## Problems

### Logistics issues

Not enough computers, internet connections and conducive space for training and workshop

### School related issues

Teachers not open to the idea and opposing it because they are not ready to change or learn.

### Community related issues

Project team not getting enough support from community members, online resources and the foundation.

## Objectives

Increase the use of computers for digital literacy training in a conducive space and provide strong internet connections for the devices.

Design a very interesting and practical course/module for the teachers on how to use Wikipedia as a learning and teaching tool, train them.

To motivate and engage community members to get involved in the project.
