualities by coming in nearly three minutes ahead of the second boat, J. S. Hodge's Bessie A. III. The summary:

Atlantic Y. C.

EDITH II. won the majority of prizes in the first two regattas in the motor boat championship of Gravesend Bay last Saturday. She won both the morning and the afternoon races for displacement boats, captured the hydroplane contest in the afternoon, and finished second to Vita in the race for hydroplanes. The races were held off Sea Gate, under the auspices of the Atlantic Y. C., and brought out a large number of yachts.

During the afternoon race for displacement boats, Mrs. Paula H. Blacton's Vita skidded and rammed Ethel May. Vita was badly damaged and had to be towed ashore.

Dr. Henry Z. Pratt's Tiny Tad, while in the morning race had trouble with her steering gear, in the afternoon's contest after starting thirty seconds late, she picked up Edith II. and Vita, Jr., and was leading at the end of the first round. At the end of the second round she stopped, but started again and led to the end of the third round. The race then was between Tiny Tad and Edith II., as Vita, Jr., had given up the contest. Nearing the Fort Hamilton mark, Tiny Tad again stopped, and was passed by Edith I. She never started again and had to be towed to her mooring. The summary:

Morning Race—Displacement Boats—Start, 11:00—Course, 30 Miles.		
	Finish.	Elapsed.

Arcanum Y. C.

A DECIDEDLY unique race was held on July 4 by the Arcanum Y. C. on Gravesend Bay. The "bang and go back race" was its official classification, and the conditions advised that upon a signal from the committee all boats must stop and return to the finish line over the same course. Rear Commodore McCaully's Carlotta II. won. Commodore Graff's Adelaide was second and Alva was third.

Tappan Zee Y. C.

THE regatta of the Tappan Zee Y. C. was run off on July 4 and was interesting and well attended. Respite, owned by V. C. Peterson, won the ten-mile event for cabin cruisers in 58m. 23s. Spindrift, owned by C. R. Butler, was second. Grace, owned by C. R. W. Smith, won in the fluke class. Bantam beat Louise in a five-mile sail race. In the one-design class No. 16, of the Yonkers Y. C., won in 1h. 20m. 7s. No. 4, of the Ridge Y. C., Hastings, was second.

Edjacko II. a Winner.

GLOUCESTER, Mass., July 6.—Although Onda, in the first class, held the lead from start to finish, Edjacko II. was at her heels, and with her allowance, won.

In the second class Osprey and Elizabeth fought it out all the way, but the first named won on actual time and did not need her allowance to get into first place. Weasel, as has been the case from the beginning of the season, had things her own way and won in a romp.

Sumarki, sailed by W. R. Harcourt, and Armored, sailed by Paul Wick, a Youngstown, O., boy, sailed one of the closest races, the allowance to Armored bringing the time of each out alike, although pursuing the decimal further, Sumarki wins by a shade.

Tid and the new boat Jane locked horns, and in the breeze which freshened toward the close, it was evident that the older boat had a trifle the best of it with rail awash and a rough sea. The course, as in all but the 15-footers, was a beat to the outer western mark, then a reach to the mark off the whistler, a broad reach to the breakwater and a spinnaker run from that point home. Meave scored her first win, the heavy weather condition showing her to advantage. The summary:

First Class.		
	Elapsed.	Corrected.
Edjacko II.	1 26 31	1 21 14
Onda II.	1 23 23	1 23 23
Nereid	1 26 51	1 24 45

Stamford Y. C.

THE first round in the tournament race for the Stamford Y. C. one-design boats on July 4 was won by H. C. Fleitman's Kittawake. Kelpie in turn beat Kittawake. Snapper beat Osprey. Curlew beat Dart.

THE last race in the first series for the Stamford Y. C. one-design yachts was sailed last Saturday and was won by Dart, which finished 1s. ahead of Gayer Dominick's Curlew. The summary:

Start, 3:05.		
	Finish.	Elapsed.
Dart	4 39 00	1 34 00
Curley	4 39 01	1 34 01
Kelpie	4 41 00	1 36 00
Snapper	4 41 35	1 36 35
Killie	4 41 42	1 36 42
Fiddler	4 42 00	1 37 00
Osprey	4 42 10	1 37 10
Kittawake	4 44 30	1 39 30

Killie leads the other boats in points scored in the series with a total of 32. The standing of the others is Kelpie, 25; Dart, 22; Fiddler, 19; Snapper, 18; Curley, 14; Osprey, 13; Kittawake, 12.

Seawanhaka-Corinthian Y. C.

ONLY six seconds separated the first three boats in the race of the 15-footers of the Seawanhaka Corinthian Y. C. over the inside course at Oyster Bay on July 4. There were seven starters. Moranto, owned by E. F. Whitney, won, beating Flicker 2s. and Hen, 6s. The summary:

S. C. Y. C. 15-Footers—Start, 3.15.		
	Finish.	Elapsed.
Moranto, E. F. Whitney	4 46 02	1 31 02
Flicker, E. C. Henderson	4 46 04	1 31 04
Hen, George Nichols	4 46 08	1 31 08
Thelema, Clinton Mackenzie	4 46 40	1 31 40
Imp, F. L. Landon	4 47 40	1 32 40
Grilse, P. J. Roosevelt	4 48 05	1 33 05
Tamale, Francis Weld	4 55 02	1 40 02

Bensonhurst Y. C.

THE Independence Day regatta of the Bensonhurst Y. C. showed fifteen starters. Alice won in Class Q by more than 4m., never being headed from the start. Spider took second. La Cubana won in the sloop division on corrected time. Blue Bill took the second division and Cyrice won in Class S. The summary:

Sloops, Class Q—Course, 12 Miles—Start, 11:00.		
	Finish	Elapsed.
Alice, G. Davis	12 51 16	1 51 16
Spider, H. Chubb	12 55 13	1 55 13
Florence, R. A. Brown	12 56 18	1 56 18
Soya, W. A. Barstow	12 56 38	1 56 38
Sloops, Handicap Class—1st Div.—Course, 12 Miles—Start, 11:05.		
Joy, Le Sauvage and Geer	1 01 52	1 56 52
La Cubana, J. H. Ives	1 04 02	1 59 02
Corrected times: Joy, 1.49.51; La Cubana, 1.46.11.		
Handicap Class, 2d Div.—Course, 11.5 Miles—Start, 11:05.		
Blue Bill, Z. Mayhew	1 13 43	2 08 43
Careless, R. Rummell	1 14 56	2 09 56
Gunda, W. H. Hall	1 15 25	2 10 25
Sloops, Class S—Course, 11.5 Miles—Start, 11:10.		
Cyric, Dr. C. L. Atkinson	1 16 44	2 06 44
M. and F. II., C. M. Camp	1 17 28	2 07 28
Sloops, Class X—Course, 8 Miles—Start, 11:15.		
Mouse, R. Dingman	12 46 50	1 31 50
Skylark, W. A. Howard	12 49 47	1 34 47
Pike, R. Rummell, Jr.	12 55 38	1 40 38
Slow Poke, F. L. Durland	12 57 38	1 42 38
Corrected times: On the second division of the handicap class: Blue Bell, 2.00.50; Gunda, 2.03.20, and Careless, 2.09.56.		

Stratford Shoal Race.

EARLY finishes, especially in the motor boat division, marked the New Rochelle Y. C.'s annual races for power and sailing yachts from off Premium Point to and around Stratford Shoal Lighthouse and return, a distance of sixty-five miles, on July 6, and to Pearl II, was awarded the first prize in the motor boat division.

Seven power yachts were started at 10 o'clock the previous morning and half an hour later the sailing division was sent to the eastward.

It was not expected that the first of the sailing yachts would finish much before midnight, but at half-past seven o'clock Rohilla made her appearance off New Rochelle and won the special prize offered by W. King, Jr.

Hyperion, R. N. Bavier, and Amada, B. R. Stoddard, were second and third to finish, but the winner in the sailing division could not be announced until all the yachts had finished. The summary:

Motor Boat Division—Start, 10:00—Course 65 Miles.		
	Elapsed.	Corrected.
Pearl II., G. W. Korter	8 08 45	6 22 45
Eileen, W. H. Creevey	7 13 40	6 24 15
Takitezy, F. M. Appleby	8 21 22	6 25 37
Thistle, J. H. Wallace	6 56 45	6 36 10
Hopalong, W. King, Jr.	8 08 02	6 37 39
Muskeget, C. W. Voltz	7 48 47	6 57 52

Flicker a Winner.

FIVE yachts took part in the weekly regatta of the Seawanhaka-Corinthian Y. C. yesterday. The contest was decided in a good breeze from the southwest. Flicker was the winner. The summary:

Sloops, Class S—Start, 3:20—Inside Course.		
	Finish	Elapsed.
Flicker	4 46 35	1 26 35
Grilse	4 47 05	1 27 05
Moranto	4 52 53	1 32 55
Iris	Disqualified.	
Hen	Disqualified.	

Racing at Washington Park.

THE members of the Washington Park Y. C. turned out in force to witness the regular races of that organization. The boats started from the club landing and sailed around Greene's Island and back to the land. A strong southwest wind and a lumpy sea helped furnish excitement.

Omeme, owned by F. Holt, and Wemader, owned by S. W. Gammons, fought it out in the Class F. event for catboats, the former winning by 30s. Molly, owned by O. Howes, had little trouble in landing the Class Q events for knockabouts. Eva May was the only starter in the power boat event.

Steward Richard Higgins acted as starter in

the absence of the chairman of the regatta committee. The summary:

Class F—Catboats.		Elapsed.
Omeme, F. Holt	4 35 30
Wemader, S. W. Gammons	4 36 00
Trixie, F. Dimes	5 08 00
Class Q—Knockabouts.		Elapsed.
Molly, O. Howes	4 36 02
Mystery, H. Walsh	5 02 30
Power Boats.		Elapsed.
Eva May, Al. Ellicott	5 33 30

Savin Hill Y. C.

FOUR boats furnished good sport for the members of the Savin Hill Y. C. on July 6. It was planned to conduct the race in two classes, but owing to the small number entered, the boats were bunched. Jacquinall won prettily. The summary:

	Elapsed.	Corrected.
Jacquinall	1 25 55	1 00 06
Aarman	1 26 31	1 00 52
Caprice	1 20 03	1 00 53
Hannah B.	1 41 04	1 16 16

From Governor's Island to Larchmont.

THE Bensonhurst Y. C. has arranged for a race to Larchmont. The boats will sail in the events of race week. The Yacht Racing Association of Gravesend Bay has officially recognized the Sound series this season and has arranged no dates for either of the Saturdays of Larchmont week. A larger fleet undoubtedly will take part in the contest this year.

The start will be made from Governor's Island on the morning of July 21. The contest is especially arranged for the knockabouts, but if the Q and the other classes decide to take part in the contest, prizes will be offered by the Larchmont Y. C. The boats that have entered the contest are: W. E. Darling's Paloma, A. M. Chace's Idler, Mystery and Alice W. All in the Q class.

Bay Side Y. C.

Two races made up the program of the Bay Side Y. C. on July 4. In the bird class Loon, owned by A. W. Knapp, won. H. C. Andrews' Dodo was second, W. F. Dayton's Skylark, third. In the one-design class Betty took the one-design class event, being cleverly sailed by W. H. Johns, her owner. C. Snedeker's Rowdy was second; W. Banks' Mary Jane third. In the afternoon Plover beat the other five birds handily, finishing as named: Loon, Skylark, Dodo, Curlew and Teaser. In the one-design class Mary Jane beat Rowdy.

Nassau County Y. A.

H. B. SIMMON'S Rocket, of the South Shore Y. C., won in the Class A regatta on July 4, the time being 19m. Sadie L. won in her class with Gonfalon second. In the 21-foot class sloops, the winners were: Rose Marie, J. Henry, Cedarhurst Y. C.; 15-foot class, The Bug, R. S. Carter, Cedarhurst Y. C.; 14-foot class, Shamrock, P. K. Stevens, Cedarhurst Y. C.; 23-foot class cats, Ethel, E. J. Williams, Cedarhurst Y. C.

Ticks from the Ship's Clock.

The Mitt II, owned by J. Harold Hayden, of New York, took a successful fall out of the new Dixie, Jr., and Bear Cat, owned by Herbert W. Copelle, of Englewood, in a race held at Alexandria Bay on the St. Lawrence River yesterday over the course of the Thousand Island Y. C. on July 2. Mitt II. is the holder of the gold challenge cup won last August at Frontenac.

Bill Thompson sure did yeoman's work on his trip abroad in the interest of the Chicago yacht carnival. He pulled it over the owners of the fastest boats in Europe, so that Lake Michigan will see the greatest bunch of international speed boats ever seen on this side of the ocean. William H. is a wonder in matters of persuasion.

New York Y. C.

THE program for the cruise, weather permitting, will be as follows:

The squadron will rendezvous off Station No. 10, Glen Cove, at 5 P. M., on Wednesday, Aug. 7.

Captains meeting on board the flagship at 9 P. M.

Reception on board the flagship at 9:30 P. M. to captains and their guests.

Thursday, Aug. 8, squadron run, Glen Cove to Smithtown Bay.

Friday, Aug. 9, squadron run, Smithtown Bay to New London.

Saturday, Aug. 10, squadron run, New London to Newport.

Sunday, Aug. 11, at Newport. The squadron will dress ship at morning colors. the squadron will illuminate at 9 P. M.

Monday, Aug. 12, squadron run, Newport to Vineyard Haven.

Tuesday, Aug. 13, squadron run, Vineyard Haven to Newport.

Wednesday, Aug. 14, at Newport. Races for Astor cups.

Thursday, Aug. 15, at Newport. Race for the King's cup.

Friday, Aug. 16. The squadron will be disbanded.

The preparatory signal for squadron runs will be two guns fired in rapid succession by the flagship, and the display at the foretopmast head of the code letter P over the signal indicating the next port. The start will be made promptly one hour later from a line previously established by the regatta committee, at which time the preparatory signal will be hauled down on board the flagship.

The regatta committee will issue instructions for the runs from port to port, and for the other racing events.

The flag officers' cups will be sailed for during the cruise.

Races for owl and game cock colors will be held at Smithtown Bay, on Aug. 8, at 6 P. M.

Captains are requested to supply their vessels with New York Y. C. night signals.

Captains and their guests will be welcome on board the flagship at all times.

Particular attention is invited to the club routine and to the signal code as appearing in the club book.

Captains are requested to forward the names of their guests to the fleet captain upon joining the squadron. The complete list will be sent ashore to the club station on the arrival of the squadron at the several ports for the convenience of members.

C. LEDYARD BLAIR, Commodore.
FRANKLIN A. PLUMMER, Fleet Captain.

Yachts Change Hands.

The 50-foot bridge deck cruiser Vincent, sold for Fred Brainan, of New Rochelle, to F. H. Shafer, of Brooklyn.

The 50-foot yawl Janette, sold for J. D. Peabody, of New York, to A. H. Likely, of St. Johns, New Brunswick.

The 40-foot raised deck cruiser Alice, sold for L. M. Boyce, to H. P. Hamell, of Philadelphia.

The 40-foot raised deck cruiser Navette, sold for Alfred Mestri to Dr. C. R. Holmes, of Cincinnati.

The 40-foot cabin cruiser Opitsah, sold for J. J. Harty, of Kingston, to a Western yachtsman.

THE entrants in the Independence Day regatta were: Adolph Hupfel's Dolphin, Frank James' Maywin, John G. Gilligh's Papoose, Otto Wagner's Widow, John S. Dickerson's Manhasset and C. G. Worthley's P. D. Q. Papoose won on corrected time in 56m. 31s. Maywin was second in the handicap and winner in Class H, corrected time being 1h. 12m. 3s.

Motor Boating

Palatka (Fla.) Y. C.

PALATKA, July 6.—In the speed boat races pulled off yesterday morning and afternoon some exciting aquatic sprinting was indulged in and several records lowered. The course was clear of hyacinths, a brisk northeast breeze was blowing and the weather was fair. The contests were witnessed by several hundred speed boat fans and appeared to be thoroughly enjoyed.

In the twenty mile handicap Diana was first, Seminole second and Independence II. third. In the flying mile Diana won the handsome cup offered by the Gulf Refining Company and lowered the record for that distance. Her time was 1:42.

Seminole lifted the trophy in the thirty mile handicap, winning by a small margin from Diana.

In the afternoon Diana was the victor in the first class race with Seminole a close second.

In the second class race Independence II. and No-Name of Palatka carried off the prize cups offered in that event. This concluded the races which should have taken place the day before, and constituted the premier attraction in Palatka's Fourth of July celebration, but on account of hyacinths obstructing the course were postponed until yesterday.

Jacksonville boats practically made a clean sweep of the entire card.

The New Winchester.

MESSRS. COX & STEVENS, the designers of the new express steam yacht Winchester for Peter W. Rouss, which has attracted so much attention during the course of its construction, have received a very satisfactory cable from the builders of this vessel, Messrs. Yarrow & Company, Scotland, to the effect that a thoroughly satisfactory trial was run over a measured mile on June 25 during which the Winchester made an average speed of 32.23 knots as a mean of six consecutive runs over a measured mile. This speed was secured without undue forcing and exceeds the speed guarantee by .23 knots, and it is safe to say that if desired, the owner can

drive Winchester at a considerably higher speed. Winchester is 205 feet over all, beam is 18 feet 6 inches, and she is driven by Parsons turbine supplied with steam by oil-fired Yarrow water tube boilers.

The trials having been completed, Winchester will be immediately prepared for her trip across the Atlantic, and will soon be seen in these waters in commission.

Mississippi Valley P. B. Ass'n.

THE fifth annual regatta of the Mississippi Valley Power Boat Association closed with Leading Lady, owned by W. P. Cleveland, of Galena, Ill., winning the five-mile handicap for boats in the speed championship classes. The time was 22m. 36s. Wigwam II., with five minutes' handicap, was second.

The five mile handicap for small boats was won by Borem Jeric, owned by Theodore Thompson, of Lacrosse, Wis., time 22m. 57 4-5s. Water Witch, owned by A. Smalley, of Muscatine, Ia., was second.

The Class A five mile event for single cylinder craft was won by Spitzbub, owned by Joseph Kelso, of Bellevue, Ia., time 23m. 4 1/4s., with Siren, owned by Harry Godley, of Davenport, second.

South Shore Y. C.

THE South Shore Y. C. at Freeport had a motor boat regatta on July 4. There were four classes—cabin boats, open boats, displacement speed boats and hydroplanes. In the hydroplane class Jack Boyden was the only one to finish, the time being 1h. 12m. In the class for cabin boats La Boheme was the winner with Old Fashioned second. In the race for open boats the winner was The Commodore. Rothsay was second with All Wool third. Marie II. won the race for displacement speed boats and Mildred V. finished second.

Ocean Race.

ALFRED S., owned by H. S. Soddner, of the Orum Y. C., won the 210-mile motor boat race to Cornfield Light and return which started last Saturday from the Colonial Y. C. Alfred S. crossed the finish line in front of the Colonial Club at 7:29:13, making her elapsed time for the long race 27.59.12. She was next to the limit in the handicap. Francis H., owned by G. W. Hoertel, of the Hudson River Y. C., on the long handicap, was the last of the boats to finish, and won second place by 1 1/2 m. from Spindrift, owned by C. R. Butler, of Albany.

Seven prizes, to be awarded in the order of corrected time, were donated by Senator Cyprian C. Hunt for this race, which was the longest inland motor boat race of the year. The first

prize was a German silver yacht model, complete in every detail, and the other six prizes were loving cups.

Empire, which is owned by J. B. Luckenbach, of the Atlantic Y. C., poked her way to the front as soon as the starter's signal boomed, and made the pace for the fleet every inch of the way. She turned Cornfield Light at 1:58 o'clock Sunday morning, forty minutes ahead of Snap Shot and Naiad, which turned at the same time, 2:38 o'clock. Empire crossed the finish line at ten minutes after the noon hour Sunday, her elapsed time for the race being 20.40.50. Empire won the fifth prize, no prize being offered for best time.

Madeline I., owned by Owen Reilly, of the Hudson River Y. C., finished in the highest corrected time. On the trip up the East River the intake valve on her first cylinder broke, and it was generally understood that the boat was out of the race. After a delay the boat continued on her way. She turned Cornfield Light hours after all the other craft had started back and finished up at 9:41 o'clock.

Commodore Franklin Pratt's Alma II. was the committee boat. The committee on board consisted of C. H. Newman, C. Van Culen, E. D. Knowles and H. W. Mott. William Richards represented the committee at the Cornfield Light turn. The summary:

	Cornfield L't.	Turn.	Finish.	Corrected.
Alfred S.	5 41 00		7 29 12	15 01 43
Francis H.	6 04 00		9 45 13	17 07 41

1913.

Jan. 22-25.—Pinchurst (N. C.) Country Club. Leonard Tutts, Pres.

DRIVERS AND TWISTERS.

The 1913 Missouri State shoot will be held under auspices of Marshall (Mo.) Gun Club.

Jersey City Gun Club is going to be open for several Saturdays before closing the season and extend an invitation to shooters to pay them a visit and enjoy a good sport.

The eighteenth annual tournament of the Betterton Gun Club will be held at Betterton, Md., July 22, 23, 24 and 25, under the management of J. R. Malone. Tournament and Handicap Committee: Joe Hunter, W. T. Harvey, Jos. Gifford, John Brice.

The Post Season tournament will be given at Cincinnati, O., on Oct. 15, 16, 17 and 18, 1912. All amateurs who have on Oct. 1, made an average of not less than 88 per cent. on 1,200 or more single targets shot from the 16yds. mark at registered tournaments held in 1912, will be eligible to take part in the Post Season tournament.

Don't overlook the shoot of the New Jersey State Rifle Association at Sea Girt, N. J., July 17 and 18. Lloyd Lewis, Neaf Apgar, H. H. Stevens, Jack Fanning, T. Haze Keller, Jr., Frank Pratt, Harry Wells, Mal Hawkins, Carl von Lengerke, Bob Schneider, Frank Lawrence, C. R. Babson and H. L. Brown will be there to take care of you. The Sea Girt championship, for amateurs only is a feature. Valuable trophies will be given. Write for program to H. G. Aspell, Secretary, Sea Girt, N. J.

W. G. BEECROFT.

Chesapeake City Gun Club.

CHESAPEAKE CITY, Md., July 6.—Fifteen contestants took part in the monthly shoot here to-day. The main attraction was the Du Pont trophy event, which was won by W. Anants with a score 97—four best scores out of six, with handicap added. This event has been keenly contested for. Of the thirty-five contestants, fourteen have scores of 80 to 96. In the spoon event W. Anants won the tablespoon, and C. Anants the dessert spoon. The scores:

Targets:	10	10	10	10	25	5p.	5p.
L H Worthington	7	8	10	10	20	9	9
R Reese	8	6	9	7	18	6	3
C Hoover	7	9	6	..	21

PUMP GUN, STEEL LINED SHELLS and METALLIC CARTRIDGES

BEAT THE WORLD IN OLYMPIC GAMES

American Experts and *Remington-UMC* Arms and Ammunition set a New Pace in Great Stockholm Meet

Individual Clay Bird Championship—Won by J. R. Graham, shooting *Remington-UMC* Pump Gun and *Remington-UMC* Arrow Steel Lined Shells, score 96 ex 100.

Team Clay Bird Championship—Five high men shot *Remington-UMC* Arrow Steel Lined Shells, with scores averaging over 90 ex 100.

Revolver and Pistol Championship—A. P. Lane, shooting *Remington-UMC* Metallic Cartridges, made the best individual score and a world's record in the team competition, scoring 509 ex 600; won the individual competition at 50 metres, scoring 292 ex 300, and won the individual competition at 30 metres, scoring 287 ex 300.

Paul Palen, also shooting *Remington-UMC* Metallic Cartridges, was second in the 30 metre individual competition.

The Olympic Trap Shooting Team chose Remington-UMC Arrow Steel Lined Shells because of their remarkable trap record of 15 out of 17 great national handicaps.

**There is strong additional proof here of the supremacy of
Remington-UMC — the perfect shooting combination.**

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO., 299-301 Broadway, New York, N. Y.

Du Pont Gun Club.

WILMINGTON, Del., July 7.—Just an even two dozen shooters took part in the events decided yesterday afternoon on the grounds of the Du Pont Gun Club. This was a good showing, considering the counter attractions offered and the hot weather that prevailed.

The club management was disappointed in not having J. H. Minnick and A. B. Richardson, the State champion, get together and decide their match for the Class A 1911 cup; also their tie for one of the Coleman du Pont spoons, which was offered to the local man making high score on all program events during the shoot yesterday week between the All-New England team and the team representing All-Delaware. On that occasion Messrs. Minnick and Richardson tied on score of 169 out of 180. Owing to Mr. Richardson being unable to attend the shoot yesterday, arrangements have been made for both matches to be shot next Saturday afternoon. This will make the program for that afternoon especially interesting, as both men are shooting a fast gait just now.

Minnick showed yesterday that he was in good form, breaking 25 straight for the Class A spoon. In Class B Clyde Leedom, H. W. Bush and H. P. Carlon tied on 22, and will shoot off the tie next Saturday. The Class C spoon went to Z. H. Lofland on the excellent score of 23, and R. S. Robinson won the Class D spoon on 18 out of 25.

The Class D cup (1911 trophy), recently held by S. T. Newman, was put up for open competition, no one having challenged the holder within the time limit set by

the conditions. The winner yesterday afternoon was R. S. Robinson, who is now open to receive challenges and do his best to defend his title to the cup.

A couple of novelties were introduced during the afternoon's sport. The first was "quail shooting," and Clyde Leedom and H. W. Bush showed their proficiency at "field shooting" by breaking 12 out of their 15 targets. "Quail shooting" at the traps is carried out as follows: The gunner starts walking toward the trap, his gun held well below the elbow, as if hunting birds. He starts from 23yd. mark, and the puller is permitted to pull the trap and release the target any time after the gunner has started on his walk toward the trap. Sometimes he lets him walk right up to the trap, and then again he pulls the trap just as soon as he has started. The event was quite interesting, and also proved how easy it was to miss targets even when standing "on top of the trap house."

The second novelty was an event at 25 targets, "Olympic style" of shooting. This means 18yds. rise, use of both barrels; targets thrown about 60yds., and with gun held between the armpit and hip until the target is in the air. E. A. W. Everitt showed the way with 22 out of 25. Leedom broke 19, Carlon 17 and Skelly 16. It was at this style of shooting last week at Stockholm, Sweden, during the Olympic gathering, that J. R. Graham, of Ingleside, Ill., a member of the Chicago A. A., won the Olympic world's individual championship with the wonderful total of 96 out of 100, two more than he broke when he led the winning American team which carried off earlier in the week the Olympic team

championship of the world.

The scores in the regular Coleman du Pont spoon contests, were as follows, each man shooting at 25 targets: J. H. Minnick 25, *Edward Banks 25, *J. T. Skelly 24, W. M. Hammond 23, *E. A. W. Everitt 23, Z. H. Lofland 23, Clyde Leedom 22, H. W. Bush 22, H. P. Carlon 22, T. E. Doremus 19, Dr. S. Steele 19, Dr. A. Patterson 19, T. W. Matthewson 19, R. S. Wood 18, R. S. Robinson 18, F. P. Ewing 17, D. A. Grier 17, J. H. Stadelman 17, W. B. Smith, Jr., 16, J. A. Kaiser 16, A. J. Curley 15, Dr. H. Betts 14, J. B. Grier 13, S. P. Livermore 12.

*Not eligible for spoons.

Fulton Gun Club.

FULTON, Mo., July 6.—Having formed the Fulton Gun Club at this place on June 24, the result of our July 4 shoot follows:

Shot at. Broke		Shot at. Broke	
R A Moore.....	50 44	H Baker	30 11

		F. C. WELLS, Sec'y-Treas.	

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

Pacific Indians.

EUGENE, Oregon, July 1.—The three-day shoot of the Pacific Indians ended on the 28th of June and was attended by a goodly company of lovers of the game.

As early as a week previous, some of the boys who could spare a little time began to arrive, attracted by the famous fishing in the Willamette and McKenzie rivers; and the more fortunate who got this extra enjoyment out of the annual meet, came in with strings of the beautiful "red sides" that made the other fellows wish that they as well, with all the world, "might a-fishing go."

By the 23d a goodly bunch had gathered in the hotels, and every train dropped its recruits unto the second day of the meet, many visitors coming to see the shooting who did not even participate themselves.

As showing appreciation of the occasion, a great many of the local business houses had special window decorations in honor of the occasion, and some of these were of a really high order of merit. The gun club and the good people of Eugene, in fact, showed in many ways that the Tribe made no mistake in voting to come here two years in succession. A finer degree of hospitality could not have been showed, and we are glad of this opportunity to say that this fact is appreciated by the Indians.

Practice Work.

Forty shooters went to the grounds Monday to "look down the barrels at a few," either for the first time if they were new-comers, or to confirm their previous experience of the traps and surroundings.

On an informal program of 100 targets, Lee Barkley took the most scalps, coming in with 99 at his belt. Right up close and leading the amateurs came Chief Bill Caldwell, of Portland, with 96; Hugh Poston accounted for 95, and Les. Reid bagged 94. Then the scores became pretty well bunched, but averaging well above 85, indicating that there would be "some shootings" later in the week.

Notes.

"Mooch" Abraham and Dick Carlon got away early and made sure that the fish were still there.

The Vancouver, B. C., squad was a jolly bunch and had "something doing" all the time. May we always have them with us.

Frank Riehl made the longest "jump" to get here—all the way from the Grand American Handicap at Springfield, Ill., passing up the premier shooting event of the year in order to be in on time.

Chiefs Haight, Holohan and Morris contributed their full share to the spontaneous gaiety of the week.

As the youngest one in the game, Deskin Reid was there with a whole basket of beads.

If the world has another trio who can "show" with Al Cook, Ed. Bean and Doc Day as preceptors in the art piscatorial, we will have to be shown.

First Day.

The shoot started promptly with sixty-five shooters at the score, the largest attendance yet recorded at a shoot of the kind on the Coast. Weather conditions were fine, and scores ran high for the day. Les. Reid got away from the bunch right at the start and finished with 147 alone. Lee Barkley was right after him with 146 for the Indians, as was also Fred Moellen, of Eugene, leading the palefaces. For third place B. Kompp, Harry Ellis and Hugh Poston tied, and then a long string followed with 140 or better. We are of the opinion, in fact, that no shoot ever before held on the Coast with over fifty guns on the firing line returned such high general scores for the day's work.

A new feature of very special interest was the competition for the solid gold honor medals, ten of which were offered for the ten high places each day. Ties had to be shot off at 50 targets, and of the ten places there were seven ties with two to five men in each. Over a thousand extra targets were shot in these special matches, and a large crowd of spectators watched the races with interest akin to that of the average crowd in a good turf event. This new feature was an experiment on the part of the tribe this year, but so eminently successful was it that we shall almost certainly make it a permanent feature of our annual meets. When the last gun was fired, the following were in possession of the day's honors, and thereby barred from medal competition on the following days: L. H. Reid, E. Ford, E. W. Cooper, J. T. Hillis, E. Abraham and Al. Cook.

Second Day.

Conditions were varied, and a good deal hinged on luck as the squads called during or between wind and rain showers. Scores, however, continued very high. Poston led the field with only one lost, Barkley losing 2 and L. Reid 3 for the day's work. For the palefaces, Frank Troeh, of Vancouver, Wash., scored 145; Harry Ellis, of Portland, and Chas. Porter, of Vancouver, 144, and Percy Knight, of Portland, 143.

For the day's ten medals the winners proved to be Barkley, B. Komp, F. Troeh, L. M. Fisher, Percy Knight, F. Van Atta, Harry Gilchrist, Bill Caldwell, Peter Holohan, Dr. Bull. Again there were ties in six of the ten places, these being shot off in a driving rain at 50 targets each, affording much entertainment for visitors on the grounds.

The annual meeting of the Tribe was held on the evening of the 26th at Hotel Osburn, there being twenty-three Indians in attendance.

Conditions governing the Chingren challenge trophy were changed to make it a straight race at 100 single targets, all contestants standing at 18yds. rise.

Bids for the 1913 meeting were received, backed by substantial money offers, from Boise, Idaho, Eugene, Ore., and Raymond, Wash. A close ballot resulted in favor of Raymond. Special votes of thanks were voted to Boise for its generous bid and to Eugene for this third offer to entertain the organization, as well as for

the magnificent entertainment accorded as at this and the last annual meet.

New officers elected are: E. A. Bean, Eugene, President; Geo. H. Smith, Eugene, First Vice-Chief; D. W. Riehl, of Tacoma, Herald-Custodian.

New members elected to the Council of Chiefs are: C. A. Porter, Dr. A. R. Baker, Al. Field, Vancouver, B. C.; J. A. Dague, Tacoma; Harry Gilchrist, Centralia; Fred Sturgis, Raymond, Wash.; W. A. Simonton, San Francisco; Con. Dillon, Dr. F. M. Day, Fred Moellen, James Seavey and Dr. M. M. Bull, Eugene, Ore.; Albert Zieroff, Junction City, Ore.; Chas. Dierlein, Eugene; Webster Kincaid, Eugene; W. W. McCormack, Eugene; C. E. Wilson, Raymond, Wash., and D. C. Reid, Seattle, Wash.

Third Day.

The third day's work held right up to the high standard, and what is remarkable in a tournament these days, the attendance was larger on the last day than the first. Throughout the week, the comment was that it was a most successful, satisfactory and well-managed meet, and it is believed that every participant went away more than well pleased.

Honor medals on this day's program went to D. Reid, D. W. Fleet, Fred Willett, John Edmunson, Frank Riehl, Ed. Morriss, Chas. Porter, Chas. Dierling and Frank Howe.

The annual competition at the Chingren challenge medal brought twenty-four shooters to the score. Poston and Walt McCormack tied with 97, with Riehl, Mullen and Seavey second at 96, and D. Reid, Caldwell and Barkley third with 94. Poston won the shootoff, and was immediately challenged by twelve shooters. A second contest resulted in a victory for Fred Moellen, of Eugene, with the splendid score of 98 out of a possible 100. And so the matter rests, on the finish of the finest tournament ever held by the Tribe.

The programme consisted of 150 targets each of the three days. Scores:

Table with two columns: 'Shot at. Broke' and 'Shot at. Broke'. Lists names and scores for various participants including Airheart, Tracy, Edmunson, Meek, Brockbank, Nichols, Simons, Leninger, Pfeiffer, P J Baltimore, Hillis, Baker, Porter, Field, Helman, Ford, Fleet, J Cooper, F C Mullen, M M Bull, B Komp, J W Seavey, W McCormack, D C Reid, W W Caldwell, R P Knight, H Ellis, F M Day, Dierling, Professionals, J E Reid, F C Riehl, Ed Morris, P J Holohan, C A Haight, H W Maynard, Dillon, Simonton, M Abrahams, Carlon, Bullock, E E Young, Dague, Ted Cooper, F O Joy, Geo Smith, A Cook, Ed Bean, H Gilchrist, F Howe, Dr Seelye, F Van Atta, F M Troeh, C Wagner, Lewis, E C Stotzer, Sturgis, Wilson, Zeirolf, J W Gibson, W Kincaid, W Komp, M A Rickard, J E Eiger, Glasso, A Blair, I M Fisher, H E Poston, F Willett, L R Barkley, L H Reid.

Analostan Gun Club.

WASHINGTON, D. C., July 7.—The Analostan Gun Club was honored by visits from two professionals—Homer Clark and E. H. Storr—at their regular shoot on the 6th. Clark scored 95 out of 100, and Storr accounted for 92. Dr. M. E. Harrison was high among the amateurs, scoring 93; Dr. Stine rang up the good score of 91. In the doubles Storr scored 22 out of 24, Parsons 20, Dr. Monroe and Miles Taylor 18, and R. T. Bray 13.

In the spoon contest Dr. Harrison walked away with the spoon in Class A, scoring 47 out of 50; Brown and Taylor tied for the Class B spoon on 42, and Green and Parsons tied for the third spoon. In shooting off the ties at 15 birds, all four tied again, and in the next shoot-off, Brown and Green scored all 15 and took the silver. Following are the scores:

Table with two columns: 'Shot at. Broke' and 'Shot at. Broke'. Lists names and scores for Green, Brown, Clark, Harrison, Storr, Stine, Dr Taylor, D D Stine, Parsons, Emmons, Sharpe, Wagner, Le Merl, Bohne, Taylor, Bray, Monroe, Orrison, T M Monroe, Bradford.

Grafton Gun Club.

GRAFTON, W. Va., July 4.—The following scores were made here at a practice shoot held this afternoon. A high wind and a hard target, together with five men who had never shot at a target before, kept the scores low:

Table with two columns: 'Shot at. Broke' and 'Shot at. Broke'. Lists names and scores for Gerstell, Riffee, Flanagan, Murray, Mambourg, Peck, Walker, Heckmer, Powell, Donnelly, Wren, Fahey.

N. J. S. R. A. Tournament.

THE first registered trapshooting tournament of the New Jersey State Rifle Association Gun Club will be held July 16-18 at Sea Girt, N. J. July 16 will be practice day. In announcing the first trapshooting tournament of the New Jersey State Rifle Association Gun Club, we extend a cordial greeting to all, assuring you a hearty welcome and a pleasant outing.

Sea Girt, N. J., is delightfully situated on "Old Ocean," fifty-seven miles from New York city, and is one of the most picturesque places on the north Jersey coast.

The privileges of the club house will be extended to visiting sportsmen, and meals may be had at most reasonable rates in the club restaurant.

The officers of the New Jersey State Rifle Association Gun Club are: President, General Bird W. Spencer; Vice-President, Colonel William Libbey; Treasurer, Colonel Charles A. Reid, Secretary, Henry G. Aspell; Field Captain, Captain Charles F. Silvester.

The program follows:

Practice day, five events, 20 targets each.

First Day.—Ten events, 15 targets each. Extra Sea Girt championship, open to amateurs only, 50 targets per man, handicap 16 to 21yds.; 25 targets to be shot each day; valuable trophies will be given to the three high guns; entrance, including targets, \$1.00; optional sweeps this day, \$1.00. The first day's events will be held open until 11 A. M.

Second Day.—Ten events, 15 targets each. Extra, continuation of last half of the Sea Girt championship, 25 targets; entrance, including targets, 50 cents; optional sweeps this day, \$1.00.

Division of moneys Rose System.

From Philadelphia, Broad Street Station of the Pennsylvania Railroad, or at the foot of Market Street, via Camden. Express time, two hours.

From New York via Pennsylvania Railroad, Thirty-third Street Station, by ferry from foot of Cortlandt or Desbrosses streets, or by Hudson Tubes from the Terminal Building or Sixth Avenue Stations, or via Central Railroad of New Jersey from foot of Liberty or West Twenty-third street, or boats of Sandy Hook Route from Pier 10, North River. Express time, one and one-half hours.

For further information, programs, etc., address the Secretary, Sea Girt, N. J.

Bryden Gun Club.

CATASAUQUA, Pa., July 3.—The weather for the Bryden Gun Club's registered tournament was ideal, but the sun shone a 90 degree heat, which caused the boys to sweat a good deal, although the firing line was protected by a 12ft. wide canvas. Thirty-eight shooters were present—thirty-two amateurs and six professionals. A short recess was called at the noon hour for dinner, which was served gratis by the courtesy of the club to all participants, and was in charge of hostess Mrs. Granville E. Brown, who provided a luncheon fit for a king, as "Smith," of Reading termed it—a token which is never to be forgotten. The menu consisted of roast beef, cold sliced ham, Swiss cheese, hard-boiled eggs, mixed pickles, wheat bread, graham bread, fancy cakes, fruit, prepared mustard, radishes, potato salad, celery gherkins, olives, red beets, onions, cucumber salad, bananas, banana cakes and ice cream. Eating too much lowers a man's score, and such was the case to-day. Lloyd says, "Oh you banana cakes." Al. ate for forty-five minutes and looked hungry yet.

High amateur honors fell on Smith, of Reading, and Kahler, of Philadelphia, who tied on 140. Behm, of Esterly, and Heil, of Allentown, again tied. These were the principal stars among the visiting fair sex, as both are single, but neither of them cares to be tied to any cotton-tails. Some of the bacon has always to be shared with the Reading boys. At Allentown, Ed. Adams was high with 146; at Newmantown, A. J. Menzel was high with 147, and a straight run of 126, and here Smith tied as high amateur with 140 H. W. Kahler, the Philadelphia champion. Behm and Luddy served as coaches; thus Smith landed \$28.90 as first money, with Kahler the same; Behm and Heil received \$22.05 each as second prize.

Fred Coleman, of Philadelphia, the noted live-bird shot, shot in the same squad with Smith and Behm, breaking 155 out of his quota. Rasmusson, pitcher of the Allentown Baseball team, broke 157 out of his quota—a notable record for "Rass."

H. J. Schlicher, former State champion, had bad luck and fell down to 136 in the regular program, but landed first with 45 out of 50 (25 pairs of doubles), and received the silver cup donated by the Brydens in this event. Here Heil was second with 44, and Kahler third with 41.

The professional field was led by Neaf Apgar with 148 out of 150. Out of his last 252 targets shot at on these grounds in registered tournaments, Neaf dropped but 4 birds. He holds a record of 236 straight here, while Hawkins holds one of 216 straight on the same date. "Mal" was second with 145 to his credit. Lloyd R. Lewis was third with 139.

During luncheon Mr. Granville E. Brown, president of the Brydens, presented a fine loving cup to Mr. Lewis for his kind services to the club since its organization, as a token of remembrance. Mr. Lewis was taken entirely by surprise, and thanked the club for their courtesy.

C. R. Babson shot but one event, as he became sick and could not continue in the race.

H. L. Brown served as squad hustler, and kept the game moving.

The long-run trophy was won by Arthur Walker with 56. George Selfies was a close second with 54, and Heil landed in third column with 50.

The low gun trophy was won by J. Knoll, of Cata-sauqua, with 66 breaks.

Luddy, secretary of the Hercules Gun Club, Temple, Pa., was in charge of the office, assisted by the popular John McAlister, and L. R. Lewis, on the Squier money-

back system. The shoot opened at 10 A. M., and closed at 5:30 P. M.

R. D. Thomas showed an 80.33 per cent. clip on his 90 targets shot at, which was well done.

A. E. Rasmusson, shooting a 91.30 per cent. clip, will be ranked among the stars as quoted by the fair sex, as well as Messrs. Heil and Behm.

W. Hepner reached the 136 mark, and tied H. J. Schlicher.

J. A. Depew paid us a visit and landed 123—away below his gait, while his comrade, Mr. Budd, of Lykens, reached the 127 mark.

Englert and Silfies tied on 132 to-day. John changed his old standby shells to-day, which caused him to fall down some. George Cooper showed the boys some skill when he broke 124 to-day. H. W. Headman, the oldest man at the firing line to-day, showed exceptional skill to-day, with 123 kills.

John C. Bitterling did well with 119 in the regular program, while he got 30 out of his 50 in the doubles.

The next big event will be the Hercules Gun Club's registered tournament at Temple, Pa., on Aug. 10. Here the Reading Eagle donates a solid bronze cup, standing 10in. high, elaborately decorated in silver, the center marking a crack target shooter in position, for competition to all amateurs on the full program of 150 targets. The amateur winning this event will be the sole owner of same. This cup was placed on exhibition at Catasauqua, and many of the crack shots will be in attendance on Aug. 10 on the Hercules Gun Club grounds to compete for this cup. The program for this tournament is in the press now, and will be ready for distribution in several days.

Ed. H. Adams and C. H. Adams, of Reading, had promised to come to Catasauqua on the auto, but business prevented this.

Lockwood B. Worden, of Harrisburg, Pa., president of the P. S. S. A., has submitted no excuse for absenting himself from this tournament, which he had promised Luddy to attend. Scores follow:

Echoes of New England—Delaware Shoot.

It seldom happens that any trapshooting team race finishes under such exciting conditions as those which prevailed in the race between All-New England and All-Delaware at Du Pont Gun Club. Stanley Tuchten, of the Du Pont Club, was the last man on the list to finish, and he had to break 18 out of 20 to win, or 17 to tie. When he only dusted his fifteenth target, things looked squally for the Delawareans, as that made his third miss, but he broke the last five targets and finished with 17, the race ending in a tie.

E. A. Staples, of Franklin, Mass., did great work, breaking his 100 straight in the team race; altogether, he made a run of 118 straight, a new club record, and finished with 175 out of 180, or an average of 97.2 for the program.

C. F. Marden, of Salem, Mass., who broke only 89 in the match, may be excused for some of his misses. He had bad luck from the start. His grip was stolen from him at the Boston station, and he had to purchase a soft collar in Wilmington. No wonder he couldn't "break 'em all." Said he: "If Staples lost his grip, what would Delaware?"

Billy Foord came to his own again, scoring 97 out of his 100, and landing in first place on the Delaware team. His good work netted him a prize in the shape of a souvenir silver spoon. Mr. Staples, of course, won the spoon offered to high man on the visiting team.

H. B. Cook, of the Seaside Hotel, Atlantic City, N. J., left the seashore and surf-bathing long enough to come over and break 170 out of 180 targets, incidentally winning a spoon also. His side partner, F. Plum, broke 95 out of his last 100.

E. C. Griffith, of Pascoag, R. I., is one of the old-timers who has made a decided mark on trapshooting records. Among other things worthy of note that he has done at the traps was his double win of the two Grand American Handicaps in 1901—the live-bird G. A. H. and the clay target G. A. H., both shot at Interstate Park, Queens, L. I., N. Y. He broke 95 out of 100 from 19yds. when he won the target event, and beat seventy-four other shooters. Last Saturday his best work was done on waffles during breakfast at the Wilmington Country Club.

J. L. Snow, of Boston, was as his name implies, the coolest man on the ground, despite the great heat. The only sign of warmth that he displayed was when he realized that his team had needed but one more target to win out, and that his score was only 87.

A. B. Richardson and J. H. Minnick, both Delawareans, and good shots as well, tied for the spoon offered to the local man, making highest total on the 180 targets in the program.

Bridgeton, N. J., was well represented by genial John Morris, C. E. Platt and S. E. Shull. Morris broke

WINCHESTER

Rifles and Cartridges

A man who travels the distance and incurs the expense generally necessary to get into big game hunting country should not run the risk of having his time, money and effort all go for naught by taking a rifle or cartridges that may fail him at the supreme moment. The surest way to guard against such a disappointing experience is by equipping with a Winchester rifle and Winchester make of cartridges. They come as near to being infallible as guns and ammunition can be made. Not only are they dependable, but they are made in calibers suitable for hunting all kinds of game. Remember

THE RED W BRAND NEVER DISAPPOINTS

91 out of his last 100, and 162 out of 180, but said he had just as much fun as those who broke more targets.

G. N. Proctor, of Boston, one of the visitors, declared several times during the day that he was absolutely certain he had a hat when he came to Wilmington, although none could be found on the grounds that he could claim as his. On the way to the Station in the evening it was discovered hung up in the top of the automobile in which he had ridden out to the grounds in the morning. Mr. Proctor thus left on the Colonial Express for Boston later in the day without a stain upon his character, and with his hat upon his head.

That the shooting was decidedly high class is shown by the fact that out of the forty-five shooters who shot through the entire program of 180 targets, no less than twenty-seven of them made better than 90 per cent.

JAKE.

Sikeston Gun Club.

SIKESTON, Mo., July 5.—Out of 50 clay pigeons, the following scores were made, to-day: L. R. Bowman 42, Clem Marshall 40, W. H. Tanner 40, W. Brookins 28.

WM. H. TANNER, Sec'y.

Marshall Gun Club.

MARSHALL, Mo., July 4.—Two days' good shooting was result of our registered tournament, finished here to-day. Wm. Ridley shot a great brace of scores, getting 146 on first day and 149 on second, a total of 295 out of 300. The weather was clear and hot, and while the attendance was not large, it was enthusiastic.

E. C. CHALLENGE CUP AGAIN WON BY A RECORD SCORE

Peters

WITH

"steel where steel belongs"

LOADED SHELLS

In a match at the Cincinnati Gun Club, July 4, H. D. Freeman (Challenger) won this famous trophy from C. A. Young (Holder) by a score of 189 to 172. This score of 189 is five targets better than that by which Mr. Young won the cup May 14, 1912 (also with PETERS Shells), and ten targets in excess of the best previous score with other makes of shells. The results of the match of July 4, in detail, are as follows:

	Singles	Expert Rules	Doubles	Total
FREEMAN - - -	98	46	45	189
YOUNG - - -	85	44	43	172

Here are some more winnings, adding to the already overwhelming weight of evidence of P superiority:

St. Louis, Mo.	June 23-24	High Amateur Average	295 ex 300	by Harry W. Kahler
Webster City, Ia.	" 25	" " " "	193 ex 200	" W. S. Hoon
Wilmington, Del.	" 29	High Professional Average	173 ex 180	" Neaf Apgar
Barre, Vt.	" 18-19	Vermont State Championship	92 ex 100	" W. B. Springer
Dayton, Ky.	" 30	High General Average	144 ex 150	" C. O. Le Compte

Cleveland Gun Club.

The weekly shoot of the Cleveland Gun Club was held on Saturday afternoon, June 29, at Shooting Park, Mayfield road. The shoot was not as well attended as we would like to see, but the hot weather and too much shooting for the last month has begun to tell on some and rest is needed. But those who attended put in the afternoon doing some good shooting. Mr. Doolittle was high gun in the first two events, the monthly and the annual, breaking 94 out of 100. The fine work of the day was done by Mr. F. W. Judd, who broke 50 straight in the annual contest and 39 in the special events, making a total run of 89 in all, with good targets and a wind that kept the flag moving all the time. This is good shooting and is a record for any man, may the weather be hot or cold.

I wish to announce to the many friends of Mr. John A. Flick that he is at his home a very sick man, and that it may be some time before we will see John on the firing line again. We are all wishing and hoping that he may be with us again, as he is one of the old standbys and the life of the game; and not to have him with us during the summer shoots one thinks he is not at home.

Event No. 1, monthly trophy, 50 targets, 16yds. handicap: Doolittle 48, Rogers 46, Dibble 45, Wallace 44, Judd 43, Stepp 43, Brown 42, Rockwell 39, Gould 38, Jones 37, Freeman 36, Thorp 35.

Event No. 2, annual trophy, 50 targets, 16yds. handicap: Judd 50, Brown 48, Stepp 47, Doolittle 46, Williams 46, Rockwell 45, Harris 45, Dibble 44, Wallace 43, Rogers 42, Freeman 42, Jones 41, Thorp 30, Annis 27.

Special event, blue ribbon handicap, 25 targets, added target handicap: Judd (2) 25; Stepp (1) 25; Harris (4) 25; Freeman (1) 23; Dibble (2) 23; Brown (1) 23; Rogers (2) 23; Williams (0) 23; Jones (0) 20; Annis (8) 17.

Special event No. 2, 25 targets, added targets handicap: Rogers (2) 25; Annis (8) 25; Judd (1) 24; Brown (0) 25; Freeman (3) 24; Jones (1) 23; Stepp (0) 23.

Silver spoon contest, 10 pairs doubles: Williams 19, Doolittle 16, Robers 15, Charley 15, Rodgers 18, Thorp 12.

The Fourth of July shoot of the Cleveland Gun Club was a success. The weather was very warm, and when the program was shot out nobody was looking for special events. All were glad to pick up and look for an ice house. The program was divided into events of 100 targets each. The first was shot from 16yds.; the second from 16 to 20yds. The prizes in the first event were twelve cash prizes, from \$2.50 to \$10, and a silver loving cup to each contestant making the best score out of each 20 targets shot at. The second 100 targets, handicaps 16 to 20yds., was a very pretty race. W. H. Archer won the beautiful Independence trophy with a score of 91, from 17yds. E. S. Rogers won the second prize, a silver cup, shooting from 18yds., and making a score of 90. Geo. Burns, the third, a silver loving cup, 88 out of 100 from 19yds. The high gun trophy was won by E. S. Rogers, who broke 182 out of 200 from 16 and 18yds. All hands got a little of the money and went home happy, as it is the long green stuff that makes the boys smile, no matter how small it is.

Following are the scores of Club shoot on July 6:

Event No. 1, monthly trophy, 50 targets: Doolittle

49, Williams 47, Jack 46, Rogers 45, Haycox 45, Dibble 45, Brown 44, Judd 43, Stepp 43, Jones 42, Bickley 39, Forman 38, Cline 37, Rockwell 35, Mutt 35, Annis 34.

Event No. 2, annual trophy, 50 targets: Doolittle 48, Brown 47, Rogers 46, Haycox 45, Williams 45, Judd 44, Scott 44, Jack 44, Jones 42, Dibble 42, Wallace 40, Rockwell 39, Stepp 39, Bickley 39, Forman 38, Cline 35.

Event No. 3, Blue Ribbon contest, 25 targets: Brown 25, Doolittle 25, Judd 23, Scott 23, Rogers 22, Haycox 21, Stepp 21, Williams 21, Dibble 19, Bickley 19.

Event No. 4, Blue Ribbon contest: Rogers 24, Brown 24, Haycox 23, Williams 23, Jack 23, Little 22, Wilson 22, Stepp 21, Bickley 21.

The scores made on the Fourth were:

Event No. 1, monthly trophy, 100 targets, 16yds.: Wilcox 95, Rogers 92, G. E. Burns 92, Ledgett 91, Haycox 89, Brown 88, Archer 87, Jones 86, F. Burns 85, Freeman 81, Hopkins 78, Rockwell 78, Bigelow 75, Annis 74, Gould 74, Goss 74, Wakman 70.

Event No. 2, Independence Day trophy shoot, 100 targets, handicap: Archer (17yds.) 91, Rogers (18) 90, Geo. Burns (19) 88, McVeigh (16) 87, Wilcox (20) 86, Jones (18) 84, Stepp (17) 83, F. Burns (16) 82, Freeman (18) 81, Haycox (18) 78, Brown (18) 76, Rockwell (16) 75, Hopkins (16) 74, Gould (16) 73, Annis (16) 70, Wakman (16) 65, Goss (16) 62.

F. H. WALLACE, Mgr.

Jersey City Gun Club.

JERSEY CITY, N. J., June 29.—Twelve members were out to-day and enjoyed a good afternoon's sport, as the day was an ideal one for shooting, although a little warm. H. H. Shannon was high gun for the day with an average of 87 per cent.; W. J. Simpson second, with 86 per cent.; North third, with 84 per cent. Huggins and McLemore tied for the first weekly prize with full scores, counting the handicaps, and in the second Shannon won by breaking all of his twenty-five birds. The scores follow in strings of 15:

Events:	1	2	3	4	5	6	7	8	9	10
Targets:	15	15	15	15	15	15	15	15	15	15
North	10	12	14	12	13	14	12	12
Simpson	14	12	14	13

Harvey	12	8	8	11	13	12	10	13	9	12
Jones	10	8	7	8	9
Brady	11	11	13	14	8
Sam	10	10	9	8	9

First weekly prize, 25 birds, handicap: McLemore (7) 25; Huggins (10) 25; Shannon (0) 20; Harvey (4) 21; North (0) 21; Lawrence (6) 21; Dr. Groll (2) 22; Dicks (0) 19. Huggins won shootoff miss-and-out.

Second weekly prize, 25 birds, handicap: McLemore (6) 25; Huggins (7) 22; Shannon (0) 25; Harvey (4) 24; North (0) 23. Shannon won with full score from scratch.

SECRETARY.

Buffalo Audubon Club.

A FAIR crowd attended the first shoot of the Audubon Club for July. Messrs. W. B. Darton and Ed. Cox, trade representatives, were welcome visitors. This was the first shoot for the fiscal year, and Mr. W. H. Smith kindly donated three beautiful trophies, to be shot for under similar conditions which prevailed in the Lambert trophy events last year.

The following officers were elected: C. F. Lambert, President; Chas. Rogers, Vice-President; W. C. Wootton, Secretary; John Ebberts, Treasurer; Ed. Wacker, Field Captain, and Messrs. B. V. Covert, Lewis Houpt and Ed. Cox, Directors. The scores for yesterday follow: No. 2 was the badge event, No. 4, spoon event; No. 5, Smith trophy event.

Events:	1	2	3	4	5
Covert	17	16	18	15	17
Rogers	16	13	19	18	17
Hammond	12	12	16	16	16
Ward	15	14	15	14	17

Olympic Trapshooting.

THE American team won the international match over the traps at Olympic games, Stockholm, Sweden, breaking 532 out of 600, Olympic style. James R. Graham, of Ingleside, Ill., and Chicago A. A., was high individual member with 94 out of 100. Charley Billings made second with 93, with Ralph Spotts getting third place with 90.

The British team ran second with 511. Germans brought up the rear with 510.

Mr. Graham won also individual championship, making the remarkable score of 96 out of 100. J. F. Gleason, of Boston A. A., looked like a contender until the last stage, when he was passed and beaten for second place by Herr Guelden, of Germany, who was credited with 94. The Russian entrant, Blau, got third on 91.

The individual shoot with any rifle, at 300 meters, 120 shots (40 standing, 40 kneeling and 40 prone), was won by Colas, of France, with a score of 984. Madsen, Denmark, was second with 983; Johansson, Sweden, third, with 959.

In the pistol shooting competition for firing teams, firing at a distance of 50 meters, the United States team won yesterday. Sweden was second and Great Britain third.

The United States team was awarded the gold medal, its aggregate score being 1916. Sweden scored 1849, and Great Britain, 1804.

Highest Olympic Honors

No Shortcomings

The Smith Gun has no shortcomings—not one. The 6 Hunter brothers, with inventions, precision, workmanship and experience, kept after shot gun shortcomings for 22 years, until they had wiped out the last and least important one. "6 Times 22 Years Experience" gives the shooter of a Smith Gun the fullest possible pleasure in the field, and the maximum game in his bag. Ask your dealer to show you the new L. C. Smith 20-gauge. Pigeon Shooting

By CAPT. A. W. MONEY.

A standard book on the sport by a recognized expert, covering all phases of live-bird and clay-pigeon shooting with much that is of value to every man who wishes to be complete master of his gun.

Covers position, guns, ammunition, handling, sighting, field shooting, trigger pulls, technique and practice. This book will soon be out of print. Listed to sell at \$1.00. Our price, while they last

75 cents, postpaid.

FOREST AND STREAM PUBLISHING CO.

Spencer Gun Club.

SPENCER, Ia., June 27.—The weather conditions were ideal and a more successful event would be hard to pull off. One interesting feature of the shoot was the work of J. Becker, a boy just in his teens—first day, 133; second day, 120, using a 3/4 dram load, which seemed to jar the boy some.

High average went to Porter White and W. S. Hoon, who tied for the honors, with S. A. Huntley a close second; Frank Campbell next, closely followed by Wm. Ridley. In the specials, Ridley, Huntley and Harker carried off the honors.

1st Day.		2d Day.		1st Day.		2d Day.

Smith Gun Club.

NEWARK, N. J., July 7.—There was a large attendance yesterday at the Smith Gun Club shoot. The shooting, in the main, was about up to the average. Following are the scores in the practice events:

W Hassinger	21	20	19	20
J Baldwin	25	25	24	..
E Gardner	14	16	19	..
C W Naugle	21	22	20	..
H Higgs	22	21	23	..
John Erb	21	20	19	21
Sam Thornton	21	20	22	19
J Bross	16	14	17	..
A Castle	18	19	21	..
E Keller	18	20	17	..
H Parsella	17	16	17	..
I Castle	19	21	20	20
Dr T Moller	19	21	21	20

In the 50-bird prize merchandise event, J. Baldwin won first prize, breaking 46 out of 50. John Erb and Wm. Hassinger tied for second and third prizes with 43. On the draw, Erb took second and Hassinger third prize. Fourth prize was taken by G. W. Naugle with 42 to his credit. Sam Thornton and Dr. Moller tied for fifth and sixth with 41. On the draw, the fifth prize was taken by Thornton and the sixth by Dr. Moller.

Mulberry Grove Gun Club.

INDEPENDENCE DAY brought only a dozen shooters out, nearly celebrations and the intense heat being the chief causes for the lack of interest displayed over the only "celebration" we boast of. Much enthusiasm, however, was "on tap" throughout the largest crowd of spectators that has ever witnessed any of our previous shoots. The afternoon's shooting was featured by E. E. Pages' straight, and the shooting of J. Banks. The latter caused quite a little comment because of the fact that he waited so long before shooting, the target sometimes being almost on the ground when his gun would speak. Luck figured largely in his score. The comedy of his shoot was, "Watching the unfamiliar gun 'kick him off the boards' every time he shot, and his giving vent to his feelings immediately following the rough treatment." Scores:

Events:	1	2	3	Events:	1	2	3
Targets:	25	25	25	Targets:	25	25	25
H Enloe	22	20	19	Ed Hartley	15	14	..

E R Enloe	21	20	16	Wm Lilligh	14
E E Page	25	Dr E A Glasgow	11
Lee Davis	22	19	..	James Banks	18
F McKean	16	19	..	Wm Disser	18

Official Averages for 1912.

THE yearly averages for amateurs will be computed as follows:

First.—The original competition will be based on 1,200 or more single targets shot from the 16yds. mark at registered tournaments held prior to Oct. 1, 1912, and apply to all amateurs who have made an average of not less than 88 per cent. at said number of targets.

Second.—All amateurs who qualify in the original competition must further contest at 800 single targets shot from the 16yds. mark at the Post Season tournament.

Third.—All amateurs who compete at the Post Season tournament will start on an equal footing in the yearly averages, regardless of the percentages made by them in the original qualifying contest.

The yearly averages for professionals will be computed as follows:

Not less than 2,000 single targets must be shot from the 16yds. mark, and this only at the Southern Handicap, Grand American Handicap, Eastern Handicap, Western Handicap, Pacific Coast Handicap and Post Season tournaments given by the Interstate Association.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

Romantic Origin of the Pekingese Dog.

PEKINGESE dogs are the product of that palace life in Peking which would seem now to be passing for ever into the limbo of forgotten things, so that the present is surely an appropriate time for touching briefly on the history and character of the dog which has leapt into favor in the past few years in an extraordinary meteoric manner.

In 1860, says the Strand, the Summer Palace of Peking was sacked by European soldiers, the first shaking-off of that extraordinary fabric of Eastern rule which we now see laid in the dust. Among the loot were eight of the Imperial dogs, which had hitherto never been allowed outside the confines of the palace, save under penalties that included death in various fashions, such as stoning or being cut into a thousand pieces, either of which methods had not unnaturally been found sufficiently drastic to discourage dog-stealing.

The dogs looted in 1860 are persistently described as being five in number, but there must have been eight at least. They were found hidden in the apartments of the Emperor's aunt, an unfortunate lady who committed suicide on the approach of the soldiers. One was given to Queen Victoria, who had its portrait painted by Landseer; one pair became the property of the late Duke of Richmond and Gordon, and another pair were acquired by Admiral Lord John Hay. Admiral Oliver Jones (then captain) brought home one further dog, and a pair were secured by another officer, from which was bred a puppy that lived in England for nearly seventeen years.

From these eight priceless creatures were bred all the Pekingese that England could boast of for another generation, and, remaining in few hands, they continued comparatively unknown. At length, however, a few were obtained from the palace by methods into which it would be impertinent to inquire, but it seems clear that they had begun life as the personal pets of the late Dowager-Empress, known as "Old Buddha." How jealously watched they were is shown by the fact that at the later siege of Peking, when the foreign embassies were in such great danger and were believed even to have fallen, the palace dogs were removed in the first palankeen which departed from Singan-fu as the foreigners entered the Forbidden City.

Ladies Kennel Association of New Jersey.

THE Ladies' Kennel Association of New Jersey will hold its show on Young's Million Dollar Pier in Atlantic City on Aug. 2. The officers of the club are: Mrs. Frank Smythe, President; Mrs. Ralph C. Stewart, Vice-President; Mrs. Henry Jarrett, Treasurer and Miss Lida R. Patton, Secretary. The judges are: Mrs. Arthur L. Holland, Japanese spaniels; Mrs. A. Hungerford, Bay Shore, L. I., dachshunds; J. C. Cooper, Fort Washington, Pa., collies and Scottish terriers; Mrs. William Thorpe, poodles, black and tan terriers, Schipperkes, English toy spaniels, pugs, Yorkshire terriers, toy black and tans and Chihuahuas; M. R. Guggenheim, New York, bulldogs; Daniel S. Riker, New York, Airedale terries and fox terriers; W. Howard West, Wyncote, Pa., bull terriers; F. J. Bristol, New York, French bulldogs; A. G. Rohr, Germantown, Pa., Boston terriers; Miss Lida R. Patton, Chelsea, N. J., Pomeranians, Griffons, Italian greyhounds; Dr. M. Carey Corkhill, Philadelphia, Pa., toy poodles and maltese terriers; Frank Spencer Byram, Germantown, Pa., Russian wolfhounds; E. B. Chase, Rodner, Pa., English setters, Gordon setters and Irish setters; Walter J. Few, Westchester, Pa., beagles; B. F. Lewis, Jr., Lansdowne, Pa., all other breeds.

YOU know mallards—wisest and wariest of all ducks—Solomons of the air. You can't knock down mallards with a paddle nor can you get them with a gun that plasters its shots all over the face of creation.

A mallard shot is generally a long shot, and long shots require a hard-shooting, close-shooting gun.

That's why the long-headed man who goes to a mallard country takes a Lefever. When he swings it on a towering pair of mallards he does not question the result. He knows it—

TWO CLEAN KILLS

The reason a Lefever kills clean and sure and far is **Lefever Taper Boring**.

But if you buy a Lefever for the taper boring alone, you will get more than your money's worth. For instance, you will never be handicapped with looseness at the hinge joint. The exclusive Lefever screw compensates for a year's wear by a trifling turn that you make yourself with a screwdriver.

LEFEVER SHOT GUNS

Sixteen other exclusive Lefever features and Lefever simplicity and strength make the \$28 gun the peer of any \$50 gun on the market. Upwards to \$1,000. Send for free catalog and get Lefever wise. LEFEVER ARMS CO., 23 Maltbie St., Syracuse, N. Y.

Durston Special
20 Gauge. Price \$28.00

Maxim Silencer

On a .22 Cal. Rifle

Will afford more pleasure this summer than anything you ever owned. No noise. No disturbance. Remarkable accuracy. Small expense.

Ask any sporting goods or hardware dealer. Insist that he get one to show you. We make them with coupling to fit any rifle. No trouble to attach.

Write (giving dealer's name) for free interesting reading matter.

MAXIM SILENT FIREARMS CO.

Specify Silencer Equipment on your new rifle.

It's Easy to Reload!

If you haven't time to cast bullets, we furnish hand made bullets for any caliber at low prices. You then merely decap and re-cap shell, insert powder and crimp shell on to bullet.

Free 160 Pages Does it pay? You can reload 100 .32-40 smokeless short range cartridges (buying the bullets) in half an hour at a total expense of 77c.; casting bullets yourself, 38c.; the new factory cartridges cost you \$2.52 per 100.

The Ideal Hand Book tells about reloading all rifle, pistol and shotgun ammunition; free for 3 stamps postage.

The Marlin Firearms Co.
27 Willow Street New Haven, Conn.

Ch. Duchess Chica de Doberman.

A. K. C. 137826.

THIS well-known Doberman-Pinscher after her successful show career in the East has been recently sold by the Doberman Kennels, of Rochester, N. Y., to Dr. Will H. Potter, of Kootenai, Idaho. She was bred prior to shipment to the recently imported "Weddo von Eichthal" and is now weaning a fine litter of pups in her far Western home, thus affording a chance to Western dog lovers to get a pup from the best possible strains in their own section. As a mate for the future the doctor purchased Doberman Dorussia, another winner. This is by experts considered to be one of the best American bred dogs of the breed ever produced. He is champion bred on both sire's and dam's side, his sire being the now dead champion Bertel Doberman, his dam the famous champion Hertha Doberman.

Ontario Bench Show.

THE Kennel Club of London, Ontario, will hold its annual bench show on Sept. 10 to 13 at the same time the Western Fair is held. Charles H. Mason, of Port Washington, L. I., one of the first of the cocker spaniel breeders, will judge all breeds except the Boston terriers. William Austin, of Toronto, will have these under his direction.

New Kennel Club to Hold Show.

A RUMOR is afloat that as a consequence of the forming of the new kennel club, a bench show will be held at Red Bank, N. J., in the near future.

YACHTING NOTES.

New York Y. C.

TWENTY-TWO yachts in the New York Y. C. race for Glen Cove cups last Saturday crossed the starting line. An eight knot south by west breeze gave the yachts some good light weather work over the courses of $2\frac{3}{8}$ and $1\frac{3}{4}$ miles selected for the two divisions, and running, reaching and beating were provided for, but not enough of the last to enable the Class M sloop Medora to hold her own with the K class sloops, and on corrected time the Istalena defeated her by 1m. 35s.

It was a great day for Istalena as regards the other boats of her own class as well, for she defeated Aurora by 4m. 44s. and Winsome by 5m. 32s.

The warning signal was set on the committee boat at noon, and at a quarter past twelve that for the three big single stickers. Aurora, with Cornelius Vanderbilt at the wheel, obtained the windward position, with Istalena close under her lee, and Winsome, handled by Frank Bowne Jones, got away at the leeward end of the line. All broke out ballooners as they started on a broad reach for the first mark off Woolsey's reef. Two minutes later the new Medora started all alone.

Three of the Class P sloops, Corinthian, Cara Mia and Windward, with the first in the weather berth and the last well to leeward, were next to get away, but their start was not an exciting one, and Windward, though to leeward, had all the best of it.

Five minutes later, when ten of the popular New York Y. C. thirties were sent away to a fine start, Joyant, which had not arrived in time, crossed the starting line from the eastward, went about and started after the other Class P boats.

The smaller yachts set their spinnakers as they made for their first mark, the buoy off Matinicock Point. The little schooners, four in all, followed the example of the small sloops, when they were started at twenty-five minutes of one o'clock.

The 65-footers, having rounded the first mark, had a leg of windward work to the Lloyd's Neck spar buoy, and then followed a close reach

until Matinicock was rounded, when another short leg of weather work was provided as a wind-up of the day's work.

By the time Istalena had rounded Matinicock, she had a good lead over her competitors and was enabled to cover the last leg without splitting tacks as often as the others, thereby gaining considerable time in the beat to the finish.

The second mark for the smaller yachts was the buoy off Parsonage Point, and then came the windward leg. The smaller yachts of the various classes, especially the New York thirties, kept close together throughout the two rounds of the triangular course selected for them, and

the finish of that popular course was one of the closest seen in a long while.

To make the finish more interesting, Medora, which sailed the best time of the K class sloops, was in their midst, and a group of the Glen Cove jewel class racers, which were in a race of their own in Hempstead Harbor, rounded the spar buoy, used as one end of the finishing line, in the opposite direction, and the two fleets passed each other, affording a most unusual yachting spectacle. Six of the New York thirties finished with less than a minute between the first and last of them.

H. de B. Parsons and J. M. Macdonough composed the regatta committee. The summary:

Sloops, Class K—Start, 12:15—Course, 23 $\frac{7}{8}$ Miles.

Eastern Y. C.

LIGHT, favorable airs wafted the Eastern Y. C. fleet from Booth Bay into the Western Penobscot last Saturday with an anchorage for the night beneath the Camden Hills. The racing portion of the fleet had a 33-mile struggle from Squirrel Island around the Bantam Ledge buoy, past the Old Man Ledge, through Monhegan Channel to a finish off White Head Light. The light southerly breeze gave the yachts a beat, a broad reach and a run. It was the third racing run of the cruise, and as Irolita let almost from the start and beat the Elena boat for boat by 33s. at the finish, the half of the cruise closed Saturday last with honors even in the first division schooners between Irolita, Elena and Enchantress, so far as actual wins are concerned.

There was just wind enough in Booth Bay Harbor to take the yachts out to the start off the southern end of Squirrel Island. Soon after 10 o'clock the fleet was sent away on a four-mile beat around the Bantam buoy to the southward of outer Heron Island. Elena had a good berth at the windward end of the line, with Irolita a couple of hundred yards to leeward and Enchantress astern. The wind, however, proved fickle both in strength and in direction, and on the first board to port Irolita crossed Elena's bow by a hundred yards.

The three big yachts slipped through the fleet rapidly, but the sloops Avenger and Shimina managed to wear around Bantam before the big schooners caught them.

It was a 19-mile reach to the Old Man, and with big ballooners, jibs and staysails bulging out to port and an increasing southerly breeze coming over the starboard rail, all the yachts made fairly good time for about an hour. Then the wind dropped again, but not until Elena was on even terms with Irolita, while astern Enchantress was bringing up what was left of the expiring breeze.

Between Monhegan and Burnt Island the yachts were nearly becalmed at one time, but Irolita managed to pick up a draught from some quarter, slipped out from under Elena and squared away for the finish, ten miles to leeward. In this last run Captain Clark on board Irolita, played the game of beating to leeward

Security and Substantial Profits

A GROWING UNDERSTANDING that a reasonable high rate of return is not necessarily a sign of weakness has of late contributed materially to the enlarged investment popularity of the unlisted stocks of high grade industrial corporations.

STOCKS PREFERRED AS TO ASSETS AND DIVIDENDS give strong security, plus the profit-sharing possibilities of a successful partnership.

AMPLE SECURITY, SUBSTANTIAL RETURN, ready marketability and high collateral value are some of the strong features of the shares we offer.

OUR CIRCULAR contains an instructive discussion of this subject. Sent on request.

Don't Wear a Truss!

Brooks' Appliance is a new scientific discovery with automatic air cushions that draws the broken parts together and binds them as you would a broken limb. It absolutely holds firmly and comfortably and never slips, always light and cool and conforms to every movement of the body without chafing or hurting. I make it to your measure and send it to you on a strict guarantee of satisfaction or money refunded and I have put my price so low that anybody, rich or poor, can buy it. Remember, I make it to your order—send it to you

—you wear it—and if it doesn't satisfy you, you send it back to me and I will refund your money. The banks or any responsible citizen in Marshall will tell you that is the way I do business—always absolutely on the square and I have sold to thousands of people this way for the past 30 years. Remember, I use no salves, no barnes, no lies, no fakes. I just give you a straight business deal at a reasonable price.

Dr. E. BROOKS, 1230 State St., Marshall, Michigan

Property for Sale.

Salmon Club Share For Sale

I have one share to dispose of in a most exclusive and carefully run salmon fishing club. Season, June 1-Aug. 15. Easily reached; 125 miles east of Quebec. Forty miles of club fishing water. Comfortable cottages on premises. This is a rare opportunity. Particulars from **Box A - - - Forest and Stream**

Great Opportunity

Trout Lake, club house and 1500-acre fishing and hunting preserve. Greatest chance in the State for club or private owner. Address: T. W. WESTON, care of FOREST AND STREAM.

SALMON FISHING FOR SALE.

Outright ownership. No license fee to government. Annual expense nominal. Accessible location, North East Branch of Marguerite. Short drive over good road from Tadousac on lower St. Lawrence. Fine large camp fully equipped. Fish abundant and large. Season last of June to middle of August. Price, \$18,000, including land, buildings and full equipment. Apply to H. W. care Forest & Stream.

Ask your club to subscribe for another copy of FOREST AND STREAM, so you won't have to wait for it.

Efficiency

In Many Men is Due to an
O=P=C

Many a man outdoes his fellows by simply conserving his nerve force.

He wears a suspensory, and saves the strain which saps other men's vitality.

The energy which others waste is made to count for most.

Thousands of men have thus learned a secret which you ought to know.

Write for our book about the O-P-C—the scientific suspensory, famous for 20 years.

It tells of a comfort which saves weariness, saves vim and vigor, keeps men at their best. A man who wears it 30 days will never go without it. Write us now.

All druggists guarantee you satisfaction with an O-P-C. No. 2, Lisle, 75c—No. 3, Silk, \$1.00

Mailed direct from 43 25th St., Chicago, if your druggist will not supply you.

Bauer & Black Chicago and New York

more deftly than Skipper Dennis, on board Elena, but it meant lots of work, for the spinners were being swapped from port to starboard and back again every few minutes.

In the last five miles Irolita jibed four times and several times was a quarter to half a mile off the straight course. Half a mile from the finish she was just far enough ahead of Elena not to get blanketed and slipped across the line by 3s., winning by 2m. 37s. corrected time.

Princess, Muriel and Taormina fought out a fine sailing battle in light air and Princess managed to win for the first time since the cruise started. In the first division the sloop Avenger and Shimna indulged in several luffing matches on the run to Old Man Ledge, the former getting the lead and holding it to the finish. Tammany scored her first victory in the cruise in the third division of schooners, while Dorello won again in the second division of sloops.

There was a jollification meeting on the after deck of Irolita when the committee tug blew the three blasts which always greet the leader in each division. The rest of the fleet had a hard struggle in the light air around the Old Man, and it was nearly dark before some of the smaller yachts reached the finish and late in the evening when all were anchored in this harbor. The fleet will spend most of tomorrow visiting friends in the western Penobscot, but will assemble again at night.

In the competition for the cruise prize offered by Commodore Paine for the best total corrected time in this division, Elena was leading to-night, with a total of 13h. 28m. 45s. and Enchantress third, with a total of 13h. 34m. 8s. The yachts have three more races to sail, one on Monday, a second on Wednesday and a third on Thursday. It is expected there will be more or less windward work in these remaining contests. The struggle between these three big schooners is much keener and considerably closer than last year. The summary:

First Division—Schooners—Start, 10:25.		
	Elapsed.	Corrected.
Irolita	3 41 50	3 39 46
Elena	3 42 23	3 42 23

Nahant (Mass.) Dory Club.

ANOTHER leg of the champion cup series of the Nahant Dory Club, of Nahant, Mass., was sailed on the outside course on July 6, the course being from the steamboat landing around the Nahant buoy and to Deer Island buoy, nearly ten miles. There was a stiff westerly wind blowing that made the beating to windward a tough proposition. Commodore Foster won the leg. The summary:

Elapsed.		Elapsed.

Log of Karina.

ROBERT E. TOD's schooner yacht Karina turned in a decidedly good log on her trip across the ocean in May. Throughout the trip, with the exception of May 17, she carried a moderate sailing breeze. Her best stretch was 150 miles in ten hours.

The total distance sailed from the Ambrose Channel lightship to the Lizard was 3,245 miles, and she did this in 15 days, 19 hours 24 minutes. Atlantic, when she made the record in 1905, sailed 3,013 miles in 12 days 1 hour 4 minutes. She averaged 10.32 nautical miles an hour and her best day's run was 341 miles.

Ambrose Channel lightship to the Lizard, started 3:40 P. M. (Greenwich time), May 17, 1912:

	Latitude.	Longitude.	Distance.
May 17.....			20
May 18.....	39° 26'	66° 58'	302
May 19.....	39° 37'	63° 22'	168
May 20.....	39° 03'	58° 10'	245
May 21.....	38° 48'	55° 25'	135
May 22.....	39° 00'	50° 55'	230
May 23.....	38° 27'	45° 18'	254
May 24.....	39° 51'	41° 05'	219
May 25.....	41° 05'	38° 15'	148
May 26.....	43° 09'	33° 22'	255

The Figures on the Measures Tell the Story of a Real Radical Fuel Economizer

KEROSENE Gas Producer

Attached in same manner as a muffler. In all sizes, from 2½ to 500 h. p.—Length overall, from 11½" to 26"; diameter from 5" to 8".

- If you are interested in saving almost 50% of your fuel bill, clip and fill out the following and mail to Department S.
- 1—Make of engine.....
 - 2—Automatic or manual control.....
 - 3—Number of cylinders.....
 - 4—Two or four cycle.....
 - 5—Are exhaust and intake on opposite sides.....
 - 6—Speed, R. P. M....
 - 7—Lowest, R. P. M.....
 - 8—Highest, R. P. M.....
 - 9—Bore.....
 - 10—Stroke.....
 - 11—Diameter of inlet pipe.....
 - 12—Diameter of manifold exhaust port.....
 - 13—Make of carburetor.....
 - 14—Size of carburetor.....
 - 15—Rated horse power.....

The experiment illustrated above shows the actual results of a steady 10-hour run of a 50 h. p. engine, first with gasoline, then with the Kerosene Gas Producer and kerosene.

The Kerosene Gas Producer develops the same power and efficiency as gasoline at a saving of \$4.83 for the day's work. This pays for the Producer and leaves a snug profit in less than a month.

The KEROSENE GAS PRODUCER Runs Any Gasoline Engine on Kerosene. No Carbon. No Smoke. No Smell. No Danger of Fire or Explosion.

The Kerosene Gas Producer is guaranteed to give a clean exhaust, with no carbonization or fouling of the cylinders. It is easily attached, simple in operation and will outlast any engine.

Chicopee Falls, Mass.

ARE YOU A GUNNER?

Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.

AMERICAN GAME BIRD SHOOTING

By **GEORGE BIRD GRINNELL**

(New—Just Published)

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY

DOGS OF THE YUKON.

Dogs in Alaska are of all breeds and sizes, the most common being the malamute or native dog, says a writer in the Wide World Magazine. The word "malamute" is an Indian word meaning Eskimo and is applied to both dogs and natives. The malamute is of the wolf strain—in fact, the best of the breed are half wolf. They evince all the characteristics of the wolf, both in appearance and in manners.

Owing to his wolflike fur, the malamute can easily stand the extreme Alaskan cold. He is a born fighter, an inveterate thief and somewhat of a coward, for he will seldom fight singly against a lone adversary. The malamute, while well able to withstand the cold, does not seem to have the same order of intelligence as is displayed by the outside dog, and the best dog for Alaska would seem to be a mixture of the two strains.

Another native breed in the North is the huskie, but this breed is rarer than common usage of the word would imply. The real huskies are bred in the neighborhood of the Mackenzie River, and are more common in the territory under the jurisdiction of the Hudson's Bay Company than in Alaska.

Small dogs, such as fox terriers, are a rarity in Alaska, for in that country a dog is valuable in exact proportion to the amount he can pull. A sleigh dog will weigh anything from thirty to 150 pounds, the average being about seventy-five pounds.

Dogs in Alaska, when on the trail, are fed once a day, after the day's work is done. They are never fed in the morning, for if they were they would be lazy all day, or what is more probable, would vomit up their breakfast soon after they got on the trail. Dogs, to work well, must be well fed.

They get a variety of foods, including rice, tallow, corn meal and fish. If rice or corn meal forms a part of their food it must be cooked. Some men prefer to feed their dogs on bacon or fish, thus doing away with cooking.

The Yukon sled, while not a thing of beauty, is built to stand all kinds of hard wear. The sled is about eight feet long, is made of any kind of hard wood, lies close to the ground, costs from ten to fourteen dollars, and makes a trail sixteen inches in width. Another pattern is known as the basket sleigh, and is to the Yukon sleigh what a three-masted schooner is to a coal barge. In length it is from eight to fifteen feet, is made of birch, oak, or hickory, cuts a trail twenty-two inches in width, costs from \$40 to \$200, is raised a foot or more from the runners, and, in the best examples, is lashed together with rawhide.

The basket sleigh, as its name implies, is fitted with a basket, into which the load is placed, and from the back of the basket a pair of handles project, to be used in guiding the sled on the trail. In very cold weather wooden runners are best, but in ordinary circumstances steel or brass runners are used.

THE CRADLE OF THE NEW YORK Y. C.

SHORTLY after the Revolution, says W. P. Dodge in the July Strand, Colonel Stevens purchased Hoboken, which was then an island of swamps and rocky hills, and established the family on Castle Point, a beautiful promontory overlooking the Hudson and New York City. John C. Stevens, the father of American yachting, was born there in 1785. There were no ferries in those days, and the Stevens boys of necessity became expert boatmen. At fourteen John C. owned a sailboat of twenty feet length, named Diver. As the years passed by he had the schooner Gimcrack built for him by William Capes, in Hoboken. This boat is one of the most historic craft of American yachting, since she was the cradle of the New York Y. C., the organization being accomplished in her cabin on July 30, 1844, the year in which so many of the world's greatest achievements occurred. On that day John C. Stevens called a meeting of yachtsmen, which assembled aboard the Gimcrack, anchored off the Battery, New York city, and here the constitution of the New York Y. C. was drawn up.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth, 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00.

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With artotype portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose; Mountain Sheep; Game Refuges, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00.

An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00.

A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth. 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

Fishing in Colorado

By GOV. JOHN F. SHAFROTH

COLORADO presents a happy combination of fishes to the sportsman. Trout and grayling are abundant and furnish the standard of excellence, but the hump-backed sucker, the white salmon and several other odd fishes offer

the territories west of the one hundredth meridian. During the next fifteen years the trout in the more accessible streams, particularly those of the Eastern slope, suffered from the popularity of trout fishing. Adequate protection

was arranged, and three species of trout introduced, the rainbow trout from California, the landlocked salmon from Maine and the Eastern brook trout. All of these have thrived, particularly the last, which is almost, if not quite, as successful as the various native species. Of the native trout there are four kinds, one of which is unique to Colorado. This, the yellow-finned or Macdonald trout, is especially worthy of note. It is much like the green-backed or native trout of the Eastern slope except for the lower fins. These are brilliant yellow. It is a fine species and reaches the weight of eleven pounds. Dr. Jordan, of Leland Stanford University, discovered this fish in Twin Lakes in 1889, and it is known only from these lakes and from the streams in the immediate vicinity. The common native trout on the western slope is the Colorado River trout, locally known as the red-finned trout.

Concerning the caprices of trout almost any fisherman who has tried for them will have a supply of stories. Trout are notorious for their change of taste. One bait may be taken with alacrity for an hour or so, when suddenly the fish stop biting. A change of bait at this time frequently means a favorable change of luck, and again frequently not. What fisherman has not crouched near a still mountain pool and disgustedly watched the play of color on a fine "green back" as it repeatedly passed the most

NEAR ESTABROOK, PLATTE CANYON.

something distinctly different from the usual catch. The game fishes are of the best and will try both the skill and equipment of the expert, although the amateur may be sure of fish with nothing more than the hook and line, and the worm, if accompanied by a bit of good humor.

Trout have always been favorites. It seems that they have a charm of their own to man, both civilized and otherwise, for even the Indians prized these splendid fish. Perhaps this is due in part at least to the habits and habitat of these fish. In clear, cold streams, sometimes barely deep enough to cover its back, the brilliantly colored trout moves about in plain sight of its pursuer and taxes his ingenuity to the utmost. The trout of merry England, of New England and of Colorado have each in turn commanded the attention of fishermen, and to-day few fishing grounds rival the mountain streams and lakes of Colorado.

Colorado trout were first brought to the general notice of Eastern fishermen by the exploration of the expedition of Lieut. Wheeler, U. S. A., during the years 1871 to 1875. This expedition collected fishes among other things in

ON BIG THOMPSON RIVER.

AT GLENISLE, PLATTE CANYON.

alluring flies and worms for a floating bug. A friend of mine who fishes often and takes a camera with him to verify his stories, tells of an experience on Jasper Lake. He had tried a royal coachman, a gray hackle and several other of his favorite flies without result, yet there were plenty of trout. At last he placed a yellow wasp on the line as he was about to quit. Previously he had had little luck with this bait except in the lower streams. Almost as if by magic the trout began to strike. He could not cast fast enough, and as for putting the fish in the basket, that was out of the question. As he fished a storm came up, and he was finally driven to cover by the sharp lightning, with the trout literally crowding for his bait to the last. This same bait, in the same place and under almost identical conditions, a few days later, was of no avail. But this very tantalizing uncertainty of the trout makes them fish worth fighting for.

Almost all mountain streams of the State are good trout streams unless the fish have been killed by mine waste, and that is now almost past. Each fisherman has his favored place which he assures you is unexcelled, yet all agree that the headwaters of the Bear River on the west slope are among the best, though the Platte, Rio Grande, Arkansas, North, Middle and South Boulder, White, Eagle, St. Vrain, Big and Little Thompson, Gunnison, Roaring Fork, Frying Pan, Animas, Grand, Michigan, Laramie and others are rich with the trout propagated at the hatcheries. The trout were once very abundant in the San Luis Valley, but the alteration of the streams for irrigation has greatly reduced them, as so many are killed in their fall migrations down stream, but the streams are being stocked again and fishing is getting better. In general trout are confined to waters the temperature of which does not exceed 65 degrees Fahrenheit. Thanks to the efforts of the National and State Governments and of many private individuals there are numerous hatcheries in the State and the waters are being restocked continually with game fish.

Near relatives of the trout are the grayling and whitefish, both natives of the Rocky Mountains, which have been found to thrive well in

the northwestern part of the State. The State Commissioner of Fish and Game, Col. J. H. Shinn, has had the fry of the grayling at the hatcheries, and this fish will probably become more important. In late spring and early summer the grayling are very abundant in the more favorable localities. They migrate up streams, fairly crowding the smaller streams, and during the night the peculiar noise made by these fishes may be heard. The Colorado grayling is regarded by some scientists as being the same as the Michigan grayling, but others think it quite a different fish. In habit it is much the same.

The trout tribe furnish the game fishes of Colorado with the exception of the bass, which has been introduced into certain lakes. There are, however, other fishes in the State worth fishing for. The Pacific slope has two at least which will satisfy the most exacting angler if he be looking for queer fish. In the tributaries of the Colorado River one finds the hump-backed sucker and the white salmon.

The hump-backed sucker or razor tail, as it is called, is a curious fish. The posterior portion of the body is rather thin, but of the general shape of the common sucker, the tail being perhaps a trifle thinner, hence the name razor tail. The head on the other hand is very much flattened in the opposite direction, being widest in a plane at right angles to the main axis of the fish and abruptly joined to the rest of the body which stands above it like the hump of a camel. On the under side of the head is the mouth, of true sucker type, which is almost the only feature of this fish that would enable a fisherman unfamiliar with it to tell what he had caught. The razor tail reaches the weight of from eight to ten pounds, and although a sucker, it is regarded as a food fish. Further south in the Mohave region it is much sought after by the Indians. Its large economic importance comes from its pernicious habit of eating trout eggs.

The white salmon is more widely distributed through the tributaries of the Colorado River than the razor tail. It is concerning this fish, which is really not a salmon in spite of its popular name, that Colorado's "biggest" true fish story is told. This fish belongs to the tribe of

minnows, and minnows to a scientist are not the young of any kind of fish, but a particular group of fishes that are usually small as adults. The white salmon has been known to weigh eighty pounds and average specimens usually exceed forty pounds. With the scientific position of this fish in mind, Colorado anglers may well boast that Colorado is the place to fish, since even the minnows are giants "out here." The nearest relative of this fish is the squawfish of the Sacramento River in California, and this squawfish is easily remembered as the fish which may be readily caught, however incredible it may seem, on a large hook, the point of which has been covered with a single grain of soaked wheat. The white salmon, in spite of its close relationship to the carp, furnishes a fair grade of food, although not so fine as the trout or grayling. Unfortunately it, like the razor tail, eats eggs of the trout. It is best taken in small streams in the spring when ascending to spawn, and through the summer it is found in the deep pools. Carp have been introduced into several lakes and as elsewhere they thrive. They have not, however, secured the hold in the streams of this State that they have in many others. There are hundreds of lakes in Colorado that afford excellent trout fishing, and they are reached by good roads.

Catfishes as a rule are not favorites, unless to the small boy, but during the summer months when the river is low they furnish amusement and a "bite of fish" to the people of the plains along the Arkansas. The bullhead and the channel cat, the latter ascending from the Mississippi, are usually taken.

Eastern fishermen must notice soon on coming to Colorado that certain fishes so common throughout the Mississippi Valley are not found here. The ringed perch and the bass are found only where they have been introduced in our streams and lakes. The native sunfish are small and few, and except for the Arkansas basin, catfish are almost wanting. Colorado fishes for the most part belong to the soft rayed types, while the fishes with the spiny-rayed fins like the bass are not native here to any extent. Including all kinds there are about forty-two species of fishes known in the waters of this State, according to Prof. Max Ellis, of the University of Colorado.

That the fish fauna of Colorado is unique has been known for some time. This is due in part to the large amount of headwater, as the Platte, the Arkansas, the Rio Grande and the Colorado Rivers all have tributaries rising in the mountains of Colorado, and Colorado streams connect with both the Pacific and Atlantic oceans.

The fishing season begins May 25 and closes Oct. 31. The streams are the popular resorts of the natives and adopted sons of Colorado, and Colorado welcomes the true sportsman from every clime. Come while the water is good and the fish are biting.

The streams are annually stocked by both the Game and Fish Department of the State of Colorado, and the Federal Government. The State in 1911 put 11,000,000 trout fry into the streams, the output of the various State fish hatcheries. The output for 1912 will be about 14,000,000 fry, insuring a continuous supply of the speckled beauties. Tourists intending coming to Colorado for pleasure will find inviting accommodations and camping grounds along any of the streams where beautiful scenery and fine

BELOW BAILEY'S.

BIG THOMPSON.

fishing will amply compensate them for their trouble. Beginning Sept. 23, 1912, the American Fisheries' Society will hold its annual meeting in Denver. A magnificent game and fish banquet will be one of the unique features of the meeting. Come and taste what Colorado has to offer.

Report on Colorado Fishing.

FOLLOWING are carefully compiled reports to July 10 from some of the choicest troutng resorts in the State:

South Platte.—Fishing fair.
 Colorado Sportsmen's Association.—Fishing good.
 Buffalo.—Fishing fair.
 Pine Grove.—Fishing not extra good.
 Bailey's.—Fishing fair.
 Shawnee.—Fishing good.
 Grant.—Geneva Creek water little high; fishing fair; Platte River little roily; fishing with bait good.
 Longmont.—Fishing reported fair.
 Loveland.—Fishing in streams with fly and bait fair.
 Fort Collins.—On Poudre and its North Fork, fishing not up to standard, but in streams tributary to it, good catches are being made.

CAUGHT 248 TROUT, 10 TO 16 INCHES.

Eldora and Nederland.—Middle Boulder, Nederland reservoir and Jasper Lake, bait fishing good. In a week three parties caught 248 trout from 10 to 16 inches in length in Jasper Lake; good catches in Nederland reservoir.

Blue Bird.—North Boulder bait fishing good.
 Hill Siding.—Bait fishing good.
 Ward.—In Middle and South St. Vrain, Jim Creek, Lakes Stapps, Tumbleasons and Duck Lake, bait fishing fair.
 Hartsel.—Fishing poor.
 Antero.—Fishing poor.
 Creek reservoir, fishing fair; Lake Creek and Clear Creek, fishing also fair.

AT FRYING PAN RIVER POINTS.

Nast.—Bait and fly-fishing fair.
 Sellar.—Bait and fly-fishing fair.
 Ruedi.—Fishing good.
 Thomasville.—Fishing good; large catches are made.
 Wood's Lake (seven miles from Thomasville).—Fishing good; some excellent catches past week with fly and spoon.
 Basalt.—Bait fishing good.
 Ivanhoe.—Fishing in Lake and Ivanhoe Creek fair.
 Cottonwood Creeks and Lake.—Bait fishing fair.

ALONG EAGLE RIVER.

Pando.—Fishing good.
 Red Cliff.—Fishing good.
 Minturn.—Eagle River, Gore Creek and Cross Creek, two miles distant; Piney Lake, fifteen miles, can arrange for packing there; good bait fishing.
 Avon.—Fishing fair.
 Wolcott.—Bait fishing fair.
 Eagle.—Eagle and Brush Creek, some good catches have been made; fishing good.
 Gypsum.—Fishing good in Eagle and Sweetwater lakes.
 Glenwood Springs.—At Roaring Fork and Grand River Falls, Grizzly and No Name Creeks fishing fair.

WILLOW FLIES OUT ON GUNNISON.

Sargent.—At Tomichi and Marshall trout rise to flies; willow flies are out, and nice catches are made daily; fishing very good.
 Gunnison.—Gunnison, Tomichi and Taylor rivers; angle worms, helgramites and minnows for bait; several large catches reported; fishing good.
 Crested Butte, Almont, Jack's Cabin.—Bait fishing fair.
 Sapinero.—Willow flies are out; fishing good.
 Lake City.—Fishing fair on natural and artificial bait.
 Cimarron.—Bait fishing good.
 Creede.—Fishing only fair.

The FOREST AND STREAM may be obtained from any newsdealer on order. Ask your dealer to supply you regularly.

Care of the Feet

By CHARLES STUART MOODY, M.D.

IF I were the general of an army in full retreat, and believed in the efficiency of prayer, I should petition the God of Battle to afflict every soldier in the pursuing army with a corn, bunion or ingrowing toe nail. I believe it was Napoleon who said an army traveled on its stomach. Had he said "on its feet" he had been both literally and figuratively correct. The care with which the examining surgeon in the army inspects the recruit's feet, and the promptness with which that recruit is rejected unless his walking extremities are in first class shape, has caused me to reflect upon the necessity of the man who goes hunting paying some heed to the same subject. When a man's teeth trouble him he very promptly takes them to the dental surgeon; if his stomach gets balky, he goes to the physician, but he will suffer from a busy corn with all the fortitude of a Spartan and never think of visiting the chiropodist.

No man should think of going on a long tramp without first giving attention to the condition of his feet. While the selection of footwear is probably of the first importance, he should understand that no matter how well fitted his shoes may be, he will suffer unless they are fitted over feet free from corns, bunions, ingrowing toe nails, callosities and the like.

There are some hints that have come to me from years in the woods which I am inclined to inflict upon the readers of this magazine. Many of these things have been learned from the Indians, several from the Canadians, a few from the "river hogs" of the West.

Let me assume that the reader has taken my advice and visited a competent chiropodist before setting out upon his journey. He has also followed the advice I shall give later with regard to the selection of his foot wear, but some evening he arrives at camp with a large and angry chafe on his Tendo Achilles, where a blister has been. The chafe, unless cared for, will render his trip a horrible nightmare, make him a "grouchy" camp companion, and possibly destroy his chances for securing that head he has longed for so ardently.

The remedy is to wash the chafe clean with warm soap and water, dry it, then cut a piece of zinc oxide plaster without which no man should ever enter the woods, apply this plaster over the chafe, taking care that it covers the edges fully half an inch. This same treatment should be applied to a bunion, or calloused place. First soak the feet until the epidermis is loosened, then scrape it down with a dull knife, taking care not to reach the live skin beneath, apply plaster and allow it to remain. In the case of the chafe where the blister has been, it is well to renew the plaster every day.

Ingrowing nails are really serious things. A person afflicted should take every precaution when in the woods far from surgical attention, for of their liability to become infected, and an infection without surgical care is something of gravity. There are several ways of alleviating the evil. The old standby of paring the nail square across the end, then scraping it down the center until

it is very thin is a very good one. In most cases this gives relief. The best remedy, one often followed by surgeons when they do not wish to operate, but one that should be used with caution, is to draw the flesh away from the affected side and instill a few drops of pure carbolic acid around the side of the nail, allow it to remain exactly one minute, then neutralize with pure alcohol. This is by far the most effective cure next to actual removal. Relief may be temporarily afforded by lifting the nail and inserting a thin piece of paper, like a cigarette paper folded several times beneath the nail. This must be renewed every day.

Most of us are familiar—too familiar—with corns. Corns are an invention of the devil to destroy the pleasure of hunters. There is no such thing as removing a corn without medicines. The sufferer can only pare the thing down until he has reached the tender skin beneath, then dress it. A good dressing for a corn is to take a small pledget of absorbent cotton and saturate it with collodion. Apply this to the corn and add another small bit of cotton above it. Care should be taken that the pledget impregnated with the collodion is not too thick or it will irritate.

Blisters on the feet and ankles should never be opened by an incision. If you wish to remove the serum, puncture the blister at its lowest point with a needle and press the fluid out through the opening. The serum is nature's pad and is placed there to protect the tender skin beneath. It is really best to allow the serum to remain.

Anomalous as it may appear, there is such a thing as washing the feet too much. The feet of course should be kept clean, but when on a long tramp it is not best to remove the shoes and wash the feet. If they become hot and perspiring, sore from walking, it may be well to sponge them off with a damp cloth, afterward drying them thoroughly before replacing the shoes, but they should never be soaked, as this has a tendency to loosen up the epidermis which supplies a protection.

By far the greater number of foot ills might be eliminated by properly constructed and properly fitting footwear. I have my own peculiar ideas of what constitutes propriety in this regard, based upon some thirty years in the mountains. If these ideas do not happen to coincide with yours, I am ready to listen to argument.

It is an undeniable fact that when properly made, the moccasin is the very best foot covering a man can wear. No man, however, can wear a moccasin without education. Unfortunately it takes longer to acquire this education than most of us are prepared to give. The feet must be habituated to their use before starting on a long tramp. We, who have been accustomed to heels, will find that a heelless shoe has a tendency to strain the muscles of the calf and make us lame. This can only be done away with by use. The deer skin moccasin of the Indian is noiseless; they are the thing for clambering over rocks and fallen logs; they are light and fit the foot like a glove. Of course they are not

waterproof and useless to the civilized man in damp weather. The Indian does not care for this, but wears his moccasins winter and summer.

Next comes that first cousin to the moccasin, the moose hide pac. I have practically abandoned all other kinds of shoes for these. They generally come with a single sole of heavy leather which I rip off and attach a sole made from a piece of old rubber belting. The rubber belting is nearly indestructible; it is waterproof; it never slips and has just the right degree of spring to make walking easy. If the wearer desires a heel, he may add two thicknesses of the belting for that purpose. I wear two forms of pacs—those with half leg for snow and rain, and those made no higher than a moccasin for dry weather.

The popular sporting boot with either half or full leg is not a great favorite of mine; the full leg boot not at all. In the first place these boots are made too heavy with the soles several times as thick as required. This is doubtless done under the mistaken idea that a walking boot needs a heavy sole. The sole of any boot should be no thicker than is necessary to keep the feet from being bruised by the inequalities of the trail, such as stones and sticks of wood. For comfort the sole must have a certain degree of spring. Shun the full leg boot unless you are to be in the saddle a great deal. A full leg boot is hot and constricts the play of the walking muscles. The same caution with regard to tight leggins or puttees. The ideal leg covering is a heavy pair of golf stockings which should be worn with knee trousers or at least with trousers opened from the knee to the ankle. If you ever do any mountain climbing you will recognize the truth of the above statement.

There should be as much care exercised in the selection of the hosiery as in the leather portion of the footwear. In summer medium weight silk is the most suitable, while in wet weather or winter cold, the light weight wool. No man should venture on a hunting trip without a number of pairs of hose. Nor should he ever wear one pair more than a day. They should be scoured at night in cold water and hung up to dry, a fresh pair substituted in the morning. Avoid the cotton sock by all means. Also reject any hose with a variety of colors. Red, blue and green dyes are decidedly irritant, and if you annex a chafe while wearing them, you are liable to a nice little case of blood poisoning as I have seen more than once.

Having decided upon your footwear, the next thing is the fit. Care should be taken that the shoe is neither too tight or too loose, the latter worse than the former. A tight shoe will stretch, a loose one will also, and then misery. The shoe should pull on like a glove and feel comfortable when it is on. If it binds in some spot and feels loose in another, discard it. If it feels loose and "squashy" all over, do not wear it. If it binds in every part, but more especially across the ball of the foot, cut it out. If you intend wearing half leg boots, see to it that they fit snug around the ankles and do not constrict the bony prominences of the ankle joints.

While it may seem trivial to you, take the same heed about the fit of your hose. If they are too tight, the great toe will prod a hole through, and if too loose they will wrinkle and one wrinkle in a sock can scrub a blister on your foot just a few shades quicker than anything I know about. Leave your hose supporters at home when you go on a hunt.

And now to conclude, a few words about the care of your shoes when in camp. In the first place no leather was ever made perfectly waterproof. If it were, it would be about as comfortable as a rubber boot, and if you want to know how comfortable that is, put on a pair some day in July and walk half a mile. The best that can be done is to render the leather approximately impervious to moisture, and that can be done only by constant care. There are several leather dressings on the market, all of them good. If you want a recipe for a good one, here it is: Take a pound of mutton tallow, half pound lanolin, quart of shark oil, one ounce resin, four ounces beeswax and melt them all together. This forms a thick yellow composition having a tendency to congeal in cold weather which is about as near waterproof as anything I have ever seen. When you come into camp after a tramp in the snow or rain, do not remove the shoes at once, and do not stick them up against the camp-fire to dry. The leather must be dried slowly, and when half dry you can remove them and finish the process. Before going to bed warm your composition and rub into the leather thoroughly, add a top coat and set them away. This must be done every day in wet weather and twice a week in dry weather if you expect your feet to remain dry.

The river drivers of the West, whose feet are wet for months at a time, have a practice which is worth following. They melt tallow and pour into their driving boots in the morning before going on the drive. While the tallow is yet warm, they draw the boots on, and their feet remain dry all day. Not only that, but the oil keeps them from chafing and becoming sore from the action of the water. I have tried this plan several times when on trout fishing excursions and can vouch for its value.

Wasps' Nest in a Rifle Barrel.

JAFFREY, N. H., June 29.—*Editor Forest and Stream:* As a subscriber of several years' standing, I thought the following incident might interest your readers:

Before going away for a week I carefully greased my Marlin .25-20, and put it in the barn, as the driest place I could find. On my return, when I was about to use it, I happened to glance at the muzzle, which I found plugged with dry mud. Supposing some unauthorized person had been making free with it, I carefully pushed the mud out with my cleaning rod. I was surprised to find that the plug was a mud wasps' nest containing several grubs and a partially decayed insect. The whole nest was about two and a half inches long. Naturally the mud had pretty well rusted out the bore of the rifle.

BRYANT STRONG.

Some Famous British Yacht Clubs

By HORACE WYNDHAM

A CONVINCING proof of the popularity of yachting in Great Britain is afforded by the fact that no fewer than sixty clubs exist for the sole purpose of encouraging this pastime. The majority of these are established at different ports on the English coast, but there are also several important ones in Scotland and Ireland. Indeed the oldest of all such clubs—the Royal Cork—has its headquarters at Queenstown. It was founded there so long ago as the year 1720, and received its admiralty warrant in 1831. Another distinction belonging to the Royal Cork Y. C. is that it alone out of all the other institutions of a similar nature in the United Kingdom is presided over by an admiral instead of by a commodore.

The chief of all the British yacht clubs is

guineas, while the annual subscription is £16. The list of yachts registered to fly the squadron burgee includes such universally famous craft as Meteor (of the German Emperor), Sunbeam (of Lord Brassey), and Valkyrie (of Lord Dunraven).

The yacht club next in importance is the Royal Thames. It was established in 1823 for the purpose of "encouraging yacht building and sailing on the river Thames." The members have recently acquired new premises in Piccadilly, and are housed in a mansion that formerly belonged to Sir Francis Burdett-Coutts, M.P. They are entitled to wear a uniform, consisting of a plain blue cloth dress coat and white waistcoat, each with special buttons, and either blue cloth or white duck trousers according to the

HEADQUARTERS OF ROYAL YACHT SQUADRON, COWES, ISLE OF WIGHT.

the Royal Yacht Squadron, founded at Cowes, in 1812, and granted an admiralty warrant in 1839. The squadron was established by a group of fifty yacht owners, but no regular regatta was held until many years later. At first the yachts resembled revenue cutters, and were made too heavy for speed. Several of them also ran to considerable dimensions, as there was no time allowance for difference of size. In 1827 the committee of the Royal Yacht Squadron passed a resolution, by which any member who should use steam was to be disqualified. The first Royal cup given to the squadron as a racing trophy was presented by William IV.

The Royal Yacht Squadron is perhaps the most exclusive body in the club world, and no candidate can hope to secure election unless possessed of considerable social influence. The ballot indeed is so severe that the "pilling" of extremely well known sportsmen frequently takes place, much to the chagrin of their proposers. On one occasion for example a certain Royal personage is said to have been so annoyed at finding one of his nominees blackballed that he promptly tendered his own resignation. On election all members pay an entrance fee of 100

season. In undress a short blue jacket is worn in place of the tail coat.

The club flag is the blue ensign of His Majesty's fleet (in terms of a warrant granted in 1848), while the burgee is blue, with a white cross and a red crown in the center. Among the peculiar privileges enjoyed by members of this club are those of making their yachts fast to Government buoys, and of entering foreign ports without being first required to pay harbor dues. As in the case of the Royal Yacht Squadron the membership is very exclusive. At one time the "black ball" was used right and left, and the ordeal of the ballot was extremely severe. A story is told of a certain former member of the committee who was bent on "pilling" a prospective member. Accordingly he attended a meeting and put in a black ball. To his dismay, however, he discovered that by doing so he had made up a quorum, and the candidate was declared to be elected since nobody else registered an adverse vote. The annual subscription of the R. T. Y. C. is eight guineas, except in the case of members owning yachts of not less than nine tons Thames measurement (who pay six guineas), and an entrance fee of ten guineas.

REGATTA ON SOLENT.

Another old established yacht club is the one entitled the Royal Western Y. C., of England. It was founded in 1827, and granted its admiralty warrant in 1834. When Prince of Wales, our late King Edward honored the club by becoming its commodore, but he resigned the office on succeeding to the throne.

Membership is restricted to 500, and no one can be elected if the ballot show him to have received one black ball against five white. Members wear a special evening dress uniform, consisting of a dark blue shell jacket (with buttons inscribed with the club monogram), blue waistcoat (with similar buttons) and plain blue trousers.

The club house, which is at Plymouth, contains a number of valuable pictures and souvenirs, the gifts of past and present members. In the coffee room, for example, is an engraving of the "Death of Nelson," the frame of which is made of timber taken from the Victory, while in the hall are some West African war drums and an elephant's carved tusk that was taken from Benim City in 1897. The special privileges enjoyed by yachts registered as belonging to this club include that of free admission into the harbors of France, Holland, Belgium, Russia, Denmark, Prussia, Egypt, Syria, Canada, Hanover, Greece, Portugal, Norway, Sweden and Spain. They are also allowed to make fast to Government buoys in British ports when these are not required by His Majesty's ships. Should a member of the club, however, leave a passenger at any foreign port, or receive one on board his vessel, he becomes liable to harbor dues as a packet boat.

The Isle of Wight, being the chief yachting center in Great Britain, the Royal Victoria Y. C. has its headquarters appropriately enough at Ryde. It was established at this port in 1844 for the encouragement of yachting among gentlemen owning property on the island. By its constitution membership is still confined to persons coming under this heading. Admission to temporary membership, however, may be extended to yacht owners who belong to other recognized clubs.

Both Queen Victoria and his Royal Highness, the Prince Consort, conferred their patronage upon the R. V. Y. C. for many years. The election of members is vested in the whole club, instead of (as is usually the case) in a small committee. The ballot is a strict one, as a

single black ball in five means rejection. Ladies who are registered as the owners of yachts are eligible to the club privileges afloat. The entrance fee and annual subscription are respectively five and six guineas.

One of the rules of the club that strikes the visitor as a little curious is to the effect that no round game of cards and no game of hazard of any description may be played on the premises. In other respects the club is conducted in practically the same manner as any other establishment of a similar nature.

The members of the R. V. Y. C. are specially permitted by the Lords of the Admiralty to fly the red ensign of the fleet with a crown surmounting the letters V. R. emblazoned on the fly; the club burgee is red, with a crown over an anchor, and on either side the letters V. R. pierced yellow.

Among the privileges enjoyed by members are those of removing their furniture from one port to another in the United Kingdom without being required to take out a coasting license, and on arrival from abroad of depositing wines, etc., in the Customs warehouses free of duty, in readiness for reshipment for subsequent voyages.

Although it was established at so comparatively recent a date as 1875, the Royal Southampton Y. C. is recognized as a leading one. By its

constitution the club exists for the encouragement of yachting in Southampton water and the Solent. Membership is open to both ladies and gentlemen, the proportion of the former being a considerable one. With regard to colors, vessels registered as belonging to the R. S. Y. C. are sanctioned by the Admiralty to carry the blue ensign of the fleet, with a crown in the center of the Union Jack, and a blue burgee with the Southampton town shield, surmounted by a crown, embroidered on the center thereof.

Dotted round the coast of the United Kingdom are several small, but still well known, yacht clubs. Prominent among such is that of the Royal Cinque ports, and others are established at Harwich, Dartmouth, Weymouth, Lowestoft and Torquay, etc., together with four in the Isle of Wight. Ireland contributes—in addition to the Royal Cork Y. C. already mentioned—the Royal Ulster, the Royal Alfred, the Royal Dublin and the Royal Munster, etc., and in Wales there is a yacht club at Anglesey, while Scotland furnishes among others the Eastern, Forth, Clyde, Highland, Largs, Northern, Tay and Western of Scotland. Of these the Royal Anglesey Y. C. is the second oldest in the Kingdom, since it was founded in 1802. The Royal Northern, with its station at Rothesay, was founded in 1831, and the Royal Eastern, at Granton, dates from 1836. Practically all these various clubs are in possession of the coveted admiralty warrant, entitling the members to special privileges in British and foreign ports. The entrance fees and annual subscriptions range respectively from £10 10s. and £7 7s. to £2 2s. and £1 1s.

New Publications.

THE MANUFACTURE FRANCAISE D'ARMOS & CYCLES DE SAINT-ETIENNE'S CATALOGUE FOR 1912-13. Price thirty centimes (postpaid).

A big book, made up of 1,200 full size pages, weighing three pounds, and containing 40,000 black and white and colored illustrations, showing all latest and finest designs in fire arm, cycle, sewing machine and typewriter construction, besides the most comprehensive collection of goods connected with every known sport—the home, the office, the workshop, the farm, the garden, photography, horology, optics, etc.

ROYAL YACHT AT COWES.

"Now, that Reminds Me"—IV.

By O. W. SMITH

Photograph by the Author.

"**N**OW, that reminds me' of a live bait almost as attractive to rainbow as minnows; I have grasshoppers in mind. Did you ever try them? Well, let me tell you that they will often turn the trick in July and August when flies prove unattractive and earthworms unavailing. Of course in fishing large rivers or lakes where overgrown rainbow and trout are to be found, one should not attempt their capture until along toward sunset, unless the day be a mizzling one, when they are apt to bite any time. Personally I have caught my largest rainbow when using grasshoppers, and I have found them a good bait for brook trout, too. It is not the easiest matter in the world to become a good 'hopper fisherman; the secret lies in manipulating the insect in a perfectly natural manner, for unless the fish be ravenously hungry, they will regard with suspicion a grasshopper that can travel upstream, feet sticking in the air.

"I have found my best 'hopper fishing for rainbow in rather wide and slow-moving streams, where one can handle the gymnastic insects to a nicety, and where the record-breakers are sometimes hooked. Probably the Peshtigo River, Wis., is one of the best rainbow streams in the Middle West. I have fished it several times going in from Ellis Junction on the C. M. & St. P., then I have gone in from the northwestern line, leaving the road at Mountain, Lakewood and Laona, and I have also 'hit' the headwaters of the Peshtigo from Cavour and Armstrong Creek on the Soo Line. Undoubtedly the best fishing today is to be reached from the latter station; at any rate two years ago I found the August fishing all that could be desired.

"I was late in getting away from town that year, and it was well toward the middle of August before we got down from the train at the little station of Armstrong Creek. Probably our host at the hotel could not understand such haste as we manifested, unless he attributed it to a desire to escape board bills; at any rate by dint of much persuasion and a generous fee we were enabled to get a driver to take us down to the mouth of Armstrong Creek at once, so at 8 o'clock in the evening we set out, bag and baggage. It was a long drive and the road not of the best, but years of campaigning along the edge of civilization has inured us to hardships, so while the wagon bumped from rock to root and back again, I hung to the seat and watched the stars which winked at me through the tree-tops and listened to yarns of my companion. Daylight and sun had arrived before we reached our destination, and with a sigh of relief I paid off the driver, who outspanned his tired team, got himself a lunch, then lay down under the wagon for a snooze. But there was no rest for my companion and I. We got busy with the tent and before the uninitiated might think it possible, had a comfortable camp established. Then, mid-day though it was, we jointed our rods and began fishing, the result being several good speckled trout and three fair rainbow.

"When we returned to camp our driver had

disappeared with his team, and we were not sorry to be left alone. One of the most enjoyable features of wilderness camping is its loneliness. You have not camped out until you have gone alone or with a single companion. Leisurely we prepared our mid-afternoon dinner, neither talking much, for in our work-a-day

ARMSTRONG CREEK.

world speech is at a premium and in the out-doors we are glad to keep silent. Then we rested until the sun, a great red ball, hung just above the treetops, a sign that the best hour for rainbow fishing had arrived.

"We camped at the head of a long rapid, wild and angry water with many an up-reaching brown rock, and deep eddying pool, an ideal rainbow water. Side by side we waded in, and side by side we walked with the current. The water was not much above our knees; that is, save in the deeper places which we watched out for. Casting was easy, for we had plenty of room, and when upon the surface of the water the swift current kept our 'hoppers bobbing and dancing in a very lively manner. We discovered that while trout are always found on the lower side of rocks, rainbow were often found above them. The instant a fish was hooked we could tell whether it would prove a native or a Westerner, their methods of fighting are so different. The rainbow's actions are more electric than the native's, while the former leaps from the water, something that the latter never does on a slack line. By the time night had gathered we had several fine fish, more than enough for breakfast, while we had liberated three for every one we kept.

"Now, I am not going to tell you of individual battles, victories and defeats; there were many of both. Only remember the one who handles grasshoppers as he would flies is sure of plenty

of rainbow on the upper Peshtigo. We found waders rather a nuisance, for we were always stumbling or stepping into deep holes and filling them, not only a disagreeable experience, but a dangerous one in that swift water, so we formed the habit of fishing without them and changing our clothes upon returning to camp.

"The days passed swiftly and all too soon the last arrived, the last fish was caught, and the tent taken down in anticipation of the arrival of the promised team. Then we were bumped and tossed over the stones and roots once more and whirled away behind the iron horse, back to the desk and business. If you want to know what grasshopper fishing for rainbow trout is like,

just visit the Peshtigo or like stream in dog days, and my word for it, you will be delighted with the experience and results."

A Real Sea Serpent?

ST. JOHN'S, N. F., July 5.—*Editor Forest and Stream:* It is reported that the sea serpent has been seen at Englee down the north coast, and the fishermen are afraid to go out to the grounds. This is not a "holiday" tale, as certainly some monster fish has been seen in that vicinity, as it is not easy to frighten Newfoundland fishermen with anything coming from deep waters.

W. J. CARROLL.

Wisconsin Angling.

THE third season's angling trip for the Fontinalis, in the rivers of Shawano county, Wisconsin, by the three boon companions (old members of the Chicago Fly-Casting Club) Geo. A. Murrell, William Wolfarth and Hawley A. Newkirk, was most enjoyable. They spent ten days with their good Indian guide and caught enough to have trout on the table for five people three times a day, and bring the law's allowance home. It was a little early for the very large ones, but they secured from seven to twelve-inch trout, and the best flies proved to be, in their order, brown Palmer, queen of waters, cow dung and the professor.

Wee Fighters in Big Waters

By RETTA KING TOURISON

(Assistant to the Superintendent of the Fairmount Park Aquarium.)

THERE is an aquatic warrior which, in some parts of the country, people call sunfish; in others, pumpkin seed; again he is known as "kivers," and in the South as bream. For a noted fish he is very small, among the smallest of the fighting fishes, for he rarely exceeds a length of six or seven inches. What he lacks in size he more than makes up in brilliancy of color, in ambition, energy and courage. He is a wee fighter in big waters. Tiny as he is the small boy and the grown ups love the little "scrapper."

In shape he is flat and nearly circular, hence his name—pumpkin seed and "kiver." He is always hungry, and boys soon discover that when he seizes a hook, he swallows it just as a catfish does, almost to his tail. His appetite is so insatiable that he will come up from the bottom of the water with a rush and take a hook covered with feathers—the artificial fly—and sportsmen declare that he does it with the vim of a trout. When hooked he does not quietly submit to adverse fate, but makes a gallant and stubborn fight for his life.

Although ever hungry and eager to snatch at food, the sunfish hunts deliberately and even daintily. When he sights a prospective tid-bit, he pauses a short distance from it, balancing by quick movements of his pectoral fins, and a gentle waving of his caudal. Soberly, contemplatively, he eyes his prey; then a swift dart forward, and the little jaws close quickly over the trophy of his chase.

The "sunny" delights in clear streams and ponds. In winter he goes into deep water, but when the spring raises the temperature, he comes into the shallows and haunts the shores. He hunts a sandy spot in early June where the water is only about a foot deep, for at this time his inclinations have turned to nest building.

The sunfish has seen his big cousin, the black bass, build a nest. He thinks he will construct his on the same lines, but so great is his ambition that he decides to have a home much larger than that of his ferocious relative. Now while the sunny has, in proportion to his size, just as much strength and courage in his wee body as the big bass, yet to carry out his architectural plans he must choose a site different from the bass's stony estate. Hence the sandy bottom.

When the sunfish has selected a place he spends much time darting back and forth, wagging his tail. He has much the same air of superior satisfaction as the "newly weds" who have just embarked on the simple life in the country.

By and by dropping close to the sand he flirts away the sediment with a rapid fan-like motion of his pectoral and ventral fins. It is marvelous what speed the sunfish imparts to

these redimentary arms and legs, and in an incredibly short time he clears a circular space of more than two feet in diameter, where the sand glistens white and clean. As the sunfish fans he turns and turns without ceasing, so that the sand is thrown in an unbroken mound around the edge of the circle, and a well defined rim is formed.

The sunfish delves with the object of penetrating the sand and reaching fine gravel. Sometimes he succeeds. If he fails he does not abandon the spot, but goes to work and little by little carries home gravel from wherever he can find it. On these errands, having no wheelbarrow, he uses his mouth. When this task is done the center of the nest presents a circle of about eight inches or more in diameter, covered with pebbles the size of small peas. When everything is symmetrical and scrupulously clean, the sunfish goes a-courting, and when he finds a mate, he coaxes her to the nest where she is to lay her eggs.

The sunfish is as dainty in his courtship as in his every day life, and very loving. While he follows the same general method of making love as his cousin, the black bass, he is not rude or rough. He swims in graceful circles around and around the female, tilting sidewise until the light catches the opalescent colors of his scales. He sidles up to her and with open mouth touches her on the cheek just as though he were kissing her.

The female seems to accept this all as a matter of course and with much complacency, unless, as sometimes happens, she decides to reject him, when she flouts the wooer contemptuously with a toss of her tail and swims away.

Even so, he will try his luck with another. He follows the maxim that there "are just as good fish in the sea" as she. Yet, when he succeeds, it often appears that the male sunfish, in building a nest, has gone beyond the ability of the female to provide a sufficient number of eggs to fill it. This does not satisfy his sunfishship. It leaves a waste of good house room which he has so carefully prepared. He wants his nursery filled. So, obsessed with this idea, he sallies forth in search of a second mate. Sometimes the little Mormon brings as many as five wives home to the nest.

When at length there are as many eggs deposited as he thinks desirable, the sunfish generally drives all but one of the females away. He may keep his first wife, and in the expulsion of the discarded mates he is assisted by the favored one. They rush open-mouthed and savagely at the unfortunates, and woe betide the one the pursuers overtake. She is likely to lose one of her fins or a piece out of her side in this brief period of savagery. Generally the ousted

females take their ejection philosophically, and as a matter of course, seeking safety in hasty flight.

Housekeeping now begins in earnest. The female scouts on the outside and forages for herself. But the male poises over the center of the nest, now and then darting away to assure himself that all is well. He takes no food; even if a most toothsome morsel falls directly into the nest, he tosses it out, and with scarcely any rest he is on duty day and night.

The approach of an intruder fills the sunfish with rage. His fins are all raised and expanded to their fullest extent. It matters not how big, or what the species of fish the interloper may be, the sunfish pauses but for an instant, then darts open-mouthed and fearlessly in assault.

Strange to say the onslaught of the sunfish is almost invariably successful. There seems to be something about a nest-building fish which inspires respect and even fear in the hearts of other fish. A pickerel, for instance, might be able to swallow a sunfish at a single gulp, and under ordinary circumstances would do so, but he sedulously avoids a sunfish nest when the parent fish is there.

The young of these wee fighters, the sunfish, begin life like all other fish by emerging from the egg tail first, and the diminutive creatures—for they are mere specks—cling closely to the fine gravel in the nest where they wag their tiny tails in apparent joy at being alive and in the world. There are thousands of them in one of these sunfish nurseries, and they are so close together and wagging their tails so rapidly and persistently that when the sunshine falls on the water and illuminates the nest, there appears but a rippling of a reddish yellow mass.

The domestic cares of the sunfish are now doubled, yet at this point the female deserts, and the up-bringing of the family rests wholly with the male, and to this work he rises nobly. Fortunately the little father does not have to prepare food for his thousands of babies, because for some days after birth the young sunfish has attached to its body a sac, on the contents of which it lives by absorption. When this food is gone, the mass of tiny sunfish rises from among the stones toward the surface with rapid awkward movements. Their father sweeps gracefully about among them as though to teach them how to swim easily, and to the best advantage.

When about two weeks old all these boys and girl fishes are ready to shift for themselves, and then the parental instinct deserts the father. He darts into their midst and ruthlessly "chases" them. Frightened at the changed attitude of their father the young sunfish scurry to the shoal water and hide among the grasses. The father turns, swims away and promptly forgets his children.

THE Illinois fish commissioners are continuing their warfare against the garfish which are becoming so plentiful in the waters of this State, and which are destroyers of game fish. A large specimen was seined in the Mississippi recently which contained forty pounds of spawn and weighed 238 pounds. The law provides that gars must be killed whenever taken by hook or seine, and all fishermen who recognize the destructive characteristics of this species kill these fish before returning them to the water.

On the Beaverkill and Rondout.

RIPOGENUS LAKE, Maine, July 2.—*Editor Forest and Stream:* In the interest of a little accuracy permit me to untangle a little statement made by "One Who Went," appearing under the title, "Fishing at the Beaverkill," on page 790 of your issue dated June 22, 1912. He must have "went" a rugged, not to say jagged, route. As you know, but as some well meaning reader may not know, De Bruce is on the Willowemoc River, not 'at the Beaverkill' at all; the Hearthstone Inn is run by Mrs. (not Miss) Elizabeth Royce, and "The Homestead" by her sister, Miss (not Mrs.) Ada Cooper, and there is corking good fly-fishing there, particularly in the stretch of water between the "Anvil Rock" and the junction pool of the Mongaup Brook (not river; the river has a story all its own further south in Sullivan count) with the Willowemoc. Jay Davidson's place is at Beaverkill P. O., on the Beaverkill River. Here, however, I have not had such good fishing as further up the river, nearer to Lew Beach (not Besch), particularly just back of Archie Dickson's farm—famous pools, eddies and rips once you learn the water—and just below Voorhis's place, where a fishing club now has its headquarters. Otherwise he who went is all right. It is a beautiful country, all easily accessible from Livingston Manor on the Ontario & Western railway, and mighty good cover for the ruffed grouse if the farmers' boys would turn their attention a little more toward keeping down the numbers of three kinds of hawks—the crows, owls, skunks and other vermin which, added to what men do to him, make life some exciting for said Mr. Grouse.

A word, too, if I may, with Mr. "Whirling Dun" who in the same issue writes of "The Dry-Fly on the Roundout." Don't worry, Mr. Dun, if you begin to suspect that Dr. Breck is not after all in all things always infallible. You have some others with you and Dr. Breck is himself too good a sportsman to believe or to wish others to believe that he believes he "knows it all" in connection with all of out of doors. He does know a lot, but like other wise men, he has apparently changed his mind about one or two things in the last twenty years, so let's hope he will live at least twenty years more. To which I suppose he may inquire, "Why limit me?" But as many of his ideas are sound, I haven't time to go into that now.

That yellow-winged floater you write of interests me. Or, rather, I have gone at it backward, for it is not the yellow-winged floater that interests me at all, but rather the natural yellow-winged fly that caused you to use it. If, when wading some of those Catskill streams about the middle of May or earlier, you look carefully, you will notice clinging to the stones, rather nearer the banks than mid-stream, what appear to be small bits of twigs. I first noticed the thing in the waters of Western North Carolina, where it is locally known as "stick bait." For by pressing upon these "twigs" they crack open and discover a white grub with a black head. These I believe to be the larvæ of the yellow-winged flies which I have seen hatch by the thousands for a few minutes on the waters of the Willowemoc about De Bruce. During the hatch you might as well stay home and play with the baby, but just as it ceases, and only a

fly here and there is left upon the water, and the fish have just about gorged themselves, cast a green drake dry over a rising fish, and if Mr. *Salmo fario* is he who rose—oh! la, la, la, la!

I took in this manner the two finest brown trout of my experience one afternoon at De Bruce. Now, the green drake is not a good imitation of the hatching fly. It is not at all on the same shade of yellow. But the point is the trout—the brown trout, at least—take it, and I believe they will the yellow May. When I had my panic and had thrashed everything I could think of at a school of brown trout feed-

"THE CORPULENT MR. GILL."

ing on the hatch, the green drake was all I had left, and they "fell for it."

As you suggest, what we need in this country is a fly tier or two who can exactly or approximately imitate the actual flies found upon our waters upon which trout habitually feed. That man may justly be termed the American Halford and save us from a great deal more of the hysterical babbling that is the present mode about the dry-fly in America—"practical" or otherwise. Mr. La Branche, a most gracefully fashioned person, gyrates horribly upon the tournament platform; the corpulent Mr. Gill writes most gracefully; and Mr. Camp is a wonderful "south paw" artist, but are they improving American angling conditions in the least?

RALPH BISBEE.

All the fish laws of the United States and Canada, revised to date and now in force, are given in the Game Laws in Brief. See adv.

Fishing in California.

THE distribution of trout fry is going forward steadily, and it is anticipated that by the end of the season almost 18,000,000 fry will have been liberated in California streams, the largest number on record. Many streams that have never been stocked before have been given attention this season, especially in sections of the Sierras, recently opened to railroad travel. With the growth of the fish planting work of the Fish and Game Commission, it is becoming the opinion of members of this body that more satisfactory results could be obtained by the establishing of a number of new hatcheries, rather than by enlarging the facilities of existing ones. This year about 10,000,000 fry were hatched at one station and distributed from here to streams all over the State. With smaller hatcheries located at important distributing points, the expense for transportation would be greatly reduced, and there would be much less loss of fry through impaired vitality caused by long journeys. W. H. Shebley, A. E. Doney and Mr. Gilmore have been making a survey of California streams with the idea of locating all dams and obstructions which might interfere with the free passage of fish to natural spawning places. A map is being prepared, showing all streams and dams, and steps will be taken at once to see that fishways are installed wherever needed. Nevada sportsmen are interesting themselves in similar conditions on the Truckee, and it is believed that this stream will soon be freed from all obstructions. Congressman Raker, of California, has introduced a bill appropriating \$10,000 for building a fishway at the Derby dam, the old one being useless.

Visitors to the Yosemite Valley since the first of July have been enjoying splendid sport in the Merced River and its tributaries, these streams having been thrown open to fishing on that date after a three years' closed season. Heavy plantings of trout have been made there during the past few years, and the fish are now more plentiful than ever before. Dr. F. B. Alden, of San Francisco, made the trip there recently with his family and succeeded in landing many fine trout, some of these weighing four pounds each.

Fishing has been unusually good this season in the streams along the Ocean Shore railroad between San Francisco and Santa Cruz, and will be kept at the present high standard if this can be accomplished by planting. In one day recently there were planted about 350,000 fish in ten of these coast streams, which should insure some splendid sport for several seasons to come.

The best sport of the season is now being experienced along the Feather River, notably on the lower stretches where the early sport was rather indifferent. At Belden limit catches can be easily made and some large fish are being taken. At Spring Garden the sport continues to be of high order, and a six-pound trout was recently landed there. The fish taken in that vicinity are averaging about five to the pound. On the Middle Fork good fishing is to be enjoyed in the vicinity of Cromberg, but most of the anglers now visiting this section are spending most of their time at the lakes in the vicinity of Johnsville where fishing is just commencing. In the vicinity of Oroville a variety of sport is

now being enjoyed, trout, striped bass and black bass being in evidence there. Bass fishing there is reported to be much better than it is in most of the fishing grounds on the lower Sacramento River. A heavy run of striped bass occurred recently on the Russian River, and the sloughs near San Francisco have not been receiving much attention of late.

A movement is on foot in the lower part of the San Joaquin Valley to organize the San Joaquin Valley Game Protective Association, and A. D. Ferguson, of Fresno, Deputy Game Warden in charge in that section, has promised his co-operation in making the organization a success. It is planned to map all the mountain trout streams and to keep on hand data as to their condition as well as to plan a system through which they may be kept replenished with fry.

Deputy J. L. Bundock, of the California Fish and Game Commission, recently arrested Al McCormick and Frank Peterson, near Giant, for fishing for bass with a net of illegal sized mesh.

GOLDEN GATE.

Landlocked Salmon in Lake George.

ALBANY, N. Y., July 9.—*Editor Forest and Stream:* Doubtless genuine anglers will be interested to know that the experiment of placing the landlocked salmon in Lake George is a success. Large specimens are being caught yearly by those trolling deep for lake trout, and it now remains for experts who know how to fish for the ouananche to go to this beautiful body of water properly equipped and get what they fish for.

The late A. N. Cheney, when State fish-culturist, planted landlocked salmon in Lake George a dozen or more years ago, and while secretary of the Forest, Fish and Game Commission, I had the work continued. Dr. Bean has since kept it up. The distribution of ouananche was begun by the old commission in 1903, but the first regular plant was made in Lake George in 1907, when 1,200 fingerlings were put into the water. Since then the record is as follows: 1908, fingerlings, 18,886; 1909, fingerlings, 28,000; 1910, fingerlings, 23,000; and I have just been assured that a plant of about 10,000 fingerlings was made there during the present week. There does not seem to have been any plant made in 1911. The eggs from which these fingerlings are hatched are furnished by the United States Commission, and the fish are reared by the State at its Old Forge hatchery.

Unfortunately, it does not seem possible to secure records of the landlocked salmon that are caught, although frequently an angler is found who tells his story for the benefit of others. Such an one is Dr. D. F. McGillicuddy, of Glens Falls, whose 8½-pound catch is shown in the picture inclosed. It was caught the latter part of May, and this is what the doctor says about his experience: "I hooked my fish on May 25, at about 5:30 p. m., about a mile south of Dome Island, on the north side of fixed Pine Point Shoal, where the water is about 80 feet deep. Had on a small brook sucker for bait and about 150 feet of line out without lead. The lake was quite rough and a strong wind was blowing. When first hooked the fish jumped about six feet out of water and it took

me fully twenty minutes' hard work to land him. At two different times when brought near the boat within reach of the net he jumped several feet out of water." Dr. McGillicuddy wanted very much to know just what the fish was feeding on, but says that the taxidermist to whom he sent it to be mounted told him he "found the stomach entirely empty," but that he found "a liberal quantity of spawn."

With one exception, this is the only account we have of the way in which the ouananche have been caught in Lake George or their manner of acting when hooked. The other was given to me in 1907 by S. H. Harris, one of the best known fishermen at the lake, who had just caught a 12½-pound specimen, a photograph of which was shown in the commission's report of that year. Harris said: "I

DR. D. F. M'GILlicuddy AND HIS 8½-POUND SALMON.

caught my landlocked salmon near Victoria Lodge on a hand line. I was running about 250 feet of line with a frost fish for bait on a gang. The fish struck hard and then made a rush that took about 100 feet more line. When I stopped him finally, I thought I had lost him and reeled in about seventy-five feet of line before I felt him again. He acted like that for fully three-quarters of an hour before I managed to get him near enough to the boat to see him. I had about a pound sinker on and was doing bottom fishing when he struck. When he came to the surface he jumped from four to six feet in the air several times before I got him close enough to gaff him."

These are stories to stir the blood of any angler, and I hope to see them repeated, as I am certain they can be if only still-fishermen will try for the ouananche in Lake George at the right time, properly equipped, and will then send pictures of their catch to *FOREST AND STREAM* with an account of the battle, so that all fishermen may enjoy it.

JOHN D. WHISH.

THE TOP RAIL.

C. T. WALLACE is the champion fisherman of the West, but he never uses a seine or hook. He catches the fish in his bare hands while below the surface of the water. His home is in Macon county, Illinois, and he supports himself by this unique method of fishing. Long practice has made him expert in locating a fish in hiding in the protection of a log, brush or other retreat, and once his fingers are locked in the gills, there is no escape for his prey. He is always an attraction at fish fries, being engaged to make a public exhibition of his work, the fish he catches being later cooked for the assembled company. His record catch was 200 pounds in forty minutes. The largest fish he caught with his bare hands was a Mississippi catfish that weighed thirty-six pounds. This fish was captured in Salt Creek, a small stream of Central Illinois. Wallace has carried on his unique occupation for twenty years and is almost as much at home in the water as the fish themselves. He seldom goes deeper than eight feet. He has become so expert that he can detect the presence of a fish by a slight discoloration or movement of the water, and has the knack of approaching the fish without alarming it. He is also successful in catching turtles and snakes. Efforts are being made to perpetuate his work by means of moving picture films.

* * *

FRANK L. MATHIS, a thirteen-year-old boy of Morton, while fishing off Kelly's beach on the Illinois River this week, landed a black bass after a desperate struggle lasting a half hour. The contest between the boy and fish attracted a large crowd of campers. The fish weighed 14½ pounds, the record catch of the season with a hook and line. Fishermen say that this is a banner year for black bass fishing in the Illinois, but it is extremely rare to land one as large as the prize catch of young Mathis. The black bass season is on at the lake of the Decatur Fishing Club, and some fine strings are being caught. Phillip Mueller landed one this week which weighed four pounds, the largest taken so far this season.

* * *

PLYMOUTH, MASS., farmers are complaining of extensive damage by deer. So tame have the animals become from being protected from gun and dog that they suffer anybody to come within a few feet of them while feeding.

GRIZZLY KING.

A Foxy Trick

By A. D. DART

Flagging Ducks Within Gunshot on Great South Bay by Gently Waving a Small Red Flag or Boot

A QUEER custom practiced by Sir Reynard on Long Island, N. Y., was to lay on his back a few feet from the water, and by gently waving his brush to and fro, lure a flock of ducks within reaching, or springing distance.

easy matter to secure at least one out of the lot. The accompanying unique photograph shows the hunter lying on his back, while two flocks of ducks are slowly swimming in, the nearest flock at the time the picture was taken being

HUNTER "FLAGGING DUCKS."

Although the ducks might be a mile or so away, their curiosity would lead them to investigate the singular and apparently harmless object.

Old hunters have told the writer that they have seen hundreds of ducks lured to the water's edge by this trick, some even venturing on shore so close to Mr. or Mrs. Fox that it became an

not more than 100 feet away. The boot on this occasion was wrapped with a piece of red flannel. As the leg is being waved for the last time the kodak clicks, followed almost immediately by the discharge of the double barreled gun. Thanks to Sir Reynard, five broadbills are bagged.

Scarcity of Swallows in England.

BUDLEIGH, Salterton, Eng., June 4.—*Editor Forest and Stream:* During the present season there has been a remarkable scarcity of birds of the swallow tribe in the British Islands, although other summer migrants appear to be as numerous as ever, and cuckoos (at least, in this part of England) are unusually plentiful.

For many years I have kept notes of the dates on which the swallows have arrived and departed. Generally they have appeared between the 15th and 20th of April, but this season I did not see the first pair until the 20th of May, and they are still exceedingly scarce either about the town or in the surrounding country.

I have lived here twenty years and swallows have always bred in the chimneys of my house, in the loft of the stable, and in an outhouse at the end of the garden, while martins have built under the eaves. This year there is not one pair of either species in any part of the grounds.

There was a colony of sand martins in an old gravel pit about 200 yards distant. It is now entirely deserted. Within the last seven years there has been a gradual but marked diminution in the numbers of swallows of all species, compared with what there were twenty years ago. This was attributed to the French and Italians

on the north shores of the Mediterranean, catching them with nets when they arrived after the flight from Africa. I think it is not exaggerating to say that they are one hundred times less numerous this season than they were last year.

A theory was lately published in a newspaper that owing to the multitudes of Europeans who have settled in the north of Africa within the last few years, the swallows now remain there and breed about their houses instead of crossing the Mediterranean.

Considering that nearly all migratory birds have a fixed habit of returning annually to the places in which they were hatched, it is very improbable that the great mass of swallows and martins would, in one year, change a custom established for many past ages.

It is greatly to be feared that the reduction in their numbers has been caused, in their countries where they spent the winter, by a widely spread epizootic disease. If so, the countries of Europe may suffer severely for some years from insect plagues. I have noticed a considerable increase of blight on fruit trees coincident with the lessened quantities of swallows during the last few years.

It would be interesting to know if there has been a similar diminution in the swallows of America. Those individuals which extend their

migrations to the arctic regions, are while there the near neighbors of their cousins from Europe which breed in the same latitudes, and an infectious disease in one variety might possibly extend to the other.
J. J. MEYRICK.

An Albino Sparrow.

EXETER, N. H., June 25.—*Editor Forest and Stream:* Throughout the winter and spring I have noticed frequently on a certain side street of the town an English sparrow that conforms pretty nearly to what must be albinism. I have observed the creature with great care, and the matter has been mentioned in the local paper. The tail and the chief feathers on the wings are the dirty brown always seen on the typical English sparrow, but the breast, the back and the belly are a creamy white. I cannot be sure that the eyes are any different from the usual sparrow, but the rest of the specimen is surely unusual. The bird is always in the company of other sparrows, and acts no differently from its fellows. Can you give me any information on this?

Though I have not been in the woods since the shooting season closed to any extent, report says that there are many young grouse and that they are thriving. The cold rains of the spring did not promise well, but there seem to be a good many young broods that have hatched out and that are now past the worst time of danger. A good number of woodcock have been reported as nesting in the vicinity. The birds that are raised here are invariably gone before the shooting season opens in October, but I consider that a great blessing, since the early shooting which some of the older men tell about well nigh settled the woodcock question for all time. Several litters of young foxes are being raised within a couple of miles of town, and promise the usual fine sport that the fox hunter loves.

Under the two weeks of open season on deer we are surely and rapidly losing those beautiful creatures from the woods and fields. The actual damage done by them to farmers' crops was always inconsiderable, and nothing in comparison with the advantage of having our countryside blessed by their sprightly presence. In a few years the "timid citizens" will have permanently withdrawn to the safer retreats of the forests further north. LAURENCE M. CROSBIE.

[White-breasted sparrows are not infrequently found in sparrow beevies, although white on the back is most unusual. It is not likely that the eyes are pink, the feather coloring being due to accident of birth.—EDITOR.]

A New Jersey Martin House.

PRINCE'S BAY, S. I., May 18.—*Editor Forest and Stream:* Easter Sunday I spent at Lake-wood, and there I saw a sight I had not seen before since I was a very small boy—it was a colony of purple martins. A man had taken a common sugar barrel and made it into a suitable house and put it on top of a pole about thirty feet high. The martins were first seen Easter morning, and they were busy cleaning out the English sparrows that had had free rent all winter. There must have been fifty pair of martins there before evening.

If I thought I could get them around my place, I would do the same thing, but I have never seen a martin on Staten Island.

Published Weekly by the
FOREST AND STREAM PUBLISHING COMPANY,
 CHARLES OTIS, President.
 W. G. BEECROFT, Secretary. S. J. GIBSON, Treasurer.
 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

OUR POLICY.

We reproduce herewith a paragraph from a letter written us by a prominent fisherman. The subject of the letter was unsatisfactory results obtained by the correspondent from certain fishing tackle used by him in Florida fishing:

"All sportsmen heartily sympathized with my disastrous results and agreed with my proposed method of obtaining a cure, although I have not seen many articles on the subject, perhaps because none have been written, and perhaps because publishers of sporting magazines care more about the revenue which they obtain from the dealers as fishing tackle advertisers than they do about promoting the interests of sport and sportsmen."

We take this paragraph as a theme worthy of explanation as to the relative position of FOREST AND STREAM and its subscribers.

Our first interest is to our subscriber. His complaints, when just, become our complaints; his perplexities are ours for solution. We absorb satisfaction from his pleasures. For forty years FOREST AND STREAM has been free from any control of its editorial policy through its advertising columns. It has been, and will continue to be, just to advertisers and subscribers. It will not exclude from its reading space fair criticism, whether such criticism be aimed at an advertiser, an individual, or a commission. We prefer to boost, but when occasion rightly demands a knock, we wish we had the hammer of Thor. Our policy is for construction, not destruction, except wherein it is necessary to destroy to clear the way for progress, or to take out of the way a purveyor who intentionally offers sporting goods that are not all that he claims them to be.

We make every effort to develop the business of our advertisers, but we aim to do it

through satisfaction with his goods by the subscriber.

Our columns are open to letters from readers or advertisers, and we will do our best to take up any argument that may arise between them. Our columns are at your service.

STATE OWNERSHIP.

THE question of the ownership of fish and game is a point much disputed. In a decision handed down by the United States Supreme Court in 1896, it was held that the ownership of the fish and game rested in the State. The decision was written by Chief Justice White. The ownership of fish and game being vested in the State, the State has a right to regulate the manner in which it is taken, or it may prohibit the taking of it entirely. An end would soon be put to the remaining fish and game of the State if private ownership should ever be proclaimed. With no restriction placed on seining or the spearing of fish, and the shooting of game birds and game animals permitted at all seasons of the year, we might expect a total destruction of our fish and game within a short time. Instead of a demand for the repeal of our fish and game laws, we find in place a growing sentiment for still stricter laws governing the taking of game birds and game fish. We heartily endorse the plea of the Marion County Fish and Game Protective Association that a "close season during the spawning season of bass and the prohibition of spring shooting of waterfowl are laws that should be presented to the next meeting of Indiana Legislature for serious consideration." A movement for their enactment should be supported by the hunting and fishing fraternity, not only in Indiana, but in many other States as well.

TWO GOOD ORDINANCES.

NEW YORK CITY has two good ordinances, one of which—the muffler cut-out on motor boats—is indifferently enforced. On Long Island Sound, around City Island, dinky "near speed" boats chug-chug about without regard to the law prohibiting cutting out of the muffler. On July 16 a similar ordinance went into effect applying to muffler cut-out on automobiles. Let us hope the enforcement of the second law is more forceful than that of the first, because soon it will be time for aeroplanes to come under, or over, the eye of city fathers, and it won't do to have two statutes applying to vehicles of transportation, unenforced when it becomes necessary to cut out the overhead muffler. Perhaps by that time it will be a case of cut-out city ordinances as well as mufflers.

DUCKS FIND GAME REFUGE.

A LITTLE family of wild ducks, too impatient to wait for the untying of bows of red tape by the game refuge associations, settled down on the Jersey meadows, nested and hatched. Undisturbed, they decoyed other families of ducks until now there is a goodly colony of ducks, drakes and ducklings residing peacefully in the waste lands of New Jersey. It is the first time in twenty years that wild ducks have nested in this section. It looks as though we did not need game refuges as much as game laws to enable migratory birds to multiply and grow fat.

JULY CROP REPORT.

A RECORD crop report for July comes from the Department of Agriculture. It omits of course the probability of any great deterioration between now and harvest time, which, figured on past history by average, is not likely to be. The crop of food stuffs shows an increase in animal, rather than human substance, but people who associate abundance with cost of living need have no worryment on that score. Big harvests of oats, corn and hay betoken lower prices more surely than a surplus of wheat, apples and potatoes. The prices of bread and apples practically are constant, leaving only potatoes to offset the downward trend of animal food stuffs incident to big crops. For another thing the significance of the Government crop report is emphasized by bright prospects for a plentiful production of cereals in foreign countries. A reversal of conditions from last year, therefore, practically is world-wide. The cry of famine comes from no quarter, a fact unusual at this season, but oftener true to-day than of old, when war and pestilence, together with undeveloped marketing facilities, shortened the production and distribution of staples. The crop story is no great surprise, but rather a confirmation of unofficial forecasts, which have become more and more optimistic since a backward early season suddenly was transformed into a continued spell of favorable farming conditions.

AMERICAN WINS AT STOCKHOLM.

IT indeed is gratifying to find that a real American won the highest honors at the Olympic games at Stockholm, Sweden. James Thorpe, a Carlisle Indian, therefore an American in every sense of the word, won the athletic championship of the world. Another victory for clean living was that of Harry Babcock, who though not an aborigine, has an American family tree dating way back into the great oaks of American history. This youngster, a product of the educated farm district, sometimes known as the suburbs, a student at Columbia University, with no suggestion of professional taint nor likelihood of acquiring one, is an excellent example of Young America. There were those on the Olympic team, whose wins are more a credit to England than to America, as they were Ireland born, but they have made such good citizens we are proud to credit their records to America. The entire team was an exemplification of what America can do with "born home" material or goods sent in for finishing.

OUT-WHALING JONAH!

TIME was when Jonah had all long distance records for whale transportation, undisputed leviathan rider of all time. A change has come and that too from the home of culture and veracity—Boston, of course. The New York Sun, wherein anything found passeth beyond conjecture, tells of a fisherman being attacked by a whale, tossed into the air, where he remained during such time as was necessary to make the descent, when he landed upon the whale's back. Here he slid about during his short cruise, finally landing right side up for rescue. The tossing feature would indicate a bull whale. The whole thing sounds like a "bully" story.

Ticks from the Ship's Clock.

Sidney Herreshoff, the eldest son of designer Nathaniel G. Herreshoff, has produced a new type of speed launch and gasolene engine which attracts attention in Narragansett Bay because of the steady going of the craft, no matter how rough the water. The boat is 20 feet in length, named Bubble, and has a speed of twenty miles an hour.

The reversion to the old custom of running a steamboat in order that members and guests may follow the races, worked out admirably last Saturday at the Indian Harbor regatta. The steamer was crowded comfortably and but for the fog would have been a most enjoyable innovation.

The Newport Y. R. A. has offered a cup for a race between the 65-footers Aurora, Istalena and Winsome. This race will be sailed after the close of the New York Y. C. cruise.

The longest yacht race of the year, from Los Angeles, Cal., to Honolulu, Hawaii, was won by Lurline, owned by Captain Harris, of the San Diego Y. C. The distance was 2,013 miles and the sailing course about 2,600 miles. Lurline's time, unofficially, was 13 days 23 hours and 16 minutes, finishing on June 30.

James J. Hill, the Minneapolis millionaire, is cruising along the Labrador coast on his steam yacht Wacouta on a salmon fishing expedition.

Indian Harbor Y. C.

WITH fifty-two starters, headed by the three 65-foot sloops in Class K, the twenty-fourth annual regatta of the Indian Harbor Y. C. was sailed off Greenwich, on Long Island Sound, last Saturday. The weather man was various in his service, his first offering being a brisk, lowering east by north wind, which had kicked up a generous bit of sea by the time the start was made at 1 p. m. About 3 o'clock the wind faded into a zephyr vaporizing and shifting to the southeast, where it stayed to the finish. During most of the races the boats were fog-enshrouded. The big sloops over-jockeyed at the start. Winsome forcing Istalena over the line ahead of the signal, and following across both were recalled, thus giving Aurora a considerable lead which was cut down after the first leg by Istalena, which finished with 1m. 15s. to spare. The New York Y. C. "30" class was next away and furnished the prettiest race of the day. J. P. Morgan, Jr.'s, Phryne crossed first, followed closely by J. H. Mahlstadt's Okee and the Alker brothers' Alera. Okee ran along in the bunch on the first leg, then took the lead which she held to the finish, crossing 1m. 11s. ahead of Rowdy. Caprice and Phryne finished in the order named only 19s. apart. Other winners were: Corinthian, sloops, Class P; Helen II., Long Island Sound schooners; More Joy, sloops, Class Q; Sally IX., handicap class, first division; Amanda, second division; Rascal III., third division; Whiff, Larchmont Inter-Club Class; Turquoise, jewel class; Little Dipper, star class; Ace, Indian Harbor cats; Scalpa, Sound Beach dories; Arethusa, in a special match. The efficient regatta committee was: E. Burton Hart, Abbott P. Bush and H. C. Pelton. The summary:

Sloops, Class K—Start, 1:00—Course, 20 Miles.		
	Finish.	Elapsed.
Istalena	4 08 18	3 06 18

Chesapeake Bay Y. R. A.

J. H. ROBINETTE was unanimously elected president of the Chesapeake Bay Y. R. A. to succeed Commodore Isaac E. Emerson, who recently resigned. Mr. Robinette has been associated with local clubs for several years. His selection is a popular one.

The committees in charge of the races of July 20 to 30 follow: Official Measurer, Commodore L. F. Hewins, Capitol Y. C., of Washington; Alternate Official Measurer, J. G. Callis; Rules Committee for Sailboat Racing, Dr. W. Williams, Baltimore Y. C.; W. W. Estep, Corinthian Y. C., and M. F. Hartley, Capitol Y. C.; Rules Committee for Motor Boat Racing, A. Stanley Zell, Baltimore Motor Y. C.; Raymond Thompson, Baltimore Y. C., and James Smith, Cambridge Y. C.

Following is the program of coming events: July 20.—All boats will sail for Annapolis, where rendezvous will be set for that day. The crafts will lay over until Monday, when the races begin. Sunday the Capitol Y. C., of Washington, will entertain the yachtsmen at their Annapolis station.

July 22, 9 A. M.—Start from Annapolis to Cambridge.

July 23.—Races at Cambridge for sail and power boats.

July 24, 10 A. M.—Start from Cambridge to Oxford.

July 25, 10 A. M.—Sailboat races at Cambridge, and 3 P. M., power boat races.

July 26, 10 A. M.—Start from Oxford to Annapolis.

July 27, 10 A. M.—Start from Annapolis to Baltimore.

July 28.—The yachtsmen will be entertained by the Baltimore Y. C.

July 29.—Races at Baltimore. At 2 P. M., sail boat racing, and 4 P. M., motor boat racing.

July 30.—The boats will leave for their respective quarters.

The course for the races at Baltimore announced by Commodore Eckel follows:

Sailboats.—Start from Baltimore Y. C. to buoy off North Point, thence to Black Buoy at White Rocks and return. Distance, 16 miles.

Motor Boats.—Start from Baltimore Y. C. to buoy off the Quarantine Station and return. Distance, 5 miles.

Some of the boats entered are:

Sail Boats.—Helen, Eleanor, Ojigwan, Nemoosha, Grace K., Zillacoa, Vingt Trois, Chenonden, Freya, Friar Luck and Ventura.

Motor Boats.—Amina, Priscilla, Iorolanthe, Ketroas and Marguerite II.

Atlantic Y. C.

GRAVESEND BAY racing sailors got what they wanted last Saturday in the way of wind. It was steady and brisk. The winners were: Gray Jacket, Joy, Bluebill, M. & F. II. and Mouse. The summary:

Sloops, Class Q—Start, 3:00—Course, 10.5 Miles.			
	Finish.	Elapsed.	
Grayjacket	4 45 24	1 45 24	
Alice	4 46 32	1 46 32	
Soya	4 46 54	1 46 54	
Spider	4 47 47	1 47 47	
Florence	4 48 27	1 48 27	
Handicap Class, 1st Div.—Start, 3:05—Course, 10.5 Miles.			
Joy	4 56 40	1 51 40	
La Cubana	5 06 01	2 01 01	
Corrected time: Joy, 1.44.58; La Cubana 1.48.44.			
Handicap Class, 2d Div.—Start, 3:05—Course, 9.6 Miles.

Myra	2 45 55	2 40 55

Jamaica Bay Y. C.

SEVEN boats of Jamaica Bay finished the second ocean race of the season off the red spar buoy that lies off Manhattan Beach. The blow brought reefs to all but Kismet. Curlew, owned by E. Wilson, won by nearly four minutes. The summary:

Sloops—Start, 12:13—Course, 14 Miles.		
	Finish.	Elapsed.
Curlew	2 43 52	2 30 52
Cornelia	2 47 49	2 34 49
Kismet	3 08 32	2 55 32
Kanawha	Did not finish.	
Cabin Catboats—Start, 12:18—Course, 14 Miles.		
Sinbad	3 17 42	2 59 42
Elvira	3 21 38	3 03 38
Madge	Did not finish.	

Columbia Y. C.

Fog and light air predominated about Thompson's Island during most of the regatta held by the Columbia Y. C. off City Point, Boston, last Saturday. The winners were: Class A, A. C. Jones' Nutmeg; Class B, O. L. Brambach's Sintram; Class C, W. L. Jefferson's Eleanor; Class D, catboats, H. W. Robbins' Clara; Class S, F. J. Stewart's Zoe; Class H, handicap, Ralph Packard's Sinbad; Class I, 18-footers, A. W. Finlay's Dorchen II.; Class X, dories, J. J. Blaney's Barbara; cabin power boats, J. J. Tobin's Gertrude; open power boats, L. R. Cogswell's Pegasus. The summary:

Class A.		
	Elapsed.	Corrected.

Gloucester Y. C.

GLoucester, July 13.—The Gloucester Y. C. held its weekly regatta to-day. In the first class Onda won by 11s.

Elizabeth and Osprey were the only two entries in the second class. Elizabeth finished on actual time 47s. ahead, but lost on allowance.

In the third class, Armoral won without her time allowance.

In the 18-foot class, the new boat Jane again beat Tid II.

The 15-footers sailed a shorter course, Oleta winning handily. The summary:

Class One.		
	Elapsed.	Corrected.
Onda	1 15 08	1 15 08
Nereid	1 17 45	1 15 19
Edjacko	1 17 48	1 15 22
Class Two.		
Osprey	1 20 31	1 19 11
Elizabeth	1 19 54	1 19 58
Class Three.		
Armoral	1 33 17	1 29 53
Sumarki	1 34 56	1 34 56
Weasel	1 35 00	1 35 00

Princess, S. H. Smith	Did not finish.

Boston Y. C.

MARBLEHEAD, July 13.—The Boston Y. C. held its regatta here this afternoon. The wind was light from the southeast. Italia won in Class 6. Irma beat Ellen by 2s. in the Sonder Class. Mirage II. in Class I had a walkover. In the Marblehead 17-footers, Searob won from Lolita by 26s. The Corinthian Y. C. 15-foot class went to Dingbat. The summary:

Elapsed.		Elapsed.	
Italia	1 32 01	Amoret	1 43 32
Timandra	1 33 09
Sonder Class.			
Irma	1 37 49	Ellen	1 37 51

Dingbat	1 54 01	Half Moon	2 05 48
Wee Three	2 04 06

Annisquam Y. C.

GLoucester, July 13.—The regatta of the Annisquam Y. C. was sailed this afternoon in a brisk southerly breeze with four starters. Reaching across to the Annisquam Y. C. buoy, Tabasco and Snipe drew away from the two others. In the rounding for the windward mark the boats made a short hitch to starboard with a long tack to port. Nisan began to pick up and when off Squam Light took the lead by a small margin from Tabasco, and after a nip and tuck race up the river was beaten by 13s. The summary:

Tabasco, Jr.	1 23 35
Nisan II.	1 23 48
Princess	1 27 40
Snipe	1 31 18

Nahant Dory Club.

NAHANT, July 13.—Brownie III., owned by S. E. Guild, won the leg in the championship races by beating out the second boat 40 seconds. Brownie was beautifully sailed by Mr. Guild's two sons. The summary:

Bug Boat Class.		Elapsed.
Brownie III.	1 24 00
Staying	1 24 40
Stinger	1 28 05
Bugaboo	1 28 19
Humbug	1 29 23
Wejvell	1 30 00
Midge,	1 31 22

Beverly Y. C.

BUZZARD'S BAY, July 13.—The finishes were close in two of the four classes in the sixth club race of the Beverly Y. C. off Wings Neck this afternoon. The race in the 21-foot class was a repetition of the previous wins this year. D. L. Whittemore's Foraminifer again came home in the lead, nearly a minute ahead of Skate and Saracen, which were only two seconds apart. In the sonder class there was a difference of only 34s. between the first and fourth boats. Seacoon finished first, five seconds ahead of Sally VIII. Miss Margaret Codman again brought Yalu over the line first in the Herreshoff 15-foot class, sailing a decidedly clever race. Miss Codman's boat crossed just a second ahead of Tinker, owned by Robert W. Emmons 3d. In the Crane 15-foot class, Lestris, which has been a consistent winner in previous races, was second, F. B. Austin's Pioneer getting in just ahead of Miss Priscilla Crane's boat. The summary:

21-foot Class.		Sonder Class.			
	Elapsed.		Elapsed.		
Foraminifer	1 37 20	Pollywog	1 40 32		
Skate	1 38 15	Macabaro	1 41 48		
Saracen	1 38 17	Phantom	1 44 02		
Selwonk	1 38 28	Terrapin	1 46 09		
Sonder Class.					
Seacoon	1 40 21	Joyette	1 40 55		
Sally VIII.	1 40 26	Fin	1 47 55		
Peg	1 40 28		
Herreshoff 15-foot Class.		Crane 15-foot Class.			
Yalu	1 16 41	Endeavor	1 18 55

Niobe <td>1 14 55</td> <th colspan="2">.....<td>.....</td> </th>		1 14 55 <td>.....</td>	

Bayside Y. C.

A PRETTY race was sailed here last Saturday. It was the annual women's race of Bayside birds. There were four starters, conditions being that a woman must handle the tiller in each boat, being allowed one crew. The Bayside Y. C. may be proud of its women sailors. They compare favorably with the best among the men. Skylark, owned by J. H. Shiras, was beautifully handled by his daughter, Miss Peggy. As a sailor of international fame, we are willing to credit Hank Haff, but as a small yacht skipper we must give Miss Shiras credit for the other half. Miss B. Willard sailed Curlew, Miss A. Nesbitt, sailed Teaser and Mrs. McGregor handled Loon, and no criticism may be made of any of them in their seamanship, but like men sailors only one can win. The summary:

Bayside Y. C. Annual Women's Race, Bird Class—Course, 2 1-6 Miles—Wind, Southeast.		Elapsed.
Skylark	0 38 00
Teaser	0 39 00
Loon	0 39 38
Curlew	0 40 30

Seawanhaka-Corinthian Y. C.

THE second race of the second series for the one-design class of the Seawanhaka-Corinthian Y. C. was sailed last Saturday off Centre Island. Hen, owned by George Nichols, won by 2m. 28s. The summary:

	Finish.	Elapsed.
Hen	4 56 02	1 36 02
Flicker	4 58 30	1 38 30
Grilse	5 00 02	1 40 02
Chipmunk	5 00 15	1 40 15
Iris	5 02 30	1 42 30
Imp	5 11 30	1 51 30
Moranto	5 06 10	1 46 10

Eastern Y. C. Cruise.

FOR the third successive year the cruise of the Eastern Y. C. fleet ended in a tow home, for there was no wind in Frenchman's Bay at Bar Harbor, Me., to-day. To-night prizes were awarded by Commodore Paine to the yachts making the best corrected time in the five divisions in the five races of the cruise. Winners were: First division, schooners, Irolita, owned and sailed by E. Walter Clark, of Philadelphia; second division schooners, Taormina, owned and sailed by William S. Eaton, of Boston; third division schooners, Vagrant, owned and sailed by Harold S. Vanderbilt, of New York. First division sloops, Avenger, owned and sailed by Harry S. Maxwell, of New York; second division sloops, Dorello, owned and sailed by W. B. Henry, of Philadelphia, with the fleet by invitation. The dispute over a foul between Irolita and Elena at the start of Wednesday's race off Swan's Island was settled, the committee finding Elena in error and upheld the protest of Irolita.

Hingham Y. C.

HINGHAM, July 13.—In a southwest breeze over an 8-mile course, six of the one-design 15-footers belonging to members of the Hingham Y. C., held a race off Crow Point this afternoon.

It was a struggle for first place between Polly Wog and Mischief, with the former winning by 20s. The summary:

Elapsed.		Elapsed.	
Polly Wog	2 45 00	Pirate	2 48 10
Mischief	2 45 20	Possum	2 49 00
Usonia II.	2 47 00	Marwinder	2 49 30

Quincy Y. C.

QUINCY, July 13.—The Quincy Y. C. held a race for boats in Class B this afternoon off its club house at Hough's Neck. The summary:

	Elapsed.	Corrected.
Yarita	1 02 28	1 01 36
Plaris	1 06 57	1 05 58
Alpha	1 09 42	1 08 27
Pioneer	1 14 47	1 13 52
Rutland	1 19 30	1 18 35

Duxbury Y. C.

DUXBURY, July 13.—The Duxbury Y. C. sailed its weekly race to-day. L. B. Goodspeed's Again won very easily. The summary:

Elapsed.		Elapsed.	
Again	2 17 25	Aspinquid II.	2 33 52
Croaton	2 24 14		

Toledo Y. C.

LAST Saturday, Old Sam, Commodore Richardson's boat, won the second heat for the Taft cup in the fourth annual race over the Maumee Bay course. Bones, Commodore Walter F. Brown's yacht, was second, and Ethel, owned by Dr. F. A. Aldrich, of the Detroit Y. C., was third.

Stamford Y. C.

THE second round of the tournament race for Stamford Y. C. one-design boats was sailed last Saturday. Snapper sailed against Kelpie. Killie sailed against Curlew and Kelpie and Curlew won.

Sales and Charters.

THE Hollis Burgess Yacht Agency has sold the 35-foot waterline yawl Syren, owned by Russell Gardner, of the Cottage Park Y. C., Winthrop, Mass., to Judge Stanley M. Bolster, of Boston; and the 40-foot motor boat La Reine, owned by E. A. Studley, of Portland, Me., to Herbert M. Plimpton, of Norwood, Mass.

The same agency has chartered the 55-foot motor boat Totem, owned by Capt. Kimball, of Boston, to William Cameron Forbes, Governor of the Philippine Islands, who will use her at Nashawena Island, Buzzard's Bay, during his vacation there this summer.

Motor Boating

Rockland Light Race.

TEN motor boats finished the fifty-mile race of the Hudson River Motor Boat Club to Rockland Light and return before sundown last Sunday night. The winner of the cabin cruiser class, sent away at 10:30 A. M., was S. H. Soeldner's Alfred S., with an allowance of 2h. 51s. from the scratch boat, Mesaba. The elapsed time of Alfred S. was 5h. 56m., and her corrected time 3h. 25m. 9s. She defeated the second boat, C. R. Butler's Spindrift, by 53m. 16s. H. B. Freeman's Marinette was third and W. Israel's Sylvemort fourth. Gray Hare, belonging to A. Haas, was the winner in the open boat class. She won from Annadora by 1h. 8m. 32s. The summary:

Cabin Cruisers—Start, 10:30—Course, 50 Miles.		
	Finish.	Elapsed.
Alfred S.	3 56 00	5 25 00
Spindrift	2 58 06	4 28 06
Marinette	3 31 55	5 01 55
Sylvemort	4 50 51	6 20 51
Mesaba	4 20 22	5 50 22
Lillian II.	5 06 06	6 36 06
Twin Kid	6 12 53	7 42 53

Corrected times: Alfred S., 3.25.09; Spindrift, 4.18.25; Marinette, 4.38.57; Sylvemort, 4.54.46; Mesaba, 5.20.22; Lillian II., 6.19.44; Twin Kid, 6.32.14.

Open Boats—Start, 10:20—Course, 50 Miles		
Gray Hare	2 12 13	3 52 13
Annadora	3 53 53	3 33 53
Roxanna	2 51 23	4 31 23

Corrected times: Gray Hare, 2.36.36; Annadora, 3.45.08; Roxana, 4.31.23.

The Regatta Committee timed the finishes from the club house at West 151st street.

Motor Boat off for Europe.

THE 35-foot motor boat Detroit, owned by Commodore W. E. Scripps, of Detroit Y. C., and commanded by Captain Thomas Fleming Day, started at noon last Sunday from New Rochelle Harbor on the second leg of her passage from Detroit to St. Petersburg.

Her next port will be Vineyard Haven, where, after a final supply of water is taken on board, the boat will go direct to Queenstown, thence up the English Channel, and through the North and Baltic seas to St. Petersburg.

Charles C. Earle, Jr., of Boston, will assist Captain Day in the navigation of the boat. The engineers are Walter Moreton and W. Newstead. Detroit is equipped with a two-cylinder engine of 16 horsepower, that drives her seven knots an hour.

She carries 1,200 gallons of gasolene in seven steel tanks, and provisions for ninety days. Each man will stand a watch of four hours, and no smoking will be allowed on board. A stout dinghy, that will carry five men and provisions, has been provided and all other legal marine requirements have been complied with.

Detroit is modeled like a lifeboat, with double ends and bilge keels. She has a beam of ten feet, and she draws five feet of water on a displacement of fourteen tons. The trip to Queenstown will take about twenty days.

The Chicago Power Boat Races.

FORMAL entries for twenty hydroplanes and five displacement boats have been received to date, July 11, by the Associated Yacht and Power Boat Clubs of America, the organization under whose auspices the American championship power boat races will be held in Chicago, Aug. 10-17. As the entry list does not close until a few days before the race it is expected this number will be nearly doubled, thus making the Chicago event the largest ever held in the history of the power boat game.

The races in Chicago will be the most important from the standpoint of prizes given, boats entered and features in connection with water sports ever held. Not only will the week be a great one for the powerboat men, but it will be one of the greatest importance for the windjammer, as the International yacht races between Canada and the United States will be held at the same time.

A third big feature will be the Lipton cup yacht races, while other big numbers on the program will be the exhibitions by the naval reserve fleet which will be the first ever held on fresh water. According to present plans, this fleet of eight warships and six other Government boats will arrive off Chicago Thursday afternoon, Aug. 15. The fleet will anchor inside the outer breakwater, and a fleet of hydroplanes will be sent out to see whether it is possible for the speediest craft afloat to get close enough to warships to damage them with torpedoes. This will be the first test ever given the hydroplane from the naval standpoint and upon the showing made by the speedy little craft will depend whether the Government will become interested in this type of speed boat.

There are so many big aquatic features in connection with the naval pageant and water carnival that they can only be mentioned. From two o'clock Saturday afternoon, Aug. 10, when the first race for the yachting supremacy of the Great Lakes begins, until Saturday night, Aug. 17, when the last rocket of the big fireworks exhibition is sent hissing into the air, the week will be so full of events there will not be a dull moment in the whole program.

At least two thousand motor boats from the various rivers of the Great North American central plain will wind up their annual cruises in Chicago. Especial preparations are being made to entertain the visiting yacht and power boatmen in the way of securing accommodations for them and giving them all the little courtesies possible in return for their attendance on th magnificent carnival.

The actual entries so far received are as follows: Disturber II. (re-named Chicago, Disturber III., Disturber IV., Baby Reliance III., Spitzbub, Leading Lady II., Peter Pan V., Baby VI. (the English hydroplane), Ankle Deep, Restless II., Minnow, Saracen, Tuttle, Wildcat I., Loew Victor II., Gretchen, Intruder II. Eph, Pee Vee Ho, and the Courier. These are all hydroplanes. Displacement boats entered so far are the Running Water and Audaciter. Other entries which have been promised are the Wigwam II. from Astoria, Ore.; Sea Rabbit, from the Cambridge Y. C., Cambridge, Md., and a German entry, which has not as yet been named.

The United States Government, Governor Deneen, of the State of Illinois, and Mayor Harrison, of Chicago, as well as the Association of Commerce, of Chicago, and many other civic bodies have given the pageant their endorsement and are doing everything in their power to help the cause of the yachting and power boating game.

Canoeing

Eastern Division Meet.

THE annual meet of the Eastern Division, A. C. A., was held at Camp De Costa, Long Pond, Lakeville, Mass., June 15, 16 and 17. The campsite was located on the western shore of the pond on a wooded ridge overlooking the course for the races. The first day of camp, Saturday, was given over to pitching of camps and greeting of old friends of former meets. Saturday night all gathered in the big tent for a Dutch supper followed by a camp-fire with speeches by members of all clubs present and a general good time.

Sunday, although cool and the water rough, many crews were out.

On Monday the big event, the war canoe race, had five entries, which is more than any previous A. C. A. race has had. Crescent C. C., Lawrence C. C., Cocheco C. C., Medford B. C. and Dedham B. C. were represented. The results follow:

War Canoe—First, Dedham B. C.; second, Crescent C. C.; third, Cocheco C. C.; fourth, Lawrence C. C.; fifth, Medford B. C.

Double Blade, Single—First, Riess, Swas-
(Continued on page 94.)

TRAP SHOOTING

If you want your shoot to be announced here send a notice like the following:

Fixtures.

Aug. 13-14.—Portland (Me.) G. C. Individual Championship on second day. S. Dimick, Sec'y.
Sept. 12-13.—Cincinnati (O.) G. C. Arthur Gambell, Supt.

REGISTERED TOURNAMENTS.

July 20.—Danbury, Conn.—Western Connecticut Trapshooters' League tournament, under the auspices of the Pahquioque G. C. E. H. Bailey, Sec'y.
July 21-22.—Bellingham (Wash.) G. C. O. H. Joy, Sec.
July 22.—Sheridan (Wyo.) G. C. J. H. Bradford, Sec'y.
July 22-23.—Crookston (Minn.) G. C. W. E. Rowe, Pres.
July 22-25.—Berterton, Md.—Berterton G. C. James R. Malone, Sec'y.
July 23.—Marion (O.) G. C. D. A. Orr, Sec'y.
July 23-24.—Paragould (Ark.) G. C. C. W. Stedman, Sec'y.
July 24.—Milton (Pa.) Rod and Gun Club. S. H. Kock, Sec'y.

1913.

Jan. 22-25.—Pinehurst (N. C.) Country Club. Leonard Tufts, Pres.

DRIVERS AND TWISTERS.

It is encouraging to find our efforts to interest canoe clubs in trapshooting is beginning to be rewarded. To-day I have a letter from T. A. Saylor, manager Saginaw Canoe Club, Saginaw, Mich., that they will hold a registered tournament Sept. 27.

The eighth annual tournament of the New England Military Rifle Association, which was scheduled to take place during the fourth week in August, has been changed to the third week, the meeting opening Aug. 19. This change was made necessary by the National Rifle Association matches being fixed for the week of Aug. 26 to 31.

Elmer E. Shaner writes us: "In accordance with a resolution adopted by the Interstate Association, at its annual meeting in 1910, I beg to advise you that Mr. C. D. Henline, Bradford, Pa., was the winner of the seventh Eastern Handicap, shot at Bradford, Pa., July 11. Mr. Henline used a Baker gun, Winchester shells, and Du Pont powder."

The Danville (Ill.) Rod and Gun Club now owns its own home. A tract of eleven acres with buildings which the club has been renting for some time, was purchased last week, and the members propose to greatly improve the grounds and buildings. A campaign for new members is also to be inaugurated and a successful season is anticipated.

The Big Game Rifle, Rod and Gun Club, Wheeling, W. Va., extends a cordial invitation to attend its fall merchandise and cash prize tournament, Thursday, Aug. 29. There will be plenty of prizes. This is a registered tournament. Professionals shoot for targets only. Price of targets, 2 cents, included in all entrances. Lunch will be served on the grounds. Shooting will begin at 9 A. M. sharp. Take the West Alexander car between Eleventh and Sixteenth streets, on Market. Shells and guns shipped, express prepaid, to H. G. Friedrichs Sporting Goods Store, 1523 Market street, will be delivered at the grounds free of charge. Interstate Association rules will govern. This shoot will be held under the Squier money-back system. For any further information, write to H. G. Friedrichs, Secretary. W. G. BEECROFT.

Red Deer Gun Club.

RED DEER, Alta, Canada, July 1.—The registered tournament held here to-day was interfered with seriously by rain. Fifty-four shooters tried to be happy, and although their dispositions were good, the same may not be said of their scores. R. G. Robinson, of Calgary, was high average, with Davis, of Red Deer, second. Morris, Bishop and Davis tied for championship, Davis winning out on shoot-off. Calgary won team shoot with 64 out of 75. Ponoka second with 63.

Canandaigua Sportsmen's Club.

SIXTEEN shooters took part in the good sport at the traps of the Canandaigua Sportsmen's Club on July 11. Mason won first, the silver spoon in the open events at 50 targets, scoring 46, which, with a handicap of 7, gave him a perfect score. Sterling was second with 40 killed and 4 handicap. Barringer changed guns after the second string, and with Club Champion Mason's pump, broke 27, and with a handicap of 15, landed in third place. It was one of the best proofs of "fit" of a gun the local shooters have witnessed, as Barringer scored 20 out of 25 in the merchandise event, taking second place to Van Wormer, who broke 23 with a similar gun. The scores:

B. H. T.		B. H. T.	
Mason	6 7 50	Ellis	28 .. 23
Sterling	40 4 44	Bushnell	26 .. 26
Barringer	27 15 42	Reed	23 .. 23
Eiselne	32 8 40	Gilligan	18 .. 18
Kibbe	32 6 38	Brink	18 .. 18
Soule	31 4 38	Miles	13 .. 13
Van Wormer	28 8 33	Sanford	10 .. 10
Thompson	32 .. 32	Chesebro	6 .. 6

W. J. KIBBE, Sec'y.

Sikeston Gun Club.

Sikeston, Mo., July 12.—Out of 50 clay pigeons, the following scores were made to-day: Harry Smith 47, Geo. Faiszt 43, W. H. Tanner 43, Clem Marshall 43, Dan McCoy 39, C. H. Yanson 37, Lyman Bowman 35, J. E. Dover 27. W. M. H. TANNER, Sec'y.

BEAT THE WORLD IN OLYMPIC GAMES

American Experts and *Remington-UMC* Arms and Ammunition set a New Pace in Great Stockholm Meet

Individual Clay Bird Championship—Won by J. R. Graham, shooting a *Remington-UMC* Pump Gun and *Remington-UMC* Arrow Steel Lined Shells, score 96 ex 100.

Team Clay Bird Championship—Five high men in the victorious American Team shot *Remington-UMC* Arrow Steel Lined Shells.

Revolver and Pistol Championship—A. P. Lane, shooting *Remington-UMC* Metallic Cartridges, made the best individual score and a world's record in the 50 metre team competition, scoring 509 ex 600; won first in the team competition at 30 metres, scoring 292 ex 300, and won the individual competition at 30 metres, scoring 287 ex 300.

Paul Palen, also shooting *Remington-UMC* Metallic Cartridges, was second in the 30 metre team competition.

Running Deer Championship—Pitted against a formidable field in which the nations of the world were represented, the American Team, shooting *Remington-UMC* rifles and ammunition, closely contested for first honors, losing by only 8 points. Sweden was first, scoring 150; America second, scoring 142; and Finland third, scoring 123.

The Olympic Trap Shooting Team chose Remington-UMC Arrow Steel Lined Shells because of their remarkable trap record of 15 out of 18 great national handicaps.

There is strong additional proof here of the supremacy of
Remington-UMC - the perfect shooting combination.

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO., 299-301 Broadway, New York, N. Y.

Saratoga Gun Club.

THE Fourth of July shoot of the Saratoga Gun Club was certainly a "hot one," as far as the weather is concerned. With the mercury at 102, fifteen shooters blazed away and perspired and then kicked at the scores. The torrid weather had an effect on the targets that made a break difficult, and in the "pickups" it was not uncommon to find targets with from two to ten perforations in them which failed to break. Harry Levingston, one of our best shots, and also one of the best in the State, was decidedly out of form, and coupled with the weather conditions, showed up badly. Levingston's last performance was in the 90 per cent. class, and his score of 34 out of 45 on the Fourth will give the reader an impression of how hot weather affects trapshooters:

	Shot at.	Hdep.	Broke.	Total.
Sesselman	45	8	24	32
Levingston	45	0	35	35
Corey	45	0	30	30
Kearney	45	10	22	32
Downs	35	3	25	28
Hammond	35	12	15	24
Shevlin	20	1	13	14
Chamberlin	20	2	15	17
Futnam	20	2	12	14
Wentworth	10	2	6	8

Dr. Downs leads for the Dupont trophy, and also for the Levingston cup. Corey and Kearney are second and third respectively.
J. M. COREY, Sec'y.

Sunbury-Selinsgrove Gun Club.

SUNBURY, Pa., July 11.—At the regular weekly shoot of the Sunbury-Selinsgrove Gun Club to-day the rain kept the attendance down, but some very good scores were made. Teats, with a score of 95 out of 100, was high gun. The spoon in Class A was won by Schoffstall, with 25 straight. In Class C the spoon was won by Moeschlin, with 15 out of 25. For the cup event, Schoffstall again went 25 straight, thereby winning a leg on it. No. 3 was the spoon event; No. 4, the cup event. Scores:

	1	2	3	4		1	2	3	4
Howell	21	24	21	22	Schoffstall	22	20	25	25
Hartman	21	21	21	24	Moeschlin	12	11	15	..
Teats	24	23	24	22	J. W. SCHOFFSTALL.				

Baltimore Rod and Gun Club.

BALTIMORE, Md., July 8.—As we have recently organized a rod and gun club, note your invitation for publication of club shoots, we send you the following report of our "shoot" on the Fourth of July:
At Highland Electric Park, the home of the Rod and Gun Club, on July 4, R. H. Butler won in Class A; W. T. Turner in Class B; and W. E. Bowers in Class C. H. W. Williams, Augustus Gross, Henry Brown, Frederick Leon, Dr. R. G. Baker and Luther Tucker qualified for the 100-bird race for Aug. 30.
WM. MURRAY, Sec'y.

Analostan Tournament.

FIRST annual registered tournament of the Analostan Gun Club, of Washington, D. C., will be held July 27. Program, ten 15-target events, entrance \$1.40 each event, optional sweeps, entrance \$1. Squier money-back system. Division of moneys in regular program, Rose system, ratio points 5, 3, 2, 1. To be eligible for the Squier money-back system a contestant must compete in all regular program events. Any other events conducted in connection with the tournament are separate from the regular program, and it is optional with the contestant whether or not he makes entry for them. The Squier money-back system does not apply to any event or events other than the regular program.

The shoot is under the auspices of the Interstate Association, which contributed \$50 to apply on the money-back system, originated by Luther J. Squier. Manufacturers' agents, paid representatives, etc., may shoot in the various events for targets only. Those who desire may shoot for targets only. The shoot will start promptly at 10 A. M. Interstate rules govern all events. To reach the grounds, take the H street cars and get off at the Benning Power Station, just across the Eastern Branch. The officers of the Analostan Gun Club are: C. S. Wilson, President; Dr. W. D. Monroe, Vice-President; Dr. A. B. Stine, Treasurer; Miles Taylor, Secretary.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

Arkansas State Sportsmen's Association.

LITTLE ROCK, Ark., July 12.—The twenty-second annual tournament of the Arkansas State Sportsmen's Association, which was held here July 9, 10 and 11, was favored with good weather and a fair attendance, so that the entries for the three days ran very uniform. As has been the custom of this organization, a very attractive program was offered and in addition to the various State trophies for which only members of the association were eligible there was \$700 in cash added.

The program of the first day consisted of five 20-target events, Rose-Jack Rabbit system, with \$20 added in each. Then there were two 50-target events with a purse of \$25, divided among the six high guns. The first of these constituted the individual State championship, and this honor was won by J. P. Wright, of Camden, with 47. B. Vinson and J. W. Alston, of Little Rock, and C. C. Handley, of Pine Bluff, and Dr. A. U. Williams of Hot Springs, all finished with 46.

Among the non-resident shooters who were eligible to compete for the purse, C. B. Eaton scored 49, Weaver Wilson 48, and Pottinger 47.

The second 50 target event was the handicap, and the same conditions applied to this. E. B. McKain, of Hot Springs, shooting from the 16yd. mark, scored 48 and carried off the trophy. Harvey Dixon with 49 from the 22yd. mark, won first money. Eaton, shooting from the same mark, took second money on 48. A. L. Morgan, B. L. Williams and R. D. Keene scored 44. The high score in the professional class was 46 by Woolfolk Henderson, from 22yds.

The double-target championship at 25 pair was the closing event, and this was won by Hiram Whittington, of Hot Springs, with 39, this being high over all.

Dell Gross was high professional with 149, having a run of 96 straight. Henderson and Gibbs were second with 145.

Eaton and Pottinger tied for first in the amateur class with 142, and Bart Lewis was second with 140.

On the second day, Bart Lewis enjoyed the distinction of leading the entire field, hired men included, with 145. Eaton was second with 144, and then came Pottinger and Gibbs with 143, followed by Henderson and Gross with 142.

The team race was won by the Camden Club, with 73 out of 75, individual scores being: Morgan 25, Myar 25, Wright 23. The Pine Bluff team, consisting of C. C. Handley, E. J. Voss and P. W. Scruggs, finished second with 69; Little Rock team No. 1, composed of George Clements, J. W. Alston and J. G. Ebbets, finished third with 68.

There were also three 20-target sweeps on the program, Rose-Jack Rabbit events, with \$25 added. Pottinger cleaned up the 60 targets in these events, and Bart Lewis, Myar, Mermod and Gibbs dropped but one.

The third day was a repetition of the second day, and once more Bart Lewis showed his class by finishing with 148, leading the entire field. Henderson and Gibbs were second with 146, and Dixon, Pottinger and Borden followed with 145.

The two-man team championship was won by Pine Bluff on a perfect score, both C. C. Handley and E. J. Voss scoring 25 straight. J. W. Alston and George Clements, Little Rock team No. 1, with 49, were in the running, Clements dropping the lone target. Little Rock team No. 2, composed of Clements, Jr., and Baldi Vinson, showed good class by scoring 48, each dropping one.

The Squier money-back fund aggregated \$381.50, and the losses amounted to \$69.03; this left \$312.48, which was divided into twenty-two moncys, paying as follows: Bart Lewis, \$43.68; C. B. Eaton and H. B. Pottinger, \$37.44 each; H. Dixon, \$28.08; J. W. Wilson, \$24.96; Fremont Houston and J. P. Wright, \$20.28; C. C. Handley, \$15.60; A. L. Morgan and H. N. Bellinger, \$14.04 each; J. W. Alston, Guy Short, and J. A. Howlett, \$9.36 each; R. R. Stockburger, \$6.25; J. W. Myar, E. J. Voss, B. L. Laden, Dixon McCloy, J. N. Walker and A. W. Scruggs, \$3.12 each; George Clements, and R. D. Keene, \$1.56 each.

The annual meeting of the Association was held in the banquet hall of the Capital Hotel, Tuesday night, July 9. Hot Springs was awarded the next meeting and tournament. The following officers were elected: W. W. Little, Hot Springs, President; J. P. Wright, Camden, Vice-President; A. L. Morgan, Camden, Treasurer (re-elected), and R. L. Bennett, Little Rock, Secretary. Baldi Vinson, George Clements and Paul R. Litzke were appointed a committee to draft a game bill, with a view to having the next Legislature enact it.

The scores in the Squier money-back follow:

	1st Day.	2d Day.		1st Day.	2d Day.
C Eaton	144	144	B L Ladew	130	130
J W Myar	128	133	G Puterbaugh	140	113
J P Wright	137	139	R Stockburger	123	141
A L Morgan	135	137	W W Little	131	122

J K Lewis	133	127	D D Gross	142	140
H J Donnelly	127	139	W Henderson	142	146
H D Gibbs	143	146	R L Bennett	123	138

Penetration Pads.

George Puterbaugh, of Fayetteville, who had not shot a target in two years, showed remarkable form on the second day, scoring 140 in the Squier money-back event.

Dixon McCloy, of Monticello, the only juvenile par-

ticipant, made everyone sit up and take notice on the last day, by going through the money-back event with a score of 140, which was close to the top. This youngster plainly possesses the nerve, and with a little more experience will be a factor in the game.

R. R. Stockburger, hailing from Fayetteville, was a novice at the game, and this was his first tournament. Lack of experience was very evident at first, but gradually he got his bearing, and on the last day scored 141 out of 150, which was fifth in the producers' class.

Henderson and Gross (hired men) each cleaned up 50 straight in the championship event on the first day.

Heavy-weight Alec. Mermod was taken ill on the last day, and was unable to finish the program, much to the regret of every one present.

Henderson and Gibbs had a great race for hired men's honors, all during the tournament it was nip-and-tuck, but Gibbs finished one to the good.

That steady, consistent shooter Bart Lewis, of Auburn, Ill., again showed his class by running away from the entire field, winning high general average.

B. L. Laden and Guy Short, from Idabel, Okla. are a game pair, and though new to the game, are improving steadily.

H. A. Bellinger, the only Memphis representative present, though not shooting up to his usual form, showed himself the same clever fellow.

Dr. A. U. Williams, of Hot Springs, was one of the few who were present at the organization of the Association twenty-one years ago. In addition to the Doctor, the family was also represented by his son Burkett, and if Father Time should force the Doctor to retire, the family will still be in the game.

Reliable Pete Wright, of Camden, carried off the individual championship by scoring 47. Alston looked like a winner with 39 out of 40, but lost three in his final 10, finishing with 46, along with Baldi Vinson and Dr. Williams.

Pottinger cleaned up the final 60 targets in the three 20-target, Rose-Jack Rabbit sweeps, on the second day. All others failed to duplicate this.

A. S. Rutland, of Little Rock, cashier, and J. R. Hinkle, the well-known trade representative, his assistant, were the "target" bearers. You know it is a pleasant relief to take a kick at the cashier when one failed to negotiate the expected number on the firing line.

Alston's shooting was a disappointment to his many friends. Prior to the tournament he had averaged over 97 per cent. for more than 400 shots, but for some reason he could not strike his stride.

Popular Dell Gross did himself proud on the first day, with his fine score of 149 out of 150. His shooting throughout the entire tournament was very consistent.

Harvey Dixon arrived late on the first day, owing to a delayed train, and missed all of the sweeps, but showed his usual class, and his score of 49 out of 50 in the handicap from the 22yd. mark, was easily the feature of the day.

Walter Little is the gamest man of the Hot Springs contingent, and stayed through the entire shoot, not missing an event. The name is somewhat misleading, as Walter is of rotund physique, and his avoirdupois will approximate close to 300lbs.

Mrs. Hiram Whittington, who accompanied her husband, experienced keen disappointment at Hiram's poor showing in the individual championship contest, especially after the fine form he had shown earlier in the day. The handicap event also showed Hiram in the also-rans, but realizing that life would be a burden unless he captured some of the jewelry, he came through in good style and captured the double-target championship when it looked like a forlorn hope.

The Camden trio—Morgan, Myar and Wright—demonstrated their class, winning the three-man team championship with the fine total of 73, Wright shooting first, skipped two, but Myar and Morgan cleaned up in splendid style.

The two-man team championship was a battle royal and was won by Handley and Voss on a perfect score of 50 straight. Handley finished early, and then put it up to his Dutch running mate to duplicate his performance, and this he did impressively.

Alston came into his own in the two-man race, making a perfect score, but his running mate, George Clements, dropped one, so that this pair finished second with 49, which will win most of such events.

Weaver Wilson, of Parsons, Kans., was a long ways from home and shot as though he needed the money, doing consistent work throughout, and landing fifth average money in the Squier money-back events. His improvement has been remarkable, as last year he was eligible to compete in Elliott's Simon-pure shoot.

Bart Lewis, Dixon and Wilson shot the three-man team race to fill in. Bart slipped one, and with the Camden team already out with 73, there was little margin for Dixon and Weaver to beat their score, but both went at it like sawing wood and cleaned up the entire 50, so their total was 74; but of course, being non-residents, they were ineligible to compete for the trophies.

After a very poor start on the third day, in the first event, Borden got going and made the magnificent run of 186 straight, finally dropping a target in the last event. However, his loss of five at the start kept him from leading the field.

E. B. McKain, of Hot Springs, who won the handicap with the fine score of 48 from the 16yd. mark, is new at the game, and this was his first tournament. The emblem that goes with the honor is by far the handsomest of all those contested for, having been purchased at the birth of the organization twenty-one years ago. There is no evidence of wear, and the beautiful diamond has doubled in value since then.

The trade was represented by H. D. Gibbs, J. R. Hinkle, C. E. Gardner, H. J. Borden, D. D. Gross, H. J. Donnelly, O. D. Mermod, J. K. Lewis, Woolfolk Henderson, R. L. Bennett and Paul R. Litzke.

Good-natured Willis McCracken, from Success, was on hand the first day, shooting part of the events after arriving late, but evaporated that night, much to the disappointment of his many friends.

That enthusiastic pair from De Queen (Tobin and Barber) shot the program through and left well satisfied, with the expressed intentions of coming again.

Clements, Sr., and Clemens, Jr., each shot on the

Little Rock team in the two-man team race, and the father had nothing on the boy, who matched the senior's 24 score.

Both Voss and Alston had previously won the individual trophy with a score of 49 out of 50, but neither could repeat, though both were factors until the finish.

Hot Springs captured two of the trophies, the handicap and double championship medals. Camden did likewise by winning the three-man team and the individual trophy. Pine Bluff carried off the two-man team trophy on a perfect score.

PAUL R. LITZKE.

Du Pont Gun Club.

WILMINGTON, Del., July 13.—Thirty-three shooters took a gun to the Du Pont Gun Club's grounds today. The program was attractive enough to reward those who went out to the grounds. First the match between J. H. Minnick, of this city, and Alden B. Richardson, of Dover, for the Class A 1911 challenge trophy. Minnick won this after a close and interesting match. Then there was the competition for the final ownership of the 1911 Class B cup. This also went to Minnick. He captured also the prize given to the local amateur who made highest score on the program which was shot when the All-New England and All-Delaware teams shot their race two weeks ago, when he tied with Richardson on 169 out of 180.

Fourteen teams of two men each, handicap allowance of "misses as breaks," competed in the first shoot for the Eugene E. du Pont team trophies. Six teams scored "highest possibles" of 50 each, and the ties will have to be either shot off or decided by lot, according as the management of the club thinks best. Three very handsome cups are the prizes donated by Mr. Du Pont for this race.

Among the other happenings of the afternoon were two matches for 1912 class cups. One was for the class C cup, held by L. L. Jarrell. This was won by Dr. Patterson, who scored 41 out of 50, to Jarrell's 39. The other match was for the 1912 Class B cup held by Victor du Pont. He was challenged for the cup by D. Lindsay and resigned ownership when he had to acknowledge defeat by the score of 42 out of 50 to 41.

In the match between Minnick and Richardson the first string of targets resulted in 25 to 24 in favor of Richardson, Minnick "dusting" his second target but not scoring a break. The second string ran along without a skip until the 39th round, when Richardson missed one and made the score all square. In the 42d round he put Minnick one ahead by dropping another, but the race ended a tie, when Minnick "dusted" once more a target in the 45th round. Both men finished with 48 out of 50.

The shoot for final ownership of the 1911 Class B trophy was close. The ten men eligible to compete for the cup were handicapped by distance, and Minnick, with H. P. Carlon, was placed at scratch (2lyds.) The scores, each man shooting at 50 targets, follow:

J H Minnick	21..... 44	Dr S Steele	19..... 41
W M Hammond	20..... 43	Victor du Pont	20..... 39
W G Wood	20..... 42	T W Matthewson	18..... 38
D Dougherty	19..... 42	N K Smith	19..... 35
H P Carlon	21..... 41	Thorpe Martin	19..... 32

In the Eugene E. du Pont team races the handicap of "misses as breaks" was figured on the club's classification of its members. Class A men received an allowance of 1; Class B, 3; Class C, 5, and Class D, 7 misses as breaks. No two men of any one class could shoot together as team mates. It is also provided that no two men can shoot together more than twice in the series of twelve shoots for the three cups, and cannot shoot together twice in succession. This event is a novelty and an entry list of fourteen teams must be considered as very satisfactory. As stated above, six of the fourteen teams scored highest possible, no team of course being allowed to score more than 50 for the team, no matter how many they broke with their allowance. The teams who tied, together with their allowance, were as follows:

A. B. Richardson (1) and H. P. Carlon (3), W. Edmanson (3) and J. A. McMullen (7), J. B. McHugh (1) and D. Lindsay (3), Victor du Pont (3) and J. W. Anderson, Jr. (5), Dr. Patterson (5) and W. G. Wood (1), T. W. Keithley (3) and C. D. Prickett (5).

The best scores made in the team races, exclusive of handicaps, were: Richardson, 25; F. P. Ewing, J. B. McHugh, Dr. Patterson and W. G. Wood, 24; H. P. Carlon, D. Lindsay, T. W. Keithley and C. D. Prickett, 23; Thorpe Martin, W. Edmanson, Victor du Pont and J. H. Minnick, 22.

Practice scores were shot during the afternoon by thirty-three shooters, Edward Banks shooting at 100 targets and breaking 99, with a straight run of 97. The practice scores were as follows, each man shooting at 25 targets:

Edward Banks, 25; J. H. Minnick, L. D. Willis (the old Wilmingtonian), W. G. Wood and Dr. Patterson, 24; A. B. Richardson, D. Dougherty, E. A. W. Everitt, T. W. Keithley, W. B. Smith, Jr., and D. Lindsay, 23; W. Edmanson, S. J. Newman, L. C. Lyon, H. P. Carlon, V du Pont, C. D. Prickett, and Stanley Tuchten, 22; J. B. McHugh, W. M. Armisted and J. A. McMullen, 21; J. W. Anderson, Jr., and Frank Matthewson, 20; F. P. Ewing, T. Martin, W. M. Hammond, L. L. Jarrell and Dr. Kracher, 19; R. S. Robinson, 18; A. J. Curley and N. K. Smith, 17; J. A. Stadelman, 15, and S. G. David, 12.

JAKE.

Fulton Gun Club.

FULTON, N. Y., July 11.—Eight trappers shot away this afternoon with R. A. Moore, chief cracksmen, he returning 45 to the soil, fragmented irreparably, out of 50 that flew toward the danger limit, 50yds. away. E. E. Hope allowed to escape only 5 of 25 pulled for him.

	Shot at.	Broke		Shot at.	Broke
R A Moore	50	45	C Doerreis	95	68
E E Hope	50	20	A Briglieb	45	38
G T Yancey	50	38	Mit Neal	50	28
F A Gengrich	50	37	John Kester	25	14

WINCHESTER

“Leader” Loaded Shells

W O N

THE EASTERN HANDICAP

C. D. HENLINE, of Bradford, Pa., winner, score 96 x 100 and 19 x 20

The winning of this, one of the leading events of the trapshooting year, with “Leader” Loaded Shells, was a foregone conclusion, as their perfect shooting had outstripped all competition and left C. D. Henline, F. Korner and W. Wallis, who were shooting these shells, all tied on 96 x 100. Mr. Henline won the shoot-off, scoring 19 x 20 from the 20-yard mark. F. Korner, who also shot from the 20-yard mark, used a Winchester shotgun as well.

“Leader” Loaded Shells

W O N

High Average Over All

Amateur and Professional

Lester German and an Illinois amateur won respectively Professional and Amateur Averages for all targets trapped, both shooting Winchester “Leader” Loaded Shells.

“Leader” Loaded Shells

W O N

Double Target Average

Amateur and Professional

Allen Heil won Amateur Average on “doubles,” scoring 90 x 100, which gave him the Holly Trophy. Lester German won Professional Average on “doubles,” scoring 93 x 100. Both shot “Leader” Loaded Shells.

As will be noticed, Winchester Loaded Shells ACTUALLY WON all the events of the tournament making a clean sweep and proving themselves absolutely superior to all others.

A RECORD SURPASSING ALL OTHERS

Winchester Loaded Shells are the only ones that ever held at one time all the World’s Records at Inanimate Targets. They hold the record for the World’s Longest Run of 565 straight. They tied the winner of the recent PRELIMINARY HANDICAP and GRAND AMERICAN HANDICAP, and won the PROFESSIONAL CHAMPIONSHIP and PROFESSIONAL CHAMPIONSHIP AT DOUBLES.

E. C. CHALLENGE CUP AGAIN WON BY A RECORD SCORE

Peters

WITH

"steel where steel belongs" LOADED SHELLS

In a match at the Cincinnati Gun Club, July 4, H. D. Freeman (Challenger) won this famous trophy from C. A. Young (Holder) by a score of 189 to 172. This score of 189 is five targets better than that by which Mr. Young won the cup May 14, 1912 (also with PETERS Shells), and ten targets in excess of the best previous score with other makes of shells. The results of the match of July 4, in detail, are as follows:

	Singles	Expert Rules	Doubles	Total
FREEMAN - - -	98	46	45	189
YOUNG - - -	85	44	43	172

Here are some more winnings, adding to the already overwhelming weight of evidence of P superiority:

The Eastern Handicap

Three Days of High Scores at the Bradford Traps

BRADFORD, Pa., July 13.—The Interstate Association's seventh Eastern Handicap tournament was held at Bradford, Pa., July 9-11, under the auspices of the Bradford Gun Club.

The feature of the practice day, Monday, July 8, was the special match race for the Hazard double-target challenge championship trophy between Mr. Fred Gilbert, of Spirit Lake, Ia. (holder), and Mr. Fred G. Bills, of Chicago (challenger), at 100 double targets. After the completion of the regular program, Elmer E. Shaner, of Pittsburgh, Secretary-Treasurer of the Interstate Association, stepped to the firing line and announced the match between Messrs. Gilbert and Bills. Mr. Shaner stated that Chauncey M. Powers, of Decatur, Ill., would officiate as referee; that C. D. Henline would pull the traps, and that J. T. Skelly, President of the Interstate Association, would officiate as scorer. Mr. Shaner asked the spectators to refrain from any demonstrations until the last target had been thrown.

At the end of the first half of the race Gilbert had such a lead over his opponent that it was apparent he would have no trouble to retain his title. At the close of the match, Gilbert received congratulations of his friends. The scores of the match race follow:

F Gilbert	19 18 18 17 18 19 18 17 18 18—180
F G Bills.....	16 13 17 16 13 16 15 15 15 16—152

Practice Day, July 8.

There were also five 20-target events on the practice day, the scores of which follow:

First Day, July 9.

There were 129 entrants registered at the opening of the seventh Eastern Handicap tournament at the Foster Brook grounds of the Bradford Gun Club when the program opened at 9 o'clock. There were ten events of 15 targets each, or a total of 150. A large number of spectators witnessed the sport during the day.

The strength of the Bradford Gun Club members was developed when C. D. Henline won high gun for the day in the amateur class against some of the crack shots of the country. His score was 146 out of a possible 150 targets. L. E. Mallory, Jr., was tied with H. W. Millin with scores of 145 each. R. Budd was third in the amateur class with 144.

In the day's events W. R. Crosby made the high score for the professional class. He finished with 149 targets out of a possible 150, and made a run of 137 without a miss. In the same class he was followed by H. D. Freeman, 148; Lester German, 148; George Maxwell, 147; C. G. Spencer, 147; Fred Gilbert, 146; Fred G. Bills, 146; Homer Clark, 146; J. R. Taylor, 146; J. M. Hawkins, 146.

Mrs. Ad. Topperwein, the only lady participant, made a record of 143 out of a possible 150 targets. In the special event of 25 doubles, A. Heil was the winner for the amateurs. He broke 47 out of a possible 50. The scores of the first day follow:

WHAT WILL YOU SHOOT AT THE NEXT TOURNAMENT?

Never Shakes Your Confidence

DON'T let your long planned hunting trip be spoiled—spoiled by your gun not rising to the occasion at some critical moment. And you know how the shortcomings of your gun always show up at the critical moment.

After that your confidence is gone.

The six Hunter brothers have kept on the trail of shotgun shortcomings with invention, workmanship and Purpose, for 22 years.

The result is the Smith Gun, the gun without a single shortcoming to mar the pleasure of the

hunting trip or cheat the game bag of a single bird.

Purpose got rid of "shooting loose" by producing the Smith bolt, which double-wedges through extension rib and grips tight with a double rotary grip.

Purpose eliminated *inaccessibility*—which causes a gun owner to leave his lock uncleaned until it causes trouble—with the Smith "one-screw access." And so on through the list.

Have your dealer show you the new Smith 20 gauge—20 gauge from butt to muzzle. Write for catalog, showing grades from \$25 net to \$1500 list.

L. C. SMITH GUNS

"6 Times 22 Years' Experience"

HUNTER ARMS COMPANY, 76 Hubbard Street, FULTON, NEW YORK

(Patented, Feb. 20, 1912.)

SPORTSMEN'S GLASSES REVOLUTIONIZED

by our new **Akopos Crystal** lens—a double shade of amber and veridian, and our own exclusive product—far superior to the old style, obsolete amber lens. The **Akopos Crystal** eliminates not only all the ultra violet rays, but also all the violet and blue rays which are so irritating to the eye.

The amber lens is less than 50 per cent. efficient, because it cuts out only part of the ultra violet and does not affect the latter two.

Before buying a field glass or binocular, it will pay you to communicate with us.

THE F. W. KING OPTICAL CO. 450 Ellastone Building, Cleveland, Ohio

pleted and the special event of 25 doubles was well along when rain began to fall, and the shooters were driven to cover. The entire program was completed, however, later on.

In the amateur class Geo. Volk, of Toledo, O., outdid the men of the professional class by making a score of 148 out of a possible 150 targets. J. D. Elliott, of New Wilmington, and F. Guinzburg, of Du Bois, were tied for second place, each having a score of 146. R. Budd was third with 145.

C. F. Lambert, of Buffalo, secretary and treasurer of the New York State Sportsmen's Association, and president of the Audubon Gun Club, of Buffalo, was at his best, and opened the eyes of the other shooters by making a run of 92 targets straight. The Audubon Club team was composed of Messrs. Lambert, Covert, Ebberts, Rogers and Ward. Lambert made a total of 141, Covert 140, Rogers 135, Ebberts 118, Ward 136.

Fred G. Bills, of Chicago, was high gun for the day in the professional class, breaking 147 out of a possible 150. Mrs. Topperwein was second with 146, and J. M. Hawkins, George Maxwell and R. W. Clancy were tied for third place, each breaking 145 targets.

In the special event at 25 double targets, C. M. Powers was high among the amateurs with a total of 45. In the professional class R. W. Clancy, of Chicago, was high with a total of 49.

In the regular events George Volk, of Toledo, was high gun for the first two days with 290 out of a possible 300 targets; R. Budd was second with 289; L. E. Mallory, Jr., was third with 288. The scores of the second day follow:

Third Day, July 11.

C. D. Henline, of the Bradford Gun Club, won the seventh Eastern Handicap of the Interstate Association, which came to an end this evening. T. J. Wallis, of Sharon, Pa., shooting from 16yds., and C. D. Henline and F. Korner, of this city, each shooting at 20yds., tied with a score of 96 out of a possible 100 targets. In the shoot-off, Mr. Henline made a whirlwind finish, breaking 19 targets out of a possible 20 targets. He dropped the 13th target. Mr. Wallis made 18 out of 20 and Korner broke 16 out of 20.

In the Eastern Handicap there were 160 entrants,

and the rain that fell copiously at times during the afternoon interrupted the sport and caused it to be late before the big event was finished.

The high amateur for the tournament was George Volk, of Toledo, O., who scored 338 out of a possible 400 targets. C. G. Spencer, of St. Louis, Mo., made the longest run of the three days, with 162 without a miss.

In the regular events the third day, five events of 20 targets each, a total of 100, Lester German and George Maxwell broke 100 targets straight. Both men are in the professional class. Dr. Vanderhoof, of Watkins, N. Y., and Carl Moore, of Brownsville, Pa., each broke a total of 99 out of a possible 100 targets.

The remarkable scores made were the topic of conversation on the streets and in the hotel lobbies. The shooters were of the opinion that the atmospheric conditions had been in their favor. There was a mellow light, and the targets are more easily seen, they claim.

Yesterday was a remarkable day in the history of trap shooting. In the morning 140 entrants shooting from the 16yd. firing line, made scores which averaged 92.89 per cent.

The work at the traps by George Maxwell, of Hastings, Neb., was considered wonderful. Of 400 regular targets, he lost but 8, making a total of 392. He is a one-armed man.

During the tournament, thirty-one of the amateurs broke better than 92.5 per cent. of the 400 targets at the 16yd. line; 84,380 targets were thrown during the tournament.

The Bradford Gun Club's manner of conducting the tournament was highly praised.

The handicap committee was composed of C. F. Lambert, Buffalo, N. Y.; C. C. Irwin, Pittsburgh, Pa.; J. G. Martin, Harrisburg, Pa.; F. M. Edwards, Columbus, O., and L. E. Mallory, Jr., Bradford, Pa.

Ideal-Leggett traps and bluerock targets were used. Mr. C. A. North, of Cleveland, O., was in charge of the traps, and kept them in first-class shape during the entire tournament. The even flight of the targets and smooth working of the traps came in for much praise from the contestants. The scores of the third day follow:

Five 20-target events, shot to-day, had scores as follows:

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen.
 Shoot well because they hold the charge compactly together at extreme ranges.
 Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address
PARKER BROS. :: Meriden, Conn.

YOU know mallards—wisest and wariest of all ducks—Solomons of the air. You can't knock down mallards with a paddle nor can you get them with a gun that plasters its shots all over the face of creation.

A mallard shot is generally a long shot, and long shots require a hard-shooting, close-shooting gun.

That's why the long-headed man who goes to a mallard country takes a Lefever. When he swings it on a towering pair of mallards he does not question the result. He knew it—

TWO CLEAN KILLS

The reason a Lefever kills clean and sure and far is Lefever Taper Boring.

But if you buy a Lefever for the taper boring alone, you will get more than your money's worth. For instance, you will never be handicapped with looseness at the hinge joint. The exclusive Lefever screw compensates for a year's wear by a trifling turn that you make yourself with a screwdriver.

LEFEVER SHOT GUNS

Sixteen other exclusive Lefever features and Lefever simplicity and strength make the \$28 gun the peer of any \$50 gun on the market. Upwards to \$1,000. Send for free catalog and get Lefever wise. LEFEVER ARMS CO., 23 Maltbie St., Syracuse, N. Y.

Durston Special
20 Gauge. Price \$28.00

It's Easy to Reload!

If you haven't time to cast bullets, we furnish hand made bullets for any caliber at low prices. You then merely decap and re-cap shell, insert powder and crimp shell on to bullet.

Free 160 Pages Does it pay? You can reload 100 .32-40 smokeless short range cartridges (buying the bullets) in half an hour at a total expense of 77c.; casting bullets yourself, 38c.; the new factory cartridges cost you \$2.52 per 100.

The Ideal Hand Book tells about reloading all rifle, pistol and shotgun ammunition; free for 3 stamps postage.

The Marlin Firearms Co.
27 Willow Street New Haven, Conn.

Iowa State Sportsmen's Association.

FORT DODGE, Ia., July 11.—The thirty-fifth annual tournament of the Iowa State Sportsmen's Association, held under the management of the Fort Dodge Gun Club, at Mineral City Park, was finished this afternoon with one of the special events. The tournament lasted three days.

State amateur championship cup, held last year by Mr. Wm. Weatleaf, of Nichols, Ia., who again proved the winner with 96 out of 100, being tied with Dr. Bothel, of Iowa City. On shoot-off Wettleaf broke 24 and Bothel 18. This is the third time that same cup has been won by this shooter. There were twenty-five entries in this event.

This shoot proved one grand success, so far as entries and consistency of weather were concerned, sixty-five shooters starting and sixty-five finishing the three-day's program.

The special cup events were also well entered. Smith cup, shot for on July 9, had twenty-four entries, at 25 targets, and was won by J. B. Harker, of Spirit Lake, on 25 straight, being tied by Prof. G. Hezlewood, of Iowa Falls. First shoot proved another tie on 25 straight. On second shoot-off, Harker broke 24 to Hezlewood's 23.

The second cup event of this day was the Wahkonsa cup, at 15 pairs. There were twenty-three entries, and the cup was won by A. L. Yearous, of Eagle Grove, score 27 out of 30.

Wettleaf also takes home the Ottumwa diamond badge, held jointly last year by Schman, Des Moines; Gilbert, Spirit Lake, and Kautzky, of Fort Dodge, winning out after shoot-off on tie with F. Fisher, of Eagle Grove, both having broken 48 out of 50. On shoot-off at 25 targets Wettleaf broke 24 and Fisher 23. This is a handicap event, Wettleaf shooting from 21 and Fisher 18 yards.

Annual Meeting of the Iowa State Sportsmen's Association.

A very enthusiastic meeting was held by the Iowa State Sportsmen's Association at the Wahkonsa Hotel in the evening of July 10, at which 65 members were present. Mr. E. C. Henshaw, of Okoboji, was re-elected President; Mr. F. M. Shares, of Waterloo, First Vice-President; Mr. Sam. S. Foster, of Mason City, Second Vice-President; Jos. Kautzky, of Fort Dodge, Secretary-Treasurer. Board of Directors: John Peterson, of Randall; Prof. Hazlewood, of Iowa Falls, and G. L. Taylor, of Sioux City. Legislative Committee: Prof. Hazlewood, W. A. Brown, Dr. Bothell, of Iowa City; H. W. Vietmeyer, of Spencer, and John Peterson, of Randall.

A hot contest developed between Fort Dodge, Waterloo and Mason City, to secure the State shoot for 1913. A vote by ballot was taken, and Fort Dodge was again given the State shoot for 1913. Waterloo was given the Iowa State Post-Season shoot for next October.

By resolution, the secretary was instructed to pay the membership fee of \$5 to the American Game Protective and Propagation Association.

Several hours were spent discussing ways and means of better protection and propagation of the game of the State, and the following resolutions were passed:

1.—Whereas, the game of State of Iowa is rapidly disappearing, this based measurably upon the natural conditions, the reclaiming of lands for farming purposes which were formerly the home of the game bird,

We, the Iowa State Sportsmen's Association, organized for the protection and propagation of the game, and representing as we do, the sportsmen of the State of Iowa, and taxpayers of this commonwealth, do hereby express our disapproval of the appropriating of any funds collected for hunting license from the sportsmen of this State, this to any fund except in the interest of the protection and propagation of game.

We indorse the American Protective and Propagation Association in their great work as National game protectors. We recommend State co-operation with this Association, and to this end, we, the Iowa State Sportsmen's Association, in convention assembled at the Fort Dodge, Ia., July 10, hereby become a member of the American Protective and Propagation Association, this as a State Association.

We further protest against the utilization of the funds collected from the sportsmen of the State of Iowa being appropriated into any fund or channel, aside from the protection and propagation of game in the State of Iowa.

That this protest may be more emphatic, we agree, as sportsmen, regardless of political belief or affiliation, not to support or favor any member of the Senate or House of Representatives who shall vote to divert the funds collected from the State hunting license into other channels other than the protection and propagation of game.

We further urge the necessity and importance of immediately securing either by purchase or lease a suitable tract of land for the purpose of establishing a State fish and game farm, this for the propagation, protection and distribution of game birds and fish throughout our State.

We further recommend that the State game warden have immediate supervision and care of the propagation farm, permitting no shooting or fishing upon said farm under any conditions or circumstances.

We indorse legislation that will bring about the adoption of our recommendations and putting of same into active operation.

2.—Be it resolved, that the President of the State Sportsmen's Association be instructed to confer with the State game warden, Lincoln, to the end that the legislative committee appointed at this meeting, receive at his hands substantial recognition as co-workers.

Notes.

J. E. Harker, of Spirit Lake, made a run of 99 straight, giving out on his 100th bird.

F. C. Whitney, of Des Moines, the red W man, cashired the shoot, and was snappier than ever.

A. L. Yearous, Frank Fisher and the balance of the

Kennel.

BLUE GRASS FARM KENNELS, Berry, Ky.

COCKER SPANIELS.

Several fine black Cocker Spaniel dogs, about 1 year, field type. Suitable to train in for the fall shooting. HANDSOME BROOK KENNEL, Franklin, N. Y.

Hunting Hounds for Hunters. Well bred, well trained, well kept. COLUMBIAN BEAGLE KENNELS, Chatham, N. Y.

Eagle Grove bunch, made them all hustle. Yearous won the Wahkonsa cup at 15 doubles with 27 on very hard and difficult angles. That score will be hard to crack next year. Fisher divided with Wettleaf on diamond badge, losing out on hard shoot-off.

Potter, White, Hoon, Campbell, Huntley, Harker and Wettleaf were running a neck-and-neck race for the three days, Campbell finally landing first money.

Waterloo, with Shores, Webber, Hummel, Cowin and Corsin enjoyed themselves immensely if they did not take back the diamond badge, which the big, good-natured sheriff from that metropolis handed back to the shooters on his last three birds in the event, losing his 47th and 50th targets, with a grand total of 47 out of 50.

Tom A. Marshall, of Keithsburg, Ill., could not pass up the Iowa State shoot, this being about the twenty-fifth he attended.

J. E. Dickey, winner of the 1910 State amateur championship shoot, shot well for the entire three days.

Neal Layman, Joe Kautzky and Fred Gilbert took up this year's entries of diamond badge, which was held jointly by them, and was this year carted away by Wettleaf, who also took with him to Nichols, the amateur championship, shooting from 2lyds.

Brown, Duncan, Huntley and Taylor, of Sioux City, went very strong the last day, Taylor having one run of 89 straight, this with an unfinished run of the previous day, he went well over the 100 mark.

Mason City, with Joe Thompson, McGowan and Flaherty, pulled hard for next year's shoot, but fell a little shy on votes. Still they left happy, thinking of the future.

Prof. Hazlewood, after first shoot-off for Smith cup, on which he tied with John Harker, of Spirit Lake, both having again broken 25 straight on shoot-off, said, "He don't miss, and I don't."

Old Steady Bill Ridley was breaking in his new gun, which accounts for him not being among the topnotchers. Nevertheless, he was all cheer from What Cheer.

The scores of those who completed the three days' programme of 450 targets follow:

	1st Day.	2d Day.	3d Day.

Hunters' Club.

ROCKAWAY BEACH, Syracuse, N. Y., July 4.—Fifty gunners from all Eastern States took part in the registered tournament of Hunters' Club, of Onondaga, which was held at Rockaway Beach.

Jerome De Bee, of Marcy, N. Y., was high gun for the day's shooting with 144 out of 150. C. L. Frantz, of Seneca Falls, was second with 142.

W. E. Corfield, of Utica, won the merchandise event with 24 out of 25. T. E. Clay, of Syracuse, was second, after shooting a tie with Corfield.

C. H. STANNARD, Sec'y.

Holland Gun Club.

BATAVIA, N. Y., July 13.—Wm. R. Crosby, of O'Fallon, Ill., called on his Batavia friends to-day and shot along with the boys this afternoon, breaking 85 out of 90. Walls won the cut-glass dish in the regular program handicap. Brumber is ahead for the Du Pont trophy with 98.6. We'll have to doctor his handicap for the next shoot. A strong southwest wind and rain showers made shooting hard to-day. Scores follow:

Targets:	10	15	10	20	20	25
Tomlinson	8	7	7	15	14	22
Gardiner	8	11	10	18	18	22

Resorts for Sportsmen.

W., care Forest and Stream.

TRAINING vs. BREAKING

Practical Dog Training; or, Training vs. Breaking. By S. T. Hammond. To which is added a chapter on training pet dogs, by an amateur. Cloth, 165 pages. Price, \$1.00.

FOREST AND STREAM PUBLISHING COMPANY

THE CAMPER'S OWN BOOK

A Handy Book for Devotees of Tent and Trail

This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see here. It is "woody" from cover to cover—stirred by lake-breezes and redolent of pine.

Authors of country-wide repute have, with their enthusiasm and familiar knowledge, aided its making. Stewart Edward White, Edward Breck, Frank A. Bates, Charles Bradford, F. C. Selous—these and others join this camp-fire council. They say their say about a hundred little practical details that hold close interest for you; and they spin a yarn or two by the way.

"The Camper's Own Book" measures 8x5 3/8 inches over all. It is a goodly generous volume, with 194 pages handsomely set in Scotch-Roman type, and 13 of the finest illustrations you've ever seen. Everybody should have a copy who believes that a day under the free sky makes the pomp of emperors ridiculous. And you're one—you know you are.

PRICES PER VOLUME: In the appropriate green T-cloth \$1.00
In the paper (as shown in cut)50

If your dealer cannot supply you we will send postpaid on receipt of price.

THE LOG CABIN PRESS 144 Worth Street NEW YORK CITY

THE ANGLER'S AND SPORTSMAN'S GUIDE FOR 1912

(FORMERLY THE ANGLER'S GUIDE)

The 1912 edition, rewritten and improved from cover to cover, is the most complete and authoritative book of the kind published. The Fish and Game Laws for 1912, included in the "Guide," are alone worth the price of the book. But the book will also tell you When—the best season—Where—giving many virgin waters,—and How—telling the best methods of angling used by the most successful fishermen everywhere.

"WHERE TO GO DIRECTORY," containing the best hunting, camping and fishing places in America, giving railroads, steamships, hotels, camps, guides and best accommodations. (The only resort and guide directory in America.)

PRIZE FISHING CONTEST FOR 1912

In order to give new readers an opportunity to read the list of prizes in FIELD AND STREAM's Prize Fishing Contest for 1912, together with stories by the prize winners of 1911's Contest now running each month, we are making the following special offer:

Keep barrels and lock mechanism in perfect condition by using Dixon's Graphite. Booklet 52-P and sample sent free.

JOSEPH DIXON/CRUCIBLE CO. JERSEY CITY, N. J.

KEEP YOUR RAZOR SHARP

Don't blame the razor if it dulls quickly. Maybe it's your fault. Rub a few drops of 3-in-One oil on your razor strop. When leather is pliable strop as usual. Any razor will cut easier, better and stay sharp longer. After using, draw blade between thumb and finger moistened with 3-in-One. This prevents rust, keeps edge smooth and keen, always sharp and ready for immediate use. Don't scrape your face. Use 3-in-One on your razor and shave right. **FREE** Write for liberal free sample and special scientific circular. Try it yourself. **3-IN-ONE OIL COMPANY.** 112 New St., New York.

Muskeetopunk

BEST and only sure relief from mosquitoes. No bad odor. Just what you have been looking for. Makes outdoor life ideal. **Means Camp Comfort** You sleep o' nights. For campers and Chautauquans, cabin, houseboat, tent or home. 35 cents a box, three boxes \$1.00, by mail, or at all Druggists and Sporting Goods Dealers. Money back if wanted. Guaranteed. **MUSKEETOPUNK CO., Dept. F, PEKIN, ILLINOIS.**

rence C. C.; Executive Committee—Wm. Collins, Pawtuxet C. C.; B. F. Jacobs, Medford B. C.; R. F. Kelly, Coheco C. C.; Member Board of Governors (for three years), Paul Butler, Vesper C. C.

The Division also expressed the desire that the name of Mr. F. W. Cramphorn be presented by the Board of Governors as their candidate for Commodore of the A. C. A. for 1913.

One hundred and fifty members and guests were registered at headquarters and many more visitors were present on Monday to witness the races.

The meet this year was under the auspices of the Dedham B. C., the officers of the meet being as follows: Fred Brodbeck, Vice-Commodore, Dedham B. C.; Jack Howard, Rear-Commodore, Medford B. C.; E. A. Roland, Purser, Dedham B. C.; B. L. Goodman, Campsite Committee.

The meet will be held next year at Lawrence.

Fell, 56 Richards street, Dedham, Mass.

PROPOSED FOR ASSOCIATE MEMBERSHIP.

Miss Elizabeth D. Friese, Kenilworth, Ill.; Miss Charlotte E. Friese, Kenilworth, Ill.; Miss Charlotte A. Mount, La Grange, Ky., all proposed by A. W. Friese.

Attracting Birds.

NEW SALEM, Mass., April 15.—*Editor Forest and Stream:* Some people have noticed that strangely few birds nest on their grounds. Too many seem to pass on in migrating time. In driving through the country, especially after the leaves are off in autumn, you can notice more nests in some localities where the food supply does not seem better than where nests are scarce.

Notice nests. Make a nest census on your grounds every year. It is educational and also sport. Birds want safe places to nest. Von Berlapsch says that birds look long and earnestly for safe nesting places. They also must have a nearby food supply while feeding the young.

With us the summer of 1910 was disappointing. The hole-nesting birds did not seem to approve our nest boxes, and the open nesting

Taxidermists.

No. 182 SIXTH AVENUE,

Tel. 4205 Chelsea. Near 13th St. NEW YORK

birds did not stay to make nests. Last summer, as soon as the first robins appeared, the family cat was kept in the sheds. Other cats were watched and warned. The few other enemies to nests were watched and some appropriately treated. Crumbs were scattered on rocks and bare places. Where the year before only one robin's nest could be found, twenty-one robins' nests were counted and forty other birds' nests were found in the same area where very few were the year before.

Robins watch and defend their nests vigorously from enemies, and so the little birds like to build near robins. For instance, a robin angrily drove off a jay as soon as he appeared in sight. The jay left the vicinity from that day. One robin courageously defending its own incidentally saved many little nests. Probably robins are greatly needed for just this work. Nature's balance requires many robins. One hundred and twenty-two birds and their young on a few acres nearest the house makes the country interesting.

Elm leaf beetles are not troubling our trees, and we have no browntail moths this spring. Perhaps that, however, is because we hang out suet to attract the woodpeckers and other residents in winter.

We are glad to inform you what sport we are having with birds, as readers may get more or less out of the same. **E. O. MARSHALL,**

Secretary of the Massachusetts State Grange Committee on Protection of Wild Birds.

The FOREST AND STREAM may be obtained from any newsdealer on order. Ask your dealer to supply you regularly.

SAUER MAUSERS DO THE WORK

Calibers: 8 mm. and 9 mm.
Also 30 Gov't, 1906.

Light weight, accurate, with the simplest and strongest breech mechanism; powerful enough for the largest game on the surface of the globe. **The Sauer Mauser** is the choice of the discriminating sportsman who knows that the best is not too good when going after big game.

Write for descriptive matter.

Our fall Hunting Catalog will be out in a few weeks. Let us put your name on our list to receive that catalog.

A PROBLEM'S SOLUTION

Log Cabins and Cottages

How to Build and Furnish Them

A seasonable book when all minds are bent on the problem of getting close to nature. Mr. Wicks in this delightful book offers timely advice to every one who wants to build a simple summer home at one with its surroundings of wood or stream or shore.

This is a thoroughly practical work, treating of the how, the where, and the with what of camp building and furnishing. It is helpful, too, in regard to furnishing, and withal a most beautiful work.

Cloth, profusely illustrated, \$1.50 postpaid.

 From "Trapping in the Santa Ritas," in this number.

GAME LAWS IN BRIEF

The accepted authority for the
Game and Fish Laws of the
United States and Canada

Illustrated

Price 25 Cents

Revised to June 1, 1912

This is the size of book. Made to fit the pocket. It contains no anecdotes, fiction or short stories, but has absolutely accurate Fish and Game Laws, digested so as to be found at a glance and comprehended at sight.

You want 'em now as there have been lots of changes this spring.

Published now and for past 25 years by

BOILING DOWN PENGUINS.

WHAT is probably the most southerly industry of the world is being carried on at Macquarie Island, about half way between Tasmania and the Antarctic Continent, in the capture of penguins for their oil. Macquarie Island belongs to the State of Tasmania and has an area of about 25,000 acres, being about twenty-five miles long and five miles wide. The island is leased by the Tasmanian Government to Joseph Hatch, who has established a penguin oil industry there.

There are probably 80,000,000 penguins on the island, so that the stock to be drawn from seems almost limitless. According to Consular and Trade Reports the oil is obtained from the penguins by boiling the carcasses in digestors capable of dealing with 800 birds at a time. The tops of the digestors are fastened down and steam applied until about twenty-five pounds pressure is obtained. The steam is then turned off and water pumped into the bottoms of the digestors, this causing the oil to rise, when it is taken off the top by a tap.

The oil is placed in barrels and sold to binder twine makers in Australia and New Zealand. There is a good market for all the oil that is produced here, but the industry has met with several severe losses through wreck of ships attempting to visit the island. There is no harbor about the island, so that the vessels have to lie about half a mile off the rocky coast, and all material has to be conveyed to and from the shore on rafts formed of casks. Owing to the roughness of the open roadstead it is impossible to obtain insurance for vessels trading there.

Macquarie Island is about 750 miles southeast of Hobart. The island is barren, being covered only with tussocky grass. Whaling ships visiting there have introduced rabbits and Maori hens, which are now quite prolific. The Mawson Antarctic expedition from Australia has established a wireless station there, and daily messages are now being received at Hobart.

It was the intention of this expedition to use Macquarie Island as a means of sending messages all the way from their base at Adelie Land to Hobart, but unfortunately the wireless station established at Adelie Land has been unable to communicate with Macquarie Island, owing, it is supposed, to being too near the magnetic disturbance caused by the proximity of the south magnetic pole. The station at Macquarie Island, however, has already proved of considerable value to shipping in Australian waters by giving warning of storms coming from the south.

SYRIAN APRICOT PASTE.

IN view of the abundant apricot yield on the Pacific Coast, it might be of profit to American farmers in that region to utilize that portion of the yield which is too ripe, or is otherwise unfit for transportation to the fruit markets or canneries, in the manufacture of apricot paste, known in Syria as kamereddin.

*This industry has long been in vogue at Damascus and all along the valley of the Barada River. The methods employed are very simple. A basin two or three feet deep and of a circumference proportionate to the crop to be treated, is dug by the farmer and usually lined with cement. The ripe apricots are stoned and thrown into this basin and beaten into a pulp with tampers. The primitive method of kneading the fruit with bare feet is still often resorted to. The pulp is then spread out on thin boards and placed under trees and in shady places to dry. These boards are of uniform size, and the paste is so spread out as not to be thicker than one-tenth of an inch when dry. The sheets thus manufactured when dry weigh 1 rattle (about 5½ pounds) and look like sole leather.—Vice-Consul General F. Willoughby Smith, Beirut.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth, 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00.

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With artotype portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiak Bear; Moose; Mountain Sheep; Game Refuges, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00.

An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00.

A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters' was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters' was admirably equipped to write such a work. It has already taken its place as the standard authority.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

Rhymes of the Stream and Forest.

By Frank Merton Buckland. Cloth. Heavy laid paper. Sumptuously bound. Postpaid, \$1.25.

A charming collection of verse by an author who knows and loves nature well. A particularly pleasing gift for fishermen, closely simulating in form and ornamentation the standard fly-book.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth, 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

Trapping in the Santa Ritas

By M. R. STEVENS

Photographs by the Author.

FOLKS back in the land of clover meadows and blue-grass pastures would have thought the scene before my eyes a wilderness, barren and forbidding, but to me it was Elysium, peopled with the seductive forms of grizzly bears and black-tailed deer, and promising a goodly measure of pleasure and profit in the wake of the .30-40 Winchester lying across my arm. At that particular moment I was gazing over miles of live oak and juniper covered hills, up Sawmill Cañon where, fifteen years ago, a bear might have been found napping under almost any bush or boulder, and which is still a very good bear country, as well as the home of mountain lions and a few deer. I had come out for a look at my traps and to try for a shot at a bear before the last one had stowed himself away into winter quarters out of reach. If successful at all, I knew it must be soon ere his winter drowsiness beat me in the conquest of bruin.

It was early in November, and I had just settled my camp for a winter's trapping high in the Santa Rita range. Arizona's mesas and hills lay all around, empty save for the countless herds of cattle which here and there added a slightly emphasized note of animation to the unseen but strongly felt presence of wild life, permeating this waste as it does every scene of nature in her unmarred state. Material manifestations of the unseen wild life of the Santa Ritas had been playing havoc with the life of the herds; that is, wolves, bears and lions had been making free with calves and weaklings, and the fact had much to do with my selecting the Santa Ritas as a likely trapping ground. I may as well state right now, however, that the Santa Rita bears were too much for me, or I was too slow for them, for I did not get a shot at one the winter long.

Within a radius of six or seven miles from camp I put out some sixty traps in two lines, one nearly twenty, the other half as many miles long, and with making the rounds of them, skinning their victims, and taking an occasional tramp into the hills for deer, I was kept busy. My warehouse, in other words, the little tent given up to the storage of furs, filled rapidly. Tent walls, rocks and bushes in every shady spot in camp were soon covered with pelts stretched out to dry, while each visit to the traps added to the store. No beast of the hills seemed proof against the temptation of bait in those No. 4 traps. Mountain lion, coyote, gray fox, wildcat,

skunk, 'coon, ring-tailed cat, wolf and lynx alike came, smelled, tasted and paid the penalty with their lives. Even the birds of the air were not exempt from the danger, no less than twenty-four thieving eagles, some very large, falling into durance, as a result of their bait-filching efforts during the season. It always brought regret to find the national bird a victim of the snare intended for more mischievous prey, for the eagles are practically harmless in this region. I had no wish to include the birds among the marauders of the hills against which I waged warfare.

Yet it was not strange that the bait of those traps was tempting to such numbers of wild creatures. It often consisted of venison which would tempt the human appetite of a New York epicure. My most highly coveted game, however, was mountain lions, and consequently my favorite bait for the traps was horse meat, for

there was nothing the lions liked so well. Other animals showed no special preference in the bait line.

Notwithstanding its superiority, horse meat bait was not always at hand, and was obtained with some difficulty. The source of supply was the small bands of wild bronchos, fierce and wary, useless and ownerless, roaming the hills with the rest of the natural population. They were hunted and shot the same as deer, but were much harder to approach, being usually out on some mesa where it was easy to discover a doe at her very first appearance. A shot at short range was rare, and at times my .30-40 brought one down when the herd was grazing nearly a half mile away.

It is commonly thought necessary to use a large caliber gun in hunting large game, and as a deer rifle and general weapon nothing surpasses a .30-40 Winchester. But in this particu-

GREEN WALLS. FROSTED BORDER, BLUE CEILING.

A WILDWOOD TRAGEDY.

lar trapping expedition I conceived the fancy for testing the possibilities of the .22 rifle, with results that surprised myself. For trapped game it was as effective as anything could be after repeated tests upon the lives of wolf, lynx and coyote. The season's largest mountain lion, measuring over eight feet from tip to tip, was shot dead with the .22, and I even succeeded in shooting a deer with it, though I had some doubts of the result as I fired. The prize, a fine fat buck, ran only a little way after the ball reached him and proved the deadly merits of the .22 so conclusively that I became fired with the determination to kill a bear with it before breaking camp. I'll always be positive I could have done so, too, if every bear hadn't wisely taken warning and stayed out of sight and range.

Of all the fur game in the Santa Ritas, none was more interesting than the wolves and coyotes. As a rule, they are very cunning and hard to trap, and many a ruse was necessary to entice them into reach of the jaws of those No. 4's. One young fellow, however, was captured the first night one trap was baited, but his easy defeat was probably due to the overconfidence of youth and his ignorance of traps and trapping ways, not to any remarkable huntsman's skill and craft of the trapper. One trap, baited for coyotes, caught a lynx which was easily dispatched with the .22.

One day late in the season as I was gathering up and bringing in the traps, preparatory to breaking camp, I found a large gray wolf in one of them. He was very savage, poor beast, as any of us no doubt would be, with a foot crushed in a steel vise. He tried his best to get his fangs at the throats of the two dogs following at my heels, lying very quiet with eyes half closed and head averted until the dogs, thinking him helpless and harmless, approached to

investigate when, presto! he leaped like a flash into the face of his foes, who promptly fled with startled yelps. The performance constituted a series of short, rapidly changing scenes in a simple, wildwood tragedy often seen on the trapper's stage, with the curtain dropping at last on a silent furry shape beside a boulder against which a rifle leaned. Those particular dogs would fight a coyote, but a wolf was too much for them.

The dogs, while sources of companionship in those long winter days in the mountains, were likewise often sources of aggravation. They were only common curs and little more than pups, with the usual puppyish propensities for destruction which they found it possible to exercise even in a bare tent surrounded by trees and rocks, and which, upon at least one occasion came near costing them their lives. Our only visitors were now and then a passing cowboy or wandering Mexican, while reading matter and mail were rarities, so when by happy chance a large illustrated newspaper of fairly late date was left in camp, it is easily believed that I regarded it as a treasure and anticipated great joy in its perusal. But before the chance came for reading, I left camp one day, carelessly leaving that precious paper lying unprotected and in plain sight. While I was gone, those curs went inside the tent, spied the paper, and promptly tore it up, the scattered fragments littering the premises, being the first thing to meet my eyes when I returned, while the pups wore a very beaming and satisfied expression much like that worn by youngsters just returned from a Sunday school picnic. If I had been certain which pup was leader in the fray, I think I should have shot him then and there, but there was no way of telling where the guilt belonged, and I rather hated to kill both dogs to make sure of getting the right one, so I let

them off. They did it just for fun, anyway, and by the way paper was scattered they certainly must have had a high old time. After that when I left the tent I put any papers I wanted into the middle of my bed under the blankets, where the pups could not get at them.

The Santa Ritas, in the vicinity of camp, was an excellent deer country, and there was one spot where a high rocky promontory jutted out into a sea of juniper and dwarf oak above an old ditch, which was their special haunt. The ditch once played its part in hydraulic mining, but the claim was long since abandoned. A plentiful supply of water, however, filled the ditch in the rainy season, while above its head a water hole fed by a spring and furnishing a goodly drinking place, may have helped account for the presence of the deer in such numbers. One day I shot a small buck here, as it ran along the mountain side about 150 yards away hanging it up above a clump of bear grass in an oak sapling near where it fell, while I went for a horse to pack it into camp. Then I decided I'd like a snapshot before moving my game, so left it hanging for suitable light. Long waiting for such a purpose would seem not to have been necessary in that land of almost perpetual sunshine and clear air, but on this occasion one of the Santa Ritas' rare spells of dark cloudy weather immediately set in, and that deer was forced to hang in the oak sapling till nearly spoiled, winter though it was, before I succeeded in getting the picture I wanted.

Not thinking it would rain very soon I went to look at my traps, one of those wet dark mornings, with the result that I was caught in a regular downpour. It wasn't very comfortable without a slicker, for up in the mountains where I was the rain was about half snow, and the wind blew a gale down the cañons. I was supposed to be wearing a waterproof coat, but it turned water about like a barley sack, and I was soaked to the skin and about half frozen when I got back to camp about 1 o'clock in the afternoon. But cheering myself with the thought that I'd be warm and comfortable again as soon as I got into dry clothes and was sheltered from the wind, I closed up the tent and began to make the change of raiment.

Well, I had successfully reached the low tide stage in the disrobing process, and had on about as near nothing in the shape of clothes as I could go, when zizz! flop! down came one end of the tent. Rain had softened the ground and a peg had pulled up, letting a corner of the

A FEW PELTS.

PACKING GAME TO CAMP.

canvas fall, while several other pegs barely held their own and threatened every second to let go. At the same instant a fresh gust of wind could be heard coming shrieking down the cañon, and when it struck I knew it would wreck both the tent and my dream of dry clothes.

'Twas a time for quick work, not for meditation, and I dived out into the weather to fix those pegs, dressed like a hummingbird and with all its graceful darting motions imitated through force of circumstances. If any one thinks I didn't work for the next five minutes, he never camped in the Santa Ritas with only a seven-foot canvas wall between him and the wild night. Some of those pegs were driven into the ground until, if they are ever pulled out again, it will be by a stump puller and not any little old winter wind. I felt good after it was over and I was safe inside my dry clothes, but I didn't exactly feel good while driving those pegs à la Cupid in the midst of a deluge, half rain, half snow, driven by a hurricane. A shower bath is pleasant, but not that kind. They say there is good in everything, but it took me some time to see the good in that experience, though after a while I partly figured it out by reflecting how things would have been if I had been an hour later getting into camp.

Winter away up in the mountains with no

company but two horses, two cur pups and the wild things and no habitation but a small tent often buried in snow, is rather a lonesome time. But it is a good time, too, in many ways, and makes one see and think things that he could never see nor think anywhere else. Then, when the spring sun begins to shine, and the snow melts away from the foothills and is crowded higher and higher up the slopes, till the ranges rise like huge green walls with a white-frosted border next a blue ceiling, all the mountains' lonesomeness melts away with the snow, for the full life of the hills is awake once more, filling every cliff and cañon with companionship. At least, that's the way the pups and I felt one April morning when, the trapping season over, we loaded our pack horse and took our way down Smith's Cañon toward the lower valleys and civilization after a five months' stay in the Upper Santa Ritas. To be sure the pups didn't tell me what they thought, but judging by that familiar, beaming, satisfied expression in their eyes, I felt sure they would be disappointed when they found they were being taken away from the scene of our mutual exploits, and that nothing would console them for their forced return to the tame confines of civilization, but the prospect of unlimited Sunday newspapers to demolish without danger of capital punishment.

collection is of immense size, including 4,000 specimens, more than 700 of which are those of large game. Edmund Heller, of the National Museum, was the guest of Mr. Rainey on his African hunting trip, and accompanied the expedition for the purpose of preserving the animals. Mr. Rainey has generously donated the entire collection to the Smithsonian Institution and the National Museum. While Mr. Heller

had charge of the preservation of mammals in general, he paid especial attention to the collection of carnivores and ungulates. In the collection are twenty-four new species of rodents, in which it appears Africa abounds. During the trip Mr. Rainey extended to Mr. Heller every opportunity to make a complete survey of the mammals, which he successfully accomplished, assisted by thirty trained native skinners and porters who accompanied the safari.

Among the material obtained is the famous series of lions captured by Mr. Rainey's celebrated American bearhounds as described in his lectures. The idea of hunting lions with bearhounds appears to have been original with Mr. Rainey so far as the success of the venture is concerned. He carried with him to Africa thirty-six Mississippi bearhounds for use in trailing lions, a new and novel venture in African hunting annals.

Mr. Rainey stated that the hunting fraternity in Nairobi scoffed at his idea of trailing lions with dogs, and predicted that the dogs would not survive the first lion attack, and that as such a thing as lion hunting with dogs had never been heard of in Africa, the project must fail.

Nothing daunted, Mr. Rainey proceeded to the jungles with his pack of bearhounds, which readily took the trail of the first lion scent and strung out in true hound fashion. He carried with him on the hunting trip a complete moving picture outfit, including an expert operator, and on each chase after lions and other animals the moving picture machine was present to record the actual occurrences of the hunt. These pictures, exhibited by Mr. Rainey as a supplement to his lectures, show many remarkable illustrations of animal life. For instance it showed how the hounds acted in chasing the lioness, and how the latter tried to escape the tormenting dogs, finally sinking on her haunches in an exhausted condition, too weary to fight the dogs further with the exception of an occasional slap or snap at the pack which surrounded her, keeping her at bay until dispatched with a well directed shot.

In no instance did any dog show fear of the lion, and only one hound was lost straying from camp in a wounded condition, and was probably killed by some wild animal.

Mr. Rainey surpassed the record of all lion hunters, having killed seventy-six, each of which was trailed and bayed by his bearhounds. There are also many specimens of different kinds of antelopes in the collection including the hartebeestes, wildbeestes and waterbucks, as well as buffaloes, zebras, cheetas, monkeys and rodents. A few hippo skulls and rhino skins and one elephant were also collected. A large number of birds were secured, including some of the rarest species. Many of them are game birds, among them guinea fowls and francolins (which resemble our partridges), and plantain eaters, crows, bustards, vultures, vulturine, owls, hawks, kites, secretary birds, hornbills, pigeons, parrots, sun-birds, fly-catchers, are also represented. There also are four ostrich eggs.

The territory traversed was mostly to the north and east of that covered by Colonel Roosevelt on the earlier Smithsonian expedition, and included the country lying between the northern part of British East Africa and Southern Abyssinia.

The Paul Rainey Collection.

BY RALEIGH RAINES.

THE final shipment of the natural history collection, made by the Paul J. Rainey expedition in British East Africa, numbering some fourteen barrels and thirteen cases, has just been received at the National Museum, and is being unpacked in the taxidermy shops. The extensive

The Throne of the Mighty

By ROBERT PAGE LINCOLN

WHERE then is the throne of the mighty? In what enchanted land, and amid what wonderful environments, surrounded by the blessed outpourings of a generous nature, can such a place be found, such a place as would stir the latent blood of the least caring onlooker and lift his very soul into the boundless home of the infinite? Truly there is such a place, for out there where the eternal Rockies thrust their snow-clad peaks into the matchless blue of the Western heavens, and form themselves in all their beauteous grandeur into what is now famed as the Glacier National Park—truly the playground of those gods who rule our mere lives, and strengthen us to meet our daily toil, with a smile of courage beaming on our faces. Let me not be misunderstood. I am offered no remuneration for this pleasant task of extolling this wonderful and grand expression of nature's handiwork—other than to have the honor of putting my words to type for the perusal of my brothers of the out-of-doors. I can best write this unvexed by the call of fame and gold, best know that I am writing from my heart with the glory of the infinite resting upon my soul and directing this task toward its ultimate goal. Truly there is a throne of the mighty, and there is a place for it in this beautiful country of ours; out there in Montana in this park, where the Creator heaped in lavish array the summing up of his toil in building this earth. There, under the graceful bend of the skies, rise in faultless attire the hoary vested mountains, one after another, hundreds of lakes, like gems on the bosom of silk, and streams that throw off a million glints of light to catch the sun-rays and turn them into bars of the purest silver; where the cascades pour their tumultuous offerings into the foaming, crashing basins below, where the very demons of carnage eagerly lie in wait to visit their doom upon whosoever in mortal flesh and blood, would stumble and disappear into that vast waste. Here, in seemingly endless array, the mountains rise, one after another, each seeming to vie with the other in presenting to the human eye that vast scheme of mighty perfection, beheld by the onlooker with a certain degree of awe that no endeavor of the mind would suffice to diagnose. In the selection of this wonderful region as an addition to our national playgrounds, there certainly was evinced a degree of perception that had for its making the very essence of art and beauty. Who can behold this region in all its primitive magnificence, without realizing that, first and above all things, it is the one spot in all the chain of the American Rockies where grandeur and sublimity walk hand in hand, where a man might truly spend a summer, and still be aware of new and newer sights as he traverses those pine set trails in sight of glaciers, multitudinous lakes, and waterfalls at whose bottom lurk the trout in such abundance as to set the heart a-beating in the breast of the wisest piscatorialist born. There is not one foot of that virgin region that has not some special attraction, where the man, tired and worn from his com-

bat with his kind in the sordid, practical mart, in search after the elusive dollar, might gain back some of that youthfulness that has stolen, truly like the Arabs, from his weary body. Here he might lift his eyes to the eternal hills, and be in constant communion with the wisest of all, nature. Here he might drink in the blessed ozone of pine and balsam, feel the muscles respond to his daily exertions, and realize in a thousand varying phrases those dramatic intercourses that cannot but influence the being to a better and wiser system of life. It will tone and recuperate the lost ideals; it will instill into the mind the very flower of endeavor, so that when once more the train carries one back over the homeward journey he will be fresh and happier for his little sojourn into the heart of things.

Such is the Glacier National Park, and word of pen or speech, and yet again the brush of the artist, cannot serve to convey in one single whit the intense, silent, overwhelming beauty of this spot, which seems like the supreme effort of the God of All Things. With an area of some one thousand four hundred square miles, this park is truly what is said of it; it is a national playground, offering to the persevering man the very cream of outdoor beauty, and setting forth for the appreciation of man those environments, so singularly in keep-

ing with the Western atmosphere. There it lies, all wild and unbroken, save for a few trails here and there, but always the same day in and day out, always beauty, loftiness and magnificence; gazing upon those lakes, those staggering waterfalls, those great mountains one feels the lack of tongue in trying to make the soul believe one's own capacity. With a perfect system of accommodation for the benefit of prospective visitors, much of the rough and unwelcome is done away with, so that now one is able to leave the railroad and make the inland journey without any great inconvenience.

Proceeding to Lake McDonald, one is brought almost instantly into the very heart of this most beautiful region, the heart of it, and by that I mean the very center of its magnificence. A glimpse at the photograph on page 106 will suffice to give the reader an idea of the wondrous clarity of the atmosphere, the subtle scenic effect, and the gem-like rarity of the waters, of that scintillating expanse. Twelve miles of this wonderful water with all the variety in color one can think of, and mirroring the clouds in the sky to perfection. The photographer has caught the effect and has brought with his effort some of that art that is gradually becoming more and more noticeable in the work of our camerists. At Glacier Park Hotel one finds the nucleus of his visiting days; from here he can start out, and, day after day, enjoy the beauties of this scenery, riding over the endless trails, and fishing out those inimitable pools, where the trout are crazy to snatch the skillfully cast fly from the foamy surface, and to make the bamboo a very thing of life and action. Starting out from the Glacier Hotel the first trip will be to Avalanche Lake, along trails where one is fully able to appreciate the wholesome stretch of country that lies between the two points. With good saddle horses trained for this mountain climbing, one finds no difficulty in becoming inured to the pleasure of sitting in a saddle, and the incident will soon enough appeal to one who has never before thrown his legs over the back of a horse. Up and up into the heights, where the sky seems to droop low over those giant mounts, enveloping them in a shroud of haze, and presently, ere one is quite aware of it, he comes upon the Royal Gorge, and pauses, with something of the awe-inspiring in his breast, to gaze, and still stand there inspired, while the moments creep by—a sight that one will cherish as long as there is life in the body. What mortal can tell in word of those intrinsic beauties? Who can unravel from his heart the promptings of the soul? There are none. Words are but mere playthings, and will fall upon the silence unheard. One can only gaze and wonder.

Avalanche Lake is a sight for the most world-familiar man or woman. With the pines reaching gracefully down to its sides, one has his first glimpse of it, as it lies there hid in between the guardian mounts, and fed by some half dozen spuming waterfalls of inconceivable beauty. These torrents flash from their great height into the space below, and one stands

long absorbing to its minutest detail that herculean flood. Gray as the clouds in November, and catching occasional touches of the sunlight; changeable and intermittent, sparkling and supplemented by the roar and crash. One seems to have suddenly left the shores of this country; he seems to be in the midst of the Switzerland country, for one cannot conceive of such equally beautiful scenes in this, the chain of the Rockies, where the usual order is lack-luster hills, lacking so much in that wonder one can find only here. With the first day filled out to the fullest extent, homeward you go at twilight, when the purple veil of night is lowering over the eternal quietudes, serene with the restfulness of evening, and lying there as though graced by the kiss of one who left them there as in the beginning.

The trip to Sperry Glacier occupies the next day, and by the time the rising sun has gilded the mountains in colorful lights, the order is given to up and out for the day's journey. One is first of all struck by the wonderful array of colorings, as seen in the early morning, when the silence is profound and the solemnity of the scene is intense. Steady climbing soon brings one to Crystal Ford, and thereafter the territory covered being of such a nature as to make riding in the saddle an inconvenience, the sightseers dismount, and with some difficulty reach the easier height of ground. From this prominent situation one is able to overlook the country below and witness for the first time the beauties of the upper world. Close to the waterfalls one is able to fully appreciate their wonderful views, but at a distance they also appeal in some distinct manner that is inexplicable, but of a such a nature as to be marked down in the heart for the closest attention. Perhaps it is the height; the realization that you are closer to the face of the skies. Who can tell? The scene is one of joy, and as the horses forge ahead, the eyes are busy taking toll of the scenery, and wondering if it is possible to say something fitting to the occasion about it to

his comrade, but hesitates, for he has nothing to say. It is one of those times when human speech is needless to convey meaning to the kindred. Sperry Camp is duly reached and there the hunger that has steadily been attaining an indomitable proportion in the intervening hours is appeased and thereafter the climb is continued on foot to the top, there to behold the wonders of the Sperry Glacier. The scribe has said of it:

"The glacier comes to an end a mile from the rim rock that the party gazed at when on the shores of Avalanche Lake the day before. The intervening mile is one of geological wonders, riven rocks the size of a bungalow that look as if they were split by a mighty wedge. Great hollows sculptured by the ice of ages, show twisted strata in whirls and spirals, and sharp angles. Here one may read of some vast convulsion when the world was young, ere it froze solid in its horror. Reds, greens and yellow are splashed with pink, violet and gold on the jagged pinnacles, around which cower pitiful little pines as if still fearful of the last of the winter winds. Some of them lie abject on the rocks like creeping things, all distorted and awry. On every side the waters squirm their way to the rim-rock that overhangs Avalanche Lake, and a half hour's stumbling brings the sightseer to that point to gaze downward in silenced awe at a scene of beauty beyond words and retrospect. He is 9,000 feet above sea level. There lies the lake on whose shores we stood the day before. Yesterday it was agate-gray, but to-day it is of a milky-white, in a setting of dark green pines that from that height look like soft, lustrous fur. To the right and left the water is leaping down, as white as the lake, with a roar that drowns out words. All around are the sharp, jagged crags, clothed in many colors, grim sentinels of the gem over which they stand jealous guard. It is far from the world of men and cities, of tilled fields and twentieth-century activities. The setting is of another age—before man took dominion over

the earth. The throaty whistle of the wind is a dirge, and a chill falls on body and spirit, as the clouds mass in front of the sun, and the white fire dies on the lake below. The green carpet of the pines turns to funeral black, and a longing springs up for the association of one's fellow-man, with horses or any of the commonplace living things."

What an aspect the glacier reveals itself in with its grinding flood of ice and snow lying there open to the vision; the hoary offerings of the gods, the cruel, menacing flood that carries the burden of the hills into the basin below, truly the cup of the mighty held in terrible hands that clutch at the crevices of those gaunt sides for a hold and seems to cling there in sheer desperation, frothing in his madness to gain the wild ascendancy. One looks and beholds with picturing eyes the terrible, awe-inspiring waste and feels within him something of that changeful, mute and ever constant passing. But the scene shifts and again night waits upon the hills, shutting out the menace of the height and flooding the garden of the gods in a dusky, luminous shroud, with the snow-clad peaks standing out aggressive and prominent, and the pine tips touched with the last dying rays of the setting sun, if such it be, presenting to the eye something of the art of the wild and free. And then, as the camp is made, one listens to the requiem of the heights, with the vesper notes throbbing musically through the boughs of the pines; slowly sleep touches the eyelids, and before one has the intimation of its presence, rest in all its glory bids the tired muscles relax into peacefulness. There are no dreams to vex one; just that solid, soothing, profound sleep that heralds the oncoming array of health and joy.

With the dawn of another morning the sightseers are up and doing. How pleasant is a morning in the mountains! It is as though the sins of the previous day, if any such exist, had been washed from the soul of the past, and now fresh, and new, soft and appealing, and colored with the blessings of the mighty sun,

there would wait upon one the sweet abandon of care. And who cannot but feel care-disburdened with such realistic surroundings, heightened by the most intense of nature's outpourings, suffused in the mothering rays of her love. One stands long, and lifts his eyes before the order comes from the guide to mount horses and away.

Gunsight Pass is the next on the list of beauty spots on the route and thence the cavalcade proceeds with more or less laborious effort, while the guide is busy proffering information of things in general to those nearest him. Those behind are content to conserve their speech, and let their minds mingle with the eloquent beauty of all around. Thus on and on until suddenly the party is brought face to face with a beautiful stretch of water, the well-known Lake Louise, which in itself is a veritable mirror of nature. Here one sees in startling array the imprint on the water of the giant shore pines, such is the wonderful transparency of the water. Slowly traversing the shores of the lake the party passes through Gunsight Pass, and thence on to the summit from which immense height, on the backbone of the continent one is able to command an inimitable view of the country below his gaze. After some time spent here the start back is made, during which many scenes of grandeur are met with, some of them of such prominence that it would take a full chapter in print to do them homage.

A trip of great interest indeed is the one that leads over the mountainous trails to Red Eagle Lake, nestled high up there between the clouds, in the center of some of the most picturesque country of the West. After fording the St. Mary's River, the first place of prominence is Old Town, which is a deserted mining town with no signs whatever of life; a mute reminder of those wild and woolly days when the West was in its infancy, and when the lure of gold was strong upon man. Passing into this town the sightseer finds ample room for scout-

ing around, taking stock of the situation, gathering from the deserted aspect some of that mystery that dominates such places. Here once long ago the untamed element had their swing and vanished with the day, which was marked with the crash of the six-shooter and the wild harangue of the bar-room; one imagines as he stands there in some empty, lonesome building that those visionary men of the past are re-enacting their wild deeds, and if he will listen he may seem to hear again that revelry at its height. But now the sunlight pours down, the aisles of the forest are silent, and no more shall the quietude be split on those wonderful evenings by the crash of the .45 Colts.

The party now proceeds toward their destination, making stops here and there to satisfy the cravings of the men in the saddle. The camera plays a prominent part in the program. It seems that here the camera is in its true element, for with such a territory to draw from, with such immense scenes to portray, one is lacking without the inevitable kodak; a glowing bit of water as seen between the pines, the foam fluttering water-fall, gleaming in ever-changing colors in the sheen of the sunlight, a shimmering lake, touched in blue, indigo and lavender, with here and there between those wonderful lights, and the shades of the pines upon its bosom. A touch of the shutter and the film has marked down a tale stronger than words—a scene that one will treasure when on cold winter evenings before the fire one recounts that wonderful trip into the mountains, showing as further evidence the proof of the photograph.

Trout? Of the fishing opportunities to be found in this treasured land no word can quite bear mention of in the right sort of phrasing, for such are the conditions that one is able at most any of those stops to go out and enjoy himself to repletion. Select a well set up bamboo; the trout will run up to four and five pounds in weight on the average, and have so much fight tucked in under their rainbow hides

that the best rod will find its equal, and when once they are on, one is sure to be the participant in a fight that will tone up the fever right. Connect your favorite flies to the leader, flip them in there under the waterfall, where those rotund fish lie sporting their aristocratic forms in the changing lights of the water, eager to dart from that basin and snatch them from the surface. The flies strike water—an upward leap, and the fight is on! You lead him a bit away from the fall, and there, with the glory of the mountains around you, fulfill one of those moments you have waited and hoped for.

St. Mary's Lake is especially noted for its Mackinaw trout, which will run in weight up to twenty pounds, and requires both experience and a good man at the oars to bring the gamey fish into check. And such a fight! To the onlooker it would seem that the very bottom of the lake had risen in wrath and was turning things into chaos. Back and forth, up and down, the mighty fish takes its course, with the reel shrieking its wild acclaim, and the line cutting up blades of water as it splits over the surface in the mad career for supremacy. Often enough the fight is disastrous to the fisherman, for the mighty denizen of the deep will get away. Here you will have a chance to test your favorite tackle, and you will have a chance to try your mettle; from beginning to end it is one constant fray.

Too much cannot be said in praise of this wonderful park, for truly it is one of the pleasure nooks in this country, and the man or woman who would enjoy themselves in a rough and ready manner, shorn of the artificial conventionalities of civilization, should remember that one of the places they should bear in mind is the Glacier National Park. As I have said I am not influenced by fame or gold to recommend this place, it is just the word of a brother of the out-of-doors to another, and if I have succeeded in impressing anyone in my trivial manner, I think I have won my point, for I am always looking out for the good fortune of my fellows. The one thing about this that I would outline to the prospective visitor, is that everything is conducted on a perfect scale of system and unfailing experience. You are entering a country which, while just as wild as any place you may think of in the United States, it is thoroughly investigated, and familiar to all the guides; you have not to bother with those hundred and one things that will present themselves in arranging a trip into the mountains in alien country, having to rely upon whomsoever you find to guide you. Here you have but to take the train, get out, locate at the starting point, and the trip begins—no needless blunders or worries to oppress you, everything just right to start. Anyone who has been through the mountains will appreciate the strictly up-to-date conditions presented to the sightseer here, and this, mind you, in a country that seems to have never been touched since the Creator first made it. I can think of no better place to spend a vacation, with a limited amount of money, than in the Glacier National Park, and one will return with the conviction that it is the one big playground of this country, where the scenery is singularly heightened, where the most wonders exists, and where with rod and reel one may obtain some of the best trout fishing known. Try it.

LAKE McDONALD—GLACIER NATIONAL PARK.

The American Game Association's Farm in Massachusetts

By SYDNEY G. FISHER

DURING the last week in June, I had to attend a meeting of the Board of Trustees of Trinity College at Hartford, and after telling the incoming freshmen to be good boys, study hard and not waste their time in sports and amusements, I started off for a day at the American Association's New Game Farm, near South Carver, at the base of Cape Cod.

It is a peculiar region, rolling, hilly, sandy and with very little fertility; but covered with a heavy growth of scrub oak which never grows high, pitch pine, poplar and some white pine. The original forest was cut or burnt off, I presume, long ago, and what we see is the second and possibly in places third or fourth growth. The farm is about five miles long, and three miles wide, pretty much a wilderness; and the surrounding region is very sparsely inhabited, and with more dense cover for the wild creatures of the world than we often see nowadays in this country.

A peculiarity of the region is a tendency to form level boggy places along the sides of the numerous streams and also in depressions where there is no stream. These places vary from half an acre or less up to sixty or a hundred acres; and are usually planted in cranberries which form an important industry and an exception to the statement I have just made as to the fertility of the land. It is the natural soil of the cranberry plant; and both the upland and the bog cranberry grow wild there. These cranberry bogs I found in a previous expedition some years ago, to be characteristic of the region much farther southeast on Cape Cod, where occasionally I saw magnificent houses with beautiful well kept lawns, and on inquiring the name of the fortunate owner, was told, "Oh, that's just a Cranberry King."

In the game farm region these bogs are apt to be lakes of all sizes and shapes. Some of them are a trifle deep without much grass, reeds or mud in them. Others are very grassy, shoal and muddy; and these are ideal places for wildfowl to breed and feed. In some of them, Mr. Torrey, the superintendent, has placed a pair of mallards or black ducks with their wings clipped, and they have nests; and some of them have young ones. Even the ponds that are not grassy and muddy have thick cover close to the water's edge, and in time I think they will be breeding places, too. All the ponds and the surrounding thick green cover reminded me very much of the innumerable ponds and lakes I have seen in South Dakota, where the wildfowl have always bred in such great numbers.

The most interesting pond was the one devoted to raising woodducks. It is very grassy and shoal. Part of it has been fenced off with wire and a number of boxes, like a wren box, put on posts. The theory was that as the woodducks have for thousands of years been nesting in hollow trees, they would readily use boxes with suitable holes in them. Sure enough they did; and the flock placed in the enclosure with clipped wings has laid over seventy eggs in these boxes. The eggs have been removed and placed under hens. Some of them are already

hatched out, and I had the pleasure of seeing the ducklings.

There is one remarkable circumstance about them. I have been informed, and have read, I think, in books, that no one knew how the adult woodduck removed her young from the hollow

Torrey made a projecting shelf all around the pen to stop them. While I was there, on approaching the pen he found one of the young rascals sitting up on the shelf shaking his tail, smoothing his down with his bill and saying, "I have been climbing trees for a good many thousand years, my boy, and you will have to build more than a shelf like that to stop me."

This climbing faculty of young woodducks may possibly be an old story to naturalists; but it was "a new one on me," as the boys say. Would not climbing duck be as suitable a name as woodduck? What a strange history in the far distant past the bird must have had to enable it slowly to develop in its young this tree-climbing ability in addition to web-footedness. The Muscovy duck and some crosses of it will build in a hollow tree, if you furnish them with it; but I do not know whether their young are tree climbers.

The woodduck must have been developed during a long period of time in this country when old decaying trees or trees that afforded hollows of some kind were numerous near water. Some of the cypress swamps in Florida, where I have seen numerous woodducks, have been admirable places for them in this respect. The drowned lands which have been numerous in some parts of the country may also have afforded suitable trees. There used to be woodducks in New Hampshire when I was a boy, and the heavy and old timber along the streams would account for them. Water which developed feet that could swim, hollow trees as safer nesting places than the ground, a slight variation in the toes of some young fellow which enabled him to survive by climbing and long lapse of time and survival of the fittest did the rest. Darwinians will please correct mistakes if I make them; and also kindly tell me how the beautiful plumage of the male woodduck was developed.

One of the residents near the game farm, an experienced sportsman and observer, told me that hollow trees near the water had grown scarce and had almost disappeared, and in that way he explained why the woodducks had largely abandoned that region for nesting. His reasoning seems to be correct, and the converse also is probably true that if you supply artificial hollows for them to nest in, they will return to the region. Might not woodducks be encouraged and bred in this way all over the United States? Mr. Torrey, the superintendent, has plans in mind for hollowing out logs with the bark on and nailing them to trees in suitable places, or making boxes from slabs with the bark on which can usually be obtained at sawmills. Something of this sort must be done; for the disappearance of the old forest growth of the country and the general clearing up that is going on will soon destroy entirely the original conditions which created and perpetuated the beautiful woodducks.

On a large pond close to the house at the game farm, with proper wire enclosures, wild mallards and blackducks are being reared, and I saw many young broods. I also saw in the

TWO VIEWS ON AMERICAN GAME ASSOCIATION'S FARM.

tree to the water. The entrance to the nest is often twenty or more feet from the ground; and as the little fellows were put in the water long before they could fly, the wonder was how it was done. Some said that the mother took them on her back and flew down to the water with them. But we can dismiss all that; for the young woodducks at the game farm have shown how they do the trick. They climb up the side of their pen and out as easily as flies could do it. They have a sharp nail or something in each foot which enables them to walk deliberately up or down a board or log more easily than a lineman climbs a telegraph pole or a steeplejack goes up a chimney.

Finding they could walk up the wooden side of their pen whenever they liked, Mr.

bushes along the shore a blackduck sitting on her nest. How she did flatten herself out and concentrate her whole being on hiding. I have hunted and shot her shy race for many years, and it was a new sensation to be so close to one of them alive. The wild duck industry at the farm is very promising and comparatively easy. Will they not in time raise sprigtails, baldpates, goldeneyes, redheads or canvasbacks and teach the rest of the country how to keep up the supply?

The raising of the English pheasants is also comparatively easy and I saw scores of broods presided over by common hens. These are in charge of a Scotch game keeper of experience and training. When turned out wild they may survive the winters and be as numerous as they are in Oregon. There is certainly plenty of cover for them.

Almost as interesting as the woodduck problem and far more difficult, I should suppose, is the attempt to raise young ruffed grouse in captivity. These birds are native to the region and nest in the neighborhood of the farm. I saw several broods that had been hatched by common hens and were doing well. They are quite fearless and will not hide from strangers like the young pheasants. Mr. Torrey tries to reproduce natural surroundings for them and has them in a rather thick growth of young poplars. It is an experiment on which much depends.

There are quail in the neighborhood, and I heard two cock birds whistling bobwhite. No attempt has as yet been made on the farm to struggle with the heretofore unsolvable problem of raising young quail in captivity, but I have no doubt it will be undertaken. The farm was started only this spring and has got under good headway in an astonishingly short time. They would be much further advanced if contractors had not failed to supply some of the pheasants until too late in the season.

In short, I spent a most delightful day, learned a great deal and was most handsomely entertained by the very agreeable and competent superintendent and his wife. I recommend all sportsmen, naturalists and nature lovers to apply at once for membership in the American Game Protective and Propagating Association at its headquarters, 111 Broadway, New York. It is the organization we have long been waiting for. It is not confined to this one game farm I visited and which is merely a starter. It is nation wide in its purpose, prepared to deal with every problem of game preservation in Legislatures and in the field. It is intelligent and broad-minded in its management, and if we all support it there will be money and influence to carry out its plans. It is part of the great movement to teach the American people the conservation of their natural and national resources.

problem of a full utilization of the annual product of the deer herd, the problem of disease and the problem of protection from the ravages of lions, coyotes and other varmints. In addition to making a study of the three species of deer found here, the black-tailed, white-tailed and mule-tailed deer, Mr. Clarke will devote his attention to elk, mountain sheep and antelope. He is getting in touch with every deputy of the commission in districts where deer are to be found, and expects to get much valuable data from the observations of these men.

The offices of the California Fish and Game Commission have been removed from the Balboa Building to the Mills Building at Montgomery and Bush streets, San Francisco, where much more space than formerly used has been secured. It is anticipated that at an early date work will be commenced on a State Building for this city, and the commission will then have permanent quarters and ample room, not only for the transaction of business, but for the display of specimens of California animal life.

Camp Food.

PITTSBURGH, Pa., July 12.—*Editor Forest and Stream:* There seems to be a prejudice against oatmeal as an article of diet for campers and canoeists. This arises, I believe, from the fact that few know how to cook it properly and many confound it with rolled oats. Personally, had I to choose between oatmeal, rice and cornmeal for use in the woods, I would take oatmeal every time.

To cook oatmeal properly, for one person, add half a pint of dry coarse oatmeal (the kind our grandmothers used) to a little more than a quart of boiling salted water; let it boil for ten minutes, stirring and skimming off the pasty scum that rises to the top; then place the kettle where it will cook slowly for twenty minutes, giving it an occasional stir to prevent it from sticking to the kettle. Eat with milk, butter or maple syrup.

You will have more oatmeal cooked than you may care to eat at one meal. Pour the surplus into a spare cup or bowl, as a mold, and allow it to cool and harden. At the next meal it may be eaten cold or fried. To fry properly, remove the oatmeal from its mold, cut in slices, dip in flour and fry until brown.

Never soak the oatmeal before cooking. Never cook it in a double kettle. In either case you would get a pasty mess almost as bad as rolled oats, but not quite. Make your maple syrup in camp from maple sugar; it is easier to carry. Get your wife or the cook to show you how.

LORNA.

Louisiana Game Conditions.

ALABAMA State Game and Fish Commissioner John H. Wallace, Jr., returned last week from Baton Rouge, La., where he addressed the Legislature on the subject of conservation. Mr. Wallace was met at Baton Rouge by a committee of prominent and influential sportsmen. There is pending before the Louisiana Legislature a bill for the protection and preservation of game, birds and fish, embracing the principal features of the Alabama statute, and Mr. Wallace advocated legislation along the lines of the Alabama law.

Mr. Wallace said: "While I had anticipated

Hunting in California.

BY GOLDEN GATE.

THE deer hunting season in game districts 2, 4 and 5, comprising the central counties of California, is now in full swing and promises to be a highly successful one if the success of the season is to be judged by the number of deer slain. The reports received by city sportsmen early in the season to the effect that deer were very plentiful in these districts induced an unusually large number of them to get out on the opening day, and many bucks have been killed. The majority of the bucks brought in have been in poor condition, however, most of them being still in velvet. The opinion is general among sportsmen that the open season should not commence anywhere in California before the 1st of August, and even a later date is favored by many. The question of a revision of the game laws is now receiving the attention of the many game protective associations throughout the State, and it seems very likely that there will be some wholesale changes when the Legislature meets next January in regular session. Changes may be made at that time in the boundaries of the present game districts, as these were established more from a geographical standpoint than from any other.

In Santa Cruz county bucks seem to be very plentiful and some large ones have been bagged already. William Little, of San Francisco, brought down a seven-pointer at Waddell Creek, this being one of the largest ever killed in that vicinity, and the only seven point buck.

The Boulder Creek Gun Club gave a venison barbecue on July 7 and had plenty of venison for all. During the day a blue rock shoot was held on the club grounds. The officers of this club are: W. J. Caesar, President; Thomas Maddock, Vice-President; James Maddock, Secretary-Treasurer; Clyde Hickey, Official Scorer.

Mayor James Rolph, Jr., of San Francisco, enjoyed a few days' sport early in the season in company with three friends, the party accounting for four bucks.

The California Fish and Game Commission has commenced an important investigation of the deer of this State that will extend over a period of several years, and which, it is hoped, will throw light on a number of questions touching upon the conservation of game. This work will be carried on under the able direction of Frank C. Clarke, a graduate of the University of California, who received the unqualified recommendation of Chas. A. Kofoid, professor of zoology at this institution. Mr. Clarke is especially well fitted for this work, having been raised in the northern counties of the State where deer are plentiful, and having made a special study of animal life at the University. Last summer when a serious epidemic broke out among the deer of Trinity county, Mr. Clarke was sent there and rendered a report of much value to the commission. The new work of the commission will be to determine as nearly as possible the distribution and number of deer in the State, the ratio of the sexes, the effect of a prolonged killing of the males, the question of protection and conservation by law, the

finding conditions in a bad shape in Louisiana, I was not prepared to see them in such a chaotic state relative to game laws, and the enforcement of the statutes. I do not believe that I have ever known of a game commission to have fallen into such universal disrepute as has the one in Louisiana. No game law can be a success that does not contemplate the non-sale of game, and by this means obliterate the market hunter, which is the synonym of game hog."

Mr. Wallace urged the installation of the warden service as the only possible means of enforcing the provisions of the game and fish laws, and declared that local laws on these subjects had failed everywhere. He further said that a twenty-five cent hunter's license fee, as proposed, was a species of pusillanimousness that was unstatesmanlike and would cause the law to fall into certain disrepute and disrespect.

Mr. Wallace announced that in the event a model and modern law was not enacted by the present Legislature of Louisiana, the Governor would either assemble the Legislature in extraordinary session for the purpose of passing such a measure, or else the people of Louisiana would elect a Legislature, four years hence, that would appropriate a half million dollars for the purpose of purchasing game and fish to stock the State.

Game in North Dakota.

GALESBURG, N. D., July 18.—*Editor Forest and Stream:* All indications are that game will be very plentiful in North Dakota this fall. The country people report many large flocks of young prairie chickens all over the State. The sloughs are full of water and ducks have stayed here and bred in large numbers. The weather is perfect—abundant rains, cool nights and comfortable days. The crops are luxuriant and promising beyond compare. Another three weeks of favorable weather and the Northwest will be diving into the hugest harvest ever garnered. By Sept. 7, the opening day on birds, the grain will be about all cut, and we will be ready to welcome the visiting sportsman to all the good things which promise to be superabundant this fall all over the State. J. P. WHITTEMORE.

New Collection in National Museum.

A NEW collection of a novel sort has been opened in the National Museum, and though the collection is not large, it represents the peculiar phenomena of albinism. All of the birds and animals are white instead of their natural colors. The largest single specimen is a deer that is entirely white, but unlike some albinos there was enough pigment in its composition to keep the eyes dark instead of pink, as is the case with the most pronounced type of albinos. Beside the deer there is a 'possum, a 'coon, a white crow, a white loon, white sparrows and a small jumping mouse that is white and has pink eyes. There are a number of birds, some entirely and others partly white. There is a small case with half a dozen specimens just opposite the albino group. These animals are types of melanism, in which there is an excess of color instead of none at all. There is a woodchuck and other animals almost black. The collections are most interesting, and the types are accidental. The specimens accumulate very slowly.

Richardson Lake Fishing.

NEW YORK CITY, July 10.—*Editor Forest and Stream:* On June 1 I took a party of friends (in all we numbered eight) to Upper Dam, Me. We left Bemis and crossed Mooselucmaguntic by launch to Upper Dam and fished the best part of the week on Richardson Lake, one of the so-called Rangeley Lakes.

The inclosed pictures will speak for themselves, and I would particularly call your attention to that of Chas. B. Ames, of the Horseless Age Co., who was my boat mate. I photographed him while he was in the act of reeling

strated by the fashionable crowd present and the automobiles blocking the way. The high scores were liberally applauded, while the day was extremely hot and humid, still it was tempered by a delightful breeze, which while very pleasant to the crowd generally, interfered somewhat with the accuracy of some of the fly-casters. All in all the contest was voted to have been unusually interesting and enjoyable. Following are the scores:

Fly, distance:			
	Feet.		Feet.
M. J. Brennan 79	Geo. Ashton 70
Aug. Cyran 76	Ralph L. Smith 69
S. S. Pingree 73	I. H. Hellman 61
B. A. Fleming 72		

A "REEL" STUDY IN EXPRESSION.

in his biggest fish, and you will note that his guide is in the act of placing his net.

Each day we went fishing we met at a given point. All the boats contributed to the morning's catch, and the guides immediately commenced to manufacture chowder. We also enjoyed broiled fish, flap-jacks, steaks and all other items that go with camp food, and if you were present you would think that you were among a lot of kids about sixteen years of age instead of full grown and supposedly sensible men.

N. R. HOPKINS.

St. Louis Fly- and Bait-Casting Club.

ST. LOUIS, Mo., July 15.—*Editor Forest and Stream:* The bimonthly tournament of the St. Louis Fly- and Bait-Casting Club was held on Sunday, July 14, in Art Hill Lake, Forest Park. The popularity of these contests was well demon-

"Flying" into Controversy.

NEW YORK CITY, July 20.—*Editor Forest and Stream:* And now comes along Mr. Ralph Bisbee to swat the humble chronicler of the dry-fly. He asks: "But are they improving American angling conditions in the least?" The "they" means the aforesaid dry-fly writers.

Mr. Bisbee's question may be answered in true Yankee fashion by asking another: "Well, what about it?"

As a matter of fact nearly all literature has for its object either instruction or entertainment or both, and after wading through an enormous mass of angling literature during the past few years I can recall very little written for the distinct purpose of "improving conditions." So, I think, dry-fly literature is intended both to entertain and to instruct, but a thorough reading of nearly all of it leaves a distinct impression on the mind that there has been no school of angling writers with such uniformly high ideals of sportsmanship, and next to thoroughly stocking streams, keeping them from being polluted, and protecting fish by more stringent laws and better enforcement of these laws, I can think of nothing better calculated to improve angling conditions than thoroughly sportsmanlike literature. The dry-fly story rarely concludes with a triumph at the end of the day accomplished by the aid of a fat, juicy worm, cast into the best pool as the evening shadows are falling. In

I believe that this cult up to the present time must be given a clean bill of health.

Several times during the past year I have had occasion to quote T. E. Pritt's well known saying that anglers are not an intolerant folk, and have tried to believe it. Once I had a lot of trouble with this quotation, when an editor insisted on crossing out the "not." He explained this act of vandalism by saying: "But they *are* an intolerant folk." My reputation was saved by the reinsertion of the "not" after the article had gone to press. My belief in this saying perhaps was somewhat shattered when, early in 1911, some American dry-fly articles began to appear in American magazines. There seemed to be a disposition on the part of a few of the old-time wet-fly men to shy bricks at the dry-fly every time it was mentioned. Just why this should be so has always remained a mystery.

No one can claim that dry-fly methods are not thoroughly sportsmanlike. The tackle used is light and delicate; the fish has every show; casting the dry-fly and handling the line properly as the fly floats down stream require skill, and the method of fishing has many fascinations for its devotees. Our writers have not, I think, glorified it at the expense of the wet fly. Many dry-fly books have been published in England, while the Fishing Gazette, the English angling paper, devotes much space to the dry-fly weekly year in and year out. Why, then, should the dry-fly not receive its fair share of attention in our American sporting publications?

By the way, I met on a stream a week or two ago a stranger, who, as we talked things over, confided to me the fact that he was Mr. "Whirling Dun," who asked a question in FOREST AND STREAM about a yellow fly a few weeks ago and has been answered both by Theodore Gordon and Mr. Bisbee. He showed me the fly, and as I remember it, it had a light brown body, red hackles and yellow wings. It was not at all like our good old "yellow Sally." Mr. "Dun," for so I will call him, said that this fly was sent to him a few years ago by Cummins as a willow fly, but as it was entirely unlike the willow fly that he had used, or any described by the authorities, he made up his mind that Cummins had made a mistake. He did not use the fly for a long time, but the past two years has had much success with it.

Meanwhile, Mr. Bisbee, let the dry-fly man go on telling his tale. The "corpulent" writer mentioned by you, having handed out a few things for beginners, has performed his mission, so far as he can see at present, and is now waiting with you for the appearance of an infant American Halford. But before assuming the title the claimant should read Halford's "Autobiography" as well as Halford's other works, and understand just what the great English writer has accomplished in his life's work.

EMLYN M. GILL.

North Shore Casting Club.

CHICAGO, Ill., July 15.—*Editor Forest and Stream:* A communication received by me as secretary from the Chicago Fly-Casting Club dated March 15, 1912, stated that a tournament given by the four casting clubs of the city would be given during this summer, each club to be represented by five members.

The executive committee of our club con-

sidered that this plan disbarred the majority of the members of the various clubs, and therefore would not be representative of the whole membership, therefore declined to participate in said tournament.

At a subsequent meeting held by the delegates it was decided to hold a tournament under the following rules, which are heartily endorsed by our executive committees as giving every member a chance to participate in the sport:

"Every member of the four casting clubs are cordially invited to participate in this tournament. All of the members attending, regardless of what club they may be a member, will be divided into two parties, each under the supervision of a captain to be chosen at that time, each side to cast against the other for experience only, as no prizes of any kind are to be given. This very pleasant contest will be held at the anglers' casting pool, Douglas Park, Sunday, July 21, 10 o'clock A. M. sharp. Games played will be quarter-ounce accuracy bait and light tackle dry-fly accuracy."

The second series of the tournament will be held at the casting pool of our club on a date to be decided later.

The secretary wishes to congratulate the members on the good showing that we are making in our comprehensive schedule. It has been conclusively shown that we have in our membership men who can handle any of the games in the fishing line and handle them well.

The scores for July 13, 1912, follow:

Half-ounce accuracy bait:			
Hinterleitner	98.3	Marshall	99.0
Forsythe	98.9	Goodwin	97.2
Anderson	98.2	Bellows	98.5
Lambert	97.7	Ellsworth	93.2
Waters	98.0	*Gray	97.6
Liddell	96.3		
* Visitor.			

Re-entry:			
Anderson	98.0	Goodwin	97.1
Marshall	98.9		

Half-ounce distance bait; longest cast:			
Ercanbrock	135	Waters	100
Hinterleitner	139	Liddell	152
Forsythe	180	Goodwin	125
Anderson	130	Bellows	160
Adams	167	Ellsworth	160

Average of five casts:			
Ercanbrock	129	Waters	78
Hinterleitner	130	Liddell	125
Forsythe	136	Goodwin	109
Anderson	93	Bellows	137
Adams	130	Ellsworth	150

Accuracy fly:					
Hinterleitner	96	6-15	Liddell	99	3-15
Forsythe	99	9-15	Goodwin	97	9-15
Anderson	99	1-15	Bellows	99	11-15
Lambert	98	13-15			

C. O. DORCHESTER, M.D., Sec'y-Treas.

Newfoundland Notes.

ST. JOHNS, N. F., July 5.—*Editor Forest and Stream:* The angling season is now in full swing. Every day numbers of American sportsmen land at Port au Basque, and then hasten to various parts to whip the chosen waters.

Last week passengers that came from the west coast reported that salmon were never so numerous as they are this season; every river is overflowing with them, and it only requires the right weather for the fishing to beat the record.

Many prominent Americans are on the various rivers, and they are reported as having great sport. Donald Brian caught two salmon weighing respectively twelve and thirteen pounds, and Mrs. Brian, who accompanies him,

THE AUTHOR.

fact, nothing like this has as yet appeared either in English dry-fly writings or in our infant American literature on the subject. Up to date I have not met a dry-fly angler who has shown the slightest evidence of being a fish hog. So

landed a splendid fish that tipped the scales at thirteen pounds. By yesterday's report they were credited with three salmon weighing thirty-eight pounds. Several other New Yorkers were also reported for good catches.

Trainmen and sectionmen say that the herds of caribou migrating north this season exceeded anything they ever before saw. Some of the old hunters say that the caribou are increasing, notwithstanding the increasing numbers of American hunters to take toll each year.

On the last two public holidays a special traveler's train was put on, and over 200 anglers went out along the line. Many hundred dozen were reported, but as many of the fishermen exaggerated the size of their catches, no accurate estimate could be formed of the number of trout really caught.

The following rivers report great catches: Little, Crabbes, Robinson's, Harry's, Gander, Gambo, Salmonier, South East, Lapoile, Salmon Falls, Grand, Codroy and Middle Bara-choix.
W. J. CARROLL.

The Right Way With the Tuna.

THE welcome success of Mr. Ross with the big tuna of Nova Scotia, a well deserved triumph on which all his friends will have congratulated him, has necessarily robbed that particular en-

and others of us failed, a plan abandoned only at the last moment. He still, however, hopes to catch the record tuna, and I am certain that the special tackle which he has designed for the purpose will bring such an achievement immeasurably nearer to fulfilment.

FIG. 1.

A, Universal joint on plate to be screwed to seat. B, Universal joint in use with rod attached. C, Brake drum (at side of reel), showing link for tightening band. D, Lever, which works brake. E, Ring for hook of shoulder strap.

terprise of the quite unusual interest that attended previous efforts to capture the first specimen. Nevertheless, it is highly improbable that there will be any resulting diminution of interest in big-game fishing generally, and I have, therefore, the pleasure of recording, says F. G. A., in the London Field, some particulars of a most remarkable outfit for such sport on a grand scale, the invention of Mr. Lorenzo Mitchell-Henry, which I have recently been privileged to inspect. Mr. Mitchell-Henry has had long and varied experience of tarpon and other big fish, and it was his intention, in company with the Duke of Manchester, to have tried for the big tuna of Cape Breton Island last year, when Mr. Ross

Instead of the usual method of binding the guides on the rods, above and below, these guides, which are slightly tapered, are slipped over the point of the rod and find their own position where they firmly bind themselves. By this arrangement the rods can be bent or used in any direction required, and are not reduced to only two directions, as happens when the guides are bound on. Another advantage of this system is that the tips can be tied up together in a bundle without damage to themselves or the guides, which are only put on when mounting the rod. It is also quite possible that by this system a broken tip could be replaced if it broke while playing a fish, the guides and top

FIG 2.—LARGE TUNA REEL WITH BRAKE FITTED AND COVER REMOVED SHOWING BAND BRAKE AND BRAKE DRUM.

A, Bolt which goes through butt and screws into reel-plate. B, Split collar binding tip securely in butt socket. C, Brake lever.

guide being slipped off the broken rod and a new tip being put through the guide.

Fig. 1 shows an arrangement making it impossible for the rod or reel to twist, as happens when the leather cup usually employed is used. This device allows of free liberty to the rod to "pump" a fish, and also allows the rod to be swung in any direction, but in whatever direction the rod may point the reel is always uppermost, which is the object of the invention.

Fig. 2 shows the large reel specially made for tuna. It holds 400 yards of 39-thread line, and is fitted with a very powerful brake, which can, by means of the lever, be regulated with the greatest ease to any desired drag, from a free run to a dead stop. The bolt (a) in the figure also fills a long-felt want, as it fixes the reel absolutely solidly to the butt. The split collar at (b) when screwed up prevents any possibility of the tip twisting in the butt, which always occurs when winding the reel and holding the tip owing to the reel twisting.

Fig. 3 shows the support, which enables the shoulders and back to assist the arms in the mighty struggle in operation, and while there is quite a 20-pound pull on the line, in the photograph the rod, which is a very powerful one, appears hardly bent.

Such is the outfit, and if one item of it compels my admiration more than the rest, it is the perfect universal movement of the swing table, which, far more effectively than any other device I have seen, enables the rod to work with a minimum of friction in every direction.

FIG. 3.—ROD IN ACTION. SHOULDER STRAP AND BRAKE BOTH AT WORK.

 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

VALUE OF BIRDS ON THE FARM.

THE value of birds on the farm lies in the service they render in the destruction of weed seeds, rodents and insects.

Someone has said that "a weed is a plant out of place," and if this be true, some plants seem to have a well established habit of getting out of their proper sphere and into cultivated land. As a single plant of certain garden weeds may produce as many as 100,000 seeds in a season, if unchecked, these would soon become a decided menace to crops.

While the hoe and the cultivator may help to keep down the weeds on the farm, they still continue to grow in waste lands and along roadsides, and from there eventually spread to the cultivated lands. It is in just such places that birds are often most abundant, and so they play an important part in checking this increase. In fact, the seed-eating birds are among the most effective agents in the warfare against weeds, for they attack these pests in the critical seed period, and thus help to prevent their further spread. While a few seeds are simply scattered by birds, in nearly all cases they are destroyed. Dr. Judd, of the Biological Survey, says: "No less than fifty different birds act as weed destroyers, and the noxious plants which they help to eradicate number more than three score species."

Among the weeds commonly destroyed by birds are tarweed, turkey mullein, alfilaria, pigweed, knotweed, thistle and chickweed. Great numbers of seeds are often consumed by birds even in a single meal. The stomach of one sparrow contained 1,000 seeds of pigweed, while two other birds had taken 300 and 700 seeds of various kinds. Prof. Beal, of the United States Department of Agriculture, has estimated that the tree sparrows of Iowa will destroy, during the year, 875 tons of weed seeds.

Among the weed destroyers our native sparrows are unrivaled, weed seeds forming more than half of their food for the year. The value of sparrows to the farmer is increased by the fact that during the summer, and especially in the nesting season, they also eat many injurious insects. The young birds are fed almost entirely on insect food, including such pests as caterpillars, weevils, grasshoppers, cutworms and ants.

The one member of the sparrow family, which seems to be alike despised by both birds and man, is the imported English sparrow. While a few insects and weed seeds are eaten by these birds, the little good thus done cannot compare with the harm which they do, especially in driving out the useful insect and seed-eating birds. The English sparrows also destroy fruit and grain, and are a decided pest wherever they are found. The distinguishing mark of the male English sparrow is the large black patch on the throat and breast.

Among the other birds which hold a high place as weed destroyers are the goldfinches or "wild canaries," as they are commonly called. They often destroy certain weeds not usually taken by other birds, being especially fond of thistle seeds. For this reason they are sometimes given the name "thistle birds."

One of the game birds, the mourning dove, is especially worthy of mention as a useful seed-eating bird. While the dove sometimes takes grain, most of this seems to be waste grain taken after harvesting is over. These birds are most abundant, however, in waste lands where weeds abound, turkey mullein forming one of their favorite foods, while tumble weed and mustard are also eaten extensively.

The immense numbers of weed seeds destroyed by these birds is shown in the fact that the stomach of one dove contained 9,200 seeds of different weeds, while the stomachs of two other doves contained 6,400 and 7,500 respectively. If three doves at one meal can destroy 23,100 weed seeds and thus prevent the spread of that many noxious weeds, how much good could be accomplished by the doves on one farm in one county or throughout the State.

In the United States alone the annual loss from weeds has been estimated at \$400,000,000. In the face of these startling figures we can well realize the importance of protecting the useful seed-eating birds, one of nature's best means of checking just such losses.

WHITE PINE BLISTER RUST.

THAT the State of Massachusetts appreciates the seriousness of the damage that may be done is evidenced in the fact that stringent precautionary action against the white pine blister rust has been taken by the State Board of Agriculture when in an official order, signed by H. T. Fernald, State Nursery Inspector, the importation of pines of all kinds having the leaves in groups of five from any part of Europe into Massachusetts after June 1 is prohibited.

This action was taken because of the prevalence upon white pine trees and their four varieties of a very dangerous disease known as the white pine blister rust. This disease has practically ruined the growth of the white pine in Germany and France. Once established here, it

would kill all young pines of the five-leaved group, and ruin the larger pines.

Three places in Massachusetts are known to be infected with the white pine blister rust disease, but until the inspection by the nursery inspectors is completed late in this month, the exact amount of damage will not be definitely known.

This year there have been approximately only ten shipments of young trees made into Massachusetts. Of these two were discovered by Deputy Nursery Inspector W. S. Regan to be infected and were promptly condemned.

GOOD RESOLUTIONS.

IN last week's issue appeared resolutions passed at a recent meeting of Iowa Sportsmen's Association. They deserve a careful reading by every sportsman, and if he is a member of any sportsmen's organization, he should use his efforts toward having that body adopt identical resolutions. If he is not a member of an organization, the sooner he joins the better for the sport and the sportsman. If each State body of hunters and fishermen would get their organization working on members of State Legislatures, using as a slogan the following paragraph, taken from the Iowa sportsmen's platform, there soon would be a lot of action among State legislators toward the desired end:

"That this protest may be more emphatic, we agree, as sportsmen, regardless of political belief or affiliations not to support or favor any member of the Senate or House of Representatives who shall vote to divert the funds collected from the State hunting license into channels other than the protection and propagation of game."

FISH AND GAME DISTRICTS.

SEVERAL important improvements have been inaugurated in the division of fish and game by Commissioner James W. Fleming, but it is believed the most practical and satisfactory results in the protection of fish and game will accrue from the redistricting of the State and a more perfect systematization of the work of the protectors. Commissioner Fleming has divided New York State into twelve districts, each of which is in charge of a division chief protector. Each division chief has been advised of the names of the counties comprising his division, and the names of the protectors "who come under your supervision and control and who have been notified to make all reports to you." While each protector of a given district must give an account of his work to the division chief and look to him for orders, the entire force of division chiefs and protectors are under the direct management of Chief Protector Legge and Deputy Chief Protector Sauter.

COMMISSIONER WALLACE.

JOHN H. WALLACE, JR., game and fish commissioner of Alabama, deserves the support of every sportsman. He is relentlessly prosecuting violators of the game and fish laws in his own State, as well as giving his services to Florida and Louisiana. He is strongly opposed to market hunting, and believes with other worthy authorities that the surest method of propagation and preservation of game birds is the absolute prohibition of their sale.

YACHTING

Ticks from the Ship's Clock.

William H. Moffit was elected commodore of the Bayshore Motor Boat Club at the club's annual meeting. Dr. William A. Hulse was elected Vice-Commodore and John H. Ennis, Rear-Commodore. The club has a hundred members.

The annual cruise of the yachts of the Great South Bay Yacht Racing Association will start on Aug. 6. The fleet will rendezvous at Babylon. On Aug. 8 the run will be to Sayville; Aug. 9 to Patchogue and Aug. 10 to Bellport.

The Bay Shore Motor Boat Club opened its season last Saturday. Tommy III., owned by Thomas Forbes, of Freeport, won the speed class race with June Bug second. In the cruiser class A. Rundel, owned by Thomas Forbes, won, with Sunray second. J. A. Mollenhauer's Preston III. won the race for semi-speed boats and Charles J. Hill's Vinita won in the open class.

MISS MARJORIE COCHRAN driving Spree, won the motor boat regatta at Shelter Island Y. C., New York, last Saturday. Miss Cochran handled her flyer like a veteran.

The clubs in the Southeastern Long Island Association will have a busy season. The association race will be sailed on Aug. 3. Amateur club races will be sailed on Aug. 10, and on Aug. 23 there will be a ladies' race. The officers of this club are: Commodore, E. P. Maynard; Vice-Commodore, R. L. Dickinson; Fleet Captain, Theodore E. Conklin; Secretary-Treasurer, F. B. Lindsay, who with W. W. Hallock forms the regatta committee.

The Westhampton Country Club will hold races on July 30 and Aug. 17, and the Moriches Y. C. will have regattas on July 27, Aug. 17 and 31.

The Great Peconic Bay Y. C. will begin with a motor boat race. Justice William Rasquin, Jr., has offered a prize for the one-design class and three races are to be sailed. The yacht scoring the most points will win the prize. The dates are Aug. 3 and 31 and Sept. 2. There will be a free-for-all for motor boats for the Wunder prize on Aug. 10, and races for the Leggatt and Ludlam trophies on Aug. 17. The regatta committee is C. A. Ludlam, Albert E. Disney and William Leggatt.

Inland Lake Y. R. A.

PUT-IN-BAY, Ohio, July 16.—Twenty-eight boats entered in the first day's sailing races of the I. L. Y. A. regatta to-day; three from Cleveland, Toledo sent eighteen, Detroit five and Sandusky and Monroe each one. None of the Buffalo, Erie and Canadian yachts that have been brought to former regattas entered, and the total number of entries in the sailing classes is but little more than half the usual number.

Two of the Cleveland yachts won first place in their classes. Psammiad in the modern cruiser class and Hoorah in the 16-foot class, while Half Moon, skipper E. C. Botten, was second in the yawl class. Hoorah's winning has been protested by the crew of Rambler, of the Maumee River Y. C., Toledo, on the ground that she was potlead in violation of the rules. The summary:

Class F—21-Footers—Start, 8:55.		
	Finish.	Elapsed.
Toledo, T. Y. C.	11 06 26	2 11 26

Knickerbocker Y. C.

PORT WASHINGTON, L. I., July 22.—Dark brown weather greeted four yachts in the second race for the Kayah cup held yesterday. W. B. Beam's Paiute won, covering the course, 16.5 miles, in 2:57.55. Lynx, owned by A. E. Aigeltinger, finished 8m. later, with Rodman Sands' Ouananiehe nearly half an hour behind her. The next leg for the cup will be pulled off on July 28. The summary:

	Finish.	Elapsed.
Paiute, W. B. Beam	1 12 55	2 57 55
Lynx, A. E. Aigeltinger	1 33 10	3 18 10
Ouananiehe, Rodman Sands	1 58 20	3 43 20
Knot, C. E. Davenport	2 03 22	3 48 22

Corrected times: Paiute, 2:57.55; Lynx, 3:05.16; Ouananiehe, 3:21.10; Knot, 3:01.49.

Yachts Change Hands.

THE Hollis Burgess yacht agency has chartered the 52-foot waterline auxiliary yawl Vanessa, owned by Dr. John C. Phillips, of Wenham, Mass., to John J. Martin, of Boston, who will use her on the Boston Y. C. cruise and for other cruises in Eastern waters; the 70-foot motor boat Kasagi, owned by George E. Hills, of Boston, to a prominent Boston yachtsman; the 40-foot sloop yacht Hera, owned by Oscar M. Angier, of the Boston Y. C., to L. W. McCallum, of Chicago, and W. G. Spaulding, of Cleveland, for cruising in Maine waters; and has sold the 26-foot waterline auxiliary sloop Marchesa, owned by Allyn A. Stillman, of Hyannis, Mass., to James H. Jones, of Springfield, Mass.; the 18-foot waterline knockabout Shrimp, owned by Dr. Farrar Cobb, of Boston, to Alexander Kendall, of Cambridge, for use at Annisquam; the Swampscott racing dory Sea Dog, owned by Mauric Briggs, of Lynn, to C. M. Chapin, of Boston.

INTERNATIONAL TROPHY.

Presented by Commodore S. O. Richardson, of Toledo. To be raced for by "Patricia" and "Michicago" Aug. 10-17, under auspices of the Chicago Yacht Club.

Corinthian Y. C.

MARBLEHEAD, Mass., July 20.—Twenty-two boats contested in the club race of the Corinthian Y. C. this afternoon. In Class P there were four entries. Amorel was third over the line at the start, but after rounding Archers Rock Buoy she split tacks. Amorel led to the finish, defeating Italia by 56s. Sayanora withdrew. In Class Q Tabasco III. sailed the course alone. Four boats entered in the Sonder class, Ellen defeating Demon, the second boat, by 56s. Nine boats crossed the line at the start in the Marblehead 17-foot class. Daddy B won out over Dorma by 2m. Lolita carried away her mast near the finish and withdrew. In the Corinthian one-design class it was a close race between Wee Three and Pecayne, the former winning by 20s. The summary:

Marblehead One-Design Class.		Elapsed.	
Daddy B.	1 29 21	Moslem III.	1 35 00
Squaw	1 31 21	Neva	1 35 40

Demon	2 12 17	Clara	2 12 25

Beverly Y. C.

BUZZARD'S BAY, Mass., July 20.—Commodore Eustis brought his new 21-footer Skate over the line a winner to-day in her first regatta. Sally VIII. won in the Sonder class. Miss Elizabeth Coolidge took Water Witch over a winner in the Crane one-design event, while another lady pilot, Miss Esther Hosmer, took the Herreshoff 15-foot class by 1.20 in Pronto. There were eight skipperesses, which added much to the afternoon's enjoyment. The summary:

21-Footers.		Elapsed.	
Skate	1 55 30	Phantom	2 06 10

Duxbury Y. C.

DUXBURY, Mass., July 20.—The Duxbury Y. C. boats raced this afternoon in a strong southwest breeze. All the 15-footers, except Cucu and Gretchen, carried a single reef. In the 18-foot class Osprey 2d won by nearly a minute. In the 15-foot class Kit was an easy winner. The summary:

18ft. Class.		Elapsed.	
Osprey 2d	1 39 35	Aspinquid	1 40 45
Again	1 40 24	Croatan	1 45 50
15ft. Class.		Elapsed.	
Kit	1 43 55	Curlew	1 49 30
Virginia	1 44 41	Petrel	1 50 52
Elizabeth	1 45 06	Cucu	1 54 45
Merlin	1 46 23	Thistle	2 05 34
Gretchen	1 46 29		

Manchester Y. C.

MANCHESTER, Mass., July 20.—Ten boats of one-design class of the Manchester Y. C. crossed the line in a whole sheet breeze to-day. The boats made a pretty start. Teal and Ketchup going over together on the gun. Shad, Bluegrass and Minx followed. Gnat made excellent weather work out to the first mark, which she turned with a lead of 1m. 20s. over Bluegrass

and was never headed. Kiowa, Clarise and Teal followed in the order named, which was practically the order to the finish. The summary:

Elapsed.		Elapsed.	
Gnat	1 49 02	Vosetta	1 55 39
Blue Grass	1 51 59	Shad	1 56 52
Kiowa	1 53 59	Minx	1 57 37
Clarise	1 54 07	Hiccough	1 57 55
Teal	1 55 22	Ketchup	1 58 50

Winthrop Y. C.

WINTHROP, Mass., July 20.—Great sport was furnished to-day in the annual regatta held by the Winthrop Y. C. There were many mishaps and a misunderstanding in the motor boat men, but all in all it was a great, big successful regatta. The winners were: Class A, Nutmeg; Class B, Winona; Class C, Eleanor; Class S, Maritza II.; Class D, Clara; Class H, Marion III.; Class I, Dorchen; Class X, Barbara; Hingham one-design Mischief; cabin power boats, Gertrude; open power boats, Gerard. Annisquam Y. C.

GLOUCESTER, Mass., July 20.—On the first two reaches in the 15-foot class Princess led, with Tabasco second, about a half minute behind. At the stone beacon at the south of the river Nisan got the weather berth, crossing Tabasco's bow, but the latter fought every inch of ground and it was a race until the cannon sounded. In the catboat class little Priscilla Smith, the twelve-year-old daughter of Mr. and Mrs. B. A. Smith, gave her big brother Russell a rub to win with the Wiggin boat Bow Wow. The summary:

Chesapeake Bay Y. R. A.

CAMBRIDGE, Md., July 22.—Because of an unsettled protest, no winner was selected in to-day's regatta of the Chesapeake Bay Yacht Association regatta. It was claimed that Vingt Trois cut a buoy. The summary follows:

Sailing yachts, Class P, over 25 and not over 31 feet—Helen, Schneidereith and Gilbert, Baltimore Y. C.; started at 9:25:30; won by sailing over the course without opposition.

Class Q, over 20 and not over 25 feet—Vingt Trois, T. Johnson, Chesapeake Bay Y. C.; started 9:30:23 and finished 1:59:20.

Eleanor, Dr. I. E. Emerson, owner, Baltimore Y. C.; started 9:30:15 and finished 1:59:40.

Ojigwan, Tilghman brothers, Chesapeake Bay Y. C.; started 9:31; time not taken.

Class Y, Special for cruising yawls under 60 feet—Chenoden, J. A. Dinning, Baltimore Y. C.; started 9:35:24 and finished 2:06:30.

Fraya, Capt. J. H. Bright, Capitol Y. C.; started 9:37:15 and finished 2:16:45.

Serena, Capt. H. Cruet, Capitol Y. C.; started 9:36:05 and finished 2:22.

Neenemooske, E. H. Hewens, Capitol Y. C.; started 9:35:28 and finished 2:28.

Class Z, Special Class for cruising yawls under 26 feet—Wye, Capt. H. Huseman, Baltimore Y. C.; had no competition, started 9:18, time not taken.

Gloucester Y. C.

GLOUCESTER, Mass., July 20.—In to-day's regatta there were sixteen starters and a spanking breeze. The winners were: Onda, Elizabeth, Weasel, Tid 2d and Meave. The summary:

First Class.		Elapsed.		Corrected.	
Onda	1 22 21	1 22 21

Grilse, G. P. Roosevelt	4 50 04	1 26 10	

Larchmont Y. C.

LARCHMONT, N. Y., July 20.—Race week started auspiciously here to-day. The first regatta had 130 entries, and Larchmont luck was much in evidence. With a flat calm half an hour before the start, the first class got away with a full sail breeze for the southwest. The winners were: Winsome, Medora, Corinthian, Carlita, Gamecock, Vandalia, More Joy, Interim, Red Wing, Cliphora, Ogeemah, Natoma, Kenosha, Yukan, M. & F. II., Mile, Boss, Amethyst, Loon, Snapper, Little Dipper, Mary Jane, Go Go, La Rochelle, Iney, Alice, Joy, Wasp, Pixie and Barnacle. The new Gardner boat, Medora, in Class M, showed up remarkably well, beating handily Class L. Avenger. The summary:

Sloops—Class K—Start, 1:15—30½ Miles.
 Elapsed. Elapsed.
 Istalena 3 51 55 Aurora 3 49 18
 Winsome 3 47 45

Sloops—Classes L, M and N—Start, 1:20—23 Miles.

Thousand Island Y. C.

ALEXANDRIA BAY, N. Y. July 20.—The much exploited Bear Cat was beaten to-day by A. G. Miles' P. D. Q. in the elimination races for the gold challenge cup. Bear Cat came in about one-fifth of a mile behind P. D. Q., which will represent the Thousand Island Y. C. in the regatta on Aug. 1, 2, and 3.

- Jan. 22-25.—Pinehurst (N. C.) Country Club. Leonard Tufts, Pres.

DRIVERS AND TWISTERS.

The Kenmar Gun Club, of Jersey Shore, Pa., has forty-four members, and is planning to hold a big tournament some time this fall.

Next tournament of Central Pennsylvania Trapshooters' League will be held Aug. 22, at Ebensburg, Pa. W. R. Thompson is Secretary.

Second annual tournament of the Mt. Kisco Gun Club will be held on Sept. 25; \$250 in merchandise prizes; \$25 added money. Full information from A. Betti, Sec'y.

The sixth annual registered target tournament of the Hercules Gun Club, of Temple, Pa., will be held on grounds at Cotopaxi Swamp, Aug. 19. For particulars address A. K. Ludwig, Secretary, 930 North Second street, Reading, Pa.

Dupont Gun Club will visit the West Chester Gun Club, on July 27, to shoot a team race on the latter's grounds, and it is expected that about twenty-five members and friends will make the trip, which will be made in automobiles. Capt. Eachus, of the West Chester Club recently fractured his left arm, but he will be on hand to welcome the visitors.

W. L. Karcher and wife are members of the Freeport, Ill., Gun Club, and Mrs. Karcher participates in all tournaments given by the organization. She broke 19 targets out of 25 at last week's shoot, making a better record than many of the men.

In that Indiana town with the stimulating name, Bourbon, there is an energetic gun club, the officers of which are: Luman Russell, President; Oscar Loney, Vice-President; R. W. Stokes, Secretary; Dell Morrill, Field Captain. They shoot every Monday.

I have just received advance copy of program for seventh Western Handicap (reviewed in another column). The same nest egg—\$1,000 added money—wields its magnetic influence as usual, while the omnipresent Shanerian sign of success pervades the program. Remember, Aug. 14, 15 and 16. Further information from R. S. Elliott, Secretary-Treasurer, Kansas City Gun Club, 1221 Walnut street, Kansas City, Mo.

The Frank Hall cup championship will be held at the Alert Gun Club, Phillipsburg, N. J., July 27. While this cup can only be shot for by New Jersey shooters, still in order to have a good shoot we invite all shooters to be present, whether from New Jersey or not, and we will have the 100-target event, in addition to being the event for the cup, open for all as follows: Four 25-target events, \$1 entrance in each. Entrance for cup, \$3.50 extra. This shoot, as all will understand, is optional, and will start at 2 P. M. Extra events will be shot if time will permit. Ammunition will be on sale at the grounds. For further information write Edward F. Markley, Easton, Pa.

Greenwich (Conn.) Gun Club will hold an all-day shoot at Island Beach, Greenwich, Conn., Saturday, Aug. 3. Program commences at 10:30 A. M. Perfect background. Covered platform. There will be six events at 15 targets, 40 cents entrance in each; three at 20 targets, 45 cents entrance, and two specials (Nos. 10 and 11), 25 targets, \$1.25 entrance in each. Nos. 1 to 9 are for merchandise, class shooting, optional sweep \$1. Contestants may shoot for targets only at 1½ cents each. Events 3, 4 and 5, two-man team race for cup; events 7, 8 and 9, five-man team race for cup. Medal for high amateur in events 1 to 9 inclusive. Medal for high amateur run in events 1 to 9 inclusive. For further information address J. H. Finch, 93 East Elm street, Greenwich, Conn.

W. G. BEECROFT.

Indianapolis Gun Club.

INDIANAPOLIS, Ind., July 20.—Favorable conditions, fast work and surprises marked the meet of the Indianapolis Gun Club. First came Carter, emerging from mediocrity, who led in the first 100 targets shot at with 96 broken, and made a run of 58. In the finals, 160 targets having been shot at, Edmonson again led with 154, Carter being second with 149. Edmonson, starting with the fourth frame, broke 99 out of 100, losing only the 51st bird. That is the best performance credited to a local amateur in the history of the club. Summary:

Shot at. Broke.		Shot at. Broke.	
Edmonson	160 154	Britton	120 112
Carter	160 149	Ahg	120 100
Fayette	160 148	Foland	100 79

Neighbors	140 111		

R. R.

Throckmorton Gun Club.

THROCKMORTON, Texas, July 16.—We are all beginners, organized last March and have about twenty-five members. As we are forty miles from a railroad, we seldom have any professional shooters with us.

The scores of to-day are: H. A. Bachman 19, W. G. Thorp 8, J. B. Wilkinson 10, H. C. Roberts 16, A. B. Gober 14, M. H. Hoile 9, L. A. Hansby 11, John W. Craig 14, W. I. Craig 12, M. B. Bachman 15, W. A. Donald 13, J. T. Davis 6, Dr. J. E. King 12.
H. A. BACHMAN, Sec'y.

Roanoke Gun Club.

ROANOKE, Va., July 13.—Only twenty-one members shot over the traps of the Roanoke Gun Club to-day, the extreme heat being assigned as the cause of the absence of a number of the enthusiasts. We are pleased to note the improvement being shown by a number of the younger members, and hope that they may continue to show the same amount of progress during the remainder of the shooting season.

The weekly medals were won by the following members:

Scratch—First, M. S. Battle; second, S. S. Scholl.
Class A—First, W. S. Jones; second, H. F. Wilkinson.
Class B—First, tie between Boyd and Ferguson; second, B. J. Fishburne.
Class C—First, E. D. Heins; second, C. T. Jennings.
The scores, at 50 targets each, follow:

Per		Per	
Brk.	Cent.	Brk.	Cent.
Jones	46 92	MacFerrin	36 72
Battle	45 90	Ferguson	35 70
Wilkinson	44 88	Fishburne	34 68
Scholl	42 84	Jennings	33 66
Bloxton	41 82	D W Richards	32 64
Robinson	40 80	Thurman	30 60
Shepherd	40 80	Lightner	29 58
Bringman	39 78	Blankenship	27 54
Boyd	39 78	Berkeley	23 46
Holland	39 78	Martin	21 42
Heins	39 78		

July 20.—The regular weekly shoot held on the grounds of the Roanoke Gun Club to-day was well attended and thoroughly enjoyed by the twenty-eight members present. A number of ladies witnessed the shooting, and the club is always glad to welcome them, and hope that they may continue to visit the grounds and witness the contests each Saturday afternoon at 4 o'clock. The weekly medals were won by the following members:

Scratch—First, tie between Shepherd and Bloxton; second, Battle.
Class A—First, Jones; second, Wilkinson.
Class B—First, Ferguson; second, Boyd.
Class C—First, Holland; second, Berkeley.

BUSHONG, Referee.

The Western Handicap.

THE Interstate Association's Seventh Western Handicap tournament will be held at Kansas City, Mo., Aug. 14-16, under the auspices of the Kansas City Gun Club.

Kansas City, in Jackson county, Missouri, the second city in size and importance in the State, is situated on the right bank of the Missouri, immediately below the mouth of the Kansas River, 235 miles west by north of St. Louis. It is a large railroad center, several important lines meeting here, and giving the city large facilities for commanding the trade of western Missouri, Kansas, northern Texas, Oklahoma and part of Colorado and New Mexico. The business in agricultural products is very large, the beef and pork packing business being especially great, and growing with great rapidity. The city was laid out in 1830, but its growth may be said to date from 1860, when its population numbered less than 5,000.

Famous for its beautiful parks, boulevards, magnificent homes, enterprising citizens, progressive municipality and generous hospitality, it is a place to be desired by those seeking pleasure or business. Its general picturesqueness and natural attractions cannot be exaggerated, while in point of beauty and completeness its roads and drives cannot be surpassed. These alone furnish a never-ending change of scenery and beauty.

It was a wise choice when Kansas City was chosen as the logical point to hold the Western Handicap tournament in 1912. Located as it is in the geographical center of the United States, with its vast net of railways radiating to every habitat point of the Middle West territory, it is an ideal city to reach quickly and conveniently from all points in this vast scope of country, which has such a large following of sportsmen who love the pleasures of trapshooting.

The Kansas City Gun Club is the oldest organization of its kind in the State of Missouri, it having been brought into existence more than thirty years ago, and has been in continuous existence ever since. This in itself insures visiting sportsmen that there will be nothing left undone to meet their most exacting requirements. The Kansas City Gun Club is from Missouri, and it will "show you" from the first toss of your hat into the ring—the more hats the merrier. Special efforts will be made by all gun club members to see that visiting sportsmen are entertained, and their stay in the city made a pleasant one.

Kansas City has the shooting grounds and local management, and will overlook no chance to make memorable the Seventh Western Handicap tournament.

The conditions governing the Western Handicap are 100 targets, unknown angles; handicaps 16 to 23yds.; high guns, not class shooting; \$200 added to the purse; the number of moneys into which the purse will be divided will be determined by the number of entries. Entrance \$10, the price of targets being included. The

299-301 Broadway - - - - - New York, N. Y.

winner of first money is guaranteed \$250 or more. If first money falls below \$250, the difference will be made good by the Interstate Association. A trophy will be presented by the Interstate Association to the amateur contestant who makes the highest score.

Regular entries must be made at the cashier's office on the shooting grounds before 5 P. M., Thursday, Aug. 15. Penalty entries may be made after Thursday, Aug. 15, up to the time the first gun is fired in event No. 5, Friday, Aug. 16, by paying \$15 entrance, targets included.

The money will be divided as follows: Regular program and double target events, Rose system; ratio of points 5, 3, 2, 1. Optional sweepstakes, percentage system, 40, 30, 20 and 10 per cent., class shooting; ten entries and under, three moneys, 50, 30, and 20 per cent.

To be eligible for the Squier money-back system a contestant must compete in all regular program events.

The special events at double targets, and the Western Handicap are separate from the regular program, and it is optional with the contestant whether or not he makes entry for them. The Squier money-back system does not apply to the double-target events and the Western Handicap.

The first tournament was held at Denver, Colo., in 1906, open to all, and had a total of 227 entries in the main event. W. R. Crosby, of O'Fallon, Ill., handicapped at 21yds., was the winner, with a score of 97 out of 100.

The second tournament was also held at Denver, in 1907 with 202 entries in the main event. T. E. Graham, of Ingleside, Ill., handicapped at 19yds., was the winner with a score of 99 out of 100 shot at.

The third tournament was held at Des Moines, Ia., in 1908 with 143 entries in the main event. B. F. Elbert, of Des Moines, Ia., handicapped at 18yds., was the winner with a score of 96 out of 100.

The fourth tournament was held at St. Paul, Minn., in 1909, with 154 entries in the main event. F. H. Bailey, of Fargo, N. D., handicapped at 16yds., was the winner with a score of 97 out of 100.

The fifth tournament was held at Des Moines, Ia., in 1910; total number of entries in the main event, 119. J. E. Dickey, of Davenport, Ia., handicapped at 17yds., was the winner with a score of 96 out of 100 shot at.

The sixth tournament was held at Omaha, Neb., in 1911; total number of entries in the main event, 188. William Ridley, of What Cheer, Ia., handicapped at 19yds., was the winner with a score of 98 out of 100.

New Hanover Gun Club.

WILMINGTON, N. C., July 18.—John E. Taylor, of this city, a member of the New Hanover Gun Club, won the State championship event, after he and Mr. Chas. Nichols, of the Mecklenburg Gun Club, Charlotte, had tied for the honor with scores of 93 each. On the shoot-off, Mr. Taylor broke 25 targets out of 25, while Mr. Nichols broke 23. The highest amateur score in the State championship race was made by J. M. Barrett, of Augusta, Ga., who broke 95 out of 100, but not being a native of this State, his score did not count in the competition.

Iomer Clark, of Alton, Ill., was high professional with 149 out of 150 targets. H. D. Gibbs was second high with 145 and E. R. Holt third with 142.

In the high amateur class John E. Taylor and S. R. Coley, of Wilmington, and J. B. Pennington, of Tarboro, tied for first honors with scores of 140 out of 150. J. M. Barrett, of Augusta, Ga., was second with 139, Charles Nuchols, of Charlotte, third with 138. Scores:

Table with columns: Name, First Day (Shot at, Broke), Second Day (Shot at, Broke). Lists scores for various participants like J. B. Pennington, G. DeF. Wilson, etc.

Table titled 'Professionals:' listing names and scores for professionals like H. Clark, E. R. Holt, H. D. Gibbs, etc.

Buffalo Audubon Club.

The club members turned out in good numbers to our club shoot, twenty-three in all. It seemed like old times to see some of the members who have been out of the game for some time. We hope to see Messrs. Cannon, Imhoff, Eaton, Bargar, Babcock and Burgwardt out regularly in the future.

Some good shooting was witnessed by the many spectators present, F. S. Wright being high for the day with 93 out of the 100. Mr. Houpt shot well for the second time at the traps, finishing with 75 per cent. Messrs. Wright, Burke and Rappock were winners in the badge event in Class A, B and C respectively, while Wright, Imhoff and Houpt scored in the spoon event. In the W. H. Smith trophy event Messrs. Lambert and Imhoff won with straight scores in Class A and B, and Houpt won Class C. Messrs. Moser and Rommel made application for membership. Scores follow:

Table with columns: Name, Events (1, 2, 3, 4, 5). Lists scores for participants like Imhoff, Cannon, Ebberts, etc.

No. 2 was for badge; No. 4 was spoon event; No. 5 was for Smith trophy.

Lorain Gun Club.

LORAIN, O., July 20.—Fancy scores were made at the second annual registered tournament of the Lorain Gun Club, held Thursday, in spite of the high wind and rain-storm. Geo. Volk copped high average in the amateur events, "killing" 140 birds. J. P. Traxler was second with a score of 139, and C. E. Doolittle, of Cleveland, with a score of 138 out of a possible 150, was third.

The high wind and heavy rainstorm dampened the enthusiasm of the spectators, but the marksmen braved the stiff zephyrs and finished with good scores.

Cleveland turned out with a good bunch of sportsmen, as well as Sandusky. Come again, boys, we will not forget you.

Following are the scores:

Table listing names and scores for the Lorain Gun Club tournament, including J. L. Wadsworth, W. H. Archer, M. D. Stepp, etc.

*Professionals.

Western Pennsylvania Trapshooters' League.

BUTLER, Pa., July 16.—Seventy-nine is a pretty good bunch to turn out for a one-day shoot, but we got that many here to-day, and they all had a rattling good time. C. F. Moore got away with the big roll with a score of 143 out of 150. He started badly, losing 3 in his first event, and 2 in the third. He ran the second five events straight, with a straight in the fourth. There were three ties at 141 for place. G. E. Painter, Ad. Hickman and H. Gillespie comprised the bunch. Bill Crosby was big pro. with 146. He missed two in the 14th frame, one in the 4th and one in the 8th.

Table with columns: Name, Shot at, Broke. Lists scores for participants like J. W. Gribble, C. J. Jessop, E. Murray, etc.

*Professionals.

North Side Gun Club.

MILWAUKEE, Wis., July 14.—Despite the fact that the fishing season is on in full sway, and as quite a number of our members are very enthusiastic in the art of Izaak Walton, the attendance at the North Side Gun Club shoot to-day was very gratifying. E. Reichel led a field of twenty-four shooters by breaking 97 out of 100. Groffy Immekus, Gus Piepenhagen and Obenberger tied for second honors with 95. In the sweepstake of 25, Groffy and Piepenhagen broke even with a straight. In a special match Geo. Sell defeated E. Reichel by one target, breaking 24 out of 25. Scores:

Table with columns: Name, Shot at, Broke. Lists scores for participants like C. Groffy, E. Reichel, G. Immekus, etc.

In addition to the regular events there was a special match at 25 targets and a sweepstake of 25 targets. Scores: Sweepstake: Groffy 25, Reichel 23, Immekus 24, Gies 24, Sell 22, Lehnhoff 20, Krause 21, Piepenhagen 25, L. Pietsch 19, Geo. Himmelstein 21, Bruley 22, Obenberger 24, Imse 23. Special match: Reichel 23, Sell 24.

New Jersey State Rifle Association.

SEA GIRT, N. J., July 17.—The first trap shoot of the New Jersey State Rifle Association took place here to-day and was most successful. The score sheet looked like a page from ye olden days. They came from all parts. Mrs. Vogel shot pretty well on day one, but going off badly on second day. John Philip Sousa, J. T. Skelly, Les. German, Jack Fanning, Harry Kahler and other genial and artistic wielders of batons and rock-breakers vied with one another to keep up interest in the merry art of pull and bust. C. Newcomb took down high average kale with 288 out of 300. Harry Kahler, the redoubtable, made second upper with three less.

JULY 17.

*Professionals.

Triangle Gun Club.

MADISON, Wis., July 18.—There was a goodly gathering of powder igniters here to-day and plenty of excitement. A. E. Van Wald, did some great shooting, smashing cleanly 145 out of 150. J. F. Wulf trailed close up with 142, and but for a sad stumble in seventh and ninth events, would have come pretty close to counting. W. D. Stannard shot like a demon in the professional class. He broke straight in all but 3 and 4, finishing with 148 out of 150.

Table with columns: Name, Shot at, Broke. Lists scores for participants like W. A. Wager, J. V. Winter, C. P. Shumway, etc.

Professionals:

Table listing professional scores: W. D. Stannard.. 148, F. H. Siefkin 150, H. R. Patterson.. 150, C. E. Robbins.... 145.

Portland Gun Club.

PORTLAND, Me., July 20.—"Bobby" Hunt won to-day the third leg of the shoot at the Portland Gun Club for the Spotts cup with a score of 94 out of 100. This shoot will be continued for three months, at the end of which the cup will be awarded to the contestant having won the greatest number of legs. The first three matches were shot on June 29, July 4 and July 13. The first was won by Webster. Hunt has won the last two matches. The scores were as follows: Hunt 94, Wheeler 90, A. L. Dow 89, Dr. Hayden 87, Weymouth 77, Freeman 68, W. Taylor 38 out of 40, N. Taylor 40 out of 60.

Du Pont Gun Club.

WILMINGTON, Del., July 20.—Twenty-five shooters shot this afternoon in the fifth contest for the F. L. Connable trophy, postponed from the previous Saturday. Two were visitors and two others were not eligible under the rules of the club to win the trophy. This left a total of twenty-one competitors, and of that number Doc Steele carried off the cup with 24 out of 25 from the 18yd. mark. It was a popular win, and puts him on the honor roll, which already bore the names of W. M. Foord, W. Edmundson and H. P. Carlon (the latter having won the trophy twice.) The conditions provide that after the cup has been shot for twelve times, all those who have won the cup one or more times shall shoot off for final ownership. L. L. Jarrell had just hung up a total of 23 out of 24 from 18yds.

A special feature was a match between R. S. Robinson, holder of the 1911 Class D cup, and Dr. E. Q. Bullock, challenger. Dr. Bullock succeeded in having the right to have his name engraved on the cup by beating out his opponent by the score of 31 to 28.

On July 6, H. P. Carlon, H. W. Bush and Clyde Leedon tied for the Class B spoon. To-day they shot off the tie, and on the first string of 25 targets Carlon and Leedom tied on 22, Bush scoring 21. The second shoot-off resulted in a win for Carlon by 23 to 20.

Another match was also shot during the afternoon. This was between W. S. Colfax, Jr., holder of the 1912 Class A cup, and Ward Hammond, who challenged him for the trophy. Colfax shot in his usual good form and won easily, breaking 47 out of 50.

Walker Matthewson got together a squad of five men to shoot under conditions that earned for them the title of "The Foolish Squad." Each member of the squad shot at 25 targets and shot five different guns; that is, each man shot five targets first with his own gun, then passed on to the next position and shot with his neighbor's gun, and so on. In other words, the gun never moved from its first location, but was shot by five different persons. Ed. Banks broke 23, W. P. Northcott 19, Ward Hammond 18, William Coyne 17, Walker Matthewson 16.

Colfax made the best record on 100 targets, scoring 96, Banks had 95. W. P. Northcott, a native of Chicago, but a regular visitor at and a member of the club, ran his last 50 straight. Scores in the Connable cup event were as follows, each man shooting at 25 targets:

Tracy City Gun Club.

THERE will be a big registered tournament Aug. 14, at Tracy City, Tenn., by Tracy City G. C. Everybody with a gun and a good disposition is invited. Shooting begins 9 A. M. Targets 2 cnts each. Purses divided

into four moneys. The innerman will be provided for on the grounds on European plan—"you pays for what ye gits." Regular program has ten 20-target events, alternating cash and merchandise prizes, the first event having merchandise prizes. High gun for entire day's program at 200 targets, has three prizes. Prizes are to be given for high gun. Booby prize given to the low gun of the day. There will be several handsome merchandise prizes in each merchandise event. Special railroad rates can be obtained to Tracy City and return. Club officers are: E. C. Norvell, President; Geo. W. Tidman, Secretary.

Alabama State Shooting Tournament.

THE twelfth Alabama State shooting tournament will be held in Birmingham, Ala., at State fair grounds on Aug. 6 and 7, 1912, under the auspices of the Birmingham Gun Club. The officers of the Alabama State Association of Gun Clubs are: R. H. Baugh, President; J. A. Blount, Vice-President; H. McDermott, Secretary-Treasurer; Al. Geohagan, Cashier. A handsome silver pitcher will be presented for State championship.

E. C. CHALLENGE CUP AGAIN WON BY A RECORD SCORE

Peters

WITH

"steel where steel belongs" LOADED SHELLS

In a match at the Cincinnati Gun Club, July 4, H. D. Freeman (Challenger) won this famous trophy from C. A. Young (Holder) by a score of 189 to 172. This score of 189 is five targets better than that by which Mr. Young won the cup May 14, 1912 (also with PETERS Shells), and ten targets in excess of the best previous score with other makes of shells. The results of the match of July 4, in detail, are as follows:

	Singles	Expert Rules	Doubles	Total
FREEMAN - - -	98	46	45	189
YOUNG - - -	85	44	43	172

Here are some more winnings, adding to the already overwhelming weight of evidence of P superiority:

St. Louis, Mo.	June 23-24.	High Amateur Average	295 ex 300	by Harry W. Kahler

Cincinnati Gun Club.

HEAVY showers on the morning of July 21 cut the attendance at the weekly shoot far below expectations, only seven men showing up. The team match, scheduled for the day, was declared off, and a few events were shot between the showers. Of the amateurs, Eph Randall, of Mason, O., and J. Schreck tied for high gun on 69 out of 75. Dan Pohlar was at the grounds for the first time in several months and shot an 88 per cent. gait. George Walker did nice work in his last event, missing but one target out of 20. J. S. Day came over to get a little practice on doubles and shot a very nice race, breaking 47 out of 50 singles, and 46 out of 25 pairs of doubles, a total of 93. His match for the E. C. cup with H. D. Freeman, of Atlanta, Ga., the present holder, will be shot on these grounds on Aug. 24.

Dr. Hill, one of the old-time regulars at the Northern Kentucky's grounds, was out to-day, and showed that he has not forgotten how by breaking 80 per cent. of his targets with a borrowed gun. Shooting at 12 pairs of doubles, Pohlar broke 20 and Schreck 18. Len Shepard

played the triple role of puller, referee and scorer. The club is still looking for a chance to mix it up with some of the local clubs, and will welcome almost any kind of a proposition for a team match. Just drop a line to Supt. Arthur Gambell.

Targets:	15	15	20	25	25	Total.

Dr Hill	18	22	..	40

Greenwich Gun Club.

"BETTER late than never," come the scores of July 4 shoot at Greenwich Gun Club. It was a great day. Fifty shooters were entered and many shot the entire program. The background being the blue sky and Atlantic Ocean, was too clear for most shooters used to shooting across a field with a tree and bush backing, hence many scores were low. L. C. Wilson was high gun with 154 out of 165.

The team shoot was won by Sea Side Gun Club, of Bridgeport, beating Greenwich Gun Club team by 4 targets out of 250.

Championship of Greenwich was tied for by Luke Brush and J. S. Conover, at 91 out of 100; shoot-off won by Brush by one target.

High run medal won by B. J. Jones, 46. Scores:

The Amateur Long Run of the Tournament

*Mr. George Volk, of Toledo, Ohio, who was High Amateur with 388 ex 400, commenced shooting with another powder, but losing 6 out of 75, changed to  and lost only 6 out of his last 325.

WHAT WILL YOU SHOOT AT THE NEXT TOURNAMENT?

Grand American Handicap, 1912

Most wonderful shooting with

THE BLACK SHELLS

Mark Arie, of Thomasboro, Ill., with **THE BLACK SHELLS**, won **Amateur Double Championship - 89 x 100.**

High Amateur for all single targets, 657 x 700

High over all for all program targets, 558 x 600
(singles and doubles)

High over all for all targets - 746 x 800
(singles and doubles)

THE CONSOLATION HANDICAP - 96 x 100
at 20 yards

High over all for all handicap targets, 281 x 300

This remarkable shooting shows clearly what **THE BLACK SHELLS** will do in a repeating or magazine gun.

UNITED STATES CARTRIDGE COMPANY

Dept. H, Lowell, Mass.

Cumberland Gun Club.

DAVENPORT, Ia., July 17.—There was some race at our two-day tournament between Jess Young and Max Kneussel, and they never did decide who was the topper of the pair. Each made 291 out of 300. Kneussel outshot Young by one rock on first day, while conditions were reversed the second day. Each man made 13 straights, and each had two frames in which 13 were scored. Billy Hoon slipped in place with 284. Big pro. was C. G. Spencer with another 291, which, while only tying high amateur, was several doors further up the street than his nearest pro. competitor. Scores:

Jersey Shore Gun Club.

THE Jersey Shore Gun Club held its first registered tournament under auspices of the Interstate Association near Jersey Shore, July 17. More than forty marksmen were at the traps throughout the day, thirty-three shooting through the entire program. The high amateur

was George Clinger, of Milton, with 145 out of 150. D. Herald, of Sunbury, was second with 143, and Bryan Teats, third, with 142. The feature of the shoot was a run made by George Clinger, who broke 105 straight, and D. K. Kishel, of Ottawa, 113. The first merchandise prize was won by Mr. Donahue, of Lock Haven, on the toss of a coin after it became too dark to shoot. Mr. Donahue and J. A. Klinger, of Pine, were tied four times after shooting 100 extra.

Somers was high pro. with 129 out of 150. Daly broke 126, and Ed. Banks made 115 out of 120.

Orange Gun Club.

ORANGE, N. J., July 20.—A relay team match at the Orange Gun Club showed no winner to-day. The two leading teams of the three tied till too dark to shoot longer. Dukes and Marsh tied Wickes and Lockwood on original program of 20; they shot until 25 had been broken by each team. Then they retired. The other team was composed of Wakeley and Raymond, who broke 19 out of 20.

Wickes and Dukes were tied with a clean score of 25 for the Du Pont trophy, the other scores being: Mosler 23, Raymond 20, Wakeley 20, Lockwood 25.

At 15 pairs of doubles the scores were: Dukes 23, Mosler 23, Wickes 21, Yeomans 24, Wakeley 22.

On the Unger cup Lockwood scored the full 50, the other scores being: Dukes 47, Mosler 42, Wickes 43, Yeomans 41, Raymond 40, Wakeley 47.

Charleston Gun Club.

CHARLESTON, W. Va., July 20.—Fine conditions prevailed at the gun club's shoot yesterday. Sixteen shooters faced the traps and scores resulted as under:

Marshall Gun Club.

MARSHALL, Mo., July 16.—Nine enthusiasts took up arms in our weekly practice to-day. The program was 50 aerosaucers. Bagnell, F. H. Brown and E. W. Brown shot a great race. The former broke 47 for first, second going to F. H. Brown with 46, place being taken by E. W. with 45. In first 25 all three tied with 23, which figure F. Brown made also in second 25, E. W. missing three birds, while Bagnell missed only one. The scores:

E. W. Brown 45, A. F. Brown 44, Bagnell 47, Poye 33, Tucker 42, Tillery 42, F. Brown 46, Radford 38, Pote 33.

Rifle and Revolver

National Rifle Association.

BISLEY, Eng., July 20.—The National Rifle Association closed a successful tournament of a fortnight's duration with the completion this afternoon of the match for the King's prize, the principal trophy of the meeting. Private A. C. Fulton, a London volunteer, was the winner with an aggregate score of 335 out of a possible 350. The winner of the gold medal has appeared in the final of this competition four times previously, but each time failed to carry off the prize.

YACHTING NOTES.

Long Island Y. R. A.

THE Quantuck, Moriches and Westhampton Country Yacht Clubs of the Southeastern Long Island Yachting Association have prepared for a big season. The former will hold its first races on Saturday, July 27. The association race will be sailed on Aug. 3 and 10 and ladies' races on Aug. 27. The Westhampton Country Y. C. will hold its races on July 30, and Aug. 17. The Moriches Club regatta will be held on July 27, Aug. 17 and Aug. 31.

Motor Boating

Studebaker Cup.

Just how wild a flight of speed is really possible to the highly developed motor boat of the present day is a ground which nautical sharps have found fertile for argument. Practically all events at recent regattas have been raced on a course requiring one or more turns, and there

CLEMENT STUDEBAKER, JR.

are few skippers who have yet succeeded in getting the top speed out of their craft for the whole distance.

Clement Studebaker, Jr., the millionaire vehicle and automobile maker, has been closely

STUDEBAKER CUP.

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen. Shoot well because they hold the charge compactly together at extreme ranges. Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline. Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

Hunting Out West

May I Tell You Where To Go, And What To Take?

While anywhere in the great outdoors is of benefit to mankind, the delightful climate of the Rocky Mountains, the fascination of the Western life appeals most strongly to me. If you want to go in pursuit of Elk, Mountain Sheep, Mule Deer or Bear, I can put you in touch with reliable "game-getting" guides. I will tell you what to take and what *not* to take. I will do this willingly whether you buy your outfit from us or not.

Our new book No. 530 tells of Hunting, Fishing and Camping Goods for every section—North, South, East and West. May I send you a copy?

Tawhataui R. Robinson President

NEW YORK SPORTING GOODS CO.

Agents for Maine Hunting Licenses
15 and 17 Warren Street, near Broadway, New York.

(Patented, Feb. 20, 1912.)

SPORTSMEN'S GLASSES REVOLUTIONIZED

by our new **Akops Crystal** lense—a double shade of amber and veridian, and our own exclusive product—far superior to the old style, obsolete amber lense. The **Akops Crystal** eliminates not only all the ultra violet rays, but also all the violet and blue rays which are so irritating to the eye.

The amber lense is less than 50 per cent. efficient, because it cuts out only part of the ultra violet and does not affect the latter two.

Before buying a field glass or binocular, it will pay you to communicate with us.

THE F. W. KING OPTICAL CO. 450 Ellastone Building, Cleveland, Ohio

interested in the argument and took advantage of Detroit's Cadillaqua regatta to make an offer which should go far to differentiate between extravagant claim and actual performance.

Mr. Studebaker gave a massive sterling silver trophy to the motor boat making, during the regatta, the fastest flight over the measured "Studebaker Mile" course on the Detroit River. The event was open to all boats propelled by gasolene engines. The name of the winner will appear in our next issue.

The fastest of the world's motor boats were entered in the Detroit event and conditions were ideal for the very best results.

Carondelet M. B. C.

St. Louis, Mo., July 20.—At a meeting held last night plans for the second annual motor boat regatta, under the auspices of the Carondelet Motor Boat Club, were completed. It will be held on the Mississippi at the foot of Kraus street, Aug. 31, Sept. 1 and 2. Entries so far are: Reliance III., owned by John J. Ryan; Leading Lady III., owned by W. P. Cleveland, Galena, Ill.; Wigwam II., owner, Charles Wise, Astoria, Ore.; Wild Cat II., owner, W. D. Beauvais, St. Louis; Show Me, owner, Sidney T. Bixby, St. Louis; Disturber III., owner, Commodore James A. Pugh, Chicago, Ill. Edwin C. Koenig's Independence III., a 26-foot single step hydroplane, equipped with a four-cylinder, long stroke, 130 horsepower French motor, also will race. The builder of this boat, W. D. Beauvais, has guaranteed the owner a speed of forty-five miles per hour. The racing committee is: Dr. M. C. Starkloff, Commodore; C. W. Rippstein, O. R. Van Kleeck, W. J. O'Hara, W. Rudolf, Jr., J. M. Hass and J. Quirk.

Ocean Race.

NEW ROCHELLE, N. Y., July 20.—Power boat skippers seem to be afraid of ocean or other races requiring navigation. In the Block Island race a few weeks ago only three boats finished, while only seven entered. In the ocean race from New Rochelle around Long Island, under the auspices of the New Rochelle Y. C., held to-day, only three boats entered, these being C. R. Butler's Spindrift, Dr. Pederson's Respite and Dr. Geo. W. Van Benschotten's Half Moon. These power boats represent the Albany Y. C., Columbia Y. C. and Rhode Island Y. C. Respite won, being the only boat to finish the rough trip.

It's Easy to Reload!

If you haven't time to cast bullets, we furnish hand made bullets for any caliber at low prices. You then merely decap and re-cap shell, insert powder and crimp shell on to bullet.

Free 160 Pages **Does it pay?** You can reload 100 .32-40 smokeless short range cartridges (buying the bullets) in half an hour at a total expense of 77c.; casting bullets yourself, 38c.; the new factory cartridges cost you \$2.52 per 100.

The **Ideal Hand Book** tells about reloading all rifle, pistol and shotgun ammunition; free for 3 stamps postage.

L. C. SMITH GUNS

Safety Rigs for Motor Boating Emergencies.

BY GEORGE ETHELBERG WALSH.

EQUIPMENTS required by law for motor boats are only such as ordinary common sense would dictate to safeguard navigation, and the owner of a craft will not stop short with these if he considers the safety of his boat and himself. The navigation laws do not require the carrying of emergency rigs, for their intent and purpose is to protect the water highways from the invasion of the rights of the many by a few careless or ignorant people. They do not attempt to formulate rules for the protection of the individual against himself. A motor boat must perforce carry lights, whistles, life preservers and similar equipment, but he may use an old leaky tub for his boat, carry a wornout cranky engine, take insufficient gasoline, and leave his tools behind without in any way breaking the navigation laws. That is all a matter that concerns him alone.

But the experienced motor boat owner and navigator supplies himself with all sorts of emergency equipment.

Now, it is no reflection upon the value or seaworthiness of the motor boat to make proper preparations for accidents that may happen to the motor or machinery, and breakdowns may be caused by heavy seas and storms. No man who ventures far from the shore is sure that he will return safely to it without encountering bad weather.

An emergency sail rig is now considered necessary for motor boats which take long cruises or trips along the coast, or on any of our great bodies of water. Such a rig enables the navigator to get back to land without the use of the engine. The emergency sail rig is simply large enough to give good steering headway, so that the craft can be kept from drifting and work its way slowly into port. A rig of this nature can be stowed away in a small space. It may not be used for years, possibly never, but when needed is invaluable.

Both sail and spar should be strong and serviceable. The average motor boat is not built with the idea of carrying a sail, and consequently it must not be large, or the hull may be strained. A small leg of mutton sail will answer for the average boat. Emergency outfits of this character may easily be obtained or rigged up on shore. The yard should be jointed, and masts in the form of a joint that can be let down are convenient. Many standing masts on motor boats are of the jointed form so that they may be let down without unstepping when passing beneath bridges.

The emergency sail rig should be strong enough to withstand a hard blow. A very small sail area will give a good deal of drawing power to a motor boat that has good lines. A tall mast is, therefore, not required, nor for that matter a heavy or cumbersome one. The whole rig should be simple, easy of stowage, with good driving power, and so arranged that it can be quickly installed and operated.

A great variety of these sail rigs are made for motorboats of all sizes, but for a small craft under twenty-five feet any ingenious yachtsman can rig one.

When caught off a bad coast in a storm the navigator experiences many difficulties unless he is prepared for the emergency. The storm may prove too severe to make headway against the wind and waves. The motor may be working, but to drive it at full speed against waves and wind may prove risky. To slow it down may mean loss of headway, and that is a bad business. In such an emergency the only safe course often is to anchor and ride out the storm.

But how many motorboats that go to sea for short trips are prepared to ride out a storm? If properly equipped, however, a good staunch, seaworthy boat can ride out about the roughest storm that springs up suddenly. The motorboat that plunges forward under full power is liable in a heavy storm to broach to and roll over or to drive the nose under each crested wave. There

FOREST AND STREAM PUBLISHING COMPANY

is always the danger in such an emergency of the engine failing.

The experienced motor boat navigator would have his anchor ready for immediate use and also his oil bags. The anchor equipment of a seagoing motor boat is one that needs special attention. Most boats designed for still water sailing carry an anchor or anchors inadequate for use off shore in a storm. The most common fault is too light an anchor and too short a cable. If the water is not too deep, a motor boat properly anchored off shore can ride out the storm that is too severe for the boat to face with the engine running.

The anchor then has real work to perform, and the test of its usefulness is never more critical. In the heavy sea the boat will rise and fall on the waves, and this will give a tremendous jerk on the cable and anchor. The tendency is to jerk the anchor up each time the boat rises and dragging follows. The longer the cable in such an emergency, the longer the slant it will have, and consequently the less upward jerk on the anchor. Extra lengths of cable for emergencies should always be carried along.

The small anchors perfectly suited for fishing and anchoring in mild weather are of little use in a storm. For sea purposes or for use on the Great Lakes a boat of one ton should not have an anchor weighing less than twenty pounds, and a two-ton boat should carry one of at least thirty pounds, and a four-ton boat from fifty to sixty pounds. These figures, however, are hardly adequate for severe emergencies. The best rule is for a motor boat of thirty feet to carry a forty to fifty-pound anchor and a twenty-five-foot boat a twenty to twenty-five-pound anchor.

Few motor boats carry sea anchors, and yet they are of the utmost importance. One reason why sea anchors are not generally carried probably is the comparative ease that one can be extemporized in an emergency. A good seaman can extemporize a fairly good sea anchor out of a pair of oars and some canvas, or for that matter from planks ripped up from the bottom or side of the boat. The oars are crossed and the ends fastened together with rope. Then a piece of canvas is cut to cover one side, hanging down in the middle to form a sort of pocket into which some heavy article of metal is placed. A rope bridle is formed, crossed from two corners of the frame, and to this the cable is attached. But after all the necessary materials for extemporizing a sea anchor may not be aboard, and in that event considerable trouble would be experienced in riding out the storm. It is much better to make the sea anchor at home and carry it stored away in the boat.

The simplest form of a homemade sea anchor may be constructed on shore. For the ordinary motor boat take an iron ring twenty-five to forty inches in diameter, cut a piece of canvas to fit around the iron and lace it to the ring. The depth of the cone should be about twice the diameter of the mouth. When cut to the proper shape, sew a double seam down the outer side. At the end of the cone fasten a small iron ring to which a light tripping rope is attached. This is useful in hauling in the sea anchor. A rope bridle of five ends should be fastened to the ring and brought together in a knot about two feet from the mouth. A ring should be attached so that a cable can be quickly fastened to it. A sea anchor of this character takes up little more storage room than required for the circle of iron, and it can be tucked away in a locker until needed.

An ordinary pail has been used in emergencies as a sea anchor, and also wooden buckets. The handles of these, however, are apt to weaken under the strain and give way.

As a last resort in a heavy sea the motor boat navigator must resort to the oil bags. With the sea anchor holding the boat up into the waves there may still be danger. The crested waves may be so high that they break over the bow and gradually swamp the craft. In such an emergency the oil bags may save the day. Like the sea anchor these can be extemporized in an emergency if the necessary materials are at hand. But advance preparation is always the safest. It is easier to make the oil bags on shore and store

them away with the sea anchor and extra cable lengths.

The oil bags may be made out of old pieces of canvas in any shape desired. The most acceptable and usual shape is cylindrical, and about six inches in diameter. The bags must be made of at least three or four thicknesses of canvas so that the oil will not escape too freely. The bags are stuffed with oakum, and with a rope bridle attached they are ready for use. When needed they are first attached to a short length of cable, and then the oakum is saturated with cylinder oil. These must be used freely until the oakum has absorbed all it will hold. Usually it is wise to attach to the oil bags a small, wooden float, for sometimes they prove so heavy that they will sink. They must float on the surface to give the proper results. A little experiment with them when finished will enable one to judge how large a float is needed. Some place a piece of cork the size of the fist in the bag to make floating certain.

The oil bags should be floated a few fathoms ahead of the boat to quiet the breaking waves. Two oil bags floated ahead of the boat on either side will suffice. If the storm proves a long one the bags can be hauled in as needed and replenished with more oil. In this way one may safely ride out a rough storm for forty-eight or more hours. Many a boat and yacht has been saved by the sea anchor and oil bags. Where there is plenty of sea room the boat can be allowed to drift indefinitely with a good sea anchor thrown out, and there will be no danger of the boat drifting around so as to get the pounding seas on the side. The motor may be dead or kept going very slowly if it is not desirable to drift too far.

When all these precautions have been taken and the seas continue to break over the boat, the only thing left to do is to get on the life preserver and wait for the end. But do not abandon the boat until it has actually sunk. Many an abandoned boat has eventually floated ashore in perfect condition or been picked up by other vessels while the frightened occupants were drowned in trying to swim to the shore.

The old maxim of the sea still is: "Stick to your ship until the last." Then take to the sea, but don't forget your life preservers. Moreover, don't be ashamed to pass out the life preservers before it is too late. It is no sign of cowardice or panic to insist upon every one wearing a life preserver when things begin to look squally and threatening for the safety of the boat. Preparedness for the worst is good seamanship.

THE ANGLER'S WORKSHOP

Rodmaking for Beginners

By PERRY D. FRAZER

Not only Americans, but anglers of Great Britain and nearly every European State, South Africa, Australia, Canada, are making their fishing rods under the simple instructions laid down by the author in this useful little manual. A Japanese, after reading the book took up rod repairing for his fellow countrymen as a business. An Englishman followed it in making several of the sixty-five rods that he has in his collection. A Russian appreciated the book so much that he suggested a Russian translation. The British sportsmen's papers have quoted from it time and time again. In that country it has helped bring about a great change in rod types, and to attract attention to the excellence of American fishing rods. In fact "Rodmaking for Beginners" has become the standard manual wherever fishing with rod and reel is practiced.

The reason is obvious. The book is written in plain English, and all the details are set down so simply that a boy can follow them. All of the types of rods used on fresh and salt water are described and specifications given. Separate chapters cover all details, and the one on split cane rodmaking is the only comprehensive treatise on that subject ever published.

Cloth, 180 pages, four full-page illustrations, 60 working drawings, making plain every feature of the text. Postpaid, \$1.00.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK

PARTRIDGES IN CAPTIVITY.

THE State game hatchery at Wilbraham is making an experiment in partridge propagation that will be watched with interest by sportsmen all over the State, and if it proves successful it will demonstrate something that has long been hoped for, but never realized.

The State hatchery has proved that pheasants can be raised and bred in captivity, but the partridge, with its shy and timid ways, has been an uncertain problem all these years. At last the State hatchery has succeeded in hatching fourteen partridges, all of which are living and are doing finely and bid fair to reach maturity in captivity.

The method under which the State became possessed of these birds has a local flavor, for they were hatched from Great Barrington eggs. Game Warden Sargood on one of his hikes over Beartown Mountain into Great Barrington territory came unexpectedly upon a partridge's nest in which there were fourteen eggs upon which the mother bird had sat for ten days or so. Sargood gathered up the eggs, wrapped each one in cotton batting and some other protection, and carried them to the State hatchery.

The eggs had been six hours away from the nest when he reached the hatchery, but fortunately a bantam hen had been setting on a clutch of pheasant's eggs just about ten days, so they transferred this bantam to the partridge eggs and she hatched every one of them. Now the hatchery people will do their best to so domesticate these young partridges that when they reach maturity and arrive at the laying stage their eggs may be hatched in captivity and the flock at the hatchery thus materially increased until in course of time partridges may be put out from there into the woodland covers the same as pheasants are now handled.

This means the solving of a problem that has long been considered, but which hitherto, from lack of the right opportunity, has not before been tried at the hatchery. There has always been such an element of doubt entering into the problem in scuring eggs at the right time to insure a hatch that many obstacles have hitherto surrounded the attempt. Now the way to success appears most encouraging.—From the Berkshire Courier.

OYSTERS NOT POPULAR IN AUSTRIAN CAPITAL.

CONSUL-GENERAL CHARLES DENBY, of Vienna, Austria, says: "Oysters are offered for sale in several large Vienna restaurants, always in the shell, but they are not much in demand. They are seldom served in private houses or at banquets. The oyster usually found in the restaurants is the Whitstable oyster, sold on the half shell at six crowns (about \$1.20) per dozen. On the Adriatic coast of Austria, at Trieste and other cities, local oysters are peddled about the streets, but this variety seldom reaches Vienna.

There were imported into Austria-Hungary in the year 1910 twenty tons of oysters valued at about \$10,000. They came from Belgium, Germany and Holland. There is fast freight transportation in Austria, performing all the functions of the express service in America. The refrigerator service on Austrian railways is at present not fully developed, and a service of refrigerator cars on a regular time table does not exist."

MALTESE CATS AND DOGS.

CONSUL JAMES O. LAING, resident at Malta, says: "Many requests have been received from Americans to be placed in touch with breeders of pure-bred Maltese terriers and cats. There are a few of the so-called Maltese terriers in Malta, but they are not of pure blood, and the puppies, which the street hawkers offer for sale to tourists, are more or less mongrel with a strain of the old breed. The Maltese cat does not exist in Malta; at least not one has been seen here of the color called Maltese in the United States."

Heinz Foods Take the Edge Off of "Roughing It"

YOU'll have all the joys of outdoor life—without the hardships—if you take along plenty of Heinz Food Products.

With the delightful changes they offer you'll never grow tired of camp fare. No puttering. No shifting the cooking job to Bill or Jim.

Your meals will be ready when you are ready—and always delicious—appetizing—satisfying.

You can prepare an excellent meal in a jiffy from a selection of Heinz 57 Varieties.

Take along plenty of Heinz Baked Beans.

They are really baked. Rich with a nut-like flavor that baking alone can give.

Heinz Cooked Kraut with pork in tins is ready to serve. And Heinz Peanut Butter solves the butter problem.

You will want to take Heinz Ketchup and the famous Heinz Pickles—Sweet and Sour—great appetizers. Also Heinz India Relish, Select Olives, Mustard—Heinz Tomato Soup.

Yes, you'll want Fruit Preserves, too, and Apple Butter. And Heinz other things.

Make out a list before you start. Heinz Foods are conveniently packed—easily handled. Good grocers sell them everywhere.

Heinz 57 Varieties

THE CAMPER'S OWN BOOK

A Handy Book for Devotees of Tent and Trail

This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see here. It is "woody" from cover to cover—stirred by lake-breezes and redolent of pine.

Authors of country-wide repute have, with their enthusiasm and familiar knowledge, aided its making. Stewart Edward White, Edward Breck, Frank A. Bates, Charles Bradford, F. C. Selous—these and others join this camp-fire council. They say their say about a hundred little practical details that hold close interest for you; and they spin a yarn or two by the way.

"The Camper's Own Book" measures 8x5 3/8 inches over all. It is a goodly generous volume, with 194 pages handsomely set in Scotch-Roman type, and 13 of the finest illustrations you've ever seen. Everybody should have a copy who believes that a day under the free sky makes the pomp of emperors ridiculous. And you're one—you know you are.

Roughing it in Big Cypress

By WILLIAM PERRY BROWN

WILD life, of the shootable kind, is much more in evidence in the Big Cypress than amid the more open savannas of the "Grasswater," or Everglades in South Florida. To hunt in the Big Cypress swamp it is best to either go in the dry season—always uncertain as to time and duration—or to proceed through some of the many waterways by boat, with a competent guide. In fact, even at this day the average tourist sportsman is apt to hear more about this tremendous swamp than he is likely to see, for the difficulty—not to speak of the expense—of penetrating the surrounding country is, to many, too discouraging.

The Big Cypress lies south of the Caloosahatchee River, from which it is separated by broad stretches of open pine land, low scrub ridges, and smaller isolated areas of hammock and saw grass marsh. A good deal of this flat, open country in Southern Florida is so often flooded during wet seasons as to be termed "drowned lands." Miles upon miles of it may then be traversed on horseback, the depth of water varying from "shoemouth" to near swimming depth, the last when one happens to strike a natural watercourse or saw grass, for at these wet times all things look alike to the traveler—water, water, everywhere, with the perpetual forest, and forest undergrowth alone deceiving the eye with fallacious promise of dry land.

One who can go from Tampa or the Charlotte's Harbor section along the gulf coast down into Gallivan's Bay and below Cape Romano and effect a landing with suitable guides and other equipment, may enter the Big Cypress from the west without much trouble. Along this side some of the larger hammocks have been secured by private individuals for game preserves or plantations to raise tropical fruits. This last, however, only to a moderate extent. If the great drainage development goes on under State supervision as at present, this region as well as certain portions of the Glades will be much more accessible. But at this time to reach the more accessible points nearest to the big swamp, the tax for a coasting sloop, boats, guides and other paraphernalia is beyond the purse power of ordinary, every day hunters, unless they club together, or are personally known to some one of the class of individuals who have already secured a foothold along the edge.

When once beyond the immediate influence of railroads, steamers, and the towns they have created, the natural conditions surrounding and within the Big Cypress are much the same as when the Seminoles took refuge there in the

wars with the whites, and when, after most of them were taken west, the remainder made their final home in the Everglades.

Coming to the big swamp itself, when we reflect that here is a water-wooded wilderness

probably larger than the Great Dismal (in Virginia) and the Okcfenokee swamps put together, we may have a stray notion as to its extent. Add to this that it is so far south that frost is practically unknown, with all which this implies

THE BIG CYPRESS.

in regard to natural wild growth and animal life, we may easily doubt if there is another region of similar extent and formation where such phenomenal conditions exist in our own broad land.

It is probably almost the last refuge for the alligator, now so nearly exterminated in more settled regions. A species of this tribe, here and in the Big Mangrove Swamp (southeast of the Glades) is so fiercely carnivorous as to be locally called crocodiles, though there is no evidence to prove that they are closely akin to the terrible man-eaters of equatorial Africa or the far East. They are more allied to the huge, savage cayman of the Amazon and other tropical South American swamps. But they are isolated, few in number, and their habitat is limited through natural causes. Many years ago, when living in South Florida, I saw a Seminole lad near Fort Dallas, who was one-legged—the only one-legged redskin I ever met. I was told that when he was very small a crocodile attacked his father, who was toting him across a bayou or lagoon. Whether the parent got clear I know not, but the kid lost a leg.

Penetrating these "drowned lands" that belt the Big Cypress is by no means easy or pleasant, except in very dry seasons, which here are exceptionally infrequent owing to the Gulf stream and the humid west winds off the Gulf. The flat monotony is broken by clumps of stunted pine, and saw and cabbage palmetto. Nearing the Big Cypress these clumps increase in number and size. Camping on the way is not comfortable, for only in the highest spots, amid these clumps, is the earth dry. One learns to distinguish the dryer clumps by the kind of growth thereon. Pine, oak, hickory and other hardwoods seldom attain much vigor; where the water "sobs" the earth they grow in all the year round. On the lower swamp islands those hammocks, where cypress, gum, water oak, mangrove and certain kinds of bay and magnolia flourish, they indicate wet and miry soil. Some of these Big Cypress hammocks are so large as to seem interminable. The ferns are gigantic, while the melancholy Spanish moss festoons the branches above so as to exclude the very sun.

The term "island" down there is merely relative, meaning not so much dry land surrounded by water as land that is a trifle higher than similar land immediately surrounding it. Everywhere the tall cabbage palm raises its clustered fronds, and everywhere the moss streams alike from all higher timber, its long, trailing gray masses dominating the whole in a way hardly possible to describe. It is in these vast, intricate "islands," where the soil is always oozy and sunlight hardly ever penetrates, except in spots, that the deer, bear and turkey find refuge when their feeding grounds are disturbed by the hunter. Snakes abound, many of them poisonous, such as water moccasins, swamp adders, ground rattlers and the like. High boots, or leggings of thick leather, should be worn by the more venturesome.

Bear are fairly numerous in the Big Cypress. They are rather small, cowardly, and unless young and quite fat, not good eating. Their rusty, brownish black hides are less valuable in the fur market than hides procured further north. When wounded, cornered, or in defense of their young, they may put up a fight to the extent of whipping a dog or two. But it re-

quires no great skill to murder one when cornered. The real test of sportsmanlike grit lies in getting there yourself with your weapon dry and serviceable. The recesses where these bear will penetrate before being treed or held up are such a mass of intermingling brush, vines, ferns, bottomed in depthless ooze, one wonders not so much how he got there, as to how he will get the bear out. Still it is often done, and bragged about on hotel porches thereafter where the surroundings are more congenial to yarn exaggerations than the actual occurrence—bad as it was—would altogether justify.

Deer may be had almost anywhere in season. They are more plentiful than in the open glades to the east. One may not see many when tramping, but they are in the thick places, lying perdu, fleeing from man before man often gets a sight. Only a glimpse, at that, of a flash of white over something dun underneath; then the saw palmetto hides all. I except the native Indian, who is among the best of "stalkers" seldom using dogs, and more lynx-eyed in his wilderness than a city sleuth at home. With good guides the sportsman will get his fill of deer shooting by being simply placed on good stands, and if guides are faithful they will drive the pretty dun whitetails within open gunshot, especially if their employer has been liberal with the "long green."

It is, however, the wild turkey that is compensation for undergoing such a toilsome trip. There br'er turkey still holds sway, much as he did before the white man came. The reasons for this are as follows: One is the difficulty and expense incurred by the average sportsman in getting himself and a suitable outfit there—on the ground. The other is one most creditable to those who are carrying it out. Namely, as I have said before, it is the institution of several private game preserves on the larger "islands" that have been taken for plantation usage. One of these includes several hundred acres of higher land destined for the culture of grape fruit. The owner has forbidden the killing of turkeys by anyone on his land, which in all embraces a thousand or more acres. The cleared land now utilized is less than a fifth. Indians often visit him from the glades, but so well known is his ultimatum they respect it perhaps because they respect the man himself. He has plenty of help, and if any white intruder disobeys, his summary ejection follows. Even the irresponsible pot and plume hunter keeps clear of these private refuges. It is said that in the hunting season the turkey learns to know these refuges, for they swarm about them. A friend who visited the Big Cypress recently told me that they were so tame, gobbling and strutting up and down about the hens, that to shoot them would be a shame.

But the wild turkey is a wild turkey all the same. Catch these same turkeys a few days later, and they have become a different bird altogether. They are then as hard to approach as they were easy when safe in their island refuge. How did they acquire this knowledge? Probably by the same means that the most of us acquire certain usages in life—the force of habit. They felt that they were safe in those refuges. This instinct or sub-intelligence is most acute in the wild turkey. The Seminoles recognize it when they say, in hunting: "Deer look up, see injun. Say 'Mebbe injun, mebbe stump.'

Turkey look up, see injun. Say 'Mebbe injun,' then he run away mighty quick."

Groups of strutting gobblers and hens with their broods would walk fearlessly among the workmen on these refuges. Yet they kept a suspicious eye on strangers who wielded neither axe, mattock nor hoe. Away in the swamp, or on the prairie, these birds were exceedingly wary. In the brief dry seasons the native hunter will often drag a lighted torch of dead palmetto leaves across the wind. This is to assist his progress from one island to another. Turkeys are unharmed, and the deer are drawn hither to lick the salty ashes. But the snakes perish by the thousand; the new grass makes good feeding ground for the game later on. A born hunter, who walks without stepping on things that make a noise, or shadows the thick places without a rustle, may pick up a turkey in the Big Cypress most any time. But it takes the green hand so much longer that he is apt to quit, or fall back on the old pioneer dodge of seeking br'er turkey at night. When roosting high amid the big timber he is an easier and less sportsmanlike mark.

One of the easiest ways to secure a wild turkey is to let the birds do the hunting. This sounds paradoxical, but note the method. The place to hide in must be chosen with judgment and with the wind, if any, blowing from the direction where the turkeys are feeding. A clump of palmetto in the edge of a burnt prairie where the young grass is up, is as good as any. Chance counts for a lot. When the turkeys drift back to their roosting place in the swamp, about sunset, makes a good combination. They are almost sure to spend the day among the young grass. If they do not approach near enough, a deft call or two on a yelper will often assist. The gobblers are apt to gobble and advance closer, though with suspicion.

Also a sizeable panther or wildcat may be stirred up when least expected. Then there is always fishing of the best, both of fresh and salt water.

New Publications.

THE YOSEMITE, by John Muir. Century Co. Cloth, 284 pages, illustrated.

So attractively has John Muir portrayed The Yosemite that the reading is almost as good as a trip through the National Park. He tells, as only Mr. Muir can, of the birds, flowers, trees and the park conditions in winter and summer. The work is illustrated with original photographs, with maps inserted showing the general features, and includes an outlined map for the traveler. It is dedicated to Robert Underwood Johnson, editor of the Century Magazine, and is finished and bound in the incomparable style of James Abbott.

THE FLIGHT OF BIRDS, by F. W. Headley. With-erby & Co., London. 8vo., 260 pages, 5s. net.

F. W. Headley, whose works, "The Structure and Life of Birds" and the "Life and Evolution of Birds," have been instructive as well as interesting, has issued a new book, "The Flight of Birds," with a continuation of his erudite style. The plates are made from clean photographs well handled. There is much of interest contained in the book for the aeroplane driver, as it includes many comparative tables.

In Quest of the Red-Eyes

By J. B. THOMPSON, Author of "The Tale of a Quail"

IT has always been my practice in spring, after the last cold spell, or at least after what is imagined to be the last, to make my obeisance to the small-mouth of Current River, Missouri. This had so long been the case that I considered it really a necessary procedure in order to propitiate the fish gods in my favor. Personally, I have always believed it to be the

through mountains, right in the maple sugar camps of Shannon county. Big Creek; that is the one.

I remembered once a visit there without rod or fishing tackle of any kind. Yes, that was the place where I cast the early grasshopper on the hastening waters and the great rush of red-eyes after it. In a few days I had arrived at Emi-

be made on foot over steep acclivities, numerous waterways, and not the least among the native element hostile to visitors if they bear any resemblance to their conceptions of certain State officers. Unfortunately I came within the latter classification, and the well-meaning prosecuting attorney had warned me at the last moment against exposing my identity and protested strongly my making the trip on foot and alone.

But an angler has little consideration for other than the subject of his quest. I was anxious to be off. However, Jack's Fork had taken a sudden rise and was too deep to ford and not a boat in sight, so I remained a day in the terrace-situated town and watched a snow storm chill my prospects, but not my ardor.

Fortunately the following day broke clear, and in an hour the sun, under the influence of a warm southern breeze, had vanished. Somewhat restless I took a stroll down the stream and found a small boat moored to a clump of leather wood. There was only one way to acquire its services; that was to appropriate it without asking. So I ran hastily to town, gathered my scanty luggage, threw it in the craft, and after a hard struggle poled her across the rapids. I left her fastened for some other wayfarer.

Knowing the depths of the main streams I decided to avoid them. Keeping close within touch of them I could tell my whereabouts wherever I happened to be. I knew the river routes well, but back in the untouched wilderness of the pine, where houses were not to be met up with, I was dependent on those signs of direction which nature posts in the wild countries. I got my course as I passed the last farm and swung along the bluffs for a short distance and left the stream right at the point where the river makes its horseshoe bend.

A trail was discovered across the first hill. It was followed to the northeast until it reached a rapid creek, whose bed of flat rock made quick falls in its haste to the river. It was Sheldon Creek. While its water was clear and it possessed the desirable swiftness, it lacked the depth of the typical small-mouth stream. I pursued it for a mile or more before I discovered a crossing.

Evidently the cold had still a grasp on the

BIG CREEK.

best red-eye stream I have come in contact with, while its fish were the strongest battlers I had ever engaged with, its waters the coldest and by far the clearest, and the fish ran larger in size. I have had only one complaint to register against it—the late period in spring before the bass rose to flies; sometimes they remained until the latter part of May before offering battle with the light fly-rod.

Other nearby streams offer fishing a month before, but as with the exception of Eleven Point they contain the less belligerent big-mouth. They have been unable to lure me from my favorite. But my favorite stream takes the melting snows from so many formidable chains of hillsides. The water is very late before it has enough warmth to bring forth the little bronze warriors from their lair of rock. However, a month's idleness from a stream in spring is unthought of by the angler, so I planned a little sortie to one of the tributaries, reasoning that where the water warmed earlier, fishing would be of some consequence.

Nevertheless I had to think of an ideal place. There were Buffalo and others, but too many big-mouth in them to suit me. Then I began to count over acquaintances of the kind from Current River's source, and I knew only one creek would fit my wants. It must of course be a tributary of Current River, have its start from springs in the mountains, rock and gravel bottom, fairly deep and particularly swift, nearly all its length, as a mill race. Then as suddenly came to my mind a small stream way up, cutting

nence, the county seat on the Jack's Fork of Current River.

While I had gained this little town, plastered by some miracle on the side of a hill, and by a greater miracle it remained there, I had only passed a few of the terrors incident to the journey. The undesirable train service looked almost like comfortable traveling, when I realized that the remainder of my journey was to

CURRENT RIVER.

shaded areas of the northeast face of the bluffs. Icicles clung to the shelving rock.

An hour before dusk I espied a small clearing in the distance and gazing beyond a well known landmark on the east approach of the river—the large bluff of rock called Bee Rock. Yes, I had reason to remember it, for only the spring before I saw a four-point whitetail leap to his death on the gravel bar—a palpable case of suicide. It was in the little valley upon which the rock frowned, and where the blue smoke of green wood fire curled up, that I realized was one place where I could remain for the night. The character of my host was doubtful as the vindictiveness of former feuds in the valley remained, and a certain intangible hostility against a man from the city was still there, and I doubt if this feeling will ever be eradicated. A certain apprehension took hold of me as I dropped to the flat to apply for a night's lodging, and more than that, if fishing was good, a week would find me there, but the owner of the small farm was a dangerous citizen when aroused, and I thought caution was necessary.

Through the second growth hickory on the outside of the fence a man and a woman pulled laboriously a cross-cut saw. I walked over to them and offered the conventional "Howdy," responded to in the same tone as offered, possibly a little brusker and slightly tainted with curiosity as well as suspicion. I seated myself on another log, showing no undue eagerness to enter into conversation, and watched the slow severing of the hard wood. We remained under this spell of uncommunicativeness for at least thirty minutes, and the subject uppermost in my mind, a sleeping place for the night, as yet remained unbroached.

Two children came to the clearing—dirty little bare-headed urchins. The older, a girl about eight years, was leading a younger one, a boy. I noticed that the left hand of the boy had a repulsive bandage around it, and the owner flinched as he stepped gingerly over strewn limbs.

"What's the matter with the little chap's hand?" I asked of the father.

He turned to me with an expectant look and explained: "Poor little devil got three fingers chopped off; got hold of my tic-axe and tried to chop some pine knots. Do you know he ain't slept none since it happened."

"How long since it has happened?" I asked.

"Three days."

"Have you done anything for it?"

"Yes, wrapped a piece of fat meat on it after we got the bleeding stopped, but he's still pretty sore. I guess I'd better take him to a doctor next week if we go to town, but the river's done been too high of late to ford; dunno when I'll git a chance"

"If you don't mind I'll dress his hand," I offered. "If you have some hot water at the house I'll fix the little fellow up," I added.

There was in my tramping clothes an emergency outfit which I always carried, and told the big man of it. He immediately picked the youngster carressingly in his arms and struck out for the shanty, visible at a distance of 200 yards on the ridge. His wife and I followed.

His house was a large log house of one room crowded with beds, stove, tools and in confusion of dirtiness. But there was one agreeable prospect—the large open fireplace, and on two smouldering logs steamed a kettle. I took

the little fellow in my lap and proceeded to unwind the covering. From a bowl of warm water the mother had placed within easy reach, I saturated the hand and was able to unwrap it without much pain. What a sight met my eyes as the last remnant of cloth came from the wound! A dirty, repulsive, festering, gangrenous sore.

"You are a brave fine fellow," I said to the unflinching young one as I washed it with antiseptics and followed with a dressing of absorbent cotton. Aside to the parents who were over-looking my amateur efforts at surgery I remarked: "Jessie, I want to take a picture of him, the bravest boy I ever saw, and I'll do it to-morrow if you will only keep me over night."

The parents stepped back amazed at my knowledge of their names, and the boy laughed out: "Pap, my hand ain't hurting none now." At the same time he threw me such a grateful look.

"How did you 'un know my name?" drawled the father in surprise. The description offered to me in advance of him had been too accurate to mislead, and I also remembered his face as one of the cedar rafters that occasionally visited my town.

"B.," I exclaimed, "I want to stay a while. Now don't get a false impression about me. I'm a game warden; I have nothing at present, strange to say, against your crowd, but I want to do some fishing on Big Creek. I have a week to myself, and I want to make the most of it, so it's up to you to say git or stay." I could see amazement, hatred and kindred facial expressions melt under the rapidly growing warmth of gratitude. He lowered his soft brown eyes and extended his hand to me, and his wife gained confidence and blurted in with the big mountaineer.

"Well, it's a case of stay as long as you want to, and I'm sure everyone's gwine to treat you right." We both laughed, and from that moment I felt comfortable, and it might be well to say that all the natives showed me marked respect, and did everything in their power to make my visit a memorable one. While the men of the hills had slight respect for the game laws, and prior to this visit, I was continually in conflict with them, I had no need to be on my guard against the customary pernicious nagging that undesirable visitors are subjected to. I had his word and it sufficed for me. Across Current River I was fairly familiar with the country. I had tramped it before to the extent of the small village of the Rat postoffice, and during the jaunt had become acquainted with the promises of Big Creek.

Morning came with its transcendent glow of pink, and as it touched the yellow sedge-clad hills and flashed back a light of gold, a marvelous transformation had taken place; the unkempt hut was now clean, the food was good and I reveled in comforts unlooked for the day before.

Climbing into the hollowed pine log canoe I pushed across the swollen river to the mouth of Brushy Creek, took the waterway and followed it about a mile, where a fallen maple log made easy crossing, then I changed my route to one due north and climbed an immense hill; an hour elapsed in going over it. At its base flowed swiftly Big Creek, while in the eastern divide of the hills I discovered all of the branches to be clear and in a normal condition of flow. On

the side I had passed the day before, unprecedented rains at the head of the Jack's Fork had given the waters an ugly appearance. I figured from my present location I could have five miles of fishing water to the river, and believed that I was to be the first person who had ever cast a fly on the transparent stream. I was in a narrow valley and could see the maple trees dripping slowly in the crude cups their sap; it was the maple sugar district of the county.

It was not necessary to select a particular pool. All the water course looked likely. Assembling my rod I dressed my leader with a trio of royal coachman. I made my first cast across to the opposite bank under a leaning birch. I had acquired the right side and found few trees or entangling growths on the other side.

My first offering received immediate response, possibly thirty small red-eyes charged angrily at my flies. Two not over eight inches impaled themselves on the hooks. It was such a motley gathering of black bass that as I released the lucky pair and returned them to their home I felt encouraged. Working slowly down stream I drew a two-pounder from under a rock and had quite an exciting tussle in keeping him away from the numerous large rocks in the stream.

Another cast behind the same rock brought a double of about the same weight. I coaxed them to within ten feet of the bank when one tried an upstream route and the other, just as determined, frantically plunged down stream. Unfortunately a small boulder of flint, peering an inch above water, obstructed the leader. The up stream fish gave a leap and took with him the second dropper fly. As chance would have it, the other fish seemed content to use opener water for his battle, finally to yield gracefully to the persuasions of my tackle.

I left the stream for a moment on account of its narrowing and numerous obstructions, but eventually turned back to a broader stretch of water. It was fairly fast, and I should judge eight

THE TRANSPARENT STREAM.

or ten feet in depth. Many good size fishes were caught, invariably on the trailer, the dropper during the combat was fiercely attacked by hundreds of small-mouths not over six inches in length. It proved to me conclusively that in March the bass were making the run of the smaller waterways of the mountains. By noon I had fifteen fish averaging from a pound and a half to four pounds and saw that all the muscle I put to crowding them in the creel could not make it contain more. Nevertheless this would prove sufficient for the family and myself. I wandered on through the sugar camps, finally to a confluence of creeks, climbed a ridge, descended and found my boat.

I had discovered in my contests with the Big Creek small-mouth that the light rod I carried was entirely out of place here. The fish were such gallant fighters, the stream so promiscuously strewn with sharp boulders that I had lost many, as in the limited fighting territory frequently I could not turn them quickly enough from dangerous quarters. But I had no complaint to make; I had fully enjoyed the day and now was anxious to see my intrepid little patient.

Jessie greeted my arrival as he accepted the heavy creel: "We sure will have plenty of feesh; they ain't none of them trout* caught here less we gig 'em. My leetle chap feels mighty pirt since you fixed him up."

The little one just then peeped from the doorway and I advised him that it was time to renew the dressing on his hand. Again the youngster exhibited his bravery, this time scarcely flinching while I bathed the wound.

"Did you meet anyone?" asked the father.

"No. Why?"

"Some of the boys planned to go out tonight and gig some feesh if you didn't ketch enny, but I 'lowed you might meet some one."

"No, I passed through the sugar country and saw no one."

"I'll blow the horn, then they'll know you ketched enough, and as ther's plenty fur all, I'll have the MacIntyre boys over fur supper."

Little Jessie had become very much attached to me, and while seated near the fire found my knee an irresistible seat. He was a charming child, intelligent and promised much under other associations. The MacIntyres came for supper, shook hands, asked about the boy, and the hard uncommunicativeness of their kind mellowed under the warming influence of Jessie's attitude to me.

"If you'll only feesh at the lower end of them little rock dams you seen on Big Crick, I'm sure you'd git some crackerjacks," offered the older of the visitors, who spoke for the first time. "While down at my sugar trees the other day I seen some whoppers a-jumping."

I had wondered to myself during the day the wherefore of the innumerable dams on the short stream; two or three to each mile, so I interposed. "What's the reason for so many dams on the stream? It seems to me rather out of the way for much grinding to be done."

MacIntyre blushed visibly, but finally managed to say not without exhibiting suspicion at the purport of my question: "Ah!" I guess a person can set a mill near water if they wants

*It is strange to hear an Ozarker call a small-mouth a trout. He usually applies the misappellation of trout to the big-mouth bass; the small-mouth invariably goes by the name of "yaller bass."

MANY BIG ONES WERE TAKEN HERE.

to, and them that wants to grind can do it when they pleases."

I shifted subjects at once, for inadvertently I had blundered on an occupation of the natives that was quite risky to make mention of. At least, if circumstantial evidence was to be considered, indications of activity in the mountain dew way were in evidence on many sides. But as I had no interest other than curiosity, I subsided into another lead. However, my *faux pas* went unnoticed, and we parted good friends.

My last morning found me on the stream. Great banks of clouds hovered threateningly in the east. The lessons of the day before had been of some service. So as not to be bothered with the smaller fishes as I had been the day before, I placed my faith in the superior powers of the black gnat. Stepping cautiously along the rocky bank I placed my first cast below the fall of an old dismantled dam. Nothing came; again and again I worked along the decaying timbers, perfectly bound up in the estimate, that no place could be more promising without results. Stepping below a rock that jutted midstream some ten feet from the dam, I cast upstream, the flies glancingly scraped the rock, then dropped lifelessly on the water. Just as I began a quick recovery there came from under the huge boulder a flash of gleaming bronze, hurling itself with fury at the dropper. It seized it at the first rush and dashed fiercely with it down stream, until it gained the opener water, which was free from obstructing boulders and logs.

I had no conception of its size. Suddenly from out the water as it felt the first inhibitive prick of barbed steel it leaped for freedom, and to my eyes came through the haze of morning a momentary vision of one of the largest small-mouths I had ever seen. He plunged for the opposite bank where a few logs offered release. Luckily he turned hastily, as one of the MacIntyre boys happened at the moment to pass on his visit to his sugar trees, and realizing the danger to my tackle began shaking a willow on the bank. The fish saw it and tried to bore for the deep water. This put me at my wits' end, for they have a peculiar habit when hooked of making gyrating dives for the bottom, if perchance, as there usually is, some obstruction offers an opportunity for escape. Nevertheless

I gained confidence. Finding that I had open water nearly all of the way down stream the creek fairly wide, I could risk roughing it with him if I could only deter him from charging to the bank opposite me.

Unsuccessful with his diving experiments he went into a series of spectacular leaps, but between each shaking and tearing at the line with the relentless determination of an infuriated bulldog.

The Ozarker shouted as the fish lunged for the first rapid: "If he gets in that swift water, he's sure a goner!"

"No," I replied with confidence, "he'll go straight through, and I'm going with him." True to my words, as I saw I could not check his strong rush, I leaped in the water as he gained the first riffle. I could feel the strain ease some and thought possibly the line had been severed. I began to reel slowly, then I knew the cause as the giant broke water once more. He had backed into one of those up stream currents and I was only too glad for the rest of my hand. He took the swift water again, and with chilled limbs I followed in his wake. Occasionally he attempted a frantic up stream effort, but the current favored not.

Finally he dove for another deep pool and the gyrating dives were again begun with desperate intensity. But the little rod responded nobly, and MacIntyre on the bank, shouting inarticulate orders and gesticulating wildly, assisted me greatly in turning him from the brushy bank. The fish eased slightly as I took the bank, for the stream was now too deep for further wading. The fighter renewed his spectacular leaps, heading pell-mell for another rapid—a very short one. I permitted him to back slowly into the quiet pool. I could perceive that his rushes were weaker and he made them in heartlessly small circles. Now it was my turn at the initiative.

I gave him a taste of roughing it until he went into a succession of feeble leaps, then I coaxed him into a smooth eddy where the bronze warrior backed reluctantly into the landing net, his red eyes flashing belligerent lights.

MacIntyre came to me and I held my hand out to him, and he, accepting it, was the first to speak: "That sure was some fighting, wasn't it?"

"You bet!" I explained. "If it had not been for you on the other side frightening him from the bank I never would have landed him; he was so strong I simply couldn't turn him."

"He'll weigh six pounds sure as a fiddle," announced my friend admiring my prize. "He's certainly a son of a gun of a yaller bass!"

"Any way, I have had the experience of my life. I will present him to you, but I want you to tack his head up and save it for me," I said.

Mack smiled all over, and after urgent solicitations accepted my gift. I afterward learned from a card sent to me by the recipient that the fish weighed five and a quarter pounds and was twenty-one and a half inches in length.

With the capture of the big fellow the black gnat lost its potency. Finally after offering several deceits with only ordinary success I gave my old favorite, silver doctor, a chance to display its effectiveness. That it had attractive powers was immediately proven. In a short time the weight of my creel drove me to the Jessie homestead. Even if it had not, the ominous growlings of a near thunder storm would have hastened me to shelter. I had only gained the west side of Current River when the storm lashed forth in all its fury, and by the time I reached the warm fireplace I was soaked to the skin.

I burrowed clothes from the head of the house, though they could easily contain two of my frame. I felt comfortable and remained before the radiant fireplace watching my garments pouring a cloud of steam throughout the restrictions of the room, and knowing well that the terrific downpour of rain would ruin the fishing for a week or more. Still my mind reverted

"THE BLACK GNAT LOST ITS POTENCY."

longingly to the small stream hidden in the hills, and I sensed that the lure of its pleasures was so strong upon me that another try at the red-eyes of Big Creek would follow soon.*

*In writing the article, I have purposely withheld from giving the name of my host Jessie; as he is a rather dangerous animal and the valley is full of lawless feudists, I would not care to have some of your readers run in there for a trip and meet with disaster. That district has been noted for its monthly killings of the most cold-blooded kinds.

I think you will be pleased to learn that I secured conviction of the notorious duck shipper in the Sunken Lands, DeLisle Godair, for attempting to ship 100 wood-ducks. This has about cleaned up the last shipper on the Missouri side of the big overflow.

Grouse Hunting in the Idaho Lowlands

By CHARLES STUART MOODY

UNLESS more stringent protective laws are enacted the dusky grouse (*Dendragapus obscurus*) and his nearest kin the sooty grouse (*D. o. fuliginosus*) will have gone to join the passenger pigeon and the heath hen in the land of things that were.

It is not so many years ago that the foothills of the mountains of north Idaho were covered with these, the handsomest of our upland game birds. The "burned over" lands were the breeding places of the birds, and there they congregated literally in thousands. After sunset of an evening in spring the air was ventriloquial with their musical hooting, nearly every burned log harbored its nest. In summer and early autumn the young coveys assembled in the service berry fields, then later, when the frosts came, retired to the deep-leaved firs where they spent the winter. Grouse shooting was good those days, and I fear that we did not appreciate that there would come a time when it would not be so.

I have always had a feeling of love for the grouse, there is something so wild and free, something that breathes of the pines, about him. One Christmas time I was an alien, far from home. I tried to kill the time by walking down the streets of a great city. There is nothing more depressing in this life than to be among a city of happy holiday busy people and not know a soul there. I passed a poultry store and saw a grouse displayed. The poor fellow was long since dead, but he, too, looked lonesome, out of place, far from his native pines. I bought him. No matter what I paid, it was more than I could afford. The landlady and her daughter who were more familiar with domestic fowls of the masculine persuasion, thought I had brought some new and rare variety of turkey for my Christmas dinner. The next day I sat down to my lonesome meal and my great roast grouse brought up visions of the blue mountains and crystal streams of the West. The West was calling, and before the meal was ended, I had resolved to heed the call.

Ah me! things were changed. The former wilderness now blossomed with homes, the waste places were grain fields, the grouse were gone. Like the wild Indian, they had retired before the onward march of civilization.

The prime requisites of grouse shooting are a hard close-shooting gun, an intelligent dog, and a sturdy pair of legs that will not rebel when called upon to carry the hunter upon the steep and rugged sides of the mountains, for it is there only he will find the game, and even there he may consider himself fortunate if he kills a brace of birds in a day's tramp. The grouse is, as I stated before, a rare bird. But, ah! the joy of bagging one or two of these big handsome blue-gray fellows with their smooth glossy plumage.

It is early autumn, a tang of frost is already in the early morning air as you tumble out in the "false morning" and hustle into your shooting togs. Across the lake the mountains loom dark with a fog hanging over them. Before the sun has peeped above the eastern

horizon you are panting up the steep side of the hill following the sinuous winding of a dim trail. The hills rise by successive "benches," each "bench" several acres in extent. When you have reached the last of these you enter a forest of open pines beneath which dense thickets of service berry bushes grow. Upon

"MRS. DENDRAGAPUS' NEST."

these berries the grouse will be found feeding in the early morning. Turn down the "bench" and lie on your dog. If there are any birds feeding and you have never hunted grouse there is a surprise in store for you. You are wading waist-deep in the service berry and buckthorn, your dog working in front, hidden by the undergrowth. All of a sudden you imagine a bomb shell has burst beneath your feet and you get an indistinct impression of something like several dozen birds all going in different directions, the beating of their wings making a sound like mimic thunder. It requires a quick eye and good judgment to pick out your bird and let him have it. He who hesitates is lost, for no bird flies that is wiser about putting a tree or a hill between himself and the hunter. The wise old grouse hunter carries his gun at the ready and fires upon the first flash of a wing. For so heavy a bird the grouse flies very rapidly, with a rolling motion of the body which is very disconcerting.

After you have hunted the upland "benches" and the day is well advanced, it will be well to seek some hidden spring in a wooded cañon, for there the grouse congregate at midday to drink and rest in the cool shade. Some years ago quite a discussion went the rounds of the sporting press as to whether the grouse ever drank. Some persons who should have known better, asserted with the greatest solemnity that they never did, because forsooth, they had never seen them do it. Not only do they drink, but that frequently, so frequently in fact, that you may always be certain of finding them in the heat of the day around some spring or watercourse. At such times the birds are less wild than when on their feeding grounds. A covey of young grouse flushed near their watering place will generally take to a tree where they are adept in hiding among the leafy branches. There are much easier things seen than a young

grouse, or an old one either, for that matter, sitting in a leafy fir tree. They have a provoking trick of alighting near the outer end of a branch, then walking along the branch until they are near the body of the tree, where they crouch down and blend so perfectly with the surroundings that it requires a sharp eye to detect them. The hunter walks around the tree, peering with all his eyes into the foliage without being able to locate his game. After he has strained his vision until it is about to crack and craned a "crick" in his neck, the bird waits until he is on the opposite side, then hurtles out of the tree cackling in derision.

Grouse hunting requires an especially trained dog. The dog trained for quail or pinnated grouse will prove useless. The best dog for grouse hunting is a cross between a cocker and Gordon setter, one of those busy, industrious little chaps that will go hurrying from place to place, never quiet for an instant. When he strikes the scent he should follow it with a rush and flush the game without setting. In the first place, if he should come to a stand you would be unable to see him in the brush and in the next the grouse would quietly vacate that immediate vicinity, using their strong legs

to get away on. A healthy grouse can run, under proper stimulus, just a few shades faster than a scared rabbit.

The nest of a sooty grouse is of sufficient rarity that no apology need be made for presenting a photograph of one. Naturally I have found many of their nests in the old days, but the one presented happened to be the last, and the only one found when I happened to have a camera along. I was seeking far more important things, gold in fact, when I chanced upon this nest. It was in the Bitter Root Mountains in Shoshone county, Idaho, and near the summit of the range. I had climbed up out of a narrow steep cañon and was crossing a small plateau, picking my way through the "devil club," when Mrs. Dendragapus shot right out from beneath my feet. The next step would have landed me upon her. To clear away the brush, set the camera and make the exposure was the work of only a few minutes, and as I walked away the bird came creeping back and settled upon her eggs. I tried to photograph her, but she would have none of my attentions. For fear the eggs would get chilled (it was early spring and the ground damp and cold), I desisted and went my way.

"Oh, yes! Simplicity is fine! It's the greatest thing that ever came down the gang way, but it has its drawbacks. One of the drawbacks of simplicity is illustrated by the man who takes it for granted that because he has used his electric apparatus for fourteen hours running, it's in good condition.

"Maybe it is, but if it is not, he won't know it until the engine stops and he gives up five or six hard-earned iron men to some pirates who offer to tow him in for all the spare cash he has aboard. Ammeters that would cost him \$1.25 would have put him wise to the sad state of affairs before he cast off his moorings.

"Do you suppose for two seconds, my young and unsophisticated friend, that people just like to sit around and write to the dealers to send them, C. O. D., boat accessories and such luxuries? Each and every bit of apparatus that you find aboard a motor boat is there because the man who owns that boat knows it is a good thing to have, and placing his time, comfort and safety up against the cost and trouble spent in taking care of it, the boat owner of experience knows that he's way ahead of the game. If somebody could arouse Robin Hood and show him a sample line of shotguns, he, in his innocence, would be just as likely to pick out a single barrel muzzleloader as an automatic, as you in your innocence, who think all there is in boating is to jump aboard and start up the engine, may go wrong on simplicity during your first year. But you'll see things differently after you've been soaked once, scorched twice, paid for two or three tows and gone home feeling as if you had fallen out of a three-story window because you sat four and a half hours on an uncomfortable seat.

"This isn't to say that if you and three or four other hardened citizens wanted to go out for a day, you can't stand it in a boat such as you're describing, but the boat to-day has grown to be a family matter, and it wouldn't be half as popular among the girls, or among the men, either, if every time one took a lady out in it, she took a chance on getting soaked or roasted, and it was a dead sure 100 to 1 bet that she'd be covered with engine grease and soaked with the bilge water thrown by the playful fly-wheel."

Yearning for Old-Time Thrillers.

CHICAGO, Ill., July 6.—*Editor Forest and Stream:* I presume it is contrary to the ethics of standard journals to republish articles which have once appeared in their columns, but I am sure that many of your subscribers would delight in reading those thrilling accounts which appeared in your columns of the experience of Colonel Pickett killing grizzly bears with his Sharp's .45-120-275 Express, or Ira Dodge in his disastrous battle with three grizzlies in the Big Hole country, Wyoming.

There are many other writers and articles that might be mentioned, but in this day when we compare the results obtained by our high-power rifles, it is also interesting to note what was accomplished by the best types of hunters using the best weapons of a time rapidly passing away. In making this request there is no criticism of the articles that appear from time to time, but simply a desire that present day readers may enjoy that which we of the Old Guard so greatly appreciated a few years ago.

B. A. DUMSER.

Simplicity vs. Utility

By E. T. KEYSER

"YOU can talk all you want to," said the novice, as leaned back in his chair, "but that boat of Smith's is just about my size.

"For a sensible man who does not want any flim-flam-flap-doodle and wants to get anywhere within twenty-four hours of the time he steps aboard, she's got everything else in the harbor beat a mile. All Smith has to do is just yank the tarpaulin off the engine, turn on his gasolene, throw on the switch, give the wheel a yank, and he's off.

"It makes me tired to see the way most of the fellows down at the club spend from one to one and a half hours getting things ready before they start out. They let down the spray hood, take off the cockpit cover, get out the tool bag, arrange the cushions, get the flags out of the locker and stick 'em up, and perform forty-seven other stunts before they let go the mooring, and then it's the same old job over in a contrarywise method before they can quit the boat and go home to a cold dinner at night.

"Half of you fellows that think you're enjoying yourselves are spending all your time polishing up brass work and paying for motor accessories, electric lights, speed counters, voltameters and 472 variety of junk that has to be taken care of. Give me Smith's boat every time."

And then he lowered the tide in a long glass that had ice and something else in it.

During the fore part of the tirade the skipper of the Betsy Jane had looked with mild amusement at his friend as he condemned every other type of boat but Smith's, but as he continued, he began to take more and more interest. When the novice had finally subsided, the skipper arose and took the floor.

"It's all right for you theorists, who are just able to distinguish between a fly-wheel and a

carburetor, to sit down here on the club veranda and tell a man, who has accumulated an outfit, that he's seventeen varieties of assorted imbecile. You make me think of the back to nature camper, who calls every man who uses a tent a 'softy' and proceeds to tell how beautiful it is to sleep in the open air.

"What you and the back to nature, one-cent-a-word writer never seem to grasp is the fact that almost anything will go in fair weather, but that the man who wants to be happy and provide against rain and accidents and be comfortable afloat in almost any circumstances must put a slight dent in his pocket book to do so.

"It's all right for you to climb aboard Smiths' boat on a bright, beautiful, June day when the sun is shining two minutes and going under a cloud every four or five, but how would you like to sit down on one of these nice, hard board locker seats and remain glued there for eight and a half hours with a hot sun beating down on the back of your neck, and how would you feel if you took your family, either actual or prospective, all dressed up in its nice, sweet yachting clothes with a neat little parasol that measures two and a half inches in diameter and cost \$14 an inch, and experienced a nice, fat, juicy downpour just about the time you struck the middle of the sound, and nothing but an oil-soaked tarpaulin to wrap around the lady? You'd stand a swell chance for the return of the engagement ring or divorce proceedings, wouldn't you?"

"And some day, when you were caught in a tight corner, and you wanted to sit plumb still for about forty-five to fifty seconds, and yet be able to pick up and wade along when the necessity occurred, you'd find you couldn't do it without a reversible propeller or reverse gear.

“Now, that Reminds Me”—V.

By O. W. SMITH

Photograph by the Author.

NOW, that reminds me' of some grasshopper fishing I once did for brook trout.

“Not a great ways out from the city of Green Bay, Wis., there are several little trout streams, unimportant, but naturally much fished. I presume that those streams have local names by which fishermen designate them, but so far as I am concerned all are nameless. One found in Pittsfield township has always been an especial favorite of mine. I fished it often during eight years, and naturally became well acquainted with it from the swamp in which it had its genesis to the Suamico River into which it emptied. It was little and unimportant, and yet I look back upon those days spent along its banks as among the most enjoyable of my piscatorial experiences. After all it is not so much the fish one catches as the attachment one forms for a stream that makes fishing attractive.

“The Pittsfield stream was visited by my wife and I one hot August morning. We walked in from Tremble, a little box-like depot on the C. M. & St. P., which we had reached by a freight train. Our good friend A., a farmer whose comfortable house stands hard by the creek, was surprised to see us, but as usual extended a hearty welcome.

“When we informed Mr. A. that we were after trout, and that we were going to get them, too, he laughingly promised to eat raw all we caught. It seemed that the local fishermen, farmer boys, insisted that either the trout had left the creek, or that they were all caught out; in any event trout fishing in that stream was away below par. But we were not daunted. Lives there a fisherman worthy of the name who

does not think that he will secure a basket of fish even though experienced anglers inform him that it is an ‘off day,’ or ‘the fish have migrated to colder waters’? Shouldering our rods, while our friend grinned, we set out for the cow pasture, a favorite portion of the stream with us.

“‘Say,’ shouted Mr. A., making a trumpet of his hands, ‘don’t forget that I am going to eat raw all you bring back.’

“If such a taunt as that would not stir an angler to great efforts, nothing would. Mentally I resolved to stay by those fish until I had enough to make our fun-loving friend a substantial meal, though my wife was plainly downcast.

“Early though it was, the air was fairly stifling, a premonition of what was to follow, yet there was something about the shimmering atmosphere and serene landscape that was thought provoking and satisfactory. For all the world the landscape had what one might term an Arizonian aspect. Every mid-summer angler knows what I mean, a time when the water is low, fish shy and sulky, pool after pool apparently tenantless, flies unattractive and worms valueless. Well, we fished and we fished. Up and down the pasture we worked, exercising all our skill and employing all the little tricks common to old trout fishermen, but without avail. Oh! I caught one miserable little fingerling less than four inches long which I promptly liberated with the injunction, ‘Go home and grow up.’ It began to look as though our farmer friend was to have the laugh on us, a matter more unendurable than a mere fishless creel. Discouraged, my wife unjointed her rod and returned to the house to discuss clothes and child training with the far-

mer’s wife. Shortly after I heard a shout and looked up to behold Mr. A. on the back porch going through an energetic pantomime of transferring something from a pan to his mouth. I shook my fist at him and hurried out of sight.

“When well screened by brush, which grew in clumps along the creek, I sat down close by the water’s edge to think the matter out. I had tried all my flies; I had used worms, so there was but one thing more to do, catch a grasshopper. Now the short-cropped grass was just alive with those insects, but I worked for fully five minutes before I succeeded in capturing one of the lively fellows. Then, face bathed in perspiration, with unholy delight, I impaled the struggling ‘hopper upon my hook. Crawling up to within twenty feet of an open and unprotected pool, I sent the bait whirling through the air. It landed upon the far bank of the stream well back from the water’s edge, where I let it remain for some moments; the fine line held well above the water. When certain that any suspicions which might have been awakened in the brain of some watchful fish by the shadow of the flying insect had been allayed, I gave the line a sharp jerk. Instantly, and in a very natural manner, the hooked ‘hopper leaped out upon the surface of the water. There was a swirl and a tug and I had hooked for the stream a good fish. I honestly was sorry he was so large, for I could not throw him out by strength of rod, therefore in playing him alarmed any other fish there might have been in the pool, but there were other pools, a matter for which I was devoutly thankful.

“From the next hole above I stole three fish without its sly inhabitants discovering that the grasshoppers, which jumped into the water, carried with them a barbed hook. It was great sport, the difficulties adding thereto immeasurably. A shadow or a heavy footfall upon the bank was sufficient to warn every speckled rascal that danger was nigh, and they then wormed back under the overreaching bank from which hiding places they could not be induced to move. I visited several holes from which I failed to secure a single fish, but others surrendered two and sometimes three of their bright denizens. As I worked upward, always moving very cautiously, I found the fish more numerous; perhaps because the country yokels had fished the lower reaches of the creek more steadfastly, or probably because the trout were seeking the cooler water of the upper portions of the stream.

“For some distance the creek made its way through a woodlot where it spread out and trickled over gravel and small stones, utterly without pools or even moderately deep water. Of course I caught nothing there, though now and then I would see a small fish dart like a shadow through the water. Knowing the stream as I did, I took a short cut through the woods to another open pasture with which I was acquainted, located some half a mile or so up the stream. There several small springs gave liberally of their cold water, and there of course I found fish. Profiting by my experience lower down, I approached the water with great caution, cast my kicking grasshoppers from a great distance, and whenever possible swung my fish clear of the water without resorting to my landing net, but several times I hooked fish so large that I was glad to utilize that convenient tool. Because I cast from

“IT WAS THE BEAUTY OF THE STREAM THAT MOST IMPRESSED ME.”

such a distance, and because my rod was such a light affair—weighed only three and one-half ounces—I lost many large fish, but enough were coming my way to keep me in a good humor in spite of losses.

“The heat was terrible and yet the trout rose readily to ‘hoppers. Again and again I rigged up a cast, but no matter what selection of flies I used, the trout would not so much as look at them; they wanted only grasshoppers, and can you much blame me when I tell you that I yielded to their whim? Of course there are anglers who would not have used bait, even grasshoppers, but I am not of that ilk. I use bait when flies fail to attract, though I use the same character of tackle for one as the other. You may be surprised that I found ‘hoppers a successful bait during the heat of a mid-summer day, but often and in various streams have I found it so. Seemingly there is some connection between August heat and their habit of feeding on ‘hoppers.

“The hot hours slipped by, and I, reeking with

perspiration and unmindful alike of time and heat, as well as forgetful of wife and dinner, fished on. My basket was heavy when a line of thunder heads in the west informed me that a storm, long hoped and prayed for, was gathering. Perhaps the approaching storm had something to do with the fishes’ unexpected hunger, for sometimes they feed just before a storm. The clouds gathered fast, and I paused by a spring to dress and prepare my fish, then hurried down through the woods, ran across the lower pasture, sprinted up the road and reached the house just as the storm broke.

“I found the family all assembled on the wide porch, rejoicing over the heavy downpour, my wife somewhat anxious as to my whereabouts; Mr. A. smiling easily with an ‘I told you so’ expression upon his fine old face.

“I called for a dish-pan and dumped out before his astonished gaze thirty-seven as fine brook trout as ever were stolen from a little stream. ‘There, gol darn ye,’ I exclaimed, ‘now eat ‘em.’”

the magazine and saw the general landscape of the story spread out before us, we knew just what was going to happen. It was a ten to one shot that the day would be spent casting ineffectually various flies of impossible sizes and hues, but that a glorious triumph would come as the evening shadows were falling and an enticing bait of some kind was cast deftly into the favorite pool. Always the same old pool, the same old trout, the same old lure. Then, taking up another publication, we started to read of an angler’s paradise, only to curse softly (?) when we discovered that, in this God’s own country for fly-fishing, the expectant trout were lured to their doom by means of spoons and even hand lines.

Fine stuff, that, Mr. Bisbee, “for improving American angling conditions,” eh?

Even nowadays, if we pick up a recent copy of an up-to-date outdoor magazine, we do not have to look far to find a ‘trouting’ story, in which the writer’s choice of lures consists of flies, spoons, worms and minnows. Thank heaven that his space was used up, or something else happened, before he got to the dynamite! For if those fellows who apparently have no choice of lures simply must have a creelful of trout, why should they not use dynamite when all other means of capture have failed?

I am unfortunate, indeed, in not having had the pleasure of seeing Mr. La Branche “gyrate horribly” on the tournament platform, as described by Mr. Bisbee. “Gyrates horribly” has a hideous sound, and as my indigestion has resulted in chronic nervousness, perhaps it is well that I have been spared this sight. But where does Mr. Bisbee find the “hysterical babbling” in Mr. La Branche’s writings? I know this gentleman only by reputation, having crossed his trail once or twice on the streams, but I am convinced that his principal trouble is not hysteria. A friend of his once told me that sometimes when this angler-writer carried his light around with him, he forgot to take along his bushel to hide it under; but that trait is far from hysteria—quite the contrary, as this characteristic often merely spells ice-cold self-assurance. But why should he not have his say about the dry-fly? There is certainly nothing harm-

SEA AND RIVER FISHING

Again the Dry Fly.

HOBOKUS, N. J., July 29.—*Editor Forest and Stream:* I am a cousin of Whirling Dun, who asked a question a few weeks ago about a yellow fly and has had several rises from your correspondents since, showing that it was a pretty good fly whether a caddis or otherwise. My cousin, Whirling, like the rest of our family, has always been most modest and retiring, and I was rather surprised to see him “rush into print” so boldly. The only thing that might be considered ostentatious about us is pride in our family name. It is probably known to all your readers that we come from the old *Ephemerida* family, celebrated as far back as the prehistoric ages.

The one great drawback to my happiness in life has been a bad stomach, for which there seems to be no cure. The result is naturally a somewhat grouchy disposition, which tempts me at times to join in when there are any bricks flying through the air.

Contrary to my usual custom, however, I now take up my pen with pacific intent, and with no other purpose than to speak a word in favor of certain scribes accused recently in your columns by Mr. Bisbee of “hysterical babbling” when writing of the manifold charms of the dry-fly. Can it be that in Mr. Bisbee I recognize a fellow sufferer, whose stomach gives him but little peace and tends to make of him a pessimist?

Fortunately, from my standpoint, I am one of those who were initiated into the mysteries of the dry-fly many years ago, and this lure has become an old story with me. Perhaps it is this fact alone that kept me from “getting a grouch” when, a year or two ago, dry-fly fishing began to receive recognition in our sporting publications. In fact, instead of feeling pain, I said “Bully!”

Let Mr. Bisbee look over his files of the

outdoor publications for the past ten years or more. He will notice a wonderful sameness in the “trout stories.” I do not refer to the writings of our delightful Theodore Gordon, or to tales like the fine yarn written a few months ago by Lou Darling about his first trout caught in the Gunnison River. My arrow is aimed at what might be called the vast output of angling inaninity, always the same thing told over and over again, generally stupid and without point, and often written by those who could by no possible stretch of the imagination be considered expert, up-to-date anglers. For instance, take the old yarn, told a hundred times or more, of the man who, accompanied by wife, son, daughter, maid, puppy dog and pussy cat, starts out in the morning for a fine day on the cunning little trout stream. As soon as we opened up

“CAST DEFTLY INTO THE FAVORITE POOL.”

ful to angling conditions in it. He deprecates the fact that so many of the forests around our trout streams have been cut down, as many have before him. But the story cannot be told too often. Even to tell Americans about "tailing" and "bulging" trout—English copyrighted expressions—is much better than to try to teach a young man to be a "fish hog" in one lesson.

And Mr. Bisbee's "corpulent" Mr. Gill! What has he done that Mr. Bisbee does not like? Certainly he is not built on the "hysterical" plan. What has been more needed by American anglers than his little book, "Practical Dry-Fly Fishing," modest, but full of meat? Many a wet-fly fisherman has been helped by him to understand the methods of the floating fly.

If Mr. Camp really uses his "south paw" in writing, as Mr. Bisbee says he does, this fact explains a lot of things that have puzzled me in the past. For large, juicy words give me the "south paw" hereafter. And he seems to strive to please everybody. Take his recent "dry-fly" article of six pages on the proper kind of a rod to use when slamming the dry-fly through the air. I read it twice. I possess just about two cords of fly-rods of all descriptions. When I had finished mentally chasing Mr. Camp's words around, I made up my mind that each and every one of my numerous rods duplicated in some way Mr. Camp's choice. It was wonderful!

But really, Mr. Bisbee, why let the wet-fly men and the worm and artificial bait fishermen have all the stage to themselves? Learn to use the dry-fly, and I doubt if you will want any other lure. I have a lot of wet flies that began to accumulate when I was fishing with Noah on the ark. They are no longer useful to me, and every one that comes to my home can have all the wet flies he could reasonably ask for. Mark Twain told us about the organist who played under a sign: "Don't shoot the organist; he is doing the best he can." So are the dry-fly writers. Only a few months ago I heard an English dry-fly angler of international reputation praise very highly some of the American dry-fly talks that Mr. Bisbee biffs at. A Halford does not always emerge from the first egg hatched. He must go through the chicken stage before he can grow his long tail feathers.

OLIVE DUN.

Night Fishing at Asbury Park.

ASBURY PARK, N. J., July 13.—*Editor Forest and Stream*: The vagaries of fishing is one of the features that add a peculiar charm to fishermen, results oftentimes being in direct opposition to accepted theories, and an odd exemplification of this fact was shown Saturday at Point Pleasant, New Jersey.

The incoming or flood tide is generally credited with being the best fishing tide from the beach, particularly for striped bass, the water rising high, close into the shore, allowing small fish, sea bugs, clams, etc., their natural food, to gather close to the undertow. Another accepted theory is that daylight fishing is preferable to night fishing, as it is assumed that the fish can see the bait better in day time. Both these theories were oddly contradicted by facts on Saturday.

A party of fishermen, of which the writer

was one, arrived there about 3 P. M. in order to take advantage of the incoming tide, it being high water about 6 P. M.

After fishing industriously up to high water with very poor results, they determined to quit and had returned to the pavilion, when Ralph Borden, who manages same, advised them to stay, as he said that he felt satisfied that they would catch striped bass if they did. This being contrary to their accepted theories, the tide falling and darkness approaching, the fishermen decided otherwise and left.

The ensuing result proved that Borden was right in his judgment, as other fishermen remained, and between 10 P. M. and midnight, and at nearly mean low water, they captured eight striped bass, ranging from three to five pounds each, and in addition by 8 o'clock in the morning had over 100 kingfish beside, which proves that flood tide is not always the best fishing tide, and that sometimes night fishing is better than day fishing.

HARTIE I. PHILLIPS.

Illinois Casting Club.

CHICAGO, Ill., July 23.—*Editor Forest and Stream*: Although conditions were not so favorable as on the Saturday previous, the contest of the 20th inst. developed a remarkable showing of good scores. Of twenty-one scores cast in the quarter-ounce accuracy bait, eleven were 99 per cent. or better.

The weather conditions were: Sky cloudy, wind south, velocity about twenty miles per hour. The scores follow in the order in which they were cast:

Quarter-ounce accuracy, bait:		
	Score.	Re-entry.
Cook	98.3	96.2
Stanley	99.4	99.3
Linder	99.0	99.2
Hartley	99.1	98.8
Whitby	99.5	99.1
Asper	99.1	98.6
McFarlin	98.2
Amman	99.1
Bauer	99.1	98.2
Spencer	97.8
Heston	98.7
De Garmo	98.0
Wehle	99.2
Tournier	98.3
Salmon fly:		
De Garmo	133	132½
Amman	125	113
Stanley	125

The first of the series of inter-club contests to be played by the four Chicago clubs was held at the pool of the Anglers' Casting Club on the 21st inst. This affair, intended to promote sociability and good fellowship, was in every way a success. The honor of first place in the quarter-ounce accuracy was won by Mr. Perce, of the Chicago Fly-Casting Club, and in the light tackle dry-fly accuracy the honor went to Mr. Bellows, of the North Shore Casting Club. The veterans will not be denied.

The date set for the national tournament is rapidly approaching. The time left in which to practice is very short. The boys of Illinois will have to put up a harder fight this year than ever in order to secure the national pennant.

Those who cast their scores on days following the regular contest days are urged to be as prompt as possible in order that time for fly events, which have been postponed, may be provided.

Come out and work for the 98 per cent. average button, given by the N. A. S. A. C.

A. F. SWISHER, Sec'y.

Landlocked Salmon Fishing.

TUXEDO PARK, N. Y., July 20.—*Editor Forest and Stream*: The article in to-day's issue of FOREST AND STREAM by John D. Wish, entitled "Landlocked Salmon in Lake George," is particularly interesting to me, as I am going on a fishing trip up there next week, and intend making a systematic and thorough trial of deep trolling for this specie in those waters.

I have handled this fish continuously for over twelve years at the hatchery here, domesticating it through four generations, and during this time have had an unusually good opportunity of studying its peculiarities of growth, habits and reproduction. Also results of stocking waters with this species from advanced fry, fingerlings and yearlings to those of over two years of age. It is an utter waste of time and money to plant this fish as fry or fingerling in any waters containing bass or pickerel, unless they are held until they are at least ten inches in length before being turned out. To do this at the State or Federal hatcheries is out of the question with their limited amount of room, and the extra amount of expense it would entail, but if a fishing association could be formed, composed of the summer residents, natives, guides, hotel men, railway and steamship companies, and a series of pools built along some spring brook for the purpose of holding the salmon for a year or so after they had been consigned from the State or National hatcheries, there is no doubt but that splendid fishing would result, and instead of some half dozen of these fish being taken in a season, there would be thousands. Such angling would bring in a crowd of early fishermen filling the hotels and boarding houses at a season of the year when they are usually empty of guests.

I am sure both the State and Federal fish commissions would gladly co-operate in such an undertaking, if it was gone about in the right way, for Lake George seems an ideal environment for this, the grandest of all fresh water American game fishes.

W. M. KEIL.

Newark Bait- and Fly-Casting Club.

EAST NEWARK, N. J., July 20.—*Editor Forest and Stream*: The following scores were recorded at the club contest, held on Saturday afternoon at the club platform at Weequahic Lake:

Half-ounce distance, bait:	
Endersby	69%
Champion	112%
Jacobus	94
Mapes	164%
Neu	135%
Long	70%
Muldoon	138½%
Sands	90%
Doughty	173½%
*Smith	127%
*Marsh	172
Half-ounce accuracy, bait:	
Endersby	96 10-15
Champion	98 5-15
Jacobus	94
Mapes	97 5-15
Neu	97 6-15
Long	88 3-15
Muldoon	97 10-15
Sands	95 8-15
Doughty	96 10-15
*Poor	93 10-15
*Smith	97 1-15
*Marsh	97 9-15
Accuracy fly:	
Enders	98 8-15
Champion	96 13-15
Mapes	98 9-15
Muldoon	98 2-15
Doughty	99 5-15
Frazer	97 11-15
Distance fly:	
Enders	68
Champion	99
Mapes	93
Neu	66
Muldoon	79
Doughty	83
Frazer	96
*Smith	74
*Poor	83

Champion and Frazer used heavy rods; the others 5-ounce rods.

L. L. SANDS, Secretary.

A Bird Refuge.

ST. AUGUSTINE, Fla., July 1.—*Editor Forest and Stream:* While down on the Indian River on a recent inspection trip among the motor boats of this district, I took the inclosed photograph which I thought might be of some interest.

It represents a scene on Pelican Island, situated on the east side of the Indian River across from Sebastian, Fla. The island is not very

have nests in the same place, and two broods of young have been hatched from these nests this year, but none of them that I have seen at least has been colored differently from the typical sparrow. The nearest I have been to this white bird is about twenty feet. I could see that its bill and legs were of a pinkish color, and I thought the eyes also were pink, but could not be certain of this. Did not have a glass at the time.

In 1910 I saw a sparrow colored almost ex-

SCENE AT PELICAN ISLAND, INDIAN RIVER, FLA.

large, about two or three acres, and the pelicans have been nesting on it since or before the Civil War, and the island is now under the control of the Secretary of Agriculture, and there is a warden at Sebastian. No one is allowed to land on the island unless the warden accompanies. This picture was taken from a rowboat as we rowed around the island. The birds are all sizes, viz.: from the egg to full grown birds.

I have been a subscriber to your magazine for the past two years and would not be without it.

EDW. R. JOYCE.

Albino Sparrows.

ROCKDALE, Tenn., July 22.—*Editor Forest and Stream:* I notice in your last issue an article in regard to "An Albino Sparrow" by Laurence M. Crosbie, of Exeter, N. H.

There are two albino sparrows at this place, one of which has been noticed around here for the last eight or nine years. This year, and also once in 1911, I have seen the two together, so know that there are at least two of them. These sparrows are all white, the quill feathers seeming to be pure white, and the feathers on the back and breast with a slight tinge of yellow like the fur of a white ferret. One of these sparrows has had a nest this year behind the chimney of a negro cabin near this place, and I see it almost daily. One or two other pairs

actly like the one described by Mr. Crosbie. It was about three miles from here, so probably was not the offspring of one of these albinos.

D. R. GRAY.

YONKERS, N. Y., July 24.—*Editor Forest and Stream:* I have seen white crows and white blackbirds, the latter quite frequently among the immense flocks on Cape Cod, but have never observed an albino sparrow until this season, when I have on several occasions seen a perfectly white cock bird among a flock in the Ludlow section of our city. At first I thought him a different species, but his unmistakable chirp, shape and pugnacious manner proclaimed him a sure enough cock sparrow.

GEORGE S. SNOW.

Night Herons in Illinois.

BLOOMINGTON, Ill., July 27.—*Editor Forest and Stream:* Isaac E. Hess, the famous ornithologist of Central Illinois, has discovered a colony of fifty pairs of black-crowned night herons in the timber along the Embarras River in Southern Champaign county, Illinois. These birds inhabit the loftiest elm trees of the grove, their nests being seventy-five feet from the ground. Each nest contained from four to five

young, keeping the old birds active in supplying them with food. The adult night heron stands two feet in height. The male is a beautiful bird with three long, white plumes from the back of his head, down his back. His neck and breast are pure white, his back dark green and his eyes a flaming red. The female is without plumes, but is pure white. Subsisting upon insects, small reptiles and various pests of the farmer, the birds are of great value to the agricultural interests of the country, and the real sportsmen will never molest them. The colony discovered was so unusual in this day of growing scarcity of wild life that observers are deeply interested in the discovery of the ornithologist. The herons winter in the South.

E. E. PIERSON.

"Keeping Flies off Cattle."

MORRISTOWN, N. J., June 29.—*Editor Forest and Stream:* I am minded to try for the thanks promised in the last paragraph of your editorial, "Keeping Flies Off Cattle" in your paper of June 1. The receipt I give you is by no means original with me, nor is it now published for the first time. It was given me long ago by an old salmon angler, and is also printed by Henry P. Wells in his "American Salmon Fisherman," he having received it, if I mistake not, from the same party. I offer no suggestion at present, taking it for granted that anglers who really "paddle up stream" or land "the biggest fish" know all about them, but I unhesitatingly recommend to anyone who dislikes, as I do, the oil of citronella, the following lotion, easily prepared by any druggist, and if an experience of its virtues, lasting over fifteen years and acquired in the height of fly time in some of the worst fly-infested sections of Maine and Canada, be of any value, I can confidently affirm that he who uses it will have "no flies on him." I suggest it, as it seems to be much less known than its merits warrant. Here it is:

Best olive oil, half pint; creosote, 1 ounce; camphor, 1 ounce; pennyroyal, 1 ounce.

Rub the camphor up in alcohol and mix. I have had the best results from the use of "beechwood" creosote.

H. W. VAN WAGENEN.

Unusual Bird Incidents.

WHITNEYVILLE, Conn., July 18.—*Editor Forest and Stream:* While reading your most interesting paper this morning I saw the item about "Unusual Bird Incidents." It spoke of the bluejay subsisting on insects only. I think that a mistake, especially in this part of the country, as I have many times seen the bluejay steal the young birds from nests of other birds. In that respect they are as bad as a crow for robbing nests. I do not know if the jay takes the eggs also, as the crow does, but I do know the bluejay will steal the young, and it is as much a lover of young birds for a meal as the crow and hawk are for young chickens. Many times I have seen all sorts of birds fighting a jay to drive it away from a nest of young birds. An incident of this kind happened not long ago in a hemlock tree near a window of our home from which my daughters and I watched the fight and tried to help the birds drive the bluejay away.

 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

THE GAME REFUGE BILL.

BIG-GAME hunters and naturalists are watching—not very hopefully—the action of the Agricultural Committee of the House of Representatives on H. R. 23,839, which was printed in FOREST AND STREAM of May 18. The bill's good features have more than once been pointed out, but the measure is so important that it should be again brought to the attention of all who are interested in the preservation of our large game animals, and through them to the notice of their representatives in Congress.

The bill provides that the President of the United States, when requested in writing by the Governor of any State, may set aside as national game refuges areas adapted for the propagation and protection of game or other animals, birds or fish. The area of any one refuge shall not exceed 50,000 acres. Such national game refuges shall be under the charge of the Secretary of Agriculture. When such areas shall have been set aside, the hunting, trapping, killing or capture of animals, birds or fish shall be unlawful, except under regulation prescribed by the Secretary of Agriculture.

The purpose of the bill is to protect game mammals and birds, and not to interfere with the operation of local game laws as affecting private State lands. It is to encourage the re-introduction of elk and other big game in districts where they have become extinct, and to establish game refuges which may serve as breeding grounds, from which adjacent parts of the national forests may be restocked with game.

If Congress felt any special interest in the protection of our large game and the perpetuation of certain species which are now perilously near extinction, so good a bill as this is would not have slumbered in committee for months. Congress does not feel an interest in these matters, and the reason is because Congressmen have

not been made to understand that their constituents do feel interested in these things and want the game perpetuated. Until sportsmen actively bestir themselves in these matters, their representatives will be sluggish, and it will not be difficult to smother good bills in committee, or to kill them on the floor.

Readers of FOREST AND STREAM should demand action on H. R. 23 839.

ADVERTISING.

It isn't considered good form to talk about one's self, but at the risk of being considered "out of order" we think our readers will be interested in the advertising record of FOREST AND STREAM.

New magazines secure advertising on the possibility that such advertising may pay the advertiser. An established periodical secures advertising only because it pays, and has paid, its patrons. FOREST AND STREAM is an established magazine—the oldest outdoor magazine extant. The following comparative statement, compiled by and published in Printers' Ink, the recognized authority upon such matters as pertain to magazines and their advertising, shows FOREST AND STREAM, during the month of June, 1912, to have carried over 2,215 lines (approximately ten standard magazine pages) more than any other outdoor sportsman's publication. The month of June was selected for comparison, because it is considered the biggest month for advertising in outdoor publications:

AGATE LINES OF ADVERTISING.

(Compiled by Printers' Ink.)

Publication.	June, 1912.
Forest and Stream.....	20,023
Outing	17,808
Field and Stream.....	15,624
Outer's Book	12,320
Recreation	10,248

In addition to leading all other outdoor magazines, it is gratifying to find FOREST AND STREAM for June, 1912, showed a gain of 6,339 lines over June, 1911.

But in considering these figures, it should be borne in mind that FOREST AND STREAM, being a weekly, is issued oftener than the magazines with which it is compared, and its figures are derived by totaling the advertising of the weekly issues.

Without the support of our readers, through their patronage of our advertisers during the past year, we could not have shown so handsome an increase this year. FOREST AND STREAM has paid its advertisers handsomely, and indications are that this year will out-distance all previous years. Our editorial improvements are daily bringing encomiums—and new subscribers. FOREST AND STREAM is the most talked of magazine among outdoor men and women. It has been, and is, authority on all matters relative to hunting, fishing, trap, field and big-game shooting, travel, natural history and yachting.

We are proud of our showing as set forth by Printers' Ink, and take this opportunity to thank our readers and advertisers.

ECONOMIC VALUE OF BIRDS.

In a bulletin recently issued by the Department of Agriculture a phase of the work of the Bureau of Biological Survey, as developed under Secretary Wilson, is brought prominently to the

attention of those interested in the economic value of birds. In this bulletin, which is No. 44, of the Biological Survey series, the traits of the family, commonly known as fly-catchers, are shown, and the results of a study of the food of the birds given to the public. The contents of 3,398 stomachs are reported upon, showing an average of 94.99 per cent. of animal food and 5.01 per cent. vegetable, the animal food consisting of insects, almost exclusively of harmful species. Attention is also called to the fact that the fly-catchers, as a rule attack large predaceous birds and are thus a protection for the poultry yard against such winged enemies as hawks and crows. Of the seventeen species reported upon, the habits of each are briefly described, and insects preyed upon, as revealed by the stomach contents, are listed.

PROF. WILLIAM NIVEN'S DISCOVERIES.

It gratifies us not a little to have secured for our readers the heretofore unpublished paper by Prof. William Niven, of Mexico City, relating his discovery of several ruined cities in Mexico.

Beginning more than twenty years ago, Prof. Niven was the first white man to gaze on the greatest of these buried towns, a city fifty miles in length by five miles wide, lying along the bank of one of the lesser rivers in the heart of the wildest part of Guerrero. With the persistence of the Scotchman—for the professor is a son of the Land of Heather—he followed this first discovery with others, laying bare several ruined towns not even named by the Indians, and altogether unknown to men of science of any land. None was so large as the first great city, but from all he has brought thousands of artifacts of the dead race, relics which are totally different from anything left anywhere else in Mexico by the vanished tribes of America's Egypt.

In these explorations, Professor Niven first overcame the objections of the Indians, successfully combatted a small but determined revolution, conquered insects, reptiles, animals and the dread diseases of the wild land, and finally emerged from his last trip, only to prepare for another on which he will leave this fall, commissioned by the Mexican Government to wrest from the earth the secret of the great race which vanished from Guerrero more than 2,000 years ago.

In the article, to appear shortly in FOREST AND STREAM, Professor Niven has told for the first time the story of his trips into unexplored Guerrero, and enumerated his almost unbelievable adventures among men and animals and dead cities there. The account of his years of life in the jungle reads like a piece of fiction, but it is true to the smallest detail, and needs no addition of skilled word-imagery to make it interesting.

STATE FORESTER RANE TO ENGLAND.

F. W. RANE, State Forester of Massachusetts, has been delegated by Governor Foss to represent the Commonwealth of Massachusetts at the Second International Congress of Entomology, which is to be held at Oxford, England, Aug. 5 to 10, 1912. At the termination of the convention Mr. Rane will go on to the Black Forest of Germany to study forestry conditions and the gypsy moth question. He will remain abroad throughout the month of August.

YACHTING

Larchmont Race Week.

Tuesday the 23d was devoted to visiting and social events topped off with swimming races and other "out-of-the-boat" aquatic sports. Wednesday the 24th opened with the big event, a race between the three big schooners over the 30 1/2-mile course. The wind was very light from the southwest, in addition to which it was decidedly fluky. Elena had little difficulty in leading Irolita, crossing the finish line about 15m. in advance, while Enchantress followed in about 7m. later. The 65-foot sloops offered a picturesque race which was won by Istalena by 1m. 54s., Aurora beating Winsome by about 1m. Medora won in Class M, beating Adventuress by 4m. Joyant won the Class P event, while Nepsi took the race for the New York Y. C. 30-footers. In Class S, C. M. Camp's M. & F. II. won handily by over 2m. The summary:

JULY 24.

JULY 25.

Elena easily beat Irolita to-day, crossing the finish line better than 4 minutes ahead of her and 11 1/2 minutes before Enchantress came over. In the K class Winsome had it all her own way, taking the gun nearly seven minutes before Aurora and Istalena, between which there were only twenty seconds. Rowdy played havoc in the New York Y. C. 30 class, getting in a minute ahead of Alera and nearly twenty minutes before Lena.

Schooners—Class B—Start, 2:25—Course, 15 1/4 Miles.

JULY 26.

At the Larchmont Y. C. regatta to-day, Momo, W. E. Butler's fast sloop, "came back," defeating A. Manton Chase's Idler in a special 5 1/4-mile race for Narragansett Bay yachts. Races between these boats Wednesday and Thursday resulted in victories for Idler. The elapsed time to-day was: Momo, 1.47.41; Idler, 1.49.49.

Former Commodore Cornelius Vanderbilt is now leading for the Wilson Marshall prize in the regatta. In a drifting match of several hours on the Sound off Larchmont, his racing sloop Aurora won the Class K race, beating both Winsome and Istalena. Prior to the contest the three boats had been tied at eight points, after sailing four races. Aurora had not won a contest. She had four seconds to her credit, however, and her victory to-day gave the Vanderbilt craft 11 points. Istalena finished second and now had 10 points.

The racing to-day was the poorest that has been held so far. There was absolutely no wind at the scheduled starting hour, and after a wait of two hours the different divisions were sent away.

Cliphora defeated Maryola by 2m. 5s. in the American raceabout division, and Ogeemah won in the R class. The first of the Bayside Birds

to finish was Dodo, and M. & F. II. again won in the S class. J. S. Morgan's Turquoise took the prize among the Glen Cove Jewel boats, and for the first time in the week C. A. Correy sailed Little Dipper to success in the Star class.

Sloops, Class K—Start, 2:30—Course, 9/4 Miles. Istalena 3 15 26 Winsome 3 23 36 Aurora 3 01 02 Sloops, Classes I and M—Start, 2:35—Course, 9/4 Miles. JULY 27.

The last day, July 27, of race week broke all regatta records with thirty-four classes starting 140 yachts. A spanking northwest wind made the time in each event fast. On points made during the week, Elena, Morton F. Plant's schooner, won the Commodore Richards cup, although the good old Irolita won the race today. Winsome won in the big sloop class.

To-day's regatta ended the largest and most successful regatta ever held by the Larchmont Y. C., and with the exception of the Marblehead Corinthian, the entry list was the largest thus far recorded at any regatta. The Marblehead record included many very small classes, so that Larchmont may be taken as a record. Other winners were:

Schooners—Start, 12:40—Course, 30 1/2 Miles. Elapsed. Elapsed. Elena 2 42 51 Enchantress Disabled. Irolita 2 44 19 Corrected time: Irolita, 2.42.25. Colonial Y. C.

NEW YORK CITY, July 27.—Long distance power boat races seem to be getting more popular if the entry list at to-day's Poughkeepsie race may be taken as a criterion, twenty-six power boats taking part to-day. J. L. Luckenbach's Empire reached Poughkeepsie, the end of the first leg, well ahead of the bunch which finished as follows:

Gray Hare 3 16 13 Helen II. 5 20 14 Lottie G. 3 47 50 Marion II. 5 24 28 Idle 3 49 16 Emma B. 5 29 11 Snapshot II. 3 49 16 Alforda 5 30 22 Spindrift 4 00 20 Etta L. 5 45 11 Madeleine II. 4 40 45 Utopia 5 45 53 Yo Ho 4 47 25 Caniste 6 13 40 Respite 4 48 17 Lady Betty 6 17 43 Sterpe 4 48 44 Isis 6 43 45 Virginia 4 49 27 Retta 6 45 12 Marionette 4 51 57

Empire left Poughkeepsie at 9:50 Sunday morning, arriving at the finish with corrected time of 10.36.50 for the whole trip, 104 nautical miles. The second boat in Class B was Retta D., owned by C. Dalton, of the Colonial Y. C. Her corrected time was 12h. 17m. 45s. The third boat was F. B. Freeman's Marionette, 12h. 50m. 17s. In Class A, Spindrift, owned by C. R. Butler, of the Albany Y. C., won; time, 11h. 4m. 22s. The second boat was Idle Time, of the Colonial Y. C.; time, 11h. 25m. 52s. The third boat was Respite, owned by V. C. Peterson, of the Columbia Y. C.; time, 11h. 35m. 25s. Gray Hare, owned by A. Haas, of the Tappan Zee Y. C., won in the open boat class. Her time was 11h. 40s.

Hingham Y. C.

HINGHAM, Mass., July 27.—The one-design 15-footers belonging to the members of the Hingham Y. C., held a race off Crow Point this afternoon. Pirate won handily, and as a result of the day's racing, Usona II. takes the July championship. The summary:

Elapsed. Elapsed. Pirate 2 03 50 Inez 2 16 15 Usona II. 2 08 30 Possum 2 18 57 Polly Wog 2 15 15 Marwidor Withdrew. Puzzle 2 15 30 Mischieff Withdrew.

Corinthian Y. C.

MARBLEHEAD, Mass., July 27.—The club race of the Corinthian Y. C. this afternoon brought out twenty-six starters. The wind was from the northwest and mighty uncertain. In Class P only Timandra showed up at the start, and in Class Q Tabasco III. sailed the course alone. The sonder class brought out seven boats. Ellen and Beatrice sailed a close race, Ellen finally winning by 40s. In the Eastern Y. C. one-design class Lolita won over Scarab by 37s. In the Corinthian Y. C. one-design class, Half Moon won by 5s. Five dories of the Pleon Y. C. entered the race for the first time this season. Snail, sailed by Miss Margaret Wood, daughter of Archer Wood, won by more than 2m. The summary:

Class P.		Elapsed.
Timandra		1 47 33
Class Q.		Elapsed.

Chesapeake Bay Y. R. A.

THE port to port races of the third annual cruise and regatta of the Chesapeake Bay Yacht Association were ended to-day at Baltimore. The winners were: Chenoden, in Class Y; Eleanor, in Class Q, and Helen, in Class P. Only sailing yachts took part in these races. The power boats joined squadron runs from port to port and raced in the events given at each port. The sail racing was confined to four classes: P for sloops from 25 to 31 feet; Q for sloops 20 to 25 feet; Y for cruising yawls under 60 feet and Z for yawls under 26 feet water line. In the latter class Wye had no opposition and won by sailing over the first course. The port to port races began on July 22, the course being from Annapolis to Cambridge, a distance of 29½ nautical miles. July 24 the races were from Cambridge to Oxford, a distance of about 10 miles. July 26 the races were from Oxford to Annapolis, a distance of 31 miles. To-day's races were from Annapolis to Baltimore, a distance of 24½ miles. In each race the winning boat in each class scored one point for every boat it beat in that class. When these classes of races were finished, the scores were:

Class Y.		
Chenoden, B. Y. C.		15
Nenemoosha, Capt. Y. C.		9
Freya, Capt. Y. C.		5
Serena, Capt. Y. C.		5
Class Q.		
Eleanor, B. Y. C.		5
Vingt Trois, Chesapeake B. Y. C.		2
Class P.		
Helen, Corinthian Y. C.		5
Zillacoa, Cambridge Y. C.		2

Yachting in California.

THE fifth annual race from San Francisco to Santa Cruz, held under the auspices of the Corinthian Y. C., but open to all boats enrolled in any recognized yacht club, was held on July 19 and 20, and proved to be by far the most exciting contest ever sailed over this course. Thirteen boats were entered, but when sailing time arrived, only nine were on hand to start. In former years this race has always started from the Fulton Basin, but this year the starting point was outside the breakwater, owing to the fact that two big dredgers were in the basin filling in low ground on the Panama-Pacific International Exposition site. Special attention was given this year to the

inspection of yachts before granting permission for the race, and one, Folly, entered by the Sausalito Y. C., was denied entry on the ground that she was not deemed seaworthy enough to make the trip, which sometimes is a rather rough one. The United States Government furnished a vessel to accompany the fleet, and thus the danger of accident was greatly minimized. All the yachts were equipped with the necessary instruments for navigation. Those having engines installed had these sealed three hours before the start was made.

The first boat to appear next morning at Santa Cruz Bay was the sloop Nixie, with Capt. A. Hirsch, Jr., at the helm, crossing the finish line at 8:42 o'clock, making the trip down the coast in 12:27:35. Directly behind her came the Yankee, Charles Miller's sloop, and when the time corrections were made, it was found that the former had won by the scant margin of fifteen seconds. The third boat to arrive was Marian, which took first prize in the schooner class, and which might have finished ahead of Nixie, but for the fact that she chose the outside course and was becalmed for an hour. Thistle, the smallest boat in the race, finished fourth and was followed by Fulton G., Sweetheart, Speedwell, Lady Ada and Harpoon. Nixie not only won the prize for the yacht making the best time over the course, but also won the cup offered for the sloops over thirty feet. Thistle was the winner in the class for yachts under thirty feet.

Another recent event of interest was the race for the Hammersmith trophy, held under the auspices of the Corinthian Y. C. This event was sailed over the regular channel course and was the fourth held for the trophy to secure possession of which three wins are necessary. The sloop Meteor, with a handicap of 20m., won by a margin of 7m. 25s., Yankee being second with Kathleen third and Thistle fourth. Both Yankee and Meteor now have two wins each to their credit.

Jamaica Bay Y. R. A.

BEACH channel races for small craft were held under the auspices of the Yacht Racing Association of Jamaica Bay last Saturday. The contests were for the yachts that were too small to take part in the regular ocean regatta of the organization. The open catboat class was the only sailing division to fill and the first prize was won by C. A. Merritt's Siren. Smarty took the open power boat class and Anna Grace again was the winner among the semi-speed boats. The summary:

Open Catboats—Start, 12:05—Course, 10 Miles.	
Siren	2 51 10
Smarty	1 37 42
Ella and Elsie.....	1 43 30
Semi-Speed Power Boats—Start, 12:20—Course, 10 Miles.	
Anna Grace	1 30 08
Zoe	d. n. f.
Thistle	1 44 14
So Long	1 31 10

Duxbury Y. C.

DUXBURY, Mass., July 27.—The Duxbury Y. C. sailed a race to-day. In the 18-foot class Again won. In the 15-foot class Curlew won by 13s. The summary:

18-Foot Class.	
Again	1 45 11
Osprey	1 51 11
15-Foot Class.	
Curlew	1 53 45
Elizabeth	1 53 58
Petrel	1 54 58
Gretchen	1 55 59
Merlin	1 56 31
Sailing Dories—W. Snow, first; Miss Margaret Benedict, second; W. Kennard, third.	

Red Bank Y. C.

RED BANK, N. J., July 27.—J. G. Gillig's Papoose won the five boat race here to-day by nearly 4m. The summary:

Papoose	1 21 06	Dolphin	1 26 40
Imp	1 24 38	Maywin	1 28 55
Widow	1 25 18		

Portland and Boston Y. C. Cruise.

PORTLAND, Me., July 27.—The combined cruise of the Portland and Boston yacht clubs was ended at Peaks Island in Portland Harbor to-night. In all the events for the day, Harbor won. In the Class A race, A. M. Moody's Al Kyris was the victor by better than 10s., while in Class C Goldenrod had no competitors. The summary:

Class B.		Corrected.
Al Kyris		6 37 03
Tunipoo II.		6 47 25
Class C.		Corrected.
Goldenrod		6 44 44

POWER BOATS.

Trophy offered by Rear-Commodore Upton. Owners estimated time to make run from Boothbay to Portland. Actual time taken and percentage in correctness determined the winner: Minna started at 9:30 and finished at 1:11:14; elapsed time, 3:21:14; owner's estimate for the 30½ miles, 3:37:00. Minna was therefore penalized 10.37 points, making the corrected time 3:31.51, or 94.2 per cent. Minna is owned by F. F. Dickerman. Coaster, owned by William Brown, started at 9:50 and finished at 1:43:31; elapsed time, 3:53:31; owner's estimate for 30½ miles, 3:38.08; per cent. 93. Idlewild, owned by John Oakes Burke, started at 9:50, finished at 2:00; elapsed time, 4:10.00; owner's estimate, 4:05.00, giving him 81 per cent.

Class B—Race for Portland Y. C. Trophies—Herreshoff Method of Handicapping.		Corrected.
Al Kyris		6 36 50
Tunipoo		7 31 15
Class C.		Corrected.

New York Y. C. Instructions.

SAILING instructions for the New York Y. C. cruise on Aug. 7, off station No. 10 at Glen Cove, L. I., announce the following prizes for the various port to port runs:

For the squadron run from Glen Cove to Smithtown Bay, the Navy challenge cups; the run from Smithtown Bay to New London for the Alumni Association of the U. S. N. Corps; the run from New London to Newport for the Reare Commodore's cups; from Newport to Vineyard Haven to Newport for the Vice-Commodore's cups.

When sailing for the flag officers' cups, open only to yachts enrolled in the club, the fleet will be divided into the following divisions:

Schooners—First division, Classes A, B and C; second division, Classes D, E and F. Sloops and Yawls—First division, Classes G, H, K and L; second division, Classes M, N, P and New York Y. C. thirties.

Michigan will Race for Trophy.

MICHIGAN won three out of four elimination races against Mavourneen, thus entitling her to the right to sail against Patricia, of the Royal Canadian Y. C., for the international trophy goffered by Commodore Richardson. She will be sailed by Ogden McClurg. The international races will take place during the great regatta week of Aug. 10-17.

TRAP SHOOTING

If you want your shoot to be announced here, send a notice like the following:

Fixtures.

- Aug. 7.—Wellington, Mass.—All day shoot of Palefaces. Charles F. Mardin, Sec'y-Treas.
- Aug. 13-14.—Portland (Me.) G. C. Individual Championship on second day. S. Dimick, Sec'y.
- Sept. 4-5.—Wellington Mass.—Paleface G. C. merchandise shoot. Charles F. Mardin, Sec'y-Treas.
- Sept. 12-13.—Cincinnati (O.) G. C. Arthur Gambell, Supt.

REGISTERED TOURNAMENTS.

- Aug. 3.—Holmesburg Junction, Pa.—S. S. White G. C. W. E. Robinson, Sec'y.

DRIVERS AND TWISTERS.

The Cleveland Gun Club will hold a Labor Day tournament on Sept. 2.

The Seventh Pacific Coast Handicap will be held at Portland, Ore., Aug. 27, 28, and 29.

Tenth annual shoot of Charlottesville and University Gun Club will be held at Charlottesville, Va., Aug. 7. There will be ten events of 20 targets each, all merchandise and cash.

The Interstate Association's seventh Pacific Coast Handicap tournament will be held Aug. 27, 28 and 29, at Portland, Ore., under the auspices of the Portland Gun Club; \$1,000 or more added by the Interstate Association and the Portland Gun Club.

Gouverneur (N. Y.) Rod and Gun Club will hold its first annual registered tournament Aug. 23. The officers, from whom programs may be obtained, are: A. M. Jepson, President; E. R. Fredenburg, Vice-President; W. R. Patrick, Secretary; H. D. Holes, Treasurer; W. H. Corbin, Field Captain.

Mr. Elmer E. Shaner notifies us of the following changes in our list of registered tournaments: Ye Oak Meadow Gun Club's tournament, scheduled for Sandusky, Ohio, Aug. 23, has been postponed to Aug. 30; Mechanicsburg Gun Club's tournament, scheduled for Mechanicsburg, O., postponed from Aug. 27 to Sept. 6; and the dates for the Recreation Gun Club's tournament, at Evansville, Ind., have been changed from Sept. 9 and 10 to Sept. 16 and 17.

Paleface Gun Club will hold an all-day shoot at Wellington, Mass., on Aug. 7; and on Sept. 4 and 5 will hold a two-day merchandise shoot. Chas. F. Marden is the Secretary.

Sea Girt, N. J., interstate shooting tournament will be held Aug. 24 to Sept. 7, at Sea Girt, N. J. It will come under the auspices of the New Jersey State Rifle Association. Gov. Woodrow Wilson is president of the Association. Trapshooting is the added attraction this year. Programs may be had from National Rifle Association of America, Woodward Building, Washington, D. C. W. G. BEECROFT.

Bellingham Gun Club.

BELLINGHAM, Wis., July 22.—No high scores were made here during our two-day shoot, but we had a good attendance and felt certain every one went away happy. W. R. Thomas copped the kale with 278, seconded by Spratley and Ford, each of whom made one less. L. R. Barkley took pro. honors with 290, F. C. Riehl getting place two with 289, and only one up on F. Willett, whose sheet showed 288.

		DAY A. ORR, Sec'y-Treas.	

Crookston Gun Club.

CROOKSTON, Minn., July 23.—William Ridley shot at pair of good days at our tournament just ended. He took the big end of the shoot with 293 out of 300. This year Ridley put What Cheer, Ia., on the map. M. A. Nashold wasn't so bad with his 277, which took him up to second place. The best Fred Bills, for one of the for-targets-only shooters, could do was to tie with J. H. Stair on 280, just 2 shy of enough to take first place from R. R. Barber, who stored up 281.

Cerro Gordo Gun Club.

MASON CITY, Ia., July 25.—A good shooting crowd spent two days here, breaking rocks, and one or two good loads of small rock resulted. Billy Hoon broke just enough birds to win high gun, getting 287. He toppled over on second day, but saved himself by breaking last 15 straight. On day one he broke ten events straight, missing one in each of the others. Frank Campbell shot consistently each day, getting 143. His serious lapse from truthness came in events 6 to 9 on day one, and 9 on day two. His total was 286. Third man, H. W. Converse, made only 273, each day tallying him 139. His shooting was most erratic. Bill Crosby did bully shooting, getting 147 day one, 148 day two, for a total of 295. He made nine straights the second day, losing two in his last frame. None of the other pros. shot well enough to push him.

Huntington Gun Club.

HUNTINGTON, W. Va., July 26.—Two scores of 141 divided high amateur gun honors to-day. T. R. Shepherd and William Shattuck were behind 'em; 140 went to two shooters for place, R. Gerstell and J. B. Knapp doing it. J. S. Day took pro. "envious position" with 145, beating Luther Squier by one, who in turn was credited with only one more than R. O. Heikes.

Chicago Gun Club.

THERE will be held a two-day registered tournament on grounds at 123d street and Michigan avenue, on Aug. 10 and 11; \$100 added money. Squier money-back system. This is a registered tournament, to which the Interstate Association has contributed \$100 as a part of the Squier money-back special fund. The second annual Middle West Championship will be held some time in October. This is one of the most interesting contests ever held in the West. Watch for announcement. Program each day, ten events of 15 targets each. Rose system money division. There will be three special events (not part of the regular program), two at 15 targets, \$1.50 entrance each, and one at 20 targets, \$2.00 entrance. Money divided percentage system, class shooting, 25, 25, 25 and 25 per cent. Targets deducted at 2 cents.

Western Connecticut Trapshooters' League

DANBURY, Conn., July 20.—With even more than the usual amount of success the fourth registered tournament of the Western Connecticut Trapshooters' League was shot at Tamarack range, under the auspices of the Pahquioque Rod and Gun Club, of Danbury, Conn., today. A little touch of color and romance was added to the competition throughout the entire program by three young women shooters. Miss Thorpe, of Danbury, a young lady of fourteen, shot remarkably well, making a score of 77 out of 150, breaking 13 out of her last string of 15. Miss Hyland, of White Plains, was the high feminine, her score being 101 out of 150. There were thirty men in the tournament who made less than this breakage. Miss Bolles, of Greenwich, removed from further competition 80 aerosaucers out of her allotment of 150. The ladies attracted considerable attention, and will, we hope, through their exhibition of grace and aptitude, attract many of the numerous women present to the gentle art of trapshooting.

The winner of the tournament was L. H. Bradley, of Hartford, with a score of 137 out of the entire program of 150. W. A. Grady, of the Pahquioque Club, was second with 135; E. W. Mulford, of Hartford, was third with 134.

The race was exciting from start to finish. C. H. Daley, of Danbury, won the Connecticut State championship, with 93 out of 100. The Pahquioque Rod and Gun Club won the five-man team event with 440 out of 500. Bridgeport No. 1 was second with 434; Hartford was third, making 431. L. C. Wilson, of Bridgeport, made a run of 66, the highest of the tournament, for which he was awarded a gold watch. The cup (Connecticut trophy)—that is, one limb of it, went to L. H. Bradley.

The shooting of L. C. Chamberlain, of New Haven, put him up to 553 out of 600, high gun for the league trophy. A. O. Storer broke 98 out of 150, securing a nether limb of the Pahquioque Gun Club trophy.

In the special distance handicap merchandise event, D. H. Hall, of Bridgeport, topped the list with 24 out of 25.

The shoot was the largest ever held in the State of Connecticut, which incidentally means New England, and was, as usual, errorlessly managed, Edward H. Bailey being chief helmsman, ably assisted by W. S. Thompson, prize committeeman, and George Ginn, of the Winchester Arms Co., who cashiered the event.

Eighteen thousand five hundred targets were thrown and from the first call of "Pull" until the last pigeon had been trapped, there was intense enthusiasm among contestants and spectators. Lester German was high professional gun with 146 smashes, while Harry Stevens smashed up 138 dried muds. Neaf Appgar refused to trail, so broke the same number. Scores:

Richmond Gun Club.

RICHMOND, Va., July 20.—Parker was high gun today with 48 out of 50, being within one bird of equaling the high score of the season. Hammond was second with 47.

After the shoot the club held a meeting and voted to make the price of targets 1 cent instead of 2 cents as heretofore. This should be an inducement for visitors to come out and shoot with the club.

The program for next Saturday will be very interesting, as several experts are expected. There will also be a race between two teams, to be selected on the grounds. Scores:

Events:	1 2 3	Events:	1 2 3

Analostan Gun Club.

WASHINGTON, D. C., July 28.—The Analostan Gun Club of this city, held its first registered shoot yesterday. The weather was perfect, barring a strong wind, which blew directly in the faces of the shooters and made targets fly badly. Forty-one shooters were on the firing line, of whom thirty-three shot through the entire program of 150 targets. Five of these were professionals. H. Linn Worthington won high professional average, 143 out of 150; Homer Clark was second with 124; E. H. Storr third with 133.

S. P. Silling, of Staunton, Va., won high amateur average, tying Worthington with 143. He also won the gun event from 20yds., tying with Hogan and Leight and winning on the shoot-off with a 10 straight. E. W. Ford, of the home club, was second, making 139. Dr. B. L. Taylor was only 3 behind Ford, scoring 136. E. R. M. Purdum, secretary of the gun club at Gaithersburg, Md., landed all alone in fourth place. Following are the scores:

Westy Hogans.

THE programe for the sixth annual target shoot of the Westy Hogans is in the hands of the printer. This year's shoot will be held at Venice Park, Atlantic City, N. J., Sept. 17, 18, 19, 20 and 21. When Young's Pier was destroyed by fire, the Hogans, it might be said, were without a home, and it became necessary for them to find a suitable place in Atlantic City where they could hold their annual tournament. Venice Park should meet with the general endorsement of all intending contestants. It is easy of access, from all hotels in Atlantic City and an ideal place to hold a tournament. The background is perfect and there is a club house ample in size to accommodate any number of contestants.

The program of this year's tournament is not materially different from that of last year. The "Westy Hogan Special," which was arranged last year for amateurs who could not average better than 88 per cent., proved one of the big events and is continued. The addition of "Venice Park Special," open to amateurs only, will determine the question of individual excellence under scratch conditions.

The Squier money-back system with the Rose system governing the regular events, and the percentage system and high gun system governing the optional sweeps.

From 1907, when the first Westy Hogan tournament was held, until the present time, the Hogans have spared

WINCHESTER

Factory Loaded Shells

Won The Eastern Handicap

C. D. Henline, F. Korner and W. Wallis, all shooting Winchester Factory Loaded Shells, tied on 96 ex 100. Mr. Henline won the shoot-off, scoring 19 ex 20 from 20 yd. mark.

HIGH AVERAGE OVER ALL

Amateur and Professional

Lester German and an Illinois amateur won respectively Professional and Amateur Averages for all targets trapped, both shooting Winchester Factory Loaded Shells.

DOUBLE TARGET AVERAGE

Amateur and Professional

Allen Heil won Amateur Average on "doubles", scoring 90 x 100. Lester German won Professional Average on "doubles", scoring 93 x 100. Both shot Winchester Factory Loaded Shells.

CHAMPIONSHIP OF NORTH CAROLINA

John E. Taylor, of Wilmington, won this hotly contested event with "Leader" Loaded Shells, scoring 93 ex 100 and 25 straight. High Amateur Average was won by J. B. Pennington, of Tarboro, who also shot "Leader" Loaded Shells

Winchester Loaded Shells with Patent Corrugated Head Always Shoot in a Winning Way

no pains to arrange all the details of this great annual event. A program will be mailed any shooter in the country if he will address Bernard Elsesser, Secretary Westy Hogans, York, Pa.

Norfolk-Portsmouth Gun Club.

PORTSMOUTH, Va., July 26.—The attendance was good, and some excellent scores were made at the weekly shoot of the Norfolk-Portsmouth Gun Club yesterday afternoon. Dr. Byrd was high amateur with 94 out of 100. The conditions were fine, and several straights of 25 were made. In the club shoot Richardson and Dr. Byrd tied with 48 out of 50. The scores of the club shoot follow:

Shot at.		Brk.	Shot at.		Brk.
*Clark	100	98	Winchester	50	43

Watts L. Richmond Trophy.

THE Watts L. Richmond trophy is sanctioned by the New York State Sportsmen's Association as the western New York amateur championship at inanimate targets. In a special match on Sept. 12, 1911, between Messrs. Edward Cox, A. E. Conley, F. S. Wright and Jay D. Green, the first cup became the permanent property of

this a permanent event, and that same shall always be known as the Watts L. Richmond trophy.

This event shall always be open to recognized amateurs residing within Cayuga, Tompkins and Tioga counties, and counties in New York State west of these, which is hereby considered as western New York. This will be a 50-bird event. Ties shot off in strings of 25 targets. The entrance in an event for this cup shall be \$1, plus the targets at the price prevailing at the tournament. The Holland Gun Club or the donor, reserves the right to challenge the eligibility of any shooter.

The winner of the cup at the first tournament will receive the cup upon giving satisfactory bond for its return two weeks previous to the next following annual tournament of the above club or its successors. On return of this cup, as stated, at the next annual tournament, the holder will be entitled to 50 per cent. of the entrance, likewise the winner at the second annual tournament, upon returning the cup two weeks previous to the third tournament, shall receive 50 per cent. of the entrance at the third annual tournament, and so on. The winner at the previous tournament receiving the cash percentage on the next ensuing tournament. Mr. Green will receive 50 per cent. of 1912 entrance. All contestants in this event will shoot from one mark, regulation distance from the trap. The Interstate Association rules to govern, 50 targets, entrance \$2, targets included.

Roanoke Gun Club.

THERE was a large and enthusiastic attendance at the traps on the grounds of the Roanoke Gun Club, July 27, and some good scores were made. Guy Ward and Ed. Lec, trade representatives, were among the visitors and shot well. A number of ladies surprised the members by serving ice cream, cake and lemonade, which was thoroughly enjoyed. The weekly medals were won by the following members:

- Scratch—First, Watson; second, Scholl.
- Class A—First, Jones and Wilkinson tie; second, E. W. Poindexter.
- Class B—First, Ferguson; second, G. C. Cumbie.
- Class C—First, Berkeley; second, Bringman.

The scores follow, 50 targets:

	Per Broke.	Per Cent.		Per Broke.	Per Cent.
Blankenship	26	52	Price	45	90
Dann	30	60	Atkinson	39	78
E Poindexter	39	78	Wilkinson	42	84
T Poindexter	36	72	Elliott	36	72

			H. F. WILKINSON, Sec'y.		

Mr. Green. The cup has been replaced with a larger and better one, and the first shoot for this cup will be held on the grounds of the Holland Gun Club at Batavia, N. Y., Aug. 14, 1912, and will be regularly shot for at the annual tournament of this club or its successors. Any shooter winning this cup three times entitles him to permanent ownership, and the Holland Gun Club agrees to replace the cup, thereby making

Milton Rod and Gun Club.

MILTON, Pa., July 24.—It wasn't the most enthusiastic bunch here to-day. Our program was ten events of 15 targets, but only nine events were shot. Thirty-seven gunners turned out. Rishel was high gun with 128; Curtis second with 127, and Leats third with 124. High pro was twins—Neaf Apgar and Harry Stevens—breaking even on 132.

			J. H. DREHER, Sec'y.		

Northern Kentucky Gun Club.

JULY 28 was not an ideal day for trapshooting, the sky was covered with heavy clouds most of the time, causing a very poor light, and drifting smoke made a background against which it was extremely difficult to see the targets; then, too, there was a strong wind blowing across the traps which made the targets do all sorts of unexpected stunts which kept the shooters guessing. The shoot was the best attended of this season's series of monthly money-back tournaments, over twenty men facing the traps during the shoot. Among the out-of-town shooters present were: A. C. Blair and H. Humston, of Xenia, Ohio; F. Fuchs and G. A. Beard, of Evansville, Ind.; W. Green and W. H. Hall, Maysville, Ky.; Ed Cain and Ike Brandenburg, of Dayton, Ohio; L. Bittner, H. Hessler and C. Davis, of Mt. Healthy, Ohio, and Stickles, of Hamilton, Ohio. The office work was in charge of Mr. Lamb, and John Braunagle acted as referee and scorer. Shooting began about 11 o'clock, and was continued until after five, a couple of special events being shot after the regular program was finished.

The program consisted of ten 15-target events, money divided 4, 3, 2, 1, Rose system in the first five and percentage, 40, 30, 20 and 10 per cent in the last five. The moneyback purse amounted to \$39.50, and there were ten shooters with total losses of \$44.95, in sums ranging from 31 cents to \$9.52. All losses were guaranteed by the club, so that no one was out anything.

High score was made by Stickles, 143; second high amateur was W. Green with 140, and Hammerschmidt got in third place with 137. C. O. Le Compte, professional, was second high man for the day with 141. The special handicap event was won by L. Bittner from 17yds., with only one miss; Capt. G. Dameron came second, one target behind him, and Green and Hammerschmidt tied for third place.

The last event of the afternoon was at 50 pairs of doubles, with four entries. W. R. Chamberlain, of Columbus, did very nice work, breaking 84, a remarkable score under the hard conditions prevailing when this event was shot. His nearest competitor was J. S. Day, with 81; Le Compte broke 76, and G. A. Beard, 60. Day is getting into trim for his match with Freeman for the E. C. cup on Aug. 24, and will put up a good race.

Programs for the club's registered shoot, to be held on Aug. 15 and 16, are in the mails. There will be ten 15-target events each day, with a special at 25 targets. A large crowd is expected, as many of the shooters in this section are working hard to qualify for the Pot Season shoot next October. The scores follow:

*C O Le Compte..... 141	H Hessler	131
F Fuchs	L Bittner	125
G A Beard	Johnson	103
W Green	Stickles	143
W H Hall	Dameron	136
A C Blair	Richards	125
H Humston	Frohliker	119
I Brandenburg	*Holaday	136
Cain	Hammerschmidt	137
Black	C Davis	134

*Professionals.

Special event, 25 targets, entrance \$1.25, three moneys, 50, 30 and 20 per cent., handicap yards:

Green, 20	21	L Bittner, 17.....	24

Blair, 18	20	Fuchs, 16	20
Hessler, 18	19	Humston, 16	15
Hall, 18	20		

Hudson Gun Club.

JERSEY CITY, N. J., July 28.—Appended are the scores of the regular bi-monthly shoot of the Hudson Gun Club, held to-day. The day was cool and pleasant for the game, with a stiff wind blowing across the traps, making the targets a little hard to get. J. E. Smith was high gun with an average of 91 per cent., having a straight run of 44, and being the best performance at our grounds for some time past. M. Wynne was the runner-up with an average of 89, and W. Roach finished in third place with 83.

Our next shooting date will be on Aug. 11, and everybody is welcome to come out and use our traps. A full line of the standard trap loads are for sale at the grounds at popular prices.

T. H. K.

Capt. Bogardus Retires.

CAPT. ANDREW H. BOGARDUS, famed for forty years as the champion all-around gun shot of the world, announced his retirement this week, and will handle a gun no more. He is now in his eightieth year, and has been a prominent figure before the public since 1868, when he first began to attract attention by his wonderful dexterity with a rifle. Capt. Bogardus was born in New York city, and commenced to shoot at the age of fifteen. He came to Illinois in 1856, and settled near Petersburg. He found ideal hunting conditions in the timber land of that district and this gave him ample opportunity to develop his talent with a gun. His first public appearance was in 1863, in St. Louis, when he entered a pigeon

The Result of Over a Century's Experience

Perfection in powder-making is only achieved by exercising the most scrupulous care in the selection and preparation of raw materials, employing skilled workmen exclusively, and using only the most improved modern mechanical equipment.

This is the Du Pont method and accounts for the unequalled reputation among sportsmen enjoyed by the Du Pont brands of Smokeless Shotgun Powders. One of these brands that retains its popularity year after year is "The Old Reliable"

Bulk

High Velocity without sacrifice of regularity of pattern and pressure and without increase of residue. Burns clean—no "blow back." DU PONT SMOKELESS SHOT-GUN POWDER positively will not pit the gun barrels.

UNEQUALED FOR FIELD AND TRAP SHOOTING

Pioneer Powder Makers of America

ESTABLISHED 1802

Wilmington, Del.

shooting contest. Although this was the first trapshooting in his experience, his skill won him first money. He was immediately matched with George Stanton, of Detroit, for \$200 each, 50 birds to be killed by each. Capt. Bogardus, shot 46 and his opponent but 40. This match was followed by hundreds of others, the Central Illinoisan meeting all of the crack shots of the world, soon earning and holding the title of champion of the world. A large box is required to hold the badges, trophies and prizes of various kinds won. This collection is one of the most remarkable of the kind in the world. During the visit of the late of King of England to the United States in the early 70s, Capt. Bogardus piloted him to the hunting grounds of Livingston county and other places, where the royal sportsman sought game and was his host on many fields. Capt. Bogardus also traveled for many years with the leading circuses of the country, giving a daily exhibition of his skill with the rifle. Of late years he was with Buffalo Bill. He was accompanied for a time by his sons, who have also attained fame as marksmen. For the past few years, Capt. Bogardus has operated shooting galleries in his home city of Lincoln and various public parks of central Illinois. Ill-health decided him to retire. His decision will be learned with regret by friends all over the world.

Canandaigua Sportsmen's Club.

SYRACUSE, N. Y., July 26.—An even dozen marksmen faced the traps at Lakeside Park to-day at the weekly shoot of Canandaigua Sportsman's Club. One event, styled a "Jack Rabbit," or a near approach to actual hunting conditions, created much amusement, and several shooters "grassed" their birds with regularity with the first or second barrel. Van Wormer was high gun for the silver spoon; Stoddard second, a cut-glass dish, and Eiseline third.

The club will send a squad to the Rochester Gun Club's tournament, and also to the Holland Gun Club's tournament at Batavia next month, when extra merchandise and trophy cup events will be competed. The Watts L. Richmond trophy, sanctioned by the New York State Sportsman's Association as the western New York championship at inanimate targets, will be contested for at Batavia on Aug. 14.

Scores of to-day follow: Van Wormer (15) 49, Stoddard (6) 47, Eiseline (13) 43, Kibbe (13) 41, Barringer (15) 38, Mason (0) 37; Stoddard 39, Mason 38, Richie 34, Cayward 33, Potter 27, Chesebro 16, Mason 14, Elliott 9, Van Wormer 7, Eiseline 6, Lacy 5. W. J. KIBBE.

I cheer-fully recommend Robin Hood Ammunition. It got 36 partridges in 36 shots in ten hours. The proof is in the picture. George C. Prince Powers Mich.

He Shoots R.H. - Why Don't You?

Be an R. H. Sharpshooter! If your scores are less than perfect, Robin Hood can help you make them better. Try it. Buy a box from your dealer, take it out and put it on trial. Note the absence of recoil; note the velocity, the accuracy, the perfect pattern.

ROBIN HOOD NOT MADE BY A TRUST AMMUNITION

is loaded with our own smokeless powders, made after a special formula that eliminates the "kick" and uses all the force to propel the shot. Naturally, R. H. drives faster, shoots straighter and kills further than others.

Free Booklet

Every man who carries a gun ought to have our booklet, "Facts About Our Shell Game." It tells why R. H. progressive-burning powder means great muzzle velocity and a full game bag.

ROBIN HOOD AMMUNITION CO., O STREET, SWANTON, VT.

looked very small to him; but Fred says that they will look larger from day to day, as he gets into the game again. We hope so, and it would be pleasing to see some of the other old stand-bys get into the game again.

The club shoot on Aug. 3 will be known as Freeman day; the contest will be in charge of Capt. Geo. P. Freeman, and George is going to see that everything is dished out as fine as silk, and if the boys will only come, they will get a day that they can put in a frame—something to look at—as George knows how to do it. Shoots of this kind are to be held each Saturday. Some member of the club will be honored by having a day named after him, and it will be up to him to see how many of his friends he can get out; so, boys, get on your thinking caps and see how many friends you have got that can break targets. Judge Ong is home. From a letter received from him by the manager he says some dub has been using his name, making 28 or 30 out of 50. The Judge wants it understood that he has not shot a target in a year, and he don't like to have a man by the name of Ong without he can break a 90 per cent. clip.

Event No. 1, monthly trophy, 50 targets, 16yds.: Jones 48, Brown 46, Dibble 45, Stepp 45, Freeman 42, Rockwell 42, Judd 42, Haycox 40, Hopkins 37, Wall 37, Thorp 35, Beckley 35, Beal 33, W. Green 33, C. B. Green 37.

Event No. 2, annual trophy, 50 targets, 16yds.: Brown 47, Freeman 44, Jones 44, Rockwell 43, Judd 43, Wall 40, Stepp 40, Beal 40, Hopkins 39, Mist 39, Green 37, Right 37, Thorp 35, W. Green 33, Douglass 31.

Blue Ribbon No. 1, 25 targets per man, added targets handicap: Stepp (4) 25, Jones (1) 24, Brown (0) 23, Beal (2) 23, Hopkins (8) 23, Freeman (6) 22, Judd (1) 22, Green (5) 22, Haycox (2) 21, Beaumont (10) 20, Douglass (8) 19, Right (4) 18.

Blue Ribbon No. 2, 25 targets per man, added targets handicaps: Judd (2) 25, Jones (2) 25, Green (5) 25, Brown (0) 24, Beaumont (10) 23, Stepp (0) 20, Beal (2) 20, Right (4) 20, Douglass (8) 19, W. Green (6) 17.

F. H. WALLACE, Mgr.

Du Pont Gun Club.

WILMINGTON, Del., July 27.—In a team race at West Chester today between teams representing the Du Pont Gun Club and the West Chester Gun Club, the local marksmen won by the score of 452 to 424.

The conditions of the race were that the ten high scores were to count, and prizes of silver spoons were awarded to the high man of each team.

J. B. McHugh made the high score of the team representing the Du Pont Gun Club, breaking 48 out of a possible 50. C. E. Barnes was high man for West Chester, with a score of 47 out of a possible 50.

The showing made by the local gunners was excellent, and they shot against the cream of Chester county. The scores:

Cleveland Gun Club.

CLEVELAND, O., July 20.—The weekly shoot of the Cleveland Gun Club was held to-day at Shooting Park Stop 16A, Mayfield road. The shoot was well attended, but no record-breaking scores were made. The weather conditions were not of the best. The shoot had to be shot under the covered booths, as it rained most of the time, but the game moved just the same, as the Cleveland grounds are equipped for all kinds of weather conditions.

At our next shoot a novel event will be held. A number of pictures have been secured of some of our good shots in days gone by and who are leaning on past records. These pictures will be used as a proxy and will be placed at the score and somebody will do the shooting, and the scorer will be placed on record in the name that the picture represent, as we do not want to see the names of Ong, Blakeslee, Burns, Eady, Telling, Docomun, Genner, Ambler, Rowley, King, Hopkins and others go out of existence. Of course, we cannot always use a proxy that will make the score of these gentlemen, but we wish to keep their names before the public as great shots.

The following are the scores of to-day:

Event No. 1, monthly trophy, 50 targets, handicap 16yds.: Judd 46, Stepp 45, Brown 44, Jones 43, Dibble 43, Rockwell 43, Doolittle 42, Freeman 40, Wallace 40, Beckley 38, Thorp 38, Stevens 38, Weeden 38, Sherman 37, Mack 36, Sharp 35, Douglass 35, Schultus 33.

Event No. 2, annual trophy, 50 targets, handicap 16yds.: Brown 46, Dibble 45, Doolittle 45, Jones 42, Wallace 40, Stepp 40, Freeman 40, Thorp 38, Rockwell 41, Judd 37, Beckley 36, King 36, Stevens 36, Weeden 36, Schultus 35, Douglass 34, Sharp, 32, Sherman 32, Wakeman 30.

Event No. 3, blue ribbon contest, 25 targets: Brown 25, Doolittle 22, Jones 22, Judd 22, Thorp 21, Stepp 19, Beckley 19, Rock 19, Freeman 19, Stevens 19, Sherman 18, Douglass 17.

Event No. 4, blue ribbon contest, 25 targets: Brown 24, Doolittle 24, Stepp 23, Jones 21, Judd 21, Freeman 20, Rock 20, King 19, Beckley 17, Thorp 17, Stevens 17, Sherman 15.

July 28.—Fifteen shooters took part in the weekly club shoot of the Cleveland Gun Club, held yesterday. High guns for the day were: Dr. A. I. Brown with 93 out of 100; A. B. Jones, second with 92; Fred Beaumont, once a regular Saturday shooter, put in his first appearance at a club shoot for 1912. He said the targets

Smith Gun Club.

NEWARK, N. J., July 27.—Good scores were made today at the Smith Gun Club traps. Sweepstakes were popular. Four interesting 25-bird matches were shot between Dr. C. Moeller and G. W. Naugle. In the first the men tied, each breaking 20 birds. The second match also came out a tie, each man breaking 22. Dr. Moeller took the lead in the third by smashing 22 against 18 by his opponent. The fourth match was also won by Dr. Moeller by the score of 21 to 20, giving him a decisive victory in the series.

Considerable interest was also aroused over a match between J. W. Riley and E. Leslie, which was won by the former by the score of 20 against 11, out of the possible 25.

The following scores were made:

Events:	1	2	3	4	Events:	1	2	3	4
Dr C Moeller...	20	22	22	21	H Higgs	19	20	20	..
G W Naugle ...	20	22	18	20	F Hagle	17	18	18	..
J W Riley ...	20	21	19	..	C Young.....	18	16	16	15
E Leslie	11	8	E Lindell	17	21	20	20

Indianapolis Gun Club.

INDIANAPOLIS, Ind., July 27.—Parry led the target shooters at the weekly practice of the gun club to-day, breaking 165 out of 175 and posting a run of 62. Edmonson was second and Britton third.

The statement made last week that Edmonson's 99 out of 100 was the best local performance applied only to our weekly practice. It has been beaten by Britton, Wise and J. W. Bell in the tournament shooting.

	Shot		Shot		
	at.	Brk.	at.	Brk.	
Parry	175	165	Wilson	100	84
Edmonson	175	163	Moller	200	166
Britton	175	161	Alig	100	81
Dixon	175	154	Stitle	100	72
Lewis	150	126	Neighbors	125	90
				R.	R.

Rod and Gun Club of Baltimore.

BALTIMORE, Md., July 27.—Our practice shoot today brought out an interesting 5-target, 5-event match. H. N. Williams broke his 25 straight, taking high gun honors for the day. Gross broke 23 for second, and Turner 20 for third. Other scores were: Dr. Baker 19, Butler 19, Rielly 19, Bowers 16, White 15, Dolman 11.

William Murray is secretary and Wm. A. White field captain. Visitors always are welcome.

YACHTING NOTES.

Beverly Y. C.

BOSTON, Mass., July 23.—*Editor Forest and Stream:* I send you with this the reports of our races this year, commencing with the four hundred and sixty-ninth regatta on the 15th of June up to and including the four hundred and seventy-sixth regatta on the 20th of July.

It is a pleasure to note that the events have been well attended, and that the racing is excellent. The new class of 15-footers has been well represented each day since their arrival in the bay. The boats have demonstrated themselves to be slightly better than the old Herreshoff boats, particularly off the wind. They were built in Boston by George Lawley & Sons Corporation, and towed around the Cape.

F. A. EUSTIS, Sec'y.

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen.

Shoot well because they hold the charge compactly together at extreme ranges.

Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

(Patented, Feb. 20, 1912.)

SPORTSMEN'S GLASSES REVOLUTIONIZED

by our new **Akops Crystal** lense—a double shade of amber and veridian, and our own exclusive product—far superior to the old style, obsolete amber lense. The **Akops Crystal** eliminates not only all the ultra violet rays, but also all the violet and blue rays which are so irritating to the eye.

The amber lense is less than 50 per cent. efficient, because it cuts out only part of the ultra violet and does not affect the latter two.

Before buying a field glass or binocular, it will pay you to communicate with us.

THE F. W. KING OPTICAL CO. 450 Ellastone Building, Cleveland, Ohio

Never Shakes Your Confidence

DON'T let your long planned hunting trip be spoiled—spoiled by your gun not rising to the occasion at some critical moment. And you know how the shortcomings of your gun always show up at the critical moment.

After that your confidence is gone. The six Hunter brothers have kept on the trail of shotgun shortcomings with invention, workmanship and Purpose, for 22 years.

The result is the Smith Gun, the gun without a single shortcoming to mar the pleasure of the

hunting trip or cheat the game bag of a single bird.

Purpose got rid of "shooting loose" by producing the Smith bolt, which double-wedges through extension rib and grips tight with a double rotary grip.

Purpose eliminated *inaccessibility*—which causes a gun owner to leave his lock uncleaned until it causes trouble—with the Smith "one-screw access." And so on through the list.

Have your dealer show you the new Smith 20 gauge—20 gauge from butt to muzzle. Write for catalog, showing grades from \$25 net to \$1500 list.

\$102.50 grade. Net price, with ejector, only \$75; with Hunter One-Trigger, \$100 net.

There is home safety and abundant nourishment of the right sort in

CARNATION MILK

From Contented Cows

The best cup of home coffee is no better than the luscious coffee anyone can make over the camp-fire, served with plenty of delicious Carnation Milk. Carnation Milk won't "churn" to butter on the way. It is always the same smooth consistency, rich and sweet and fresh, no matter how far it is carried or how rough the road.

Carnation Milk is the pure milk of contented cows that are fed, watered and kept under ideal conditions. A part of the water is taken out, by evaporation at low temperature, and the milk is cooled, sealed and sterilized, by a simple, but very careful, process which the makers of Carnation Milk have perfected during years of experience. To make the best was the aim for Carnation Milk. That this ideal has been absolutely realized is attested by the unconditional guaranty under which Carnation Milk is sold.

You will be glad to have plenty of it—camping, hunting, fishing, traveling, logging—whatever the call that takes you near to nature. You will be equally glad to use Carnation Milk at home. It is safe, pure, delicious, always.

Free Recipe Book, giving directions for using Carnation Milk for all dishes in which milk is used, thus making them more delicious and with greater economy. Any one can make delicious dishes from the Carnation Book. Send for a copy.

Order a case of **CARNATION MILK—the Modern Milkman** for the outing trip.

BUZZARD'S BAY, Mass., July 27.—The eighth club race of the Beverly Y. C. was sailed here to-day. At the start the wind was very light from the southwest, and the first three classes were just about able to get away from the mark comfortably. In the 21-foot class F. W. Sargent's Phantom won by nearly 3½m. over Foraminifer. Saracen got the start with Polliwog and Skate following, kept it until the outer mark was rounded, when the wind shifted. Phantom way astern got it first, rounding the outer marks in the lead, and kept it to the end. The sonder race proved a walkover for Galen L. Stone's Peg by nearly 13m. Seacoon finished second and Fin third. Lestris scored another win in the Crane one-design class, Miss Priscilla Crane bringing the boat home about half a minute ahead of her brother, Joshua Crane, Jr., in Charmion. In the Herreshoff 15-foot class, Miss Eunice Taylor's Vim finished first. The summary:

21-Foot Class.

Ticks from the Ship's Clock.

C. M. Camp, commodore of the Marine and Field Club, has offered a cup for the S class, open to all divisions. The cup must be won twice by the same owner, though he may win in any other boat in the class. In other words, the cup is for skippers' expertness, and not for architects' lines. The first race will be sailed to-day, and the second the last day of the Atlantic Y. C. race week.

LONG BRANCH, N. J., July 27.—Five knockabouts entered to-day's race on the Shrewsbury River. Elf, owned and sailed by William Potts, won over Seymour Houghton's Elseadore by a close margin.

Harold Buch's Kelpie won again last Saturday in the Stamford Y. C.'s one-design class. Bartholomew Jacob's Killie finished second on 35s. behind.

It was lady skippers' day last Saturday at the Seawanhaka-Corinthian Y. C. at Oyster Bay. Miss Nichols, a cool, clever yachtswoman, took Hen across the line a winner, beating Chipmunk, sailed by Miss Young, nearly four minutes. Mrs. C. Mackenzie crossed third in Thelma, exactly two minutes later. Miss Roosevelt's Grilse and Miss Landon's Imp also sailed.

An effort is being made by yachtsmen to induce Alexander S. Cochran, of Yonkers, N. Y., to fit out the crack racing schooner Westward and place her in commission for racing in the New York Y. C. squadron runs next month and other racing events planned under the auspices of this club for the fall. Up to the present time nothing has been accomplished, owing partly to the change of sail area, which the Plant schooner Elena underwent at Bristol several weeks ago.

FOREST AND STREAM PUBLISHING COMPANY

Investment Opportunities In High Grade Securities

The foundations of many large estates were laid by a small initial investment in a manufacturing enterprise in its early stage. Many opportunities are now open to investors to share in the prosperity of well established industrial concerns whose business has been brought up to a high state of organization and efficiency.

The preferred shares of such corporations are particularly desirable as investment for those who desire to obtain the largest percentage of income return consistent with safety of principal.

We shall be pleased to explain fully through personal interview or correspondence, to anyone interested, the many advantages of this form of investment. Call or write for our 40-page August circular regarding these issues.

THOMPSON, Mgr., Kedgemakooe Club, New Grafton, Nova Scotia.**

No Decision in Momo—Idler Race.

THE 118-mile race between the Class P sloop Momo, owned by W. E. Butler, and the Class Q sloop Idler, owned by A. Manton Chace, from Newport to Larchmont, ended in a dispute and resulted in an equal division of the prizes. Momo gave her time as 11:45 and Idler announced her arrival at 12 P. M.

The captain of Momo claimed that Idler did not finish until 12:45 P. M., and as there was no committee boat at the finish, it was impossible to arrive at a satisfactory conclusion, the result being the division of the trophies. The starting gun was fired at the committee boat moored in Newport Harbor at 12 sharp. Momo crossed to leeward at 12:17 and Idler to windward at 12:23.

Cadilloqua Regatta.

DETROIT, Mich., July 27.—Kittyhawk II. won the Clement Studebaker, Jr., trophy for the fastest trip over the Studebaker mile in the regatta ending here to-day. She did the measured mile in 1m. 11 2/5s., the fastest mile ever made on the Great Lakes. This is at the rate of 50.42 miles an hour. Previously Kitty Hawk II. won the forty-mile Cadilloqua free-for-all motor boat championship. The Clement Studebaker, Jr., trophy is one of the handsomest ever offered for a motor boat event and was a tremendous in-

centive to the motor speed boats. Competitors for the trophy included the fastest motor boats in America at the present time.

Manchester Y. C.

MANCHESTER, Mass., July 27.—Thirty boats were entered to-day in the invitation race of the Manchester Y. C. Onda II., owned by John Greenough, was the winner in Class P. Time, 53m. 48s. The other winners were: Sonder class, Ellen, owned by Charles Curtis; Class I, 18-footers, Louise, A. E. Whittemore; Marblehead one-design, Lolita, C. H. W. Foster; Manchester one-design, Ketchup, George and Everett Fabyan; Corinthian one-design, all withdrew.

Motor Boating

Bermuda Power Boat Race.

So little interest was taken in the ocean race to Bermuda, starting from Philadelphia on last Saturday, that only two boats started. Kathemma was piloted by Dr. C. S. Street and is owned by Commodore W. C. Smith, of the Ocean Gate Y. C., and Dream, owned and handled by Chas. L. Logan, of the Yachtsmen's Club.

The yachts were not measured until morning of the starting day and the handicap allowance computed. Dream, 3/8 of an inch longer than the minimum of 40 feet, receives a time allowance over Kathemma, 51 feet long, of 14h. 14m. 21s. This has made Dream a favorite among the yachtsmen here. She was built especially for the race.

The final inspection by the committee of the Yachtsmen's Club was made before noon, and at 12 o'clock the warning signal was sounded. Five minutes later the preparatory signal was given, and the boats started across the line, Dream leading at 11m. 10s. after 12, and Kathemma following 31s. later.

Lake Hopatcong Y. C.

LAKE HOPATCONG, N. J., July 27.—The second annual motor boat meet of the series under the auspices of the Lake Hopatcong Y. C. was held to-day. Summary:

Class A—Won by Dixie, Jr., owned by R. H. Lock; San Toy, owned by W. H. Barron, second; Gopher, owned by E. C. Sargeant, third. Time, 48m. 36s.

Class B—Won by Pegasus, B. C. Tefft; Kalitan, Raymond Brown, second; Chum, J. G. Clark, third. Time, 28m. 19s.

Class C—Won by Neptune, A. F. Roberts; Nixie, C. R. Kingsley, second; Dollie, K. S. Evans, third. Time, 1h. 3m. 53s.

Canoeing

Yapewi Aquatic Club.

THE Yapewi Aquatic Club held a most enjoyable regatta on Saturday afternoon, July 27, off their club house at Bordentown, N. J. A large crowd witnessed the contests, and in some events the finish was very exciting. All events were open only to members of clubs belonging to the Associated Canoe Clubs of the Delaware. This association has an annual trophy which is awarded to the club having the greatest number of points to its credit at the conclusion of the season's racing programs.

After the races a supper was served in the club house, following which an informal dance was held. The afternoon and evening entertainment was thoroughly enjoyed by everyone, and much praise was given the committee on their

For Sale.

A PROBLEM'S SOLUTION

Log Cabins and Cottages

How to Build and Furnish Them

A seasonable book when all minds are bent on the problem of getting close to nature. Mr. Wicks in this delightful book offers timely advice to every one who wants to build a simple summer home at one with its surroundings of wood or stream or shore.

This is a thoroughly practical work, treating of the how, the where, and the with what of camp building and furnishing. It is helpful, too, in regard to furnishing, and withal a most beautiful work.

Cloth, profusely illustrated, \$1.50 postpaid.

DURATION OF LIFE.

It has been estimated by Prof. Weisman in his work, "The Duration of Life," that the day-fly lives twenty-four hours, the Mayfly one day, the butterfly two months, as also does the flea; the fly three to four months, the ant, the cricket and the bee one year each, the hare and sheep six to ten years each, the nightingale twelve years, the wolf twelve to fifteen years, the canary bird fifteen to twenty years, the dog fifteen to twenty-five years, cattle twenty-five years, the stag thirty-five to forty years, the heron and bear fifty years each, the turtle and parrot 100 years each. The ivy outlives 200 years, the elm 300 to 350 years, the linden 500 to 1,000 years, the locust tree and the oak 400 years, the fir 700 to 1,200 years, and palm trees 3,000 to 5,000 years. The mouse lives six years, the squirrel six years, small singing birds eight to eighteen years, the pigeon ten years, fowls (domestic) ten to twenty years, the fox fourteen years, sheep fifteen years, golden pheasant fifteen years, the turkey sixteen years, crayfish twenty years, the magpie twenty years in captivity, well over twenty years in natural state; the pig twenty years, the wild boar twenty-five years, the sea-snail thirty years, the cuckoo (single instance) thirty-two years, the lion thirty-five years, the toad, cat and horse forty years, corals fifty years, sea anemones fifty to sixty years, the raven and eider duck 100 years, the wild goose 100 years (?), eagles and falcons 100 years, the golden eagle 104 years and upward, the white-headed vulture 118 years, falcon (species not mentioned) 162 years, the elephant 200 years, the pike 200 years, the carp 200 years and the swan 300 years (?).

REARING DEER IN SCOTLAND.

THE intelligence that, with the view of bringing fresh blood into his forests, Sir Charles Ross, of Balnagown, is rearing from sixty to a hundred deer calves secured from all the leading preserves in the North of Scotland, serves to remind us that parts of the Balnagown estate have for centuries carried a superior head of deer, says the Shooting Times. The grounds have always been regarded as among the finest in the Highlands, and have, according to tradition, harbored some splendid stags. It is on record that, about seventy years ago, they yielded on more than one occasion heads displaying no fewer than twenty-two tines. The general consensus of opinion is that the finest head obtained in the Highlands within recent times belonged to a stag killed in 1843 by a poacher in the forest of Deanich, Balnagown. The trophy, which was latterly the property of the late Lord Powerscourt, was embellished with eighteen tines of marvelous beauty and symmetry. It had a span of forty inches, the horns measuring seven inches round the base. The brow antlers were pre-eminently elegant and well developed, and measured not less than eighteen inches in length. This matchless head was bought from the poacher for £3 by Hay Mackenzie, of Rhidoroch. We are not aware whether this is the trophy referred to by Evan G. Mackenzie as having passed into the possession of a Duchess of Sutherland, who left it at her death to Lord Talbot. "Since then," continues Mr. Mackenzie, "all traces of it have been lost." It is evident that Sir Charles Ross intends to maintain the high prestige of his excellent preserves.

"WEAR a wool suit for hunting," says John Carville, of Spring Lake. "A woolen shirt, a sweater, a mackinaw coat, short pants and wool stockings are the articles to make a man feel that he is clad right for the great outdoors. I prefer a waterproof shoe in the summer time and moccasins for hunting if a man can wear them. Sometimes a man with tender feet is unable to stand the roads with such thin foot gear."—Maine Woods.

THE knowledge that only reputable firms, with sound and wholesome propositions, are to be found in the advertising columns of a magazine is the magic wand that transforms readers into buyers.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth. 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00.

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose; Mountain Sheep; Game Refugees, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00.

An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00.

A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

"The Long Shooters" and the Origin of 300 Yards Revolver Shooting. (New.)

By Wm. Brent Altsheler. Price 75 cents. Postage 4 cents extra.

Interesting alike to civilian and soldier, amateur and professional. A neatly bound volume; illustrated from photographs of shooters and shooting scenes.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth. 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

**Investment Opportunities
In High Grade Securities**

The foundations of many large estates were laid by a small initial investment in a manufacturing enterprise in its early stage. Many opportunities are now open to investors to share in the prosperity of well established industrial concerns whose business has been brought up to a high state of organization and efficiency.

The preferred shares of such corporations are particularly desirable as investment for those who desire to obtain the largest percentage of income return consistent with safety of principal.

We shall be pleased to explain fully through personal interview or correspondence, to anyone interested, the many advantages of this form of investment. Call or write for our 40-page August circular regarding these issues.

Through Unexplored Guerrero

By PROF. WILLIAM NIVEN

Chapter I.—Into the Wilderness

[THE Mexico of to-day, a land covering an area of more than 800,000 square miles, is fairly well known to civilized man as far south as Mexico City, the capital of the republic, built on the ruins of the ancient Tenochtitlan, capital of the Aztec Empire. But if one draws a line from east to west, from the Gulf of Mexico to the Pacific Ocean, through this capital, he will find lying to the south clear to the Guatemala line, a stretch of wilderness less known than the pine barrens of Canada and more thinly inhabited than the eastern slope of the Andes.

Here rises mountain range on mountain range; here flow numberless small rivers into greater streams, abundantly watering great uncultivated gorges, and eventually emptying crystal tides into two oceans; here lie mile on mile of buried cities, centers of population which were crumbling ruins when thunder and lightning played 'round Calvary; here dwell great snakes ready to crush the wanderer in their powerful coils, and here roams the largest of the cats of the New World, the spotted jaguar, undisputed king of the mountain and the valley, the forest and the level river bank. Even to scientists the scattered wild tribes which make their homes in this southern half of Mexico are unknown, creatures almost as wild as the animals which dwell in their forests, and yet no kin to the city-builders who lived and worked and died in this region long before the Aztecs came to the Vale of Anahuac.

Wildest of all this large area, which comprises at least half of all Mexico, is the State of Guerrero lying more than one hundred miles south and west of Mexico City. It is a State of mountains, dry, save where large streams flow through precipitous cañons yet filled with gold, and with ruined cities now buried beneath many feet of earth and vegetation. Thence came the greater part of the gold which Cortez sent to Spain and Mexico; thence, likewise, came the treasure of the Montezumas, yet the State has been scarcely scratched in a mining way.—EDITOR.]

MY first glimpse of the prehistoric riches of the Mexican State of Guerrero was obtained in 1889, when I visited Chilpancingo, the capital of the State, on a mission not connected with archeological or ethnological work. While in Chilpancingo, I had the pleasure to be the guest of the Governor, Gen. F. O. Arce, an able executive and a deep student of the country and the people he ruled.

The Governor had a large collection of antiques, and among them I noticed a number of idols, ornaments, and one or two clay pots, of a design altogether different from anything I ever before had seen. These, Gen. Arce informed me, came from the ruins of an extensive city a few miles from the village of Xochipala. He added the still more interesting news that, to his own knowledge, no foreigner had ever seen these ruins, much less tried to wrest from them their secrets of the dim past.

With the aid of Governor Arce, I selected four trustworthy natives, armed and provided them with horses and blankets, and, one bright morning in December, set out for the River of Mystery—the Rio Balsas, along whose shores the tribes of other days planted their massive stone cities.

The Balsas River, numbered among the few great streams of Mexico, rises in the State of Tlaxcala, and flows southward and westward into the Pacific Ocean near the village of Zacatula. Terrific rapids make it almost unnavigable, while high mountain walls shut out its narrow valley from the world. As a consequence, both the modern and the ancient tribes along its shore are practically unknown, and it was with some misgivings that I set out, surrounded by my little bodyguard and provided with letters from Governor Arce to the various chiefs, on my journey into the burial ground of a great race.

Out from Chilpancingo the trail, narrow, twisted, and, in many places, cut from the solid rock of the hills, rises first to the divide. About an hour's ride from Chilpancingo we came to the village of Zumpango del Rio. The name of this town is a peculiar combination of the Nahuatl Indian word Zumpango, meaning "ancient skulls," and the two Spanish words,

del Rio, meaning "of the river," or "beside the river," probably so qualified to distinguish it from some other Zumpango of olden days.

A description of Zumpango del Rio is a description of each and every other Indian village of this section. About two hundred houses, built of huge adobe bricks, with thatched or tiled roofs, clustered about a plaza

MAP OF STATE OF GUERRERO, MEXICO. BLACK SPACE SHOWS AREA OF RUINS DISCOVERED BY PROF. NIVEN. EACH SMALL WHITE MARK IS A SEPARATE RUIN.

STREET "CARNICERIA" OR MEAT MARKET, IN CHILPANCINGO.

and a church, the former filled with trees and flowers and the latter with ancient paintings and images of the saints, constitutes the town. One thousand persons, mostly Indians, engaged in agriculture and the raising of goats, make up the population.

These Nahuatl tribesmen are practically pure descendants of the Aztecs, and are scattered from Mexico City to the Pacific through the States of Mexico, Morelos and Guerrero, south from the Balsas River to the Rio Papagallo, and west to the divide of the Sierra Madre del Sur mountains. Few of these Indians speak Spanish, but still use the old tongue of the Montezumas, the dominant language of the country when Cortez entered it. Names of all the towns in this area south of the Rio Balsas are in the Nahuatl language, while to the north of that stream, they are in the Tarascan. South, in the Nahuatl district, not a town has a name containing the letter "r", while to the north, the harsh Tarascan tongue has plentifully sprinkled the map with guttural "r's".

Here in this town the streets follow the winding trails of the ancient Indian village, which was here years ago, how many the natives themselves do not know. Flat-faced, with high cheek bones, broad, flat noses, these Nahuatls, usually short of stature, force the student of humanity into a strong belief in their Oriental origin. Carvings on their ruins lead one to believe this even more strongly, and their black, straight hair adds to the conception of the transplanting.

Zumpango del Rio stands on one bank of a deep barranca or gully, and, as I stood on the side of this barranca, gazing across at the brown clay wall one hundred feet away, I realized why the superstitious Nahuatls had named the town "Ancient Skulls." There, staring me in the face was a layer of white bones, a foot thick, a thousand feet long and

buried eight feet from the surface. It appeared at first to be merely a stratum of limestone, but when I had obtained permission from the Indian owner of the land, and put my men at work with rude hoes and shovels, I uncovered a genuine vein of death, a burial place, in which, as the result of some cataclysm of nature, thousands of human beings had been buried, quite probably, alive.

Throughout this part of Guerrero the Indians have stories of mysterious lights, playing along the edge of this barranca, luminous bodies of various shapes which, they believe, point to buried treasure. I had often puzzled over these stories as they had been told to me by Mexicans from this section, but one glance at this layer of bones, and the puzzle existed no longer. The lights came from the phosphorus in the bones, brought into action by the dampness of the rainy season, just as the waters of the marsh bring forth will-o'-the-wisps and similar perfectly simple phenomena.

Like a miner following a vein to the mother lode, I followed this vein of bones for half a kilometer up the barranca, I came upon traces of a prehistoric ruin. On and on I went, until I had covered nearly a league more, when the site of what had once been a city of fifty thousand inhabitants appeared. Leveled to the ground by the hand of nature, nothing remained but the foundations of many laid stone houses, with regular streets, the ruins of a temple, a large square which had been a pyramid, and innumerable artifacts of the forgotten race which had built it. Here, then, was the source of the bones, washed down to the mesa below by the giant cloudburst which overwhelmed city and people probably centuries before Zumpango del Rio had been thought of as a village site.

Much as I would have liked to have gone into this ruin, which has never been explored by modern scientist, time was too pressing

and we moved on four hours' steady ride to the puebla of Chalchiutepetl—a Nahuatl word meaning "Hill of Jade." Here the people, who speak only the Nahuatl dialect, told me that two kilometers further northwest were ruins. Thither I went, and found two pyramids, each forty feet high, and about three hundred feet in diameter. These had been originally small hills, which had been smoothed down and then covered with laid stone, apparently with flat spaces at the tops, whereon had stood temples.

An old Indian, who acted as my guide, seemed incredulous, when I investigated and told him that the pyramids were solid, that they contained no tombs, and had been erected merely as bases for altars and temples. He told me in strict confidence, and with a mysterious air, that he had seen a fire burning on top of one of the pyramids several months before. He solemnly assured me that there were spirits guarding an immense treasure which lay hidden in the heart of the pyramid.

The next day, on exploring the top of this pyramid, I found at the foot of a crowning pile of stones, which had apparently been an altar, an earthen jar or olla, containing rosin and charcoal, which bore evidence of having been on fire quite recently. This doubtless explained the Indian's story, as I learned afterward that these Nahuatls of Chalchiutepetl still adhere to many of their ancient beliefs, and, for one, make fire offerings to the deities of their ancestors, also propitiating them with fruits and flowers. Thus does pagan Aztec Mexico still persist in the midst of the Catholic and supposedly Christian republic.

Here I found more jade beads and ornaments than I have ever found in all my travels in twenty-five years of life in Mexico—but where this ancient, valuable green stone, prized so highly by the builders of these olden times, came from is a mystery to this day. Like the grave of Moses, the jade mines of the prehistoric tribes of Mexico are lost, apparently forever. The jade of Australia and South America does not resemble the jade found in Mexican ruins, although that of China does resemble the jade in my collection to some extent, and this resemblance has given rise to the oft-repeated question: Did the people who built the ruined cities of Mexico originate in China? This no man can answer and prove his reply. From my explorations, it appears that ten to fifteen million people once inhabited the mountain ranges of Guerrero, where to-day a man may ride mile on mile, day on day, without seeing a human being. The chances of jade being found to-day, therefore, are much less than in the days when this section supported a large population among whom jade was a highly prized jewel.

From Chalchiutepetl, we crossed the great barranca and rode west one whole day through the mountains, crossing the great cañon of Zopilote (the buzzard) until we came to Cuadrilla de Xochicoltzin. This is a small village of possibly one hundred Indians, and here we saw for the first time the Pintos in their homes. These Pintos are not a tribe, but are members of many tribes, afflicted with a horrible disease, known as "pinto," from which they take their name. Either parasitical or the result of the work of a microbe, this disease manifests itself

first in the form of red or black or blue blotches, usually on exposed portions of the body, which spread until they cover large areas, gradually turning white with the death of the skin, until the disease runs its course. Then the victim is left, often to live to a ripe old age, possessing all his faculties, as active and eager to work or play as ever, but marred with great white blotches scattered all over his body.

Doctors agree that the original cause of the disease was filth, and that, while not leprosy, it is a leprotic disease, and is highly contagious. White men have been known to get the disease, largely through life with Pinto women, or through degeneration into the life of the Indians of this part of the country, just as the beachcomber of the Orient descends to the level of his native fellows.

On the other hand, the Pintos themselves have a legend that the dread disease originated from the mating of a man with a female alligator, who fell in love with him amid the reeds of the Balsas River. They claim the disease is only about 150 years old, and that it was unknown to their remote ancestors. Everything possible has been done to stamp out the pinto by the Mexican Government, but all to no avail, and fully fifty per cent. of the people of the Balsas River Valley are afflicted with it, while to a lesser degree, it is found throughout the southwestern part of Mexico, from Guernavaca to the sea at Acapulco.

Here we found a great gray diorite idol six feet in length and two feet square. This idol was cut in outline on a natural slab of the stone. It is impossible to decipher the meaning, or even the name of this image, but from the reverence with which present-day Indians regard it, and from the legends with which it is surrounded, it must have been a god of considerable importance.

Remains of building foundations about half a meter high and covering several square miles, appeared on the rolling mesa at this point, at the foot of a spur of the Sierra Madre. Apparently some seismic disturbance wiped this city from the earth, as the walls are all fallen, literally wrenched to fragments and now half-buried between the broken foundation walls. The earth itself is filled with skeletons and broken pottery; evidently practically all the inhabitants were killed by the disaster which overwhelmed their town.

Xochocoltzin—the name of the small and miserable village which now straggles along the boundary of the ruined city—is the same as the name of the great ruin, and means, "Place of the Yellow King"—quite possibly a Chinese king. Who shall say?

Here we were entertained by the Pintos with the greatest hospitality. They had no chairs and few beds, but what they had was ours, even to the clothes on their backs, had we wished them. The best of the poor food they possessed was set out for us, and we were informed by the few who could speak Spanish, that the village was ours, to keep as long as we wished. The most touching part of all this was, that the natives meant exactly what they said, and, though many of them had never before seen a white man, I was accorded better treatment among them than I have received at times from my own countrymen.

Rising early the next morning, we struck

GREEN DIORITE DYKE ON THE BALSAS RIVER.

out north, after bidding farewell to the entire village, all of whose inhabitants came out to see us on our way. Dropping down into the bottom of the Xochipala barranca, a branch of the Zopilote gorge, we arrived in the town of Xochipala, after an all-day's ride which was without incident worth recording.

Like Xochocoltzin, Xochipala is an Indian town, of about 800 inhabitants, the streets are paved by nature with limestone, hard and durable, but into which on the shady side the feet of passing generations have worn ruts. It was the day of the festival of San Pedro, and buildings, fences and trees in the plaza were hung with paper bunting in the Mexican colors and with paper imitations of the images in the church. Here and there was a large image of St. Peter—the San Pedro of the Spanish language—while every inhabitant was dressed in his or her best, celebrating one of the three hundred or more festival days in every year.

On our arrival at the town we were received very kindly by the chief, Francisco Gomez, who, on seeing our letters of introduction from Governor Arce, put himself out to do everything possible for our comfort. He gave us the choice between the church and the courthouse as places to sleep, but, as the courthouse seemed to have the better roof, we chose that building. Our room was separated from the prison only by a partition which did not quite reach the ceiling, and we could plainly hear the prisoners talking. It was a queer situation, and I lay awake for some time that night listening to the odd comments of the men imprisoned so near me, and thinking of the mysterious city which all the Indians had told me I should find a few miles from Xochipala.

The chief provided us with a guide, who, he said knew the tortuous trail over the mountains to the ruined city, which the Indians of Xochipala called Yerbabuena, the name of a plant which grows thickly in this part of

Mexico. Accordingly we set out, about day-break, on the last stage of the quest on which I had come more than two hundred miles—to find the center of the wonderful dead civilization of Guerrero.

Up one mountain spur and down into a deep gorge; thence out and up another mountain, only to drop again into a barranca was the history of the first six hours' ride. Then came a broken mesa, cut with gullies wherein rushing torrents from the high mountains had done their work; and here we came on the first ruins, foundations of houses in regular streets, broken into squares by cross streets, and dotted here and there with circular and square open places, evidently once plazas or temple sites.

Through these we rode for ten miles, and, just as the sun stood at the zenith, there appeared, a mile or two distant, the standing walls of a huge temple. Below this temple stretched away mile on mile of ridges, scarred with the white limestone walls of other ruins, until the eye wearied with gazing, and hills, ruins and sky seemed to melt into one indistinct horizon line.

Here the guide stopped, planted his horse firmly in the trail and said:

"I go no further. Beyond, on every ridge are ruins for fifty miles, all a part of one great City of the Dead. This is Yerbabuena, and there is the haunted temple, but the Gods will permit no man to go further, and from here I return."

I wasted no time in argument, but, drawing my revolver and leveling it at his head, I answered in the same mingled Indian and Spanish patois:

"Beneath and beyond your horse's feet lies the trail. Follow it if you wish to return to your home and family. Here in my hand is the real ghost of Yerbabuena, the real god of the ruins. Will you obey him or must he speak?"

[TO BE CONTINUED.]

Rough Shooting in Ireland

By W. R. GILBERT

WHEN we landed at Greenore, the Mourne Mountains near Newey were clad in snow, but only very little had settled on the hills around Newtown Stewart. Here I found an old friend waiting to take me to Plumbridge which I had selected as headquarters for my shooting. Six years had elapsed, spent in India and the South Sea Islands, since my last visit, but I still met some well-known faces. A young man, a bit of a gossoon when I had seen him last, called round on the first evening to report on the prospects of sport on the morrow. Upon his advice, we started at 5 A. M., drove eight miles and had a day's rabbiting with ferrets on the grounds of Clougherney Rectory, once a fine old country mansion, where the former rectors kept hospitable house, but now bereft of timber and crumbling in ruins, as a result of the disestablishment of the Irish Church by Mr. Gladstone, the rabbits now burrowing unmolested under the floors and outhouses.

The first day turned out so well that we decided to spend another in the same place, and we camped in one of the stables, sleeping in the hay and cooking our food over a huge wood fire with such articles as we could borrow in the neighborhood. We totaled up our bag after the second day, and found that we had accounted for 31½ couple of rabbits, four pigeons, one snipe, and, strange to say, a Solon goose, which was flying up the river some miles from the sea, and evidently out of its usual haunts.

After a rest of two days, we started after snipe. The weather had now turned frosty, and an old pointer we had, made a sad mess of it flushing snipe. He came back to apologize, as it were, after each failure, but we gave up in disgust and requisitioned a Gordon setter in the afternoon, who turned out worse still. There was evidently something wrong in the training. A storm of sleet and snow then came

on, and when it had cleared away, we tried the old pointer again, and he made ample amends for his morning blunders, standing as steady as a rock, giving us some fine sport, eventually bringing to bag twenty-eight birds.

By way of a change, a day's coursing was proposed. I borrowed a greyhound, and, with two young farmers of the district, set out for a mountain at daybreak. No hares were found until near the summit, about 1,200 feet. There they were too plentiful, and besides the ground was very rocky. Ten or twelve courses were run, but it was impossible to get the dogs back, as fresh hares were continually getting up. Then a thick fog came on, and I lost both my companions and my dog. I was in rather an unenviable position, for I did not know the locality, and after waiting half an hour and shouting and getting no answer, I determined to follow a little stream running down the mountainside. This led me into a burn, and I followed its course for what seemed miles and miles. The walking was very rough, and sometimes through water up to the knees. At last I heard voices, and trying to find out whence they came, was pleased to see the figure of a man approaching. He led me down to a lane, which eventually took me to the main road. I told him I was uneasy about my companions. "You needn't trouble about them," he replied, "they know every foot of the mountain, fog or no fog; but you might have fared badly if you hadn't followed the burn." My companions turned up three hours later and reported they had only killed two hares. This ended a miserable day's sport, and we welcomed the sight of the village inn.

The remainder of my time was spent either in snipe shooting, or in ferreting rabbits. By way of digression I may mention a rather curious occurrence illustrative of the vagaries

of shot. I place a small boy in a fixed position behind a ledge, where he was to keep his eye on any ferrets which might come out on his side. The hedge was high and evidently grown up through what was once a stone fence. After a short time a rabbit ran across the field and was killed at about forty yards distance from where I stood. About a minute elapsed and another rabbit bolted nearly opposite me and ran up the side of the hedge, but in the field also. I fired and killed it at about thirty yards distance, but was horrified to hear a scream from the opposite side, and the words, "I'm shot." I made my way quickly through the fence, and found the lad I had placed some thirty yards behind me on the other side of the hedge engaged in pulling off his clothes. He was bleeding from the stomach. I examined him and cleaned off the blood, but there was no trace of shot nor of any other foreign substance in the wound. I then examined the stone where the dead rabbit lay and looked at the angle where the boy had been hit and could not account for shot taking a course slightly slanting backward from a right angle. I surmised it must have been a splinter from the stone, which had glanced from one of the branches, but that is mere supposition. The lad having got excited, left his position on hearing the first shot and paid the penalty accordingly. It taught him a wholesome lesson, but it might have been worse.

The total bag for the visit—twelve days—consisted of two hundred and eight rabbits, four woodcock, eight pigeons, twenty-five hares, one hundred and five snipe, four wild duck, twenty-eight golden plover and fifteen sundries. Mighty good sport, too, for rough shooting—all the more enjoyable to one who, blasé with shooting in India, attended by shikaries and coolies, now had to do chores himself.

To-morrow and the Day After

By O. W. SMITH

Photographs by the Author.

IF you will take a good map of Wisconsin and place your finger upon the square designated as Waupaca county, then look in the southwestern portion of the square, you will discover a small stream bearing the same name as the county—Waupaca. You will also discover that the river forks at the city of Waupaca. (By this time you must think that "Waupaca" is the hub of the Badger State, and there are those who think so.) Now follow the north fork or branch of the river up into Portage county. Note that the stream crosses the Soo Line near a little station named Amherst Junction. Amherst Junction and not Waupaca is the hub of things. Now stick a pin in the black spot named

Amherst Junction and settle back in your chair while I spin my yarn.

A rumor of the good fishing to be found in a river called "To-morrow" had reached me, and be it said that name was new to me. When I asked my wife if she had ever heard of a stream with such an uncertain sounding name, she quoted, "To-morrow never comes." But still accounts continued to reach me of large catches taken from the To-morrow River, both rainbow and speckled trout, yet the stream itself remained unlocated. You know how such stories filter through to a fellow: Tom tells Dick, and Dick tells Harry, and Harry, Dick and Tom see to it that the story does not suffer in their

hands, so if you happen to be John Smith, by the time the story reaches you it is large enough to cause you to sit up and take notice. I had heard so much about the stream that it was impossible to content myself to be happy until I had wet a fly in the new water. Then just as I had about despaired of learning where and what the To-morrow River was, came a letter asking for certain information concerning tackle, the writer adding as an after thought: "I took a fine catch of trout from the To-morrow River yesterday and inclose picture which may interest you." At last something tangible. By return mail sped a letter asking for information. That angler was a lineal descendant of Father Izaak

all right, for back came a prompt reply: "To-morrow is the English translation of the Indian word Waupaca, and around here is always applied to the Waupaca River." Then I kicked myself.

It seems, that is if one is to believe a current legend, in an early day, when the Indians traveling down the Wisconsin River on their way to Green Bay reached the spot now occupied by the city of Steven's Point, would make a portage from that point to what is now called the Waupaca River, a distance of some fourteen miles, thence down the Waupaca, Wolf and Fox to Green Bay. When met by traders on the portage, to the natural question of the white men, "How far are you going?" the Indians would reply, "Waupaca" (to-morrow) meaning that on the next day they would have their canoes in water once more. So the stream became known as the Waupaca, though to-day the north branch of the river is locally called To-morrow almost exclusively.

I think it true that if one desires anything with sufficient longing, in time it comes to him. At any rate, there came a day recently when I found that I could spend a few hours on the To-morrow, a privilege of which I was quickly to avail myself. So, late one evening, I got down from a Green Bay & Western train, for Amherst Junction is where that road crosses the Soo Line, the old Wisconsin Central. I found the people of the Junction, as it is locally called to differentiate it from Amherst proper, a town some two miles south on the Soo, very friendly and free with information, something not always true in a good fishing locality. I was informed that the best fishing was to be secured at Nelsonville, a town six or seven miles distant, but as my time was limited, I decided to stay at Amherst Junction, leaving Nelsonville for another day.

The next day I was astir betimes, and with an old acquaintance whom I found living on a farm not a great ways from the river, was whipping the stream before the sun smiled down upon us. Early spring in Wisconsin was exceptionally rainy, and while the To-morrow was not much affected by the superabundance of water, a peculiarity of the stream, I was informed, the fish were not rising. The lower reaches of the To-morrow, that is from Nelsonville to near the city of Waupaca, is rainbow water, more of those fish being caught than native trout, though now and then a monster speckled beauty rises to the fly. The stream is an ideal one for the fly-fisherman, being broad with many deep pools. While in places it finds its way through woodland, for the most part it is a meadow stream, so that the back cast is seldom a matter of anxiety. I should imagine that one could wade the stream, the upper reaches at any rate, but as I was unprovided with waders I followed the bank. The boulders which lifted their shiny heads above the many rapids, invited the fly, but from the shore reaching the ideal spots was often an impossibility. Yes, to fish the stream right the angler should wear waders.

But it was the beauty of the stream that most impressed me. In the woods, where one could see but the narrow streak of twinkling, tinkling silver, the tall trees reaching up and up upon either side, all but shutting out a view of "that inverted bowl we call sky," and shutting in the fisherman with himself, the birds and

the companionable water. Out in the open, when the stream made its way through green pasture lands where meek-eyed cattle stood knee deep in the cool water, or when flowing through meadows where the uncut grass stood knee high, the stream was always beautiful. Always it seemed to me great red boulders were to be seen in mid stream, or piled up in fantastic heaps along the shore. Of course there were places where these boulders caused the current to fret and foam, but often there would be a single great rock around which the stream would slip with scarcely a perceptible ripple. The trout fisher does not need to be told what lay below those boulders. I found myself at a loss to account for the presence of so much volcanic rock, and some day I hope to have a learned

man read me the geologic history of the To-morrow. Until I possess the true scientific history I am going to believe that there was a day, long since passed of course, when Titans played at football in the valley of the To-morrow. If there were no trout in the stream the superlative beauty of the place would amply repay one for a visit.

Perhaps some impatient reader is saying: "But what about the fishing; how many fish did you catch?" Peace, my dear fellow, peace! Still the question is a fair one and deserves an answer, so I will tell the honest truth—not one. Rainbow I saw in plenty, but they rose "short." Perhaps it was an off day, perhaps I lacked requisite skill, perhaps whatever you please, not a fish did I hook. Still I was not dissatisfied with my between train trip. I had seen the To-morrow, had secured some fair pictures, and knew where to hit the water "next time." Is there a more talismanic word in the lexicon than "next time"?

The days and weeks sped by, as weeks and days have a habit of doing, when I found myself getting down from an early morning Soo train. Just how it came about I am not altogether clear, but "where there's a will there's a way" you know they say, and the fact that I found an afternoon for the To-morrow proves the truthfulness of the saying. Quickly I secured a team and in due course of time found myself on the banks of the To-

morrow just below the Forks, or near Nelsonville. History did not repeat itself. The trout were willing to rise to anything almost and kept me busy. The fish were of average size and numerous, while now and then a large two-pound or so rainbow would make trouble, the sort of trouble a fellow likes to overtake. I

"RAINBOW APLENTY HERE."

prefer our native trout to the rainbow as a pan fish and as a creek fish, but when the stream is large, forever commend me to the acrobatic Westerner; he knows how to fight.

Just below a large rock, about which the water curled with a hint of depth, I hooked my largest fish. That I was going to hook a fish I was positive even before I drew back my fly for the cast. You know the feeling, seventh sense or whatever it is. I dropped my fly above the rock first, for sometimes a rainbow will be found on the upper side of a stone, something never true of the brook trout. Not securing a fish there, I cast again, letting my fly whirl around the rock with the current. There was a flash in the water and a slight twitch upon the line. The fish had missed or I had failed to turn my wrist at the psychological moment. Reeling in my line I stood perfectly still for two or three minutes, admiring the view down stream. (In rapid water I fish with the current.) Then I cast to right and left until I had out the requisite amount of line, and my fly slid

CAUGHT IN THE EVENING.

around the red boulder for the second time. His troutship was waiting and so was I. Well hooked, instantly he went into the air, shaking himself as does a small-mouth black bass in a vain effort to be rid of the hook. Then straight across the river he dashed, the line ripping through the water, throwing up a thin foam against which the sun built fairy castles, destroying them instantly. The line sang, but not so loud as to still the beating of my heart. The battle lasted for fifteen minutes or so, then suddenly came the end, and the rainbow was struggling in my landing net and I towed him ashore. Did you ever think of it, when you play a large fish to the finish, the finish comes suddenly? All at once, after fighting strenuously for half an hour perhaps, the fish comes to the conclusion that the game is not worth the candle and gives up; at least that has been my usual experience. The fish was not over large; weighed two and a half pounds when hooked on the pocket scales. In the stream he was a five-pound fish, and had he escaped would have gone down in memory as such. You can draw your own conclusions from that statement concerning my large fish that "get away."

At 2 o'clock I was compelled to leave the stream in order to catch my train, but when I did so my basket contained sixteen good fish; rainbow and trout beside the large one, and I was satisfied. When my driver asked: "How is To-morrow to-day?" I replied: "To-morrow to-day is more satisfactory than To-morrow was yesterday." (Honestly, I do not see how the natives stand it, for every visitor must try his hand at playing on the name of the stream, and the concoctions of "to-day" and "to-morrow" equals Washington cocktail.)

The To-morrow River is not as well known as it should be, though there are a few Chicago and Milwaukee anglers who visit it regularly. Perhaps it is best early in the season if one can hit the right combination of weather, though I hope to speak from personal experience concerning August fishing when this season closes. The stream can be conveniently reached from the Windy City. A night train will land a man in Waupaca, Amherst or Amherst Junction at such an hour that a day's fishing can be enjoyed and the return made again at night. The hotel accommodations are good, or one can put up with a farmer who lives right on the stream, which to my mind is much the best plan and saves the drive to and from town. The Green Bay and Western road runs trains most conveniently for those who can reach it. Go to the To-morrow and put up at a little red farmhouse for a week and see if you do not fall in love with the stream as I have done.

Wild Ducks Brooding in New Jersey.

CHATHAM, N. J., July 31.—For the first time in twenty years wild ducks are brooding in the meadows of the Passaic known as Big Piece, Little Piece, Swinefield, Troy, Black and Great meadows between Two Bridges and Hanover.

Farmers cutting meadow grass report seeing broods of woodduck, teal, beach duck, mallards and spoonbills.

The cold and wet spring and the law against shooting wildfowl at that season are assigned as the causes of the ducks staying there to brood.—N. Y. Sun.

The Duties of Game Protectors

By T. S. PALMER, Assistant Chief, U. S. Biological Survey

Read at Annual Convention of Game Protectors of New York State.

TWO years ago when I had the pleasure of addressing the convention of New York game protectors, I endeavored to show that the work of the game protector or warden should be regarded as a profession rather than a temporary job, and in order to succeed, the officer must do much more than perform, in a perfunctory way, ordinary police duties. The subject assigned to me is along the same general line, probably for the reason that on the protector's efficiency depends very largely the success of the work of game protection. It is natural that the protector and his work should receive careful consideration, not only by the Conservation Commission, but by the general public, when it is recalled that one of the largest expenditures for game protection is the outlay for salaries, fees and traveling expenses of wardens. The results obtained by these expenditures are usually the main return which the general public receives for the special tax or license fee which it cheerfully pays to carry on the work of protecting the game.

The warden service of the United States is different from that of other countries. In England, Scotland and Ireland the protection of game is chiefly entrusted to gamekeepers employed by private individuals, supplemented, of course, as with us, by the work of local police officers. In Germany the work is performed by forest officers, who may be either State or municipal officials, or employed by private individuals, but game protection forms only a small part of their duties. In the British colonies of East and South Africa officials are provided to look after the game, but under very different organization and conditions from those which obtain in this country. In New Zealand, under the act of 1884, rangers were authorized to exercise the powers of constables in the performance of their duties in connection with game. In Canada, the wardens, commonly known as game guardians, will be found more nearly like our own, but in number, powers and organization, considerable differences will be noticed. In 1910, the last year for which statistics have been published, the game warden force of the United States numbered about 9,354 officers and deputies, distributed among forty States. Of these, 748 received regular salaries; 1,167 a per diem, and 7,439 worked without regular salary, or received as compensation fees or part of the fines imposed for violations of the game laws. The salaried warden force, aggregating about 750 men, was distributed among twenty-nine States. Of these twelve States had twenty-five or more each and six had fifty or more, namely: New Jersey, 25; Massachusetts, 30; Indiana, 33; Utah, 34; Maine, 40; Minnesota, 44; Oregon, 52; South Dakota, 58; Wisconsin, 60; California, 73; Louisiana, 74, and New York, 90.* Even this force in the States which had the largest number of wardens was entirely inadequate, though it be urged that these men are employed largely in a supervisory capacity, and form as it were the skeleton of the

warden service. The result is not reassuring, whether measured by area or population. For example, theoretically in New Jersey, with its area of 7,815 square miles and population of 2,537,167, each protector was responsible for 312 square miles, or 101,486 people, while in New York with its 49,170 square miles of territory and 9,113,279 people, each protector was supposed to cover 546 square miles, or watch for the violations of about 101,250 persons. Of course these figures, while convenient for comparison, are of relative value only, and do not represent actual conditions, since the protectors are not evenly distributed.

Turning for a moment to the origin of our warden system it will be interesting to see how this specialized body of men came into existence, and what progress has been made in its organization. The officer in charge of game is commonly known as a game warden; in New Jersey and New York, as a game protector; and in several of the Provinces of Canada as a game guardian. In all cases the position is practically identical, and the title differs only in designation and not in meaning. The first officials charged with the protection of game were apparently those appointed in Massachusetts in 1739 to enforce the deer laws and were designated in 1764 as "deer reeves." This title is interesting from a historical standpoint, as the corresponding title is still preserved in the case of one of our county officers. In former times the warden, protector, or guardian of deer was known as the "deer reeve" and the guardian, protector or warden of the county or shire, was called the "shire reeve." The latter term exists to-day in the form of "sheriff," but the title "deer reeve" has been lost and almost forgotten.

It was not until nearly a century after Massachusetts had provided special game officials that the example was followed in other States by the appointment of local moose wardens in Maine in 1852. For many years these officers were paid by fines or on the moiety plan and worked more or less independently. In 1878 California and New Hampshire made provision for general officers in charge of the work under their State fish and game commissions. Another decade passed before the next important step was taken. Apparently it was not until 1887 that the office of game warden was considered of sufficient importance and dignity to be worthy of a regular salary. In the last quarter of a century progress in the organization of the service has been rapid. Nearly two-thirds of the States now have commissions or State officers in charge of game. New duties and responsibilities have been added, a higher standard of work is required, more care is exercised in making appointments, five States have applied the merit system or civil service methods to selection of wardens, and a serious effort is being made to remove the service from politics. In many cases the compensation has increased so that to-day the salaries of deputies or privates range from \$600 to \$1,500 per annum, while those of wardens, commissioners or heads of departments range from \$1,000 to \$10,000 per annum. It is

*Under Chap. 318 of the Laws of 1912, this number has now been increased to 125, thus giving New York the largest salaried warden force in the United States.

with the ability of the protector to earn his salary that the public is chiefly concerned, and in discussing his duties the subject may be conveniently considered under three heads: (1) The duty of the protector to the commission; (2) the duty of the protector to the State; and (3) the duty of the protector to himself.

DUTY OF THE PROTECTOR TO THE COMMISSION.

Under the act to amend the conservation law in relation to fish and game, which went into effect April 15, 1912, the duties of protectors are briefly set forth somewhat as follows: Game protectors and fishery protectors are required to enforce all laws relating to fish, birds and quadrupeds, and all laws of boards of supervisors relating to the same subject. Each protector shall keep a daily record of his official acts and report the same at the close of each week to the division chief of his division, and at the end of each month to the chief game protector. He cannot draw his salary or traveling expenses until he has filed his reports, and he is forbidden under any circumstances to compromise or settle any violation of the game or fish laws out of court without an order of the commission.

It goes without saying that the warden is expected to perform his duties with reasonable activity, diligence and intelligence and with due loyalty to the commission. The act provides certain powers in relation to search, seizure and making arrests to facilitate his work, offers as inducement for faithful service an increase in salary under certain conditions, but is silent on precisely how the officer is to perform the most important of all his duties, namely to enforce all laws relating to fish and game. To the ingenuity of the warden and the discipline maintained by the commission is left this most important factor of carrying out the intent of the law. A high degree of intelligence, efficiency and team work are necessary to perform properly the duty briefly outlined in the above clause.

The native fauna of New York includes 411 species of birds, 81 species of mammals, 375 species of fish and frogs, many species of turtles and shellfish. Most of these are protected by some provision of the conservation law. This act also fixes seasons for hunting, trapping and fishing, requires licenses for enjoyment of these privileges, limits the amount of fish or game that may be caught or killed, regulates methods of hunting and fishing, places restrictions on shipment and sale, requires all game sold in the State to be properly tagged, provides for public and private hatcheries, for posting lands and for a number of other matters of greater or less importance. Some familiarity with the common and conspicuous mammals, birds and fish and their habits is absolutely essential; knowledge of the more important provisions of the law is equally essential and perhaps more easily acquired. It is also necessary that the warden should know something of procedure under the game law, the kind of evidence required for successful prosecution of his cases and a few of the decisions of the courts on important points. Obviously, no man can be expected to know all these things before he enters the service, but without such knowledge he cannot properly perform his duties.

As a matter of fact, very few zoologists know all of the 860 species of mammals, birds and fish which have been recorded from New York. An ordinary man does well if he knows

IN THE HEART OF THE WILDERNESS.

An actual moonlight photograph.

even ten per cent. of them. It is less important to know many of them than it is to know how to find the name or the life history of the particular species which may be of special interest, but which happens to be unfamiliar, and what museum books of reference or authorities on each special subject to consult. Very few lawyers, unless they are also sportsmen and have given special attention to the game law, make any pretense of knowing either the details of its provisions or of the decisions which the courts have rendered, but they do know where and how to look them up when necessary. Similarly the protector's first concern should be to ascertain how and where he can obtain competent legal advice when he needs it.

But it is not sufficient for him to be familiar with the local game law or local officials. He should also be familiar, especially if he is located in any of the border counties, with the more important provisions of the laws of adjoining States and the addresses of the principal game officials, so that at a moment's notice he can render effective co-operation to them or secure similar courtesies in return. The law of any State is made up of the best provisions of the laws of other States, and provisions now in force in other States will probably be adopted here in a few years. The resident license law which has proved so successful in this State had been in force ten years in the Northwest before it was adopted in New York. The non-resident license had been in effect twenty years in Nova Scotia before it was generally adopted in the United States. It is one of the special functions of the Biological Survey of the U. S. Department of Agriculture to collect and summarize information regarding the various methods of game protection which have been proposed, and to place it before the people in all the States. Upon application to the Department such information as is available may be had concerning conditions. Enough has been said to show the necessity to the protector of keeping up with the times.

THE DUTY OF THE PROTECTOR TO THE PEOPLE.

Beside his duty to the commission or department, the protector owes a duty to the people

which is none the less real or important because it is not defined by statute. The Conservation Commission is the creature of the Legislature and its employes are the servants of the people. In making its reports to the Legislature, accounting for funds received and expended and work accomplished under its direction, the commission performs a public duty, but the people who elect the Legislature come into direct contact with the employes of the commission and expect practical and substantial results from the work intrusted to the game protectors. The public is apt to be ill informed as to the limitations under which the protector labors, highly critical of methods, impatient for results, and frequently openly hostile to certain provisions of the law. It looks only to the gratification of its desire for the maximum amount of fish or game with the minimum of restriction. It chafes under the restrictions regarding hunting, fishing, trapping, shipment, sale or possession. It is inclined to place personal interest above public good, to demand greater protection for the hunter than the game, and then to condemn the system which fails to perform a miracle in producing an abundance of birds or fish amid a hundred means of destruction.

Under such obstacles is the protector compelled to work and to account to a master usually unreasoning and frequently unreasonable to avoid pitfalls, overcome opposition, and not only secure strict enforcement of the law, but to mould public opinion in favor of more effective conservation. Is it any wonder that under these circumstances he needs the skill of a lawyer, the tact of a diplomat, and the patience of Job? Ignorance of the law excuses no man, but the warden who follows this adage too closely and confines his attention to applying it literally, seeking only to arrest those who are ignorant or negligent, not only falls far short of his full duty to the public, but is laying up trouble for the future. Sooner or later his master, the people, will bring about his retirement "for cause," inefficiency, or the "good of the service."

[CONCLUDED IN NEXT ISSUE.]

Canoeing Down the Ramapo River

By JOHN F. AHRENS, JR. (A. C. A. No. 5724)

Photographs by D. J. Finn

WITH a loud shout of "Whoop-e-e" forty-five members of the Atlantic Division of the American Canoe Association celebrated their arrival at Suffern, N. Y., the rendezvous for their annual cruise.

We were directed to the freight house by Alfred D. Berning, or "Hike," as he is better known to us, where we found our canoes and duffle in good order. After substituting our

turned out to be the only place in the river to admit of passage, and all canoes maneuvered safely through, but one, which had aboard three members and their outfit. They were suddenly swept broadside against a tree and capsized with the result that their entire duffle, including some loosely packed clothing, a camera and various other articles that were lying in the boat, floated down stream. Instantly all was excitement and

READY FOR THE START.

"glad rags" for the "ole clo," we portaged the canoes and outfits to the Ramapo River, which at this point is about twelve feet wide and has a slow current. With the purchasing of "grub," everything was ready, and in a few minutes we were away.

Shortly after the start a canoe containing three members and their outfit came to grief while running a rapid, causing a series of rips in the canvas for about six feet. To save the outfit all three jumped into the water and succeeded in dragging the canoe ashore. Luckily they were able to procure a strip of canvas, and with the aid of some glue, patched the boat and then proceeded on their way. With the exception of a few slight scrapes from rocks all went well, until we had about reached our stopping place for the night, where a shallow rapid left several of the canoes hard aground in mid-stream, which necessitated wading.

Having made camp and eaten our fill, we gathered around the camp-fire, singing songs and telling stories until half-past 10 o'clock, when we "turned in" with the prospects of a long day's run ahead of us.

We were awakened at daybreak by the quacking of ducks in a pond a short distance away. A shower during the night made the ground wet and soggy. With breakfast over we launched our canoes, and once more were afloat.

We soon reached the first carry, in reality only a "lift," around a small dam. Here two canoeists were drenched, and their boat partly filled with water in attempting to run up close to the dam. Shouts of glee from their companions showed how sincerely their predicament was appreciated.

With "plain sailing ahead" we steadied down to our usual cruising pace, when the first canoe was seen to swerve to the left bank and shoot through a space about six feet wide. This

the hills echoed with the pleadings of the unfortunates to salvage this or that part of their outfit. This accident caused a delay of twenty minutes to enable the "early morning bathers" to don dry apparel, after which we were off and continued for quite some time, when another "lift" around a dam was necessary before we were able to make further progress. After this the river gave us splendid uninterrupted enjoyment in the way of rifts and fast water,

through to Pompton Lakes, where arrangements had been made for an unusually fine dinner to be served.

After dinner a group photograph was taken, and the spirit that prevailed is best shown by the illustration herewith. Proceeding to the river, almost everyone took two or more trips through the rapids below the Pompton Lakes Dam, the more expert ones doing such stunts as standing on their heads and on the gunwales. Some of the members, captivated by the excitement attending their experiences, became careless and three upsets occurred almost simultaneously.

Within half an hour we arrived at a falls about five feet in height, and for some time we centered our efforts at this place, shooting the drop again and again. After all had obtained their fill of excitement, the number of upsets reached the grand total of fourteen, while one canoe recorded damages to the extent of twelve broken ribs and four split planks.

With the exciting part of our trip over, we "laid to" the blades with increased effort, so as to reach Mountain View, the end of our journey, before dark. The clouds, which had been threatening during the greater part of the day, now began to shower water upon us in torrents and continued for almost an hour, making it necessary for some canoes to be beached and emptied of their accumulating load. Of course everyone who had not taken the precaution to equip himself with a raincoat or poncho was thoroughly soaked.

At the bridge crossing near Mountain View we were all glad to see George P. Douglass, an old member and enthusiastic participant in the doings of the American Canoe Association.

We portaged our canoes and duffle a short distance and loaded them aboard a freight car for shipment home, after which Theodore Quasebart invited us to his summer bungalow, where a most delightful luncheon was served and an enjoyable time was had by all.

"AMONG THOSE PRESENT."

The Florida Situation

By JOHN H. WALLACE, JR., Commissioner Dept. of Game and Fish, Alabama

THE enactment of a model and modern game law for the State of Florida is absolutely imperative in order to save many of the most valuable species of birds and game of that State from certain depletion and threatened extinction. The question of the protection of the birds and game in Florida is not a local one, but is national in its scope. Birds know no State lines, and while practically all the States lying to the north of Florida protect migratory birds and waterfowl, yet these are recklessly slaughtered in that State to such an extent as to be appalling to all sportsmen and bird lovers.

Birds and game are not the property of the people of any particular section, but belong to the race. They are ours to use, and in doing so to take no more than our needs require in order that future generations may have transmitted to them the same blessings we are permitted to enjoy as their rightful heritage and legitimate benefaction.

The worst enemy of wild life is the pot-hunter and game hog. These wholesale slaughterers of game resort to any device and practice, matter not how murderous, to accomplish the pernicious ends of their nefarious campaign of relentless extermination of fur and feather. They cannot be controlled by local laws, for these after having been tried for several generations have proven consummate failures for the reason that local authorities will not enforce the provisions of game and bird protective statutes.

Experience has demonstrated the fact that no one desires to inform voluntarily on his neighbors, and since breaking the game law is not construed to involve moral turpitude, even to any infinitesimal degree, by many of our citizens, the plunderers of nature's storehouse thus go free, matter not how great the damage done to the people as a whole.

No game law can be a success that is not State-wide in its operation. In order to secure the best results, a plan should be adopted by Florida similar to that in force in practically all of the other States, viz.:

First—The creation of a department of game and fish presided over by a State game and fish commissioner.

Second—A game and fish warden for every county, to be appointed by the State game and fish commissioner, and subject to removal for cause or non-performance of duty by the commissioner appointing said warden.

Third—A hunters' license tax as follows: Non-resident, \$15; those who hunt outside of the voting beat or precinct of residence and on lands other than they own or rent, \$1; those who hunt outside of the county of residence and hunt on lands other than they own or rent, \$3; the said money to be covered into a game and fish protection fund to be used for defraying the expenses incident to enforcing the provisions of the game and fish laws.

Fourth—A closed season on all game birds and animals. The killing of wild turkey hens and doe (female deer) should at all times be prohibited.

Fifth—It should be unlawful to use any pit-fall, deadfall, scaffold, cage, snare, trap, net, salt lick, baited hook or baited field, or any other similar device or any drug, poisonous chemical or explosive for the purpose of injuring, capturing or killing any protected birds or animals.

Sixth—A reasonable bag limit for each day and season should be prescribed. The sale of game should be prohibited. The shipping or carrying of game, except openly and in the possession of those who have hunters' licenses as required by law, should be prohibited.

Seventh—Judges charging grand juries should be required to give especially in charge the provisions of the game and fish laws, and urge diligent inquiry into infractions thereof.

Under the scheme above outlined, the burden of supporting the department of game and fish will fall exclusively upon the hunters, and if the Florida sportsmen are like their brothers in other portions of the nation, they will gladly contribute toward the maintenance of a system that will in reality and not in name merely protect the wild life of their State.

The farming class, those who reside in rural districts, will not be called upon to pay a hunters' license tax unless they hunt outside of the limits of their voting precinct, which is rarely the case. The hunters residing in towns and cities, who own no land, who do not furnish the hunting domain over which game is pursued, who do not supply the provender for the subsistence of game, must in the very nature of things secure a hunters' license before they can legally participate in the sport they enjoy.

The vast and economic value of birds, game and fish to the people is incalculable. Not only is sport and recreation furnished by them, but they are esteemed everywhere as an elegant article of food. So alarming has become the decrease of the birds and game of Florida that unless a halt is called on the campaign of reckless annihilation that has been ceaselessly waged in that State, the sport and recreation enjoyed by primeval nimrods will linger only in history and tradition.

It is the sincerest hope of all lovers of wild life of the American continent that a strong and invincible sentiment, relative to the imperative necessity of real conservation legislation, be crystallized in the minds of the members elect of the Florida Legislature, to the end that the next Legislature will spread upon the statute books of the State of Florida a model and modern law for the preservation and protection of the birds and game of that State, which when put into practical operation will elicit the thanks of all good citizens, and likewise the gratitude of future generations.

Two Hours' Quail Shooting.

BY JOHN SANDERS.

ON the second day of November, 1909, I got the shooting fever so strong that I was compelled to leave until to-morrow something that should have been done to-day, get my pup and gun and go out and reduce my temperature.

Tom, as I named him, was only six months old when I introduced him to the field and he had the misfortune, when four months old, to jump into the blades of a mowing machine and have his right front foot nearly cut off. Consequently he was entirely unbroken when he went afield and that on three legs.

It was 3 P. M. when I left the house and started to a point on the river where a covey of quail could always be found. Sure enough they were right there. The pup made his first stand splendidly. I flushed them myself, as I always do, and held my fire, as I did not wish to excite the dog. They pitched beautifully in a narrow strip of sedge on the shore. I patted the pup and he thought he was some dog. He started in an almost opposite direction, for a short distance, before swinging toward the covey. I do not like dogs to go directly after birds in their training, as they will sometimes chase, if allowed to do so. What was my surprise, when I stepped almost into the middle of another large covey which flushed and went among first covey, making about thirty birds in the most ideal ground. I waited a few moments longer to allow them to settle and then went carefully to where I had marked the first birds down. Pup stood like a thing of steel, rigid, intent and at the same time perfectly steady.

The next stand was a pair; both flushed at once. Well, to make a long story short, when I got to the end of the line I had sixteen fine birds out of seventeen shots. My ninth bird was a cripple, requiring the second barrel to down him. Two hours from the time I left the house I was back with as many birds as we could use and a memory that will never die. I have killed many more birds than that in a day's hunt, to my shame, but have never enjoyed a day as much as I enjoyed those two hours.

National Sportsmen's Show, Kansas City

KANSAS CITY has been selected for the second National Sportsmen's Show, to be held during 1912, the first having been held in Madison Square Garden, New York city.

The Kansas City Show is scheduled for Sept. 23 to 29 and the indications are that the exhibition will equal any show of this kind ever held in the United States.

Kansas City enjoys the reputation of being one of the best show towns in the United States, which is ascribed to its central geographical location, its large floating population and the enthusiasm of its citizens in supporting any enterprise the success of which will redound to the credit of Kansas City. The show will be held in Convention Hall.

Entries for exhibits are scheduled to close Aug. 25, at which time the program of special events and features will be made public.

All communications or requests for information should be addressed to Secretary National Sportsmen's Show, 514 East Fifteenth street, Kansas City, Mo.

Why, Mr. Burnham, Why?

HUDSON, N. Y., July 26.—*Editor Forest and Stream:* From what your paper has said, as well as from what I saw at the committee hearing, Mr. John B. Burnham, formerly chief game protector of this State, and now the responsible head of a society for game protection, was the expert on the committee that produced the new uniform fish and game law. This being so, it is up to Mr. Burnham to enlighten the great republic of sport fishermen on at least two little matters:

Why was the legal length of trout, that stood at seven inches in one of the original drafts of the bill, changed back to six inches? Who asked for the change and what influenced the committee to go back on its original judgment?

Why was there cut out of the bill just before its final passage these words referring to the brook trout: "They may be taken from streams only between the hours of 4 o'clock in the morning and 9 o'clock in the evening." Why was this paragraph added anyway, and who asked to have it stricken out?

An explanation might be illuminating as indicating just how a fishing law is made.

T. URTELLE.

Editor Forest and Stream:

I am very glad to furnish the information requested by your correspondent relative to the changes made in the brook trout section, as prepared by the game law revision committee last winter.

Your correspondent asks what influenced the committee to go back on its original judgment that seven inches is a more suitable minimum length for trout than six inches. As one of the committee I would say that the judgment of the committee has not changed, and that we still believe that seven inches is the proper minimum limit for taking brook trout. Unfortunately, the revision committee did not have its way in this matter.

The bill, after introduction in the State Legislature in the usual course of affairs, went to the forest, fish and game committee of the Senate and the forestry, fisheries and game committee of the Assembly, and was there amended both with respect to the seven inch limit and also by striking out the sentence prohibiting night fishing between the hours of 9 in the evening and 4 in the morning. The revision committee was aware of both of these amendments, but the power to make them lay in the Legislature and our argument did not prevail.

The reason why the sentence prohibiting night fishing was put in our revision was to make the game law more easy of enforcement against violators who are more apt to carry on their illegal practices on trout brooks under cover of darkness than in daylight.

JOHN B. BURNHAM,
President American Game Protective and
Propagation Association.

Hunting in California.

BY GOLDEN GATE.

THE Porterville Fish and Game Protective Association is erecting a large club house on the Tule Indian Reservation, where a site was given them by the Government. This association has appointed C. A. Buswell, J. E. Frame and

W. F. Harvey to choose dates and make arrangements for a series of mass meetings to be held in Tulare county to discuss the game protection question. D. H. Hoen, the county game warden and A. D. Ferguson, the district deputy, will assist in this work. It is realized that changes in the game laws are badly needed, and through these meetings it is hoped that the opinions of the people interested can be secured.

Most of the bucks now being killed in the game districts of the State where deer hunting is in order are still in the velvet, and many sportsmen are waiting until later in the season

before going on their annual hunting trip. The slaughter this year has been very heavy and deer are reported to be plentiful in almost all of the mountain sections. L. Bowes and Al Korn have returned from a trip thirty miles east of Willetts where the limit was secured in a couple of days. This section is seldom visited and is a veritable hunters' paradise. In addition to deer, bear and mountain lions are to be found in numbers. During the stay of these hunters in this section they found eleven carcasses of deer, mute evidence of the heavy destruction of game by predatory animals.

The Dry-Fly Exponents.

NEW YORK CITY, Aug. 1.—*Editor Forest and Stream:* In the early days of the eighteenth century, Pope wrote his "Essay on Criticism," from which poem is taken a stanza to emphasize that which is to follow:

"By false learning is good sense disgraced
Some are blinded by the maze of schools,
And some made coxcombs nature meant for fools;
In search of wit they lost their common sense,
And then turned critics in their self-defense."

During the interval of more than two hundred years man has not altered in characteristics, and this retentive feature is often displayed in the columns of FOREST AND STREAM, and other papers that tolerate free writers.

The time never was when that American principle—free speech, free press and free men—has been more thoroughly exemplified than during recent years. Banks of type and columns of space are at the service of him whom it may concern to write—subject not dictated—provided the editor of his paper is not committed, and there are writers without number who think they are inspired to impart knowledge and instruct their neighbors, and they go at it like a woman chopping wood—with more effect than capability or tact.

It is also true that a percentage of sportsmen do not read FOREST AND STREAM, nor any other paper, to their edification, only retaining that which is meat to their individuality, omitting thought of the vital need of sportsmanship. Any scheme that promises change, regardless of work or quality, will win advocates.

To the readers of FOREST AND STREAM, there is import in the agitation of the use of the dry-fly, fittingly introduced in England over fifty years ago, and encouraged in America by many of our well known anglers, chief among whom stands that graceful and successful writer and sportsman, Mr. George M. L. La Branche.

Please permit me to infringe on your space to quote from Mr. Bisbee's letter of July 20, in which he writes:

"As you suggest what we need in this country is a fly-tier or two who can exactly or approximately imitate the actual flies found upon our waters upon which trout habitually feed. That man may justly be termed the Amer-

ican Halford and save us from a great deal more of the hysterical babbling that is the present mode about the dry-fly in America—'practical' or otherwise. Mr. La Branche, a most graceful fashioned person, gyrates horribly upon the tournament platform."

Now, why these pyrotechnic tactics so flamingly announced by Mr. Bisbee? To use his statement in opening his article, written to FOREST AND STREAM from Ripogenus Lake, "in the interest of a little accuracy," why not apply this to the above quotation?

Truth comes by insinuation, impression and enlightenment, not by gyroidal force. Does Mr. Bisbee suppose his mere assertion must be truth, or are we to take his statement a "little accuracy" literally? Does he believe that the sportsmen of America have been in a daze or whipping the streams of dreamland to bite at such gyratic bait?

The writer of this letter bears no malice toward Ralph Bisbee, nor would he malign anyone. If Mr. Bisbee had any acquaintance with America's most noted and recognized angler, he would never have made such an assertion. His conscience—that faculty that distinguishes between right and wrong and directs the sagacity of man along channels for the production of "the greatest good to the greatest number"—would forbid it.

Now to conclude in the interest of a "little accuracy." Is the photograph of the "corpulent gentleman" shown with the article, a proper representation of the outfit required by a real dry-fly angler? Please note the fly rod with a multiplying reel—with creel and net strapped to him, alongside a canoe facing a lake—is this not an incongruous bait-fishing outfit?

G. A.

NEW YORK CITY, Aug. 5.—*Editor Forest and Stream:* What might "Olive Dun" not have said had he thought I was coward enough—notwithstanding the "ice cold assurance" he endows me with—to take refuge behind a group of my friends in the face of an attack? If this gentleman considers my "babbling" offensive to him, let him vent his spleen upon these gentlemen who are responsible for it—misguided anglers who thought I knew something of the art of dry-fly fishing, and who insisted that my knowledge would be of value to others. What little I think I know really might be of value if I were pos-

sessed of Mr. "Olive Dun's" virile, sword-like pen; yet, did I possess it, even then, those same credulous friends would be entitled to all the credit; I never have claimed it for myself. Mr. "Olive Dun" has been imposed upon by some individual who does not realize, or who does not know, the meaning of the word "friend." I do not believe that he learned of my little failing which he characterizes as "the light under the bushel" from one of mine.

Mr. "Olive Dun" hints at plagiarism when he speaks of the use of the terms "taling" and "bulging." He evidently overlooked, when he read the article on this subject, the statement made regarding these terms. Certainly no amount of "ice cold assurance" would permit one to coin words to take the place of those familiar to all anglers for the sake of being thought the originator thereof. One might as justly be taken to task for using the phrase "dry-fly." There are those who believe that anything that is not copyrighted is, of course, the property of him who steals it first, and it is balm to the hearts of all sportsmen to know that "Olive Dun" detests dishonesty.

Writing upon the subject of dry-fly fishing may simmer down in the end—in this country, at least—to a single individual who will not be denied. But even though this great and only be aborted in the embryo—even then, the cult of dry-fly fishermen will grow, and the sport will flourish without his aid as it did before he knew what the dry-fly was.

Fly-fishermen should hail with delight the prospect of some increased and valuable entomological knowledge in this country. We have learned already that "Whirling" and "Olive Dun" are cousins, and that "Olive," besides exhibiting a heretofore unknown characteristic that surely connects him with the family *Simuliidae*—which may be, however, developed only in the *Hohokus* variety—is subject to attacks of indigestion, which infirmity may account for his non-appearance upon the stream at times when he would be heartily welcomed by both angler and trout—sour stomach, nervousness, sting and all. I am inclined to think from the similarity of thought expressed by these two insects that they are even more closely related than "Olive" has claimed, and also that their surname is "Did" and not "Dun," and that their combined Christian name is "Katy." Naturally, it would be useless to hope to have the writer who hides behind the *nom de plume* of "Olive Dun" reveal his identity. Yet I should like to know the man who is able to ferret out such a fund of information regarding another whom he has never met. He shows quality enough to be a member of the "plain clothes" squad, and with a little training would make someone a valuable press agent.

GEORGE M. L. LABRANCHE.

North Shore Casting Club.

CHICAGO, Ill., July 30.—*Editor Forest and Stream:* That quarter-ounce bait is a sticker without a doubt. However, we can do much better work if we practice some every day, and to those who do not know it I wish to state we are having splendid practice every evening until it is so dark that we are afraid to go home. In that case the timorous ones take dinner at the refectory and enjoy it very much.

Many of the members are working hard to get into trim for the national tournament, so that

they may uphold the N. S. C. C. and bring home the honors to it.

Are you one of the workers? If not, get busy. Work, work work. I am in receipt of a communication from L. E. DeGarmo, in which he states that he has the official scales, which will be used to weigh all rods. If you are not sure that yours is eligible, you are welcome to call at his office, 215 South Market street, and he will weigh them for you.

The club is in receipt of an acknowledgment of a letter of condolence sent to Mrs. A. L. Springer by the secretary at the direction of the president.

Events held July 27 had scores as follows:

Quarter-ounce, accuracy bait:	
I. H. Bellows 98.8	L. Goodwin 97.4
T. A. Forsyth 97.9	A. B. Paulson 97.7
G. A. Hinterleitner... 93.7	Wm. Liddell 97.5
Dr. Dorchester 97.8	C. M. Ercanbrock ... 97.2
Dr. Waters 96.4	E. E. Martin 95.5
W. I. Marshall 98.8	E. Lambert 97.4
Re-entries:	
E. E. Martin 95.5	A. B. Paulson 97.6
Dr. Dorchester 98.5	L. Goodwin 96.8
W. I. Marshall 98.7	T. A. Forsyth 98.7
Quarter-ounce, distance bait—longest cast:	
I. H. Bellows 130	Wm. Liddell 113
Dr. Dorchester 120	C. M. Ercanbrock ... 128
Dr. Waters 95	E. E. Martin 102
W. I. Marshall 122	H. D. Ellsworth 132
A. B. Paulson 102	
Quarter-ounce, distance bait—accuracy:	
I. H. Bellows 114	Wm. Liddell 102
Dr. Dorchester 96	C. M. Ercanbrock ... 105
Dr. Waters 73	E. E. Martin 86
W. I. Marshall 111	H. D. Ellsworth 110
A. B. Paulson 94	
Light tackle, distance feet:	
I. H. Bellows 99	Dr. Dorchester 92
T. A. Forsyth 87	
Light tackle, distance feet, average:	
I. H. Bellows 99 2-15	Wm. Liddell 99 3-15
T. A. Forsyth ... 98 7-15	C. M. Ercanbrock 96 10-15

C. O. DORCHESTER, M.D., Sec'y-Trcas.

Aransas Pass Tarpon Club.

PORT ARANSAS, Tex., July 22.—*Editor Forest and Stream:* Replying to your letter of the 18th, asking for this season's catch, I take pleasure in giving you the following catch so far this season. This record is all on light tackle:

R. D. Powers, New York city.....	Total.	9
H. C. Carter, Boston, Mass.....		1
W. E. Jones, Houston, Texas.....		1
A. Hewitt, Wisconsin.....		2
W. B. Taylor, Chicago, Ill.		3
O. L. Oldham, Dallas, Texas		3
Dr. H. E. Mock, Chicago, Ill.		2
A. W. Hooper, Boston, Mass.....		35
L. A. Rone, Torreon, Mex.		14
J. E. Cotter, Port Aransas, Texas.....		10
L. Hirsch, San Antonio, Texas		5
J. E. Campbell, Nowata, Okla.		5
Mr. Lawson, Nowata, Okla.		7
Mr. Keller		2
L. Allan, El Oro, Mex.		3
R. M. Thompson, Washington, D. C.		1
H. F. Johnson, Racine, Wis.		4
E. J. Dunlap, Victoria, Texas.		5
L. E. Olwell, Dayton, Ohio.		2
Jack Locke, San Antonio, Tex.....		7
H. W. Brannock, St. Louis, Mo.....		6
J. M. Seifert, Houston, Texas.....		9
L. G. Murphy, Converse, Ind.		16
J. N. Brannock, St. Louis, Mo.....		9
Dr. A. Garwood, New Braunfels, Texas.....		1
W. C. Boschen, New York city.....		3
Henry Wilcox, Denver, Colo.		2
L. S. Clarke, New Orleans, La.		5
A. G. Weakley, San Antonio, Texas.....		4
Chas. Schriener, Jr., San Antonio, Texas.....		6
H. P. Goodman, San Antonio, Texas.....		3
S. B. Weller, San Antonio, Texas		2
W. W. Searcey, San Antonio, Texas.....		3
S. S. Searcey, San Antonio, Texas.....		2
H. T. Coulter, Rockdale, Texas		2
J. N. Murphy, Pittsburgh, Pa.....		1
Total		185

This total is to date, July 21. The largest tarpon to date was caught by A. W. Hooper, 6 feet 5 inches. The smallest tarpon to date was caught by S. S. Searcey, 34 inches.

J. E. COTTER,

Secretary Aransas Pass Tarpon Club.

Fishing in California.

BY GOLDEN GATE.

STEELHEADS have commenced to run in the Eel River, and from now on some splendid sport is anticipated on this stream. The first big catch of the present season was made a short time ago by C. J. Craddock, of Eureka, who landed four splendid fish at the famous Weymouth pool using a spinner. The first fish taken weighed eight pounds and one of the others tipped the scales at eleven pounds. The fish are full of fight, being in fresh from the ocean, and as soon as the run is general, many anglers from San Francisco will make the trip there. The water in Eel River is quite high for this time of the year. The first fish usually do not pay much attention to flies, but about the middle of August they should be taking these as well as spinners.

Since the opening of the fishing season in the Yosemite National Park many splendid catches have been made within the reservation limits, and some very large fish have been taken. Several trout over two feet in length have been landed, and no difficulty is experienced in securing the basket limit of twenty. No fishing has been allowed there for several years, and not only are the trout averaging large in size, but are easily taken.

The Truckee River is lower at Reno than has ever before been known, and hundreds of trout have been stranded and are being taken with bare hands in pools within the city limits, some of these being twenty-six inches in length.

The California Fish and Game Commission is planning to construct a large spawning station in Southern California, so that trout fry and other fish may be distributed at less expense in the streams in that section. The proposition of taking over the county hatchery at Santa Cruz is also being discussed, and this move will probably be consummated soon. The growth of the fishing industry on Montrey Bay has been such of late that a more efficient patrol of those waters will be made in the future.

National Ass'n of Scientific Angling Clubs

CHICAGO, Ill., July 23.—*Editor Forest and Stream:* The National Association of Scientific Angling Clubs will hold its annual tournament for 1912 on Aug. 15, 16 and 17, on the grounds of the Illinois Casting Club, Washington Park, Chicago:

Aug. 15.—Light tackle dry-fly accuracy, light tackle distance fly, accuracy fly and distance fly.

Aug. 16.—Accuracy bait, quarter-ounce; distance bait, quarter-ounce, and salmon fly.

Aug. 17.—Accuracy bait, half-ounce, and distance bait, half-ounce.

There will be ten trophies for each fly and twelve for each bait event.

J. M. SMITH, Sec'y.

Newfoundland Fishing.

SPRUCE BROOK, N. F., July 20.—*Editor Forest and Stream:* The year has been an exceptionally good fishing year, especially on our river, Harry's Brook. I myself caught in one day's fishing in two pools twelve salmon weighing 149¾ pounds and fourteen grilse 62½ pounds. Not bad, eh?

JOHN J. O'NEIL POWER.

Published Weekly by the
FOREST AND STREAM PUBLISHING COMPANY,
 CHARLES OTIS, President.

 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

THE HIGH COST OF MEAT.

THE Farmers' Bulletin, just issued by the United States Department of Agriculture, covers a subject that ultimately will have a direct bearing on the reduction in cost of living. It tells the farmer how to exterminate the Texas fever tick, so destructive to cattle. Another cause of the raise in price of beef is brought to light in the taking up of the Western cattle ranges by homesteaders, resulting in a shortage in the supply of beef cattle for consumption by the millions of people largely dependent upon cattle grown in that region, causing a rise in price of steers at the great abattoirs of the country, and a decided increase of cost of meat to the consumer in cities.

Naturally, also, it has caused both the growers and buyers to look about for fresh pastures for the herds upon which their prosperity and business depends.

The Secretary of Agriculture years ago saw the inevitable crisis and turned his attention to providing ample sustenance for the stock needed to supply the market, and which could no longer be furnished by the West.

The locality was found in the South and Southwest, but that country was infested with an insect that made cattle raising unprofitable, if not impossible. So, for the past six years, the Bureau of Animal Industry at Washington has been conducting tick eradication work in all but one of the States of the infested region in co-operation with the State authorities, and has freed 162,648 square miles of the Texas fever tick and relieved that area of the restrictions placed by national quarantine on the shipment of cattle to other sections.

In a considerable additional area the work of eradication is well under way, but the territory already freed exceeds the combined areas of Georgia, Alabama and Mississippi. The eradication of the cattle tick is of prime importance to

the agricultural interests of the infested section, but the benefits resulting therefrom would not be confined to them; in fact, it would be enjoyed to a great extent by the rest of the country.

The progress so far made in the co-operative campaign by the Department and the State authorities demonstrates that it is entirely possible to accomplish the complete elimination of the cattle tick, although a number of years of hard work will be required to free the entire country of this pest.

It is of great importance that the efforts of the officials should be supplemented by the farmers, and to this end this Farmers' Bulletin was issued, giving "Methods of Exterminating the Texas Fever Tick" in a practical manner that can be utilized by the farmer or stockman who has already begun or who contemplates undertaking the complete extermination of this pest from his farm.

These methods may be improved upon as new facts become available, but they have already reached such a degree of perfection and have been given such wide practical tests that the main part of the task is to enlist a hearty, vigorous and conscientious co-operation on the part of the people—in other words, the work will progress from now on just as rapidly as the people desire it should and no faster.

SILVER OR WHITE BASS.

THE return of silver bass in waters where they have not been captured in many years is the subject of jubilant articles in various newspapers of New York State. Enthusiasts of the rod and gun may well hail this intelligence with delight, because the silver bass, or white bass, affords the sportsman much pleasure, and is a toothsome dish. The Conservation Commission of New York State proposes to give this gleaming member of the bass family more attention than this worthy fish has received at the hands of the State authorities heretofore. The commission hopes soon to propagate this valuable species in large numbers when the proper pond facilities are available. State Fish Culturist Bean says of the silver bass:

"The fish is more generally known as white bass, and it is a near relative of the celebrated striped bass of our sea coasts. It may be readily distinguished by its lengthwise blackish streaks on the side, which are eight or more in number. The body is deeper than in the striped bass. The general color is silvery tinged with gold on the sides.

"The white bass abounds in the region of the Great Lakes. In Oneida Lake the Conservation Commission collected more than 700 of the fish recently in gathering black bass for its breeding ponds at Constantia. The fish has been introduced into many lakes in which it was not native. The white bass prefers the deeper parts of rivers, and is also well adapted for lakes and ponds. It is said to be a good fish for artificial pond culture. It spawns in April and May near the shore or in the river mouths.

"This bass swims in schools while feeding or migrating and thus becomes a ready prey to the angler. It is caught with the fly or with a minnow, and it will bite freely in the night. It is not unusual to score a hundred white bass in a few hours. It feeds naturally upon minnows, crayfish and other fresh water crustacea, small

mollusks and the young of fishes. A white bass one foot long will weigh about one pound. In the Ouachita River, Arkansas, it is said to reach the weight of five pounds. It is one of the best of food and game fishes."

A HOBBY.

How fortunate it is to have a hobby, and how unfortunate is a man or woman without one. Whether the hobby be gardening, carpentering, shooting, golf, fishing, music, painting, boating, or what not, the effect is much the same—the mind is concentrated upon a subject foreign to the day's work and the evening's worries. Of course an outdoor hobby is more healthful, though it may not offer more happiness, for it tones the system while resting the mind. Did you ever stop to think how many men, though diversified in professions, are unanimous in recreation? This fact was brought forcefully to our mind in glancing through the subscriptions to FOREST AND STREAM received in a week's mail. They came from a captain in the British Army in Upper Burmah, India; a guide in British Columbia; an Episcopal clergyman in London, England; a Presbyterian minister in Philadelphia, Pa.; a doctor in Arlington, Vt.; a lawyer in Chicago, Ill.; a bank director in Panama City, Fla.; a hotel owner in Cochrane, Alberta, Canada; a gentleman farmer in Round Hill, Va.; Superintendent of American School Association of the City of Mexico; a ranch owner in Cody, Wyo.; and men prominent in all lines of commerce in Nova Scotia, Ontario, Quebec, Maine, Connecticut, New Jersey, New York, Tennessee, Indiana, Ohio, Maryland, Texas, California, North Carolina, South Carolina, Alabama, Louisiana, Delaware, Michigan, Wisconsin, Iowa, Montana, Washington, Arkansas, Idaho, Minnesota, Kansas, Missouri and Nebraska. Men miles apart geographically, religiously and politically, but close together in their hobby, the life out of doors.

TEA À LA CANINE.

AN American woman, Mrs. A. L. Holland, innocently and with a desire to break the monotony of social summer doldrums, established a most disgusting precedent. This spring she gave a "luncheon" for her tiny Pekingese, Vin Sin, by name. The guests were several pekes, whose long nails showed they belong not to the useful class of canine. Each dog was chaperoned by its mistress and the affair was duly press-agented in the daily papers as a "tremendous success"—Brooklyn ministers to the contrary notwithstanding. An English society woman, Mrs. Pinto Leite, was inoculated with the idea, and its publicity possibilities. Recently she gave a "Billikin tea" for her peke pup, at which "cups of tea repeatedly were drunk to his health." In Latin we have Stabulum—a place of abode for animals and men of poorer classes. What shall we say in English for luncheon places for dogs and wealthy women?

STATE TO FEED DEER IN WINTER.

PROVISION to have the wild deer in the Adirondacks fed is being made by the New York State Conservation Commission. Directions have been sent to the protectors to have hay cut on the Beaver meadows at once. Two hundred dollars is available to each division in the deer country for the purpose.

YACHTING

Ticks from the Ship's Clock.

A special chart of the course for races for the British international trophy at Huntington Harbor is to be published, and the committee will assign anchorages for yachtsmen who wish to watch the races from their own yachts. Positions will be assigned in order of application, and as a very large fleet will be at Huntington, yacht owners will do well to apply early.

G. E. Roosevelt, chairman of the race committee of the Seawanhaka-Corinthian Y. C., has sent the following notice to the members of the club:

"The attention of this committee has been called to the fact that carelessness on the part of yacht owners, in allowing their vessels to be placed in position where they have interfered with racing yachts, has recently caused considerable inconvenience to racing men.

"Sailing masters of all yachts should be cautioned by their owners against allowing their vessels to approach a racing boat in such a way that any claim of interference could possibly be made.

"It is hoped that all members of this club will instruct their sailing masters in this regard and do everything in their power to give racing boats a fair chance in the interest of the sport."

It would be a mighty good scheme if members of other clubs would take Chairman Roosevelt's suggestion unto themselves.

Patricia, the Canadian yacht, which will meet the syndicate boat Michigan for international honors, arrived in Chicago on schedule Aug. 1, flying the British flag and the burgee of the Royal Canadian Y. C. Commodore Norman Gooderham, owner and skipper, accompanied by his crew, also reached the scene of action. Those who will assist in handling Patricia are Roger Clarkson, Harry J. McAdie, F. S. Hobbs and J. L. Bartlett.

The Motor Boat Club of America has sent out invitations to 150 yacht clubs in the United States and Canada to co-operate in the defense of the British international trophy for power boats on Huntington Bay, L. I., Aug. 31 and Labor Day. The speediest boats of the world will be on hand. Elimination races to select the three American defenders will be held on Aug. 26, 27 and 28.

The racing machine Massachusetts, of the Manchester Y. C., which successfully defended the Seawanhaka cup in 1910 against the Canadian challenger St. Lawrence, has been sold to J. M. Kinnabrew, of New Orleans, representing a syndicate. Massachusetts will be used in an effort to down Seawanhaka, formerly Manchester, which was brought South and cleaned things up pretty well in those waters. Massachusetts was designed by E. A. Boardman and built at Manchester. She is a racing machine pure and simple, measures 25 feet on the line, 42 feet over all, 8 feet 6 inches beam and draws officially 6 inches.

The annual election of the Unqua Corinthian Y. C. of Amityville, L. I., held on July 27, brought success to the following: Commodore, Fred B. Dalzell; Vice-Commodore, Edgar P. Foster; Rear-Commodore, William T. Loudon; Treasurer, Marshall A. Woodman; Secretary, Clark B. Davis; Governors, Rufus J. Ireland, Francis A. Williams, George S. Thompson, George Schard, Jr., Charles R. Duryea, Erastus E. Hoff. In the re-election of Commodore Dalzell he breaks a precedent of long standing. It is an almost inviolable rule that officers shall serve not

more than two years. The members could not resist the desire for continued prosperity, so Mr. Dalzell was ordered back to the chair.

New King's Cup.

THE new trophy to take the place of the King's cup, raced for the past several seasons, is to be given by King George V., and probably will be competed for next year if not this season. The original King's cup was presented to the New York Y. C. by the late King Edward VII. in 1905, and has been raced for each season.

The names of six yachts inscribed on the outer surface of the trophy, together with the names of the respective yacht owners, takes up so much space that no room remained for the next winner. The change to a new cup adjusts matters in that respect so nicely that pleasure is expressed generally in yacht racing circles.

The conditions embodied in the deed of gift of the King's cup are that it shall be raced for each year at the end of the annual squadron run of the New York Y. C. off Newport. The winners of the event cannot retain the trophy, according to the deed of gift, and the club is responsible for its safety.

As the old cup will be now held as a memorial by the New York Y. C., the King George cup is to take its place under much the same conditions. Interest will be as great for years to come as it has been since the trophy first came into existence.

Not all yachts can race for the big piece of silver and gold, for it is specially stipulated that a sloop or single-masted yacht must measure 50 feet on the waterline and a schooner at least 60 feet on the waterline before they can enter for such a race. Otherwise, any yacht belonging to any yacht club in good standing in the United States may race for the trophy. There may be changes from these conditions, whenever the flag officers of the New York Y. C. determine upon such a course taken ten months prior to the race to which such alteration is applicable.

The rules stipulate also that the races for the cup shall be sailed without time limit. There is never any lack of interest in these races off Newport and in fact they are among the most noted events of the New York Y. C.

Yachts have been built specially of the highest speed and power to capture the right to have the yacht's and the owner's name inscribed on the cup. It is well remembered by most men interested in large yachts that the famous schooner Queen, now the Irolita, was built at Herreshoff's, in Bristol, for J. Rogers Maxwell to capture the inscription on the trophy.

It proved otherwise though when the first race was sailed for the cup off the Brenton Reef course in 1905. A smaller racer than Queen, and a sloop at that, won the right to have her name engraved that year. It was the Gielow designed sloop Effort, owned by F. M. Smith, of New York, that craft winning the race in a high easterly wind on time allowance on the small margin of nine seconds.

It was depressing to Mr. Maxwell to bring his new schooner Queen to the finish far in the lead of the whole fleet that day and then stand by back of the line counting the minutes and seconds it took Effort to complete the course and smash the feat of Queen, which was nearly twenty minutes in the lead.

Queen won the cup the next year, however, and then it went to the sloop Istalena of the 60-foot class of sloops; to Avenger, a smaller boat of that class of flyers in turn, and then to the big racing schooner Enchantress, owned by William Iselin, in 1911.

Red Bank Y. C.

RED BANK, N. J., Aug. 3.—The week-end regatta to-day brought out five yachts of the Red Bank Y. C. Maywin took the lead across the line, but Papoose soon passed her to windward. Maywin again took the lead after a short sprint and held it until the finish. Papoose won the race on time allowance. The summary:

	Corrected.		Corrected.
Papoose	1 21 56	Emily	1 31 42
Maywin	1 31 05	Florence	Withdraw.
Widow	1 31 53		

Seawanhaka-Corinthian Y. C.

OYSTER BAY, L. I., Aug. 3.—Six one-design boats of the Seawanhaka Corinthian Y. C. sailed the fourth race of the second series to-day, and it was the best race of the season. The winner was Clinton Mackenzie's Thelema by 2m. 30s. The summary:

Sloops, Class S—Start, 3:10—Inside Course.			
	Elapsed.		Elapsed.
Thelema	1 25 50	Sabrina	1 31 10
Bat	1 30 00	Hen	1 31 50
Iris	1 30 15	Imp	1 32 30

EMBRYO YACHTSMEN.

Southern Y. C.

NEW ORLEANS, La., July 12.—*Editor Forest and Stream:* FOREST AND STREAM for many years has been regarded as the authority of sports both aquatic and afield, and has been accepted as most reliable in its articles and chronicles. However, in its issue of June 8, 1912, appears a paragraph under the caption, "New Orleans Regatta," which contains a series of statements relative to the sixty-third annual regatta of the Southern Y. C. at variance with the truth.

The facts are: The interest in this regatta was greater than has existed in many years. More yachts (both sail and motor) than had been known since the days of the "Sand-Bagger" participated in the races. The public to the extent of 3,000 enthusiastic visitors witnessed the regatta from the club house, while fully 500 people occupied positions of vantage on wharves and revetment.

The great interest taken in this regatta of the second oldest yacht club in America was primarily due to the advent of two new racing open sloops brought here this spring to attempt the defeat of the champion Seawanhaka. One of the boats, Stranger, having been designed and built for that purpose, and the other Senorita, a last year's craft of reputation.

Without elaborating upon the conditions under which the success of the regatta was achieved, it is pertinent to state that the membership of the Southern Y. C. has steadily grown during the past few months, and now numbers nearly 550.

In justice to the Southern Y. C. and to yourself we ask that a correction be made in your paper.

HOLMES HARRISON,
Chairman Regatta Committee.

Horseshoe Harbor Y. C.

LARCHMONT, N. Y., Aug. 3.—There were seventy-one starters in the regatta held at the Horseshoe Harbor Y. C. to-day. A whole-sail west-northwesterly breeze prevailed, but it was uncertain. The winners were: Joyant in Class P, by 53s.; Alert, in the New York Y. C. thirties class, with Ibis, Okee and Juanita crossing the finish line as mentioned. Vandalia, More Joy, Dorinda, Amada, Rascal III, Rascal, Whiff, Little Dipper, Sapphire, Drena, Arizona, Mlle. Boss, Kazaza, Petrel, Iney, Tautog and Alpha were the winners in other classes. The regatta committee consisted of Messrs. Kenneth M. Spence, R. C. Heather and Commodore H. C. Southwick acting in place of Butler Whiting, who sailed Babette. The summary:

Sloops, Class P—Start, 1:10—Course, 15 Miles.

Bergen Beach Y. C.

THE invitation regatta of the Bergen Beach Y. C. last Saturday brought the biggest entry ever recorded at the club. Thirty-seven sail and power craft crossed the starting line. Marion was the winner among the cabin sloops and Elvira won the cabin catboat class. Selfish beat Siren in the open cat class. Tanna took first among the hunting cabin launches and Brisk won the standing cabin launch event. On corrected time Vixen won the open launch cup, and the semi-speed division went to Valiant II. on corrected time. Alert took the sharpies prize. The summary:

Van Rensselaer Cup Regatta.

MARION, Mass., Aug. 3.—The contestants for the Van Rensselaer cup had an exciting time in a heavy blow this afternoon in the annual race off Ruggles Point. Seven 21-footers, four sonders and two of this year's Crane design boats started, the 21-footers having 1m. 42s. time allowance and the Crane boats 10m. allowance. Commodore W. E. C. Eustis' Skate under full sail won by more than 4m. The time allowance enabled Peg and Sea Coon, sonder boats, credit for second and third places. Wind caused trouble for the little Herreshoff 15-footers. Miss Margaret Codman's Yalu took the lead early, but on the second time around broke her mast and had to withdraw. Polly won in this class. Pronto, owned and sailed by Miss Esther Hosmer, protested that the course was not understood by the crew and withdrew. Vim protested Folly for fouling one of the buoys, thus leaving the actual winner in doubt till the regatta committee passes on the protests. The summary:

Van Rensselaer Cup Race.			
Corrected.		Corrected.	
Skate	1 49 01	Lestris	1 58 46

DRIVERS AND TWISTERS.

One of the most popular ammunition demonstrators, Otto Feudner, has taken up the Pacific Coast territory for Peters Cartridge Co.

The second annual tournament of the Maryland State Sportsmen's Association will be held at Prospect Park, Baltimore, Md., on Aug. 27, 28 and 29.

Elmer E. Shaner telegraphs that "the Portland Gun Club will add an additional \$500 to the regular program events at the Pacific Coast Handicap tournament, Portland, Ore., Aug. 27, 28 and 29, making a total of \$1,500 added money at said tournament."

Do not overlook the seventh Western Handicap, Aug. 14, 15, 16, at Kansas City. There will be \$1,000 or more added money, made up as follows: Added to the Western Handicap, \$200; trophy for the winner of the Western Handicap, \$100; added to the Squier money-back special fund, \$200; one cent (1c.) for each target trapped added to the Squier money-back special fund, \$500 or more—making a total of \$1,000 or more. If 50,000 targets are not trapped in the regular program events, the difference will be made good by the Interstate Association and the Kansas City Gun Club.

W. G. BEECROFT.

Buffalo Audubon Club.

BUFFALO, N. Y., Aug. 3.—Only seventeen members attended the first regular shoot for August, and our old friend, F. D. Kelsey, was easily the star of the day with a good 90 out of his century. He only got 14 out of the last event from the 19yds. mark, or he would have done much better. Kelsey, Imhoff and Blackmer were winners in the badge event, while Kelsey, Suckow and Blackmer won spoons and Rogers, Barger and Blackmer won legs in the Smith trophy event. Scores:

Events:	1	2	3	4	5
Targets:	20	20	20	20	20
Imhoff	16	18	16	13	16
Wacker	17	16	14	16	14
Ebberts	11	14	14	12	11
Burgwardt	16	12	13	13	10
Glover	19	18
Rogers	16	18	15	13	19
Kelsey	17	20	20	19	14
Blackmer	15	15	10	17	15
Suckow	18	16	18	17	14
Ward	18	17	16	17	10
Immel	10	16	14	17	12
Seymour	14	..	16	14	..
Haupt	12	10	6	8	11
Smith, Sr.	16	16	15	16	13
Smith, Jr.	7	12	10	12	12
Barger	17	16	..	15	16

Event No. 2 was the badge shoot; No. 4, spoon shoot; No. 5, Smith trophy.

Island Beach Events.

ISLAND BEACH, Conn., July 27.—In event No. 4, which was for the second leg on the DuPont trophy, Rogers, Purdy and Luke, with their handicaps, made clean scores. No. 5, which was the shoot-off, was won by G. Luke. These Saturday afternoon shoots at Island Beach are becoming very popular, and are much enjoyed by the contestants, particularly on account of the splendid background and location. It surely makes an ideal outing for anyone enjoying trapshooting.

The scores of to-day are as follows:

Events:	1	2	3	4	5
Targets:	15	15	20	25	25
A E Rooney	14	15	18	23	23
J D Chapman	11	12	17	15	..
F F Rogers	12	11	16	18	21
W D Finch	7	11	10	14	..
L Brush	12	11	17	16	20
C S Purdy	13	9	17	21	20
J S Conover	13	13	16	20	..
S G Chard	12	13	19	21	..
E White	4	6	8	9	..
T W Hoyt	10	10	15	18	..
G Luke	12	13	16	20	23
J H Finch	12	13	16	20	..
Miss L M Boles	8	10	15	13	..
W E Smith	1	4	5	8	..

The following scores were made at the shoot on Aug. 13:

Shot at Brk.	Shot at Brk.	
A E Ranney ... 150 129	G F Headrie 150 113	
R J Held 150 135	A Betti 150 124	
F F Rogers 150 101	C H Banks 150 93	
H O Allyn 200 147	H B Smith 150 103	
*J S Fanning ... 150 122	C S Purdy 90 63

L Brush 175 100	H A Bell 70 48	
G Luke 150 99	O Tuhill 95 71	
J H Finch 175 136	J Garrecht 70 47	
C S Medler 150 132	R A Gillespie ... 70 58	
S G Chord 200 152		

Two-men team race cup, 50 birds, was won by P. A. Raymond and J. H. Finch. The five-men team race cup, 50 birds, was won by Greenwich Gun Club team. High amateur medal was won by R. J. Held with 135 out of 150. High amateur run medal was won by A. E. Ranney on 42.

Winners of medal prizes were: Class A: Held, first; Raymond, second; Medler, third; Ranney, fourth; Betti, fifth; Finch, sixth. Class B: Hendrie, first; Chord, second; Allyn, third; Wylie, fourth; Smith, fifth. Class C: Rogers, first; Luke, second; Offatt, third; Banks, fourth; Miss Boles, fifth.

The high wind made targets extremely difficult and high scores impossible. The day was beautiful, the shoot well handled and enjoyed by all.

Program shoots are held every Saturday and also on Labor Day.

J. H. FINCH.

Portsmouth Gun Club.

PORTSMOUTH, O., July 31.—Good scores were the rule here yesterday and to-day. High gun went to R. H. Bruns with 287. Second to Wm. Shattuck and Wm. Spangler, with 3 less on a tie. R. O. Heikes, from the pink sheet, showed what a pro. could do by doing way with 292. J. R. Taylor tagged on with 290.

South Chicago Gun Club.

CHICAGO, Ill., July 30.—Our next regular shoot will be Sunday, Aug. 11, and every second Sunday thereafter. South Chicago Gun Club will change dates with Arlington Heights Club in Chicago Interurban League. South Chicago Gun Club will have the Aug. 18 date. The race is getting warm, only five points separating the first four clubs.

Chicago Gun Club and Long Lake are tied with 24 points each, National 20 points and South Chicago with 19. The boys from South Chicago expect to make the other teams go some at the next shoot.

CHAS. H. RAMBO, Sec'y.

Chicago Interurban League.

THE fourth shoot of the Chicago Interurban League of Gun Clubs took place on the grounds of the National Gun Club at Riverside, July 28. The attendance was very good, eighty-six shooters in all. If it were not for the threatening weather early in the morning, the attendance might have been larger. The day turned out beautiful; the wind was high from the west, which probably prevented real high scores, such as are most always made on the Riverside grounds.

Chicago Gun Club again won first place, with the Long Lake Club second. This puts these two clubs now in a tie for first, each having 24 points. Joe Barto, of the Chicago Gun Club, and J. L. Humpick, of Hammond, each got high score with 47.

This was Jay R. Graham's first appearance since his return from Stockholm, where he won the world's honors, and he was given a hearty reception by the shooting contingent present.

Doc May and his crew did their utmost to make this shoot a success, and every little detail was looked after, and the shoot consequently ran off very smoothly.

The standing of the League at this time is as follows:

Table with 3 columns: Club Name, Points, and another column. Includes Long Lake, Chicago, National, South Chicago, South Shore, Hammond, and Arlington Heights.

The scores follow:

Table with 2 columns: Club Name and Shooter Name with scores. Includes Chicago Gun Club and South Shore Gun Club.

Long Lake Gun Club.

Table with 2 columns: Shooter Name and Score. Includes Jay Graham, Tom Graham, McDermott, Ray Loring, and F Stanton.

National Gun Club.

Table with 2 columns: Shooter Name and Score. Includes A F MacLachlan, Dr Conk, W C Brown, C W May, and O P Goode.

South Chicago Gun Club.

Table with 2 columns: Shooter Name and Score. Includes C Emery, Chas Rambo, C Hausler, S Johnson, and F Olson.

Those who shot, but who did not qualify for their respective teams follow:

Chicago Gun Club—W. F. Riley 40, W. A. Davis 41, C. E. Shaw 41, Gulder 40, Oscar Kausche 41, Wm. Holtz 42, J. A. Taggart 35, J. H. May 40, Phil Miller 34, J. Panesi 40, C. R. Seelig 42, C. F. Seelig 42, J. Eck 31, T. P. Bue 43, J. W. Keller 33, Leo Stockley 43, Dr. Shaw 35.

Long Lake Gun Club—W. Jackson 42, L. M. Fetherstone 42, R. Kuss 42, P. J. Graham 38, Hutton 33, Cliff 33.

National Gun Club—W. E. Einfeldt 41, B. L. Kammerer 41, J. A. Schultz 38, Kuhlman 40, A. Johnson 33, E. J. Kearns 39, M. George 39, Kunzer 39, Rizzig 32, Fredericks 39, Houseman 36, Eckert 35.

South Chicago Gun Club—W. Reed 35, H. Reed 34, W. Hausler 28, E. Hausler 41, Nitshe 39, Fred Pernod 29, Dr. Stanton 40.

South Shore Gun Club—J. Birkland 35.

Hammond Gun Club—F. M. Warnimont 22.

Arlington Heights Gun Club—Edw. Schulenberg 32, E. B. SHOGREN, Sec'y-Treas.

Oregon Gun Club.

OREGON, Wis., July 30.—J. S. Young easily was high gun here to-day, shooting a classy and consistent score up to the tenth event, when he fell down from form with a thud that lost him 3 out of his 15. Finally he totalled 144, this being 4 better than C. P. Shumway and Paul Kimball, each of whom broke badly in several frames. However, all three top amateurs shot in a class with the two upper "no cash" shooters, E. Graham making 143 and W. D. Stannard 141.

Table with 2 columns: Shooter Name and Score. Includes L Nickerson, J Heimer, L Nelson, P H Cusick, C E Parkin, W E Lawyer, H McNamara, E P Drake, Dr Gibson, C E Snider, J D Pollard, E L Wiswall, H H Gay, A Vance, W H Dreher, J S Young, O P Goode, C P Shumway, Capt Jack, H G Waterman, A E Hanneman, N Miller, Jas Christianson, P Erickson, P Christianson, L S Dell, L Fauerbach, W E Miller, W E Riley, A A Mayer, C F Ford, W H Skolas, J L Meloy, E L Sholts, L C Angrick, J B Pierce, E E Austin, G Sholts, A L Hauson, H W Turner, C M Clark, Paul Kimball, F G Fuller, J Raup, D A Hutton, Dr P C Regan, Chas F Schneider, W O Stannard, C E Robbins, H. R. PATTERSON, Sec'y.

Thornburg Gun Club.

THE Thornburg Gun Club held a very successful shoot at their traps, Thornburg, Pa., Saturday, July 27. Neb Painter was high amateur with 98 out of 100, and Jimmy Lewis, the popular Winchester pro., tied him with a loss of only 2 out of his 100 targets. The following are some of the scores:

Table with 2 columns: Shooter Name and Score. Includes G E Painter, G H Cochran, A C Wooster, M D Ullery, A S Bishop, J M Kable, J Bruff, A N Baker, J Lewis, A W Patton, Wm A Stavings, Harrington, Fetzter, PAUL T. EVANS, Sec'y.

Baudette Gun Club.

BAUDETTE, Minn., July 29.—Thirty-seven enthusiasts, including six upper-class men from "targets only" college, shot in our registered tournament here to-day. Amateur J. P. White won high gun honors in the money class, breaking even on 146 out of 150, with R. R. Barber top pro. Bill Ridley's pump hand suffered some

lost motion, resulting in a bad day for him, with 142, 2 less than Fred Bills from prodrom cracked. C. A. Hale was third amateur, tying up at 139 with J. H. Stair and "Snuff" Taylor from the "pink sheet."

Table with 2 columns: Shooter Name and Score. Includes W Ridley, J P White, M A Nashold, C A Hale, Dr Jones, J E Wahlberg, E Esenrich, P Aldrin, Mrs Nashold, P Cowan, W Young, M S Weeks, O Flatner, F E Johnson, Max Stein, R R Barber, F G Bills, J H Stair, Mrs R R Barber, D Farrel, Bert Ayers, J Perkins, C E Wubbens, J W Jowett, E Moorhead, T Hoover, J F Peterson, T Gerrie, W E Carr, E Riley, L Matthews, D F Miller, F Smestek, H G Taylor, C G Dockendorf, F R Gilman, A. M. HOOPER, Sec'y.

The Pacific Coast Handicap.

THE Interstate Association's seventh Pacific Coast handicap tournament will be held at Portland, Ore., Aug. 27, 28 and 29, under the auspices of the Portland Gun Club.

Portland, Ore., where roses bloom nearly the year round, is known as the "Rose City," and it is well deserving of the name. Nearly every inhabitant has his favorite variety, and in every yard they are to be seen blooming in great profusion during the summer.

Portland is neither level nor extremely hilly, but is surrounded by high hills. As a residential city it is delightful. For the tourist who finds pleasure in majestic, impressive mountain scenery, it has much to offer. The scenery along the Columbia River is said to excel in attractiveness that of the Hudson or Rhine. From Council Crest, an elevation near the city and easily reached by street cars, one can see the glistening peaks of Mount Hood, Mount Jefferson, Mount Adams, Mount St. Helens and Mount Rainier. Mount Hood commands the center of this fascinating picture. There are many little trips than can be made by steamer or by rail, each of which has its own distinctive charm.

Portland's buildings, traction lines and water system are those of a splendid modern city. Beautiful homes surrounded by green lawns and handsome shrubbery, with a wealth of roses, even in the poorest yards, makes this a peculiarly attractive home city. The streets are shaded by beautiful trees, and many well kept parks are so situated as to give the people of the city ready access to them.

Portland's location is not only picturesque, but practical. The same river—the Willamette—which flows past Portland from the south, adding to the city's charm, furnishes water-power, makes Portland's harbor, and drains the productive Willamette Valley. The city is connected by rail and water with the Inland Empire, has rail connections with Central Oregon, and is connected by steam, electric lines, or both, West, North, South and East, and by fresh water with the Pacific. Portland is an ocean port—a world's port—with a down-grade haul from 250,000 square miles of fertile territory.

The Portland Gun Club is of the hustling variety, and its members are heartily interested in everything pertaining to trapshooting. They are also interested in game protectory and the enforcement of the laws pertaining to same, and are at all times ready to give information to visiting sportsmen regarding the best and most convenient game shooting grounds and fishing waters. Although young in years, the Portland Gun Club has gained the reputation of being composed of one of the most congenial lot of sportsmen as ever formed a trapshooting organization, and it is safe to say that they will not allow a single contestant at this tournament to leave feeling dissatisfied.

The committee having the immediate management of the tournament is fully capable of handling it, and as the tournaments given in Portland in the past have always been well attended and greatly enjoyed, and as the interest in trapshooting throughout the Northwest was never greater than this year, it is confidently expected that this will be one of the best tournaments ever given on the West Coast.

Roanoke Gun Club.

ROANOKE, Va., Aug. 3.—The threatening weather kept away some of the enthusiasts this afternoon, but there were twenty-six to shoot over the traps of the Roanoke Gun Club, including S. P. Goodloe, the popular representative of the Winchester Arms Company. The weekly medals were won by the following members: Scratch—First, tie, Bloxton and Shepherd; second, tie, Battle and Atkinson. Class A—First, Elliott; second, Wilkinson. Class B—First, Ferguson; second, Fisher. Class C—First Holland; second, Berkley.

Table with 2 columns: Name and Score. Lists scores for various members like Berkeley, Holland, Dyer, Ferguson, etc.

H. F. WILKINSON, Sec'y.

Charleston Gun Club.

CHARLESTON, W. Va., Aug. 3.—Good scores were the rule here to-day.

Table with 4 columns: Name, Shot at Brk., Score, and another Name/Score. Lists members like D W Goshen, De Gruyter, etc.

DR. G. NICHOLSON, Sec'y.

Holland Gun Club.

GROUNDS located on Law street, near the Erie track. Carriages via Walnut or Chestnut streets. It is only five minutes' walk from the New York Central station via Mill street and the Erie Railroad track. Shooting will begin promptly at 9 A. M. on Aug. 14—one hour earlier than last year. Guns, ammunition, etc., care Jay L. Robson, Batavia, N. Y., express prepaid, will be delivered to the grounds free of charge. Interstate rules to govern all points not otherwise provided for. All paid representatives to shoot for targets only. Targets two

cents each included in entrance. Rose system, four moneys, 5, 3, 2, 1. Lunch will be served on the grounds. Three automatic traps.

Shells—Walbridge & Co., Buffalo, N. Y., will have on sale a full line of U. M. C., Winchester and U. S. shells in popular loads. If you want a special load send your order to Walbridge & Co., Buffalo, N. Y.

Added Money Cash—Interstate Association, \$50 to apply to the Squier money-back system of the regular program. Cut glass merchandise, \$100. Richmond trophy, this year's winner getting 50 per cent of next year's entry.

The officers are: J. B. Knickerbocker, President; E. S. Watson, Vice-President and Treasurer; Watts L. Richmond, Second Vice-President; Chas. W. Gardner, Secretary; D. W. Tomlinson, Jr., Captain.

Warroad Gun Club.

WARROAD, Minn., July 28.—The State tournament held yesterday and to-day by the Minnesota Sportsmen's Association drew a big entry, there being sixty-two gunners present. The program consisted of 150 targets each day. Scores follow:

Table with 4 columns: Name, 1st Day, 2d Day, Total. Lists members like Christeman, W E Rowe, etc.

Gouverneur Rod and Gun Club.

THE first annual tournament will be held on Aug. 23 at Gouverneur, N. Y. To reach the traps ten minutes' walk up William street. Guns, ammunition, etc., may be forwarded to W. R. Patriek, Secretary, Gouverneur, N. Y., express prepaid, and the same will be delivered on the grounds. All prizes in merchandise event are listed at actual retail price. Manufacturer's agents and professionals shoot for targets only. Interstate Association rules will govern all points. Every shooter must, upon making his entry, register his correct name and address and the name of the club he represents, with the secretary.

Events Nos. 11 and 12 will be special events at 10 pairs, entrance \$2 and \$1 respectively. Targets reduced to 2 cents each. Money divided 5, 3, 2, 1.

Event No. 13 will be the team event, five men from any recognized gun club in Canada or the United States, 25 targets, team entrance \$7.50. Money divided 50, 30, 20 per cent., less price of targets.

Event No. 14 will be the merchandise event, 25 targets, entrance \$1.50. Subsequent entries 75 cents. High gun ties will be shot off at 10 targets.

Spoooner Gun Club.

SPOONER, Minn., July 30.—Scores in the distance handicap here to-day were unusually low for the class of shooters entered. High gun was Bert Ayers, who from 16yds., cracked only 137 out of 150, with C. A. Hale second on 135, while William Ridley marred the landscape with dust of only 124. High pro. didn't do much better, R. R. Barber getting on 139 for 20yds.:

Table with 4 columns: Name, Yds., T'l., Score. Lists members like Wm Ridley, C A Hale, etc.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

Du Pont Gun Club.

WILMINGTON, Del., Aug. 3.—There were so many specialties on the card to-day at the grounds of the Du Pont Gun Club that it was hard to keep track of the winners in the different events. Over forty shooters put in an appearance during the afternoon, and tried out their skill against the targets thrown in the F. L. Connable trophy race. Of that number Alden B. Richardson, of Dover, and Dave Lindsay, of this city, tied on 23 out of 25. Richardson shot from 22yds. as against 20yds. for his opponent.

The main feature of the day's shoot was the match between A. B. Richardson, holder, and E. A. Everitt, challenger, for the State championship. While this had been looked upon as a somewhat easy match for the title holder, the first quarter of the race did not promise an easy thing for the man from Dover. The score stood 24 to 22 in Everitt's favor when the first 25 had been shot, but after that it was almost a procession. The totals for each succeeding 25 were: Richardson 25, Everitt 19; Richardson 24, Everitt 18; and Richardson 22, Everitt 24. The total was 93 for Richardson and 85 for Everitt.

A special event during the afternoon was the final shoot-off for the 1911 class A cup. Ten men had qualified for this trophy. Of this number only J. H. Minnick and H. H. Lukens were absent. Mr. Lukens is now in South America and Mr. Minnick was engaged in defending the honor of the Du Pont Gun Club at the grounds of the S. S. White Gun Club in Philadelphia.

When the scores for the 1911 class A trophy were counted up, it was found that Eugene du Pont had won the shoot-off for final ownership by the satisfactory margin of two targets. His score of 48 was two targets better than that of 46 made by J. B. McHugh earlier in the afternoon. The scores made in this race, and the handicap apportioned each competitor were: Eugene du Pont (20) 48; J. B. McHugh (20) 46; Edward Banks (22) 45; A. B. Richardson (22) 44; J. T. Skelly (22) 43; E. du Pont (20) 43; W. S. Cofax, Jr. (22) 40; and E. A. W. Everitt (21) 38. Thus Mr. Eugene du Pont won the coveted class A 1911 trophy.

In the challenge contest for the class B cup (1912 issue), Clyde Leedom shot away ahead of the class he is supposed to belong to, and scored 47 to the 35 recorded for the holder of the cup, D. Lindsay.

J. A. McMullen, the challenger for the 1911 class D trophy, showed that he had a perfect right to challenge for the trophy by defeating the holder, Dr. E. Q. Bullock, with a score of 37 to 30 out of 50.

The scores in the F. L. Connable cup race were as follows:

Table with 2 columns: Name and Score. Lists members like W Worthington, Ed Banks, etc.

*Not eligible to win the trophy. A. B. Richardson and D. Lindsay are tied for the cup. The tie will be shot off at the earliest opportunity.

Tyndall Gun Club.

TYNDALL, S. D., July 30.—Ideal weather greeted the shooters at the registered tournament of the Tyndall Gun Club. H. K. Stilwell, of Tyndall, was high amateur, and also made long run, 58. G. A. Olson made long run for professionals, 87. Owing to very muddy and bad roads, at least ten shooters were unable to attend.

Table with 2 columns: Name and Score. Lists members like F F Clark, H K Stilwell, etc.

Professionals: George Kregger..... 146 F K Eastman..... 112 G A Olson..... 145 A J French..... 141

Fulton Gun Club.

HEREWITH are the results of our weekly shoot, which, you will note, is very light in attendance, owing to this shoot falling on the first of the month, when many members were busy collecting their monthly bills. We had with us Mr. J. E. Fulford, who did nice work, but was unfortunate in the last squad up in getting some bad targets. We hope he will come again, as well as any other firm representatives or visitors. The scores follow:

Table with 4 columns: Name, Shot at Brk., Score, and another Name/Score. Lists members like J E Buford, F A Gengrich, etc.

FRED C. WELLS, Sec'y.

Frontier Rod and Gun Club.

BUFFALO, N. Y., July 27.—The attendance was small to-day, but its lack was offset by enthusiasm. Eichberg and Wakefield shot off for Class A point. Harry Thompkins won Class B point as well as the handicap and a spoon for perfect score. Lawson and Broderick, of Niagara Falls, were visitors.

Fred Wakefield, now of Alden, offers a spoon to any member making a straight score in the handicap race.

The next event will be a black-bass fishing party on Aug. 18. The scores:

Targets:	10	15	25	25	25
Wakefield	21	23	..
C McKenna	14
Thompkins	10	17	25	..
Eichberg	8	10	21	22	19
Dewald	7	19	18	22	16
Faber	3	4	11	17	..
Lawson	5	12	22	19	20
G McKenna	16	20	..
Mehen	7	..	12	17	..
Utz	17	13	..
Broderick	21	20

Point winners: Event 3, cup race—Class A, Wakefield, 21; Class B, H. Utz, 17; Class C, Thompkins 17. Event 4, handicap: H. Thompkins 25.

Cincinnati Gun Club.

THE registered shoot of the Cincinnati Gun Club will be held on Sept. 12 and 13. There will be \$100 added by the Interstate Association. Squier money-back system. Programs will be mailed later. Don't forget, this shoot will be held on the same grounds and over the same traps to be used for the Post Season Tournament, affording a good opportunity to get some practice for the big event. All amateurs who have, on Oct. 1, made an average of not less than 88 per cent. on 1,200 or more single targets shot from the 16yds. mark at registered tournaments held in 1912, will be eligible to take part in the Post Season Tournament, \$1,000 added money, on Oct. 15, 16, 17 and 18.

The E. C. cup contest will be held Aug. 24, H. D. Freeman, holder, and J. S. Day, challenger.

For further information or details write to Arthur Gambell, Superintendent, 615 Madison avenue, Covington, Ky., or R. F. Davies, Secretary, 2414 Copeland street, Cincinnati, O.

The grounds of the Cincinnati Gun Club are open every day in the year. Take Rosedale car at Fountain square.

N. J. S. R. A. at the Traps.

ANNOUNCEMENT is made that a new feature of the "sports" of the New Jersey State Rifle Association this season is trapshooting. A gun club within the association has been organized, and a lay-out for trapshooting of the most recent model and the Ideal Leggett automatic traps have been installed on the ground adjacent to the club house, Sea Girt N. J., overlooking the beautiful Stockton Lake; an ideal location, where the club members, together with their guests and lady friends will be heartily welcomed, in fact, anybody will be welcome who enjoys the sport.

Trapshooting for beginners and others who wish to indulge in trapshooting practice at the clay birds will be provided from day to day during the rifle tournament, Aug. 29 to Sept. 7, 1912, at such hours as may be designated by the executive officer.

Tickets for "targets" will be on sale at the range office at two (2) cents each. Targets, to club members only, one and one-half (1½) cents each. A full line of factory loaded shells will also be on sale. Applicants will be sold any quantity desired.

Programs upon request to the committee.

Norfolk-Portsmouth Gun Club.

PORTSMOUTH, Va., Aug. 2.—Ideal shooting conditions yesterday afternoon brought out a good number of shooters for the weekly shoot of the Norfolk-Portsmouth Gun Club. Mr. E. C. Gunther did the best work of the afternoon, breaking 191 out of 200 targets, with a run of 60 straight. Mr. Storr, of Peters Cartridge Co. was second high man with 95 out of 100. Gallagher and Gunther tied on 45 out of 50 in the club shoot. Following are the scores:

Shot at. Brk.	Shot at. Brk.
Gunther 200 191	Edwards 75 63
*Storr 100 95	Boyd 50 41
*Anderson 100 87	Thompson 50 41
Dr Byrd 100 87	Talbot 100 75
Richardson 100 87	Gallagher 50 45
Borrowdale 75 63	Ballance 50 38

*Professionals.

W. T. E., Sec'y.

Wilmington Gun Club.

WILMINGTON, N. C., Aug. 2.—The following scores were made on the above date at our regular shoot:

Shot at. Brk.	Shot at. Brk.
S R Coley 100 90	C Cooper 75 27
J H Dreher 100 78	Christian 50 38
L B Pearce 100 54	E L Holloway .. 50 36
F L Robbins 75 65	Underwood 50 28

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

WINCHESTER

Self Loading Shotgun MODEL 1911

A comparison between the Winchester Self-Loading shotgun and other makes is all that is necessary to convince anyone of the great superiority of the Winchester Self-Loader. Note the absence of unsightly screws and pins and of dangerous projecting parts. Note the neat little trigger lock, which operates cross-wise and cannot be jarred out of place. Take the gun down and note how easily it separates into only two parts, without releasing small parts. Note how simple is the action, and that the springs are of coiled wire, the most durable kind. Then note the general finished appearance of the whole gun; and remember that all metal parts are made of nickel steel—about twice as strong as that used in repeating guns of other makes. The barrel has to be pulled back only when starting to shoot, as the recoil does the reloading afterwards. The gun is readily used as a single loader. No adjustment is required to shoot different loads; and no unpleasant effect is felt from the recoil, as it is divided in the gun. Made in 12 gauge only, and a much better shooter than the ordinary gun. Examine one at your dealer's.

A Gun That Is Unexcelled For Duck Shooting :: ::

Chesapeake City Gun Club.

CHESAPEAKE CITY, Md., Aug. 3.—Seventeen gunners took part in the events decided to-day on the grounds of the Chesapeake City Gun Club. The shoot was not as well attended as we would like to see, but those who did attend, put in the afternoon doing some good shooting, considering the wind. One novelty was introduced during the sport, which was quail shooting, and N. Bouchelle, W. Anants and R. Reese showed their skill at this style by breaking straight in the trophy shoot, this being the first leg of four. Mr. Chas. Stevens broke 25 straight. By doing this he adds another spoon to his list. Six of the gunners tied for the dessert spoon. N. Bouchelle won by breaking 10 straight. Following are the scores:

Events:	1	2	3	4	5	6
Targets:	10	10	25	10	5	5
Chas Stevens	10	10	25	9
R Reese	8	7	17	6	5	4
Wm Anants	8	6	20	8	5	..
Wm A Brown	7	9	20	10
A Pyle	7	8	20	..	3	..
W Stevens	9	8	19	6	3	5
H Pyle	18	8	2	..

H Everett	9	..	15	..	5	..
N Bouchelle	10	23	9	5	7
G Bakeoven	14	7	4	..
H Kibler	15	6
H Howard	8	8	13	5	2	..
G Bennett	6	..	13	7
J Bouchelle	7	3	13	5	3	..
H Hazel	7	..	22	7
J Harris	18	7	4	..
S Toy	5	21	6	3

Event No. 5 was at quail; event No. 6 at 5 pairs.
J. C. LUPFER, Sec'y-Treas.

Next Match for the E. C. Cup.

WHEN H. D. Freeman, of Atlanta, Ga., defeated C. A. Young, of Springfield, Ohio, for the E. C. cup on July 4, at the grounds of the Cincinnati Gun Club, it was but a very short time before Mr. Freeman received a challenge from J. S. Day, of Midland, Texas. The challenge was duly accepted, and Mr. Freeman has set Aug. 24 next and the grounds of the Cincinnati Gun Club as the date and place for this match, which is the twenty-first contest for the E. C. cup, representing the inanimate target championship of the world.

"Steel where steel belongs" Superiority

is being demonstrated day after day at tournaments large and small, in every section of the United States. **Peters Shells** are the only ones having steel of proper kind in the head and rim, and the only ones in which the correct method of construction is used. Their unequalled shooting quality contributed to the following victories at the traps:

Marion, Ohio,	July 23,	High Prof.	Average,	143 ex 150,	won by J. S. Day
Bradford, Ill.,	" 25-26,	High Gen.	"	285 ex 300,	" Bart Lewis
Manning, Ia.,	" 26,	High Gen.	"	193 ex 200,	" W. S. Hoon
Warroad, Minn.,	" 26-27,	High Gen.	"	273 ex 300,	" R. R. Barber
La Salle, Ill.,	" 28,	High Gen.	"	144 ex 150,	" H. W. Cadwallader

Cleveland Gun Club.

CLEVELAND, O., Aug. 3.—The Cleveland Gun Club weekly shoot held to-day at Shooting Park was known as Freeman Day, in honor of Captain Geo. P. Freeman. The regulars turned out in good number, and George was on the job.

The next shoot, Saturday, Aug. 10, will be Rockwell Day. Mr. C. H. Rockwell, the club secretary, will be in charge of this contest and will do the thing right, as he is quite a boy at the game.

Mrs. Freeman assisted the Captain in making the day one to be remembered. Mr. C. E. Doolittle put up one of his fine scores, 96 out of 100, which is going some for a boy. Charley can do it and is doing it a number of times this year. Dr. Brown was not to be overlooked, as he was taking his time and turned in 94 out of 100. The scores follow:

Event No. 1, monthly trophy, 50 targets, handicap added targets:

H. T.	H. T.
Doolittle 2 50	Smith 9 44
Haycox 5 50	Stapp 1 42
Ledgett 2 50	Burns 3 42
Thorp 16 50	Beal 4 42
Freeman 4 48	Genner 4 42
Judd 4 48	Archer 0 42
Brown 0 47	Beckley 16 41
Wall 9 46	Brainard 0 37
Gould 16 46	Taylor 0 35
Rockwell 4 44	

Event No. 2, annual trophy, 50 targets, handicap 16yds.:

H. T.	H. T.
Doolittle 48	Burns 40
Stapp 48	Thorp 38
Brown 47	Judd 37
Ledgett 47	Wall 37
Archer 47	Smith 36
Haycox 43	Beckley 36
Rockwell 43	Gould 35
Brainard 42	Beaumont 33
Arther 42	Taylor 31
Freeman 41	Turner 31

Event No. 3, blue ribbon, 25 targets, handicap added targets:

H. T.	H. T.
Haycox 4 25	Brown 0 22
Freeman 7 25	Smith 5 22
Archer 2 25	Beckley 5 21
Doolittle 1 24	Taylor 2 21
Jones 0 23	Wall 2 21
Stapp 1 23	Beaumont 5 20
Burns 2 23	Gould 5 18

Event No. 4, 25 targets, handicap added targets:

H. T.	H. T.
Jones 2 25	Brown 0 21
Archer 0 24	Wall 2 21
Doolittle 0 23	Taylor 0 20
Freeman 3 23	Tamblyn 2 20
Smith 4 22	Beaumont 5 19
Stapp 1 21	Gould 5 17
Haycox 0 22	Beckley 5 18

F. H. WALLACE, Mgr.

Indianapolis Gun Club.

INDIANAPOLIS, Ind., Aug. 3.—Strife for first place, in the practice shooting, was again between Edmonson and Parry, the former winning by one point. A high wind operated to keep all scores below the usual average. The scores:

Shot at.	Brk.	Shot at.	Brk.
Edmonson 160	147	Barr 100	93
Parry 160	146	Britton 100	91
Dixon 160	130	Lewis 100	81
Moller 160	127	Fuller 100	78
Alig 140	112	Golden 75	40
Neighbors 120	86		

R. R.

Northern Kentucky Gun Club.

ONLY four men were on hand for the weekly shoot on Aug. 4. Several of the regulars are out of town, and others had their fill of shooting last week, but will be on hand Aug. 11 to brush up for the tournament to be held on the 15th and 16th. Wuerdeman was high man, and Walker was second.

The club is preparing for a big crowd next week, Thursday and Friday. Two sets of traps will be used and special events provided in addition to the regular registered tournament program of ten 15-target events each day. The scores of Aug. 4 were as follows: Wuerdeman 35, Walker 34, D. K. 32, C. T. 31.

Newton Gun Club.

NEWTON, N. J., Aug. 5.—Ladies' day at the Newton Gun Club was a success, 125 ladies attending this shoot. The main attraction of the day was the team race between the Keller and Von Lengerke combination vs. the Newton Gun Club. The following are the scores:

Keller-VonLengerke.	Newton Gun Club.
T H Keller, Sr. 21	G Welsh 21
Haze Keller 21	A B Brickner 23
Harold Keller 17	E J Cahrs 22
T C Keller 20	A P Kinney 18
J Von Lengerke... 21	C B Brickner 18
E Von Lengerke . 22	W Howell 20
J Von Lengerke Jr 19-141	L M Morford 21-143
	A. B. BRICKNER, Sec'y.

Rod and Gun Club of Baltimore.

THE above named club's shoot, Saturday, Aug. 3, was held at their grounds, Highland Electric Park. The wind was very strong. The following are the scores made in a 25-bird race: H. N. Williams 20, Augustus Gross 17, R. H. Butler 18, Wm. Turner 14, Wm. A. White 14, Wm. A. Bowers 15, Wm. Murray 13, Basil Hall 12.

IVORY MADE FROM MILK.

ONE of the latest discoveries of the synthetic chemists is how to make ivory out of nothing more wonderful than cow's milk—and very good ivory at that, according to all accounts. The original idea was to use the new "ivory" for piano and organ keys because it preserves its original color indefinitely, whereas the genuine article turns yellow after a time.

But it has been found that the new product is not only an efficient substitute for ivory, but can easily be prepared so as to take the place of amber, horn, coral, celluloid and such like products, and, it is claimed, can hardly be distinguished from them.

It is in its position as a substitute for ivory that the new material has caused most surprise, however, because it has the appearance of being another instance of improving upon nature. The new ivory takes a very high and lasting polish, and probably will not lack a commercial field for itself, as natural ivory continues to grow scarcer and dearer year by year.—Allaha-bad Pioneer.

MAKE HATS FROM SOAP WEED.

MRS. AKERS, wife of a farmer in Stevens county, Kansas, is making hats from the tops of the soap weed, or yucca plant. By a process of stripping the blades of the soap weed, plaiting them together, she secures a braid as light and pliable as straw and far more durable. These braids she sews together and moulds them into hats of different sizes and shapes. Mrs. Akers has placed a number of these hats on sale with the local merchants and they have sold well.

The soap weed, which has so long been considered worthless by the farmers of the great Southwest, is rapidly coming into prominence as a valuable plant. Old and New Mexico are shipping the soap weed tops by the carload to be made into rope, and when you consider that you can cut off the tops of a soap weed every year for eighteen years without replanting, you can get some idea of the value of a soap weed farm.—Hugoton Hermes.

YACHTING NOTES.

Gold Challenge Cup.

ALEXANDRIA BAY, N. Y., Aug. 2.—Commodore Blackton's Baby Reliance, representing the Motor Boat Club of America, took the second race for the Gold Challenge cup to-day. A. Graham Miles' P. D. Q. 2d, winner of yesterday's race, finished second. P. D. Q. 2d represents the Thousand Islands Y. C. and is the defender of the trophy. John J. Ryan was at the wheel of Baby Reliance, and at the end of the first round was in the lead, P. D. Q. 2d being second.

At end of the second round, Baby Reliance and P. D. Q. 2d held the same positions, with Guess Not third. On the last lap P. D. Q. 2d gained 7s. on Baby Reliance, losing by only 20s. Baby Reliance's time for the 32 miles was 53m. 1s., almost one minute slower than the time of P. D. Q. 2d in the first race. Guess Not, owned by Harry Denny, of Watertown, was third and William Toucey's Wasp was fourth.

P. D. Q. 2d led in points with 15; Guess Not and Baby Reliance tied for second with 13 points each.

The final race to decide ownership of the gold challenge cup was won by Baby Reliance, with P. D. Q. II. second. On points this gives the cup to P. D. Q. II. by a margin of one. The handsome cup will remain the property of the Thousand Island Y. C. for whom P. D. Q. II. defended it. The summary:

	Finish.	Points.
Baby Reliance	51 55	21
P. D. Q. II.	53 34	22
Wasp	54 20	17
Guess Not	57 12	18
Mit II.	62 25	12

Philadelphia-Bermuda Race.

THAT the race is not always to the swift once more is exemplified, this time the setting being motor boats instead of turtles et al. Navigation was responsible for the less speedy finishing first in this race. Dream, smaller by ten feet, in round numbers, and receiving a time allowance of 14.14.21, finished more than 21 hours ahead of Kathemma, the bigger boat. Undoubtedly, as each boat encountered identical weather, superior navigating was responsible for the winning of Dream. The story of the race reads like a trip around the horn.

The weather was fine on the first day out, but the next morning a southwesterly gale blew up and Dream was hove to, with sea anchor and oil bag, driving into the storm all Sunday night. Three times the course was altered, Dream finally running before the storm when it let up sufficiently.

Cooking on board was impossible on Monday. No sights were taken during the day on Tuesday, but that night lunar and summer observations were obtained. On the following morning one of the logs broke and the other was lost overboard. Everything in the cabin was awash.

On Tuesday night a hurricane kept the wind to the starboard quarter and the little cruiser kept clear. The crew came near throwing the lifeboats over and two men were lashed to the wheel for sixty hours, the hatches being closed down.

Walter Bieling, one of the crew, who has been in all the previous Bermuda races, said he had never seen a crew like that of Dream. For forty-eight hours they had no food and the bilge was full of water.

Wednesday the navigators were able to find their position and headed again on the course for St. David's Head. Dream anchored outside during the night and came into harbor Thursday morning, Aug. 1. The members of the crew were tired out, but they were delighted that they had won.

Kathemma crossed the finishing line at 6:20 o'clock Aug. 1. Dr. Street says the yacht had the worst weather he ever experienced and it was impossible to get observations until Wednesday, when they were seventy miles to the

west of the islands. No one was able to remain in the cabin. The seas washed through the engine room and broke the gasoline connections. For nineteen hours the yacht was hove to with a sea anchor and oil bag out.

The race was 719 miles for Bermuda challenge trophy, which has to be won three times by the same owner to become his individual property. This is the fourth race, others having started from New York. The first race was in 1903, won by Ailsa Craig, of the Motor Boat Club of America. In 1909, Heather, of the Shelter Island Y. C., was winner, and in 1910, Eroncl, of Bensonhurst Y. C., won it. There was no race in 1911.

On Kathemma were her owner, Commodore William C. Smith, of the Ocean Gate Y. C.; Dr. C. S. Street, Dr. Eugene Swayne, R. L. Young, A. T. Rowland, Jacob Smythe, Harold

Renner, Dr. B. Christine, Frank Frankenfield, George Trembley and C. Kullum. The crew of Dream consisted of C. L. Lagen, owner; Walter M. Bieling, George E. Goldbeck, Fred D. Biddle, John J. Sproul and Thomas Larsen.

Trophies for Chicago Carnival.

A TOTAL of \$50,000 for cups and prizes alone is a single item of expense in the preparations for the great water carnival and naval display which will be held outside the port of Chicago from Aug. 10 to 17. This event, the most wonderful of its kind in the history of the Great Lakes, is being arranged under the auspices of the Associated Yacht and Power Boat Clubs of America, with the aid of the national, State and city governments. The William Wrigley, Jr., trophy, to be contested for by

high-speed power boats, is the most costly ever offered in any branch of sport. It is valued at \$22,500. It is a reproduction in silver of the famous "Flying Mercury," modeled by Giovanni da Balogna. The trophy stands five feet five inches high and the base is 47 inches in diameter. Other valuable prizes to be striven for at the carnival are the \$5,000 cup presented by Commodore S. O. Richardson, Jr., for the International Yacht Race, and the \$4,000 cup offered by Sir Thomas Lipton for the winner of the Columbia Y. C.'s race.

Canoeing

Atlantic Division Meet.

THE annual meet of the Atlantic Division was held on the grounds of the Philadelphia Canoe Club, Wissahickon, Pa., from July 3 to 7, inclusive. Although within the limits of picturesque Fairmount Park, the camp could not have been more exclusive had it been situated miles from any habitation. Wednesday afternoon found several tents pitched, and in the evening several more camps arrived, including Miss Mae Zuk and Fred Bloempot, via automobile from New York. Thursday morning all the energetic ones were mustered together for a forty mile trip up the Schuylkill River to historical Valley Forge and return in canoes and motor boats. Despite a very hot day, everyone thoroughly enjoyed the trip. In the evening an informal dance was held in the club house. The cruise up the Wissahickon Creek scheduled for Friday had to be abandoned owing to low water. Friday night was ladies' night, with another informal dance, which was well attended and enjoyed by all. Saturday morning found the camp very much astir, getting ready for the regatta. Members and visitors arrived every hour, and by the time the races were started, the club house veranda and grounds were crowded. The results of the races were as follows:

Club Fours, Double Blades.—First, Lakanoo B. C., Page, Sleeper, Gauntt, Sholl; second, Fort Washington C. C., VonDohln, Erlandsen, Molnar, Zuk. Time, 3.01.

Tandem, Single Blades.—First, Finn and Marshall, Inwood C. C.; second, Kelly and Molnar, Fort Washington C. C. Time, 4.03 2/5.

Maclister Trophy, One Man Double Blades.—First, Kelly, Fort Washington C. C.; second, Marshall, Inwood C. C. Time, 4.01.

Tail End.—First, J. R. Reeder, Yapewi A. C.; second, Sholl, Lakanoo B. C.

One Man, Single Blade.—First, Kelly, Fort Washington C. C.; second, Sleeper, Lakanoo B. C. Time, 4.01 3/5.

Tandem, Double Blades.—First, Zuk and VonDohln, Fort Washington C. C.; second, Marshall and Finn, Inwood C. C. Time, 3.30 2/5.

Club Fours, Single Blades.—First, Fort Washington C. C., Molnar, Zuk, Erlandsen, Kelly; second, Inwood C. C., Marshall, Esselborn, Berning, Finn. Time, 3.00 1/5.

The nominating committee met in the club house at 8 p. m. on Saturday, the following clubs being represented: Chippewa C. C., by Muschert; Fort Washington C. C., by Kelly and Zuk; Inwood C. C., by Marshall and Finn; Lakanoo B. C., by H. H. Baylie and E. D. Baylie; Mohawk C. C., by D. S. Hill; Philadelphia C. C., by Boon and Richards; Red Dragon C. C., by Logan and Wilson; Yapewi A. C., by Thompson and Southard. The meeting was called to order and the vice-commodore elected chairman. The following were elected: Vice-Commodore, Albert D. Berning, Inwood C. C.; Rear-Commodore, Elmer B. Ayres, Yapewi A. C.; Purser, Francis C. Buckenberger, Fort Washington C. C.; Executive Committee, Henry B. Fort, Lakanoo B. C.; Fred Smith, Knickerbocker C. C.; Frank T. Wilson, Red Dragon C. C.; Eugene C. Kelly, Fort Washington C. C.; G. Gardner Richards, Philadelphia C. C.; Member of Racing Board for three years, George P. Douglass, Knickerbocker C. C.

The camp was well attended and the following members registered: Henry B. Fort, A. D. Berning, M. E. Southard, F. T. Wilson, R. F. Tims, E. R. Coleman, V. D. Able, F. E. Altemus, H. H. Baylie, J. L. Jones, E. D. Baylie, H. L. Walker, H. L. Pollard, T. Zuk, J. Marshall, Dr. D. J. Boon, A. E. Svenson, C. M. Swart, J. W. Broomhead, T. G. Alteneder, J. A. Edgar, T. W. Cook, H. M. Hager, J. E. Thompson, E. Kerber, G. A. Barker, W. C. D. Gauntt, F. N. Thompson, F. C. Buckenberger, D. J. Finn, F. L. Muschert, E. B. Hand, E. C. Kelly, F. W.

Molnar, J. Erlandsen, A. VonDohln, H. J. Burns, F. Bloempot, F. Andreas, B. A. Sleeper, J. S. Page, R. E. Margerum, G. Esselborn, C. E. Sholl, J. H. Reeder, J. R. Reeder, C. F. Koenig, Jr., L. H. Cox, R. F. Black, W. A. Kemble, L. S. Fine, I. C. Hendrickson, W. M. Johnson, F. Gauntt, A. C. Biles, R. P. Stout, W. H. Logan, Jr., D. S. Hill, B. Margerum, Jr., W. H. Prentzel, W. A. Furman, S. L. Woodhouse, D. C. Wells, Jr.

Among the visitors registered were: Mrs. H. B. Fort, Miss Gertrude M. Fort, Mrs. J. W. Broomhead, Mrs. Wm. Walter, Miss Mae Zuk, Miss Florence Dreesbach, Miss Florence M. Henn, Mrs. J. A. Edgar, Mrs. W. J. Bachman, Miss Mildred M. Bachman, Miss L. I. Bachman, Master Osmond Broomhead, Wm. Walter, Jr., E. H. Groll, J. A. Hamilton, W. J. Bachman, W. E. Mueller. M. E. SOUTHARD, Purser.

Central Division Annual Meet.

IDEAL weather conditions greeted the loyal members of the American Canoe Association who attended the annual meet of the Central Division, held on the Allegheny River, at Verona, Pa.

The meet opened on the morning of Independence Day, July 4, and the breeze was fulsome enough to allow of a fairly good sailing race, a rather unusual condition for inland waters.

In the afternoon the program of races was carried through, a synopsis of the result being appended herewith.

Other events were pulled off during the week and a general open house for all the clubs along the river was held Saturday night closing the meet.

The annual meeting of the Central Division, A. C. A., was held at the Duquesne Canoe Club Saturday, July 6. The following were elected to be the officers of the A. C. A. Central Division for 1913:

Vice-Commodore, C. A. Spaulding, Buffalo C. C.; Rear-Commodore, Frank Graf, Algonquin C. C.; Purser, John H. Teach, Buffalo C. C.

Executive Committee.—E. H. Demmler, Duquesne C. C.; J. P. Rigsby, Sylvan C. C.; C. F. Walters, Rochester C. C.; C. H. Smith, Crescent C. C.

Racing Board.—Henry D. James, Sylvan C. C.; Lyman T. Coppins, Buffalo C. C.

Report of Regatta Committee of the Central Division of the American Canoe Association:

Committee.—Allen D. Kirk, John M. C. Price, Edw. H. Stoner, Frank Graf, Frank C. Demmler, Chairman.

Regatta held at Verona, Pa., July 4 and 6, 1912.

Central Division Trophy Sailing Race.—First, Harry D. James, Sylvan C. C.; second, R. W. Copeland, Algonquin C. C.; third, F. C. Hanker, Algonquin C. C.

Event No. 1, One-Man Single Blade Cruising Class, Quarter-Mile.—First, Earl W. Gardner, Aspinwall C. C.; second, W. H. Valiant, Algonquin C. C.; third, W. O. Amsler, Duquesne C. C.

Event No. 2, Gunwale, One-Man Single Blade Cruising.—First, Earl W. Gardner, Aspinwall C. C.; second, Alex. H. Bovard, Crescent C. C.; third, Frank Graf, Algonquin C. C.

Event No. 3, Mixed Tandem, Single Blade, Cruising Class.—First, W. O. Amsler and Mrs. Kingsland, Duquesne C. C.; second, A. Graf and Miss Parker, Algonquin C. C.

Event No. 4, Quad, Single Blade, Racing Class, Half-Mile.—First, A. Graf, F. Graf, J. G. Bunker and W. F. Hoffman, all of Algonquin C. C.; second, H. H. Martindale, Jay Moore, T. E. Simpser and A. D. Kirk, all of Sylvan C. C.; third, George Rector, E. H. Stoner, D. H. Boyd and F. C. Demmler, all of Duquesne C. C.

Event No. 5, Handle Paddle Tandem, Cruising Class, 150 Yards.—First, F. D. Newbury and J. M. Summers, Sylvan C. C.; second, J. H. McCrady and A. H. Bovard, Crescent

C. C.; third, E. H. Demmler and W. O. Amsler, Duquesne C. C.

Event No. 6, Tandem, Double Blade, Cruising Class, Half-Mile.—First, W. H. Valient and R. W. Copeland, Algonquin C. C.; second, N. B. Gardner and W. S. Sprague, Algonquin C. C.

Event No. 7, One-Man, Double Blade, Racing Class, Half-Mile.—First, W. F. Hoffman, Algonquin C. C.; second, Sidney R. Gittens, Crescent C. C.; third, F. A. Bumpers, Sylvan C. C.

Event No. 8.—Overboard, One-Man, Single Blade, 150 Yards.—First, Earl W. Gardner, Aspinwall C. C.; second, Alex. H. Bovard, Crescent C. C.

Event No. 9, Tandem, Double Blade, Racing Class, Half-Mile.—First, J. G. Bunker and Frank Graf, Algonquin C. C.; second, R. F. Gettinger and T. E. Simpser, Sylvan C. C.

Event No. 10, Tandem, Single Blade, Cruising Class, Half-Mile.—First, D. G. Fullman and C. B. Cooke, Sylvan C. C.; second, W. F. Fowler and J. M. Frazier, Sylvan C. C.; third, R. W. Copeland and W. H. Valient, Algonquin C. C.

Event No. 11, One-Man, Single Blade, Racing Class, Half-Mile.—First, E. L. Morris, Crescent C. C.; second, Frank Graf, Algonquin C. C.

Event No. 12, Tail End, One-Man, Single Blade, 150 Yards.—First, H. H. Martindale, C. C.; second, J. E. Clune, Tippy C. C.; third, J. G. Bunker, Algonquin C. C.

Event No. 13.—One-Man, Double Blade Cruising Class, Half-Mile.—First, C. C. Edmund, Duquesne C. C.; second, J. P. Riggsby, Sylvan C. C.; third, W. E. Fowler, Sylvan C. C.

Event No. 14, Tandem, Single Blade Racing Club, Half-Mile.—First, W. F. Hoffman and Arthur Graf, Algonquin C. C.; second, L. L. Wright and A. D. Kirk, Sylvan C. C.; third, E. L. Morris and A. H. Bovard, Crescent C. C.

Event No. 15, Hurry Scurry, One-Man, Single Blade, Cruising Class.—First, E. L. Morris, Crescent C. C.; second, H. H. Martindale, Sylvan C. C.; third, J. G. Bunker, Algonquin C. C.

Event No. 16, Tilting.—First, L. L. Wright and J. H. Caldwell, Sylvan C. C.; second, E. L. Morris and A. H. Bovard, Crescent.

Wants to Build a Canoe.

NEWARK, N. J., July 25.—*Editor Forest and Stream:* A young man, whose annual attack of "canoesia" is of much greater severity this season than usual, would like to hear from you or any of your readers as to the advisability of undertaking to build a sailing canoe such as described by Mr. Stephens, in his book on canoe and boat building.

Not being an experienced wood worker, we wonder whether an amateur could make a presentable job at laying the strakes and such details. As we would rather not tackle the job than to make a half way apology for a canoe, we would indeed appreciate any information you would care to favor us with.

I would also like to get an approximate cost of the material for a boat, say, 14 feet by 30 inches (decked).

BLESSEY JUE.

Maryland C. C.

THE Maryland Canoe Club held its third annual regatta and carnival on the Patapsco River, opposite its new club house on the Cromwell estate near Brooklyn, Md., last Saturday. Single, double and quadruple races were held in the afternoon. The winners of the various contests were:

Single Straightaway Race—First, C. C. Krouse; second, J. L. Botts.

Double Straightaway Race—First, Charles Winters and Lawrence Ogle; second, Leo Battes and George Parr.

Canoe Battle—Paddles of winning canoe, George Parr and Alfred Black.

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen.
Shoot well because they hold the charge compactly together at extreme ranges.
Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

TO KILL FLIES.

To clear a room of flies, pepper and sugar may be used in this way: Heat a shovel or any similar article and drop thereon pepper and white sugar, letting it dissolve. The fumes circulating through the room will kill the flies.

A cheap and perfectly reliable fly poison, one which is not dangerous to human life, is bichromate of potash in solution. Dissolve one dram, which can be bought at any drug store, in two ounces of water, and add a little sugar. Put some of this solution in shallow dishes and distribute them about the house.

Sticky fly paper and liquid poisons are among the things to use in killing flies, but the latest, cheapest and best is a solution of formalin or formaldehyde in water. A spoonful of this liquid put into a quarter of a pint of water and exposed in the room will be enough to kill all the flies.

To quickly clear the room where there are many flies, burn pyrethrum powder in the room. This stupefies the flies, when they may be swept up and burned.

"RINGERS" IN THE WEEVIL MARKET.

THE market for live boll weevils closed at Natchez recently with a total of 47,600 bought June 29, July 6 and 13, at fifty cents a hundred. These prices were paid at the Natchez cotton oil mill for weevils caught in Adams county. The oil mill, local wholesale merchants and banks, contributed the money for the purpose. It was reported that most of the insects purchased were not the genuine article, many of them having been taken from cockleburrs.—New Orleans Picayune.

THAT FISHING TRIP

The new textbooks for outdoor work and play

Requires consideration for the following recent additions to this practical series of handbooks:

FISHING KITS AND EQUIPMENTS—S. G. Camp. A complete guide to the fresh water angler on selections and purchases.

THE FINE ART OF FISHING—S. G. Camp. Includes detailed instructions in various forms of trout and bass fishing.

BACKWOODS SURGERY AND MEDICINE—Dr. C. S. Moody. For use when out of reach of doctors.

CAMP COOKERY—Horace Kephart. Selection of provisions and utensils. Food values. Preparation game, fish, beverages, desserts, etc.

Purchase from bookstores or direct at 70 cents a copy. Postage extra, 5 cents. Send for free Outing Handbook catalogue.

DO FLYING-FISH FLY?

THIS much-mooted question is discussed by William Allingham, in the Nautical Magazine. The orthodox scientific opinion is that the "wings" of the flying-fish merely serve as a parachute to sustain the fish for a brief period in the air, after he has launched himself out of the water by a powerful screw-like movement of his tail. According to this view the fish has no power of directing his flight after he has left the water. However, Mr. Allingham, who is a nautical expert attached to the British Meteorological Office and is in constant intercourse with seamen, reports many observations that tend to controvert this opinion. Certain observers claim that the wing-fins are in constant rapid vibration and seem actually to serve the purpose of flight. One vessel master watched a fish that had attained an altitude of twenty feet above the water, and was flying toward the mizzen rigging of his ship when, apparently noticing the obstruction, it changed its course about 60 degrees, crossing the vessel's stern to regain the water. Many other similar observations are mentioned. A series of cinematograph pictures might solve this question once and for all.—Scientific American.

It's Easy to Reload!

If you haven't time to cast bullets, we furnish hand made bullets for any caliber at low prices. You then merely decap and re-cap shell, insert powder and crimp shell on to bullet.

Free 160 Pages **Does it pay?** You can reload 100 .32-40 smokeless short range cartridges (buying the bullets) in half an hour at a total expense of 77c.; casting bullets yourself, 38c.; the new factory cartridges cost you \$2.52 per 100.

The Ideal Hand Book tells about reloading all rifle, pistol and shotgun ammunition; free for 3 stamps postage.

The Angler's Workshop

RODMAKING FOR BEGINNERS

By Perry D. Frazer

Every practical angler has some room, or corner of a room, that he calls his workshop, and he obtains almost as much pleasure in working in it during the winter as he derives from his summer's fishing. He may not make rods, but he likes to "fuss over them," altering them to suit his pet ideas, making necessary repairs or renewing frayed windings. Others, who have a few suitable tools—and very few are needed—make excellent fishing rods. It is really surprising how many such rods have been produced in this way since Mr. Frazer's book has been on the market.

"Rodmaking for Beginners" was not "written over the heads" of beginners. Anybody who knows how to manipulate a plane can follow the instructions, and every old angler finds useful hints in it.

Besides being the first book on practical split-bamboo rodmaking, it contains chapters on rods of all sorts, for fresh and salt water fishing, and is of value in repair work.

Cloth, 180 pages, several full-page illustrations and 60 working drawings. Postpaid, \$1.00.

The Secret

Of Many Men's Tireless Vim is an
O=P=C

Thousands of men, by their doctors' advice, wear the O-P-C suspensory.

Not for golfing, not for walking only. Most of the wearers are brain workers.

They save a fearful strain on the nerve force. They multiply their capacity. They conserve their vim.

They have made themselves tireless, efficient.

Write for our book about the O-P-C—the scientific suspensory, famous for 20 years.

It makes men optimists. It ends the "blues." It seems to create comfort, happiness and energy by simply avoiding waste. Write us now.

All druggists guarantee you satisfaction with an O-P-C. No. 2, Lisle, 75c.—No. 3, Silk, \$1.00.

Mailed direct from 43 25th St., Chicago, if your druggist will not supply you.

Bauer & Black Chicago and New York

IN SEARCH OF WOODCOCK IN CHINA.

LOOKING west from the town of Dalny, should the dust of September not shut out the view, you will descry, some four miles away, a bare hill standing apart from many other bare hills that flank the port. The Chinese call it Ta-shan (the great hill); but to the exiled Japanese, who see in its outline a resemblance to the great and sacred mountain of their own native land, it is known as the Dairen Fuji. Nobody climbs it, for a reason presently to be explained. Below it, in the valley, is a long and wide river-bed, stones only at the upper end, but near the sea mud. A miserable watercourse meanders down its length, having for tributaries one or two muddy rivulets fringed with bent grass, and in one corner of the valley is a tiny marsh. Here, in their season, you may find a few snipe, and, perhaps, an occasional duck or teal. This inviting spot I arranged to visit with a companion, L., taking with us our guns and cartridges. In the street hard by stood a "droshky," one of the many that had in palmier days belonged to Russians, but which have since, by ways devious and obscure, come into the hands of the original owners of the soil. To describe these conveyances is difficult, but their qualities may be summed up in the one adjective "negative." Once they had springs, but springs are painfully lacking now. Once they were clean; that was "lang syne," for hordes of Shantung coolies have driven and roosted in them since. Once they were drawn by well-fed, well-groomed horses; now sorry jades, fed on "kaoliang" stalks and bad straw, drag them wearily along.

There, then, the carriage stood, and, preferring the evils we knew not to those we knew, in other words, a doubtful drive to a certainly dusty tramp, into it we jumped without delay, and by its aid eventually we reached our destination. The drive was long and bone-breaking. The road, if, indeed, it was a road, ran up hill and down like a switchback railway, a switchback punctured at irregular intervals with sharp and sudden drops of alarming depth. This was where the lumbering country carts had worn the thin upper stratum of soil down to the bed rock. The shock of the drops was broken somewhat owing to the fact that invariably there lay below a deep pocket of dust. Into this we fell, and immediately, as though a shell had burst, a dense cloud rose, engulfing carriage, horses, and all. Along the level stretches of the road things were little better, for the dust lay inches deep everywhere, and our sorry nags, too tired and ill-fed to lift their feet, simply ploughed through it. Through the veil we caught occasional glimpses of the landscape—Chinese mud hovels, mangy dogs, unwashed, half naked children, and gaunt black pigs wallowing in mud, or scampering with the speed of deer across the brown stubbles. It was, indeed a long ride to Ta-shan, and joy and relief were ours when at last we emerged on the river bed itself, stony, but at least free of dust.

With a shout our driver reined up. We alighted, and picked up our guns, then, bidding him await our return, walked in the direction of a little marsh, which lay invitingly a few hundred yards further on. Very pleasant it looked in the still afternoon, with the sun shining on the pools and the lush green grass. With feelings of pleasurable anticipation, we thought of the toll levied from it on previous occasions; we reckoned on finding among its tussocks from eight to a dozen snipe, with luck perhaps even more. Alas for the vanity of human hopes! Only four birds were there, and in ten minutes all four were hanging from the game carrier. Not merely was it a poor beginning, it was likewise an evil omen for our prospects elsewhere, since experience had taught us that this was the only snipe ground in the district, and that from the tiny streams crawling through the mud and the bent grass we could hope, even with good luck, to glean no more than three or four birds. With disappointment, therefore, we turned our backs on what had been our chief hope, and plowed off slowly through the mud. Our fears were not vain. An hour's toil brought for sole reward

two snipe. There were no more. Six birds to two guns for an afternoon's shooting! It was disgusting. And the pity of it was that no other place offered in which we might retrieve our fortunes. Laothotan, another favorite resort, was at least five miles away; the upper part of the Ta-shan River bed contained only stones. It was hopeless; there was nothing for it but to go home. Thus, we grumbled as we cast our eyes around. Suddenly and simultaneously they fell on the hill of Ta-shan opposite. Its top was bare as a billiard ball; nothing was to be gained by climbing up there. But about the base were several deep gullies thickly covered with trees, the only semblance of a wood for miles around. If there were pigeons in the neighborhood we should certainly find them there. We might even put up a stray woodcock, though this was doubtful, because Dalny, with its myriad sportsmen, was too close at hand. In any case, the wood was worth exploring, and forthwith we started to explore it. Entering the first gully, we passed immediately out of the hot sunlight into the dark, cool shadow of a grove of small firs, and simultaneously there was a wild flutter of wings, and away into the gloom scurried a bird. Bang! went a gun, and down came a small brown object. We both rushed forward to pick it up. It was a little owl. We looked sheepishly at one another, then burst out laughing. There was really some excuse in the half-light for mistaking an owl for a woodcock. On we went again, owl after owl fluttering ahead of us, but never a woodcock. The gully was rapidly becoming steeper; it was hot work toiling through the undergrowth. At last, perspiring and breathless, we reached the top and open ground. A hundred and fifty yards higher up the hillside stood five or six tall firs; above them the bare rock soared into the sky. We sat on the grass to bemoan our evil fortune, and three pigeons at the same moment floated into sight and settled among those trees. My companion looked at them and sighed. "A stern chase is a long chase, particularly after a pigeon," quoth he, as I snatched up my gun and hurried off. He was right. The pigeon is a bird gifted with disagreeably acute powers of vision; it is likewise of an eminently suspicious disposition. These were no exception to the rule. They rose before I had gone 30 yards, and drifted higher up the hill, alighting finally on a bare rock, where they could easily be seen by their enemy, and, unfortunately, could equally easily see him. Nevertheless, a mean bag being an excellent incentive to effort, I panted after them, hoping against the hopeless that they might be foolish enough to allow me to come within range. With eyes glued on the birds, I pressed forward, when b-r-r-r-t, right under my feet, rose a brown bird. "Another owl!" thought I, and would not be drawn. But in the nick of time I discovered my mistake. This was no owl, but a woodcock very much alive. He was lifting to drop over a dip in the hill when I discovered my mistake. Hurriedly raising the gun to my shoulder, I fired, and, as the faint puff of smoke drifted away, an instantaneous impression was photographed on my brain of a bird disappearing at an extraordinary acute angle. I could not say he was hit, yet the final angle of his drop was so different from the initial that I felt certain I had not missed. In the meanwhile L. came hurrying up; he, too, had noticed the strange way in which the bird had dropped out of sight, and agreed with me that it must certainly be hit. Away we ran to the spot where it had vanished. Nothing was to be seen, though we searched high and low among the grass and bushes. A quarter of an hour passed in a fruitless hunt. Then, a few yards ahead of us, a cock rose without warning sound, and with a dip of a wing was out of sight behind a tree. "That," exclaimed L., "must be your bird!" Hardly had he said this when he stooped down and picked out of a tuft of grass my woodcock. Our drooping spirits thus raised, we pressed on after the second bird, hoping to put him up again; but that afternoon we were not fated to succeed, for, shout and beat the bushes as we would, he refused to be dislodged. Reluctantly we at last

abandoned the quest, and, returning to the river bed, worked the banks of a little pool we had left untouched earlier in the afternoon. Here Fortune again smiled, and a snipe and a teal were added to the bag. It was not one to boast of; but at all events we had worked hard for it, and it was better than nothing at all. The sun was now setting; it was time to think of home, so returning to our "droshky," we jogged back in the twilight to Dalny, promising each other that ere long we would without fail look again for that second woodcock.

On the following Saturday afternoon we once again found ourselves in the Ta-shan River bed. The little marsh and the streams were this time an utter failure. Only one snipe was found, but as we approached the first gully of the hill a fat woodcock flapped out into the sunlight, drifted in leisurely manner round a bend, and vanished in the covert. This was a promising augury, and in the best of spirits we set to work. It is true we had no dogs, which was a great drawback. At the same time, the area covered by the five gullies was not great, though their slopes were long and steep enough to make the quest for the birds an arduous undertaking. Among the short firs the little owls of the previous week were still present in numbers; but, taught by experience, we left them alone. Just outside their sanctuary a woodcock rose hurriedly from some long grass, and, in spite of four barrels, sailed away unhurt. We marked his line, and followed hard after him. The way led over the ridge of a gully and into a little shallow cup-like inclosure on the further side. Thick grass grew everywhere, dotted at intervals with dwarf firs or oaks, and bright sunlight filled the quiet place, making it an ideal refuge for the long-billed birds. As we looked down into it from the ridge we felt certain something would be found there. Nor were we mistaken. A big woodcock, roused from his musings by the sound of our footsteps as we brushed through the undergrowth, rose lazily in front of us, and fell an easy victim to a single barrel. Lower down were some thin, straggling bushes fringing a tiny rivulet, and there another bird was put up, and in due course shot; but a fourth, flushed among some big fir trees in the next gully, was badly missed. So we went on, toiling up and down those gullies, backwards and forward across them. We were breathless and bathed in perspiration, but the birds were there, and all the ills of the flesh were in consequence forgotten. Of the cartridges expended we carefully kept no count; but I know that one bird, which we chased from end to end of the covert, and eventually shot far away on the open hillside, must have been saluted with a dozen barrels at least. By four in the afternoon we had five birds to our credit, and were high up the steepest gully chasing the sixth, which we firmly believed to be the last the covert held, when I heard a faint shout far below. Tall trees were around us, and we could see nothing; moreover, we were too busy with our own affairs to heed extraneous matters. The shouting went on; it seemed to move from place to place; it gradually increased in volume; finally it concentrated in the very gully in which we ourselves were. At this moment we emerged from the trees, and simultaneously far down I caught the flash of steel. That could only mean one of three things—soldiers, gendarmes, or police—all three equally unwelcome. In some trepidation I wondered what it might forbode. The explanation was soon forthcoming. A figure appeared in the open; it was a policeman. He was shouting frantically and waving his arms at us. What he said could not at that distance be heard, but its purport was unmistakable. He wished us to come down at once, and, being not without experience, we thought it advisable to comply with his request. So down we scrambled. Like ourselves, he was hot and panting, but courteous and bland, which, under the circumstances, I afterward thought a matter of wonder. With ceremonious formalities he proceeded to explain that he was the police officer in charge of a large Chinese village hard by, and that, hearing the noise of much firing on this hill, he had come to see

FIELD TRIALS.

Oct. 28.—Southern Ohio Field Trial Association's second annual field trials. G. R. Harris, Sec'y, 15 West Sixth St., Cincinnati, O.

Regulating the Size of Dogs.

DR. JOHN E. MURPHY, of Chicago, one of the foremost surgeons of America, who with thirty-three members of the American Clinical and Surgical Association has been getting some new ideas on surgery in the hospitals of Germany and Austria, has this to say on the latest work in surgery as applied to regulating the size of dogs of any breed:

"We are learning much about the four mysterious glands which regulate the body's growth. The thyroid gland regulates the growth of the long bones. When these are overstimulated in youth, it causes giants; an insufficient secretion causes dwarfs. We can

LERWICK REX,

Unbeaten ch. Shetland sheep dog. Winner of King's Coronation cup at Glasgow, Scotland. Imported and owned by J. G. Sherman, of New York city.

feed dogs on the thyroid secretion, beginning on one dog the first month, on another the second month, and so on, and produce a series of dogs of perfectly graduated size. The first dog for example grows a dog and a half long and the second two dogs long. It is like a fairy story.

"Another gland is the so-called pituitary body, which regulates the growth of the wide bones. Its stimulation causes a broadening of the face, jaws and joints. Still another set of tiny glands, no larger than lentils, are attached to the outside of the thyroid gland. If these are removed, the patient dies from violent lock-jaw and convulsions. All these glands in their normal condition mutually regulate each other, a derangement of one affecting the others."

J. PIERPONT MORGAN is so generally associated with big things that it is hard to imagine him interested in so small a thing as a Pekingese, but it is none the less a fact that Mr. Morgan has an extensive kennel of these little animals in England. Recently he acquired from Mrs. Loftus Allen, Peiching Pu Yi. This dog is a son of Champion Peking Peri, while its dam is Leintwordine Fuzzie. Peiching is reputed to be at least the equal of any Peke in Mr. Morgan's kennel, which includes such blue bloods as Cragston Sing, Kwa Chao Tzu, Sing and Su, Sung, Girlie, Ching Wo, Wong Sing of Braymick, Chang and Pu Ling.

J. G. Purdy, Jr., of Morris Heights, New York city, in writing us on a business matter, says: "I do not wish to lose any numbers of the publication [FOREST AND STREAM] which I prize very highly."

Modern club house, garage, motor boats, telephone, electric lights. \$10 per week. Automobile from Annapolis. Illustrated booklet and game laws. **J. THOMPSON, Mgr., Kedgema-kooge Club, New Grafton, Nova Scotia.**

FOREST AND STREAM thoroughly appreciates the support it continually receives from its readers in its aim at a high, clean standard in its editorial, news and advertising columns.

IN SEARCH OF WOODCOCK IN CHINA.

(Continued from page 189.)

what it all meant. The following colloquy then took place:

"What are you doing here?" inquired the minister of the law.

"Shooting!" replied we.

"Shooting what?" he asked.

"Woodcock." And we held up, somewhat rashly, our victims.

"Do you not know that this is a strategic zone, and that not only is shooting forbidden here, but you are even prohibited from putting foot on this hill?"

"No, certainly not!" I replied.

"But," said he, "there is a notice yonder to that effect. And he pointed to a small white stone mark some distance away.

"There is nothing on that stone but paint," I answered.

"That is true," he retorted, "but on the other side is a small wooden post, and it is on that the notice is written."

"We have not seen it," I protested.

The policeman smiled sceptically. "Are you quite sure?" he asked. Of course we were, and, indeed, it was not till afterward that we found the post in question, a small block of square hewn wood scarcely 18 inches high and covered with Chinese characters.

"Where do you come from?" he went on.

The answer was obvious. We gave him our names, nationality, and addresses. He pricked up his ears when he heard them, reflected for a few moments, and then said:

"I am glad you are not—" and he mentioned a nationality not at that moment very amicably disposed toward his own, "for then I should have been under the painful necessity of referring your case to a higher authority. But since you are — and therefore, good friends, I will take upon myself the responsibility of letting you go without further question. But, please, don't come here again."

"Strategic zones" are not things to be lightly tampered with, and glad, therefore, were we to get off thus easily. With mutual expressions of esteem we parted, and then I understood why no one ever climbs the Dairen Fuji, and also why it holds woodcock when a town bristling with sporting guns is so near at hand.—*Karigané in the Field.*

EMERGENCY RATIONS.

"So vital is food to the existence of an army, and so closely is its activity restricted by this necessity, that any extra weight that may be left out without impairing the value of the diet is of moment," says a writer in the *Dietetic and Hygienic Gazette*. "Many years ago the English army authorities sought to solve the problem.

"At first sight it seems easy, for of the ordinary articles constituting the soldier's ration a large proportion consists of water. Much more is made up of non-nutritious substances, cellulose, etc., if these were excluded material saving in weight would be effected.

"Accordingly, the ration was, so far as could be done at that time, deprived of the non-essential elements and reduced to a cake one-eighth the bulk and weight. It was calculated that the soldier could then carry a week's rations in the same bulk as had been occupied by the allowance for a single day, and his mobility correspondingly increased.

"The trials did not result favorably, for the men looked with suspicion on the little cakes, and consumed the same bulk as that to which they had been accustomed, eating a week's rations in a single day. They asserted that they were not satisfied with the portion intended, but demanded that the stomach should be filled, as it had been by the big rations. Whether this was a truly 'physiologic need or merely a psychic one was not ascertained at the time, and the experiments seem to have stopped there.

"Some time ago an old shipmate, now on the retired list, called my attention to an 'emergency ration' prepared at the instance of

Main house, 20 rooms, 12 masters' rooms, four baths; winter lodge, 4 rooms and bath, all outbuildings, 30 acres land, 600 feet beach front, altitude 1,000 feet, unlimited supply spring water, bass, brook and lake trout fishing, deer, partridge, bear shooting in season. Ideal camp for anyone wanting high class place for private use, club or sanitarium. Apply. Pease & Elliman, No. 340 Madison avenue, City.

DUCK SHOOTING.

For Sale—Two shares in an exclusive Shooting Club. Excellent feeding grounds yield best duck shooting in America. Other game in season. For terms, apply to W. R. Bayes, 40 Wall street, New York.

the United States army authorities. This was based on the present United States army ration formula. One day's ration comes in the shape of three cakes, weighing, together, eight ounces net.

"Its components are chocolate, nucleocasein, malted milk, desiccated eggs, sugar and cocoa butter. It is put up in a tin case that may be opened without the use of an instrument, simply by pulling off a strip of tin. The label states that the contents will sustain a person (adult man, presumably) for twenty-four hours. The number of calories is in decided excess of what the average diet for a workingman requires.

"My habits being unusually sedentary I waited until I could get off to the country for a week. During this week I gave my eyes a rest, and spent the time sawing and chopping wood and similar bodily exercises, as severe and prolonged as my strength permitted. This, however, was far short of what would be demanded of a soldier on a raid, but it was the best test that offered.

"I tried living exclusively upon the emergency rations, taking each cake in a pint and a half of hot water to add the bulk, a precaution that was neglected in the experiments described by Parkes. Before the end of the week I suffered a smart attack of indigestion, evidently due to overfeeding. The ration contained more food than I could dispose of, even with the hard work.

"The cakes look and taste like the ordinary sweet chocolate of the shops. The sweetness made it rather cloying after a time; otherwise it was pleasant enough. One such experiment goes for little, but that little shows that the rations contain at least enough food value for its purpose; it surely will sustain a soldier for the period given, twenty-four hours.

"The army authorities seem to be sensitive to hostile criticism, and are careful to explain that they are not recommending these as aught but emergency rations, and by no means as a substitute for the regular food supply. They conservatively suggest that these emergency rations should be better in emergencies than no rations at all; and they are fully justified in this.

"They might go much further, and assert that when a raiding column is sent out each soldier could easily carry eight of these packets about his person without seriously adding to the burden of his equipment, and that this would enable him to keep constantly on the route without stopping to forage, or even to prepare food, as the cakes could be nibbled dry while marching.

"Of similar importance is this matter to the hunter, trapper or traveller in the frozen North, or in any part of the world, where it is necessary to carry food along, and where every useless ounce must be eliminated from the equipment. The reduction of a week's rations, full food value, to three and a half pounds would simplify many a contemplated exploration. The bulk needed to distend the stomach may be supplied by water or by chewing any non-medicinal leaves accessible.

"I understand that there has been a disposition to criticise the army people in this matter, and to charge them with an attempt to scientifically starve the soldier. That such a charge should be made by any person worthy of a hearing, or by anybody else than one who is looking for a plausible chance to find fault, seems impossible. Anyhow, war is not a matter of sentiment or of prejudice, but of cold fact; and modern war cannot afford to forego any advantage, even if slight."

SHIPMENTS FROM THE UNITED STATES

AMERICAN exports of oysters have averaged \$600,000 in value for a number of years, the amount in the fiscal year 1911 reaching \$690,268. There were increased sales of about \$100,000 to Canada, which purchased \$378,355 worth, while England took \$163,100 worth. The remainder of the exports were in small amounts to various countries throughout the world, evidently all canned oysters.

Don't Wear a Truss!

Brooks' Appliance is a new scientific discovery with automatic air cushions that draws the broken parts together and binds them as you would a broken limb. It absolutely holds firmly and comfortably and never slips, always light and cool and conforms to every movement of the body without chafing or hurting. I make it to your measure and send it to you on a strict guarantee of satisfaction or money refunded and I have put my price so low that anybody, rich or poor, can buy it. Remember, I make it to your order—send it to you

—you wear it—and if it doesn't satisfy you, you send it back to me and I will refund your money. The banks or any responsible citizen in Marshall will tell you that is the way I do business—always absolutely on the square and I have sold to thousands of people this way for the past 30 years. Remember, I use no salves, no harness, no lies, no fakes. I just give you a straight business deal at a reasonable price.

THE ANGLER'S WORKSHOP

Rodmaking for Beginners

By PERRY D. FRAZER

Not only Americans, but anglers of Great Britain and nearly every European State, South Africa, Australia, Canada, are making their fishing rods under the simple instructions laid down by the author in this useful little manual. A Japanese, after reading the book took up rod repairing for his fellow countrymen as a business. An Englishman followed it in making several of the sixty-five rods that he has in his collection. A Russian appreciated the book so much that he suggested a Russian translation. The British sportsmen's papers have quoted from it time and time again. In that country it has helped bring about a great change in rod types, and to attract attention to the excellence of American fishing rods. In fact "Rodmaking for Beginners" has become the standard manual wherever fishing with rod and reel is practiced.

The reason is obvious. The book is written in plain English, and all the details are set down so simply that a boy can follow them. All of the types of rods used on fresh and salt water are described and specifications given. Separate chapters cover all details, and the one on split cane rodmaking is the only comprehensive treatise on that subject ever published.

Cloth, 180 pages, four full-page illustrations, 60 working drawings, making plain every feature of the text. Postpaid, \$1.00.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK

AFRICAN WILD DOGS.

THERE is no wild animal in Africa which deals out such wholesale destruction to certain kinds of game as the hunting dog. Leopards have been known to be chased up trees; hyenas have been found in process of being mobbed to death; the lion himself, when found solitary, is sometimes pursued by a pack.

Bush pirate and Ishmael, as he is, strangely enough toward man, the hunting dog seems to betray little or no aggressive tendency.

Wandering about in bands over huge areas of wild country, and seldom remaining more than a few days in any one locality, the hunting dog is probably less frequently encountered than any other kind of carnivore, and therefore in less degree than any other has he experience of man and his ways. There is at least no doubt that when this experience has been acquired, few creatures show more haste in escaping from man's presence or display more intelligence in doing so. But if there is little ground of complaint against him as regards man personally, it is a very different matter where the latter's flocks and herds are concerned.

When the farmer first begins to graze his sheep in a wild country, one of the chief, if not the most dangerous, of his enemies is the hunting dog. Sweeping down upon a flock, a pack of these animals will in a very few minutes entirely annihilate it, killing and rending apparently for the mere pleasure of doing so, and then, having completed the slaughter, will probably be miles away, wreaking the same destruction elsewhere, ere the irate owner and his friends have time to arrive upon the scene.

A long crusade against them in Cape Colony resulted at length in their virtual extinction in the settled parts, but in all the wilder corners of South Africa the same thing still goes on, and raids upon small herds of native goats and sheep are everywhere, where these pests exist, of constant occurrence.—Blackwood's Magazine.

RESTRICTIONS ON IMPORTED GOOSE-BERRIES.

VICE-CONSUL JAMES FISHER, of Hull, says: "In order to prevent the spread of American gooseberry mildew, the Board of Agriculture has issued an order containing the following provisions: The landing in England or Wales of any gooseberries brought from any place outside Great Britain (except the Channel Islands) is prohibited, except where there is attached to the package in which the fruit is imported a label bearing the words 'Imported gooseberries,' and stating the name of the consignor and the country and district in which the fruit was produced. The label must not be erased or obliterated, or detached from the package so long as any of the imported gooseberries remain therein."

FOOD VALUE OF COTTON SEED.

It is interesting to recall in the light of what has since been done that it is less than thirty years ago that a M. Sace read a paper before the Academy of Sciences in Paris, having for its subject the food value of cotton seed.

He claimed as a new discovery that this seed was the richest in nitrogenous substances of any grain and claimed to have produced from it by milling 56½ per cent. of yellow meal, 40½ per cent. of bran and 3 per cent. only of waste. His prophecy was that cotton seed flour would become a staple in the world's food supply.

DOMESTICATED ELEPHANTS IN SIAM.

THE number of tame elephants in Siam is estimated at 3,000. These animals give most valuable services, and it is greatly to be regretted that they are diminishing in numbers. As a consequence of this their price is increasing. At the present time a male fetches about \$2,500 and a female \$1,800. The elephant is mature at twenty-five, reaches its full vigor at thirty-five, and lives to an age of eighty-five to a hundred and ten years.—Cosmos.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth. 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose; Mountain Sheep; Game Refuges, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00.

An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00.

A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

"The Long Shooters" and the Origin of 300 Yards Revolver Shooting. (New.)

By Wm. Brent Altsheler. Price 75 cents. Postage 4 cents extra.

Interesting alike to civilian and soldier, amateur and professional. A neatly bound volume; illustrated from photographs of shooters and shooting scenes.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth. 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

THE CAMPER'S OWN BOOK

A Handy Book for Devotees of Tent and Trail

This is that BIG little book of the open—America's new outdoor annual. It comes to you bound as you see here. It is "woody" from cover to cover—stirred by lake-breezes and redolent of pine.

Authors of country-wide repute have, with their enthusiasm and familiar knowledge, aided its making. Stewart Edward White, Edward Breck, Frank A. Bates, Charles Bradford, F. C. Selous—these and others join this camp-fire council. They say their say about a hundred little practical details that hold close interest for you; and they spin a yarn or two by the way.

"The Camper's Own Book" measures 8x5½ inches over all. It is a goodly generous volume, with 194 pages handsomely set in Scotch-Roman type, and 13 of the finest illustrations you've ever seen. Everybody should have a copy who believes that a day under the free sky makes the pomp of emperors ridiculous. And you're one—you know you are.

PRICES PER) In the appropriate green T-cloth \$1.00

A PROBLEM'S SOLUTION

Log Cabins and Cottages; How to Build and Furnish Them

A reasonable book when all minds are bent on the problem of getting close to nature. Mr. Wicks in this delightful book offers timely advice to every one who wants to build a simple summer home at one with its surroundings of wood or stream or shore.

This is a thoroughly practical work, treating of the how, the where, and the with what of camp building and furnishing. It is helpful, too, in regard to furnishing, and withal a most beautiful work. *Cloth, profusely illustrated, \$1.50 postpaid.*

Through Unexplored Guerrero

By PROF. WILLIAM NIVEN

Chapter II.—The City of the Dead

HAVING located the largest ruin, in point of area, at least, in the New World, on my first trip, I must now beg the reader's permission to carry him with me on the third trip into Guerrero. On the first trip I had not the time to make thorough explorations of the great discovery. On my second trip I went as a mining expert and paid little or no attention to archaeology; in fact, my business on this occasion did not lead me in the direction of the ruined city.

But on my third trip into the land of mystery I started from New York as the representative of Morris K. Jesup, now dead, who was at that time president of the American Museum of Natural History. To-day, the most valuable of my finds are in the Jesup collection of Mexican antiquities in that museum, together with a large number in the Peabody Museum at Harvard University, Cambridge, Mass. Others are in the Archaeological Museum of the Canadian Institute, Toronto.

Hastening to Mexico from New York, I secured a concession to explore 7,000 square miles of the State of Guerrero for archaeological and ethnological remains. Thus prepared and provided with a first-class camping outfit, as well as cameras and 500 photographic plates—from which most of the photographs illustrating this article were made—I again entered Guerrero, bound for Yerbabuena, ghost-haunted and filled with evil spirits if the natives of the surrounding region were to be believed.

July 29, 1893, I began the journey which lasted four months, and which resulted in what I believe to have been the greatest and most important archaeological discoveries since white men for the first time gazed on Mitla and Palenque. We—myself, a faithful Indian servant, who had been in my employ for five years, and a muleteer, mounted on three good mules and with four pack animals, made the start from Cuautla, in the State of Morelos, arriving in Iguala the second day and reaching Tepecoacuilco as our next stop. This town lies in a rich sugar district and has a population of about 2,000 souls. The famous patriot and priest, Morelos, was imprisoned here just before his execution. The town boasts of an imposing church, a relic of its one-time grandeur, for Tepecoacuilco was a thriving city 200 years ago.

Two days' ride further brought us to the town of Oapan, where we crossed the swiftly-flowing Balsas River on balsas, or rafts. These fragile looking craft are made of flat floors of

cane or bamboo, lashed to hollow, sealed calabashes. After the pack has been deposited in the center of the raft, and the whole affair balanced in the water, the passenger takes his seat, finding that the water reaches to within an inch of himself and his pack. The place for crossing is chosen near a bend in the river, and when clear of the current, the Indian ferrymen swim behind and push the raft with its load across the stream. The mules are forced to swim, each being guided by an Indian, who sometimes rides the swimming animal and sometimes swims beside it. If the river is not in flood, and no driftwood is passing, there is little if any danger, but if a log strikes the frail raft, the pack is almost certain to be lost, and the passenger is lucky if he escapes without a good wetting at least.

Our next camp was at Ahuehuepan, and the reader who follows us on the map of Guerrero must by this time have noticed that on this third trip I went into the ruins from a different direction from that followed on the first trip. Ahuehuepan is a small town, situated near the summit

of a rugged hill of considerable size. We pitched our tent near the plaza, and at night the Indian natives, men, women and children, to the number of about 200 formed in one of the strangest processions I ever gazed upon. Each carried a lighted candle and the procession was led by eight stalwart peons bearing shoulder high a life-size figure of the Virgin Mary. Round and round the plaza they marched, until nearly midnight, singing and shouting out their prayers, wildly imploring the One God, and whatever other gods may have been left in their imagination, to save their famishing crops by sending rain. The clanging of bells, beating of drums, shrieks of the marchers and the repeated firing of guns and glare of rockets combined to make a scene of excitement and pandemonium for which it would be difficult to find a fitting simile.

On the following morning I learned from my servant that our visit had not been regarded favorably by the chief of the village. This worthy had declared that the idols and other

FIRST TRACE OF RUINS WHICH LED TO DISCOVERY OF THE BURIED CITIES OF GUERRERO.

objects, of which we had come in search, were highly treasured by the Indians who believed, as did their fathers, that they were the images of the gods of the air. The chief commanded all his Indians to refuse to lend us any assistance in digging into the mounds or other prehistoric remains scattered thickly about this village. He also hinted that we were spies, and would report the procession of the night before, which had been held contrary to law, to the authorities in Mexico City.

We replied to the chief, at a formal meeting with him, exhibiting my concession and otherwise showing evidences of our exact intentions, but he professed not to believe us, and even went so far as to order his townspeople to sell us no corn, and if possible to avoid it, not even to let us have water for ourselves or for our animals. I left the inhospitable village, therefore, and after a day's steady riding across hills and barrancas, arrived again at Xochipala, the town from which I had started on the memorable trip four years before, the trip on which I had found the vast ruins of Yerbabuena. Here we were received like long lost brothers by the chief, who immediately provided us with the same guide I had had on the previous journey, and who promised to go through the entire length and breadth of the ruins, ghosts or no ghosts.

When we arrived at Xochipala, a monster dance, in which practically every inhabitant of the village was taking part, was in full swing. Some clad fantastically in the skins of animals and some in tight-fitting trousers or loose-flowing skirts, according to their sex, they moved first in great slow circles about the plaza, chanting an Indian song handed down to them from generations of dancers long since dead. My servant, who was a native of Guerrero, and who spoke the Indian language fluently, informed me that the ceremony was in honor of a princess who had died, and whose body had disappeared mysteriously a short time after death. I speak of chiefs and princesses in this Republic of Mexico, but it must be remembered that these tribes of Indians scattered through the heart of wild Guerrero know no law but the word of their chief, having no knowledge of and caring less for the Government in Mexico City than an American does for the laws of the Chinese Empire.

As a feature of the finale, a comely Indian girl, resplendent in colored paper ribbons, rushed about among the dancers, touching here one and there one, apparently conferring some honor, for each of these so touched immediately went forward and prostrated himself or herself before the chief, who sat on a raised seat above the dancers. Then there was more dancing, but of a less formal nature, and about midnight the church bells rang out, there was a great beating of drums, blowing of horns and firing of rockets and everybody went home.

Again we slept in the court house or jail of Xochipala, and early in the morning found our old guide waiting for us. Almost with the sun we were off in the direction of the ruins, and after half a day's easy riding, arrived at the edge of what must have been a series of connected towns, all of one nation, all prepared for defense against some hostile foe, and once embracing, at a conservative estimate, at least one million human beings.

Broken walls, ruined buildings, huge in size beyond comprehension, unless actually seen by

CITY OF TIXTLA, GUERRERO, ANCIENT CAPITAL OF STATE.

the reader, marked the slopes as far as the eye could reach. Once this was a rolling plateau, dropping gently away from the mountain wall, but now it is cut into giant ridges by gorges from 200 to 1000 feet deep—gorges whose sides are scarred with broken buildings, ridges covered with ruins of great houses, some of them larger than those of Mitla, and many grander in size than any now standing in Mexico City.

Our journey was a rough one, but eventually we found the old trail I had followed four years before, and once on that we found the way becoming easier on both mules and men. Presently as we began to draw near the great mass of decaying grandeur that once formed the ancient metropolis itself, I for the second time got a good view of the ruins. They seemed to me even more wonderful than before. It must have been an immense nation that once dwelt here, and this city, or chain of cities, or district, or feudal estate, as you may wish to call it, must have been fully as large as Babylon, or Thebes, or Memphis, or other famous cities of remote antiquity. Its buildings, save those that had been erected on the tops of huge pyramidal bases, were of rather low construction, but so massive as to give the idea of fortresses rather than homes.

As we journeyed along through the tangled underbrush we could see the faint outlines of a great mass of ruins that slept majestically in its age-old bed on the plain some distance ahead of us. This I afterward learned was an enormous arched door or gateway, and it seems probable that at one time it was one of the main entrances, possibly the main entrance to the city. It is made of great, unhewn stones, piled closely and held in place by a white cement. I noted particularly that this binding material, this primitive concrete, was white, for the ruins at Mitla, Palenque and San Juan de Teotihuacan show only black cement. This to me seems to be one of the little signboards to the great fact that the

civilization of the builders of Yerbabuena was greater than that of any other prehistoric tribe of Mexico, not even excluding the Aztecs.

A few minutes before the sun sank behind the serrated crest of the mountain wall, we reached the first of the crumbling structures, clambered over masses of fallen stone, mounted a little hill, and looked out over the remains of a fallen nation whose grandeur probably was to the New World what Rome was to the Old.

After viewing the mile on mile of shattered buildings, the remnants of palaces and temples and fortresses and homes, I descended to the ruins of a temple fully 600 feet long by 200 feet wide, and ordered the making of a permanent camp. There the tent was pitched, and there, after a supper of tortillas and cold beans, and fresh fried deer meat, cut from a haunch of venison supplied us by the chief ere we left Xochipala, I rolled in my blankets, never to wake until the sun was turning the white walls of the temple a rosy pink next morning.

Then I began explorations in earnest. With my men I came on ruined walls, foundations of huge buildings fast crumbling to decay, all of which I believe will be mere piles of dust within the next century. We found walls twenty and thirty feet high which had sunk straight down into the earth until only two or three feet remained above the surface of the ground. Many of the houses of which these walls had once been parts were forty to fifty feet wide and one hundred feet long, facing on streets which had once been well paved, all laid out in regular rows across the rolling plateau whereon the primitive architects of the long ago had built the homes of their nation.

We made a general survey of the place, seeking the best and most promising location to begin operations, finally choosing the interior of another large temple which measured 300 by 200 feet, inside measurement. In the center of this

LAI-D-STONE ALTAR INSIDE RUINED TEMPLE, AT YERBABUENA, PROBABLY USED FOR FIRE OFFERINGS.

we found a huge altar of solid masonry fifteen feet square by twenty feet high, and in a remarkably good state of preservation. Later we found many such altars scattered through the fifty miles or more of ruins. They appear to have been used for sacrificial purposes, and some of them are built upon the very apex of huge pyramidal sites, evidently constructed solely for their foundation.

At each corner of the foundations of the large building just mentioned we found circular towers six feet in thickness and most remarkably designed. We endeavored to take photographs of them, but owing to the great number of trees and the heavy tropical underbrush growing all over the ruins, we found it impossible to show them as they really appeared. Forty miles in front of us, along the mountain slope, extended the ruined city, while its buildings ran in solid mass of six miles on either side. I estimated there were three hundred square miles of ruins in the heart of this tract, with another hundred and fifty or two hundred square miles of buildings which had once stood on the present sites of the great gorges. Undoubtedly this is the ruin of the largest, most civilized and most important of all the prehistoric tribes that peopled Mexico's populous past.

Temples were thickly scattered through this ruined city, all built on more or less the same plan, and all showing evidences of massive construction. I chose the best preserved of these and ordered my men to dig a trench around the base of the large altar which stood in the center. On the old limestone floor at the base of the altar, several feet beneath the present surface of the ground, we found the trench leading from the altar, about three inches deep and five or six inches wide, stained a deep red by the blood of countless victims which had flowed down it. Whether these sacrificial victims were human or animal it was impossible to learn, and I doubt

if even analysis of the blood would have showed to a certainty, so old were the stains.

Gathered in the trench and in little depressions in the floor about the altar, we found wonderfully carved jade beads. We also found two diorite chisels. This stone is often confused with jade, but is not the original translucent jade which has been found so far in Mexico only in the forms of artifacts left by the vanished races.

Some distance beyond this we came on an immense wall, rising thirty feet into the air, and evidently part of an enormous palace or temple. Remains of this wall still endured for more than 200 feet, and digging under one side we were fortunate enough, after a day's hard labor, to come on a large underground chamber, probably the most important find of the entire visit. Stone in the wall of this building was cut in blocks twelve by eighteen inches, and laid in even lines in the same white cement which I had noted in other parts of the ruins.

After effecting an opening, we found ourselves in an immense circular chamber, the walls of which were well plastered with a white cement which had been painted red, still retaining its color in almost pristine brightness. A number of fragments of timber, now turned to tinder, were lying on the floor, while under the dust of centuries were numbers of beads, stone knives, small idols and fragments of greater images. The roof, without arch or other support, remained standing firm as ever, while in the center was a long, carved altar of green diorite, a priceless thing, the weight of which we could only estimate at several tons. All along its sides, ends and on the top were carvings, depicting scenes in the religious life of the people and in the daily exercises of the priests. To me, looking back at this great monolith, which still sleeps in the subterranean chamber, it appears comparable with the great calendar stone of the

Aztecs, and is possibly of greater import, if its hieroglyphics only could be translated into some modern tongue.

From this chamber we passed to another and smaller one, less well kept, but apparently once the burial place of the priests. Here we found innumerable skeletons, all unadorned with beads or other ornaments, giving rise to the idea that they had been priests in life. Had they been warriors, or even common people of the city, they must have worn ornaments of some kind, and these would have been buried with them. No idols were found in this room, but returning to the other and larger chamber we took out more than seventy images, masks and idols in perfect condition.

All made of diorite, some green, some gray, these idols are of various shapes and sizes, but all, no matter how weirdly shaped, show strivings after the human form. Some are fairly well proportioned, while others are of the most hideous conception, with huge heads and abnormally long faces. Others again have small bodies and exceedingly large legs, each leg being almost as large as the trunk of the body. Then there are still others with small heads, small legs and great, wide bodies; yet others, evidently patterned after the human form, bear not the slightest resemblance to any races of men known to-day. Some are hunchbacks and others are grotesques, cartoons in stone from the hand of some humorous Phidias of a bygone day.

About a mile south from this chamber, passing over myriads of ruined homes of the people of this nation, is an immense mound which rises abruptly from the valley and is one of the most noticeable of the ruined piles. This contains dozens of chambers, and was evidently the home of the priests, a sort of community house. Into a few of these we entered and found in the smallest a number of jade and serpentine beads. Possibly they were from rosaries, or some similar instrument for worship, though of course these people knew nothing of Catholic ceremonies. The beads are genuine Chinese jade, altogether different from the jade of Mexico, and seem to prove that at some time or other the people of this city and nation had some sort of connection with the natives of the far western rim of the Pacific ocean.

Some little distance southeast of this ruined building are two interesting pyramids, each more than sixty feet in height and covering nearly equal areas, about 150 by 250 feet, I should say, from hurried measurements. These pyramids are rich in treasure in the shape of personal ornaments of stone, diorite, serpentine and terra cotta as well as clay which has metamorphosed to stone in the centuries which have passed.

I believe these pyramids were burial places, as we found passageways to the interior and large chambers inside, filled with dust and crumbling bones amid which were countless ornaments; so many of them that we tired of the search and returned to the outer air for lunch on the day which we had devoted to the pyramids. Just as we stepped out we were startled by a series of grunts and squeals, and there, not fifty feet away, was a drove of wild pigs, the peccaries of South American forests, here known as javelins, pronounced "hah-vey-leen." They did not run, but fully one hundred strong stood their ground, their thin lips drawn back over long yellow teeth

(Continued on page 221.)

Camping in the Blue Ridge Mountains

By FRANK W. BICKNELL

Photographs by the Author.

YES, we've succumbed to the wiles of your letters and pictures," wrote my friend the lawyer, "and the Squaw and I will meet you as directed at Linville Falls Station Aug. 3, and we don't really have to get back to this infernal grind before the first week in September. Have everything ready for the camp—I'm bringing an amazing stock of tackle and little comforts. You just lead the way, give us a few days to get in form, and we'll be game

HANGING ROCK.

for all the mountain climbing and gorge traveling you can show us."

Four congenial spirits, tried by several camping trips together, two couples whom six weeks on the tented trail still left good friends, we met for this Blue Ridge Mountain tour prepared to absorb all its beauty and partake of its "classy" sport to the utmost.

Leaving New York at 4 P. M., Linville Falls Station is reached at 3 P. M. next day. This new crossing of the Blue Ridge, built primarily as a coal carrier from the Virginia fields, has brought this glorious region, so aptly characterized as a human repair shop, closer to the outside world, from which it has been hidden away in undeveloped isolation. Incidentally it has opened to the view of the traveler the grandest mountain views east of the Rockies, including Mt. Mitchell (altitude 6711 feet), highest of peaks in Eastern America, and hundreds of other high mountains in all directions. The railway crosses the Blue Ridge in nineteen tunnels and several loops. It is

now building across the Cumberland Mountains to connect with the railroad at Elkhorn City, Ky., when it will offer the Northern visitor to Southern climes more mountain scenery than he can see on any other route.

The ascent to Linville Falls village is most comfortably made on muleback, while a wagon hauls the camp equipment up the mountain. This six-mile ride up the picturesque cañon of the North Fork of the Catawba, between Linville and Humpback mountains, was an appetizing introduction to the rich flora, the rugged scenery, the pure water and invigorating atmosphere of the Western North Carolina mountains. Springs on one side of the road and the rushing, tumbling stream on the other gave us refreshment and the wild music we came to hear. Climbing from the station 1,800 feet of altitude to the top of Linville (3,300 feet), we felt that we had made no mistake in doing that which the unknowing had thought so queer, "going south for the summer." The fresh, cool air was equal in all the qualities sought by the city sufferer from heat and vitiated lung food to the Rocky Mountain article that is found only above 6,000 or 7,000 feet. These high altitudes had proved too great a stimulant for one of us, who was delighted to find here in the Blue Ridge all the benefits and none of the ills of the higher Rockies.

Experience had taught us that a leisurely made camp is more popular with its inhabitants than the makeshift flung together in the dark, so the first night we enjoyed the hospitality of one of the mountain boarding houses, where we learned much to our advantage. Except to say that we went in for simplicity and that we found the essentials of wood and water easy to secure, I need not go into the details of our camp. We "lived off the country" and its delicious fresh fruits, vegetables and trout, bringing only a few condensed foods and relying on the village store for most of our staples.

Making the acquaintance of our guide, getting a glimpse of the falls and a peep down into the deep Linville River gorge, planning the best use of the two weeks we had allotted to this place, and our first day was gone. It was big with promise of things worth seeing and doing. First we were to take a preliminary survey, get the "lay of the land," take in some of the best views from the rim of the cañon (summit of Linville Mountain) and harden our muscles for climbing. At frequent points for fifteen miles along the top of Linville one looks down into the deep, rocky gorge of Linville River, 1,000 to 2,000 feet below, across to Gingercake, Hawksbill, Table Rock, Chimney and Short-off mountains. The stream seems very small from these heights and the huge rocks that block its way mere stepping-stones, but a closer acquaintance increased our respect for them. The high cliffs that have contributed the rocks that turn the river this way and that, have eroded and formed soil,

fertilized by humus, till the steep, often precipitous sides of the cañon are covered with a dense growth of kalmia, rhododendrons, hemlocks and pines, besides a bewildering variety of deciduous trees and shrubs. This is a botanist's paradise, for more different trees, shrubs and plants may be found here than in any other area of equal size in North America. Underneath, overhead, far away and all about us we found the works of nature worth the attention and admiration of seasoned travelers. Clouds

ENTERING BABEL TOWER GORGE.

from the ocean bumped against the cool air of the mountains, and spilled their contents in half an hour to clear the atmosphere and reveal distant mountains. A few days of this climbing prepared us for the serious business of going into the gorge and following the river in its tortuous way between the mountains. We wanted some of the rainbow trout and the sport of taking them, but most of all we wanted to see the river, said by the United States Geological Survey explorers to be "the wildest and most picturesque in the Appalachians."

The mountain people looked with skeptical astonishment upon our proposition to take "the squaws" along, but these "squaws" said they could do it if their fat old "bucks" could. Charley, our clever guide, reckoned he could get us all through if we would do as he said and give him time. The first three miles of the river below the falls gave us practice and encouragement, for though it seemed hard enough for us at first, Charley assured us that it didn't compare in beauty with the lower

gorge, and that we did not begin to see any roughness till we got down below "this easy part." Three days we explored, fished and photographed this section of the river and were able to climb out each night to our comfortable camp. Wading, climbing rocks and cliffs to avoid deep holes, passing many beautiful little cascades, we found the trout below. We soon learned that he who has been successful with brook trout has to learn his art all over again when he matches it against the rainbow, but with Charley's help we tuned our song to the undoing of all the fish we could eat.

A day's rest and we were ready for the really big undertaking, the camp in the lower gorge, the farewell to all but stern necessities, for the load must be packed four miles out on the mountain and thence a mile and a half down a steep trail to the river. Here a headquarters camp was made, a bed of leaves and hemlock boughs, with great hemlocks overhead. We might have had a small army of men carry tents and beds and other comforts in, but we were out to rough it, so held ourselves down to the lightest load we dared. With camera and plates this gave three men all they could "tote." Near by was a "rock house," that is a cave, for shelter if we needed it, but we did not. Now we began to see the real wild beauty that had been promised us, where we were assured no woman had ever traveled before. For the sake of the "squaws" Charley built bridges of driftwood over some of the worst crossings.

Starting at six or seven in the morning, in the shade of the cliffs, we explored the river up and down for four days. The fish were larger than they were above, and light tackle went away with some of them. Here we enjoyed to the full that choicest of piscatorial delicacies, a perfectly fresh fish roasted on a forked stick over hardwood coals. No restaurant can equal it, nor does the high-salaried chef have the compliment of such appetites as surrounded the camp-fire. Over, under and around gigantic rocks hurled down from cliffs above, often scaling a cliff to get around an unsounded pool with perpendicular sides, taking long detours to portage a cascade, often the water, cool and refreshing, was the easiest place to travel. Choked in narrow chasms, swift and terrible to cross, the river invited us to match our strength against its force, for occasionally it was either that or a long, hot climb. Above us on both sides rose the great ragged walls of the gorge, sometimes 800 feet without a foothold, thence by easy stages a mile, perhaps a mile and a half, to the rim of the cañon. Everywhere cascades and rapids, now and then a still, long pool, inviting the swimmer and the angler. Charley knew the best of these, and after we recognized the strength of the gamey, flashing beauties we were dealing with, we brought a few to net. In one such hole, small but very deep, and sheltered, the very rare treat of catching a cold-water eel was ours. Now if you have never eaten an eel taken from cold, swift water you do not know much about eels, for to my notion the meat is better than anything short of bass or speckled trout. It is no more like the eel from warm, sluggish water than a sucker is like a bass.

Now we cut loose from our base, took what we could carry and started up the river to camp one night and be ready for the most daring of

all our adventures, going through the Babel Tower gorge. This is a loop of Linville River something over half a mile long. Deep pools, bounded by smooth walls, occasionally a shelf or foot- or hand-hold for the person who knows just where they are, avoided by even the hardest mountain fishermen, this dark and dangerous passage tempted us more than anything else, after we had been told all about its terrors. For the "squaws" to earn the honor of being the first women through it meant that they must discard the short skirts they had so far been able to wear and do this day's work in stout duck trousers. Wading to the waist, climbing straight up and down and crawling along a shelf a foot wide is not business for skirts. Beginning in a pretty cascade with a wide, deep pool below it, this seldom visited wonder ends below in a long, narrow, still pool

"AN EASY BIT OF THE CANYON."

between perpendicular walls of such height that they seem to meet above and form a cave, so dark is the place, except at midday. The easy way is to swim it, but it can be penetrated by wading and climbing if one knows where to take each step at the critical points. Most of its length this gorge contributes its full share to the river's fall of 1,800 feet in the first ten miles below the falls. With careful guide, rope for emergencies, fresh hob-nails and stout pole for water travel, this day was one of pure delight, surpassing in interest, for it was wholly unlike anything we had experienced in Rockies, Andes and Appalachians. Whoever is fit to camp in the mountains may be guaranteed new thrills by following our trail. Back to our comfortable Linville Falls camp that night, hot water and dry clothes restored us for further expeditions.

Meaning to spend only two weeks with Linville River and mountain, we stretched it to nearly three with horseback rides and

tramps to not-far views that were constantly being suggested and found worth while. With a last day and night on the river, sleeping on a great flat rock on cucumber tree leaves to the tune of broiled trout and the gentle lullaby of the passing stream and with a luxurious camp-fire all night before us, we bade a reluctant *au revoir* to Linville Falls. We might have lingered on there for weeks without seeing half its attractions, but we decided to come again in June, when the rhododendron, kalmia, azalea, tulip tree and other blooms are at their best.

Past the pretty resort colony of Linville, at the foot of Grandfather Mountain, fourteen miles north of Linville Falls, we pushed on to a camping place near the summit, for we wanted the solitude of this rugged old gray-head and the sunrise from his 5,964 feet of altitude. In passing the gay summer hotel, with its dressy spenders adorning its porches, we all agreed that we would not exchange our real vacation for one that requires frequent change of costume, course dinners and golf to make it complete. The summit of the Grandfather offers one of those bewildering, sea-like views, where countless ranges and ridges roll away in the blue-hazy distance like the waves of the ocean. In every direction, but toward the northwest this misty multiplicity of mountains is spread before us, but the sunset absorbed all the color, it seemed, for there was little left for the morning. The mountain itself, its great bare top suggesting the Rockies, is more interesting than the view it affords, though a good glass and a knowledge of the geography of the region give it high claims as a lookout.

Winding around the Grandfather is the famous Yonahlossee road, twenty miles from Linville to Blowing Rock. This first-class turnpike, wide and well kept clay-gravel surface, is one of the most delightful and picturesque drives in America. Bordered by rich flora, commanding many fine views, crossing several crystal streams, it will form an important link in the crest of the Blue Ridge Highway, now building from Altapass, on the railway via Linville Falls to Linville. This highway will ultimately run along the crest of the Blue Ridge from Asheville, N. C., to Roanoke, Va. It is being built on a maximum of 4½ per cent. grade, twenty-four feet wide, thoroughly first-class for automobile travel.

At Blowing Rock is one view, but it is "a whale of a view," as the lawyer remarked. From an overhanging cliff one looks out over a great horseshoe of mountains 250 miles to the southwest, and just below lies the beautiful valley of the Johns River. Blowing Rock is 4,000 feet above the sea and is a popular resort. "For those that like that sort of thing, that is the sort of thing they would like." It was too noisy for us, so we did not linger long and took to the road and in twenty-three miles were at the railway at Lenoir, fit for battle with the world again.

Shore Birds on Long Island.

THE season opened on Long Island on August 1 on shore birds, snipe, plover, surf birds, sandpipers, tatlars and curlew.

THE weekly outdoor magazine is the most current. FOREST AND STREAM is a weekly.

The Duties of Game Protectors

By T. S. PALMER, Assistant Chief, U. S. Biological Survey

Read at Annual Convention of Game Protectors of New York State.

(Concluded from page 171.)

FIRST and foremost is a duty of education in making the law more generally known and clearly understood. No State has yet solved the difficult problem of popularizing the game laws. Distributing copies of the law with every license, providing convenient summaries of the more important features, calling attention to it through the press, posting notices in public places, translating summaries in foreign languages for the benefit of hunters ignorant of English—these and other expedients reach certain classes of people, but all combined fail to reach a considerable part of the public. Many points in the law are ambiguous, but some have been cleared up by judicial decisions, and others by departmental regulations and precedents. It is doubly important that all possible light should be shed on these doubtful passages. Here is where the game protector can perform invaluable service by circulating copies of the law, summaries or posters; by securing publication in the press of timely notices of changes in the statutes, the opening or closing of seasons or matters of general interest, and by personal contact in explaining or furnishing information whenever opportunity offers. In this way he will soon come to be regarded as the friend and adviser, instead of, as too often happens, the enemy and persecutor of the hunter or fisherman.

Not less important is the protector's duty in the matter of increasing the supply of fish and game. True, in enforcing the law strictly he directly decreases destruction, and he may on occasion be called on to distribute pheasant eggs, plant fish, or put out game birds of various kinds. But the opportunities which will come to him in the daily performance of his duties, will, if improved, do far more to increase the game than any of the prescribed methods just mentioned. He can feed certain kinds of game in severe weather in winter or better yet, interest farmers and others to put out food for birds on their own land. He can see that water is provided for birds at suitable places in hot weather; that valuable birds are not ignorantly destroyed on account of alleged damage to crops; that dogs running deer, cats destroying birds and other enemies of game receive more than ordinary attention; and that persons interested in feeding, attracting or introducing game, are put in the way of obtaining necessary information and are encouraged to persevere in their experiments. These and similar activities will popularize the service and make its work more satisfactory to the people.

Even more important is provision for the future by moulding public opinion in favor of needed reforms, improved methods, or new lines of conservation. Through daily contact with actual conditions the protector will soon discover weaknesses in the law which require amendment. By intercourse with other wardens or officers of the commission or by reading, if he keeps abreast of the times, he will frequently learn of novel methods or devices which have

been successfully applied elsewhere. Some of these might be adopted with advantage in his own locality. The public naturally expects him to keep up with the progress of the world in his chosen work, and will often welcome new ideas or suggestions for improving existing conditions. If he is keenly alive to the interests of the public, the protector will see that important matters are brought to the attention of the people in his district through the medium of the press, through sportsmen's meetings, or by personal discussion; that public sentiment is formulated and crystallized on various questions so that proper recommendations may be submitted to the commission, or through regular channels to the Legislature. In this way the public interests can be subserved, the needs of the people presented to legislative committees, and the work of the commission greatly strengthened.

THE PROTECTOR'S DUTY TO HIMSELF.

Beside his duty to the commission and the people every game protector owes a duty to himself. For his own interest or that of his family he should exercise due care, and it is only fair that this phase of his work should receive full consideration. If after several years of hard and often dangerous duty the warden can look forward to no increase in salary or promotion in office, if he can show nothing in return for his labor except a small fixed salary and a number of personal enemies acquired in the line of duty, if when performing some dangerous work he should be seriously injured, crippled for life or killed, he can expect no compensation, it is questionable whether, in justice to himself or his family, he can afford to remain long in the service. Under ordinary circumstances it is not likely that he can acquire wealth or fame, but he will have plenty of outdoor exercise, varied experience, and more or less interesting work. If he does not suffer from the political upheavals which are too frequent in warden service, he need have no cause to complain, but an ambitious man must have something to which to look forward. Because an officer occupies the position of a deputy or private is no reason why he may not have an opportunity to rise. In some States chief deputies are chosen from the ranks; in others promotion of deputies to the position of State warden or commissioner are sometimes made when changes occur in these offices. As game warden work increases in complexity, greater opportunities for promotion will be open to progressive men in the ranks.

It frequently happens that a deputy, although performing ordinary duties in an apparently limited field, becomes widely known outside his district, and may even acquire a national reputation. Several instances of this kind will readily suggest themselves. I need only mention such men as E. V. Visart, of Arkansas; Walter R. Welch and the late W. B. Morgan, of California; E. H. Bartels, of Illinois; the late W. A. Palmer, of Michigan; E. T. Grether, of Missouri; Harry

Chase, of Vermont; H. Rief, of Washington, and Val. Raeth, of Wisconsin. None of these men are commissioners or State wardens; they are all deputies or privates. Some have become prominent through their skill with the pen, but all chiefly through their activity in the field.

The time has come to discard the old idea that any man can perform a warden's work, or that failure in other fields is a valid reason for recommending a man for appointment as a game protector. With the organization now possible under the direction of a commission or State officer, and the inducement of a regular though modest salary, warden work has reached a higher standard and is proving attractive to better men than ever before. Application of the merit system under civil service rules has removed the service from politics in four or five States and the necessity of such action elsewhere is generally recognized. Notwithstanding these advantages, the warden's position is not entirely satisfactory even in the most advanced States, and earnest efforts should be made for further improvement in the direction of service pay, a pension system similar to that provided for members of the police and fire departments in some cities, and compensation for injuries incurred in the line of duty.

OUTLOOK FOR THE FUTURE.

Service Pay.—Under the new conservation law New York provides for service pay whereby a protector's salary may be increased from \$500 to \$1,300 at the rate of \$100 per annum. Wisconsin has recently graded her warden work into three classes and provided for promotion from \$900 to \$1,460 per annum after certain length of service and examination. Massachusetts provides both service pay and pensions, the former under regulations of the commissioners of fisheries and game, the latter under a general law applicable to all State officers. Under the commissioners' plan which took effect Dec. 1, 1911, deputies receive \$60 per month during the first year, and afterward may receive an increase of \$10 per month each year up to five years. In other words, the entrance salary of \$60 per month may be increased to a maximum of \$100 per month at the end of the fifth year. The chief deputy receives \$125 per month, and in two cases the office has been filled by men selected from the ranks, so that a deputy at \$60 per month or \$720 per year may look forward under favorable circumstances to promotion to the position of chief deputy at \$125 per month or \$1,500 per annum.

Pensions.—Under a new State law passed last year (Acts of 1911, Chap. 532), all State officers in Massachusetts must retire at seventy years of age and may retire at the age of sixty, after fifteen years' service. A pension is provided on conditions somewhat as follows:

Part of the employe's salary (from 1 to 5 per cent. of all salaries up to \$1,500 per annum as the board of retirement may determine) is withheld for a pension fund, and is compounded semi-annually at 3 per cent. If an employe leaves the service before the expiration of fifteen years, he is entitled to the amount withheld from his salary plus the accrued interest. If he serves the full fifteen-year period, the State then doubles the amount to his credit and pays it to him as a life annuity, payable monthly, but in no

Valuable Fur

By DR. A. L. LEEDS

PROBABLY only a few of the many readers of *FOREST AND STREAM* are acquainted with the fact that there is now bred in a few places in Texas a real fur-bearing animal.

Nearly three years ago, at almost a prohibitive expense and after enduring the greatest hardships, fifteen head of pure Karakule sheep were brought over from Russian Turkestan.

It is from the breeds produced by crossing these sheep with common varieties that the valuable skins known as Persian Lamb, Astrachan, Krimmer, etc., are produced.

They differ from common sheep in a great

his father and grandfather were engaged in the business of raising sheep furs, and found it a profitable industry.

None of the doctor's people ever possessed a thoroughbred Karakule, and when as a boy he used to tell his father that some day he would go to Bokhara and get some of the pure stock, the old gentleman treated his remarks with no more seriousness than are usually given to the talk of children and dreamers.

Experiments, already made, demonstrate that by crossing these sheep with some of the lustrous long wool varieties, a fur is produced super-

wool breed of common sheep, which greatly interferes with the natural luster of the Karakule, and are known in Persia as Doozboy, and are not fur-producing sheep, but the Karakule strain makes them a hardy and heavy mutton sheep. The so-called "Caracul" fur sold in this country is a misrepresentation made up often of scraps of Persian lamb fur, and it is safe to say that few, if any, full blood Karakule lamb skins have reached the American market.

The small wild Arabi, or Karakule sheep, is practically extinct, although the Uzbecks, of Bokhara, claim that some of them still are found in a wild state in the Pamirs. The skins of the small Arabi are priceless, and are infinitely more beautiful than those coming from either the large or the intermediate classes of the Karakule family. The latter are more plentiful and can be obtained in the deserts of Bokhara, but it is almost impossible to procure a wild Arabi.

It is the intention of the importer to establish the breeding of these sheep on a sound basis throughout the United States, and there seems to be no reason why it should not in a few years be as well established as the breeding of ostriches or angora goats. Half blood Karakule-Lincoln rams crossed again with any of the lustrous long wool varieties of sheep of the United States or England produce a fur equal to that of Asia, and when we consider that we annually import about fourteen million dollars' worth, it is well worth interesting ourselves in this new industry.

FULL BLOOD KARAKULE LAMBS.

many ways, chiefly in that they have immense broad flat tails in which they store up vast quantities of fat. They are also absolutely devoid of the characteristic smell of common sheep, and instead of wool, they have a long coarse hair-like covering which resembles the coat of some wild animal like a Rocky Mountain sheep or muskox. Their natural gait is the pace or single foot, and in their fondness for dry, coarse food they are rivals of the goat and burro.

People who have eaten the meat of the cross breeds say it is nothing like mutton, but is more like antelope.

From the wool of these sheep the famous Persian and Bokhara rugs are made. The staple is not quite as long as that of a Lincoln or Cotswold. The entire clip was sold a year and a half ago to parties in Mexico for forty-two cents per pound gold. It was all used for making blankets or serapas, as they are called in the sister Republic.

The importer of these sheep, Dr. C. C. Young, of Belen, Texas, was born in Bessarabia, a Province of Southwestern Russia, where both

ior to anything grown in either Asia or Russia. Tests made to determine the quality and quantity of mutton, produced by cross breeding, have shown an increase in weight from 25 to 35 per cent., that lambs mature from two to three months earlier are much hardier, and that all traces of a sheepy taste to the flesh are eliminated with as little as 25 per cent. of the blood of the thoroughbred Karakule.

It must be understood that the term "Persian Lamb" as applied to lamb skins is only a trade name, and refers to all black lamb skins which have a close, tight, curly fur, but when the curls are open, it is called Astrachan. Twenty-five per cent. of Karakule blood will produce a black fur, even though the mother is white or brown. Naturally the more Karakule blood contained in a graded Asiatic lamb skin, the tighter the curl, and the more beautiful the fur.

The so-called Persian broad tail sheep raised in several parts of the United States is but a graded Karakule sheep, and is the result of a cross between a Karakule ram and some tight

How About Our Wild Animals?

HUDSON, N. Y., July 30.—*Editor Forest and Stream:* Your statement in the last issue that the California Fish and Game Commission has begun an inquiry into the condition of deer in that State leads me to ask: Why don't our own Conservation Commission do something of the kind? Certainly it would be very interesting as well as have no little value to know how our own wild animals are getting on. The old Fish and Game Commission, which never had anywhere near the resources of the Conservation Commission, used to publish a lot of interesting facts about Adirondack animals in their annual reports. Why they neglected the animals of the Catskills did not appear.

But the Conservation Commission does not even keep up the record of deer killed; at least, it is not in their report for 1910 or 1911, and it was highly interesting to sportsmen. Won't you try to get the Conservation Commission to give us a real animal census this year? They can do it easily through their many protectors and other employees. It would be as well to follow the California plan and set forth the distribution of the principal wild animals; the number of each species in each locality; the ratio of the sexes; the effect, if any, of killing only male deer; the question of cutting hay for deer or providing other food; the diseases prevailing, if any; and miscellaneous information as to albinism or melanism, freaks, etc.

The only approach to an attempt at such work that I can find in the old reports is when Harry Radford tried his hand at a partial census years ago.

J. B. ATFIELD.

Australian Flying-Foxes

By FRANK S. SMITH

THE name flying-fox, given popularly to one of our animals, is rather misleading, as the owner of the cognomen is really a large, fruit-eating bat. Their head, however, is, on a small scale, very like that of the fox, and in offensive smell they more than hold their own with the fox. Probably, too, the reddish fiery color had something to do with the name. These fruit-eating bats form a class of their own. The largest species, the speckled flying-fox, has a body about twelve inches long, while the smallest is not much more than two inches long. Their range is the whole of the eastern portion of Australia, but they are most abundant in the tropical and sub-tropical districts.

I well remember my first introduction to the flying-fox. I was staying with a friend in Northern N. E. Wales, who had an orchard. After tea, at about 7 P. M., he took down a gun and asked me to come with him and see the flying-foxes. In about half an hour he pointed out what seemed a small cloud on the horizon. As it drew nearer, however, I saw that it was a great flock of, apparently, some sort of bird. Then it began to pass over us and my friend began to fire an odd shot at the mass, "just to encourage them to keep going," he explained. The flock was a continuous affair and must have been a mile long. It was flying too high for the shot to kill any of them, but there was always a chance of some of them coming down to the orchard if they were not watched.

A few days later we rode out to the roosting place of the flying-foxes. It was in the heart of a dense, almost tropical, forest. "How are you going to find them?" I asked my friend. "Wait, and you'll see, or rather smell," he smilingly added. Presently a sickly, musky odor struck my nostrils. It got worse and worse until it became an appalling stink. Then we stopped. "Look above you," said my friend. I looked and was amazed to see the trees loaded, apparently, with reddish and dark fruits, but which I knew by the awful smell to be flying-foxes. There were countless thousands of them. Branch after branch held its load of foxes like a row of gooseberries in a good season. The fox sleeps head downward, hanging by his claws, and with his wide, semi-transparent wings folded about him like a shroud. In one tree there was a very curious sight. It was so overcrowded that hundreds of the bats were hanging to each other, and on three or four of the branches there were several tiers of them, one hanging to the other. In these cases the combined weight had bent the branches almost to breaking point, and the bats looked like bee swarms on a mammoth scale. My friend had a gun and I suggested shooting at one of the bunches, but he objected, as the disturbed bats would fly out in thousands and cover us with excreta. However, when we got out on the edge of the colony on to a clearing he shot a couple for me to examine. They bear a strong resemblance to the ordinary insect-eating bat, only they are much larger and more powerfully built. On the extremity of what may be called the leading fingers, there are claws.

The flying-fox is a great lover of fruit, and

will travel miles from its roosting place to get it. Our Australian forests are rather poorly supplied with wild fruits, except in the tropical portions. But the bats soon found out the orchards of the farmers and they do a lot of damage to them every year. A flock of flying-foxes will mess up an orchard in a single night, so those farmers living in their vicinity are always on the watch for them. So powerful is their odor that even if they just brush a peach or plum with their wing, the fruit becomes uneatable. I did not believe this until I was offered an apparently good peach so treated. It was quite untouched so far as the eye could see, but it smelled like a dead shark.

The flesh of this bat is, as may be expected from its diet, very succulent, but the unfortunate smell is again the trouble. If the smell could only be got rid of, flying-fox would, I am certain, quickly become such a popular article of diet that the sportsmen would soon keep them within bounds. But I have never found a white man game enough to enjoy them. At a black's camp one day I was given a piece of one to taste and found it very good, all but the smell. That was so bad that I had to force myself to eat it. The blacks (aboriginals), however, eat them readily enough, although when they can get it, they prefer 'possum or kangaroo. The blacks catch the flying-fox in a variety of ways. The two principal methods are by the use of smoke and with the boomerang. When the blacks discover a roosting place, they build a big fire beneath the trees, feeding the fire liberally with green branches so as to raise a big smoke. The smoke stupefies the bats, and some fall to the ground, while the others can be knocked off the branches without alarming the flock. It is curious that the smoke does not make the bats move off. On the contrary, they will hang on until they smother. They hang so firmly unless previously smoked, it is difficult to dislodge them with the boomerang. The boomerang, I may explain, is a black fellow's weapon and is a curved stick, with one side flat and the other rounded, about two feet long, bent at an obtuse angle. This is the famous weapon which can be made to return through the air to the thrower. If, however, it hits anything, its course ends.

Another method pursued by the blacks is to wait on the edge of the forest for the bats either leaving or returning. As they come past, the black fellow will send boomerang after boomerang whirling into their midst, usually with good results. He may send a dozen boomerangs in this fashion before he stops to collect the slain. He usually cooks the bats by roasting them whole, in their skins, on a small fire.

Mr. Le Souëf mentions in his book, "Wild Life in Australia," having seen some enormous flocks of this bat. One flock was flying from an island on the Queensland (Australia) coast to the mainland. The air was full of the bats, and the flight continued for over an hour, until it was too dark to see any more of them. On another occasion, near Singapore, he saw an enormous flock at broad mid-day flying appar-

ently to a new camping ground. "They flew high, and when passing between us and the sun, cast a shadow and hid the sun from view for some time. We estimated that there must have been over half a million flying-foxes."

The flying-fox is found all over the islands to the north of Australia, known as the East Indian Archipelago, where the rich wild tropical fruits supply it with an abundance of food. In the southern portions of Australia it is becoming scarcer, as the forests are being cleared off. As it is of absolutely no use, and is certainly no ornament, no one will miss it if it becomes extinct.

THE TOP RAIL.

A NEW YORK Medico, who appears prominently among the dry-fly exponents, and who now is proving the book on dry-fly theories in the Adirondacks, came into the hotel after a fish et al supper at one of the Adirondack clubs the other night. There being no elevator in the rural hostelry, he tip-toed up three flights of creaky stairs in the wee sma' hours. Stealthily as he thought, he opened the bed room door and started to slip out of his clothes and into bed before wifey shook off the control of Morpheus. Removing shoe number one he placed it gently on an imaginary chair in the ambient atmosphere. The shoe struck the floor and awoke wifey. Rising on her elbow she observed hubby standing in the dark room in front of a window, through which the moon shone full on his face, above which topped his hat. Wifey, somewhat surprised to find her inferior fraction so remiss as to keep his head piece undoffed in the house, said: "Bill, why didn't you take off your hat outside?" With a start of surprise, and after a second of deep thought, he replied: "It was too dark in the hall."

* * *

I HAD an amusing experience with a battery on a ducking trip to Ragged Island, or rather my friend "Mike" did. We were tied off Lane's in shallow water, and the shooting was fair, Mike downing eight "boobies" and one canvas in his first trick, though it was his first time in a "sink box." Howard, my guide, poled me up to relieve him, but before we got alongside, Mike, thinking there was a wing at the foot of the battery as on the other three sides, started toward us and walked right off into the bay. The water was only up to his waist, though slightly chilly, and he was soon warmed up again as the result of some vigorous sprinting up and down the marsh nearby and internal applications from my flask. I didn't think I'd ever be able to stop laughing at the startled look of amazement on his face when he first came up after his sudden dip.

GRIZZLY KING.

The next three months will add many subscriptions to FOREST AND STREAM.

GAME BAG AND GUN

Good Quail Season.

URBANNA, Va., July 31.—*Editor Forest and Stream:* On coming to this country, almost two years ago, I was surprised to learn of the excellent fishing, and the variety of fish to be taken by hook and line embracing sea trout, bluefish, rockfish, flounders, white perch, spots, croakers, shad of the finest flavor (the latter netted), soft and hard shell crabs by the tens of thousands.

Crab roasts, with other good things, are very popular with the young people. The fishing is good from June to late fall.

There will be good quail shooting in this vicinity. The season for mating has been exceptionally good, and I have no doubt there will be numbers of second nestings. In some near places covers are bad for man and dog, there being many ravines well armed with that pest, the cat-brier; and into these of course the whole covey pitches on being flushed in the open, and there being few open covers, the single bird shooting is seldom found in the fields close to ravines. Further back in the country, some six miles or so, the opportunity for a good day's sport is enhanced. There is a non-resident license and all shooters must get permission from the owner of the land to shoot. There are no snipe, woodcock or ruffed grouse here. Once in a great while during the fall flight a solitary woodcock is picked up. It is sad to contemplate the total destruction of this fine game bird, so dear to the heart of the sportsman, particularly the old generation of shooters who have seen this great bird in numbers sufficient for rare sport. Is there no way out to save the beautiful woodcock from extinction? Brother sportsmen, are we doing our duty to posterity and to ourselves to know this bird is passing away while we are not taking decided steps for his preservation? Can we not have a law that will prohibit the shooting of woodcock for, say, eight or ten years in all States, making the penalties very heavy in fines and jail sentences? DICK SWIVELLER.

Erbswurst.

DETROIT, Mich., Aug. 2.—*Editor Forest and Stream:* Hurrah for the ever-improving issues of FOREST AND STREAM!

In your issue of May 18 you publish a mighty interesting article by L. Lodian on "Some Camping-Out Foods," but in it the author does what I and my Detroit fellow campers feel to be a grave injustice to a splendid article of the campers' commissary, namely Erbswurst. We have used it in camp and at home for years and have introduced it to a large number of friends. I have never seen anyone fail to wax enthusiastic over it, and should include it in the lightest pack because it has all the virtues we look for in camp foods—dryness, compactness, palatability and high nutritive value, with ease of preparation. In these respects it excels clear soups, tea or coffee. Please do not let it rest with the black eye Mr. Lodian gives it, but ask your campers to try Erbswurst (Knorr) next time they are wet, tired and hungry in camp. All outfitters and large city groceries now handle it.

In your issue of July 6 you mention an "Interlaken Regatta" and in that of July 27 an "Inland Lake Y. R. A." Both of these news items refer to the I. L. Y. A. which is the "Inter-Lake Yachting Association" which has an interesting meet annually at Put-in-Bay. Just watch us next year at the Perry Centennial. Better yet—join us there. O. E. FISCHER, M.D.

Pheasant Eggs Under Barnyard Hens.

PHEASANT eggs for setting under barnyard hens are now being distributed throughout Illinois by the Illinois State Game Department. Deputy Game Warden G. W. Trunk distributed forty dozen of these eggs among the farmers of Peoria county this week. Only one dozen was allowed to each applicant. The farmers are asked to raise these birds with great care, and when able to shift for themselves to release them in some timber or brush land where they can take shelter from their enemies. The State Game Commission will ship many thousands of these eggs this year, and it is believed that this plan of propagation will prove of great success. It has been learned that better results are secured in rearing the young pheasants when barnyard hens are used than with the pheasants themselves. The latter are not so solicitous concerning the safety of the chicks as the hens. When the latter birds are used the percentage that reaches maturity is vastly increased.

Illinois Shooting.

THE mourning dove season opened on Aug. 3 in Illinois. Hunters are permitted to shoot fifteen of these birds daily. The season lasts 120 days. All other game birds are protected until Sept. 2, the exceptions being quail and prairie chickens, which may not be shot until Nov. 11. Not much attention is paid to squirrel shooting until after the dove season opens. The open season for squirrels extends to Nov. 15.

New Life.

MINNEAPOLIS, Minn., Aug. 5.—*Editor Forest and Stream:* I like your magazine better than before. Somehow or other there is more life in it. There was a time when it seemed sort of dead. The new management seems to be decidedly more liberal.

Yours for continued success and all the good wishes of the season.

ROBERT PAGE LINCOLN.

Authoritative Article.

POPLAR BLUFF, Mo., Aug. 12.—*Editor Forest and Stream:* It pleases me to note the last article by J. B. Thompson in your paper. You are to be congratulated in having a contributor so well posted on the fauna of our country. I have noticed his writings in the newspapers for some time and hope your interesting journal will entertain us with many more from the same pen. BYRON C. TOOMBS.

Alaska Game Protection.

IN EFFECT AUG. 1, 1912.

IN accordance with the authority conferred on the Secretary of Agriculture under Section 2 of the Alaska game law (35 Stat., 102), approved May 11, 1908—that the Secretary of Agriculture is hereby authorized, whenever he shall deem it necessary for the preservation of game animals or birds, to make and publish rules and regulations prohibiting the sale of any game in any locality modifying the close seasons hereinbefore established, providing different close seasons for different parts of Alaska, placing further restrictions and limitations on the killing of such animals or birds in any given locality, or prohibiting killing entirely for a period not exceeding two years in such locality—the following regulations, additional to those of Aug. 1, 1908, and superseding those of March 6, 1909, and July 21, 1910, are hereby promulgated, to take effect Aug. 1, 1912:

Regulation 1.—Open Season For Deer: The season for killing deer in Southeastern Alaska shall be limited to the period from Aug. 15 to Nov. 1, both inclusive.

Regulation 2.—Limits: The number of deer killed by any one person during the open season shall be limited to six.

Regulation 3.—Sale: The sale of deer carcasses in Southeastern Alaska shall be suspended until Aug. 15, 1913.

Regulation 4.—Killing Deer on Certain Islands: The killing of deer on the following islands in Southeastern Alaska: Duke Island, near Dixon Inlet; Gravina Island, near Ketchikan; Kruzof Island, west of Sitka; Suemez Island, near Klawak; and Zarembo Island, near Wrangell, is hereby prohibited until Aug. 1, 1914.

Regulation 5.—Kenai Peninsula: The killing of caribou on the Kenai Peninsula is hereby prohibited until August, 1914.

The shipment of carcasses of moose and sheep for sale, from Seward or other points on the Kenai Peninsula, is hereby prohibited, and no carcasses of said animals shall be accepted for shipment to other points in Alaska unless accompanied by affidavit of the owner that they were not purchased and are not intended for sale.

Regulation 6.—Walrus: The season for killing walrus in Bering Strait and in Bering Sea north of the mouth of the Kuskokwim River shall be limited to the period from May 10 to July 1, both inclusive. The killing of walrus in Bristol Bay and at points on the coast of Bering Sea, south of the Kuskokwim River, is hereby prohibited until Aug. 1, 1914.

The regulations of March 6, 1909, and July 21, 1910, are hereby revoked.

JAMES WILSON,
Secretary of Agriculture.

S. B. SMITH, a farmer of near Rochester, claims to be the champion skunk killer of Illinois, although the distinction was thrust upon him somewhat unexpectedly. While out hunting recently he discovered a colony of seventeen of the odorous animals. Although the skunks defended themselves by the means given to them by nature, and the atmosphere was rendered almost stifling, Smith persisted in his work until he killed all but one of the animals. Veteran hunters assert that it is rare to find such a large colony. The pelts will yield the hunter a handsome return, as skunk skins are in demand.

Wind Interference in Surf-Casting.

BY SWITCH REEL.

THE writer recently had the privilege of watching half a hundred surf-casters battling all day with a stiff 9 o'clock wind in an effort to cast a four-ounce lead beyond the 300-foot mark. At least six of them should have done so had not the wind conditions been adverse. The best cast made, however, was seven feet four inches short of the hundred yard mark, and great disappointment prevailed. A study of the failure in the light of experience discloses some interesting points as to the effect of a cross wind upon bait-casting work.

Figure 1 illustrates roughly the belly in the line at the instant the lead strikes. Figure 2

Fig. 1

gives an idea of the trajectory of the lead, the dotted line representing the course traveled by the lead and the solid line representing the line, the caster standing at the point A. Distances as follows: A-C-B, 275 feet; A-D-B, 300 feet; C-D, 75 feet; estimated average velocity of lead, fifty-five feet per second; wind velocity, twenty-two feet per second; time consumed in flight of lead, five seconds, belly in line, seventy-five feet.

It is probable that as the lead advances, the lengthening line sweeps through a course whose limits are between the dotted and solid lines in the two figures and which is a product of the two areas. The line makes part of a revolution about the line along which the lead travels; probably less than a quarter revolution. Given that the line attains an extreme divergence of seventy-five feet from the course followed by the lead, the mean divergence would be half that

distance. But as the drag of the advancing belly in the line exists both between A and D and between D and B, the sum of two means, or seventy-five feet, must be taken as the total line surface offering resistance to the air. The area of one side of seventy-five feet of nine-thread line at thirty-six turns to the inch is twenty-five square inches, which is the total surface exposed to the air at the end of the cast. But as this surface grows from zero, it would seem proper to regard the mean of twenty-five square inches as about the equal of the exposed line surface offered as a drag on the lead throughout its flight. If this reasoning be correct, it may be said that the lead in a 275-foot cast under the wind conditions above described has, in effect, been towing a plane surface a little larger than half a postal card, broadside on, through its entire journey.

It is remarkable that a 292-foot 8-inch cast should have been made under such a handicap, but such was the achievement of Mr. Frank P. Johnson at Asbury Park on Aug. 3.

I am not in the class with your correspondent "Olive Dun," who possesses two cords of fly-rods. My stock is down to about half a cord through having supplied a few boy friends of the right sort with proper tools. But while I look back tenderly to the fly-rod days, they brought no wild joy like that which goes with a 300-foot surf cast running smoothly to the end.

A good two-fisted rod with plenty of butt and with ginger in the spring of it, a free spool, silent running reel, a slender nine-thread line that breaks at eighteen pounds strain, a four-ounce lead, a long backward reach, a move like unto Chief Meyers' whipping the ball down to second base which the left hand at the end of the butt follows through and accelerates with a bit of a pull, and—away goes the lead tearing yard after yard of line from the reel. The fly is retrieved and cast in two or three seconds. A deer is seen and shot in less. But it is one, two, three, four, five seconds of anxiety and doubt lest a back-lash part the line ere the lead finally strikes a hundred yards away. Wah! A bull moose! It would make T. R. himself feel like six bull moose rolled into one.

I know, for I've done it—probably when no fellow saw it.

Mascalonge in the Niagara River.

BUFFALO, N. Y., July 31.—*Editor Forest and Stream:* Mascalonge are plentiful on Upper Niagara River this season. Fifteen a day are being caught on an average. Many of our club members are among the successful. The record for size to date is held by ex-Game Protector Thomas Carter, his prize weighing forty pounds.

H. C. UTZ, Sec'y Frontier Rod and Gun Club.

Fig. 2

Dry-Fly in Northern Waters.

SOUTH MILFORD, N. S., July 24.—*Editor Forest and Stream:* Disappointed that any remarks of mine previously made have led to the impression (as I read out of Mr. Bisbee's genial letter) that I have been so daring as to deny the efficacy of the dry-fly on the Rondout or any other water in the neighborhood of New York, or for the matter of that anywhere else that I do not personally know. The older a sportsman grows, the less given he usually is to generalizing about country that he is not well acquainted with. Except my experience in English waters I have never used the dry-fly save in Canadian and Maine waters, and I have confined my remarks about its comparative inefficiency to Nova Scotia waters. And, furthermore, I do not say that even in some other part of the North Woods it might not prove a success, though I rather doubt it, except on certain occasions, as I believe the wild trout of our waters do not like dead or immovable bait.

I do not relish the idea that I pretend to any exclusive knowledge on any woodland subject, for the older a man gets, the more humble he grows. I merely register my experiences, and draw certain, not very far-reaching, conclusions from them. Having tried the dry-fly here ever since 1900 (see "Tent Dwellers" for use in 1902), I cannot fail to have observed certain things about the dry-fly and our trout here, *voilà tout*. Though the use of the dry-fly is fifteen years old and more, with some of us on this side of the big pond, and though Mr. Gill and Mr. LaBranche are doing a lot to make the art of it popular, yet I am also of the opinion that some maker must first come who has the enterprise to tie flies after our own insects before we can pretend to an American dry-fly science.

EDWARD BRECK.

Santa Cruz Tournament.

A FLY-CASTING contest was held at the Santa Cruz water pageant, July 27, 1912. Eight beautiful trophies were awarded to the successful casters. Among the contestants were the experts of the San Francisco Fly-Casting Club of San Francisco and the California Anglers' Association of San Francisco.

The contest was held on a beautiful lake and the conditions of the weather were ideal. Santa Cruz at this time of the season is one mass of solid summer visitors, with the result that a large gathering was present to witness the fly-casting contests. The following proved to be the most expert in the different events: Accuracy fly, first prize, F. J. Cooper; second prize, T. C. Kierulff. Delicacy fly, first prize, T. C. Kierulff; second prize, E. A. Mocker. Accuracy lure, first prize, F. A. Webster; second prize, C. H. Kewell. Long distance line, first prize, C. H. Kewell; second prize, F. A. Webster.

E. A. MCKER.

DAVID HILL, of Ottawa, Ill., while fishing recently at the junction of the Fox and Illinois rivers, landed a ten-pound red-mouth buffalo fish, the largest of this species caught with a hook and line in many years. It required the combined strength of Hill and a companion to haul the big fellow to shore.

Catfish on Artificial Bait.

AN incident in fishing experience that may be of some interest to readers is the taking of a Mississippi cat with artificial bait. I was casting in the Potomac for small-mouth bass, in the swift water where interfering rocks made eddies. The bait was a medium sized two-bladed spoon. The fish was a pound or more in weight, and took the spoon at six to twelve inches under water. The water was cloudy, but not too thick for bass, as I caught a bass and had several rises.

On a previous occasion I was casting in a pond where fish were left by overflows. The water was clear and I saw from a cliff that there were cats and bass in it. When close to the water, the reflection on the surface usually prevents seeing off at an angle, and which prevented me on this occasion being sure what sort of fish made for the spoon. As I drew it across a deep place, the mouth that I saw open and miss the spoon looked very much like that of a cat. The fish, whatever it was, made a second dash at it into water that was too shallow and missed again.

An article on the fish that will take the artificial and the best sorts and colors for the various fish, if it could be gotten together and published, would be very interesting to me.

F. R. FRAVEL.

St. Louis Bait- and Fly-Casting Club.

ST. LOUIS, Mo., Aug. 9.—*Editor Forest and Stream:* A contest of the St. Louis Fly- and Bait-Casting Club was held in beautiful Forest Park, Sunday, Aug. 4. The popularity of the sport was again shown with a great number of people present who applauded some of the fine casting. The results were as follows:

Accuracy, fly-casting:		Geo Ashton 97 2-15
H J Steinmesch... 99 1-15		Dr C A Vosburgh. 97 1-15
S S Pingree..... 98 10-15		H F Mardorf..... 96 14-15
Aug Cyran 98 4-15		R L Smith..... 96 4-15

GEO. ASHTON, Sec'y.

Asbury Park Fishing Club.

THE casting tournament committee of the Asbury Park Fishing Club has just handed out the official list of winners in the last annual tournament, held Saturday, Aug. 3.

There were originally but six prizes for the first event, for club members only. This event, for the best average of five casts in a lane thirty feet wide, the caster using a three-ounce lead, was won by Nelson Schoen, with an average cast of 190 feet 11 inches. The sixth prize was awarded R. H. Corson, but W. W. Flavell claimed an error in measurement and was credited with the same distance thrown by Cor-

son, 166 feet 8 inches, and he was given a 200-yard line similar to the sixth prize awarded Corson.

The wind was from the west and struck the lines sidewise, thus making it unfavorable for high averages. The longest individual cast was made by Frank P. Johnson, in the fifth event, which was open. He threw 292 feet, winning over John Clayton by 3 feet 2 inches. Arthur Seger got the line offered by L. Holdidge for the lowest average in the first event, his average being 118 feet 8 inches.

Winners of special prizes were as follows:

For casts nearest to 650 feet in events 4 and 5 won by Henry C. Rydell; total 650 feet. Cast nearest to 642 feet in event, G. W. Fen-

FRANK P. JOHNSON.

more, 653 feet 4 inches. Best average in events 1 and 2, John Vogler, average 197 feet 9 7/10 inches. Three best casts nearest to stake, H. G. Cole, 18 feet 1 inch. For average nearest to 360 feet in event 2, F. H. Westervelt, 754 feet.

The events, winners and scores, fractions of inches excluded:

Event No. 1—Nelson Schoen, 190 feet 11 inches; John Vogler, 179 8 inches; C. M. Day, 174 feet 10 inches; C. O. Perry, Jr., 169 feet 2 inches; J. M. Dettrick, 167 feet 10 inches; R. H. Corson, 166 feet 8 inches; W. W. Flavell, 166 feet 8 inches.

Event No. 2, best average of five casts in a line thirty feet wide with four-ounce lead—C. O. Perry, Jr., 217 feet 10 inches; John Vogler, 215 feet 11 inches; A. W. Flavell, 200 feet 1 inch; J. F. Marshall, 195 feet 11 inches; T. C. Mertz, 193 feet 11 inches; W. W. Flavell, 178 feet 8 inches.

Event No. 3, three casts at a stake 140 feet from starting line—H. G. Cole, 3 feet from

stake; J. E. English, 3 feet 7 inches from stake; G. W. Fenimore, 4 feet 7 inches from stake; J. C. Clayton, 5 feet 1 inch from stake.

Event No. 4, with V-shaped court, best average in five casts, open to all—John Clayton, 257 feet 9 inches; C. M. Day, 251 feet 5 inches; H. K. Satow, 223 feet; C. O. Perry, Jr., 222 feet 4 inches; J. A. Davett, 214 feet 7 inches; F. P. Johnson, 203 feet 7 inches.

Event No. 5, longest individual cast, open to all—F. P. Johnson, 292 feet; John Clayton, 286 feet 10 inches; C. M. Day, 284 feet 2 inches; L. J. Brown, 260 feet; W. W. Flavell, 257 feet 9 inches; R. H. Corson, 250 feet 2 inches.

Illinois Casting Club.

CHICAGO, Ill., Aug. 5.—*Editor Forest and Stream:* Notwithstanding somewhat adverse weather conditions, a large number of enthusiastic casters gathered for the contests of the 3d and 4th inst. The weather conditions were approximately the same for both days—northwest cross winds, about fifteen miles per hour. The scores follow:

Half-ounce accuracy bait:	
De Garmo 98.5	Kernaghan 98.5
Linder 99.0	Kerr 97.4
Jamison 97.8	Swisher 97.6
Stanley 98.7	Blodgett 98.4
Humphreys 98.1	Huntley 98.6
Hartley 98.2	Hartstall 98.9
Heston 98.5	Abbey 96.9
Asper 98.2	Hornstein 94.8
McCandless 98.1	*Paulson 97.0
Buchanan 96.8	*T Nordholm 97.0
Whitby 98.5	*J Nordholm 96.4
McFarlin 97.6	*Campbell 97.1
Wehle 98.2	
Re-entries:	
Linder 99.1	Kerr 99.1
Stanley 99.3	Swisher 97.6
Hartley 98.2	Blodgett 97.3
McCandless 97.5	Huntley 92.8
Buchanan 94.6	Hartstall 98.6
Half-ounce distance bait:	
Wehle 141	Grant 38 3/4
De Garmo 73 1/2	*Lingenfelter 183 1/2
Heston 125	*Chatt 160 1/2
Jamison 136 1/2	*T Nordholm 117 1/2
Re-entries:	
Heston 137 1/2	
Distance fly:	
Jamison 93	De Garmo 102
Stanley 94	Linder 90
Re-entries:	
Jamison 95	
*Guests.	

A. F. SWISHER, Sec'y-Treas.

Elgin Anglers' Club.

ELGIN, Ill., Aug. 5.—*Editor Forest and Stream:* The scores of the Elgin Anglers' Club contest of Aug. 4 are as follows:

	1/4-ounce	1/2-ounce
	D. and A.	D. and A.
Fred Eggabrecht	98	98.1
Wm Newton	97.9	95.8
C L Provost.....	97.6	97.7
C T Huff.....	97.6	97.6
Chas Elliott	97.4	94.8
O Schmidt	96.3	93.2

R. F. KADOW, Sec'y.

All the fish laws of the United States and Canada, revised to date and now in force, are given in the Game Laws in Brief. See adv.

Published Weekly by the
FOREST AND STREAM PUBLISHING COMPANY,
 CHARLES OTIS, President.
 W. G. BEECROFT, Secretary. S. J. GIBSON, Treasurer.
 127 Franklin Street, New York.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Breniano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

OUR BIRTHDAY.

ON Aug. 14, 1873, FOREST AND STREAM was born into a tremendous field of usefulness. Every week since that day we have endeavored to live up to everything we promised. How well we have succeeded, readers of FOREST AND STREAM can judge. Personally we have no hesitation in saying: We have done our best, and that others agree with us is evidenced by the fact that many of those who sought our society when they and we were young have remained loyal friends to this day. We have made some enemies through our persistence in enactment of game protective measures and enforcement of righteous game and conservation laws, but it is safe to say that no member of the class of sportsmen to whom we cater or whose co-operation we seek is among the disgruntled. It is hard for some of the older hunters who lived actively in the days of game abundance to realize the necessity for curtailment in bag limit and shortening open seasons, but they have taken our educational work good naturedly, albeit not willingly, and almost to an individual have come to see the light. The game hog we have handled without gloves, with the result that legislators in most States have made him a negligible item. Our support of game refuge measures is too well known to need further definition, as is the case with other legislation we deem wise. Our rigid adherence to fact, together with our erudition, has given us *the place in authority* on matters of interest to sportsmen, by whom daily we are consulted. Growing older to us is a pleasure because we know that every year adds wisdom and stature and makes us more and more needful to the outdoor man and woman. Our aim was and is set forth in the leader in black face type at the top of this page—as it was in the beginning, is now.

THE SISSON BILL.

REPRESENTATIVE SISSON, of Mississippi, has introduced a bill to tax the manufacture and sale of deadly weapons, which provides that there shall be paid a tax of \$2.50 on each pistol, dirk, bowie knife, sword cane, stiletto and brass or metallic knuckles, and in addition to such tax an ad valorem duty of 25 per cent. shall be collected on the price at which the manufacturer sells the weapon to the trade. The bill, which is to take effect July 1, 1913, provides a fine of \$1,000 and six months imprisonment for violations of its provisions. The measure was referred to the House Committee on Ways and Means which has to do with all bills which levy taxes and was extended hearings in order that Mr. Sisson might explain the purpose and provisions of his measure. Mr. Sisson declared that the purpose of his bill was primarily to raise revenue but would also operate to regulate the sale and carrying of deadly weapons in violation of State and municipal laws, and would, therefore, operate for the welfare of society. The bill is not intended to cover any weapons except those mentioned, and would not therefore include rifles or shotguns as was supposed by many when the bill was first introduced. It was shown during the hearings that there were manufactured in this country in the year 1910 the enormous number of 1,638,560 revolvers, rifles and shotguns. There were ten manufacturers who reported 580,042 revolvers, 391,875 shotguns and 666,643 rifles as having been made during the year mentioned. Sixty-six establishments are engaged in the manufacture of firearms and ammunition with a combined capital of \$39,377,000, with 15,000 employees. It was natural, therefore, that many protests were filed by the manufacturers with the committee, though none appeared in person at the hearings to oppose the bill. It is estimated that with the enactment of the bill into law, the proposed duty would realize at least \$2,500,000 in revenue to the Federal Treasury, as well as serve to identify and regulate the sale and use of the deadly weapons mentioned. The bill does not include any weapon enumerated therein, and does not disturb the sale of cartridges or ammunition of any kind. A great deal of misapprehension was felt over this measure by sportsmen and others when the bill was first introduced owing to a misconception of the terms of the bill and inadequate treatment of its terms by the press. Mr. Sisson has received many letters of commendation from State and municipal officers who ardently support the bill. It is understood that the committee will report the bill favorably, and that it will finally pass the House during the next session of Congress.

THE STARLING.

REPORTS received at the Department of Agriculture state that the English starling, whose progress in this country has been watched with some uneasiness, has gotten as far south as Newport News, Va. This is one of the imported birds that it feared will rank with the English sparrow as a pest. It does no particular harm in England, but it was introduced into Australia some years ago and there it has proved to be a serious menace to the wheat crops. The birds were started in this country in New England and have worked South slowly, remaining almost stationary for several seasons around Philadelphia, Pa.

BIRDLESS MONTCLAIR.

THESE days everything seems to run to the suffix less, excepting possibly the cost of living. We have wireless telegraphy, seedless oranges, beardless youth, thoughtless legislation, speechless fright and lesses ad lib., but can it be now that we are to have birdless Montclair? The present desire is to rechristen the moneyed thoroughfare of this ultra New Jersey village, Birdway. The trees fairly droop with their feathered freight, residents along the songed highway woo sleep in vain, phonographs are put away to rest because the oriole and robin sing away, regardless of the efforts of Mary Garden and Caruso to promote musical art in condensed form. All that stands in the way of Montclair's peace of mind is the law that says: "Thou shalt not kill." It is good for Montclair's hot-headed citizens that the commissioners won't let them kill song and insectivorous birds. Good because should Montclair have her way, she not only would be birdless, but treeless as well.

It is probable the birds have not selected Montclair because of its climate and roosting facilities, but because insect life there offers superior feeding, a decrease in the labor of living made so high in Paris-greened sections. Treeless Montclair is not destined to be, because a wise legislation has willed against birdless Montclair, and later, when the birds have gone to warmer climes, though not those to which we understand the residents on Birdway oft have consigned them, the bird killers of the Jersey suburb will be glad wiser heads made laws that will enable Montclair to continue as one of the show villages of the State of New Jersey and not birdless and treeless Montclair.

ALASKA GAME LAWS.

IN another column we print the revision in Alaska game laws superseding those of July 21, 1910. It seems unfortunate that the Department of Agriculture should have delayed issuing these revisions until Aug. 1, as under the old laws the season on caribou on the Kenai Peninsula opened Aug. 20, 1912, after having been closed four years, while in other parts of Alaska the law was off on Aug. 1. Many sportsmen had their trips planned before Aug. 1, while others already were on their way to the Alaska hunting grounds before the new regulation was issued. It seems as though those in authority could have made the new ruling in January instead of at the opening of the season, under the then existing laws.

THE ADVERTISING RECORD.

IN June, FOREST AND STREAM, according to Printers' Ink, carried 2,215 agate lines more advertising than any other sportsman's publication. In July it did still better, according to the same authority, carrying 2,920 lines more than its nearest competitor as the following tabulation will show:

AGATE LINES OF ADVERTISING.

(Compiled by Printers' Ink.)

Publication	July, 1912.
Forest and Stream	15,604
Outing	12,684
Field and Stream	11,816
Outer's Book	9,632
Recreation	7,310

Well! Well!!! Well!!!

YACHTING

Let the Gasolene Twins Do Your Work

By E. T. KEYSER

TIME was, and not so long ago at that, when most canoeists could, within an hour of dropping their boats overboard, find themselves in a nice sequestered place with wood and water and a good camp-site awaiting them. Today the proposition is so vastly different that the man who wants a reasonable amount of solitude finds his hours' paddle multiplied by three or four.

Yes, I know it's exercise all right, and what the average canoeist is after is exercise.

At the same time it's a mighty big difference when you break camp on Sunday afternoon, and find that the calking has all been pulled out of the clouds, whether you travel through that leakage for one or for three hours.

Furthermore, when a man quits at 1 o'clock on Saturday it makes a big difference whether he reaches his camp site at 3 or 4 o'clock that afternoon, or sometimes about 7 P. M.

That's why so many hardened canoeists who have sworn that there is nothing to beat sailing, are casting sheep's eyes at some of the many attractive little marine motors that give more power than a man at considerably less than the average paddler's weight.

What kept the canoeist out of the marine game was the fear of encountering difficulties when installing the engine and boring for the shaft and attaching a shaft log, but with the advent of ready-made shaft logs with adjustable fastening adapted to any style of canoe or small boat, the only part of the work that was beyond the average canoeist's ingenuity has been so simplified as to cut no figure in subsequent proceedings.

For use in a canoe the 2-cycle engine, by reason of its light weight, has a much greater advantage over its brother of the 4-cycle type than when installed in any other type of boat.

The 2-cycle engine to-day may be obtained running in weight from less than 40 up to about 150 pounds and capable of producing from 2 horsepower up to 10.

These engines develop their rated horsepower at all the way from 750 up to as high as 1,150 revolutions per minute, and swing two or three-bladed propellers from ten inches up to fourteen inches in diameter.

On a craft as small as a canoe, where shoal water must be navigated, the diameter of the propeller has a very important bearing on the cruising radius of the craft, and it is better for this reason to utilize a three-bladed wheel, as it enables one to obtain the same power and speed from a smaller diameter than would be required in a propeller of but two blades.

Furthermore, particularly when used behind a deadwood or skeg, there is less vibration with a three than with a two-bladed propeller, and vibration is something to be carefully guarded against in a craft so lightly built as a canoe.

For this reason it is well, when installing the engine, to see that the bed is of good stout material, and that fore and aft stringers are just as long as the canoe will accommodate without unduly sacrificing her seating capacity.

In general practice to-day the motor is installed as far aft as possible in the canoe as it may be placed without giving an undue rake to the shaft.

Undoubtedly the reason for this is that there is a saving in the length of shafting, and that with the fly wheel at the forward end of the engine it is easier to start up the motor from this position when afloat than if it were placed forward of the passengers.

On the other hand, from its very form of underbody the canoe is more or less of a "squat-ter," principally more.

Now, although this defect is an inherent trait of the peculiar form of the canoe's after under-water body, this may be reduced somewhat by placing of the weights, such as gasolene tank and engine well forward, so that when at rest the boat will be down by the head; this will not eliminate "squatting" entirely, but will reduce it considerably. The fly wheel of the engine may be transferred from the forward end of the shaft to the after end, just forward of the shaft coupling, or one of the small light and very effective rear starting devices may be utilized, so that the engine may be started even more easily than in its other position, which requires the engineer turning around and facing aft when turning over the fly wheel.

As a matter of fact, however, no canoe should be equipped with power without the including of either a reverse gear or a reversing propeller.

It is not entirely in a reversing mechanism's ability to allow you to back up quickly that its full utility lies, but in the fact that you can "stand by" with engine turning and the boat making no headway, and yet be capable of instantly starting when you so desire.

Without some reversing mechanism you cannot run your engine without moving the boat, and stoppage of the boat at a buoy, or while waiting for someone, necessitates that the engine be stopped, and later on—and probably with much inconvenience—restarted.

In a larger boat this is not a particularly pleasant state of affairs, but in something so small as a canoe—where cranking the engine necessitates moving around and shifting the positions—it is anything but safe.

From my own personal way of thinking, I prefer, so far as the canoe is concerned, a reversing propeller to a reverse gear. It requires less clearance, weighs considerably less—and these are no slight items in a craft so small as a canoe. Reverse gears, most admirable in larger craft, weigh nearly almost as much and

occupy pretty nearly as much room as the twin motors adapted to canoes.

Reversing propellers are now made, which not only enable the canoeist to go forward, backward and keep the engine running while the boat lies perfectly still, but also enables him to change his speed at will from scarcely headway to the greatest speed of which the boat is capable, without any adjustment of spark or throttle on the engine, so that with a steering wheel in one hand and the reverse lever in the other, you can do any manner of stunts with perfect ease and security.

Single cylinder motors average lower in cost per horsepower than those of two or more cylinders. On the other hand the multi-cylinder engine runs smoother and more quietly.

Speaking of quietness, the underwater exhaust is a mighty good proposition on a canoe, and if the engine is installed forward, so that the boat trims down by the head when at rest, the exhaust outlet may be placed so that it will be just above the water when the boat is not under way. This will allow the squatting of the stern to submerge the exhaust when the boat is in motion and also allow of easy starting.

Do not, under any circumstances, no matter how strongly tempted, pump your bilge through your cylinder jackets.

Yes, I know that some canoeists have a two-way fitting so that the circulating water may come from either outside of the boat or from the bilge as desired. It is only a matter of time before one forgets to make the shift after the bilge is dried, and then the least of the trouble is that the paint is all off the outside of the engine; the worst possibilities are too horrible even to contemplate.

Utilize one of the many admirable forms of power bilge pumps, which add very little in weight or cost to the outfit, and then, no matter if a comber does come aboard once in a while, you will keep dry and comfortable. A bilge pump is a great deal more of a necessity to a canoe by reason of the lack of space beneath the floor than to the ordinary power boat, and the comfort of a power bilge pump aboard one is out of all proportion to its cost.

Unless you intend to navigate on fresh water exclusively, see that all your fittings be for salt water; that is, your propeller, shaft and all your water piping. Your exhaust piping may be of galvanized steel, and it is well to run at least a portion of the circulating water into your exhaust lines, which is an insurance against somebody getting an ugly burn or the wood charring.

A little two-horse motor will drive your canoe, hour after hour, at a considerably better speed than a sturdy paddler can hit up for the first half hour after he leaves the float, while a 3 to 4-cylinder will give you a real speed of from eight to nine miles an hour. It seems at least twelve or fifteen on account of the boat being so small.

The cost of equipping a canoe with power is so light, the advantages are so many that undoubtedly the year 1913 will find power canoes among the fleet of most of our canoe clubs.

Furthermore the power canoe is so small and so light that it can be housed and properly cared for and tuned up in a manner that is impossible with the average power boat, which must lay out in all sorts of weather at its moorings.

New York Y. C. Cruise.

FIRST DAY.

STONY BROOK, N. Y., Aug. 8.—The run from Glen Cove, L. I., to this port constituted the opening event of the New York Y. C. cruise. It was a day of big sails with a spinnaker run for the first two miles, a broad reach under balloon jib topsails for sixteen miles to Eaton's Neck, and then a fetch, but still with big headsails to the finish off Crane Neck Bluff. The wind held true to the finish and some of the big schooners covered the distance in two hours.

The honors went to the schooner Enchantress, owned by William E. Iselin, and the yawl Phantom, owned by E. S. Booth, which captured the navy challenge cups. Enchantress won in her class, leading the fleet to the finish.

SECOND DAY.

NEW LONDON, Conn., Aug. 9.—The second day's run of the New York Y. C. cruise ended here to-day. From the eastern entrance to Smithtown Bay to the mouth of the Thames River it was a straightaway run with no sail shifting. The principal trophies offered for the day were the cups of the Navy Alumni Association for sloops and schooners. These were won by the sloop Cara Mia in P class, owned by R. L. Cuthbert, and the schooner Vagrant, owned by Harold Vanderbilt. In the regular class the winners were the schooners Elena, Taormina and Vagrant, and the sloops Winsome, Avenger and Medora. In the P class Cara Mia won; Rowdy won in the New York Y. C. 30-footers and Rival in the Sound schooners. The principal race was between the schooners Elena and Enchantress. Two yachts sailed for fifty miles with only megaphoning distance between them. Four miles from the finish Elena drew away and won by 45s.

The summary of the second day, Aug. 9, follows:

Schooners, Class B—Start, 8:30.	
Elena	3 57 12
Enchantress	3 57 57
Irolita	4 04 59
Corrected time: Elena, 3.44.21; Enchantress, 3.45.06; Irolita, 3.48.47; Sea Fox, 3.50.04.	

Schooners, Class B, Special—Start, 8:30.	
Endymion	4 08 52
Corrected times: Sea Fox, 3.50.04.	

Schooners, Class D—Start, 8:25.	
Taormina	4 46 13
Muriel	4 39 30
Corrected time: Taormina, 3.46.13; Muriel, 3.51.50; Princess, 3.52.06.	

Schooners, Class F—Start, 8:25.	
Vagrant	5 00 27
Corrected time: Vagrant, 3.28.12; Miladi, 3.29.20.	

Auxiliaries Under 90 feet—Start, 8:35.	
Venona	5 45 26
Corrected time: Venona, 3.41.52; Iris, 3.51.10.	

Auxiliaries Over 90 feet—Start, 8:35.	
Intrepid	4 20 35
Corrected time: Intrepid, 3.16.28; Aloha, 5.31.03.	

Sloops, Class K—Start, 8:20.	
Winsome	4 45 01
Aurora	4 45 18
Corrected time: Winsome, 3.42.45; Dorello, 3.46.49; Gardenia, 3.48.34; Adventuress, 3.52.55.	

Sloops, Class L—Start, 8:20.	
Avenger	5 03 09
Corrected time: Avenger, 3.54.03; Shimna, 3.56.41.	

Sloops, Class M—Start, 8:20.	
Medora	5 15 00
Dorello	5 19 04
Corrected time: Medora, 3.42.45; Dorello, 3.46.49; Gardenia, 3.48.34; Adventuress, 3.52.55.	

Special Class—Start, 8:20.	
Phantom	5 41 03
Corrected time: Phantom, 3.29.37; Gardenia, 3.48.34.	

Sloops, Class 6, Special—Start, 8:15.	
Cara Mia	6 03 06
Windward	6 04 08
Corrected time: Cara Mia, 5.59.04; Windward, 6.08.13.	

New York Y. C., 30-footers—Start, 8:15.	
Rowdy	6 22 17
Phryne	6 23 38
Carlita	6 31 25
Miriam	6 33 11
Corrected time: Rowdy, 6.33.26; Phryne, 6.34.31; Carlita, 6.41.03; Miriam, 6.41.03.	

Sound Schooners—Start, 8:10.	
Rival	6 36 38
Alys II.	6 38 59
Móira	6 41 51
Corrected time: Rival, 6.41.58; Alys II., 6.42.03; Móira, 6.44.43.	

Alumni Association of U. S. N. Challenge Cup—For Schooners.	
Vagrant	3 28 12

Shimna	3 55 43
Winsome	3 58 05
Adventuress	3 51 59
Aurora	3 58 31
Istalena	4 00 30

THIRD DAY.

Moderate to strong winds carried the fleet out of Long Island Sound, across Block Island Sound and into Narragansett Bay on the third run of the annual cruise to-day. The run was a repetition for the greater part of that of yesterday, for the yachts had a close fetch of twenty-six miles hard on the starboard tack along the Southern Rhode Island shore. Rear-Commodore George F. Baker, Jr., contributed a silver cup for the day and the trophies were won by the schooners Elena and Vagrant, and the sloops Istalena and Rowdy.

The class honors went to the schooners Elena, Muriel and Vagrant, the sloops Istalena, Shimna, Medora, Corinthian and Rowdy, the yawl Phantom, and the auxiliary schooners Intrepid and Venona. The breeze picked up strong almost from the start, and when the yachts finally anchored inside of Fort Adams, most of them had to tighten up the starboard rigging, for the fleet had been on the starboard tack in every run since leaving Glen Cove on Thursday morning.

Elena, at the head of the fleet, rounded Point Judith whistler at 12:25 and crossed the finish line with the water boiling under her port bow at three bells on the afternoon watch. Commodore Morton F. Plant, owner of Elena, sailed on his yacht to-day and was enthusiastic over her performance. Elena ran so fast to the finish that the flagship Diana, with the regatta committee on board had only two minutes to spare in which to establish the line. Enchantress and Irolita, which were about a mile astern, had a sharp luffing match in the seven-mile reach from Point Judith. The remainder of the fleet came in quickly in the form of a long procession of yachts until at colors at night Newport Harbor floated one of the largest fleets in many years. The summary:

Schooners, Class B.	
Elena	2 56 13
Irolita	2 58 53
Enchantress	3 00 49
Corrected.	
Sea Fox	3 13 59
Endymion	Not meas.

Small Auxiliaries.	
Venona	3 02 05
Corrected.	
Iris	3 11 22

FOURTH DAY.

VINEYARD HAVEN, Mass., Aug. 12.—The yachtsmen of the New York Y. C. squadron had to show their ability as navigators in to-day's run from Newport to this port. They started at Benton Reef Light Vessel in a thick fog and for seventeen miles of the course were completely shut in by the pall of mist. The sea was rough and the race from start to finish was the exciting one of the cruise. The special prizes were the commodore's

cups, and these were won by Irolita, Taormina, Shimna and Rowdy. Rowdy so far on this cruise has not been beaten, and in addition to winning class prizes she has won two of the big cups offered by the flag officers.

In the big schooner class Irolita won by nearly one minute. Class B schooners were led in by Sea Fox. The summary:

Schooners, Class B—Start, 12:45.	
Elapsed.	
Elena	3 27 52
Irolita	3 29 41
Corrected times: Irolita, 3.18.38; Elena, 3.19.04; Sea Fox, 3.41.29.	

Schooners, Special Class B—Start, 12:45.	
Sea Fox	4 00 29
Corrected times: Sea Fox, 3.41.29; Endymion, not measured.	

Schooners, Class D—Start, 12:45.	
Iris	4 00 31
Muriel	4 05 23
Corrected times: Iris started too soon; Taormina, 3.19.25; Princess, 3.28.08; Muriel, 3.32.43.	

Schooners, Class F—Start, 12:40.	
Vagrant	4 28 03
Corrected times: Miladi, 3.21.52; Vagrant, 3.24.51.	

Schooners, Class D, Special—Start, 12:45.	
Muriel	4 05 23
Corrected.	
Princess	4 01 27

Sloops, Class K—Start, 12:35.	
Aurora	4 19 51
Istalena	4 14 51
Corrected.

--	--

Perpetual Trophy Holders.

THE Motor Yacht championship trophy is held by F. C. Haven's Avis; the cabin launch championship trophy is held by Spindrift, owned by C. R. Butler, of Albany, N. Y., and the national trophy, for speed boats over 40 feet, was held unchallenged for by Tartar, the speedy Seabury racer, owned by Ralph E. Slaven. Sand-Bur II., the phenomenal little Appel monoplane, owned and raced last year by Messrs. A. K. and C. D. White, of Atlantic City, holds the international world's championship trophy for speed boats under 40 feet, while the interstate championship trophy, for speed boats 33 feet and under, was won last year by Hazel, Albert E. Smith's speedy little Elcoplane, which has figured in so many sensational races, and which has been renamed The Bug.

Canarsie Y. C.

NINE boats took part in the flag officers' regatta of the Canarsie Y. C. on Jamaica Bay Aug. 10. The regatta was managed by Martin F. Plage, E. M. C. Cane and George Masters. The summary:

Cabin Sloops—Start, 4:05—Course, 10 Miles.		
	Finish.	Elapsed.
Namee, A. H. Behrens	6 07 45	2 14 45
Elizabeth II., E. Cornell	6 37 27	2 32 27
Kenewaha, W. McLaughlin	Did not finish.	
Cabin Catboats—Start, 4:10—Course, 10 Miles.		
Flora May, W. Menzlich	6 35 32	2 25 32
Sinbad, G. Brown	Disabled.	
Open Catboats—Start, 4:15—Course, 10 Miles.		
Selfish, W. Smith	6 22 40	2 07 40
Caddie, E. S. Karr	6 37 55	2 22 55
Open Power Boats—Start, 4:20—Course, 10 Miles.		
Henrietta, F. Singer	6 25 52	2 07 40
Cabin Power Boats—Start, 4:25—Course, 10 Miles.		
Myra, E. Taylor	6 51 00	2 26 00

Nine boats took part in the flag officers regatta of the Canarsie Y. C. on Aug. 10. In the cabin catboat class the winner was Flora May. Sinbad was the only other craft in the division, and she was disabled off the breakwater. The cabin sloop class was won by Namee and the open catboat class was taken by Selfish. The regatta committee was Martin F. Plage, E. M. C. Cane and George Masters. The summary:

Cabin Sloops—Start, 4:05—10 Miles.		
	Finish.	Elapsed.
Namee, A. H. Behrens	6 07 45	2 14 45
Elizabeth II., E. Cornell	6 37 27	2 32 27
Kenewaha, W. McLaughlin	Did not finish.	
Cabin Catboats—Start, 4:10—10 Miles.		
Flora May, W. Menzlich	6 35 32	2 25 32
Sinbad, G. Brown	Disabled.	
Open Catboats—Start, 4:15—10 Miles.		
Selfish, W. Smith	6 22 40	2 07 40
Caddie, E. S. Karr	6 37 55	2 22 55
Open Power Boats—Start, 4:20—10 Miles.		
Henrietta, F. Singer	6 25 52	2 07 40
Cabin Power Boats—Start, 4:25—10 Miles.		
Myra, E. Taylor	6 51 00	2 26 00

National Y. C.

THE seventh race in the championship series of the Lower Bay was decided under the auspices of the National Y. C. on Aug. 10. The regatta committee comprised of D. G. Griffin, A. MacDougal, and Howard Scribner used H. A. Langhaar's schooner Rosina as a committee boat. In Q division Alice won by 1m. 50s. from Spider. On corrected time, La Cubana won in the first division of the handicap class. Cyric won the S division and Merry Widow was the first of the knockabouts. The summary:

Sloops, Class Q—Start, 3:15—Course, 10 1/2 Miles.		
	Finish.	Elapsed.
Alice, G. Davis	4 56 00	1 41 00
Spider, H. Chubb	4 57 50	1 42 50
Suelew, E. F. Luckenbach	4 58 10	1 43 10
Soya, W. A. Barstow	5 13 00	1 58 00
Handicap Class, 1st Div.—Start, 3:20—Course, 10 1/2 Miles.		
Joy, Le Sauvage & Geer	5 15 55	1 55 55
La Cubana, J. H. Ives	5 19 03	1 59 03
Corrected time on La Cubana, 1:52.06.		
Handicap Class, 2d Div.—Start, 3:20—Course, 10 1/2 Miles.		
Gunda, W. Hunt Hall	5 29 32	2 09 32
Sloops, Class S—Start, 3:25—Course, 10 1/2 Miles.		
Cyric, Dr. C. L. Atkinson	5 24 16	1 59 16
M. & F. L. C. M. Camp & Marchant	5 35 06	1 10 06
M. & F., C. M. Camp	5 35 00	2 10 00
Gravesend Bay Knockabouts—Start, 3:30—Course, 8 Miles.		
Merry Widow, E. Bailey	5 13 07	1 43 07
Suffragette, Platt & Tiemann	5 24 26	1 43 26
Mouse, R. Dingman	Disabled.	
Slow Poke, F. L. Durland	Did not finish.	

Huguenot Y. C.

NEW ROCHELLE, N. Y., Aug. 10.—The Huguenot Y. C. regatta was sailed to-day off Huckleberry Island. Considering the fact that several nearby clubs were off on their annual cruise, the entry list was very good. However, the hustling regatta committee, V. C. Brown, T. J. Coe and H. M. Williams, generally can draw the best available. The wind was strong and the sea choppy making things very wet for the little fellows. The absences from different classes made it necessary to mix classes to some extent, all of which added excitement to finishes. There were many "Peter Thompsons" on board the yachts, but they stood for the wetting in true sailor fashion.

The Larchmont Interclub class led away, H.

M. Goldschmidt's Hamburg II., crewed by Tom McCahill and Mrs. Kenneth Whiting, winning by 53s. The unbeaten Drena, owned by Sam Shethar, from Port Washington, and crewed ably by his charming superior fraction, won in the mixed sloop class, beating Virginia by 10m. W. S. Macintosh's Gemini won in the Star class by 3m. The summary:

Larchmont Interclub Class—Start, 2:00—5 1/2 Miles.		
	Finish.	Elapsed.
Hamburg II., M. M. Goldschmidt	3 01 00	1 01 00
Whiff, W. R. Manny	3 01 53	1 01 53
Sloops, Mixed Class, P and Q—Start, 2:15—5 1/2 Miles.		
Crescent, W. E. Southwick	3 12 32	0 57 32
Sally IX., A. E. Black	3 13 51	0 58 51
Corrected times: Sally IX., 0:56.45; Crescent, 0:57.32.		
Sloops, Mixed Class—Start, 2:15—5 1/2 Miles.		
Maryola, A. F. Bradley	3 21 49	1 06 49
Insurgent, U. D. Cutting	3 30 52	1 15 52
Sloops, Mixed Class—Start, 2:20—5 1/2 Miles.		
Drena, S. Shethar	3 23 10	1 03 10
Virginia, C. Shields	3 33 14	1 13 14
Scylla, E. A. Sierck	Did not finish.	
Sloops, Class R—Start, 2:20—5 1/2 Miles.		
Pixy, L. F. Eggers	3 35 56	1 20 56
Star Class—Start, 2:25—5 1/2 Miles.		
Gemini, W. S. Macintosh	3 50 43	1 15 43
Star Faraway, A. B. Fry	3 53 39	1 18 39
Comet, W. Rand	Time not taken.	

Detroit Crosses Ocean.

AFTER a good deal of knocking about and much bad weather, the motor boat Detroit, 35 feet over all, commanded by T. F. Day, reached Queenstown from New York. She made the trip in twenty-four and a half days. On her arrival she had 200 gallons of gasolene. Her log is interesting:

July 16.—Left; covered 44 miles.
 July 17.—165 miles.
 July 18.—150 miles.
 July 19.—170 miles.
 July 20.—165 miles; very squally.
 July 21.—22 miles only; stopped engine.
 July 22.—43 miles; sea anchors out.
 July 23.—150 miles.
 July 24.—145 miles; good weather.
 July 25.—103 miles; head sea.
 July 26.—150 miles; good weather.
 July 27.—120 miles.
 July 28.—105 miles.
 July 29.—140 miles; bad weather, heavy rain, hard to steer.
 July 30.—108 miles; hove to part of day.
 July 31.—72 miles.
 Aug. 1.—140 miles.
 Aug. 2.—60 miles; ballast shifting.
 Aug. 3.—152 miles.
 Aug. 4.—156 miles.
 Aug. 5.—149 miles.
 Aug. 6.—92 miles, half speed, squally, barometer falling.
 Aug. 7.—Passed Old Head, Kinsale, 5 P. M.; landed 9 o'clock.

Otto Heins Cup.

OTTO HEINS, president of the Bosch Magneto Company, has presented to the Motor Boat Club of America a trophy to be raced for in connection with the international races for the Harmsworth trophy on Aug. 31 and Sept. 2 and 3. The trophy will be known as the one mile international record trophy to be contested for annually.

The record trophy will be raced for immediately after the Harmsworth trophy races. It is to be contested by all foreign and American sportsmen who believe their boat sufficiently fast in a one mile dash. The winner each year will be given a small replica of the trophy by the donor.

There are no restrictions concerning the trophy excepting the rules which govern motor boat racing in general. All boats, whether foreign or American, and which are 40 feet or under in length, may enter the contest. Admiralty rules for deciding the mile dash shall prevail.

The one mile international record trophy will be given over to the Motor Boat Club of America as soon as completed, and the deed and considerations under which the trophy will be contested for will be forwarded to all national

and international clubs desiring to enter the competition or extend a challenge.

It is expected that the announcement of the Heins trophy will create quite a stir in international motor boating circles, as it will provide a final contest where the fastest boat in the world will be decided each year.

The event will be held at Huntington Bay, L. I., on Sept. 2 or 3.

Stamford Y. C.

STAMFORD, Conn., Aug. 10.—Harold Buck's Kelpie won to-day's race for the Stamford Y. C. one-design boats. Dart, R. H. Gillespie, was second. Master Jacob won with Doodle in the Bug class. The summary:

	Elapsed.
Kelpie, Harold Buck	1 09 47
Dart, R. H. Gillespie	1 10 10
Curlew, Gayer Dominick	1 10 42
Snapper, Edward Corning	1 14 47
Killie, Bartholomew Jacob	1 13 26
Osprey, Douglas Elliman	1 13 23
Kittawake, Herman Fleitman	1 14 12

Seawanhaka-Corinthian Y. C.

OYSTER BAY, L. I., Aug. 10.—Two boats took part in to-day's race of the Seawanhaka-Corinthian Y. C., off Centre Island. The winner was Bat, which beat Hen by 1m. 24s. The summary:

Sloops, Class S—Inside Course—Start, 3:10.		
	Finish.	Elapsed.
Bat, O. B. Jennings	4 04 40	0 51 40
Hen, G. Nichols	4 03 04	0 53 04

Michigan—Patricia.

CHICAGO, Ill., Aug. 12.—To-day Patricia beat Michigan for Richardson cup in the best three out of five races in the international regatta on the Great Lakes. Last Saturday Michigan won handily, to-day things were the reverse. This gives each racer one win.

Dream Wins Return Race.

NAVIGATION improved greatly on Kathemma coming back from Bermuda, so that although she was beaten by the little Dream, it was on handicap, of which she had twelve and a half hours. Dream won by 5h. 26m. The boats left Bermuda Tuesday, Aug. 5, at 7 P. M., finishing at Atlantic, Aug. 10. Kathemma got in at 3 A. M.; Dream at 10:04.

Canoeing

A. C. A. Membership.

NEW MEMBERS PROPOSED.

Atlantic Division.—Russell F. Black, 1502 Riverside Drive, Trenton, N. J., by R. E. Margerum; Millard Farr, 185 Hudson street, New York city, by Robert J. Wilkin and Jos. F. Eastmond.

Central Division.—F. Lloyd Wassell, care of W. A. B. Co., Wilmerding, Pa., by Percy W. Lander.

NEW MEMBERS ELECTED.

Atlantic Division.—6512, Earl J. Fisher, 514 West 136th street, New York city; 6513, Norman I. Young, 118 Main street, Ossining, N. Y.; 6514, B. F. Wolfinger, Orange, N. J.; 6515, William J. McAnanny, 172 West 130th street, New York city.

Central Division.—6516, Fred A. Isley, 524 Tallman street, Syracuse, N. Y.

Northern Division.—6517, Keith Donevan, Gananoque, Ont., Canada.

MEMBER REINSTATED.

Atlantic Division.—1308 Henry H. Smythe, 70 Columbia Heights, Brooklyn, N. Y.

RESIGNATION.

Central Division.—6268, Harry A. Logan, Wilkinsburg, Pa., now Landsford, Pa., to take effect Oct. 1, 1912.

TRAP SHOOTING

If you want your shoot to be announced here, send a notice like the following:

Fixtures.

Sept. 4-5.—Wellington Mass.—Paleface G. C. merchandise shoot. Charles F. Mardin, Sec'y-Treas.
 Sept. 12-13.—Cincinnati (O.) G. C. Arthur Gambell, Supt.
 Sept. 14.—Greenwich Gun Club fall tournament. J. H. Finch, Capt.

REGISTERED TOURNAMENTS.

Aug. 20.—Marthasville, Mo.—Daniel Boone G. C. J. O. Wilson, Sec'y.
 Aug. 20.—Canonsburg (Pa.) G. C. A. S. Anthony, Sec'y.
 Aug. 20-21.—Sioux Falls (S. D.) G. C. A. Olson, Sec'y.
 Aug. 20-23.—Montreal, Canada.—Dominion of Canada T. S. A. T. Claude Cooke, Sec'y.
 Aug. 21-22.—Garrison, N. Y.—Garrison-Highland R. and G. C. F. N. Limdebjerg, Sec'y.
 Aug. 22.—Ebensburg, Pa.—Central Pennsylvania T. S. L. tournament, under auspices of Ebensburg G. C. W. R. Thompson, Sec'y, Ebensburg, Pa.
 Aug. 23.—Gouverneur (N. Y.) R. and G. C. W. R. Patrick, Sec'y.
 Aug. 24.—La Crosse (Wis.) G. C. J. V. Winter, Sec'y.
 Aug. 27-29.—Cedar Point, O.—Indians. C. W. Budd, Sec.
 Aug. 27-29.—Portland, Ore.—The Interstate Association's Seventh Pacific Coast Handicap tournament, under auspices of the Portland G. C.; \$1,000 added money. The winner of first place in the Pacific Coast Handicap is guaranteed \$250 in cash and a trophy. Elmer E. Shaner, Sec'y-Treas., Pittsburgh, Pa.
 Aug. 28-29.—Fulda (Minn.) G. C. H. W. Converse, Sec'y.
 Aug. 28-29.—Baltimore, Md.—Maryland S. S. A. State tournament. Geo. P. Mordecai, Sec'y, 215 American Building, Baltimore, Md.
 Aug. 29.—Wheeling, W. Va.—Big Game, Rifle, Rod and Gun Club. H. G. Frederichs, Sec'y.
 Aug. 29-30.—Sedalia (Mo.) G. C. John McGrath, Sec'y.
 Aug. 30.—Sandusky, O.—Ye Oak Meadow G. C. Ira C. Krupp, Sec'y.
 Aug. 31.—Menominee Falls (Wis.) G. C. Jas. A. Pike, Sec'y.
 Sept. 2.—Hammond (Ind.) G. C. J. C. Becker, Sec'y.
 Sept. 2.—Ft. Collins (Colo.) Shooting Club. Jos. Garst, Sec'y.
 Sept. 2.—Tower City, Pa.—Sheridan G. C. W. E. Daub, Mgr.
 Sept. 2.—Ogdensburg (N. Y.) S. A. J. M. Morley, Sec'y.
 Sept. 2.—Bridgeport, Conn.—Western Connecticut T. S. L. tournament, under auspices of Sea Side G. C. Earl R. Lewis, Sec'y.
 Sept. 2.—Lima (O.) G. C. A. W. Fisk, Pres.
 Sept. 2-3.—Fayette, Mo.—Afro-American Trapshooters' League Grand Afro-American Handicap. T. H. Cohron, Sec'y.
 Sept. 2-3.—Lynchburg, Va.—Virginia State tournament, under auspices of Lynchburg G. C. W. R. Winfree, Sec'y, 1008 Main St., Lynchburg, Va.
 Sept. 2-3.—Paducah (Ky.) Target Club. C. E. Pursell, Sec'y.
 Sept. 3.—Celina (O.) G. C. Geo. Kistler, Sec'y.
 Sept. 3.—Bucklin (Mo.) G. C. Ed. Herriman, Sec'y.
 Sept. 5.—Holdrege (Neb.) G. C. Thos. Hufford, Sec'y.
 Sept. 5.—Cumberland (Md.) G. C. F. Billmeyer, Sec'y.
 Sept. 5.—London (O.) G. C. H. L. Hildinger, Sec'y.
 Sept. 6.—Mechanicsburg (O.) G. C. tournament.
 Sept. 10.—McKeesport, Pa.—Western Pennsylvania T. S. L. tournament, under auspices of Youghiogheny Country Club. R. J. Caughey, Sec'y.
 Sept. 10-11.—Caro (Mich.) S. A. F. W. Bowles, Sec'y.
 Sept. 10-13.—Denver, Colo.—Rocky Mountain Interstate Sportsmen's Association; \$5,000 added money. Ambrose E. McKenzie, Mgr.
 Sept. 11.—Worcester (Mass.) Sportsmen's Club. Jay Clark, Jr., Sec'y.
 Sept. 12-13.—Cincinnati (O.) G. C. A. B. Heyl, Pres.
 Sept. 13-14.—Beverly, Mass.—Massachusetts State tournament, under auspices of Massachusetts State T. S. A. F. E. H. Sheldon, Sec'y.
 Sept. 16-17.—Evansville, Ind.—Indiana State tournament, under the auspices of the Recreation G. C. Geo. A. Beard, Cor. Sec'y.
 Sept. 17.—Huntingdon, Pa.—Central Pennsylvania T. S. L. tournament, under auspices of Alexandria G. C. L. M. Hagerty, Sec'y, Alexandria, Pa.
 Sept. 17-18.—Brookfield, Mo.—Linn County G. C. Ed. Barton, Sec'y.
 Sept. 17-20.—Atlantic City, N. J.—Westy Hogans of America tournament. Bernard Elsesser, Sec'y.
 Sept. 18-19.—Bloomington, Ill.—McLean County G. C. C. A. McDermand, Pres.
 Sept. 19.—Springfield (O.) G. C. Harry C. Downey, Sec.
 Sept. 20.—Sangerfield (N. Y.) Country Club. R. H. Terry, Sec'y.
 Sept. 23-24.—Lewiston (Idaho) G. C. P. T. Lomax, Sec'y.
 Sept. 25.—Mt. Vernon (N. Y.) G. C. A. Betti, Sec'y.
 Sept. 26-27.—Baltimore, Md.—West Forest Park G. C. Richard L. Collins, Sec'y.
 Sept. 26-27.—Capron (Ill.) G. C. Alex. Vance, Sec'y.
 Sept. 27.—Saginaw (Mich.) Canoe Club. T. A. Saylor, Sec'y.
 Oct. 1-2.—Omaha (Neb.) G. C. F. T. Lovering, Sec'y.
 Oct. 2.—Piedmont (W. Va.) G. C. G. N. Hoover, Sec.
 Oct. 3.—Wapakoneta (O.) G. C. Chas. E. Zint, Sec'y.
 Oct. 3.—Elkton (Md.) G. C. H. L. Worthington Mgr.
 Oct. 5.—Philadelphia, Pa.—Meadow Spring G. C. Wm. F. Letford, Sec'y.
 Oct. 8-10.—Iowa State Sportsmen's Association. Jos. Kautzky, Sec'y.
 Oct. 9-10.—Indianapolis (Ind.) G. C. Geo. Alig, Jr., Sec'y.

Oct. 15-18.—Cincinnati, O.—The Interstate Association's Post-Season tournament, on the grounds of the Cincinnati G. C.; \$1,000 added money. Elmer E. Shaner, Sec'y-Treas., Pittsburgh, Pa.

 Oct. 30.—Medford (Okla.) G. C. Dr. I. V. Hardy, Sec'y.
 1913.
 Jan. 22-25.—Pinehurst (N. C.) Country Club. Leonard Tufts, Pres.

DRIVERS AND TWISTERS.

Next shoot of the Chicago and Interurban League will be on the grounds of the South Chicago Gun Club, instead of the Arlington Heights Gun Club, by agreement.

S. D. Fowler, of Walcott, aged seventy-eight, the oldest living trapshooter in New York State, and a marksman of considerable reputation, took part in the tournament at Fulton, N. Y., Aug. 7. Who says trapshooting isn't a healthful recreation?

We are informed by the International Falls Gun Club, through Elmer E. Shaner, Sec'y-Treasurer of the Interstate Association, that the tournament registered for the International Falls (Minn.) Gun Club, scheduled for Aug. 1, was cancelled owing to the loss of their shooting grounds.

The Interstate Association announces that, in addition to the \$1,000 added by them, the Portland Gun Club will add \$20 to each of the regular events (the handicap and double-target events not included), at the Pacific Coast Handicap tournament, scheduled for Portland, Ore., Aug. 27-29. This will make a grand total of \$1,500 added money at this tournament.

At a meeting of shooters, held Tuesday night, Aug. 6, at Birmingham Gun Club, it was determined to have a special car for those from Alabama and sister States who intend to take in the \$5,000 Denver handicap. John Warren and Boh Skinner were appointed a committee. Arrangements were made for a special car to leave Birmingham on Saturday, Sept. 7, at noon, going through without change to Denver, arriving there Monday morning, Sept. 9, the shoot beginning Sept. 10. Any shooter desiring to go with the Birmingham crowd should make reservations early.

Secretary Bernard Elsesser, of the Westy Hogans, announces that he has received an unusually large number of requests for programs from shooters who have never attended a Westy Hogan tournament. This, he writes, is a good sign for a record-breaking attendance at this year's shoot, which will be held at Venice Park, Atlantic City, N. J., Sept. 17-21. The Hogans are predicting that the number of entries this year will reach the 400 mark. This prediction is based on the attendance figures of each Westy Hogan tournament, and which show a steady increase each year. The first year, 1907, there were 63 entries; in 1908, there were 104; in 1909, 178; in 1910, 233, and in 1911, 309.

W. G. BEECROFT.

Plattsville Gun Club.

PLATTSVILLE, Wis., Aug. 3.—Eleven shooters faced the traps to-day. Messrs. Altenburg and Kitts came up from Hazel Green and did some creditable work with us. The scores:

Targets:	50	25	25	25	25
P. Karrmann	42	21	22	20	20
L. Bartling	43	23
T. Bridges	40
C. Gilmore	41	19	20	21	21
Altenburg	42	23	21	20	..
Dorcher	44	21	23	25	21
Long	45
McKown	11	21
J. Stark	38
Kiltor	39	22	20	21	..
Pitts	..	11	14

T. J. BRIDGES, Sec'y.

Charlottesville Tournament.

CHARLOTTESVILLE, Va., Aug. 8.—The tenth annual shoot of the Charlottesville University of Virginia Gun Club was held on Aug. 7. The attendance was gratifying, forty-two shooters participating in the various events, of whom thirty-two shot through the entire program of 200 targets. During the day, 8,470 targets were thrown from one trap in the program events, including the special handicap event of 25 targets, and this does not include those used in shooting off the ties. It seems to the writer that this is almost a record for one trap. The shooters were mostly veterans in the game and from the moment the first gun was fired until the last target was thrown, things moved with clock-like precision.

Mr. George L. Bruffey was the manager, as he has been of the nine other shoots held in the years that are gone, and this one added additional luster to his reputation as a manager of tournaments. No complaints were heard; every one was treated fairly; the arrangements for the comfort of those taking part and the visitors were perfect. The day was ideal and conditions perfect, except for a fluky wind, which ever and anon played havoc with the scores.

The first, sixth, seventh, eighth and tenth events were for six prizes, the others contained five each, most of which were cash prizes, there being \$91 distributed among the ten events. This seemed to please the shooters, who do not enthuse when shooting for a conglomerate mass of merchandise stuff. However, the merchandise prizes on this program were above the average, and well worth carrying home.

E. M. Daniel, of Lynchburg, was high amateur, and was high over all, scoring 194 out of 200. Dr. W. W. Dennis, of the same place, and S. P. Sillings, of Staunton, were next in line with 183. Baskerville was high professional, scoring 183.

The special handicap event at 25 targets attracted the attention of the visitors, and was a warmly contested affair. First in this event was won by Miles Taylor, of the Anolostan Gun Club, of Washington, D. C., who went straight from 18yds. He was closely pressed by E. M. Daniel, who shot from 20yds. and scored 24. Fisher and Battle, also shooting from 18yds., scored 24 each. Baskerville and Goodloe, professionals, also scored 24. Following are the scores made during the day:

Shot at. Broke	Shot at. Broke
Daniel	200 194
Dennis	200 183
Sillings	200 183
Baskerville	200 183
Fisher	200 179
Bruffey	200 178
Atkinson	200 175
Fox	200 175
Rea	200 172
W O Harrison	200 172
W B Anderson	200 171
Scholl	200 170
Peck	200 170
Taylor	200 169
Battle	200 169
Day	200 168
George	200 168
Goodloe	200 168
Runnels	200 168
Coyner	200 170
Wheat	200 167
Cook	200 156
J E Harrison	200 163
Moore	200 166
Moorman	200 166
Ferd	200 165
Hammond	200 165
Huseman	200 164
Page	200 161
Burgess	200 167
Middlekauff	200 155
Puffenberger	200 154
I A Anderson	200 149
Hall	180 151
Thomplins	180 124
Caw	120 103
Nelson	120 100
F M Rea	100 66
C B Cook	160 101
McBryde	80 40
Lyle	40 31
Peyton	40 25

The special event at 25 targets resulted as follows: Taylor 25, Daniel 24, Fisher 24, Battle 24, Baskerville 24, Goodloe 24, Nelson 23, Huseman, Hammond, Sillings, W. R. Anderson, Puffenberger, Fox, Moorman 21 each; W. O. Harrison, Burgess, George Dav, Page, Dennis, 21 each; Atkinson, Dr. Rea, and Moore, 20 each; Peck, Runnels, Middlekauff, J. E. Harrison, Wheat, F. L. Cook and Coyner, 19 each; Ford, Scholl, Bruffey, Gaw, 17 each. The 24s divided second; Nelson won third alone on 23; the 22s shot off the tie miss-and-out, and W. R. Anderson won; the fifth, sixth and seventh ties were shot off, and Harry George won the fifth; Dr. Rea won the sixth, and James M. Coyner won the seventh.

Lunch was served by the ladies of the Episcopal Church. It was a fine spread and was well patronized. Miss Bocoock, who was assisting in feeding the hungry, found time to sing several negro songs. Her imitation of their dialect was perfect and added much to the enjoyment of the occasion.

Dick Snow was the official scorer, and his work was flawless. He is an old shooter, and did not let the scores get "balled up."

George W. Peck, Jr., of the Anolostan Gun Club, of Washington, D. C., who by the way is the original of "Peck's Bad Boy," was on the firing line, and after it was over was heard to remark, "That Charlottesville could borrow anything he had, for he had \$1,000 worth of fun."

Dr. W. W. Dennis was in fine form and gave "Shooting" P. Sillings a hot race for second high average, and he might have beaten his Staunton friend if it had not been for a "punk" load. The representatives from Lynchburg were surely a shooting crowd and will be heard from at the State shoot.

The Virginia State shoot will be held at Lynchburg this year. It will open on Labor Day, as is the custom always. The boys say they have everything in apple pie order for their visitors, and that there will be about \$900 in cash and prizes to be contested for by the members of the association.

Many of those who attended this shoot will be on hand at the registered shoot to be given by F. L. Cook, at Mt. Elliot, the latter part of this month. Watch out for the programs. Cook will give a good shoot. He is a prince when it comes to entertaining, and you don't want to miss this one.

MILES TAYLOR.

FOREST AND STREAM may be ordered from any news-dealer. Ask your dealer to supply you regularly.

Mattatuck Rod and Gun Club.

WATERBURY, Conn., Aug. 10.—The Western Connecticut Trapshooters' League held a tournament to-day on the grounds of the Mattatuck Rod and Gun Club.

High gun score for the day was made by A. L. Chamberlain, of New Haven, who scored 139 out of a possible 150.

New Haven team, No. 1, won the team race with a score of 439 out of 500. Other team scores were: New Haven No. 2, 411; Hartford, 407; Waterbury, 395; Danbury, 330.

Roanoke Gun Club.

A BRISK wind made shooting somewhat difficult Saturday, Aug. 10, when there were twenty-eight contestants on the firing line at the traps of the Roanoke Gun Club.

Scratch—First, Dr. Richards; second, Atkinson. Class A—First, J. W. Poindexter; second, tie between Jones and Wilkinson.

Table listing scores for Roanoke Gun Club. Columns include names, Shot at, Broke, and Per Cent. Includes names like L. G. Richards, *Storr, Atkinson, etc.

Hercules Gun Club.

TEMPLE, Pa., Aug. 10.—The annual registered tournament of the Hercules Gun Club was a great success with an entrance of thirty-five shooters.

A. J. Mengel, the noted amateur of Mohnton, Pa., a suburb of Reading, broke 145 and took high amateur gun.

A. S. Heil won the extra event on 24 doubles, 12 pairs, with 23 to his credit. J. M. Hawkins led the professional field with 142, but three targets shy of Mr. Mangel.

CAPT. GEORGE DAMERON was high man at the shoot on Aug. 11, breaking 91—not up to his mark, but then he has not been keeping up his practice lately.

Table listing scores for Northern Kentucky Gun Club. Columns include names and scores. Includes names like Van Girder, Dameron, Woodbury, etc.

Belle Vernon Gun Club.

BELLE VERNON, Pa., Aug. 6.—Seventy-four was not so bad in this season, so thickly populated with tournaments. We got 'em nevertheless, and they all liked what we gave 'em. Geo. E. Painter was altitudinous amateur with only 7 misses out of 150 tries. Geo. Cochran and B. H. Matthews tied for place with 138. Woolfolk Henderson rebuked his fellow entrants from the pink sheet department by getting 145, his nearest brother pro., L. W. Cumberland, doing 10 less for place.

Table listing names and scores for Belle Vernon Gun Club, including L. J. Squier (129), W. Henderson (145), C. C. Irwin (133), R. J. Gumbert (113), W. H. Schmler (113), Geo. Cochran (120), J. H. Elliott (138), L. W. Cumberland (135), C. F. Moore (138), L. W. Canon (123), J. W. Gribble (116), Wm. Zimerly (105), R. Rathmell (126), A. H. Aber (134), A. H. Rigsby (135), L. W. Huff (115), P. W. Brann (119), T. R. Egge (46), Tim Wilson (106), B. B. Hansell (119), I. E. Shepherd (99), L. Myers (110), A. Murphy (124), A. S. Bisloux (119), B. H. Matthews (138), J. A. Carry (138), C. Nickles (90), F. Cotter (113), H. R. Boyd (128), M. A. Ullery (112), L. D. Davis (127), S. G. Purois (75), A. S. Anthony (125), G. E. Painter (143), J. E. Wampler (112), Dave Shaw (100), W. H. Henman (119), J. W. Shepler (120), G. L. Pearson (127), G. J. Elliott (117), *Jas. Lewis (129), J. I. Morrison (129), Hans Hardy (117), W. J. Hickey (95), L. Lantenstager (109), J. F. Calhoun (137), Al Hickman (126), R. G. Knight (100), T. H. Thompson (93), T. P. Grant (103), F. C. Speers (71), V. M. Pistorious (101), W. L. Born (118), Dave Donley (99), W. Murphy (98), O. L. Kirsch (127), J. K. Lawson (130), E. E. Frost (121), E. McGuiley (77), C. Waters (96), W. H. Herberson (123), P. T. Evans (118), J. E. Peurod (110), L. W. Baker (122), A. W. Whalen (89), H. G. Gillespie (141), A. J. Fetzer (122), W. M. Beck (124).

THREE PRESIDENTS.

Farrell, Warren G. C.; Miller, Minnesota State Sportsmen's Assn.; Rowe, Crookston G. C.

Central Illinois Trapshooters' League.

SPRINGFIELD, Ill., Aug. 8.—Illinois Gun Club handled the league shoot held under its auspices yesterday and to-day, to the absolute satisfaction of every one present, while Dr. J. R. Leib, its secretary, was indefatigable in his efforts to keep every one from thinking for himself. Buckles was amateur par excellence, his score of 280 being all necessary to collect the incentive. Venable was only one further away, while Crothers made two less and sat in third place.

There was great sport among the pros. Graham and Bills tied for top with 291, each getting 145 first day and 146 on day two. Kirkwood got one less on day one and tied with them on day two, thus taking third portion of the dust (of targets only).

Table with columns for First Day and Second Day, and sub-columns for Shot at and Broke. Lists names and scores for various participants like Buckles, Venable, Crothers, Connor, Hall, Leib, Loring, Davidson, Ensminger, Houston, Gray, Farmer, McCosker, Peters, A. L. Stubblefield, Nerr, Burns, Troy, McGinnis, Gunstein, Lewis, McDermand, L. W. Stubblefield, Morley, Workman, Allen.

Table for Professionals in the Central Illinois Trapshooters' League, listing names and scores for Graham, Bills, Kirkwood, Cadwallader, German, Stannard, Matthews, Winans.

Mitchell Gun Club.

MITCHELL, S. D., Aug. 7.—Two ideal days showed yesterday and to-day during our tournament, being a local ginger ale highball (G. A. H.), enthusiastically welcomed and suggesting another. Many good scores were recorded, with Potter White the big noise. This young clear eye made a run of 105 and won high average for two days, reducing to macadam 293 out of 300. Some kute sighting for an amateur, being only one less than high "targets only" expert, Geo. Kreger. Alvin Shaw tried the vision line mighty well, running 86 without a miss, getting second high amateur gun with 281. W. A. Brown loped along in the caravan with 277, enough to take him into third money. Among the educators, H. G. Taylor "showed 'em" with a run of

134, and a final two-day score of 293, or one too few to win, 'cause Kreger made 294.

Table with columns for 1st Day and 2d Day, listing names and scores for F. F. Chladek, A. K. Stilwell, Wm. Thompson, S. A. Barton, F. F. Srstka, A. M. Shaw, J. P. White, H. Kress, A. Wallace, C. A. Ferguson, A. H. Gilson, E. T. Myers, S. A. Huntley, W. A. Brown, E. L. Cantwell, R. Trombly, L. Rosenblatt, M. H. Gosche, A. E. Eddy, John Snyder, B. B. Ward, C. H. Anderson, H. G. Taylor, G. A. Olson.

C. A. F., Sec'y.

Wilson Gun Club.

WILSON, N. C., Aug. 7.—There was a long and interesting program here yesterday and to-day. The regular and added events totaled 250 white fliers each day. J. B. Perrington broke 454 out of his 500. Long run was made by Homer Clark, his trip-up coming on the 122d bird. Perrington took high average on regular program with 273 out of 300.

Table with columns for 1st Day and 2d Day, listing names and scores for J. B. Pennington, E. F. Killette, J. H. Drcher, W. W. Simms, E. D. Taylor, Wm. Walls, Geo. Simms, H. Clark, E. H. Storr, R. H. Flautt, C. H. Knight, S. R. Coley, C. C. Austin, J. B. Gray, L. B. Pearce, J. C. Tilghman, N. Anderson, Jr., R. E. L. Cook, J. D. Barnes, E. S. Richards, Geo. L. Lyon.

Marysville Sportsmen's Association.

MARYSVILLE, Pa., Aug. 3.—The Marysville Sportsmen's Association entertained at their shooting grounds at Seidel's Park, yesterday the crack team of the Rutherford Gun Club. Very good shooting by Kessler, Martin, Worden, Keller, Miller, Cumberland, Wise, Wilson and Mitchell were features of the evening. Also the team shoot between Rutherford and Marysville, which resulted in the following scores:

Table comparing scores between Rutherford and Marysville teams, listing names and scores for Sarvis, Sr., Hicks, Spangler, Miller, Allcman, Geo. Sarvis, Wilson, Wise, Martin, Keller, Worden, Mitchell.

The total scores for the afternoon follow:

Table with columns for Shot at and Broke, listing names and scores for Kessler, Martin, Worden, Keller, Miller, Cumberland, Wise, Wilson, Mitchell, Hicks, Spangler, Geo. Sarvis, Sarvis, Sr., Alleman, Rocky, Slucker, Sarvis, Jr., Erdley, F. G. Stees.

S. S. White Gun Club.

HOLMESBURG JUNCTION, Pa., Aug. 3.—J. Griffith drilled 146 targets here to-day, giving him high gun for the tournament. He was only one plug ahead of G. McCarty, who pulled two more than Buckwalter. Les. German and Will Hawkins bridged it at 148, with Neaf Apgar gumming along with four too many cavities in his score to tie the aforesaid high-mucks. There was the usual goodly attendance drawn by the dental gentleman from Philadelphia, with more happiness among those present than it is usual to find on a visit to the gentleman of pain and forceps—possibly there is safety in numbers, though.

Table listing names and scores for O. Groff, B. P. Donnelly, J. M. Heitelbeittle, H. Wiley, F. B. Zeigler, E. R. Christman, H. Buckwalter, F. Coleman, J. D. Wright, A. B. Freeman, S. M. Freeman, G. Gerhardt, J. Minnick, C. B. Platt, A. Robbins, L. Zanes, N. L. Looy, H. B. Cook, T. E. Hinkson, A. Runner, B. Harper, W. H. Mathews, C. H. Keene, J. McKean, W. B. Abbott, F. Russell (134), H. George, C. B. Cole, Wm. Clegg, E. Ford, W. E. Robinson, H. Perry, F. W. Mathews, S. T. Atchley, J. Budd, A. Hill, C. Newcomb, H. Sloan, G. McCarty, R. Hall, W. Wakeman, W. Letford, C. Keenan, H. P. Carlon, J. Griffith, H. L. Brown, W. B. Darton, N. Apgar, L. S. German, H. H. Stevens, J. M. Hawkins, J. F. Pratt, V. V. Dorp, Joslyn, V. du Pont.

Blue Ribbon Gun Club.

CONCORDIA, Kans., Aug. 8.—Yesterday and to-day were literally a blue ribbon shoot. Everyone said the Blue Ribbon Gun Club came honestly by its title, if it was intended to cover hospitality. J. H. Wilder was high amateur with 286 out of 300, E. W. Varner polling second with one break less. Third place was divided among H. E. Snyder and Chas. McKee, each toppling over 284. Bill Crosby was there with the eye, irreparably damaging 292 aero-saucers, getting just two more credits than Fred Gilbert on the score sheet. Billy Heer slipped into the high among the esoteric affinity with 289. The scores:

Table listing names and scores for E. P. Bender, Nick Carter, *R. H. Crane, J. T. Clark, Guy Cooper, J. F. Caldwell, M. B. Empson, *D. N. Freeman, Chas. Gellatly, E. T. Gibbs, W. Huscher, R. C. Hulburd, *C. Krohn, *W. G. Lytle, D. Linderman, L. S. Myers, R. Murphy, Chas. McKee, Chas. Sewart, C. L. Snyder, H. E. Snyder, Mrs. H. E. Snyder, J. H. Wilder, H. Wetzig, E. W. Varner.

Professionals: W. R. Crosby (292), W. H. Heer (283), Fred Gilbert (290), *Shot on only one day. D. D. Gross (284), H. N. Kirby (242), Ed. O'Brien (287).

Green Bay Gun Club.

GREEN BAY, Wis., Aug. 4.—The thirteenth annual State tournament of Wisconsin and University of Michigan Trapshooters' Association, held yesterday and to-day, brought out a record attendance, 88 selected from the best amateur and professional shooters being on hand to enjoy the sport. T. E. Graham was topper with 291 out of 300. F. Campbell rated second with 288, and 287 gave third to Guy Dering. Fred Bills was away up among the targets, getting only 294 out of 300; seconded by R. W. Clancy with 285.

Marion Gun Club.

MARION, Ia., July 31.—The irrepressible Billy Hoon copped our thunder to-day, in addition to return carefare. He tagged 145 white fliers, bagging just one more than Mr. Campbell, who in turn clipped the wings of three more than Bill Witleaf, every one of whom was a few up on all the pink sheet shooters, the highest of which was W. T. Garrett with 138. It was one of the best shoots that has struck the West this year. Enthusiastic and genial was the crowd, well taken care of by the Marion bunch.

South Chicago Gun Club.

CHICAGO, Ill., Aug. 4.—The wind off the Lake made the shooting hard, although some good scores were made. In the regular club event at 50 targets, Dr. Stanton and Gilbert Hausler were tied with 48 out of 50 in the shoot-off. It was still a tie to the last target, which Hausler missed, the score being 24 to 23 in favor of the Doctor. The boys are making preparations for a big crowd at the Interurban League shoot on Sunday, Aug. 18. We expect about one hundred shooters if the weather is nice. The South Chicago Gun Club is always ready to receive visitors and encourage new shooters. The club is three years old, and have a membership of 135 active shooters. Scores of the shoot to-day, at 50 targets, No. 1 was for practice; No. 2, regular shoot:

WINCHESTER

Self Loading Shotgun

MODEL 1911

A comparison between the Winchester Self-Loading shotgun and other makes is all that is necessary to convince anyone of the great superiority of the Winchester Self-Loader. Note the absence of unsightly screws and pins and of dangerous projecting parts. Note the neat little trigger lock, which operates cross-wise and cannot be jarred out of place. Take the gun down and note how easily it separates into only two parts, without releasing small parts. Note how simple is the action, and that the springs are of coiled wire, the most durable kind. Then note the general finished appearance of the whole gun; and remember that all metal parts are made of nickel steel—about twice as strong as that used in repeating guns of other makes. The barrel has to be pulled back only when starting to shoot, as the recoil does the reloading afterwards. The gun is readily used as a single loader. No adjustment is required to shoot different loads; and no unpleasant effect is felt from the recoil, as it is divided in the gun. Made in 12 gauge only, and a much better shooter than the ordinary gun. Examine one at your dealer's.

**A Gun That Is Unexcelled
For Duck Shooting :: ::**

"Steel where steel belongs" Superiority

is being demonstrated day after day at tournaments large and small, in every section of the United States. **Peters Shells** are the only ones having steel of proper kind in the head and rim, and the only ones in which the correct method of construction is used. Their unequalled shooting quality contributed to the following victories at the traps:

Twelfth Alabama State Tournament.

THE twelfth annual State tournament, held at Birmingham, Aug. 6 and 7, was a great success. A large crowd of shooters from Alabama and adjoining States was on hand to enjoy an attractive program and the genuine Southern hospitality extended to them by the officers and members of the local club.

Ideal weather conditions favored the shooters all three days.

Secretary O. L. Garl had worked hard and long to make this shoot the best in the history of the club, and from the complimentary expressions heard, he succeeded beyond his expectations.

Three perfectly working traps, a well drilled force of trappers, pullers, scorers, referees and squad hustlers, backed up by that prince of cashiers, Al. Gehegan, and his assistant William Fox, all combined to make the tournament run smoothly. In addition to these, the little comforts of the shooter were arranged, such as larger shelter tents with plenty of comfortable chairs, with large barrel of ice-water in each tent, gun racks and stands conveniently placed, and a system of publicity for the scores never before excelled. It is such comforts and conveniences as these—little things though they be—which go to make the shooter enjoy a tournament, and the best inducement in the world for him to attend the next one.

Monday, Aug. 5, was practice day, and 32 shooters were on hand. The program consisted of five events of 20 targets each, a total of 100 single targets, and an extra event of 25 pairs. Highest scores this day were made by H. D. Freeman and H. D. Gibbs, who broke 99 out of the 100; Walter Huff broke 98, R. R. Holt and Guy Ward 97. Of the amateurs, J. R. Livingston broke 96, with J. K. Warren second with 94.

In the double-target event, Huff broke 46, Freeman 45 for the professionals, while J. K. Warren and Gentry Hillman were high amateurs with 41 each.

The individual scores in detail for this day are here given:

Walter Huff ... 100 98	P B Plummer... 100 85		
E M Holtz.... 100 97	T A Cassetty... 100 82		

The scores made at the 25 pairs were: Professionals—Walter Huff 46, H. D. Freeman 45, Guy Ward 41, E. R. Holt 39, L. M. Norwood 35, T. A. Cassetty 26. Amateurs

—J. M. Warren 41, Gentry Hillman 41, W. M. Griffith 38, C. J. Broyles 32, R. R. Skinner 31, H. E. Ewing 26.

Tuesday, First Day.

Ideal weather favored the 64 contestants on the first day. Nearly all shot through the entire program of 250 targets, 150 of which comprised the registered program—ten events of 15 targets each, and four extra events of 25 targets each.

Professional honors to-day went to Walter Huff, of Macon, Ga., with 147 out of 150. H. D. Gibbs, of Union City, Tenn., second with 146; H. D. Freeman, of Atlanta, Ga., third with 145; E. A. Holt, of Montgomery, Ala., fourth with 144, and Guy Ward, of Birmingham, fifth, with 143.

On the total of 250 targets for the day Gibbs was first with 244, Huff and Freeman tying with 243 each; Ward third with 240; Holt 238.

Amateur honors on the 150 registered targets were won by J. K. Warren, of Birmingham with 144; J. R. Livingston second with 142, and W. H. Jones, of Macon, Ga., third with 141. W. T. Laslie, of Tuskegee, Ala., and Vassar Cates, of Brunswick, Ga., broke 140 each. On the 250 targets, Warren and Jones tied on 237, Laslie and Cates scoring 236, D. A. Edwards, of Memphis, 232, and "Big John" Livingston 231.

The last two events of 25 targets each counted on the State championship race, Wednesday's program being a repetition of that of Tuesday. In this the first half of the State championship race, Laslie went out with 49, Warren 48, Owen Meredith, of Tuscaloosa, Ala., 47; J. A. Blount, of Greensboro, Ala.; O. L. Garl and H. C. Ryding, of Birmingham, 46. Eight other shooters, including Mrs. O. L. Garl, broke 45 each in this race.

Long runs for the day were made by H. D. Freeman, who broke 157 straight; Walter Huff broke 110 before missing one, while among the amateurs, E. C. Little, a popular shooter from Gadsden, gathered in 97. John Warren had one run of 83, while W. H. Jones and R. R. Skinner had unfinished runs of 43 and 41 respectively. Scores of this day follow:

R R Skinner.... 250 218	A Henderson .. 100 83
C W Dunlap.... 250 218	Wm Walker 100 73
O L Garl..... 250 218	M Cannon 50 34
J Lambeth 250 217	W M Meredith.. 45 20
H B Blanks.... 250 216	

Professionals:			
H D Gibbs 250 244	T A Cassetty.... 250 227		
H D Freeman... 250 243	C E Goodrich... 250 224		
Walter Huff ... 250 243	P B Plummer... 250 210		
Guy Ward 250 240	L M Norwood.. 250 193		
E A Holtz 250 238			

The scores of those eligible for the State championship trophy are shown for the first 50 targets in that event:

W T Laslie..... 49	J Lambeth 44
J K Warren..... 48	F P Baker..... 43
O Meredith 47	C J Broyles..... 42

G Hillman 45	N Tucker 36
E C Little 45	V C Prowell... 36
C W Dunlap... 44	J T Coulbourne.. 35
C W Wheeler... 44	

Wednesday, Second Day.

The same perfect conditions which marked the first day repeated themselves on the second and last day, and in consequence the entire program of 250 targets was shot, trophies presented, and all winners paid off before five o'clock, which spoke volumes for the efficient management in both field and office.

Mr. W. T. Laslie, of Tuskegee, Ala., won the State championship event at 100 single targets with the record-breaking score of 99, this being Mr. Laslie's third consecutive win of this honor, and he also has the distinction of making the highest score, not only of a State championship contests in Alabama, but his score of yesterday was the highest score of all championship events in all States in the Union so far this year.

Mr. Laslie also won the handsome silver trophy donated by the Herzog-Thompson Jewelry Company for the highest score on the 500 targets of the entire program, he breaking 481.

J. K. Warren, of Birmingham, had the next highest score in the State championship with 96 and was also second high on all targets, he breaking 477 out of 500. Vassar Cates, of Brunswick, Ga., third, with 476.

In the regular registered program of 150 targets each day, a total of 300 for the tournament, Mr. Warren won high amateur average with the score of 288, Cates being second with 286, with Laslie third with 285. J. R. Livingston had 281 and D. A. Edwards 282.

Forty-two shooters shot through the regular registered program for the two days, and after all who had failed to win their entrance, less price of targets, had been paid their losses, there remained over \$200, which

was divided among the high amateurs, Mr. Warren receiving \$40.15, high average money.

As is usually the case at all large tournaments, there was a battle royal on between the representatives of the several ammunition houses for high honors, but H. D. Gibbs, of the Remington-U. M. C. Co., won out with the good score of 296 out of the 300 registered targets and also was high on all targets, he scoring 492 out of 500, having a straight run of 187 yesterday.

H. D. Freeman, of the Peters Cartridge Company, and Walter Huff, of the Du Pont Powder Company, tied with 292 out of 300, while H. A. Holt, of the Winchester Company, had 288 to his credit.

On the 500 targets Freeman was second high professional with 489, and Huff third with 487. Surely some wonderful shooting.

High runs for the tournament were: Gibbs 187, Freeman 157, Huff 112, for the professionals, while the only amateur to get the coveted 100 straight was Laslie, who has an unfinished run of 112.

After the shoot was finished, the trophies were presented by the vice-president of the club, Judge Wm. Walker, with some very happily chosen remarks, and sprung the surprise by presenting a very beautiful solid silver vase filled with flowers to Mrs. O. L. Garl, the vase being inscribed, "Presented to the Champion Lady Shooter of the South by the Shooters of the Alabama State Association."

Mrs. Garl is the charming wife of the secretary of the local club, and is a most excellent shot, as her scores of 87 in the State championship race, and her total score of 432 out of 500, will show.

The individual scores made this day are shown below:

W T Laslie	250	245	H C Ryding	250	220
J K Warren	250	240	J H Perch	250	216
V Cates	250	240	Mrs O L Garl	250	214
W M Jones	250	237	Jas Hillman	250	215
J R Livingston	250	235	P N Lalande	250	211
D A Edwards	250	234	W M Griffith	250	206
L F Lalande	250	232	J H Minga	250	204
A Lawson	250	231	W R Dunn	250	204
J Fletcher	250	231	N Tucker	250	200
G Hillman	250	227	I Armstrong	250	195
W A Leach	250	226	J T Coulbourne	250	195
L Moody	250	225	F F Baker	250	194

J H Perch	47	J Lambeth	42
R R Skinner	46	J H Minga	41
O L Garl	46	F P Baker	41
G Hillman	46	P H Lalande	40
W R Dunn	46	R H Baugh	38
O Meredith	46	J T Coulbourne	35
J Fletcher	45	I Armstrong	36
E C Little	45	F B Bowie	31
Jas Hillman	45		

Pick-Ups.

Wasn't it just about the best ever? Who says the Birmingham boys can't entertain? How about that chicken dinner served each day? "Nigger" Gibbs drank a barrel of buttermilk. H. B. Blanks had a hard luck story—did he tell you? "Bill" Laslie has a penchant for Birmingham's silverware.

J. H. Lowe calls "pull" like a buzz saw in a pine knot.

W. J. Timms has some voice when he is ready to shoot.

Guy Ward speaks softly, but he breaks 'em up just the same.

There may be others, but none so dear as our own Walter Huff.

President Jas. Hillman broke a straight 25 and smiled twice.

"Bob" Baugh borrowed Walter Huff's gun and broke a straight. Must have been the gun—so H. C. Ryding says.

Lee Moody's health is fast improving, and he was able to shoot through the entire program.

"Uncle Pcte" Bowie was on hand as usual and had a new story.

W. A. Leach, of Talladega got off bad and never caught his stride. How about that telegram he was to send if he won the championship cup?

Freeman was "wiping sweat," and when questioned, answered, "I've got to break 99 in the next 100 to beat Huff." He did.

L. M. Norwood was a very sick man, but stuck to his gun and shot the program through. His score is no criterion of his ability or of his popularity with the Alabama shooters.

Bruce Plummer must get used to the Birmingham "cats". To look at his score one would know that something was wrong.

John Fletcher won enough golf balls from "Bob"

WHAT POWDER DO YOU USE?

Baugh to last him until the next annual shoot in 1913. These two had a ball bet on each event of the tournament. It's a good thing Baugh buys golf balls by wholesale.

"Bill" Laslie "went crazy" toward the finish and wound up with an unfinished run of 112, and sighing for just one more day on the program. A fine shot and a clever gentleman.

Ed. Holt skipped a few each morning, but soon got right and ground 'em up the balance of the day, but oh! "those early birds sure did hurt."

Gibbs broke the ten events of 15 each and came back with a 25 straight in the extra, missing his eleventh target in the second extra event. Every time he broke straight he drank a glass of buttermilk. Query: How much was the waist measure at the finish?

E. C. Little got to going good, and when he missed his 98th target, it almost broke his heart. "So near and yet so far." Everyone was pulling for him to get the hundred straight and one of "Jim" Skelly's watch fobs.

Laslie took home all the silverware—both cup and pitcher, and also has a gold watch fob coming for his run of 112 unfinished. This is Laslie's third consecu-

tive win of the State championship, and his one regret was that "Tid" Alexander was not along to see him turn the trick.

Jovial John Lester was a happy man—his goods captured all the honors, professional and amateur, with Gibbs, Warren, Laslie and Cates "pointing to perfection."

Captain Andy Meaders, "the dean of American shooters," was on hand, and his score of 225 out of 250 and 228 out of 250 will show that he is able to hold his own with the young fellows at the traps, while socially he is a most delightful gentleman of that old type so fast disappearing. Capt. Meaders has been shooting continuously since 1857, and never misses attending one of Birmingham's shoots.

The ladies of the West End Catholic Church upheld their past reputation by furnishing excellent dinners to the shooters, and the boys certainly showed their appreciation of this feature.

The referee at trap No. 2 won the shooters by his fairness and promptness in announcing results of each shot in an unique and pleasing musical manner.

Secretary Garl was everywhere, it seemed, looking after the comfort and pleasure of the shooters, and yet found time to make some very good scores. He cer-

Never Shakes Your Confidence

DON'T let your long planned hunting trip be spoiled—spoiled by your gun not rising to the occasion at some critical moment. And you know how the shortcomings of your gun always show up at the critical moment.

After that your confidence is gone.

The six Hunter brothers have kept on the trail of shotgun shortcomings with invention, workmanship and Purpose, for 22 years.

The result is the Smith Gun, the gun without a single shortcoming to mar the pleasure of the

hunting trip or cheat the game bag of a single bird.

Purpose got rid of "shooting loose" by producing the Smith bolt, which double-wedges through extension rib and grips tight with a double rotary grip.

Purpose eliminated *inaccessibility*—which causes a gun owner to leave his lock uncleaned until it causes trouble—with the Smith "one-screw access." And so on through the list.

Have your dealer show you the new Smith 20 gauge—20 gauge from butt to muzzle. Write for catalog, showing grades from \$25 net to \$1500 list.

\$102.50 grade. Net price, with ejector, only \$75; with Hunter One-Trigger, \$100 net.

L. C. SMITH GUNS

"6 Times 22 Years' Experience"

HUNTER ARMS COMPANY, 76 Hubbard Street, FULTON, NEW YORK

KING'S SPORTSMEN'S GLASSES

(Patented, Feb. 20, 1912.)

are far superior to the old style ambers because they have lenses of **Akopos Crystal**—a double shade of amber and veridian. The **Akopos Crystal** eliminates not only all the violet but also all the violet and blue rays. Amber glasses are only 50 per cent. efficient in this particular and therefore are only worth 50 per cent. of what is charged for them. King's Sportsmen's Glasses are used and endorsed by such well known sportsmen as E. C. Crossman, Lieut. Townsend Whelan and Stewart Edward White.

The Ohio State Amateur Championship was won by F. W. King, wearing shooting glasses of his own design and patent. Write for catalog.

THE F. W. KING OPTICAL CO. 450 Ellastone Building, Cleveland, Ohio

tainly deserved the many congratulations showered on him for the success of the tournament.

John Warren shot a splendid race and finished strong, he being in one of the last squads to shoot. He had an uphill fight of it with the results known of all other leaders almost before he went to the score. All Birmingham was pulling for him to win the State championship event and keep the honor at home, but the one target lead Laslie gained the first day, coupled with his perfect score on the second day, made Warren's task an impossibility, even with a perfect score, and which he almost succeeded in making.

Canandaigua Sportsmen's Club.

SYRACUSE, N. Y., Aug. 10.—Fourteen shooters tied the score at the Canandaigua Sportsman's Club to-day. C. A. Soule proved his ability as an old duck shooter by scoring 34 kills against 31 for Eiseline, but their respective handicaps reversed the places for the prizes, the silver spoon going to Eiseline and the cut-glass dish to Soule.

There is a close run for the Stevens gold watch fob trophy, the standing at present being: Eiseline 130, Stoddard 127, Van Wormer 125, Kibbe 121, and as each has handicaps of 13, 14 or 15 for the next and concluding 50 targets, it is possible for anyone of the four to win.

Secretary Kibbe announces if no one else is disposed to challenge Mason for the championship emblem and title he will again attempt to gain its possession at the next shoot, Aug. 23. The scores of to-day follow:

Eiseline	15	47	Bushnell	15	23
Soule	11	45	Cayward	15	16
Kibbe	15	42	Adams	15	12
Van Wormer	11	41	Bushnell	15	11
Barringer	15	37	Fake	15	10
Stoddard	4	35	Chesebro	15	9

Correction.

DANBURY, Conn., Aug. 4.—*Editor Forest and Stream:* In your report of the Western Connecticut Trapshooters' League tournament, held under the auspices of the Pahquoque Rod and Gun Club, at Danbury, Conn., July 20, you made a mistake in the name of the winner of the Connecticut championship, which was won by C. Howard Dalcy, of Danbury, whose picture you printed. You had L. H. Bradley's name under the picture. Please rectify this in your next issue. Thank you for the fine report and also for publishing the pictures.
E. H. BAILEY, Sec'y.

Fulton Gun Club.

FULTON, N. Y., Aug. 7.—Four hundred people attended the big trapshoot held to-day. C. L. Frantz, of Seneca Falls, carried away high gun honors with 129 out of 135, after shooting off a tie with C. C. Hobbie, of Fulton. A. W. Meager and Hurlbut W. Smith, of Syracuse, tied for second place with 125.

L. W. Hunter, of Oswego, and C. C. Snook, of Baldwinsville, tied in the ninth event. The tie was shot off at 15 targets, Hunter breaking 12 and Snook 14.

The winners of the cups were: First, T. E. C'ay, Syracuse; second, G. M. Phillips, Syracuse; third, C. L. Frantz, Seneca Falls; fourth, I. Chapman, Fulton; fifth, H. W. Smith, Syracuse; sixth, A. W. Meager, Syracuse; seventh, B. J. O'Grady, Fulton; eighth, C. J. Dally, Baldwinsville; ninth, C. C. Snook, Manlius. The scores:

Lock Haven Gun Club.

LOCKHAVEN, Pa., Aug. 7.—The eighth annual target tournament of the Lock Haven Gun Club was held yesterday and to-day and proved to be a howling success in every respect. This club is noted for holding successful shoots, and the tournament which closed Wednesday evening eclipsed all former efforts and was attended by shooters from all parts of the State, who were loud in their praise for the manner in which the shoot was conducted. The weather both days was all that could be asked, and 57 men shot the program through. Lloyd R. Lewis had charge of the office, which is sufficient guarantee that this end of the game was well looked after. "Come, get your money, boys," was the joyful call from the office a few minutes after the last shot was fired. The boys responded promptly, and all declared they would be back to old Lock Haven next year.

L. B. Worden, of Harrisburg, and Allen Heil, of Allentown, tied for high amateur average, scoring 291 out of 300. F. Gunzberg, of Du Bois, was high amateur for the second day with 147 out of 150. G. H.

Hassam, won high professional average, breaking 294, with a run of 190 straight. George certainly did grind them up some. J. M. Hawkins won second professional with 292. The obstruction handicap, or high board fence event proved quite interesting, especially to the winners, who secured the \$20 on a 50-cent entrance. It was won the first day by Bressler and Leinbach, of the local club; on the second day by Worden and Heil. There was also a good entrance in the merchandise event; Slagle, of State College, won first prize the first day, and Brian Teats, of Sunbury, the second prize. On the second day Leinbach won the mileage book, which was first prize, and Munro won the fine pair of blankets for the second place. All arrangements for the shoot were as perfect as it is possible to have them, and the officers of the club were warmly congratulated for the manner in which the shoot was pulled off.

Du Pont Gun Club.

TWENTY-ONE marksmen shot between showers at the Du Pont Gun Club on Saturday afternoon, Aug. 10. Five of this number made scores of better than 90 out of a possible 100. J. H. Minnick was high man of the day with 97. The other high scores were: W. A. Joslyn 96, W. S. Colfax, Jr., 96, E. E. du Pont 94, H. P. Carlon 91.

Mr. Joslyn made the longest run of the day by breaking 78 straight. Mr. Minnick was second with 68, and Mr. du Pont third with 63.

The principal events were the contests for the Eugene E. du Pont cups. Seven teams of two men each qualified, three of the teams making perfect scores of 50. This earned four points for each individual member.

One team scored 48. This score was second high, each member getting three points. Another team made 48, each member earning two points. Still another team made 46, each member securing one point.

The scores for the Du Pont cups were:

W Edmanson	25	Dr E O Bullock ..	25
J W Anderson, Jr..	25-50	J T Roberson.....	22-47
H P Carlon	25	J A McMullen	25
J H Minnick	25-50	21-46
E E du Pont.....	23	W M Hammond ...	25
L C Lyon	25-48	F P Ewing	17-42
Dr A Patterson ...	25		
Stanley Tughton ...	25-50		

Dr. E. O. Bullock and J. A. MacMullen tied at 19 out of 25 for the Class D challenge cup. In the shoot-off, MacMullen won by a score of 21 to 17.

J. W. Anderson, Jr., won the Class C challenge cup from Dr. A. Patterson, 42 to 41. The scores:

W Edmanson	23	L C Lyon	22
W M Hammond	25	E E du Pont	22

Durant Gun Club.

DURANT, Ia., Aug. 6.—Oh, Billy Hoon did it again. Did what? Off with the money trot. This pride of the G. A. H. is working over the West like a lady looking for something in the wool of a Pomeranian pup. And he's about as successful. He broke 144 here to-day, two more than F. Campbell, who took second. Wm. Wetleaf made 140, and third stuff. Three pros. ran along for company for the third and those lower down the list. W. T. Garrett was top in the class with 140. Some one said they saw Matthews come into the gate, but it must have been a mistake. Scores:

E. C. NORVELL, Sec'y.

Cincinnati Gun Club.

SOMETHING doing at the grounds on Aug. 11, and in spite of a stiff wind, some nice work was done. L. J. Squier was high man with 95, followed by Hamerschmidt with 87. The latter has been doing very little trapshooting this season, and was not in his usual form. Dillon made his first appearance as a trapshooter, and will do better with practice. The grounds are in perfect condition for the E. C. cup match between H. D. Freeman and J. S. Day, which will take place on Aug. 24.

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen. Shoot well because they hold the charge compactly together at extreme ranges. Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline. Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

PARKER BROS. :: Meriden, Conn.
New York Salesrooms, 32 Warren Street

This Model 28, 12 gauge *Marlin* shotgun is the finest repeating gun in the world. It has every up-to-date feature, perfected far beyond all previous standards, and it has exclusive advantages not obtainable in other guns.

Note these features: **Hammerless—Solid Steel Breech** (inside as well as out)—**Solid Top—Side Ejection—Matted Barrel** (as on our highest grade hammer guns)—**Press-Button Cartridge Release** (to remove loaded cartridges quickly from magazine without working through action)—**Double Extractors—Take-Down Feature—Trigger and Hammer Safety. Price, \$22.60.**

Our 160-page **Ideal Hand Book** tells about reloading all cartridges; mailed for 6c. stamps.

The Model 28 is a fine appearing, beautifully balanced gun, without any objectionable humps or bumps; its **Solid Steel Breech** (not a shell of wood) permits a thoroughly symmetrical gun without sacrificing strength or safety; **it is the safest breech-loading shotgun ever built.**

Our free circular gives large illustration of gun and full description. Our complete 122-page catalog of all other *Marlin* repeating rifles and shotguns mailed for three stamps postage.

The Marlin Firearms Co.
27 Willow Street, New Haven, Conn.

Programs for the tournament to be given in September are ready for mailing. Several interesting matches are on the cards for the fall, and due notice will be given. The club is getting into shape and will be back among the leading organizations of the kind before the snow flies. Scores:

Nine Grades

Guernsey Gun Club,

GUERNSEY, Ia., Aug. 3.—Our gun club met on the grounds this evening for practice after having been disappointed the two previous Saturdays on account of rain. Only a few of the boys put in an appearance, everybody being very busy at present taking care of this 60-bushel per acre crop of oats and heavy crop of hay. We shot for our Du Pont club trophy this evening. It was won by J. W. Dobbins, after shooting off a miss-and-out tie of 20 out of 25 targets with H. Glenn. We practice every Saturday afternoon at 3 o'clock. Visitors invited. We are giving a one-day tournament with specials tacked on Sept. 24. Scores follow:

	Shot at.	Broke		Shot at.	Broke

Moorman	43	38	*Lee	31	..

*Professional.

Riverside Gun Club.

RED BANK, N. J., Aug. 10.—William Chandler, of Red Bank, was high gun here to-day. Fourteen shooters were entered in the tournament. The first event was the third series of a four-event match for the James Diamond trophy. This event was captured by A. L. Ivins in two 25-bird events. He broke 47 out of 50, with a scratch and 1 handicap. E. M. Cooper finished second with 3 handicap, breaking 48. William Chandler tied with George Gallo for the Du Pont trophy. The tie was shot off and Chandler won, breaking 38 out of 50.

Bourbon Gun Club.

BOURBON, Ind., Aug. 5.—Following scores were made in practice, only a few shooters participating:

Dilley	19	Reubelt	13
J Russell	17	Lucas	15
Bowers	14	L. RUSSEL, Pres.	

FROZEN AND DRIED EGGS.

FROZEN and dried eggs intended for human consumption are largely used for cooking purposes where inferiority may be concealed, as in baking cakes or making custards, omelets, pies, etc. The traffic in eggs sold for drying and freezing has greatly increased in the past few years. Strictly fresh marketable eggs in the shell command a high price, and there is difficulty in meeting the demand for them, but large quantities of questionable eggs, often bought at very low prices, have been broken out for cooking purposes by disreputable firms, being preserved by freezing or drying until ready for use. Some dealers, however, manufacture a satisfactory product by the use of good eggs handled under proper conditions.

There is no objection to drying or freezing good eggs under proper sanitary conditions; in fact, there are some advantages to be gained by preserving eggs in this manner, although the manufacturing processes devised by man as a rule do not improve the quality of nature's work. Conditions of modern life and commerce must however, be met, and dried eggs or eggs in a frozen condition may be shipped long distances, and require less space for transportation and storage than do eggs in the shell.

As the result of investigations instituted by Secretary Wilson, the United States Department of Agriculture has recently issued two publications that give practical suggestions for correcting some of the existing practices and conditions which are at least partially responsible for the unsatisfactory products now found on the market. These publications are Bulletin 158 and Circular 98 of the Bureau of Chemistry, entitled, respectively, "A Bacteriological Study of Shell, Frozen and Desiccated Eggs" and "Practical Suggestions for the Preparation of Frozen and Dried Eggs."

FIELD TRIALS.

Oct. 28.—Southern Ohio Field Trial Association's second annual field trials. G. R. Harris, Sec'y, 15 West Sixth St., Cincinnati, O.

Breeders' Association.

WALTER S. GURNEE, JR., of Oyster Bay, will judge bulldogs at the fifth annual show of the Breeders' Association, held in conjunction with the Associated Specialty Club of Chicago, in that city, at the Bismarck Gardens, on Sept. 28. Mr. Gurnee is well known as a breeder, having produced Rockhill's Runt and Tommie, and he is the owner of Thornbury Master.

Premium lists will be ready on Aug. 18 and may be obtained from the secretary, A. D. Gillette, Fort Salonga, L. I.

A number of prominent Eastern exhibitors will show Champion Kitty Royal, which has a dash of Peter Pan in her blood lines; Crissie Denton and Deodora Delilah on their home grounds are a formidable trio and it will take a bit of going to attach their laurels. Champion Deodora Monarch will be added to the Western team of bulldogs. Added to this there is a particularly deadly female of the species in Michigan which, if rumor has it correctly, should augur a little anxiety for the Eastern intrepids. The Breeders have obtained a license and a full four point rating from the American Kennel Club for this show.

Entries will close on Sept. 14.

THROUGH UNEXPLORED GUERRERO.

Continued from page 199.

and their cruel three-inch tusks bared on either side of the snapping jaws.

I noticed that my guide and my men did not advance to meet the pigs, but turned inquiring eyes toward the top of the pyramid, as if estimating how many jumps would be required to reach the apex. Then a young son of one of the workmen precipitated matters by firing a load of fine bird shot from an old muzzleloading gun into a young pig at one side of the band. The shot went all too true, and with the first scream of the wounded javelin I found myself following the guide in headlong flight up the side of the earthen cone, the hundred or more wild hogs hot at our back. The snapping of their teeth and their grunts of anger came all too plainly to our ears, as we strove to reach a square stone altar some fifteen feet in height, crowning the top of the pyramid. The guide reached this vantage point first, and lying flat on his stomach on the top, extended a helping hand to me just in time, for the teeth of the leader of the porcine band took the heel off one of my high hunting boots just as I scrambled to safety beside the guide and the rest of the workmen on top of the altar.

Around the bottom of the square stone altar, made for worship of strange Indian gods, and used for refuge by the first white man who had ever gazed on these ruins, gathered the horde of little wild hogs, fearless and angered to the fighting point by the cries of their wounded comrade. There we laid for three hours, while the javelins snarled and jumped and strove to reach our resting place. Then of a sudden the leaders of the band turned about in their tracks faced off the pyramid toward the thickest part of the underbrush, snorted, began a series

of squeals and grunts and followed by the entire band struck off headlong into the jungle.

"El tigre! el tigre!" whispered the guide, scarcely above his breath, and as the horde of wild hogs struck the underbrush, we could hear the crash of some heavy body further out in the jungle, while the squeals of the javelins grew fainter and fainter as they settled down to the pursuit of their old-time enemy. Later we proved that the guide was right by finding the tracks of a large sized jaguar in the soft soil almost obliterated by the stamping and tramping of the sharp pig hoofs as the herd passed over them. The javelins seem to bear a lifelong grudge against the jaguar, or tiger, and according to the Indians, never lose an opportunity for attacking one of the cats. Only when cornered with no tree of sufficient size in jumping distance will the jaguar fight a herd of javelins, preferring even to swim a stream, much as he hates water, to meeting the sharp-tusked little fighters face to face.

We discovered later that the name of this place was Chalchiutepetl—"The Hill of the Green Stone"—and by further explorations in one of the sealed chambers, which certainly had not been opened for ten centuries, we found the complete skeleton of a small dog. The bones crumbled to dust at the touch, but this was a case of a dead dog being better than a live lion, and these mute bones gave us some idea of the antiquity of the man's faithful canine companion among these Indians. In the villages of this section to-day it is a tie between babies and dogs as to which are the more plentiful.

During a rainstorm here I was much surprised to see my native workmen cut leaves from the wild fan palms and fashion for themselves rain coats which shed the water perfectly. We stayed here about four months, taking out more than 2,500 relics, idols, masks, skulls, beads and various objects, including a stone tablet three by two feet, covered with hieroglyphics, which I then believed to be the Rosetta Stone of this tribe of Guerrero aborigines, but which has never been deciphered. This ruined city is peculiarly rich in hieroglyphics, and it is more than probable that the unlocking of this large carefully carved stone tablet would reveal the meaning of the carvings on the ruins, and tell at least some fragments of the identity and history of the great race which peopled this part of Guerrero.

case are the minimum payments less than \$200 per year or the monthly rates more than half the average salary received during the ten years prior to retirement.

Compensation for Injuries.—The danger of bodily harm to which a warden is exposed is no slight matter. In Pennsylvania, where injuries of this kind have perhaps been more frequent than elsewhere, the secretary of the game commission in his report for 1904 declared:

"Nine of the officers of this commission have, during the past summer, been called upon to meet armed resistance, three having been shot, and one of them very seriously. This man while attempting to arrest an Italian, whom he caught in the act of killing robins, was deliberately shot by a companion and friend of the violator." (Report Penn. Game Commission, 1904, p. 8.)

And again in 1906:

"We have had fourteen officers shot at during the present year. We have had seven shot, three of whom were killed, and three very seriously wounded; and one other, a gentleman of

Lawrence county, while not serving under a commission of this board, was killed for doing our work. * * * (Report Penn. Game Commission, 1906, p. 11.)

The frequency with which wardens are shot suggests inquiry as to what punishment is meted out to their assailants and what redress they can obtain. Only a few cases can be mentioned in this connection.

Shortly after the passage of the Maine law prohibiting hounding, Warden Lyman O. Hill, on Nov. 8, 1886, killed a dog belonging to a man named Calvin P. Graves, whereupon Graves shot and killed the warden and his companion. Graves was sentenced on May 1, 1887, to life imprisonment, and this sentence was later commuted to twenty-five years; good behavior still further shortened the term, and early in 1906 he was released, after spending twenty years in jail. (FOREST AND STREAM, XXVII, p. 308, Nov. 11, 1886; Maine Sportsman, XIII, p. 158, Apr. 6, 1906.)

In the same year that Graves was released, Seely Houk, a deputy game warden of Pennsylvania, disappeared March 2, 1906, and after the lapse of some weeks his body was found in the Mahoning River weighted down with stones. Investigation showed that he had been shot by a man named Rocca Racca who was duly convicted of the killing, but what the sentence was is not stated. (Report Game Comm. Penn., 1908, p. 25.)

In October, 1908, deputy C. B. Peyton was killed while attempting to arrest a band of Flat-head Indians near Swan River, Montana. At the following session of the Legislature a joint resolution was passed providing for the appointment of his widow as a deputy game warden at his former salary of \$125 per month. This method of making an appropriation by resolution was found to be unconstitutional, and the State auditor refused to draw a warrant for her salary. Later she was appointed as assistant in the office of the State warden. (FOREST AND STREAM, LXXI, p. 816, Nov. 21, 1908; American Field, LXXI, p. 607, June 26, 1909.) This action is worthy of note as hitherto little or no provision had been made for injuries sustained by wardens in the performance of their duty. Massachusetts, however, is a notable exception to the rule. Six years ago, on Oct. 14, 1906, Deputy Adam J. Rausch, while attempting to arrest a game law violator near Lawrence, received a charge of shot in his chest. Under a special act of the Legislature an appropriation of \$2,000 was made as compensation for his injury. (Resolves Mass., 1907, chap. 70, p. 1001.) Last January Deputy Nixon, who was injured while pursuing a game law violator, died from embolism after being confined to the hospital for six weeks. Under a special act of the Legislature his hospital expenses amounting to \$423 were paid, and an annuity of \$500 for a period of five years was provided for his minor children. In one or two other cases in which deputies have been incapacitated, their salaries have been allowed to continue for some months while they were unable to perform active service. In one instance a deputy contracted tuberculosis while on duty, but drew his salary for nearly two years, although unable to perform active duty much of the time.

Most States are well able to provide for injuries sustained by their public servants, and it

For Sale—Two shares in an exclusive Shooting Club. Excellent feeding grounds yield best duck shooting in America. Other game in season. For terms, apply to W. R. Bayes, 40 Wall St., New York.

is simple justice that they should make such provision. When a man devotes the best years of his life to the service of the State, he is at least entitled to the same consideration that he would receive from a private corporation, and he should not suffer financially or physically on account of his willingness to serve the public.

BRITISH MEASURES TO PREVENT RABIES.

CONSUL-GENERAL JOHN L. GRIFFITHS, of London, says:

"Respecting the measures adopted in Great Britain to exclude rabies and the manner of suppressing an outbreak, should it appear, the following particulars have been obtained from the British Board of Agriculture and Fisheries:

"In accordance with the order of the board of March 23, 1897, a copy of which is forwarded [and may be had from the Bureau of Manufactures], and also by virtue of powers vested in them by various statutes, every dog attacked by rabies must be immediately slaughtered. Notice of any actual or suspected case must be immediately given to a police constable, who is required to wire the information to the Board of Agriculture and also to an inspector of the local authority. After the afflicted animal has been destroyed it is subjected to a post-mortem examination and thereafter buried in its skin (slashed so as to be useless) at a depth of not less than six feet and covered with a sufficient quantity of quick lime or disinfectant.

"Whenever an actual or a suspected case of rabies is reported, an order is issued requiring all dogs within the district (and the surrounding area) where the outbreak occurred to be kept under control by (1) confinement in a kennel or other inclosure from which the dog cannot escape; or (2) secured to some premises by a collar or chain; or (3) efficiently muzzled with an effective wire cage muzzle, and also led (by a person) with a collar and chain or other attachment. Until the order is withdrawn it is an offense to move any dog outside the area defined in such order, or permit any dog or other animal to come into contact with any animal to which the order applies.

"When a dog feels ill in the early stages of rabies it is anxious to get away from its home and to go 'on the march.' Cases are known where dogs so affected have been found to have continued 'on the march' for seventy miles. In consequence of this fact, whenever an outbreak occurs the area brought under the jurisdiction of an order such as described is very large. To prevent, if possible, the spread of the disease the provisions of the act are applied at once to the entire territory."

AN ACCIDENT DUE TO AIR WASH.

DURING the first aeroplane meeting held at Rheims, in 1909, aviators for the first time realized the dangers of flying in the wake of an aeroplane. Although the perils that lurk in the wash of a flying machine are fully appreciated, nevertheless a serious accident occurred at Villa Coublay, near Paris, on July 5 last. Lieuts. Briez and Burlez, of the French Army, started on a flight to Belfort, each in a monoplane. Lieut. Burlez had attained an altitude of about 600 feet, passing the other man at greater speed 100 feet higher, forcing a current of air downward and causing the machine driven by Briez to lose its equilibrium. The monoplane crashed to the ground and Briez suffered two broken legs, a fractured jaw and injuries to his chest. He is expected to recover.—Scientific American.

You can get a pretty good idea of the kind of sportsmen who read FOREST AND STREAM from what the publication offers them to read. It's of the highest grade.

A PROBLEM'S SOLUTION

Log Cabins and Cottages

How to Build and Furnish Them

A seasonable book when all minds are bent on the problem of getting close to nature. Mr. Wicks in this delightful book offers timely advice to every one who wants to build a simple summer home at one with its surroundings of wood or stream or shore.

This is a thoroughly practical work, treating of the how, the where, and the with what of camp building and furnishing. It is helpful, too, in regard to furnishing, and withal a most beautiful work.

Cloth, profusely illustrated, \$1.50 postpaid.

GAME LAWS IN BRIEF

The accepted authority for the
Game and Fish Laws of the
United States and Canada

Illustrated

Price 25 Cents

Revised to June 1, 1912

This is the size of book. Made to fit the pocket. It contains no anecdotes, fiction or short stories, but has absolutely accurate Fish and Game Laws, digested so as to be found at a glance and comprehended at sight.

You want 'em now as there have been lots of changes this spring.

Published now and for past 25 years by

FOREST AND STREAM PUBLISHING CO.

127 Franklin Street, New York City

SINDELAR
COPYRIGHT, 1911, BY FOREST AND STREAM PUBLISHING CO.

AN OPEN LETTER TO BUYERS AND SHIPPERS OF EGGS.

From Department of Agriculture, Office of the Secretary, Washington.

It is a conservative estimate that more than \$45,000,000 are lost in the egg-producing sections annually because of improper handling. This enormous loss is due to small eggs, cracked and broken eggs, dirty, stale, heated (hatched) and rotten eggs.

When farmers, peddlers, merchants, etc., come to you with eggs for sale, talk to them about the improvement of the market egg, and enlist their co-operation in the elimination of this great loss. Here are some of the fundamental points to be considered by all egg men, whether producers, shippers or middlemen:

1. Encourage the production of large eggs. This can be accomplished by keeping pure bred "general purpose" breeds of fowls hatching only the eggs that weigh at least two ounces apiece and from only the most vigorous stock. A higher price for large than for small eggs will help along the argument.

2. Infertile eggs do not hatch, do not form blood rings and seldom form black rots. If the male birds are sold or penned up after June 1, the flock of hens will lay more eggs and they will be infertile.

3. More than 10 per cent. of the eggs received in New York during the year are "seconds" because they are stale. Tell your egg men that gathering eggs every afternoon, or twice daily in hot or murky weather, keeping them in a cool, clean, dry place until marketed, and marketing at least once a week and more frequently in the summer time will reduce the number of stale eggs greatly. Of course, stale eggs are worth less money than fresh eggs all along the line.

4. Can you convince your trade that eggs from stolen nests and from incubators are never fit for sale? If the farmer thinks they are good, reliable food, urge him to eat them at home. For since the egg buyer can afford to pay more for large, clean, fresh, whole-shelled eggs, it is good business for the farmer to use small, dirty, cracked eggs at home.

5. Do you know how to candle eggs? If not, learn, and learn quickly. There is no other way by which you can determine the worth of what you are paying for. Having yourself learned how to grade eggs, show the merchants, peddlers and farmers in your neighborhood, by means of the candle, what kind of eggs they are bringing to you. Farmers are not scamps, nor egg buyers' angels. Show the farmer the kinds of eggs you cannot pay for and he will find a way to eliminate the bad egg and to make the good egg even better.

6. Candle in a room where the temperature does not go above 55 degrees F. Ship chilled, in a good refrigerator car, in carlots. If you cannot chill the eggs before shipping, use a refrigerator car, well iced, and ship only the minimum load that the eggs may receive the benefit of the ice before the market is reached.

SALMON HATCHERIES.

BESIDES a Dominion game fish hatchery at Cowichan River, on Vancouver Island, the Dominion maintains eight salmon hatcheries located at the following points: Bon Accord, Fraser River; Pemberton, Lilloet district of Fraser River; Granite Creek, Shuswap Lake, one of the sources of the Fraser River; Harrison Lake, another of the sources of the Fraser River; on the sources of the Skeena River at Babine, Stuart and Lakelse lakes, and at Oweekayno Lake in the Rivers Inlet district. It is reported that additional hatcheries are contemplated.

In 1911 the number of eggs taken at most of the hatcheries appears to have been far below their capacity and the needs of the industry, the output in some of them falling below the poor record for 1907. For instance, at Pemberton, 12,500,000 were taken as against 27,000,000 four years before, and at Harrison Lake, with a capacity for 50,000,000, 10,224,000 eggs were taken as against 22,000,000 four years previous.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth. 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00.

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With art-type portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and hand-somest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose; Mountain Sheep; Game Refuges, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00.

An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00.

A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

"The Long Shooters" and the Origin of 300 Yards Revolver Shooting. (New.)

By Wm. Brent Altsheier. Price 75 cents. Postage 4 cents extra.

Interesting alike to civilian and soldier, amateur and professional. A neatly bound volume; illustrated from photographs of shooters and shooting scenes.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Alhert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth, 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I Have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

Through Unexplored Guerrero

By PROF. WILLIAM NIVEN

Chapter III.—Among the Mound Builders

BESIDES the great city, which I have just described, there is another section, several thousand acres in extent, rather thickly covered with small Indian villages of the modern tribes, and which is so studded with ancient mounds as to give the appearance of being a hilly country, when, as a matter of fact, it is a rolling mesa, or mountain slope. This section, totally different from all the other ruins of pre-historic Mexico, is the one-time home of the mound builders, quite probably a part of the mysterious tribe or tribes which left the serpentine mounds in the Ohio Valley and in other parts of the United States.

Outside the northern Republic this one section of Guerrero contains the only trace of the mound builders found in the New World, and is in a much better state of preservation than the mounds of the United States. Into this section I determined to go on my next trip, and having completed my investigation of the ruins of Yerbabuena for Mr. Jesup, I struck out again, in 1896, for the land of the Misteca, the Amusgo and the Tlapaneco tribes, located many miles in the jungle-covered mountains southeast of Chilpancingo.

Horses and supplies were obtained at Iguala, on the Cuernavaca division of the National Railways of Mexico, and Chilpancingo was reached after a two days' ride over the mountains. Here we were hospitably received by the new Governor, Col. Antonio Mesinario, who supplied me with an escort of troopers and gave me open letters of passage through his State. From here we went to Mochitlan, and thence onward to Zuechultenango, the first night out from Chilpancingo, having spent some time in examining the ancient Spanish workings of a once-profitable silver mine.

The country traversed thus far was composed of well-watered valleys and cultivated ridges, every acre, almost, being planted to corn. The people were polite and hospitable and were curious to know what class of goods we had for sale, or if we intended giving a circus, as they had seen my tent strapped on one of the mules. When told that we were in search of the relics of the ancient mound builders, they brought us a number of stone beads, stone axes, chisels and similar imperishable utensils, but no pottery. In addition to this they pointed out a number of low and weather worn mounds in the midst of their villages, from which they declared great treasure had been taken in years past. They

also added that further on were much larger and better preserved mounds, into which no excavations had been made.

I determined to press on into the heart of the mound builders' country, and next day passed Colotlupan, Telpoxtlahuaca and Tlanicuululoco, reaching the town of Pazote late in the afternoon. There we secured a guide who could speak the language of the Tlapanecos, through whose country we were passing and who could speak little if any Spanish. We arrived at Mantzentla in the evening, and finally were able to secure food for ourselves and animals, but the Indians were shy and did not seem to appreciate our visit, although no open opposition was made to our short stay among them. This is a barren, cheerless settlement. With the exception of the comisaria or combined jail and courthouse, all the buildings are round, about twelve feet in diameter, built of mud and thatched with wild grasses. These structures have no windows, and only one door, which is seldom opened; at least, we saw none opened during our stay in Mant-

zentla. All in all this village reminded me much of descriptions I had read of the towns of the African natives, especially those of sections of the dark continent remotely removed from civilization.

Acatapec was our next stopping place, a pueblo of about 500 houses, substantially built of stone, but with the same disregard for light and ventilation which we had noted at Mantzentla. Here we were greeted with the same closed doors and the same oppressive silence as at the previous village, and the guide informed me that we were now in the heart of the Tlapaneco country. There was a Government school here, and the teacher informed me that his brightest pupil, a full grown man, had been able to learn the Spanish alphabet only after three years' hard and continuous study. The people are simple and taciturn in demeanor, with formal ceremonials for every performance of their daily lives. When friends salute, they touch each others' hands without clasping them, and in this manner raise them to within a few inches of the lips of one

HUGE STONE ARTIFACTS FOUND IN GUERRERO BY PROF. NIVEN.

ALTAR IN CHURCH IN PASCALALAN DEL ORO, AND OF THE TLAPANECOS.

and then of the other, the while muttering a salutation in a low tone, their words sounding as strange as the Apache jargon of the tribes of Western United States.

Unlike the Indians in other parts of Guerrero, they seem to have no curiosity, and the sight of our outfit, with half a dozen men on the backs of mules, animals which the Tlapanecos do not possess, created no ripple of interest. In some places, along the trails outside the villages, the natives fled precipitately at sight of us.

Their language sounds strangely like Chinese or Japanese. For good-day they say "gaze"; good-night, "nawee"; good, "meeha"; tortilla, "gooma." When they wish to say, "Let us go," it is, "I yook," and when they drink each others' health, they say, "Ah gee-ya."

When a marriage ceremony is performed, which is very seldom, and never with a member of an outside tribe, it is only by the judge who is chosen by the people of his particular village, totally irrespective of the nomination of any judge by the central Government in Mexico. Chiefs are chosen in the same manner, and the life of the people is feudal, each village being a nation unto itself. Their religion seems to be a mixture of hazy paganism handed down from their ancestors, undoubtedly the mound builders and modern Catholicism, introduced by the all-pervading priests who flocked into this country with and after the conquest. When a child arrives at the age of six years, the father takes it at midnight to some secret place in the hills, and there performs what is known as the "purification ceremony." Having provided himself with a chicken or turkey, and an incense pot filled with the sweet-odored copal gum, the head of the fowl is severed, the blood allowed to run into the earth, and the pot placed on the spot where the blood fell. The incense is then lighted and the child must remain immovable in front

of the pot until all is consumed. When the ceremony is completed, the fowl is buried in the same spot and the earth filled with lime, to kill the odor, so that no wild animal may detect the odor and dig it up.

Continuing our journey we arrived next day at Barranca de Pobre, where a feast was in progress, and where, strange to say, we were welcomed with great kindness and courtesy by the chief. There I met a young Tlapaneco who could speak some Spanish, and with him went into the tribal temple where a strange ceremonial was in progress. The building was of stone, about fifty feet long by twenty wide, with a palm leaf roof. At one end was an altar, on which were three male images, draped with brightly-colored native cloths, the three representing the ancient gods of fire, wind and water. They resembled images in a Chinese Joss house more than anything I have ever seen.

The priest, an aged Tlapaneco, clad in white cotton, and wearing the shell of a gourd, painted red, for a skull cap, placed a string of priceless green jade beads around the neck of each image and handed each a yellow flower, called "Xochipala," in the language of the tribe. Three very small candles were then given to each worshipper in the great temple. All knelt on the earthen floor, and the priest prayed aloud in the native tongue, while the Indians responded at proper intervals. No Bibles or other books were in evidence, and my young Indian friend declared that the words used in the ceremony were not taken from the Bible, but were handed down from the ancient times of the mound builders. The service lasted about ten minutes, when each Indian, advancing to the altar, laid thereon a yellow flower produced from beneath the folds of his clothing, and placed his candles in primitive candle sticks made from sections of banana tree trunks.

At the conclusion of the ceremony the men, more than one hundred in number, began a peculiar dance, keeping slow time to the combination of a drum and a guitar. The dancers were divided into sets of twelve, only men taking part. Each one wore a red cloth tied around his shoulders and passing under the right armpit; one around the neck, covering the mouth, and a third around the waist. Each carried a small yellow flag in his left hand. The master of ceremonies, dressed like the dancers, but wearing the skin of a jaguar's head over his hair, carried a short-handled stone axe, and spent his time leaping wildly from group to group of the dancers, evidently trying to startle them, though no one paid the slightest attention to his antics.

In another building more than fifty young Tlapaneco girls were engaged in cooking great pots of corn, beans, meat and chile peppers, for the refreshment of the people when the dance was concluded. It was a weird looking place, the darkness fitfully illumined by blazing torches, while the dusky maidens silently flitted about their duties or stirred the food in great clay pots, often two feet in diameter, and at once suggested a realistic rehearsal of the witch scene from Macbeth.

In still another house a group of Tlapaneco men and their wives were brewing a sort of palm wine, which tasted sour, but which did not appear to contain a large percentage of alcohol, inasmuch as, though everyone drank copiously, no one seemed intoxicated. In the morning the chief and nine of his councillors called on me, each carrying a gourd filled with savory chicken stew. I returned the compliment by giving each member of the party a cigar and photographing the group.

Another long ride of ten hours brought us to Pascalalan del Oro, situated among pine timber, in a lovely valley, 6,000 feet above the level of the sea. We camped near a crystal stream, cold as ice, and next day visited the first important prehistoric ruin seen on the trip. Two

PROF. NIVEN IN CAMP TWENTY-ONE YEARS AGO IN THE HEART OF THE RUINS.

mounds were found near the center of the valley within sight of the village. One of them is 300 feet long, 100 feet wide and nearly forty feet high, while the other is practically twice as large in every measurement.

After careful examination I found that the mounds were intact, had never been entered, and doubtless concealed graves rather than ruined buildings. They appear to be identical with the mounds of the Ohio Valley, and the people who constructed them appear to have been a nomadic rather than a building people, and so far as I can learn, there are no traces of ruined cities in the country of the mound builders in Guerrero. I prepared at once to dig into the smaller of these mounds, around the base of which I found a number of beads, small ornaments and other artifacts of stones, which, strangely enough, seemed never to have been disturbed since the rains and the winds had sent them tumbling down through the natural disintegration of the mound.

But all my plans for entering the mounds were speedily frustrated by the woman chief of the town—the only woman Indian chief in Mexico, by the way. No sooner had my men begun moving shovelsful of earth when she appeared, followed by practically the entire populace of the village. She approached me quietly, and in a dignified manner informed me that the mounds were the tombs of the ancestors of her tribe; that they were guarded night and day by the young men of the village, one of whom had informed her of my first attempt to open the ruin.

All attempts at expostulation were vain, and offers to buy the privilege of cutting into the mounds proved futile, and as a last resort she pointed to about twenty Indians, armed with long knives, and old-fashioned stone and bone-headed spears, declaring that if I did not desist she would put these men on guard and death would be my portion if I attempted to go on with the work. Following this she extended to me the hospitality of the village, declaring that even her house was mine, as long as I wished to remain, but under no conditions would I be permitted to open the mysterious mounds.

In her house that evening the queen, who bore a strong facial resemblance to high-caste Chinese women, and whose name was Chen-a-la, told me in all seriousness that the mounds covered the open ends of enormous veins of virgin gold, from which her ancestors had taken fabulous amounts of the yellow metal, with which they paid tribute to the Spaniards to prevent the conquerors from invading their country. She declared that beneath the mounds lay the ruins of magnificent temples, built as last resting places for the dead kings of her people, and she confirmed my belief that the mound builders never were city dwellers, but were nomads, miners and traders, living in temporary structures and never erecting edifices to compare with those I had seen at Yerbabuena.

"According to stories told me by my father," said the queen, "it was the custom of the tribe to take a few pounds of the yellow metal to the coast, when they wished to purchase cloth from the tribes of weavers near the sea. In later years a priest, in one of the coast towns, converted some of these traders to Christianity, bought their gold himself, and repeatedly begged that they tell him the source of the yellow metal.

CHURCH AT XOCHIPALA.

"All the Tlapanecos, however, were sworn to secrecy on penalty of death, as regards the veins of gold, and refused to tell the priest. One day, though, the men of my tribe engaged in a fight on the way to the coast, and went to the priest to confess their sin. He absolved them, and in return they agreed to take him to the source of the gold, provided he would make the journey blindfolded. To this he agreed, but, when they set out, he carried beneath his robe a bag of corn, from which he dropped a grain at almost every step of the mule on which he rode, thinking that by the scattered grains he would be able to retrace the trail to the source of gold.

"On the second day out they arrived at the vein, the bandage was removed from the priest's

eyes, and he gazed on a vein of virgin gold more than six hands in width. Filled with amazement and joy, the priest, chuckling at his cleverness in outwitting the Indians, prepared to return, when to his complete mortification one of the Indians approached and handed him a bag, exclaiming: 'Here, father, is some of the corn you lost.' These mounds you see here mark the treasure house of the Tlapanecos and never shall they be opened while there is life in my body."

After spending another day in argument with the obdurate queen, and finding all attempts useless, I commenced the descent to the coast, following the ancient trail down which the Tlapanecos had gone centuries before to peddle their gold. I stopped at a hot spring near Santa Monica, the waters of which are above 100 degrees Fahrenheit. Surrounding this spring are hundreds, if not thousands, of crosses erected by grateful sufferers from various maladies who had been cured by bathing in or drinking of the waters of the spring. We dined at San Luis Allende, an important trading center, through which were passing all day long loaded burro trains going to and coming from remote parts of Southern Mexico. Then we rode to Paso de Zintla, and next morning to Copala, where many days were spent hunting and photographing the beautiful scenery. Game was everywhere abundant, and we had deer, wild hog, rabbit, ducks, wild pigeons, doves, wild turkeys and a species of small grouse on the table one day or the other all the time we were in the village.

Thereafter we went on to Ayutla, stopping a few days there, and then took the old Acapulco trail back to Chilpancingo, fording the Omítlan River, and in three days more were back in Mexico City. Naturally I was disappointed at my inability to explore the ruins of the mound builders, but I was satisfied that I was the first white man who had ever gazed on their mysterious mounds, and to-day I have the further satisfaction of knowing that no one since has been able to penetrate the mysteries they conceal.

CHEN-A-LA, THE QUEEN OF THE TLAPANECOS, WHO REFUSED TO PERMIT PROF. NIVEN TO OPEN THE RUINS OF THE MOUND-BUILDERS IN GUERRERO.

More Lines and More Trouble

By A. J. S. NEWBERRY

MY article "On Lines," published in *FOREST AND STREAM*, July 1, 1911, was scrupulously accurate and seemed to be entirely just as originally written, and brought forth a large number of replies from two classes of correspondents. All sportsmen heartily sympathized with my disastrous results and agreed with my proposed method of obtaining a cure, although I have not seen many articles on the subject, perhaps because none have been written and perhaps because publishers of some sporting magazines care more about the revenue obtained from the dealers in fishing tackle as advertisers than they do about promoting the interests of sport and sportsmen. The second class of letters was from dealers in fishing tackle, nearly all of whom condemned me greatly, entirely failed to understand the purpose of my article, and seemed to think that I was condemning their whole class of makers or dealers instead of trying to protect the honest maker and dealer against the dishonest maker and dealer, and therefore to promote the interests of sport. After a large amount of correspondence, however, three separate dealers or makers agreed to furnish me lines, and I went to Nassau in January of the current year equipped with six 200-yard twenty-four thread green cable laid lines furnished by the Edward vom Hofe Co., six by Abbey & Imbrie, and six by the Ashaway Line & Twine Mfg. Co., the Ashaway Company also furnishing me a single twenty-four thread braided linen line, and Abbey & Imbrie doing the same thing.

I stated to all these gentlemen that I proposed to thoroughly test these lines, to keep a careful record of the results obtained and to

publish these results whether they were bad or good, and to this they all agreed in writing.

After having made such efforts to guard against the disasters of the winter of 1911, I supposed I was protected, and that the disasters of the previous season would not be repeated, but unfortunately this was far from being the case. Before giving an account of my experience, I ought to say that Nassau fishing requires the use of a large bait, which must necessarily spin, and consequently is very severe upon a cable laid line (although I had no difficulty with similar lines in the winter of 1906), and the very unfavorable winter which has just prevailed even in the South, though to a much less degree than in the North, delayed the arrival of the big fish until very late in the year, so that I had no practical chance to try these lines against fish of any magnitude until the month of March. In fact, I caught nothing but barracuda and rockfish, and none of these in excess of twenty-five pounds, until nearly the end of February, so that the cable laid lines during the early part of the season had no severe test. Under such test as was then given they showed extraordinary differences. I used three rods, each carrying a line of a different maker, and kept a record of the performance of each of the lines. The twenty-four thread lines furnished by Abbey & Imbrie gave good success during this early fishing; that is, they showed little tendency to kink or unravel and took a large number of fish up to fifteen or twenty pounds each without any accident, and the lines furnished by the Ashaway Company gave practically the same results. During all this early time I made a practice of taking these last two lines from the reels and substituting new lines in a period not much exceeding two weeks, and thought they were thoroughly reliable. The twenty-four thread cable laid lines furnished by E. vom Hofe Co. showed a disastrous difference. I tried three of these lines in the beginning and each of them broke or became unfit for further use on the first day, so I no longer dared to use their lines at all and have three of the twenty-four thread lines of their make still in my kit. I never saw any cable laid lines show such tendency to untwist and kink as these lines did, and think that they are absolutely worthless for fishing in tropical waters under Nassau conditions even for small fish.

Messrs. Abbey & Imbrie also furnished me two hundred yards of their braided Cuttyhunk line and the Ashaway Company furnished me one of their "Reliance" braided linen line, both of which I tried during the early part of the season in comparison with the cable laid lines. I found the braided lines showed some tendency to swell and slightly preferred the Ashaway line, although the difference was not great, but both of them seemed to me so swollen and weakened by salt water as to be unfit for service after about a month's use, and I therefore took them off the reels, substituting for them one each of the cable laid Ashaway and Abbey-Imbrie lines which had made before so good an appearance. The names of the cable laid lines

HIS FIRST TARPON.

furnished me by the various companies were as follows, all being green in color and twenty-four thread size: Abbey & Imbrie—"Highest Quality Linen Cuttyhunk Line." The Ashaway Company—"The Original Cuttyhunk Bass and Tarpon Line." Edward vom Hofe & Co.—"Celebrated Bass and Tarpon Line."

About March 15 the big fish at last arrived and my confidence in cable laid lines of any make promptly disappeared. I began to hook big kingfish, unmistakable by their characteristic play, and my lines promptly began to break. I cabled north for more braided lines, for no tackle can be bought at Nassau, and found that the Ashaway Company did not have braided lines in stock, and that it would take nearly a month to make them, which would bring me to the end of my stay. In reply to my order for six braided lines, Abbey & Imbrie sent me six more of their twenty-four thread cable laid lines, so I was left until the last week of my stay with nothing but these untrustworthy cable laid lines to depend upon. I repeatedly hooked large kingfish, played them with the greatest skill in my power and without fault on the part of my boatman, and had my lines break, often after the fish was pretty nearly exhausted. By further cabling my office I finally obtained from Abbey & Imbrie six of their braided linen lines bearing the following name, "Everlasting Deep Sea Cuttyhunk Line," but they were only of size twenty-one instead of size twenty-four, which I wanted. With these six new braided linen lines I succeeded in taking a 53-inch dolphin and a 43-pound amberjack during the last week of my stay, but these were the only big fish that I got. One afternoon, using an Abbey & Imbrie cable laid line, I hooked two of the largest kingfish I have ever felt, played them with the greatest care and skill within my power, and without fault on the part of myself or my boatmen in both cases the lines broke short before the fish

(Continued on page 251.)

DOLPHIN JUST FROM THE SEA.

My Substitute for the Wilderness

By ROSCOE BRUMBAUGH

THE surest way to make some lovers of the out-of-doors disgusted with life is to describe your month's excursion in the wilderness. Lug out your photographs of bears and fish and big trees. Show them the camp, the river and range on range of mountains. Tell them that you were one hundred miles from a railroad and that during your entire trip you saw no other persons than members of your party. Don't forget to enumerate the good things you had to eat, and relate in detail all those pleasant little incidents which made your vacation so enjoyable. Don't forget a single joke or yarn that will enliven the tale. Include all the trimmings. Pile it on. Rub it in. The poor devils can't help themselves—just yet.

My sympathy is with the fellows who want to go and can't—just yet. I am one of them myself. I turn cynical with envy every time I am told of an outdoor journey I could not start upon. Maybe the trip turned out to be a failure, or the men were not good sportsmen after all. I envy them just the same, for the getting out is what I crave. My rule book sentences me to six days at labor, fifty-two times a year. A day or two is the longest reprieve practicable. The rope won't reach any farther. And I have not the courage to use the knife—just yet.

However, I believe I have found a sort of satisfying substitute for the wilderness. Sometimes I think it has better "staying" qualities than the genuine article. It is slowly curing me of my envious disposition, too. But once when I told a big-game hunter about it, he smiled indulgently and said: "Enjoy yourself; it doesn't cost anything." In a rather small souled remark he hit the nail right on the head and drove it home more neatly than I can hope to.

This wilderness of mine is only a few miles from a great city and is practically the back yard of a thriving suburban town. Strangest thing of all, no attempt has ever been made to improve it and sell it off as five-acre chicken farms or bungalow plots. Perhaps I am the only person who believes it worth anywhere nearly the enormous price at which it is held. But I must confess my method of valuation is based upon no arbitrary commercial standards.

In all seasons of the year this uncultivated tract of "five hundred acres more or less" is a delightful stamping ground for the lover of the out-of-doors. I have come to know and to love almost every foot of it, from many different angles, but each new jaunt shows me something new in interest and beauty. The fact that nature is allowed to run the place after her own fashion attracts all the birds and persecuted animals of the countryside, which find in this pleasant retreat the cover and protection so hard to secure in the environs of the most overcrowded city in America. But this casual, undesignated "reserve" bears not the slightest resemblance to a public park. To me this is one of its greatest charms. It is given a wide berth by the Sunday dress parade, and by almost everyone else except a few foreign invaders and the adventure-seeking boys of the neighborhood.

Included in this "waste" is some abandoned

farm land, cleared and grubbed, no doubt, by early Dutch settlers. The little patches of fields are inclosed with elaborate stone fences, which cut up the woods in about the same aimless, patch work way. These stone fences annoyed me at first and made me homesick for a man's

size farm country, but I learned later to view them in a different, more kindly light. Now I think I should miss their rugged, sturdy presence. The farm buildings vanished long since, and no one remembers the time when any man tried to wrest a livelihood from the boulder-

THE BROOK IN SUMMER.

strewn hillsides and swampy hollows. A few dying apple trees and some old-fashioned garden flowers, now growing wild, help the friendly observer to reconstruct the past.

In summer the fields are a tangle of briars and bushes and weeds, affording slim pasturage even for sheep and cattle, but I have never seen a place richer in birds and wild flowers and other wild crops of nature's own raising. In these thickets the birds of summer nest and sing, for the most part unmolested except by their natural enemies. On a morning's jaunt I have seen wood-thrushes, catbirds, red-eyed vireos, yellow-breasted chats, orchard orioles, wood pewees, phoebes, meadowlarks, bobwhites, scarlet tanagers, chewinks, rose-breasted grosbeaks, vesper sparrows, flickers, bluejays and a large number of other birds not so well known. One bright afternoon, which I will not soon forget, I watched with delight an Irish setter "work" a lone snipe from one heavy cover to another. The poor dog, besmeared with mud, was having the time of his life, and probably felt disappointed because I did not take part in the game. Occasionally since then I have seen snipe and plover about the place. Red squirrels, rabbits and woodchucks are numerous, and according to report a few red foxes are making their presence felt. I recently stumbled upon what appears to be a den, and I am anxiously awaiting possible developments.

So it goes. There is always something worth while to call one back for further investigation. Perhaps I would not be so keen about going if it were not so near at hand. The state of the weather might be a hindrance if there were involved "a long, hard trip." One visit might last a long time. After all a really intimate acquaintance is possible only with things close home. Would you have the inclination, for instance, to listen to the tinkling music of the little brook singing under its arch of ice if you chanced upon it in the Big Woods? A thousand commonplace sights and sounds, exceedingly pleasing to the receptive mind, pass unnoted when more important objects are at stake.

Fortunately a large portion of my fanciful wilderness is in fact a heavily wooded ridge, in some parts mountainous in character, in which

there are three fair-sized ponds. Here a little practice shooting or fly-casting does no harm. In winter an uncrowded stretch of ice affords skating of a better grade than usual. There is plenty of room also for snowshoeing, and a winter camp does not seem wholly out of place. At all times there are splendid opportunities for the outdoor photographer to indulge his fancy.

I often wonder how long this comparative seclusion will last. Save the day when the inevitable axe and spade shall come to "beautify." At present only the cedars suffer at the hands of unthinking marauders in search of Christmas trees. The historic ground can have changed but little since Washington's tatterdemalion troops marched over it, but the city's feet are edging closer and closer, and the speculative invasion only too soon will take the place by storm.

Last fall it was said mistakenly to have been purchased by a great real estate company which had tremendous "development" plans under way. The few of us who appreciated this unspoiled outdoors immediately "fell for" the rumor and proceeded to take advantage of every excuse to get out and enjoy ourselves while the "going" was good and before the Italian camps were pitched. The hickory nuts and wild grapes and the velvety fall winds seemed never so tempting. How we reveled in that friendly corner of the good old earth!

"Hang the city," sighed one of us.

"I'm going back to Colorado next month," growled another. "I can't get my breath around here."

"I don't believe in civilization, anyway," chimed in the third. "Fact is, I'm an anarchist."

But the fear which possessed us then did not remain to spoil our fun, and the occasional days off which followed could hardly be excelled. To all of us the autumn seemed the gayest period of the year, the season of stirring marches and brilliant uniforms. We saw nothing melancholy in our tramps. Nature was in her merriest mood, keeping step to lively music, and we made the woods ring with boisterous banter and laughter. The man who sees anything sad in the flaming woods must carry sadness within him. At least that is the conclusion the three

of us reached after running Fall down to the last faded leaf.

It is the "dead," "close" season now and still there are no signs of the dreaded occupation by contractors. Instead, the chickadees and juncos appear to be having the place all to themselves. They act as though they owned it, bless their merry, frolicsome hearts. It is their playground, their feeding ground, their shelter in rough weather. I trust they may never be crowded out. And sometimes I think the solitary bobwhite I heard calling plaintively there one day is worth pretty nearly the price of the whole estate.

It has been literally my wilderness this winter, for my two companions of other days have moved to foreign parts. I miss them. The skating and the skiing have been great. I have spent many pleasant hours in stormy, zero weather, searching for some evidence of the lingering (or is it the awakening?) fires of summer. The white and black winter has a witchery about it which cannot be defined or described, and which is lacking in any other season. The snow hides the defects and at the same time brings out all the strong lines of the landscape that cannot be traced during the season of leaf and flower. Everything superfluous is blotted out. Only essentials remain. Winter, like truth, is a powerful stimulant.

When spring comes back again, perhaps with dancing feet, perhaps half reluctantly, I know that I shall see her smile first somewhere in those ancient woods. Her voice I shall hear when the first bluebirds carol along the edge of the pasture. The dogwood, the shad bush and the violets will vouchsafe a vision of her exquisite presence. I shall strive to be on hand with the robins and blackbirds and all the other members of that band of enthusiastic press agents of the star performer of the year.

While it may be somewhat a matter of "sour grapes" with me, still I do not envy the person who holds title to the "five hundred acres more or less." As for buying it, I do not believe that ownership always means possession in the truest sense. Besides, to paraphrase Thoreau, what has the average lover of the open to pay for a great estate which the owner will take?

Disappearance of the Wild Pigeon

By HERMAN L. COLLINS

WE know what happened to the American Indian who made his home in the Eastern woods. We have seen the annihilation of very nearly the last buffalo that lived on the Western plains. There is no uncertainty as to the fate of the gray wolf and the panther.

The salmon and the trout are the sure prey of a growing population. The deer, the bear, the elk, the rabbit, the squirrel, the raccoon, the wild goose and the wild turkey, pheasant, quail, woodcock and all the other rovers of the wood and air may be diminished in number, but they are far from extinct—all except one—the wild pigeon.

There is a mystery surrounding the utter disappearance of this bird that no one has yet satisfactorily explained. Thirty years ago I saw

in Northern Pennsylvania millions of them every spring. But for many years no one has seen a single flock where once the air was darkened by their flight.

Was man responsible for this swift and complete destruction of a whole species, or was the wild pigeon the victim of some great natural tragedy? It has been argued that a storm during migration drove them out to sea where all perished. Some real or near naturalists pretend that only an awful pestilence could so thoroughly have destroyed the whole wild pigeon tribe. Still others say that the failure of a winter's food supply resulted in their starvation. Then there are those who believe that the bird butchers are to blame.

But whoever may be right or wrong, this we do know for certain—a short generation ago you might see more wild pigeons in one day in Northern Pennsylvania than you will see all other birds combined for an entire year, and now you cannot see one, whereas the other birds are nearly as plentiful as ever.

In his novel, "The Pioneer," Cooper described a pigeon shoot. The scene of this tale is Lake Otsego, in Southern New York, and while the time of the story is half a century before I was born, I have myself witnessed flights of these birds just as the novelist described them.

The year after William Penn came up the Delaware in 1682, one of his companions wrote a letter back to the founder in England, telling

about the wild game. Indians sold all the deer to the new settlers they could eat for fifty cents a head. Wild turkeys weighing forty-six pounds were found, and the woods were full of them where now the city of Philadelphia stands. But most surprising of all was the vast number of wild pigeons.

Penn's lieutenant says the birds could be easily killed with clubs. For 200 years thereafter Pennsylvanians, and for all I know dwellers in other adjoining States as well, were killing pigeons every spring, and yet the flocks were enormous up to the early eighties in the last century. Then all at once they vanished—not gradually, but almost instantly, and they have never yet returned.

Wild pigeons when seen always flew North. I never saw any fly South, but of course they always went South to winter. The migrations to the warm country occurred at night and they rested during the daylight. They would come North soon after the snow disappeared, usually in March or early in April. Their period of flight was short and as I recall it not over a couple of weeks. A gray cloudy day that was warm was the time these birds pushed northward in the greatest haste.

I have seen flocks which must have contained a million birds and flocks of a thousand were common. It usually happened that once or twice each spring a stupendous flock would be seen. Then every one's attention would be called to it. The teacher would even permit us to look from the school house windows to see these giant hordes.

Pigeons fly in irregular flocks and not like wild geese which invariably go in the shape of a letter V. I have seen flocks that were so big that it was impossible to see both ends at the same time. This sounds like an exaggeration, but there are thousands of persons living who can verify the statement. Dozens upon dozens of flocks, big and little, and all coming straight up from the South would pass overhead in a day. I never saw a wild pigeon fly alone. It was also extremely uncommon to see them alight except when a snow storm suddenly overtook them, or when they were being lured to the nets by bird catchers.

Pigeons as a rule flew fairly high, but not so high that the whirr of their myriad wings was lost to the human ear. They made no cry and they flew steadily and with amazing swiftness.

All wild pigeons that I ever saw were of exactly the same color. They were dark blue. They were shaped somewhat differently from a tame pigeon, having a smaller breast and were fashioned more nearly like a turtle dove. They were built for great speed and long endurance.

A belated snow storm that covered the ground for several days resulted in consternation among the migrating pigeons. It also furnished a good proof that they ordinarily rested, if rest they took on their great journey, during the night time, for except at such snowy periods these rapid travelers were never seen to stop or eat. But as stated before, when on the return journey to the sunny South in autumn, the pigeons flew by night and rested during the day time, so that no one saw them go.

I have known a big flock of pigeons to settle upon a barn and all around a farm yard when there was snow on the ground. They were

WILD PIGEONS.

seeking food. I never saw a flock alight except when there was snow or when they were brought down by the deceiving stool-pigeon and flyer.

I do not know now and I never did know just when the wild pigeons returned from their Northern hatching places. The first snow in the autumn, however, must have been to them the compelling message.

The manner of catching pigeons in nets as practiced in Northern Pennsylvania up to twenty-five years ago was unique. Two men would build a little hut of green pine or hemlock boughs on top of a high, bare hill and usually near the edge of a woods. This hut was universally known as the "bough house." A few feet away from this place of concealment the men would spread brown buckwheat chaff over a space perhaps twenty feet square. A stake was driven in the middle of this brown patch of chaff, and a wild pigeon was tied to it by the feet with a string about a yard long. This is the genesis of the term "stool-pigeon," as will be seen later.

The men in the bough house had another pigeon that had been purposely blinded and attached to a string a hundred feet or so long. This pigeon was called the flyer. Then off to one side of the space covered with chaff was placed a net that was to catch the pigeons. This resembled an ordinary fish net and was cleverly attached to a crude spring, so that when the men in the bough house pulled the rope, they sprung the net.

With this outfit ready and a good day dawning, a pair of bird hunters could be sure of pigeon pot pie for an entire neighborhood for a week.

But keep quiet! Here comes a flock of pigeons—not a big one, only three hundred birds. They are flying low over the top of our high bare hill and its deceptive little bough house. Whirr! The captive pigeon tied to the stake out on the field of chaff sees its former companions and rises to meet them only to be pulled back to its prison post. Our stool-pigeon now makes a great ado, and it will be queer indeed

if he does not attract the notice of the flock passing overhead. He is being used all unknown to himself to deceive his friends who are still free and to make them think that here is a fine feeding place away from all danger. For is not one of their number already at the feast? But no, they do not see him, or if they do they are still skeptical. Very well, then, here goes the flyer. And up we fling him in the air, but he goes for only a hundred feet, and then we haul him back toward the bed of chaff. Surely with these two already down there having a gorge of buckwheat, it must be safe!

Now see the flock swiftly change its course and sweep around in an ever narrowing circle and then swoop down upon the bed of brown chaff, almost smothering the poor stool-pigeon. But don't tarry. Pull the rope. Spring the net. Confusion ten times confounded follows and such a fluttering of wings and straining to get free you never saw. Half the flock is caught beneath the net. The pigeons, frightened beyond any power to describe, put their heads through the meshes of the net to fly, but better might a human prisoner endeavor with his bare fist to beat down the iron door of his cell. There is no escape.

But don't waste time. Another flock will be here any moment. What will they do with one hundred and fifty fluttering, terrified pigeons? That man will show you. What in the world is he doing? Can my eyes deceive me? Is it possible! Yes, his method of killing his prisoners is swift and sure. He bites each one in the head. It looks cruel, but there could really be no speedier death. The skull of a pigeon is thin as an egg shell, and it is easily cracked between the teeth of a man.

I have known two men in one day in the manner just described to catch twelve hundred

pigeons. And in every community there would be several bough houses and as many fluttering stool-pigeons. And so the work of slaughter went on.

There was a nesting place that I know of in the northern part of Lycoming county about thirty miles from Williamsport. I did not see it myself, as I was then a boy, but I have talked with others who did. Here there was at times a real massacre of pigeons. The bird butchers would wait until the squabs were just ready to fly, and then they would go from tree to tree with clubs and beat down the young victims. The limbs of the trees would almost break under the great load of nests, so that it was easy for the pot-hunters to carry away bagfuls of dead squabs.

It was a curious fact that the young birds in this particular place were often fed upon wild rice, as was shown when they were killed. The nearest point that this kind of rice grows is in Carolina. Pigeon hunters said that the male birds carried this rice 500 miles for their young. Their southward flights on these errands of parental affection must have always been at night, for they were never seen to go.

Another curious fact I myself witnessed. It was customary for some of the bird catchers to keep several hundred wild pigeons for experimental or breeding purposes. But they died very rapidly in captivity even when well housed and fed. Moreover, they would hatch but very few young; in fact, it was impossible to keep a flock alive for any considerable length of time.

John Burroughs says the goldfinch and the striped chipmunk almost vanished only to return again. Perhaps some day we shall again see the heavens darkened with the wild pigeon on his annual pilgrimage northward.

of the Department of Agriculture provided for in this bill. Through these local laws, however, it appeared that because of their nomadic habits little or no real protection was afforded waterfowl and other migratory game birds, and therefore, to secure for them adequate protection, particularly in the spring, when they are on their way to their nesting grounds, the committee believed that they should be placed under the custody of the Federal Government.

It was also shown to the committee that unless immediate Congressional protection were afforded some of the most valuable species of these nomads would soon become extinct. It was clearly shown that the economic aspect was two-fold. The game birds yield a considerable and important amount of highly valued food, and if given adequate protection will be a constant valued asset. The insectivorous migratory birds destroy annually thousands of tons of noxious weed seed and billions of harmful insects. These birds are the deadliest foes yet found of the boll weevil, the gypsy and brown-tailed moths, and other like pests. The yearly value of a meadow lark or a quail in a ten-acre field of cotton, corn, or wheat is reckoned by expert entomologists at \$5. The damage done to growing crops in the United States by insects each year is estimated by experts of the Department of Agriculture at about \$800,000,000.

The majority of the committee believed that to give Federal protection to these birds is no invasion of State rights, for being migratory, they belong to no single State, but to all the States over which they pass and within which they simply pause for food, rest, or breeding. It was believed by the committee that the question is purely a Federal one, and that under the strictest construction of the Constitution these migratory birds may and should be subject and entitled to National protection by act of Congress. The committee further declared that the interstate bird is as interstate commerce and should be protected by and subject to the laws of the nation.

Forty-four of the forty-eight States of the Union were represented before the committee during the hearings on the bill, by persons, telegrams, petitions, or letters, either through their governors, or their State game commissioners, or through the many sportsmen's associations interested in bird protection. All favored this legislation being added to the Federal statutes, and three of the States, Oklahoma, New York and Massachusetts have indorsed the proposition by legislative act petitioning Congress for the passage of the act.

The Weeks bill is the fifth measure which has been introduced in the House of Representatives for the protection of migratory birds, and but for the objection of Representative Mondell, the bill would have passed the House and gone to the Senate, where Senator McLean, of Connecticut, who is chairman of the committee on protection of game, has a similar measure which is now before the Senate, having been favorably reported for passage by his committee. Mr. Mondell's objection can only temporarily delay this much needed legislation, for it is not believed that he can ultimately defeat this bill which the hearings before both the Senate and House committees have shown

The Weeks Bill

By RALEIGH RAINES

THE Weeks bill for protection of migratory birds, including in its provisions wild geese, wild swans, brant, wild ducks, snipe, plover, rail, woodcock, wild pigeons, and all other migratory game birds, which measure was favorably reported from the house committee on agriculture with the recommendation that it pass, has been stricken from the calendar of the House of Representatives on the objection of Representative Mondell, of Wyoming. Mr. Weeks, of Massachusetts who had charge of the bill, used every effort to have the bill considered by the House, declaring that the people of the country were in favor of the passage of the measure, and that if the House of Representatives had the opportunity, the bill would pass, but Mr. Mondell strenuously objected to the consideration of what he termed an unconstitutional measure which in reality menaced the rights of the people and the States. Of course this declaration

brought forth a spirited debate between the supporters of the measure and the Wyoming objector who it must be admitted is not authority either on constitutional law or bird life, and bird preservation. The object of the Weeks bill is to protect migratory and insectivorous game birds of the United States. The House Committee on Agriculture having jurisdiction of the bill extended public hearings on the measure and a great amount of testimony was produced before the committee to sustain the provisions of the bill. It appeared that most of the States of the Union have laws more or less effective in the protection of game or other birds resident and breeding within their borders, and by special reservation in the bill none of its provisions are to be deemed to affect or to interfere with these laws as to such birds or to prevent the States from enacting laws and regulations in aid of the regulations

and demonstrated is earnestly demanded by almost every State in the Union.

The McLean and Weeks bills for the protection of migratory birds have brought forth more enthusiastic support from the scientific and sporting fraternity than any measure which has been offered, with the possible exception of the Weeks Appalachian Forest measure, which finally became a law, notwithstanding the efforts of its opponents who offered the same alleged constitutional grounds for objecting that the opponents, including Mr. Mondell, is now urging to the Weeks and McLean measures for protection of migratory birds. Nothing daunted, Mr. Weeks will continue his efforts in behalf of this measure at the next session of Congress, when it is believed either his or the McLean bill will pass both the House and Senate. It might not be amiss for those who are interested in the enactment of either of the bills mentioned to write immediately to their Senators and representatives in Congress and urge the support of either measure which has for its purpose the protection of the migratory and game birds of the country, which is surely a patriotic desire on the part of all, in addition to being an effort to preserve a form of wild life that is of the greatest economic importance.

Scorpion Stings.

BY FRANCIS C. NICHOLAS.

DISCUSSION is heard at times in regard to the effects of a sting from a scorpion. Some people claim that such a sting is not dangerous; others state that there have been many instances where a scorpion has inflicted a fatal wound. The strength of the poison from these insects is often thought to vary with the locality. Here in Northern Mexico the sting of a scorpion is thought of less than a nip from a red ant. Further south in Tepic the insect is dreaded and held in so great fear that watchfulness against it becomes such a habit as to develop a suggestion of dread in the ordinary movements of many people. It is claimed by some that there are two varieties of the scorpion in Tepic, one of little consequence; the other capable of inflicting a terrible punishment, frequently even to the death of the victim.

The following incident is authentic and is related personally by the gentleman who suffered, William Bremer, whose address is in care of O. J. Omstead, Nogales, Ariz.:

Mr. Bremer was engaged as a constructing engineer for the Southern Pacific Railway of Mexico and was stung twice in the State of Tepic by scorpions, during September of last year. In telling of the occurrence he said:

"When I was first stung I didn't think much of it and had no trouble; a numbness in the arm for a few moments, a little stinging pain which some ammonia relieved, and that was all. I didn't even stop work. I do not know what kind of scorpion it was that stung me, because a Mexican killed it before I could see it, and I did not give much attention to the stories of danger, but now I would go up on top of the Court House and jump off before I would be stung again by a Tepic scorpion. It was shortly after my first experience that I was stung again, this time on the lower part of the thumb. The first sensation was a prick and a sharp burning pain as if a red hot needle had been run into

the fleshy part of my thumb. This continued for about two minutes, then the pain stopped. Meanwhile the wound had been cut open and allowed to bleed freely, a Mexican sucking the place vigorously to draw out the poison. It did me no good, and in about five minutes my nose began to run, discharging large quantities of mucus. Gradually a pricking sensation began to develop, as if an electric needle were being applied, and it seemed as though my tongue was swelling up and the pricking sensation was increasing to burning pains. The area of this feeling and pain gradually extended till the throat and the chest were affected, and the pain was becoming unendurable. I wanted water, but found that I could not swallow; also I was nauseated by the water I so much wanted, because it had in my mouth the taste of putrefaction. The pains were increasing all the time, becoming like electric shocks, accompanied by burning, and shortly became so violent that I could not breathe. Then the pain became more than the human body could sustain and remain under control. I went into violent convulsions, and it seemed as though I would in my writhings of agony twist my body in contortions which would have wrenched it to death if three men had not held me, and to do so it required all their force.

"I was taken to camp four kilometers distant in an open wagon, the convulsions and gaspings for breath continuing and becoming intensified at every jolt and movement. I was put in bed where I remained fourteen hours. The ability to speak began to return after two or three hours, but I could only with great difficulty get out a word or two and would at times be five minutes or more in simply saying 'water.' I could not remain in one position, and if anything touched me, it brought on the convulsions of pain. At one time a friend threw a shirt across the room to an attendant who wanted it for me, but failing to catch it, the shirt fell on me, and it seemed as though a cart load of bricks had fallen.

"With each succeeding paroxysm and struggling for breath it was thought that my end had come, for death from this scorpion's sting usually results during such struggles. The effects of the poison gradually wore off, and after fourteen hours I could get up, though I was weak and could not manage my legs and feet. On trying to walk I staggered like a drunken man, and for several days the numbness and pricking sensations continued in my feet. After two or three weeks I was as well as usual, but I never want another such experience:

"There are in Mexico two kinds of scorpions. The poisonous fellow is small, not over two inches long and has a yellow shading under its tail which can be seen when the tail is coiled up to sting. In the specimens I have seen it is not very distinct, but it might be clearer on some specimens, and this would account for the yellow spot which some people say the poisonous scorpion has on its tail. I have heard some people say it is a red spot. The coloring may change a little at different seasons, but it is simply a shading on the underparts of the insect. I appear to have been stung by each variety, and whenever you hear a fellow say that a scorpion is not dangerous, you just say that it depends on the kind of scorpion.

"Yes, sir, I have known of other people who

were stung while we were at work in Tepic. A woman was stung on the breast and died in two hours. A boy was stung and died in a few hours. One of the young engineers was stung in the office about 6 A. M., and a little after noon he was dead, though the company's physician was in attendance all the time. Besides these there were a number of people on construction work who were stung. Some nearly died and all went through such experiences of pain and convulsions as I have described. I have been bitten by a rattlesnake, and the pain and prostration are as nothing when compared to the agonies I suffered from the sting of a poison scorpion."

Mr. Bremer, who makes the above statement, is a well known and highly respected constructing engineer who conducts his business in Northern Sonora, Mexico, and in Southern Arizona and California.

A North Carolina Preserve.

HENDERSONVILLE, N. C., Aug. 17.—*Editor Forest and Stream:* I only learned quite recently of a very interesting experience right here in Western North Carolina. It must be remembered, however, that this "neck of woods" is quite extensive—140 miles west of this town.

A gentleman from Detroit, Mich., has leased for a number of years 60,000 or more acres of mountain lands in Graham county, in the extreme western part of the State, for a game or fish preserve. His name is Moore. This is a grand mountain region and splendidly watered. Big and Little Snowbird creeks, and the Santeetla River and tributaries are well stocked with brook trout. He has built heavy wire fences and introduced a half dozen or more of elk, or wapiti, as many brown bear, a number of buffalo and wild boar (this latter I wish had been left out), these to stock the preserve.

I am only sorry regarding the wild boars, as two of our most valuable game birds, the wild turkey and ruffed grouse, are already having a hard time to hold their own against many enemies, the worst and most destructive of all so far being a cousin of the wild boar, viz., the razor-back hog. Altogether it is a very interesting experiment. A friend was recently on this preserve on a business trip and saw a number of the elk and buffalo.

A large breed of dogs are there also, and these dogs were then introduced in an effort to have the bear cut short his visit, and this he resented. He was finally lassoed, and thus was "persuaded" back to his own grounds. I am told when these bears arrived at the nearest depot to the preserve, Andrews Station, a pretty little town in Cherokee county, they were locked up over night in the freight depot in their crates or cages.

Next morning when the agent of the railroad opened the door of the depot one of the animals was "at large," and no doubt looked large. It is enough to say the door was quickly closed. He had to be lassoed and returned to his crate. I shall look forward with much interest to this the first experiment of this kind I have heard of in our mountains.

Barring the boars, I think it an assured success.

ERNEST L. EWBANK.

SEA AND RIVER FISHING

Memorial Window to Izaak Walton.

THE CLOSE, Winchester, England, July 27.—
Editor Forest and Stream: I shall be very grateful if you can find room in your paper for a paragraph about a project which we have recommenced in this city, and which may, I think, appeal to many of our friends across the water who are interested in fishing. We have many visitors from your country, and they nearly always express a wish to see Izaak Walton's grave in our [Winchester] cathedral. It is only a flat marble slab in the floor, with an epitaph written

window. It is marked by a flat slab with an epitaph from the pen of his brother-in-law, Thomas Ken, Canon of Winchester, and afterward Bishop of Bath and Wells.

The scheme will include the careful repair of some of the old stone work of the window, which is in the "Decorated" style of architecture.

The stained glass will be entrusted to Messrs. James Powell & Sons, of Whitefriars, whose work is deservedly held in such high esteem.

The total cost will be about £400. An appeal is therefore made, with the cordial approval of the Very Rev. the Dean, to all who are followers of the "gentle art," that they will join in this memorial to an honored name.

WINDOW IN PRIOR SILKSTEDE'S CHAPEL NEAR GRAVE OF IZAAK WALTON.

PRIOR SILKSTEDE'S CHAPEL IN SOUTH TRANSEPT, SHOWING THE TOMB OF IZAAK WALTON.

by Bishop Ken, his brother-in-law, and we are wishful to further commemorate his life by placing a suitable stained glass window almost over his resting place.

I inclose a circular which I am sending to many fishermen in England, and if you will help me by publishing an extract which will take the form of an appeal to our American friends, I shall be much obliged. Several of your countrymen have kindly sent subscriptions, and we have received altogether about £150.

I believe that Messrs. Powell have carried out the stained glass in New York cathedral. Their work is most beautiful.

F. PRESTON-JOY.

The circular mentioned follows:

More than a dozen years ago a project was commenced for placing a Memorial Window to Izaak Walton in the South Transept of Winchester Cathedral. This plan has remained in abeyance during the protracted repairs necessary for the preservation of the historic building. The great undertaking being successfully completed, the opportunity arises for continuing the work in memory of the "Prince of Fishermen," the charming biographer, and author of "The Compleat Angler." His resting place is in Prior Silkstede's Chapel almost beneath the proposed

The following gentlemen have kindly given their support:

Fishing for Fish or Fun and Fish.

HENDERSONVILLE, N. C., July 15.—*Editor Forest and Stream:* I read with pleasure your remarks in the issue of June 15, "Old Clothes" and "Fishing For Fish or Fun and Fish." I say amen to both. For the life of me I can't see how an angler can get full and thorough enjoy-

ment in the woods or on the streams if he is handicapped by "tailor made" and "store clothes" and all that goes with "sich." Nor can I understand an angler making use of grab irons to catch fish. The kind you speak of is a monstrosity, and the 9, 12 and 15 hook gangs nearly as bad. It is right that you should draw the contrast as you have with the Williams hook. There is so very much more in "fishing for fun" because the angler enjoys the outdoors and taking fish in a strictly honest way.

In a recent letter I spoke of the careless manner many anglers approach trout in a pool or good live water. There is, too, the danger of disturbing them from below. Talking does not frighten fish, but the hard stamping on the ground in approaching may do so, and the careless knocking together of the stones under the water or disturbing it in other ways. For instance, I well remember several years ago getting a rise from a nice trout, and wishing to give him a rest, I left him for half an hour. Then with my eyes so intently bent on the spot at which he rose, I stalked up stream on the opposite side and nearly to the vantage point I desired to reach, when I caught one foot under a rock. It was a quick, hard struggle to keep my feet, but resulted of course in my sitting rather too suddenly down up to my arm pits in the stream. The result? Why, the trout immediately had grave suspicions of my intent. At any rate, not a rise after that.

Another time I tripped in like manner and dove over the rock and went quite under, head over heels. In each case I was too intent on where my flies were falling without due regard to where I was stepping. For like reasons the back cast will greatly surprise one by catching trees or bushes. It is simply this over-anxiety—too quick. The safe rule is to "make haste slowly."

Again, I was at the power plant in Green River. This time I began to fish the pool just under the mountains after stalking up the rapid bit of water below. Not a rise till I got almost to the last rocks under water that I could reach. Then I skipped my flies about as flying insects again, again and again, and let them drop just on the rapid water below the white foam. There was a rush as the flies touched the water, and I had my fish well hooked. I took it to be a ten-inch rainbow, but soon found I was mistaken. The little five-ounce rod bent as no ten-inch fish could bend it, and I soon found I had a "good one." We fought it out to a finish, and when I took him into the power house and measured him, he was a bit over eighteen inches long and quite heavy. I took this trout on a Williams barbless bee. I find the bee a great killer of rainbow trout.
ERNEST L. EWBANK.

EVERY season the Atlantic coast resorts give birth to stories of sea serpents, but here's an inland snake story par excellence:

"While spooning for bass in a creek near Mt. Carroll this week, Allen Sword, a fisherman of that place, caught a rattlesnake which was trying to cross the stream. By a dexterous cast of his spoon hook he caught the snake and hauled it to shore, where it was killed. The reptile carried ten rattles. Veteran fishermen declared that the exhibition by Sword was remarkable."

Pond Culture of Small-Mouth Bass.

From a pamphlet issued by the Marion County (Ia.) Fish and Game Protective Association.

THE hatching and rearing of small-mouth black bass by the method known as pond culture, which is in use at the Riverside station, Marion County Fish and Game Protective Association, is the only successful method ever discovered in the propagation of this fish, and was originated by Dwight Lydell, of the Michigan fish commission. By this method the hatching is done by the adult fish in ponds constructed for that purpose and under conditions made as nearly natural as possible. The hatching ponds are built with a gradually sloping bottom made of clay, and are made to drain toward a deep pool or kettle at the outlet, so that the water can be slowly drawn off and all of the fish gathered in a small space at such times when they are to be removed from the pond.

Broodery ponds for rearing the young fish are constructed on the same plan except that they are not made so deep as the hatching ponds, since there are no adult fish in them, the fry being transferred from the hatching ponds.

The ponds at Riverside Park consist of a wintering pond, hatching pond and brooding pond. The wintering pond is the smallest and deepest of the three. It is triangular in shape, each side being about sixty feet long. Its greatest depth is about five and a half feet, and is lined throughout with cement. It is used for keeping the parent fish over the winter and at all other times except during the hatching season.

The hatching pond is about 175 feet in length and 105 feet wide. Its greatest depth is about four and a half feet at the outlet, but for the larger part will vary from eighteen inches to three feet in depth. The hatching is done in this pond, and it is also used as a broodery for the fry after the nests are hatched off. The broodery pond was built last fall (1911) and will be put in operation for the first time this season. It is about 250 feet long and 112 feet wide, and is three feet deep at the outlet. It will be used for rearing the fry to the fingerling stage.

The water supplying these ponds is derived from springs in the hillside back of the ponds. It is conducted to the wintering pond through a tile drain and flows at the rate of thirty-four gallons per minute.

From this pond it flows into the hatching pond and then into the brooding pond. The waste water drains into Crooked Creek.

METHOD OF OPERATION.

The hatching pond is cleaned in the spring after having been left dry during the winter months and nest frames consisting of one-inch boards built in a box shape thirty inches square without top or bottom, two adjoining sides being four inches high, and the other two sixteen inches high are placed in position around the edge of the pond with the highest sides toward the bank, and so they will be in water about two feet to thirty inches deep when the pond is full. They are then filled with coarse gravel and sand to the height of the four-inch sides. The nests are weighted down with a heavy stone placed on top to keep them in position. Then the pond is filled. Water lilies set in flower pots so as to be easily moved are placed near the nests to help screen them, and also at other

points in the pond. Chara and elodia moss is planted around the edge of the pond for a hiding and feeding place for the insects on which the young bass feed.

When the water in the hatching pond reaches the temperature of 70 degrees—generally in the early part of May—the water in the wintering pond is lowered and the breeders seined out and put in the hatching pond. This temperature being right for spawning, the male bass selects his nest at once and cleans it by fanning it with his fins and tail. He then goes out and gets a female that is ready to spawn and drives her on the nest. After working some time—possibly an hour or so—to bring the female into that state of excitement in which she will drop her eggs, by circling around her and biting her on the head and sides, spawning takes place. The fish turn partly on their sides a few inches above the nest with the vents together and stay in that position for a few seconds at a time, at intervals of two or three minutes, during which time the circling movements are resumed for about a half hour, during which time the eggs and milt are deposited on the nest. The male then drives the female away and tends the nest alone, fanning it to keep sediment from collecting on the eggs, and which might smother them, and drives away any other fish that comes near the nest. During the spawning period both fish turn very light in color, as they sometimes do just after being caught, making the black spots on the head and sides appear very prominent.

The eggs hatch in six to eight days and the fry swarm to the top in ten to fifteen days after the eggs are laid. The fry which are to be left in the hatching pond are allowed to scatter over the pond; and the balance which are to be removed either for planting or removal to the brooding pond, are confined in guards placed around the nests at the time the fry are rising to the top. These guards consist of a wooden frame three feet wide and four feet long, covered with cheese cloth. They are made in several heights, and when set around the nest extend several inches above the top of the water. The fry are seined out of these guards with a cheese cloth net as wanted, but are not confined in them for more than two or three days. The young fish do not start feeding until the yolk sac is absorbed; this lasts them for about two days after they have come to the top.

The food of the young fish consists of a number of insects that live in the water. These insects are gathered from stagnant pools where they live on decaying vegetable matter. They are seined out with a cheese cloth seine and are planted in the ponds inside a screen wire inclosure. This is done to keep the larger and injurious insects from getting into the pond. The smaller food insects can easily pass through the meshes of the screen and scatter all over the pond. They find plenty of food in the dead mosses and other vegetation that grows in the pond and multiply very rapidly. The food insects consist mainly of cypris, cyclops, daphnia, gammarus, blood worms, round worms, the larvæ of the May fly and mosquito. Some of the more common of the injurious insects that prey upon the fry are the boatman, whirligig beetle, the larvæ of the dragon fly and the water beetle. The fry which are black until they reach the length of about three-fourths of an inch are guarded by the male fish. Every evening during

this period the fry will circle the shore of the pond and ball up at some point, generally around a lily or nest frame. They then gradually take on the color of the old fish and do not ball up any more at night, and the old fish do not pay any attention to them.

The fry are constantly feeding and reach the fingerling stage (one inch) in about twenty days. They are then thinned out from day to day and planted. Planting continues until the latter part of August, at which time they are from two to three inches in length.

The fingerlings are seined out of the pond with a fine mesh seine and are transferred to the place of planting in ten-gallon milk cans. The water in the cans is aerated by means of a perforated dipper which is plunged into the can and carries the air down with it. When the air is exhausted and the dipper is filled with water, it is lifted out and the water left to fall back into the can. By this means the fish can be held in the can all day long if necessary. Some of the fry grow more rapidly than others, especially those which have a tendency to feed on the weaker ones. Some of these will attain a length of four or five inches by the last of August. The proportion of these, however, is very small.

The cans are loaded in the wagon and wet canvas is wrapped around them. This is done to keep the water in the cans cool by the evaporation of the water on the canvas.

On arriving at the place at which they are to be planted, most of the water in the cans is emptied and all of the fish put into one or two cans. These cans are then sunk in the stream in comparatively shallow water, near some grass patch—which is the natural feeding grounds—and the fish allowed to swim out of the cans, which they will do when the water in the cans is tempered to the same degree as that in the stream. They will scatter over a large area in a short time. Should there be any pin minnows about, the young bass will start chasing and feeding on them as soon as they come out of the can.

The breeders are allowed to stay in the hatching pond with the young fish and are fed on minnows every day. The minnows are killed before being fed to the bass, so they will not escape in the pond and feed on the insects and young fish.

When the hatching pond is emptied, the breeders are put back into the wintering pond and the pond stocked with live minnows. The bass feed upon these until freezing weather sets in, and then do not feed any more until spring.

The Anglers' Club of New York.

THE club tournament of the Anglers' Club of New York will be held as follows:

Saturday, Sept. 7.—2 P. M., dry-fly accuracy; 4 P. M., distance salmon fly handicap.

Saturday, Sept. 14.—2 P. M., distance bait handicap; 4 P. M., distance fly handicap.

Rules of spring tournament to apply unless otherwise specified. Lure in bait event furnished by the committee. Weight of rod in distance fly event limited to six ounces with no allowances. Silver medal for first, bronze medal for second in each event. The contestant making best average score in the four events to receive a gold medal.

WALTER MCGUCKIN,
Chairman Tournament Committee.

CORRESPONDENCE—FOREST AND STREAM is the recognized medium of entertainment, instruction and information between American sportsmen. The editors invite communications on the subjects to which its pages are devoted, but, of course, are not responsible for the views of correspondents. Anonymous communications cannot be regarded.

SUBSCRIPTIONS: \$3 a year; \$1.50 for six months; 10 cts. a copy. Canadian, \$4 a year; foreign, \$4.50 a year. This paper may be obtained of newsdealers throughout the United States, Canada and Great Britain. Foreign Subscription and Sales Agents—London: Davies & Co., 1 Finch Lane; Sampson, Low & Co. Paris: Brentano's.

ADVERTISEMENTS: Display and classified, 20 cts. per agate line (\$2.80 per inch). There are 14 agate lines to the inch. Covers and special positions extra. Five, ten and twenty per cent. discount for 13, 26 and 52 insertions, respectively, within one year. Forms close Monday in advance of publication date.

THE OBJECT OF THIS JOURNAL

will be to studiously promote a healthful interest in outdoor recreation, and to cultivate a refined taste for natural objects.

—FOREST AND STREAM, Aug. 14, 1873.

NATIONAL PARKS.

THE bill introduced in the Senate by Senator Smoot, of Utah, for the establishing of a National Park Service in the Department of the Interior has been reported favorably by the Senate Committee on Public Lands, with the recommendation that the bill pass. The purpose of the proposed legislation is to provide proper supervision and administration of the national parks from one central point under one department of the Government, with a sufficient number of employes under a director who will devote their entire energies and attention to the upkeep, supervision and administration of the national parks and national monuments. At present these public reservations are governed by three departments of the Government, namely the Departments of Agriculture, Interior and War, and while there can be no criticism offered on the administration of the parks, yet it is felt that the means are inadequate for properly governing them, with the jurisdiction divided as it is with three departments instead of being concentrated under one department. The bill provides for an appropriation of \$75,000 for the support of the national park service, and declares that the parks, monuments and reservations shall not at any time be used for any purpose other than as agencies for promoting public recreation and public health through the use and enjoyment by the people. The committee believes that with a more effective administration of our national parks the people of the country will realize their value as recreation grounds, and that the number of visitors each year to the various parks will increase very materially. Up to the present time very little inducement has been offered to the public to visit the parks and monuments, except through the advertisements of the railroads, and it is believed that with proper administration of the parks to include a publicity bureau, which

would educate the public in the matter of the beauty and scenery of the parks, the annual travel could be greatly increased.

With proper public interest and support the Smoot bill may be expected to become a law during the next session of Congress.

THE SULLIVAN LAW.

THE Sullivan law is by no means perfect, but on the other hand it has many good features. It takes out of the hands of irresponsible people many opportunities of doing damage to themselves and to others. Every day we read of a shooting affair that could not be possible were the letter of the Sullivan law lived up to—or strictly enforced. The law gives to those who need a revolver the privilege of a permit. It is clamored that a revolver is necessary for home protection. Is it? We think not. How many of us had a revolver in our houses before the Sullivan law; mighty few of us. How many instances do we hear of wherein a revolver has been the means of capturing a burglar; very few. Generally a yell out of a window does the trick. Now and then we read of a drunken husband shooting his wife in mistake for a house breaker or of a nervous woman shooting her husband thinking him a burglar. Such cases would not be were the Sullivan law enforced as was intended by the father of it. The day has passed when affairs of honor, so-called, need settlement with a gun.

The penalty for carrying a revolver should be heavy and the law should be rigidly enforced after such changes have been made in so far as it affects target shooters, alien or citizen, and its use in camp, and other places where the intention of the possessor is beyond question. We want a revision of the Sullivan law; not a repeal of the measure.

THE Senate foreign relations committee has agreed to recommend the ratification of the treaty signed July 20 last by the United States and Great Britain promulgating fishing regulations in Newfoundland waters. The treaty carries out with some modifications the rules and method of procedure recommended by the Hague Tribunal, Sept. 7, 1910. It provides that all future laws or rules for the regulation of the fisheries of Great Britain, Canada or Newfoundland, such as relate to the time and method of taking fish shall be promulgated and come into operation within the first fifteen days of November of each year. At ten year intervals a change in the date may be made the subject of negotiations.

SENATOR CATRON, of New Mexico, has introduced a bill to appropriate the sum of \$200,000 for the purpose of destroying predatory wild animals upon the national forests and lands adjacent thereto. The bill further provides that upon request of the State officials of States where national forests are located, that the Department of Agriculture shall co-operate in the destruction of said animals, but that the amount expended in any State shall not exceed in any one year the amount expended by the State for the same purpose. Representative Mondell, of Wyoming, has introduced a similar bill in the House of Representatives. It would appear to the casual observer that an appropriation for the

extermination of wild animals by the Federal Government in this day of sportsmen who travel half around the world to find animals to kill would be superfluous legislation and a waste of public money. Nevertheless, the Bureau of Forestry complains that the number of predatory animals in the national forests is a menace to settlers and stockmen alike. Last year the Bureau reports 7,971 animals killed by forest officers, and many thousands more killed by settlers. The animals destroyed include 213 bears, 88 mountain lions, 870 wildcats, 172 wolves, 72 lynxes, 6,487 coyotes and other animals. This number of animals killed is about 25 per cent. less than the year previous. Here is an interesting and profitable field apparently untried by our sportsmen in search of wild animal hunting.

REPRESENTATIVE FAISON, of North Carolina, has introduced an omnibus fish hatchery bill providing for the establishing of fish hatcheries and fish culture stations in the following States: Alabama, near Mobile, where the city has donated the site; Georgia, near the sea coast; Washington, near Lake Quinault; Illinois, sixteenth congressional district; North Carolina; Oklahoma; Texas, near the Gulf coast; Nebraska, first congressional district; Oregon, two stations; Indiana; Arkansas, and Tennessee. The sum of \$25,000 is provided for each hatchery station which shall be operated by the U. S. Fish Commission in co-operation with the States named. The increased interest in fish culture is daily manifested by the activities of various members of Congress in efforts to establish hatcheries throughout the country. The high cost of living, and especially the increased cost of meats means that the energies of the people must be directed to cheaper food, and the ever welcome and toothsome fish is coming into increased popularity.

It is gratifying to observe in what esteem trapshooting is held by the better class. At the Charlottesville and University of Virginia tournament last week luncheon was served the shooters by ladies of the Episcopal Church. This sort of encouragement makes for the good of one of the greatest of outdoor sports. The ladies deserve thanks and the shooters congratulations.

BORZOI, by Joseph B. Thomas. Houghton Mifflin Company, New York. 8vo., \$1.25 net.

Joseph B. Thomas, who has made a thorough and lengthy study of the Russian wolfhound, has brought out a book covering every phase of the subject in such a way as to interest the casual reader, as well as breeder of this attractive animal. The author has studiously avoided the suggestions and pitfalls of some of the earlier importers and fanciers who brought the breed somewhat into discredit, through claims of an impossible combination of speed, endurance and courage. The author has expended his time and energy in fixing a correct type of this picturesque hound, which will do much to popularize the breed in America.

Handsomely illustrated throughout with the best specimens of Russian wolfhound to be found in this country, bred at the Valley Farm Kennels, owned by the author. It makes a volume invaluable to the owner of an outdoor library.

YACHTING

Ticks from the Ship's Clock.

Judging from all indications and the early interest aroused, the Motor Boat Club of America's race week, which will include the National Motor Boat Carnival, to be held on the Hudson River, at Yonkers, N. Y., Sept. 16 to 21, inclusive, will be a record-breaker in the number of entries and the class of boats that will show their paces.

It looks as though Commodore Blackton had been handed a submarine instead of a hydro-plane when he got Baby Reliance III. At any rate, she spends most of her time under water. She now is submerged in thirty feet of water and rests on the bottom of Lake Michigan where she dove on Aug. 12 in the Chicago races.

Atlantic Y. C.

In a preliminary way the annual race week of the Atlantic Y. C. started Aug. 17 on Gravesend Bay, although officially not until Tuesday of this week.

The largest fleet that has sailed so far this year crossed the line, the eighth race to count on the yacht racing championship of the lower bay. Five of the lower bay Q boats put up a great race. Spider was first in, covering the course in 1.50.17. Six seconds later came Alice, and Suelew was 3s. astern.

On corrected time, both Joy and Careless were beaten in their respective divisions of the handicap class. The former boat led home the first division, but lost on corrected time to La Cubana. M. & F. defeated Careless in the second division. The S division was taken by Dr. C. L. Atkinson, and Mouse led home the Gravesend Bay knockabouts. Among dinghies of the New York C. C., the winner was Viva. The summary:

Sloops—Class Q—Start, 3:00—11½ Miles.		
	Finish.	Elapsed.
Spider, H. Chubb.....	4 50 17	1 50 17

Stamford Y. C.

THIRTY-FIVE yachts sailed in the twenty-second annual regatta of the Stamford Y. C. last Saturday.

Commodore Edward Y. Webber's new steam yacht Mareva was the Regatta Committee boat, the committee being G. G. Dominick, Bartholomew Jacob, C. A. Hatch and H. P. Stokes.

E. Randolph's Helen II. won the Sound schooner class from Alys II. by 1m. 1s. and the "thirty" Nepsi defeated Alera by 2m.. The winners in the other classes were Robin Hood, Hamburg II., Dart, San Sarana, Madeleine II. and Edmee.

Bug class raced in the forenoon, finishing

in this order: Bunkie, John Rodley; Doodues, Mannin and Lawrence Jacob; Toy, Kenmore Knox; Duckling, Allston Jacob; Fly, Herbert Wildman; Caterpillar, Trowbridge Elliman; Flipper Lewis Renshaw, and K. T., Reeves Hart. Summary:

N. Y. Y. C. Thirties—Start, 1:40—14 Miles.		
	Finish.	Elapsed.
Nepsi, Johnson De Forest.....	4 40 18	3 00 18
Alera, J. W. Alker.....	4 42 18	3 02 18
Ibis, W. H. Busk.....	4 43 29	3 03 29

Whim, A. G. Huhfel, Jr.....	5 23 32	2 03 32
Dash, L. M. Dashiell.....	Withdraw.	

Boston Y. C.

HULL, Mass., Aug. 17.—The sixth annual championship of the New England Engine and Boat Association was held here this afternoon. More than forty boats raced in the three regular classes. Class A, speed boats of more than 12 miles an hour; Class B, cabin cruisers, and Class C, open boats.

There was also a "bang-and-go-back" race given impromptu by Rear-Commodore Roger Upton of the Boston Y. C., in which most of the boats in the power boat division took part.

Twelve boats, ranging in size from a 10-foot power tender to a 50-foot power yacht, in speed from a heavy-going 23-foot cabin cruiser to a 20-mile-an-hour speed shell, started in this latter event.

The boats went at full speed toward Hough's Neck, stringing out until more than a mile separated the first and last boat. After a six-minute run, a whistle from Elizabeth recalled the boats and at the first sight of the steam over her stack, they returned and made for home, thus establishing their own handicaps.

Sconooda, owned by J. A. Needham, won, followed in order by Zui Zia, Commodore Alfred Douglass; Alserie II., C. N. Burnell; Kuzn III., B. R. Miller; Saracen, W. Briggs; I Duno, F. W. Dutton; Pilgrim, C. W. Estabrook; Henrietta, S. A. Slack; Petrel; Presto, C. W. Conant; Kex, E. P. Huckins and Mascot, Fred Borden, disqualified.

Class A—Speed Boats.

Nahant Dory Club.

NAHANT, Mass., Aug. 17.—Grayling, owned by Frank Gray, won the race of the Nahant Dory Club this afternoon. This race is the first race of the bug boats in Nahant for two weeks. The contest, for a championship silver cup, will be finished soon after Labor Day. The summary:

	Elapsed.
Grayling, Frank Gray.....	1 20 15
Humbog, J. H. Foster.....	1 23 33
Bambino, J. H. Lovering.....	1 22 50
Midge, A. S. Johnson.....	1 23 10
Weivel, J. L. Motley.....	1 24 55
Brownie III., S. E. Guild.....	1 25 00
Spider, T. Motley.....	1 25 20
Stinger, W. O. Gay.....	1 27 10
Bugaboo, Nelson Whitney.....	1 29 02

Hempstead Harbor Y. C.

GLEN COVE, Aug. 16.—Four of the gem boats sailed in the midweek race to-day. The course was to and around Weeks Point buoy, to and around Prospect Point buoy to starting line. Emerald, owned by Frederick Johnson, and sailed by Eugene S. Willard, was the winner in 58m. and 15s. The summary:

Glen Cove Gem Class—Start, 3:35.		
	Finish.	Elapsed.
Emerald, F. Johnson.....	4 33 15	0 58 15
Brilliant, H. W. J. Bucknall.....	4 35 39	1 00 39
Topaz, Trubee Davison.....	4 35 37	1 00 57
Catseye, H. M. Adams.....	4 33 00	1 03 00

Yarita Defeats Alpha.

QUINCY, Mass., Aug. 17.—Two boats in Class B of the Quincy Y. C. held a race this afternoon over a course to the buoy off Bunkin Island, to the buoy off the Government wharf at Peddocks Island and home. The wind was light from the eastward. Yarita defeated Alpha by nearly 5m., actual time.

Cottage Park Y. C.

WINTHROP, Mass., Aug. 17.—The annual regatta this afternoon of the Cottage Park Y. C. was eminently successful. The winning yachts were: Nutmeg, Class A; Olivia, Class B; B. H. Lindsay, Class C; Clara, Class D; Sinbad, Class H; Moslem III., Class I; Zoe, Class S; Barbara, Class X; Leenane, Bar Harbor, 30-foot class. The summary:

Huntington Y. C.

HUNTINGTON, I. I., Aug. 17.—Twenty-two motor boats and hydroplanes competed in the annual regatta of the Huntington Y. C. held here to-day: In a race between the high-speed displacement boats, Ran and Big Balaam, the latter won by 3m. Big Balaam covered the distance in 48.55 against 51.42 by Ran.

In the hydroplane class Commodore August Heckscher, Seawanhaka-Corinthian Y. C., tried out his new 20-foot craft. She did well for one lap and then had trouble with her engine and

stopped. The race was won by Gunfire, Jr., owned by W. J. Brainard, covering the course in 1.07.10.

J. Lewis Luckenbach's Empire led seven small cruising power boats. Lady Betty won from four large cruising power boats. The standing cabin launch division was taken by E. J. Jacha's Nautilus.

East Greenwich Y. C.

EAST GREENWICH, R. I., Aug. 17.—The East Greenwich Y. C. held its third anniversary to-day, being the biggest celebration ever witnessed in the town. The affair was the opening regatta of race week under the rules of the Narragansett Bay Y. R. A. The summary:

FORTY YEARS OF AGE.

THIS is the age at which the average man begins to weigh carefully his experience, his capabilities and his financial resources. All these factors loom up before him as of large importance. They affect not only himself, but the future welfare of those dependent upon him. If he is a normal man, he understands that the age of forty is the age of opportunity, and that by an orderly application of his experience and knowledge, and by systematic saving and prudent investment, he has every reasonable chance to provide for the future.—Spencer Trask & Co.

THE boys as well as their elders in the homes where FOREST AND STREAM goes read it. They are great readers of advertisements and dream of what they will buy when they grow up. Make them acquainted with your name and when they are grown they will not forget it.

American Forestry Association.

ONE of the most important actions taken by the directors of the American Forestry Association, who held their midsummer quarterly meeting in the White Mountains of July 17, 18 and 19, was the passage of a resolution protesting vigorously against the proposed amendment to the Agricultural appropriation bill, soon to be acted upon by the Senate, which provides that all lands in the national forests, "suitable and fit" for agriculture, must be classified and listed for settlement whether it is wise or unwise to remove them from public control. This resolution has been sent to each member of the Senate with a request for his careful attention.

The directors, with a number of guests, including State foresters, forestry instructors, State officials, timberland owners, paper and pulp company officials and a number of other prominent men, gathered at Plymouth, N. H., on the morning of July 17, and through arrangements by Col. W. R. Brown, of the Berlin Mills Company, journeyed to North Woodstock in automobiles. The afternoon was spent in looking over the Lost River reserve, recently acquired by the society for the protection of New Hampshire forests, and the members of the party climbed down the course of the Lost River for some distance among the mammoth boulders, into the caves they form, and viewed the remarkable scenic effects caused by some remote convulsion of nature, with wonder and delight. Here is a spot, which, when the road to it is improved, will become the mecca of almost every sightseeing party going into the White Mountains.

There followed in the evening, at the Deer Park Hotel, a meeting participated in by the directors of the association, and under the auspices of the Society for the Protection of the New Hampshire Forests. Some 300 deeply interested people attended, many of them of national prominence. They included Mrs. Grover Cleveland, Governor Robert P. Bass, of New Hampshire, the president of the American Forestry Association, who opened the meeting with words of welcome; former Governor F. W. Rollins, who presided; former Governor Quimby, of New Hampshire; former Governor Woodruff, of Connecticut; President John H. Finley, of the College of the City of New York; President Henry S. Drinker, of Lehigh University, and—as ex-Governor Rollins said—"so many distinguished people that you could not turn around without bumping into one of them."

W. R. Brown, president of the New Hampshire Forestry Commission, told about the progress of forestry in New Hampshire during the year. A paper by Montgomery Rollins, on the acquisition of Lost River, was read. E. E. Woodbury, an orator of North Woodstock, told of the town's interest in the Lost River, and there were talks by Dr. Finley, ex-Governors Quimby and Woodruff, Dr. Drinker, Dr. B. E. Fernow, of Toronto; P. S. Ridsdale, executive secretary of the American Forestry Association, and others.

The following day the entire party journeyed by automobile to Bretton Woods, where Thursday and Friday were spent in viewing the Crawford Notch reserves, and at several important meetings discussing forest problems and conditions of the day. The directors of the American

Forestry Association held their sessions at the Mount Pleasant and the Crawford House.

Reports of the condition of the association were most satisfactory and showed that the membership is steadily growing, that the sphere of its influence is rapidly extending, and that it is now regarded as one of the most important organizations for the good of the general public in the country, and as such is receiving steadily increasing support and recognition.

At the fifth annual forestry conference meeting on the afternoon of July 18 there were represented the American Forestry Association, the Society for the Protection of New Hampshire Forests, the New Hampshire Timberland Owners' Association and the Association of Northeastern Foresters. The fire protection problem was discussed at length, papers being read by Prof. J. H. Foster, of the New Hampshire State College; E. A. Ryder, Commissioner of the Department of Claims, Boston & Maine R. R.; State forester E. C. Hirst, of New Hampshire; F. H. Billard, forester of the New Hampshire Timberland Owners' Association; F. G. Olmstead, consultant forester of Boston; F. W. Rane, State forester of Massachusetts; S. N. Spring, State forester of Connecticut; Austin F. Hawes, State forester of Vermont, and Dr. B. E. Fernow, of Toronto.

In the evening H. S. Bristol, Superintendent of Woodlands, for the Delaware and Hudson R. R. Co., spoke on problems of forestry as they relate to the railway; Prof. Walter Mulford, of Cornell, discussed the prospects of forestry as a profession; Prof. W. C. O'Kane, of the New Hampshire State College, spoke on the present status and prospects of the gypsy moth and the brown tail moth in the State; George H. Wirt, chief forest inspector of Pennsylvania, gave an illustrated lecture on the management of State forests in Pennsylvania.

At the annual meeting of the Society for the Protection of New Hampshire Forests, held on the morning of July 19, reports were made on the gratifying progress of the society's work in the past year. In addition, Herbert Welsh, of Philadelphia, spoke about the progress upon the Sunapee Forest Reservation, and Harris A. Reynolds, secretary of the Massachusetts Forestry Association, told how he is organizing branch associations in that State.

The ever interesting and vital question of the taxation of forests was discussed at the concluding meeting of the conference on Friday afternoon. Dr. B. E. Fernow spoke on the principles underlying the taxation of forests; Prof. F. R. Fairchild, of Yale, discussed the taxation of forests in America and abroad, and Prof. Charles J. Bullock, of Harvard, gave his ideas on practical plans for taxation in New Hampshire and Massachusetts. The other foresters and lumbermen present joined in the discussion which, while it resulted in the enlightenment and instruction as to ways and means of all who were present, did not reach any definite conclusion as to the best way to overcome existing difficulties.

In the evening Philip W. Ayres, forester of the Society for the Protection of New Hampshire Forests, gave an illustrated address on the forests of the White Mountains.

WE don't reach all of them, but a large proportion of the live ones read FOREST AND STREAM.

TRAP SHOOTING

If you want your shoot to be announced here, send a notice like the following:

Fixtures.

- Sept. 4-5.—Wellington Mass.—Paleface G. C. merchandise shoot. Charles F. Mardin, Sec'y-Treas.
- Sept. 12-13.—Cincinnati (O.) G. C. Arthur Gambell, Supt.

Jan. 22-25.—Pinehurst (N. C.) Country Club. Leonard Tufts, Pres.

DRIVERS AND TWISTERS.

Chicken and duck will supersede clay bird shooting Sept. 1, at Cerro Gordo Gun Club, Mason City, Ia. In other words, the trap season will close when field season opens.

The trigger is out to visitors to Columbia, (Mo.) Gun Club. Amateurs and professionals are cordially invited. Every Thursday is the time. A line to Dr. R. L. Lockwood, Captain of the club, will get full information—if you need more.

E. Reed Shaner, manager department of records, the Interstate Association, informs us that the scores made at the Spooner Gun Club's registered tournament, held at Spooner, Minn., July 30, will not be counted in the official records of the Interstate Association owing to the contestants shooting under a distance handicap.

The Indianapolis Gun Club will hold a Labor Day tournament Sept. 2. The program calls for ten events of 15 targets each, entrance \$1.50. Squier money-back and Rose system to govern. Also two specials of 25 targets, entrance \$2.50; three moneys, 40, 30 and 30 per cent. Dinner, 50 cents. Targets 2 cents. Grounds on Brazil traction line. Geo. Alig, Jr., is Secretary.

Mr. E. Reed Shaner, Manager Department of Records, writes: "In accordance with a resolution adopted by the Interstate Association at its annual meeting in 1910, I beg to advise you that Mr. Frank Campbell, Waukee, Ia., was the winner of the seventh Western Handicap, shot at Kansas City, Mo., Aug. 16, 1912. Mr. Campbell used a Parker gun, Remington Arms-U. M. C. shells."

The tournament, Aug. 27, 28 and 29, of Maryland State Sportsmen's Association, at Prospect Park, Baltimore, will be one of the big events of the year, unless all signs are bogus. Last year 105 shooters took part; this year probably 150 will come nearer the number. Linn Worthington has it in charge, which in itself is sufficient evidence that nothing will be overlooked in the "make it a go" department.

The fall tournament of the Island Beach Gun Club will be held Sept. 14, at Island Beach, Greenwich, Conn., beginning at 9:30 A. M. The program will consist of ten events—Nos. 1, 2, 3, 4, 8 and 9 are at 15 targets, 40 cents entrance in each; Nos. 5, 6 and 7 are at 20 targets, 45 cents entrance; No. 10 is a special at 10 doubles, 40 cents entrance; medal for high gun. Class shooting, merchandise prizes. Optional sweeps, 50 cents or \$1. Contestants may shoot for targets only at 1½ cent each. Events 7, 8 and 9, five-man club team race for cup. Medal for high amateur in events 1 to 9 inclusive; also medal for high amateur run in events 1 to 9 inclusive. Sixteen merchandise prizes in class shooting. Six prizes Class A—High gun and seven points below. Five prizes Class B—Six points below Class A. Four prizes Class C—Six points below Class B. Prize for low gun shooting events 1 to 9 inclusive. High gun wins in each class. Cup and medals donated by Island Beach Co. Rose system of division of sweeps, 5, 3, 2, 1. "Shooting up" permitted according to number of contestants. Standard loads for sale at 65c. per box. Boats leave Island Beach dock, near railroad station, every hour, beginning at 9 A. M. Refreshments on grounds. Program shoots every Saturday. Special program Labor Day, Sept. 2, beginning at 10:30. For further information address J. H. Finch, 93 East Elm street, Greenwich, Conn.

Northern Kentucky Gun Club.

THE registered tournament, held on Aug. 15 and 16, was one of the best ever given by the club. The success of the affair was due to the efficient work of Messrs. G. W. Dameron and H. R. Irwin, both of whom put in much time and energy in the preliminary arrangements, and followed this up by unremitting attention to all details making for the welcome and comfort of those attending.

The club was favored with ideal weather on both days, and scores were good in consequence. The office work was looked after by Luther J. Squier, and was, of course kept up to the minute, and settlement made in short order after the last event of Friday. Len Shepard performed the duties of referee and scorer to everyone's entire satisfaction. A feature of the shoot was the excellent dinner served in the club house by Mrs. Taggart, wife of the superintendent, and this was thoroughly enjoyed by all the shooters. The local shooters turned out fairly well.

The program was the regular one of ten 15-target events, entrance \$1.40 in each; money divided Rose system, 5, 3, 2, 1. An extra 25-target handicap event for a trophy was added each day, entrance \$1.25. Handicaps were based on score made each day, in regular program; 128 or less, 16yds.; 129 to 132, at 17yds.; 133 to 136, at 18yds.; 137 to 141, at 19yds.; 142 to 145, at 20yds., and 146 to 149, at 21yds. Any shooter breaking 'em all was required to shoot from the roof of the club house. The only thing occurring to mar the occasion was an accident to Arthur Gambell, superintendent of the Cincinnati Gun Club, who on Thursday afternoon fell, breaking his leg. His many friends among the trapshooters will extend their sympathy to him, and their wishes for a speedy recovery.

First Day.

Thursday found Superintendent Taggart with grounds and traps in first class condition, and everything ready. During the day 6015 targets were trapped. Thirty-seven shooters faced the traps, all but four going through the program. The first was not started until nearly 11 o'clock, and the delay caused by the accident made a late finish, the special not being decided until 6 o'clock. Rolla O. Heikes, professional, was the star performer, missing but 2 targets—one in the third and one in the last event, and making a run of 106 straight. R. L. Trimble and J. S. Day, tied for second high professional place on 141.

The amateurs put it all over the experts to some extent, high man being B. S. Cooper with 144, Geo. Volk 143, and R. H. Bruns 142. Geo. Dameron had one or two bad events, which kept his total down, but he made the second long run with 67. Cooper got 64 straight and J. N. Shropshire 60. The special event had thirty-three entries, and resulted in a tie on 25 between Dr. Wm. Shattuck and Ed Cain. In second place were W. G. Green, Sam Leever, L. Bittner and J. S. Day with 24 each. The last-named is a professional and was shooting for targets only. When the men lined up for the shoot-off, it was so near dusk that the targets were almost invisible. This was too much of a handicap for Cain, and he fell down badly, losing by a score of 15 to 21.

Second Day.

Conditions were perfect. Attendance fell off a little, thirty shooters only putting in an appearance and twenty-eight shot through. Later in the day a few others arrived and entered for the special.

The first event was started promptly at 9 o'clock, and at 2:30 the program was finished. By 3, Luther had everyone paid off, and bid the crowd good-by, as he was to start for Montreal. From there he will step over to Cedar Point, O., for the Indian shoot. The special event was finished about 4, and then the late-comers had their turn, and kept things going until dusk. Roundy Chamberlain blew in this afternoon on his way home, and put up a perfect score in the special event. This was amateur day, only one professional (Pop Heikes) finishing in their class. Dr. F. M. Edwards and Geo. Volk tied for high gun on 146; then came Pop with 145; T. E. Donald was third high man and second amateur with 144, and the next place was filled by R. H. Bruns and W. G. Green with 143. Edwards and Volk each went straight in four consecutive events, making the best runs of the day. First prize in the special event was won by E. Bittner on 24; J. S. Day tied him, but was not eligible to win. Second prize was won by M. H. Johnson, after shooting off a tie on 23 with Shattuck, Cain, Sunderbruch and Gould. In the shoot-off, he broke 24. The banner squad of the tournament was No. 3, which scored 74 out of 75 in the eighth event—Heikes, Edmondson, Cain and Volk, 15 each, and Shattuck carried the guns to the house for missing one. In the ninth event the same squad dropped but 2 targets, Heikes being the guilty party. In the special event Sunderbruch had hard luck, missing his 22d and 25th targets and losing a chance to win or get in a tie for first. In the regular and special events, 5060 targets were trapped. R. O. Heikes made high score for the two days, 293 out of 300, or 97.66 per cent.

Money-Back Purse.

Targets first day, at 1 cent each.....	\$51.90
One dollar extra entrance first day.....	27.80
Targets second day at 1 cent each.....	43.35
One dollar extra entrance second day.....	25.70
Added by Interstate Association.....	100.00
	<hr/>
	\$247.75
Losses	65.65
Surplus	\$182.10

The surplus was divided into twelve moneys, 20, 16, 13, 10, 8, 7, 6, 5, 5, 4, 3, and 3 per cent., high guns. First money, \$36.40, Geo. Volk on 289; second, \$29.10; third, \$23.65; R. H. Bruns and F. M. Edwards, \$26.40 each on 285; fourth, \$18.20, B. S. Cooper, on 284; fifth, \$14.60, G. G. Green on 282; sixth, \$12.75, T. E. Donald on 281;

seventh, \$11, and eighth, \$9.10, Sam Leever and T. J. Donald, \$20.10 each on 280; ninth, \$9.10, M. J. Welsh on 279; tenth, \$7.25 and eleventh, \$5.45, G. W. Dameron and W. H. Hall, \$6.35 each on 277; twelfth, \$5.45, J. N. Shropshire and G. H. Hessler, \$2.20 each on 276. Thirteen shooters failed to win their entrance and were paid losses in sums ranging from 80 cents to \$12.65. Two of the losers succeeded in getting a piece of the average money. Scores:

Table with 3 columns: Name, First Day, Second Day, Total. Lists names like C O Le Compte, T H Parry, C A Edmondson, etc.

The special events follow:

Table with 4 columns: Name, Hdcp., First Day, Second Day, Total. Lists names like Le Compte, Edmondson, Britton, etc.

The shoot off of the ties in the special events follow: First Day—Shattuck 21, Cain 15. Second Day—Johnson (16) 24, Shattuck (18) 22, Cain (18) 20, Sunderbruch (19) 22, Gould (17) 22.

Bergen Beach Gun Club.

BERGEN BEACH, L. I., Aug. 13.—Midsummer handicap of the Bergen Beach Gun Club, held to-day, was worth while. The event was at 100 targets, with added handicaps. G. Remsen and Dr. Moeller tied for first with 96. In the shoot-off at 25 targets Remsen won. Third prize was won by Dr. Sauer. The scores:

Table with 3 columns: Name, Score, Name, Score. Lists names like G S Remsen, Dr Moeller, Dr Sauer, etc.

Plattsville Gun Club.

PLATTSVILLE, Wis., Aug. 11.—The shooting to-day was exciting, as six of the shooters were very close in the first 50 targets. We have a very beautiful cup to shoot for which was furnished by the president, C. Burg. The scores:

Table with 3 columns: Events, Targets, Score. Lists events like Targets, Belmeyer, Dorscher, etc.

World Beating Speed Shells WIN WESTERN HANDICAP

Fourth Consecutive Time

This Makes It 16 of 19 Big National Handicaps For Remington-UMC in Four Years :: :: ::

Western Handicap Event: Won by Frank Campbell, Wauke, Iowa, 94 ex 100 at 20 yards, shooting Remington-UMC Nitro Club Steel Lined Shells.

2d. G. Yowell and J. F. Caldwell tied, 93 ex 100 from 18 yards—both shooting Remington-UMC Nitro Club Steel Lined Shells.

High General Average: Won by W. H. Heer, 395 ex 400, shooting Remington-UMC Pump Gun and Nitro Club Steel Lined Shells.

2d. Lester German, 394 ex 400, shooting Remington-UMC Nitro Club Steel Lined Shells.

High Amateur Average, including all 16-yard handicap and double target events, won by W. R. Ridley, 567 ex 600. 2d. H. E. Snyder. Both contestants used Remington-UMC Arrow Steel Lined Shells.

STILL ANOTHER VICTORY

Report comes from Alabama State Shoot that Remington-UMC swept everything in sight—State Championship, High Amateur and Professional Averages, Long Runs—all won with the World Beating Speed Shells.

Remington-UMC Arms and Ammunition

Winners at Olympic Games

Winners at Grand American Handicap

Winners at Western Handicap

STILL WINNING!

REMINGTON ARMS—UNION METALLIC CARTRIDGE CO.

299-301 Broadway - - - - - New York, N. Y.

NOTE: In a previous advertisement, we stated that the North Carolina State Championship was won with Remington-UMC Arrow Shells. Mr. J. E. Taylor, in winning this event, did not use Arrow Shells, but did use a Remington-UMC Autoloading Shotgun.

North Side Gun Club.

MILWAUKEE, Wis., Aug. 14.—Saturday afternoon's pleasant weather induced several members to try their skill with the gun. Gies took high honors with 88 out of 100. C. Groffy was second with 81. Scores:

Table with 2 columns: Name, Score. Lists names like G Obenberger, C Groffy, W Radue, etc.

On Sunday, Aug. 11, G. Schoessow was high gun and C. Groffy a close second, dropping 2 birds more than the former. Scores:

Table with 2 columns: Name, Score. Lists names like M Poetzel, A Krause, A Splitt, etc.

Dallas Gun Club.

DALLAS, Tex., Aug. 8.—The two-day tournament ended to-day, was not very well attended. Score sheet not sufficiently legible to indicate winner. Scores follow:

Table with 4 columns: Name, 1st Day, 2d Day, Total. Lists names like Dr Adams, Mrs W G Allen, W Alston, etc.

Western Handicap.

KANSAS CITY, Mo., Aug. 17.—Just about three hours before the sun went down on a beautiful August day (the 16th), the event that will go down in history as one of the best in this line of amusements was closed at the famous Blue River Shooting Park, located at Kansas City, Mo.

The program for this shoot has in its introduction the following remarks, viz.:

"It was a wise choice when Kansas City was chosen as the logical point to hold the Western Handicap tournament in 1912. Located as it is in the geographical center of the United States, with its vast net of railroads, radiating to every habitable point of the Middle West territory, it is an ideal city to reach quickly and conveniently from all points in the vast scope of country which has such a large following of sportsmen, who have the pleasure of trapshooting."

The Kansas City Gun Club is the oldest organization of the kind in the State of Missouri, and for thirty years has kept the ball rolling. The club was fortunate in having the family of Elliott brothers to keep the park going, and when J. A. R. dropped the management R. S. took it up, and he is ably assisted by Jack and young Robert. Oh, yes, there is Dave; he is usually around when big events are being pulled off, and just ask all those present at this shoot if he did not handle the office to perfection.

As a matter of policy, these Interstate shoots are held at different cities of the West each year, but when the time again comes to hold this event at Kansas City, all will agree that all roads lead to Kansas City, and Elmer Shaner and J. T. Skelly will be the first to say, Amen.

The perfection of ammunition and guns was brought to the front during this shoot; coupled with this was shown what practice will accomplish along the line of perfection. For instance, here is a partial list of consecutive "breaks" made during the shoot: William Ridley ran 124 straight; R. W. Clancy, 156; W. R. Crosby, 100 and 113; H. Dixon, 153 and 100; Ed. O'Brien, 127; H. E. Snyder, 155; C. B. Eaton, 171; C. Spencer, 100; W. H. Heer, 127; and this list does not include the last day.

Three times during the second day the squad composed of Mrs. Topperwein, Dixon, Campbell, Hoon and Freeman made straight scores.

You should have seen the smile that came over Bob's countenance as he kept passing out the shells to the happy shooters, who were busting Charles North's saucers.

Practice Day, Aug. 13.

In the program we find this announcement: "Kansas City has the shooting ground and local management, and will overlook no chance to make memorable the seventh Western Handicap tournament." The old-time shooters have long been accustomed to these things, and the new ones were on hand to see if the Missourians were equal to their boast of "show me."

A prominent figure about the old park for the past two weeks has been one Bob Elliott, stripped for the work of putting the park in order. He has even moved his family into and resides in the park, so as to be there day and night. The shooters are glad for this move, as it insures some of those good old dinners for which Mrs. Bob has long been famous. I must say that we old-timers will miss the "pigeon pot-pies" that were so delicious in "ye olden times," but the yellow legged chicken stews look good to all.

On Monday and Tuesday one Robert was assisted by Elmer and Charles North, and when I P. M. came on with the heavens threatening rain, there were five Ideal-Leggett traps in position and the trap houses full of the old reliable bluerock targets—no others go as a rule at the Blue River Shooting Park—ready for the opening gun.

When the first squad toed the mark, it was noticed that W. H. Clay, the good shot from East St. Louis, was on No. 1 peg, and that the veteran, Tramp Irwin, who has not entirely quit the shooting game, was at the score board to signal, "Broke." "Lost," etc.

The shoot progressed without much interruption from the downpour, save an occasional sprinkle, but the boys were "up against" dark, lowering clouds, interspersed with streaks of smoke and a naturally dark background. The improvement made by the Chamberlin people in the kind and quantity of paint used of late on the targets was much appreciated by those who have not the most perfect eye, and though some of the new trappers and pullers were not quite on to their jobs, yet many of the scores were excellent.

One T. Bill Crosby lost one at trap one and then smashed the others to dust, and was high professional. Close after him came Bill Heer, Lester German and H. D. Freeman, with 98; George Maxwell and H. C. Kirkwood made 97, while C. G. Spencer and Mrs. Topp with F. Gilbert made 96.

The amateurs were in fine form, as Harvey Dixon, the 1911 G. A. H. winner, duplicated the score of "T. Bill," 99, with F. Campbell 98, Tom Clay 96, I. C. Davidson, W. S. Hoon, S. Hoyne, H. E. Whitney and W. Ridley 95. The scores of practice day follow:

Table listing scores for practice day with names and scores.

Table listing scores for practice day with names and scores.

First Day, Aug. 14.

When the appointed hour arrived and Manager Shaner was keyed up for the opening address, 9 A. M., the shooters were filling up the park and crowding the gun room, yet there were some tardy ones owing to the delay from late trains and the transfer to the surface lines, which make the connections for the park. This caused the management to postpone the opening until 9:30, but the contestants were informed that 9 A. M. meant 9 A. M. for the following day.

It is worth the outlay and time spent to the new shooter who is present at these Interstate handicap shoots to get the benefit of the Secretary-Manager's remarks. During all these years that Shaner has managed tournaments a very prominent feature has been that of a strict enforcement of the rules in all their details. Sort of an educational institution from which officers of gun clubs could see and learn how to enforce rules on their own grounds when tournaments are being held. Mr. Shaner calls his talks "heart-to-heart." And that is what they are, for while he enforces all rules with an "iron hand," at the same time he is kind and considerate, and no one could feel it more deeply than he when a shooter loses out through negligence in complying with the rules.

First, he called attention to the tournament at Denver, to be held Sept. 10, which should be the largest in the West, owing to the large amount of added money. Just think of it, 300 shooters means \$5,000 added money—some attraction for the scatter gun men.

Second, the sixth annual Midwinter Handicap target tournament at Pinehurst, N. C., Jan. 22 to 25, 1913. Of course, this is some distance ahead, but then those of you who want to get away from cold winter's blasts, there is \$500 to the winner and \$2500 added money.

The "Boss" then became a little more oratorical, and called to mind that we were now at the very spot where the world's greatest shooting tournament was held, the G. A. H. at live birds in 1902, and he could see nothing to prevent this shoot from being "pulled off" with the same result as the former big one, as here we have practically the same management, grounds, etc. He called particular attention to the decision of the referee being final, and that the shooter must make it his business to see that the results of his every shot are properly made on the score sheet, same not being changeable after two shots have been fired by the contestants.

The rule as to not shooting at pieces (broken targets) was fully explained, also the rule applying to "no target" if the shooter shoots out of time.

With a wave of the hand toward trap No. 1 and a hope that all will feel satisfied when the shoot closes, that the best men have won, the opening gun was fired at 9:30.

The weather could not have been improved upon, as the clouds obscured the sun for a part of the day, and the wind, coming in facing, was a handicap. Everything moved off like clock-work from start to finish. Those coming in late were permitted to enter and shoot.

Some of the 1912 leaders were not quite up to the front at the close. One Fred Bills, the well-known Chicago professional, and L. S. German, of Maryland, were at the top, each losing but 2 in the 150-program. H. C. Kirkwood, of Baltimore; W. H. Heer, formerly of Kansas, but now from Oklahoma, with C. G. Spencer, of St. Louis, were only one to the bad. Hawkins and Clancy close up with 146.

The cream of the Western amateurs were present, yet they were not quite up to their best form, though Wm. Ridley, from Iowa, made 146, and incidentally made a run of 100 straight. C. E. Orr, of Illinois, and W. E. Hoon, of Iowa, "blew up" 145, with H. E. Snyder, of Kansas City, and Max Kneusel, of Ottawa, Ill., close with 144. For detailed score of your shooting friends we refer you to the scores herewith.

DOUBLES.

This being more of a novelty, was the attraction for the afternoon. There were a number of the shooters' lady friends out, and they were interested in the skill that was exhibited by Mrs. Topp, when she blew the saucers into dust. Some of the best shots fell down a bit, and yet the way the second barrel reached out and "found" that second target was an "eye-opener." The Kansas City lad, Harry Snyder, "came to the wire" first with 45. Harvey Dixon and H. E. Whitney "busted" 42, and others followed, as per scores.

Only about half the amateurs present took part in this double event, as it appears from scores made, and new faces present, that members of many new clubs were taking part, being attracted by the Squier money-back system adopted for this shoot.

The traveling experts had a race for supremacy, and when the official announcement was posted, there was one H. A. Freeman with 47, Fred Bills 46, J. M. Hawkins and J. R. Taylor 45. The scores of the first day follow:

Table listing scores for the first day with names and scores.

Table listing scores for the first day with names and scores.

Second Day, Aug. 15.

This proved to be the "show me" and smiling day. When the last result had been chalked up on the scoreboard, there the shooters lingered and wondered as to the future possibilities of this shooting game. It was regretted that a photographer was not present to preserve that wonderful high mark.

Pat O'Connor, the weather man, was considerate and "shied" away the threatening forenoon clouds and set the wind to blow away out in Kansas, but not up nor down the Blue River Valley. The reader, an old-time shooter, like the writer, will readily see by the scores that all conditions of weather, traps, grounds, etc., were perfect, and the contestants entered into the spirit with congeniality, and a concentration of the one thought of making and breaking records with the scatter gun.

There has long been a rivalry between Iowa and Missouri as to the number of top-notchers. Many times Nebraska men come in for a good share of the honors, but this year these good ones seem to be "laying" for the Denver shoot, and have deserted this Blue River Handicap.

In glancing at the scores you will discover that there are three perfect ones—150 straight. Well, well, Talk about your "show me," I guess yes. Lend me your ear. C. B. Eaton, Fayette, Mo.; H. E. Snyder, Kansas City, Mo.; Harvey Dixon, Oronogo, Mo. There you are shown, and what a grand showing it was. Don't you wish you had been there? Bob could have easily taken care of one hundred more shooters. Don't miss this opportunity next shoot. You have heard of Eaton and Dixon before, but this man Snyder is a comparatively new man. Keep your eye on him. Other good scores were made, viz.: Bart Lewis 144, F. Campbell 144, W. S. Hoon 142, W. H. Clay 141, Tom Clay 140, Caldwell 141, William Ridley 145, William Peck 141, W. H. Hick 141, Max Kneusel 141, R. Thompson 143, J. S. Thomas 143, J. Graham 146, Don Morley 145. These for the amateurs.

For the representatives, we find Clancy 147, Kirkwood 144, Skelly 141, Heer 149, Maxwell 144, C. G. Spencer 145, Bills 146, German 147, Mrs. Topp 146, Freeman 143, Gilbert 146, H. Clark 147, Killam 141, Marshall 143, Hawkins, 145, O'Brien 148, Crosby 148, Taylor 143. There you are; take your choice. Not one of them lost over seven; some one and two.

DOUBLES.

Some good scores were made on this style of shooting. There were some reversals of form shown from the previous day. Some very poor, some very high.

In this, as well as the singles, the amateur was leading at the finish. When Fred Gilbert lost but one at one trap, and two at another, he was warmly congratulated by his friends, and had a smile for himself; but along came one Ridley and held up the Iowa end of the game with 48. See. Others right there, not to be gainsaid were Clancy 46, Dixon 46, H. Clark 45, J. Graham 45, R. Thompson 44, J. R. Taylor 43, Guy Ward 42, Fred Bills 42, Whitney 42, Mastin 43, etc.

Third Day, Aug. 16.

The weather man was kind again to all who enjoy outdoor sports. Those of you who shoot at the traps know that dark and windy weather is a great handicap to the making of good scores. So the Blue River Park entertained more shooters and more spectators than the previous two days. This being the handicap day, added to the interest materially.

The five events of 20 targets each was the first to be disposed of, and some of the shooters were not aware of the changes in squads and came out late, but the management permitted them to shoot up out of turn.

The amateurs did not quite hold up to the previous day, yet they shone to the "samee," for Jay Graham made 97, C. B. Eaton 98, A. M. Mastin 98, G. T. Hall 95, H. Dixon 96, Bart Lewis 97, W. M. Ridley 97, C. E. Orr 97, Tom Clay 95.

*Professionals.

For the professionals the first and only straight score for the three days was made by Charles Spencer, 100. He only had the best of William Heer by one target, and Billy was in a class with German and Clark; the 98s were Freeman, Mrs. Topperwein, Crosby, Taylor, Maxwell; 97s were Hawkins and Guy Ward.

The summary for the three days, counting single targets at 16yds., for the amateurs gave the following results for the 400 targets, viz.: C. B. Eaton 391, H. Dixon 389, H. E. Snyder 388, William Ridley 388, J. R. Graham 386, F. Campbell 384, A. M. Mastin 382, C. E. Orr 382, Bart Lewis 379. For the representatives, the

Winchester "Leader" Loaded Shells Surpass All Others

HIGH GENERAL AVERAGE: C. B. Eaton, an Amateur of Fayette, Mo., won High General Average for the tournament, scoring 391 x 400, 16-yard targets. Part of this was composed of 150 straight targets, which he broke on the second day of the tournament. He did this with "Leader" Loaded Shells.

HIGH AVERAGE ON DOUBLES: Fred Gilbert won High Average on Doubles, scoring 92 x 100. He did this with "Leader" Loaded Shells.

HIGH AVERAGE FOR ALL TARGETS SHOT: Fred G. Bills made an average of 571 x 600 for all targets shot, including Singles and Doubles. He did this with "Leader" Loaded Shells and a Winchester Repeating Shotgun.

LONGEST RUN: C. B. Eaton made the longest run of the tournament scoring 216 straight. He did this with "Leader" Loaded Shells.

Winchester "Leader" Loaded Shells Surpass All Others

WINCHESTER WINNINGS AT WESTERN HANDICAP

W

W

three high men were William Heer 395, Lester German 394, C. Spencer 392, F. Bills 389.

Western Handicap.

This will go down in history as a "hot contest." Although the scores were not so good as in many previous events, the handicaps were placed with a view of equalizing the shooters, and targets looked small to most of the participants. Did you ever read of a shoot with 111 entries and thirteen of them at 23yds.; ten at 22yds., four at 21yds., all amateurs, and 10 at 20yds. This surely gave plenty of encouragement to the amateurs present who were beginners in the game.

The winner turned up in Mr. F. Campbell, of Wauke, Ia., as no one tied him with 94, from 20yds. The second men were J. F. Caldwell and G. Yowell, on the 18yd. score. Guy Ward was high man over all shooting from the 20yd. mark; he made 95. Fred Bills, from far away 23 peg, made 94, as did Ed. O'Brien, from 22yds.; Lester German made 93 from 23yds.

The shoot closed at about 3:30 P. M. There being no ties, the management brought Frank Campbell to the front, and Mr. J. T. Skelly made the presentation speech, which was short and to the point. After congratulating the management, the grounds and all the conditions, he did not forget the lunch provided by Mrs.

Elliott; indeed, he thought it the best of any he had ever had the pleasure of enjoying.

Mr. Campbell was called upon for a speech, but being modest, bowed himself out, and Mr. Shaner closed the shoot by calling attention to the fact that he named the park here in 1902, and was proud of it. He said that he had not had one complaint during the whole week from a contestant, which was unprecedented; and think, my friends, what a compliment that is to the officers of the Kansas City Gun Club, and the kind of experienced help furnished. He bade us all a godspeed, and expressed a hope that he might again meet with those present on a like occasion at the old renowned Blue River Shooting Park.

The men who placed the shooters in the handicap race were selected from among the shooters present, and they had no easy task. They were as follows: George K. Mackie, V. H. Green, William Wettleaf, J. S. Thomas and W. H. Clay.

The scores of the Western Handicap follow:

"Steel where steel belongs" Superiority

is being demonstrated day after day at tournaments large and small, in every section of the United States. **Peters Shells** are the only ones having steel of proper kind in the head and rim, and the only ones in which the correct method of construction is used. Their unequalled shooting quality contributed to the following victories at the traps:

Fulton Gun Club.

FULTON, Mo., Aug. 14.—Following are the scores made yesterday at our regular weekly shoot, though Thursday is the usual day, but owing to the County Fair the last of the week, we decided to have our meeting on Tuesday, and it was fairly well attended by members and several ladies. We expect soon starting to shoot twice a week, and develop teams to compete with other clubs, and that will bring home the bacon. Our club is not so large or so long organized as many others, but we are not offering any apologies to anything running loose in this neck of the woods.

As we are on the State highway, we invite those passing through our city to be sure and put your trap gun in your machine and don't overlook the fact that we have a good gun club, and you are welcome to shoot as long and as fast as you please. We are going to make the top of the list crowded, and some will have to practice up or give way to younger and aspiring members.

Drop us a line when contemplating a visit to our city and we will do our darndest (put it stronger if you like) to make you at home and hesitate to leave.

F. C. WELLS, Sec'y.

Buffalo Audubon Club.

BUFFALO, N. Y., Aug. 17.—Nineteen members attended the second regular shoot for August and some good scores were made. Frank Wright was high gun for the day with 93, closely followed by Mr. Hass with 91, while Covert had a good 90.

Beginning with next shoot trophies will be competed for in each of the five regular events, and we thus hope to stimulate interest in the game. Scores, No. 5 was the distance handicap:

Analostan Gun Club.

WASHINGTON, D. C., Aug. 18.—The scores made yesterday by the Analostan Gun Club were below the usual average. Conditions were poor for good work, owing to the afternoon being dark, a strong south breeze and rain threatening. Following are the scores:

George W. Peck, Jr., has been going at a good clip since he commenced the use of a single barrel. His score was good considering the conditions.

E. W. Ford did his shooting with a 20 gauge gun, and made a good score with it. He used 2 1/4 drs. of powder and 7/8 oz. of 8s.

Uncle Billy Wagner was up against it. He left his shooting glasses at home, and the day was so dark he could not locate the "clay canaries."

The boys are planning a merchandise shoot for Labor Day.

Shot at.	Broke	Shot at.	Broke

The event at 12 pairs had the following scores: Stubener 19, Huseman 17, Parsons 15, Ford 19, *Culver 15. *Visitor.

Southern Trapshooters Organizing.

BIRMINGHAM, Ala., Aug. 16.—The amateur trapshooters of the Southern States have determined to organize an association with object and features similar to that of the Indians and the Westy Hogans. Preliminary steps in this direction were taken at a meeting last week at Montgomery, Ala., during the tournament there, and to assist him a temporary vice-president from several States. Temporary organization was effected, and George Waddell, of Columbus, Ga., was chosen Chairman, and to assist him a temporary vice-president from each State was selected, they being: Alabama, R. R. Skinner, Birmingham; Georgia, George Waddell, Columbus; Florida, C. G. Westcott, Orlando; Louisiana, Dr. W. P. Miles, Brunsd; Kentucky, Thos. H. Clay, Austerlitz; Mississippi, Dr. C. M. Davis, Laurel; Tennessee, D. A. Edwards, Union City; North Carolina, Geo. L. Lyon, Durham; South Carolina, G. D. Wilson, Spartanburg.

Oakwood Gun Club.

LYNCHBURG, Va., Aug. 13.—Medal No. 1 for high average was tied for by Fox and Winfree. Medal No. 2 for first straight was tied for by Fox and Single. Medal No. 3 for long run was won by W. R. Winfree, 20 straight. Medal No. 4 for high in third event, tied for by Fox, Daniel, Winfree. Scores:

No. 1 was the club event; No. 2 an extra at 50 targets.

DU PONT POWDERS MAKE AND BREAK RECORDS

Indianapolis Gun Club.

INDIANAPOLIS, Ind., Aug. 10.—The scores were low in the practice shooting to-day, due perhaps to the stiff wind blowing across the traps. Edmonson was again in first place. Parry was close up and got the only straight. The scores:

Shot at.	Brk.	Shot at.	Brk.		
Parry	170	155	Neighbors	145	95
Moller	170	132	Alig	125	102
Hymer	170	132	Britton	100	65
Edmonson	145	134	Foland	80	64
Dixon	145	125	Owens	20	10

Stephens 39, B. F. Mode 37, J. S. Rollins and I. C. Adams 33, S. R. Barnett and John C. Holloway 31, Dr. J. E. Thornton 27, J. E. Gillespie 24, Jack Daily and Eugene Gauss 23, Machir Dorsey 15, Fred Brown 21, John Ball 19, L. B. Stevinson 19, Wm. Daily 15, H. H. Banks 13, Dr. A. W. Kampschmidt and Carl Stewart 10, T. N. Kurtz 10.

Indianapolis Gun Club.

INDIANAPOLIS, Ind., Aug. 17.—Edmonson retained first place in practice to-day with 96 per cent. broken. The squad composed of Edmonson, Hymer, Alig and Lewis broke 79 out of 80, the one lost being charged to Lewis.

	Shot at.	Broke.
Parry	120	110
Moller	120	109
Alig	120	107
Lewis	120	104
Neighbors	120	89
Edmonson	100	96
Hymer (professional)	100	93
Coss	100	80

Columbia Gun Club.

COLUMBIA, Mo., Aug. 15.—Dr. R. L. Lockridge took the high gun here with 46 out of 50. He broke the first 25 straight. Dr. J. H. Brown was second with 43, and Dr. E. H. Smith and C. C. Bowling tied for third with 39. Other scores were: E. H. Heidman and J. L.

NEW 12 GAUGE Marlin

Hammerless Repeating Shotgun

This Model 28, 12 gauge Marlin shotgun is the finest repeating gun in the world. It has every up-to-date feature, perfected far beyond all previous standards, and it has exclusive advantages not obtainable in other guns.

Note these features: Hammerless—Solid Steel Breech (inside as well as out)—Solid Top—Side Ejection—Matted Barrel (as on our highest grade hammer guns)—Press-Button Cartridge Release (to remove loaded cartridges quickly from magazine without working through action)—Double Extractors—Take-Down Feature—Trigger and Hammer Safety. Price, \$22.60.

The Model 28 is a fine appearing, beautifully balanced gun, without any objectionable humps or bumps; its Solid Steel Breech (not a shell of wood) permits a thoroughly symmetrical gun without sacrificing strength or safety; it is the safest breech-loading shotgun ever built.

Our free circular gives large illustration of gun and full description. Our complete 122-page catalog of all other Marlin repeating rifles and shotguns mailed for three stamps postage.

The Marlin Firearms Co.

27 Willow Street, New Haven, Conn.

Our 160-page Ideal Hand Book tells about re-loading all cartridges; mailed for 6c. stamps.

(Patented, Feb. 20, 1912.)

KING'S SPORTSMEN'S GLASSES

are far superior to the old style ambers because they have lenses of Akopos Crystal—a double shade of amber and veridian. The Akopos Crystal eliminates not only all the violet but also all the violet and blue rays. Amber glasses are only 50 per cent. efficient in this particular and therefore are only worth 50 per cent. of what is charged for them. King's Sportsmen's Glasses are used and endorsed by such well known sportsmen as E. C. Crossman, Lieut. Townsend Whelan and Stewart Edward White.

The Ohio State Amateur Championship was won by F. W. King, wearing shooting glasses of his own design and patent. Write for catalog.

THE F. W. KING OPTICAL CO. 450 Ellastone Building, Cleveland, Ohio

Cleveland Gun Club.

CLEVELAND, O., Aug. 10.—The weekly shoot held to-day at Shooting Park, Mayfield road, was the second contest of the month given in honor of its working members and was known as Rockwell Day. Mr. H. C. Rockwell was on hand to look after his friends, and a good bunch turned out to take in the sport. A jolly crowd came from Akron, O.—the big six with W. C. State as bandmaster, and a good one he is. Mr. State is a member of the Cleveland Club, lives in Akron, and is a busy man. We see him but little; but when he does come, he is a shooter from start to finish. He says Labor Day will be his next big day at the traps, when he takes in the Cleveland Gun Club tournament. He says he will bring up the bunch, as he says Cleveland shoots are the only ones. Mr. State is a great lover of loving cups, and to-day when he saw the beautiful cups that we always have on hand for cup contests, nothing would do until a cup contest was arranged for at 25 birds, and when the cards were handed in, Mr. State's card was 24 out of 25, and the name of W. C. State was placed on the cup and shipped to Akron, O.

The next shoot in honor of one of our members will be held Aug. 17. This contest will be known as Telling Day, in honor of Mr. F. O. Telling, one of the old stand-bys. Frank says if any of the shooters are looking for something good, just let them attend this shoot and they will see a shoot and shooting grounds second to none in the country.

F. H. WALLACE, Mgr.

Independent Gun Club.

EASTON, Pa., Aug. 10.—Appended are the scores of the regular semi-monthly shoot of the Independent Gun Club. The day was bad for the sport, the shooting being done in a thunderstorm which made the shooting anything but easy. But with all that, there was some good shooting. This is the first shoot that the club has held over its new Ideal Leggett trap which they have just installed.

The next shoot will be held on Aug 24, when a large number of shooters are expected. The program will be arranged to suit the shooters. All are welcome to come and have a good time with us.

Table with 2 columns of names and scores for Independent Gun Club. Names include J Maurer, J Heil, B Wenner, G Cross, C Stocker, W Ivey, O Sandt, G Elliott.

W. R. IVEY, Sec'y.

Cerro Gordo Gun Club.

MASON CITY, Ia., Aug. 11.—Interest has not waned over the prospect of having a merchandise shoot at the end of this month, to get the local shooters in trim for the opening of the prairie chicken season. Several Cerro Gordo Gun Club enthusiasts took a work-out to-day. The scores:

Saratoga Gun Club.

SARATOGA SPRINGS, Aug. 15.—The mid-August shoot of the Saratoga Gun Club was held yesterday afternoon, about a dozen shooters participating. The weather was ideal, but scores were low. The following scores tell the story:

Table with 2 columns of names and scores for Saratoga Gun Club. Names include H Levingston, Jas Shevlin, C Harrington, E Green, J Corey, J H Walbridge, P B Kearney, F Kelly, F Sesselman, E Hammond, Dr Van Aernam.

MORE LINES AND MORE TROUBLE.

Continued from page 232.

got near enough to the boat for me to see them.

All through the last half of March and the early part of April tourists and natives, using ordinary white hand lines with a big hook, were bringing in kingfish of over forty pounds, and two were taken and brought into the Colonial Hotel, of which one weighed sixty pounds and the other eighty pounds, while I, fishing diligently, had nothing but broken lines and small fish to show.

I should add that Messrs. Edward vom Hofe & Co. sent me a twenty-seven thread cable laid line of different make, which gave comparatively good service, enormously superior to their twenty-four thread line, and in fact better than any of the cable laid lines I had, but after this long and trying experience I have reached the conclusion that a cable laid line is absolutely unsatisfactory for fishing, under the peculiar conditions at Nassau, and that a braided line of the quality of the Everlasting Deep Sea Cuttyhunk Line furnished by Abbey & Imbrie, if of twenty-four or twenty-seven thread size, might be reasonably satisfactory, but that anyone that goes to Nassau to fish with any other line is doomed to disappointment.

The trouble with my lines was not the only difficulty which I met in this fishing. I took down with me two tarpon reels that I had used five years ago, and one of Abercrombie & Fitch's tarpon reels No. 444, which I had bought the previous season. That reel had promptly broken its click, but I supposed this was an accident and did not expect a recurrence of the trouble in reels of that kind. My two old reels were fitted with Abbey & Imbrie's Rabbeth drag, which had given me such excellent service, and before I had been using them much over a month, the screws which bind the drag to the reel wore out and the handles came off, rendering the reels useless. As soon as the first of these Rabbeth drags failed, I cabled my office for more reels, and two new reels of No. 444 were forwarded me from Abercrombie & Fitch. On the day they reached me, the first one jammed in the main axle, so I took it apart and forwarded the imperfect piece to Abercrombie & Fitch by express. They returned me a new axle to put in its place. Before the end of the season the second Abercrombie & Fitch reel, No. 444, jammed in the same way, and the nut holding the Rabbeth drag on the third one wore out and came off, so that during the latter part of my stay I had only one reel in service and in this I naturally had no confidence, although it fortunately did not actually fail me, so that my fishing, which was my principal pleasure, could be kept up, although with untrustworthy tackle, until the end of my stay.

My rods, of which I started with four, I managed with some splicing to keep in working order. After a great deal of difficulty I obtained from Messrs. Abercrombie & Fitch a dozen of hand-forged hooks which they called 12/0, but the breaking of my lines soon disposed of this small supply, and I had to again revert to the local hooks of proper size, but of inferior quality. In the winter of 1911 I had obtained some Sam spoons through Abercrombie & Fitch, which I found to fail me entirely, through the tarnishing of the metal of which they were composed, through the weakness of

the hook at the point at which it was attached to the spoon, and from the incurved point of the hook which is admirable for still-fishing, but makes one miss a large number of strikes in trolling. I reported these disasters to Messrs. Abercrombie & Fitch, and they furnished me a number of Sam spoons specially nickel-plated and with stronger hooks, although the incurved point was still present. I found the nickel plating completely remedied the trouble of tarnishing, so that with very little effort one's spoons could be kept in proper shape, but even these heavier hooks were too weak at the point where they were attached to the spoon, and I broke two of them, and also found that the old trouble of missing strikes, which I suppose to be due to the incurved point of the hook, was as prevalent as ever.

I plan to go to spend next winter at Nassau, devoting myself to fishing as usual, and want to start with at least the following outfit:

1. One dozen braided linen lines as good as Abbey & Imbrie's Everlasting Deep Sea Cuttyhunk line, but of larger size, twenty-four or twenty-seven.

2. Not less than three reels of the very best quality, with a reliable friction adjustable drag, preferably in the handle.

3. Not less than 100 hooks of about the size called 12/0 by Abercrombie & Fitch; that is 1¾ inches from point to shank and about 4½ inches in the length of the shank.

4. I should like some more spoons of the Sam shape, nickel-plated, with a very much stronger and heavier hook than those sent to me, and with a straight point.

The cost of these articles is unimportant as compared to their quality, and I ask the privilege of publishing the results obtained. My total expenditure for fishing tackle during the current season was considerably over \$250, and I stated this fact to one of the dealers at Nassau, gave him a catalog I happened to have with me, marking the articles which I had used, and advised him to make the attempt to have something of the kind on hand. This he may possibly do, provided he has more energy than most of the business men of the South seem to possess. The names of the principal hardware dealers at Nassau are Messrs. S. George & Co. The General Hardware Co., and the Ironmongery Co.,

PARKER GUNS

Wear Well, Shoot Well and Handle Well

Wear well because they are made of the best material by the most skillful craftsmen.

Shoot well because they hold the charge compactly together at extreme ranges.

Handle well because the greatest attention has always been paid to the distribution of wood and metal, to insure perfect balance and the most symmetrical outline.

Twenty-bore Parkers have set the pace for small bores in America, and are growing in popularity every year with the most progressive sportsmen.

For further information regarding guns in gauges ranging from 8 to 28, address

PARKER BROS. :: Meriden, Conn.

New York Salesrooms, 32 Warren Street

and I think it might be well worth while for fishing tackle dealers to communicate with them, as there are many Americans beside myself who desire to fish in the tropics and would be glad to use American tackle if it could be procured, which at present it cannot.

The typical tarpon and tuna rod has a butt of five or six feet long and short tip, which of course makes it excessively awkward to carry. I had a rod seven feet long, built of greenheart, in two pieces of equal size, the sliding ring being above the reel and arranged to lock by turning. My specimen gave me a good deal of trouble on account of the tarnishing of the metal of which it was composed, so that the ferrules and locking ring had to be greased at least once a day. I have used and have one or two greenheart rods of the standard patterns and have suffered an immense amount of annoyance in their transportation, but found the new rod quite as satisfactory in use and enormously more convenient in transport. I ought to explain here that I have two fishing trunks, one for fresh water and one for salt water, the lower portion of each of which holds tackle box, lines, reels and other equipment, and the upper portion holds the necessary fishing clothing. These trunks are about fifty-six inches long, twenty-four inches wide and sixteen inches deep, so that they will readily hold any ordinary rod of two pieces, a bag of golf clubs or anything of such dimensions, and the tackle does not have to be taken out and put back again, but stays in the trunks unless removal for repairs is necessary. I have found these trunks of enormous convenience and heartily recommend them to my brother anglers.

I have fished both in salt and fresh water; in fresh water for at least thirty years, and in salt water for a dozen. Standard trout and salmon tackle, all from the same New York dealers whom I have named above, have never given me any trouble of importance. In fact, I have taken it for granted that my trout lines, supplies and rods could be depended upon. Why I should have had such a disastrous experience with salt water tackle from the same concerns is beyond my understanding. Two such winters as I have passed at Nassau have been trying enough to seriously impair the health and strength of any fisherman. I want to say that I

believe I have discovered a tropical fishing country in which the sport is far superior to that at Florida, Catalina or anywhere else that I know of, and as soon as my health is re-established I propose, with the assistance of one solitary American now resident there, who has taken me into his confidence, to fish this country, write a book about my results, illustrating it with my own photographs, and throw open to the world of sportsmen a new region of sport, for which I hope and believe my name may go down to the future as having earned their sincere gratitude.

I want everybody, sportsmen, manufacturers and dealers to understand that I am not writing in a spirit of malice, nor with a desire to hurt anybody, but in the best interests of sport, which means sportsmen first and makers and dealers afterward. My original records and correspondence are on file here, and I earnestly invite their inspection, and should any person feel that he has been aggrieved, shall be more than pleased to make the damage good. I believe, however, that after careful consideration, even the trade, of which I know the temptations, will come to the conclusion that I am writing in good faith and will accept the rule on which I run my own business, viz.: that a pleased customer is the best advertisement.

ENGLISH SEAWEED FOR TRIMMING HATS.

A RATHER unusual industry along the Kentish coast has come to public attention through a complaint lodged with the Kent and Essex Sea Fisheries Committee at a recent meeting in London, says the Daily Consular report. The inhabitants of the Isle of Grain and the adjoining districts of the east coast of Kent have for many years been collecting a white seaweed that is washed up along the shore, which has been used by London and provincial milliners as trimming for women's hats.

According to the English press this has grown into a profitable industry during the winter months when farm work was not to be had, but its continuance is threatened, so those interested claim, by the practice of trawlers, who attach barbed wires to their trawls and gather this white seaweed before it is ripe, selling the algae thus collected at a very low figure. In the ordinary way the seaweed falls off from the roots and is washed ashore, but the trawls pull it up by the roots and thus destroy the source of supply as well as leaving nothing for the islanders.

Biffed Bisbee.

RIPOGENUS LAKE, Me., Aug. 6.—*Editor Forest and Stream:* Gee! Between the red-blooded Gill, the bilious Olive and cousin Whirling, I'm having some time! And all because I tried to be a little helpful. And the odd part of it is that the only man I directly "swatted" or "biffed" at, the well-meaning but twisted person who "went" "at the Beaverkill" most circuitously and by inference suggested that others do likewise, has so far kept hopefully silent. However, with your permission, I will not be so anonymously done.

Just why is all this "hysterical babbling" (apt phrase!) about "fish hogs," and "luring trout to their doom by means of spoons and even hand lines" and "enticing bait of some kind cast deftly into the favorite pool"? Not having the advantage of so generously buggy an ancestry as that avowed by the bilious Olive, I am at a disadvantage in trying to follow his reasoning processes. Ephemeral indeed, however, must be the substance of any concatenating cerebration that leads to the conclusion that I am justly indicted of these offenses and of advocating a school for teaching "a young man to be a fish hog in one lesson." The ordinary processes of rational ratiocination can not deduce such a conclusion from anything I have done, said, or written.

Under the impression that the whirling one had, in some giddy moment, lost his yellow imported floater, I suggested a set of circumstances under which I advised him (in my letter to you of July 2, published July 20), to "cast a green Drake dry over a rising fish." If that isn't the phraseology of a dry-fly purist, beat it, you brick heavers!

In the face of the fact that I have used flies dry since 1896; that I have, so to speak, since that time "plucked a thistle and planted a rose, wherever a rose would grow"—i. e., substituted the dry for the wet fly wherever the use of the former seemed "indicated"—the bilious one's smug suggestion that I "learn to use the dry-fly" nudges a bit my funny bone. It is a fact that I never saw an eyed- or a dry-fly tied true to pattern, until 1906, but that fact did not prevent my using dry such flies as I could procure, though it must be confessed that little of my angling during that ten years was strictly according to Hoyle, or Halford, for of one at least of these gentlemen I had never heard.

In 1896 I lived, and had for some time lived, on the Pacific slope. I never carried a gun, for many of those about me did and they all knew its uses convincingly well, while the art of "fanning" was a deep mystery to me. My one weapon offensive and defensive was a devastatingly ingenuous, if not vapid, grin—with occasionally, in a real pinch, a few well chosen words. Well, one day, one way or the other, or both, I persuaded one of the steamboat captains on the Columbia River to put me off at Marr's Landing. I can hear now his half-smothered exclamation, "God help Marr," as I floundered through the mud to the firmer footing of the high bank. For "Marr's Landing" is, or at least then was, no landing at all. It was simply a nice mushy mud flat, into which the boat shoved her nose as far as she could, and while you did the rest in getting yourself really landed, her powerful stern wheel pulled her free of the sucking mass. The very sound of it helped one to

FISHERMEN NEED DIXON'S GRAPHITE

It prevents sticking of ferrules, tangling of line and is good for reels. Fishermen need it. Get free sample and booklet P-52.

JOSEPH DIXON CRUCIBLE CO.

JERSEY CITY, N. J.

high ground. I've just looked at a map and find Marr's Landing on it. I am tempted to ask why. For then Marr didn't live there and apparently no one else did. I had been told that a man lived at Marr's who could deliver the best fly-fishing ever, if one could only persuade him to it.

After "landing" and reaching the high ground of the bank, I found myself on a neck of land with a big "slough" (pronounced slew) on one side and the swirling river eddies on the other, not a shack in sight, and I began to get a beautiful case of cold feet. This wasn't helped much by having a crazy Siwash suddenly yell, sprint by me and plunge into the river after his annual Turkish (?) bath, just as I was finding the mainland end of the slough. At least a thousand red-heads (mine among 'em) rose at that yell. Just then I spied a shack and some cleared ground just beyond a knoll ahead of me, and burst into a sprint that I have never before or since equalled. The owner of the shack had forgotten to latch the door, but I didn't know it; so it was a rather mixed and tangled piece of humanity that suddenly rolled in on his floor. During such ejaculations as "Who got ye, Kid?" and "Hell, there ain't a mark on him," I untangled myself and told him about the Siwash. He grinned, I grinned, and we got talking about Dolly Vardens, cut-throats and rainbows. Anyway, the program when we went to bed was to start at sun-up next morning to pack in to the head waters of the Washongal.

We were delayed a little locating my rod and haversack, but finally found them within about six inches of the river at or to the right of where the Siwash jumped me. All the time we were hunting them my friend kept anxiously asking me if I "didn't have no safety-pins," adding that he only had three himself. Finally we started off with a black mare for pack animal and an old buckskin for exchange saddle horse. The mare looked decidedly Andean in the perspective with two "Pratt's Astral Oil" cases hanging from the saw-buck saddle—these in lieu of and slung as alforjas. But my companion seemed to have no rod, which worried me, and I spoke of it. "Don't you fret yourself, stranger," he said, "I'll get 'em if my pants don't bust, which is why I'm carryin' those safety-pins." And he did "get 'em," too. And this was his method:

He cut a small sapling about nine and a half feet long, bent the hinge coils of his safety-pins to 45 degrees to their shanks, wrapped them as two guides and a tip ring to his sapling, strung up and started to work. His reel was a wonder; simply a large spool with a thin shank upon which he had wound about thirty yards of E level enameled line, finely dressed and rubbed down with deer tallow (I fancy mutton would have done as well had it been so handy), and all inclosed in a small round tin can, through one side of which he had punched a small hole from the inside out with the flare edges rolled and reamed back to a smooth surface for the free running of the line. The whole he kept in the left hip pocket of his "pants." Cumbersome as it sounds and looked, it gave him little or no trouble. He seldom, if ever (and then only after playing a particularly stubborn fish), seemed to have any annoying coils of free line at his feet. But what bothered me most was that after catching fish after fish his line and his fly always floated, while his leader (hand made) did not. Fish after fish would rise vigorously to his fly,

get hooked and landed, while fish after fish would rise vigorously at mine, come clear of the water, plunge in again and sail off scot free. Two or three I did manage to get through dumb luck by striking at the flash in the water. I remember getting two by the tail and one by the belly, which *shows* the mere luck of it.

I was tired and sore and wet and cold when we left off to get ready for supper, and he stopped to clean the fish, while I went up to the camp for dry socks. Fumbling for them, I came across a stray lemon in my pack. Half of this I squeezed into each of our generous tin cups, poured in about two ounces of whisky each, sweetened the mass with fine brown sugar (the only kind me had), put in some ice-cold spring water, and waited for my partner's coming. As he appeared I pointed to his dipper, raised mine and said, "How." As he picked up his cup, I remember dimly fearing a possible assassination. He drank off the mixture, however, apparently at one gulp, a huge smile occupying the space allotted for his face, as he put down the cup and exclaimed, "Kid, that sure *is* skookum chuck!" From that moment to this I have called him "Skookum," and the unfortunate part of it is (such is fame), I cannot now recall his real name.

Between gulps of our villanous coffee next morning, Skookum suddenly said, "Kid, we'd be in the hell of a fix if I *did* bust my pants. You ain't ketchin much, and I reckon you ain't lendin' that rod o' yourn to nobody." I was still pretty sore, but by some inspiration I managed to grin. It was a ghostly, sickly affair, but it got Skookum, and he opened up and told me all about it. Then he borrowed my rod, strung up with his own line, leaders and flies and went down to the stream and showed me a few things. They were impressive. I've never forgotten them and many of them I've never seen equalled. His management of the fly *on the water* was the most marvelous thing I've ever seen. It seemed incredible to realize that he was not controlling the thing by some hidden electric battery, for he imitated perfectly the fluttering struggle of the natural fly to free itself of the water, and at times he would purposely sink it in the ripples then let it come to the surface again a little lower down, then again he would shorten his line in the middle of the forward cast and simply touch the water three or four times before letting the fly finally settle down and float on a slow moving current. Then he produced a little pocket oil can, anointed the hackles of a few flies for me, and, stringing up his cut pole and

returning my rod, told me to "go to it." I did, and for seven blissful days had as good sport as one may decently want.

Now, please note that the man who gave me, in 1896, this first "look in" at angling with floating flies, was something like the thirteenth son of a thirteenth son who had wandered from the crowded fireside in Missouri to become on the coast an indifferent trapper in the winter, if hunting interfered, and a bum prospector in the summer, when fishing always interfered. He knew nothing of Halford, or of the Itchen, or of whirling or evening or duns dyspeptic or pale or of "sedges" or "quills," "May flies," or in fact of practically anything that his own powers of observation had not taught him.

He had simply had the experience that all of us in our tyro days have had of losing flies at a first hurried cast by having them snapped up as they floated on too dry snells. Until recently I did not realize how few have profited as he had by such experiences. I only know what a consummate ass I felt myself to be to have previously had such incidents teach me no more than to soak my snells, while to him it had been immediately apparent that the trout wanted the fly, at least dry.

Now when Mr. Gill tells me, as he does, that at least fifty of his personal friends, all good anglers, but strictly wet-fly men, knew nothing of the dry-fly until the appearance of his articles, and that since the publication of his most entertaining little book such men as Dimock and Pinchot have thanked him for shedding a new light in their direction, I, too, exclaim, "Bully!" and thank Mr. Gill for the assurance that I was not such an egregious ass as I thought myself.

So far as Mr. La Branche's writings are concerned, I suspend sentence, for the act is incomplete. I never accused Mr. Camp of writing with his left hand. I was discussing *angling*. I know not how he produces his mazy English, but the bilious one has sufficiently characterized its ultimate effect on the average reader's mind. So let it go at "wonderful." I have Mr. Gill's autograph word for it that he does not object to, what I confess to have been, the somewhat un-Homeric epithet "corpulent"; but I think it is time we stopped printing it weekly. Let us say sturdy, for the bilious one need give himself no concern over the ability of this dainty little fellow of 245 pounds to take care of any epithet I hurl at him, *good and proper!* I am not more than average cowardly myself. But when I am wrong, I'm wrong, and I'll save you the proof. I admit it.

As to Mr. Gill's book, I withdraw "hysterical babbling"—in fact, I never intended to apply it—for it has been made plain to me that it had a plain mission and is fulfilling it. It may further interest you to know that I have told Mr. Gill that the only genuine objection I have to offer to what he and Mr. La Branche are writing is that "I read every word of it and am by no means satisfied that I have any right to so employ my time." It is also but justice to Mr. Gill to add that one recognizes in every page he writes an undercurrent of yearning for the appearance of an American entomologist. And now we near the home stretch.

It is the entomology that we primarily need. Personally I know nothing or next to nothing of angling in any other form than the fly-casting; and, as I have said and written before, of fly-

TIMBERLAND ON LAKE AND RIVER.

Eight thousand acres of timberland, with several miles of lake and river front, situated on a large lake in the center of the game and fishing country of Northern and Central Maine. This tract of land would make an ideal reservation for a club, or for anyone desiring an investment in timberlands. For information, address Lock Box No. 11, Auburndale, Mass.

A RARE INVESTMENT**Safer than Bonds and Mortgages**

Four hundred and eighty acres of beautiful level land in Keith County, Nebraska. Rich black loam, six feet deep, which produces all kinds of big agricultural crops. Forty bushels of wheat to the acre, and all other crops in proportion. These lands are located eight miles from the county seat, and six miles from the thriving, bustling town of Brule, on the main line of the Union Pacific Railroad. The town has church, high school, hotels, all kinds of stores, grain elevator, etc., etc. I will also sell 160 acres adjoining Brule, fronting on the Union Pacific Railroad, under cultivation, with all improvements. The climate is unsurpassed for all lung or throat difficulties. Elevation, 3,200 feet.

For terms and particulars address

E. H. BARTON, 32 Bank St., Batavia, N. Y.

casting for trout I know little more than to let this day's knowledge in some measure prepare me against too great a shock at to-morrow's surprise. He who knows more has forever lost much of the eternal and perennial fascination of the game. Furthermore, if I am to learn more of the habits of trout as an index to the best methods of their capture with the fly, I want to learn it myself, unaided by books or masters, and in this I believe I have the vast majority of the great army of anglers with me. 'Hysterical babbling' was phrased not in condemnation of what has been written, but in fear of the avalanche that apparently is coming. 'Anglers are not an intolerant folk.' In proof of this the bilious one admits that we have all been surfeited for long-suffering years with a mass of 'angling inanity.' How long now shall the dry-fly Catalogue be permitted to abuse our patience?

Frankly, what I fear is a commercializing by editors generally of the dry-fly idea as something new—a fad to be capitalized—and upon which to found excuse for continuing and increasing the volume of this already swollen stream of angling inanity. I believe I see the beginnings of this very movement in progress, and I believe that with the vast majority of thinking anglers my protest will be popular. Is it not enough to have told us that flies may be fished dry and to have given us the deer tallow and paraffin hints? Isn't anything more simply detail of technique, which, if unchecked, rapidly runs to fads, fancies and a certain pharisaical and un-angler-like intolerance? And why rob us of the joy of acquiring such technique as we may by hard experience obtain for ourselves obiter? And why be so dogmatic about it all? Angling writers, advocates of the dry- and wet-fly alike, are rapidly robbing us of one of the greatest joys of life—differences of opinion—by their uncompromisingly flat-footed statements. If a man tells me I *must* use a ten-foot rod and get out a long line in dry-fly work, I brand it as buncombe—I know better. I once took a pound and three-quarter trout on a five-foot bait rod, using a dry-fly and a 'fly' cast, standing behind a tree on the same side of the stream as the bank under which he lay. It was the only way I could get at him without being seen, after three days of maneuvering. Similar instances might be multiplied almost *ad libitum*.

And from the intolerant to the pharisaical pose is but a short jump. One of the most refreshing things that has appeared in recent years was Charlie Zaring's title, "I Fish for Fish." In sober truth, we all do, and we should stop cloaking the fact. There is not a word that Mr. Gill says (FOREST AND STREAM, July 27) about the rare conclusion of the "dry-fly story," which is not equally true if he leave off the prefix "dry." All waters, by the way, are not adapted to the use of the dry-fly, so that the man who deliberately discards all of his "wet" flies advertises himself extravagantly foolish.

The very basic argument most commonly used in favor of the dry-fly is that where conditions fit, it is a "killing lure." Why then is not Dr. Breck right in sticking to the wet-fly for use in the dark-colored waters of the North Woods, very few of which even in spots "indicate" the use of the dry-fly? It is not the *manner in which*, but the reckless and ruthless number of fish of any and all sizes taken that justifies so gross an epithet as "fish-hog." RALPH BISBEE.

Log Cabins and Cottages

How to Build and Furnish Them

A seasonable book when all minds are bent on the problem of getting close to nature. Mr. Wicks in this delightful book offers timely advice to every one who wants to build a simple summer home at one with its surroundings of wood or stream or shore.

This is a thoroughly practical work, treating of the how, the where, and the with what of camp building and furnishing. It is helpful, too, in regard to furnishing, and withal a most beautiful work.

Cloth, profusely illustrated, \$1.50 postpaid.

ARE YOU A GUNNER?

Do you love to follow your good dog over the fields in search of quail or chickens, or to struggle through swamp or along thick grown hillside, expecting to hear the roar of the ruffed grouse or the twitter of the fall woodcock? If so, you should have this new book.

AMERICAN GAME BIRD SHOOTING

By **GEORGE BIRD GRINNELL**

(New—Just Published)

This companion volume to "American Duck Shooting" treats of the upland game which American sportsmen shoot over dogs—woodcock, snipe, all the quail, grouse and turkeys.

The first part of the volume is devoted to a description of the various species and their habits—the way in which they live their lives.

The second part of the book is devoted to upland shooting and treats of the methods by which all the upland birds are pursued and taken. The chapter "Aids to Shooting" describes the clothing, guns, and loads and dogs that the gunner may profitably use; while the last section of the book treats of the shooting of the future and the efforts to rear our native quail and grouse in domestication.

The volume is illustrated by colored plates of ruffed grouse and quail, and 48 full page portraits of different game birds and hunting scenes, with a number of cuts in the text.

Cloth. About 575 pages. Price \$3.50, net. Postage 25 cents.

This book is of inestimable value. It contains the genuine hunter-naturalist facts given in the most entertaining and interesting style.

FOREST AND STREAM PUBLISHING CO., 127 Franklin St., NEW YORK CITY

PEARL FISHERIES OF LOWER CALIFORNIA.

ON June 1, says Consul Lucien N. Sullivan, of La Paz, Mexico, the pearl fishing concession held by the Mangara Exploration Limited of London, was canceled by the Mexican Government, the company receiving for its equipment, consisting of boats, diving suits, air pumps and other paraphernalia 300,000 pesos, or about \$150,000 gold.

Under date of July 14, 1912, notices were posted by the inspector of fisheries that the register is now open for the inscription of the names of persons desiring to take out licenses to dive for pearl oysters.

The abrogation of the above named concession throws open all localities for pearl fishing, except some beds in the vicinity of a few small islands, exclusive rights for these restricted areas being retained by two concessions of not much relative importance. The agitation for free fisheries was continuous for more than two years; and the inhabitants of this section are jubilant over the final success of the popular movement.

It will now be possible for the pearl buyers of American houses to secure some of the choice pearls taken from these waters. The beautiful pink, sea-green bronze and blue pearls, it is believed, are not found in other parts of the world. While it is true that many pearls are secured from the mussels found in the Mississippi and some other rivers in the United States, the fresh water pearl does not have the luster of pearls obtained from salt water pearl oysters.

The first boats will be allowed to go out about Sept. 1, and the first zone to be fished will be that along the west coast of the mainland south of Acapulco. The boats with their equipment are to be sold at auction by the Government in lots to the highest bidder.

The rules regulating the pearl fisheries will probably be printed soon. When available, this consulate will send a translation to Washington [where it will be procurable through the Bureau of Manufactures].

THE RIFLE THAT WON THE WILDERNESS.

THE rifles of colonial and Revolutionary days would stagger the model marksmen to sight. Deckert, a famous Pennsylvania gunsmith of that time, made most of his rifles sixty-four inches long with a heavy four-foot barrel. It required muscles of steel to aim such a weapon accurately.

But to its owner such a rifle was often the most prized of all his earthly possessions. He called it a pet name; he kept it oiled and cleaned to perfection; he gave it all the credit of his successful marksmanship.

And largely he was right, says the Boston Globe. For the traditional skill of the American rifleman depended in no small part on the skill that went into the making of his weapon, hand-made in some frontier gunsmith's cabin shop.

For the long, heavy, slender, small-bore rifle was distinctly an American development, and it reached its climax when about 1750 some genius of a rifleman hit upon the device of wrapping the bullet in a greased buckskin patch to make it fit the bore tight.

It was in no small part through the marksmanship attained by such weapons in the hands of the New Englanders that Louisburg fell; it was the accurate rifle fire of the Pennsylvanians and the Southern riflemen under Morgan that cut down the advancing French on the Plains of Abraham; and, in the Revolution itself, it was confidence in the superiority of their weapons that aided the Americans to cut off Burgoyne in New York State and Ferguson at King's Mountain in South Carolina.

The colonists were the greatest weapon-using people in the world of that epoch. On his rifle the hunter, the pioneer and the settler depended for food, for protection against beast and savage, and for offense in time of war. And the necessity for the best produced the best, something that the owner prized next after his wife and children.

THE OUTDOOR LIBRARY

Seasonable books dealing with every phase of life in the Open. Handbooks of sport. Books that make "roughing it easy." Books for Fisherman, Hunter, Yachtsman, Canoeist, Camper, Nature Lover. Books of Travel and Adventure for Young and Old.

Uncle Lisha's Shop.

Life in a Corner of Yankeeland. By Rowland E. Robinson. Cloth. 187 pages. Price, \$1.25.

The shop itself, the place of business of Uncle Lisha Peggs, bootmaker and repairer, was a sort of sportsman's exchange, where, as one of the fraternity expressed it, the hunters and fishermen of the widely scattered neighborhood used to meet of evenings and dull outdoor days, "to swap lies."

Hunting Without a Gun.

And other papers. By Rowland E. Robinson. With illustrations from drawings by Rachael Robinson. Price, \$2.00

This collection of papers on different themes contributed to FOREST AND STREAM and other publications and now for the first time brought together.

Forest Runes.

Poems by George W. Sears ("Nessmuk"). With artotype portraits and autobiographical sketch of the author. Cloth, 208 pages. Price, \$1.50.

American Big Game Hunting.

The Book of the Boone and Crockett Club: Editors: Theodore Roosevelt and George Bird Grinnell. Illustrated. Cloth, 345 pages. Price, \$2.50.

Trail and Camp-Fire.

The Book of the Boone and Crockett Club. Editors: George Bird Grinnell and Theodore Roosevelt. Illustrated. Cloth, 353 pages. Price, \$2.50.

Like its predecessors, the present volume is devoted chiefly to the great game and outdoor life of Northern America; yet it does not confine itself to any one land, though it is first of all a book about America, its game and its people.

American Big Game in Its Haunts.

The Book of the Boone and Crockett Club for 1904. George Bird Grinnell, Editor. 490 pages and 46 full-page illustrations. Price, \$2.50.

This is the fourth and by far the largest and handsomest of the Club's books. It opens with a sketch of Theodore Roosevelt, founder of the Boone and Crockett Club, and contains an extremely interesting article from his pen descriptive of his visit to the Yellowstone Park in 1903. Other papers are on North American Big Game; Hunting in Alaska; The Kadiac Bear; Moose; Mountain Sheep; Game Refuges, and other big-game topics.

My Friend the Partridge.

By S. T. Hammond. Cloth, 150 pages. Postpaid, \$1.00.

An inimitable study of the noblest of our game birds, following the ruffed grouse deep into his haunts, detailing the experiences of more than 60 years in the field, and throwing much light on the habits, life history and habitat of the game. A most delightful reminder of happy days with upland game.

Inter-Ocean Hunting Tales.

By Edgar F. Randolph. Cloth, 200 pages. Postpaid, \$1.00.

A collection of stories such as are told about the camp-fire. Mr. Randolph offers a hunting experience bounded only by the two oceans, replete with incident, interesting from its novel viewpoint, and dealing with every kind of game that falls to the rifle of the American sportsman.

The Spaniel and Its Training.

By F. H. F. Mercer. To which are added the American and English Spaniel Standards. Cloth. Illustrated. Price, \$1.00.

Men I Have Fished With.

Sketches of character and incident with rod and gun from childhood to manhood; from the killing of little fishes and birds to a buffalo hunt. By Fred Mather. Illustrated. Price, \$1.50.

Training the Hunting Dog for the Field and Field Trials.

By B. Waters. Cloth, 281 pages. Price, \$1.50.

This is the latest and best manual on the subject. As an owner and handler of field trial dogs, and one having had an exceptionally wide experience in the field and at field trials, Mr. Waters was admirably equipped to write such a work. It has already taken its place as the standard authority.

American Duck Shooting.

By George Bird Grinnell. Cloth, 630 pages. With 58 portraits of North American Swans, Geese and Ducks, Plans of Boats and Batteries. Fifty Vignettes in the text and a chart of the topography of a duck's plumage. Price, \$3.50.

My Sixty Years on the Plains, Trapping, Trading and Indian Fighting.

By W. T. Hamilton ("Bill" Hamilton). With 8 full-page illustrations by Chas. M. Russell. New York. Cloth. 233 pages. Price, \$1.50.

Manual of Taxidermy for Amateurs.

A complete guide in collecting and preserving birds and animals. By C. J. Maynard. Illustrated. New edition. Price, \$1.00.

"The Long Shooters" and the Origin of 300 Yards Revolver Shooting. (New.)

By Wm. Brent Altsheler. Price 75 cents. Postage 4 cents extra.

Interesting alike to civilian and soldier, amateur and professional. A neatly bound volume; illustrated from photographs of shooters and shooting scenes.

Woodcraft.

By Nessmuk. Cloth, 200 pages. Illustrated. Postpaid, \$1.00.

No better book was ever written for the help and guidance of those who go into the woods for sport and recreation. It is simple and practical, and withal a classic, written with a rare and quaint charm.

Houseboats and Houseboating.

By Albert Bradlee Hunt. The book contains forty specially prepared articles by owners and designers of well-known house-boats, and is beautifully illustrated with nearly 200 line and half-tone reproductions of plans and exteriors and interiors. A most interesting chapter is devoted to houseboating in England. Extra heavy paper, buckram. The price is \$3.00 net. Postage, 34 cents.

Some Native Birds for Little Folks.

By Dr. W. Van Fleet. Illustrated by Howard H. Darnell. Cloth, 146 pages, with 14 photogravure plates. Price, \$1.00.

Describes the wood duck, the great horned owl, ruffed grouse, killdeer, plover, bobolink, bluejay, chickadee, cedar bird, meadow lark, robin, woodcock, kingfisher, crossbill, and nuthatches.

The Anglers' Workshop. Rod Making for Beginners.

By Perry D. Frazer. Cloth, 180 pages. Four full-page illustrations, 60 working drawings. Postpaid, \$1.00.

A complete, simple and thoroughly up-to-date work for the guidance of the amateur rod maker, carrying him from first principles through all phases of successful rod making. There is no theorizing or speculation. All terms are simple, and all kinds of rods and woods are treated of.

Modern Fishculture in Fresh and Salt Water.

By Fred Mather, author of "Men I have Fished With," with a chapter on Whitefish Culture by Hon. Herschel Whitaker, and a chapter on the Pike-Perch by James Nevin. Illustrated. Price, \$2.00.

My Angling Friends.

A Second Series of "Men I Have Fished With." By Fred Mather. Cloth, 369 pages, with 13 illustrations. Price \$1.50.

READ IT AND CATCH FISH!

No matter how busy you are, you can never afford to ignore a message that points out a shorter path, a better method, a more efficient system.—The Century Co.

True Anglers Use

THE WILLIAMS BARBLESS HOOK
Because it is guaranteed to catch and hold better than a barbed hook, and you can remove the fish without injury. Yearlings, spawn, and their killing wastes thousands of eggs. Does this mean anything to you? It means ruin to a glorious sport. The Williams Barbless Hook is a scientific and practical lure, no mechanism, just its ingenious shape. Highest quality standard flies, \$1.60 per dozen, and bait hooks 25 cents. Postpaid

LACEY Y. WILLIAMS, 86 Water Street, Oak Harbor, Ohio

Contains No Acid

NYOIL
THE SPORTSMAN'S FRIEND

Will Not Gum or Chill

A Guarantee Against Rust
The best gun oil ever known. Cleanest to carry. Absolutely odorless. All sporting goods and hardware dealers. Large bottle (cheaper to buy) 25c.; trial size, 10c. Don't wait until your old bottle of some other make is used up, but throw that away and buy a bottle of NYOIL now.

WM. F. NYE
New Bedford, Mass.

NEW HANDY OIL CAN

HUNTERS AND ALL SPORTSMEN WANTED THEIR 3 IN ONE IN A CAN, SO WE GOT OUT HANDY OIL CAN—The Can that Can't Leak. It's just hip pocket size.

Contains 3½ oz. of oil—Costs 25c. You can buy it at any hardware or sporting goods store. If your favorite dealer hasn't secured Handy Oil Cans yet, we will send you one **express prepaid**, on receipt of 30c. in stamps.

Leading gun manufacturers for years have used and urged all hunters to use 3 In One gun oil. It's the only oil on earth fit for fine guns or revolvers.

3 IN ONE

Lubricates perfectly lock, trigger, ejector, and break joints. Cleans and polishes barrels, also wooden stock. Positively prevents rust.

FREE—Write today for a hunter's generous free sample.

Sold everywhere also in 3-size bottles: 1 oz. 10c.; 3 oz. 25c.; half-pint 50c.

3 IN ONE OIL CO. 112 New Street, New York

HUNTSMEN NEED DIXON'S GRAPHITE
Keep barrels and lock mechanism in perfect condition by using Dixon's Graphite. Booklet 52-P and sample sent free.

Little Trails and Waters

By ROBERT PAGE LINCOLN

IT was now in the early summer season and the signs of growing things were manifest in every woodway, along the open meadow where the golden sun was pouring down its rejuvenating wealth to awaken from the earth clods the tempting green of another space of inimitable season of finery. The glory of summer was in the air; warm and appealing was the glow of the sun high in the heavens, and again the birds were sending forth their calls in every

clang of the cars and the rumble of the traffic; I heard the whirr of machinery, and the clash and clang of all those wheels that go to make commerce the octopus of our present-day life. The sweat was running down my brow, and what sun there was pouring in through the windows seemed sticky and unpleasing. How unlike the sun that I had often drunk my fill of out there on those hillsides, when the season was young and fair, and the clover was blooming lush and

by, night came and still that spirit of unrest lived and stirred in me and craved for the excitement that it is natural in us to fulfill. The streets were deserted and night fell, but as the hours crept on I gained no respite. Something was calling, calling. The shadows I considered were just enveloping the hills now as the aftermath of a glorious sunset. It would lie still and serene there under the starlight with just enough wind in the heights above to rustle the

"ON PLACID WATERS."

"COAXING 'EM OUT."

wood lot where they were busily constructing their little homes to bring forth another brood of songsters.

It was in such a season I found myself with the demon Work following me like the sordid creature he is, and what thoughts I had of taking myself away from this unsavory situation were restricted indeed when my mind would take the course of those channels of necessity; but somewhere away back in my utmost consciousness I had that indelible picture on my mind of those woods and waters, where the birds nested, and where the little brooks, with their trout inhabitants, were awaiting the fly I would cast out to them. I seemed to see through the hazy dims of my vision that big one by the rock shelf rising high, with a swirl, and taking the fly with a jerk that set the reel singing and the blood tingling through my veins. But it is just a dream. Here was the present. I heard the

perfumed! To what extremes the two advance, one the very height of pleasurable appeal, and the other the making of hard thoughts and sordid mind. I wanted to be away from this clamor and dust, out there where the woods were now in their delicate dress of green, and the open road was inviting me to further trips into the land of enchantment.

I seemed to see through the dims of my recollection that open road as it led haphazard away into the pleasant hills where ran the brook. The trout were there. Many a time I had dropped my line in those dark waters and had been welcomed with the leap of one of those tender-fleshed trout, the very finest of our fish. But dreams will vanish under the pressure of those factors that so often serve to unbalance the rules of nature, and I swung once more on the desk, for the demon Work was pointing with his thin finger to the task before me. The day slipped

leaves of the trees into lullabies, and so cool the unrested spirit. And all would abide in that graciousness that can only be found close to the heart of nature with the glory of the wild spaces to enwrap one.

I wandered into the suburbs, and though the air was fresher and the trees greener in contrast with those in the city, still they had that inevitable touch of artificiality that always sets them in the pampered, unnatural class which never will appeal to the ardent lover of nature. Faces I saw everywhere. They smote my consciousness with the iron fist of some hate that had arisen in me; I did not care to see them. They were not part and parcel of my dreams, and were best excluded and relegated into a more kindly oblivion than I could make for them. I returned to my room, and there, sitting in my chair by the open window, watched the incidents of night take their wonted course. At about

that time I considered I would be stretched full length upon my balsam bough bed with the gentle murmurs of the woods to waft me into pleasant unconsciousness in the fragrant land of sleep. Racked by fancies I walked the floor. I was disgusted with myself; there was nothing to do. My friends with the trivial inconsequences of speech and their lack luster views of life palled upon me. The antidote for my harassed mind was peace and quietude; something to renew my fancy and revitalize the blood that had grown dull from care.

Soon I would get away. Soon, I turned the word around in my mind and my heart leaped to the very pronunciation of it. Soon the days would pass and I would wave my hand in farewell, with the pack sack on my shoulder and the dog at my heels. I would pass under those trees and lift my face for the benediction of the golden sun, warm in the azure heavens. I would listen again to the caroling of the birds and hear the subtle murmuring of the countless leaves in that soothing harmony we all know so well. So I fain would leave my misgivings; a book of Keats, and again I trace my way through the wilds with this poet beside me to point out the exquisiteness of nature's fond appeal. How like the effects of a long sweet sleep to awake to the delicate fancy of Keats', that harbinger of life, the god of song. To him let my fancies trend when the camp-fire glows warm in the heart of the woods, when the long day has worn apace. Let him be the guide to those lands that lie beyond. Like heavy laden caravans the days trail across the deserts of monotony, with the goal of youth and freedom far away on the horizon, but steadily they creep on, it comes to an end, and I find myself ready for the eventful trip into the wild places, there to commune with nature in her manifold presentiments, just as man was meant to commune were he close to the heart of the lady of moods. Wake then, O heart, and rise to the very skies in acclaim for the glad day has come.

I took down the slender Bristol fly-rod, nine feet and a half of beauty, the comrade of many a sojourn into the wilds. I jointed it together once more that I might feel its pliancy, its resiliency, and that hidden merit that is the tell-tale sign of a good rod's worth. Into the suit case I tucked the clothes, a few shirts and odds and ends, and took out the tackle box and went over its contents. Then I hunted out the steel casting rod, for I knew where also there were bass in the blessed Wisconsin country I was about to hie me. And so I was on the train and speeding away to the land of my heart's desire. And as I sat there looking out upon the country from the car window I felt a sense of great anticipation, the calmness of ease, for there was no demon Work hanging over me pointing with a cold finger to that which must be done. All that was gone and I could again think of the birds, the wild scenes of nature, of Danny and the old homestead. These were the pictures that come to my vision and they lasted.

Danny was on the platform waiting for me when the train pulled in. It was ten at night and I saw him standing there, smoking his favorite pipe, and watching those who stepped off. We were shaking hands a moment later and he was piloting me to the buggy. Same old Danny; old in the sense of friendship, but in reality on the smooth and sunny side of life.

"There are trout down there in the creek," he told me as the horses put distance between the depot and the country. "And I have routed out quite a number as I told you in the letter. In the morning we will pack the little tent and hie us away for a week close to nature."

How good it was to drink in the pure, sweet country breezes as they billowed over the seemingly endless fields. There is some magic in their searching appeal that cannot but uncover the finer grain in the body of one. There were the comingled scents of swelling loam, and the freshening grass, now strong with the vitality of youth and the leaves that on the trees were spreading in the warm rays of the maturing sun. Back again, and I had visions of coming days, a continual round of peacefulness, of reverie and the strengthening of limb and mind.

In the realm of piscatorial art, Danny is supreme, and it is notable that we hold about the same feelings in regard to things in general, be it rods, lines, baits, flies and the hundred and one little things dear to the heart of the angler. We sat up until the midnight hour talking over things, for our enthusiasm had mounted to a degree that made it impossible to get away without knowing what had occurred to each other in the intervening months. But finally we got to bed and slept on the thought of getting an early start in the morning.

Morning found us up, getting ready. And after a time spent at packing things away, we bid farewell at the house and set out across the fields. The beginning of our trip was under way. The weather was clear and fine and a thousand birds were sending their anthems into the still of morning, a scene of seeing and hearing that will always remain with me. Still were the fresh breezes billowing across the fields and the trees were rustling with a faint stir of life that seemed in perfect harmony with the universal quietude that dominated our surroundings. Above in the skies there was just evidence enough of clouds to break any monotony apprehended. They were fleecy white, set on a field of azure of the purest conceivable. Together we admired the world of nature, wordlessly finding a place for our feelings, for speech is paltry, and then Danny and I are hopelessly poetic.

"You will notice as we stand here," said Danny in a moment of exquisite rapture, as we were contemplating a scene that lay before us, "how hazy and yet how pure the sun rays are. That witchery of glamor that touches the edges of those leaves, and that seeming unfurling of an unseen beauty as the sun mounts higher in the heavens. Notice how the scene seems wrapped up in sleep; how still it is; nothing intruding upon the solemnity of the morning hour. And there, where the shadows are by the brook, see how very deep they present themselves, with here and there the hint of a fragile sunbeam that has stolen in between the leaves."

It was indeed a glorious vista and we stood long and gave it our attention. The morning was now well on its upward climb to the meridian hour, and we were making our way along to a stream, which, hid in among the willows, contained many a trout waiting there in the gloomy nooks for something in the shape of an insect to fall on the surface that they might rise for it. What anticipation and delicate mysticism there is surrounding a native trout brook, or any water for that matter. As you approach,

the heart seems to stand still, and the breath comes fast. Will he take your fly? Ah! that is the question, and it is only answered when that cleverly constructed bit of artificiality flicks the mirror-like surface to arouse the little denizen of the brook to rise and strike it, or it may come to naught. A Coaxer trout fly! The identical thing, and we individually chose one of different coloration and prepared for work. What better imitation than this, and how well it floated; the personification of a dry-fly and fit for a sonnet in portrayal of its virtues.

Danny was stealthily creeping along ahead. I had spotted out a pool that was deep and placid, with just movement enough to the flow to take the fly along. How gracefully it made its way toward its destination. See, it passes that outjutting log and suddenly the water breaks and the first trout is on my hook and fighting for his liberty. Once more playing the little fellows and what gladness throbs through the pulse. He comes to net a clean, beautiful fish with the wealth of nature in his tender length. And so we kept on, with the morning sun rising high and higher, while the prevailing breezes rustled and whispered in the leaves, telling some tale that is as old as the world itself. Rounding the bend I found Danny sitting on a rock with his pipe in his mouth, his rod across his lap, the picture of contentment and reverie. At my approach he motioned to the camera.

"It contains a little of nature and its beauty. Right in there by that big tree, not twenty feet from you, there is a brown thrasher's nest with four eggs in it. Go in carefully and you may find the mother bird there. I have her home pictured on a film and have two trout in the creel as an example of my exquisite luck."

True enough, there was the old bird as I parted the intervening branches and stole a glance at what was before me. She hopped from limb to limb, uttering little cries, half in fright and questioning, I thought. Beautiful harbinger of the day! The poetess of the woodland, with a soul as pure as the light that glimmered down from the sun. I left her there and returned to my companion who was again immersed in dreams, gazing out across the glade with eyes that seemed far, far away. The spell of the day was in me, too, and there we sat long, dreaming and puffing at our pipes while the habitants of the wild passed and repassed us, inquisitive and beautiful in their child-like innocence. What a motive for man to gain fruit of endeavor from! What restful beauty! What sweet magnificence, such as man would seem incapable of uttering or putting to word. I lay on my back outstretched, full length, gazing between my fingers up into the blue of the sky. There was stillness all around. I heard, however, in the hollow of the wood the chirping of a bird, but save for that and the slight stir of the wind through the leaves of the trees now and then, there was nothing to break in on that wonderful solemnity.

Our progress along the stream was gradual, for we would let nothing of that beautiful country pass by with a perfunctory glance. Rather we searched the deeps of nature in that communion which spells love in its highest form. We caught trout here and there, and we soon had enough to last us. Noon day came and we made our stop. And after the pleasant meal we

(Continued on page 281.)

Through Unexplored Guerrero

By PROF. WILLIAM NIVEN

Chapter IV.—Crushing a Revolution

INDIAN OF PINTO TYPE.

FOR eight years after my visit to the land of the mound builders I made several trips into Guerrero, mostly in search of the extension of the vein of fabulously rich ore of which I had heard from the queen of the Tlapanechos. I did not find this, but I found a good placer mine at Otatlan, and on a trip to this placer bed in 1901 I met with an adventure which came near costing my life, and in which I materially aided the Government of Mexico in putting down a revolution which bade fair to overturn the entire State of Guerrero.

Prior to 1901 a movement was started against Governor Mercenario, of Guerrero, and he was compelled to resign at the suggestion of President Diaz. The revolutionary candidate for the governorship was A. Calderon y Castillo, but Diaz did not appoint him, naming instead Agustin Mora. This did not quiet the revolt, and hearing of uprisings throughout the State I believed my presence necessary at the mine, and despite warnings that my life would be in danger, I set out from Mexico City in the last days of April of 1901.

I went on the railroad to Balsas station, and then outfitting with three men, including my trusted mozo, Jesus Mancilla, who had been in the army a number of years prior to entering my service, and who did not know the name of fear, and taking a long train of pack animals, I struck out on the five days' ride to Otatlan. With me went Willie Neale, then a youth of

twenty-two years, but as brave a lad as ever walked in shoe leather. At every village I noticed signs of the uprising. Men were arming themselves and preparing for long-continued trips through the hills, while the women were engaged in parching corn, making tortillas and otherwise providing food supply for the warriors who were going out.

We reached Otatlan, however, without serious incident, save the insolence of three armed men whom I met on the trail, and who though they knew me very well, refused to raise their hats. I rounded them up, made them repass me and speak with great civility, after which they apologized, claiming they did not recognize me, which was of course a falsehood, their new-found revolutionary spirit having made them unduly independent.

At Otatlan I found every one wildly excited with reports that a band of revolutionists were swooping down to attack the town and loot the district treasury, which they afterward did, getting \$19,500 Mexican currency, for their trouble, and killing the Presidente Municipal because there was not more money. Pushing on to the mine I met two Americans who, frightened nearly to death, struck off through the mountains shortly after my arrival, only to be met by the rebel band and robbed of everything they possessed. I offered them refuge, but they deserted Neale and myself to our fates, and their robbery probably proved a lesson for them.

JESUS SALGADO UNDER EMILIANO ZAPATA AND HIS STAFF AT OTATLAN AFTER THE FIGHT IN WHICH SIXTEEN WERE KILLED.

AGUSTIN MORA, GOVERNOR OF GUERRERO DURING THE REVOLUTION WHICH PROF. NIVEN HELPED TO PUT DOWN.

Then came the news to the camp that 500 rebels had attacked Mochtitlan, looting the town and killing some of the officials there. This did not tend to quiet the fears of the eighty or more men and women at the camp—all natives, of course—and on the heels of this notice came another that the smaller band under Manuel Vazquez had taken Otatlan, as described above. At this news, knowing that the only trail to the coast led directly past my camp, I began the work of fortification.

On the point of a hill commanding the camp and up which wound the trail, I ordered a trench dug. I found I had sixty men against Vazquez' band of about one hundred. Most of my force were armed with muzzleloading shotguns and muzzleloading rifles, for which they had plenty of ammunition, while every man carried a machete, one of the long, wicked knives of the tropics, a primitive saber, with which fearful execution has been done among the natives in previous battles in Mexico.

I sent the women and children of the camp to a spring about five miles further back in the mountains, posted my men in the trench, which I caused to be even more strongly fortified with a rude stone wall, and had large piles of boulders collected on the hillside above narrow portions of the trail, ready to be hurled down on the heads of Vazquez' men when they attacked. They could reach my trench only by this one trail, and after I had posted guards that night I lay down in my blanket under the brilliant semi-tropic moon, confident that Mr. Vazquez and his rebels would, at least, meet with a warm reception.

For years I was a member of the First Lanark Shire Artillery Volunteers, and the military training I received in Glasgow stood me in good stead in the wilds of Mexico in planning my defense. That my guards were awake was proven about 2 o'clock in the morning when I was awakened by about thirty of my men who had surrounded an Indian who had come creeping in, bringing news of a drunken orgy, then being carried on by the rebels in Otatlan. The poor fellow was harmless and nearly frightened to death. He declared he was fleeing to a village

where dwelt some of his relatives, about a day's journey over the mountain, and we let him proceed.

Next morning a messenger arrived from Vazquez, commander of the rebels, demanding that I surrender such rifles as I had, there being five modern rifles with which I and my immediate servants were armed, with 1,500 cartridges. The letter which this messenger brought added that I should then present myself before Vazquez in Otatlan, if I wished to live more than twenty-four hours longer. This messenger was clad all in white, mounted on a white horse and carried a white flag tied to an enormous machete which he continued to brandish aloft until my mozo, leveling his pistol at the fellow's head, commanded him to lower the flag or else hold the machete still.

I still have Vazquez' letter in my possession, and my reply to it, of which I also have a copy, was as follows:

Coronel Manuel Vazquez,
Otatlan, Guerrero, Mexico.

I have some rifles, but only for a defense.
(Signed) WILLIAM NIVEN.

Otatlan was only three-quarters of a mile away, and messengers from Vazquez kept coming to me all day, but I persistently refused either to give up my arms or to meet him in the village. I slept that night in the trench, but the next day, posting some of my men as sentinels on the highest hills in the vicinity, I took the balance and resumed work on the mine. At 1 o'clock I heard the sentinels firing, and in five minutes the entire force, together with myself, was in the fortifications.

My sentinels came down and informed me that they had seen Vazquez, followed by all his force, coming up the cañon, and had not fired into the air, as I had directed, but straight into the approaching band, at which Vazquez fired

two pistol shots into the air and all the rebels fled down the cañon at top speed.

This was our last visit from the rebels, and practically ended the revolt in Guerrero, for Vazquez and his band, failing to escape to the west coast through my fortifications, turned back to Tlacotepec, where they were ambushed by a brave priest, Father Gonzales, and 200 men, and practically wiped out. That night I slept again in the trenches, but with no fear that the rebels would return, as they seemed so thoroughly frightened by the fire of only two men. Had they been able to get across the mountains into Sonora, the probabilities are that they would have started the Madero revolution, which has just been concluded, and that one of the bloodiest wars of Mexico's history would have been precipitated then instead of ten years later.

Next day we were again surprised by another body of armed men riding up the cañon, but they proved to be Rurales, members of the Government's force, who had come to the "rescue" of the American, at the orders of the Governor in Chilpancingo. They were much surprised to find me alive and safe, and immediately demanded fifty dollars for the expenses of the trip, stating that they were without funds. I not only gave them the money, but killed a fat steer as well, and we had a barbecue which I shall never forget. They declared they had missed the rebels, but the truth was they had dodged them, as I learned afterward, fearing to meet Vazquez and his band in the narrow confines of the cañon.

After this we were not disturbed, the Rurales went their way, and we returned to our work on the mine, to which I devoted my time for some months, practically forgetting the ruins of dead cities which lay back in the mountains all around me, until they were called to my mind by some explorations made in a tour of large caves, which I shall describe in the next chapter.

[TO BE CONTINUED.]

TAKING A DAY OFF AND TRYING ONE OF THE LITTLE STREAMS FOR GOLD.

Hunting Partridge Among Powder Magazines

By THOMAS TRAVIS

PARTRIDGE, br'er rabbit and powder magazines—that's an interesting combination for any sportsman to front, isn't it? Open season, rabbits hopping along the trail in plain sight; squirrels galore, calmly eating sweet hickory nuts over tons of fulminate; partridge whirling up under the muzzle of your gun, and when you peep along the sights, instead of a whirling bird you see this, out of the corner of your eye, in great red letters: "Danger! Keep Off; Powder Magazine." Yet in spite of it all we had a good day's sport and a good bag, too. This is how it happened:

We were standing on a stump, up to the neck in a tangle of golden rod and brier. The hounds were singing their unmatched rhapsody of a hot trail. "He's coming down the old lumber

"Git him?" said Sam.

"No, did you?"

"Nope; didn't git a sight at the danged thing."

"What did you shoot at?"

Sam rubbed his nose, scratched his head and grinned. "Well, doctor, it was this way: just a brown hole in the air what I shot at, 'n I thot it was a rabbit. But you shore ought to gotten yourn. He wan't only lopin'."

"I shot at the woodcock, Sam. Didn't you see them?"

Again Sam rubbed his nose, looked off at the distant mountains and grinned. "D'you think they was woodcock down where you went, huh?"

Away over the hill the hounds were still mouthing; the chorus rapidly dying down as the chase swept further and further off. "They'll

So we started. Ten miles through country lanes we purred. Over rustic bridges we rumbled, along the Pequannock and Wanoche streams, through Pompton till at last we turned into a by-path and came upon the loveliest bit of wild land I had seen in many a day.

No sooner had we turned Snob, the foxhound, loose than he put up a molly cottontail within five yards of us, and before we could snap the collars free from the other two, they had sprung from the auto and were off pell-mell with a yard of chain between them. Snob doubled the cottontail, which dodged under a log right in front of the beagles, Sport and Nell. With a wild yell, Sport jumped the log and Nell, with an equally eager howl went under. "Bang! bang!" I blazed away and Molly jumped a foot in the

"A BIRD DOG CAN'T SMELL POWDER UNTIL AFTER IT'S DISCHARGED."

road," said Sam, jumping from the stump. "You stay here and I'll head him off at the crossing."

"Right," said I as I cleared for action. "Here he comes!" Just ahead of the dogs, his ears laid back, hopping along as briskly as if at play, his little cotton tail fairly jerking with fun, came br'er rabbit with the beagles after him open-mouthed, yelling, humping their little bowed legs, and madly giving tongue in their effort to close the few yards between them and him. It was such a pretty sight that I paused a moment to watch. Then, things began to happen. Sam stepped on a pile of dry bush; out shot a brown streak with a white dot in it; right across the chase coming pell-mell down on us. "Wow!" said Sam's gun; then, "Chir-r-r, chir-r-r," right behind me, and I saw out of the corner of my eye two woodcock spring up from the birch not ten feet from me. Quick as a wink I turned, slipped and fired as I came down with a bump. "Bang, bang," went my gun and "Bow" said Sam's; then silence that could be felt as I crawled to my feet, recovered my hat and pulled the burrs from my hair.

bring 'em round again all right, you see," said Sam. But scarcely had he spoken when a distant fusillade as of a dozen war men ambushed arose.

Sam snorted, pulled the cartridges from his gun and sat down. "'Taint no use huntin' here on 'lection day; see? That's our rabbit gone all right. Let's go home." And as the hounds came panting back, he snapped their collars on and held them fast. "First thing you know somebody 'll pepper the dawgs."

In the midst of our quandary a familiar auto came chugging along the old lumber road. It was my old friends Dilts and Steers of DuPont powder fame.

"Well, doctor," quoth Dilts, "what are you looking so glum about; anything wrong?"

The situation was explained fully, fervently and at length. "Oh, that's all right. Come on with us. We're off to Steer's reservation. Twelve square miles of wild land up at the powder works at Pompton. Can't crowd you out there. The dogs will be all right, too. Safest place in Jersey on election day."

air, dry leaves flew in a cloud where the double explosion of Dilts' gun was blended with a frenzied cry from Steers. "Got him!" said Dilts. "But for heaven's sake, look at that!" Right where Molly was heading when Dilts picked her up was this huge sign: "Dangerous! Powder Magazine; Keep Off!" Needless to say, we did.

Snob was called in, Sport and Nell were untangled and we were pushing further along the hillside away from the magazine when Snob gave a howl that sounded like grand opera after a high note. There were two rabbits hopping along the trail not twenty yards ahead.

"Don't fire toward the magazine," said Steers; "the wads might raise Ned."

"Don't fire at all," said I, eagerly; in fact, pleadingly. "What's the use. Two rabbits aren't worth raising such a fuss about." Sam, with one eye on the blue sign, the other on the rabbits, was sidling off like a crab after bait, to get a flank shot. "Hold on, Sam'l," I yelled. "Look here, d'you want to blow the dogs up?" That fetched him.

"Ginks, doctor, I hadn't thought of that. Them dogs can't be beat. Sho, now," and he rubbed his nose with one finger, grinned and came back. "Dominie, for a sky pilot you're mighty unwilling to go up higher."

"No, Sam'l," said I, "it isn't that. It's the poor dogs. If you shot into that fulminate there would be a steady day's drizzle of dog meat and suspenders."

We held a consultation and decided to go half a mile further along the trail and then hunt over the hills and valleys of a great granite nub that rose before us. In the clustered golden rod of a lovely valley four rabbits were put up, and a pretty sight it was to watch them play tag with Snob and the beagles. Has any hunter yet explained why bunny doesn't dash away from the dogs as she does from a man when he puts her out? Perhaps it is because the dogs follow so closely that she cannot rest after her first burst of speed, while with a man she feels that the burst has put her at a safe distance; where she freezes till he rousts her out again to repeat her comet-like swoop. At any rate I could watch from the cliff on which I stood just what happened with the dogs. When they put Molly up she would rush for a few yards then wait till the hounds came close. Then with ears back, her little tail bobbing, she would lope along, while Snob, wildly bugling and the beagles madly yelling would make every effort to catch up. Thus the chase progressed from harbor to harbor. Sometimes Molly would get in the long grass and sit up to watch where the dogs came toiling along with gasping howls. Once I saw her run across a little rill that tumbled in tiny cascades down from the mountain; then she doubled and hopped in the shallow water for about twenty yards. Rarely in a straight line did she go more than a hundred yards. But always she zig-zagged from cover to cover. Sometimes I could see the hounds, and they were good ones, running the back trail, as eagerly mouthing as though Molly were in sight. Then at fault, they would spread out, nuzzle her up again from where she had "frozen" under a log. Nearer and nearer they brought her, till I was beginning to listen for the final fusillade. But Molly knew the game. The course ended with the futile baying of Snob at a hole under the rocks where only the wildly waving tails and rear elevations of Sport and Nell protruded.

Later I could hear the crack of guns, and when we foregathered at the end of the valley there were four rabbits between us. "Look at Snob nuzzling around. There's birds here," said Sam. "Snob kin trail 'em just as well as though they were rabbit or fox. Only he won't point."

"Bang" went Dilts' gun. "Got him?" shouted he, a partridge running along the ground in a laurel thicket.

But he hadn't "got him." From my post further up the hill I saw a big cock partridge, breast ruffle erect, flash by through the treetops and veer among the higher rocks. Up there I followed to watch the scene below. I could see the hunters stealing along in a great laurel-clothed wrinkle of the mountain, the dogs nosing through the thickets. Then I saw one, two, three, four partridges get up about a hundred yards ahead and fly silent as arrows up among the dense thickets and ledges beyond.

There we concentrated. All hands were tense on the guns. We knew we were close to a covey

of grouse. Round a huge boulder we crept. "Hur-r-r-r, hur-r-rr," up they got. But even as our guns came to shoulder, another big sign loomed over the sights: "Danger! Power Magazine; Keep Off!" Hidden in those valleys laurel-clothed were dozens of magazines. Some of them contained explosives so sensitive that even the concussion of a gunshot might precipitate a crash which would split the very rocks and announce in rumbling thunder-like earthquake the end of our chase at least. Small wonder that we turned our backs on the birds and hunted over the mountain crest where Steers assured us was a two-mile stretch entirely free. The game seemed to know somehow that what was danger to us was safety for them. But over that two-mile stretch of laurel and mountain we flushed many a bird. Nor were our bags empty as we paused to look where the Wanoche flowed in silver thread to join the long lakes lying amid the silent mountains which rose, crest on crest, till they stretched away like huge tepees far as the eye could reach.

From the crags we could see the works lying in the hollows; romance and thrills enough they were among the commonplace. From here were going forth cases of shells to fill the belts of hunters in the far North. On the prairies of the West as in the meadows of the South those shells would spit fire against gray dawns where hunters followed warm trails to the music of hounds or the silence of the wilderness. Across the ocean to the land of big game those shells were going, to rest at last among the tropic grasses where lions roared, or to lie perchance among the snow-capped crags of the Himalayas. What stories they could tell were their red cases tongues and their single eye sight-endowed. What hunter's songs those brazen pipelets would roll forth on wold and wild. Wolf and tiger, leopard and lion, elk and elephant—all alike would answer them with rage, roar or death howl. How many tense moments in the face of saber teeth and smiting claws these tiny tubes would share! And how many a lone hunter, hunger-pressed or standing at bay, would steady his thumping heart to pray that the shot would not fail!

So, with the music of the hounds lilted from the distant coverts or swelling in chorus through the tree-covered trails, we worked down through the laurel to the lake shore and more magazines. Here plump squirrel were feeding, plenty of them, scrambling up the trees or sitting, brush awake, calmly eating, while rabbits hopped along the path or took refuge under the works where tons of explosives were being made.

Once across the water we were on freer ground. The cap works indeed was within two miles, but we swung along parallel to it. Steers picked up another rabbit, then Dilts a grouse which chanced to get up in the only open space. Grouse after grouse flew up, now singly now in pairs. Among the caves of the singularly wild rocks we found spoor of skunk and fox. Again we came across abundant deer sign. Sam pointed out a place where two children strayed from home, had been found the next fall by fox hunters, and all this almost within sight of the big city.

But the climax of all came just as we were drinking in the beauty of the scene. The beagles put up another rabbit which rushed almost into Snob's jaws. With a twist like a

jumping-jack she dodged and Snob rolled head over heels in mad scramble to turn as quickly. Then pell-mell the three dogs, rabbit and all swept over the crest of the knob and down on the hunters below. I saw Molly just ahead of Snob, Snob sitting on his tail, his fore feet braced, his mouth open and howling, slide fully twenty feet down the smooth rock, while Sport and Nell rolled after him in a shower of leaves and pebbles right across the front of the three gunners below. Who fired first or last nobody knows. "Bang! bang! Ba-bang! ba-bang!" went the guns. Leaves flew; shot rattled through the trees, and Molly? Molly stopped for one brief instant after the last shot, wagged her tail with exactly the expression of a naughty boy when he put his fingers to his nose. She stopped, looked back and then hopped quietly off among the rocks.

It was too much. We collared Snob and the beagles; packed our guns and made for the home trail. Where the full moon rose in ruddy splendor behind the hills and in the glare of the head lights, bunnies danced from time to time across the road.

THE TOP RAIL.

C. S. JOHNSON, a deputy game warden in Illinois, shut his eye for personal business so he could get a bead on a lawbreaker for the State. It happened this wise: Brother Johnson runs a hotel for sportsmen down in Siloam, a pretty popular place among the fraternity, but as you will see, no good place for the transgressor of the game laws. A few days ago a chap from Paris, Ill., registered at the Johnson hostelry, went to his room, unloaded his suit case of a bunch of quail, rang for the bell hop, and as the hotel is active, so are the hops, and in a twinkling the boy arrived. "Take these to the chef and have them cooked for my dinner," said he handing the quail and a quarter to the hop. Now this chef wasn't French. He was Illinois, and he knew the game laws. Upstairs he planed, striking the steps only often enough to steer himself, until he volplaned into Warden Johnson. "Boss," said he, "the gent from Paris, now in room 13, gave the boy a quarter to bring a bunch of quail down for me to cook."

"Quail, 13 and a quarter," shouted Johnson. "His number is unlucky. He gave the boy something he won't get here and it's close season on quail."

The guest from Paris was shocked when he found the hotel proprietor, with the aid of a Justice of the Peace had added \$76.50 to his hotel bill, and then Mr. Johnson wouldn't serve him the quail.

This is a true story, honest and true. It was told me by E. E. Pierson, of Bloomington, Ill.

GRIZZLY KING.

Wild Dogs and a Talking 'Possum.

RALEIGH, N. C., Aug. 12.—*Editor Forest and Stream:* A regular campaign has been made against wild dogs by the authorities of the Hospital for the Insane and by other people a little southwest of Raleigh, where there is a forest, now owned by the State, of something like a thousand acres, this being one of the finest in North Carolina, some of the trees being six feet in diameter, oaks, poplars, pines, etc. These dogs are found to have gone wild in a very singular way. About thirty years ago labor agents came into this State and, working largely through the negro preachers and other leaders of that race, induced over thirty thousand of the blacks to leave North Carolina and go to the Southwest, mainly across the Mississippi River. One preacher got a dollar a head for those he induced to go, his rake-off being \$300, and after this work was done he departed for fresh fields. The negroes always have dogs, usually a hound or cur of very low degree indeed.

In a scattered settlement of negroes some three or four miles from Raleigh, where the dogs were numerous, the owners, to use the darkey phrase, "pulled up and left." Usually with the blacks to move merely means to "put out the fire and call the dog"; but this time they did not call the dog, and so the latter was left. Masterless and uncared for, the dogs went wild, and they ruined two herds of cattle, and have been killing sheep and even goats. The hospital authorities have been giving them the shotgun treatment, and in eighteen months have killed forty-five, while other people have added to this list. These half-savage beasts, which are curiously blotched and look very like hyenas, breed in little caves and hollow stumps and under rocks, and not long ago a hunter went to a trap he had set, when suddenly a wild bitch sprang at him from a little cave in which were her pups. He had to shoot quick to save himself. He found six pups, which he put out of action in short order.

The average North Carolinian is country-bred and loves every outdoor sport, day or night, including, of course, 'possum and 'coon hunting. The writer is a devotee of these sports, as well as all others with dog and gun. One of the best stories he has ever heard was told a day or so ago by Mr. Allston, a member of a family which for generations untold has followed field sports. On the Roanoke River north of Raleigh and near the Virginia line, where the negroes do a great deal of 'possum hunting, lives a man named Allen, nearby him living a negro named Zeke, who because he lives nearly all the time on the river or in it, is known as "Roanoke." This negro told Mr. Allen he was going out on a certain night last winter, said he was going to catch him a fine 'possum and told him the direction he would follow. Mr. Allen slipped out into the woods and climbed a tree on which there was yet a lot of foliage, the tree being a very large one. Presently Roanoke's dogs came along, taking

Mr. Allen's trail, and up came Roanoke, who, after the manner of the darkey, addressed himself to the atmosphere and his dogs, saying: "Dey shooly has treed him, far and squar, but dat tree is too big fur me ter cut, and I'm er gwine to climb it." Suiting the action to the word, he began to climb, the dogs barking and looking up into the tree. When Roanoke was something like ten feet from the ground, Mr. Allen cried out, in the deepest voice, "Who you cumin atter, nigger?" At the words Roanoke fell out, and his three dogs, thinking he was a 'possum, jumped on him and bit him hard on his legs, while he yelled and threshed about with his hands, shouting as he did so, "Keep off, you d— dogs; de devil's right here." Roanoke limped off for home and Allen, coming down from the tree a little later, made his way to the old darkey's house and there he found Roanoke with his head in his hands, in front of the fire-place. Mr. Allen knocked at the door, after he had peeped through it, as it was partly open, and Roanoke limped to it. Mr. Allen said, "Roanoke, I hope you got me a 'possum."

Roanoke replied, as he looked at his torn trousers, "Bless God! Mr. Allen, I ain't never gwine in dem woods no mo'. I sholy treed de devil, er else er' possum what kin talk, fur one uv dem two things hollered at me fum er tree, whar my dogs, which is trusty dogs and never fails, had treed dat sumfin."

Mr. Allen, not cracking a smile, departed, and the next day told Roanoke's experience, while he gave the poor fellow a solatium to salve his dog-bites. If Mr. Allen hadn't told the story, Roanoke would have gone to his grave believing that he had either treed a devil or a talking 'possum.

FRED A. OLDS.

The Fish Crow.

HOLYOKE, Mass., July 22.—*Editor Forest and Stream:* Recently you printed an article, entitled, "Do We Need the Crow?" Three summers ago I lived by a lake in the western part of Vermont by the name of St. Catherine. Near the lake shore a fish crow built her nest in the top of a rather tall, slim hemlock tree in a thick growth of forest. When the young ones were nearly grown, they were blown down by a heavy wind. A party nearby killed one and we got the other two. One of these was hurt and died in a few days. The other one, which we called Joe, was quite intelligent and knew its name. At first we fed it bread crumbs, but when it got older, so that it could feed itself, it would open its mouth and take the bread and then throw it away. It never would pick up any bread crumbs, but would always swallow pieces of meat or fish. I think this shows that the fish crow lives on an animal diet wholly, and does not like grain of any kind.

Joe was very fond of raw fish. When I was dressing any, he was always on hand for his share. I had a small garden, and while working in it, this crow would follow me and pick up all of the bugs and worms, but would never

pick up corn. A number of times I saw him stop and listen to the ground, and then make two or three powerful picks with his beak and fetch out one of those large white grubs, the larvæ of the June bug. He would put it under his toe and pick its head off, then eat the rest of it.

The young fish crow is quieter than a young field crow. It does not make so much noise, not even with the old ones. I do not think the fish crow can stand cold weather. Mine died when the first cold weather came on. The others leave the last of September or first of October. I had a good chance to notice the habits of the old birds, as the nest was only a few yards from the house where I was stopping. In the same grove were a number of nests of other birds. A flicker had one in the top of a dead limb on a beach tree. A few yards away some other kind of bird had her nest, and nearby a robin had hers near the house. The fish crows never disturbed any of these nests. My opinion is that they never do this.

These fish crows always flew out over the water and returned the same way. Their flight was more like that of the dove—a light gliding stroke with their wings. I think they do not go out into the fields like a field crow, but stay near the water where they build their nests. There should be laws protecting their nests within a certain number of yards of the lake shores. I think they do little harm, but eat large beetles and worms that smaller birds cannot master. This crow comes further north than Connecticut. The field crows that came to the lake to drink were larger and more of a blue black color. They stay through the winter here, but the other kind go South. The fish crow is of a flatter build and more of a brownish black. I think the two keep separate. The fish crow should be protected, but we may have too many of the field variety sometimes.

ELLIS L. DUDLEY.

"The Winter Sleep of Brute Creation."

BREWSTER, Me., July 15.—*Editor Forest and Stream:* In the July 6 issue of your paper I notice that Leonard K. Hirschberg, A.B., M.D., etc., makes the statement: "The hedgehog enters into a deep sleep comparable to that of mosquitoes and fireflies. It retires to some rocky crevice, beneath some gnarled roots or intertwining vines and twigs. Perhaps it is lucky and finds a disused cellar or water pipe. Here it maintains a foodless slumber until far into the spring. In the South, and even in some parts of Canada, the hedgehog awakens at periods and seeks food."

After reading the above, the impression received is that the gentleman has been reading of the hedgehog of Europe, and that by some means he has conceived the idea that the European hedgehog and the porcupine of this country are one and the same animal. Since he speaks of the "hedgehog" in Canada, it seems only fair to take exception to some of his statements.

In the first place there is no "hedgehog" in this country and never was. He evidently refers to the Canada porcupine, but as to the Canada porcupine hibernating I can say that they do not. Mr. Hirschberg is, in fact, the first person I ever knew to make such a claim.

Not only are the porcupines traveling about

during the entire winter from their dens to their feeding trees, whenever the footing will permit, but very frequently one will live in a single hemlock or in a small clump of these trees from late fall to early spring, scarcely coming to the ground during the entire period. We have had opportunity to observe individuals in the tops of tall trees during every day of an entire winter, and except for their restricted range of operation they fed and carried themselves daily in every way exactly as during the summer months. By spring these trees were almost without foliage, and the snow beneath was littered with droppings and the tips of branches. After having observed them for years I regard them as about as much subject to hibernation as the red fox.

In another place Mr. Hirschberg speaks of the "marmot, ground squirrel and similar rodents" coming out of their dens in the spring in a much poorer condition than they were when they entered. While it may be impossible to know just how fat each individual was in the fall when he entered his den, I have taken woodchucks on the snow when they first appeared in the spring so fat that they ought to have been ashamed of themselves. They were fairly covered with fat. If Mr. Hirschberg has made any observations of his own in the field upon woodchucks when they first appeared in the spring—not a week or two later—it would be interesting to have him make some definite and plain statements as to just what he found out.

W. M. H.

A Starling Investigation.

NEW SALEM, Aug. 6.—*Editor Forest and Stream:* A quite thorough investigation of the starling in America is reported in the Massachusetts Board of Agriculture Report of 1910, by the State Ornithologist, E. H. Forbush. The report appeared but a few weeks ago, as our State printer is slow and sure, and apt to be at least a year behind where one expects to find him. The names and addresses of 206 observers who have contributed to the information about starlings is given in the appendix, and copies of the ornithologist's report can be had separately from the rest of the agriculture report. The report is valuable also from the information about resident birds which have learned to eat the gypsy moth eggs, as they seemed not to have learned to do in 1896, when Mr. Forbush wrote his "History of the Gypsy Moth," collaborating with Prof. Fernald. At that time the native birds were observed eating all other forms of the moth, but unlike European birds, did not then seem to have found out that the eggs were good. So, although most of the report is taken up with the starling, the announcement that nuthatches, chickadees, brown creepers, golden-crowned kinglets and downy woodpeckers are being observed by several persons eating these eggs is receiving well-deserved attention from practical men.

The report describes the starling, and glances over a few interesting points in its history in western central Europe, where it is native, and in Switzerland and England, and gives a copy of a quaint old tract on, "The wonderful battle of starlings fought at the City of Cork, in Ireland, in 1621, where they met to fight together the bitterest and sharpest battle

among themselves, the like for the manner of their flight, and for the time the battle did continue, never heard or seen at any time, in any country of the world. (I believe.)"

"In America, the starling is not regarded as particularly pugnacious, except where it has to fight for nesting places or food. In such cases it is combativeness personified, and its attacks are well directed and long continued."

"The testimony of 110 correspondents, whose residences are scattered over five States, shows that the starling is increasing fast. Only eighteen have seen no increase in their localities or find the increase slow. Even in Brooklyn, however, Edward W. Vietor, who keeps a careful daily account of birds observed at Prospect Park, records an average of twenty-nine starlings daily in 1908, thirty-one in 1909, and forty-one in 1910. The most convincing proof of increase comes in the statements of people who saw the starlings in flocks of from 1,000 to 3,000 in the fall of 1900, and who now find them in the same localities in flocks estimated to contain from 8,000 to 10,000. In the region about New York city, including Long Island, Staten Island and parts of the Hudson River valley, also portions of New Jersey, where the sparrow is more abundant than I have ever seen it elsewhere in this country, there appeared to be at least fifty sparrows to every starling, in June, 1910, but it is quite possible the ratio has now been very materially changed in many places by the increase of the starling."

The five States from which the reports were received are Pennsylvania, New Jersey, New York, Connecticut and Massachusetts. Among the list of observers we notice some who get the most intimate knowledge of birds' habits obtainable by the new methods of attracting those birds that can be induced to nest near houses. Besides there are some noted field observers. A fondness for cherries is reported, sometimes a number of birds stripping a tree, and sometimes only taking a few here and there. One hundred and two stomachs were collected by Mr. Forbush and examined by Prof. Beal, of the Biological Survey. The food, largely insect, is much like the starling's food in Europe, only that there their fondness for the destructive land snails makes them useful, but we are not troubled with these snails. "The increase and spread of the starling is due to its fecundity and its general fitness for the battle of life. * * * It often has two broods in America, as it has in Europe. It has the physical characteristics of a little crow. * * * Mentally the starling is superior to the sparrow. * * * No doubt in the city the starling is preferable to the sparrow, but it cannot displace the sparrow without indirectly making trouble for native species also. The sparrow and the starling will live together as in England, but the starling will drive the sparrow away from nesting places that are suitable for its own use, and the sparrow will in turn eject tree swallows, martins, bluebirds, wrens and other native birds from their present nesting places, that it may secure homes in place of those taken by the starling. * * *

"The starling breeds in dove-cotes, holes and crevices about houses, in niches under the eaves, in electric light hoods, bird houses, woodpecker holes in hollow trees * * * in

competition with domestic pigeons, screech owls, sparrow hawks, flickers and other woodpeckers, crested fly-catchers, martins, bluebirds, tree swallows and wrens. * * * The sparrow soon learns that it is no match for the starling and the contest degenerates into a straw-pulling match, each bird alternately clearing out the nesting material which the other brings. * * * The starlings quietly watch and never interfere while the flicker digs and shapes its nest in some decaying tree; but when the nest is finished to the satisfaction of the starlings, it is occupied by them the moment the flicker's back is turned. On the return of the flicker, a fight ensues which usually results in the eviction of the starling from the hole, which, however, keeps up the fight outside while another enters the hole to defend it against the flicker, which having temporarily vanquished the first, returns to find a second enjoying the advantages of possession. As Mr. Job says, the flicker is confronted with an endless chain of starlings, and finally gives up."

Of course, the starling must also compete with native birds for its food of berries, etc. No one will ever know the number of attempts that have been made to establish the starling here, many of which have proved unsuccessful. The first attempt that is known to have been successful was in New York city.

"The fact that it is generally considered a desirable species in northern Europe ought not to have convinced anyone that it would be so in America. * * * When imported into New Zealand it became a very destructive pest. * * * The Biological Survey * * * has been given authority to regulate the importation of foreign mammals and birds, and now has agents in every port where foreign species are likely to come."

A principle which is stated in this report seems to me of great importance in any country, as sentiment ought not to rule us wholly in relation to foreign species. Reason is needed to some extent in the protection of insectivorous birds, as the protection of birds is practically getting complicated.

"When any animal is successfully introduced into a new country," says the writer, "and increases rapidly, its advent naturally tends to upset the biological balance. Its native natural enemies have been left behind in its own country, where it had a settled established place in a series of natural forces that had been in existence for centuries, and it becomes an interloper in the new land, among conditions and forms of life entirely new. If the species is weak or unfit for its new environment * * * it dies out and no disturbance results; but if it is strong and fit and the climate is suitable, it is likely to increase abnormally, and it cannot so increase without displacing some of the species native to the soil. The starling is a hardy, capable, prolific bird, which, like the sparrow, has had centuries of experience in getting its living in populated countries and cultivated regions in close relationship with man, and in such environments it has survived and thriven. It has thus an advantage over our native species similar to that enjoyed by the sparrow. How can the bluebird or the house wren, which have been accustomed to life about human habitations for a comparatively short time, compete with such a bird?" E. O. M.

Ideas About Landlocked Salmon.

ALBANY, N. Y., Aug. 14.—*Editor Forest and Stream:* With others I am very much interested in introducing landlocked salmon in Lake George. On the strength of the statement that the clear, cold, clean water there is suited to the species, it has been introduced and there is ample proof that it has thrived to a noticeable extent. But it apparently is caught only when fishing for lake trout, and this suggests a problem for the solution of expert fishermen.

As the situation now is with respect to the landlocked salmon, the following extract from a letter, written by J. W. Muller, of New York, who long ago became a devoted admirer of the lake, is submitted. He says:

"As to the landlocked salmon, if any art of man can devise a way to catch 'em, that man shall have the gratitude of many. I think that the trouble is that the conditions in Lake George will not favor the ouananiche to live and feed as that magnificent creature does in Northern waters, where he takes the fly. The ouananiche wants swift, wild, troubled water, with torrents and deep pools, if he is to be a sporting fish. Lake George presents just the reverse. It is an immensely deep lake, with no streams of wild strength emptying into it. All its streams are trout brooks, suitable, no doubt, for the ouananiche to spawn, but eminently unsuitable, impossible, for the fish to use when he is grown. Hence the landlocked salmon in Lake George (I think) is doomed to be a deep-water fish, swimming on the rocky bottoms fifty and one hundred feet deep, and to be caught only by deep trolling with the regulation and established lake trout trolling outfit—an immense long hand line of hard, oiled silk, a sinker weighing two pounds, and a big trout gang baited with a whitefish, chub, sucker or perch, whitefish being by far the best bait.

"All our lake trout are taken thus and thus only. The deepest place in this lake is 190 feet. The average in the lake trout grounds is fifty feet. I've tried for them with all sorts of rigs and baits, from flies cast over ledges to deep still-fishing with live bait, and the trolling outfit is the only one with which I ever succeeded in getting a touch. And I think I can claim to know a little something about fishing. The fact is that the ouananiche is a sporting fish only in a limited number of regions, where the conditions favor a mode of life different from that enjoyed by big fish of the trout and salmon kind in deep, still lakes.
