The Music Trade Review

This is the oldest music trade publication in this country, having appeared without interruption since July, 1879.

It is published every Saturday, and contains a thorough and exhaustive résumé of all departments of the music trade industry.

Its editions vary from 60 to 150 pages. It is conceded to be the most influential paper representing the music trade, and if you are interested in the topics with which it deals, do not fail to receive this paper regularly.

Ask for a sample copy.

Regular subscription price is \$2 per year.

FATTENING THE MAILING LIST.

How Dealers Can Double and Treble Record Sales of Their Purchasers' Lists.

The dealer was going over his mailing list preparatory to sending out a monthly supplement—256, 257, 258—that was all. There was always the same number, every time, 258 homes with graphophones—the possibility for 258 sales—no more. And all of them would not buy!

The dealer's eye stopped at a name, Joseph Smith. The dealer looked at it long and longingly. Joseph was a rich man with a large family. Each month he had received his Columbia supplement and immediately purchased four or five records. The dealer suddenly remembered that Joseph Smith had a son. Joseph Smith, Jr., was a strapping boy of thirteen, a very active member of the Boy Scout Patrol in the town. Mr. Smith, Sr., was sixty-five years old, and therefore beyond the Boy Scout limit, but (and this was the dealers thought), if Smith, Jr., ever heard that Ernest Thompson Seton record, Smith, Sr., would have to dig down in his pockets for the "where-with-all."

The dealer took one of his cards, wrote on the back, "Your son will want Record A-1331, Scout Patrol Calls; send him around to hear it," and slipped the card in the supplement for J. S.

One thing often begets another, and no sooner had that dealer glanced at the next name on his list than he remembered that Mrs. Blake had a G. A. R. grandfather sitting at home. Out came another card and the notation, "Captain Blake would enjoy our record A-360. Let us send you our collection of old-time melodies and war songs."

The dealer's thinking, having a good start, soon swelled the mailing list up to three times its previous sales possibilities.

He canvassed the family situation with every name on his list. A house with a graphophone was not only a house with a graphophone—it was a house with a baby, or a house with a boy and two babies, or a house containing a grandmother, or a school-girl. Some special suggestions went out with all sales. Lullabies were suggested for the baby, slam-bang band records for the school-boy, piano records for sister's musical studies, war-time selections for grandfather, old-time melodies for grandmother, and always the choice of the "favorite selection" for all.

"Did the sales of this dealer increase?" asks the Columbia Record. Try it yourself.

DID A LARGE HOLIDAY BUSINESS.

The talking machine department recently opened by the F. G. Smith Piano Co. at 1217 F street, Washington, D. C., is proving a successful venture. It is located on the first floor of the warerooms, and the Victor and Columbia machines and records are represented. W. P. Van Wickle, vice-president of the company, reports having transacted a very large business during the holiday season.

R. L. HOLLINSHEAD TAKES CHARGE.

(Special to The Talking Machine World.)

BUFFALO, N. Y., January 9.—Rubert L. Hollinshead has been appointed manager of the Victrola department of J. N. Adam & Co., the prominent department store in this city. Mr. Hollinshead succeeds H. V. Kautzmann, who has accepted a position with Mason & Risch, Toronto.

ENTHUSIASTIC OVER TRADE OUTLOOK

H. B. McNulty, general sales manager of the Union Specialty & Plating Co., Cleveland, O., manufacturer of the Union phonograph specialties, was a visitor last week to the offices of The Talking Machine World. Mr. McNulty spoke optimistically of the business outlook, being enthusiastic over the rapid strides in popularity that the company's products are making in the East.

LOCAL COMMERCE BUREAU IS LIKED.

Business Men Find It Very Valuable in Getting Information on Foreign Markets.

Much appreciation has been expressed in New York by prominent business men of the action of the Department of Commerce in establishing a branch of the Bureau of Foreign and Domestic Commerce at the local Custom House. This bureau has for some time rendered a great deal of valuable assistance to manufacturers and exporters who have needed information on various foreign markets, and the establishment of the local branch has made this service more rapid, and therefore more valuable.

A great deal of interest has been shown in the manuscript Consular reports shown at the local office, according to George W. Doonan, who is in charge.

"Many manufacturers and merchants have availed themselves of the opportunity to inspect the tenders for bids, plans and specifications which have been sent to this office," he said to a newspaper man this week. "Previous to the opening of the local office these documents were loaned in the order of application, and sometimes a list of forty or fifty firms would be interested in the same thing. As time is the essence of value of much of this material, it can be readily seen that by the time a document had gone the rounds it might be useless to those who received it last.

"Hundreds of applications are being made for the 'reserved information' connected with the foreign trade opportunities service, and almost numberless inquiries have been made for statistics of exports and imports of various foreign markets. Again, foreign tariff rates are often asked for.

"Other branches will be opened in large cities soon, and these offices, it is thought, can be made of the utmost value by making them the local headquarters for American Consular officers visiting the United States and for the bureau's commercial agents returning to this country on the completion of special investigations, for the purpose of conferring with manufacturers and merchants interested in trade conditions in the Consul's district or in the trade made the subject of the commercial agent's special investigation. Recent visits of these men here have proved the value of the scheme, as both the Government officials and the business men have been benefited by the interchanging of ideas and information."

FIRE CAUSES HEAVY LOSS.

Large Stock of Talking Machines and Records Destroyed in Fire Which Guttled Big Department Store of C. T. Sherer, Worcester, Mass.

(Special to The Talking Machine World.)

WORCESTER, MASS., January 3.—The large department store of C. T. Sherer was almost totally destroyed by fire, causing a loss of \$250,000, on the morning of December 21. On the sixth floor of the establishment was a large stock of talking machines and records, and these were made useless. In the lot of goods were 1,000 disc records, which were either burned or smashed to bits. As the store was having a large holiday trade, the fire came at a most inopportune time, especially as the sale of machines and discs had been particularly heavy and much of the stock destroyed was for immediate delivery.

COMPLETE IMPROVEMENTS.

The New York Talking Machine Co., 81 Chambers street, New York, has just completed a number of additional improvements in its sales offices, conducing to the maximum convenience and comfort of its clients. All of these new changes permit of the handling of the company's dealers' requirements at top-notch efficiency.

MR. EDISON SEES MISS KELLER.

Inventor Thinks He Can Give Her Actual Sound Perceptions—Hats Prove Medium.

A meeting, which had been much desired for many years, was arranged between Helen Keller and Thomas A. Edison at the Edison home in Llewellyn Park recently, just before Miss Keller and her teacher, Mrs. Macy, started west to continue a lecture trip. Miss Keller was much interested in all that Mr. Edison told her of recent experiments and inventions.

"Tell me more about your wonderful inventions," she said over and over again.

Mr. Edison showed deep interest in Miss Keller's keenness and delicacy of touch perception. After testing it in various ways he declared his confidence that he could translate sound waves into electrical vibrations, which would give Helen Keller actual sound perceptions.

One method of conveying the vibrations of the disc to Miss Keller on this occasion was by inserting an ordinary derby hat into the horn of the phonograph with the crown of the hat outward. Putting her fingers on the crown of the hat, the vibrations of the music were conveyed to Miss Keller. A silk hat was tried in place of the derby, and still better results were accomplished. The ragtime pieces seemed to afford Miss Keller the most enjoyment, probably because the vibrations were clearer and stronger; band music, also, was very successfully conveyed to her through her fingers on the crown of the hat. At no time, however, can it be said that Miss Keller "heard" the music. What she did get was the vibrations, and the lively pieces were most enjoyed.

Miss Keller and Mrs. Macy will spend a day with Mr. Edison in his laboratories on their return from the West for the purpose of assisting in experiments to this end.

CASE SETTLED OUT OF COURT.

Action Brought by Burton H. Corbett Against President of Boston Talking Machine Co. Settled Out of Court When Near Hearing.

(Special to The Talking Machine World.)

BOSTON, MASS., January 9.—Burton H. Corbett, of Brookline, formerly of Denver, who was mentioned in The World last month as having left here following the financial difficulties of the Boston Talking Machine Co., of which he was manager, brought suit for \$100,000 against Henry M. Whitney, president of the company. Corbett alleged that he entered into a written contract with Whitney on July 31, 1913, to enter the employ of the talking machine company, of which Whitney was president and a large financial owner. He claimed that he was to act as manager, to have control of the factory in Cambridge, and was to receive \$26,000 a year and a percentage. He broke up his business to come here, he claimed, and worked for a few months for the talking machine company. He says he asked Whitney for money and was refused. He alleged Whitney did not pay him in full for the work he did; that he performed his part of the contract, but Whitney did not perform his, and that he was entitled to damages. Twenty-four hours after the announcement of the suit came a statement that an agreement had been reached between the attorneys representing Messrs. Whitney and Corbett. The case, it appears, had been settled out of court.

HANDSOME WALL HANGER.

In order that its dealers might call the attention of the public to the new record catalog it recently issued, the Victor Talking Machine Co. sent out to its trade last week a handsome wall hanger or window display portraying a page from the new catalog.

EDISON PATENTS NEW RECORDS.

New Invention Provides for Hardened Surface for Ordinary Form of Wax Cylinder Records—Some Details of the Process.

Thomas A. Edison has secured and assigned to the New Jersey Patent Co., of West Orange, N. J., a patent for a new method of making phonograph records so that the surface will be harder and present greater resistance to the wear of the reproducing stylus. This invention is especially designed to make it possible to record on the cylinder at the rate of 200 grooves per inch and still have a record that will resist the increased wear satisfactorily.

As is the case with the ordinary cylinder records, Mr. Edison's new invention provides for a record made of wax or other easily molded material, but with the surface especially hardened. In describing the invention in his patent claims Mr. Edison says in part:

"In the practice of my invention I preferably take a duplicate or original phonograph record, which has been made in any of the usual ways from the usual wax-like composition, and immerse it in a solution of nitrated cotton in any of the ordinary solvents used for this purpose, as, for example, acetate of amyl, which is commonly made use of for providing a liquid solution from which films are made for photographic use. I may, if desired, add a small percentage of camphor to the nitrated cotton, thus making a celluloid collodion solution, but this may be dispensed with.

"I place the record upon a dipping mandrel having adjustable extension ends at each end of the record. It is then immersed in the solution while held vertically; it is then withdrawn and subjected to a gentle breeze from a fan—to slightly affect or harden the surface; it is then immersed a second time and subjected to the air. If the solution is rather thick, two such dips will give a sufficient thickness of film over the record when the latter is dried. Sometimes it is best to make the solution thinner, when three or more dips will be necessary. After the dips, the mandrel is transferred to a machine which rotates it in a horizontal position until nearly free from solvent, when it may be taken off the mandrel and set aside until the whole of the solvent has evaporated, leaving a very hard, tough film on the surface of the record.

"It is a remarkable fact, and entirely unexpected, that although the average depth of the indentations on a record is only half of one thousandth of an inch and the greatest depth one thousandth of an inch, yet, if the thickness of the film of the nitro-cellulose when dry is three thousandths of an inch, a perfect replica of the record underneath is produced on the surface of the cellulose above, even

to the finest detail, and what is more strange is that the depth of the wave is so little affected that the loss in the volume of sound is scarcely noticeable.

"Very deep records can be made and the reproducing balls can be pressed with sufficient force against the cellulose as to cause it to follow the record without injury to it, which would be im-

possible if the ball was forced against the record surface below. Thus, the volume and quality of the sound can be increased, and the sound record can be used indefinitely without noticeable deterioration.

"Other film-producing liquids may be used in place of the nitro-cellulose and its solvents, such as acetyl-cellulose in acetic acid."

PROGRESSIVE NEWBURGH DEALERS

Are John Schoonmaker & Son, Who Have Built Up a Splendid Business with the Columbia Line—Excellent Work Accomplished by Manager F. A. Munger—A Model Department.

(Special to The Talking Machine World.)

NEWBURGH, N. Y., January 9.—The accompanying illustration pictures the talking machine department of John Schoonmaker & Son, of this city. It emphasizes the success a department can achieve when high-grade methods are used to exploit the products handled therein. This company,

grade publicity when coupled with products of merit. Mr. Munger has also staged a number of interesting recitals at frequent intervals, which present the Columbia machines and records to the very best possible advantage.

The department itself is a model of quiet and dignified refinement. The color scheme throughout is white enamel, and booths being finished in an attractive style with furnishings and decorations conducive to the comfort and convenience of the store's patrons. Although the Columbia department closed a remarkably good business during the few months it has been open, the sales staff is

John Schoonmaker's Handsome Warerooms and Recital Hall.

which handles the products of the Columbia Graphophone Co. exclusively, has been in the talking machine business only a few months, but in this short space of time has acquired an extensive high-grade clientele for Columbia machines and records that is growing steadily.

The Columbia department of John Schoonmaker & Son, which is one of the largest department stores in this section of the State, is under the able management of F. A. Munger, who is a firm believer in the drawing powers of consistent high-

preparing energetic plans for a proportionately better year in 1914.

George E. Lang, of Barton, Vt., is remodelling his phonograph parlor and has restocked with the new Edison Amberolas.

Frank J. Butler, a live-wire and progressive Victor dealer at Pontiac, Ill., is giving a series of recitals at his store that are attracting music lovers from many near-by towns.

A Happy and Prosperous New Year to All

1913 is of the past, and 1914 is opening up before us. May the New Year bring to all, Happiness, Good Health and Prosperity

To our dealers, through whose patronage our business in 1913 was by far the largest in the history of our company, we extend our heartiest thanks, and we shall, by the constant and never failing effort to improve our service, endeavor to warrant a continuance of this patronage and attract new trade, that we may familiarize them with EASTERN SERVICE and in turn number them among our regular dealers to whom we extend preferred consideration in the times of shortages of goods, which seem unavoidable at certain seasons of the year.

Victor-Victrola

The big opportunity in the music trade.

The Victor-Victrola occupies the most commanding position in the entire musical world. From a purely musical standpoint, the Victor-Victrola is the most wonderful musical achievement of modern times.

And on the business side, the Victor-Victrola has a record of accomplishments which establishes it as the most influential force that ever entered into the music trade.

Around the Victor-Victrola centers the prevailing prosperity of the musical industry—a prosperity reflected in the handsome and luxurious showrooms of to-day; a prosperity that extends right down to the very foundation of the music trade, which it has placed upon a more dignified and more substantial basis.

The Victor-Victrola keeps right on bringing greater opportunities to every dealer, accompanied by profit and prestige greater than ever before.

UNIQUE RECORD ALBUMS

CONTAINING SIX PAGES OF INDEX

For Durability, Artistic Design and Finish, our Albums have no equal. They are made in the most substantial manner by skilled workman, and are first-class in every particular. We sell them at very low prices to meet competition.

DISC RECORD ALBUMS
ARE WHAT EVERY
Talking Machine Owner
MUST NOW HAVE

With the index they make a complete system for filing away all disc Records, and can be added to, Album by Album, as Records accumulate, like books in a library.

OUR SUPERB ALBUMS ARE BEST FOR VICTOR, COLUMBIA AND ALL OTHER TALKING MACHINES

MADE IN TWO SIZES TO FIT ALL 10 AND 12-INCH DISC RECORDS

These Albums contain 17 pockets made of strong fibre paper, each pocket having a hole in the center, as shown in the picture. These pockets are so made that they show very plainly both the single and double face titles on the Records. The Albums are bound in the finest quality of Brown Silk Finish Cloth, with gilt title on front cover. They are also bound in imitation leather. Write for sample and prices of our Albums, which are superior to all others.

LARGE HOLIDAY BUSINESS DONE IN CINCINNATI.

Leading Talking Machine Houses Say That Business for December Was Not Only Large in Volume But That the Demand Was for the Expensive Styles—Some Talk of the Phonograph Co. Engaging in the Retail Business.

(Special to The Talking Machine World.)

CINCINNATI, O., January 9.—The local branch of the Phonograph Co., of Cleveland, which entered the jobbing field here some time since, closed an immense holiday business under the management of F. O. Peterson. The outlook for a large Edison business in this territory is excellent. There is some talk here of the Phonograph Co. conducting a retail department as well as jobbing business, but Mr. Peterson would not discuss the matter.

John Arnold, the well-known dealer, has been handling Edison goods in this territory for years, being the only representative in the business district. Arnold disposed of his entire stock during the holiday rush and had numerous demands for the higher priced Edison instruments. There is no question but what the Edison instrument has made quite an impression in Cincinnati.

Manager Dittrich, of the Victor talking machine department of the Rudolph Wurlitzer Co., summed up the situation of the past month as follows:

"The month of December exceeded our expectations. The amount of business done was limited only by the amount of machines available with which to fill orders. We are very well satisfied, even though we could have increased the volume of sales very materially had we been able to secure sufficient stock to fill orders. The immense sale of Victrolas and other Victor styles has stimulated record business enormously, and provisions will immediately be made to take care of this increase."

Throughout the month of December and up into January business at the local Columbia store was characterized by strenuous hustle and bustle throughout the day and far into the night.

"Business during the holidays," said Manager Whelen, "was unusual, and we closed a larger December business than any previous holiday season in the history of the Cincinnati store, both in records and machines. The stock was practically cleaned out and, had we been able to secure all the stock necessary to supply the tremendous demand, and room to accommodate all the customers, results would have been far in advance of what they were. The new types of Columbia models stimulated this wonderful demand, and the new Grafo-nola 'Leader' lived up to its name. This little \$75 model is certainly a winner, and if we had been able to get in sufficient of this type we could have tripled our sales even in this one type."

"Business was good throughout the wholesale territory, and during the month we enjoyed the visits of many of our large dealers, who came in personally to select their holiday stock. The year as a whole has been a very gratifying one, and we are now ready to pitch in with renewed vigor to make last year's figures loom up small in the distance when the next New Year rolls around."

"F. A. Norris, who has for years been associated with the Adder Machine Co., has just joined the Dictaphone local forces, and in the short time that he has been associated with the Dictaphone has placed some very nice installations."

Advertising Manager Page, of the Aeolian Co., attributes much of the after-Christmas rush, which has been a feature of the holiday week, to money presents given many people who desire to invest it in a substantial manner, which happens to be a talking machine. In speaking of the business at Aeolian Hall he said:

"December business at Aeolian Hall surpassed

all expectations, although much was expected, the installation of new Victrola booths more than doubling Aeolian facilities, being evidence that a large increase was looked for.

"Business was simply enormous, all styles of Victrolas showing the demand. A very large number of Style XVI were disposed of, including many in special finishes."

"The record business was very much in the nature of a landslide. It proved a very difficult matter to get enough dance records to meet the demand."

"The Aeolian Victor force is in splendid shape and includes a number of new faces. The organization has simply had to be increased half a dozen times in the past few months to meet the requirements of the trade."

The Otto Grau Piano Co. is much elated over the success of its Victrola department, which was instituted during the past year. Its stock was cleaned out by the holiday rush.

The Lyric Piano Co., with its larger and better facilities for handling Victor business, did very well during the Christmas season, as did the Milner Musical Co.

KNOWLEDGE OF RECORDS PAYS.

(Special to The Talking Machine World.)

DAVENPORT, IA., January 8.—The John Hoyt Piano Co., of this city, which maintains an attractive Victor department, recently had placed before it an excellent example of the value to be derived from their Victor salesmen carefully studying the Victor catalog.

One of their salesmen, Mr. Pickens, recently closed a sale of a Victrola XVI to a prominent music lover of this city, who requested him to select a list of records, which were to be sent out on approval. Mr. Pickens selected the records carefully, the total list amounting to \$117. It is a tribute to his judgment and knowledge of the Victor record library that not one of these records was returned by the purchaser.

DETROIT TRADE BEAT 1912 RECORD DURING PAST YEAR.

The Gain in Business Reported by the Leading Jobbers and Dealers Runs from 30 Per Cent. to 80 Per Cent. Increase—Greatest Year with the Columbia Co. in Both Machines and Records—Grinnell Bros.' Victor Business Shows Immense Growth—Other News.

(Special to The Talking Machine World.)

DETROIT, MICH., January 8.—The holiday talking machine trade in Detroit lived up to every hope of the most optimistic dealer, and to every indication outlined in this correspondence a month ago. In fact, it went beyond most hopes, for it is still going top speed.

In the regular period, that is, from December 1 the day before Christmas, every dealer communicated with beat his 1912 record, the margins ranging from fifty to more than a hundred per cent. It then, to leave no doubt as to whether business was good, everybody who received a new "talker" for Christmas showed it to a "talkerless friend," who frequently put on his coat and went downtown to gather in one himself. And subsequent to Christmas the demand for records overwhelmed the statistics.

Manager Harry Rupp, of the talking machine department of Grinnell Bros., said: "We beat last year by about 80 per cent." This means much when it is considered that Grinnell Bros. are Victor jobbers, besides having twenty-five Michigan stores of their own, and last December did a holiday business that seemed to be beyond ordinary condition. "The demand was very well distributed all year," continued Mr. Rupp. "The high-priced machines still maintained their good lead, though." Tax Strasburg was as busy as Mr. Rupp. Though, like Mr. Rupp, he has a big force of salesmen, he was out in the floor in person, selling machines. Mr. Strasburg had the advantage of double the space and double the stock he had last year, therefore he did more than double the business. His stock consists almost entirely of high-priced machines.

It was our greatest December and our greatest year," said Manager K. N. Johns, of the Detroit branch of the Columbia Co. "While we were not able to get all the machines we needed, we were

in far better shape than last year, or in 1911. Last year we lost a great deal of business through being unable to fill orders. This year we had to turn down but little. The Saturday preceding Christmas our store was fairly mobbed all day, but we kept pulling the machines out of the stock room, and sent everybody away satisfied. We got them all delivered in time, too.

"A lucky feature of the business was that the demand was more diversified than in the past. That helped in handling the trade. Last year the calls were largely for one style of machine, the \$50 one. This year they wanted everything on the list, from the \$25 machines to the \$200 ones. So we were in fairly good condition all along.

"We sold 50 per cent. more records than in the last holiday season, and the rush is still on. The people of this city have gone dance crazy. The tango, one-step and hesitation are not confined to the public dance hall patrons, as so many people suppose. The best people in Detroit are buying those records in thousands, to dance by in their homes."

The J. L. Hudson store, which four months ago filled all its spare space with Victrolas and Columbias, and hired a wareroom for more of the stock besides, in order to be certain of plenty to meet all demands this winter, achieved its object, but didn't have much remaining on January 1. Even the low-priced ones were cleaned out, though not to Detroiters.

As in the case of the other downtown dealers, trade is still brisk, especially in dance records. Dance records are not the only ones called for, however. Red Seals are in big demand. Apparently few records were sent out with the gift machines of the holidays, and now the recipients are flocking to the stores to spend as much for records as the machines themselves cost. Which, of course, is very pleasing to the merchants.

TALKING MACHINE SUPPLIES MUSIC

At the Annual Christmas Dinner Given the Poor and Homeless of New York by the Bowery Mission—The Victor Was Used.

At the annual Christmas dinner tendered by the Bowery Mission to the poor and homeless of New York City a Victrola XVI played a prominent part, furnishing all the music at this charitable event. The machine and records were furnished by a local Victor dealer, and the music was just as enthusiastically received by the homeless and poor as if it were being played on the operatic or concert stage.

The records furnished by the dealer were comprehensive in their scope, including grand opera, religious, popular and semi-classic. Many of the evening's guests were greatly affected by the music, which was the subject of the heartiest praise.

TALKING MACHINE DEALER FAILS.

John J. Rooney, a dealer in talking machines and photo supplies at 1983 Broadway, New York, filed a petition in bankruptcy, with liabilities of \$5,863 and assets \$4,065, consisting of stock, \$36; cash in bank, \$620, and return on insurance, \$9. Among the creditors are the New York Talking Machine Co., the Blackman Talking Machine Co. and the New York Sporting Goods Co. At a subsequent court hearing J. Newcomb Blackman was appointed receiver, and will continue the business.

VICTOR CO. DISTRIBUTED TURKEYS.

(Special to The Talking Machine World.)

LAMDEN, N. J., January 9.—As has been its practice for some years past the Victor Talking Machine Co. on Christmas Eve presented each of its employes of the company with a turkey and a part of cranberries, 5,700 turkeys being distributed.

HOW TO APPROACH PROSPECTS.

Differentiating Between Cheap Sentimental Types, the Nervous, Sanguine and the Phlegmatic Types of Business Men.

How the salesman should differentiate in his approach between the three temperamental types of men, the nervous, sanguine and phlegmatic, was the subject of a talk given recently to a class in business efficiency and salesmanship in Boston. "The nervous type," said the speaker, "would become impatient if handled in a dilatory or long-winded manner. His brain is active, and every idea you give him will breed a dozen more instantly. It is necessary to make your approach brisk, businesslike and forceful. The sanguine type must be carried along by short, easy stages. Being fond of companionship and comfort, it is necessary for the salesman to interest him along these lines. The phlegmatic type is more difficult to approach, for he lets you talk and listens himself. As he is logical and practical, the salesman must know his goods and all that pertains thereto. "This type of man," says a writer in the New York Times, "will remember the arguments used, and should there be a difference in statements he will remember it and hold it against you, thus making the sale more difficult."

OPERATES PLAYER AND PHONOGRAPH

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 8.—The Aeolian Co., of New York, N. Y., is the owner through assignment by Edwin S. Votey, Summit, N. J., of patent No. 1,082,218 for a Means for Operating Musical Instruments, and which consists of a means for operating two or more musical instruments together, and is particularly designed for the operation of said instruments together in the same musical time and harmony of pitch.

The embodiment of this invention is applied particularly to two musical instruments such for instance as a player-piano and a phonograph or graphophone, driven by means supplied with power from a common source, and comprises means associated with each motor for controlling the speed of the motor, and hence the musical time of the corresponding musical instruments as well as the pitch of one of the instruments. Broadly speaking, this means constitutes or effects in each case a tempo-control for each instrument, but obviously this means may be related or unrelated to the regular tempo-control already provided in connection with each instrument. Preferably the means of control provided are operable independently and separately.

NEW LOCATION FOR CABINET CO.

The C. B. French Cabinet Co., 401 Flushing avenue, has secured a plot of ground at Metropolitan avenue and the Long Island Railroad tracks near Bushwick Junction, Brooklyn, to erect a building for the manufacture of patent telephone booths and cabinets for phonograph concerns.

3 EASY SELLING SPECIALTIES For Edison Machines

EXTRA PROFITS are waiting for you, because every Edison owner can be interested in these attachments. Union No. 1 enables him to play Columbia and Victor records—the Union Modifier enables him to regulate the tone without changing needles—the Union Sound Box is designed to eliminate scratching.

UNION PHONOGRAPH SPECIALTIES

Union No. 1 shown in use with Sound Box in lower corner. Gold plated, \$5; nickel or oxidized, \$4.

TALKING MACHINE SALESMAN'S BOOK OF KNOWLEDGE.

Purchase Scrap Book and Jar of Paste, Mr. Talker Man, and Start an Encyclopedia of Phonograph Information for the Edification and Enlightenment of Your Customers—Some Valuable Hints Worthy of Consideration for the New Year.

There is a salesman attached to the establishment where I buy my records who bears a unique reputation. He is universally conceded to have the greatest store of talker news stored away along with the gray matter in his active brain of any man in town. In addition to the notoriety he enjoys from this source, it aids him tremendously in selling goods.

A great many times have I witnessed customers refusing to be waited upon by any salesman but Frank (his name is Frank), and in the event of his being engaged elsewhere, they would sit themselves patiently down in the showroom and await his return.

There is not a subject of interest in the talking machine world, be it old or new, that Frank cannot talk upon fluently and well. Ask him a question regarding the salary of an artist, the latest march by Sousa, or the color of Ada Jones' eyes, and he will not only answer you correctly, but throw in some entertaining attendant anecdote for good measure.

Such a salesman is most valuable to his employers, and, therefore, capable of commanding a remunerative return for his services.

Why not follow Frank's example, Mr. Dealer, and familiarize yourself with all things phonographic, which at some future time may prove of interest to your patrons? There is not a day goes by that does not bring to you, through the medium of the newspaper or magazine, some bit of information well worthy of a place in your salesman's book of knowledge. For instance, it is most satisfying when a physician calls to inspect a machine, for amusement purposes only, to find yourself in a position to converse technically regarding the effects of different kinds of music upon the sick, and to convince him that not only will the talker

be a source of entertainment and delight to himself and family, but of vast value to him in his practice as well.

Tell him of the views of Dr. Leonard Keene Hirshberg, A.B., M.A., M.D. (Johns Hopkins), upon this subject. "There is no doubt," says Dr.

Why Frank's Services Are Sought.

Hirshberg in the Philadelphia Evening Telegraph, "that music, like other emotion stirring stimulants, plays, at times at least, a fair share in the medical aids that go toward the restoration of health. If the musician's touch is tender, full of emotion and vibrating with sincerity, Beethoven seems to

act as an ideal tonic upon the sick. On the other hand, the current ragtime melodies popular with these same patients when they are well pall upon them and irritate them when sick."

He then speaks of Miss Alice E. Gether, an accomplished pianist, and describes her experience with music as a curative agent in the hospital as follows: "The day she left the institution a request came from a patient, whose recovery a few days before had been very doubtful, to please have her piano moved near her room and to play Schumann's 'Träumerei' for her. This was done, and the patient took a turn for the better and recovered."

When you have told him these things which he did not know, he is not only amazed, but does some hard thinking as well. In the end, instead of selling a single outfit to the man of medicine, you sell several to his hospitals also. You have, through the agency of your book of knowledge, opened up a new field, and that, of course, means more business and greater financial returns.

Now that the medical fraternity in its relation to the talking machine industry has been sufficiently touched upon, we will turn another page of our scrap-book.

* * * *

A cylinder record was playing softly, the melody floating through the grill of the Amberola with dreamy sweetness. "When It's Apple Blossom Time in Normandy," sang the artist, his golden tenor soaring high above the querulous voices of two angry customers. I like that song immensely, so I paused to listen.

"That's Irving Gillette singing, I tell you!" declared one of the irate patrons, positively.

"You're wrong!" snapped the other fiercely. "Don't you suppose I know a voice when I hear it? I want you to understand, sir, that I have been an authority on singing for twenty-five years, and, furthermore, I have a dozen disc records in my cabinet at home this very minute with that voice on them."

Then, glaring belligerently at his opponent, he snarled, "If that isn't Henry Burr's tenor on that record, By Gad! I'll eat it."

"If my eyes do not deceive me, brother, you have a tough meal before you. The name of Irving Gillette is stamped upon the box lid."

"I don't give a —!"

"What is the difficulty, gentlemen?" interrupted the salesman (our friend Frank) arriving with a tray of best sellers.

"Difficulty enough!" roared the debaters in unison. "This man"—each glaring at the other—"don't know a voice when he hears it!"

"Irving Gillette for the Edison, Henry Burr for the Columbia and Victor, and Harry H. McClaskey in private life," explained Frank succinctly. Both were right—war was averted.

From interesting a professional man, by a chat with him in his own language, to settling an argument as to the identity of a singer, is a far cry, but your scrap-book of talker facts will enable you to do either equally well.

Oh, there is no doubt, Mr. Dealer, about this book of knowledge idea being a trade bringer.

Just a bit of advice in conclusion: When your next customer calls to hear a certain record, surprise and delight him by indulging in a brief resumé of the artist's life; or, if you prefer, speak of a memorable incident in connection with the composer of the selection.

Your patron will be most appreciative and delighted because, through your courteous explanations, he is able to add very materially to the enjoyment he has previously derived from his instrument.

He will speak of you to his friends as an authority upon everything in talkerdom. He will tell them also of the pamphlet of artists' biographies, meaty kernels of news, and valuable hints, he is compiling with your able assistance, and suggest that they come and do likewise. Why, if every talking machine man in the country would cultivate the fine art of entertainingly instructing his customers regarding the many subsidiaries of the talker, the industry would enjoy a greatly enhanced prosperity. Do you not agree with me?

HOWARD TAYLOR MIDDLETON.

Won't You Have a Lesson in Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

International Correspondence Schools

Box 918, Scranton, Pa.

1913 was a great year for Columbia Double-Disc Records—the greatest we ever had. 1914 will be twice as great. That much we can already see coming. Watch it. But watch it from the inside looking out, not from the outside looking in.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

SOME NEWSPAPER MISSTATEMENTS SET RIGHT.

Recent Report of Suit of American Graphophone Co. Against the Parlograph Co. Led to Some Statements Being Made That Are Misleading—Statement from the Counsel of the American Graphophone Co. Is Important and Informative in This Connection.

The talking machine industry was greatly interested in the published account of a dictating machine lawsuit which appeared in the New York Sun recently, wherein the American Graphophone Co., manufacturer of the Dictaphone, asked for an injunction against the American Parlograph Co., manufacturer of the "Parlograph," another dictating machine of foreign manufacture. This injunction was denied, as the American Graphophone Co. had expected, but in publishing the account of the trial the Sun apparently made some deductions which were not based on the facts at issue.

The headings of the story, prominently displayed in usual newspaper style, in bold-face capital letters, read: "Bars to foreign phonographs down—Dictaphone makers lose suit to keep out German 'Parlograph'—Edison patents expired—Open field for devices and records is expected to cut prices."

The remainder of the article under the above startling headings read:

Through the denial by District Court Justice Holt, an application by the American Graphophone Co., manufacturers of the dictaphone, for an injunction to restrain the importation and sale of a German machine known as the parlograph on the ground of patent infringements, it became known that the American field is now open to foreign talking machines.

The decision is said to form the opening wedge for the importation of all foreign talking machines and records, and means an eventual cut in the price of both business and musical phonographs.

The decision is said to be the first in which the American manufacturers have failed to keep foreign machines out.

The defendant was the American Parlograph Co., of 2 Rector street, American agents for the Carl Lindstrom Co. of Berlin, who were warned before the suit that the parlograph was an infringement. The defendant referred the matter to its attorneys, Cabell & Gilpin, of 11 Wall street, and made contract to sell 1,000 machines. Then the suit was brought.

The American Graphophone Co., through its attorneys, Mauro, Careron, Lewis & Massie, alleged that the defendant's machine infringed on a patent of Thomas H. Macdonald, of Bridgeport, Conn., and upon patents of John H. J. Haines and Elam Gilbert. In the argument the plaintiff relied solely upon the Macdonald patent.

Shelton F. Cameron, a patent lawyer, of counsel for the plaintiff, said in an affidavit that he has made a specialty of the art of producing sounds, and that he found in the parlograph every feature claimed by the Macdonald patent.

Edward D. Easton, president of the American Graphophone Co., and the Columbia Graphophone Co., said that for years prior to 1896 his company was in litigation with the Edison companies. In 1896 this was settled and contracts entered into which are still in force, under which each agreed to keep to its type of machine.

The answer of the defendant said that the alleged invention was used by Edison and many others before it was patented by Macdonald, and that the letters patent didn't describe an invention but a "mechanical expedient."

The defendant also alleges that the contract between the American Graphophone Co. and the Edison Phonograph Co. is in violation of the Sherman anti-trust law.

Philip Mason Cabell, president of the defendant company, said that it is a matter of common knowledge that the graphophone was invented by Edison in 1880, and that his patents have long since expired. He said that other machines merely differ from the Edison machine in mechanical structure, and that so far as the principle is concerned America is an open market.

Judge Holt denied the application for the injunction without writing an opinion.

When seen by a representative of The Talking Machine World, C. A. L. Massie, of the firm of Mauro, Cameron, Lewis & Massie, counsel to the American Graphophone Co., stated that the newspaper account was somewhat overdrawn, and dictated the following statement in order that the

trade might be properly informed regarding the true status of the points of law at issue:

"BARS TO FOREIGN PHONOGRAPHS NOT DOWN."

"The American field has not yet been opened for invasion by foreign talking machines. The American Graphophone Co. has recently brought suit against a German dictation machine known as the 'Parlograph,' as an infringement of no less than five different United States patents. This suit has nothing to do with disc machines, or with 'records' of any kind, or with musical machines.

"The suit will be prosecuted vigorously, in the usual manner; and is expected to result in a permanent injunction, and the defendant will have to account to the Graphophone Co. and pay over to the latter its own profits and also the damages resulting from the infringement. Under the law the Graphophone Co. can also proceed against every user of the infringing machines.

"With one exception, these five patents have many years to run. The Macdonald 'overhanging mandrel' patent, however, will expire in the coming spring. For that reason, and also because of the long public acquiescence in the validity of that patent, the Graphophone Co. ventured to seek a 'preliminary injunction' in advance of the trial—even though there has been no 'prior adjudication' in favor of that patent. All five of these patents have hitherto been respected, so that the Graphophone Co. has not heretofore been called on to bring suit to enforce them; and consequently there has been no 'prior adjudication' concerning any of these particular patents.

"Ordinarily, the Federal Courts refuse preliminary injunction upon a patent that has not already been sustained by some prior adjudication. Of course, there was no ground for asking preliminary injunction upon any of the other four patents sued on; yet the Graphophone Co. had hoped that the court might decide to grant preliminary injunction under the Macdonald patent, which expires so shortly.

"However, this case proved no exception to the general rule, United States Judge Holt handing down a memorandum decision which reads: 'I think that the case made on these papers is not so clear and decisive as to justify a preliminary injunction under the practice in patent cases. Motion denied.'

"Judge Holt's decision is in line with the usual reluctance of the Federal Courts to grant preliminary injunction before trial, and does not in any wise effect the merits of the controversy or foreshadow the outcome of the suit."

"The twentieth century was born without a memory—it's so busy with to-day's achievements and to-morrow's projects that no one has time to remember yesterday's exploits."

HISLOP CO. SECURES EDISON LINE.

(Special to The Talking Machine World.)

NEW LONDON, CONN., January 8.—The agency for the Edison disc phonograph has been placed by J. W. Scott, representative of Thomas A. Scott, Inc., with the James Hislop Co., for this city and vicinity. A large initial order was placed. Much interest has been manifested in the Edison disc, owing to the recital given by Mr. Scott in the lobby of the Mohican Hotel last Sunday afternoon. This is the first time that the Hislop company has handled musical instruments, and it is making the public acquainted with its plans in imposing announcements in the local newspapers.

SECURE EDISON DISC AGENCY.

(Special to The Talking Machine World.)

NORWICH, CONN., January 8.—The Porteous & Mitchell Co. has secured the exclusive agency for the Edison disc phonograph in this city and vicinity, and a full line of these instruments are now being displayed in the company's handsome new musical department. In connection with the opening some striking advertisements were carried.

Long Distance Telephones—Numbers 5982-5983 Madison Sq.
 Cable Address: "Elbill," New York.

NEW YORK, JANUARY 15, 1914.

AT the beginning of the year most of us are apt to indulge in a little retrospective and prospective thought, and it is the aim of every business man to remedy certain policies which have been pursued in the past which have not proven their usefulness in a business sense.

What policy can be best adopted to make the talking machine business better for 1914?

Have our practices and methods been thoroughly up-to-date?

Are there any weaknesses which are discoverable when we analyze our various policies and systems?

These and other queries along similar lines will be considered by talking machine men everywhere.

The industry has great possibilities and are we all making the most of them? That is the question!

That the present position of the talking machine has advanced commercially, artistically and nationally, cannot be too strongly emphasized, for this broadening out in every department of life means greater expansion of business for those whose financial interests are interlocked with the industry.

The growing importance of the talking machine everywhere makes necessarily for the business advance of the men who are interested in disposing of these popular creations.

Sometimes we feel that some of the talking machine dealers throughout the country do not realize the importance of the product which they sell as an educational and instructive factor.

For quite a period a large proportion of our population viewed the talking machine as a product the existence of which would be ephemeral. They did not take it seriously, but all that is changed. Artists internationally famous, in both the vocal and instrumental field, are now being heard through the aid of the talking machine in the homes of people who never without its mediumship would have become acquainted with good music.

IT means the best in music has been carried from the concert stage to the parlor, and that our great singers and instrumentalists and our great orchestral organizations are now heard in every home, thus aiding the musical education of the people; helping to a keener appreciation of good music, and teaching them how to enjoy music in the home in a manner never before possible.

Then, if we consider the manufacturing department, it must be admitted that the output has been vastly increased, for year by year the manufacturing facilities have been greatly augmented. In fact, the increase in the manufacturing department has been as rapid as we could reasonably expect.

It is impossible to create a great factory over night, and when

we view the great plants, limited in number, but vast in space, it must be admitted that the manufacturers of talking machines have made every reasonable provision to take care of their trade with promptness and despatch. But notwithstanding these great plants involving the outlay of vast capital, they have been unable to keep up with the demand because by the aid of advertising running into colossal figures, the public has been more and more educated to the possibilities of the talking machine, its entertaining powers and its value as a home entertainer. Hence, the demand has been increased in a phenomenal manner.

THEN another point which is of vital importance is the stability which has surrounded the trade through price maintenance.

Every man in the talking machine trade has had the advantage of nationally advertised products and has had a price protection which has been of infinite value. A condition of price cutting and business disturbances have thus been happily and wisely avoided. And yet notwithstanding these unusual conditions of strength and stability there are retailers who, by their public exploitation, are doing things which would seem to us are not warranted by the conditions which surround the talking machine industry.

Take, for instance, a public exploitation in which talking machines are offered on terms which are not in accordance with sound business methods, and which seem to us to be superfluous and un-called for.

According to the advertising announcements of a department store, one dollar will place a \$15 machine and \$9 worth of records in the homes of purchasers. Future payments can be made at the rate of fifty cents.

A \$5 payment will place a \$100 machine and \$10 worth of records in the home of the user, and a \$10 note puts a \$200 machine and \$10 worth of records in the same place.

Do not merchants who sell on such a basis strike a blow at the stability of the business everywhere? Why pay cash, even if you have it, when such terms are thrust at you?

The men who put out pianos at nothing down and a dollar a week have long ago become convinced of the ruinous pace they were traveling, and the talking machine business which has to-day but three producing houses and no such competition as exists in the piano industry, yet some of the merchants deliberately violate all rules of business soundness in their evident anxiety to do business.

We should bear in mind, too, the fact that such offerings affect the entire trade. They establish a standard of selling terms which is liable to be put up to talking machine men in every city and every hamlet throughout the land.

What in the name of common sense, when there are not enough goods to go around, is the use of offering a man a machine worth \$200 and \$10 worth of records for a ten dollar note?

The buyer can use the machine a month with the records and then return it. The returned machines are sold again as new. Is this right?

What is the machine but a used product, and how much are the records depreciated?

Furthermore, does anyone believe for a moment that there are not many people who would take advantage of such terms who do not, at the time they order the machine, expect to keep it beyond a very limited time?

Again the advertisers deliberately turn a cash business from their own establishments by such offerings.

Why should a man pay cash for a talking machine when he can get one for a few dollars per month? Why not run over a period of a couple of years in his payments when it costs him no more?

Such advertising hurts in more ways than one, for it creates a long time small payment credit business out of what otherwise might prove a near cash transaction, and it tells the man who has the cash that he need not pay it save in homeopathic doses over a long period. Is that good business?

What is the advantage of offering a hundred dollar machine for \$5 a month and a bunch of records included?

Under those conditions the purchaser who desired to have a talking machine in his home during the holidays, could secure a good machine and a few records before Christmas, and after a month's use decide that he does not desire the machine, return it with the records, and gets his money back. Can you beat it? Not very well—machine, records, music for a month at no cost.

Now, does anyone for a moment doubt that there are not plenty of people who will abuse such generosity.

The bait is too good—too alluring—and many will snap at it because it has been put forth by department stores of reputation and standing.

Is there any reason why talking machines should be offered on such terms?

THEN, again, what becomes of the used machines under such conditions? Surely reverts are put out again and are they not sold as new machines? And the records, too, may be badly damaged.

This kind of appetite whetting advertising is a greater disturbing factor than many think at the first blush.

The great metropolitan papers containing notices of such allurements reach the smaller towns, and possible customers go into the talking machine merchants and show them the advertisements put forth by the department stores and ask the local men why they cannot do as well as they in terms. Then they follow up with the threat that they will do their buying outside of town if the small merchants cannot meet competition regarding terms as well as prices.

What is the result?

The dealers in the small town have to use some convincing line of arguments, or they have to make concessions which they would not be compelled to do in order to close sales.

Now, this unsatisfactory and unwholesome condition is needed, because there is no industry in the world that is as well protected, as well fortified in every way, affording ample protection to the jobber and retailer as the talking machine business. Yet, here are some houses that deliberately jump in, and while they do not flaunt low prices, they annihilate sound business principles by offering allurements which are not justified under the existing conditions.

THEY help to create a condition which makes it harder for the small merchants to do business than before, and up to the present time one of the splendid advantages of the talking machine business is the fact that it afforded the small man—the man with limited capital—an opportunity to do business on equal grounds with the big house controlling millions.

That has only been possible by fixed prices, and now some of the houses which are handling talking machines are endeavoring to increase their business by offering inducements of a nature which are merely must be unprofitable for themselves, and which will have a reflex effect upon the entire trade.

Is there any profit in giving a man a \$100 talking machine with 100 worth of records for a month for a five dollar note? There is no profit in the salesman's time, the cartage both ways, the pro rata selling costs and simply a gamble on the man's keeping it, and even if he does, why is it necessary to emphasize too long a period in which the talking machine instalments may run?

Why harp upon the long selling time when there are not enough talking machines to go around to-day?

THERE are some business moves which we fail to understand even though they may be put forth by great and successful houses.

We see no reason why the selling time should be extended under conditions which are contrary to sound business principles.

Such methods are not in harmony with the principles which have protected the trade through the enforcement of rules holding the price maintenance to a point of unyielding rigidity.

Talking machines are profitable to handle and the retail purchaser secures excellent value. In other words, it is a perfectly fair arrangement all around, and it is absurd to offer a kind of bait to purchasers which creates the impression that talking machines may be purchased at any kind of prices and terms.

It injures the business in that it creates the impression in the minds of readers of the advertisements that talking machines can be purchased on almost any terms and conditions. Therefore, the impression would then be formed that the prices at which the machines are sold afford unusually large profits to the retailer, else such allurements would not be made. This is creating a false impression.

TALKING machines should not be handled as a baiting piece of merchandise, and the impression should not be created that one house can violate legitimate merchandising conditions in order to attract customers to its establishment, with perhaps the hope that the customer will be impressed with the ability of the house to supply cut rates on some other lines of merchandise than those advertised.

It may be urged that such advertisements injure no one, but in our opinion they injure the entire trade and they impose a heavier burden upon dealers everywhere to meet such unbusinesslike offerings. The talking machine business is a wonderful industry, and the men whose interests lie therein should not, through alluring price offerings, aid to introduce a baiting element which may work out disastrously to the entire trade. There can be no annihilation of selling terms without the entire trade feeling the effects of such a move.

A PARTICULARLY interesting endorsement of the position, as an amusement and education factor, now reached by the talking machine is that contained in the recent announcement of an extra allowance of \$82,500 granted for army post exchanges by Congress at the instance of Secretary of War Garrison. The amount as divided will provide a fund of \$1,245 for each army chaplain with which he is expected to obtain a talking machine and a suitable supply of records, a motion picture machine with slides and films and a tent with adequate seating facilities in which to give entertainments for the amusements and benefit of the enlisted men.

The fact that the appropriation will result in the purchase of sixty or more machines with several hundred records, is not so important to the trade at large as the fact that Congress, through the influence of the Secretary of War, displayed its appreciation of the value of the talking and motion-picture machines as a means of making the lot of the enlisted soldier more pleasant, to the extent of making a generous appropriation for the purchase and maintenance of such equipment.

Recognition by the Federal government of the value of the talking machine as a means of entertainment for soldiers is a tribute that should prove a sales-producing argument at the hands of the wide-awake dealer, for Uncle Sam, in buying supplies, doesn't bother with experiments, but demands goods of accepted worth and quality, whether it is a matter of blankets or amusement devices. The adoption of talking machines by the army is just another indication of the rise of the talking machine from the point where it was a novelty of the freak order and the butt of humorists to its present forward position in the field of music.

Through the medium of the talking machines the enlisted men can listen to their favorite selections, whether grand opera or rag-time, and when the men at one post after months of use become tired of their stock of records they can be exchanged for those of another post until the records are worn out. With talking machines in public institutions of all kinds, schools, colleges, army posts, etc., and in hundreds of homes throughout the country the energetic advertising and sales campaigns have surely brought results.

IT is better to prevent credit evil than to attempt the remedy after the evil is done, so declares Edward S. Mills, who at one time managed the adjustment bureau of the Philadelphia Association of Credit Men, who says further that the chief reason for tardiness by merchants in the payment of their bills may be found in a "lack of business ability and management," and therefore it is of the highest importance for the credit man to keep in close touch with his tardy accounts and make it his business to educate them and warn them against their mistakes.

"In this way," Mr. Mills adds, "slow accounts can often be developed into very profitable ones, and the credit man who considers his duty done when he simply passes upon an account and then tries to get his money out of it has no proper conception of the credit man's sphere, for he should make it his interest to find the flaw in his customer's business." He cites one house that looked upon this as a matter of such importance that it had a force of trained men whose duty it was to call upon its customers in order to show them how to take and keep track of stock and accounts and how to supervise their business generally, and this concern had been instrumental in saving and making profitable businesses out of what otherwise would have been failures.

Better Value than Other Albums by Reason of Superior Quality

Our Albums are bound **correctly** by expert hands. **Envelope pockets** are constructed of very tough **Dark Green Fibre** paper. Albums are bound in best **Mahogany Imitation** leather, gilt stamping on face and leather or gold-plated ring pulls as desired. Made for 10 and 12 inch discs. Write for sample and prices, which will convince you, as they have all our other customers, of the superior quality and value of our albums.

These albums are constructed with a view to **Strength**, so that they will really hold the **full** complement of discs, and give excellent service.

OPTIMISM IN THE TWIN CITIES.

A Great Holiday Business Transacted by the Talking Machine Houses and the Percentages of Increase Given Out Would Seem Extravagant Were They Not Supported by Irrefutable Testimony.

(Special to The Talking Machine World.)

MINNEAPOLIS AND ST. PAUL, January 6.—If ever the talking machine and phonograph dealers of the Twin Cities lived in clover it was in the holidays and the contiguous days fore and aft. Some of the statements handed out to your correspondent in his merry round read extravagant like, but there is no question but that they were in clover, head high and luxuriant. The extent of the business was limited only by the ability to obtain goods.

"We lost many retail sales and many local orders because we could not supply the goods," remarked W. J. Dyer, head of the big house which bears his name and an extensive jobber in Victor products. "Of course, it is much better to clean out your stock and make ready for new goods than to carry a big line over the season, but it is aggravating to be compelled to refuse actual money. Some day, probably, we will have stock enough to meet the demands, but I imagine that just for the present the talking machine trade is growing so rapidly that the manufacturers are unable to keep the production up to the pace of the demand. We will continue our Victrola and Pianola recitals every Friday night, as these have become a regular musical institution in St. Paul and draw large numbers each week."

"Nearly 300 per cent. increase" is the comparison made by the Minnesota Phonograph Co. between December, 1913, and the previous December. "Had we taken in \$1,000 more," explained Laurence H. Lucker, manager, "we would just have trebled the business. We received six carloads of Edison instruments just before Christmas and one carload after, and nearly everything has gone and we are about a hundred machines behind in our orders. Much of the business was high grade. We sold

one \$400 and one \$450 Edison way out in North Dakota, which serves to illustrate how the fame of the Edison instruments is spreading."

At the Columbia headquarters in Minneapolis Jay H. Wheeler, manager, still was so busy that he did not have time to stop and talk about the business, but in this case no news doubtless means good news.

Archie Matheis, of the Talking Machine Co., has not recovered from the holiday rush, and still is hustling, but halted long enough to announce that his December trade was greater by 150 per cent. than during the previous December and, of course, he is pleased. Mr. Matheis handles both Victors and Edisons.

Foster & Waldo, who have been pushing their Victor department with much energy of late, have reaped a rich harvest therefrom, and are highly pleased that they have done so, as the sales in recent weeks have been tremendous.

One of the handsomest display windows in either city during the holidays was that of the Columbia store in St. Paul, which was arranged by C. P. Herdman, manager. It contained types of seven machines, from \$25 to \$275, with a decorative arrangement of holly, smilax and palms. After a big rush of trade there was not a \$75 or a \$100 machine in the house, only one \$150 machine, not a single mahogany type except two at \$250, and that is being cleaned out right.

VICTOR PUBLICITY FOR JANUARY.

The Victor Talking Machine Co. sent out to its dealers late last month its usual batch of valuable literature to assist them in developing January business. Proofs of the advertisements to be used by the company in the newspapers throughout the country, record hangers, and the customary proofs of magazine advertisements for January were included in the batch. The proof of the company double page spread in the Saturday Evening Post of January 17, shows an advertisement of exceptional merit and beauty.

The maintenance in popularity of the tango and

the ability of the Victrola to adequately cater to the demand for this type of record, is referred to particularly in the letters accompanying the new Victor publicity, together with the suggestion that the vast amount of new machines sold during the Christmas season opens a new market for the sale of additional Victor records.

MOVING PICTURE SLIDES.

In Connection with New Advertising Record Issued by Columbia Co. an Aid to Dealers.

In order that Columbia dealers may reap the full benefit of the value of the new advertising record recently issued by the Columbia Grapho-

phone Co., a number of publicity stunts have been introduced by the company's advertising department during the past few weeks. Live-wire pamphlets, car cards and moving picture slides have all been among the recent publicity presented by the company for the attention of Columbia dealers. One of the important helps offered is the motion picture slide shown in the accompanying illustration. This slide is meeting with success wherever it is introduced, and dealers throughout the country are ordering it.

AT THOS. A. EDISON'S OLD HOME.

Mrs. Ilsen Takes New Disc Phonograph to Old Edison Homestead in Milan, O., and Gives Concert for Benefit of Mr. Edison's Cousin "Twinsy," Who Tells of "Alvie's" Boyhood.

(Special to The Talking Machine World.)

CLEVELAND, O., January 8.—From the depths of a massive Edison disc phonograph, looming out of all proportion in a tiny "6 by 7" bedroom, floated the beautiful old "heart song," carrying with it the rare, gripping sentiment of a lifetime.

For the little bedroom, in the unpretentious old-fashioned cottage at Milan, O., was the room where the greatest mechanical and electrical genius of all time, Thomas A. Edison, first saw the light of day 66 years ago.

And just outside in the front parlor—the huge mahogany cabinet filled the bedroom—the "old folks" listened, with heads almost reverently bowed, to the most perfect reproduction of the human voice obtainable—the result of 35 years' unceasing study by the "big-headed boy" they all knew so well.

Memories Bring Tears.

The last strains died away. The old home "where the old folks stay" was silent. Then the lovable, white-haired cousin of the wizard inventor, Mrs. Nancy Elizabeth Wadsworth, named by Edison's mother and nicknamed by Edison himself "Cousin Twinsy," broke the awed hush.

"It's too wonderful, isn't it?" she asked appealingly. "He's just the same little Alvie to me; I can't think of him as the mighty, wonderful man the world sees."

And throughout the long, wonderful day, Thursday, when "Alvie" came back to the "old home" through the medium of his talking machine, the eighty-year-old boyhood confidante of the twentieth century's superman just marveled and voiced her pride in her wonderful boy.

Mrs. Isa Maud Ilsen, the first woman ever to represent Edison, who has been giving recitals in Cleveland to demonstrate the new Edison diamond-disc phonograph—probably the inventor's greatest achievement—conceived the idea of taking the beautiful product of his brain into his boyhood home in Milan.

So Milan and the home folk enjoyed a red letter day in history—and, most of all, "Cousin Twinsy," whose pretty ringlets of gray hair fell occasionally over the eyes that never lost their prideful glow.

"Oh, you've forgotten the horn," Mrs. Wadsworth exclaimed when the phonograph had been unpacked. The explanation that the horn was ingeniously concealed left the aged woman mystified at the wonders wrought from her Alvie's abnormally large head.

Tries to Hatch Goose Egg.

"Of course, I never dreamed Alvie would be such a great man, but I always knew he'd succeed," related Mrs. Wadsworth joyously.

"The day his father went out on that green hill over there and pulled him off a stump where he'd turned purple with cold while he was sitting on a goose egg to hatch it, I said it showed he was thinking of things.

"But I was young and Alvie got a whipping just the same.

"However, when Alvie took a boy, who lived in that house across the road, and filled him all full up with seidlitz powders to make him fly, I almost believed what his teacher said about him being addled.

"Oh, how I wish Samuel—that's his father—could have lived long enough to see how high Alvie's gone in the world—doing things for humanity. Alvie's pa always said 'his head's too big.' Alvie did have a large head, the largest I ever saw on a boy of his age."

Several of the old songs restored her youthful pertness. First, she examined the great instrument standing in Alvie's room.

Makes Good Early Promise.

"Alvie once said to me: 'I'll make iron and wood talk some day, Twinsy,'" Mrs. Wadsworth remarked suddenly, arousing from a reverie of retrospection.

"He's done more than keep his word, hasn't he? It seems as though he must have been living for centuries to do all he has—but I keep seeing the little boy I put to bed."

The cottage proved far too small to house the old friends and neighbors, so sentiment had to be waived a little, and the library secured for an evening recital.

Two hundred of the 700 population appeared on two hours' notice. Twinsy and her daughter Metta were both there.

"To think I used to pull his hair and stick my tongue out at him," gasped a "girl" of seventy-five, Mrs. A. J. Barney. Memories and anecdotes of Edison were murmured admiringly.

BUILDS UP LARGE VICTOR TRADE.

Wm. K. Kaplan & Co., Jamaica, N. Y., One of the Most Successful Talking Machine Houses in Vicinity of New York.

One of the most successful of the talking machine houses in Queens County, N. Y., which constitutes one of the boroughs of Greater New York, is that of William K. Kaplan & Co., 316 Fulton street, Jamaica, who in summing up the business of the company for the months of November and December, just past, state that it shows an increase of nearly 100 per cent. over that of the same period of 1912, and the quality of the business is also a most pleasing factor, the higher priced machines and records being in greatest demand.

In order to take care of its growing business the company has just completed the remodeling of the rear section of its store for the purpose of making room for extra demonstration booths for the Victrolas. An entire new lighting system has also been installed. In addition to Victrolas, W. K. Kaplan & Co. also handle pianos and player-pianos with much success.

ANALYZING INITIATIVE.

Initiative consists of doing on the spot without being told and without complaining what the other fellow never thought of doing—and didn't do when he was told.

HEAVY TRADE IN INDIANAPOLIS.

Christmas Business Surpasses All Previous Records—Stores Handle Profitable Saturday Night Trade—Columbia Co. Stock Cleaned Out Temporarily—News of the Month.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., January 7.—Christmas trade in the talking machine business here exceeded all expectations of the dealers, who assert that the holiday trade of 1913 was nearly twice as heavy as the Christmas trade of 1912. Talking machines and records were scarce articles around the stores when the doors closed on Christmas Eve.

The Columbia Graphophone Co.'s local branch thought for a while that a number of customers were to be disappointed, but at the last moment the express company came along with twenty-eight extra machines and thus saved the day.

The Stewart Talking Machine Co., Victor distributors in Indiana, had the best Christmas trade in the history of the house. W. S. Barringer, manager of the company, worked day and night in handling the large volume of business. The company's warerooms were emptied by the onslaught of Victor buyers.

The talking machine department of the Aeolian Co.'s branch also had a huge Christmas trade. Victor machines by the carload were shipped in for the Aeolian Co.

The Kipp-Link Co., the energetic distributors for the Edison machines, also experienced gratifying sales, especially of the new Edison disc machines and records.

Most of the stores are still closing at 6 o'clock on Saturday evenings, but the Columbia Graphophone Co. and the Kipp-Link Co. say the public just won't let them close up before 9 p. m. Saturday. Apparently, there is a large class of talking machine owners who like to come downtown Saturday night and buy records for the next week. The volume of business done by the talking machine stores which keep open is surprising. The managers of the stores would prefer to close up, arguing that the stores would get the business anyway, but the machine owners demand service on Saturday night.

Records are scarce in the Columbia Graphophone Co.'s store, and the getting of more records is the problem which is bothering the management. While the writer stood in the store Saturday afternoon the salesman had to say again and again, "We're sorry, but we are out of that number." The popular records simply can't be kept in stock at all times. The patrons of the store, however, appeared to realize that the store was not to blame, and would promise to return in a few days when a new shipment would arrive. "My Skylark Love," by Denni; "Marriage Market," by Jacob; "Mad Scene from Lucia, and Caprice Viennois, by Ysaye, are among the records which are hard to keep in stock.

Advertising is nearly fool-proof. No persistent advertising of an article of merit has ever failed in the United States.

YOUR CHRISTMAS SALES

were, to a large extent, made up of the smaller machines.

BEST MONTH IN TWENTY-TWO YEARS

Says Manager Dennison of Baltimore Branch of Columbia Graphophone Co. When Talking About Business for December—His Statement Coincides with the Views of the Leading Talking Machine Men in That City.

(Special to The Talking Machine World.)

BALTIMORE, Md., January 10.—"December is the best month we have had for twenty-two years." In those words which appear on a little blackboard beside the desk of Manager F. A. Dennison, of the local branch of the Columbia Graphophone Co., tell very plainly just what happened in a business way at this store during the days preceding the holidays. Manager Dennison keeps posted the business results right along on this board, and when these words appeared, the sales force felt very jubilant. This statement means a great deal for statistics show that the month of December of every year has been the banner month, while it so happened during several months of the year just closed that the figures even surpassed those for December, 1912. Mr. Dennison is not letting a matter of this kind bother him, however, for he is keeping right after the buyers, and declares that he is going to make 1914 go ahead of everything else.

With regard to the Victor line, Manager W. C. Roberts, of E. F. Droop & Sons Co., makes very elaborate reports. These instruments proved great sellers during the holidays, while the run on the latest records was extremely heavy. Figures at this store show the December business to have passed the sales for any previous month and this is going some, for the reports right along have been of the most encouraging character. This firm has put in two handsome soundproof rooms which have added to the attraction of the store and enabled the firm to better handle the customers.

The Peabody Piano Co. is also making rapid strides with the Columbia line. The firm has been in the talking machine business a comparatively short while, but they are going forward with a rush. They had a big December showing.

The Sanders & Stayman Co., Inc., also had a fine showing with the Victor and Columbia lines which they handle.

Hammann & Levin have put in two new soundproof booths for the benefit of customers for Victor talking machines which they handle.

THE FIBRE NEEDLE MASTERPHONE.

Latest Improvement Introduced by the Masterphone Corporation Is a Device for the Use of the Fibre Needle Which Is Highly Spoken of by Those Who Have Had the Privilege of Hearing It—Now Ready for the Market.

"We sold over 5,000 Masterphones within two months after it was introduced to the trade," states Matthew B. Claussen, president of the Masterphone Corporation, 187 Broadway, New York, manufacturers of the Masterphone, the popular clarifier for talking machines. "I am pleased to say that our device was a pronounced success from the very first announcement we made to the talking machine dealers throughout the country, as evidenced by the fact that we have on our books at the present time, the names of 500 aggressive dealers handling the Masterphone, with our clientele increasing every day.

"From the standpoint of the consumer, the Masterphone has evidently filled a long-felt want, as we have in our files nearly a thousand unsolicited testimonials from talking machine owners relative to the perfect satisfaction that our device is giving them, and the enjoyment they are deriving from its use.

"The emphatic success of our original Masterphone has prompted us to perfect another device which will be designated as the fibre-needle Masterphone, utilizing, as its name implies, a fibre needle, instead of a steel one. This latest Masterphone is now perfected, and we are preparing to fill the orders of a long list of dealers who have been awaiting the introduction of a fibre-needle clarifier.

"Our fibre-needle Masterphone represents a perfected clarifier that in our opinion and in the

opinions of a number of operatic artists who have heard it demonstrated, is the greatest aid to the proper enjoyment of a talking machine record that has ever been announced. We have demonstrated our fibre-needle device before several operatic artists now appearing in New York, who were enthusiastic over the clear and natural sound of their own selections.

"The basic principle of the fibre-needle Masterphone is the same as the original device with certain necessary changes. It consists of a triangular ball-socket arrangement in the Masterphone disc which corresponds of course with the shape of the needle employed, the point of the needle going through, and extending about a quarter of an inch. The volume of the fibre-needle is doubled by the use of the Masterphone, the sound is accurate, clear and distinct, and through the use of the Masterphone disc, each word is reproduced clear and true without the slightest sound of after-tone, and with the volume equal to that of a medium steel needle. The fibre needle, of course, practically has no wear on the record.

"The retail selling price of the fibre-needle Masterphone, which costs considerably more to make than the original one, will be \$1.50, with a liberal discount to the trade."

TAFT'S MESSAGE TO INDIANS.

Dr. Joseph K. Dixon, leader of the Rodman Wanamaker Expedition to the North American Indians, returned recently to New York in his private car over the Pennsylvania Railroad after a 25,000-mile tour of the United States, during which he visited every Indian reservation in the country.

Dr. Dixon took on the trip the flag which President Taft raised over the Indian Memorial at Fort Wadsworth last May, and a phonographic record of the President's speech on the American Indian. At each of the reservations, 185 in all, Dr. Dixon raised the flag and produced President Taft's speech.

Dr. Dixon completed the circle by going to Fort Wadsworth and replacing the flag over the Indian Memorial.

MEDIUM PRICED MACHINES IN DEMAND IN NEW YORK.

But Despite the Lessening Demand for Higher Priced Models the Sales Average for 1913 Was the Best in the History of the Trade—Dance Craze Boosts Record Sales Materially—What Prominent Jobbers and Dealers Report—News of the Month.

With manufacturers, distributors and dealers unanimous in declaring that 1913 was the very best year the talking machine industry has ever enjoyed, and the recent Christmas trade equally as good, if not better, than that of 1912, there is every reason for the members of the New York trade to feel well satisfied with the results of this year's work, and optimistic in their predictions for the future.

Although the year as a whole closed in a most satisfactory manner, there is no doubt but that Christmas trade with some of the dealers was not quite up to expectations. The leading members of the local trade ascribe this slight setback to unsettled political and financial conditions, which were country wide.

Probably one of the most noteworthy features of the past year's trade was the tendency of the local buying public to confine their purchases to the machines retailing at \$150 and less, rather than the \$200 machines which were so popular during the Christmas trade of former years. The machines of all makes selling at \$75 and \$100 were easily the most popular in the entire catalog with the local trade during the past year, although many members of the trade are emphatic in stating that this class of trade is equally as satisfactory as the \$200 class, the larger number of popular-priced machine sales producing an increased number of record purchasers for the future.

Few members of the local trade have attempted to ascribe any specific reason for the comparative neglect of the \$200 machine the past season, attributing it chiefly to the tightness of the money market, which is particularly noticeable in the East, where the stock markets are located. Other dealers have asserted, on the other hand, that the manufacturers have presented such excellent value in their \$75 and \$100 machines that the prospective purchasers refuse to be convinced of the superiority of the higher priced types. At any rate, this condition is not the cause of any complaint, but rather of conjecture on the part of the dealers as to the exact reasons for the public's choice.

Dance Craze Helps Record Sales.

January and February are the acknowledged "record" months of the year, as more records are usually sold during this period than during any other three months. The first half of this month has started off with a rush, the demand in many instances swamping the dealers, who were not prepared for such an insistent call for certain types of records.

The present dance craze is undoubtedly acting as an impetus to one of the greatest sales of records that the trade has ever experienced. This demand for dance records is stretching out to all parts of the country, although it is more pronounced in the East at the present time than in any other section. The popularity of the dance record has been responsible for the sale of many machines, as numerous dance enthusiasts who have learned that they can enjoy the one-step, tango, hesitation and similar records in the comfort and convenience of their own homes have become impressed with the desirability of owning a talking machine in order that they might hear the records. In one prominent talking machine store on Fifth avenue the call for dance records has reached a stage where it is out of the question to keep them in the regular racks, as the salespeople would be obliged to waste considerable time in frequently going over to the racks and taking out the desired dance records for the waiting customers. Instead of the racks, boxes of twenty-five of each of the popular dance records are placed on the floor, where they can be instantly accessible and easily handled.

High-Class Records Also Favored.

Although the dance record demand is the most predominant feature in the local trade, it is not to be supposed that grand opera and instrumental records are not in demand by talking machine owners.

On the contrary, this type of record is at present experiencing its best season. The success of the opera season, which is more impressive this year than ever before, and the large number of recitals and concerts by famous artists that have been presented during the past few weeks, have all aided the sale of the more expensive records, and this class of record is certain to secure its share of the record business during the next few months.

Gain of 48 Per Cent. Over 1912.

"We have just closed the very best year in our history," stated R. F. Bolton, manager of the Columbia Graphophone Co.'s store, 89 Chambers street. "Our exact gain over 1912 is 48 per cent., which we naturally consider very good in view of the shortage of certain popular types of machines and the generally unsettled financial conditions. Our dealers generally report a very good business during 1913, particularly in the popular-priced machines and Columbia records. Our cash collections this year were better than last year, making an even higher percentage than heretofore, notwithstanding the increased volume of business. Our plans for the coming year include the extending of the heartiest co-operation to our many dealers, all of whom, we are certain, will find 1914 their banner year."

Increase of 100 Per Cent., Says V. W. Moody.

"Victor record business last month was exactly 100 per cent. better than that of December, 1912, which was a record breaker," was the surprising statement of V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, the prominent Victor distributor. "This gain would have been even larger if we had not been handicapped by the factory's shortage on certain popular records. Our business as a whole last year exceeded by far all our expectations, and, although we have not yet completed our official figures for the year, we know that 1913 was the best year in our history, and the gain we registered over 1912 a splendid one. We ascribe our splendid year to the high quality of Victor products, the consistent advertising used by the Victor Talking Machine Co. and the co-operation we are extending to our dealers. We are offering our dealers real service, not merely half-hearted service, and the letters of appreciation and tribute that we received from our trade the week after Christmas were concrete evidence of the value of our methods and selling plans."

Extent of Edison Disc Business Surprises.

Edison disc business the past month has been one of the surprising events in the trade, thanks to the national magazine and newspaper advertising of Thomas A. Edison, Inc., on behalf of the Edison disc product. The following statement by Ashley B. Cohn, of Hardman, Peck & Co., the prominent Fifth avenue piano house which recently closed arrangements to handle the Edison disc line, is indicative of the general Edison business on the new product: "Although our Edison disc department has been open but a few weeks, and our furnishings, booths, etc., completed for only a fortnight, we have closed an Edison disc business that is really amazing. At the present time we have eight demonstration rooms, and it is a tribute to the numerous qualities of the Edison disc product that these rooms are crowded day after day, with patrons waiting to enter them." On the Saturday before Christmas several officials of the company, two wholesale piano travelers, two retail piano men and the regular Edison disc sales staff were in attendance at the Hardman, Peck Edison disc warerooms.

Blackman Says Best Year in History.

"1913 was generally satisfactory," stated J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, New York, Victor and Edison distributor. "We closed the best year in our history, and although there was a

shortage in the more popular-priced machines, our dealers who had placed their orders earlier in the season and who had co-operated with us in our efforts during the year secured practically everything they ordered. We make it a point to co-operate with our dealers throughout the year, and the satisfactory business reported by our dealers is very encouraging."

Manager Cleveland Enthusiastic.

The Columbia Graphophone Co.'s store on Twenty-third street is experiencing a very heavy trade in Columbia records that gives evidence of the fast growing popularity of this important division of the Columbia business. The dance craze is booming the sale of Columbia dance records, and Manager Cleveland is enthusiastic in predicting for 1914 the biggest Columbia record year his store has ever enjoyed. The Christmas trade at this Columbia stronghold was ahead of expectations, the many new types of Columbia machines being in heavy demand.

Tower Co. Reports Edison Popularity.

"Our Edison disc business is very satisfactory," states Manager Parkhurst, of the Edison disc and cylinder department of the Tower Manufacturing and Novelty Co., 326 Broadway, one of the first Edison disc agencies in the country. "Our phonographs and records are selling fast, and with the steady advertising that Thomas A. Edison, Inc., is doing, there is no doubt but that the Edison disc products will secure during 1914 a still firmer grip on the public than they now have."

"Best Year We Ever Closed" Says Landay.

"The best year we ever closed," states Max Landay, of Landay Bros., the prominent Victor distributors, with four retail stores. "You can say for us that Landay Bros. go on record as predicting for 1914 a still better year than 1913, with each succeeding year in the future better than the preceding one. Victor quality of product and Victor advertising form a combination that cannot be equalled."

Optimistic Reports from Others.

Optimistic reports of 1913 business and encouraging statements for 1914 were received by THE TALKING MACHINE WORLD's representative from the following: Bremner Talking Machine Co. (Victor); F. G. Smith, Brooklyn, Newark and New York (Columbia); Cort Sales Co. (Edison disc, Victor and Columbia); Silas E. Pearsall Co. (Victor); Pease Piano Co. (Victor and Columbia); Benjamin Switky (Victor); Paul Helfer (Edison disc); Michaels Bros. (Columbia).

TAKE ON COLUMBIA LINE.

Among the recent additions to the Columbia Graphophone Co.'s list of representatives in near-by territory are the Empire Phonograph Co., 246 Bowery, New York, and L. Ebenchick, Albany, N. Y. Both of these new accounts placed substantial initial orders.

Send for Samples

If you will write us, giving name of your jobber, we will send samples on approval.

"DUSTOFF" Record Cleaners

add life to records.
Keep the Tone
Pure and Clear.

They will get into the minute sound grooves of the record and thoroughly remove accumulated dust and dirt. For all makes of records.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., January 9.—December was a record breaker in point of business, and not a concern in the city dealing in talking machines, Victor, Edison or Columbia, that was not taxed to the limit as the eve of the Christmas season drew near. As one dealer put it, the growth of the talking machine proposition as seen in this single month's business is phenomenal when one compares the present-day situation with the time when some dealers, and not so many years ago, thought that the talking machine was only a hobby and its life was limited. Certainly times have changed, as this is to-day one of the most important industries. Everyone your correspondent has met is most enthusiastic over the prospects for the new year.

Death of Edwin R. Read.

The local talking machine men have lost a good friend in Edwin R. Read, who died on December 29 in Waltham. Mr. Read was a veteran in the business, a pioneer in the game, and, it is said, brought the first talking machine into this city. He was eighty-four years of age and was of the firm of Read & Read, whose last location has been in Boylston street. Mr. Read was uncle of Mark Read, of the Eastern Talking Machine Co., and had friends everywhere. The body was taken to Lewiston, Me., where the funeral was held a few days later. Among the floral offerings was a large wreath sent by the employes of the Eastern Co.

Current Plays Help Record Sales.

Business at the Eastern Talking Machine Co. has been right up to the capacity of the house, and from Manager Taft down everyone was kept on the jump. The last week was a record breaker. The past fortnight the windows of the Tremont street concern have been most artistically arranged. As Lina Abarbanell was playing next door at the Tremont Theater in "The Red Canary," one of the windows was filled with advertisements of her records and the choice numbers of the musical comedy. Now that Donald Brian is here at the Hollis Street Theater in "The Marriage Market," a window has featured that musical piece, which means that all the attractive numbers of "The Marriage Market" are to be had within. It's a forgetful moment when the enterprising staff of the Eastern overlooks a prominent musical comedy.

Nagel Didn't Get the Bearskin Rug.

Frederick Hager, of the Keenephone Co., was in town the other day calling on the trade, and he played a joke on Adolf Nagel, of the Boston Symphony Orchestra, which the boys of the Eastern Talking Machine Co. are enjoying. Meeting Nagel outside, Hager gave him an order for a bearskin rug which was at the Eastern Co.'s establishment, and which Hager said he wished to make him a present of. Nagel accordingly went to the Eastern, where he knows all the boys, and asked for the skin, which is used as a rug on the floor of the main office. It was some time before Nagel became convinced that the rug was the property of the Eastern Co. and that he had been made the victim of a joke.

Heavy Columbia Business Increase.

Manager Erisman, of the Columbia Graphophone Co., reports that December was the largest month he ever has known and was 100 per cent. better than December of the year before, which is going some. As an explanation of why the Boston office was able to do such a large business, it is stated that there is such co-operation among the staff and the organization is so perfect that it makes for business at the outset.

Selling Columbia Grands.

Manager Erisman disposed of a Columbia grand to James J. Phelan, of the banking house of Hornblower & Weeks, a few days before Christmas. Another to whom Mr. Erisman made a sale of one of the handsome grands was George W. Brown, vice-president of the United Shoe Machinery Co., who makes his home at the Hotel Touraine.

Extra Quarters Proved Useful.

George Lincoln Parker, of the Colonial Building, did a large business during the holidays, and he found the new apartment which he leased for those few weeks on the floor below of great use during the rush days. The room was handsomely furnished, and the finest of the Edison disc and Victor machines were constantly demonstrated. Mr. Parker hopes soon to be able to add to his suite, so that his enlarged quarters may be of a more permanent character, as his business is growing rapidly. The year just closed was the best twelve months Mr. Parker ever experienced.

Popular with the Business Men.

Harry Rosen, of School street, had a remarkably large holiday trade, and the fact that he

always keeps his establishment open late on Saturdays, when he has to hire extra help, makes his place very popular with downtown men. Mr. Rosen lately has taken on three additional clerks, William Thatcher, Arnold Zoobley and George Rosenblatt, all of them expert and competent men.

Resumed Street Car Traffic Helps Trade.

No sooner had the surface cars been put back on Boylston street on December 15, following the long period of subway construction, than the Victor business of the Henry F. Miller Co. immediately picked up, and from that time until Christmas Manager White and his staff were kept busy day and night. The business done during the last fortnight was such as to bring the sum total of the year's business up to a high figure.

Opera Stars Among the Visitors.

Madame D'Alvarez, the new mezzo soprano of the Boston Opera Company, is a frequent caller at the Columbia Graphophone Co.'s Tremont street quarters, and when not singing she has a merry time with a Columbia grand, which is one of the furnishings of her suite. Another visitor is Mardones, one of the basses of the company, who is an enthusiastic Columbia admirer. Whenever Alice Nielsen is in the city she never fails to pay a visit to the Columbia parlors.

Large Increase in Edison Business.

Manager Silliman, of the Pardee-Ellenberger Co., was more than satisfied over the year's results, and the distribution of Edison disc machines during the month of December was phenomenal. With two good catalogs, one devoted to machines and the other to disc records, the trade is pretty well supplied with informing matter, and those owning Edison outfits now have no difficulty in getting all the records they desire, thanks to this rapidly growing catalog. R. C. Peck, one of the traveling force of the Pardee-Ellenberger Co., is hustling through Vermont; Guy R. Coner is finding much business in territory not far removed from Boston, and L. H. Ripley is devoting his time to the cultivation of a local territory, and the harvest he is reaping is a rich one.

Victors for Ansonia, Conn., Schools.

Richard Tobin, the superintendent of schools of Ansonia, Conn., has been in correspondence with Manager Taft, of the Eastern Talking Machine Co., relative to the installation of Victor machines in the schools of his city; and the result has been that ten were recently expressed to that

**Are You Going
to Let Big Profits
Slip Away from You
During 1914?**

**Real Music
At Last**

The Pardee-Ellenberger Co., Inc.
BOSTON, MASS. NEW HAVEN, CONN.

Answer "No!" to that question, and ask us just how to make 1914 the most profitable year. You don't have to "sell" anything for this line of goods sells itself. All you have to do is to show us that your ability as a distributor can be created so that the new machines and records from the factories of Thos. A. Edison will be properly represented in your city.

Edison Disc Phonographs

are recognized as the greatest development of sound reproduction ever achieved in the world's history; so great is the demand for Edison machines and records that the factories are rushed to meet the orders, and Edison goods are recognized to-day as the FASTEST SELLING phonographs. No matter what line you are handling, ask to hear the New Edison. After you once hear it, you'll go after these big profits.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

city and are now playing an important part in the musical development of the public school children.

Manager Erisman's Clever Ad Stunt.

The R. H. White Co., of Boston, one of the largest of the department stores, did a big Columbia business during the holidays, and the publicity given the Grafonolas was due in no small measure to the clever advertising "stunt" which originated in the fertile brain of Manager Erisman, of the Columbia. Four good-looking young women were stationed about the store, each wearing a broad red sash with the word "Columbia" in large white letters. These sashes were draped across one shoulder so that the word Columbia was conspicuous across the breast. Where the two pieces of the sash met under the arm was the seal of the Columbia—two eighth notes—in blue and white. These girls distributed cards advertising the Columbia outfits and directing the possessors to the Grafonola parlors on the third floor of the establishment, "and secure full information relative to our special holiday terms." The scheme worked admirably and drew renewed attention to the Columbia proposition.

H. R. Skelton Visits Edison Factory.

H. R. Skelton, who has been spending several months in Chicago in the interest of the Thomas A. Edison, Inc., is back in Boston, and reports an active season, which resulted in wide publicity for the Edison disc proposition. Mr. Skelton got back in time to spend Christmas with his family in Roslindale, and then went over to the Edison laboratories at Orange, N. J., where he spent several days of the new year.

The Holiday Rush at Ditson's.

Henry A. Winkelman, with that perpetual smile that betokens complete accord with the whole world, found things pretty lively in his Victor department at the Oliver Ditson Co. during December. The year right through has been an eminently satisfactory one, and his large staff of clerks feel a bit relieved that the holiday rush is over. Manager Winkelman's right hand man, Otto Piesndel, has found a quiet corner for himself where he can attend to his official duties when not waiting on customers. That is to say, he is enjoying a "near-private" office close to Manager Winkelman's corner.

Greetings from Constantino.

Constantino, the former leading tenor of the Boston Opera Co., sent his friends in Boston Christmas greetings in the shape of postals with a photograph of himself and his signature. Several were received by those in the local talking machine business.

Elsie Janis to Make New Records.

Elsie Janis, one of the stars of "The Lady of the Slipper," playing at the Colonial, paid a visit with her manager to the Eastern Talking Machine Co. a few days ago and informed the house that she is about to make some new records for the Victor.

Edison Business Outfits in Demand.

The Office Specialty Co., of 220 Devonshire street, found things lively during the end of the year and they were able to make many sales of Edison disc outfits to a select class of patrons. The company's quarters are conveniently situated in the downtown section of the city.

Newspapermen Enjoy Victor Concert.

Manager Herbert L. Royer, of the Arch street Victor department of the M. Steinert & Sons Co., loaned a Victor outfit to the Newspaper Club on the occasion of its annual dinner at the Boston Yacht Club quarters in Atlantic avenue on the night of January 2. The Victor was a complete surprise, and no one knew of its presence until one of the members, called upon to sing "I Love a Lassie," asked to be excused. "Well, we'll have the song anyhow," called out the "manager" of

the show that followed the dinner and, giving the signal, the strains of the song were heard from the adjoining room. Thereafter a most enjoyable concert was given, Herbert Evans, of Manager Royer's staff, operating the machine to good purpose.

Does Some Important Work.

About the busiest man these days is "Captain" Ned Wilkinson, who is the man responsible for the safe departure of the Victor and Columbia machines from several of the large talking machine establishments. The Captain is on the job early and late and just at this time he and his many teamsters have about all they can do.

PLANS TO GO AFTER RECORD TRADE.

Special Demonstration Booth Installed in Store of Peck-Leach Furniture Co. to Take Care of Business—Furnishing Service.

(Special to The Talking Machine World.)

TAUNTON, MASS., January 8.—The Peck-Leach Furniture Co., of this city, has just installed a new and up-to-date soundproof demonstration booth in its Victor department for the convenience of its many patrons, who are constantly dropping in to get records. The manager of the talking machine department of this large establishment is William Howes, who, through keeping in close touch with such large centers as New York and Boston, is able to inject into his business all the latest innovations and customs of which the purchasing public gets the benefit.

In establishing this demonstration room Manager Howes, who will be pleasantly recalled as formerly in the talking machine business in Boston, states that it will obviate the necessity of sending out so many records on approval, which is unsatisfactory and is gradually being eliminated wherever possible. Mr. Howes now keeps constantly in stock a representative line of the best records to be found in the entire Victor catalog. An invitation extended to the public to inspect the improved Victor quarters has been taken advantage of by many people—many, in fact, who hitherto had placed their orders for records in either Boston or Providence.

MANY NEW DEALERS SIGNED

By J. W. Scott on His Recent Trip Through New England in Behalf of the Edison Disc—New Agents in Norwich and New London.

(Special to The Talking Machine World.)

BOSTON, MASS., January 9.—J. W. Scott, who has been traveling for the National Phonograph Co., and its successor, Thomas A. Edison, Inc., for the past thirteen years, most of the time in New England, is now demonstrating the new Edison disc phonograph in all the large cities in that section, and he has met with most flattering success wherever the new machines and records have been demonstrated.

Mr. Scott began his work on November 5 with a recital and demonstration at the Hotel Worthly in Springfield, Mass., during both afternoon and evening. The impression made with the latest Edison product was evident from the flattering notices appearing in the daily papers. At frequent intervals recitals and demonstrations were also given by Mr. Scott in other cities in New England, including Norwich and New London, Conn., in which cities Mr. Scott was successful in signing up as dealers the Porteous-Mitchell Co. in Norwich and the James Hislop Co. in New London, both of which concerns had never before handled musical goods of any kind. The recitals were always held in the leading hotels in the various cities and every effort was made to impress the visitors with the artistic rather than the commercial importance of the Edison disc phonograph and the new records. Every recital was duly announced by large advertisements in the daily papers, and in cases where an Edison disc dealer was already located in the city, as was the case with Otto Baab in Springfield, he also took the opportunity to advertise the new machines on his own account.

At the present time Mr. Scott is spending a few days at the Elton, Waterbury, Conn., and during the coming months plans to continue in an even more energetic manner the demonstration campaign that has proven so successful in the short space of two months.

STANDARDIZING A SYSTEM OF TONE PRODUCTION.

The Efforts of Prof. Bertrand de Bernyz, President of the American Opera Society, in This Connection Are Interesting—His Visit to the Edison Laboratory and His Experiments with Records Are Most Valuable—Wins Edison's Support and Personal Approval.

That great and rapid strides have been and are being accomplished toward the establishing of a standard of tone production to be adopted throughout the entire world is evidenced by the fact that the man who is the strongest champion of this cause, Prof. Bertrand de Bernyz, president of the American Opera Society, has won the support and personal approval of Thomas A. Edison in his effort to standardize a system of tone production, after proving it to be the system for producing pure tones.

Mr. Edison grew so enthusiastic over this subject lying close to the heart of its great champion that he devoted all the choice portion of the day to this interview, keeping scores of waiting ones on the outside of his laboratories, while Prof. de Bernyz explained in minutiae the science of tone production and its applicability to the natural laws. He also made demonstrations on his own voice and the voice of a pupil, a tenor.

The contention of Prof. de Bernyz that a standard of tone production is not, as contended by other teachers, beyond the pale of possibility, is upheld by Mr. Edison.

Through the courtesy of Mr. Edison Prof. de Bernyz was permitted to hear artist after artist of world renown from the two huge phonographs in Mr. Edison's laboratories. The season's salary of these artists represents a fortune, and not one voice was perfectly pure or free from defects. These phonographs reproduce with unmistakable clearness the human voice, and in all there was easily discernible to those listening the interference with the tone production.

But Mr. Edison hears these voices through an instrument which acts upon the ear as does the microscope upon the eye, exaggerating the minutest detail, so that it is not possible to overlook same.

The fact that in listening with the natural ear to the reproduction of these illustrious artists various defects are detected without difficulty proves beyond all doubt that if artists were heard without scenery, orchestra, atmosphere, and the hypnotism of the crowd, and were entirely dependent upon their vocal effort for success, with no personal magnetism or gestures to aid them, many enjoying the applause of five continents to-day might be relegated to the catalog of failures.

Mr. Edison made exhibition of the imperfections of our leading vocalists and most celebrated singers, then heard with much gratification and deep satisfaction the succession of tones produced by Prof. de Bernyz, all of the same superior quality, regardless of where in the scale they were located, proving unquestionably the possibility of mastering a technique of tone production that enables the singer to produce one or hundreds of tones in precisely the same manner.

The fact that the registration of the voice on the phonograph record varies, or the same tone repeated makes a different line on the sensitized disc, demonstrates that the tones are produced in different manner. It is but logical that tones produced in like manner will record on the disc in the same manner.

It is also obvious that if, when Mr. Edison reads the record with his powerful microscope, he finds a high C, for instance, has been registered five times in as many different ways or lines on the disc, that the high C was produced in just so many different ways.

The use of the phonograph in teachers' studios has long been advocated by Prof. de Bernyz as an aid to the pupil. Mr. Edison agrees with Prof. de Bernyz that it is by this means that the pupil or artist may most readily determine his faults and overcome them, if he is properly instructed.

By invitation of Mr. Edison, Prof. de Bernyz will avail himself of an opportunity to demonstrate on the voices of numerous pupils that the production of pure tone is not accidental, but the result of mastering technique of a proper tone production.

In connection with the phonographs which Prof.

de Bernyz will install in his private laboratory, he will use an invention of his own, an apparatus used in acquiring breath control, and an aid to both teacher and pupil. Mr. Edison's invention has to do with the finished product; while that of Prof. de Bernyz has to do with the first principles and has to do with the producing—a complement to the inventor's much-loved instrument.

It is a source of much gratification to those who hope for a standard of tone production to learn that Mr. Edison, who has hitherto been interested solely in the results obtained and not in how to acquire the desired results, is now intensely interested in the tone production—interested to the extent that he gives hours of his invaluable time to learn of this new system discovered by Prof. de Bernyz, and of which he is the author and instructor says the Opera News.

The additional fact that Mr. Edison affixes the seal of his approval to the contentions of Prof. de Bernyz, declaring that pursuing his present policies the establishment of a standard of tone production is easily within sight causes the hope that "springs eternal" to leap to great heights in the hearts of those vitally interested in the American Opera Society. For the interest lying nearest their hearts is that of precluding the possibility of so much fraudulent practice among the unscrupulous, and thus preventing disappointment and misery, the inevitable consequence of pursuing wrong methods.

NO "CUT PRICE" FOR STAMPS.

And Yet Men May Be "Cut-Priced" for Commodities—Another Argument for the Fixed Re-sale Price—Uncle Sam as a Merchant.

Under the heading of "The Living Wage for the Dealer," the editor of American Paint and Oil Dealer advances a timely and interesting argument in support of the right of the manufacturer to maintain a fixed re-sale price on his trade-marked products. The editorial, in part, follows:

The Government recognizes and practically enforces the principle of the living wage among the great aggregations of capital that are being subjected to the processes of "regulation." It jealously watches over and intervenes or "mediates" between the railroad companies and their employees for the maintenance of the living wage, and while now becoming more alert and efficient in its

supervision of their financing, and its control of their rates, the principle of the living wage, extended to give capital its own fair return, over and above the cost of doing business, interest on bonds, betterments, depreciation, etc., is also recognized and established; and upon that basis the retail selling prices, the rates for service, are fixed by the Interstate Commerce Commission. But woe be, and is, unto the road that "cuts the price," by secret rebates or by open "ruinous competition." The Government even prohibits the sale of its postage stamps at "cut prices"—and they're not "returnable for, or without, any reason." An independent merchant is Uncle Sam.

But the small dealer, independent and practically unorganized, is not entitled to the living wage—at least that appears to be the belief of the newspapers and magazines, and the Government, and the public itself; a public that is generally fair-minded, and quick to resent any injustice, but a public that for years has been mis-educated on merchandising, the principles and ethics of buying and selling; though the merchandising community and its allies have undergone a process of education in recent years that has quickened all classes engaged in regular or so-called legitimate distribution with a broader intelligence and a keener conscience in their relations with each other and with the public.

The dealers, the jobbers and the manufacturers, in the reputable trade, believe in the living wage, for themselves and for each other, as well as for labor and capital in other fields. Their earnest study of cost accounting, their more general realization of the cost of doing business, and their application of this knowledge, have practically eliminated the ignorant or careless price cutter—the man who unwittingly undermined the living wage of his fellows and himself.

THOMAS A. EDISON'S DOUBLE.

The extraordinary resemblance of E. F. Manchester, Randolph, Vt., to Mr. Edison led the Edison representative to wonder if he has not interrupted a peculiar vacation. The illusion was heightened by the fact that Mr. Manchester is exceptionally deaf. However, he states that he finds this no handicap in his business.

COLUMBIA GRAND FOR CHOIR USE.

R. R. Souders, manager of the Columbia Graphophone Co., sent a new Columbia grand to the First Baptist Church Choir, Dallas, Texas, of which Will. A. Watkin is organist and director, for an evening recital. A nice letter was received from the secretary of the choir by Mr. Souders thanking him for this courtesy.

Columbia Graphophone Company
Woolworth Building, New York

VICTORS FOR DALLAS SCHOOLS.

Board of Education of Dallas, Texas, Purchase Twenty-six Victor Talking Machines and Records to Be Divided Among the Different Schools of That City—Now Considered Indispensable for Educational Purposes.

The missionary work done by the Victor Talking Machine Co. in introducing the Victor into the public schools of the country began some time ago to produce that kind of automatic momentum which comes to all commercial enterprises when they are based on sound principles and systematically developed.

The Times-Herald, of Dallas, Tex., in its issue of December 9 published the following:

"Another item of the expenditure made by the board was the order for the purchase of twenty-six Victor talking machines, with records enough for use in the different schools where they will be used. The total price for these instruments will be between \$1,900 and \$2,000. These instruments and supplies will be used in the musical and athletic departments of the school system. The purchase of this equipment will be equally divided between the two agencies in Dallas, Sanger Bros. and Field-Lippman Piano Co. A. Harris & Co., another agent, is not qualified to compete for the business, as A. L. Kramer, president of the company, is a member of the board, one of the laws of which says that no member of the board shall figure in any financial transaction of the board."

There was a time when Victors were established in the schools by contributed funds. The condition is changing, and they are now being officially acquired along with other school supplies.

On November 28 the same paper published the illustration and comment which follow:

Taking Physical Exercise to Music by Victor Talking Machine.

"The above picture shows a class of small children from the Rusk School, who are taking the physical exercises which are now being given in the public schools of Dallas. Standing behind the children is Miss Bessie Keller, assistant super-

visor of the physical education department of the city schools. A demonstration of the work in this department is being shown this afternoon before visiting teachers. The program began at 1 o'clock in the auditorium of the Dallas High School, and is being witnessed by a large number of interested teachers and school officials from over the State. The program which has been arranged is being participated in by various schools and is as follows:

"Minuet, first grade, San Jacinto School, Miss Keller; Tantoli, second grade, Colonial Hill School, Miss Goslin; Swedish Gymnastics, third grade, Rusk School, Miss Wilson; Highland Schottische, second grade, Sam Houston Normal, Miss Hölder; Hopp Mos Annika, third grade, San Jacinto School, Miss Cochran; Thanksgiving, second grade, Stephen F. Austin School, Miss Tate."

The instruments secured by the school authorities, were in addition to others previously installed, and in the future there are to be two Victors in each of the schools of Dallas.

A REAL "RECORD" PROPOSAL.

Phonograph Worker's Note Brings It from Widower with 11 Children, but Too Late.

(Special to The Talking Machine World.)

WEST ORANGE, N. J., January 8.—A proposal of marriage from a widower with eleven children has been received by Miss Jessie Cosgrove, who was formerly employed by the Edison Phonograph Record Works here. A few years ago, for a joke, Miss Cosgrove wrote a note on a piece of paper which she inserted in a record of "Where the River Shannon Flows." There was a large demand for these records in Ireland, and yesterday Miss Cosgrove, who is soon to be married, received the proposal from one Dennis O'Finn, of Westmeath, Ireland.

In part the letter says: "In a talking machine record I found a note in which you say you are looking for a man. Being as I am a widower, I would like to say I wouldn't mind if you would come to this country so I could marry you. Although I am fifty-three years old now, my health is just as good as when I was twenty. I have a wooden leg, because I lost the real one in a steam road accident, but the artificial one

doesn't interfere with my walking or work.

"My good wife died from a fever more than twelve months ago, and, having pity on my eleven little ones, I thought to ask if you would become my wife so I may entrust their bringing up you."

TWO NEW EDISON ARTISTS

To Be Introduced in Edison New Amberol List for March Are Edmund A. Jahn, Bass Soloist, and Gustav F. Heim, Internationally Famous as a Trumpeter.

Two new artists will be introduced in the Edison new Amberol record list for March. The first is Edmund A. Jahn, who is recognized as one of New York's foremost church singers, being at present bass soloist at the St. Nicholas Collegiate Church. He also has an excellent reputation in the concert field, having appeared in various prominent festivals and concerts. Mr. Jahn will be

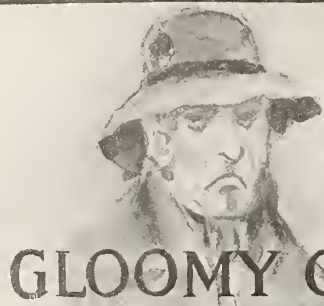

E. A. Jahn, Baritone. G. F. Heim, Trumpeter.

represented in the March list by PUNCHINELLO, one of Max Heinrich's famous songs, and he renders it in a masterly manner.

The second new artist represented in the Edison list for March is Gustav F. Heim, who ranks as one of the world's greatest trumpeters, having served with some of the leading military bands on the Continent. He came to St. Louis during the World's Fair, where he was engaged specially because of his skill as a trumpeter. He has been associated with the World's Fair Orchestra, which was conducted by some of the world's most eminent conductors. Mr. Heim later became connected with the Philadelphia Symphony Orchestra, and later was engaged as first trumpeter of the Boston Symphony Orchestra under Dr. Muck. Mr. Heim's superb playing is well displayed in the record which he has made for the March Blue Amberol list—"Inflammatus," from Rossini's "Stabat Mater," a wonderful record in many respects.

MOTORS FOR TALKING MACHINES.

Gebrüder Steidinger, St. Georgen, Black Forest, Germany, have made a hit with their new types of motors for talking machines. The device by means of which the spring casing of the Steidinger mechanism can be easily taken out is so efficient and yet so simple that even the most uninitiated can take out the casing from the mechanism, and put in a new spring without the slightest trouble. The high efficiency of Steidinger mechanism, which has been already recognized and appreciated in every country in the world, is further enhanced by this most excellent device.

TALKING MACHINE INTERESTS OPPOSE THE KAHN LAW.

Horace Pettit, of the Victor Talking Machine Co., Chief Spokesman at Washington for Talking Machine Interests in Opposition to Kahn Act Which Will Cause Great Confusion, Especially in Regard to Patents—The Present Status of the Oldfield Bill Set Forth.

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 10.—Talking machine interests are very active in opposition to what is known as the Kahn Act. Indeed, the protest against this legislation which is now being registered at Washington by the talking machine trade, is second only to the fight which is being made against the Oldfield bill which aims to prevent the fixing of a resale price on talking machines, records and accessories.

Already the talking machine manufacturers are up and doing in their agitation against the Kahn Act, and the dealers are following suit as they come to realize that what menaces the interests of the manufacturers also menaces, indirectly, the retail end of the business. Horace Pettit, of the Victor Talking Machine Co., has thus far been the chief spokesman at Washington for the talking machine interests in their protest against the Kahn Act and he has made a strong case.

Talking machine interests might not be so adversely interested by the Kahn Act as by the Oldfield bill, but there is danger enough of damage. Furthermore the status of these two measures is very different. The Oldfield bill has been merely introduced in Congress. It has not as yet passed either house of Congress nor been signed by the President, so that it is far from being a law. The Kahn Act, on the other hand, is a law. It slipped through Congress last autumn and was signed by the President before the manufacturers of the country awoke to the injury it might do.

The Purpose of the Kahn Law.

The purpose of the Kahn law, as most of our readers are aware, is to protect foreign manufacturers who desire to exhibit their products at the San Francisco exposition. Some of these foreign exhibitors complained that when they exhibited at the St. Louis world's fair, their exclusive designs were pirated by unscrupulous American competitors. Hence they gave notice in advance that they would not exhibit at the Panama-Pacific Exposition unless assured that their models would be protected from reproduction.

To mollify the foreigners, Representative Kahn of California, introduced the bill which bears his name. In effect it enables any foreign exhibitor who has a foreign patent on a talking machine or other product, to secure, merely for the asking, American patent protection for his device, following the date on which it arrives for exhibition at San Francisco. There is a wide difference of opinion as to just what construction the courts would place on this law—in other words, how much the protection accorded foreigners is worth—but there is a widespread feeling among American manufacturers that at any rate it is liable to result in confusion and litigation. Worst of all is the fear that even if the law does not actually justify interference with American patented goods, it might be used by unscrupulous persons to annoy, by a system savoring of blackmail, manufacturers and dealers who were not fully informed as to their rights.

Basic patents on some of the elementary features of sound-reproducing instruments having expired, there is no fear on the part of talking machine men that this new law will cause controversy regarding the talking machine in its fundamental form, so to speak. But there is grave fear that it will precipitate disputes as to the right to use some of the patented improvements which make the talking machine of to-day so distinctive.

That talking machine men have an opportunity to register protest now, even though the Kahn measure has become a law, is due to the fact that a bill to amend the Kahn Act by striking out the objectionable portions, has been introduced in the House of Representatives by Representative Bulkley—who will be remembered by talking machine interests for his opposition to the Oldfield bill last year. Hearings on this Bulkley bill are now in progress before the Patents Committee of the House of Representatives—that self-same body be-

fore which representatives of the Columbia, Edison and Victor companies appeared last winter to oppose the Oldfield bill.

Arguments of Horace Pettit.

The Victor representative, Mr. Pettit, when he appeared before the Patent Committee a few days ago to protest against the Kahn Act, said in part: "It seems to me that there is no question that there has been a mistake in passing the Kahn bill. The intention probably was good, but unfortunately the wording of the bill is such that great confusion is going to occur doubtless in its administration, especially in regard to patents for utilities.

"This bill is going to work, in my mind, a great hardship on many manufacturers. I represent talking machine manufacturers whose industries I think would be considerably affected. Talking machines may be imported. There are some of them patented abroad, under foreign patents, which could not, perhaps, be patented in this country. Those machines would come in here under the guise of a foreign patent and would be exhibited in the Panama Exposition and a certificate issued of three years' proprietorship. The result would be that we would perhaps be infringing, technically, some of those rights, which could never have been protected under the patent of the United States."

Then followed the following conversation between Mr. Pettit and Chairman Oldfield of the Patent Committee.

Representative Oldfield: "May I ask a question? I understand your position to be this: Take the talking machine companies, some of whom you represent here. They have their patents that have been granted abroad, and probably those patents have run for five or ten years."

Mr. Pettit: "Yes, sir."

Mr. Oldfield: "Now, then, if a foreign talking machine concern would send talking machines to the exposition grounds and they have a patent in their own country, do you think that your selling your patented machine in conflict with theirs after the exposition ended would put you in the position of infringing on their patent?"

Mr. Pettit: "I think that it would during a period of three years provided our machine contained some construction which they had patented abroad under right which they could not have gotten here."

Mr. Oldfield: "And you have a patent now?"

Mr. Pettit: "Yes, sir."

Mr. Oldfield: "These machines can not possibly come in for some months yet?"

Mr. Pettit: "No, sir."

Mr. Oldfield: "Do you think that your patent that is valid now could be an infringement on those patented machines that may come in for three and a half years?"

Mr. Pettit: "I am speaking of improvements and new constructions which we are constantly adding to the machines. The machine might embody some improvement that might come in as having been patented under a German patent which would never have been granted here."

Mr. Oldfield: "I can see where we might get into trouble writing patents on your machines that were taken out after their machines were shipped here."

Mr. Pettit: "It is quite possible, on the other hand, reading the Kahn Act as it stands, that, supposing we had had it before it came into this country, the proprietorship abroad in their foreign patent would warrant them in getting a certificate here, which, according to the Kahn Act, would preclude us, even though we might have manufactured it here before."

Representative Oglesby asked leave to put a question to the representative of the talking machine interests. Said he: "Suppose you were manufacturing a machine in which you were using an appliance which was not patentable here at all. It may have been patented heretofore, or the patent may have run out, or else it was nothing new. They might come in here with an appliance of that char-

acter and file a certificate and stop you from making a machine which you had previously been manufacturing?"

"Under the Kahn Act they could do so," was Mr. Pettit's rejoinder.

In concluding his remarks, the representative of the talking machine interests said: "It seems to me that this law is going to occasion great confusion and is going to be greatly to the detriment and prejudice of the American manufacturer."

Kahn Law Hurting Panama-Pacific Exposition.

It has lately developed that the situation precipitated by the passage of the Kahn Act is likely to have considerable influence upon talking machine exhibits at the Panama-Pacific Exposition. Many manufacturers in all lines are threatening to boycott the exposition unless the exposition officials consent to have the Kahn law amended. Some of the manufacturers simply wish to show their resentment. Others say that they are afraid to exhibit their goods at San Francisco lest the mere circumstance of their exhibition there serve to call to the attention of foreign exhibitors patented features, the right of possession of which might be made a subject of controversy.

Of course, the talking machine manufacturers have not given any intimation as to what policy they will pursue with regard to sending exhibits if the objectionable act is not amended, but the situation presented is certainly an interesting one, particularly in view of the announcement that a number of leading American piano manufacturers will (from entirely different motives) refrain from exhibiting at the San Francisco show.

It is significant that the present United States Commissioner of Patents is opposed to the Kahn Act as it stands. He spoke on the subject at the same session of the committee at which Mr. Pettit appeared, but he made it clear that he was opposing the Kahn Act because it would subject the Patent Office to unpopularity and injury, and not because he wanted to serve the manufacturers. On this score he remarked: "If I am right it is a matter that affects the business interests of the country at large and the business interests of the country can take care of themselves."

The Oldfield Bill Is Coming Up Again.

Of course this has nothing to do with the effort to amend the Kahn Act, but it is an interesting piece of news for talking machine dealers and manufacturers who had supposed, many of them, that the Oldfield bill was dead, due to opposition in the talking machine field and other lines.

Congressman Oldfield tells The Talking Machine World that he hopes to have his bill "reported out" by the Patent Committee by February 1, and inasmuch as Mr. Oldfield is chairman of the Patent Committee he presumably knows whereof he speaks. If the bill is reported favorably by the Patent Committee, as its author predicts, it will be, the measure will presumably come to a vote in the House of Representatives during the spring. An effort will also be made to have this measure voted in the Senate before Congress adjourns.

The Oldfield bill in so far as it affects the talking machine trade is just the same as it was a year or so ago when the talking machine companies began their great fight against it and enlisted all jobbers and local dealers in talking machines throughout the country to the extent of having them make protests to their respective Congressmen.

Speaking for the benefit of readers of The Talking Machine World, Mr. Oldfield said that he considered it likely that the bill would be changed or rewritten in some minor respects in committee during the next few weeks when the measure will be under consideration by the Patent Committee (which must send a report and recommendation with the completed bill to Congress), but he predicted very decisively that the bill as it comes to the House for a vote by that body will have no changes in that section which hits hardest the talking machine industry,—namely the section which provides that it shall not be possible to proceed for infringement of patent against a person who sells patented products, such as phonographs, talking machines, records or accessories at "cut prices" or at prices lower than have been fixed by the manufacturers.

The first sale of a Columbia Record is the beginning of a steady business—business you should get—and can get.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

HIGHER PRICED MACHINES IN DEMAND IN ST. LOUIS.

Talking Machine Dealers Feature Machines Selling for \$50 and Up During the Holidays and Report Heavy Business—Some of the Concerns That Made Noteworthy Records During the Holidays and the Lines They Featured—New Dealers Enter Field.

(Special to The Talking Machine World.)

St. Louis, Mo., January 8.—Now for 1914. After closing books on the best year's business, the talking machine dealers are talking of doing more this year. The Christmas trade surprised everybody by the way it held up to a fast pace all through the season. When some unexpected but hoped for deliveries of machines arrived late in December it was thought that every dealer would be able to take care of all of his trade, but Victor X's were short of the demand and country dealers were clamoring for more VIII's and VI's. XVI's also were short.

The Edison stock of machines got very low and some quick shipments were made from the factory to fill late orders. The Edison trade was harder hit by record scarcity than by that of machines.

The city dealers report stocks low after the flurry and reports that are reaching the jobbers indicate a fine volume of business may be expected this month and next, because of low stocks in the country.

The St. Louis trade was chiefly for high priced machines and no downtown dealer made any particular showing of small instruments. Only machines for \$50 and up were in demand, according to sales managers. Jobbers report a heavy shipment of smaller machines for out-of-town use. The department stores and some of the residence district dealers moved a fair number of the very cheap machines, the purchasers usually explaining that they were for the nursery.

Koerber-Brenner Music Co., Victor jobbers, has erected a sound-proof booth at its warerooms as a part of its display of stock for sale. That is, the booths are for sale, rather than demonstration purposes.

The Thiebes Piano Co. occupies the unique position (in St. Louis) of selling both the Edison and Victor machines. In the holiday advertising Manager Robinson placed these machines on par, and rather urged all customers to hear both and then decide. He says there was about an even break and that the double presentation kept attention centered on the higher-value machines.

W. H. Twheatt, recently of the Scruggs, Vandervoort & Barney department, has joined the Thiebes talking machine sales staff.

Harry Levy, talking machine manager at Aeolian Hall, says the new year finds stock in excellent shape for the onward movement of business. "I believe there is a disposition," he said, "to prepare for a let-up in certain quarters, but that does not appear to have reached the talking machine trade. The only dissatisfied dealers I have found assign absolutely local reasons. Collections are in good shape. The Christmas trade moved off nicely with our retail department and with our dealers. In our jobbing department we did some eleventh-hour shifting and I think all of our customers were taken care of. There was a shortage of some ma-

chines, the \$75 model, but we and the dealers realized that in time to turn enough of this trade to the \$100 styles to cover on that. I think generally the last Christmas goes onto the record as a capacity sale and the outlook is optimistic."

W. S. Fulton, who has been assigned to Missouri by the Victor factory, was in St. Louis the first of the year getting acquainted with jobbers and local dealers.

The department stores report excellent business for December. Any person who looks in at the Famous & Barr department occasionally realizes the truth of Manager Ligon's statement that his holiday business was limited only by his capacity for handling it. Despite the fact that his space was doubled before the holidays, and that he invaded a part of the piano department floor space, he was unable to handle all of the customers and had to be content with what he got hold of. This department has not indulged in the practice of other department stores, of placing machines on thirty days' free trial, and a sale is closed when the machine is sent out.

The Vandervoort Salon Victrola department is credited with doing an exceedingly heavy December business, and they talk figures there that are astonishing and minimize the effect of returns on the free trial offer. Manager Seegar's department is the handsomest in the city, and the moonlight rooms and easy chairs are a very decided attraction to luxury loving people, who also buy records.

Manager Robinson's best proof of prosperity at the Stix, Baer & Fuller department store is the added space that is given him with regularity and his increased facilities for serving his public.

C. W. Smith, manager of the F. G. Smith Piano Co.'s Columbia department, is planning to resume his concert program. He is well pleased with his first holiday outing in St. Louis.

At the Columbia warerooms there is a general spirit of good feeling over the holiday trade and everybody is boosting the works of the sales forces, both retail and jobbing.

Retail Sales Manager Duffy says, "Our low-price sales this year were about equal to the high-price sales of three years ago. There has been a consistent improved demand for the better models, and this year we have been getting excellent results from the table models. They were a little slow in catching on here, but they are going all right now and the buyers are invariably pleased."

General Manager Reid reported the country trade in excellent shape, collections good and prospects bright.

The Columbia has attracted considerable attention by some window displays that are out of the ordinary in St. Louis. One of them was piles of records, with a general placard, "An evening's entertainment." The various piles were labeled opera, tango dance, popular, vaudeville, etc. The prices ranged from \$5 up, and for Christmas week the

window was artistically trimmed with dolls. Mr. Duffy said that this window had been a producer to the extent of selling a good many of the lists just as presented, and bringing many inquiries from persons who filed lists of what they already possessed.

Some trade interest centers in the Columbia now because the lease on the present warerooms expires this spring and it is generally understood that the new terms offered by the agents are not to the liking of tenants. At least all the other tenants of stores in this block have moved when time came to sign new leases. Mr. Reid said that he had not yet found a new home, but added, "it is getting about time." It is known that Mr. Reid has been looking about.

The Silverstone Music Co.'s warerooms are to become known as "The Edison Shop," and all late advertising is bringing this phrase into the signature. The show window sign is being changed and the lettering appears on the demonstration booths. "The Edison disc has demonstrated to me," says President Silverstone, of the company, "that it is a splendid article of commerce to tie to, and I am going to impress upon the public that my large store is distinctly an Edison institution. I have no idea of putting in other talking machines, and am going to make what prestige of this I can.

"The jobbing business is developing in a way that indicates that its demands in the future will be heavy. New firms are being added daily almost and their business is growing to such an extent that we must expand constantly to handle it. The La Mothe Piano Co., in the residence district of North St. Louis, sold fifteen Edison machines at \$200 each and up during December. One of these machines was the \$375 type. This is an indication of what our retailers are doing to force us to expand the talking machine department."

Mr. Silverstone, as soon as the Christmas rush was past, called in carpenters and others to arrange for necessary changes. The dictating machine department was sent from the first to the second floor, and two new booths ordered for the first floor. The five main floor rooms are primarily record demonstration rooms, and he also uses a concert machine stationed in the corridor. The machines sales booth are on the second floor, and to meet the demand for space, machines have been paired with player-pianos in all of what were built for player demonstration rooms.

Some of the new dealers on the Edison list are: Henry Meyer, of Carlinville, Ill.; R. D. Wall, Mexico, Mo.; Humphrey Drug Co., Vandalia, Ill.

The Columbia Graphophone Co. closed arrangements recently with the prominent piano house of Otto Wissner, whereby this concern will install a Columbia department in its Jersey City store. Otto Wissner has already established the Columbia line in its Thirty-fourth street store in New York, and is achieving marked success with the Columbia products.

Another new Columbia account opened in nearby territory is Jacob Sheiman, 390 Grand street, Brooklyn, who closed negotiations recently for a complete line of Columbia products. He is enthusiastic over the prospects for business.

Mid-Winter Meeting of Talking Machine Jobbers' Association

The annual mid-winter meeting of the executive committee of the National Association of Talking Machine Jobbers, will be held at the Bellevue-Stratford Hotel, Philadelphia, Pa., on February 15, at which time the various officers and the members of the committee will consider a number of matters of general importance to the trade that have come up since the last meeting of the committee in

Following the meeting, it is the intention of the committee members to spend a day at the factory of the Victor Talking Machine Co., in Camden, where they will consult with the officers of the Victor Co., on various topics of more or less importance and will make a tour of inspection of the plant to gain an idea of the increased facilities for turning out machines and records.

serve to attract all those distributors who have the future progress of the trade at heart, and their efforts are meeting with success.

The accompanying excellent photograph shows the executive committee in a most interesting and effective grouping, and was taken at the recent meeting in Chicago, when every member of the committee was in attendance. In the lower row

Officers National Association of Talking Machine Jobbers.

First Row, Left to Right—W. H. Reynolds, Treasurer; Geo. E. Mickel, Vice-President; J. C. Roush, President; Perry B. Whitsit, Secretary; James F. Bowers, Executive Committee. Second Row, Left to Right—R. H. Morris, O. K. Houck, T. H. Towell, E. C. Rauth, also Members of the Executive Committee.

Chicago. All jobbers who are members of the association, whether officers or not, are invited to attend the meeting.

An important feature of the meeting will be the making of preliminary plans for the annual convention, which will probably be held in Atlantic City in July, and which, it is promised, will be one of the liveliest conventions ever held by the association, both from business and social viewpoints.

The present executive committee of the National Association of Talking Machine Jobbers is made up of men prominent throughout the trade and, who have taken an active interest in association work since it was first organized. They have, under the administration of President J. C. Roush, planned to increase the importance of the association as a factor in the trade, and to develop the association work in such a manner that it will

seated, are, from left to right: W. H. Reynolds, Mobile, Ala., treasurer; George E. Mickel, Omaha, Neb., vice-president; J. C. Roush, Pittsburgh, president; Perry B. Whitsit, Columbus, O.; secretary, and James F. Bowers, Chicago, committee member. From left to right, standing, are: R. H. Morris, Brooklyn, N. Y.; O. K. Houck, Memphis, Tenn.; T. H. Towell, Cleveland, O., and E. C. Rauth, St. Louis, executive committee members.

A NEW TALKING COMBINATION.

Dictagraph, of Detective Fame, Hitched to Talking Machine for Purpose of Recording Sermon at a Distance—Other Experiments.

Thus far the dictagraph has been employed mainly by detectives in showing up graft and political conspiracies, but a much wider use for it was demonstrated recently in a series of experiments by the inventor, K. M. Turner, at the Broadway Tabernacle, Broadway and Fifty-sixth street, New York, that the little instruments can be made valuable in recording and transmitting sounds from church services and public meetings. Hooking up one of his dictagraphs to acousticons, talking machines and telephones, Mr. Turner recorded and multiplied every sound at the services so that they were heard in a number of places at once.

The dictagraph was fastened in the pulpit of the church before the morning service began. Wires were rigged up to connect it with several acousticons in other parts of the assembly room, so that worshippers, however distant from the pulpit or defective of hearing, could follow the services. Other connections were made with the offices in the rear of the church. In one of the offices dictaphone transmitters were connected with three talking machines, and on their cylinders were recorded the sermon of the Rev. C. E. Jefferson the pastor. Mr. Jefferson speaks extempore in his pulpit, and wished to thus preserve his sermons for his own use and to duplicate them

on phonograph cylinders for distribution to "stay-at-homes," who, according to the last census, comprise two out of every three persons in the country.

In one of the guild rooms the sounds transmitted by the dictagraph were increased in volume by means of a large horn, so that a woman prominent in Mr. Jefferson's congregation, who could not sit through a service in church, was able to follow the worship and sermon at her home.

For all of these connections with the dictagraph Mr. Turner used a multiplier, which is also one of his inventions. Fastening this multiplier to a telephone instrument and fitting a dictaphone transmitter into it, Mr. Turner transmitted the sounds in the church to the homes of his family and several friends, and by long distance telephone to a newspaper office in Philadelphia. The organ music and congregational singing were heard distinctly in the telephones in this city and in Philadelphia. Mr. Jefferson's voice, during his sermon, it was said, sounded too loud, that all his words were not always audible on the telephones here. In Philadelphia Dr. Jefferson's voice was heard, but his words could not be understood. It was not possible to readjust the dictagraph in the pulpit during the service, but Mr. Turner believes that the softening of the voice under such circumstances will aid in having the words distinctly heard.

In speaking of the success of the experiment, Mr. Turner said, in part:

"I firmly believe it is only a short time ahead when the congregation sitting in the church or in-

dividuals sitting in their homes in San Francisco will be able, with the aid of the dictagraph and the telephone, to hear a sermon in New York, Philadelphia or Boston, with relatively the same ease and satisfaction as those who are actually present where the sermon is being delivered.

"It is now possible to throw the sermon from a dictagraph wire into a phonograph for permanent preservation. Many clergymen never prepare their sermons, and the best that they say under the inspiration of the moment is forever lost. The success attending our efforts in this direction on Sunday proves that we can now make a perfect record of these sermons while they are being delivered, at the same time that they are being sent over the telephone wire to distant points.

"From this record any number of copies desired can be made, and these copies sent broadcast for reproduction on family phonographs in the home, thus enabling many more thousands to hear the sermons than are able to crowd into the churches to hear them. A family living in the most remote part of the country can have at its hearthstone the best that has been spoken in this line. It can have a new sermon every Sunday by a different minister if it likes.

"Church organizations can arrange for the distribution of these records in the same manner as the books of a circulating library. Country churches and meeting houses without regular ministers, instead of waiting upon the itinerant circuit preacher, can provide their members with a sermon by the most distinguished pulpit orators of the great cities, via the new combination.

PAYEE CANNOT HOLD BANK.

Appellate Division Rules Against Brill Brothers in Unusual Case Which Is of Wide Interest to All Business Men—Negligence in Giving Prompt Notice of Dishonor Charged.

The payee of a protested note which is held by a bank cannot hold the bank liable for the default and release of an indorser if he himself has failed to forward to the indorser a notice of protest sent him by the bank which is in ignorance of the indorser's address. Enunciating this principle, which has hitherto not been defined, the Appellate Division has reversed a verdict of \$1,248.08 in favor of Brill Brothers against the Jefferson Bank. The court in a unanimous opinion, written by Justice Clarke, said:

"Brill Brothers were depositors in the Jefferson Bank and deposited therein two promissory notes for \$600 each, payable in four months, drawn by Henry C. Squires's son, G. Harry Squires, and indorsed Grace H. Squires, Brill Brothers. Mrs. Squires was the wife of G. Harry Squires. The notes were not paid when due and were protested. This action against the bank is based upon allegations of the complaint setting forth that the bank did not give due notice to Grace H. Squires.

"The bank's notary did not know the address of Mrs. Squires. He sent one notice to her, care of Henry Squire's Son, 30 Church street, the maker. It is conceded that this would not constitute due notice to her or reasonable diligence to satisfy the obligation of the bank. He also sent a notice addressed to Mrs. Squires, with the address blank, and a two-cent stamp attached thereto, inclosed in the envelope addressed to Brill Brothers, 47 Corlandt street, which contained the notice of protest addressed to them.

"Brill Brothers had the same time within which to give notice to the antecedent indorser that the holder had after the dishonor. They failed to forward the notice to their indorser. It is conceded that Mrs. Squires did not reside or have a place of business in the city of New York. The notary does not appear to have been negligent. He did what the law required; that is, he sent a copy of the notice addressed to Mrs. Squires to Brill Brothers. It seems to us that if they have been unable to collect from her by reason of negligence in notifying her of the dishonor it was their negligence and not that of the bank."

Honesty is still the best policy—yet there seems to be a lot of people who are opposed to playing "policy."

LOUIS BUEHN IS OPTIMISTIC

Regarding the General Outlook for 1914 and This Well-Known Philadelphia Talking Machine Jobber Tells Why—Closed an Excellent Year's Business in All Departments.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., January 13.—Louis Buehn is enthusiastic over the year's work, and looks in the most encouraging way to the future, believing that the new currency bill is going to make money easy and he is of the opinion that the trade will this year enjoy even a greater era of prosperity than they did in 1913. "The past month," Mr. Buehn says, "has been the biggest we ever had. I have closed not only the biggest month I ever had, but the biggest year, and for the first time in several years I feel that I have given my customers perfect satisfaction." Mr. Buehn has only the highest praise for the manufacturers for the way in which they were able to supply the wholesalers and retailers, and he says that only in a very few of the most popular records did he find a shortage. He could have sold a few more records had he been able to secure them, but even this loss of trade was so small that it would be folly to complain. Their dictating machine business also took quite a satisfactory jump in December.

Mr. Buehn is most optimistic regarding every feature of his business, and he says that the only thing he can see wherein the dealers could be benefitted, would be the establishing of the rule for the charging of interest on deferred payments, and even that he believes will regulate itself. He says the factories cannot be asked or expected to remedy the condition, but he believes that there should be a difference between cash and instalment prices.

ANNOUNCE THEIR ENGAGEMENT.

The engagement was announced this week of John Child Ray, familiarly known as "Jack" Ray, assistant to Assistant General Manager H. L. Willson, of the Columbia Graphophone Co., to Miss Marguerite Latham, of 1820 Cortelyou road, Brooklyn, N. Y. No date has been set for the wedding.

John C. Ray, who is a son of Herbert B. Ray, assistant advertising manager of the Columbia Graphophone Co., has been connected with the Columbia Co. for a number of years, having held several positions at the company's factories at Bridgeport, Conn., prior to joining the New York executive offices. Miss Latham is one of

the most popular belles in the Flatbush section of Brooklyn, and the engagement was announced at a luncheon given at the Crescent Club, of which Miss Latham's father, Ellis C. Latham, is a prominent member.

URGES LEAGUE TO AID BUSINESS.

Col. Leland Would Restore Confidence in Financial World by Organizing Owners of Business Enterprises Into a National League for Mutual Protection.

A proposal to organize owners of business enterprises into a national business league for the purpose of resisting further attacks by radical politicians and for co-operating with the Government in measures which will restore confidence and help to bring about a return of general prosperity, has met the hearty approval of Col. Francis L. Leland, president of the New York County National Bank, who furthermore stands ready to give financial support towards the legitimate expenses to be incurred in forming such an organization.

"Several years ago," said Col. Leland in discussing the matter, "I made a suggestion of this kind, and I am glad to see it revived in a proposal now before the Chamber of Commerce executive committee looking towards an association of stockholders in railway and industrial corporations. I approve of this heartily, but I would go further and include in a national business league owners of all kinds of business concerns, including small factories, retail stores and shops.

"It should not be necessary to have politics enter into such an organization in any way. Its one and only aim should be to aid responsible Government officials in legislation for the public good and to compel radical politicians of all parties to stop their continual attacks on American enterprise.

"Long ago it became apparent that some such organization would have to be formed, and the time is now ripe for it. I confidently expect to see it undertaken in the near future, and when professional politicians feel the weight of its influence business will be permitted to go ahead honestly and fearlessly and this country will enter upon a period of prosperity such as it has never seen before.

"Trade is the most important thing in the United States. It is through employment in agriculture, manufacturing, mining and mercantile enterprises that our people earn their living. When reckless politicians looking for votes hammer away at large business concerns without reason they destroy confidence in those concerns. The disastrous effects are felt all down the line, for in this country at least we are all interdependent."

A MUCH APPRECIATED GIFT.

With its customary thoughtfulness for its clientele, the Blackman Talking Machine Co., 97 Chamber street, New York, the prominent Victor and Edison distributor, sent out this week a key chainette, which is designed for practical use. It has a number of distinctive features, including a double-swivel lock and a flexible chain. The key portion of the device can also be used as an emergency screw-driver or Presto gas tank key, thereby greatly enhancing its value. The most important feature of the Blackman gift is the fact that each key is numbered, and the corresponding number kept on file at the offices of the company, so that if any Blackman dealer loses his keys, they will be returned to the company, who will, in turn, notify the owner of the keys. Detailed pains were taken by the Blackman Talking Machine Co. to make this plan as practical as possible, and thus the key chainette represents a gift of practical and useful import.

"I knew a man," said a live-wire young minister, "who attributed much of his worldly success to a rule he'd made for himself. He saw how much time and how many opportunities went wrong, and how much money was wasted by indecisionists, as he called them. So he adopted for one of his mottoes: 'Guess quick and stick to it.'"

PRESIDENT HUERTA PLEASSED

With the Record Made of One of His Recent Speeches—His Interesting and Appreciative Letter to the Columbia Graphophone Co.

In connection with the present political disturbances in Mexico, the Columbia Graphophone Co. is experiencing a heavy demand for the record made last summer by Gen. V. Huerta, the President of Mexico, around whom the disturbances are centering. This record in the Columbia library presents the speech made by Gen. Huerta, delivered before the National Representation.

It is somewhat unusual for a man of President Huerta's prominence to make records of his speeches, but the following letter, received some time since by the Columbia Graphophone Co., indicates the pleasure of President Huerta regarding his record:

"I take pleasure in sending you my most expressive thanks for your kind present of the record in which the speech which I delivered in the recent occasion before the National Representation is recorded. I congratulate you very cordially for the perfection and accuracy with which the said production is reproduced, and I take advantage of this opportunity to subscribe myself, yours very truly,

"(Signed) V. HUERTA."

EXPERIENCING A BIG DEMAND.

"Our new fibre-needle cutter, which we introduced to the trade a few weeks since, is proving considerably more popular than we had anticipated," states Thomas W. Kirkman, manager of the Standard Gramophone Appliance Co., 173 Lafayette street, New York. "Although we expected that our Standard cutter would be a success, we had not hoped for the very cordial reception the trade accorded it the first week it was introduced. There is undoubtedly a steadily growing field for fibre-needle cutters, as talking machine owners are beginning to appreciate more and more the musical value of the fibre needle. Our customers have informed us that they sold a vast amount of fibre needles the past year, considerably more than in 1912, and as every fibre needle purchaser is a cutter prospect, it is comparatively easy to figure out the possibilities in the fibre-needle cutter field."

DISCRIMINATING IN THEIR PURCHASES

Buyers of Talking Machine Record Albums Looking for Quality in Preference to Price, Says George Bates in an Interesting Chat.

"With dealers throughout the country reporting the best year in their history, which naturally signifies a vast number of new accounts, there should be a large increase in the demand this year for talking machine record albums," states George Bates, of the New York Post Card Album Co., 23 Lispenard street, New York. "Although the year just closed was the best we ever experienced, we are making preparations for a record-breaking year in 1914, in view of the new business that is on the books of the dealers.

"To my mind, the most important feature in the album business of the year just closed was the evident change on the part of the public in its attitude towards record albums of quality. Whereas a short while since, talking machine owners looked upon the record album as a slight incidental purchase, and bought any album offered them, they are now discriminating in their album purchases, and looking for quality in preference to price.

"A record album of inferior quality not only gives dissatisfaction to the customer regarding this single purchase, but causes him to lose confidence in the establishment where he bought it, which loss is, of course, a very serious matter to the dealer. It therefore rests with the trade to order albums that are constructed along the lines of quality and value for the money, and which will give service to their users for a reasonable length of time."

GREETINGS for 1914

The year 1913 is now but history, and at least in the talking machine business it has been a prosperous one.

We greet with **OPTIMISM** the New Year and forecast even greater prosperity for those who are alive to their opportunities. Our **DEEP APPRECIATION** is extended to those who have made our closing year prosperous.

Once again we say with **PRIDE** that the bulk of our business has come from hundreds of Dealers, and we have used every effort to safeguard their interests, avoiding neglect of the "old" while receiving and serving the "new."

We believe there is every reason to expect even **GREATER PROGRESS** to be made not only in ours, but **GENERAL BUSINESS**, during this year, for the business of the country is on a **FIRM FOUNDATION**, and there is evident a quite general feeling that "co-operation" brings better and more lasting results than "competition."

Don't overlook this, Mr. Dealer, or allow pessimists to make you lose faith in yourself or your business.

OUR POLICY for 1914 will be that of **FURTHER PROGRESS**, using the past only as a guide to avoid repeating mistakes, and considering the best results obtained, but a starting point for **FURTHER IMPROVEMENT**.

We will ask and encourage **CLOSER CO-OPERATION**, not only in our own organization but with everyone with whom we come in business contact. This is bound to produce **GOOD RESULTS**.

To **ENCOURAGE** the greatest confidence on the part of our trade, we will endeavor to be **BROAD** in our **POLICY**, giving every possible **SUPPORT** to those who deserve it consistent with good business judgment, whether it be in the extension of credit, shipment of goods or adjustment of claims.

Those Dealers who are merchants and doing their best to run their business **HONESTLY** will have our **FULL SUPPORT**, and we will in every way possible refrain from supporting, by extension of credit or otherwise, the class of Dealer who is a menace to the business and a **Bad Debt** for all concerned.

No **EFFORT** or expense will be spared to make **OUR SERVICE IDEAL** in every respect. With this object in view, give us **YOUR HELP** by pointing out **DEFECTS** in our organization that we may thus introduce **REMEDIES** where necessary.

Yours for a Happy, Healthy and Prosperous New Year.

Very sincerely

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, Pres.

97 CHAMBERS ST., NEW YORK

\$250.⁰⁰ for an idea

To All Talking Machine Dealers:

1913 was a great year for the sale of Columbia Double-Disc Records—greatest we ever had.

1914 will be at least twice as great. That much is certain.

Just how much will be depends, in the last analysis, on what happens over your counter; depends on the man who comes into *your* store, puts his money down on that counter of yours and gets his records from *your* stock.

Our business—and yours—depends on that man; depends on your being able to give him what he wants. *You* know that man; you know his likes and dislikes, you know what he wants and how and when he wants it.

Now then, knowing him as you do, *you* can tell us better than anyone else what we can best do to make him buy more Columbia Double-Disc Records; more even than he has in the past; to arouse still further his interest in the Columbia Double-Disc Records.

We will give as a prize a \$250 outfit—

The Columbia Grafonola "Regent" at \$200.

Nothing else on the market even *looks* like the "Regent." It is a complete library or living-room table for everyday use in exactly the same degree that it is a complete musical instrument of unexampled versatility and matchless tonal qualities.

a Grafonola "Regent" and \$50 worth of records—to the talking machine dealer who suggests the best method by which we can help you to secure closer and more profitable relations with your customers.

Don't think of the reward as a mere \$250. That machine is a mere detail. The big thing for you is the opportunity it opens for the adoption and operation of your own ideas.

You may suggest some one single feature which you believe would help; or you can lay out a whole campaign—production, advertising, distribution, selling.

No need to restrict suggestions to the selling end either. If you have any suggestions to make relative to this product, send them along. Write on any point you choose, so long as it has a direct bearing on Columbia Double-Disc Records.

This offer applies to every talking machine dealer in the United States and Canada—without regard to which line of product he carries.

It is the one best chance you ever had to get some of your own ideas in this matter adopted and put into operation.

Edward Lyman Bill, Editor and Publisher of The Talking Machine World, will be the judge to decide which is the best suggestion received. This offer is open until February 15, 1914. All replies should be mailed to Mr. George W. Lyle, General Manager, Columbia Graphophone Company, Woolworth Building, New York.

COLUMBIA

Graphophone Co., Woolworth Building, New York

What we are doing

FIRST—We are *doubling* our tremendous nation-wide advertising of Columbia Double-Disc Records.

SECOND—We have given Columbia dealers a new Advertising Record at 25 cents that is getting for them the name and address of every disc talking machine owner in their territory—and *you* know full well the enormous value of such a list to you.

THIRD—Record buyers are to discover that new records are no longer a mere once-a-month event. We are going to offer new records *three times a month*—on regular stated dates. That means that your customers will find something new pretty nearly every time they're anywhere near your store—they won't have to wait a whole month between visits.

Already you have had the first of the new dance records. That was one of January's happenings. Those dance records have made more actual business than any series of records ever announced in the trade. They are made *right*—the rightest dance records ever put out.

You know how we did this, how we engaged the services of G. Hepburn Wilson, the greatest living authority on modern dancing, to rehearse those records until they were right. The result is a series of tangos, waltzes and one-steps that have no equal—the finest dance records that ever moved across your counter.

Above all, don't lose sight of the fact that this is only the bare beginning of the year—1914 is only 15 days old. The start that we have made is certainly big as beginnings go, but it is just the start of things—nothing more than that. And the rest is on the way.

COLUMBIA

Graphophone Co., Woolworth Building, New York

THE VALUE OF CO-OPERATION IN THE CREDIT FIELD.

Difficulties of Credit Grantors Twenty-five Years Ago Compared with To-day—Wisdom of Unlimited Confidence and Unqualified Co-operation Prior to Shipment of Goods Properly Estimated—Means Fewer Bad Debts and Business Progress for All Concerned.

Twenty-five years ago credit grantors were not organized and either could not or would not co-operate, and I can go back further than twenty-five years and recall how the first local representative of a mercantile agency in Nashville left hastily one night, having issued an unfavorable report, which meant in those days not a lawsuit, but powder and lead.

The next step in the progress for the improvement of mercantile agency service consisted in the substitution of a damage suit for the shotgun. So you see those who have been in credit work for a good many years can appreciate how the exchange of credit information has developed.

We passed through a time in reaching present conditions when credit grantors would not give information that would weaken confidence in a party who was in debt to them; instead, many following the policy of speaking overfavorably of a customer whose obligation they were particularly anxious to be relieved of, believing that if the customer were able to secure goods elsewhere, their chances of collecting a doubtful debt would be increased; contrarywise, we find that such offense on the part of a member of our association to-day would be almost certain grounds for expelling the offender and bringing upon him loss of the respect of his friends whom he most prizes and needs, writes J. T. Jenkins, in *The Hardware Dealers' Magazine*.

The 600 credit men organized in 1896 have increased to 16,500 in 1913, giving us, in other words, a trained army of over 16,000 keen-minded men co-operating unqualifiedly and freely for a single purpose—that of getting and, in consequence, giving information.

Is there any exaggeration in my estimate of the degree of co-operation? Let us take an example.

A few days ago I called up a member of the association about a merchant, the acceptance of whose order I was considering. I had some doubt, yet not a great deal, regarding this prospective customer. Instead of making some misleading statement, as credit grantors were apt to do a few years ago regarding a customer from whom they were trying to get relief, this member told me that he had been forced to place his account in the hands of an attorney. He realized that he could not violate confidence in the exchange of credit information. He had learned that the protection 16,000 credit men afforded him against future losses was worth many times the amount of this particular debt.

But the wonder is, if our co-operation is so genuine in the exchange of credit information, why it ceases when two or more members are interested in the same embarrassed or insolvent debtor. Why is it that an army of 16,000 keen-minded men who can work together so satisfactorily in one point become demoralized and break up into small detachments on the appearance of a good-sized bad debt?

It has taken sixteen years of earnest teaching and effort to show the credit grantors of the country the wisdom of unlimited confidence and unqualified co-operation prior to the shipment of goods. Must we wait another sixteen years before applying this concentrated intelligence, this conscientious, unqualified co-operation to the conservation of embarrassed customers of the adjustment of insolvent claims; if the experience of sixteen long years has explained the meaning of unity of action, has convinced of the value of confidence and co-operation in helping us know our customers, should such united action, confidence and co-operation decrease or become less valuable when considered in connection with or invoked in behalf of a customer who has gone wrong?

Through the national bankruptcy law brought about and kept on the statute books by the influence of our association, the adjustment bureau for the handling of insolvent accounts has not only become desirable, but essential and inevitable. The spirit of the time is appealing to the intelligence

of 16,000 credit grantors, pleading with them to accept the benefits guaranteed under this law to every honest debtor and creditor.

The value of the work of the adjustment bureau in the reduction of losses from bad debts and the importance of the relation it bears to the whole question of credit granting cannot be over-estimated, and it is to be hoped that the earnest attention of all will be directed to this branch of work and that there may be in consequence a keener appreciation of the worth of this service. That it is of worth can no longer be doubted.

SCHOOLS OF SALESMANSHIP.

How a Great Corporation Trains Young Men to Become Good Salesmen—Some Interesting Statements as to Methods Employed.

In the columns of *The Talking Machine World* there has been a steady advocacy of the establishment of schools of salesmanship in the talking machine stores throughout the country.

Along these lines it is interesting to note that the officers of the National Cash Register Co. have made perhaps the greatest study of the subject of teaching their selling force than any other corporation in the country.

They have established a factory school where they teach the members of the selling staff everything in relation to the selling of their products.

In a recent address delivered before the Convention of Corporation Schools held in Dayton, O., R. H. Grant, assistant to the sales manager, made a very interesting address in which he described at length the method adopted by the National Cash Register Co.

The course of instruction covered five weeks, and the students' expenses are borne by the company. There is a regular outlined course of study. Written examinations are given to make the men work, and diplomas are awarded to show how they have completed the course. This corporation believes that to have a good selling organization you must get good men. Then when you get them, you must train them. In other words, train everybody to make good at the selling end of the business.

Mr. Grant said in the course of his remarks:

"We carry on post-graduate schools. There are times when we take men into the factory and have a school of sixty to seventy men that we pick from our selling force, men who four or five years ago went through the elementary school; men that we believe need to come back here, and while they may be excellent men and be making good records, we feel that if they come back here and see what we have, see the new things that are proposed, the opportunities that exist, come here and work under a competent instructor, that they will be bigger and better and more self-reliant when they go back into the field.

"Then we have the Owl Classes, which give our people here in the offices the rudimentary ideas of selling with a view of making them better men, because we broaden the scope of their vision, and also prepare them for outside positions later on.

"Those make up the different teaching features of our selling department. I trust in this explanation I have made clear the idea that education must begin in an elementary way and go on through post-graduate courses *until you have a lot of men who will take care of their own education, and until you do that you cannot have an ideal selling force that can be called successful.*

"In our training school we take up the following subjects: Preparation, Advertising, Weaknesses of systems in use, The approach, The re-approach, Installations, Collections.

"In taking up these subjects in the school the instructor uses plain business language. We can only use to advantage scientific and psychological data after it has been reduced to simple English.

"We believe in small words and in big ideas. The president of our company has always taught us that way. We believe in all the psychological

research possible, we believe in all the tabulation of scientific data that is possible in order that when the facts are understandable to the ordinary man, we may make use of them. We believe in practical salesmanship; we believe in having men who understand what they are talking about and having them put it up to the man in front of them so that they will know what is being talked about, and we don't believe you can do it in high-flown terms. If we picked a group of highly-educated men they might understand what was being discussed if you used big words, but you cannot do that with salesmen as a rule. To be successful, salesmen must have a desire to sell; they must have courage, ability to work; they must be loyal to the company and so forth, but they do not necessarily have to be more highly educated than the trade they call upon, consequently the teaching should be in the most simple language.

"I want to say a word on the subject of advertising and selling as a combined subject. In our schools you notice the second subject is advertising. It is an important subject to a salesman, and the trouble is that most salesmen and managers do not know it and many times sales and advertising managers are not co-operating as they should. Advertising matter is not being used by salesmen as it should. Much money is being spent and there is a waste unless you get close connection between the two departments.

A HEARTY NEW YEAR'S GREETING

Sent the Trade by the National Publishing Co. of Philadelphia—Closed a Great Year in the Sale of Record Albums and Expects a Bigger Business During 1914.

The National Publishing Co., 235 South Market street, Philadelphia, Pa., who have built up a large business in talking machine record albums have just sent out a New Year's greeting to the trade, in which they say:

"The old year has passed through the gate that swings but one way, and the air is full of good resolutions; if one-half of them are kept, two-thirds of our sorrows will fade away. There is not much to be had in this life unless you go after it, so wish yourself some and in doing so put your heart in it, but do not put your foot in it. 'Wisdom consists largely in knowing when to quit.' Our wish for you is a happy and prosperous new year."

The record albums made by the National Publishing Co., have won a large degree of favor throughout the trade by reason of their durability, artistic design and finish. With the index they form a very complete system for filing disc records, and while invaluable to those who have no cabinets on hand, they also form a very important adjunct to those having cabinets and a surplus number of records, for through the aid of record albums they can be filed away most conveniently.

The record album trade is proving quite a trade factor with dealers who are pushing it intelligently, and bringing the value of the record to the attention of record customers. The fact that it makes record stock sightly in the home is a point worthy of emphasis.

INTEREST ON UNPAID PAYMENTS

Being Discussed in Indianapolis and a Special Committee Appointed to Take Up This Matter—Victor Dealers to Be Interviewed.

Robert O. Foster, of Foster & Waldo, has been named as a committee of one to interview the Victor dealers in Minneapolis, about ten in number, and to urge an agreement to exact interest on unpaid amounts due on talking machines sold on the instalment plan. Most of the persons interested are piano dealers, and they see no distinction between piano purchasers and Victor purchasers in the matter of granting concessions on instalment payments. However, Mr. Foster has encountered some opposition to the plan, but expects to convince the objectors that the plan is for their interest.

At the present session of Congress efforts will be made to advance, by gradual steps, the rate limit on packages sent by parcel post, until the hundred pound limit is reached.

REMARKABLY LARGE SALES REPORTED IN MILWAUKEE.

Not Only for December but for the Year—This Applies Pretty Much to All Concerns in That City—Our Correspondent Presents Some Interesting Data in This Connection Which Make an Impressive Showing Regarding Holiday Business—News of Month.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., January 10.—Despite the dullness experienced in some lines of industry during December, Milwaukee talking machine dealers met with an exceptionally fine holiday business. In fact, there is hardly a Milwaukee house which did not establish a new high record in the sale of both machines and records. Sales of lower-priced machines may not have been quite as heavy as usual, but this was more than offset by the remarkable business secured in machines ranging in price from \$50 to \$200. One Victor retail house disposed of \$4,000 worth of machines and records during December, while two well-known piano houses carrying the Victor line, sold approximately \$5,000 worth of goods during the past month.

Jobbers say that dealers about the State sent in rush orders for stock almost up to Christmas day, and that the total volume of business in the wholesale field was more than satisfactory. Dealers seem to be unusually low on stocks after the holiday rush, and most of them are placing some good orders, that they may get their stocks up in normal shape once more.

The outlook for the coming year seems to be bright at this time, and jobbers and dealers are confident that a good business will be experienced.

The Milwaukee Phonograph Co., jobber for the Edison line, met with a big business in disc machines and records during the month of December, according to William A. Schmidt, general manager. Dealers seem to be more than pleased with the new Edison machines. Joseph A. Bitts, of Kenosha, Wis., who recently installed the Edison line, and W. J. Augustine, Fond du Lac, Wis., and John R. Bolz, Kiel, Wis., were recent visitors. A large number of new Edison dealers were secured before Christmas.

Business has been so good with the Smith-Gensch Co., 730 Grand avenue, enterprising retail Victor concern, that it has put out two new outside salesmen, covering Milwaukee and Milwaukee County. Sales of Victor machines and records during the holiday period attained a new high mark with this house.

J. H. Ellis, the inventor of the "Real Tone" diaphragm, has been made the manager of A. G. Kunde's branch, at 3410 North avenue, opened a few months ago. Mr. Ellis is enthusiastic over the Columbia line, and ought to meet with success in his new field. Mr. Kunde says that the holiday trade at both his downtown and branch stores was exceptionally good.

The W. H. Aton Piano Co., which handles the Victor and Edison lines in Madison, Wis., is meeting with particularly good success. Several new Victor dealers have been secured about Wisconsin by the Wisconsin Talking Machine Co.

The Edmund Gram Music House met with unusual success during the holiday period and Victor sales climbed to a new high mark, says Paul A. Seeger, manager of the Victor department.

The Victor department at Gimbel Brothers, under the management of L. C. Parker, experienced a gain of 41 per cent. during December, as compared with the corresponding month in 1912. There are six demonstration parlors in the Victor hall at the Gimbel store, but Manager Parker says he could have used ten more during the holiday rush

and that he could have increased his total sales as a result.

The Victor talking machine departments at the two stores of Edward Schuster & Co., met with a fine holiday business and good sales are reported by Miss Frances Elman, manager of the department at the Twelfth and Vliet street store, and Miss Elizabeth Hughes, manager of the Third and Garfield street establishment.

C. W. Abbott, enterprising young manager of the Victor department at the Boston store, and Miss Jule Steiner, in direct charge of the Victor department at the J. B. Bradford Piano Co.'s store, are enthusiastic over the big business secured by their departments during the month of December. The Bradford house has been following the scheme of allowing the piano salesmen to round up talking machine sales when out on piano prospects, and the results have been more than satisfactory.

There are rumors afloat in Milwaukee that another new retail talking machine store will be opened in the downtown district within the near future by the jobber of a well-known line. The more the merrier.

The Heller Piano Co., which was forced into involuntary bankruptcy some months ago, a concern which carried the Victor talking machine line, filed its schedule some time ago, disclosing liabilities of \$248,310.03, and assets of \$421,760.81.

ENTHUSIASTIC OVER THE PROSPECTS.

A. W. Toennies Reports Big Gain in Business of the Eclipse Phonograph Co., Edison Disc and Cylinder Jobbers, for Year Just Closed—Many Dealers Signed Up.

"After closing the best year in our history, we are naturally enthusiastic over the immediate prospects for spring trade," stated A. W. Toennies, of the Eclipse Phonograph Co., 203 Washington street, Hoboken, N. J., jobbers of Edison disc and cylinder products exclusively. "Our gain over 1912, our former banner year, was surprisingly large, and the most gratifying feature of the Edison business is the fact that our business this month up to date shows a substantial increase over January, 1913, and steadily growing.

"The Edison disc line is certainly increasing in popularity at a remarkable pace. Since the first official announcement by Thomas A. Edison, Inc., a few months since, we have been signing up new dealers day by day, and those members of the trade who joined the Edison disc band-wagon in the fall have all advised us of the closing of an excellent holiday business. The musical qualities of the Edison disc product, coupled with the advertising that is now appearing in all parts of the country, have certainly contributed in a large measure to this impressive success.

"The hornless types of Edison cylinder phonographs are maintaining a steady popularity with our dealers, and it is pleasing to note that the demand seems to be strongest for the higher-priced hornless machines in preference to the cheaper models. As a matter of fact, the outlook for both Edison disc and cylinder products is very encouraging, and we expect 1914 to be even better than last year."

"ONE PRICE" A DISTINCT BENEFIT.

The Supreme Court of the State of Washington So Holds in a Very Important Decision Handed Down Last Week, and Which Is of Interest to Those in the Talking Machine Trade, as Well as Those in Other Industries, Who Believe in the Maintenance of Prices.

A decision of exceeding importance to the talking machine trade, and to all who believe in price maintenance, was handed down by the Supreme Court of the State of Washington last week in an action brought by the Fisher Flouring Mills Co. against a retailer who had cut the price of his products contrary to agreement.

The suit brought by the milling company was defeated in the lower court. The decision of the Supreme Court of Washington was handed down by an eight to one vote, and the Fisher Co. granted injunction and damages; the findings of the lower court reversed, and thus an important step taken toward the recognition of the one-price-to-all has a distinct benefit to the consumer. In its opinion the court says in part:

"In the absence of a monopoly, either actual or potential, a contract fixing retail prices to the consumer cannot have an effect appreciably inimical to the public interest, because it cannot fix prices at an unreasonably high figure without defeating its own purpose by either signally failing to maintain the fixed price or putting the individual manufacturer out of business. In either case it fails to restrict competition.

"The true competition is between rival articles, a competition in excellence, which can never be maintained if, through the perfidy of the retailer who cuts prices for his own ulterior purposes, the manufacturer is forced to compete in prices with goods of his own production, while the retailer recoups his losses on the cut price by the sale of other articles at or above reasonable price.

"It is a fallacy to assume that the price-cutter pockets the loss. The public makes it up on other purchases. The manufacturer alone is injured, except as the public is also injured through the manufacturer's inability, in the face of cut prices, to maintain the excellence of his product.

"Fixing the price on all brands of high-grade flour is a very different thing from fixing the price on one brand of high-grade flour. The one means destruction of all competition and of all incentive to increased excellence. The other means heightened competition and intensified incentive to increased excellence. It will not do to say that the manufacturer has no interests to protect by contract in the goods after he has sold them. They are personally identified and morally guaranteed by his mark and his advertisement."

Recent United States Supreme Court decisions, while forbidding the manufacturers of patented and copyrighted goods to set the retail price, have been based upon the assumption that the producers involved in the particular actions were actual or virtual monopolists, and these decisions have stopped short of the point as to whether it is legal under any circumstances for a maker to set the price at which the consumer may buy the goods.

A new home disc recorder has just been designed by Senor Alvaro Malibrán, a Spanish inventor, which is described as a strongly constructed mechanism with all the exterior parts nickled. It is claimed for this device that it is adaptable to any disc talking machine, and will reproduce a big volume of sound with remarkable tone fidelity.

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

Gun Metal, \$2.00 list. Nickel Plated, \$2.50 list. Gold Plated, \$3.00 list.

May be adjusted to both Columbia and Victor disc machines. Order from any Columbia Distributor.

A HANDSOME ORDER BOOK.

Has Just Been Sent Out to Its Friends by the
New York Talking Machine Co., New York—
Convenient and Very Handy for the Dealer.

The New York Talking Machine Co., 81 Chambers street, New York, the well-known Victor distributor, is now sending out to its trade a handsomely bound order book, which in addition to being attractive and artistic, is primarily a book which can be used by the dealers to excellent advantage. The company has in former years sent out order pads to its trade, but this year it was decided to design a book which could be used the year round, and afford the dealer an opportunity to place his orders with a maximum of convenience.

The order book which is now being mailed to the New York Talking Machine Co.'s trade, is intended for those dealers on the company's books who have purchased their machines and records during the year with any degree of regularity, and the dealers who have already received their books, are enthusiastic in their praise of its many merits.

The book which is designed along the lines of a loose-leaf folder, permits the dealer to insert another order pad as soon as one is finished, as the leather covers make a permanent folder. Each order pad has carbons attached to the original orders, so that the dealer has a reference file of all the orders he has placed. The order pad is furnished with perforated lines, making the ordering of goods convenient to a degree.

This new order book is bound in an artistic dark green limp leather binding, with the name of the New York Talking Machine Co. suitably printed on the cover. The famous dog trademark of the Victor Co. is shown on the center of the front cover, and the entire arrangement is one of dignity and refinement. The individual dealer's name is printed in gold on each book, giving an atmosphere of personal ownership, which naturally adds to the attractiveness of the book.

The New York Talking Machine Co. is to be congratulated on its latest co-operative plan, as this

book represents a valuable time-saver for the Victor dealer.

NEW EDISON DEALERS

In New York City and Adjacent Territory
Given Out by Thomas A. Edison, Inc.—List
Is Steadily Growing as Sales Increase.

Thomas A. Edison, Inc., Orange, N. J., has been featuring in the daily newspapers the past few weeks, an interesting list of some of the Edison disc representatives in local territory, who have taken on the line during the past few months. This list, which is constantly growing, gives a fair indication of the popularity that the Edison disc phonographs and records are achieving in this territory.

The public was invited to attend demonstrations at the stores mentioned in the advertisements, and this invitation was responsible for the drawing of interested visitors to the establishments of the dealers, which resulted in the closing of many sales.

Among the names presented in these Edison disc advertisements, were the following: Hardman, Peck & Co., Tower Manufacturing and Novelty Co., Fred Kraft, Inc., Krakauer Bros., M. Goldsmith, George Bergmaier, Paul Helfer, Cort Sales Co., and Sol. Lazarus, all of New York; Hardman, Peck & Co., B. Guy Warner, Alphonzo Smith, Charles G. Rosewell, Louis Chevalier, George S. Uniss, Guarantee Phonograph Co., T. H. Clancy and A. Eckel, all of Brooklyn, N. Y.; Frank Stedman, 41 Warburton avenue, Yonkers, N. Y.; Yonkers Talking Machine Co., 37 Palisade avenue, Yonkers, N. Y.; Albert Galuchie, 492 Communipaw avenue, Lillie Heidenfelder, 370 Central avenue, Henry Rau, 110 Monticello avenue and William Ricker, 658 Newark avenue, all of Newark, N. J.; the Quackenbush Department Stores and James Rigby, Paterson, N. J.; James L. Abbott & Son, Fort Lee, N. J.; Henry F. Schmidt, 200 Main street, Orange, N. J.; Fred G. Loeffler, 260 Bergenline avenue, Union Hill, N. J., and Henry A. Maas, 417 Spring street, West Hoboken, N. J.

SPANISH RECORD CATALOG.

The export department of the Columbia Graphophone Co. issued this week its annual Spanish record catalogue, which, in addition to being considerably thicker than the 1913 edition, embodies a number of distinctive features which constitute a decided improvement as compared with former editions. Valuable indexes and appropriate photographs add to the artistic appearance of the new catalogue.

H. L. Willson, assistant general manager of the Columbia Graphophone Co., is expected back early next week from a short trip through the important trade centers of the Middle West, where he has been receiving good reports regarding business.

Mr. Dealer:

\$witky \$ervice \$pells \$uccess for YOU

IT MEANS The Machines and Records You Want, When You Want Them.

Expert Assistance in Making Sales of Machines and Records Whenever Required.

Expert Instruction in the Proper Care and Repair of All Styles of Machines.

Expert Assistance in Writing Advertisements and Preparing Publicity Matter of All Kinds.

An Exchange Bureau for Surplus Victor Stocks Among the Dealers.

A System of Credit That Is as Liberal as Possible Under All Conditions.

You Pay for the Goods—the Service, Tested and Successful, Is Free.

NOTED ARTISTS SIGN WITH COLUMBIA

Margarete Matzenauer, the Famous Operatic Contralto, and Eduardo Ferrari-Fontana, Tenore Robusto, to Make Records for the Columbia Co.—Both Artists Have Achieved Great Success in Opera.

The Columbia Graphophone Co. closed a number of important new deals with prominent artists during the past few weeks, whereby the Columbia record library will add to its lists many new records within the next few months. These additions form valuable helps for Columbia dealers with patrons who appreciate operatic music.

Margarete Matzenauer.

The most important of these new Columbia acquisitions are Mme. Margarete Matzenauer, the internationally famous contralto of the Metropolitan Opera Co., New York, and Eduardo Ferrari-Fontana, a member of the Boston Opera Co., whose splendid performance last week at the Metropolitan Opera House in the leading tenor role of the new opera, "L'Amore di Tre Re," was one of the events of the operatic season.

Mme. Matzenauer, although she has been a member of the Metropolitan Opera Co. but a few years, has achieved a noteworthy success in this short time, and has won the admiration and praise of the leading musical critics of the country. Her voice, which is a rich contralto, has been generally commended by all operagoers for its many musical qualities, and her success in the Metropolitan Opera Co. has earned for her a prominent position among the leading contralto singers of the world. Her records will be valuable additions to the Columbia Co.'s operatic library, which is growing steadily.

Eduardo Ferrari-Fontana, in addition to achieving a country-wide reputation through his Boston Opera Co. appearances, scored an instantaneous success in his initial New York performance in the new opera at the Metropolitan Opera House. Referring to this opera, the musical critic of a leading New York morning newspaper said:

"The performance of the new opera was notably fine. Its most conspicuous feature was the first appearance in the Metropolitan Opera House of Eduardo Ferrari-Fontana, who took the part of 'Avito.' Mr. Fontana, it is understood, had sung the part in some of the earliest performances of it in Milan. He made an immediate success, not only by his fine and impassioned acting—acting of genuine tragic temperament and of finished skill—but

WANTED.—Wholesale man to sell Victor goods exclusively; must have a knowledge of the trade in New York City and surroundings; employment on a salary and commission basis. All communications held strictly confidential. Address Max Landay, 563 Fifth Avenue, New York.

WANTED.—Intelligent saleslady to sell Victor Talking Machines. Good position to the right party. Write, stating full particulars in first letter, "No. 600," care The Talking Machine World, 373 Fourth Avenue, New York.

NEW IDEA IN CABINET TALKING MACHINE.—I have an entirely new idea in a Cabinet Talking Machine, and would like to hear from any party in reference to financing the same. Address "K. R., 12," care The Talking Machine World, 37 So. Wabash Ave., Chicago, Ill.

WANTED.—Capable young man, experienced in selling Victor Talking Machines; to such a salesman is opened a permanent position with chance of advancement; must be steady and a hard worker. Write giving full particulars. Address "No. 602," care The Talking Machine World, 373 Fourth Ave., New York.

still more on account of his remarkably beautiful tenor quality. He is a true 'tenore robusto,' with not only power but also fullness, richness and warmth of tone, splendid resonance and penetration, especially in his upper ranges. Mr. Fontana sings with admirable art, with style, in a manner that makes his voice count for its utmost. He would seem to be a valuable acquisition for the Metropolitan Opera House. If Mr. Fontana's future appearances bear out the promise he offered in his first one, his work in New York will be watched with interest and pleasure."

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York for the Past Four Weeks.

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 9.—Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past four weeks from the port of New York.

TELEGRAPH ERROR RULING.

Company Not Responsible Unless Gross Negligence Is Proved.

(Special to The Talking Machine World.)

ALBANY, N. Y., January 8.—It is important to members of the piano trade and business men generally to know that a telegraph company is not responsible for errors made in a message unless they are the result of gross negligence. This is the opinion handed down by the Court of Appeals held recently.

This opinion was handed down in the case of Stephen M. Weld & Co., cotton brokers, against the Postal Telegraph Co. Weld gave an operator in the New York office a message to sell 20,000 bales of cotton at not less than 12.70 a pound, and, owing to an error in the message, it was sold at 12.07, thus inflicting on Weld a loss of \$27,565.

On the first trial of the case Weld obtained a verdict for \$10,000 damages. The Court of Appeals sent the case back for a new trial because of error in the charge to the jury. A second jury gave Weld a verdict of \$36,684. In reversing this verdict to-day because of error and granting a new trial, the Court of Appeals explained that proof of gross negligence would be necessary to warrant giving Weld a verdict. The opinion was unanimous.

There are many who cannot enjoy the sunshine of to-day for fear it will rain to-morrow.

A Big Money Making Opportunity for Talking Machine Men

Do you know how best to improve your business?

Try pianos and player-pianos.

We have the best player-piano proposition in America, barring none.

We can offer it to you right.

We can put you absolutely on the inside so far as pianos and player-pianos go.

Our facilities and our knowledge of the trade situation enable us to do this.

We can build your business so that it will show a substantial growth in profits long before the close of the year.

That sounds interesting, does it not?

Take the matter up with us, not soon, but now—just now, when the year is young and the opportunities for good business lie before you.

Remember, every day—every week—every month that you delay investigating this piano proposition you are standing in your own light. You are making the business corners of your establishment dark, when they should be illumined by good, bright piano sunshine!

We have built one of the largest piano enterprises in the world through the delivery of values.

SUBSTANTIAL REASONS FOR OPTIMISM IN 1914.

Prospects of the Year Interestingly Analyzed by J. Newcomb Blackman, the Prominent New York Jobber, Who Says That the Man Who Has Been Running His Business on a Conservative Basis Need Have No Fear as to Business Progress in 1914.

In response to a request for his opinion as to the business outlook for 1914, J. Newcomb Blackman, president of the Blackman Talking Machine Co., the prominent Victor and Edison distributor, said: "Analyzing the prospects for the year, in my opinion, those who are in a position to do business under normal conditions, have every reason to be optimistic regarding the future, as the prospects are decidedly bright. By this I mean the man who is not on the ragged edge, but who has been running his business on a conservative basis, need not have any fear as to business for 1914.

"The whole question of the year's prosperity naturally hinges on the condition of the country itself. We have for sometime been living in a state of unrest. This includes the entire American people—the wage-earner, the business man and the Government officials. The wage-earner naturally did not know to what extent he would be affected by such action as politics might bring about in business. The business man was uncertain and fearful as to what might happen on account of the changes in politics and the agitation of the wage-earner.

"All factors in the business world, however, have sobered up somewhat during the past few months and have begun to realize that we have reached the point where we must co-operate. The wage-earner is beginning to understand that there is a limit to what he is entitled and can earn from an economic standpoint. The business man feels that the simplest and best way to meet conditions is to co-operate both with the Government and with his employes. The Government is beginning to view the situation as calling for safe and sane legislation based on results for the people.

"In other words, during the past year or two, we have attempted to undo and straighten out a

condition which it has taken many years to develop, and extreme measures are now being recognized as inadvisable. The so-called trust seems ready to admit the irregularities of its methods and shows a disposition to peacefully adjust

J. Newcomb Blackman.

its affairs. The Government apparently invites such adjusting with the President as spokesman. The bankers, who have been so much agitated over the currency bill, evidently hoped for more than they ever expected to receive and have settled down to the conclusion that the present bill is

something better than they had originally hoped for.

"Pessimists can find no real basis for their contentions, for the country is prosperous at its source of production, which is the crop production, and business has benefited by the enforced conservatism following the panic of 1907. The wage earners are getting better wages to-day than they have ever received, and if the new tariff law does not reduce the cost of living, there is at least the prospect of it halting the constant increase. The income tax will, no doubt, fill in the gap, placing the burden on those who can best stand it and removing it from those who have stood it in the past and felt it most. This situation, I believe, is simply an adjustment of conditions in response to a general demand, and so long as this demand is general there can not be serious opposition and therefore no ground for pessimistic and discouraging views.

"The talking-machine business stands practically where it has been, not only because the goods have merit and the prices and discounts are reasonable, but because of the frank and open manner in which the business has been conducted. Whatever restrictions there have been placed around the talking-machine business have been well known and participated and shared in alike, and the public has always been protected by quality and price without discrimination.

"The sane level, on the part of the Government, between the abuse of over restriction as against open competition will, I believe, soon be reached, and the aggressive methods of the manufacturers, through their manufacturing, advertising and marketing of goods, coupled with a never waning desire on the part of the public for music and the unlimited variety of the talent offered, will, to my mind, cause the talking-machine business to show a healthy increase. In view of this I do not think any manufacturer, jobber or dealer who has reasonable capital and ability, need have any fear about the future, for if there have been any "hard times," I think they have passed as a reality or as threatening clouds."

Mr. Dealer: Could you spend but five minutes in going over the letters we have received from dealers and consumers in all parts of the country you would be just as enthusiastic as we are about the Masterphone. Now that the Masterphone for Fibre Needles is ready for delivery, you have an exceptional opportunity to sell your customers an attachment that will give them the best there is in the records with the assurance that there is absolutely no wear on the records.

The Fibre Needle Masterphone retails at \$1.50. Regular trade discounts apply, assuring you of a good profit.

Inquiries from localities in which we have dealers are referred to them.

CLOSER RELATIONS BETWEEN JOBBER AND DEALER.

F. H. Silliman, of the Pardee-Ellenberger Co., Is Firmly Convinced That One of the Best Ways Whereby the Jobber Can Promote Closer Relations with His Dealer Is to Have the Right Kind of Men on His Traveling Force, Who Will Act as Business Advisers.

Many men prominent in the phonograph trade have discussed this subject at various times. It is of great importance to both jobber and dealer, and one open to much difference of opinion.

From my own observation, covering a number of years as a traveling salesman, and later as manager of traveling men, I am firmly convinced that one of the best ways the jobber can promote closer relations with his dealers is to have the right kind of men on his traveling force, calling at regular intervals on the dealer.

The kind of traveling man I have in mind, studies his territory in a thoroughly scientific manner, and knows the particular requirements of each individual dealer that he calls upon. He is of great help to his dealers; they look to him for suggestions; he often arranges their advertising and shows them how to display their line to the best possible advantage. He is the dealer's right hand man, often standing between him and the jobber on the matter of credits; for the credit man must rely to a considerable extent on the traveling man's thorough knowledge of his dealers.

The right kind of a traveling man will fight for his house to the last ditch when on the road, and when he gets to the office will fight for his dealer's interests in the same manner. In a large territory, very few dealers get to know anyone connected with the jobbing house but the traveling man, and the impression he gets of the traveling man is his impression of the whole concern. Often a dealer will have a prospective customer for a high-price phonograph which he cannot close. Here is where the traveling man should shine to

PREVENTING FREIGHT LOSSES.

Caution on the Part of Consignee in Checking Weights and Rates and in Watching for Loss or Damage Will Save Much Trouble.

A large part of the delay and trouble experienced by shippers, in the matter of claims for freight overcharges and in the securing of prompt adjustment of claims for loss or damages, is attributable to negligence on the part of the receivers (consignees) of freight, who frequently are not interested in the overcharge or loss or damage, charging the same back to the shipper.

With the purpose of securing co-operation and improved methods on the part of receivers of freight, they should weigh their freight and check the rates applied, so as to insure the proper charge and thereby avoid an overcharge. The receiver of freight should likewise require the proper notation to be made on the freight bill by the delivering agent in the case of loss or damage apparent at time of delivery, and in the case of concealed loss or damage he should make an immediate report to the delivering agent.

With the view of securing co-operation of the receivers of freight, we recommend the preparation of a small blank, six by three inches, to be used as an "insert" with the transmission of bills of lading or shipping tickets of the following form:

"Important—Weigh your freight and check your rates. Examine goods before accepting. Do not give clear receipt if damaged or short. We hold a clear receipt for the transportation company that the goods have been delivered to them in first-class condition."

To prevent overcharge carefully check the weights of the items received against the weight on the freight bills. Have rates verified when you have reason to believe they are incorrect. Insist upon agent correcting charges to basis of actual weight and tariff rate.

Require agent to endorse upon original freight bill shortages disclosed at time of delivery, and in case of damage to make notation on freight bill of the exact nature and extent of damage.

Concealed loss or damage disclosed after delivery upon opening a package should be immedi-

ately reported to the delivery agent, and an exception requested with statement of the facts disclosed.

advantage, both for the dealer and the firm he represents. He should devote enough of his time, and the time of the jobber who employs him, to make this sale that the dealer is unable to close. This should be comparatively easy for the traveling man, as the prospect is bound to be impressed by one who represents the jobber. The traveling man has a mind full of similar cases, and his sales talk is bound to be more impressive than any talk the dealer could give. If the sale is made, the jobber has certainly helped the dealer and promoted a closer relation between them both.

What the new dealer needs is education; and speaking for ourselves, we teach him. Our salesmen are not only salesmen in every sense of the word, but are business advisers. As an institution, we are trained to act as the new dealer's counsel; to advise him about the technical features of the machines; to instruct him on the scope of the records and their value as a permanent monthly income; to assist him in writing advertisements and in the promotion of business; to help him secure a firm footing on the rocky ledge of credits; to show him about window displays, advertising and other publicity; and, in fact, aid him in a hundred and one ways for the successful growth of his business.

What all jobbers and jobbers' assistants should remember is that there is a great deal more than the bare sale of goods to the dealer; and when they do bear this clearly in mind they will find retail distribution on a more efficient basis; and after all, it is the retail sales that count with the jobber.

ately reported to the delivery agent, and an exception requested with statement of the facts disclosed.

A TRADE VETERAN HONORED.

Banquet Tendered Edwin E. Forest by His Friends Upon His Seventieth Birthday—Long Connected with Talking Machine Trade

An affair of much interest was held this week at the Carlos Restaurant, New York, when a number of friends of Edwin E. Forest in the talking machine trade tendered him a banquet in honor of his seventieth birthday. Mr. Forest, who has had a long and interesting career in a number of fields, starting in the lumber business and progressing through the provision, restaurant, confectionery and printing trades, was one of the first to enter the talking machine field in its early days and was ranked as a recording expert with the old New York Phonograph Co., Leeds & Alcock, and finally the Leeds & Catlin Co., until the latter concern was forced out of business some years ago. Mr. Forest is at present actively connected with the talking machine department of Gimbel Bros.

Those present at the dinner, which was later followed by a dance, included, besides Mr. and Mrs. Forest, George W. Morgan, manager of the piano and talking machine departments, and J. H. Dodin, head of the talking machine department of Gimbel Bros.; Benj. Switky, who acted as toastmaster, and I. Davega, Victor distributors; Lippman Kaiser, and others to the number of twenty.

TO FEATURE ADVERTISING RECORD.

The popular Columbia advertising record will be featured in the two Columbia advertisements to appear this month in the Saturday Evening Post, one on January 17 and the other on January 24. Special combination lists of records which can be obtained at certain prices will also be presented, as this listing of records is generally commended by the trade as productive of numerous record sales that may otherwise have been lost temporarily.

SUCCESS ISN'T MATTER OF RULES.

"Something Inside a Man," Says English Leader—Know Men Who Win.

Writing in Pitman's Magazine, a new English publication devoted to business, A. E. Bull outlines the kind of people it is necessary for the man to know who would find success in the commercial world. Says Mr. Bull:

"A remarkably successful man, who had commenced in poverty and who had built up a world-famous business, was once asked to explain the secret of his success.

"My dear man," he said to the interviewer, "it can't be done. I can no more tell you how I succeeded than a bird could explain how it learned to fly."

"But," protested the interviewer, "you surely have some rules of conduct and business methods that you have adhered to through life, and which would account for your success?"

"Yes, I have rules," replied the successful man, "but rules are nothing. Success isn't a matter of rules. It's something inside a man, something that belongs to his nature and character. If a man has it, he will succeed; if he hasn't, all the copybook headings in the world won't give it to him."

"That was the opinion of a man who had succeeded and knew his own nature, and, up to a point, it has a great deal of truth in it.

"Here is a second reply to the question which was put to the millionaire. The man who made it was by no means so prosperous, but he had succeeded beyond reasonable expectations. He was certainly more successful than those who knew him best thought he would be, for he was not a particularly able man in any way.

"I made one rule in life," he said. "I regard it as a duty to succeed, so I persistently sought the company of those who had succeeded. If a man was a failure I avoided him, not out of any snobbishness, but because I could not afford to run the risk of catching the infection of failure from him."

"His was a most curious idea, that success and failure are infectious, and that one can catch them just as he can catch fever and colds. Here is the point of the remark and the truth of it. It is just the same opinion as that of the millionaire, though presented in a different way:

"The things that bring success are the things that belong to character. To succeed one must mold the character aright. Nothing influences character so much as companionship. In his mind it worked out this way: Make companions of weak people and one becomes weak; make companions of strong people and one becomes strong."

Welcome trials, for remember it is usually difficulties and responsibilities that bring a man to the fore.

REGARDING THE PROPER HANDLING OF EMPLOYEES.

The Questions of the Training of Talking Machine Salesmen, Their Wages and the Methods of Interesting Them in Their Work Discussed in Interesting and Thoroughly Practical Fashion by Benj. Switky, the Prominent Victor Distributer of New York.

Ninety-five per cent. of the dealers of my acquaintance have more or less trouble with their "help." It is an everpresent source of annoyance and trouble to them, and I have often listened to their really serious complainings that they were either handicapped or caused to suffer financial loss by reason of unsatisfactory help. Therefore it might be well for us to dwell on some of these problems in the hope that a little light may be cast upon them so as to help brighten the dealer's path and make easier the journey to the goal of profit and success.

But first of all, I think it will do more good than harm if we point out to our good friend, Mr. Dealer, that usually he is himself to blame for most of his troubles. If he will accept the responsibility and take upon himself the duty of properly training his help, see to it that they are not underpaid, nor made to work from twelve to fifteen hours a day—if he will treat his help liberally, democratically, and secure their good will and loyalty, he will find himself free from many of the so-called troubles that we hear so much of.

The Result of Low Wages.

To pay poor wages is the greatest extravagance that a man can be guilty of. The dishonesty of an employe is very often the direct result of his being underpaid. I have had men confide in me that they could not do justice to their families and remain loyal to their employers on a weekly salary of \$12 to \$15. This applies particularly to salesmen in the bigger cities, where the cost of decent living is comparatively high.

The slow, sluggish worker can be electrified with energy and fired with ambition by the increase of a dollar or two a week and the promise of another raise just as soon as he shows himself worthy of it. Even the errand boy will give you better service if he is properly paid. He will be less likely to loaf. He will cut out scheming how to use transfers in order to knock down a few nickels a week. He will use the elevated and subway trains instead of wasting precious time travelling long distances on slow-moving trolleys.

It would surprise some of my friends if they knew that their clerks are just as dissatisfied with their jobs as their bosses are dissatisfied with their clerks.

Even as the employer finishes asking my advice whether to retain such and such a clerk, his man confides in me, on the side, that he would like to make a change—that his self-respect revolts at being constantly scolded for trifles; that while the pay is pretty good, still the hours are long, etc.

The Importance of Training.

Training implies directing thought and work and energy along such channels as will lead quickest to the result desired. If you want to cover your front porch with a honeysuckle vine it is not enough to merely stick the seed or the plant into the ground and then wait for it to creep. The proper way is to *train it*. You either tie strings to the different shoots and fasten them to the top of the porch with tacks or you provide a wire net from top to bottom so that your vines will have something to cling to, to wind around and spread upon.

I have heard men say that salesmen, like poets, are born, not made. But for the benefit of the many who cannot show a birth certificate testifying to their salesmanship, I want to say that I do not believe seriously in the foregoing statement. Every man of average intellect, pleasant personality, with an earnest desire to succeed and a willingness to learn, has within him the material necessary for the making of a salesman.

You can train your clerks to be real salesmen if you will but take the time and trouble to do so. You should bring to their attention every available bit of printed matter that bears on the subject of selling. They should read carefully their own trade paper. There are to-day schools of sales-

manship, correspondence schools with class or club representation in most big cities. It will surprise you how mathematically exact is the science of salesmanship as taught by the Sheldon School of Chicago, for instance.

You should teach your salesmen how to approach a prospective customer, how to size him up so as to interest him in the goods. In order that he may talk intelligently about his goods, he should know something about the composition, material, method of manufacture, construction, etc. He should have a fair knowledge of the mechanism of talking machines. I would earnestly advise as many dealers and salesmen as can possibly do so to avail themselves of the courtesy of the several manufacturers and carefully inspect any one of the factories. I am sure that you will return from such a tour of inspection feeling that you have learned a great deal about your own business. You will take greater pride in the industry of which you are a part. You will feel like the Roman who

Benjamin Switky.

proudly boasted: "I am a citizen of no mean country!" How often have I heard customers ask, "What are these records made of?" and the salesman replied, "Hard rubber."

You should urge your clerks to learn to take a motor apart and reassemble it—not necessarily in order to become proficient repairmen, but because a good mechanical knowledge of the motor enables them to talk intelligently when trying to make a sale. If they can impress their hearers with a good selling talk and win their confidence by demonstrating a thorough knowledge of their goods, more sales must result.

Don't wait for your help to pick up knowledge. **TEACH THEM!** You can teach them, in the course of a half-hour's talk, certain bits of knowledge which they might not acquire or stumble across within six months. Point out to them that certain records appeal only to a certain class of music-lovers, that other selections invariably please middle-aged or elderly folks, that another group of records sells very rapidly to foreigners, etc.

You must be constantly alert to train your help. The boy or driver who distributes your packages must be taught to handle the goods carefully or you will incur losses by breakage. The boy who puts away records or who packs the shipments must be trained to do the work carefully and conscientiously. The order clerk must be taught the need of watchfulness to avoid overstocking on the one hand or the loss of sales by being "out of it" by reason of oversight in ordering. Your clever salesman must be taught how to handle three or four customers at one time and to do it thoroughly, without apparent effort, confusion or the loss of any sales.

Interesting Your Employes.

In addition to teaching your employes how to do their work correctly, it is your duty to stimulate interest in their work. I shall relate to you briefly a method which I have used successfully for some

time past, one that has yielded good returns out of all proportion to the expense involved. I make no claim for originality, but will freely confess the idea is merely an adaptation of similar practices made use of in other businesses, usually of larger calibre.

About once a month I invite the entire force, from the manager to the youngest of the boys, to a dinner at some restaurant out in the neighborhood. After an hour or more devoted to chatting, mixing, etc., we all adjourn to the store, where we settle down to the serious business of the evening. I had been careful beforehand to ask each employe to try to bring to the meeting at least one new idea or suggestion of improvement to be discussed in open meeting.

The work of the evening is classified and taken up in the following order: First, the roll is called, and as each responds he is asked whether he has any complaint or grievance to present. If he replies in the affirmative, the matter is threshed out in open meeting and always adjusted to the satisfaction of the complainant. Second, each is invited to present criticisms as to management, whether in his own department or in another department. Third, they are asked to contribute for discussion and possible adoption suggestions looking to improve the service, lighten the work, eliminate unnecessary waste motion in the handling of the work, economizing time and labor, minimizing expenses, etc.

Just try it once and you will be as greatly and as agreeably surprised as I was. You will get valuable tips from the errand boy. The shipping clerk will point out to you how to perfect his department. Your stock boy will suggest how to cut down the time ordinarily required to put away stock or to pick out an order. It may cost some money at first to adopt many of their suggestions, but in the long run you profit by them.

But more important than all is the fact that you have induced your help to think seriously about their work; they find pleasure in trying to bring their efficiency nearer to the 100 per cent. mark; they actually give you more than you are paying them for and do it cheerfully because they feel flattered that they should be taken into the chief's counsels.

Then top off the evening's program with an instructive talk on salesmanship, inviting free discussion of the comparative merits and demerits of competitive lines. Let them relate how certain difficult sales were clinched, etc. They will learn from you; they will learn from one another.

If you are interested in the efficiency of your force—which you certainly must be if you are to receive full measure of success—you must be on the job all the time training and teaching.

NOVEL WANAMAKER RECITALS.

Victrola Furnishes the Voices of Living Characters Who Appear Costumed as in Actual Life—Attract Large and Appreciative Crowds—John Wanamaker a Victrola Enthusiast.

The Victrola section of John Wanamaker's New York store presented during Christmas week, at two performances daily in the store's handsome auditorium, four acts of living tableaux with characters in costume who pantomime the acting and singing of the principle arias from the opera, "Aida," assisted by the Victrola. These daily performances attracted crowded houses, and thereby increased popularity of the Victrola.

The principal characters of the opera all appeared before the audience in actual life, but instead of rendering their respective selections as they would on the operatic stage, a Victrola furnished the actual voices of Caruso, Gadschi, Destinn and the other famous stars. Accompanied by the pipe-organ and piano.

It is interesting to note, by the way, that John Wanamaker is personally a Victrola enthusiast, and owns in his handsome home, a Victrola X, finished in Japanese lacquer, a product of the Wanamaker Victrola department. The Victrola is one of the most artistic instruments ever introduced for use in a private home.

The New Columbia Advertising Record is proving itself the ablest collector of new names and new business that the dealer ever found. *It breaks the ice.*

RETAIL STOCKS ARE LOW IN SAN FRANCISCO.

Immense Holiday Business in the City and Surrounding Territory Made Placing of Large Orders a Necessity the Opening of Year—Record and Machine Business Heaviest Coast Trade Has Ever Enjoyed—Sherman Clay & Co. Expand—News of the Month.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., January 9.—Talking machine interests here, whether Victor, Columbia or Edison, either wholesale or retail, were well satisfied with holiday business. The distributors of each line supplied more goods than ever before and the retail trade showed a decided gain over previous seasons, notwithstanding the very stormy weather which prevailed the last few shopping days before Christmas, and other adverse conditions which are held responsible for disappointments in some other lines of business catering to holiday trade. In San Francisco retail stocks are well cleaned up and all reports from the country districts indicate that dealers did not overstock by any means. That stocks were much depleted in many instances is shown by the orders received by the distributors here immediately after Christmas. A satisfactory feature of this holiday business was the tendency toward the higher priced machines, and the enormous demand for records. Record business for December was the heaviest the Coast trade has ever enjoyed, and it is keeping up exceedingly well since the holidays. Prospects for 1914 are considered very encouraging by the local trade.

W. S. Gray, coast manager for the Columbia Graphophone Co., says December was the biggest month this office has ever had, and he is now formulating plans for a very active campaign in this section for the ensuing year. He says he is going in especially hard after record business. F. Anglemier, manager of the wholesale department at the local Columbia warerooms, says they managed to fill orders in pretty good shape with the exception of some late rush ones, but a few days before Christmas they were left without a half-dozen machines on the floor. Favorite and Leader machines were big factors in the fall trade, but they did not interfere with the sale of the higher priced types as they were in good demand also. A number of the grand Grafanolas were sent out in December.

At these Columbia headquarters a steady increase is noted in the demand for dictating machines. A large shipment was sent out on the steamer "Persia" which sailed a few days after Christmas for Manila, where Mr. Anglemier says there is a considerable demand developing. The installation of machines for the exposition occupied particular attention here the past month.

Manager J. S. Bayley, of the local branch of Babson Bros., says December business was beyond expectations. Considering that this was the first year for the Edison disc machine, he says the results with it were very gratifying indeed. He entirely sold out types of machines which were in greater demand than he had anticipated. Among them were the \$80 machines, \$250 mahogany disc types and \$150 disc models. Notwithstanding the absorbing interest shown in the new disc product, cylinder business, according to Mr. Bayley, was

the best in a long time. He regards the outlook very favorable for a big 1914.

L. S. Sherman, of Sherman, Clay & Co., whose Victor business runs into a million dollars a year, says that each year they have been distributing Victor products they have been able to get more goods, but that the demand has shown a corresponding increase so they still have some difficulty in supplying the needs of their customers. Holiday business was especially gratifying here in San Francisco. The tenth floor of the building was hardly ready for permanent occupancy before the holidays, so it was used as a store room for Victor Victrolas calling for holiday delivery, and before they began to move out, a large section of the floor space was covered. Mr. Sherman says the popularity of the new tango dances here has undoubtedly stimulated a particular demand for Victor Victrolas. A great many people are taking lessons and find the Victor a great aid in their home practise. The demand for the tango records bears out the statement of the influence of the new dances on the sale of machines.

P. H. Beck, of the Kohler & Chase talking machine department, is very well satisfied with holiday business, the week just preceding Christmas being especially heavy, and bringing the record for December up to a large figure.

A. R. Pommer, proprietor of the Pacific Phonograph Co., whose enthusiasm for Edison products has been largely influential in the rapid progress made in the favorable introduction of the new disc line in this section, is more than ever optimistic over the future outlook for the line since the big holiday rush, which his company enjoyed. While he was able to supply his customers in fairly good shape, owing to the large reserve stock which he had accumulated in anticipation of a shortage at holiday time, his warerooms were practically cleaned out on Christmas Eve, especially of the high-priced machines. He says the tendency of this holiday demand was toward the better products. He was heavily stocked with the high-priced machines, but was entirely sold out of \$250 styles, for instance, while he could still make deliveries of the \$60 types. J. E. McCracken, traveler for the Pacific company, was at headquarters here for a few days at holiday time, but has since returned to Seattle, and from there will proceed to other points in the Northwest.

The coast trade received a visit recently from F. K. Dolbeer, sales manager for Thos. A. Edison, Inc. While in San Francisco he made his headquarters with the Pacific Phonograph Co., and from here went North to Portland and Seattle.

Holiday business in the Columbia department at the Emporium was very gratifying to the management, as evidenced by the fact that they were obliged to provide extra accommodations for demonstration purposes in December. To this end the rooms formerly used for player-piano demonstra-

tions were placed temporarily at the disposal of the talking machine section, and besides the removal of the sheet music department to other floor space, leaves more space for talking machines. Mr. Morgan says the demand for machines here covered a wide range. The Favorite and Leader had splendid call, but the more expensive styles moved well also. Record business as well as machine sales for December was by far the best month this department has had.

Since the duck season opened Peter Bacigalupi, Jr., manager of the talking machine department of Peter Bacagalupi & Sons, has been spending considerable time up at his hunting preserve near San Rafael.

A CHRISTMAS TRAGEDY.

Are we to hold ragtime revues and other hustling forms of entertainment responsible for the following tragedy?

A music hall artist who used to tour the provinces with a flock of performing ducks, found manager no longer willing to book his sedate show. After he had been resting for some time he received a telegram asking him to open on the following Monday at a variety theater in northern New England. In reply he wired:

"Regret cannot come. Have eaten the Act."

MUSIC HOUSE

Lyon & Healy

Chicago

FROM OUR CHICAGO HEADQUARTERS

ROOM 806, NO. 37 SOUTH WABASH AVENUE, E. P. VAN HARLINGEN, MANAGER.

(Special to The Talking Machine World.)

CHICAGO, ILL., January 10.—The year closed in a blaze of glory so far as the Chicago talking machine trade was concerned. December was away ahead of the corresponding month of 1912 according to both the local jobbers and leading retailers. It must have been a cracking good month too, with the country trade, as not only were orders placed before the holidays been left to stand with practically no cancelations and mighty little revision, but new orders for machines have been coming in since the first of the year, speaking eloquently of depleted stocks and a lively current trade.

Another feature of the trade which tells of the wonderful progress of the business is that there has been a shortage of records, notwithstanding the big preparations made in this regard by the leading companies. Shipments are coming on in better shape and they are certainly needed, as January and February are always big record months, as this is the period when the recipients of talking machines for holiday gifts come into the market in the first flush of their enthusiasm.

Everybody is looking forward to a good year in 1914, and certainly with such a remarkable record for a year, during which general business conditions have not been of the brightest, still greater things may legitimately be expected when the financial and industrial clouds which have hung over us for so long give indication of dispersing.

Entertains Sales Force.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy gave a dinner to the wholesale selling forces of the department at the Union restaurant on Tuesday evening. It was very informal, everybody participating in the talk-fest. Good stories were told, some pertinent to the business and some impertinent, and there was also a discussion of the trade situation and optimistic planning for the year's campaign. After dinner the balance of the enjoyable evening was spent in witnessing the performance of "The Honeymoon Express," at the Garrick. Those present, besides Mr. Wiswell, were: J. E. Meagher, Wisconsin traveler; J. B. Ryde, Illinois; E. P. Bliss, Indiana and Michigan; Paul Rocah, city wholesale; A. Scannell, inside wholesale salesman; A. Agnew, wholesale correspondent.

A. D. Geissler Reviews Trade.

Arthur D. Geissler, general manager of the Talking Machine Co., of Chicago and of the New York Talking Machine Co., arrived this week for a stay of a fortnight or more. He was very enthusiastic over the volume of business which has been done

in both cities and the outlook for the coming year.

"At a rough estimate, I should say that the Victor business has increased, at the most conservative figures, 75 per cent. the past year," said Mr. Geissler. It is a fact that the New York Talking Machine Co., finding a shortage on certain types wired practically every distributor in the East offering to buy any of those machines that they could spare at dealers' prices.

As a result, we got in \$10,000 worth of goods the day before Christmas, on which we made no profit, but which helped us to make good on our efforts to give our dealers the very best service in our power. The same thing occurred with the Talking Machine Co. here in Chicago, with the result of materially relieving the situation. Fortunately we have had ample stocks of the \$200 machines, and in many instance dealers have met a shortage on the \$150 machines by raising their customers to the \$200 machines, and the \$75 machines by raising them to the \$100 machines. Not only has the machine business been great, but sales of records have been most remarkable. Dealers, who in past years, have been ordering one, two and three of a selection, have ordered ten, fifteen and twenty-five, and have sold them judging from the orders that have been flooding in on us since the first of the year. Every indication certainly points to a big year in 1914.

Splendid Edison Sales.

C. E. Goodwin, general manager for the Phonograph Co., the Edison distributors, waxed enthusiastic over the December trade. "I don't ask you to believe my mere unsupported statement for it, but I just want you to go over these order books of our retail department. They show fully 80 per cent. of the sales to have been of the \$250 machines. Strange as it may seem," Mr. Goodwin remarked, "our wholesale business has shown a very similar record. The Edison disc is far eclipsing the anticipation entertained for it by the manufacturers and the distributors, and goodness knows they are optimistic enough."

"Low and Grim."

The youngest purchaser of the season at "The Shop" was a little lady of some ten years, who purchased a Style XI Victrola for her "papa," and paid for it in cash. She said she had been saving up for a long time, had decided what records she wanted, and handed Miss Tischler a list of them. The list included: "Low and Grim," "Med and Tation from This; "Heilige Nacht, Stille Genacht" and "Breakfast in Bed," by Harry Louder. Also

a band record by "Susie." Miss Tischler called for help and eventually managed to figure out "Lohengrin," and "Meditation," from Thais. All of which reminded C. L. Davidson of the woman who bought "Home to Our Mountains" from "Il Trovatore" and turned to her husband who entered the shop a few minutes later, saying: "Oh, Harry! I have just bought the grandest record! It's from 'Trovatore'—'Back to the Woods.'"

Columbia Reports.

W. C. Fuhri, district manager for the Columbia Graphophone Co., says that all the branch houses in the extensive Western and Southern territory under his jurisdiction have made a marked improvement in business the past year, and that December was in the record-breaking class—this notwithstanding the supply of goods was not equal to the demand.

C. F. Baer, manager of the Chicago office, reports that the dealers in this territory did a really phenomenal business. While the December business greatly surpassed that of 1912, and in fact of any year, a number of orders were carried over and they are sticking. "We recently got in the new \$200 DeLuxe and the new \$175 Nonpareil," continued he, "and dealers are going simply wild over them and are reordering at a high rate of speed. Locally our retail was immense, and this in spite of the removal to new quarters right in the midst of the rush season."

The Dictaphone business of the Chicago office is said to have practically doubled during the year.

At Lyon & Healy's.

L. C. Wiswell, manager of the talking machine department, said: "December and the year were record-breakers. The big business was in machines from \$100 up. Just as many \$200 machines were sold, in fact more, than ever, while more than four times of the \$100 machines were sold than any machine we have ever had to sell at that price."

"The retail business of Lyon & Healy was something immense as usual. There were several days when the retail machine sales mounted upwards of \$10,000, and on one memorable day just before Christmas 175 Victrolas of various types were sold at retail."

At Wurlitzer's.

F. A. Siemon, assistant manager of the Chicago house of the Rudolph Wurlitzer Co.: "It was a mighty good year. December was a wonder. Why, in our retail we kept our big special Victrola truck going all day Christmas delivering \$200 machines, (Continued on page 40.)"

The Practical Fibre Needle Cutter—THE WADE

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone.

The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade
Fibre
Needle
Cutter No. 1

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points.

No. 1 is a very popular cutter which has given excellent service. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made.

The Wade
Fibre
Needle
Cutter No. 2

RETAIL PRICES—No. 1, \$1.50; No. 2, \$2.00

and we have reports of similar overtime activity on the part of many of our out-of-town dealers. The best thing about it is that the year is starting out with a vim and with good orders for both machines and records. You simply cannot stop this marvelous talking machine business."

Have Good Exhibit.

Schram Bros., manufacturers of talking machine record, music and music roll cabinets, this city, have a most interesting exhibit of their extensive line at the furniture manufacturers exhibition building at 1317-1319 Michigan avenue.

Cameron Takes Furlough.

L. K. Cameron, manager of the retail talking machine department at the Chicago house of the Rudolph Wurlitzer Co., has been compelled to take an indefinite leave of absence on account of a nervous breakdown. He left this week for Tucson, Arizona, where he has relatives, and will indulge in wild Western activities, shooting, fishing and riding. His friends are eagerly awaiting photos, showing him in sombrero, gauntlets and a few other articles of apparel and with a bunch of Indian scalps. Mr. Cameron is one of the best posted and most popular members of the local talker trade, and his many friends sincerely trust that he will be speedily restored to his normal health. In the meantime, F. A. Siemon, assistant manager of the house, will give the retail department his direct supervision in addition to his other duties.

Klingsor Progress.

In a chat with *The World*, Louis Schram, treasurer and general manager of the Klingsor Talking Machine Co. of America, said: "Everything indicates that we will be in a position to commence taking orders for our machines by February 1. Theodore Isaacs, our president, returned from Europe recently, where he made arrangements with the Klingsor Talking Machine Co., of Germany, whose works are at Hannau, for the construction of sound boards exactly fitting our American styles. The sound board is the key to the wonderful tone production of the Klingsor machines, and this move assures our getting the remarkable reproduction in the machines we make here that has made the European Klingsor product famous."

"Lightning Tom" Dead.

Thomas W. Gray, well-known among Lyon & Healy customers as "Lightning Tom" because of his remarkable proficiency as an order filler, died suddenly on Tuesday of this week of organic heart trouble. He had been with the talking machine department of Lyon & Healy for eight years, first as order filler and later in charge of stock. He was a great favorite in the house and his death is keenly regretted. He was forty-three years of age and leaves a wife and a little daughter of thirteen. L. C. Wiswell took entire charge of the arrangements for the funeral, which was held at the house. Manager B. B. Blackman and Miss Lessing, of the record department, sang. The pallbearers were Messrs. Fitzgerald, Mautz, Nuppenau, Burns and Gotch, Mr. Gray's associates in the order and stock departments, and John Otto, of the retail sales department. The burial was at Oak Ridge.

Remembered Their Dealers.

The Talking Machine Co. sent to each of the dealers with whom they do business a handsome gray leather order book as a Christmas present, with the name of the dealer embossed on the cover. The company has received many expressions of appreciation from the recipients.

He Was Charmed.

C. F. Baer, manager of the Chicago office of the Columbia Graphophone Co., received many Christmas presents no doubt, but none that he values more than a beautiful gold and diamond bestudded watch charm, emblematical of the Knights Templar of which he is a member. It was accompanied by a letter expressing some views not altogether derogatory to Mr. Baer. "Presented by employes of the Columbia Graphophone Co., Christmas, 1913," was the legend engraved on the beautiful memento.

Will Visit Iowa Trade.

O. H. Radix, who has had charge of the order

department of the Chicago office of the Columbia Graphophone Co., will travel for them in the State of Iowa hereafter, succeeding E. W. Graham. J. Tucker, who has been in charge of the return goods department, succeeds Mr. Radix in the order department. Both men have been given well-deserved promotions.

New Permanent Needle.

The Soler Graphophone Needle Co., of this city, who has been making a special steel needle for some time, is now putting on the market a diamond point needle for disc records, which is said to be indestructible, will last a lifetime and will not injure the records. It retails for \$3. The diamond point needle, Mr. Soler says, is covered by the patents covering his old diamond process needle.

Big Salter December.

Last year was not only a notable one with the Salter Mfg. Co., but December was the biggest month in the history of the business, according to President John F. Mortenson. The year has opened up with an encouraging volume of business from dealers whose stocks were cleaned out by the holiday rush and who are preparing for a good demand from those who received gifts of "cabinetless" machines, and who will therefore soon be on the market for means for storing their records.

Business Good, Prospects Fine.

S. O. Wade, of Wade & Wade, and the inventor of the excellent fibre needle cutter bearing his name, is highly satisfied with what 1913 brought him in the way of business. It witnessed a great increase in the number of jobbers of the Wade cutter and practically a doubling in the volume of sales. He has received some unusually large stock orders since 1914 became a fact.

Visitors and Personals.

Among the visitors the past week or so were the following: Mr. Schmidt, of the Schmidt Music House, Muscatine, Ia.; W. H. Aton, Baraboo and Madison, Wis.; E. H. Jackson, proprietor of the Talking Machine Shop, Rockford, Ill.; Mr. Kissler, La Porte, Ind.; both members of the firm of Manor Bros., Hebron, Ill.; Charles Heiman, Sturgis, Mich.; C. S. Sinclair, Dundee, Ill.; M. M. Marin, Grand Rapids, Mich.

Edward Selbman, proprietor of the Northwestern Talking Machine Exchange, 2033 Milwaukee avenue, has bought out the Victrola department of the Boller Piano Co., 2168 Milwaukee avenue.

F. K. Dolbeer, general sales manager for Thomas A. Edison, Inc., spent Sunday recently with C. E. Goodwin, the manager of the Phonograph Co., local Edison distributors. He was on his way to Minneapolis, Minn.

Theodore Winfield succeeds the late Thomas Gray in charge of the talking machine stock at Lyon & Healy's. He has been in the department for some years.

Miss Marion Cockrell is the latest addition to the sales forces of the Talking Machine Shops.

W. H. Sajewski, dealer at 1011 Milwaukee avenue, has bought considerable property at Lakeview, Mich., and early this spring will build a dancing pavilion and store as well as a commodious summer house. Mr. Sajewski has built up a very profitable trade in foreign records, as well as in English, and does a large mail order business.

Samuel Glick, son of A. Glick, dealer at 2100 W. Division street, has decided not to follow in the footsteps of his father but will take up a course of study soon at the Michigan Agricultural College, with the ultimate intention of entering the Government's employ as an expert agriculturist.

A. C. Burik, floor salesman for the Talking Machine Co., has returned from a vacation spent with his parents at Madison, Wis.

A. G. Kunde, the well-known Columbia dealer of Milwaukee, was in town a few days ago placing stock replenishing orders. During the holidays he cleaned out practically every machine on the floor, and his stock was no small one at that.

W. W. Parsons, district manager for the Dictaphone department of the Columbia Graphophone Co., has been made a member of the bowling com-

mittee of the Illinois Athletic Association. He is an expert. The club's official organ printed the photograph of Dictation Parsons, the soubriquet he is given by his fellow members, and gave him a nice little "send off."

Don C. Preston, George Cheattle and Elmer Ditmer, all travelers for the Talking Machine Co., spent part of December at headquarters, leaving for their respective homes for the holidays.

Roy Keith, sales manager for the Talking Machine Co., is again at his desk after a week's confinement to his home with a severe attack of tonsillitis.

Edwin C. Barnes, of E. C. Barnes & Bros., Chicago representatives for the Edison dictation machines, has been made a member of the music trades committee of the Chicago Association of Commerce.

George P. Metzger, advertising counsel for the Columbia Graphophone Co., spent a day or two at the Chicago office recently and expressed himself as most highly pleased with the beautiful new home on Michigan avenue. He was on a trip which will take him to the Coast. He will visit the various Columbia stores on the way.

J. W. Roose, manager of the Indianapolis branch of the Columbia Co., was a visitor to the Chicago office this week.

H. L. Willson, assistant to General Manager Lyle, is expected here in a day or two in the course of a trip among some of the Western branch offices.

J. D. Westervelt, supervisor of agencies of the Columbia Dictaphone department, spent a couple of days in Chicago recently.

L. C. Wiswell, who is chairman of the committee on arrangements for the next annual convention of the Talking Machine Jobbers' Association, leaves next week for Pittsburgh to consult with President J. C. Roush.

W. C. Fuhri, district manager for the Columbia Graphophone Co., will leave next week on a visit to headquarters in New York.

LYON & HEALY SIGN LEASE

On Tuesday for New Ten-Story Building to Be Erected at the Northeast Corner of Jackson Boulevard and Wabash Avenue, Chicago.

(Special to *The Talking Machine World*.)

CHICAGO, ILL., January 9.—Lyon & Healy celebrated the passing of the year and the firm's fiftieth anniversary by making final arrangements whereby it secures for a term of twenty-six years a lease on a ten-story building to be erected at the northeast corner of Jackson Boulevard and Wabash avenue, where there now stands the Wellington Hotel, one of the landmarks of the city and for many years a leading hostelry.

Negotiations have been pending for some time, but it was not until yesterday that the deal was closed. The lease was made to Lyon & Healy by Mrs. Carrie L. Munn, of Washington, D. C. The term is twenty-six years at an annual ground rent of \$60,000 for the first five years, \$70,000 for the next five and \$80,000 for the rest of the term.

Mrs. Munn is to construct a ten-story building after plans by Marshall & Fox, for which the firm is to pay as rent 10 per cent. on the cost of the building up to \$500,000. The additional cost of construction is to be paid by the firm. The removal of the present hotel building will be begun on May 1, 1915, following which the new building will be pushed to rapid completion.

The area of the site is ninety-six feet on Wabash avenue and 171 on Jackson Boulevard.

The average annual ground rent is \$74,000, which, capitalized on a 4 per cent. basis, gives a leasing value of \$1,850,000, which is at the rate of \$19,720 a front foot for the Wabash avenue frontage and \$112 a square foot. The average annual rent which Lyon & Healy will pay net to the lessor for both ground and building is \$124,000. They also will have a large capital investment in the building. The board of review valued the property at \$1,451,883, of which \$1,411,883 is in the land and \$40,000 in the building.

THE GROUND HASN'T BEEN SCRATCHED

EDISON HUSTLER IN FALL RIVER.

Wilmot's Establishment a Center of Activity for Purchasers of Edison Phonographs and Records During the Holiday Season.

(Special to The Talking Machine World.)

FALL RIVER, MASS., January 9.—The name of Wilmot in this city stands for a good deal among the music lovers, as many heads of households and members of their families recall with pleasure their visits to this well-known establishment. Wil-

BIG RESULTS IN LOS ANGELES

Of Campaign for Holiday Business—Talking Machine Dealers, Without Exception, Report Big Advance in Trade for the Year, Covering All Leading Makes of Machines and Records.

(Special to The Talking Machine World.)

LOS ANGELES, Cal., January 3.—The most surprising results in the talking machine trade for the past month marks the close of the year, which stands as the banner year in the history of the trade. And not only a few, but all dealers have set a new record for the coming year.

Barker Bros. have very recently added the new Edison disc line to the talking machine department. Geo. S. Barnes, department manager, states that a great amount of the sales has been of the Edison disc, which would have been trade lost if the line was not handled.

H. B. Hinman, manager of the talking machine department of the Gray, Maw, Thompson Co., San Diego, Cal., was in Los Angeles for a few days, and reports that the department more than doubled its amount of sales over the previous year.

The Wiley B. Allen Co., of this city, closed the year with the most satisfactory results in their talking machine department. Manager R. E. Wolfinger says that never before had they experienced such a strenuous time supplying the needs of the purchasers. The gratifying feature of their holiday trade was the large amount of cash sales, which comprised fully three-fourths of the gross sales of the department.

The Geo. J. Birkel Co. also experienced an unusually good season's business in its large Victor department, of which A. Graham Cook is manager.

The Southern California Music Co., Edison jobbers, has reaped an abundant harvest in the Edison disc phonographs. Their dealers have been enthused with the Edison disc line. They did a wonderful retail trade also in the Victor and Columbia lines.

E. Holland, proprietor of the Vernon Music Co., reports a good business for the season in both Columbia and Edison lines.

Schireson Bros.' talking machine trade has been most satisfactory. They did a big business in Italian, French and Chinese records.

Chas. S. Ruggles, manager of the Sherman Clay & Co. store, in this city, says the year just closed was the biggest and best in the history of this

branch. The sales have been principally in the higher priced Victrolas.

The J. B. Brown Music Co. has been making wonderful strides toward success in selling the Edison disc. V. B. Chatten, who is in charge of the talking machine department, states that each salesman has been taxed to his utmost capacity within the past few weeks. R. E. Daynes, a salesman, has put through a number of very fine sales recently. He sold the first Edison disc Louis XVI. model A 400 in this city.

I. H. Andrews is enthusiastic over sales conditions, stating that Victrolas XIV. and XVI. were ready sellers.

Miss Jordan, who has recently been sent to the coast by the educational department of the Victor Talking Machine Co., is in Los Angeles for a short time speaking and lecturing before the faculty of schools, colleges and institutes in behalf of the musical education in these institutions through the medium of the Victor. Miss Jordan's Pacific Coast headquarters are now in Berkeley, Cal.

COMMERCIAL FAILURES FOR 1913.

Considerable Expansion in the Country's Business Mortality as Compared with 1912.

Preliminary statistics of commercial failures in the United States during 1913, as reported by R. G. Dun & Co., indicate a considerable expansion in the country's business mortality as compared with the preceding year. Total insolvencies numbered 15,847 and involved \$262,639,008 of defaulted indebtedness, against 15,452 suspensions in 1912, when the liabilities were \$203,117,391. As is customary, the heaviest losses of the year occurred in the opening quarter, while the second three months made much the best exhibit, both in respect to the number of failures and the sum of money owed.

In the following table failure returns for the last two years are compared by quarters, figures for the last few days of December being estimated:

	1913		1912	
	No.	Liabilities.	No.	Liabilities.
First quarter	4,458	\$76,832,277	4,828	\$63,012,323
Second quarter	3,405	56,076,784	3,489	44,999,900
Third quarter	3,549	63,837,315	3,499	45,532,137
Fourth quarter	4,435	65,892,632	3,446	45,150,731
Total, year	15,847	\$262,639,008	15,262	\$198,695,091

LIGHT AND THE WINDOW DISPLAY.

Dark blue reflects 0½ per cent. of the light falling upon it.

Dark green, about 10 per cent.

Pale red, more than 16 per cent.

Dark yellow, 20 per cent.

Pale blue, 20 per cent.

Pale yellow, 40 per cent.

Pale green, 46½ per cent.

Pale orange, nearly 55 per cent.

And pale white, 70 per cent.

A window finished in light oak can be lighted with much less wattage than a window finished in dark mahogany; likewise, a window in which white goods are displayed.—American Architect.

Shipping Edison Disc Phonographs to Customers in Fall River.

mot's is the recognized headquarters for the Edison goods, and the accompanying picture shows twelve of the large and expensive Edison disc machines about to be shipped from the store to customers. Mr. Wilmot, the head of the house, has had a business experience covering seventeen years, so that he is pretty well acquainted with the talking machine proposition, and therefore knows how to handle his growing trade. He is president of the Fall River Men's Business Association and is one of the best "boosters" that Fall River has. When it comes to exploiting the advantages of his city, Mr. Wilmot is frequently called upon as a speaker at public gatherings.

PRAISE FOR NEW RECORD CATALOG.

The recently issued record catalog sent out to the trade by the Columbia Graphophone Co. has been the subject of much praise and commendation. The many distinctive innovations embodied in the new book, and the maximum of convenience and ease with which the dealer can consult the new catalog, have all been commented on in letters received at the executive offices during the past few weeks. The compilation of this new catalog was a work of many months and was under the direction of G. C. Jell, head of the Columbia record department, whose ideas as to record catalog production are exemplified in the new book. It is indeed a tribute to the unceasing efforts of Mr. Jell that his book is so keenly appreciated.

If you have missed the Columbia profits during the last season, you must have done it unknowingly. If you miss them this coming season, the amount of them will make a long column on your debit page.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Woolworth Building, New York

THE TRADE SITUATION IN PHILADELPHIA.

Trade for December Surpassed All Expectations, Being Almost a Third Larger Than It Was Last Year—Dealers Most Optimistic Regarding the General Outlook for 1914—Dealers, Without Exception, Exceedingly Well Pleased with the General Situation.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., January 8.—The trade in talking machines in Philadelphia continued very heavy up to the very end of the year. It surpassed all expectations for the month of December, and was almost a third larger than it was last year, and one feature about it was the great number of high-priced machines that were sold. Every year this seems to be more the rule. Purchasers are no longer satisfied with the cheap machine, for they do not look upon it as a toy or as an amusement, but take the more serious view of it as an educator, and, to get the very best results and find the most thorough enjoyment, nothing under a fifty-dollar machine will suffice. The machines that were sold this Christmas season were those that range in price from \$50 to \$150, and while the popular tango records have had an immense sale for holiday buying the majority of the records were classics—at least those which were given away for presents.

Optimistic View of 1914 Prospects.

As to the future, all the dealers are taking an optimistic view and believe that 1914 is going to far surpass the year just closed, and they are laying plans accordingly. Most of the stores have found their stock about reduced to nothing; they are just finishing up the taking of the account of stock, and then they will order heavily to stock themselves for what they believe is going to be a very excellent spring and summer trade.

New Association Making Some Progress.

There is nothing new in the dealers' organization that was launched early in the fall, other than that the projectors think that now that the busy season is over they will be able to get the men interested and hope to have all of them sign the agreement the feature of which is the charging of interest on all credit sales. There are only two or three holding out. One of the amusing incidents is that two of the large department stores are holding out in their signing one before the other, and some device is being planned to overcome this. If the paper is taken to one store they say they will sign as soon as the other, and vice versa. Now the plan is to have them both sign at the same time, and it has been suggested that the two signees shall be placed at a desk at a certain hour of the day, with their secretaries in telephonic communication, and at a given signal both firms sign. It is hoped that the matter will be brought out in some way, for the organizers of the association are very anxious that something shall be done.

Who Are the Representative Dealers?

There is considerable haggling as to what is meant by "representative dealers," for they are the only ones who are expected to sign, and it is a question that will be hard to decide as to how many machines a man must sell before he is placed in that class. There is going to be considerable caste

in this association when it is organized, and yet it would be impossible to get every one to sign.

Victor Co. Comes to Assistance of Dealers.

The Victor Co. is coming in for great praise at the way it helped out the Philadelphia dealers this year. They did everything in their power both in the way of getting out machines as well as records, and the Camden factory was kept employed both day and night. At times they were swamped almost beyond extrication, but they managed to get out, and no one will begrudge them a rest, no matter how much they may desire.

Good Report from Weymann & Sons.

Harry Weymann, who is the manager of the talking machine department as well as the wholesale department for the small goods made by H. A. Weymann & Sons, says that he never saw or expected to see anything like the holiday business in talking machines and records. He says at their their house the last week in December was equal to the entire month of the previous year.

Close Important Deals.

The Keen-o-Phone Co. reports that it had an excellent Christmas business. It entered into a couple of deals just before the end of the month which are going to give them an output of at least 3,500 machines, which will no doubt put the company on a dividend-paying basis. They expect to shortly place a new style machine on the market.

Talking Machine Co. to Move.

The Talking Machine Co., whose leading store is on Broad street below Sansom, and who have three stores at present, is looking for several new locations, and before spring it expects to have two more stores established, and maybe a third, if the proper place can be found.

No Talker Store in Cunningham Building.

There was a report that a talking machine firm would move to the Cunningham Piano Co.'s building, opposite Wanamaker's, but this statement is false, at least at the present writing. It would be an excellent location for such a business, but the rent demanded in that location would eat well into profits.

Heavy Columbia Business Reported.

W. L. Eckhardt, of the Pennsylvania Talking Machine Co., is most jubilant over his year's work, especially the December business. No comparison could be made with their holiday trade this year and last. Beginning December 1 Mr. Eckhardt set out figures for his December business, that he thought were almost prohibitive to expect, but along about the middle of the month he began to see that he would have to discount them by at least 5 per cent., and by the end of the month his sales had run away beyond his fondest expectations. The very fine automobile truck which they recently secured has helped them out very nicely in their rush deliveries.

During 1913 the Pennsylvania Talking Machine

Co. opened about 200 new accounts, which is going some, and they have prospects of very shortly announcing the Columbia in one of the most desirable places in the city, for which they are about closing a deal. They have also closed a number of important deals in the Dictaphone, and every indication is that this year will be even greater than the last.

Lit Bros. Department Makes Record.

Manager Sternberger, of the piano and talking machine departments of Lit Bros., says they have just gone through the biggest holiday business they have ever had. They will make some big changes in the department early in the new year as to sound rooms, fixtures, etc.

OUTLOOK VERY ENCOURAGING.

Says C. R. Ely, Road Ambassador for the Columbia Co., Who Just Reached New York After Extensive Trip—Manufacturers' Co-operative Work Pleases Dealers.

Clifford R. Ely, the live-wire road ambassador for the Columbia Graphophone Co., arrived in

C. R. Ely.

New York this week after an extended trip through the country, and will spend some time in the East before leaving on his annual country-wide tour. Incidentally, Mr. Ely spent but five weeks at his home in Philadelphia throughout the entire year of 1913.

"Business conditions throughout the country are somewhat unsettled, but the outlook is very encouraging," stated Mr. Ely in a chat with The World. "The dealers are optimistic in their predictions for the coming year, and the talking machine business as a whole is very satisfactory. Although the tightness of the money market has had a marked effect on many lines of business, the talking machine industry did not seem to suffer to any noticeable extent, the majority of our dealers reporting the best year since they were in business.

"Wherever I visited I was assured of the appreciation by our trade of the many co-operative measures that we have introduced the past year. The aggressive dealer invariably utilizes any sound and logical plans or ideas that the manufacturer offers him, and this was particularly true during 1913, when the Columbia dealers were extended real and up-to-date co-operation, which they accepted at its face value and used to produce increased profits."

E. N. BURNS TO EUROPE.

Edward N. Burns, vice-president of the Columbia Graphophone Co. and manager of its export department, sailed last week for an extended trip to Europe. While abroad, Mr. Burns will visit all the important European countries.

The days for talking are over—act.

REVIEW OF TRADE CONDITIONS IN ENGLAND IN 1913.

A Most Interesting and Detailed Analysis of Developments in Various Departments of the Talking Machine Industry Presented by Our London Representative—Every Aspect of the Situation Covered in a Most Informing Way—The News of the Month.

(Special to The Talking Machine World.)

LONDON, E. C., January 6.—The year that has just made its exit may well be described as a memorable one in the history of the talking machine trade. But before I proceed to a review of the more important events, it will be interesting to quickly survey the situation immediately preceding the festive-time. In the early part of Xmas week I took the opportunity of making a few calls upon the leading houses with the object of personally ascertaining just how things stood in relation to business. Everywhere I found an extraordinary state of activity prevalent, and so preoccupied with work were most of the officials that I had to rely in the main upon my own observation. So great was the demand for records and machines that in the last few weeks of the old year most of the manufacturers and factors were forced to install night shifts. By this means only it became possible to satisfy all wants, within the limit of stocks, of which daily replenishment was necessary in all cases.

Inquiries confirmed the opinion that the cheaper class of record has enjoyed a wonderful vogue, and is selling freely in all districts. During the few months of their existence millions have been sold, the only difficulty being to press them fast enough. There has been, too, an increased call for cheap machines, but it is satisfactory to note the better makes are well in the running. I am informed though that in records half-crown sales are down owing to the many cheap discs, and the fact that several records equal to them in quality are obtainable for eightpence.

December altogether has been a boom month for trade, which in bulk is far ahead of last year, even time considered. It is said that profits do not compare so favorably, and one can well understand it, having regard to the wholesale price reductions and consequent keener competitive conditions. Notwithstanding all that, it is evident the last month of the old year will remain one of pleasant memory for all.

A Review of Trade Conditions in 1913.

In retrospect 1913 deserves more than a superficial survey, for it is brimful of important happenings, which are likely to exert an influence upon the course of trade in the new year. Almost every year the industry undergoes evolutionary changes, in themselves progressive and helpful, along lines which make for expansion of trade, prestige and influence, achieving in one long series of steady improvements a position as closely allied to musical art as it may expect to reach under the present method of harnessing and reproducing sound mechanically.

Those who have watched the trend of events during the last decade will, I imagine, accept the foregoing expression of opinion as reflecting the actual artistic and scientific aspect of the situation existing to-day. To this happy position, 1913 has contributed its quota of development, in what degree and to what extent it is the purpose of this article to expound.

The object, it seems to me, may best be attained by a brief chronicle of the most important events, an examination covering the whole field of commercial, scientific and artistic endeavor in talking machine trade circles.

Influence and Power of the Gramophone.

The growing influence and power of the gramophone was never more apparent than in the past year, of which we have abundant evidence quite outside the ordinary trade channels. For political purposes some of the most eminent men of the day,

including Cabinet ministers, have availed themselves of its service; even the suffragettes find it a good medium—not its best in comparison, I must admit—through which to propagate their views. In education the gramophone is becoming more and more indispensable, especially for the teaching of foreign languages, and students in many other directions find it an invaluable aid. Drilling and dancing is carried on, and even learned, with the assistance of this wonderful instrument, which, too, has often been utilized as an effective substitute in churches for choir or organ. You will find it in workhouses, schools, at recitals, a treasured companion of Arctic and other explorers; find it, in fact, everywhere. All of which clearly demonstrates the remarkable position the gramophone now occupies in all walks of life. To those interested in its development a very pleasing sign of the times is the broader attitude of the general press. The one-time prejudice and dislike of all mechanical music has given place to more favorable consideration, as witness the statement of a leading daily that "the gramophone as we know it to-day stands for something a good deal more than the triumph of necessity over prejudice." And this is but a reflection of the general opinion of the press to-day.

I have briefly referred to these aspects of the situation because it is a significant indication of the progressive development of the record and instrument trade during 1913.

The Year's Progress on the Scientific Side.

The root principle of sound recording and reproduction was comparatively unaffected by the several improvements brought to light during the past year, yet credit is due the different efforts made by inventors in the direction of perfecting existing methods and apparatus. Although the Poulsen patent is one of very old standing, I think a reference to it is justified in view of the interest aroused during the year by a court application for its extension. The Poulsen method of recording sound is quite unique, but great difficulty in its commercial application has been experienced, and I believe I am correct in saying it has never been put to practical use although doubtless the inven-

tion is a valuable one. The patent is described as consisting of an apparatus for the storage of speech by means of a magnet and magnetically influencing wire. By means of electrical currents set up in speaking on to this wire or band of metal actuating a magnet both locally and crosswise, it is stated that a record of the human voice could be obtained and afterwards reproduced with perfect fidelity. The importance of this magnetic phonograph idea, which was considerably improved upon during last year, will doubtless receive general recognition in the near future. It certainly predisposes one to look forward with hope to the abolition of all imperfections in reproduction of sound with a new system of recording.

The Edison disc, which was expected last year, is *fait accompli* in America. One day we may see it on this market. I have been privileged to inspect a sample record, but few have heard one. From all accounts emanating from the States it may be concluded that the Edison phonograph-cut disc marks a step forward in sound reproduction, and if this be so, it is assured of a good welcome in England.

Many intelligent men aver the real future of sound recording will be revealed with the perfection of the method of photographing sound. It may not be generally known that it is quite feasible, and experiments during the past year tend to confirm this. The inventor is T. H. Williams an electrical engineer, who has made a close study of the subject. He discards altogether the present principles of mechanical music, and claims to have succeeded in reproducing photographed sound where Faraday, Poulsen, Duddell and others have failed. The inventor, Mr. Ruhmer, was an exception, but his methods are said to have never reached a practical stage. Mr. Williams has devoted himself to this problem, and says complete success is not far distant. He claims that his "Photo-gramophone" entirely does away with needles and the ordinary solid record. Under his system speech and music are entirely reproduced through the media of light, electricity and compressed air. A practical demonstration of the invention is promised in the near future. There is good promise in Mr. Williams' system and the trade will await the results with keen interest.

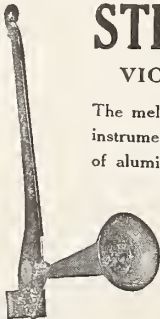

Another important feature of the year is in relation to the improvements effected in sound recording. It must be admitted, however, that the present system does not lend itself to any very radical departure, yet, confined as they are to the one channel, manufacturers' experts have managed to secure some small improvements, which, in the aggregate, represents progress. If not of a very substantial nature it merits the utmost encouragement, for anything which goes to suborn the mechanical aspect in relation to gramophone music is very welcome.

Machine and Record Developments.

Under the above caption a brief resumé of the changing styles and constructional departures in gramophones, coupled with a reference to the development of disc records, is of necessity a matter of extreme interest generally. During the past year it was clearly manifest that determined attempts were being made to relieve the somewhat monotonous regularity which previously marked the issue of what may be termed the orthodox pattern. In the Hornless instrument field several radical departures were in evidence. Different methods of fitting the amplifying chamber do not warrant much reference. The chief consideration to remember is that sound rises, and although doubtless it is of little material disadvantage that with most so-called hornless machines the sound is carried downwards, any tendency in the reverse and proper direction is worthy of being recorded. In this connection several machines embodying the correct principles made their appearance and I

learn that others are in course of preparation. One of the Marathon portable instruments is of entirely new design, it being absolutely hornless in the full sense of the word except that a sort of sound chamber of small dimensions is provided by means of a telescopic side which shuts in or out as required. The volume and quality of the reproduction is excellent, and the instrument itself must be regarded as a progressive step in machine construction.

A still more important departure perhaps from the ordinary method of construction came under notice in July. This was the introduction by the Columbia Co. of a unique motor plant built upon entirely new principles, being in fact, a combination of the whole of the motive power as a unit independent of and perfectly insulated from the cabinet. It consists of a metal motor board, (carrying the motor), breech-locking tone-arm and Regal reproducer all in one. Without expatiating upon the many claims attached to this equipment, it may honestly be said to represent a distinct improvement in its results over the usual mechanism, and certainly deserves to rank as one of the most important and eventful issues of 1913.

Still another introduction, the utility of which has yet to be determined, is represented by the combination of exterior-horn and interior-horn (portable) instruments. This feature is as yet in its infancy, and my own personal opinion is that it should so remain, for the consideration which actuates the purchase of one or the other type neutralizes the necessity for combining the two. In any case it is more or less an expensive luxury.

Coming to records we find that much the same conditions exist on the mechanical side as in 1912. The "Marathon" fine cut disc made enormous strides during the year, and both from the mechanical and artistic viewpoint, has created quite considerable notice in talking machine circles.

The Artistic Side of the Record Business.

Consideration of this aspect should rightly cover a multitude of points, but the exigencies of space confine one to a rather brief mention of the

more important features of record development.

A welcome move in the gradual elimination of suggestive records, which at one time formed a not inconsiderable amount of the total issues. Outside an isolated case or two, this objectionable feature is practically a thing of the past. In this respect then 1913 was a clean year; long may the voluntary censorship continue.

In the class of titles issued it is pleasing to note that greater attention is being paid by manufacturers generally to the listing of better-class music. For example, on most half-crown lists we find an increasing amount of operatic issues, and even so with lower-priced disc records. In itself this furnishes a remarkable index of the educational influence of the gramophone. Popular hits are still the commercial mainstay of the majority of manufacturers, but the demand for operatic, good ballads and other better-class records received an amazing stimulus during last year. And it is an ever-expanding trade to which I am pleased to observe record makers give every encouragement.

A direct result of the ragtime craze, which predominated during the year, and is still more or less in favor, was considerably increased business all round. It was undeniably responsible for the sale of thousands of extra records and many machines. Beyond that—of course a great consideration—few will regret the gradual decline of ragtime. The latter part of the year witnessed the birth from a popular viewpoint of tango, a not displeasing form of music on records. It can be regarded only as a vogue of the moment, so to speak, for in view of the intricacy and difficulty of the various movements, it is not likely to hold the field much longer.

A very important feature in relation to records is the exclusive artistic proposition which became more than ever the practice last year. Apparently it is a profitable plan to secure the exclusive service of a special public idol. In certain quarters, maybe, it represents a valuable selling asset, but generally I am inclined to believe it of not very material consequence. Many record makers have not

troubled to tie-up any artist, yet their trade is, and will be, unaffected. The most important asset is the prompt issue of the "hits" of the moment, and of a surety this consideration will ever determine the demand. Recognizing this salient fact not a few artists of my acquaintance have rejected offers for their exclusive service.

Points About the Copyright Act.

It is not denied that this bill removed a slight injustice under which composers suffered in the recording and publication of their works without monetary recognition from the gramophone industry, but it is safe to say that the amount of royalties paid during 1913 has far exceeded all preconceived estimates. As from July 1 last a large number of compositions automatically came under the benefits of the act, and the tax on record makers has, therefore, been phenomenal. Record sales have run into millions, and huge amounts are allocated each month for royalty stamps.

The act bristles with difficulty in the interpretation thereof, and some interesting law actions were heard during the last year, the result of which the trade as a whole is materially affected. One significant declaration to which the record companies have submitted is that an author is entitled to stipulate or control the form in which the score or libretto, as the case may be, shall be recorded. Even though his work or parts thereof have been recorded he can restrain the recording of any other version or mutilation which may not be in agreement. In other directions the tenets of the copyright act provisions have been sustained in law, and have made possible the avoidance of much difficulty, broadly speaking, in the smooth working of an act otherwise suggestive of future pitfalls for the record manufacturer.

One other source of considerable trouble and expense to manufacturers in connection with this act is the tracing of the rightful ownership of certain compositions and whether they are entitled to copyright benefit. Many works are invested in obscurity as regards copyright ownership, and

to a great extent the onus of discovery is placed on the firm desirous of recording the composition. This, of course, tends to considerable inconvenience, trouble and expense, and when the time comes manufacturers will have gathered a large experience upon which to base their claims for remedying the certain and many hardships inflicted by the copyright act.

It is worthy of mention that during the year, Newfoundland, Australia and other British Possessions passed legislation adopting the act.

The Year's Legal Troubles.

Aside from the important actions concerning copyright laws referred to elsewhere, the trade was unusually free from actions-at-law. Of course, quite a number of disputes arose during the year, but for the most part these were amicably settled outside the courts. There are one or two pending, I believe, although it is quite possible they will reach settlement without much legal aid. There were two trade-mark actions in 1913, and one or two other "name" disputes of comparatively unimportant interest. Of the former, the "H. M. V." trade mark was the subject of infringement by a suburban trader, the court ordering the destruction of the infringing apparatus, and an enquiry as to damages. The second case concerned the word "Invicta." W. A. Barrand & Co., Ltd., (in liquidation) made public claim to the word and threatened legal proceedings in any case of infringement brought to their notice. Objection was lodged by the Berliner Co. (Messrs. John Abraham & Sons, London agent), and it was proved to the satisfaction of the court that the name had never been registered. Application to register the word had been made by a third party who had allocated his interest in it to Messrs. Barrand, on whose behalf it was claimed they were under the impression the word had been duly registered. The Judge held that it had not and therefore the publicity was misleading. A nominal fine of forty shillings was imposed.

In the early part of the year the word "Lyric" was the subject of contention. The Columbia Co. had registered it some years ago, and they succeeded in restraining the now defunct Lyric Record Co. from using it.

Kalliope v. Blum, and Blum v. Kalliope, promised exceptional interest, but after a preliminary bout in the courts a compromise was reached to the satisfaction of all parties and beyond recording the fact, there is no occasion to enter upon a detailed account of the issue. Outside a few other minor legal disputes, the foregoing represents about the sum total of last year's appeals to the law of the land.

Advent of Cheap Records.

Under this heading I place the action of the trade in introducing the shilling record, for of all the year's happenings this must be ascribed the most important. Four months experience of the cheap record policy makes manifest that it cannot continue. Every new industry, by the law of competition, must sooner or later find a level. As things go ours is but a young industry, a matter of two decades, yet already it has been directed almost into the gutter. One's interpretation of a commercial "level" is the descent from the inflated-profit stage to a condition commensurate with reasonable trading returns for every section of the industry. Beyond that stage lies destruction, unless it were justified by economy in manufacturing costs and a cheaper channel distribution. In connection with the record trade an examination of the question reveals a most unsatisfactory state. Unprofitable alike for manufacturer, factor, or dealer, the persistence of the cheap record policy is calculated to undermine the stability of the whole industry, unless an immediate abandonment is possible. With such grave issues at stake, the rumor that the thirteen-penny and shilling records will be withdrawn, must—if it materialize—earn the gratitude of all who have the best interests of the trade at heart.

It may be argued by some that 1913 did not witness the birth of cheap records. That is partly true, but one must allow that those few in existence prior to last January were comparatively in-

significant and, moreover, it cannot be said they interfered to any appreciable extent with the sale of half-crown discs. On the other hand the marketing of the thirteen-penny record, immediately followed as it was by a host of shilling ones, disastrously affected the half-crown record sales. A large percentage of the public care nothing for artists and will not pay eighteenpence more for a particular title because it will be sung or played, as the case may be, by a performer of greater renown than the one responsible for the cheaper disc. It has been proved over and over again that given the record is good, the price determines the sale. Even so late in the day the immediate withdrawal of thirteenpenny and shilling discs would quickly operate in favor of the better priced records. There is much lost ground to recover, and the matter, to be successful, brooks no delay.

Cylinder Trade Depression.

Without descending into the realms of pessimism, an impartial view of the phonograph trade situation reveals a most unsatisfactory state of things. It is, of course, not entirely surprising in the face of recent events. For several years the phonograph business has been a declining one. But the curious part is that the very people who made and built up the one-time splendid trade in this country should themselves be largely responsible for its almost total extinction. The closing down of the Edison factory and now the Clerkenwell road premises and consequent disbandment of the staff, amounts nearly to a retreat from this market. The only remaining vestige of the business will be the recording department. Orders have now to be sent all the way to America, from where business arrangements are ratified. The difficulties of conducting trade over such a distance were soon unhappily apparent, for the policy which dictated centralization of the European business at Orange has done more to ease the phonograph trade over the precipice of destruction than the hundred-and-one new devices which were introduced too frequently on this unstable market. In short, the cylinder trade is practically dead. The largest British house, Edison Bell, has announced its intention of destroying all matrices; in itself the most significant confirmation of an all too obvious situation. It is an all-disc trade here and factors tell me the cylinder business is one long series of discouragement. With that I will pass on to a brief reference to one of two other items of interest.

The Dealers' Protection Association.

Little is there to say in reference to this matter, and it may therefore well include a mention of price-maintenance conditions during the year. In this regard 1913 stands for the most flagrant breach of the foundation of sound commerce; the worst year of all in the trade's history. Price-cutters have been having a ripping time, and they naturally protest that if manufacturers and factors indulge in the practice, what has the poor dealer to do? Anyway he does it—he "cuts" to the last halfpenny. An unusual number of failures among retailers during the year is the natural result. One had expected some activity on the part of the Dealers' Association, but if the truth be known, it is without sufficient membership strength to accomplish much. And not until a more wholeheartedly energetic policy obtains can it expect to wield a strong voice and make itself felt as a power in the land. Meanwhile, its influence is more or less nil, especially so in regard to its avowed object, the suppression of price-cutting. This, is I have said, is more or less a general practice. The unfortunate fact to remember is that outside "H. M. V.," Columbia, Marathon, Winner and Edison Bell, no patents cover the sale of disc records, and no infringement, therefore, obtains by selling below established prices. One or two other records are pretty effectually protected by price-agreements, but on the majority dealers fix their own price and for the most part protests are ignored. From the price-maintenance aspect the year has, therefore, been a most unprogressive one.

Miscellaneous.

The reduction of your general tariff will be to the advantage of almost any other industry but

ours. British record makers might build up a pretty good trade with the States were it not for your patent monopolies, which neutralize any good the tariff reductions might have conferred upon foreign manufacturers.

During 1913 the idea of issuing signed or autographed records became more in favor. It will doubtless be a stronger feature of the new year trade.

The Talking Machine Society movement is growing apace and received further stimulus last year. This feature is generally recognized as of some importance, and is encouraged by all manufacturers. The movement is spreading among users in the principal towns, and there now exists over a dozen different societies throughout the country.

Nineteen-thirteen credit conditions were exceedingly loose. Dealers take as much as three, six, or twelve months credit, or longer, if they can pass bills for these periods. The acceptance of bills is a growing practice, notwithstanding its unsound policy.

Business failures during the past year were unusually heavy among the retail fraternity and fairly normal in other directions.

Nineteen-thirteen witnessed the incorporation of about 15 new companies, most of which are now carrying on operations.

Several firms were forced to take larger or additional premises and among the more important removals may be mentioned Columbia, Lockwood, O. Ruhl, Ltd., Craies & Stavridi, and Hands' record factory.

Raw materials went up in price during the year and in almost every department an increased first cost is registered. An important financial issue was made public the early part of 1913. This was the Gramophone Company's £300,000 worth of debenture stock. At the time money was none too free, and it was accepted as a tribute to the financial standing and reputation of the "H. M. V." company that the whole amount and more was immediately forthcoming.

A noticeable tendency of the year was the prolongation of the so-called season, well into the spring months. That is a point well worth recording. One day, perhaps, we shall not talk of "seasons."

Nineteen-thirteen in one sense should be described as a year of amalgamations. Most of the big Continental firms now operate under one flag, and groups have been formed in other directions. All of which have been duly reported in these columns from time to time during the year.

The house-to-house canvassing trade is making great strides, one firm alone having a weekly turnover of £1,500. The policy of trading is the presentation of a machine upon a contract to purchase 60 half-crown records in 12 months; one a week at least. Contrary to the one-time opinion, this business opening up as it does a new field, confers a general benefit on the trade. Records additional to the contract are purchased from local dealers, and many users are encouraged to possess better machines than those supplied.

To sum up, 1913 might have been described as a good year had it not been for the introduction of unprofitable business in the shape of shilling records. Despite a greatly increased turnover, the financial aspect is not good, net profits being down as compared with the preceding season. Keener competition, higher cost of materials and reduced profits, mean that it costs considerably more, proportionately, to do the same amount of business. Which is altogether unsatisfactory. Fortunately the new year promises better prospect, for whatever may be said, the shilling and thirteen-penny records must go! To all my readers—"A prosperous and healthful New Year."

Records for January.

The new year opens up splendidly for "H. M. V." agents in the sense that a particularly attractive list of likely good selling titles is provided for the initial month. Each month since last September the Gramophone Co. has made a feature of issuing a combined record by two celebrated artists, that for this month being described as "perhaps the finest of the series." It is "Elegiac-

FROM OUR LONDON HEADQUARTERS—(Continued from page 46).

Mélodie," one of Massenet's masterpieces, sung by the great Caruso, in concert with the violin, in the hands of no less than Mischa Elman himself. That it is a wonderful record goes without saying.

In another class, a second "special" is "Another Good Thing You've Missed!" from the Drury Lane pantomime, "The Sleeping Beauty." The two original artists—George Graves and Will Evans—are responsible for the record, which is throughout full of laughter-raising fun.

The "H. M. V." Co. has achieved a triumph in the fine records they have secured of the much-talked-of Berlin Philharmonic Orchestra, under the baton of the equally famous Arthur Nikisch. The initial issues comprise Andante in two parts (two records) from the "Fifth Symphony" (Beethoven), which is beautifully interpreted by the great conductor's organization.

The complete issues for January are as hereunder:

Twelve-inch double sided.—Suite, "Bohemian," "The Appeal" and "The Caravan" and "The Tarentella" (Ord. Hume) Band of H. M. Coldstream Guards; Suite, "A Dream of Egypt," (2) "Within the Sphinx Solemn Shade"—"Pomegranate In Your Mouth," and (4) "I Wakened When the Moon" (Woodforde Finden, arr. by Percy E. Fletcher) Band of H. M. Coldstream Guards; "Destiny—Valse Lente" (Baynes), and "Dance of the Disappointed Fairies" (Air di Ballet) (La Touche) Mayfair Orchestra; "Je sais que vous êtes jolie" Two-Step (Christini), and "Maxixe Bresilienne" (Salabert) Mayfair Orchestra.

Ten-inch, double-sided.—"The Linnet" (Piccolo Polka) (Piccolo solo by Sergt. W. Valentine) (Brockett), and dance intermezzo "Sunbcams" (Gerald Lane) band of H. M. Coldstream Guards; "Little Grey Home In the West" (Cornet solo by Corpl. G. Moran) (Löhr), and "Süsse Küsse" (Vollstedt) band of H. M. Coldstream Guards; "Swedish Wedding March" (Söderman), and "Prayer From Moses" (Rossini) (arr. by F. Godfrey) band of H. M. Coldstream Guards; "June" (Baldwin Sloane), and "Some Boy" (Dave Stamper) Mayfair Orchestra.

Twelve-inch, single-sided.—"Ireland" (Stanford) Edmund Burke; "The Kerry Dance" (Molloy) Charles Tree; "The Island of Roses and Love" (Morét) Miss Lucy Marsh; "Mother's Maxims" (Pellissier) Miss Margaret Cooper; "In a Garden of Roses" (Sanderson) Miss Perceval Allen and Robert Radford; "Rhapsodié" (in English) (De Koven) and "Serenata Inutile" (Op. 84) No. 4 (in Italian) (Brahms) Mme. Tetrzini; "Che Gelida Manina" "La Bohème" (Puccini) Guido Ciccolini; "Minuetto-Vecchio," (Op. 18) No. 2 (Sgambati) Mark Hambourg (piano solo); "Air" (Bach, arr. by Squire) W. H. Squire ('cello solo); "Hunting Calls," The Rt. Hon. Viscount Galway, M. F. H.; "My Boy" (Kennedy Russell) Miss Florence Smithson; "Susie 'Oo" (Elton) G. H. Elliott and chorus; gems from "The Belle of New York" (Kirker) Light Opera Company.

Ten-inch, single-sided.—"The Foggy Dew" (Clay) John McCormack; "From the Land of the Sky-Blue Water" (Cadman) Miss Alma Gluck; "Down in the Forest" (Landon Ronald) Hubert Eisdell; "Cumley Down—Sons of the Devon Moor" (Oliver) Stewart Gardner; "Faust" trio from Prison Scene, Act. V. (Gounod) Grand Opera Trio; "Souvenir" (Morceau) (Drda) Miss Maud Powell (violin); "Just a Plain Girl" (Tennent) Tom Clare.

To Increase Society of Authors.

According to a contemporary a movement is on foot to increase the Society of Authors and to extend its benefits to British composers. Under the Copyright Act, 1911, the composers opportunities and responsibilities have been enlarged. For the past two years the composers' sub-committee has been sitting at the Society of Authors. This committee deals with all matters affecting the status of the composer. The society collects his fees at the lowest possible rate. It advises him in his dealings with publishers, exposes unfair and

sanctions fair contracts, supports him financially by maintaining actions-at-law in his interests and offers him an intelligence bureau and a trade protection society under expert management.

Gramophone as Professor of Tango.

A distinguished company gathered on Wednesday, December 10, in the White Room of the Savoy Hotel to see—and hear—demonstrations of the tango by famous dancers. Four pairs of dancers, including Destrées & Layunta and Roland and Marion Mitford, of the Palace Theater, showed both the Brazilian tango with its thrilling *elan* and the highly graceful English version: the feature of the afternoon was the perfection of the "orchestra" impersonated by "His Master's Voice" cabinet grand gramophone and tango records.

Dancers complain bitterly of the inaccuracy of many orchestras where tango is attempted; first-class organizations often fail to get the tempo correct. These records are endorsed by the dancers themselves, who declare them perfect to dance to.

Some very tasteful brochures have been issued by the "His Master's Voice" people to announce these new records. Learners of the tango everywhere are using this instrument to attain proficiency.

Thomas Edens Osborne a Live Wire.

In concert programs, newspapers and many other publicity sources, the advertisements of that well-known Belfast talking machine factor, Thomas Edens Osborne, appear with unflinching regularity representing an example of enterprise which other dealers might well copy. At entertainments, charity and otherwise, Mr. Osborne with his Auxetophone is usually a welcome contributor to the evening's enjoyment, and almost every day there is a newspaper reference to his kindness. Such tributes have made quite a public man of him, and I do not doubt but that so prominent a personality is justly regarded as one of Belfast's institutions. The distinction is well merited, for Mr. Osborne never seems happy unless he is contributing to the entertainment of the community at some function or other.

New German Trade Mark Bill Held Up.

It may be of interest to traders generally to learn that the proposed new German trade-mark bill cannot be introduced into the Reichstag for some considerable time. As a matter of fact it is in an incomplete state, its exact provisions not having as yet been determined.

New Companies Incorporated.

Warroner's, Ltd., musical instrument manufacturers. Capital, £1,000. Office, 15 New Oxford street, London, W. C.

Roll Music Co., Ltd. Capital, £1,000. Office, 93 Worship street, London, E. C.

Independent Music Club, Ltd. Capital, £10,000. Office, 13 Pembroke Gardens, Kensington, London.

Columbia Issue "Aida" Complete.

The announcement of a complete edition of records of the famous opera "Aida" is conveyed to us in a handsome leaflet just issued by the Columbia Co. We learn that the opera is complete in 34 selections, making 17 double-sided 10-inch records. These records, says the announcement, have been specially sung by some of Italy's greatest artists, among whom we notice, Signors Armanini, Martino and Bettoni, and Signoras Anita, Chelotti, De Perez, Remondini, and others, the whole of the series, to ensure absolute correctness, being recorded in the Milan laboratory.

It is typical of Columbia policy that the issue is thoroughly carried out, this being specially noticeable in the presentation, with each set of records, of a copy of the published libretto giving the words in both Italian and English. The pages of the libretto are specially marked to show where the records occur.

But the thoroughness of the Columbia issue does not end here. For in addition to an art folder giving the cast as represented by the records, the whole series of records are enclosed in a fine art album, gold-lettered, and bearing on the front an inset panel photograph of the composer, Verdi. The libretto and art folder are accommodated in a special pocket at the end of the album.

It is quite evident that the Columbia Co. intends to capture the popular taste with this "Aida" album, for they have priced it at £3 complete.

Paul H. Cromelin's Achievements.

In view of the recent transference of all Edison business to the American headquarters, the London staff has been disbanded, and Paul H. Cromelin's resignation has been accepted. As managing director of the London office Mr. Cromelin concentrated every effort to stem the tide of adversity surrounding the cylinder trade in this country, but no power on earth could effect this in the face of circumstances, and of the trade exigencies. In every other department of the Edison business substantial progress has been registered under Mr. Cromelin's able guidance, essentially one of keen foresight and extreme commercial acumen.

In the comparatively brief period of his stay among us, Mr. Cromelin took a prominent part in all matters affecting the welfare of the industry, and in particular the valuable work he rendered in connection with the difficulties of the copyright bill, will alone ensure for him a warm place in the memory of the British trade. His arrival in this country happened at a most opportune moment, for at that time difficult negotiations were on foot; we were in the thick of the copyright skirmish, and the outlook altogether was not over bright. Mr. Cromelin's wide experience of legal matters combining the art of translating vaguely worded acts into understandable language, which he freely placed at the trade's disposal, proved of immense assistance in defining the exact position of the mechanical instrument industry. The subsequent joint representation made in official quarters, resulted in securing for the trade some beneficial modifications of the act. Mr. Cromelin's whole-hearted efforts in this direction have won for him general recognition from the leading men of the industry, and he has been the subject of many eulogistic references in the trade press. Largely the outcome of his initiative a company was formed under the title of Universal Copyrights, Ltd., for the protection of trade interests. It mainly disposes of all matters relating to royalty stamps, copyright-ownership investigation, and places much valuable advice in the hands of its members, which comprise practically all manufacturers or records. In addition the company holds contracts with upwards of 100 publishers and composers, and its sphere of influence is expanding rapidly.

In the course of conversation with your correspondent Mr. Cromelin referred to his return to Washington at an early date where he intends to retrace at the Bar, from which he has been sidetracked for so many years looking after the Columbia and Edison interests. Our best wishes go with him for a prosperous new year.

Another recent departure from the Edison Co. is their sales-manager, W. Denville Simons, who, I learn, we shall shortly welcome back to the fold with an entirely new proposition. A man of such genial personality and wide experience of the trade is predestined to enjoy a full measure of success, for which we tender our heartiest wishes.

Christmas-Week Advertisement.

Special praise is due the efforts of those manufacturers in the direction of taking newspaper space wherein to emphasize the claims of the most suitable gift for young and old—the gramophone. During Xmas week many attractive advertisements appeared, all telling the same story, making trade for the dealer, and incidentally bringing happiness and increased joy to many a family gathering, as the result of "somebody's" judicious outlay. Several effective announcements by the Columbia Co., Pathe Freres, Marathon, Edison, Bell, and others in lesser degree, carried the message, but special mention should be made of the "H. M. V." advertisements. These have been appearing in the best journals throughout the season, the last splash—half-pages in the Mail, Telegraph, Mirror, News and Leader—a few days before the 25th, creating unusual interest. They told how the Xmas gift problem had been solved and illustrated a series of instruments at various prices to indicate that there was "a present for all."

NEW YEAR OPENS WITH GREAT POSSIBILITIES

**In the Cleveland Trade, Judging from Demand the Early Weeks of 1914—High-Priced
Instruments and Records Formed Large Share of Holiday Business—Local Jobbers
Took Good Care of Their Dealers—Few Complaints Heard Throughout the Trade.**

(Special to The Talking Machine World.)

CLEVELAND, O., January 8.—The close of 1913, throughout the holiday season, found the talking machine dealers busier than they had ever been in any previous season. One thing that especially pleased was that practically without exception they had an ample stock of instruments and records to meet the unusually large demand. A noticeable feature of the sales was that while a very large number of the high-grade instruments and records were sold, about an equal number of the lower priced ones were disposed of, demonstrating that all classes are seeking this means of enjoyment.

The new year opened with large possibilities, as trade has continued in pleasing volume to date. Locally, as in other sections, during the fall months there was some depression in trade generally, which was reflected in the talking machine business, but the signs of the times are now hopeful, with the reopening of steel and iron mills of this section giving employment to thousands who were recently idle.

The Phonograph Co., distributors of the disc and cylinder Edison phonographs, garnered encomiums and ducats during the holidays. L. N. Bloom, secretary, said: "Our business was, and continues, very fine. We were kept busy day and night all last month in both the wholesale and retail departments. Everybody expresses the highest admiration of the Edison instruments. We are fully satisfied with results and prospects since opening our new store.

The Caldwell Piano Co. did a large holiday business and reports trade is excellent.

The popularity of the Union phonograph specialties is manifest in the general favor with which they have been received by dealers everywhere. The Union Specialty & Plating Co., the manufacturer, was rushed and throughout December was compelled to work a full force day and night and Sundays on orders from all sections of the country of which it is in constant receipt. The management states the business is phenomenal and that the company has orders in hand to keep it busy for several weeks. H. B. McNulty, general sales manager, is away on a trip East.

Manager Madson, of the local Columbia store, is around with an unusual satisfied smile. He states that business continued exceptionally fine through December clear up to New Year's, and that it still continues, bulking large in machines and records of all kinds. The year, he stated, was one of genuine prosperity, while the past month's sales were nearly double those of a year ago.

Business with the Eclipse Musical Co. has been booming ever since Thanksgiving. Especially has this been true in the wholesale department, under the management of P. J. Towell, who is one of the busiest men in the city.

Miss Young reports the biggest holiday and mid-winter talking machine business the McMillin's ever had. Profiting by the experience of former years, the company trebled its usual order for machines last June, so it was able to take care of all customers nicely and to accommodate a few fellow dealers who ran short.

The Victrola department of the B. Dreher's Sons Co. has been a busy place for a month past. The manager said sales were of the best grades of both instruments and records, and that the Victrolas were practically sold out.

The William Taylor, Son & Co. is making much of its talking machine department. The manager, T. A. Davis, Jr., says he was swamped with holiday business, which was surprisingly good. Sales, he said, were principally of the higher-grade instruments and up-to-date records, and that double the business of a year ago was booked.

The Taylor Arcade branch of the Phonograph Co. is doing fine. W. C. Troth, in charge, says he had a splendid holiday trade and prospects are daily increasing.

Among some of the distinguishing features of the holiday trade Mr. Friedlander, of the Bailey Co., mentioned the fact that trade in December was not only a large per cent. of gain over last year, but that there were many more spot cash sales and that collections were much easier. Edison sales are measuring up large, and together with the Victor and Columbia and the small musical instrument trade the company is doing an extensive business.

Phil Dorn, of the Collisler & Sayre Co., is always happy when fingering a pair of skates, baseball or other sporting paraphernalia, but when he is in the talking machine department he becomes at once a Victor enthusiast, and his persuasive manner reaches the heart of the Victor purchaser, who departs in the happy possession of a Victrola. Many a machine has been sold through his gentlemanly endeavor. Phil says he got a goodly share of the holiday trade.

A large increase in business, covering the holidays, over that of a year ago was scheduled by the W. H. Buescher & Sons Co.

Miss Vokes, manager of the talking machine department of the May Co., stated trade in both instruments and records was splendid. "We closed out nearly our entire stock of the best grades of both Victor and Edison instruments," she said.

The Euclid Music Co., Victor Victrola and Edison phonograph dealers, located on upper Euclid avenue, has been doing a splendid business since opening last November. The management reports good sales of instruments and records and is highly pleased with the prospects.

Charles I. Davis reports the most satisfactory conditions. He states he did the biggest holiday

business of any previous season, and that his present trade is of the best.

Norman H. Cook, manager of the talking machine department of the W. F. Frederick Piano Co., took a run down to Warren Pa., and ate Christmas turkey with his mother. He says the company had the Victor goods this year and that the sales were large, the volume of last month's business being twice what he expected.

The graphophone department of the Marks Co. has been doing a very satisfactory business ever since the opening of the new store. Mr. Robinson, manager, stated that business was very good and that the holiday trade was fine. It being a "woman's store," it is becoming a fashionable resort for both ladies and gentlemen, and the musical feature is attractive.

SPECIAL DANCE RECORD BOOK

Issued by the Columbia Graphophone Co. and
Compiled Under the Direction of G. Hepburn
Wilson, M.B.—Will Be Found Convenient.

In recognition of the country-wide demand for dance music the Columbia Graphophone Co. has just issued an attractive four-page booklet devoted exclusively to this class of records. It is designed in several colors, the illustrations being appropriate to the type of dance music which they represent. The front and back covers show the four latest dances as they are actually danced, and the color scheme is effective.

The lists of Columbia dance records featured in the new booklet are compiled under the direction of G. Hepburn Wilson, M.B., one of the authorities on modern dancing, and his detailed knowledge of the music appropriate for the new dances was most invaluable in listing the various Columbia numbers. One-steps, Boston hesitation waltzes, turkey-trots and tangoes are all presented in this new booklet, which should prove a timely addition to the Columbia dealer in promoting the sale of dance records among his clientele.

CATALOG OF REPAIR PARTS.

Under date of December 19, the Victor Talking Machine Co. sent out to its dealers a new catalog of repair parts for the Victor automatic brake, repair tools and improved Victor fiber needle cutter. This catalog, which is up-to-date in every detail, takes the place of the repair part catalog issued September 1, which has been used to good advantage by the trade. The latest catalog features the usual illustrations showing the various parts mentioned in the pamphlet.

TAKES ON COLUMBIA LINE.

Among the recent additions to the list of Columbia representatives in near-by territory, are Samuel Weinstein, 54 Morrell street, Brooklyn, N. Y., and Seaver Bros., Fifty-second street and Third avenue, Brooklyn, N. Y. The latter concern has placed an unusually substantial order for Columbia machines and records, and has already laid the foundation for an excellent Columbia business.

THE VALUE OF THE "FOLLOW UP" CAMPAIGN TO DEALERS.

At No Time in History of Talking Machine Trade Was It So Necessary for Dealers to Be Up and Doing in Order That There Should Be No Backward Movement in Their Business—Territory Must Be Worked Energetically to Insure the Best Results.

One often hears it said that the talking machine business is a profitable one, and so it is, but not to the retailer who puts a sample instrument in his window and then expects to be immediately swamped with orders. What is required is well-directed and persistent effort, which can be counted on to bring results. The retailer must work his territory and see to it that the people in his district individually know that he sells certain instruments and records and what their merits are. A lady said recently, "I would not give one of those things house room." The "thing" referred to was a splendid talking machine, and one with which she would be satisfied, but her conception of it was based upon a cheap instrument she had heard several years ago, before the numerous improvements of the last few years had been made. In this particular instance the local retailer was mostly to blame. The woman had often been in his store. He knew she was fond of certain compositions, and yet he never once told her that a particular record had come in the last shipment and had it played for her. An ordinarily aggressive dealer would have sold that woman a talking machine months before she had made the remark mentioned above. In commenting upon this subject a successful retailer said, "When you get out and endeavor to dig up business it often happens that you can make a sale where you least expect to."

The show window has its place—an important place. Other factors all help in selling talking machines, but nothing can take the place of "follow up." Impressing this phase of the business some time ago, Geo. P. Metzger, the well-known advertising expert, handed out some excellent points. Among other things he said: "The follow-up is one of the biggest business getters in the talking machine trade, as well as others, and rivals in importance advertising and the quality of the goods itself. In laying out a follow-up campaign the entire public may be divided into classes as follows: First, the man who is interested and comes into the store for the purpose of making further investigations; second, the man who wanders into the store, but is not interested; third, the man who telephones or writes for information; fourth, the man who, while interested, has not called, telephoned or written; fifth, the man who is not interested in any way, and hasn't made any effort to find out the possibilities of the instrument, and so on down the line. No prospect who has shown the slightest interest in talking machines

either by calling at the store or writing should be allowed to get away without at least giving his name and address, and should receive the constant attention of the dealer until the sale is completed. The talking machine dealer should have a leaf from the book of the shoe salesman who never starts to make a sale until he has removed the shoe of the customer, for by that means the customer is prevented from leaving suddenly if dissatisfied, except in his stocking feet, and the salesman can present many arguments and show additional styles while the shoe is being replaced. Such a system could be readily instituted in the talking machine store.

TRAVELING MEN WHO ADVANCE.

One of the Requisites Is an Examination of Conscience to Show Whether Progress Is Being Made—Timely Topic Opening of Year.

How does the average traveling salesman of today account for the great success some of his fellow members of the craft have made, while he has not moved forward so rapidly? Some say it is luck, and others say greater advantages, while still others attribute it to opportunity, but the true reason why you have not advanced lies with yourself.

We live in an age where all men have equal chance at least to show their worth, and if you fail, it is because you have not trained yourself to think out the problems which stand in your way.

Pause and ask yourself: "How much real thinking have I done in the last year? Have I allowed some one else to think for me, while I have remained a cog in the wheel instead of contributing to the motive power that turns it? Have I grown with my position, or have I allowed my position to grow away from me?" Not until you can answer "yes" to each and every one of these questions can you hope to advance.

You often meet on the road men who have grown gray in the service and who know every telegraph pole from Maine to California, yet who are just where they were twenty years ago, while other salesmen stay on the road a year or so, are advanced to manager and so along the line to the general offices, and perhaps in the firm. The answer is, the man who advanced trained himself to think of nothing but advancement and permitted no other thoughts to enter his mind. By sheer force of will backed by ability he reached the goal of his desires.

"The great majority of those who are not inter-

ested in talking machines remain in that condition simply because they have never been approached. I know of a whole street in a Connecticut city where everyone owns his own home, and where a talking machine salesman has never made his appearance for the purpose of introducing the talking machine directly into the home. I would wager that I could go into the territory of practically any dealer and call upon ten families at random and find that only two owned machines, and of the balance six had never been approached by a salesman for that dealer. It is to remedy such a condition that the dealer should adopt a careful and systematic follow-up. A good rule is for the dealer himself to make it a point to call upon at least one new family per day, and introduce his line with the accompanying offer to give a demonstration, either in the home or in the store, as convenient."

CO-OPERATIVE INVESTING PLAN.

New Scheme of Encouraging Thrift Among Employes Put Into Operation by an Ohio Department Store—Has Many Points of Merit That May Interest "Talker" Trade.

A new plan for encouraging thrift among its employes has been put into operation in a prominent Ohio department store which may interest talking machine men. It is a co-operative investment scheme, the object of which is to promote saving and to assist employes desirous of making investments on small capital. The movement is being carried on under the head of a savings bureau, and it began work with a pledged deposit of \$4,100. This amount consisted entirely of pledges made by the buyers of the store. This money, together with other deposits received from the employes, will be deposited with a trust company at 4 per cent. interest until it has grown large enough to be invested. In addition to the interest paid, it is planned to pay dividends semi-annually on deposits of three months or more from the future earnings of the fund. A regular weekly or monthly deduction from the salaries of the employes making use of the bureau may be arranged by them if desired. The store paymaster will apply the deducted amounts direct to the employes' account in the bureau.

The Mead Stationery Co., which is one of the dealers on the books of the New York Talking Machine Co., ascribes its success to several reasons, chief among which are the quality of Victor products, the national advertising of the Victor Co., and the newspaper advertising of the company itself. The Mead Stationery Co. is to be congratulated on its latest advertising campaign, which is deserving of excellent results.

IN the clinches you can rely upon the **Ditson Victor Service.** Profits are contingent upon *our fast work*—and we know it.

STOP saying to your customers: "We haven't got it," because you can get it from **DITSON.**

FAST Victor service is our aim, and that we hit the mark is proved in our rapidly growing clientele of dealers.

ALL Victor Styles, records and parts, with a complete line of albums, cabinets and needles.

WE specialize upon Victor goods exclusively, and correspondence with dealers desiring the best in Victor service is invited.

Oliver Ditson Company,

Boston, Mass.

Whether looked at from the viewpoint of art, reproduction, volume or tone, the Columbia Grafonola "Colonial," \$150, table design, is a winner for any line.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

QUICK RESULTS WITH EDISON DISC.

Hardman, Peck & Co. Report Excellent Volume of Sales in New Line During the First Fortnight It Was Handled by This House.

"We have closed a remarkably good business with the Edison disc line in the few weeks that it has been established in our institution," stated Ashley B. Cohn, of the wholesale traveling staff of Hardman, Peck & Co., 433 Fifth avenue, New York, the prominent piano house. "We had expected that the Edison line would be accorded a favorable reception by our clientele, but the instantaneous response to our advertising and that of Thomas A. Edison, Inc., has pleased us greatly.

"Although our Edison disc department has been established but a short time, and our department has only been completed recently, we have already closed a number of sales of the more expensive models to music lovers, who were greatly impressed with the tonal beauty of the new Edison disc phonograph and the fine quality of the Edison disc record.

"On the Saturday preceding Christmas our Edison disc department resembled a bargain counter in a department store, as, in addition to the regular clerks of the department, it was necessary to request several of the officials of the company, two members of the wholesale piano staff and several members of the retail piano warehouses to assist in taking care of our Edison patrons.

"The selling arguments on behalf of the Edison disc line are so varied and so numerous that the salesman is permitted to avail himself of a wide field in the presentation of his talk on the merits of the machines and records, but as a matter of fact a demonstration of one or two records of various types is sufficient to close the sale without any extended salesmanship. We are enthusiastic over the future of the Edison disc line in our house, and feel sure that 1914 will be an Edison disc year, as the consistent advertising of the disc product cannot fail to extract inquiries which become ready sales as soon as the machine is demonstrated."

SCHOOL CONCERT INTERESTS.

Pupils of North Union High School Enjoy Victrola Recital by Courtesy of P. W. Simon.

(Special to The Talking Machine World.)

UNIONTOWN PA., January 6.—One of the live-wire merchants in this city is P. W. Simon, the well-known Victor dealer, who is always on the lookout for opportunities to present the Victrola through mediums that are off the beaten track. In line with this policy Mr. Simon recently directed the giving of a concert in the auditorium of the North Union High School, at which the Victrola was featured. Last year each one of the Uniontown schools enjoyed a recital, but this was the first Victrola concert given in a township school. The 145 pupils assembled in the auditorium, and a program in two parts—the first half devoted to musical appreciation, and the second to popular concert—was produced. The concert was a marked success, due to Mr. Simon's careful supervision of all details.

DEALERS COMPLIMENT SERVICE.

Express Appreciation of Manner in Which the New York Talking Machine Co. Took Care of Their Requirements During Holidays.

"December 26 was truly a day of compliments from our many dealers," stated V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor. "Telephone calls, letters and personal interviews have been the mediums used by our clients to express their appreciation of the excellent care we have taken of them throughout this time of marked machine shortage.

"Our ability to satisfy all our dealers this season was due to our method of handling all requests and orders on a sound, reasonable basis. We made it a point this year to give everybody what they wanted and to give no dealer what he really did not want. We made this well-nigh ideal condition possible by means of telephone calls and personal conversations with our trade, emphasizing all the time that we would gladly co-operate with them in every possible way to best solve their selling problems. Although some of our dealers were not taken care of until the eleventh hour, the later machine arrivals were as promptly disposed of and as much appreciated as if they had been received in the first part of the season.

"This has been a record-breaking December for everybody. We are receiving many letters from our dealers telling of the excellent results they achieved this month, one letter on the top of this morning's mail reading as follows being a fair example: 'This was the greatest December I ever had. I am over \$3,000 ahead of last December, with another week to go. Best wishes to all.' This is from a small but aggressive dealer up-State.

"We have a very keen sense of appreciation of the patronage that our dealers have given us during the past year, not only during the holiday season but throughout the whole year. Every man in our organization has contributed to the work of co-operation we carried on in 1913, and our plans for 1914 include a still more detailed method of working in complete harmony and keeping in close touch with all our dealers."

NEW BOOTHS FOR BLACKMAN.

The Blackman Talking Machine Co., 97 Chambers street, New York, the well-known Victor and Edison distributor, has just added to its wareroom space two new booths, making ten in all. These new booths were completed two days before Christmas, and rendered valuable assistance in taking care of the holiday trade. The company is now utilizing all of the extra floor space which it acquired recently.

WOULD CURB ADVERTISEMENTS.

Minnesota Congressman Urges More Stringent Mail Laws to Prevent False Ads.

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 9.—Laws preventing distribution through the mails of newspapers and periodicals that publish advertisements falsely representing articles proposed for sale were to-day advocated by Representative Steenerson, of Minnesota, before the House Inter-State Commerce Committee. Steenerson urged the enactment of Federal statutes prohibiting the sale or transportation of misbranded and misrepresented articles of commerce. He instanced numerous articles made in Germany, England and Japan which bore American names and were sold in this country as products of American labor.

The fundamental purpose of such a law, he explained, would be to instill honesty in business.

IMPORTANCE OF THE MOTOR

The Subject of Some Valuable and Informative Pointers in Circular Sent Out by the Victor Co.—Necessity of Regulation.

Under a recent date the Victor Talking Machine Co. sent out to its dealers an interesting letter on the proper adjustment of governor springs and barrel caps in order to permit of the regular running of motors. This letter treats in detail of the various causes of the irregular running of the motors, and mentions the different means that should be adopted to make the motor run true to form.

Among other things the company calls attention to the fact that the talking machine must be regulated more closely than a watch or clock, and should therefore be very carefully adjusted. It is suggested that it is unreasonable to expect an instrument which is supposed to reproduce the human voice or the most delicate tones of the violin in perfect time and tone to operate properly after being thrown about roughly by freight "hustlers" time and time again.

ENLARGE VICTROLA DEPARTMENT.

The Foster Piano Co., Troy, N. Y., which recently put in a large Victrola department under the management of Leslie C. Hathaway, has remodeled the ground floor of its building to permit of the installation of several sound-proof talking machine demonstrating booths. In the piano line the company handles the Knabe, Haines Bros., Foster and other lines of pianos and player-pianos.

OPEN "TALKER" DEPARTMENT.

The Gus Blass Co., Little Rock, Ark., has opened a talking machine department, with S. M. Field as manager. The Columbia line is handled.

A MAN SHOULD HAVE A CLEAR VISION OF HIS VOCATION

Says John Wanamaker, the Prominent Merchant, in a Recent Address Before the Leaders' Club of Philadelphia—Business Not a Matter of Mere Machinery—A Man Must Love His Business to Succeed in It—Must Be Something More Than Merely Making a Living.

The opinions of men who have scored a success in the business world are always valuable—that is, the views of practical men who have worked their way from the bottom to the top. Hence the recent address of John Wanamaker before the Leaders' Club of Philadelphia makes good reading because it gives a mental picture of the speaker and the elements that have gone to make him a leader in the commercial sphere. He said:

"Business is not a matter of machinery; it is not a great granite building; it is not iron and steel and rock; it is the human force that is in it. It is the man. What you are after, I am sure, is to see that every man becomes a better man and has a greater sense of responsibility and a larger vision of things that ought to be done.

"I would like to say to you that no business can be conducted from the outside. You cannot get it out of the newspaper or from some theory. It is the thing that is on the inside of it. It has got to be within us. You cannot learn it all in this convention. You cannot learn it all next year. It is something that must be in the human mind and in the human soul if it is going to come to anything.

"The brain and the heart of the organization are first of all the brain and heart of each individual. The best music box that was ever contrived is easily gotten out of order. You let in stand and it rusts. If you fail to wind it up in the right way it plays discord. The human heart and mind are like that. They have got to be wound up. They have got to be kept from rusting. You cannot think that you know it all.

The First Thing Is to Be a Man.

"Progress is the result of self-development. It implies self-direction. God never made a man just because he wanted one more man. He wanted you. He started you with a different shaped head, different face, different thoughts.

"When Garfield graduated from college the boys stood together talking. They said to him, 'Jim, what are you going to do?' He replied, 'The first thing I am going to do is try to be a man.' They then asked, 'Well, what about the rest of it? What are you going to do?' He said, 'I don't know. In the first place I intend to try to find out God's plan for my life and then to run along with it and not across it.'

"Did you ever hear that? That is worth your remembering—not to run across God's plan, because after all we are God's children, whether we are Jews or Gentiles, white or black. God is our Father; He is our helper and He wants us to succeed.

"I want to say to you again, progress is the result of self-development, self-direction of the talents and energies which were given to you. Someone else cannot manage your energies. I wish someone else could manage some of mine, but one cannot. We go zigzag and crooked before we know it. Something down inside of you, when you think of a wasted day, haunts you and makes you wish you could go back and do the day over.

Efficiency Is All-around Application.

"Efficiency, it seems to me, is an all-around application to the work in hand and untiring energy and patience. These to me are the foundations of success. Each man must understand the game as a whole. He cannot just pick up a little corner of it. He may do something, but I think it is an absolute necessity for a man to put the whole of himself into anything if he is going to get the success that his Heavenly Father wants him to have; that his mother wants him to have; that his company wants him to have.

"It is not a game to be played, a game to be enjoyed; not just enough to satisfy, but to do the very highest thing that you can. It is a wonderful inspiration to greater success for you. It is an influence on another man.

"There are some men that have genius, that can read a page of a book to look at it. Some men

get a great thought or vision and they believe they do not have to work. These visions will come, and they are capable of doing something very wonderful; but in a long life I have never seen great success like that. Here and there one may stand out prominently.

"I should say the first essential for any man to succeed in any business is to love it. If he does not love it he is likely to get tired. A man very easily drifts off to something else. The other side of the road looks better to him. When he gets there it is the same thing. You have got to love a business more than simply making a living or the opportunity to lay up some money.

"A man should have a clear vision of his vocation and manfully and planfully—not playfully—work it out."

REGULATING SIGN ADVERTISING.

An ordinance designed to do away with the cloth signs used to exploit special sales of doubtful merits has been put into effect in Portland, Oregon. The ordinance was backed by the local advertising club, and was originated at the suggestion of and under the direction of A. G. Clark, a member of the national vigilance committee of the Associated Advertising Clubs of America. It is called the cloth sign ordinance, and reads as follows:

"That it shall be unlawful for any person, firm or corporation to construct, maintain or tack any sign, banner or card constructed or made up in whole or in part of any combustible material, upon the outside walls, front, rear, sides or roof of any building or other surface, or over or upon any of the sidewalks within the city of Portland, excepting as provided in Section 2 hereof.

"Signs, banners and cards not exceeding twenty square feet in area are not prohibited by this ordinance; provided, however, that not more than one of such signs, banners or cards shall be constructed, maintained or tacked within every twenty lineal feet.

"Signs, banners and cards provided for in Section 2 of this ordinance shall be securely fastened and attached to the building or surface upon which they are placed. No sign, banner or card, as provided for in this ordinance, attached to the outside walls of any building, shall project higher than its blocking course or fire wall.

"Any person, firm or corporation violating any of the provisions of this ordinance shall, upon conviction thereof in the municipal court, be punished by a fine of not less than \$10 or more than \$250, or by imprisonment in the city jail not to exceed sixty days, or by both such fine and imprisonment.

"The police department is hereby authorized to remove any and all signs, banners or cards which are now in existence or which may be hereafter constructed, maintained or tacked in violation of the provisions of this ordinance."

TALKERS BY PARCEL POST.

So far as we know the first talking machine concern to advertise the shipping of talking machines by parcel post was the Crafts Piano Co., of Richmond, Va. No doubt others have fallen in line, and the business of shipping machines by parcel post will grow. The following facts concerning the growth of the parcel post business will be interesting:

It was announced recently from Washington that the profits to the Government from the operation of the new parcel post system during the calendar year 1913 would be about \$30,000,000. The new system became effective on January 1 last. It was estimated that the profits for the first year would be about \$15,000,000, but the actual figures now in possession of postal officials convince them that the profit, instead of being \$15,000,000, will be \$30,000,000 for the first year.

This will be interesting news to railway officials, who have been contending that their roads were entitled to extra remuneration for carrying the mails on account of the operation of the parcel post. It is said that, even assuming that the contention of the railroads was correct, there still would have been a good margin of profit at the end of the calendar year 1913 after the payment of extra remuneration to the roads. If a parcel post adjustment were made along the lines suggested by some of the railroads, probably not more than \$10,000,000 of this \$30,000,000 would be due to the railroads as extra pay. The total income from the parcel post for 1913 will be around \$80,000,000.

The whole question of railway mail pay, that is, compensation to the railroads for carrying the mails, is likely to be readjusted next year. Immediately after the meeting of Congress in regular session in December, a bill will be introduced providing for this readjustment. The measure is now being drafted. It will seek to establish an entirely new method of paying the railroads for carrying the mails and do away with the present archaic method of computing the payment to roads.

The name describes the needle and the needle fulfills its tone— The PURITONE Needle.

FURNISHED in Puritone or your own envelopes packed in different sizes. Quality guaranteed. Price popular. Dealers can secure a sample package free. Send jobber's name with letter. Remember, a quality needle will help you; it means a profit and a following.

THE following is a new selling idea for needles, packed exclusively by us:

Instead of selling 100 or 200 needles at once, sell a thousand. We pack 1,000 assorted needles in a box, each box containing 200 of Extra Loud, Loud Opera, Medium and Soft. This is the "Special" Dean Packing. You can sell 1,000 instead of 100 and thus get 10 times the business.

Want the Puritone Needle samples?

PUTNAM, CONN.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., January 10.—PHONOGRAPH. Frank L. Dyer, Montclair, N. J., assignor to the New Jersey Patent Co., West Orange, N. J. Patent No. 1,081,374.

This invention relates to phonographs, and the chief object thereof is to provide a phonograph reproducer whereby cylindrical sound records of different diameters may readily be brought into adjusted position to be engaged by a reproducer stylus.

When it is desired to bring a cylindrical sound record of an external diameter different from that of a record for the reproduction of which the phonograph is adjusted into engagement with the reproducing stylus, the desired end may be encompassed either by movement of the phonograph mandrel or record-carrying support into proper position for the co-action of the record carried thereby with the reproducer stylus, or, the phonograph mandrel being stationary, the position of the reproducer may be adjusted so that the stylus carried thereby is brought into operative relation to the new record. In a companion application (Serial No. 509,040) filed on even date herewith, there are disclosed means operating by

the last-named principle, the mandrel having no movement toward and away from the reproducer, while the latter is carried by a sound conveying tube pivoted at such a point that the reproducer stylus may be brought into operative relation with records of different diameters by pivotal movement of this tube. In the present application, the reproducer is held in fixed position, while the adjustment for different sizes of records is obtained by movement of the phonograph mandrel toward and away from the reproducer.

Having this object in mind, this invention consists in the construction of parts and combinations of elements necessary or desirable for the carrying out of the desired objects.

Figure 1 represents an end elevation of a phonograph embodying this invention, the inclosing cabinet being shown in section; and Fig. 2 represents a top plan view of the same, a record of large diameter being shown in cross section.

PHONOGRAPH. Peter Weber, Orange, N. J., assignor to the New Jersey Patent Co., West Orange, N. J. Patent No. 1,081,352.

This invention relates to phonographs, and the object thereof is, broadly speaking, the production of a compact and efficient device for the conveying and dissemination of sound in the reproduction thereof.

More specifically, there is provided a structure wherein the cover for the phonograph is pivoted, and when in open position may be supported in such position that a sound conveying tube connected with the neck of the reproducer may deliver the sound waves set up by the vibration of the reproducer diaphragm into the interior of the said cover. The cover is provided in its interior with sound deflecting means, and means for conveying the sound so deflected smoothly to the open or bottom end of the cover, this sound conveying means within the body of the cover being of such a character as to amplify the sound.

Preferably, the open end of the cover, when the latter is in its open position, is forwardly directed, the cover being supported in a position at right angles to that in which it is placed when the cover is closed. The sound conveying tube connected to the reproducer is preferably supported within the cover and directs the sound waves against the inner side of the top of the cover, whence they are deflected forwardly with amplification to the open end of the cover and thence to the audience. By this construction, sound conveying and amplifying means of sufficient amplification are provided in a less space than would be

necessary if the sound amplifying horn were all in one structure, as is common, and a compact structure is thereby attained.

TONE-CLARIFYING ATTACHMENT FOR SOUND REPRODUCING OR TRANSMITTING INSTRUMENTS. Cora Stetson Butler, Cleveland, O. Patent No. 1,081,719.

This invention relates generally to tone-clarifying devices for use with sound producing instruments or machines, and has particular reference to a device of this character which is adapted to be employed within sound reproducers of prevailing types of gramophones, telephones and other such machines or instruments, and is capable of being applied thereto as an attachment without the necessity of making any change or modification in the sound reproducer.

The objects of this invention are to provide as an attachment for the sound reproducers of gramophones, telephones and other sound reproducing machines or instruments a tone-clarifying device which may be quickly and conveniently applied to existing types of sound reproducers; which controls the vibrations of the diaphragm, preventing its acting too violently and continuously and thereby eliminating the fluctuation or echoing effect of the tone which is usually present in the operation of the aforesaid machines or instruments; which is very durable; and which is simple and economical of production.

It is commonly known that, accompanying tones reproduced by machines or instruments of the

above class, there is an unpleasant grating or rasping sound which detracts materially from musical reproductions, and, in the case of the reproduction of speech results in a confusion of inarticulate sounds, and this very displeasing quality is most noticeable in tones of high pitch. In fact, it appears to increase in direct proportion to the rise in pitch, which would seem to prove that, as the vibrations of the diaphragm become more rapid and the sound waves produced thereby shorter, following each other in more rapid succession, there becomes an agitated condition of air and sound waves within the sound reproducer. In other words, the principal sound waves seem to be surmounted by smaller sound waves or false vibrations or fluctuations, the resulting effect of which is nothing more than a noise. It would seem to follow from this that if certain means were introduced in the sound reproducer which would obviate this confusion by keeping under

control the diaphragm and consequently the sound waves resulting directly from the vibrations thereof and which, at the same time, would interfere in no way with the delicate operation of the diaphragm, some, if not all, of the disagreeable qualities which are incidental to such instruments would be eliminated.

Whether the above theory is correct or not, it has been found by experiments that, by placing within the sound reproducers between the diaphragm and the parallel wall of the casing a device comprising a plurality of properly arranged discs of various sizes and materials, the reproduction of the tones are cleared of all impurities resulting from the false vibrations or fluctuations of the diaphragm, and the effect is practically the same in richness and clearness as the original production.

Figure 1 is a central vertical section through a sound box of a gramophone having a device of the invention applied thereto; Fig. 2 is a sectional detail of a telephone receiver, illustrating the manner in which the device is used with such instruments; and Fig. 3 is a perspective of the various elements which constitute the device, separated in order to show their relative sizes and positions.

DOUBLE-POINTED REPRODUCING STYLUS FOR TALKING MACHINES AND HOLDER THEREFOR. Edward T. Condon, Jr., New York, N. Y. Patent No. 1,080,328.

The invention has for its object to provide a one-piece reversible stylus having oppositely pointed ends, one of which may be of different character from the other if desired; and it has for a further object to suitably protect the inactive ends of such stylus.

Figure 1 is a front elevation of a sound box, stylus holder, partly in section, and the stylus

held thereby. Fig. 2 is a view of the under side thereof. Figs. 3 and 4 are respectively a plan and elevation of a guard for the stylus. Figs. 5 and 6 are respectively a plan and elevation of another form of guard.

Similar characters of reference designate corresponding parts throughout the several views.

The invention relates to a novel reproducing stylus or phonographic needle as employed in connection with rotating cylinders or discs in talking machines, and to a novel holder therefor.

DIAPHRAGM FOR SOUND BOXES. Pliny Catucci, Newark, N. J., assignor to Meisselbach & Bro., same place. Patent No. 1,080,953.

This invention relates to diaphragms for sound boxes used for recording and reproduction of sound upon the well-known phonograph, and more particularly relates to the form and structure of the diaphragm itself. Ordinarily, such diaphragms are made of glass, mica, celluloid, a thin sheet metal, as copper, bronze, etc., or any thin elastic membrane. It has been proposed to construct these diaphragms with concentric annular corrugations, or with radial corrugations, with the idea that such corrugations will more readily gather up and respond to certain sound vibra-

tions which a plain disc is incapable of responding to. From a series of experiments it has been discovered that by producing in the face of a metallic disc or diaphragm what is termed a grid formation of corrugation more delicate sound

vibrations can be recorded and reproduced than has heretofore been possible by the use of any of the special forms of diaphragms. In some cases it has been found that one shape or form of grid corrugation will respond more readily to certain delicate sound vibrations than a grid of another character, while such other grid will respond to sound vibrations which are apparently too gross for other forms of grid. Again, in some cases it is advisable to distort the disc from a true plain into a concavo-convex contour.

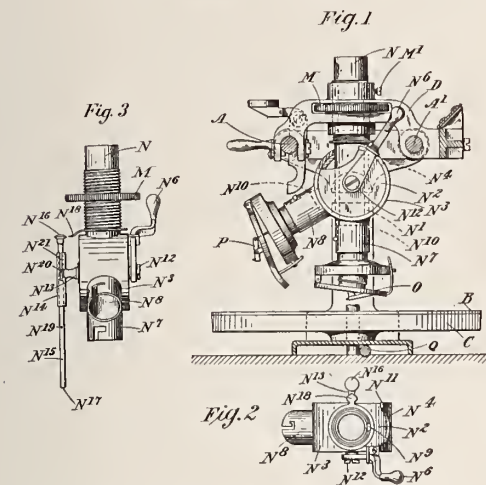

Fig. 1 illustrates the face of a diaphragm made in accordance with this invention with the rectangular form of grid. Fig. 2 is a similar view showing a triangular form of grid. Fig. 3 is a similar view wherein the grid is made up of curved corrugations so as to form the complete figure into rhombuses. Fig. 4 illustrates in cross section a sound box with a flat disc made in accordance with this invention. Fig. 5 is a view similar to Fig. 4, but having the diaphragm concaved outwardly.

TALKING MACHINE. Walter Hansen Rawles, London, Eng. Patent No. 1,080,231.

This invention relates to diaphragm carriers for talking machines and the like and is especially intended for use in that class of machine adapted to the immediate reproduction of matter recorded. In particular it is well adapted for use in the machine described in United States Patent No. 1,027,350.

The invention has for its objects to improve the working of such machine and to facilitate the general process of recording and reproduction.

It is known to provide a diaphragm carrier upon which reproducing and recording diaphragms are mounted upon a pivot at right angles to the plane of the diaphragms in order that either may

be swung around into position directly in front of the end of the speaking tube.

The present invention provides in a talking machine a diaphragm carrier comprising a holder for reproducing and recording diaphragms so supported as not only to be capable of being turned about an axis parallel with the planes of the said diaphragms to bring either into operative position upon the record tablet, but also to provide a straight, unbroken closed-in passage from the speaking tube to whichever diaphragm is in operative position.

The invention also provides for the employment of a fine adjustment for the diaphragm carrier whereby the recording and the reproducing stylus may be adjusted in relation to the recording tablet, and for the amount of adjustment necessary to be automatically indicated.

In the accompanying drawings, Fig. 1 is a side elevation of a disc machine upon which a diaphragm carrier according to the present invention is mounted. Fig. 2 is a plan of the diaphragm carrier dismantled from the machine, and Fig. 3 is a corresponding end elevation.

SOUND BOX. Pliny Catucci, Newark, N. J., assignor to A. F. Meisselbach & Bro., same place. Patent No. 1,080,954.

This invention relates to that class of sound boxes for the use in phonographs and talking machines wherein the disc record is commonly used,

although it may be used in connection with machines using the cylinder record; it relates more particularly to the improved form of stylus lever and its method of attachment to the body of the sound box, and is directed more particularly to the simplification of such parts with a view to the improvement of the results to be obtained, as well as the reduction of the cost of manufacture and quickness and facility of adjustment.

In the accompanying drawings forming a part of this specification, Fig. 1 is a front elevation of the complete sound box. Fig. 2 is a similar view with clamping ring and diaphragm removed. Fig. 3 is a side elevation of the complete box. Fig. 4 is a similar view of the box body. Fig. 5 is an enlarged sectional view on line 5-5 of Fig. 1. Fig.

6 is a side view of the stylus lever detached. Fig. 7 is a plan view of the stylus lever blank. Fig. 8 is a plan and Fig. 9 is a side elevation of the clamping washer. Figs. 10a, 10b, 10c, 10d, 10e and 10f are respectively perspective views of the several parts of the sound box arranged in the order in which they are assembled to form the complete box. Figs. 11 and 12 are respectively right and left side elevations of a modified form of sound box. Figs. 13 and 14 are sections through the right and left supporting lugs. Fig. 15 is a front elevation and Fig. 16 is an under plan view of said modified form.

STYLUS FOR SOUND-REPRODUCING MACHINES. James W. Owen, Lansdowne, Pa., assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,080,924.

This invention relates to styli for sound reproducing machines, and particularly to those styli or needles which are adapted to be used in talking machines to reproduce sound from commercial sound record tablets.

It is customary, in reproducing sound in a sound-reproducing machine from sound record tablets with the use of an ordinary steel stylus or needle, to use the steel stylus but once, and when a steel stylus has once been employed in reproducing sound from a given tablet it is usual to throw it away and to replace it with a new steel stylus to reproduce sound from the same or another tablet.

After a steel stylus has been used to reproduce sound from a sound record tablet, the tip or point of the stylus is always worn to an appreciable extent and a sharp edge is generally formed thereon which tends to cut or unduly wear away the walls of the groove of another tablet, especially when that groove of the second tablet is not exactly of the same shape and size in cross-section as that of the first tablet, and particularly if that worn stylus would be placed at any other angle or in any other position than that which it occupied during the reproduction of sound in the first sound record tablet.

The object of this invention is to obviate the necessity of changing the stylus for each reproduction of sound from a sound record tablet, and to provide a stylus which may be used to reproduce sound from a large number of different tablets without substantial injury to the tablets. It has been discovered that when a sound-reproducing stylus is composed of tungsten, that stylus may be used repeatedly in reproducing sound from different sound record tablets without the necessity of re-forming the point of the stylus and without substantial injury to the walls of the sound groove.

Tungsten is considerably softer than steel, and

generally speaking, would be expected to exhibit a much greater wear during the reproduction of sound from a sound record tablet, due to the abrasive action of the material of the sound record tablet upon that portion of the stylus in engagement with the tablet than would steel. It is found, however, that when a stylus is made of tungsten and is used in reproducing sound from a commercial sound record tablet, it exhibits peculiar and unexpected properties. Thus, during the first few revolutions of a sound record tablet, the groove of which is in engagement with a stylus made of tungsten, a new tungsten stylus wears more rapidly than does a steel needle of the same size and shape, but after that the tungsten stylus wears much more slowly than such a steel stylus does. As a matter of fact, after the first few revolutions of the sound record tablet, and the first wear has appeared on the surface of the stylus, the stylus wears so slowly as to be substantially negligible. The amount of wear which a tungsten stylus exhibits during the reproduction of sound from commercial sound records may be more readily understood when it is stated that when a steel needle is run only two or three times across a record the point of the steel stylus generally wears down sufficiently to form a shoulder and will injure the surface of the sound record groove to such an extent as will often render the reproduction of sound from the record very indistinct. A tungsten stylus, however, may be run over the same record 300 or 400 times before the reproduction begins to get indistinct.

After the tip of a tungsten stylus under the abrasive action of the material forming the sound record tablet has worn sufficiently to substantially fit the groove, the wear on the tip of a tungsten stylus is very slight. It would appear that after a certain amount of bearing surface between the end of the stylus and the walls of the sound record groove has once been obtained, the wear of the tungsten stylus is exceedingly slow.

Fig. 1 represents the sound box of a sound-reproducing machine provided with a stylus of

tungsten in engagement with a sound record tablet, the stylus being shown on an enlarged scale for the sake of clearness; Fig. 2 is a greatly enlarged view of one form of the improved tungsten stylus; Fig. 3 is a cross-sectional view through the tip of the stylus shown in Fig. 2; Figs. 4 and 5 show a modified form of tungsten stylus in which the tip is elliptical in cross-section; Fig. 6 is a diagrammatic view indicating a sound record groove on a greatly enlarged scale, and a cross-sectional view of the tips of the two forms of styli shown in Figs. 2 and 4 in the plans of the surface of the sound record tablet, and Fig. 7 is a further modified form of stylus.

No honest purpose is ever wasted and no honest desire ever remains unanswered.

NEW EDISON DEALERS DOWN EAST.

Edison disc dealers have recently been installed in Keene, N. H., and Brattleboro, Vt., and other points in these States.

The well-known firm of A. W. Dickerman, Church street, has the line in Keene.

Many a man's best friends are those who know him least.

READE your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

EDWARD LYMAN BILL
PUBLISHER

373 Fourth Avenue, New York City

Wherever there is a person who likes music, there is a market for Edison Phonographs.

This line is so complete that it best meets the requirements of all tastes and all incomes, of those who are themselves musicians and of those who can neither play nor sing but who love good music.

Just as the field of good music on the Edison is unlimited, so the audience to which it appeals is anything that you want to make it.

The Music Trade Review

This is the oldest music trade publication in this country, having appeared without interruption since July, 1879.

It is published every Saturday, and contains a thorough and exhaustive resume of all departments of the music trade industry.

Its editions vary from 60 to 150 pages.

It is conceded to be the most influential paper representing the music trade, and if you are interested in the topics with which it deals, do not fail to receive this paper regularly.

DANCE RECORDS SCARCE IN ST. LOUIS.

Heavy Demand for Such Records, with Dealers Unable to Get Sufficient Stock—Jobbers Between Two Fires—Remarks of Mr. Rauth.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., February 7.—The dance is the thing in the talking machine business in this section at present. Dance record sales are exceeding the factory speed limit, or at least they are trying to, but unfortunately for the dealers, they cannot sell more records than the factories will turn out. With this rush for dance records comes an accompanying demand for machines to play them. Perhaps this is the explanation of the excellent business that is being reported for January, but the movement of machines is too heavy to ascribe it to the dance demand alone; part of the demand must be ascribed to the general gain in business.

But seriously, there probably is not a dealer in this section that has had all of the dance records he wants. Some of them have revived some old records that will meet the demand, and have cleared out these when the ones that are called for are not at hand. This shortage is peculiar in that it affects all makes as far as this territory is concerned. A saving grace of the situation is that the new dances are so much alike that if the dance called for cannot be had, some other will do.

The wonderful jump of the talking machine business in December, and its maintained pace through January, has set a good many dealers in this musical thinking, who had not given really serious attention to this line before.

A letter received by the Koerber-Brenner Music Co., the well-known Victor distributors, a few days ago, illustrates the situation. E. C. Rauth, vice-president of the company, was on a trip through Kentucky and to other Southern points and varied his route to a town not heretofore visited. He got a very nice record order and a few days after his return home received a letter from the dealer thanking him for the prompt shipment, and concluding: "I gave you the records I could not buy of the two jobbing houses I have formerly patronized, and you filled it 50 per cent. Please accept my thanks." The fact that a dealer is willing to thank a jobber for a 50 per cent. filled order shows what the situation is in this section.

Concerning this trip Mr. Rauth says that the business accumulated for immediate shipment was surprising. "It all goes to show that the dealers are not overstocked after the holidays, and that they are appreciating the possibilities of this constantly growing business."

MAYERS BUYS ROONEY STORE.

Ninth Avenue Dealer Will Conduct This Establishment as a Branch Store.

The stock, assets and good-will of the talking machine store of John J. Rooney, 1983 Broadway, New York, recently adjudged bankrupt, was sold at a private sale February 2 by J. N. Blackman, receiver. The purchaser, who was the highest bidder at the sale, sold the store in turn to A. H. Mayers, the well-known Victor and Edison dealer at 790 Ninth avenue, New York, who will conduct the store at 1983 Broadway as a branch establishment.

LOWER DUTY ON RECORDING WAX.

The Board of General Appraisers this week upheld the claim of A. H. Ringk & Co., importers and customs house brokers, relative to their request for lower duty on importations of wax specially prepared for use in making records.

Collector Malone classified the article as a manufacture of wax not specially provided for, under Paragraph 462 of the old act, and exacted duty at 25 per cent. ad valorem. The importers said the wax was an unenumerated manufactured article, dutiable at 20 per cent. under paragraph 489.

GREAT BUSINESS INCREASE

In Talking Machine Department of J. W. Jenkins' Sons Co., Kansas City, Necessitates Erection of New Demonstrating Rooms.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., February 6.—To such proportions has grown the business of the talking machine department of the J. W. Jenkins' Sons Music Co., of this city, under the management of Burton J. Pierce, that it has been found necessary to remodel the company's store for the purpose of making room for four additional demonstration rooms. The new rooms, built of mahogany and plate glass and perfectly sound-proof, will be located on the ground floor, where there are already ten rooms, and when the new equipment is installed the company will have in all twenty-one rooms devoted exclusively to the demonstration of talking machines.

Michael Bard, who has been connected with the Jenkins house for the past five years as salesman, making some records in that line, has resigned for the purpose of entering another line of business.

NEW EDISON JOBBER IN SEATTLE.

Pacific Phonograph Co. Incorporated in That City with A. R. Pommer at Its Head.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., February 6.—The Pacific Phonograph Co., N. W., has been organized to engage in the jobbing business of Edison products, with headquarters in Seattle, Wash. A. R. Pommer, proprietor of the Pacific Phonograph Co. in this city, is head of the concern, and C. O. Baker is secretary and manager. Mr. Baker is new in the talking machine business and also new in Seattle, coming from Colorado, but he is taking hold of the enterprise in a creditable manner and is getting things started in very good shape, with the assistance of J. E. McCracken, the well-known traveler for the local company, who is up there at present for the purpose of directing matters where experience is needed. Mr. Schwab will act as traveling representative of the Northern house. In the future the entire Northwest will be covered from Seattle, instead of from this office, which will enable the Pacific interests to give better service in that section. The Seattle warerooms are at 310 Maritime building, where spacious quarters have been secured in a desirable wholesale section.

TALKER MUSIC FOR WAR DANCES.

Indians at Annual Meeting in Lincoln, Neb., Hear Their Native Music Reproduced.

(Special to The Talking Machine World.)

LINCOLN, NEB., February 5.—The monotonous, rhythmic thump of the Indian tom-tom with the quavering falsetto of the squaws as they danced the "Omaha" and "Sun" dances in circles of whirling war-bedecked savages were made realistic recently for 200 gray haired men and women who met at the Temple Theater in the annual meeting of the Territorial Pioneers' Association. The music was played on a talking machine. These wax impressions were secured by Prof. M. R. Gilmore, of the university faculty, who is arranging for their preservation in the university archives.

BARKER BROS. NEW QUARTERS.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., February 5.—Arrangements have been completed by Barker Bros. for new quarters for the talking machine department, which will give this department a much more prominent place in the business. A number of new demonstration rooms are being installed on the main center floor, where attractive and splendidly equipped quarters are being fitted up. J. H. Booth, manager of the department, expects to leave for the East shortly.

NEW STORE IN MILWAUKEE.

The Milwaukee Phonograph Co. to Open a Large Retail Store at 213-215 Second Street About March 1—Will Feature the Edison Line—Place to Be Attractively Fitted Up.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., February 9.—The Milwaukee Phonograph Co., jobbers in Wisconsin for the Edison line, has completed all arrangements for opening a large retail Edison store at 213-215 Second street about March 1, or soon after that date. William A. Schmidt, manager of the company, has had the plan in mind for several months, but has been waiting until he could secure the proper location. There are undoubtedly wonderful possibilities for a large downtown retail Edison store in Milwaukee, and Mr. Schmidt believes that the exclusive location which he has secured will insure a big business from the high-class trade. Two floors of the Second street building will be occupied and there will be more than 15,000 square feet of floor space available. Most of the first floor will be occupied by the new retail department, while the remainder of the space will be taken up by the wholesale department of the company, which will be moved from its present quarters at 347-349 Broadway. Offices of the wholesale department will occupy the first floor, while the second floor will be given up to stock rooms and demonstration parlors for dealers. Handsome parlors for the retail trade will be opened on the first floor. Several thousand dollars will be spent, according to Mr. Schmidt, in fitting up a complete and attractive Edison store which will surprise the people of Milwaukee. Mr. Schmidt has not selected, as yet, a manager for the new retail store, although he says that he has several men in mind for the place.

DRAFTING HYPOTHECATION BILL.

National Association of Credit Men Perfecting Bill Which Will Protect Manufacturers from Customers Who Secretly Hypothecate Their Accounts Receivable—Interesting Details.

The Legislative Committee of the National Association of Credit Men is still busy on the bill it is drafting to protect manufacturers and jobbers from customers who secretly hypothecate their accounts receivable. According to W. W. Orr, assistant secretary of the association, the committee is trying to draft a bill which will be protective to the creditors without being oppressive to the mercantile bankers and financial companies. It has been suggested to the committee, Mr. Orr said this week, that it make provision for amending the State law applying to chattel mortgages so that it will provide for compulsory filing with the County Clerk of records of accounts that are sold to financial companies. The main idea of the bill is publicity, and this is what many of the newer companies do not want. The amendment to the chattel mortgage law is being worked successfully in the Province of Saskatchewan, Canada, it is said this week, that it make provision for amending such provision is now in effect.

BUYS FULL SET OF OPERA RECORDS.

Unusual Sale of Victor Records Made Recently by Krausgill Piano Co., Louisville, Ky.

A record sale of particularly interesting character was made recently in Louisville, Ky., when the Krausgill Piano Co., of that city, sold to one man, R. T. Durrett, a complete set of Victor opera records for a present to a friend. The Krausgill Co. believes that the sale sets a new record, for although it is a frequent occurrence to sell all the records of one or even several operas, it is believed to be the first case where a single purchaser has taken a complete set of records of all the operas in the Victor catalog at one time.

SPECIAL CENSUS OF TALKING MACHINE INDUSTRY.

W. M. Steuart, Chief of Division of Manufacturers of the U. S. Census, Seeks Co-operation of and Suggestions from Manufacturers and Others Connected with the Talking Machine Trade to Insure Accuracy in Compiling Statistics Regarding the Industry.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 7.—Talking machine manufacturers as well as jobbers and dealers are invited to volunteer suggestions as to how the coming special census of the manufacture of musical instruments, which will include talking machines, may be made more complete and of greater value in the trade. The World is asked to carry this message to all the interests in the industry by W. M. Steuart, Chief of the Division of Manufactures of the United States Census.

The purpose of the special census of 1914 in the musical instrument field will be, like its predecessors, to show the absolute and relative magnitude of the different branches of the industry; the growth and decline of manufacture in the various lines; the size and character of the establishments, etc. Obviously, such information is of value chiefly to the persons who are engaged one way or another in the musical instrument business, and it is with the object of giving the trade just the class of information that would be of use to the Census Bureau officials who have asked The World to circulate a broadcast invitation.

There are a number of topics on which the officials want specific information, such as the matter of costs of material and other changes that have occurred during recent years in the talking machine as well as other lines of business in the music trade field.

The officials are in a quandary as to whether or not they should not henceforth in gathering statistics as to the manufacture of sound-producing instruments make separate tabulations of the horn machines and the hornless or cabinet machines that have latterly attained such vogue. They are waiting to hear from the trade on this score.

Again they would appreciate hints as to whether the trade would prefer to have separate statistics upon the manufacture of single-sided and double-sided records instead of having all disc records lumped as heretofore. In the last census, too, there was no attempt to separate, in tabulation, the cylinder records and blanks produced for entertainment purposes from those designed for office dictation work. The officials would like to have somebody "on the inside" tell them whether it would be well to specialize further in this direction.

Anxious to Meet Manufacturers' Wishes.

In all instances the Government officials are

anxious to as nearly meet the wishes of manufacturers as is possible. For instance, in speaking of possible changes in the scope of talking machine statistics, the expert in charge of this part of the work, said to The World: "Whereas we are anxious to compile all the statistics that would be of value, we realize that there are so comparatively few manufacturing firms engaged in this industry that we must exercise the greatest caution not to make public information that, if closely scrutinized, might disclose some of the business secrets of firms in this field."

Members of the trade may in some instances be a trifle mystified as to the early activity in preparation for the coming special census in view of the fact that this census is to cover the calendar year 1914, and consequently the actual compilation of the figures cannot commence until early in 1915. The explanation of the quest for advice a year in advance is found in the fact that the officials are now preparing the schedules—the lists of questions which will be sent to every manufacturer of musical instruments in the United States.

Revising List of Manufacturers.

If any change is to be made in the character of the information gathered—that is, if any new questions are to be put to manufacturers as to the volume of their business—it will be necessary to outline it on the printed blanks which will be mailed to manufacturers during the close of the present year. Meanwhile, as another preparatory activity the Census Bureau is revising its confidential list of the musical instrument and talking machine manufacturers of the United States.

One plan that has been formulated tentatively by the officials of the Bureau of Manufactures contemplates that the musical instrument census of 1914 shall embody a discussion and analytical study of the industry with reference to its trend and development and not a mere array of figures, as is the case with the census the returns of which have just been printed in permanent form. Ten years ago special reports of this kind were made in the case of a number of industries—although I believe that music trade production was not then included—but if men in the trade will urge such special study by an expert there is little doubt that the musical instrument business can have such representation in the project now taking shape.

The Chief of the Division of Manufactures expects to have complete figures regarding the industry on hand at the end of the present year, so that the full results of the census of all branches

of the music trades will be published during the summer or autumn of 1915—an unprecedented record in view of the fact that always heretofore it has required at least three or four years to complete the canvass and publish the data. It is expected that the coming census will show that the manufacture of musical instruments (including talking machines and phonographs) is one of the eight most important industries in the United States, and as such it will merit prompt analysis of the statistics and announcement of the results.

EUREKA PHONOGRAPH CO. CHARGE.

(Special to The Talking Machine World.)

CALUMET, MICH., February 6.—Among the shipments of freight recently received here was 480 pounds of talking machine needles, which were shipped to McLogan & Pierce, dealers in talking machines and other musical goods on Fifth street, Red Jacket.

Manager Logan, of this firm, stated that this is one of the largest shipments of needles ever made to one firm in the State of Michigan, or perhaps in any town in the entire Northwest. The shipment of talking machine needles covers all varieties, including soft tone, loud tone, wooden, fiber, nickel, steel, large and small, in fact every sort of a needle that is made for a talking machine.

The McLogan & Pierce concern covers a large territory, including the iron district, and its increasing business necessitated having a large stock on hand to meet supplies. They have just moved into large and spacious quarters in the old Keckonen Building on Fifth street, where they will have much larger quarters to meet the demands of their business, which is steadily growing despite the strike in the copper country, which territory this firm covers very largely.

KING CANS HIS SPEECHES.

Christian X, of Denmark Talks Into Phonograph for Posterity—Cablegram from Edison.

King Christian X., of Denmark, is the first monarch who has talked into a phonograph for the purpose of preserving his voice for the historic phonographic archives in the Danish Royal Library.

He repeated into the instrument his proclamations and his speech from the balcony of the Analienborg Palace to a great gathering of cheering people when he received the crown after King Frederick's sad death in a Hamburg street.

The following congratulatory cablegram was received from Thomas A. Edison: "I am pleased to learn that the Danish nation should be a pioneer in preserving for posterity the methods and life of their ancestors."

It Requires No Great Stretch of the Imagination to Realize That Eastern Service Must Be Good

CONSIDER: The fact that we have been handling talking machines, records and supplies *exclusively* for nineteen years.

- : That our entire time, energy and attention is devoted to one line.
- : That constant application is given to the betterment of our service.
- : That our stock is large, complete and up-to-date, and our shipping facilities unusual.

THEN YOU HAVE some of the reasons why EASTERN SERVICE is different from the ordinary.

The absolute proof is in the trying. Try it.

Write for sample and prices of our Albums, which are superior to all others.

Address NATIONAL PUBLISHING CO., 235 South American St., Philadelphia, Pa

A LIVE TALKER DEPARTMENT.

Section of Main Floor of Store of F. G. Smith Piano Co., Washington, D. C., Given Over to Sale of Victor and Columbia Machines.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 7.—So rapid has been the development of the business of the talking machine department of the F. G. Smith Piano Co., at 1217 F street, this city, that it was recently found advisable to move the department to the main floor of the company's building, where sound-proof and other special equipment was installed to facilitate the proper handling of the trade. The accompanying illustration affords an excellent idea of the general attractiveness of the department.

The F. G. Smith Co. handles both the Victor and Columbia lines of talking machines and records, and features both in an aggressive manner. Complete stocks of both makes of records are always kept on hand. The business in both machines and records during the holidays was in excess of any previous record made by the company, while trade for January was in excess of same month last year.

In addition to the talking machine lines the F. G. Smith Co. also handles the Chickering, Bradbury and other makes of pianos and player-pianos with great success.

A RECIPE FOR "MAKING GOOD."

As a man's knowledge broadens to understand the relations between his own special work and the work of other departments, he tends to become inventive. He will probably see means of improving a method or process, some economy that could be effected, some difficulty in inter-departmental relations that could be smoothed away. Every time he succeeds in securing any such advantage, his interest in his work and his self-confidence

F. G. Smith Piano Co.'s Talking Machine Display Rooms, Washington.

are increased. He grows. As soon as he begins to accept or to gather information beyond the special task entrusted to him, such growth begins in him. And when such growth begins, a man always wants more and more knowledge. He becomes absorbed in a satisfying pursuit. His part in the business will never be monotonous. Both that part and the entire business will be alive with interest.

FEATURING DANCE RECORDS.

Columbia Graphophone Co.'s Store in Boston Makes Capital Out of the Run of "The Sunshine Girl" and Sells Many Records of Argentine Tango from That Play—Miss Sanderson Uses the Grafonola—An Interesting Letter.

(Special to The Talking Machine World.)

BOSTON, MASS., February 7.—The Columbia Graphophone Co., 174 Tremont street, is closing a splendid dance record business, which has been aided considerably by the testimonial given in store by Julia Sanderson, the prominent actress, appearing in the successful play, "The Sunshine Girl." One of the most successful records in the Columbia catalog is the one featuring the Argentine Tango from Miss Sanderson's play, and this dance was rehearsed by Miss Sanderson with the assistance of a Columbia Grafonola.

Miss Sanderson's letter to the Boston store reads as follows: "It may please you to know that the Columbia Grafonola I am using at my hotel and theater is a wonderful help to me and Mr. Mudie in rehearsing before each performance the Argentine Tango. The music as rendered on your instrument is of better tempo than that furnished by the average orchestra. You are to be commended on the splendid tango selections made by the Municipal Band of the Argentine Republic. I should like to see more Bostonians learning this new dance, as it is especially beneficial to their health and figure. Anyone seeing my dance in 'The Sunshine Girl' at the Hollis Theater would know I liked 'The Tango,' but the beautiful grand opera selections and instrumental records made by your company give me an equal amount of pleasure."

As a rule, the man who is always hinting that a raise in salary would be appreciated is not to be looked upon as favorably by his employer as is the man who takes an interest in the business, does his best and depends on merit for a raise.

DANCE MUSIC HAS THE CALL ON THE PACIFIC COAST.

Present National Dancing Craze Has Good Effect on Volume of Record Sales—Wiley B. Allen Co. Business Shows Big Gain—Sherman, Clay & Co. Officials Visiting Branches—Bacigalupi Business Divided—Byron Mauzy Store Remodeled—Other Trade News.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., February 6.—Talking machine distributors and dealers here are very well satisfied with the way in which business has kept up since the holidays. In spite of stormy weather, retail sales have been fully up to normal, and the shipping movement has been gratifying. A strong feature of the business the past month has been the steadily increasing demand for dance music; San Francisco seems to have gone dance mad, and no one is profiting more by the craze than the talking machine interests. Everywhere a big demand is reported for dance records, and the trade anticipates an unusually large spring business on account of this particular demand, as it does not seem to interfere with the sale of other records. Naturally an increased demand for machines is expected also.

Heavy Gain in Talker Department.

George R. Hughes, assistant manager of the Wiley B. Allen Co., says the closing of books for the year while revealing that the volume of business in the piano department barely held its own, the talking machine department showed a decided gain, the holiday season being a banner one in that part of the business, both here and in San Francisco and at the branch stores. Jas. J. Black, manager of the talking machine department here, reports a strong demand for the Style XI Victor Victrola, and he says the popularity of the new dances has stimulated the demand for medium priced records to a noticeable extent.

To Visit Sherman, Clay & Co.

Andrew G. McCarthy, treasurer of Sherman, Clay & Co., and manager of their wholesale and retail Victor business, planned to visit the company's interests in the Northwest this month in company with Phil T. Clay and Geo. W. Bates, auditor of the company, when they made their annual trip of inspection, but did not get away with them, so will now make his trip a little later.

Big Demand for Columbia Dance Records.

At the local warerooms of the Columbia Graphophone Co. the year is reported starting off in a very encouraging manner, with a rapidly increasing demand for dance records. F. Anglemier, manager of the wholesale department, says he has already booked a good many orders for numbers appearing on the March list. A new man has been added to the local traveling force in the person of Clifford P. Le Roy, who has been in the office for some time. In future C. J. Moore will devote his attention to the city, and Mr. Le Roy will look after the country. Mr. Moore returned a short time ago from a visit of several weeks to his home in Kansas City, where he spent the holidays. While away he visited the Columbia interests there, in Denver and other cities where he stopped.

George P. Metzger a Visitor.

George P. Metzger, advertising counsel of the Columbia Graphophone Co., spent a few days in San Francisco the past month while on a tour of the country, making an inspection particularly of the retail situation. This was his first visit to California.

Bacigalupi Business Divided.

The talking machine department of Peter Bacigalupi & Son has been separated from the electric piano part of the business, the former having been taken over by Peter Bacigalupi, Jr., who has been in charge for a long time, and Mr. Bacigalupi, Sr., acquiring all interest in the other part of the business. In the talking machine department a jobbing and retail business is conducted in Edison and Victor products.

Byron Mauzy Store Remodeled.

Extensive improvements have been inaugurated at the store of Byron Mauzy on Stockton street, including the enlargement of the ground floor space and the installation of an additional show window, which will afford opportunities for specialized win-

dow displays. Mr. Mauzy maintains a large talking machine department, and has just recently added the Edison disc phonograph, which he will feature in addition to Victor and Columbia lines. Chas. S. Mauzy, son of the proprietor of the store, has been made manager of the talking machine department. He has started to learn the music business from the bottom up, having spent considerable time since he left college at factories in the East, and for several months having been

THREE NEW EDISON ARTISTS

To Make Their Debut in the Edison Blue Amberol Record List for April—The Three Have Long Been Prominent in Church, Oratorio and Concert Work in the United States.

Month after month Thomas A. Edison, Inc. is increasing the roster of artists who are making Blue Amberol records. The April list will contain three newcomers in Beulah Gaylord Young, Grace Couch Embler and Frederick Gordon MacLean. The first named of the three singers has been a mem-

Beulah Gaylord Young. Grace C. Embler.

ber of the Victoria Ladies' Quartet, popular in club, concert and church work, and is also soloist at the Thirty-third Street Collegiate Baptist Church, New York. Her voice is of beautiful quality, perfectly placed and her first number for the Blue Amberol list is "My Chain of Memories," by Mrs. Herbert Ingraham, a pleasing selection.

The second artist, Grace Couch Embler, has

connected with the selling force of his father's store here.

Manager Beck Wants More Space.

P. H. Beck, who operates the talking machine department in the Kohler & Chase store here, is now negotiating for more space. He says the business has gone ahead very gratifyingly in the six months he has been there and that it has already become necessary to provide additional accommodations. He is now located on the mezzanine floor, but hopes to move to one of the upper floors of the building this spring.

A. A. Schell, general manager of the music departments of the Emporium, says business has kept particularly well in the talking machine department since the holidays. Here Columbia products are handled exclusively.

long been popular as a singer in prominent churches in New York and Brooklyn, and has also done oratorio and festival work with Nordica, Bläuvelt and other noted singers. She has also been head

of the large glee club in Brooklyn called "The Emblem Glee." She makes her debut in the Edison Blue Amberol list in Wm. R. Chapman's "Lullaby." The third artist, Frederick Gordon MacLean, is a New Yorker whose musical career started when a boy, having been associated with some of the leading boy choirs up to the time he commenced to study singing. In recent years he has been con-

TO TRAVEL FOR COLUMBIA CO.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., February 6.—One of the recent additions to the local staff of the Columbia Graphophone Co. is H. C. Clowdsley, who will travel through Oklahoma and Kansas as the successor to John Ditzell, who has taken charge of the Columbia department of the Blass department store in Little Rock, Ark.

UNION SOUND BOX

Why the Edison line meets every requirement

Every phonograph purchaser is influenced by two questions: How much can I afford to pay? Do I like the tone?

Every merchant who sells the Edison line has the right answer for both questions. He has a range of models that recognizes the man of modest income as well as the man who can afford to spend more. A purchaser can pay whatever he can afford. That's the answer to the first question.

But it's more important that every phonograph in the line is a true musical instrument—with a voice of mellow, rich quality that makes the Edison line unique on the basis of tone. That's the answer to the second question.

Some people have a preference for cylinder phonographs. Very well, sell them the

Edison Cylinder Phonographs

which have reached a degree of excellence that embodies every noteworthy recent advance in phonographs. In the Edison Laboratories the cylinder types are constantly kept up to the minute.

There is the added attraction of novelty about the

Edison Diamond Disc Phonographs

which are now being so extensively advertised. People everywhere are asking to hear them. They want to know about the new diamond reproducer, about the new records—so hard that they are impervious to wear, yet so sensitive that no sound, however minute, fails to be registered.

In a word, the merchant who sells the Edison line has every mechanical and musical argument on his side. He also is able to offer this mechanical and musical excellence at any price that his patrons prefer.

There is a jobber convenient to you. Write us for his name.

HEAVY RECORD TRADE A FEATURE IN CINCINNATI.

Serves to Create an Excellent Post-Holiday Volume of Business—Branch of the Phonograph Co. May Be Made Permanent—What Various Houses Report Regarding Conditions and the Outlook—Big Run on Ysaye Records with Columbia Co.—Other News.

(Special to The Talking Machine World.)

CINCINNATI, O., February 7.—A tremendous volume of talking machine business is now falling to the lot of the Cincinnati dealers. During the past month the demand has been for records, which is only natural, following the sales of machines in December for the holiday season. The feature of the situation to-day is the amount of talking machine gossip that can be heard among the consumers. This, in itself, is a big item and will undoubtedly result in these buyers of the past inducing others to become purchasers.

Some of the friends of John Arnold, while still a young man, but is credited with being the oldest Edison dealer in this market, are much concerned over his physical condition. Arnold has been compelled to seek an absolute rest. He is now at Colorado Springs and is not expected back until shortly before March 1. Mr. Arnold suffered a breakdown during the Christmas rush, but managed to hold on until the latter part of January.

The Cincinnati branch of the Phonograph Co. continues to retail to cash customers and the trade here would not be surprised if the temporary house here was made a permanent one from both a jobbing and retail standpoint. Manager A. O. Peterson Saturday intimated that a vigorous advertising campaign would soon be started in this market. Peterson is preparing to make a personal visit to the factory at Orange, N. J., to see about shipments for his branch. During the past month M. W. Ehrhardt, Franklin; M. N. Billings, Chillicothe, and the Hutchinson Music Co., Portsmouth, O., became dealers for the Phonograph Co.

The Milner Musical Co. Sunday advertised some of the old style machines of all makes, with a collection of records, for \$5.

The talking machine shop at the Lyric Piano Co.

is now on a permanent basis and is attracting much attention. The booths have a snappy appearance and are spacious enough to accommodate a bunch of buyers.

Manager Dittrich, of the talking machine department of the Rudolph Wurlitzer Co., is in a most optimistic frame of mind about 1914. He believes the outlook is even greater than last year. His views follow:

"We have just passed a very busy month. The large number of Victrolas sold in December created a very vast amount of record business, which, when added to the unusually large demand among all Victrola owners, created a condition which is very hard to meet. Our facilities were taxed to the utmost, but we handled the situation with little trouble, and our record stock for a time at least was equal to the occasion. We look forward to the active record months of February and March with great hopes, and with every assurance of being able to cope with the situation.

"The machine situation has been, and is a great problem; every Victrola sold in December is an active salesman, and the machine business this month has been limited only by the amount of stock received from the manufacturer. There is no doubt that 1914 will be far in advance of the previous year, by virtue of the very fact that 1913 was the 'banner' year of the talking machine business."

The Columbia Graphophone Co. took advantage of the visit of violinist Ysaye to feature its product as follows: "Eugene Ysaye, world's supreme master of the violin, makes records exclusively for the Columbia. But if you happen to own a Victor talking machine you can still enjoy these wonderful records, because all Columbia records can be played on Victor talking machines. Likewise, all

Columbia instruments will play Victor records."

There was no hesitancy on the part of Mr. Whelen, Cincinnati manager of the Columbia Graphophone Co., when he said that business has been on the increase instead of on the decrease since the holidays. He said: "Unlike previous years, the opening of 1914 was marked by a wonderful demand for instruments of all prices, from the 'Eclipse' to the Columbia grand, whereas in previous years there has been a great demand for records, but not for machines right after the holiday season. We always expect record sales to double in January, but this year both sales in machines and records have shown a decided increase over the same period of 1913. Nineteen hundred and thirteen has been a phenomenal year, and it only goes to show that the public is realizing more and more the superiority of Columbia goods. Last year the Columbia Co. carried on a tremendous advertising campaign, but this year the advertising department is redoubling its efforts and results are already beginning to show. This 'boom' is not only local, but from reports throughout the territory and from what our traveling man tells us, all the dealers are very sanguine about the prospects for 1914."

Geo. W. Lyle, general manager of the Columbia Graphophone Co., was in Cincinnati for a day and was very enthusiastic about business in general throughout the United States.

January business at Aeolian Hall was most satisfactory, registering a large increase over a year ago. The record and machine departments show large gains, the \$100, \$150 and \$200 models being big sellers.

Manager G. R. Bethel, of the Victor department, has things moving in great shape and has surrounded himself with a most efficient organization. The location of three of the first floor record booths have been changed during the past week so as to give more floor space outside for machine display. The entire rear section of the first floor, formerly used for the general offices of the company, is now being used for Victor record stock.

The Aeolian Co. is a great believer in the efficacy of window display of Victrolas and Victor records. With the splendid location of Aeolian Hall and the large daily crowds of passers-by, the window becomes a very important consideration. Liberal window space is given the Victor line every week. Unquestionably many "drop-ins" result from the Aeolian policy of constant and forcible window display.

DISCUSS 1 AND 2 CENT POSTAGE.

H. T. Griffith, One of the Speakers Before the Publicity Division of the Indianapolis Chamber of Commerce on the Question of Postage for Advertising Letters.

The Publicity Division of the Indianapolis Chamber of Commerce, which was formerly known as the Adscript Club, recently discussed the proper use of one and two-cent postage for advertising letters. A number of prominent advertising men contributed to the discussion, relating their present experiences. Among others were Howard T. Griffith, of the Udell Works, talking machine cabinet manufacturers, who told of his successful use of the red one-cent parcel post stamp for circulars. It will be recalled that the red parcel post stamp is similar in size, color and general appearance to the Panama Exposition stamp. He mailed some circulars in a pink, open-end envelope with a red border, harmonizing in color with the red penny stamp, and found he did better than when he used another penny of postage, the cost considered, for there was practically no difference in the returns.

"TALKER" MANAGER IN ELOPMENT.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., February 5.—M. J. Corcoran, of the Oakland Wiley B. Allen talking machine department, was a principal in an elopement on January 27, at which time he and Miss Ruth A. Winter, daughter of a prominent Los Angeles contractor, were married. The romance is said to have had its inception in this New Year's eve festivities, which makes the wooing and wedding all come within a month.

Won't You Have a Lesson in Spanish?

It's so easy to learn by the I. C. S. system—and a knowledge of Spanish is so useful nowadays.

The I. C. S. system of language instruction by means of the phonograph makes easy the mastering of a foreign language, and appeals with compelling power to thousands. The dealer in phonographs who does not carry I. C. S. Language Outfits is neglecting a quick and sure way to increase his business. The new \$35 Language Outfit of the I. C. S. is a marvel. It represents the highest art in the teaching of languages, and embodies a method that has won the warmest praise of thousands qualified to speak authoritatively. The Spanish, French, and German Embassies at Washington, as well as the leading colleges, have cordially indorsed the I. C. S. method of teaching languages.

The I. C. S. Language Outfit consists of an Edison Gem Phonograph made especially for language work; small horn; headband hearing tube; oil can; and 25 Conversational Records teaching pronunciation guaranteed to be absolutely correct, with native intonation and inflection. In addition to these Conversational Records there are pamphlet Instruction Papers teaching the theory of the languages. The new Outfit is at one and the same time the best and cheapest ever offered—the price being only \$35.

If you want to increase your business, write to-day for full particulars.

OPPOSE OLDFIELD PATENT MEASURE.

The Merchants' Association Acts Upon the Recommendation of Mr. von Briesen's Committee—Reasons for the Opposition.

Upon the recommendation of the committee on the protection of industrial property the board of directors of the Merchants' Association at its last meeting unanimously voted to oppose the enactment of the Oldfield bill revising the patent laws—H. R. 10153.

The committee, of which Arthur von Briesen is chairman, reached its decision in opposition to the bill after having given the measure extended consideration.

Its reasons, as presented to the board of directors, included the following:

"The proposed law would usurp the functions of the court.

"It deprives the defendant in a patent suit of all rights to prove the invalidity of the patent sued on in any motion by the plaintiff such as is referred to in the bill.

"The amount of five per cent. is arbitrary and

will in many cases be entirely inadequate, and in many cases entirely too high.

"The bill contains no provision for the repayment of the five per cent. in case at final hearing a decree against the plaintiff should be entered.

"The bill appears to deprive the plaintiff of all rights to a preliminary injunction. In many suits a preliminary injunction is the only fair and adequate relief.

"The bill makes possible a multiplicity of suits against one machine embodying different inventions owned by different interests, each of which would then be entitled to a separate five per cent. The bill is generally vague and uncertain."

The association will oppose the passage of the measure in Washington.

BUSINESS GAIN IN INDIANAPOLIS.

Trade During January Shows Big Advance of That for Same Month in 1913—Several Changes Among the Managers—Heavy Demand for Records of Dance Music—Activities of the Various "Talker" Concerns.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., February 9.—Business is so good in the talking machine lines in Indianapolis that it couldn't be much better. Notwithstanding certain conditions which tended to hamper business in December, a greater amount of business was done in that month than in the same month of the preceding year, and all dealers report that the January business almost equaled the December business.

Several changes have been made at the local branch of the Aeolian Co. at 237 North Pennsylvania street. W. P. Kreisler, formerly manager of the Aeolian Co.'s branch at Dayton, O., has taken charge of the branch here, succeeding J. T. McDermott, who had been manager for some time. Miss Lazarus, who was in charge of the talking machine department of the Aeolian Co. here for over a year, has left the employ of the company. Arthur C. Ruark has taken charge of this department.

Records of dance music are going like hot cakes in Indianapolis. The dealers cannot get enough of them. And with many new customers coming in for dance music the sale of other records has been increased to a noticeable extent. There is considerable opposition to the new dances in Indianapolis, but most everybody is letting the opposition "go hang." And the dance goes on. One newspaper here has employed a dancing expert to teach the tango, hesitation and other dances free of charge. Thus the sale of dance records will increase, talking machine men hope it out.

The talking machine department of the Aeolian Co. had the best January business in years, according to Mr. Ruark. The Columbia Graphophone Co.'s local store at 27 North Pennsylvania street, also reports an excellent January business.

The Stewart Talking Machine Co. is "snowed under" with orders from every nook and corner of the State. The rush started before the holidays and it has not stopped. W. S. Barringer, manager of the Stewart Talking Machine Co., and George E.

Stewart, son of Alexander M. Stewart, owner of the business, have returned from a visit to the Victor factory. Miss M. A. Parsons has been employed by the Stewart Talking Machine Co. as secretary for Mr. Barringer.

The Kipp-Link Phonograph Co. is making strides with the new Edison disc phonograph. This machine is proving to be a favorite among all classes of customers, and the sales records show that it is going into the homes. The Kipp-Link Co. has expended much effort and money to make its headquarters at 345 Massachusetts avenue attractive and comfortable for its patrons. The Kipp-Link Co. has one of the largest talking machine stores in Indianapolis.

OPEN OFFICES IN NEW YORK.

The Triton Phonograph Co. has opened offices at 41 Union Square, New York, where it will handle a line of imported phonographs and talking machine accessories. J. A. Kraus is the manager and A. L. Marks is his associate.

CHAS. BOBZIN DOING DOUBLE DUTY.

Chas. Bobzin, general manager of the Silas E. Pearsall Co., 16 West Forty-sixth street, New York, is working on a double schedule as we go to press, for not only is he fulfilling various duties at the warerooms, but the additional services of juror.

It is natural, therefore, for visitors to find him unusually busy, for all his executive work has to be done in the evenings, but as Mr. Bobzin says, the double work will soon be over and then concentrated effort will be given to seeing that Pearsall dealers get the right service.

The Waltham Watch Co. has appealed to the Supreme Court from decision of the New York Federal Court that its contract fixing resale prices of watches violates the Sherman law.

NEW YORK, FEBRUARY 15, 1914

TO read some of the extraordinary advertising announcements put forth by some of the great mercantile emporiums, one would naturally think that the public would not be interested in advertised goods save they were offered at cut prices.

Perhaps we have been fed on this sort of pabulum so long that the buying system demands it! And why in the world the talking machine business should be conducted along the lines of a tiny little cash down and deferred payments extending over a long period we can hardly understand, more particularly when there are not enough machines to go around to-day.

We have very recently received communications from some leading jobbers in which they have expressed great regret that they are unable to secure stock. Now, with such conditions, should not talking machines be exploited on the cleanest kind of a basis without going to the extreme limit of time payments?

The editorial on bargain baiting advertising in last month's World, if we may be permitted to judge by criticisms which reach this office, has set the trade tongues wagging and the sympathy of our readers is entirely with the sentiments expressed in the editorial.

WHEN great mercantile emporiums in the larger cities offer talking machines and records for a month for \$10, and money back if you are not satisfied, they are putting up a kind of competition which is bound to be felt by every small talking machine man throughout the country, because the papers containing notices of such announcements reach the lesser towns and customers naturally ask the local talking machine man why he cannot do as well as the men in the larger cities, particularly as the product is price-safeguarded in every way.

If one has plenty of capital, leases of talking machines and pianos are a very nice investment indeed, but if capital is limited one is apt to tie up all available funds in a very short time, and if the small dealer sells on such ridiculous terms, the results are that his capital is entirely tied up in a very short period, and he will have no cash with which to meet his current obligations.

It takes a long time on the deferred payment plan to get enough machines out so that the intake produces cash sufficient to take care of running expenses.

Piano merchants have found this out—many of them to their sorrow, and in the collapse of the Henry Siegel stores it was shown that there was more than a half million of the assets of the Simpson-Crawford Co. in piano and furniture leases. Inasmuch as they run over three years' time it will be quite a while before this works out advantageously to the creditors.

IT seems to us that it is the poorest kind of advertising to emphasize time business in the talking machine trade, particularly when it is comparatively easy to get the cash. Cultivate the cash plan.

Cash payments count. Time payments are good if the machines are disposed of to reliable parties, but there is always an expense, and a certain percentage of delinquents which total quite a figure at the end of the year.

The talking machine trade should be the cleanest in the world and the most up-to-date, because it is price-regulated and is controlled by progressive, active forces, and yet notwithstanding that some of the concerns in their mad haste to do business will rush in and offer all kinds of allurements to dispose of goods simply to get them out—bulk business—when it would be just as easy, and perhaps a mighty sight easier, to get in a solid volume of cash, and cash is what counts in the talking machine trade, as well as in any other.

A good many of these houses are deliberately turning away cash business from their doors by their unbusinesslike methods.

What is the object of a man paying cash for a talking machine when he can get one for a trifle per month and no interest charge? What is the advantage—why cash, when time works much easier?

THERE are so many things to talk about in the exploitation of such a product that it seems as if terms should be the last thing, particularly when the hungry ones are clamoring for stock to-day.

Then people who have money—plenty of it—oftentimes decide that they will buy machines on the deferred payment plan when the facts are held out to them that there is no object in paying cash.

In the piano line it is a fact that the houses in New York, who have been offering ridiculous terms, have found that some well-known and wealthy people have taken advantage of these offerings—people who would undoubtedly pay cash, but when they have trifling payments, scattered over a term of years they figure why pay cash when cash is worth nothing!

Too easy payments, too little cash, are not good business points to emphasize.

THE training of salesmen is very essential, and Benjamin Switky, the well-known Victor distributor in New York, has made some very valuable suggestions along these lines which he has related to The World for the benefit of readers. Mr. Switky says: "I have heard men say that sales, like poets, are born, not made. But for the benefit of the many who cannot show a birth certificate testifying to their salesmanship, I want to say that I do not believe seriously in the foregoing statement. Every man of average intellect, pleasant personality, with an earnest desire to succeed and a willingness to learn, has within him the material necessary for the making of a salesman."

Now, that is a good, clean-cut expression from a practical business man.

There is no question, but that the training of salesmen is of vital importance to every employer in this country, and if, as The World as suggested at various times, it were a fixed policy with the houses employing a number of men, to get the members of the selling staff together and form schools of salesmanship, they would find the results obtained extremely valuable.

It is absurd to drift along in an indifferent manner, expecting the men to absorb knowledge from various sources when there is proper training talent right within easy reach who could be utilized in moulding so that they would become better money-makers for the house and increase their own salaries in a like proportion, because the average business man is fair, at least, we believe so. We are inclined to think that men are perfectly willing to pay salesmen what they are worth—to raise their salaries according to their increased earning capacity, and there is no other logical way in which salaries may be adjusted equitably, because it is impossible to fix a salary status, where the drone is on the same plane as the ambitiously active man. Surely there must be some incentive for the active, energetic, alert young salesman. His efficiency must count in his salary check even though the drone may be dreaming away his time at the warerooms wondering why he is not better appreciated.

Such men cannot draw the same salary and it is not right

that they should. One is earning profits for the company with which he is employed and the other is not. Now, they cannot be placed on an equal basis, and everything which will stimulate interest in work and which will teach salesmen so that they get out of the drone class and can present their arguments more intelligently should be encouraged.

Every salesman should know something about the technical or practical side of talking machines. At least he should have a fair knowledge of its mechanism. Then it is easy to absorb a knowledge of some of the operas. The development is along easy and pleasing lines—lines which are broadly educational because they will impart a great deal of interesting knowledge to the men who desire information which will be of real value to them.

Get out of the drifting habit—but if you must drift—drift with a purpose.

ALL America is dancing these days. The terpsichorean bug, or germ is in the air inoculating everyone with a desire to tango, to one-step, to maxixe, or indulge in some other of those wonderful contortional efforts which are to be witnessed in hotels, tea rooms, cabarets, theatres—in fact, wherever one turns in New York or other large cities throughout the country.

It goes without saying that one cannot dance without music, and here is where the talking machine is playing an important part. The demand for records for dancing purposes has far exceeded the supply during the past month, and this demand is certain to grow, judging from the growth in popularity of the modern dances.

Some remarkable figures are given by talking machine jobbers as to the output of records for dancing purposes—figures that seem staggering when the enormous numbers of records sold within a recent date is considered.

This demand for records, of course, has increased the call for talking machines, for one is useless without the other. As a result the past month has shown a good increase of business with the majority of talking machine houses throughout the country.

Nowadays the talking machine is indispensable not only for the dances, but for those who desire to hear their operatic favorites in the home, and there can be no question but that the growing attendance at the opera houses in New York, Boston, Philadelphia, Chicago, and other cities, is due to the increased appreciation of operatic music through the use of the talking machine in the home.

As we have said in these columns, time and time again, no one factor is contributing more to the uplift of music in America and its proper appreciation than the talking machine. The critics who sneer at this are evidently not in touch with the conditions or facts.

Like the player-piano the talking machine is fulfilling a great mission. Purchasers may start with rag time, or popular pieces, but they gravitate in time toward a better type of music—to appreciate the better class of songs from the leading operas sung by notable singers, and in due course they want to hear the operas and the singers in person.

This is an evolutionary process that takes place in the majority of homes, and it only needs an investigation by anybody concerned to find hundreds of thousands of instances such as this.

It is entirely in the hands of the talking machine dealers to augment the work of the manufacturers in placing the talking machine in a right light before purchasers everywhere—to treat of it from the elevating—educational—artistic viewpoints, so that its constituency of admirers may be broadened, and those who are still “outside the breastworks” in the matter of knowledge of talking machine progress, may be enlightened and interested.

THE National Association of Credit Men has been bringing to the attention of members the growing practice of secretly selling or pledging accounts. It has been pointed out that new companies are constantly springing up and older ones increasing their capital and constantly bringing pressure to bear on business men for the privilege of advancing cash on their open accounts.

It has been found that the system is proving productive of fraud, not only upon creditors who hypothecate their accounts, but upon the finance companies, for in some recent failures it was disclosed that all accounts receivable had been disposed of through hypothecation. Fraud was even practiced on the finance companies by the duplication of leases under the instalment plan by bogus shipments and other methods.

The question put to the association was, whether the pledge or sale of accounts receivable should not be a matter of public record just as is a chattel mortgage.

It is pointed out that legislation must not narrow the channels of money supply, but some method should be found of protecting creditors against the frauds which are being practiced through the hypothecation or sale of accounts receivable.

Members have been writing the association letters which encourage the exertion of special efforts along this line, and the secretary of the Canadian Credit Men's Association at Winnipeg writes that there has just been put upon the statute books of Saskatchewan a law compelling the registration of the assignment of receivables in the same manner as chattel mortgages, and mercantile agencies are publishing this information just as they do information relating to chattel mortgages. The idea is said to be working out so satisfactorily that the Canadian association intends to approach the legislatures of other provinces for like legislation.

Commenting on this, the editor of The Bulletin, published by the National Association of Credit Men, says that he has no doubt that an attempt to secure corrective legislation in the various States would be met with vigorous opposition, but believes the movement is so important to the protection of commercial credits, that legislatures could be made to see that public interest demands action at an early date.

THE fact that the human race is always dissatisfied has been its salvation, and the same thing applies to that part of the race engaged in the up-to-date business. Everlasting improvement is what we are after, and no sooner has one goal been reached than a longer vision and a wiser head spies out another to be won.

Thus the wide-awake inventor, manufacturer, jobber or retailer is never satisfied with things as they are—improvement is the cry all the time.

“DOLLAR” MOTORS

LATEST SENSATION—DETACHABLE SPRING CAGE

ARE UNQUESTIONABLY
THE BEST AND CHEAPEST

Without any dismantling of the motor, a NEW SPRING may be inserted within a few seconds.

Many patents both at home and in every civilized country applied for.

LOSSES THROUGH SENDING GOODS OUT ON APPROVAL

A Big Factor in the Business of the House Adopting That Policy, Says Manager Ligon, of the Famous & Barr Department, St. Louis—Has Taken a Firm Stand Against the Practice from Straight Business Reasons—Handling the Edison Disc Line.

(Special to The Talking Machine World.)

St. Louis, Mo., February 7.—Manager Ligon, of the Famous-Barr talking machine department, was greatly pleased with the January business, announcing that his sales for the month would be the largest total in the department's existence except that for December. Another pleasing feature was the recent addition of the Edison disc machines to his line. Until his three new sound-proof booths are completed he will show only a sample line of the Edison machines, preferring to let his primary order that is coming from the factory be held back until he is ready to make a real display. He has sold some of the Edisons from the samples and is pleased to note how his customers accept them. Heretofore the department has handled only the Victor line.

Mr. Ligon has some very definite ideas about his department and is being allowed full sway in carrying them out. This department was his first experience in talking machines in this city. He says:

"In my talking machine experience in the South I saw plainly that repossess and returns of goods let out of the store on approval cut into the profits heavily and I resolved then that when I became the head of a department this would be reduced to a minimum. I have seen a department doing less business than we are here have at the end of a year a great stack of damaged records to be charged off the profit account and a dozen of more or less badly used machines on hand because they were permitted to go out on approval.

"I have firmly refused to permit any merchandise to go out of this store until it is sold. The only exchange I offer is where the merchandise does not come up to the standard we set for it. Then the purchaser can have either exchange or the money back. Also I have investigated my credit

accounts before the merchandise left the store, not after. The result is that I have had no repossess, my accounts are in good shape and I have a minimum of returned records. I had two brought back the other morning. One woman brought back a record that she had bought the day before. She said that 'it looked funny on her machine and did not play well.' I put it on a machine and found that it was warped. Of course, we exchanged. The other woman brought in a record that she had taken home four days before. One of the children had dropped a receiver with a needle in the record.

"I said: 'Madame, I cannot exchange that. Your request is the most preposterous thing I ever heard of.' She became indignant and said that the store exchanged damaged merchandise in all other departments. 'Why I can get gloves, wear them a week and return them if they have a rip in them,' she told me. I stood firm and she finally accepted my view.

"I can easily see where our record profits would go if we accepted such pleas. I am planning that as soon as we get our shelving extended back over the new booths to seal all records, play only the master record for demonstration and then deliver sealed records to the customer. When that seal is broken exchange will be impossible except for factory faults. Of course, if the customer buys a record and wants it proven perfect we will play it without being subject to approval as to the music."

The Famous & Barr in declining to send out machines on approval has taken a step that neither of the other department stores selling Victrolas has yet attempted. It is understood that this method of doing business has brought to this department the exclusive department store sale of the Edison disc machines.

In order to extend his department to meet with

business requirements Manager Ligon has been compelled to make a showing that would change the general plans of the store. First, he ousted Manager Vernon, of the piano department, and his office force from their office quarters. Mr. Vernon is Mr. Ligon's immediate superior, too. Now he is ousting the photographer from quarters next to the elevator. Just where he will spread to next is hard to see. The piano and talking machine departments now have a new office built, where their accounts will be handled and all collections will be made within the department, which makes them practically a special store in the big department establishment and gives to them control of every angle of their business.

RECORDS THREE TIMES A MONTH.

Columbia Graphophone Co. to Issue Lists Three Times a Month, Starting with March 1.

As announced in last month's Talking Machine World, the Columbia Graphophone Co. has perfected plans whereby new records will be offered to the trade three times a month instead of once. Starting March 1, this plan will go into effect, some special record or group of selections being issued on the 1st, 10th and 20th of each month. On the latter date the regular monthly supplement of new records will be issued, while the special popular records of various types will be issued on the 1st and 10th.

In accordance with this idea the company will issue the first of next month "Camp Meeting Band," one of the popular hits of the day. Appropriate literature and window posters will accompany each record, and the company feels certain that the new plan will be found a marked success.

A meeting of the creditors of John J. Rooney, talking machine dealer of New York City, who recently failed, and whose business, as reported elsewhere, was disposed of, was held in the offices of Seaman Miller, the referee in bankruptcy, 2 Rector street, on February 13.

DANCE RECORDS PROVE GREAT BUSINESS BUILDERS.

Enormous Sales of Dance Records and Machines by Columbia Graphophone Co. in St. Louis—Dealers Complain of Scarcity of Records—Victor Business at Aeolian Hall—Many New Edison Dealers Appointed by Silverstone Music Co. During Month.

(Special to The Talking Machine World.)

St. Louis, Mo., February 9.—There was by no means the usual break in the machine or record business following the holidays, according to Sales Manager Duffy at the Columbia. The Columbia store has been making a special advertising campaign on the dance music records, and they have proven a great business builder, as St. Louis has been, in common with the rest of the country, "dippy" over the new dances, and the sale of a dozen records of this kind to a single customer or to a stranger has not been unusual. Most of the advertising has been of the reading notice variety, and so placed in the newspapers that it was best calculated to catch the eye of the very reader sought.

"Our machine sales have been more than we expected, and the dance music records have given the record sales a big boost," said Mr. Duffy. "We have been busy all month and will make our usual showing by comparison with previous months."

The country trade is in good shape too, according to Manager I. W. Reid. "Collections have been very good," he reports, "and are improving. For a short time collections of mercantile accounts looked bad, but that soon blew over. Our salesmen have been booking good orders, from which it can be seen that they have not found the dealers overstocked after the holiday trade. Constant inquiries that reach us indicate the general growth of the business. They come from all parts of the trade territory and from all sorts of establishments. One of the recent ones was from a butcher and grocer in a small town, who declared that he had some business to deliver if he could get a merchandise stock. We absolutely have no fault to find with business under present conditions."

E. C. Rauth, of the Koerber-Brenner Music Co., is planning to start for New York February 10 and will remain in the East until after the meeting of the executive committee of the National Association of Talking Machine Jobbers.

Harry Levy, manager of the talking machine department at Aeolian Hall, says: "The talking machine business for January in all departments was simply phenomenal, and I doubt if any person anticipated that the trade would hold on as it has. In our jobbing and retail departments we have been doing all the Victor business the stocks would allow. The record business has been immense."

Manager Robinson, of the Thiebes piano department, is reaping a rich reward from some consistent and well displayed advertising he has been doing for his talking machine department. The advertisements have been in excellent taste and have been of a sort to put people to thinking. One of them was based on "Music as a means of development." It was illustrated with pen pictures of a boy and a girl listening to the music of a machine.

The opportunity to select the Victor or Edison disc in the Thiebes parlors has continued to be a drawing card. Service letters, properly timed, also have been a splendid means of drawing in names of prospects.

"There is only one fly in our ointment at present," said Mr. Robinson, "and that is the scarcity of records that are in demand. The situation has become somewhat embarrassing, and I am hoping that the situation will be cleared up in time to put the trade in a good humor for the summer. We retailers are certainly between two fires at present, because with this popular vogue, people are insistent on getting what they want when they want it."

The reports from the other dealers are in line with these quoted. Everybody appears certain that the gains already made in business are only a beginning of what is to come.

"The Edison disc business went forward in January just as it did in December. Each month sets a mark a little bit higher than the month before," said Marks Silverstone, president of the Silverstone Music Co., Edison jobbers for this territory. "We have this month been pushing our campaign for new dealers and we have met with remarkable success. Our object at present is to prepare for the extensive advertising campaign in conjunction with the advertising that will be put out from the main office. We are being flooded with applications for retail stocks and we are, in many cases, making a selection of the various stores offered in towns and accepting those which we are assured are energetic and willing to undertake a reasonable amount of publicity.

"Best of all, our new dealers are entering into the trade with enthusiasm and they have implicit faith in their merchandise. Also our machine sales, especially here in the city, have reached a volume where the record trade is beginning to be an item and because we have catered chiefly to persons who have been able to buy high-priced machines on short time payments, they are mostly in the market for the new records as they come out, and the neighborhood dealers appreciate this."

Some of the new dealers Mr. Silverstone mentioned were: Famous & Barr department store, St. Louis; Lehman Music House, East St. Louis; F. W. Rabbe, 1800 Cass avenue, St. Louis; Mauer Music House, 1926 Gravois avenue, St. Louis; F. C. Woolsey, Fort Scott, Kan.; Eastman Jewelry Co., Petersburg, Ill.; C. H. Hawke, Greenville, Ill.; M. Y. Rusk, Brookfield, Mo.; F. C. Haley, Louisiana, Mo.; Peoria Phonograph Co., Peoria, Ill., and Jenkins Music Co., St. Joseph, Mo.

O. A. Reynolds, traveler for the Silverstone Co., reports that on his recent trip through Missouri, a part of Kansas and a little of Illinois, he found dealers' stocks very low and everybody ready to place orders for immediate delivery. He reports the efforts to push the higher priced machines

meeting with great success everywhere and the appreciation of the instrument is largely that of a musical instrument.

Mr. Silverstone, who is preparing for a trip to the Edison factory to be a guest on Mr. Edison's birthday, is taking a good deal of satisfaction over the recent placing on the market by the company of a device for playing lateral cut records on the diamond disc machine.

Raymond J. Fischel has been installed as manager of the dictating machine department of the Silverstone Co.; vice-president J. K. Savage, who retired, will take up other property interests.

A new demonstration room has been completed at the Silverstone warerooms, and the office arrangement has been changed to accommodate the growth of that part of the business.

LETTER FROM VERNON CASTLE.

Epistle Written by the Internationally Famous Dancer to the Columbia Co. Is a Tribute to the Dance Records Made by This Company.

The Columbia Graphophone Co. is appropriately featuring the following letter sent to it under date of January 1 by Vernon Castle, the internationally prominent exponent of the modern dances:

"I want to congratulate you on the excellent dance records you have recently issued; they are the best I have heard. I am using a Columbia Grand Grafonola and Columbia records at Castle House, where they are attracting extraordinary attention. The records are played in perfect dance time and are frequently encored by our patrons.

(Signed) "VERNON CASTLE."

Mr. and Mrs. Vernon Castle have been appearing for the past few months in the leading vaudeville houses on Broadway, where they have been invariably featured as headliners, commanding salaries in excess of the sums paid world-famous vaudeville stars of many years prominence. Their act consists solely of a rendition of the modern dances, which have taken the country by storm, and their interpretation of the spirit and meaning of these dances is considered authoritative in all parts of the country. Mr. and Mrs. Castle have but recently determined to confine their art solely to private exhibitions, and they are in demand by the best-known members of society.

CHANGE IN EUREKA, CAL.

(Special to The Talking Machine World.)

EUREKA, CAL., February 6.—The Eureka Co., Eureka, Cal., has changed hands, W. B. Bailey and W. H. Heaseman assuming full control. They handle the Edison and Victor lines, and are doing a fine business. These gentlemen have the reputation of being first-class salesmen, and they are right when it comes to hustling business. Their trade is steadily increasing.

"Training may make the artist, but nature gives the voice," says Mme. Melba. When the prima donna was a child at school the other children used to say to her: "Nellie, do make that funny noise in your throat." The "funny noise" was the future prima donna's natural trill.

THE RECORD SITUATION

THE MAIN ISSUE OF YOUR BUSINESS TO-DAY

We have had a problem to meet in being **SHORT OF RECORDS.**

A customer came in yesterday. His first remark was: "ISN'T THE RECORD SITUATION AWFUL?"

Our reply was: "Has your business been larger up to date this year than last year's corresponding period?"

"Why—yes," said the customer.

"Then tell us just how is the shortage of records affecting you."

He answered: "Why, we cannot fill our orders."

"Then where does the increase in your record business come from?"

He replied immediately: "We are pushing the good **STOCK** records—the records **WE HAVE.**"

MR. DEALER—that same situation can be handled every month in the year.

SHORT OF RECORDS AND A CUSTOMER LOST—but, **SHORT A FEW RECORDS AND YOU MAKE A FEW GOOD SUBSTITUTIONS**—THEN A **SATISFIED CUSTOMER.**

Our stock is the biggest in the country. In spite of the shortage, we are probably averaging the largest percentage in order filling.

No matter **WHERE** you are situated. **FORGET THE FREIGHT** and **GET THE GOODS.**

We won't claim to fill your order complete—but if we give you just a few of the ones you want—**isn't it worth while?**

New York Talking Machine Company

81 CHAMBERS STREET

NEW YORK CITY

OPERA HELPS TWIN CITY TALKING MACHINE TRADE.

The Prominent Dealers in Minneapolis and St. Paul Take Advantage of the Visits of the Chicago and Canadian Opera Companies to Give "Opera Concerts"—Activity Most Pronounced with All the Leading Concerns, Covering All Makes—News of the Month.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., February 8.—Musical artists, of whom there have been a shoal in the Twin Cities during the present season, have done much to exploit and advance the sale of talking machines, and by a nice system of reciproca-tion the talking machines have done much for the artists to enhance their repute and mayhap line their pockets. The artists get their favors through the Victor, recitals arranged by the various houses, notably the Talking Machine Co., W. J. Dyer & Bro. and the Metropolitan Music Co. Archie Mathies, of the first-named company, issued a season's program of recitals in which he heralds the advent of every prominent musical star, whether in concert or opera. This week he gave a recital with numbers by Alma Gluck, William Bachaus and Kathleen Parlow, pianiste. Next week there will be a Marie Rappold concert, then "I Pagliacci," "La Traviata," John McCormick, Clara Butt and Mischa Elman and the programs of the Canadian Opera Company and the Chi-cago Grand Opera Company. If the artists and performances make a big hit there is a big run on their records. Hence the wise dealers push hard for the concerts and operas, for the returns are immediate.

W. J. Dyer & Bro., as a curtain raiser to the Chicago Opera Company season in April, will give "Rigoletto," "Manon," "La Tosca" and "La Boheme," programs with descriptive readings by Mrs. Berna Lapham Wells. A more instructive arrangement hardly could be made, and it is cer-tain that these recitals will be well attended by music lovers and that they fully will appreciate the opportunity. The Dyers still have considerable difficulty in keeping their Victor lines filled and complain that they have been hampered a great deal during the past four months by inability to obtain goods.

Foster & Waldo had excellent trade in Victor machines and have more than doubled their sales. With a score of outside salesmen of the piano department also instructed to pick up the talking machine prospects, the Victor department has a mighty pulling power that brings in business in and out of season.

Laurence H. Lucker, of the Minnesota Phono-graph Co., the Edison boomer, boasts of a 100 per cent. increase in the January trade as compared with that of January, 1912.

"We are selling the Edison disc machines to the best musicians and schools in the Northwest," he remarked. "Recently we have sold to the North Dakota Normal at Minot, the South Dakota Nor-mal at Brookings, the State school at Faribault, Minn., St. John's University at St. Cloud and other institutions demanding the best music. We have sold Edison machines to Richard Czerwonky, con-

certmeister of the Minneapolis Symphony Or-chestra, and Franz Dick, a member of the same orchestra. We sold a \$400 machine this week in North Dakota and one in St. Peter for \$425.

ARTISTIC VICTOR WINDOW

Featured by the J. W. Carter Music Co., of Houston, Tex., During Carnival Week—Re-ports Very Large Volume of Business.

(Special to The Talking Machine World.)

HOUSTON, TEX., February 8.—The accompanying photograph presents a portion of the show window

Carter Window During Carnival Week.

featured by the J. W. Carter Music Co., of this city, showing its artistic appearance during car-nival week. This enterprising house, which han-dles the Victor line exclusively, makes a hobby of

Interesting Photograph Taken at Carter's.

its show windows, and its carnival window was certainly calculated to attract favorable comment and attention.

"One of our ladies, Miss Bessie Meyers, went up to Fargo, N. D., last week to give a concert and brought back orders for eight machines, all high priced ones. These incidents, taken in connection with the ordinary run of business, make us feel just a little proud."

The Columbia house, managed by Jay H. Wheeler, is having a nice line of trade. "We are putting out machines all the time, the record busi-ness rapidly is increasing and above all collections are fine. What more does a manager want?"

In the second picture shown herewith Clarence Whitehill, the well-known baritone and one of the most popular members of the Victor recording staff, is shown listening to one of his own records, entitled "In the Gloaming." Mr. Whitehill is an occasional visitor to Houston, Tex., and whenever he arrives here invariably calls at the Victrola showrooms of the J. W. Carter Music Co. On the right of Mr. Whitehill, who is standing be-side a Victrola XVI, are shown J. W. Carter, president of the company, and C. D. Grubbe, man-ager of the Carter Co.'s Victrola department.

During the year just closed the Carter Music Co. closed the best Victor business in its history, and this is especially significant in view of the fact that the company's Victor trade has been in-creasing year after year. On a recent trip East, J. W. Carter, president of the company, spoke in the highest terms of the value of the Victor repre-sentation to the aggressive piano house, stating that the Victor agency offered an opportunity for increased business that no up-to-date piano mer-chant should permit to pass him.

In addition to catering to an extensive list of Victor patrons, the Carter Music Co. handles a splendid line of pianos, headed by the Knabe.

WHEN TO CUT OFF CREDIT.

The small merchant, particularly in country towns, faces a serious question. If he has been extend-ing credit to a customer liberally, it is only at the risk of losing all his future trade that he dare cut off that credit, and yet to continue extending credit after a man's account becomes dangerous often is fatal to business.

The best way is to have a fixed and certain rule at the opening of an account as to exactly how far you are willing to extend credit. Then, when the stipulated amount is reached, the customer has no right to feel aggrieved.

The Twenty-third street retail store of the Columbia Graphophone Co. is closing a phenom-enal business in Columbia dance records which is due in a considerable measure to the original ideas of Hayward Cleveland, the veteran man-ager of this store. Mr. Cleveland recently sent out to his extensive mailing list a neat and at-tractive four-page booklet entitled "Modern Danc-ing and the Grafonola," which discussed in a brief, though informal way, the value of a Graf-onola in the rendition of modern dance music.

Time is money, provided you don't spend a dollar's worth of time trying to save a penny.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., February 9.—The talking machine business for January has been good, but of course does not compare with December, which always is the banner month of the year. Naturally all the prospects that could be developed during the holidays were taken care of, and with the expenditures of the Christmas month there is not much money left for January purchases. One of the interesting features of the talking machine business is the number of large houses that are making overtures to take on Edison, Victor or Columbia outfits. This is particularly true of prominent furniture concerns throughout New England, which heretofore had to be approached by the jobbers, and who in some cases took hold of the proposition reluctantly. Now the conditions have materially changed and all of them are viewing the proposition eagerly and expectantly, for they see in it something of permanent value, and that the talking machine proposition is something that is bound to grow rapidly.

A Time for Everything.

The World correspondent went into a Boston store on two Fridays lately—it was one of the largest concerns in the city—and found the janitor engaged in the process of cleaning up. Now it is most commendable to keep an establishment looking clean and neat, but there are proper times to do it, and that time is scarcely the middle of the afternoon. At the store in question all the Oriental rugs were off the floor and the sweeping that was going on was attended with more or less dust, which certainly was not pleasant for two women customers, not to mention several men, who were in the place at the time. What if Friday is the traditional sweeping and dusting day. Isn't the proper time to clean up a store before it is opened in the morning or after it is closed for the day?

Folk Dance Demonstrations.

Mrs. Soule, of the Carr School, Somerville, gave another of her folk dance demonstrations with a group of pupils from the ninth grade at the Grafonola parlors of the Columbia Company on Saturday morning, Jan. 24. Many of the numbers, some of them being Norwegian, Spanish, Swedish and American, were danced to the strains of familiar orchestral records. There was a large audience present and the value of the Grafonola as an inspirational and energy-saving aid was fully demonstrated.

Call from Dealers Very Large.

Manager Silliman, of the Pardee-Ellenberger Co., says the Edison disc proposition has just caught on in great shape. The call from dealers has been surprisingly large, and with the traveling staff out through New England the Boston office has about all it can do to handle the orders.

New Edison Representative.

Manager Silliman has made some strong connections lately throughout New England. Henry W. Berry & Co., of 436 Massachusetts avenue, Cambridge, a large furniture house, has just added the Edison disc line, and the manager of the department is pushing it for all it is worth. W. W. Ballard, of Salem, is another who has added Edison disc outfits to his department. Others who have made arrangements through Manager Silliman to handle this line are B. J. Kelly & Co., of Morrisville, Vt.; J. W. Johnson & Son, of Newport, N. H.; W. A. Allan, of Andover; the Atherton Furniture Co., of Pittsfield, and C. F. Wing & Co., of New Bedford, one of the largest concerns in Southern New England handling the talking machine proposition.

Good Advertising Stunt.

One of the advertising "stunts" of Manager Erisman, of the Columbia Co., was the issuance of cards advising its patrons to attend the concert at the Boston Opera House on Sunday night, February 1, when the contributing talent included Constantino, the celebrated tenor, and Jose Mardones, the great bass, both of whom sing for the Columbia. The airs that were mentioned on the card were those which could be procured on Columbia records.

Street Cars Help Sales.

Manager White, of the Victor department of the Henry F. Miller Co., has found a steadily growing demand ever since the surface cars were put back on Boylston street following the work of excavating for the subway. Lately he sent a good-sized consignment to a customer in Peru, South America, consisting of an expensive Victrola and a carefully selected assortment of records.

Keeping Things Hustling.

Herbert L. Royer manages to keep things hustling at the Arch street Victor quarters of the M. Steinert & Sons Co. Between the Boylston street store and the Arch street place the Victor business of the Steinert house is a large one. Manager Royer has now around him a carefully

selected staff of men, and with the frequent chats he gives them on business efficiency they are developing into clever and far-seeing salesmen.

Takes on the Edison Disc Line.

Walter J. Bates, of 170 Summer street, is one of the latest to become a distributor of Edison disc phonographs and outfits. He is near the South station in Dewey square, and if one prefers to consider the Columbia or the Victor proposition he can supply one with what he wants.

Reports Lively Demand.

George Lincoln Parker is finding a lively call for all the various kinds of talking machine outfits, and the fact that his quarters in the Colonial building are so easily reached by elevator makes them a very convenient place.

F. H. Thomas Co.'s Store Well Patronized.

Well equipped demonstration rooms on the Exeter street side of the F. H. Thomas Co. store at 691 Boylston street are the rendezvous of many Back Bay people who have become interested in the Edison disc machine. The fact that this place is near the Hotel Lenox is something in its favor, as many of the grand opera stars make that hotel their home while singing here.

Victor Outfits in the Schools.

Billy Fitzgerald, of the Eastern Talking Machine Co., says it is most surprising the way that outfits have been taken by the schools, and he adds that there is not a single private school in the city that is not equipped with a Victor outfit and the accompanying course on "What We Hear in Music," which is proving so valuable to music lovers and those bent on a finer appreciation of the art. And Billy is working hard with the public schools, too.

Demonstration of Sound Waves.

A most interesting demonstration of sound waves was made lately in one of the Lowell Institute courses of lectures at the Massachusetts Institute of Technology. The course was given by Professor Dayton C. Miller, and during his third lecture on "Sound Analysis" he used a flute, cornet, voice and Victrola, the latter being generously furnished the professor by the Eastern Talking Machine Co. The discs used included the "Rigoletto" quartet, a Caruso selection and a piccolo number. All the numbers were played through a horn into another horn, the sounds becoming graphically and clearly visible to the eye when thrown on a screen, showing conclusively how science has come to the aid of recording and

P-E
SERVICE

**Real Music
At Last**

P-E
SERVICE

The main thing that you sell when you are an Edison disc merchant is music—real music—the kind of music that makes a man long to spend his evenings at home. This is the reason why so little salesmanship is required of Edison disc merchants, and low selling cost means big profits.

It isn't even necessary that you should have any experience as a phonograph man, for part of our service to you is along educational lines in order that you and your salesmen may do the greatest amount of business. This is real service and co-operation that means results.

Boston, Mass.

**THE
PARDEE-ELLENBERGER
CO.**

New Haven, Conn.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

photographing sound waves. It is of interest that experimental work has been going on for some time at the Institute of Technology with a Victor which has been furnished by the Eastern Company, and the results arrived at through the use of different needles has been one of the many interesting developments of the experiments.

Takes a Star Part.

The dictagraph such as is used in "Under Cover," that intense play of adventure and detective ability that is crowding the Plymouth Theater at every performance, is on exhibition at the Eastern Talking Machine Co.'s Fremont street quarters, and is attracting much attention. Just what this remarkable instrument is able to do gets about the best demonstration in "Under Cover" that it possibly could have, and a study of the device whets one's desire to see the play.

Some Effective Publicity.

Joseph Santley and his musical show, "When Dreams Come True," are getting good advertisement through the postal cards which are being distributed through the Columbia Graphophone Co.'s offices. On these postals is a small disc record of one of the selections from "When Dreams Come True," which really plays fairly well. On the card is the stamp of the Columbia Co.

Larger Chickering & Son's Victor Rooms.

Since Manager Currier has taken hold of the retail quarters of Chickering & Sons the Victor department, so ably managed by Brother Batchelder, has been moved from the basement of the establishment to the second floor. The new quarters are approached by a flight of easy stairs, and at the rear of the store is the elevator if one wishes its use. The rooms are most attractive and much larger than the old quarters, and with

STANDARDIZING CATALOGS.

Effort to Make Them of Sizes Suitable for Filing Winning Approval in Business Institutions Throughout the Country.

The inconvenience of filing for purposes of reference catalogs of all sizes and shapes has prompted the Technical Publicity Association, whose membership comprises the advertising managers of many of the largest business houses in the country, to start a campaign for uniform sizes of catalogs. Definite proposals have been prepared by the association, and will be sent out this week to all of the leading manufacturers, wholesalers and retailers.

The chief recommendation is that two sizes be adopted as the standards for all catalogs, 6 by 9 inches, and 8½ by 11 inches. It is argued that if every house that issues a catalog will have it made up in one of these sizes, it can then be filed for reference with hundreds of other catalogs by any one receiving it. At present, the Technical association's circular points out, because of their varying sizes, catalogs unnecessarily take up valuable space, and cannot be filed and indexed in any way that will make reference to them easy.

The plan to standardize the catalogs has met with the approval of many advertising and catalog men associated with large manufacturing firms. The chief of the catalog department in one firm said recently that there was every reason for the adoption of the idea and none against it.

"Many catalogs," he said, "contain matter of permanent value, such as standard tables, decimal equivalents, engineering statistics and the like, and should be kept in a ready reference cabinet or closet by department managers. At present, however, it is practically impossible to keep them so that they can be of any use. I recently measured the catalogs of 700 houses and found 147 different sizes among them. They varied from pocket editions to immense books that would almost cover the top of a desk. How can such a collection of books be filed in any sort of systematic manner!"

"The only possible objection to standardization

the assistance of two able clerks Manager Batchelder is equipped to largely increase his business.

Victor on the Stage.

In "Years of Discretion," playing at the Tremont Theatre, next door to the Eastern Talking Machine Co.'s establishment, there is a Victor used, and this instrument has been furnished by Manager Taft, of the Eastern Co. The outfit plays an important part in the progress of the play.

Non-Partisan Meeting Place.

During the recent mayoralty campaign the Eastern Talking Machine Co.'s offices assumed the aspect of political headquarters, as several of the men prominent in the campaign, who happened to be Victor enthusiasts, dropped in on Billy Fitzgerald and the other boys quite often. Mayor James M. Curley (he then was only a candidate for the office) was a frequent caller, and a large picture of him and his family now adorns the desk of Fitzgerald. Collector Joseph A. Maynard was another of the political callers. Both the Mayor and the Collector possess Victor outfits.

Featuring the Columbia Grand.

Miss Mabelle Jones, who has been unusually successful in interesting patrons in the \$500 Columbia grand, has been spending a part of this month at the Atherton Furniture Co.'s place in Worcester, where she has been giving some successful demonstrations.

Visit Columbia Headquarters.

When Manager Arthur Erisman, of the Columbia, went over to New York a short time ago to confer with the home office officials, and he took with him C. A. Hewett, in charge of the graphophone department of C. A. McArthur & Co., of Boston. Mr. Hewett was thus able to come in personal touch with many of the Columbia officers.

of catalog sizes," he continued, "is that each manufacturer or wholesaler wants individuality in his catalog. But individuality can be obtained in color and thickness just as well as in size. With all catalogs printed in two sizes, each manufacturer can adopt a certain color and thickness that will distinguish his catalog from all others."

The difference between an optimist and a pessimist is that one believes in mascots and the other in hoodoos.

NEW VICTOR AGENTS IN BOSTON.

Wholesale Department of the Eastern Talking Machine Co. Make Many Successful Business Connections in Boston and Fall River.

(Special to The Talking Machine World.)

BOSTON, MASS., February 5.—Manager Chamberlain, of the wholesale department of the Eastern Talking Machine Co., has been most successful of late in being able to interest large concerns in the Victor proposition. Among the houses to recently take on these machines are the A. McArthur Co., of Washington street, this city, which already has developed a large talking machine business; Kraft, Bates & Spencer, Inc., of Boylston street, a piano house, which has had a talking machine department for some time, and George H. Munroe, of Fall River, one of the leading piano houses of that progressive city.

OPEN EDUCATIONAL DEPARTMENT.

The Outlet Co., of Providence, R. I., Perfecting Plans for Its School Campaign.

(Special to The Talking Machine World.)

PROVIDENCE, R. I., February 9.—An educational department recently has been opened at the Outlet Co.'s large establishment in this city, and its special work is exploiting the sale of Victor machines and special records in the schools. H. C. Johnson, the new manager in charge of this work, has met with marked success, due in large measure to his entirely original methods of procedure, and he has been able to convince any number of school principals and teachers of the wonderful results that can be attained by the Victor equipment in the education of children along music lines.

HOLD ANNUAL CONCERT AND DANCE.

(Special to The Talking Machine World.)

BRIDGEPORT, CONN., January 31.—The fire department of the American Graphophone Co. held its third annual concert and dance Wednesday evening at the Colonial Hall in this city. A number of prominent Columbia artists were in attendance, including Fred Van Epps, Ada Jones, Byron G. Harlan and Henry Burr.

There are many qualities of steel but only
the best steel is used in making

BAGSHAW NEEDLES

It took a lot of experimenting to secure the formula for the steel used in Bagshaw needles, for we know that the talking machine needle, while small, is one of the most important parts in sound reproduction. The temper must be exactly right, so that in manufacturing the point of the needle will be perfect. Examination of a Bagshaw-made needle under a strong glass proves this.

The steel must be firm enough to play on the record, and to do so without injuring the record. This needle quality is known to many jobbers and dealers, which is responsible for the fact that Bagshaw-made needles have the largest sale in the world.

THE TALKING MACHINE AS CIVILIZER IN THE PHILIPPINES.

A story of unusual interest is represented in the accompanying photograph showing a group of natives in the far-away Philippine Islands listening to some of their own records, which had been made for the Columbia Graphophone Co. by an

recording purposes. Dean Worcester also found the dictaphone of considerable assistance in the daily routine of his research work. Dean Worcester is shown at the extreme right of the photograph.

Members of One of the Philippines Tribes Listening to Their Own Records.

expedition under the guidance of Dean Worcester, who is famous for the constructive and uplift work that he has been doing in the Philippines. It may seem somewhat unusual to use a dictaphone for recording purposes, but in the absence of any regular Columbia dealer in this territory the dictaphone was found invaluable for

The natives in this section of the Philippine Islands are called Igorots, and their records consist of vocal selections and native songs which they rendered on the nose flute, an instrument decidedly original and distinctive. The tonal merits of these records will be a matter of considerable interest to people the world over.

BALTIMORE'S BUSY MONTH.

Talking Machine Dealers All Enthusiastic Over the Fine Business Transacted in January—Almost Impossible to Supply the Demand for Records—The Outlook for the Spring Months Is Excellent and Is One of Optimism with Every Dealer in the Monumental City.

(Special to The Talking Machine World.)

BALTIMORE, Md., February 7.—Remarkable as it may seem, the dealers here announce that figures for January show a very unusual result for this month of the year. They not only pass those for January, 1913, but all hands declare that they show a substantial increase over those for any other month during 1913 than December. There are probably no more enthusiastic individuals than the talking machine men these days, and they are emphatic in their statement that they are going to bend every effort to make 1914 go 1913 one better. Judging from the results of the last month it would seem that they are on the right road to success.

Manager W. C. Roberts, of E. F. Droop & Sons Co., announces that both the wholesale and retail trade have taken a wonderful spurt and that January was a fine month. Of course, it did not equal December, and Manager Roberts declares that had it beaten December he does not know what he would have done to accommodate the customers and properly care for the stock necessary. The capacity of his store was taxed to the climax during December, and if this condition continues he will have to make substantial extensions.

Manager S. A. Denison's business barometer is still in its accustomed place, and this indicates that business with the Columbia line has not dwindled. Mr. Denison, of course, is manager of the local branch of the Columbia Phonograph Co., and the barometer in question is his little slate which hangs back of his desk, and which tells concisely and in

a few words just what results were obtained each month. The announcement this time is simple and to the point, and runs thus: January beat any month in 1912 and 1913, except December, 1913. Mr. Denison declared he is going to do his part to make 1914 the real year in talking machine annals.

Reports from the Sanders & Stayman Co., Inc.

state that both the Columbia and Victor lines were in big demand during the past month.

Joseph Fink, of the Fink Talking Machine Co., said that January was his biggest month, and he is most enthusiastic. He had a good run on the high-priced Victors and also had many calls for the latest records.

Another firm that was in the limelight during January was the Peabody Piano Co., who have been making steady strides toward the top in the talking machine business.

INTRODUCE NEW LABEL

For Victor Records Which Was Designed and Perfected After Extended Thought and Consideration—Space for Private Number.

Beginning with the Victor records presented in last month's supplement, the Victor Talking Machine Co. announced to the trade a new label on Victor records that was designed after extended thought and consideration. A change from the former label had been contemplated by the Victor Co. for some time, as there were several minor objections connected with this label that the company felt sure could be easily remedied. The new label is the result of this thought.

As announced by the company, the new label embodies the following improvements over the former one: "The word 'Victor' appears so boldly that there is no chance for uncertainty as to the source of the record, even at considerably more than arm's length. Again, the type used is what is now recognized more or less consciously as Victor type—the face that has been most consistently used in Victor advertising. There is a broadening of the gold circle on either side of the label at the top, which can be written on with black ink.

"Formerly there was no space provided in which the user might put his own catalog number on the record, and by providing such a space we have simplified the process of returning each record to its proper place in the private collection. These will be of especial benefit in all the black label series. There was formerly no way of marking such records except by attaching an unsightly sticker."

The red seal records issued by the Victor Co. had their labels changed some time since, and the new labels have won the unqualified approval and admiration of the trade. The simplicity and dignity of the new label, coupled with the improvements noted above, combine to make it most artistic.

Record Service

IS WHAT YOU NOW NEED

Dealing with BUEHN assures you the best in service that can be had. Stocks of EDISON CYLINDER and VICTOR DISC RECORDS, both Domestic and Foreign, as complete as large orders and factory deliveries can make them.

MANY FEATURES OF INTEREST IN PHILADELPHIA TRADE.

Elaborate Demonstration of Edison Disc Phonographs and Records Gets Prompt Results—
Pennsylvania Talking Machine Co. Very Active—Progress of the New Dealers' Association—Record Supply Rather Low—Louis Buehn Reports Substantial Increase.

(Special to The Talking Machine World.)

PHILADELPHIA, Pa., February 9.—The beginning of the second month of the year finds the talking machine men of Philadelphia in the best of spirits, for they had an unusually good January. It was better than last year, every one reports, and the only unfortunate thing the dealers had to contend with was a difficulty in getting machines and certain classes of records.

Edison Disc Phonograph Demonstrated.

Several things of more than usual interest have transpired in Philadelphia recently. Last week Thomas A. Edison, Inc., gave a demonstration of its latest disc machine in this city at the Ritz-Carlton Hotel, for which they had issued 3,500 invitations. The exhibition lasted from 1 to 6 o'clock and more than a third of the invitations were accepted. Every one is most enthusiastic over the instrument and there are prospects that within the next ten days there will be a number of dealers in Edison disc phonographs in this city. After the hotel exhibition Mr. Stanton, of the Edison Co. remained in this city and gave exhibitions at several well-known piano houses. It is not unlikely that a number of prominent firms will take the Edison disc for sale here.

F. K. Dolbeer, William Maxwell and Mr. Stanton, representing the Edison Co., were here for the exhibition. They had upwards of forty of the latest and best Edison records with them. The Edison disc is at present handled here by two concerns, the most recent to take it being the Music Shop, No. 218 South Twelfth street.

Great Activity with Pennsylvania T. M. Co.

The Pennsylvania Talking Machine Co. has had the front of its building handsomely repainted with green enamel of a peculiar tint, which has been attracting a great deal of attention. They are contemplating numerous interior improvements and are now getting estimates on the building of a balcony over two-thirds of the store, with a large stairway leading up to it, and which will seat a great many people. Manager Eckhart reports that the business of his firm on the Columbia machines in January was nearly equal to that of December, and that they beat January of a year ago by more than 100 per cent. Mr. Eckhart was up the State several days this week and closed a very important deal at a very important point and secured a substantial order. He had Harold Lyle with him. He believes the firm will do a tremendous business. Among the visitors at the Pennsylvania store the past week were George Lyle, general manager of the Columbia Co., as well as Marion Dorian, the treasurer.

The Dictaphone business has also been most excellent, and they closed a number of important sales the past month and have some big things for February, one instalment being for close to 100 machines. "February," says Mr. Eckhart, "bids fair to be the biggest month in the history of the

Dictaphone in this territory." They have just had their delivery automobile painted in yellow enamel with gold letters, presenting a most striking appearance.

Hard to Get Enough Records.

G. F. Wurtele, of the Gimbel talking machine department, reports that its business in January has been most excellent and shows a big gain over last year. Plans are being formulated at present for a considerable enlargement of the department. Mr. Wurtele says that it has been unable to obtain many of the most popular of the records, otherwise it would have been able to do very much more business in January.

Weymann & Sons After High Class Trade.

Harry Weymann, of H. A. Weymann & Sons, reports that the demand for Victor Victrolas and records is almost phenomenal and their business during the year past was double that of 1912, and so far this year their sales will double those of last year. In the retail department, he says, they get most excellent results from their newspaper advertising, which is striking, and in which they illustrate the latest dancing fads and show how they can be satisfied in the home with the Victrola. They refrain from stating prices and they believe it has been the means of selling a much better class of goods, but instead they say: "Any of the Victor's new and improved styles may be purchased on convenient terms. Every instrument is guaranteed and is backed by our reputation of a half century as manufacturers and wholesale distributors of musical instruments of superior construction."

Mr. Weymann believes that this sort of advertising brings better results and a better class of people than that followed by so many houses who are continually advocating the old "small weekly payments."

New Association Making Some Progress.

It took a good while to get the thing started, but I am assured by some substantial men in the trade that the Retail Talking Machine Dealers' Association is going to go through. They are working it out on a little different basis than at first arranged. They were not able to get the signatures of all the representative dealers to become members of the association, but they have the promise of all of them, I am informed, that they are willing to sign a paper to adhere to the rule of charging interest on deferred payments. There will be another meeting within the next week or two, when those active in the organization have hopes that all the representative houses in the trade will be in attendance.

Increase in Business for Louis Buehn.

Louis Buehn reports that the business of his house in January was very good, being slightly in advance of last January in spite of the shortage of records and medium priced machines. "The shortage of records," he says, "makes it problematical as to how big our business would have been had

we been able to supply all demands. Conditions are a little better now, and the factory is supplying us in better proportion."

Machine Situation Improved.

The machine situation seems to be better all around, although I have noticed at some of the stores that there is still a shortage of the \$50, \$75 and \$100 types. Mr. Buehn believes that the indications are that business is going to be maintained for some time to come.

In the Edison dictating machine Mr. Buehn has done a splendid business and it is showing a marked improvement right along, the attitude of the big firms being much more friendly to the spending of money on devices of this kind for the facilitating of their business than they were during the last four months of 1913. They have closed some very nice business with the Linoleum Co., of Trenton; the Keystone Plaster Co. and the Tunis & Cookey Lumber Co., of this city, as well as other big concerns.

Take on New Salesman.

Strawbridge & Clothier have added to their selling force Otto Luedeke, who was formerly with a well-known talking machine house in this city. Their business has been very much better than it was last year.

LIVELY TRADE IN DENVER.

Chief Difficulty Lies in Securing Sufficient Quantities of the Popular Records to Meet Demands—Three Happy Managers and the Reasons—Other News of Month.

(Special to The Talking Machine World.)

DENVER, COL., February 6.—The talking machine trade in this city has kept up in a remarkable manner and the sales for the month of January were far in excess of the total sales volume for the same month last year, according to the reports of the various local talking machine houses. Record sales are particularly heavy and the main question with both the jobbers and dealers is that of securing a sufficient stock of records to meet the demands. The call for dance records to provide suitable music for the tango, maxixe and hesitation waltz is especially strong and the stocks of that class of records are at low ebb.

At the present time there are three local talking machine managers who are particularly happy, regardless of trade conditions. The happy ones are O. F. Kelso, manager of the talking machine department of the Denver Music Co., who is the father of a bouncing baby boy, who has already developed a pronounced taste for talking machine music; C. B. Arbenz, manager of the talking machine department of the Knight-Campbell Music Co., and W. C. Wyatt, manager of the talking machine department of the Denver Dry Goods Co., both of whom have had dainty feminine additions to their households recently.

The Denver Dry Goods Co. reports a big increase in the popularity of the Edison disc phonographs and records, for which the house has the jobbing rights. The company will be represented at the annual gathering of the Edison disc jobbers to be held in New York on the 9th and 10th,

Increase Your Record Sales

BY PLACING THIS HANDSOME FLEXIBLE COVER IN THE HANDS OF YOUR PATRONS

This attractive flexible cover is designed to hold the Victor or Columbia semi-annual record catalog, and is bound in mahogany colored imitation leather, and lined with black silk cloth.

The price of this flexible cover is so low that it permits you to give same free to your customers with the record catalog inclosed, thereby making a useful souvenir and a permanent advertisement; or you may charge a nominal sum for it if you desire.

In lots of 100 or more, your name will be stamped on face of cover in gilt lettering free of charge.

Send 20c. in stamps for a sample cover, with special trade prices.

NEW YORK POST CARD ALBUM MFG. CO., 23-25 Lispenard Street, NEW YORK
Makers of Talking-Machine Record Albums

F. K. DOLBEER HOME FROM TRIP.

Covers Principal Cities in Far West to Pacific Coast in Interests of Thomas A. Edison, Inc.—Business Conditions Generally Satisfactory Throughout the Western States.

(Special to The Talking Machine World.)

ORANGE, N. J., February 9.—F. K. Dolbeer, general sales manager of Thomas A. Edison, Inc., phonograph division, has returned from a two months Pacific Coast trip, during which he spent some time in Portland, Seattle, Vancouver, Spokane, San Francisco, San Diego, Los Angeles and other points. Leaving New York on the sixth day of December, he arrived in San Francisco inside of four days, which is a remarkably short time, particularly in winter, as stormy weather frequently retards railroad efficiency.

"I spent New Year's," continued Mr. Dolbeer, "at San Francisco and had a very enjoyable time. The city seems to go as wild over this holiday as New York, and although the rain interfered with the street processions, still the life at the hotels made up for it. This city is growing at a rapid rate and I am greatly impressed with its throbbing pulse of activity. The exposition buildings are being rapidly completed and it would not surprise me, if circumstances demanded, that the exposition could open as early as September of this year.

"As to business conditions on the Coast, it is difficult to think of a single word to cover the entire situation, for in some localities business was brisk and in others the visitor was told that general trade was not up to the usual standard. As a whole, however, the average is good and I should imagine that in some spots a slight depression were felt, the setback commercially is only temporary.

"I was very glad to witness the tremendous widespread interest on the Coast towards the Edison disc phonographs and records. Everywhere I went I heard only words of praise for the musical perfection that has been obtained in this latest product of Mr. Edison's genius. Naturally, the sales are growing very fast and there is every indication that 1914 will see a wonderful year for the distribution of these machines throughout the Coast States."

Mr. Dolbeer told about his visit to the home of Frank Hart, of the Southern California Music Co., Los Angeles, which is located eighteen miles from the city, and where he not only enjoyed eating fresh blackberries on January 11, but where he saw the most wonderful scenery. "Mr. Hart's home, comprising many acres of ground, is situated on a plateau, from which may be seen mountains, valleys, the cities of Pasadena and Los Angeles, the ocean, embracing a view that extends over many miles in all directions," added Mr. Dolbeer.

Mr. Dolbeer remained in Orange but a few days before leaving on a short trip that will take him to a number of Eastern cities.

RECEIVER FOR POOLEY CO.

Prominent Furniture and Record Cabinet Manufacturer of Philadelphia Sends Letter to Creditors Announcing Culmination of Financial Difficulties—To Continue Business.

The Pooley Furniture Co., manufacturers of fine furniture and talking machine record cabinets in Philadelphia, Pa., has sent out the following letter to the creditors of the company, under date of February 9, 1914:

"There were several merchandise suits pending against us which we have been unsuccessful in trying to get out of the way. As the suits would go to judgment on Tuesday of this week, the committee representing creditors decided, in the interest of all creditors, to apply for a receiver in equity. This was done of the 7th inst., and M. Weinmann was appointed by the court. He will continue the business, conserving all the assets in the interest of creditors.

"We regret very much that four or five creditors out of a total of 140 made this action necessary."

TAKES ON THE VICTOR LINE.

Hanford & Horton Co., Middletown, N. Y., Planning to Give the Victor Line a Live Representation in Orange County—Manager Visits New York to Complete Deal.

The Hanford & Horton Co., of Middletown, N. Y., closed arrangements last week with Thomas G. Green, representative of the Victor Talking Machine Co. in that territory whereby a complete line of Victor products will be handled. This company has been established in business for the past fifty years, during which time it has conducted a high-class leather goods, book and stationery business, catering to an extensive clientele in their part of the State.

The new Victor department will be under the general supervision of S. G. Shimer, with Mr. Kenney in personal charge. Both of these gentlemen were visitors to New York this week, calling at the offices of the New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor. They thoroughly investigated the stock methods and other interesting items of the business as conducted by this company and were so pleased with the ideas they obtained from this investigation that they placed a substantially larger initial order than they had originally planned.

"OFFICE MAXIXES" THE LATEST.

According to the New York World, "office maxixes" are the latest form of the dancing mania. Business men's wives have discovered that the hardwood floor of "hubby's" big office is excellent for dancing. There's no rent to pay and a talking machine furnishes the music. The office dances are generally held from 5 to 6.30 and are of frequent occurrence, especially in the automobile district.

THE SOUTHERN CALIFORNIA TRADE.

F. K. Dolbeer, of Thomas A. Edison, Inc., a Welcome Visitor—J. C. Berryman Appointed Manager of Eilers Department—Excellent Business Reports from the Smaller Towns—J. C. Clem Invents Tone Arm Amplifier.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., February 5.—F. K. Dolbeer, sales manager of the Thomas A. Edison, Inc., was a welcome visitor to this section recently. While in Los Angeles Mr. Dolbeer, with O. A. Lovejoy, manager of the Southern California Music Co., visited many of the city and suburban Edison dealers, and was very much pleased with the results obtained by them.

J. C. Berryman, who has been with the Eilers Music Co., of this city, for a number of years, has been lately appointed manager of the talking machine department. This position was formerly filled by S. C. Purier, who is now retiring from the talking machine line, and has taken interest in one of the large piano houses of this city.

The Baxter-Northrop Co. is much pleased with the volume of business done in its talking machine department within the past thirty days, of which B. H. Burke is manager.

W. W. Nash, Covina, Cal., has been doing splendidly with the Victor line in his progressive little town. The popular sellers has been the Victrola XIV. and XVI.

A. P. Neilson, of Taft, Cal., was in the city for a few days, and very much enthused over the outlook of the Edison line in that great oil center.

One of the best known authorities on tone reproduction is Amct, of Redondo, Cal., who has very recently perfected a new talking motion picture, and is now in Washington, D. C., with this device. Prof. Amct has more than one hundred patents relating to talking machines.

Bowman Merritt, Fillmore, Cal., has taken on a complete line of Victor goods, also Oscar Glanville, Mojave, Cal., who increased his Victor stock.

Harry H. Clubb, an old-time talking machine man of Los Angeles, is again back in the harness selling talkers for the Wiley B. Allen Co.

C. W. Betty, Maracopa, Cal., and C. C. McGregor, of McGregor Bros., Ventura, Cal., were in the city recently. Both are live wires with the Edison line.

J. C. Clem, has produced a tone arm amplifier, 12 x 4 inches at the mouth, and giving a tone equal to that of a large wooden horn. This arrangement can be placed on any style or make of machine, the object being to increase the volume of the tone in a small space.

A. J. Morse, manager of the branch store at San Diego, Cal., of the Southern California Music Co., spent a few days in this city, much elated with the growth of business within the past few weeks.

Worthy of all acceptance and constant reiteration is this. "The ideal of modern advertising is to exalt the standard of your product in the mind of the public so that you can get your price."

EDISON DISC JOBBERS' ASSOCIATION ORGANIZED

At Meeting Held at Hotel Knickerbocker, New York, on February 9—H. H. Blish Elected First President—Objects of the New Association—Jobbers Visit Edison Factory and Are Entertained by Officials of Company—Most Enthusiastic Over Conditions.

An association of Edison disc jobbers, regarding which there has been much speculation throughout the trade, and especially since the informal meeting of a number of the jobbers in New York last August, became an accomplished fact this week when on Monday a score of the leading jobbers of Edison disc phonographs from various sections of the country gathered at the Hotel Knickerbocker, New York, and formally organized the Edison Disc Jobbers' Association, for the purpose of developing and maintaining harmonious relations between the jobbers and between the jobbers and the factory and for encouraging and aiding in all such matters as may prove of benefit to any or all branches of the trade at large.

The first officers of the new association are H. H. Blish, Harger & Blish, Des Moines, Iowa; vice-president, C. B. Haynes, C. B. Haynes & Co., Richmond, Va.; treasurer, F. H. Silliman, Pardee-Ellenberger Co., Boston, Mass., and secretary, H. G. Stanton, R. S. Williams & Sons Co., Toronto, Ont. The usual committees will be appointed by President Blish at a later date.

The jobbers as they reached New York were a most optimistic lot, full of enthusiasm regarding the manner in which, in every instance, their business had developed and of the volume of trade already handled, especially during the recent holiday season, the first season they have been really equipped in the matter of stock to go after the business energetically and to take care of it properly. Each jobber expressed supreme faith in the future of the Edison disc phonograph and cited the recent additions to his list of dealers and his plans for the future to back up his beliefs in a convincing manner.

The informal meeting called by Mr. Blish last August proved such a success and so beneficial to every one who attended that in answering this latest call the jobbers all came fully prepared to enter into a permanent organization and to give the association their strongest support. The entire day was practically given over to the perfecting of the organization and to a discussion of the constitution and by-laws and there was little time for general discussion of trade subjects, though such matters as came before the meeting were considered carefully and decided harmoniously.

When the new association gets into full running order it is the purpose of the officers to keep in close touch with every branch of the trade—factory, jobber and retailer—in order that it may exert its influence in the right direction and at the time when it will prove most helpful to the trade as a whole, and the body will take up such matters as the securing of the most favorable freight rates on phonographs, records and accessories and the general discussion and endorsement of methods that will tend to further the Edison disc interests in all sections of the country.

It is confidently expected that the few jobbers who were, for one reason or another, unable to attend the meeting will be quick to join the ranks of the association and lend their support to that body as well as benefit by the work of a representative trade organization. For some time at least no regular annual convention of the new association will be held, but the members will be called together at such times as are most convenient and when the most good can be done.

Following the adjournment of the meeting the jobbers were the guests of the officials of Thomas A. Edison, Inc., at an informal dinner at the Knickerbocker and later at the New Amsterdam Theater, where they witnessed the performance of "The Little Cafe," the representatives from the Edison factory including General Manager Charles H. Wilson, Second Vice-President William Maxwell, Sales Manager G. K. Phillips, Manager of Phonograph Sales Frank K. Dolbeer and his assistant, A. C. Ireton, Charles Edison, son of Thomas A. Edison, and others.

On Tuesday morning the jobbers made an early start and were escorted to the Edison factories in Orange, N. J., where they held a long conference with the officials of the company, with results most satisfactory to all concerned. They were then escorted through the various departments of the factory, where they witnessed the improved processes for increasing the output, especially of records, without in any way detracting from the high quality of the product. The jobbers were much gratified to learn that arrangements had been made to take care of all possible demands from them for stock in the future with little or no delay through the development of new and more rapid manufacturing systems.

One of the imposing features of the visit to the factory by the jobbers was their meeting with Mr. Edison on the eve of his sixty-seventh birthday anniversary, which occurred on Wednesday, February 11. The jobbers presented to Mr. Edison a specially prepared resolution congratulating him on his anniversary and which was accompanied by a handsome bouquet of roses. Mr. Edison was quite overcome by the tribute and could not apparently do enough to express his appreciation to his guests.

After a luncheon at the Essex County Country Club the jobbers returned to the factory, where they spent some time with Mr. Edison in his laboratory and then left for New York, either to spend a few days in the metropolis or to rush home and again take up their business reins with increased enthusiasm.

Those present at the meeting and who enrolled as charter members of the Edison Disc Jobbers' Association were: Laurence H. Lucker, Minnesota Phonograph Co., Minneapolis, Minn.; H. H. Blish and H. H. Blish, Jr., Harger & Blish, Des Moines, Iowa; Marks Silverstone, Silverstone Music Co., St. Louis, Mo.; L. N. Bloom, The Phonograph Co., Cleveland, O.; B. W. Smith, The Phonograph Co., Cincinnati, O.; H. G. Stanton, R. S. Williams & Sons Co., Toronto, Ont.; F. H. Silliman, W. C. Pardee and E. L. Ellenberger, Pardee-Ellenberger Co., Boston, Mass., and New Haven, Conn.; N. D. Griffin, American Phonograph Co., Gloversville and Albany, N. Y.; J. N. Swanson, Houston Phonograph Co., Houston, Tex.; C. B. Haynes, C. B. Haynes & Co., Richmond, Va.; Walter Kipp, Kipp-Link Phonograph Co., Indianapolis, Ind.; D. W. Shultz, Shultz Bros., Inc., Omaha, Neb.; F. B. Bolway and F. B. Bolway, Jr., Syracuse and Oswego, N. Y.; Percy Ashton, American Phonograph Co., Detroit, Mich.; W. A. Myers, W. A. Myers Sporting Goods House, Williamsport, Pa.; A. W. Toennies, Eclipse Phonograph Co., Hoboken, N. J.; Albert Buehn, Buehn Phonograph Co., Pittsburgh, Pa., and C. B. Harris, Southern Talking Machine Co., Dallas, Tex.

YOUR OPPORTUNITY

HERE IT IS

If you are one of those VICTOR DEALERS who has not tried "BLACKMAN SERVICE," can you AFFORD to not try it NOW?

Will You Ignore It?

Will you simply GO WITHOUT records you need, or will you TRY BLACKMAN? We can't give you everything wanted, BUT our service will AT LEAST be a BIG LIFT.

Send a Trial Order

Make it two or three for A TEST, and we will take a chance on OUR SERVICE, when compared with others, making you a REGULAR BLACKMAN DEALER.

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, Pres.

97 CHAMBERS ST., NEW YORK

The pleasure derived from music and Columbia Grafonolas is identical—unending and increasing.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

TO WORK KEEN-O-PHONE PATENTS.

Rex Talking Machine Corporation Leases Plant Equipment and Patents of Philadelphia Concern and Will Manufacture in a Big Way.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., February 9.—The Rex Talking Machine Corporation was recently incorporated in this city for the purpose of manufacturing talking machines. Capitalization is \$1,200,000, divided equally between preferred and common stock. Philip Wohlstetter is president and H. W. Stoll is treasurer. It will be several weeks yet before the entire permanent organization can be announced definitely.

The Rex Talking Machine Corporation has leased the entire plant, equipment of the Keen-O-Phone Co. for a term of years, where it will manufacture a medium-priced line of talking machines and records, the complete line of which will be shown in the new machine and record catalogs that are now in preparation.

Thomas Kramer is superintendent of the factory, while the recording end of the business is under the charge of Frederick W. Hager and Charles L. Hibbard.

Philip Wohlstetter, president, in chatting with the representative of The Talking Machine World, said: "At the present time matters are in such a preliminary shape that it is almost impossible to tell the trade just what we are planning to do, although our policy is practically outlined. We hope to be able to make an announcement in March and in the meantime it can be said that we will manufacture and distribute a line of machines and records of medium price, catering more particularly to people in moderate circumstances."

SIGN UP MANY DEALERS.

Eclipse Phonograph Co., of Hoboken, N. J., Doing a Large Edison Disc and Cylinder Business—High-Class Trade Emphasized.

"Business has been keeping up remarkably well for this time of the year," stated A. W. Toennies, of the Eclipse Phonograph Co., 203 Washington street, Hoboken, N. J., the well-known Edison disc and cylinder jobbers. "Although there is a shortage in certain types of machines and in the more popular records, shipments are coming from the factory in a very gratifying manner.

"One of the pleasing features of the Edison disc business is the fact that the great percentage of this business is based on the machines selling at \$150 or over. This high-class trade is naturally very satisfactory to the Edison disc dealers in our territory, all of whom predict an excellent spring trade with the Edison disc phonographs and records. We have signed up quite a large number of new dealers during the past month, and, contrary to the pessimistic predictions of some members of the trade, the cylinder business is also going along very nicely."

If you can learn to meet to-day's trouble with a placid soul, to-morrow's problems will come to you with their answers in their hands.

FLORIDA FOR THE VACATIONISTS.

Max Landay Now a Strong Booster for the Land of Flowers After Recent Visit to St. Augustine and Other Popular Southern Resorts.

From the oldest city in America, St. Augustine, Fla., The World recently received on a post-card, portraying Max Landay, the popular Victor distributor, in the role of a vacationist rather than a Victor hustler, as will be noticed. Mr. and Mrs. Landay are pictured in one of the beautiful orange groves of Florida, and judging from all indications, are having the time of their lives picking the luscious fruit.

Mr. and Mrs. Landay returned to New York a few days since from this very enjoyable Southern

Mr. and Mrs. Landay in Florida.

vacation, but the memory of those Florida oranges still lingers, notwithstanding the fact that Mr. Landay has been working day and night to prepare for the opening of Landay Bros. newest store at 427 Fifth avenue, New York. Garnett Grove, St. Augustine, Fla., was the scene of the illustration herewith, and Max Landay recommends this spot to all tired Victor enthusiasts who are desirous of securing a store of renewed energy for their busy seasons.

"I hed a dickshonary oncet," said Uncle Zeke, "but after I found it didn't spell words th' way I did, I give it to th' depot agent. It holds his door open durin' the hot weather fine!"

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York for the Past Five Weeks.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 9.—Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past five weeks from the port of New York.

JANUARY 10.

Welcome trials, for remember it is usually difficulties that bring a man to the fore.

ATLANTIC CITY WINS FOR 1914.

Annual Convention of the National Association of Talking Machine Jobbers to Be Held at Popular Seaside Resort This Summer—Elaborate Program Being Arranged for the Meeting—Planning for Big Attendance from All Sections of the United States.

Under date of January 16, Secretary Whitsit, of the National Association of Talking Machine Jobbers, sent out to all members a communication informing them that the executive committee at its meeting last September endorsed Atlantic City as the place for holding the 1914 convention. A return postal was enclosed with instructions to check Atlantic City if the member favored it and if not to express his choice of other cities. To date about 75 per cent. of the membership have responded and the choice is all but unanimous for Atlantic City, there being just two dissenting votes.

Now that the meeting place has been decided on work will begin at once arranging for the convention. If the 1914 gathering does not eclipse any previous one it will not be the fault of the officers in charge. Already President Roush and Chairman Wiswell of the arrangement committee have had their heads together and they have passed the word along that not only will there be more doing from an entertaining standpoint, but there will also be several innovations in the association business meetings. In other words, these gentlemen have adopted as their slogan, "something doing extraordinary in '14," and the members knowing their caliber seem to be perfectly satisfied to leave it to them.

A special effort is going to be made this year to get to the convention the heads of all houses jobbing the talking machine line, as well as their department managers.

Prior to this time a great many jobbers have considered their talking machine department as merely a side line, but association officials have reason to believe this condition no longer exists; in fact, when comparisons with other departments are made of the 1913 business it is thought that the talking machine line will have forced its way ahead of most of their other departments. This being true, there is no good reason for the heads of these concerns ignoring longer the National Association of Talking Machine Jobbers, and much pressure is going to be brought to bear to convince them of this fact. It sounds reasonable.

President Roush and Secretary Whitsit spent a day together in January talking over the important things to take up February 16, when the executive committee will confer with the Victor directors.

Once when Mischa Elman arrived at a certain city to give a recital he hailed a conveyance at the station and requested to be driven to the concert hall. "Not a bit of good—the house has been sold out this last fortnight," retorted the driver. "That is rather awkward," replied the young violinist. "But never mind, drive me there all the same. I'll take my chance of getting in."

NEW QUARTERS FOR C. W. LINDSAY.

Will Erect New Building for Quebec Branch and Give Added Prominence to Victrolas in Quebec Province—Work to Begin in May.

(Special to The Talking Machine World.)

QUEBEC, QUE., February 9.—Greater prominence will be given the Victrola line in this city as a result of the decision of the firm of C. W. Lindsay, Ltd., to erect new premises for its local branch in the city of Quebec. The results of its negotiations was the purchasing of property on St. John street, opposite its present store. This property gives it 4,252 square feet of ground on which it proposes to build a five-story steel building, containing an attractive front and all conveniences. Work will be begun on the new building in May.

FIBRE NEEDLE MASTERPHONE.

Wins Much Praise from Trade and General Public—Promises to Have a Big Demand.

"The reception accorded our new fibre needle Masterphone has been very gratifying," said M. B. Claussen, president of the Masterphone Corporation, 187 Broadway, New York. "Since announcing our new Masterphone late last month we have received orders for it from all parts of the country, as the trade having derived entire satisfaction from our steel needle device, felt confident in the success of our fibre needle Masterphone.

"Notwithstanding the fact that the new Masterphone has only been on the market for a week or two, we are already in receipt of a number of communications from music lovers who are enthusiastic over the tonal results obtained by the use of the fibre needle Masterphone. The true, natural tone of the record is not only brought out, but augmented by the use of the Masterphone, and with the endorsement of a number of famous artists who have listened to their own records as played with our new device, we naturally feel certain that music lovers throughout the country will appreciate its true musical value."

TO HANDLE THE EDISON LINE.

Two Companies Incorporated, One with Headquarters in Chicago and the Other in Kansas City—Latter to Act as Phonograph Distributors—Will Also Open Retail Store.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 9.—The San Francisco Phonograph Co., which has conducted a store in this city for some time past, has been incorporated with a capital stock of \$15,000 for the purpose of handling Edison phonographs. The incorporators are: Morris Cohen, Fred Barth and Clyde E. Shorey. The same people have also incorporated the Western Phonograph Co., which will act as distributor for Edison phonographs and records, with headquarters in Kansas City. The Western Co. will open a retail store on Grand avenue, Kansas City, under the management of W. P. Hope.

CELEBRATES 65TH ANNIVERSARY.

R. S. Williams & Sons Co., Ltd., Jobber of Edison Phonographs, Holds Interesting and Successful Reception to Mark Business Anniversary—Its Sixty-fifth, by the Way.

(Special to The Talking Machine World.)

TORONTO, ONT., February 9.—A most successful anniversary reception was held on Tuesday, January 20, by the R. S. Williams & Sons Co., Ltd., of Toronto, who is the Canadian distributor of Edison phonographs and records. The occasion was the firm's sixty-fifth anniversary, and the crowds that inspected its ten-story "Home of Music," showed their appreciation of the programs rendered in the recital hall. Both the afternoon and evening concerts presented a variety of music furnished by Miss Estelle J. Carey, soprano soloist, Esther Smith's concert orchestra, the Edison disc phonograph and others. The building was most suitably decorated throughout and each floor was inspected by throngs of interested visitors. The event was announced by invitation cards and well-written daily paper announcements. This completes the first year of the R. S. Williams & Sons Co. occupancy of its splendid new building.

WIN SUCCESS WITH COLUMBIA LINE.

Music Supply Co., of Toronto, Ont., Forced to Move to Larger Quarters to Handle Growing Business at 36 Wellington Street, East.

(Special to The Talking Machine World.)

TORONTO, ONT., February 9.—The rapid increase of the sale of Columbia products in the province of Ontario has meant such expansion in the business of the Music Supply Co., Columbia jobbers for this province, that it has been forced to take larger premises, and accordingly has moved from 88 Wellington street, West, Toronto, to 36 Wellington street, East. A new feature of the Music Supply Co.'s trade is the introduction of the foreign language disc records. These give dealers a field for selling courses in French, German, Spanish and Italian, for which both the proprietors of the firm, John A. Sabine and Charles R. Leake are convinced is a very large one in Canada, and one that should yield good results to live retailers.

SUCCESS WITH DAILY CONCERTS.

(Special to The Talking Machine World.)

PLYMOUTH, N. H., February 8.—Fred W. Brown reports that his Edison cylinder business is making rapid strides. A very attractive window display of the new Amberolas has done much to draw trade, and daily concerts are the rule. During the visit of the Edison representative a number of prospects were closed, including one Amberola III to a prominent merchant of the town who is most enthusiastic over its musical and constructive merits. Business generally is excellent.

A little push will often be more effective than a lasting spell.

IMPORTANT NOTICE TO EDISON DISC DEALERS

Patent Pending.

The New Thomas Attachment

Plays lateral cut records on the new Edison Disc Machine. It has a patented ball bearing joint, which makes it work flexible and free. You should not fail to have a quantity of these attachments in stock, as it will greatly add to your machine sales.

Write to your jobber for a sample, if he hasn't it write to us.

F. H. Thomas Co., 689 Boylston St., Boston, Mass.

This Cabinet is built to match the machine case, and gives the impression that the two are a unit. It is a masterpiece of cabinet making, and is furnished in the various woods and finished to match. The compartments are lined with felt in the Salter style, giving perfect protection to records.

Similar cabinets for the "Columbia" line and some beautiful new cabinets for the Edison line.

Salter Cabinet for No. IX Victor Machine.

**What would you say of
a dealer in Talking Machines
who did not handle Records?**

**You would say that he
was like his stock—"Not all
there."**

How About Cabinets?

No Talking Machine business is realizing nearly what it should unless profits from cabinet sales play a big part in the dividends.

We have looked at things from the dealer's standpoint as well as our own and have designed our cabinets with you in mind. With the Salter line profits are sure.

Have Our Catalog Handy.

SALTER MFG. CO.
337-43 N. Oakley Blvd. CHICAGO

H. J. THOMAS APPOINTED MANAGER

Of Talking Machine Department of Hobart M. Cable Co. Store in Clinton, Ia.

(Special to The Talking Machine World.)

CLINTON, IOWA, February 11.—H. J. Thomas has been made manager of the talking machine department of the branch store in this city of the Hobart M. Cable Co., of La Porte, Ind. The talking machine department is a new feature of the store and a large space will be fitted up for its accommodation, with several handsome demonstrating booths. Mr. Thomas is a talking machine man of experience, having been for four years with the Chicago branch of the United States Phonograph Co., of Cleveland, starting as a local salesman and promoted as traveling salesman and was later in immediate charge of the sales of the Chicago branch. The opportunity offered Mr. Thomas to locate in Clinton was an exceptionally fortunate one for him, as it is his old home town, and he was but recently married to Miss Jennie Lee Fairchild, an accomplished young woman of this city.

ADVERTISEMENTS NOT COPYRIGHTED

Artistic and Literary Devices May Be Protected, Not Advertising Articles, Rules Judge Foster in Decision Just Handed Down.

(Special to The Talking Machine World.)

NEW ORLEANS, LA., February 7.—That advertisements are not subject to copyright unless possessed of sufficient artistic and literary merit, is the substance of an opinion handed down by Judge Rufus E. Foster, of the United States District Court, last week, in the case of Stone & McCarrick, Inc., vs. the Dugan Piano Co., Ltd., in which the motion to dismiss was sustained. In the original bill complainant alleged that it had published and copyrighted a book entitled "Manual of Instruction, in Use of Stone & McCarrick System of Salesmanship"; that the book was specially intended for use by its subscribers for reprinting parts thereof in a series of articles intended for advertising purposes and was printed in such forms as to be specially adapted for use as "copy" for advertisements in newspapers, magazines, periodicals and other literature, and that the Dugan Co. and its officers had infringed the copyright of the said book by publishing substantial parts of the copyrighted work as advertisements of the wares offered for sale by the said company.

Defendants moved to dismiss the bill on the grounds that advertisements are not copyrightable, and hence advertising copy is not copyrightable, and that the copyright of a textbook or manual of instruction of a useful art, science or system does not confer upon the proprietor of the copyright the exclusive right to make use of the art, science or system explained in it.

The decision of the court, which will no doubt have a far-reaching effect on the right of merchants to insert advertisements designed and originated by others, is as follows:

"As to whether advertisements may be copyrighted there are cases both ways, but conceding, for the sake of argument, that advertisements in the forms copyrighted by the complainant would possess sufficient artistic and literary merit to be the subject of copyright, it seems to me that the second ground of objection is destructive of complainant's case.

WANTED

Job lots of any make talking machines and records.

Will buy for cash second-hand machines, shop-worn records and supplies. Correspondence strictly confidential. Address "Cash Buyer," Talking Machine World, 220 So. State Street, Chicago.

WILL BUY Edison two or four-minute records, also Victor or Columbia regular or cut-out stock records; will also buy machine stocks. Give full particulars and lowest prices. L. Paradis, P. O. Box 356, Chicago, Ill.

"Complainant has copyrighted a book and not an advertisement. Defendants have published an advertisement and not a book. The book is in the nature of a manual of instruction and is designed to teach piano dealers how to attractively advertise their wares, and contains forms, or models, or diagrams of advertisements, just as we may choose to term them.

"If complainant had published or copyrighted a manual of instructions designed to teach a piano maker how to build the instruments any person would be entitled to follow the instructions and diagrams to construct a piano. I can see no distinction between a system of instruction as to how to make a piano and a system of instruction as to how to draw an advertisement. The copyright of the book did not prevent the general public from making use of the book for the purpose for which it was designed, notwithstanding such use results in the publication of a part of the book in the form of an advertisement. In my opinion the case is on all-fours with the decision in Baker vs. Seldon, 101 U. S. 99. The motion to dismiss will be sustained."

PROSPERITY IS COMING FAST

Says Secretary Redfield of the Department of Commerce—Tariff Found Not Harmful as Foes Feared—Business Conscience Awakened and Readjustment Welcomed.

Before the Chamber of Commerce at New Haven, Conn., last Saturday night, Secretary Redfield, of the Department of Commerce, made an address in which he stated that business conditions are rapidly working toward prosperity in this country. Reminding his hearers that trade depression has been world-wide and less acute here than abroad, and that the rising tide is first felt in America, he turned to the political reforms recently made effective by legislation and their promise of abundant benefits.

"It was perfectly proper," he said, "that business men whose output was affected more or less by the new tariff should give thoughtful heed how to readjust themselves to it. Now they are saying that the readjustments are over and the new tariff at its worst is nothing like so bad as they feared, and at its best is helpful.

"Big business has often failed to see that its methods have aroused a justly popular resentment, and that many of its past purposes were impossible and intolerable in a democracy. Business conscience has now awakened, and men of might in finance are becoming men of light in the necessary readjustments that are pending.

"The sense of what is fit, the knowledge of what is due to their own honor are now so keenly alive in the business community that when the achievements of our recent discussions shall have been finally wrought into law business men will be found ready for such further work as may remain to be done."

IT CAN BE DONE.

Somebody said that it couldn't be done,

But he, with a chuckle, replied

That "maybe it couldn't," but he would be one

Who wouldn't say so till he tried.

So he buckled right in, with the trace of a grin

On his face. If he worried, he hid it.

He started to sing as he tackled the thing

That couldn't be done—and he did it.

There are thousands to tell you it cannot be done;

There are thousands to prophesy failure;

There are thousands to point out to you, one by one.

The dangers that wait to assail you;

But just buckle in with a bit of a grin,

Then take off your coat and go to it;

Just start in to sing as you tackle the thing

That "cannot be done" and you'll do it.

Cleverness may, after all, be merely an ability not to attempt the things we know we can't do.

FOR SALE OR EXCHANGE.

EDISON PRAISES MACHINES.

They Aid the Working Man and Shorten Hours, Says the Great Inventor in the Course of Some Recent Interesting Remarks—Will Enable American Manufacturers to Compete Most Successfully with Europeans.

Thomas A. Edison expressed the opinion at West Orange recently that the Ford profit-sharing plan was the beginning of a new period in industrialism and was due to high efficiency with machinery. If generally adopted, he said, it would do away with labor unions.

"This great scheme of Mr. Ford's will do a world of good," he said. "When we use machines instead of humans and have a single apparatus to do the work of 250 men, then employes will enjoy real benefits. This is already true in the Ford factory in Detroit. It is a case where scientific management has rolled up enormous profits, because an article can be very cheaply manufactured on that plan.

"Mr. Ford struck the right note when he found he could sell his car for \$50 cheaper some time ago. Then, when efficiency in manufacture made it possible to complete the car for another \$50 less, he decided that his employes should reap the benefit. It is a good scheme, while the Ford people are prosperous, but I suppose if their business decreases it is only natural that the wage of the employe will decrease.

"The time is passing when human beings will be used as motors. We are to-day putting brains into machinery, and are replacing by machinery the energies of thousands of humans with only a few men to see to it that the apparatus keeps working. If other concerns were to set about to study the question of efficiency and reduce operation to the minimum cost, then employes would profit."

Improved machinery, went on Mr. Edison, would necessitate men working fewer hours, and at the same time would enable them to accomplish much more. He said that he had perfected a machine, used in the manufacture of his storage battery, which could be operated by a girl and which did the work of forty men.

Continuing, Mr. Edison said that in a few years, with the new machinery, American manufacturers would be able to undersell the Germans and other manufacturers.

"Machinery is the salvation of the American manufacturer," he said, "and will result in the United States leading the world commercially in a few years."

Mr. Edison also had a few remarks to make about the present system of education, saying that it was a remnant of the old Latin institutions and was too involved.

"What we should have," he said, "is education by demonstration."

The present dancing a thing to be

No other Company has gone to the expense or given the time to make their dance records so authentic as the Columbia Company.

So, we have the goods—got them right, too. Tangos, One-Steps, Hesitation Waltzes, Bostons, Turkey-Trots—every one of them in approved dance tempo, made under the personal direction of the greatest authority in this country on modern dancing—G. Hepburn Wilson, M. B., who dances while the band makes the records.

Which, being the case, we are taking two full pages in the Saturday Evening Post this week, in addition to the Columbia publicity in numerous other publications, to feature Columbia dance records.

This advertisement is all dance—and modern dance at that. These records have the real spirit that no dancing enthusiast can resist. For home dancing they are in a class by themselves—beyond the reach of serious competition.

THE SATURDAY EVENING POST February 14, 1914

Columbia

Fit Your Machine!
Pay your dealer 25 cents for our "sample" record or send the coupon to us.
Yes, no matter if it is not a Columbia. (Get our "sample" record from your dealer or send the coupon.)
If it plays regular standard disc records you can play Columbia records on it. (Get our "sample" record from your dealer or send the coupon.)

DANCE!

If you think you have danced to the best dance music that your talking machine can produce, have your dealer play any one of these—may be your dealer be able to supply them, and every Columbia dealer certainly has them ready now.

TANGOS

- A. 1463 (10-cms) **GOOD FELLOW** (Six Men Band) Played by the Municipal Band of Boston.
- 65c. **TANGOLETTE** (Six Men Band) Played by the Municipal Band of Boston.

NEW EXPRESS RATES OF MUCH INTEREST TO TRADE

Will Prove of Benefit to Talking Machine Jobbers and Dealers Throughout the Country—
Schedule of New Rates as They Apply Between the Principal Cities of the Country.

The new express rates, ordered by the Interstate Commerce Commission, and which went into effect throughout the country on February 1, and particularly interesting to the talking machine jobbers and dealers as affording a means for facilitating rapid shipments and deliveries and much reduced expense. The express companies take machines and other packages much heavier than the

parcel post limit, and in addition provides a receipt that takes the form of free insurance. The sweeping reduction in the express rates is indicated by the accompanying tables prepared by the express companies, and showing charges of specified weights between two prominent cities of the country, the rates being based on fixed distances instead of the mileage plan.

TALKING MACHINE EXPORTS.

The Figures for December Presented—Reports Show Falling Off for the Month.

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 9.—In the summary of the exports and imports of the commerce of the United States for the month of December (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for December, 1912, amounted to \$232,900, as compared with \$236,426 for the same month of the previous year. The twelve months'

exportation of talking machines, records and supplies amounted to \$2,792,667.

LEIPZIG FAIR OPENS MARCH 2.

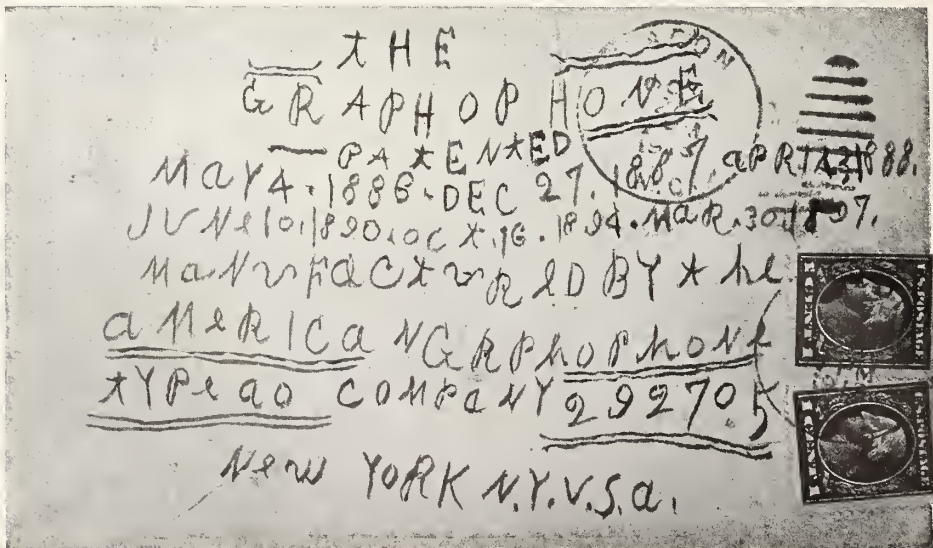

(Special to The Talking Machine World.)

LONDON, ENG., February 3.—On March 2 the Leipzig Fair commences and, as usual, will continue for one week; that is, the commercial side of it. The Leipzig City Council has been advertising the business attractions of the Fair pretty thoroughly in the leading London newspapers, and all indications point to a record number of visitors. Gramophone men usually attend the spring gathering in large numbers, but at the time of writing, while most of them speak of the probability of going over, few will commit themselves to a definite decision so many weeks in advance.

AN ODDITY IN ENVELOPES.

The Columbia Graphophone Co. received recently an envelope addressed in a truly distinctive

and unique fashion. Every possible detail, including patent numbers, was shown on this envelope, which is presented herewith, and any danger of miscarriage was apparently eliminated.

"HEARING" TYPE BY MACHINE.

New Invention for Benefit of the Blind, That Causes Different Printed Letters to Indicate Their Character by Sound.

A blind man may some time be able to read the daily newspapers, books or all printed matter with no aid except that of a machine. Such a machine has now been devised, but it is still far from perfect. Posters furnish about the only reading that can be done with it now.

What the apparatus does is to sound musical notes or chords in the blind man's ear for each printed letter. With experience the blind man will be able to tell the letter each combination of notes is intended to represent.

The inventor of this machine is a London scientist. Over a year ago he perfected an instrument that would enable a blind man to detect the source of any light near him—to find the window of a room, for instance. A box that looked something like a camera was held in the hands of the blind man and wires connected the box with a telephone receiver at the blind man's ear.

A selenium unit in the box detected any light and sent a current to the telephone receiver, thus making a sound in his ear. The blind man could point his box or camera in any direction. When it was pointed at light the telephone receiver vibrated, the loudness of the noise being dependent on the strength of the light.

The new device is a development of this box—or optophone, as it is called. Words in large type—on a poster, for instance—are passed in front of the new instrument. A strong light is thrown on the type, part of this light being reflected back from the white paper and part of it not being reflected—where the rays strike the black ink. The returning rays are detected by a checkerboard group of selenium cells. Each of these checkerboard cells will cause a musical note to sound in the telephone receiver at the blind man's ear, and each cell has its own individual musical note.

When the letter M is passed in front of the instrument, for instance, there is first a crash of a whole scale of tones, as the upright line at the left comes along; then, as the slanting middle lines pass before the instrument, the notes first run down the scale and then up the scale; and then the right-hand upright line causes another crash of many notes. The blind man quickly learns that this combination of sounds means M.

The inventor hopes it will be possible to perfect his apparatus eventually so that it can be used on ordinary type. On the face of it, the apparatus needs only refinement to enable blind men to read newspapers; but it is extremely difficult to obtain that refinement.

The Kelley Music Co., Jersey City, N. J., is a recent addition to Columbia agencies.

STROH VIOLS

VIOLIN, VIOLA, ETC.

The mellow and matured tone of these instruments, which are constructed largely of aluminum, yet possess none of the characteristics of the gramophone or wind instrument, is only one of its many points which are fully set out in an illustrated booklet which will be mailed free on request to the sole makers.

GRAND OPERA AND THE TALKING MACHINE.

The Importance of Their Relations and the Influence Exercised in the Matter of Public Taste Set Forth in Article Written for The Voice of the Victor by Albert Grau, Brother of the Famous Impresario—Interesting Reminiscences of Early Opera.

It does not seem so very long ago that grand opera was regarded as the most precarious line of endeavor with which men of nerve and capital could tempt fate, and even so intrepid an impresario as Colonel Mapleson predicted that the ultimate destination of his kind was either the county jail or the poorhouse.

But Colonel Mapleson and his colleagues, such as the Strakesches, Maretzek and the indefatigable Henry E. Abbey, all of whom died penniless, were unfortunate in that their period of activity antedated the advent of a scientific era in which, as a result of the amazing evolution of the talking machine, the scores of masters, and the world's greatest singers have been brought into our homes, and this has gradually created a nation of opera-goers, so that the spectacle of three majestic opera houses opening simultaneously in New York City, which as recently as ten years ago would have meant sure disaster, may now be viewed with complacency by impresarios, artists and public.

Even during the régime of Maurice Grau, ending in 1904, the Metropolitan Opera House had established the first operatic dividends known to American musical history, and this impresario was quick to observe that a new musical public was being created. Crowded balconies and galleries were solving grand opera's difficult problems, and the day when the works of Wagner, Verdi, Gounod, Puccini and their colleagues could attract only the social set was already passing.

But the talking machine, up to the time of Mr. Grau's retirement from the operatic field, was yet regarded as a mere toy. From 1904 to the year of 1913 were nine years of persistent musical uplift, in which the Victor Co.'s extraordinary enterprise had caused the musical map to change from coast to coast. It mattered not whether it was Caruso,

Tamagno or any of the famous singers who are paid thousands a night, they all capitulated to the inducements held out to them. But let no man doubt that this was greatly due to the astonishing development of the Victor, and not solely to the financial benefits. Moreover, there is no record of any protest in recent years on the part of the impresarios of grand opera, all of whom were brought to realize that the influence of the Victor was being felt in the box offices. This is so true that although the world's greatest singers were now adding to their annual income prodigious sums of money, while their artistry was being perpetuated scientifically, their compensation has been constantly growing larger, in the opera houses, while a third source of income, also greatly due to the Victor, has resulted from the tremendous demand for their services for concert tours, song recitals and festivals galore all over the country.

I can remember when there were not over thirty cities where a famous diva could attract a paying audience, and even ten years ago not more than five or six musical celebrities could procure sufficient bookings to justify a tour. To-day there are as many as sixty well-known vocal and instrumental soloists who can attract an audience representing anywhere between \$1,500 and \$6,000 at each appearance.

It is a fact that the demand to hear and see the famous musical stars by a new and increasing public is so great that while the distinctly dramatic or theatrical business all over the country has had an awful slump, the prosperity in the musical field is everywhere conceded. Mme. Schumann-Heink has attracted audiences in cities of about 20,000 population representing from \$2,500 to \$4,000, while in the larger cities the larger sum is an ordinary achievement. Yet this same Schumann-

Heink came hither from Berlin under my brother's direction at a weekly honorarium of \$250. If you would ask the great German contralto her opinion, she will tell you that the Victor has accomplished more to make the nation musical than all other influences combined.

When it was announced that opera in the language of the nation was to become a permanent attraction in the theater endowed by New York's multimillionaires, this writer ventured to predict that the outcome would be successful from the outset, and now when the pessimists are confronted with the spectacle of capacity audiences night after night and week after week, the fear is expressed that with the advent of the regular opera season at the Metropolitan Opera House and the inauguration of a third régime—that of Oscar Hammerstein—the gold-laden box office of the Century Opera House must show the effects instantaneously; but it will be found that New York with its 6,000,000 souls can, and will, provide a public for all three, provided that the artistic offerings are wholly worthy, and surely there is nothing to indicate a reaction in the near future in the neighborhood of Central Park West, where the advance subscriptions are already assuring prosperity for months to come.

The Messrs. Aborn know from experience that popular-priced opera is a necessity in our larger cities, and they have publicly acknowledged that this is principally due to the thousands of new music lovers who, having heard in their own homes the voices of celebrated singers and the melodies over which they have raved, now flock to the opera house or theater where they are held fast, and this is a condition which explains why in the heat of summer, when the playhouses usually are closed, the Messrs. Aborn have prospered in a half dozen cities simultaneously.

But even now the influence of the Victor is in the infant stage. The Victor Co. is not resting on its laurels; one may see evidences at every turn of expansion and productivity and an effort to embrace newer fields in which its conquest a few years ago would have been difficult to accomplish.

UP-TO-THE-MINUTE "PURE ADVERTISING" LABORATORY.

The Interesting Story of the Edward C. Plume Co., a House Which Creates Strong, Ethical, Convincing Advertising Matter for Talker Merchants and Those in Other Lines of Trade—Some Excellent Views of the Model Establishment in Chicago and Its Trained Staff.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 10.—The World takes genuine pleasure in presenting views of the general office, copy and art rooms of the Edward C. Plume Co., of this city. The reason for the "pleasure" is that the company is doing a work thoroughly in

slides for the use of the merchant in exploiting his product in moving picture theaters. Reproductions of some of the advertisements put out by the Edward C. Plume Co. have already appeared in The Music Trade Review. The series is a remarkable one in that the announcements while forceful,

pany's excellent and result productive advertising service.

The offices, however, are splendidly equipped for the great educational campaign which Mr. Plume has under way, and which means so much for the uplift of advertising.

Those members of the trade who have already made use of the Plume Co.'s advertising service are enthusiastic regarding the originality of the ideas embodied therein and the character of the copy, as well as of the results produced thereby, in the line of prospects and sales. It is the sort of advertising that stands the test.

General Offices of the Edward C. Plume Co., Chicago.

accord with the private convictions and public propaganda of The World along the lines of "pure advertising."

The Edward C. Plume Co., as the readers of The World well know, was founded several years ago by E. C. Plume, who was for a number of years the Western wholesale manager for the Columbia Graphophone Co., and in that capacity came in contact with many talking machine and

convincing and calculated to get results, are absolutely ethical and are such as to exalt the standard of the individual merchant and the trade in the mind of the public.

The first of the three views here presented shows the company's general offices, which occupy a large part of the third floor of 417-421 South Dearborn street and the entire street frontage. Mr. Plume's office is in the front on the right hand side. Mr.

NEW VICTOR DANCE RECORDS.

Interesting List Issued to the Trade Recently by the New York Talking Machine Co.

The New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor, sent out to its clientele a fortnight since a special list of new Victor dance records which was compiled after due consideration. These rec-

The Laboratory.

piano dealers and naturally is conversant with conditions in this trade. In the period between his resignation from the Columbia Co. and the founding of his present business Mr. Plume had associated with him B. L. Kelley in an advertising concern, and his experience in that line opened his eyes to the wide field for the right kind of advertising matter in the talking machine and other lines of trade. The Edward C. Plume Co. was established with ample financial backing, with Mr. Plume as president and Mr. Kelley as assistant treasurer and secretary.

While the activities of the company along advertising lines run in various channels, it features high grade newspaper advertising copy handsomely illustrated, artistic mailing folders and advertising

Kelley can be seen in his office at the right in the rear, and to the left is shown the office of J. L. Fraser, sales manager. The copy and art room is next to Mr. Plume's office, but is not shown in the general view. In the second view Mr. Plume is seen in his private office in consultation with W. F. Schramm, the advertising manager. We cannot just recall whether this picture was taken at the time when they were discussing the securing of the services of "Penny" Ross, in devising a series of Mamma's Angel Child folders, or whether it was when the Plume Co. bought out a large Cincinnati advertising service concern. After careful reflection, however, we are inclined to think that it shows the presidential and copy-creating brains working on an important extension of the com-

The President's Private Office.

ords were listed on a specially printed sheet, and labeled "The New York Talking Machine Co.'s Extra Special."

The company had expected that the list would be favorably received by its dealers but were unprepared for the remarkably large number of orders that were received within two days after the list was mailed. Many dealers ordered 100 apiece of all the records listed, and some of the company's patrons used the telephone and telegraph to place their orders at the earliest possible moment. The success of the list was a significant indication of the popularity of Victor dance records, and an impressive endorsement of the live-wire methods of the New York Talking Machine Co.

A REMARKABLE EDISON ADVERTISEMENT IN CHICAGO.

TALKER MEN MEET IN LOS ANGELES.

Grand Opera Continued in Chicago

Chicago's official operatic season has closed—but you may still hear Grand Opera!

Special arrangements have been made by which Chicago opera lovers may continue to hear their favorites.

Selected programs of popular operatic numbers—sung by the most renowned opera stars, will be presented every afternoon at the Edison Shop, between 3:00 and 4:00 P. M. This is in addition to the regular concerts which continue as before—daily from 11:30 A. M. to 5:00 P. M.

Call today and hear the gems of opera sung by the world's greatest artists—reproduced with all the purity of sound and unblemished art of the original. No charge for admission.

Call any afternoon and hear the superb New Edison—in which the inventor has finally overcome all defects and difficulties and has attained the great goal toward which he has striven for years—Perfect Reproduction of Sound.

In Mr. Edison's own words, "Real Music at Last."

Hear It!

Call and hear this superb new instrument—the supreme triumph of Thomas A. Edison. No charge for seats in concert room.

Hear the wonderful new Edison records—scores of new records just received. Or bring along some of your favorite disc records (foreign or domestic records of any make) and hear them played on the Edison as you have never heard them played before.

Concerts Daily From 11:30 A. M. to 5:00 P. M.

In the Beautiful Concert Hall at the Edison Shop. There is no charge for these concerts and no obligations or requests to buy. We are eager for everyone in Chicago to hear the New Edison if merely to tell others of the wonderful music.

On write for description booklet of prices and outfit.

The New Edison

Is Indeed Thomas A. Edison's Supreme Triumph.

The new Diamond Stylus Reproducer—the New Edison Disc Records—the New Edison Motor and the concealed sound conveyor have all been worked out to absolute perfection.

The New Edison Records, with music on both sides, are so wonderfully superior to anything that has ever been heard before as the new instrument is superior to all others.

These new records are made of an entirely new material and do not wear or scratch. They are not needed to scratch and wear them out. The Diamond Stylus Reproducer with the highly polished diamond point will reproduce the Edison records thousands of times and the last reproduction will be as perfect as the first one.

With Mr. Edison's new method it is possible to mold into these records every fine shading and subtle distinction of an artist's voice. Call today and hear.

Edison Concerts now being given in the following cities:

The Edison Shop

(The Phonograph Co., Proprietors) 229 Wabash Avenue, Chicago, Ill.

One of the most striking and undoubtedly one of the best advertisements from the viewpoint of direct results appeared in the Chicago Tribune Sunday of last week. It was inserted by the Phonograph Co., the prominent Edison distributors in Chicago, and while more directly exploitive of the Edison shop, the Phonograph Co.'s retail department is of intense interest to Edison dealers everywhere to whom it will no doubt appeal as a model advertisement of Edison goods. It is one of a series of remarkable announcements which Manager C. E. Goodwin has been running. It occupied a space equal to five full columns, or five-sevenths of a page. A reproduction of the advertisement in miniature is printed herewith.

One of the most noteworthy features in connection with the country-wide campaign being conducted in the interests of the Edison disc phonographs has been the striking originality and forcefulness of the advertising.

Southern California Talking Machine Men's Association Holds Bi-Monthly Meeting and Banquet in That City—Interesting Papers Read on Live Subjects.

(Special to The Talking Machine World.) LOS ANGELES, CAL., February 7.—The bi-monthly banquet and meeting of the Southern California Talking Machine Men's Association, was held at the usual place, the Hollenbeck Hotel, January 29. After the dinner a most interesting talk was given upon the "Use and Results of the Victor in the Public Schools," by Miss K. Stone, musical supervisor of the Los Angeles Public School. Also a paper was prepared by Mrs. Sibley G. Pease upon the "Local Musicians and Composers." A brief speech was given by the president of the association Sibley G. Pease, then followed the regular routine of business and a general discussion of matters relating to the talking machine trade.

IT HITS THE MARK.

That's What Merchants Are Saying About the "CL" H. P. Nelson Player-Piano.

(Special to The Talking Machine World.) CHICAGO, ILL., February 9.—"In all my experience I never saw anything that seems to be designed so completely to satisfy the present demand as the Style "CL" H. P. Nelson player-piano." This is the burden of a letter received to-day from a dealer by the H. P. Nelson Co. "It gives me something to go after big popular trade, and after a careful examination I know that it is going to be a winner, because it is built right and is going to be a continual prospect producer. The sample is already spoken for." Then followed an order that demonstrated that the dealer was building on the faith that was in him.

Similar letters are being received from all parts of the country. H. P. Nelson is evidently on the eve of another of his remarkable successes in piano and player production.

The new wholesale salesrooms of the H. P. Nelson Co. are the scene of considerable activity these days, and a half a dozen automobiles are kept busy bringing dealers out to the factory from the downtown district. A hundred and fifty pianos are shown on the floor, presenting the H. P. Nelson styles in all of the various woods.

One that is attracting a big share of the attention of the visitors, is the new Style 106 Nelson piano, an exceptionally attractive instrument that is drawn along simple lines, and which is equally good to look upon in either mahogany, oak or walnut. A number of other styles are also being brought through the factory.

Orville Harrold, the celebrated tenor, whose records in the Columbia library have scored a pronounced success, has joined the Century Opera Co., where he will be presented in important parts. Mr. Harrold will be the third well-known male singer in the Century Opera Co. whose records are in the Columbia library; Morgan Kingston and Walter Wheatley also being well represented.

CONSISTENT PUBLICITY PAYS.

Southern progressiveness is well exemplified in the excellent newspaper advertising used the year round by the Tampa Hardware Co., Tampa, Fla., the prominent Columbia distributor. This enter-

prising house is conducting a campaign in Tampa newspapers which is resulting in the closing of a splendid business both in machines and records. Large space is used, and appropriate illustrations together with convincing selling talks make this advertising distinctive and sales productive.

NEW YORK

A DEALER WHO GETS RESULTS.

George J. Lenth, Although Located in a Town of Only 1,300 in Iowa Orders Full Carload of Edison Disc Machines and Records and Gets Right After the Business—Shipment Well Advertised En Route to His Town.

When a phonograph dealer in a town of 1,300 population orders a solid car-load of machines, in the parlance of the street, he is certainly "going some." This was the splendid record achieved by Geo. J. Lenth, a hustling and progressive Edison disc dealer in Elkader, Clayton County, Ia. It is a safe bet that many talking machine dealers in the East have never heard of Elkader, Ia., but there is no doubt that Elkader will be well acquainted with the Edison phonograph before Mr. Lenth gets through.

The solid carload of Edison disc phonographs and records intended for Mr. Lenth left the Edison factories on January 21, and in order that cities and towns along the route of shipment could be fully acquainted with Mr. Lenth's enterprise and energy, the following large-sized sign was placed on the side of the car: "Solid carload of the wonderful new Edison diamond disc phonographs, bought by George J. Lenth, Elkader, Ia., population 1,300." The mere fact of the carload shipment leaving the Edison plant was nothing unusual, but the 1,300 population was the impressive part of the sign.

It is understood that Mr. Lenth, who is a firm believer in the value of personal solicitation, has also arranged for the giving of several concerts in the Elkader churches and places of amusement to feature the Edison disc phonograph. It is safe to say that if these concerts meet with the same degree of success that Mr. Lenth's personal efforts evidently have, there will be another carload of Edison phonographs and records very shortly.

ORIGINAL PUBLICITY PAYS.

How Brodie & Bro., of Waverly, Ia., Are Bringing the Victrola to the Attention of the People of That City with Excellent Results.

(Special to The Talking Machine World.)

WAVERLY, IA., February 9.—Taking advantage of all opportunities offered from a publicity standpoint is well illustrated in the postcards and circulars being sent out to their clientele by A. A. Brodie & Bro., of this city, the hustling representatives of the Victor Talking Machine Co. in this territory. These postcards and circulars are the subject of general comment and attention, as they are decidedly original in their design.

The purpose of this literature was to illustrate the extent of the company's business, as the scene presented was that of a wagon-load of Victrolas

being taken through the streets of Waverly, en route to the store of A. A. Brodie & Bro. The wagon was snapped in front of the store, and underneath the picture was printed: "Your Victrola is in this load. Come on in." It is pleasing to note that this up-to-the-minute publicity produced excellent results commensurate with the distinctiveness of the idea.

AID TO INCREASED RECORD SALES.

Special Cover to Hold Standard Record Catalogs Just Issued by the New York Post Card Co. and Meets with Immediate Demand.

"We are now ready to announce to the talking machine dealers throughout the country, something new that we are certain will prove a boom to their record sales," stated George Bates, of the New York Postcard Album Manufacturing Co., 23 Lispenard street, New York, manufacturers of talking machine record albums.

"Our latest product consists of a handsome flexible cover arranged to hold the Victor or Columbia six-months' record catalog, and one monthly supplement if desired. This cover is artistic in its appearance, being bound in mahogany colored imitation leather and lined with black silk cloth. The catalogs are placed in the cover by means of an adjustable cord which permits of easy and quick insertion. The cover being flexible, is convenient to a degree, forming a permanent reminder of the record catalog inclosed, and the dealer's name thereon will naturally mean increased record sales.

"In my travels around the country, many dealers have often expressed the thought that the handsome record catalogs issued regularly by the companies are not properly handled by their clients. As the catalogs are only made of paper, it is but natural that they should soon tear or curl up, and not presenting the artistic appearance so desirable in a music room, are soon hidden out of sight. These dealers felt certain that something should be designed that would permit of the inclosing of the record catalog in an attractive flexible cover, which the talking machine owner would always keep near at hand, instead of placing it in some drawer or out of the way place, as is the case with the present paper-covered catalog after it has been in use a short while.

"Working along these lines we experimented for some time until we arrived at the decision that a catalog cover that would be really successful must not be bulky or ugly, but contain only two strings, one for the regular catalog and the other for one monthly supplement if desired. Our new cover is the result of our experimenting.

"We have arranged to print the dealer's name on the face of the cover in gilt in lots of 100 and more, thereby making the cover a permanent ad-

vertisement when placed in the hands of his clients. The price of the cover has been placed so low that dealers will find it profitable to give one away with the first record catalog given to a client, or if they desire they may charge a nominal sum for the cover either on the first distribution or when the customer desires more than one cover. These are all details which the dealer can arrange in the way which will give him the most profit and advantageous publicity. Advance orders indicate the success of our new cover, as it forms a useful souvenir and a permanent advertisement."

WHEN "NEXT" IS A PLEASANT WORD.

Barbers and Bootblacks Appreciating Value of the Talking Machine in Keeping Their Overflow of Customers in Good Humor.

The Italian has long been a strong devotee to the talking machine as a means for his own entertainment and as affording him an opportunity to listen to his favorite operas in his home, no matter how humble, and at his own convenience. He has also discovered that the talking machine is an excellent business partner under certain conditions, and recently in many sections of the country "talkers" with a plentiful supply of records have been found in barber shops and bootblack parlors. The man who is being shaved or having his boots blacked or is waiting his turn to receive the attention of the "artist" in charge is not likely to lose patience over the delay if he is able to enjoy music during the wait.

SELECTED AS OFFICIAL MACHINE.

Dictaphone Installed in Offices of Panama-Pacific International Exposition for Use of Officials in Various Departments—Many Machines Required.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., February 9.—As announced in The World two months ago, the Dictaphone has been installed as the official dictating machine of the Panama-Pacific International Exposition, and many of these machines are now in use in the various departments, we understand.

It is planned to secure for permanent record speeches delivered by Commissioners and distinguished visitors to the Exposition. This will be done by having them dictate their speeches or messages on a cylinder, which will be kept, and later made a part of the Columbia Graphophone Co.'s exhibit at the Exposition.

W. S. Gray, Pacific Coast manager of the Columbia Graphophone Co., declares that the exhibit of graphophone and dictaphones in the Palace of Liberal Arts, will be a remarkable one.

DEMAND FOR DANCING RECORDS ALSO HITS DETROIT.

Incident in Store of Columbia Co. Indicates That the Craze Hits All Classes—Machine Sales Keep Up Well—Salesmen Enrolled in Efficiency Course of Board of Commerce—Piano Houses Find Profit in Talking Machines—Other Interesting News of Past Month.

(Special to The Talking Machine World.)

DETROIT, MICH., February 9.—The correspondent of the Talking Machine World stopped and took a second look as he entered the Columbia branch store the other day for his usual confab with Manager K. M. Johns. Skipping about the floor with all the abandon of a primary grade school girl, was a fashionably attired man, apparently having the time of his life, but nevertheless, as sober-faced as a magistrate in a murder case. The cause of his skipping was a hesitation waltz record, being played by City Sales Manager S. E. Lind, who also was impersonating, facially, an owl. Following the music painstakingly, missing not a step, and apparently fearful of being interfered with, the dancer persisted until the record was finished. Then he spoke up briskly: "I'll take that one. And I think that'll make enough, for this time."

After he went out Mr. Lind explained: "He's the head of a dancing academy, William J. Garand, selecting a new orchestra for this month. In the past few months we have sold a good many grafonolas to parties who wanted them for dancing in their homes, but not until a few weeks ago did we sell one to take the place of the orchestra in a dancing academy.

"He wasn't dancing in here just to be gay, but to ascertain if the tempo of the record was right throughout. He tries every record he buys in that way. They must be a pretty good lot of records, for he never has turned one down."

The sale of records is the feature of the talking machine business in Detroit just now. It is so tremendous that it makes the sale of the machines a matter of secondary consideration. The dealers are generally agreed that the wonderful stimulus is the craze for dancing. It was a craze two or three months ago, as mentioned in this correspondence at the time, but it has become more pronounced every week. Perhaps three-fourths of the records sold are dance records, mostly hesitation, one-step and tango. As the business in the other classes of records has not diminished, some idea of the general increase can be had.

The sales of machines have not slumped, however. "As a matter of fact," said Harry Rupp, manager of the talking machine department of Grinnell Bros, "the late highly prized holiday trade turns out to have been but an incident. If it were not for the calendars we might think that January and February were the holiday months. A year ago January and February were almost as good as December, and this year we have double the space and all the rooms are occupied most of the time. For Christmas we sold a lot of machines, which created a tremendous demand for records, and the records, heard by friends of the owners, creates a demand for more machines. The consequence is that we are short of records, and I

guess everybody else is in the same position."

Out in the State conditions are largely similar. Piano houses who took on talking machines a few years ago just as a little side line, are now handling them on equal terms with the pianos, if not actually as the leaders. They are attractive because sales are easier made at the lower prices, and the money is turned over more quickly.

The J. L. Hudson Co. will soon make alterations in its talking machine department, which will almost double the space devoted to it. Another row of demonstrating rooms will be built and the number of record cases will be about tripled. A complete catalogue of Victor and Columbia records will be carried hereafter.

Manager E. K. Andrew, of the talking machine department of the Hudson Co., recently duplicated S. E. Lind's feat of selling a Columbia to a dancing academy owner. Another notable sale by him was a \$200 Victrola to William B. Thompson, twice mayor of the city, and one of the best known among Detroit's business men. A. J. Fedewa, one of the company's talking machine salesmen, who has been ill since last May, returned to his work February 1.

The talking machine salesmen are all participating in the "Efficiency Course" of the Detroit Board of Commerce. This is a series of lectures by prominent business and professional men, on the various features of commercial life, salesmanship being a strong leader. Most of the companies pay the attendance fees for their salesmen, considering it a good investment.

All sections of the city are now well covered with talking machine stores. Detroit's suburban business is spread out over a wide area, and the talking machine jobbers have looked up every cluster of business houses worth while, and have established an agency in the neighborhood. All these stores begin with the talkers as a side line, but most of them, in the course of a year, find that it is more profitable to make the talking machine business the mainstay, and carry the other things as side lines.

"The situation resembles the automobile situation a good deal," said one of the jobbers. "People are just finding out that they are able to have something which they want very much. Perhaps there are a couple of million families in the country that have talking machines. They represent ten million of our hundred million population. Of the other ninety million, count out about twenty million as unable to buy a machine, and that leaves us about seventy million prospects, all getting ripe fast. That is why we do not consider what seems to be a phenomenal trade now, as phenomenal at all, but only what we ought to expect, and which we have every reason to expect will be doubled in a year from now."

The talking machine business is attracting some

of the best piano houses which hitherto have not designed to consider this line of the musical trade. J. Henry Ling, head of the oldest piano house in the city, stated recently that he was seriously considering closing out one of his piano departments and substituting talking machines in its stead.

"I have practically determined on this course," he said. "I want to make one little inquiry to satisfy myself on a certain point, and I am going East soon to do it. Talking machines are becoming one of the biggest forces in the music trades, and affairs have reached a stage that makes it bad policy for a piano dealer to ignore them longer."

EMPLOYEES' ASSOCIATION A SUCCESS.

The Victor Co-operative Beneficial Association Makes Excellent Record During First Few Months—An Example of Victor Co. Generosity—Big Increase in Membership.

The manner in which the Victor Talking Machine Co., of Camden, N. J., has the interests of its thousands of employes at heart is indicated by the first report of the Victor Co-operative Beneficial Association, covering the period from its organization, on April 15 of last year, to December 31, and the best proof of the success of the new venture and its appreciation by the employes of the company is found in the fact that the membership in the association, commencing at 1,647, during the first weeks following the organization, rapidly increased until at the end of December there were 4,210 employes enrolled.

Since the launching of the association, the Victor Co., as per its agreement with its employes, has contributed to the treasury, dollar for dollar in proportion, the amount paid by the employes up to December 31 being \$8,359.50, and by the company an equal amount. With accrued interest the amount raised last year for the association was nearly \$17,000, all of which was devoted exclusively to requirements of the association, the Victor Co. paying all the operating expenses of the association, which amounted to nearly \$2,000.

In less than nine months the association paid to 208 sick members, benefits totaling \$5,861.75, and paid death benefits aggregating \$900 for six members, leaving nearly \$10,000 in available funds in the treasury. All cases of sickness are carefully investigated by the proper officer of the association and when any doubt exists as to the right of the member to receive benefits, the matter is placed before the trustees. Where possible the member is given the benefit of any doubt that may exist.

All concerned acknowledge the Victor Co-operative Beneficial Association as a powerful factor in cementing the cordial relations existing between the Victor Co. and its employes.

The officers of the association appointed for 1914 are: Trustees—A. W. Atkinson, I. F. Burton, C. S. Wickes, E. T. Kieffer, E. K. Smith, W. B. Fulghum; president, R. L. Freeman; vice-president, E. F. Haines; treasurer, G. W. Jagers; secretary, E. K. MacEwan; visiting secretary, M. W. H. Holden.

STOCK SHORTAGE CHIEF TROUBLE IN NEW YORK CITY

Local Dealers and Jobbers, However, Losing Few Actual Sales for Machines and Records—Dance Craze Leaves Mark in Heavy Record Demand—Some Lively Advertising Campaigns Help Business—What Some of the Prominent Local Houses Have to Report.

A shortage of both machines and records of the most popular types has been the most important feature of the local talking machine trade the past month. Shortage of product around the holiday season is expected, but the prosperity of the talking machine industry as a whole is well evidenced by the continued demand that has existed for machines of the more popular prices, and records of practically every type. Although the shortage has not been so marked that the dealers have been forced to lose many sales as a result, at the same time the jobbers and dealers are unanimous in stating that they could easily handle considerably more machines and records than are now being turned out by the factories.

General business conditions the past month have been very satisfactory from every standpoint. Trade has kept up remarkably well and, what is more important, collections have been excellent. There is no doubt in the minds of the members of the local trade but that 1914 will be the banner year in the history of the talking machine industry, and this optimistic prediction is verified by the reports of the factories, which proclaim the month just ended as the best January they ever experienced. The jobbers and dealers throughout the country were responsible, of course, for this record-breaking business, and New York and vicinity have certainly shared in this general prosperity.

Dancing Craze in Full Blast.

The dance craze continuing at full blast, it was to be expected that the demand for dance records would be correspondingly heavy, and in view of this expectation the majority of the dealers naturally ordered what they considered exceptionally large quantities of this class of records. To their great surprise, however, their stocks in most instances fell far below the demand and they are finding themselves in the position of reordering records which they expected would be in stock for at least the next two or three months. The country-wide popularity of the modern dances is beyond adequate explanation, but the talking machine dealers are not trying to solve it, as they are finding it sufficiently difficult to take care of the trade that this dance craze has created.

The Victor and Columbia factories are working to full capacity to turn out enough of the popular priced machines to take care of the needs of the trade, while the Edison disc factory cannot supply its dealers with sufficient stock in the machines retailing at \$150 and over. All three companies are behind in their record shipments, but are doing their utmost to catch up with their trade.

Steady Advertising Campaign.

A steady advertising campaign in the local newspapers has been carried on by the trade during the past month, and the talking machine advertisers, taken collectively, have probably used as much space within the past few weeks as many of the merchandise fields that far outranked them in earlier years. The advertising is well conceived and impressively worded, many of the separate advertisements utilizing educational selling arguments as well as straight-from-the-shoulder "reason-why copy."

A Talking Machine Block.

With the opening of the new store of Landay Bros., at 427 Fifth avenue, there will be presented the spectacle of two Victrola stores and one Edison disc establishment on the same street, and within two doors of each other. This condition is common in several other large cities, but this will be the first instance in New York of three talking machine stores and departments being situated on one of New York's business streets. The new Lord & Taylor store, which will open next week, is located on Fifth avenue, between Thirty-eighth and Thirty-ninth streets, directly opposite the new Landay store, and will have a handsome Victrola department, equipped with about ten sound-proof demonstration rooms. At 433 Fifth avenue, New

York, a few doors north, is the beautiful home of Hardman, Peck & Co., the prominent piano house, which recently opened an Edison disc department on the fifth floor of its building. There is doubtless plenty of business for all three stores on this one street, as with the opening of the Lord & Taylor store this particular location will be traversed by thousands of shoppers who concentrate their purchases on the highest class of goods and pay cash almost invariably.

High-Priced Machines in Demand.

"We are more than satisfied with the success of our Edison disc warerooms," stated Ashley B. Cohn, vice-president of Hardman, Peck & Co., 433 Fifth avenue. "Our clientele has always been an essentially high-class one and in establishing our Edison disc department we placed before them a line of phonographs and records which appealed to their love for the beautiful and the best. Practically all of our sales of Edison phonographs have been confined to the types selling at \$150 and over, and we find that our patrons are sufficiently impressed by the musical and artistic qualities of the Edison disc product to order the more expensive machines in preference to the cheaper ones. We have heard nothing but praise for the Edison disc record, which, many of our visitors have stated, is the acme of musical perfection in a disc record."

Record Demand Is General.

"No, the dance record is not the only class of record that is selling particularly well," answered V. M. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, Victor distributor, in response to a recent inquiry. "The present record demand is far from being confined to any one type of record, but, on the contrary, embraces practically every class of record in the Victor catalog. Take, for instance, this red seal, light classic record sung by John McCormack. During the past ten days we have sold more of this one number than we did in the entire month of October last year. Bear in mind also that October is the time of the year when dealers are popularly supposed to be stocking up for the holiday trade, while January and February constitute a straight sales business. On another light classic record we sold twice as many in January as we did in November last year at the height of the holiday trade. We are very short of machines of certain types, and with our shortage in records, I need hardly state that we are busy—in fact enjoying the best February in our history."

Columbia Trade Very Active.

"We cannot get enough of many of our new machines," states R. F. Bolton, manager of the Columbia Graphophone Co.'s wholesale and retail store at 89 Chambers street. "Our stock is practically exhausted on the following machines: 'Leader,' at \$75; 'New Mignonette,' at \$100; 'Nonpareil,' at \$150, and 'De Luxe,' at \$200. All our dealers report a demand for these machines that is simply remarkable, and it is certainly a tribute to Columbia quality to note the complete satisfaction that our machines and records are giving. We opened a number of new accounts during the past few weeks that give promise of closing an excellent all-the-year-round business, and everything in general points to 1914 as the banner year for our institution."

January Beyond Expectations.

"January business was beyond all our expectations," states Dana F. Parkhurst, manager of the Edison department of the Tower Manufacturing and Novelty Co., 326 Broadway. "We are adding new names to our list of clients day after day, and with our location in the heart of the business district we are in a position, of course, to make an impressive appeal to the downtown business man. This has helped our business considerably, as, in addition, this class of trade has no use for a low-priced machine and very seldom think of purchasing a machine for less than \$100. The Edison disc

machine retailing at \$150 is our big seller and is gaining in popularity rapidly."

Landay Bros. New Store.

"When our new store is completed we will have one of the finest Victor shops in the country," recently remarked Max Landay, of Landay Bros., the prominent Victor distributors, with four stores in the best shopping districts in the city and a new one at 427 Fifth avenue now in course of construction. "We expect to be open for business about the 1st of next month and are leaving no stone unturned to make this new store distinctive and artistic to a degree. We are using a new process for sound-proofing our eleven demonstration rooms that is guaranteed to shut out the slightest outside noise, and this all-important problem was only solved after lengthy experiment and considerable expense. The front of our new store will be absolutely original, consisting of an illuminated glass front that has never been shown in this city, and, as far as I can learn, will be the first one of its kind constructed in this country. All our decorations and furnishings will be dignified and refined to a degree."

Difficult to Get Enough Records.

"We simply cannot get enough records to handle the demands of our patrons," stated Hayward Cleveland, manager of the Twenty-third street store of the Columbia Graphophone Co. "From our operative selections down to our dance records, we are behind in filling our orders, and the true musical value of Columbia records is becoming more and more appreciated by music lovers in all parts of the city."

Blackman's Satisfactory Business.

The Blackman Talking Machine Co., 97 Chambers street, Victor and Edison cylinder jobber, is closing a steady, satisfactory business in both its lines, as indicated by President Blackman's cheery report: "The month of January showed a substantial increase over the corresponding month of last year and February business to date is equally as good. Victor records and certain types of Victrolas cannot be supplied to our trade in sufficient quantities, which fact certainly seems to indicate a general prosperity in the Victor business that is very gratifying."

What Others Say.

"We are gaining new customers for our piano warerooms every month through the medium of our Columbia department," is the pleasing report of F. G. Smith, the prominent piano house, 142 Fifth avenue. "We are convinced that the Columbia division of our business has not only proven successful on its own account, but has also helped our piano and player business."

"All our twelve booths are filled during the greater part of the day," states Miss Ruby Spaulding, manager of the Victrola department of the Aeolian Co., 29 West Forty-second street. "Last month was the best January in our history and the outlook is very encouraging."

Other optimistic reports were received by The World's representative from the following: Benj. Switky (Victor), Krakauer Piano Co. (Edison disc); Fuller, Bagley & Beers (Columbia), Bremer Co. (Victor), Guy Warner (Edison disc), F. G. Smith, Brooklyn (Columbia).

F. K. DOLBEER IN SEATTLE.

Sales Manager for Thomas A. Edison, Inc., Attends Opening of Pacific Phonograph Co., Northwest, Edison Distributors in That City.

(Special to The Talking Machine World.)

SEATTLE, WASH., February 6.—F. K. Dolbeer, sales manager of Thomas A. Edison, Inc., was recently in the city in connection with the establishment of the Pacific Phonograph Co., Northwest, which will be distributors of the new Edison disc line of the machines and records. A. R. Pommer, of Los Angeles, is interested in the company. C. O. Baker will be the resident manager.

INCREASES CAPITAL STOCK.

The North Chicago Talking Machine Co., Chicago, increased its capital stock recently from \$1,000 to \$6,000.

EDISON'S Supreme Triumph

A Sensational Success

After four years of constant labor, Thomas A. Edison has reached his great goal—**PERFECT REPRODUCTION OF SOUND.**

Everywhere the new instrument is shown public interest is aroused to such a high pitch that the stores of the Edison dealers are **crowded with people** who want to hear this new marvel of Edison's ingenuity and patience.

They Come—They Listen—They Wonder—They Buy

The tremendous sales made in Chicago during the past few months is absolute proof of a genuine interest in the New Edison.

The wonderfully perfect tone of this superb new instrument is just what the public has been waiting for.

No Needles—no scratching—no destruction of sound waves. The smooth, highly polished diamond key is exactly fitted to the groove and slides lightly without the slightest wear on the record.

Record stock does not become second hand by demonstrating.

Send the coupon to-day and get our special dealers' proposition.

The New ^{Diamond} Disc Edison

The new diamond reproducer—the new Edison double disc records—the perfect Edison motor—the automatic stop—the scientifically designed sound conveyer that has no leaks—the automatic oiling system—the new designs of cabinets—and what is more important—the perfect reproduction of sound, are brilliant selling points that make big sales.

AND REMEMBER: the new Edison can be made to play all makes of records (foreign or domestic), and play them as you have never heard them played before on any other instrument.

Service

Service is a much abused word. But our service is real service—prompt, efficient, intelligent. You get what you want when you want it.

Advertising Aids

You get the full benefit of our strong advertising service plan. It will help you to make quick sales and big profits. Learn about it.

Send this Coupon To-day

It brings you full information about the special proposition to new Edison dealers. Edison wants the liveliest man in every locality. He is not going to be satisfied with anyone else. Get the details of the special advertising plan that will assist every Edison Dealer to make money.

Lyon & Healy

FIBRE NEEDLE CUTTER

EXACT
SIZE

The wonderful success of the Lyon & Healy Fibre Needle Cutter in the last two and a half years is due to the following facts about the cutter:

The Blades of the Lyon & Healy Fibre Needle Cutter are made of the finest grade of properly tempered tool steel. The upper blade is pivoted above and back of the cutting edge of the lower blade. It is held in place by a very high tensioned spring to insure correct leverage and a perfect point at every cutting.

The cutter is fitted with a guide that prevents the cutting away of too much of the needle, and also has a receptacle that receives all the waste. It is very simple and easy to operate, and with ordinary usage should last indefinitely without sharpening.

This cutter is invaluable to all users of the Fibre needle, as a needle may be used twelve to fifteen times where one of the cutters is in use.

Now is the time to get your order in and share in the profits.

TO THE
TRADE

FROM OUR CHICAGO HEADQUARTERS

CONSUMERS' BUILDING, 220 South State Street, E. P. VAN HARLINGEN, MANAGER.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 9.—The local talking machine trade was a bit startled recently when the Talking Machine Shops came out in liberal space in certain of the dailies and announced with characteristic enterprise that two of the best professional dancers in Chicago had been secured for the benefit of the patrons and friends of the Shops and that a series of afternoon tangos would be given.

The announcement continued as follows: "The dancers are Claude Wickham Kucker, former pupil of Maurice and of Cassell, who is said to be outdancing his teachers, and Miss Buckley, formerly a solo danseuse of the Chicago Grand Opera Ballet.

Between the dances the salespeople would canvass each of the audience, inquiring, "Are you enjoying the dancing? Are you interested in dancing yourself? Have you a Victrola? Have you any of the latest dance records? Would you like to be put upon our mailing list?" and so on, depending upon the answers given by the visitor.

The dancing of Miss Buckley and Mr. Kucker was most excellent and they received hearty applause from the spectators, who were entertained between the dances with some of the Red Seal records and others of the more "popular" class.

The result of the efforts of the salespeople and the favorable impression made by the dancers was made evident when the program had come to an

makes his home in Chicago, has made arrangements with talking machine dealers in other cities

The Chicago Office of The Talking Machine World has removed to new and larger quarters at 1024 Consumers' Building, 220 So. State Street.

whereby he and his partner will be taken away from their home city for some time.

How Mr. Easton Impressed Us.

Edward D. Easton, president of the Columbia Graphophone Co., was a recent visitor to Chicago and inspected the fine new Michigan avenue quarters of the Chicago branch, which he pronounced very good. Mr. Easton directs the destinies of a big corporation, but he is a man whom it is a distinct pleasure to meet. Courteous and kindly he is, and one feels a warmth in the region of his heart long after having come in contact with him. Somehow one loses any daily newspaper inculcated prejudice against big business when its representatives are men like the Columbia's president.

As the above paragraph lay on the desk of The World, a clipping containing a report of an address made by the manager of one of the big State street department stores at a meeting of its buyers, general salesmen and assistants. It seems to work in nicely with a reference to a man of Mr. Easton's ability and personality, vide this:

"Devotion to duty leads inevitably to a mastery of all of the intricate demands of any position. The man who is sufficiently engrossed in his duties, to become master of his position, cannot help but compel his employer's consideration for his success, providing the latter is of the right type. The big, broad-minded virile man of the hour, and only such men can succeed to-day."

Boss the "Talker" Business, Too?

Oh, yes, we escorted our wives and our sweethearts to the registration polls last week, and dreamed dreams of the coming age when the feminine contingent will run politics and Government literature, science and art, boss the trade papers, chase news items and hustle for the festive advertisement. Vive la femme!

(Continued on page 40.)

Tango Dancing at the Talking Machine Shops.

They will dance the tango, the maxixe and the hesitation to Victrola accompaniment. The object of these afternoon dances, of course, is to assist the thousands of people who own a Victrola in making use of it as an orchestra for these new steps. And undoubtedly many delightful home parties will be the result of this innovation."

Did the scheme work? It certainly did. People came by the scores and the average daily attendance for the week was in the neighborhood of 250 persons, with dozens turned away for lack of space to hold them.

Our illustration shows only one corner of the big room. From every side the crowd looked on and also carried chairs into the record rooms, where they could stand on them and look over the heads of those in front.

end, for the crowd lingered for some time and, breaking up into little groups, entered the demonstration booths, there to buy records or perhaps a machine.

"While the direct results and sales of machines are alone sufficient to warrant the expense," said G. W. Davidson, "the most pleasing part is the large number of record customers we are making. In a city of this size the general advertising effect is very beneficial and we are making regular patrons of people who before were hardly aware of our location and our facilities for serving them. I am very much pleased with the way things are going and we are re-engaging the dancers for the coming week."

The success of the novelty has evidently made itself known in other cities, for Mr. Kucker, who

The Practical Fibre Needle Cutter—THE WADE

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone.

The WADE cutters are made of the best steel and are absolutely guaranteed.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 39).

Rename Station Healy.

Officials of the Chicago, Milwaukee & St. Paul Railway have decided to rename the station called Pennock, to Healy, in view of the fact that the new factories of Lyon & Healy are within a stone's throw of the station, and the most important feature of the neighborhood. Already there is a vast change in the little suburban neighborhood, and it is quite evident that the big new buildings of the famous music house have started a boom very profitable to real estate owners in the vicinity.

A remarkably good business has favored the Lyon & Healy retail store the past month and all records for January sales have been broken. Steinway pianos and Victrolas have been especially well favored. The Clark Irish harps have also been much favored in the wholesale as well as the retail departments.

Good for Record Shipments.

The Interstate Commerce Commission rates on express shipments within the State became effective February 1 by an order issued by the new Illinois Public Utilities Commission. By this order the old mileage system of computing rates is substituted for the direct distance system. It means a cut in rates, especially on long distance shipments in Illinois.

Uhl Gets Committee Appointment.

E. H. Uhl, manager of the Chicago house of the Rudolph Wurlitzer Co., has been elected to serve on the subdivisional committee representing musical instruments and musical interests of the Association of Commerce. E. C. Barnes, whose place on the committee Mr. Uhl takes, has been transferred to the office appliance committee on his own request. Mr. Barnes, who is the Chicago representative of the Edison dictation machine, thought that he should be classified as a piece of office equipment rather than a musical instrument.

Turns Back to Go Forward.

B. C. Wilt, formerly a Wisconsin traveler for the Talking Machine Co., who a year ago resigned to go into another line of business, has returned to the company's service, and will represent the company in Iowa and Illinois. Mr. Wilt's former work with the Talking Machine Co. was of the most successful nature, and the trade will be glad to know that he is back in his old environment.

Columbia Expansion in Elgin.

The Kimball-Dietrich Hardware Co., Elgin, Ill., which has been handling Columbia goods for some little time, is preparing to enlarge its operations, and this week has placed a \$2,000 order with E. O. Zerkle, the Wisconsin traveler for the Chicago office of the Columbia Graphophone Co., and who ran down to Chicago and then shot out via the Aurora and Elgin Electric to fix up the order.

The Kimball-Dietrich Co. has taken the entire second floor of its building for what will be known as the Columbia Music Store, which will occupy a space of 41 x 50 feet. A large part of the space will be taken up by handsome booths for the graphophone business and the rest of it will be used by Herman Bohnenstengle, well-known musician of Elgin, who has also had a sheet music and small goods department in the store of the Bower Jewelry Co.

Mr. Bohnenstengle will put in a line of the well-known Bush & Lane pianos, handle sheet music and musical merchandise on his own account, and will also manage the graphophone department for the Kimball-Dietrich Co.

Mr. Dietrich, who placed the order, is a progressive young man, who is thoroughly alive to the possibilities in the talking machine business.

T. M. Pointers for Dealers.

One of our largest customers keeps track of just where each sale comes from. When a sale is made, he asks the customer: "Would you mind telling me just why you came to buy your machine here?"—explaining to him that he would like to know how his advertising and circular work are pulling.

"He found 84 per cent. of his sales originated by old customers—satisfied customers—sending in their friends. Every time he found this to be so, he wrote the old customer and thanked him cordially, endeavoring to show his appreciation of

their interest in him. In many incidents you would be able to telephone the old customer and thank him. You know it is a fact the biggest asset in this business is satisfied customers and their good will."

The above is just a sample of the ammunition which the Talking Machine Co., of this city, is continually supplying its customers for their selling campaigns. It is from its circular letter of advice of February 21. Here is another cartridge from its bulletin of January 22:

"Capitalize the Dancing Craze.—An offer to loan a Victrola and a selection of dance records for a tango tea or turkey trot dance, has been productive of many a good sale. We have some excellent sample letters for mailing to just such prospects."

The company recently sent to its dealers a copy of one of the ideas developed by a Chicago advertising concern, and on which the dealers can get estimates through the Talking Machine Co. if he desires to adopt it to his own use. It consists of a cover for the monthly bulletins, to be sent to the retail customer. The cover is full of good Victor advertising matter, exploiting the individual dealer and also contains an approval record order, which can be torn off, stamped and sent to the dealer by the recipient. The write-up will be changed each month, appropriate to the new list and the color scheme will match the Victor supplement.

We Are.

Are we musical out here in the wild and woolly? Are we? The board of directors of the Chicago Grand Opera Co. desires to announce at this time the continuance of the opera for the coming year, and the permanence of the organization in its annual performances in Chicago * * * The board of directors is pleased to state that for the season just closing, the sale of season tickets for seats was considerably higher than during any previous year, indicating that the interest in grand opera in Chicago is not only surely and rapidly increasing, but is permanent. And the Mason & Hamlin was used and probably ever will be.

Moreover we have got one of the largest, if not the largest musical colleges in the world, all sorts of civic music plans are cooking and the new Chicago office of The Talking Machine World has fine mahogany-fixture quarters.

Baer on Biz.

C. F. Baer, manager of the Chicago office of the Columbia Graphophone Co., is very optimistic about business, past, present and prospective. The wholesale business of the Chicago office was way ahead of the corresponding month of last year. The record business, in fact, nearly doubled. The orders for the new 25 cent. demonstrating records are something phenomenal, and as a result the lists of users of Columbia records is being increased by hundreds.

When the Columbia moved over to Michigan avenue, many people predicted that the retail business would fall off. In fact, some of the Columbia contingent themselves had a few doubts on the subject, but Mr. Baer says that the unexpected has happened, and notwithstanding the disorganized condition of things incident to moving, the deterrent advertising of the erection of a new building near-by, the retail business is way ahead. If there has been any loss on the sale of the cheaper class of goods, it has been compensated for by the increase in the high-grade business. In the new location they are selling very few machines under \$75. Probably after the location becomes better known and people get rid of their timidity regarding Michigan Boulevard, more lower price business will come, but as it is, sales in dollars and cents, both in machines and records, is far ahead of the Wabash avenue store.

How Hath the Mighty Fallen.

The store formerly occupied by the Columbia Graphophone Co., corner of Wabash avenue and Washington street, now exhibits a giant fish, 30,000 pounds in weight, forty-five feet long, twenty-three feet in circumference, eight feet in diameter. Its mouth is thirty-eight inches wide and forty-three inches deep, and its tongue forty inches long. The

liver weighed 1,700 pounds. It is not a whale, but a fish, because it has gills. Earnest research has failed to find any relics of Jonah in the giant's inside, but archaeologists and ichthyological experts have their suspicions nevertheless. Some people say that this exhibition is almost a desecration of the quarters so long and honorably occupied by the Columbia Graphophone Co., but it must be remembered that the fish is dead, while the Columbia Co. in its new quarters on the automobile-crowded Michigan avenue is very much in the swim.

National Association Plans.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, returned a few days ago from the East. He visited the Victor factory at Camden, and reports that the record plant is working night and day with greatly increased capacity.

Mr. Wiswell stopped at Pittsburgh and had a conference with J. C. Roush, of the National Talking Machine Jobbers' Association regarding the arrangements for the coming convention at Atlantic City. It was decided that everything possible shall be done to avoid a bad taste in the members' mouths after the convention. In other words they will not sit around and wonder what it was all about. Plans are working for a program that will be constructive in its character so that the members will feel that they have learned something of benefit to them in their business.

A very strong effort will be made to have not only the department managers, but the owners and chief officers of the various jobbing concerns present at the convention.

This will have the effect, Mr. Wiswell and Mr. Roush believe, of making the heads of houses take the business more seriously and cultivate profound respect for the association and its accomplishment.

Along this line it may be stated that there is a probability of a surprise or two for the members in the way of the presence at the convention of dominant figures in the industry. It is very likely that there will be a meeting of the arrangements committee called for some time this month in Chicago.

Visitors and Personals.

H. C. Baish, recently of the talking machine department of Lyon & Healy, has returned to the Victor Talking Machine Co., from whence he came, and is covering Nebraska for them.

E. F. (Doc) O'Neill, of the wholesale department of the Victor Talking Machine Co., paid one of his angel visits within our pearly gates recently.

Thomas Butler, Wabash, Ind., was in buying machines and records.

Columbia Polyglot Department.

The Chicago office of the Columbia Graphophone Co. has installed a department for the marketing, both in wholesale and retail, of the Rosenthal language system for which the Columbia Co. makes the disc records. The German, French and Spanish courses are offered. The linguistic onslaught from the disc records is large in volume and clear in announcement, and evidently if the prospective tourists cannot parlez-vous, sprechen sie, or usted habla—as a result of his Rosenthal-Columbia disc lessons, he is hopeless.

R. G. Winter, who has for some time successfully conducted the campaign waged from the Chicago offices for the installation of Columbia graphophones in the public schools, is also in charge of the new language course department. He is working the two lines practically in unison and is getting mighty good results.

Absolutely!

A Chicago daily made the remark that the exports of canned goods from the United States reached an enormous figure last year, and that it didn't include canned music either. "We" might add that canned music decidedly *does* "count," nevertheless.

Visits Lakewood.

W. H. Sajewski made a trip to Lakewood, Mich., a short time ago to superintendent the work upon a large dancing pavilion that he is erecting there.

(Continued on page 42.)

The Biggest, Healthiest Growth in the Talking Machine Business

¶ Eight years ago a business small, and weakened by attempting a retail mail order business and half-hearted wholesale business.

¶ Then a re-organization—retail thrown out entirely. ALL EFFORTS CONCENTRATED ON A DISTRIBUTING BUSINESS.

¶ Since then a steady growth made possible by a definite effort to build up our business by building up that of our customers.

¶ Ours is a concern in which exists the strongest loyalty between employer and employee. The concern's employees have never worked FOR the Talking Machine Company—but WITH that concern.

¶ These facts—no doubt—have brought us to that point which makes us to-day the LARGEST EXCLUSIVE VICTOR WHOLE-SALER in the country.

¶ But—MR. DEALER—while these are days of wonderful successes in the Victor line—still through shortages we have had great disappointments.

¶ We are all MAKING MORE MONEY than we ever did before—but we see shortages which make us think how much more money we could have made—forgetting OUR WONDERFUL GAIN in spite of certain shortages.

¶ The Talking Machine Company is probably filling its orders more completely and with greater dispatch than others.

¶ TRY US.

¶ If we can't fill all of that order—the portion we do fill will make you forget your transportation charges wherever you are.

THE TALKING MACHINE COMPANY
12 N. Michigan Avenue Chicago, Ills.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 40).

Builds Demonstration Booths.

A. H. Dannemark, of Wilmette, has just completed three new demonstration booths, which add greatly to the attractiveness of his store. Mr. Dannemark is an enthusiastic Victor representative, and he also recently installed the new Edison disc.

New Dance Records Expected.

Dealers are anxiously awaiting the extra special dance records that are being issued by the Victor Co. Calls for the Tango, the Maxixe and the Hesitation continue unabated, and buyers of this class of records will find a good deal of pleasure in "Some Smoke" and "Leg o' Mutton" which are played by Europe's society orchestra, composed entirely of colored talent.

Secures Dean Agency.

James Lyons, 25 West Lake street, has secured the Western distributing agency for the John M. Dean "Puritone" needles.

Music for the Children.

Beginning last Saturday morning Lyon & Healy instituted a series of recitals for children in their recital hall, using the "Educational Series" of the Victor Co. Miss Elsa Stein was in charge of the selection of the records and talked to the children and visitors to the series were very much pleased with her efforts to instruct as well as to entertain the children, who ranged from six to fourteen years of age. Many beautiful standard works of musical art are thus presented to the children in such a way as will aid greatly the development of their young minds.

Orders Stock.

George Eichholz, one of the big dealers of Milwaukee, Wis., visited Lyon & Healy's recently to see about the replenishment of his stock.

New Lyon & Healy Traveler.

L. A. Cummings, formerly one of the star travelers of the Victor Co., is now traveling for Lyon & Healy, succeeding J. B. Ryde, who will come into the house to take charge of detail work in the wholesale sales department. Mr. Cummings will have Illinois for his territory as well as river towns in Iowa. He is well known to the trade generally, and will be welcomed by a number of friends.

Personals and Visitors.

Arnold Lockerby, who was formerly connected with a prominent talking machine company in Grand Rapids, Mich., and later in charge of the talking machine department at Hillman's, has returned to his home in Grand Rapids and has entered the furniture business.

Expert Decorator at Wurlitzers.

Ellis P. Hansen, formerly window dresser expert of the Victor Talking Machine Co., is now associated with the Rudolph Wurlitzer Co., and has in preparation many novel window displays, which attract the passer-by to the already busy talking machine department of that company.

Assistant Manager Fred Siemon reports that this January is far ahead of previous Januarys and that the record business is "really great." "The higher priced machines are certainly selling far more rapidly," said Mr. Siemon, and the \$100 and \$150 machines seem to be holding the center of the stage at the present time. This is as we would like to have it, and the buyers of the bigger machines are, of course, more liberal in their record purchases."

The New Manager.

Ella Lentz is the new manager of the talking machine department at Hillman's. Miss Lentz is an old employe at Hillman's and received her knowledge of the business while in the employ of that company.

Selling Large Edison Machines.

C. E. Goodwin, manager of The Phonograph Co., is wearing a broad grin these days, which is due to a great extent to the large volume of business which has followed the liberal advertising campaign which this company has recently launched. "The Edison has proved that high-priced machines are the ones that carry the profits with them. We are selling more of the \$250 machines than all of the other instruments put together.

This is profitable in more than one way and the customer who is in a position to buy such a machine is naturally better able to own a comprehensive library, and then again, there is no more effort nor no more time and fuss required to sell a \$250 instrument than a \$50 machine.

"There is still a shortage in the supply of records, although the completion of the new record factory at Orange has alleviated the unfavorable conditions. Although the supply is still inadequate, we have fared very well, and hope to be filling all orders before very long."

Installs Foreign Record Stock.

F. J. Bukowitz, manager of the talking machine department of the F. G. Smith Piano Co., has installed a comprehensive stock of foreign records. He has also arranged for the services of a linguist who can speak five of the foreign languages, including Polish and Croatian. Mr. Bukowitz has also arranged for agents in certain of the thickly populated foreign districts, and is already reaping a rich harvest of orders from these sources. January was exceptionally good at the F. G. Smith store, the total of Columbia records and machines reaching seven-eighths of the December business.

Double January Business.

Wade & Wade, manufacturers of the Wade fibre needle cutter, nearly doubled their business last month, as compared with the corresponding month

of 1913. The Wade cutter was handled by the majority of the jobbers of the country, and in the last few weeks quite a few of the remaining ones came into line. The further additions to the equipment of the firm's up-to-date factory are being made.

Talking Machine Co. Sales.

January was one of the best first months in the history of the Talking Machine Co., both in the sale of machines and records. The business on the latter was something enormous. Sales Manager R. J. Keith called attention to the very large number of responsible merchants who had recently made application for the Victor line, but who had not been signed up on account of the shortage in Victor goods, or because the line was already well represented in their locality. A large stack of letters of inquiry that were temporarily held up for the reasons above stated was shown the caller.

Mercer With Columbia Co.

J. P. Mercer has joined the Chicago branch of the Columbia Graphophone Co. as assistant to Manager Ryers of the retail department. Mr. Mercer is an old piano man, and many years ago was the Steinway agent at Dayton, O. He also handled talking machines in those days, and tells interesting stories of his experiences with the first Edison phonograph of the old barrel tin foil type.

A BEAUTIFUL PRESENT.

Something About That Leather-Bound Order Book Given by the Talking Machine Co. to Its Dealers and What the Latter Think About It—Should Act as Spur to Recipients.

(Special to The Talking Machine World.)

CHICAGO, ILL., February 9.—Brief reference was made in the January World to the handsome order books which were sent by the Talking Machine Co., Victor jobbers of this city, to their dealers. A photographic reproduction of the cover of the book is presented in this connection.

It is extremely artistic, bound in gray flexible

Cover of Talking Machine Co. Order Book.

leather cover and lined on the inside with moire silk. The order pad, which is removable, contains twenty-five order blanks in triplicate, with a place for the carbon in the back of the book. The additional order pads can be obtained from the company upon application as required. As will be seen, the Victor trade-mark and the name of the Talking Machine Co. form integral parts of the embossed design. The World was given the privilege of running over some of the acknowledgements written to the Talking Machine Co. by pleased recipients. They are of interest not simply because of the kind words said about the order book, but owing to the evidence of its hearty spirit of co-operation between enterprising dealers and vigorous, up-to-date wholesale houses with a particularly high reputation for the excellence of its service. Here are extracts from some of the letters:

"We want to thank you for the beautiful leather-bound order book which you sent us for Christmas. It will be an inspiration to keep our orders in better shape than ever before, and we must say

that you remembered your customers in fine shape."

"Your 'order blank cover' and greetings received, for which please accept our thanks and good wishes for your success in the future, especially during the new year, that of 1914."

"Please accept my cordial thanks for the very beautiful order book cover. Hope to be able to send you many orders from it during the coming year."

"Please accept my thanks for the lovely leather cover sent with the season's greetings."

"Enclosed please find acknowledgement of receipt of your Christmas gift. It you will give the acknowledgement as quick attention as I have the gift, the service will be O. K."

"We wish to thank you for the fine leather-covered order book, which we expect to use quite extensively."

"The cover is artistic and 'classy,' to say the least."

"It is a beautiful piece of work, and we shall make it useful as well as ornamental."

"Very 'swell' book, thank you."

"We are in receipt of your order book of recent date, for which accept our thanks. We trust our business for the coming year will be of such volume that we will have use for it many times."

"It is very neat and artistic in design. Wishing you a happy and prosperous new year—"

"Accept our sincere thanks for the fine order book you sent us. Hope we can fill out all the order sheets for records and machines."

"We beg to acknowledge receipt of your exceptionally attractive and practical order sheet booklet, and with reciprocation of your good wishes, we remain—"

"Thanks very much for the leather cover—its a fancy."

"We are having a great Christmas business and wish to thank you for your promptness in filling our orders. Your Christmas present of an order book cover was received yesterday. Thank you for remembering us."

"We desire to thank you for the order book sent us. Wishing you a prosperous new year, we remain—"

"Both the Victor and Edison Companies are giving recognition at last to Boston song composers," declared a member of one of the Boston companies. "Compositions of several of these are now to be had on cylinder and disc, among them the pieces of Leo Feist, Tommy Allen, through their manager, Billy Lang, and these are now on the market. 'Chick' Story is another who will get good representation next month."

Have you investigated the margin of your profit on Columbia 65c. double disc records? You should.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

REPORT SHORTAGE OF STOCK IN MILWAUKEE TRADE.

Jobbers for Leading Lines Say They Are Meeting with Brisk Demand for Machines and Records, but Find It Difficult to Fill Orders Owing to Shortage—Many Changes and Enlargements in the Leading Stores to Meet Expanding Business—The News in Brief.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., February 10.—The only question that is troubling talking machine jobbers and dealers all over Wisconsin is the shortage of machines at the present time. Jobbers for all the leading lines say that they are meeting with a brisk demand from retailers for machines and records, but that they are finding it difficult to fill orders because of the inability of the factories to turn out the goods fast enough. Dealers in Milwaukee and about the State met with a big holiday business and stocks were reduced to a low stage in most lines. Jobbers are looking for a good business for the next few months, as they realize that it is going to take some time for dealers to get their stocks back in normal condition.

Business Shows Improvement.

Prospects for the coming year are much brighter at this time than they were a month ago. General business in Milwaukee and about the State has shown decided improvement, and this has reacted favorably upon the talking machine trade. Most of the large, heavy machinery manufacturing concerns in Milwaukee are increasing their working forces and are again operating on almost full time. Money is somewhat easier and confidence is more widespread. Collections have been improving since the first of the year.

The demand for the higher priced machines is still strong, but the sale of cheaper machines is increasing, now that industrial conditions are resuming a normal stage and people have work once more.

Finds It Hard to Get Stock.

"Dealers all over the State have been ordering freely since the middle of January," said Harry T. Fitzpatrick, general manager of the Wisconsin Talking Machine Co., jobbers for the Victor line. "The only trouble is that we are finding it hard to get enough stock from the factory to meet the demands of the trade. The Victor Co. seems to be rushed and is finding it impossible to turn out the goods fast enough. We have secured a large number of new Victor dealers about the State since the opening of the new year. The prospects for 1914 are unusually bright and we are con-

fidant that business will attain a new high mark." **McGreal for Congress.**

Lawrence McGreal, sheriff of Milwaukee County, for many years a prominent talking machine jobber of Milwaukee and a former president of the National Association of Talking Machine Jobbers, will be a candidate for Congress from the fifth Congressional district on the Democratic ticket. Mr. McGreal will make the formal announcement of his candidacy within the near future.

Gain of More Than 23 Per Cent.

L. C. Parker, enterprising manager of the Victor department at Gimbel Bros.'s Milwaukee store, experienced a gain of more than 23 per cent. in the business received during 1913. Business during January made a new high gain of 47 per cent. Victor machines have been sold to several more of the public schools by Mr. Parker and his sales force.

To Double "Talker" Department.

Before the coming fall season there will be a big change made in the Victor talking machine department at the Boston store, steps having already been taken for doubling the size of the department. Manager C. W. Abbott has felt for some time that even greater possibilities in the way of increased trade might be attained if larger space and better facilities were to be provided. Manager Abbott has added a new outside salesman, F. W. Holtz, who is spending most of his time in calling upon the city trade in Milwaukee. The Victor business at the Boston store during January showed a gain of 50 per cent. over the corresponding month a year ago.

May Sue the Creditors.

The First Savings & Trust Co., of Milwaukee, trustee in the case of the bankrupt Heller Piano Co., is considering the advisability of bringing a preference suit against certain creditors of the concern, on the grounds that unfair tactics were followed in securing an early settlement on certain claims. The Heller concern carried the Victor line of machines.

High-Priced Goods in Demand.

Paul A. Seeger, manager of the Victor depart-

ment at the Edmund Gram Music House, has been meeting with an unusually fine demand for high priced Victrolas of late. The Victor business with the Gram house is more than double what it was a year ago.

Making Attractive Window Display.

The J. B. Bradford Piano Co., Milwaukee's oldest piano house, which now maintains a highly successful Victor department, has been featuring the Victor goods in window displays and in its daily newspaper advertising with exceptionally good results. The salesmen in the piano department all lend their aid to the Victor end of the business, and these men bring in many good sales in connection with their visits to piano prospects.

Big January Gain.

The Columbia business at the downtown store of A. K. Kunde, 516 Grand avenue, Columbia jobber and retailer, is said to be the best in the history of the establishment. Business during January showed a gain of 60 to 70 per cent. over the same month in 1913. J. H. Ellis, the inventor of the "Real Tone" diaphragm, who is now the manager of Mr. Kunde's new branch store at 3410 North avenue, is confined in the hospital at this writing suffering from a severe attack of pneumonia.

Business Is Steadily Expanding.

The Gensch-Smith Co., operating an exclusive Victor retail store at 730 Grand avenue, met with a business during January which was more than double that received during the same period a year ago. Two new outside salesmen to cover Milwaukee and Milwaukee County were secured last month, but Mr. Gensch says that he is seriously considering the advisability of making other additions to his sales force.

How the Automobile Helps.

Henry Saak, proprietor of an exclusive Columbia store at 1602 Vliet street, has been meeting with an exceptionally fine business in Columbia machines and records. Mr. Saak uses an automobile to a good advantage in "rounding up" his sales.

EDISON PREPARES TO GO SOUTH.

Thomas A. Edison shipped on Monday chemicals and other paraphernalia to his winter home at Fort Meyer, Fla., where he is having his laboratory renovated and made larger. He celebrated his sixty-seventh birthday on February 11, and on February 21 will leave with his family for his Southern home.

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

THE CREDIT PROBLEM

Between Talking Machine Jobber and Dealer
Discussed by Louis Buehn, of Philadelphia,
in the Edison Phonograph Monthly.

The credit feature of every business is one that is most important, as many careers have been wrecked by the granting of credits too liberally, particularly to small merchants who did not have the right conception of business, and who brought about losses to the grantor of credit.

It has always been my aim to safeguard the credit situation, in so far as I was personally concerned, by never failing to ask for remittances when an account became due, and to politely but firmly insist upon settlement when the account was past due.

This condition, of course, was largely brought about in the beginning by necessity, but the rule has been so satisfactory that I have continued the practise up to the present day, although liberality also is part of my creed when the condition or situation warrants it.

Many dealers are prone to think that the principal item of consideration in the granting of credit is the amount involved, but in this they are mistaken, for the reason that any jobber will grant any amount of credit to any dealer provided he discounts his bills or pays them promptly on the terms agreed, but should a man owe an amount of money, even though very small, and exceeds the terms agreed upon, the jobber will rightfully refuse to extend an additional amount of credit.

It should be the aim of every dealer to discount his bills, for until he is in position to do this, he is not taking full advantage of the possibilities of the business, and not getting everything out of it to which he is entitled. It should be the jobber's aim to help the dealer realize this condition and the writer has always tried to lend the necessary assistance through advice and the proper extension of credit accommodations to bring this condition about.

It has been my good fortune to see a number of dealers brought from a slow paying basis to dis-

counters and there has always been a feeling of satisfaction on my part of having been partially instrumental in bringing this condition about.

The dealer should not abuse his credit by asking unreasonable things, for by so doing he not only brings down upon himself the condemnation of the jobber, but will usually bring upon himself in time a condition which will mean the giving up his right of dealership. In like manner the jobber should be careful in the extension of credit not to make the terms burdensome or irksome. He should grant credit intelligently and give every dealer all the help possible and should act generally as a constructive force for the good of the entire business.

BUSINESS OUTLOOK PLEASES.

H. L. Willson, assistant general manager of the Columbia Graphophone Co., returned recently from a short trip to the most important trade centers of the Middle West, and is pleased with the general business outlook. Mr. Willson discussed business conditions with a number of prominent financial and industrial men, and the consensus of opinion was decidedly encouraging. While in the West Mr. Willson closed arrangements for the leasing of a larger store at Toledo, to be located a few doors above the present one, and also renewed the other leases.

HOW CO-OPERATION HELPS.

A recent example of the co-operation offered by the educational department of the Columbia Co. was evidenced in an advertisement that was staged last week in Public School 23, Jersey City, N. J., under the auspices of the Columbia educational division. This school had for some time been desirous of purchasing a Columbia outfit, but no funds being available, the purchase was necessarily deferred. The Columbia Co., however, lent assistance by preparing an excellent record concert which, by the charging of a small admission price, produced sufficient funds to buy a Columbia machine and a goodly supply of records.

NYOIL

For polishing
varnished woodwork it is
extremely satisfactory. No oil is so clean.

*Ask your watch repairer whose
oil he uses on your watch.*

NEW COLUMBIA DEALERS.

A. Lasus, of New Rochelle, N. Y., is a recent addition to the lists of Columbia representatives in near-by territory. He has placed a substantial initial order and has perfected plans for the development of an extensive clientele.

Other recent additions to the lists of Columbia dealers in near-by territory, include: William Damrau, Jr., 96 Flatbush avenue, Brooklyn, N. Y., and A. Hammel & Son, Suffern, N. Y.

A special letter sent out to Columbia dealers this week called particular attention to a recent popular Columbia record featuring the latest song hit "I'm on My Way to Mandalay." The surprising demand for this record warranted the sending out of this special letter to dealers.

Another Example of \$witky \$ervice

Victrolas XI Growing Scarce

But Our Dealers Need Not Worry

☐ Last summer we foresaw the condition that is coming. We took in all the Elevenths that the Victor factory could ship us, besides buying up a lot from other sources during the dull season.

☐ Although warehouse charges, interest and insurance have cut into the margin of profit, it was **your benefit only** that we thought of.

**BENJ. SWITKY, VICTOR DISTRIBUTOR
NEW YORK CITY**

EDISON SIXTY-SEVEN YEARS OLD.

Time Has Dealt Gently with the Great Inventor After Forty-Five Years Spent in Laboratory Work—His Latest Portrait—Planning to Spend Vacation in His Home in Florida.

Sixty-seven years old and working steadily for 120 to 140 hours a week on occasions, an exhibition of energy that would break the health and spirit of a far younger man, is the record that still maintains Thomas A. Edison on a pedestal as one of the foremost figures, if not the foremost figure, in the field of electrical and mechanical invention and development to-day. Mr. Edison's work is indicated by his time card, which he punches just the same as would the ordinary employe, and the results are shown in numerous

his work in the past has entitled him to an occasional vacation without necessitating apologies, and consequently late this month he will leave home for a seven weeks' vacation in Florida in company with Henry Ford, the well-known automobile manufacturer, and John Burroughs, two close friends.

The anniversary of Mr. Edison's sixty-seventh birthday fell on February 11, and the accompanying portrait, his latest, shows that the years have dealt lightly with "The Wizard" and that he still appears to be fit to develop fresh surprises for the scientific and mechanical world.

SUCCESSFUL IN CONCERT WORK.

(Special to The Talking Machine World.)
KEOKUK, IA., February 6.—C. H. Wolfe, an enterprising Viotor dealer in this city, is closing an excellent business through the medium of original ideas in both his publicity and his sales methods.

Mr. Wolfe is a great believer in offering the public something different from the average advertising and he also presents the Viotor products by means of concerts held in various parts of the city.

On a recent occasion Mr. Wolfe prepared an elaborate program for a Viotor record concert at St. Paul's German Evangelical Church, at which sacred music was featured exclusively. The extent of the Viotor record library was well evidenced by the splendid list of sacred records which was offered by Mr. Wolfe. This concert is but one of a series that Mr. Wolfe is planning to offer during the next few months, for the experiment has proven a decided success in increasing sales.

Latest Photograph of Thomas A. Edison.

ways, most recently by the perfection of the disc phonograph. No better proof of the energy of the man is to be desired than his remark upon his return from a recent vacation, enforced by a slight illness, to the effect that forty-five years in the laboratory had so tuned him to hard work that he was sick if away from it.

Mr. Edison is beginning to feel, however, that

LATEST RECORD BY MAGGIE TEYTE

Announced by Columbia Co. in Special Letter Sent to Dealers—Sings Her Big Hit.

The Columbia Graphophone Co. sent out to its dealers this week a special letter announcing another record sung by Maggie Teyte, the famous English soprano, in addition to those featured in the regular March list of records. The company had originally planned to issue this third record in April, but as Maggie Teyte is scoring a most impressive success in her present tour of the country it was deemed to be the best interests of Columbia dealers to release the third record by Miss Teyte at the earliest possible date.

This record contains Miss Teyte's famous hit, "Mifanwy," which is considered the most popular song in her repertoire. The issuance of this song in record form should prove very popular with Columbia dealers.

"TALKING MACHINE SPECIALISTS."

Burley & Biesinger, "the talking machine specialists," who opened a new store last October, at 278 West Ferry street, Buffalo, N. Y., are handling a full line of Viotoras and Edison Amberolas, records and supplies, and report a very excellent business. Both of these gentlemen were connected with the Neal, Clark & Neal Co.

George W. Lyle, general manager of the Columbia Graphophone Co., left Monday for a ten days' trip through the West. H. A. Yerkes, manager of the company's wholesale department, left Tuesday for a short trip through New England territory.

Make Every Business Day Count

That is the only way to succeed, and if you realized how you could improve your business with the right player-pianos you would lose no time in communicating with us.

We can offer you a player proposition which is brimful of business-building possibilities for you. That means money-making possibilities.

If there is a sub-cellar under the basement we can put you right there, so the foundation is firm; not merely on the ground floor of the player business, but better than that. We can aid you in your business enterprise so that it will show a substantial increase in profits before the year is very old.

We have a player-piano proposition that you should not overlook.

One of the largest piano enterprises in the world could not have been built up within a few years unless the profits had been there—unless we had meant exactly what we said when it came to the question of values.

The question is, are you interested in values?

Are you interested in something unusual in the player line?

Then take it up with us!

STABILITY OF THE TALKING MACHINE INDUSTRY.

History of Trade Shows That the Industry Has Grown in a Broader Way Than Anticipated by Those Associated with Its Early Development—Industry Will Live as Long as Music Is Loved, Which Is Forever, Says Benj. Switky, in an Interesting Article.

"How long will the talking machine business last?" This question was frequently asked by dealers and jobbers themselves, as well as by laymen, only a few years ago. Why? Because the phonograph and primitive talking machine were hailed by the entire world as almost supernatural wonders—and wonders, you know, are supposed to last only nine days. As novelties, their only purpose was amusement. Hence it seemed but natural that they should eventually decline in popularity, the amusement lessening with the wearing off of the novelty.

Even those who succeeded in making modest fortunes seven or eight years ago believed that their prosperity would be short lived. They looked upon it as a sort of orange from which they were to squeeze out the juice, then throw the pulp away. The Victor distributor to whose jobbership I succeeded about eight years ago, accepted \$250 bonus as a consideration for the transfer—a mere mess of pottage for a birthright.

Few of the phonograph pioneers would have dared to assert, while looking at the Berliner Gramophone or the little cylinder machines, that these had within them the possibilities of a great industry. How many could have believed that these toys were but the foreword, their sale but the foundation upon which was to be reared a mighty, magnificent structure that within a decade would tower like a serene Alpine peak, loftily above industries whose lineage dated back centuries!

Although our greatest interest lies in the present, and our fondest hopes are concentrated upon the future, it will do us all a great deal of good to contemplate the past, and, while indulging in reminiscence, draw from past performance our inspiration for future accomplishment.

The ancient minstrels sang of the valorous deeds

of still more ancient knights and warriors; and their songs enkindled the fires of courage and loyalty in the breasts of the new generations.

The old men of the talking machine business are still very young; yet the autobiographies of these men would make very interesting reading.

They would be an inspiration and encouragement to the newer members of the fraternity.

Only ten years ago one of our foremost New York distributors, whose present Fifth avenue shops are the acme of elegance and prosperity, began his talking machine career by doing house-to-house selling.

On every hand we see prosperous manufacturers, dealers, jobbers—men recruited from many different walks of life, who within a very few years have built up establishments that are remarkable for their progressiveness and self-evident appearance of success.

Our manufacturers, the captains of the industry, have on every occasion proven their personal courage, their prophetic foresight, and their ability to perpetuate the business. They have lifted their machines out of the toy and novelty class and planted them in the front rank of musical instruments. They have taken their machines, which formerly were stowed away in closets when not in use, and demanded that they be given a place of honor in the parlor, where they eloquently plead our cause. This was done by clothing the instrument in beautiful red and gold, with artistic figure. They are even now spending vast sums of money and immeasurable energy to impress upon the school principal and teacher, and the board of education, that the talking machine belongs in every classroom; that a graded course in music through the medium of the records, should logically be made part of the school curriculum. After that

we will have no difficulty in making the talking machine as necessary in the household as is the sewing machine.

The manufacturers are maintaining expensive laboratories and experimentors so as to improve their product. Following each improvement they point out to us new uses to us for which the machines are adaptable; opening up for us new fertile fields, and spending millions to create the demand.

While there are certain flaws in our business methods that are sadly in need of correction, policies that pinch and hurt, these are but "growing pains." The manufacturers' ideas for the preservation of the dealer and his profits are still a little crude and incomplete, but even these will be righted in time.

The talking machine business will outlive its creators. It will last just as long as music claims its corner in the human breast—which means forever. The present types and styles and mechanical construction may undergo radical changes, but the industry will continue. It can truthfully be compared to the little brook of which the poet Tennyson wrote:

"Men may come and men may go, but I go on forever."

PREPARING NEW WINDOW POSTER.

The Victor Talking Machine Co. is now preparing a window poster and four-page folder to advertise a special list of Victor records for Easter which are detailed on an order blank sent to Victor dealers under date of February 2. This list, which was chosen with particular reference to the adaptability of the records listed to the musical requirements of the Easter season and contains a number of excellent selections that should prove very popular during that season.

Accompanying this list the Victor company sent out a short letter calling the attention of its dealers to the advantage of properly featuring special season records, as this publicity never fails to result in increased sales for the dealer's record department.

VALUE OF WINDOW DISPLAYS

Emphasized by the Success of M. Sonnenberg Piano Co., Yonkers, N. Y., in Featuring the Columbia Line So Artistically.

The enterprising methods of the M. Sonnenberg Piano Co., Yonkers, N. Y., are well illustrated by the accompanying picture of a recent window display presented by the company on behalf of its

Attractive Sonnenberg Window.

Columbia graphophone department. This photograph, which was taken at night, hardly does justice to the beauty of the display, which was used as a follow-up of the Columbia Co.'s advertising

in the Saturday Evening Post. The Favorite is the machine featured in this display, and the dolls attached to the machine by ribbons made a most attractive setting for the machine.

J. Bareuther, who is manager of the Yonkers store of the M. Sonnenberg Piano Co., is a firm believer in the value of artistic window displays, and the fact that the Columbia business in this store is steadily increasing can be attributed in a considerable measure to Mr. Bareuther's energetic and live-wire publicity and sales policies. The Columbia line is handled exclusively in this store.

CHARGE INTEREST ON VICTROLAS.

Minneapolis Dealers in Victor Talking Machines Sign Agreement to Charge Six Per Cent. Interest on All Instalment Sales.

(Special to The Talking Machine World.)

MINNEAPOLIS, MINN., February 7.—All Victor dealers in Minneapolis, some fourteen in number, have signed a pact to charge interest on deferred payments as is done with pianos sold on the instalment plan. The pact includes two department stores, who were expected to balk on the proposition, but apparently there was little difficulty in signing them. The matter of obtaining the signatures to the agreement was turned over some weeks ago by several dealers at an informal gathering to Robert O. Foster, of Foster & Waldo, former president of the National Association of Piano Merchants.

It is agreed that the interest rate will be 6 per cent., that being the current rate on loans of various kinds in Minneapolis.

MOVE TO NEW FACTORY.

The Schafford Album Co. Has a Modern Equipment in New Plant at 27-29 Walker Street, New York—Manager Skinner's Report.

The Schafford Album Co., formerly on Lispenard street, New York, is moving to a larger factory at 27-29 Walker street, where, with new machinery

and modern equipment, it is planning to increase its output to a considerable extent.

This concern makes a specialty of talking machine record albums and carrying cases, and its business now reaches all over the country, due to the high quality of its goods, consistent with reasonable prices.

General Manager Skinner, in speaking to The World representative, said: "Of course it took a week to move, and during that time we were a little delayed in shipping orders, but we are now settled and, with the additional output, we are in an excellent position to care for the orders of the trade. It is these orders that are making our rapid growth, and we aim to give the best satisfaction both as regards quality, price and deliveries, so that the business may continue to grow."

COLUMBIA CO. TRADE IN BUFFALO.

Business in Both Wholesale and Retail Departments Practically Doubled—Better Grade Machines in Demand at All Stores.

(Special to The Talking Machine World.)

BUFFALO, N. Y., February 7.—According to W. L. Sprague, manager of the Columbia Graphophone Co., in this city, the business of the local store has increased considerably during the past month.

The retail business of the store in this city has increased about 55 per cent. and the wholesale business has been doubled.

One of the unusual features of the marked increase is the fact that Buffalo people are purchasing more \$75 and \$100 graphophones than \$50 machines.

A window, artistically trimmed, adorns the front of the store which is located in Upper Main street in the heart of the music trade center of the city.

Sometimes when duty calls we can't hear it because pleasure keeps up such a racket just around the corner.

**New records—three times a month.
This is the latest Columbia innovation
meeting the demands of record buyers.**

A REAL LIVE WIRE IN COLORADO.

E. Frank Winfield, Proprietor of the Outing Shop, Grand Junction, Col., a Firm Believer in Persistent Advertising and Aggressive Salesmanship—A Window Display of Particular Interest That Tells Its Own Story.

(Special to The Talking Machine World.)

GRAND JUNCTION, COL., February 5.—One of the most progressive and up-to-date talking machine dealers in this section of the country is E. Frank Winfield, proprietor of the Outing Shop, who is also a great believer in aggressive and consistent

herewith was prepared by Mr. Winfield to properly present to the people of Grand Junction the new advertising record recently introduced by the Columbia Graphophone Co. In this connection the Outing Shop certainly met with gratifying success, as the window attracted general attention and was the direct cause of several substantial record and machine sales.

It is interesting to note that the Outing Shop has achieved exceptional success with this new advertising record, considering the limited scope of its working possibilities. When this record was first introduced, Mr. Winfield had a mailing list of seventy names, to whom he mailed regularly Co-

NEW VICTROLA DEPT. IN BUFFALO

Opened in Store of Neal, Clark & Neal—Special Sound-Proof Demonstration Booths Provided.

(Special to The Talking Machine World.)

BUFFALO, N. Y., February 6.—The Victrola department of the store of Neal, Clark & Neal, at 645-649 Main street, has just opened. All the modern improvements and artistic designs are embodied in the new addition to the store, which has been located on Main street for many years. One of the features of the new department is the installation of soundproof demonstration booths, which enable the purchasers of Victrolas to hear, without interference, the machine they wish to purchase. W. J. Bruehl is manager of the new department.

MUST ABIDE BY THE CONTRACT

When the Contract Provides That the Employee Shall Satisfy the Customers of His Employer.

When a contract for employment provides that the employe shall satisfy the customers of his employer, it is sufficient to show on a trial of his suit for breach of contract that the customers were dissatisfied. The question whether they had good grounds for their dissatisfaction is not material, and any verdict predicated upon such a theory may be set aside, the Appellate Division ruled recently, sustaining the appeal of the Henry W. Boettger Silk Manufacturing Co. against a Supreme Court judgment in favor of William Messmer, a silk finisher, discharged by them. Messmer's contract provided that he should be employed while his work gave satisfaction to the company's customers. The court observed that the jury had probably been actuated by sympathy, since they gave Messmer a verdict for half of what he would have been entitled to, if entitled to anything.

PLEASING NEW YEAR'S SOUVENIR.

The International Phonograph Co., a successful Victor and Columbia dealer, with stores at 101 Essex street, and 196 East Houston street, New York, is sending out to its many patrons a very attractive 1914 calendar that should serve as a year-round reminder of the company's establishments. The calendar shows the trade-marks of both the manufacturers the company represents, together with an appropriate center illustration in several colors.

INCORPORATED.

The LaGrange Talking Machine Co., LaGrange, Ill., has been incorporated with a capital stock of \$25,000, to manufacture and deal in talking machines.

THE MAN WHO STICKS.

Look around among the men you know and observation will teach you that, in the majority of cases, the man who wins in any vocation in life is the man who sticks to it. He may be a plodder, but if he is endowed with perseverance, he may surpass the versatile or brilliant man.

Attractive Window of the Outing Shop, Grand Junction, Col.

publicity and solicitation, regardless of the size of the city wherein his establishment may be located. Mr. Winfield handles the complete line of the Columbia Graphophone Co., in addition to doing an excellent business with Eastman cameras and photographic supplies.

The accompanying illustration of a recent window display at the Outing Shop gives a fair idea of Mr. Winfield's ideas relative to this important phase of retail merchandising. The show window

lumbia bulletins and various forms of literature. With the introduction of the advertising record, however, Mr. Winfield was enabled to increase his mailing list nearly 100 per cent., adding fifty live-wire names to his prospect file as a result of the value represented in the Columbia advertising record.

The mailing list of the store is now 120, which is an admirable one for a city of Grand Junction's size and population.

A RESULT GETTING ADVERTISEMENT.

Attractive Manner in Which Harger & Blish Exploited the Advantages of the Edison Phonographs to the Music Lovers of Des Moines—Artistic Newspaper Advertisements.

(Special to The Talking Machine World.)

DES MOINES, IOWA, February 7.—One of the most successful and result producing advertisements for the Edison phonograph ever published

cylinder and disc, offer the opportunity of having the best of the world's music brought directly to the fireside with a minimum of expense and trouble was strongly impressed upon both those who attended the Melba-Kubelik concert and those who stayed home.

PHONOGRAPH TALKED BACK.

J. B. Benton, a veteran engineer and mechanic, who was associated with Thomas A. Edison a generation ago, at the time the phonograph was just beginning to evolve as a commercial proposition, recalls, with a chuckle, the following historic incident to the memory of the "Wizard."

One of the first machines that went out of the laboratory was delivered to Charley Cheever, son of the well-known belting manufacturer. Charley couldn't make it work, and finally sent for Edison.

The great inventor himself worked over the phonograph, reciting "Mary had a little lamb" into it distinctly for nearly an hour without audible result. At last he lost patience, and slammed the thing down with a jilt, exclaiming: "Talk, d—n you! Why in blazes don't you talk?"

Then, suddenly, the phonograph broke its long silence, and squeaked out to Mr. Edison's horror:

"D—n you! Why in blazes don't you talk?"

SELL 16 VICTORS IN ONE HOUR.

This Was the Achievement of Benesch & Son, of Annapolis, Md., During a Recent Day.

(Special to The Talking Machine World.)

ANNAPOLIS, Md., January 31.—The enterprising Victor representatives in this city, Isaac Benesch & Sons, closed the best year in their history. The company maintained a consistent advertising campaign from one end of the year to the other, and this publicity, coupled with the unceasing efforts of the capable sales staff resulted in the closing of this banner year's business.

Some idea of the splendid business closed by this aggressive dealer may be gleaned from the fact that in one hour on a Saturday recently, Wm. McCurdy, manager of the store, sold sixteen Victrolas, a record to be proud of, considering the size of the city, and its population, which totals about 9,000. The company's clientele is going a pace, and judging from the record business closed so far this month, the machines sold during the past fall season are giving perfect satisfaction.

OPENS STORE IN UNION HILL, N. J.

Andrew Brunton, the prominent piano dealer with stores in Jersey City and Perth Amboy, opened recently a new store in Union Hill, N. J. Mr. Brunton is featuring in this new establishment his leaders—the Kranich & Bach and Hardman lines—in addition to several other well-known pianos and Columbia talking machines and records. Large and attractive signs are prominently displayed on the new building, calling the attention of the public to the high-grade character of the instruments handled by Mr. Brunton.

LOOK OUT FOR THIS MAN.

A man who has given various names when seeking employment, and who recently worked for the Chase & West Talking Machine Co., of Des Moines, and for another concern in Iowa, has disappeared. Wherever he has been employed, it is stated, he borrowed money, or got it under false pretenses. The last case was with Herman Marks, of Emmetsburg, Ia., where he sold a \$300 piano for \$100 cash, pocketed the money and skipped.

This man is about five feet high, weighs 110 pounds, dark brown hair, has a scar on the left side of his face from the corner of his mouth to the lower end of his cheek bone. He also has a wen about the size of a thumb nail on the side of his right ear. The Chase & West Talking Machine Co. has sent us these facts for the purpose of warning the trade. This man is supposed to have left for Chicago or Seattle.

Many a man has been undone through undue influence.

An Evening After The Concert—Thought Suggested By Harger and Blish

A Clever Edison Phonograph Advertisement.

by Harger & Blish, the prominent Edison jobbers with headquarters in this city and branch stores in Dubuque and Sioux City, is that reproduced herewith, and which occupied a full page in the Des Moines Evening Tribune on the day that Mme. Melba and Jan Kubelik gave a joint concert here.

The fact that the Edison phonographs, both

VICTOR DOG HAS A RIVAL.

Alfred W. Meldon, a lawyer of Jamaica, is reported by one of the local papers to be considering the effort of a talking machine concern to make records of songs of his dog, Caruso, which sings to the accompaniment of the piano, and is said to have a cultured voice.

IN the clinches you can rely upon the **Ditson Victor Service.** Profits are contingent upon *our fast work*—and we know it.

STOP saying to your customers: "We haven't got it," because you can get it from **DITSON.**

INTRODUCING THE ARTIST TO THE CUSTOMER.

A Series of Receptions Held at Your Store, Mr. Dealer, Where the Talent Meets Your Patrons Socially, Will Prove the Greatest Tonic Ever Prescribed for a Languid Business—It Will Make Weak Trade Strong and Strong Trade Stronger.

Have you ever noticed, Mr. Talker Man, when a prominent phonograph artist, who is also popular upon the stage, plays an engagement at a theater near your store, how it facilitates the sale of that particular artist's records? To illustrate: While Harry Lauder was playing in Philadelphia a short time ago the talker shops in that city were besieged with orders for his selections, the greatest demand centering naturally upon the songs he sang at his concerts. Even now, a full week after Mr. Lauder's Philadelphia engagement, I find, on glancing through my daily paper, that Louis Buehn is still interested in the event as a trade stimulant. In a conspicuous advertisement bearing the title, "You Missed Hearing Harry Lauder? But you may still hear him any time you like; the Victor makes it possible," he publishes a list of thirty-seven records made by this great entertainer.

Now then: If the mere proximity of the artist to your establishment will boost sales several hundred per cent., why not go further and arrange for a series of receptions where the talent will come in personal contact with the customer upon a social basis.

It appears to the writer that the manufacturer might be induced to meet the dealer half way in this matter, it being mutually advantageous. It could be arranged between the manufacturer and the artist, at the signing of their contract that a series of receptions be held at the stores of various dealers, and provisions for the same incorporated in that document. These affairs could be given, in a great many instances, very easily and inexpensively for this reason: A large proportion of the talent are en route during a part of the year upon concert, operatic or vaudeville tours, and their itinerary could be furnished in advance to the talking machine men along their line of march, so that the artists' professional and social engagements in a certain town might take place simultaneously.

When we pause to consider the vast sums—in some cases reaching six figures—spent annually by the makers of talking machines in advertising their wares, the matter of artists' receptions seems small in a financial sense, even though the entire burden be borne by the manufacturer. Inasmuch as the artist is already well paid for his record making, he should see that getting in personal touch with his phonographic audience cannot but have the effect of increasing the demand for his services, thereby adding to his already substantial remuneration. This being the case, he should carry out the reception idea with enthusiasm and be willing to accept a modest return in dollars and cents for his services in this field.

It would be as well at first, perhaps, to introduce the talent whose voices have been familiar to the users of phonographs for a great many years. Whom among all your customers would not be among those present were Messrs. Collins, Harlan,

Hooley or Stewart announced to meet them at your salesrooms? The "standing room only" sign would be conspicuously displayed, I am sure. Of course, it would add very materially to the success of the occasion to have a piano and accompanist in attendance in order that those who had heard Messrs. Collins, Harlan, Hooley and Stewart perform phonographically for fifteen years could have the pleasure of hearing them at least once in the flesh; but even though a pleasant word and a hearty hand clasp were the only numbers upon the program, the event would still be a huge success from a trade-stimulating standpoint, and the demand for coon duets, basso solos and Yankee stories would aviate.

Our old friend Cal would, I think, be the gentleman to introduce the reception idea, for who is there, from the snow-clad hills of Maine to the sun-kissed groves of Florida, or even to the shores of the balmy Pacific, that has not heard the quaint Yankee drollery of Uncle Josh Weathersby? A long time ago—fourteen years, perhaps—Uncle Josh appeared in the guise of host and entertainer at a Philadelphia talker shop, and he was welcomed by several hundred phonographists with open arms and gusts of merriment. I know, for I was there.

As I write, there is one incident in connection with that Stewart reception that remains fresh in my memory through the years.

Cal had just finished telling a story, which at that time had not been recorded, in reference to an aching molar.

"I went into one of them there tooth distractin' parlors," he explained, with the laugh that is his and his alone, an' the feller asked me if I'd take gas. I told him that up at Punkin Center where I come from we didn't know much about gas, an' if 'twas all the same to him, I'd take kerosene."

The laughter was still surging through the room as a result of this bit of rare humor when an elderly Quaker lady, in a sugar-scoop bonnet, asked meekly but curiously, "Calvin, does thee sing?"

"Gosh all hemlock, madam!" replied Mr. Stewart, mournfully, "I couldn't carry a tune if I had it in a satchel."

Just why the artist reception idea did not bear fruit at that time, I am not prepared to say, but this much is certain: A proposition attended by abundant success fourteen years ago and lying dormant from that time to the present day, if handled with the snap and vim that characterizes modern business methods, cannot but succeed mag-

nificently. In conclusion, Mr. Dealer, we will indulge in a brief resumé of just what this artist reception idea means to you.

Let us suppose that the theory has been put in practice, and you have received word from your manufacturer that Cal Stewart will hold a reception at your store for the benefit of your patrons on the twenty-fifth of February. You immediately send out announcement cards bearing a half-tone cut of Mr. Stewart and worded thus:

"You are cordially invited to be present at a reception given by Mr. Cal Stewart to his phonographic friends at the salesrooms of the Elite Talker Shop on Wednesday, February twenty-fifth, at three."

Upon the occasion of the reception you have your store attractively decorated with potted plants, an adequate number of easy chairs placed invitingly, a great deal of literature pertaining to all your goods in general, and the Josh Weathersby records in particular, displayed within easy reach of your guests—and I think that is all.

Necessarily, your show window should cry aloud to the housetops for at least one week previous to the reception that the premier delineator of the way down East type of rural citizen is to hold forth within, the decorations consisting of a large portrait surrounded by a tastefully arranged assortment of agricultural accessories, etc.

The setting thus ably prepared, the reception follows. Mr. Stewart is introduced, chats with your patrons, tells a few yarns no one has heard before and suggests certain of his records as being particularly attractive. Then refreshments are served while orders for Uncle Josh records are taken, and the show is over.

Very little trouble, small financial outlay, and big returns. In fact, everything may seem diminutive, but Cal, the crowd and the profits, which is as it should be.

HOWARD TAYLOR MIDDLETON.

VISITING SWITZERLAND FACTORY.

Marc K. Mermod, of Mermod & Co., 505 Fifth avenue, New York, manufacturers of supplies for talking machine makers, is now at the Switzerland factory for a few weeks' visit, getting his line of goods ready to take with him on the trip that he is planning to make through China.

E. L. Cuendet, a man well experienced in the importing line, and also the talking machine business, is now in charge of the New York offices, where visiting manufacturers may see him.

Many people confuse the term "efficiency with the word "effectiveness," and while there is a current usage in which the two terms overlap, yet the difference is easily capable of detection, and it is important too.

CHEMISCHE FABRIK **E. SAUERLANDT** bei FLURSTEDT

Sole Manufacturer of Wax "P." the best recording material for Berliner-cut.

HANDSOME TALKING MACHINE QUARTERS IN EL PASO

Conducted by the Southwestern Talking Machine Co. in That Go-ahead City—Now Controlled by Rafael Cabanas, President of the Mexican Phonograph Co.

(Special to The Talking Machine World.)

EL PASO, TEXAS, February 8.—The accompanying illustration, showing the main floor of the Southwestern Talking Machine Co.'s headquarters in this city, gives a fair indication of the up-to-date ideas of this hustling Columbia representative. Sound-proof demonstration booths furnished

Columbia Graphophone Co. Raphael Cabanas, president of the Mexican Phonograph Co., and an ardent Columbia admirer, is at the head of the new company, while Robert R. Souders is general manager with headquarters in Dallas. J. M. Spain, who is well-versed in Columbia selling details, is in charge of the local store.

in a dignified and refined manner are included in the artistic appearance of the company's warehouses, which are tasteful and refined to a degree.

The Southwestern Talking Machine Co. is the new name of the company, which recently purchased the Dallas and El Paso stores of the Co-

The El Paso store of the Southwestern Talking Machine Co. is located at the corner of Stanton and Texas streets, one of the best spots in the business section of the city. During 1913 the store closed an excellent business, which bids fair to be exceeded month by month during the ensuing year.

VICTOR LINE FOR HALLET & DAVIS.

This Line to Be Presented in Pleasing Environment in New Forty-second Street Store of the Hallet & Davis Co. in New York.

Arthur D. Geissler, vice-president of the New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor, in a chat with The World recently stated that Hallet & Davis Piano Co., one of the best-known piano houses in the country, will carry a complete line of Victor products in its attractive building at 18 East Forty-second street, New York. Hallet & Davis already handle the Victor line in their Harlem store, and the excellent results they achieved in this uptown branch prompted their decision to handle the Victor products in their new building.

When the Victor line is installed in the Forty-second street building there will be constructed several attractively furnished demonstration booths on the main floor, which will display the Victrolas to excellent advantage. There will also be constructed in the basement of the building a number of record-demonstration rooms which will be furnished and decorated to completely harmonize with the prestige of the store and the Victor line.

FIRE CAUSES \$4,200 DAMAGE

To the Stock of Pianos and Talking Machines of the Bates Music Co. in Greeley, Colo.

(Special to The Talking Machine World.)

GREELEY, COLO., February 4.—In a fire which swept through the Unity building, at Ninth street and Ninth avenue, this city, recently, the stock of the Bates Music Co., in a store on the ground floor of the building, was damaged by smoke, heat and water to the extent of about \$4,200. Over a half dozen pianos were badly wrecked and a new consignment of Victrolas and Grafonolas were damaged beyond repair. Several hundred talking machine records were damaged.

The Imperial Phonograph Co. has been organized at Portland, Me., with a capital of \$50,000. The officers of the new corporation are as follows: Hiram Knowlton, president; W. J. Knowlton, treasurer; Hiram Knowlton, W. J. Knowlton and Bertha B. Huston, directors.

DANCE RECORDS IN GREAT DEMAND.

The Present Craze for Dances Throughout the Country Exemplified in the Demand for Records, Which is Really Exceeding the Supply—Interesting Chat with V. W. Moody.

Referring to the present demand for dance records, V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor remarked as follows: "Many people have expressed their doubts as to the real status of the dance craze and have asserted that the demand for this type of music is not nearly as pronounced as the newspaper, talking machine record manufacturers and sheet music publishers would have us believe.

"As a matter of fact, however, the actual call for dance music is greatly in excess of the apparent demand for this class of record. In all sections of the country, the dance craze is gaining rapidly in popularity, and judging from the reports of Victor distributors throughout the West and South, Victor dealers are reaping a harvest in the sales of these records.

"In actual figures, the dance record sales in our own establishment are almost unbelievable. Taking as a basis of comparison the sales of one of the most popular records in 1908, our total sales this month of one dance record in the Victor library would equal a little more than 100 times the sales of the 1908 popular favorite. This figure furnishes the best possible evidence of the extent of the dance record business, and in my opinion will probably be distanced very materially in the very near future."

The New York Talking Machine Co. is devoting a considerable portion of its window space to a number of attractive dance record cut-out displays, which call attention to the most popular records of this type in the Victor library. These displays are also being used to excellent advantage by the company's dealers, who report a number of sales as a direct result of these suggestions to passers-by.

BIG TALKING PICTURE CO. FORMED.

(Special to The Talking Machine World.)

DOVER, DEL., February 5.—The Talking Machine Film Co. of America, with capital of \$2,500,000, has been chartered here. The incorporators are E. J. Forhan, F. B. Knowlton and D. A. Cassin, all of New York. The incorporation papers say the concern will manufacture, buy, sell and deal in films, photographs and other reproductions of scenes and dramas.

NEW LIST OF EDISON DISC RECORDS

Contain Many Numbers That Promise to Win a Large Degree of Favor.

Thomas A. Edison, Inc., Orange, N. J., has just issued a January supplement of Edison disc records that makes a valuable addition to the disc library. Over forty double-disc records are presented in this supplemental list, many of which are among the popular hits of the day.

Edison disc dealers in all parts of the country write to state that the new list is being received with popular favor wherever it is introduced; owners of Edison disc phonographs are availing themselves of this opportunity to considerably enlarge their record library.

Special

Send for a package of our Improved Half-Tone and Loud Tone Needles in New Style Envelopes.

If you want to advertise yourself, we will put your own name or trade-mark on the envelopes, or will pack in Puritone envelopes.

Quality Guaranteed

The Best Needles mean profit and satisfaction.

If you want to sell 1,000 Needles at a time instead of 100, use the "Dean-packed" Needles. Five boxes of 200 each, Extra Loud, Loud, Opera, Medium and Soft packed in a carton. The best package and fastest seller on the market. Write for samples.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., February 8.—PHONOGRAPH REPRODUCER.—Achille Luciano, Bloomfield, N. J., assignor to the Nightingale Reproducer Co., Newark, N. J. Patent No. 1,080,839.

This invention relates to an improved gramophone reproducer and is of the type that is arranged with the sound box vertical to the record and is adapted for use with its stylus projecting in substantially the same plane as the diaphragm and having its stylus adapted to be moved transversely by the groove so as to transmit its vibrations directly to the diaphragm.

The reproducer comprises a sound box in which the diaphragm is mounted in any usual manner, the stylus rod being pivoted by means of a pivotal connection that permits a limited transverse movement at the pivotal point, the stylus rod thus rocking normally at its pivotal point, but yielding to an extent under undue strain in a transverse direction.

The invention also resides in the stylus, which is mounted on the end of the rod, and which submits successive portions of its periphery to the groove whereby the groove is not subjected to undue wear and the friction is minimized, while the sound reproduction is not impaired.

Fig. 1 is a front view of the improved stylus, and Fig. 2 is a vertical section of the same through the center, the pivotal post being shown in elevation.

DISC TALKING MACHINE.—Rezso Prcsster, Budapest, Austria-Hungary. Patent No. 1,076,643. The object of this invention is to obviate the necessity of employing a trumpet with disc talking machines.

It is well known that sound trumpets generally used affect the purity of the sound and make the machine more difficult to handle and to transport. It was already proposed to cover the trumpet of talking machines or to conduct it through the casing of the machine. Thereby the trumpet was only disguised, but substantially maintained so that the sound effect was not improved by this way. As on the other hand the dimensions of the casing should not be increased too far, the dimensions of the trumpet were reduced, whereby the sound

strength was decreased. But as the dimensions of the trumpet could not be decreased too far, the dimensions of the casing resulted larger than the usual casings of talking machines.

This invention does away completely with the usual trumpets without increasing the usual dimensions of the casing. According to the disclosed embodiments of this invention the free space of the casing containing the gear is subdivided by means of resonance boards in a way to form laterally from the gear a sound chamber of substantially the shape of pyramid and to form adjacent resonance boxes.

The annexed drawing shows as examples two embodiments of the invention. Fig. 1 is a diagrammatic vertical section of the machine according to line C—C of Fig. 2. Fig. 2 is a horizontal section according to line E—F of Fig. 1 and Fig. 3 is a similar section of a modified form.

SOUNDBOX FOR TALKING MACHINES.—Wilburn N. Dennison, Merchantville, N. J., assignor to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,084,319.

This invention relates more particularly to

pneumatic soundboxes for talking machines and includes improvements in which a valve is provided, the movable member of which is positioned within and very close to the soundbox casing so that the air passing through the valve is caught or trapped between the movable member and the casing to cushion or balance the movable member.

The main objects of this invention are: to provide in a pneumatic soundbox a valve having a movable member of delicate construction which will respond readily to the vibrations of the stylus bar and which will be cushioned or balanced by the air passing through the valve; to provide an improved mounting for the stylus bar and the movable member of the valve, whereby the valve may be adjusted with great accuracy and whereby the balancing effect of the air after it has passed through the valve will not be impaired; to provide adjustable means for holding and tensioning the movable member upon its mounting; to provide a improved form of opening through the valve to permit the air to pass freely therethrough.

In the accompanying drawings, Figure 1 is a fragmentary front end view of a soundbox constructed in accordance with this invention; Fig.

2 a longitudinal section on line 2—2 of Fig. 1; Fig. 3 an enlargement of a portion of Fig. 2; Fig. 4 an enlarged fragmentary sectional view on line 4—4 of Fig. 1; Fig. 5 a fragmentary sectional view on line 5—5 of Fig. 3; Fig. 6 a fragmentary sectional view corresponding to Fig. 3 showing a modification of the invention; Fig. 7 a view corresponding to Fig. 1 of a modified form of this invention; Fig. 8 a longitudinal section view taken on line 8—8 of Fig. 7, parts thereof being omitted; Fig. 9 an enlarged fragmentary longitudinal central sectional view of the soundbox shown in Figs. 7 and 8; Fig. 10 a transverse sectional view of the soundbox shown in Fig. 9; and Figs. 11 and 12 are enlarged fragmentary front and rear elevations respectively of the valve seat shown in Figs. 7 to 9.

SOUNDBOX AND REPRODUCTION THEREOF.—Victor H. Emerson, New York, assignor to the American Graphophone Co., Bridgeport, Conn., Patent No. 1,084,415.

This invention relates to sound record having laterally undulating record groove of substantially uniform depth, commonly known as "zigzag" records. The object of the invention is to produce a record of this type which will have improved acoustical qualities. Such "zigzag" records are commonly manufactured as discs with the record groove arranged spirally around the cylinder; yet, for convenience of consideration, such record groove may be regarded as continuing in a straight line, with the lateral undulations on either side.

The underlying thought of this invention is to provide a (zigzag) record groove of such character as to produce a duplication or immediate repetition of each impulse imparted to the reproducing stylus, so that theoretically there should be expected a sort of "echo" as it were; yet in actual practice no echo will be observed by the listener, but merely increased fulness or roundness of tone. This duplication or repetition is accomplished by making the original record by means of a recording stylus having its two oppositely extending recording edges disposed diagonally with respect to the direction of

travel of the record groove (instead of transversely thereof as heretofore). As the result of this arrangement of one recording edge is slightly advanced in front of the other, and each concavity produced in one side wall of the record groove will have its complementary (and simultaneously produced) convexity located diagonally therefrom in the opposite wall of the groove (instead of directly across therefrom).

This invention, then, consists broadly in providing a diagonally disposed pair of oppositely facing recording edges for making the original sound groove; further, in the simultaneous production of diagonally disposed and complementary concavities and convexities corresponding to sound waves;

and also in a sound record having such diagonal arrangement of its complementary concavities and convexities.

This invention will be best understood by reference to the annexed drawings, which are on a greatly exaggerated scale, to illustrate the same diagrammatically.

In these drawings: Fig. 1 represents conventionally a plan of a portion of a flat record tablet having an ordinary zigzag record groove, and indicating in cross section an ordinary recording stylus. Fig. 2 is a similar view, indicating the new record groove, and indicating in cross-section the new recording stylus; and Fig. 3 is a horizontal section, on a still larger scale, of the stylus.

CLARIFYING ATTACHMENT FOR TALKING MACHINES.—Walter J. Burchett, East Orange, N. J., assignor by mesne assignment to the Masterphone Corporation, New York. Patent No. 1,084,570.

This invention relates to clarifying attachments for talking machines, and constitutes an improvement on the general type of apparatus illustrated in the pending application of Matthew B. Claussen, Serial No. 779,004, renewed July 14, 1913.

This object is the provision of a simple, inexpensive and durable attachment which can be quickly and easily applied to or removed from the reproducer of a talking machine, particularly one of the disc type, which will increase the volume of sound, clarify the tone, and enable a needle of small diameter to be used in sound reproduction, thereby increasing the life of the record, and these objects are accomplished by substituting a less rigid connection between the needle of the standard

talking machine reproducer, and the thin, freely vibrating sound amplifying body or disc of the said Claussen application than is employed in the specific form of construction illustrated in said Claussen application, and supplementing the engagement between the needle and disc by a second, elastic connection between other parts of the reproducer and the disc, whereby the disc is held against the needle with sufficient firmness to absorb the vibrations thereof when the reproducer is in operation, but may yet be easily removed from contact with the needle (when the latter is to be removed from the reproducer), without entirely disconnecting the disc from the reproducer as a whole

In the accompanying drawings and following description, is shown a form of the invention illustrating its mode of operation and which carries out the foregoing objects, but such disclosure is to be considered as illustrative, rather than restrictive, of the scope of the invention and the invention is susceptible of modification without departing from the spirit and scope thereof.

In the accompanying drawings: Fig. 1 is a perspective view showing the invention applied to an ordinary talking machine reproducer and disc record; Fig. 2, a side elevation thereof; Fig. 3, an enlarged detail, partly in section, showing the co-operation of the device with the needle; Fig. 4, a detail perspective of the attachment alone; Fig. 5, a view looking toward the lower face of the thin, freely vibrating sheet or disc; and Fig. 6, detail plan views of other shapes of thin, freely vibrating sheet or disc that may be used.

TALKING MACHINE.—Matthew B. Claussen, New York, assignor by mesne assignments to the Masterphone Corporation, New York. Patent No. 1,084,571.

This invention relates to the reproducing apparatus of talking machines and comprises a modification of the invention illustrated and described in my pending application Serial No. 670,146, filed January 9, 1912.

The present apparatus is designed especially to co-operate with records having grooves of uneven depth, the sound waves being recorded in the bottom of said grooves instead of in the sides of said grooves.

The best form of apparatus embodying the present invention, together with certain modifications thereof, are shown in the accompanying sheet of drawings in which, Fig. 1 is a vertical central section of a soundbox adapted for use on cylindrical

al sound records. Fig. 2 is an enlarged detail cross section of the disc which forms the novel feature of the invention. Fig. 3 is a similar view of a modification, and Fig. 4 shows the modification adapted for use on disc records having grooves of uneven depth.

TALKING MACHINE.—Matthew B. Claussen, New York, assignor by mesne assignments to the Masterphone Corporation, New York. Patent No. 1,084,572.

This invention relates to improvements on the particular form of attachment to talking machines illustrated and described in application Serial No. 670,146, filed January 9, 1912, in which is shown a thin sound amplifying disc rigidly mounted on the stylus of the reproducer of a talking machine. In the one particular form of the invention selected for illustration in said prior application the reproducing needle is clamped into the socket on the end of the stylus arm in the usual way, and the disc is held on the needle by being bored to form an opening of an internal diameter equal to or slightly less than the external diameter of the needle. This requires the needle to be forced through the disc before using, and, as it is not safe to use a needle on more than one record, it is necessary to pull the needle out of the disc every time a new record is put on, and stick a new needle through the disc before fastening the needle to the stylus arm for the next operation of the machine. While this can easily be done with a small pair of tweezers, the entire operation can be avoided by the use of the present invention, which comprises means for permanently attaching the disc to the stylus arm, and means for mounting the needle in this attaching means by any simple device such as a set screw. Consequently when a needle is worn it can be loosened from the disc, removed and a new one fastened to the disc without unfastening the disc from the reproducer.

The drawing shows a vertical central section of the preferred form of apparatus embodying the invention.

TALKING MACHINE.—Matthew B. Claussen, New York, assignor by mesne assignments to the Masterphone Corporation, New York. Patent No. 1,084,573.

This invention relates to talking or sound reproducing machines in which a stylus travels in a groove in a tablet or cylinder having variations of surface corresponding to sound waves. It is well known that in apparatus of this kind heretofore in use the loudness of reproduction may be increased by increasing the stiffness of the reproducing stylus, as by making said stylus of greater cross-section, but this results in a disadvantage in that the reproduction is then less clear and faithful. On the other hand it is recognized that the clearness, delicacy and faithfulness of the repro-

duction may be enhanced by making the reproducing stylus light, as by reducing its cross-section, but this reduces the volume of sound.

The inventor has discovered an improvement which may be applied to any of the standard forms of talking machine by which both the volume and clearness, or faithfulness, of the sound reproduction, are markedly increased and improved.

Briefly stated, this invention in its simplest form comprises the rigid attachment of a disc of convenient form to the standard form of reproducing stylus or needle.

Fig. 1 is a side elevation of a portion of a talking machine showing the reproducer with invention attached. Fig. 2 is a plan view of the simplest form of disc attachment constituting the novel element of the invention. Fig. 3 is a similar view of a modification. Fig. 4 is a vertical central section on line 4-4 of Fig. 3 showing also the reproducer stylus or needle in position. Fig. 5 is a similar view with a different kind of stylus, and Fig. 6 is a similar view of a modification.

SOUNDBOX ARM FOR TALKING MACHINES.—William W. Zackey, Philadelphia, Pa., assignor of forty-nine one-hundredths to Chas. B. Hewitt, Burlington, N. J. Patent No. 1,083,045.

This invention relates to the sound amplifying devices and has for an object to provide an amplifying arm and horn which are capable of transmitting and reproducing the sound with a minimum of variation from the original.

It has for a further object to provide a novel means of eliminating the scratching and scraping noises which are produced by movements of the sound record or irregularities in its surface. To this end a construction has been devised wherein the amplifying arm is maintained substantially in equilib-

rium, or floating condition, above the record but is so adjusted and arranged as to permit an extremely sensitive action of the needle with respect to the record.

Fig. 1 represents a side elevation of a sound

reproducing device, embodying the invention, the same being shown partly in section. Fig. 2 represents an enlarged section of a portion of the device. Fig. 3 represents a section of line x-x, of Fig. 2. Fig. 4 represents a perspective of the supporting device for the sound arm. Fig. 5 represents a section of a portion of the same. Fig. 6 represents a section of a portion of the sound arm showing its connection to the soundbox. Fig. 7 represents a section of a modified form of the device.

SOUNDBOX.—Peter J. Mukautz, Chicago, Ill. Patent No. 1,085,354.

This invention relates to improvements in soundboxes for use in connection with sound recording or reproducing machines.

The principal object of the invention is to provide a soundbox, which will so actuate the needle or stylus as it travels over the surface of the record, that clean-cut, smooth grooves will be traced therein; and in reproducing said record, the tones obtained will be intensified, clear and free from harsh or grating sounds. This is accomplished

by confining air or a liquid between a pair of oppositely arranged cupped pistons of different diameters.

Another object of this invention is to provide means for regulating the air or liquid pressure between the pistons, in order to get the best results from the soundbox either in making a record or reproducing the same.

In the drawings, Fig. 1 is a sectional elevation of a soundbox constructed in accordance with the invention, for use in connection with a laterally undulating record groove machine. Fig. 2 is a similar view showing a soundbox for an up-and-down record groove machine, and Fig. 3 illustrates a modification of Fig. 1.

BUYING AND SELLING POINTERS.

Buy with one end in view, to sell.

But remember, to sell means more than one sale. Therefore keep an eye open for quality, as well as price.

Buy as near home as possible. You will gain in time of delivery and in price as well.

If you are to sell, it will be necessary to buy. But remember that the selling depends largely on the buying.

Buy with both eyes wide open. Then when you sell you won't fear to meet the steady gaze of your customer.

The man who buys goods without taking selling into consideration reminds one of Br'er Rabbit and his experience with Tar Baby.

Don't treat your jobber as if you distrusted him. Remember he is probably as anxious to hold your trade as you are to keep one of your customers.

If you have a call for something you haven't got, and it's in your line, get it. But don't buy a gross unless you have more than one call for the article.

The merchant who buys, without first studying his local market, is like a traveler without a map; he is likely to end his journey at the wrong destination.

Buy early so that you can display the goods just before the season opens, thus securing the first orders, and also the reputation of being the leader in your lines.

Buy with due regard for the taste of your patrons. Cater to the trade of the "upper ten," but don't forget that the "lower" ten thousand are the people who spend the greater volume of money annually.

No honest purpose is ever wasted and no honest desire ever remains unanswered.

Many a man's best friends are those who know him least.

2203 Columbian Exposition March (F. W. White). New York Military Band
2204 Dreams of Galilee (C. P. Morrison) Sacred, organ accomp. Edison Mixed Quartet

VALUE OF PRICE STANDARDIZATION.

Every article that is really cheapest for man or woman to-day is really standardized. A thoughtless buyer may think she buys most carefully where she buys most cheaply. She studies the bargain columns.

In a standard article quality, cost and production go through the most minute scrutiny. It is first brought up to a standard and then sold at the very lowest price consistent with good materials, with good wages to the worker and a fair profit to the maker.

A good suit, for instance, made of honest materials that will last, made by a skilled workman who is paid decent wages so that he can do good work, can be made for just so much money, can be sold for just so much, and not a penny less.—Semi-Ready Special.

Initiative consists of doing on the spot without being told and without complaining what the other fellow never thought of doing—and didn't do when he was told.

READE your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

In the Edison line there are a great many models and a great many prices, but there is just one standard of musical excellence—the standard that the master of sound reproduction has set for himself.

To the merchant that means a real musical instrument for every customer, irrespective of the price paid. And that means satisfaction.

The Music Trade Review

This is the oldest music trade publication in this country, having appeared without interruption since July, 1879.

It is published every Saturday, and contains a thorough and exhaustive resume of all departments of the music trade industry.

Its editions vary from 60 to 150 pages.

It is conceded to be the most influential paper representing the music trade, and if you are interested in the topics with which it deals, do not fail to receive this paper regularly.

TO OPEN NEW RETAIL STORE SOON.

Milwaukee Phonograph Co. Expects to Get Into New Quarters Late This Month—Manager for Retail Department Not Yet Selected.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., March 9.—The Milwaukee Phonograph Co., jobber in Wisconsin for the Edison line, has met with some little delay in opening its big new retail Edison store, but Manager William A. Schmidt expects that the new establishment will be formally opened before the latter part of March. Workmen are now busy remodeling the quarters at 213-215 Second street, where two floors will be occupied by the new retail store and by the wholesale department, which will be removed from its present location at 347-349 Broadway. No money will be spared in making the store one of the finest retail talking machine establishments in Milwaukee, and the local trade will await with interest the opening of the new place. Mr. Schmidt says that he has not fully decided as yet upon a manager for the new retail department. The Milwaukee Phonograph Co. has started several new Edison dealers about Wisconsin, and business at the present time is three times what it was a few months ago.

BIG FIRE IN PITTSBURGH.

Store and Stock of Columbia Graphophone Co. Completely Destroyed—Loss Estimated at \$90,000—Temporary Quarters Secured.

(Special to The Talking Machine World.)

PITTSBURGH, Pa., March 5.—The store and stock of the Columbia Graphophone Co., located in the Fulton building, 101 Sixth street, was totally destroyed by fire which broke out Sunday and got beyond the control of the firemen, owing to the high wind and zero weather. The firemen estimated the loss at \$90,000 but the company officials, who are at present taking an inventory, believe that the estimate is rather high, despite the fact that the local branch was an active distributing center and a large stock was carried. The loss is fully covered by insurance.

On Monday morning Manager S. H. Nichols secured temporary quarters in the Bessmer building, directly opposite the burned building. All the important papers connected with the business were locked in the safe and were saved from destruction.

THE GRAFONOLA ON THE STAGE.

Plays Important Part in First Two Acts of "The Spendthrift" and Pleases Audience.

(Special to The Talking Machine World.)

ATLANTA, Ga., March 5.—The Columbia Grafonola was used to excellent advantage in performances of "The Spendthrift" which were recently given at the Princess Theater in this city. The appearance of the machine attracted general interest and its musical qualities were commended by many of the newspaper critics.

The play called for the use of the Grafonola in the first two acts, and in the second act the curtain rises while the machine is playing "Idilio." The machine plays for nearly five minutes, and the success of this demonstration was well evidenced by the fact that the machine held the attention of every person in the audience and was even encored.

McGREAL TO RUN FOR CONGRESS.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., March 5.—Lawrence McGreal, formerly Edison jobber in Milwaukee, and a former president of the National Association of Talking Machine Jobbers, is being urged by his friends to make the formal announcement of his candidacy for Congress from the Fifth Congressional District on the Democratic ticket. Mr. McGreal, who is now sheriff of Milwaukee County, has just returned from California.

KILL PROPOSED INSTALMENT BILL.

Delegation of Talking Machine, Piano and Furniture Men Visit Albany to Outline Danger of Proposed 80 Per Cent. Clause—Maker of Bill Only One to Appear in Its Favor—E. K. Camp Appears in Opposition.

Talking machine dealers throughout New York State were greatly interested in a hearing which was held February 25 before the Committee of General Laws of the Assembly, at Albany, N. Y., relative to a proposed amendment to the Personal Property Law. This bill, which was known as Assembly Bill 287, and introduced by Assemblyman Sufirin, had for its purpose the adding of another section to the Personal Property Law which would force the vendor in a conditional sale to pay back to the vendee 80 per cent. of the money paid on the contract before starting to recover the goods in case of default of payment. This is the same bill that was introduced last year, and which made no progress before the Assembly session came to a close.

In view of the rapid growth of instalment sales in the talking machine business, the proposed bill loomed up as a most important matter, as it practically made the sale of talking machines on an instalment basis an impossibility. E. K. Camp, the able counsel for the Columbia Graphophone Co., attended the hearing before the committee, as did representatives of the piano and other interested trades.

The hearing as a whole was decidedly one-sided, no one appearing in favor of the bill except Assemblyman Sufirin, who drafted it. The utter absurdity of the 80 per cent. clause was brought out early in the hearing, and after listening to several of the spokesmen for the furniture industry and Mr. Sufirin's plea for the bill, Chairman Smith, of the General Laws Committee, publicly asked the members of the committee if any one of them was in favor of the bill, and receiving no response in the affirmative indicated that he thoroughly understood the details of the situation, and required no further arguments in opposition to the bill.

Assemblyman Sufirin, at the start of his argument, stated his desire to offer several compromises, including the elimination of musical instruments from the provision of the bill, limiting the bill to necessities only, but was not quite certain as to what came under the head of "necessities." The apparent unanimous opposition of the General Laws Committee to the bill practically eliminates any chance of its becoming a law, and there is every indication that the present provisions of the Personal Property Law will not be changed during the session.

VICTROLA MAKING YOUNG MOZARTS.

Crandall Hendershot Becomes a Vocalist at the Age of Three, Thanks to the Victrola.

(Special to The Talking Machine World.)

CLEVELAND, O., March 7.—It is history that Mozart at the age of three played well on the clavichord. If this can be taken as a criterion of youthful precociousness in the musical realm, then a brilliant future awaits Crandall, the son of Fred K. Hendershot, of the suburban town of Chardon, who is an enthusiastic admirer of the Victrola and can sing a repertoire of popular songs, though he has not yet reached the age of three. Musicians, who have heard the boy sing, are astounded at the correctness of key, the perfect time he maintains, and his clear enunciation. Among the songs the boy sings perfectly are "On Moonlight Bay," "Jungle Moon," "Marching Through Georgia."

When the Victrola plays he isn't satisfied until his parents let him stand in front of the talking machine, where with improvised baton, he beats time with absolute precision.

THE GOSPEL OF COMMERCE.

This Is How Modern Advertising Is Considered by Thinking Business Men—Honesty and Honor Keynotes of Success in Commercial Sphere Today—Past and Present Compared.

Advertising has undergone a great change in the past twenty-five years. To-day it is the good word—the gospel of commerce.

In an elder day, it was a cunning device by which the commercial cut-purse seduced the unwary into trading with him. The advertising man then became a hired liar, paid to do that which the proprietor has neither the moral backbone nor the power to do himself.

Times have changed, because men have changed and business with them.

There never was a time when honesty was more honored—when service brought greater rewards than to-day.

The world is changing its faith. This is the greatest spiritual era the world has had for one hundred years. As E. St. Elmo Lewis says, it is not sufficient any more for a man to be a success to be accepted in the market place—he must have more than money—he must have a soul.

If he misdescribes an article in his advertisement, shall he be accounted an honest man?

Shall he be accepted as an honorable man if he makes selfish and subtle distinctions between what he would tell the stranger across his counter and what he would describe to one of his own family?

COLLECTS INDIAN TRIBAL SONGS.

Miss Frances Densmore Makes Records of Indian Tribal Songs and Greatly Interests Members of the Anthropological Society at a Recent Session—Some Remarkable Results.

Sioux war songs were sung and war stories were recently shown before the members of the Anthropological Society by Miss Frances Densmore at the National Museum in Washington. Miss Densmore has been making a special study of Indian music for the Bureau of Ethnology for some years.

She goes into the field with a Columbia cylinder graphophone and a musical note book, and collects the tribal songs and their accompanying legends almost as a botanist would collect flowers. The series presented to the Anthropological Society was the result of a season's work among the Sioux. There was a phonograph record of an Indian woman singing a death song for her husband, who had been killed in battle. Most of the songs were wild, quavering minors, and some had strange changes of time and curious "accidentals" in the score.

PHONOGRAPH FOR HIGH SCHOOL.

North Des Moines High School Selects a \$250 Fumed Oak Edison Disc Phonograph.

(Special to The Talking Machine World.)

DES MOINES, IA., March 7.—About a year ago the people interested in the welfare of the North Des Moines High School (which is one of three of our big high schools) decided to raise a fund for the purchase of a talking machine. When their fund had been brought up to the required amount they looked around to make their choice. After having had submitted to them in a competitive test the various makes of phonographs, the Edison salesman "came home with the bacon," having sold them not a \$200 instrument, which they had decided to spend, but a \$250 fumed oak Edison disc phonograph. Every member of the committee and of the school, and everyone around the school interested in this matter is highly delighted.

SOMETHING WORTH EMPHASIZING.

A man may have a lot of sand without ever letting you suspect it, but the fellow with nerve always lets you know he has it.

QUESTIONS OF VITAL INTEREST WERE DISCUSSED

At the Recent Annual Meeting of the Chamber of Commerce of the United States Held in Washington Bearing on the Talking Machine Trade—Oldfield Bill Denounced and the Maintenance of Retail or Resale Prices to Be Investigated Officially.

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 6.—At the second annual meeting of the Chamber of Commerce of the United States which was held in this city late last month, not only were many topics of national interest affecting every phase of business discussed, but questions of immediate moment to talking machine men, such as the Oldfield bill and the matter of resale of prices were up for consideration.

It was perhaps the most representative gathering of the leading business men of the country ever assembled, and the discussions and reports were carried on on a broad plane with a splendid spirit of good will on all sides, the aim being to arrive at conclusions that would tend to uplift the commercial affairs of the United States and elucidate many of the perplexing questions that are now up for consideration.

The Oldfield Bill Denounced.

The talking machine trade interests were concerned when on the very first day of the Chamber meeting the committee on patents, trade-marks and copyrights brought in a report vigorously denouncing the Oldfield bill, which strikes at price maintenance and recommending the amendment of the Kahn act, which is a measure looked upon with suspicion by many manufacturers of musical instruments of a class that are liable to involve a conflict of foreign and American patents. Recommendations were made for the creation of an expert commission empowered to investigate the patent laws and for the establishment of a court of patent appeals, to which cases may be taken by either party to a patent suit. This court of patent appeals would do away with confusion such as has, on certain occasions, being precipitated in the music trade when a patent has been declared by the Circuit Court of Appeals in one district to be valid and to have been infringed, whereas the Circuit Court of Appeals in another district had held this self-same patent to be invalid.

In criticising the compulsory license provisions of the Oldfield bill, the Chamber of Commerce committee said: "The enactment into law of this provision would surely tend to induce everyone to keep his inventions secret and never place them upon the public patent record." In condemning the Oldfield bill for the limitations it places upon the right to enforce restrictions on the sale or use of patented articles, the report submitted to the national Chamber of Commerce says: "The restriction of conditions of use and sale is a ques-

tion of the 'distribution' of the particular manufacturers' goods and is not one in which the public is interested. The retail dealers are heartily in favor of having the manufacturer maintain a fixed retail price."

Maintenance of Retail or Resale Prices.

One entire session of the Chamber meeting was given over to a discussion of the subject of the maintenance of retail or resale prices, and in the end it was decided to appoint a special committee to investigate this subject also. An interesting feature of the presentation of this subject was an announcement by the United States Commissioner of Corporations, Joseph E. Davies, who has been charged by the Secretary of Commerce with the making of an official investigation of this subject.

Commissioner Davies let out the secret that an effort is now being made in certain quarters to have price maintenance sanctioned by law; that is, to have an express statute enacted that will give manufacturers under certain conditions the right to fix the prices at which the articles of their manufacture, respectively, shall be sold to the ultimate consumers. Then, telling of his own plans, he said: "The Bureau of Corporations is now engaged in an exhaustive study of the question from an economic point of view. It is our purpose to make that investigation fair and impartial, without preconceived bias, prejudice or judgment. We are collecting our information from both sides and with equal fairness. We are meeting with cooperation in this investigation and we ask your continued aid as business men in our work."

Protection from Price Juggling.

"Protection from Price Juggling" was discussed by William H. Ingersoll, of New York, a member of the American Fair Trade League, which has enrolled members from the talking machine and music trade. Mr. Ingersoll was particularly severe in his denunciation of price cutting and "bargain offers," saying that this form of advertising tended to undermine public confidence in advertising statements of all kinds. Said he: "In all of this advertising goods are offered at approximately one-third less than they are said to be worth, and such a perpetual avalanche of bargains would tax our credulity unless substantiated by very tangible evidence that real bargains of such proportion are possible.

"When a well-known article is sold at a cut price, the first effect is a stimulated demand, if the offer is bona fide. Oftentimes such offers are made with a very limited stock on hand, however,

and 'something else' is offered to those who arrive after 10 o'clock. The secondary effect is that people are led to believe that they ought to get the goods regularly at the reduced price and that those who charge more are exacting extortionate profits; the goods are cheapened in their estimation; they are no longer satisfied to pay former prices, so that the good will of the maker is seriously impaired."

Attack Quantity Discounts.

Men engaged in the various branches of the trade may find food for reflection in an attack which this speaker at the Chamber made upon the present system of quantity discounts. His statement on this score was: "It is worthy of note that the present unscientific, unfair scale of quantity discounts allowed generally to large buyers is turning the retail business into one, not of merchandising, but of financial manipulation to combine outlets so as to gain buying power and be able to underbuy the general run of merchants. A premium is put upon mere size, permitting wastefulness of management through unearned buying advantage, penalizing the small independent dealer, closing the way to the newcomer and making it impossible for the individual retailer to compete regardless of how capable he may be. Quantity discounts should be reduced to a scientific scale or abolished, as rebates for quantity freight shipments have been abolished under the law."

The so-called anti-trust bills which are now before Congress were strongly opposed, and it was the general belief of those present that in their present form they would work a distinct hardship to and harass the business of the country.

There was also an interesting discussion upon the effect of the "chain store" upon modern business conditions, and in order to indicate the spread of the chain store idea it was stated at the meeting that Boyd's Dispatch now lists more than 10,000 separate chain store systems in this country, and the fear was expressed by some speakers that the power which resides in the great chain store systems is a decided menace if there is any possibility that it will be used for price dictation or for the elimination of the individual retailer.

JULIAN ELTINGE FALLS IN LINE.

C. S. Calveard, manager of the Victrola department of the Montenegro-Riehm Music Co., Louisville, Ky., recently closed a sale of unusual importance in the nature of a Victrola and a large supply of records to Julian Eltinge, the well-known actor and female impersonator. Mr. Eltinge was delighted with the musical qualities of the Victrola and contemplates placing it in his private car to accompany him on all his travels.

Some people go to a moving picture show because it doesn't make them think. Others go because it does. And there you are.

It Requires No Great Stretch of the Imagination to Realize That Eastern Service Must Be Good

CONSIDER: The fact that we have been handling talking machines, records and supplies *exclusively* for nineteen years.

- : That our entire time, energy and attention is devoted to one line.
- : That constant application is given to the betterment of our service.
- : That our stock is large, complete and up-to-date, and our shipping facilities unusual.

THEN YOU HAVE some of the reasons why EASTERN SERVICE is different from the ordinary.

The absolute proof is in the trying. Try it.

UNIQUE RECORD ALBUMS

CONTAINING SIX PAGES OF INDEX

For Durability, Artistic Design and Finish, our Albums have no equal. They are made in the most substantial manner by skilled workman, and are first-class in every particular. We sell them at very low prices to meet competition.

DISC RECORD ALBUMS
ARE WHAT EVERY
Talking Machine Owner
MUST NOW HAVE

With the index they make a complete system for filing away all disc Records, and can be added to, Album by Album, as Records accumulate, like books in a library.

OUR SUPERB ALBUMS ARE BEST FOR VICTOR, COLUMBIA AND ALL OTHER TALKING MACHINES

MADE IN TWO SIZES TO FIT ALL 10 AND 12-INCH DISC RECORDS

These Albums contain 17 pockets made of strong fibre paper, each pocket having a hole in the center, as shown in the picture. These pockets are so made that they show very plainly both the single and double face titles on the Records. The Albums are bound in the finest quality of Brown Silk Finish Cloth, with gilt title on front cover. They are also bound in imitation leather. Write for sample and prices of our Albums, which are superior to all others.

Address NATIONAL PUBLISHING CO., 235 South American St., Philadelphia, Pa

TRADE ACTIVITY IN CLEVELAND CONTINUES.

Despite Dulness in Many Lines Talking Machine Business Made Splendid Showing for January—Outlook for March Better Still—The Phonograph Co. Carrying on Active Campaign—Monthly Concerts of Eclipse Musical Co. a Feature—News of Month.

(Special to The Talking Machine World.)

CLEVELAND, O., March 9.—March, ushering in spring, though it came in like a lion, finds the various talking machine jobbers and retailers in the very best of spirits. All through the winter months trade continued good, and generally satisfactory, but with the coming of mild weather, good walking and sunshine, trade has taken on new life, and there is great expectancy of a brisk, profitable spring business.

At the Ashtabula County teachers' annual meeting, Dr. W. H. Squires, of the department of philosophy in Hamilton College, Clinton, N. Y., predicted that "teachers will soon be displaced by 'canned education,'" inferring that the talking machine will be adopted in educational work.

A private musical recital was given by the Phonograph Co., in the recital hall, March 2. The program included the latest Edison operatic selections and a number of the March records. The audience signified their appreciation of the entertainment by frequent applause.

Mr. Cadell, expert in the manufacturing department of the Victor Co., paid the Eclipse Musical Co. a visit recently, and demonstrated the new motor just put out. The officers of the Eclipse were greatly pleased with his visit.

W. A. Condon, of the Masterphone Corporation, New York, spent several days visiting dealers the first of the month, exhibiting the attachment, using the fibre needle. He secured a large number of orders in the city.

Oliver Jones, of the Victor Talking Machine Co., was a visitor here on the first of the month. He was on his way West and stopped over for a few days.

The retiring from business of the Marks Co., eliminates the talking machine department, which seemed to be in a prosperous condition. Other departments of the store failed to respond profitably, and a receivership resulted.

The monthly concerts given by the Eclipse Musical Co., under the direction of Fred E. Lane, are decidedly interesting. The store is filled to capacity each month.

R. A. Alpers, manager of the Taylor Arcade branch of the Phonograph Co., is handling a large amount of business. He is an ardent Edison adherent.

The expanding business of the Eclipse Musical Co., is an indication of the prosperity of the Victor dealers. P. J. Towell says business in the wholesale department would be limitless if he could only get all the goods he wanted when he wanted them. The shortage is more especially in the line of records, the demand for which is growing beyond the resources of the manufacturers.

T. H. Towell, who has just returned from a visit at the Victor factory, where he spent several days, expressed himself astonished at the magnitude of the diversified business the Victor Company is handling. He says that if the company had the facilities to turn out ten times its present output, the goods could be sold, as it already has orders for that amount ahead.

The business of the Phonograph Co. has demonstrated that the Edison disc phonographs are formidable competitors. The business of the company has steadily increased since the opening of the distributing store, and for the month of February exceeded that of December last. The manager says the retail business has exceeded all ex-

pectations. A number of new dealers have been signed up. Among the more prominent are: L. Weir, Clark avenue, city; the Hunter Jewelry Co., St. Clair avenue, city; Homer S. Williams Co., Youngstown; the Wickins Co., Lorain and Yingling Bros., Newcomerstown. The above named joined the "Edison Disc Association" as charter members.

L. N. Bloom and B. W. Smith, of the company, recently spent a few days at the Edison factory, and Mr. Bloom says the visit was a most interesting and profitable one.

Notwithstanding that Wm. Taylor, Son & Co. are adding several stories to the building, business is going on as usual. Mr. Davis, manager, says trade is better than ever, and that sales of both Victor and Columbia goods are fine.

The Victrola display of the Caldwell Piano Co. is attractive, and the business of the department is continually increasing. The fine demonstration rooms are usually crowded.

Everything musical is being called for at McMillian's, and the Victrolas and Edison phonographs are leading the procession. Mr. Kellogg said business was very much better than had been anticipated, and that the prospects looked good.

That business is pre-eminently good in the talking machine department of the W. F. Frederick Piano Co., is self-evident. The store is usually crowded with customers, and Manager N. H. Cook is pleased with the outlook.

The most satisfactory conditions exist at the store of the W. H. Buescher & Sons Co. Sales cover the entire line of Victor machines and records, and business is astonishingly good.

The department stores report very satisfactory business in the talking machine departments. Mr. Friedlander, of the Baily Co., says the company closed the largest February sales of Victors and Edisons it ever had. Miss Ethel M. Voke, of the May Co., reports machine and record sales away ahead of last year.

GENERAL CONDITIONS FAVORABLE ON PACIFIC COAST.

Crop Prospects Excellent Owing to Plenty of Rain—Distributors of Victor, Columbia and Edison Products Report Increasing Demand—Opening of Opera Will Help High-Class Trade—Appointment of New Edison Dealers—News of Month Worth Recording.

(Special to The Talking Machine World.)

SAN FRANCISCO, March 5.—The talking machine trade here, as well as business men generally, are very well pleased with the situation in California at present. The State has been thoroughly soaked with rain for the first time in three years at least, and consequently the crop outlook is better than for some time past. With general conditions favorable, talking machine dealers anticipate a banner year. The general tendency on their part is to get their stocks in very good shape, both in respect to records and machines, and there is every indication of increasing popularity for the talking machine in this section, rather than a falling off in demand or even a standstill. Distributors of Victor, Columbia and Edison products, all three, report a steadily increasing demand. As to dance records, they are still demanding a great deal of attention, and are undoubtedly the principal feature of the business at the present time, although the appearance of several artists in this vicinity the past month, and others due in the next two weeks, has as usual stimulated the demand for their particular records to a very noticeable extent. Dealers have taken full advantage of their engagements, by arranging special window displays featuring their records. With the grand opera season opening in San Francisco the middle of March, an increased demand for operatic selections is anticipated in the next few weeks. On the whole the outlook for record business for the coming month is particularly good.

February Business Proves Excellent.

W. S. Gray, district manager for the Columbia Graphophone Co., and F. Anglemier, manager of the local wholesale department, reports a very good month's business in February, in spite of the interference to traffic in certain parts of the State on account of washouts. Locally, the demand for both records and machines has been gratifying to them. Realizing the important position of the popular dance records and also the advantages of co-operation, Mr. Gray has inaugurated a plan for monthly meetings of the force connected with this office, at which attention is divided between business and pleasure. They are held as soon as possible upon the receipt of the month's new records, and these are all tried out for the benefit of those connected with the establishment, so when a record is mentioned everybody will know exactly what is being talked about. These meetings are of an informal nature, and open for free discussions, such as to stimulate enthusiasm all around.

A. Glenn to Return to Business.

Word has been received here that A. Glenn, manager of the Columbia Graphophone Co.'s headquarters in Portland, Ore., who has been out on leave of absence for some little time for the benefit of his health, will visit in San Francisco before resuming his duties in the North, which, during his absence, are being looked after by L. D. Haeger, traveler for the company in the Northwest.

Increasing Demand for Victor Goods.

Andrew G. McCarthy, treasurer of Sherman, Clay & Co., who devotes particular attention to the talking machine department, says the demand for Victor goods continues to increase steadily. This week the company received a request from the Los

Angeles distributing station for more space, in order to provide better facilities for supplying an increasing demand for Victor products in the southern part of the State. Here the appearance of Kreisler, John McCormack, Harry Lauder, Tetrassini and other Victor artists during February and March, has been observed by Sherman, Clay & Co., by making special features of their records, and with very good returns, according to Mr. McCarthy. He says the craze for dance music continues unabated, and that Victor dealers are having difficulty in keeping their stocks complete.

Growing Popularity of Edison Line.

J. S. Baley, manager of the local branch of Babson Bros., reports business keeping up in fine shape since the first of the year. He says his greatest difficulty at present is to get enough disc records. He finds interest increasing rapidly in the Edison disc products, and at the same time has no complaints to make about cylinder business.

Returns from Honolulu.

L. V. Ridgeway, the well-known representative of Lyon & Healy, stopped over in San Francisco for a few days recently upon his return from Honolulu.

Many New Edison Disc Dealers.

A. R. Pommer, of the Pacific Phonograph Co., reports a very good month's business in Edison products for February. A number of new dealers have taken on the disc line, including J. T. Bowers & Son, here; the Hale Piano Co., in Medford,

Ore.; the Silvers Piano Co., in Tacoma, Wash., and Ramaker Bros. in Seattle, Wash. J. E. McCracken, traveler for the San Francisco house, is still in the Northwest, assisting in getting things started at Seattle. He is now making a trip over Oregon in company with Mr. Schwab, traveler for the new Seattle firm, which will look after that territory in the future. Another traveler has been engaged by the Pacific Phonograph Co., N. W., in the person of C. E. Lyons, formerly special representative of the phonograph department of Thomas A. Edison, Inc. He is making his initial trip around Seattle.

Interesting Personal Items.

Special representative, E. V. Chandler, of Thomas A. Edison, Inc., has been calling on the trade in southern California for the last two weeks, and upon leaving here expected to cover Arizona before returning.

A. McDowell, dealer of Petaluma, Cal., was a recent visitor at local talking machine warerooms, placing orders for stock, also Mr. Logan, of the Logan Music Co., Salinas, Cal.

Peter Bacigalupi, Jr., started in several months ago to do a cash business in talking machines, and he claims his plan is working out very well, that there are plenty of people in position and willing to pay cash for machines, in spite of the liberal terms usually offered by dealers.

L. E. Cooley, superintendent of schools in Imperial County, recently endorsed a plan for providing talking machines at all the schools in that county, in the near future.

Byron Mauzy was the only representative of the music trade going to Los Angeles recently on the Exposition Flying Legion. He took along a player-piano and a Victor Victrola for the entertainment of the "boosters."

AN ORIGINAL SERIES OF RECITALS

Held in Wanamaker Concert Hall, New York, Feature the Victrola in a Prominent Way—“The Study of Music” Well Presented.

The Victrola played a prominent part last month in a "Study of Music," which was featured in the auditorium of the New York store of John Wanamaker. This interesting and original series of recitals purposed to present a chronological study of music, accompanied by interpretations of the dance in various forms. The Angelus player-piano was also presented as an important incentive to the present revival of dancing.

Elaborate programs for these interesting recitals had been prepared, and the Victrola appeared to excellent advantage as a medium for furnishing the correct music to illustrate the dances of various periods. In certain selections the Victrola and Angelus were played in conjunction, the effect being most delightful.

The "Study of Music" had been advertised extensively in the daily newspapers, and as a result, it was necessary to turn away many music-lovers who had been attracted by the originality of the concerts and appreciated the value of hearing the Victrola in such appropriate surroundings. Soprano solos, violin solos and duets were also included in the daily performances, which were given the last two weeks of February.

In addition to the unique presentation of this "Study of Music," these concerts served to impress on the minds of the music-lovers, the true value of the Victrola as an important factor in the cultivation of musical tastes. The musical prestige of the Victrola was never more emphatically pre-

sented than at this series of Wanamaker recitals, and it is interesting to note that the store's Victrola section closed a number of sales of expensive machines to visitors to the concerts who had been impressed with the character of the Victrola's performance.

The New York store of John Wanamaker has now in preparation several other original plans which will serve to still further illustrate the musical standing of the Victrola.

PHONOGRAPH HIS GREAT SOLACE.

An Affecting Story of the Late Col. Ralph B. Eads and His Admiration for the Phonograph.

Instead of the reveille to which he had long been accustomed in the army, Col. Ralph B. Eads (retired), of Newton, Mass., each morning had his Edison phonograph play his favorite hymn, "Abide with Me." True, the second stanza, "Fast Falls the Evening," seemed to make it more of a sunset than a sunrise hymn; nevertheless, the Colonel wanted to hear each morning his favorite hymn on rising and was particularly fond of the last stanza, "Heaven's Morning Breaks at Last." At last it did break; the Colonel was dead, and among his effects was found a request that this favorite hymn of his should be played once more on an Edison at his funeral. His wish was complied with, and among the mourners present were several army officers and veterans, whose eyes were moist as they listened. To an observer the scene suggested that wonderful painting entitled "The Last Muster."

No honest purpose is ever wasted and no honest desire ever remains unanswered.

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

Gun Metal, \$2.00 list. Nickel Plated, \$2.50 list. Gold Plated, \$3.00 list.

May be adjusted to both Columbia and Victor disc machines. Order from any Columbia Distributor.

Model A80, Mahogany, \$80.00

Sell the Edison line because it meets every requirement, and—

because it more than satisfies every patron.

It isn't enough for you to carry a line of phonographs which will satisfy any one class of people. There is no profit in handling merely expensive instruments or merely those of moderate price. There is no satisfaction in selling a phonograph which finally gets over by the force of your talking ability, and which fails to satisfy later in the home because you aren't there to boost for it.

59 Lakeside Ave., Orange, N. J.

DEMAND IS FOR THE HIGHER-PRICED MACHINES.

Detroit Dealers So Report in Discussing Conditions for Past Month—Demand for Records Still Continues to Be Enormous Owing to Dancing Craze—Max Strasburg Co. Enlarges Department—Talking Machine and Automobile Businesses Most Active in City.

(Special to The Talking Machine World.)

DETROIT, MICH., March 9.—The past four weeks have been just wood-sawing time with the Detroit talking machine houses. There have been few noteworthy features, or incidents. February was better all along the line than was February of 1913. The dance craze seems to have been responsible for it. The business in records alone has been sufficient to keep everybody connected with the trade moving. All stores are short of records. On big orders only about 20 per cent. of the number asked for are delivered. Appeals to jobbers in all parts of the country have failed to bring relief.

There is a belief that this abnormal record business will remain a long time—but the belief is conditional. The business must be properly catered to by the manufacturers. The dance records must be perfectly made; must have the right tempo and the right tone. Otherwise they won't sell. Even the slightest imperfection will render a record a "dead one."

The cause of the "dance craze" is simply the opportunity for it, the dealers all agree. "For the first time in their lives, people have an opportunity to dance in their own homes," said Max Strasburg, of the Victrola Shop. "This goes for the wealthy as well as the classes, because while the owners of mansions have had ballrooms in them ever since dancing came into vogue, they have not always had the orchestra with them. They could dance in their homes, but not always just when they took a fancy to. The talking machine has made it possible to transform an ordinary social call into a dancing party on the spur of the moment. I think the new custom will continue for three or four years as a fad, and for a much longer time as a common practice—until science evolves something superior, in fact."

The demand for records is causing all the downtown dealers to plan enlargements of their record filing accommodations.

The visit to Detroit of the "Bird of Paradise" theatrical company has caused a demand for the Hawaiian records put out by the Victor Co. that has practically cleaned out the supply. These records have been very popular ever since their appearance about a year ago, and for that reason large stocks of them have been carried. The new impetus is bound to make them more popular than ever. "I could sell a thousand of them in a week, if I could get them," said one dealer.

The trade in Detroit still sticks to the higher-priced machines, generally speaking. Grinnell Bros., as Victor jobbers, have had considerable call from country points, and from outlying Detroit stores, for the cheaper machines, and just at present are pretty well cleaned out of all grades below the \$75 ones. The Max Strasburg Co. and the J. L. Hudson Co., on the other hand, no longer pay more than passing attention to the lower priced machines. If a patron desires one, they will obtain it for him. But primarily, they offer the large machines, and tell why they are worth the price.

Two Detroit influences which have been supposed to affect all sorts of business quite noticeably, have had no visible effect at all on the talking machine business. One of these is the unusually large number of unemployed here this winter. Very few men who have purchased talking machines have missed payments with the explanation that they were out of work. There has been no diminution of sales, such as would be certain of the problem of the unemployed had reached a vital stage. This fact tends to prove a theory now quite generally accepted that the most of the unemployed in Detroit are men who were lured to the city by stories of Detroit's great prosperity, and especially by the story of Henry Ford's munificence in declaring a ten million dollars' dividend among his employees.

The Ford announcement is in itself the other influence. Undoubtedly the talking machine merchants are making some sales directly because of the five dollars a day minimum wage now in effect in the Ford plant. But there is no flood of such business. Perhaps the talking machine business is so good that the influx is not noticeable. Not since the summer of 1911, almost three years ago, has there been a dull spell in the talking machine business in Detroit. The constant increase has been so steady and big that it has come to be accepted here as the normal condition. So even a big swelling of sales through Ford channels would be regarded as nothing out of the ordinary.

At the same time, it is realized by all the dealers that the Ford employees are not being put on the advanced scale payroll without investigation as to their habits and domestic policies. Ford's agents let it be known to the employees that thrift is the principal thing that is expected of them, aside from efficient work, and that "thrift" means either a savings bank account or an investment in

real estate. This naturally militates against the purchase of talking machines by the employes until they have nest eggs saved up.

The Max Strasburg Co. has just completed a rearrangement of record racks by which room for ten thousand additional records has been provided. This company now carries in stock about thirty thousand records, constantly. The company will establish a motor car delivery of its own within a few days.

The company has been trying, ever since it took on the Columbia line more than a year ago, to obtain more space adjoining its store, but has been unable to do so. It has been decided to take basement space, in lieu thereof, and a contractor is now figuring on how to make an underground palace of the downstairs floor turned over to him. About five more demonstrating rooms will be built.

The original store has been redecorated and the demonstrating rooms fixed up with beamed ceilings.

Oliver Jones, credit man of the Victor Co., was a visitor in Detroit the week of March 1.

NEW UNION REPRODUCERS

Made by the Union Specialty & Plating Co. in Great Demand—Plays Edison Records on Victor and Columbia Machines.

(Special to The Talking Machine World.)

CLEVELAND, O., March 9.—One of the busiest factories in Cleveland is that of the Union Specialty and Plating Co., principally engaged in the manufacture of Union phonograph specialties. H. B. McNulty, general sales manager of the company, said:

"Business is fine and the prospects are better. Since bringing out our new sound box, it is meeting with universal favor. We are receiving numerous and large orders for both the new sound box and the Union No. 1. We are now employing twice as many people as we did last year, and all are busy as bees. We have installed a jewel department for manufacturing jewels, both diamonds and sapphires, and will have something new for the trade from this department before long. Our business is growing so, and has grown to such an extent, we were compelled to lease the adjoining building, giving us about 8,000 square feet of floor space.

"We are starting an advertising campaign, in conjunction with the Talking Machine World, in quite a few magazines, on our new Union reproducers, No. 2 and No. 3, for playing Edison records on Victor and Columbia machines, as we wish to call the peoples' attention to their fine reproduction with diamond points."

The DITSON Pledge

Is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind, not to mention cabinets, needles and trade-marked accessories.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

OLIVER DITSON CO., Boston, Mass.

The "Leader" at \$75 has quality—quality of appearance, quality of workmanship, quality of tone. That is enough to ensure a market for this Columbia instrument.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

**Columbia Graphophone Company
Woolworth Building, New York**

NEW DEALERS IN INDIANAPOLIS.

E. L. Lennox Piano Co. Added to List of Victor Dealers in That City—To Appoint New Retail Representative for the Edison Disc Line Which Is Proving Very Popular—Record Shortage Still Exists—General Business Excellent and the Prospects Are Splendid.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., March 6.—Plans are being made by the Kipp-Link Phonograph Co., 345 Massachusetts avenue, jobber for the Edison machines, to place Edison departments in three or four of the large music houses and department stores of Indianapolis. Up to this time the Edison machine could be only obtained at the Kipp-Link store but that is to be changed.

The demand for the new Edison disc machine is growing every day, and with the opening of branch departments in the downtown stores it is expected that all of the public will become better acquainted with Edison's latest masterpiece. Business with the Kipp-Link Co. is rushing.

Walter E. Kipp, of the Kipp-Link Co., in a talk with the representative of The World, asserted that the growth of the talking machine business to him was simply wonderful. While the talking machine is regarded as a luxury by many, said Mr. Kipp, still it becomes a necessity in the relief that it affords the workers of the city and the country.

We have with us another music house handling the Victor talking machine—the E. L. Lennox Piano Co., 311 North Pennsylvania street. This makes the seventh spot in Indianapolis where Victor talking machines and records can be had. Notwithstanding the number of places where the Victor machine is on sale, all are doing as much business as they can look after, that is, as much business as they can take care of with the limited number of machines and records. All are crying for more, more, more!

W. S. Barringer, of the Stewart Talking Machine Co., was scratching his head gazing ruefully at an order before him when the writer called on him. He pointed to a short order for twenty-five records. One half the records were out. "That's the way it goes," declared Barringer, "we simply can't get the records to take care of the business."

A. W. Roos, of the Columbia Graphophone Co.'s local store, is happy over the acquisition of a large block of wholesale territory in central Indiana. The Indianapolis store has not had any wholesale territory up to this time, and Roos was "itching" to get into the wholesale field. Twenty-five counties surrounding Indianapolis have been allotted to this district for wholesale territory.

Mr. Roos predicted some time ago that business in all lines would pick up after the first of the year, and he says he knows his prediction is true as far as the talking machine business is concerned. Dance records continue to be in demand and the Columbia records, which have been made especially for the dancers of the tango, hesitation and other modern day dances, are sought after to the extent that the shelves are often empty.

H. L. Willson, of New York, assistant general manager of the Columbia Graphophone Co.; W. C. Fuhri, of Chicago, district manager, and T. D. Westerveldt, superintendent of the Dictaphone agencies, were recent visitors to the Indianapolis store.

Thomas Devine, in charge of the Dictaphone business in Indianapolis and surrounding territory, has been spending considerable time outside Indianapolis building up a large Dictaphone business.

A "speechless" banquet will be a feature of the convention of the central division of the Associated Advertising Club of America which will be held in Indianapolis April 9, 10 and 11. The banquet also will be without a "headache," for the general committee in charge of the arrangements for the convention has ordained that no drinks are to be served. The banquet will be served at the Claypool hotel where the convention will have its headquarters. The banqueters will be entertained by vaudeville stunts, and who is there, who says that will be worse than speech-making? Advertising experts will be brought here to address the convention.

NEW QUARTERS IN WINNIPEG.

Winnipeg Piano Co. Holds Formal Opening of New Building in That Live Canadian City—Handsome Grafonola Department a Feature.

(Special to The Talking Machine World.)

WINNIPEG, CANADA, March 7.—Interest in matters musical cannot be said to be on the wane at all in Winnipeg, judging by the enormous crowds that attended the formal opening of the Winnipeg Piano Co.'s new piano and music store. The orchestra, vocal quartet, and soloists assisting had a very large and appreciative audience, and many flattering remarks greeted their efforts.

Numbers of old friends were in evidence, congratulating the two proprietors, John Smith and A. E. Grassby, on having been able at last to make the change of stores so long desired, which all goes to prove that business conducted in a businesslike way, is bound to succeed, especially in a country of such promise and opportunity as Western Canada.

Starting in their old store in Manitoba Hall over ten years ago, with only one line of pianos, this house has certainly made great strides, as is evidenced by their new quarters, and their many lines of high grade pianos, including the following exclusive agencies: Angelus, Autopiano, Bechstein, Bell, Chickering, Gerhard Heintzman, Gourlay, Haines Bros., Sherlock Manning, Smith & Barnes, and the Columbia line of talking machines.

For several years since their business overtook the capacity of their old store, the Winnipeg Piano Co. has in vain tried to secure suitable quarters, but when the Canada Furniture Co. moved from its big store at the corner of Hargrave street and Portage avenue, the Winnipeg Piano Co. was not slow to take advantage of this, the finest store in the city without exception.

The interior of the store is very attractively laid out, a large mezzanine floor having been built at

the rear to afford several beautiful Grafonola parlors above and piano parlors beneath, so as to avoid the necessity of taking patrons into the basement.

The Winnipeg Piano Co. is well known as the largest Columbia retailer in Canada and now that it has seven Grafonola parlors instead of three only, under the management of Joseph Tees, it will no doubt give a better account of itself than ever before.

Separate departments are provided for player-pianos and a large player roll library.

The smaller musical instruments and sheet music departments are in the capable hands of Mr. McLaskey, and it is probably unnecessary to add that the very best of attention and service can be relied on.

VICTROLA WIRELESS RECITAL.

A Novel Entertainment Prepared for the Patrons of the Famous & Barr Store in St. Louis Caused Much Favorable Comment.

The Famous & Barr Co., St. Louis, Mo., provided a novel entertainment recently for its patrons in the nature of a Victrola wireless recital. The wireless Victrola was created by combining the wireless telephone and the Victrola. Music was transmitted from the Victrola department on the sixth floor to the women's rest rooms on the fifth floor. The latest Victor records were played to the delight of the listeners. It is intended to continue the demonstration. The receivers in the rest room are attached to the chairs and davenport, and the music being played on the floor above is plainly heard. The receivers are small and simple and can be concealed on parts of furniture.

NEW YORK, MARCH 15, 1914

OUR attention has been drawn to a recent article appearing in the columns of a daily paper published in southern Illinois, in which a prophesy is made of the triumph of the talking machine over the piano as the instrument of the home.

This is simply another case of the uninformed going off at half cock—just another of the many absurd statements which are made in the columns of the daily papers concerning special industries of which the writers are in total ignorance.

Such a prophesy is absurd, and the writer probably has not even a superficial knowledge of the fundamentals of either of the industries to which he referred in a prophetic manner.

The growth of the talking machine industry in this country has been one of the most remarkable developments which has occurred in any trade, and it is probably natural to suppose that a lot of writers and business men will be free to make all kinds of predictions regarding its future.

If a piano merchant finds business dull and he finds his more enterprising neighbor is doing business, who, by the way, may handle talking machines, he attributes the slowness of trade with him to the talking machine, and when a newspaper man drops in he is liable to say that the talking machine is cutting out pianos, and so, perhaps, the writers are not wholly to blame when they make ridiculous prophecies concerning the future of musical instruments.

THE talking machine has become, within a very brief time, such a great factor in the musical life of the nation that many people are apt to make most ridiculous comments regarding its future without taking the time to investigate just what effect it may have upon the sale of other musical instruments.

We recall the time when some of the old piano manufacturers figured that long before 1900 the entire population of America would have been supplied with pianos and all of the factories would be put out of business by reason of lack of demand for instruments.

That was the limited vision with which many men contemplated the piano horizon years ago.

What is the result?

More pianos are being made and distributed than ever before, and it is reasonable to suppose that a population of 100,000,000 has an absorptive piano capacity of 300,000 pianos annually.

Now, let us take up the question as to the serious invasion of the talking machine upon the piano field, and how much it has reduced the demand for pianos.

Of course, there are instances where people of limited income debate seriously as to whether they will purchase a piano or a talking machine.

It is admitted that the talking machine has many features of attractiveness. It supplies a variety of music which no other creation of human brain and hand can supply, but still it creates a demand for something more. It awakens a true musical spirit, and every talking machine which is sold is simply carrying on educational work for a greater demand for music, just the same as pianos wherever placed are adding their share to the musical love of our people.

DOES anyone for a moment suppose that the talking machine business could have reached the position which it has achieved within such a brief time were it not for the educational work carried on through the mediumship of the piano in former years? The demand for music has been stimulated by the sales of all musical instruments.

We are inclined to the belief that the piano market would be lessened if the talking machine were removed entirely from our modern life.

Why?

Simply because there would be a lessened desire for music, and piano manufacturers and piano merchants would have to work just so much the harder to instill the love of music into their clientele.

The facts are that piano and talking machines are both powerful developers in stimulating a love for music in the home circle, and when a customer shows an uncertainty as to which instrument he will purchase it is simply an incident in our business life.

A good many piano merchants find that customers from time to time make inquiries in their stores for talking machines, expecting to find them therein. The inquiry is natural, because it is logical to associate the talking machine as a musical instrument with houses which deal in all kinds of musical accessories.

THERE are more people who look in a music store for talking machines than in exclusive talking machine stores; but so far as the talking machine itself curtailing the sale of pianos by acting as a deterrent force is too absurd to seriously contemplate for a moment.

The statement, too, has been made that the sale of talking machines has decreased the sale of what we colloquially term small goods. In other words, musical instruments of lesser value than pianos, and yet inquiry at the great music trade emporiums in the principal cities brings forth the information that the stores which are thoroughly progressive are selling more banjos, mandolins, guitars, accordions, etc., than before for years.

To our minds, this increased demand for musical instruments has come largely through the influence of the talking machine in cultivating a love for music in many ways.

To illustrate: a person who owns a talking machine puts on fine banjo, violin or mandolin records. The audience listens to them with pleasure, and as a result of this kind of educational work some of the listeners will visit nearby stores and make purchases of instruments so that they can themselves learn to play upon them. Here is where the great educational power of the talking machine comes in. It places the finest music of the world within reach of all.

The world's greatest singers and instrumentalists are, through the agency of the talking machine, brought directly into the home circle.

If we had a great catalog of world renowned piano solos and selections it would increase the sales and interest in that instrument just as the vocal talking machine records have given hundreds of students to music teachers, who have personally admitted that their pupils have been encouraged to take up the higher study of music simply by the talking machine arousing ambitious instincts within them.

THE men who claim that the talking machine is seriously affecting the piano business have not carefully studied the fundamentals, because the demand for pianos is steadily increasing, and with the growing advent of the player-piano a new factor has been introduced which will still further make for healthy progress.

Again, there is another point which is well to make in this

connection, and that is that the talking machine has proven a splendid aid to piano merchants everywhere, because it has enabled them to make quick and easy profits. It has helped them to tide over trying financial conditions and has been the means of drawing customers to their stores who would not have purchased pianos, and it has helped them out very materially in the financial showing of their business.

After all, perhaps, the criticism that the talking machine has interfered with the piano business is quite natural when we consider that the talking machine as a selling force has broken all records.

It has come within a few years and is to-day conceded to be a powerful factor in the musical life of the nation; but its stimulating musical features, however, are not wholly understood or appreciated by those who thoughtlessly criticise.

The talking machine is helpful in many ways to the musical business, and piano merchants as a whole are not slow in giving to the talking machine fair credit for the success of their business. There are, of course, some few who allege that it has curtailed piano sales, but these are the ones who are uninformed and who usually lack ability to successfully conduct their own enterprises.

THERE is no trade or business that is completely lacking in sentiment, whether it be the making of carpet tacks or the manipulation of stocks. The man who is engaged in trade sees something before him besides the mere making of so much more money, especially if he has sons to whom he desires to leave a business that is sound in every particular. The matter of tradition in business is recognized as a valuable asset by thousands of business houses who boast of the fact that the business has been handed down from generation to generation, and has always been in the family. And yet, with all the value of the family name, there is something in being the pioneer, the man who entered into a new field, conquered and built up something to leave to posterity.

A prominent talking machine dealer, in discussing trade questions, the other day remarked that he had just taken his son into the business with him, and stated it as his belief that the talking machine business was the only one of its extent and stability in the country wherein immense jobbing and retailing houses had been built and yet had not marked the passing of a single generation. The head of practically every talking machine house of the present day, stated the dealer, is a pioneer, a man who, whether well equipped or not, took advantage of the opportunity to carve out his own career in a new and untried field. In a business that, as a commercial proposition, has not seen the passing of two decades, the credit for business ability and the success of the particular enterprise belongs to the man whose name is over the door.

A large number of the talking machine men have taken their sons into the business with them in the firm belief that the best days of the business are yet to come and that there is a real career in the field for the young men after the founders of the business have passed away.

The next generation may see the trade rise to its uppermost

pinnacle of importance or may see it dwindle, but in meeting the conditions as they come to light they will have the advantage of the experience of those who were in the business before them, an advantage that the talking machine man of to-day didn't enjoy.

SPEAKING of credits in commerce, Charles D. Joyce, of Philadelphia, recently made some remarks of interest and exceeding pertinence when he said: "No risk should be accepted, no project should be furthered without investigating the character, capability and capital back of that risk or that project. When all three of these essentials are satisfactory, aid should be liberally extended. But if a man has the two greatest assets of character and capability, of capital he may have little or none, credit supplies its place. Money seeks labor, and all it asks is that the laborer shall double the talents furnished him. He dares not be slothful or afraid, his *all* depends upon his integrity, his diligence and his originality. Thinking *after* other men never puts him first. The trader, like the poet, must have a vast imagination, he must see into the future, must have his ideal, must have faith in its realization, and then work for it without ceasing.

"The captains of industry to-day are the men who, a quarter of a century ago, read between the lines and saw the possibilities of the future, and then took advantage of those possibilities.

"The practical man 'prone to value none but paying facts' has been a blessing to civilization and to Christianity. Not only has commerce chartered the sea and opened up the wilderness, but it has through the successful prosecution of its own work also exercised a civilizing and uplifting influence."

THE newly-enacted currency statute will not let down the bars so far as credits are concerned, as many people have stated, and some very pertinent remarks of interest to the trade were made recently on the subject by W. C. Cornwell, an authority, who said: "The class of paper available for rediscount at the Federal reserve banks must be of liquid character. The maturity of ninety days does not, of course, mean that only paper made for that length of time can be used, no matter for how long originally drawn.

"The tendency among banks, in order to be equipped with plenty of available paper, will be to encourage their customers to avoid renewals. Loans which are not liquid, even though well secured, will not be looked upon with as much favor. All this will, of course, tend to make the banking assets of the country sounder. And, too, the influence upon merchants and others, by encouraging promptness and more liquidity in financial arrangements, will, in the end, be beneficial for all business.

"There is some belief prevailing in regard to the new measure that it is intended, as it is called, to make credit easier. This calls up a vision of loosening up on the part of the banker as to the character of loans which will pass muster.

"Nothing of the kind is in contemplation and no such effect will follow. Credit is one of the functions which can only be safely determined on business principles, and legislation which attempts to make it unnaturally liberal, is sure to bring disaster. The bill does not affect the status in this respect. It only supplies greater facilities for extending safe credits."

INTEREST CLAUSE IN INSTALMENT LEASES UPHELD

By Appellate Division of New York Supreme Court in Case Fought to Finish by Pease Piano Co.—Ruling of Lower Court Reversed—Decision of Importance to Talking Machine Dealers Throughout State Who Charge Interest on Instalment Accounts.

The talking machine trade as a whole will view with gratification a recent decision handed down by the Appellate Division of the State of New York in favor of the Pease Piano Co., of New York, in connection with a case that had been decided against them in the lower courts. The Pease Piano Co. also handles Victor and Columbia talking machines.

The Pease Piano Co. had asked for judgment in the Municipal Court against Mrs. Miriam Fiske for an unpaid balance of \$14 on a piano that was sold under a conditional sale for \$325, together with interest as provided for in the sales agreement, amounting to \$38. Mrs. Fiske was willing to pay the \$14, but refused to pay the interest charge, claiming that the company's contract was ambiguous. Judge Murray, of this court, decided in her favor regarding the interest clause, assessing the Pease Piano Co. with the costs of the action, directing that Mrs. Fiske pay only \$14, and not the amount charged for interest.

Deeming the point of issue an important one, the Pease Piano Co. immediately appealed and as a result received a unanimous decision in its favor. Judge Lehman, of the Appellate Division wrote the decision, which vitally interests all members of the trade, as the most successful talking machine dealers are fast realizing that an interest clause should be inserted in every instalment sale, in order to protect their own interests. Judge Lehman's opinion follows:

"The plaintiff delivered to the defendant a piano under a written agreement upon a printed form which provides that the plaintiff leases to the defendant a piano for a period of forty-five weeks at a rental of \$10 for the first month, and \$7 for each succeeding month. The contract contains also the following clause:

"And said company hereby agrees with Mrs. Miriam Fiske that if she shall pay said company the sum of \$325 with interest at 6 per cent. per an-

num on all unpaid balances, said company will sell said piano to Mrs. Miriam Fiske for that sum and give a bill of sale thereof and credit upon said price all moneys which have been received from said Mrs. Miriam Fiske as rent of said piano.

"It appears plainly, both from the contract and the parol testimony, that the contract was intended as a contract of conditional sale upon instalments, and the plaintiff now brings its action to foreclose its lien for the unpaid balance.

"The defendant has paid the sum of \$311, and the sole dispute between the parties is whether absolute title was to pass upon payment of the additional \$14, or whether the plaintiff is entitled to this sum plus interest.

"The rights of the parties must be derived from the written instrument, and even the oral testimony admitted without objection must be disregarded if it is in conflict with the plain terms of the written contract.

"The contract clearly provides that the title to the piano was to pass only upon payment of the sum of \$325 with interest at 6 per cent. per annum on all unpaid balances, and the words italicized by me are printed in black capitals across the page. The payment of 6 per cent. on all unpaid balances is part of the purchase price of the piano, and the only question of construction is as to the meaning of the words 'all unpaid balances.'

"The contract provides that the payment of \$10 and \$7 per month shall be the rent of the piano, but shall be credited upon the purchase price if defendant shall purchase the piano. Since the purchase price is \$325, the balance remaining unpaid at any time is that sum as diminished from time to time by the so-called rental payments, and the defendant can obtain full title to the piano only upon the payment of interest on these unpaid balances of the purchase price.

"Judgment in favor of the defendant should, therefore, be reversed with costs, and judgment or-

dered for the plaintiff foreclosing its lien of \$14 with interest at 6 per cent. upon all unpaid balances."

Francis C. Brown, 76 William street, New York, presented the case for the Pease Piano Co.

DANCING CRAZE REACHES SPOKANE.

(Special to The Talking Machine World.)

SPOKANE, WASH., March 6.—The dance craze found its way into the Northwest about three months ago. The Columbia Co. has been doing splendid national advertising on dance music and Willis S. Storms, manager of the local store has been backing it up with lots of good live copy in the local papers.

"The result has been positively phenomenal," said Mr. Storms. "In our entire history we never have done the record business that we are doing to-day. Everybody is dancing. The Columbia Co's store seems to be one of the central meeting places of everyone who is interested in dancing. Last Saturday evening we were visited by one of the 'shining lights' of the Methodist Church. There was dance music to be heard on every hand and it proved to be so contagious that when he left our store he had six tangos under his arm and we had his money in the cash drawer. Our dealers are also realizing the splendid profit that can be had from the sale of dance records, and they are certainly taxing us to our utmost capacity to keep them supplied."

THE SIX BEST SELLING RECORDS.

A rather pertinent suggestion was made recently by the well-known magazine, System, in discussing the selling of talking machine records when it said: "I would announce—as the bookstores do—the six best-selling records for the month. Many patrons cannot visit the free concerts of latest records, so they ask, 'What do people say about this selection?' I would inclose with every record sold a post card upon which the customer was asked to write his opinion of the piece. I would publish from time to time a summary of these opinions. They would make newsy advertisements, or would form an interesting window exhibit."

HARGER & BLISH SUPPLY GRAND OPERA IN DES MOINES.

Take Up Dates Left Vacant Through the Dissolution of the Canadian Grand Opera Company by Supplying Those Musically Inclined with Edison Phonographs and Records in Their Homes—Some Striking Advertising That Has Won High Praise.

(Special to The Talking Machine World.)

DES MOINES, IA., March 7.—Harger & Blish, the prominent Edison distributors of this city, wide-awake to every opportunity which helps to feature the Edison in a dignified and effective manner, have been adding to their fame as novel advertisers.

The Canadian Grand Opera Co., which disbanded in Denver, Col., and which was scheduled to give performances for three days in Des Moines, and for which there was an enormous ticket sale,

manner in which Harger & Blish are bringing it to the attention of the public of this city, as well as in Dubuque and Sioux City, where they also conduct establishments.

The "blow up" of the Canadian Grand Opera Co. gave the firm a splendid opportunity, for no one event was so much talked of for years, the subject being discussed in the news and editorial columns, as well as in the cartoons in the local papers, showing how the appetite of the musical people of Des Moines had been whetted for grand

Harger & Blish Timely Advertisement That Caused a Veritable Sensation in Des Moines.

gave Harger & Blish one of those "psychological moment" ideas which resulted in the advertisement reproduced above, being conceived and published in the Register and Leader, two of our leading papers. It occupied a half page.

The pertinence of the advertisement to the situation aroused tremendous comment, and added another laurel to the rapidly increasing fame of Harger & Blish, as up-to-date advertisers.

Indeed, it would be impossible to conceive of any better means of concentrating attention on the new Edison disc phonograph than the progressive

opera, but Harger & Blish relieved the disappointment by notifying them that their wants could be supplied very effectively by means of the Edison disc phonograph.

Side by side with the preliminary advertisements of the National Grand Opera Co., Harger & Blish also carried advertisements emphasizing the merits of the Edison in a forceful way. The climax, of course, was the advertisement referred to above, which shows that the members of this company are alert to every development.

VERDI AS A PROPHET.

How He Came to Predict the Success of "Il Trovatore" by Interesting Test.

When Verdi was putting the last touches to "Il Trovatore," he was visited in his study by a privileged friend. The friend was one of the ablest living musicians and critics. He was permitted to look at the score and run over the "anvil chorus" on the pianoforte. "What do you think of that?" asked the master. "Trash!" said the connoisseur.

Verdi rubbed his hands and chuckled, "Now, look at this and this," he said. "Rubbish!" said the other, rolling a cigarette. The composer rose and embraced him with a burst of joy. "What do you mean?" asked the critic. "My dear friend," cried Verdi, "I have been making a popular opera. In it I resolved to please everybody except the purists, the great judges, the classicists, like you. Had I pleased you I should have pleased no one else. What you say assures me of success. In three months 'Il Trovatore' will be sung all over Italy."

VITAL FORCE THAT MAKES SUCCESS.

Some Remarkable Advertising by Curtis Publishing Co. in Public Ledger, Philadelphia, Cites Development of Victor Co. as Example of What Can Be Accomplished by Meritorious Products and Persistent Advertising.

Under the heading of "When these men can't afford to stop, can you afford not to begin?" the Public Ledger of Philadelphia, Pa., recently published a most interesting tribute to the success and remarkable growth of the Victor Talking Machine Co. In addition to presenting a forceful array of facts, this advertisement, which was inserted by the Curtis Publishing Co., owners of the Public Ledger, showed at the top of the page the small one-story building that marked the humble start of the Victor Co., as contrasted with a bird's-eye view of the present immense plant occupied by the Victor Talking Machine Co.

As illustrative of the advertising policies of the Victor Co., this page, which reads as follows, is well worth perusal:

"In Philadelphia there are ten or a dozen manufacturers to whom, every time they pick up a newspaper or magazine, the advertisement placed there by a fellow manufacturer just across the river ought to be a flaming rebuke.

"Some of those men will recognize, at the top of this page, the birthplace of the Victor Talking Machine Co.

"All of them will identify the picture below of what it has become—chiefly through wise employment of the power of advertising.

"The little sign over the door of Mr. Johnson's machine shop was his first advertising.

"To this shop, in 1894, was brought for his help one of the early experimental models of talking machine. It sounded, he says, 'like a partially educated parrot with a sore throat and a cold in the head.'

"Genius—or inspiration—sensed the possibilities latent in that crude device.

"Infinite perseverance slowly shaped it into a delicate musical instrument.

"But it was only a bold, unflinching faith that first took the lion's share of the capital of the little company and turned it into advertising.

"Faith in the product.

"Faith in human nature.

"That faith, justified, has never been lessened.

"During the financial score of 1907, when curtailment was the accepted program elsewhere, the executive board of the Victor company, without one dissenting voice, added \$267,000 to the year's advertising appropriation. They went through the panic and into 1908 facing a demand far in excess of factory capacity.

"In 1913 this company again made its heaviest investment in advertising and again had the biggest year in its history. In October alone its sales were \$1,200,000 greater than the preceding October.

"They say 'Our success has been built by advertising. Next to manufacture, it is our chief consideration. We can't afford to stop.'"

THREE NEW EDISON ARTISTS

Make Their Debut in May List of Blue Amberol Records—These Include Albert Quesnel, Tenor; Merle Tillotson, Contralto; and J. E. Walbank, Tenor—Possess Charming Voices.

Albert Quesnel, who has sung with the Opera Comique, Paris, and the leading orchestra organ-

Albert Quesnel.

J. E. Walbank.

izations of Paris, London and New York, such as the Colonne, Lamoureux, Wood, Bridge, Darnrosch and others, with great success, heads three artists who will make their debut in the May list of Blue Amberol records issued by Thos. A. Edison, Inc. Mr. Quesnel is a tenor of authority and distinction and his singing of Jules Granier's "Hosanna" and Adolphe Adam's "Cantique de Noël" in French is an admirable recording of two great numbers. Mr. Quesnel's voice is of splendid range, volume and brilliancy which he uses like the trained artist he is. His records will be welcomed by users of Edison phonographs, for his fine artistry has won compliments from the critics of the leading papers in this country (where he has spent the greater part of his life, although born in France) as well as those of Europe.

James E. Walbank, who has had a long and successful career as a tenor singer in opera and concert, is the second newcomer in the Edison

Merle Tillotson.

list of May. His singing of F. W. Vanderpool's "In Dreams, My Own," a typical sentimental ballad, is most artistic in every way, and he is destined to become a favorite. The third new artist in the Edison May list is Merle Tillotson (Mrs. B. Alcock), who possesses a contralto voice of exceptional quality for recording purposes. Her singing of Sir Arthur Sullivan's classic, "Let Me Dream Again," is a delight, particularly for its clear, finished enunciation, a trait unfortunately too uncommon among our singers. This record will find a host of admirers as will the artist who made it.

ARTISTIC VICTOR DEPARTMENT

Feature of New Lord & Taylor Store Which Was Opened Late Last Month in New York—New Quarters Are Handsomely Fitted Up.

With the opening of the new Lord & Taylor store, on February 24, one of the most artistic Victor departments in the local trade was added to the imposing list of Victor dealers in this territory. Although Lord & Taylor had maintained a Victor department at its old store for some time prior to its removal to Thirty-eighth street and Fifth avenue, that department in no sense compared with the beautiful show rooms that now form a substantial part of the Lord & Taylor "Music Rooms" on the seventh floor of its new building. This Victor department is under the direction of the Musical Instrument Sales Co., the Lord & Taylor store being a member of the Clafin chain of stores.

Five large display rooms presenting all the popular types of Victors and Victrolas are devoted to the exclusive demonstration of machines, while five tastefully furnished smaller rooms are used

NYOIL

For polishing varnished woodwork it is extremely satisfactory. No oil is so clean.

Ask your watch repairer whose oil he uses on your watch.

only for the demonstration of Victor records. C. R. Wagner is head of this new department, and, assisted by an unusually capable sales staff, is already making sales records that would be gratifying as an excellent holiday business, instead of a spring trade.

LUMBER DEALERS ENJOY VICTOR.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., March 5.—One of the leading features of the program offered at the annual convention of the Wisconsin Retail Lumber Dealers' Association, held at the Hotel Wisconsin, in Milwaukee, February 17 to 19, was a demonstration of a Victrola, from the attractive retail shop of Miss Gertrude F. Gannon. The lumber dealers were favorably impressed and it is pretty safe to say that many a Victor will be sold.

Woolworth Building, New York**

SINCERITY IS A SUBSTANTIAL BUSINESS ASSET.

Freedom from Hypocrisy, Disguise or False Pretense Essential in Order That Any Man May Rise to Eminence in the World of Trade—An Illustration from Personal Experience That Is Worthy of Close Consideration and Action Because It Points a Moral.

Are you sincere? Success and failure are very evenly balanced in the commercial scales these days, and it may take just a pinch of sincerity to send your business soaring to a greater and more lasting prosperity.

Sincerity means a great deal in the talking machine field. Your customers, if they can depend absolutely upon the integrity of everyone connected with your establishment, will deal with you permanently, and, very often, deviate from their several ways to do it. There is a certain satisfaction to be derived from trading with a chap who

"A Concert in the Home."

is honest. Honesty has many loopholes through which a business man may shoot poisoned arrows at his customers supposedly to his own betterment. He may achieve a small measure of success through this lawful dishonesty, if I may speak paradoxically, but he is sure to meet his Waterloo at last. His more fortunate fellow dealer, however, who takes sincerity for his motto, sails calmly onward toward wealth and happiness.

I am not sure I am making myself clear. What I mean to convey is this: Do not delve between the morocco covers of Blackstone to ascertain how far you can go toward skinning your customers and still remain an honest man. You will undoubtedly find innumerable recipes, but disregard them. Be sincere and you will not need to follow a crooked road to the land of promise.

A short while ago I happened to be walking on Bedford avenue, Brooklyn. Arriving at No. 1223, I found myself gazing in at the attractive window display of a talker shop. An artistically lettered card invited me within to hear "The new Edison Disc, the most wonderful Musical Instrument." I also discovered through the medium of the exhibit in the window that the Victor and Edison cylinder lines were also handled by this firm. As I had never made a careful comparison of the rival machines, face to face, I took advantage of the opportunity so agreeably presented and walked in.

A young fellow of good address came forward

and cheerfully inquired my business. I told him I had accepted the invitation in the window to hear the new Edison, and that I would like to go still further, if agreeable to him, and compare it with the Victor.

At the outset I wish it understood that I did not enter this store as a prospective purchaser; in fact, I made it plain that I was a mere investigator. Notwithstanding this fact, I was treated with the utmost courtesy during my stay, which must have filled at least an hour of time. I was made to feel thoroughly at home; was entertained by hearing the same selection by the same artist on all three machines, which, of course, is the only true test, and, during the entire competitive concert the superiority of one make of instrument over another was not discussed by my host.

By the way, I want you to know him. "Mr. Greenglick, gentlemen; a sales expert well worthy of your acquaintance."

I asked Mr. Greenglick why he did not eulogize one machine above another. "You have an individual preference, no doubt," I suggested.

"I do not consider it good business to do so," he answered. "You see, we handle all three machines, and if I should form an opinion as to which was the best, that same opinion might crop out at an inopportune moment, and, perhaps, spoil a sale or cause an old customer to become dissatisfied with his outfit, which is just as bad. I endeavor at all times to be absolutely sincere, which in my case, so far as the different makes of machines is concerned, signifies neutrality; I really have no choice. After demonstrating each instrument thoroughly, I leave the choice to the purchaser. And," continued Mr. Greenglick, after he had returned from an errand of salesmanship, "I really consider sincerity the keynote of success in the talking machine trade."

"Our customers are decidedly enthusiastic about the treatment they receive at our hands, and it is due largely to the fact that we never lie to them. We do not promise records before we can deliver them, and we do not claim anything of our wares beyond their capacity to make good. We are busy and prosperous and our business is moving in the right direction."

"And you attribute all this to sincerity?" I asked to make sure.

"Absolutely yes!" came Mr. Greenglick's answer, given most emphatically.

The above, Mr. Dealer, is a true example of what sincerity is doing for one very much alive talker man.

Is it doing as much for you? Very often the dealer himself may be sincere to a fault, careful in every possible way, so far as he is concerned individually, to act squarely and above-board with his patrons; but through the insincerity of, perhaps, just one of his employees, have his establishment acquire an unsavory reputation. There is

nothing, believe me, that will injure a business more quickly than false pretense. If a customer is trifled with in this regard a few times he loses confidence and hies himself to another store. Like the proverbial Steve Brody, he takes a chance. Rather than remain and suffer from dishonest business methods, he moves on. Can you blame him?

Did you ever visit a talker shop where sincerity is practiced in order that you might ascertain the state of mind of the patrons? I have done so, and the result proved a revelation to me. They invariably enjoyed themselves thoroughly, and their countenances were free from that hint of doubt which is wont to cloud the faces of those who frequent some talking machine emporiums. These people knew that they were being treated right, and they were happy in consequence. Their selection of records was left, in a large degree, to the discretion of the salesman, and this procedure

"Invariably Enjoyed Themselves Thoroughly."

showed good judgment on their part. Through his close association with the different kinds of music he could take their orders and cater to their tastes to the best advantage. A sincere salesman catalogues not only his customers' names but their tastes as well, and when they call upon him he is in a position to give them what they want, very often, without playing a single selection. Imagine the satisfaction and pleasure to be derived from a concert in the home where the listener is assured beforehand that the records are free from flaws and the repertoire an artistic triumph throughout.

I think it might be well, Mr. Talker Man, to give this matter of sincerity in trade your very careful consideration. There are a great many of you, I know, who already practice this fine art to the full, but to those who have thoughtlessly neglected to give it quite all the attention it deserves I would say, in closing, that if you will make up your minds to conduct your business along strictly sincere lines, and have your employes co-operate with you in the good work, your popularity among the folks who buy from you will increase by leaps and bounds.

The year is young yet. There is still ample time for the carrying out of good resolutions. Inscribe a card with the axiom "Be Sincere!" Place it conspicuously on your desk where your eyes will encounter it often. It may help you out of many a difficulty.

HOWARD TAYLOR MIDDLETON.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

Boston, Mass., March 9.—With the extension of Avery street from Washington street to Tremont street, the one concern above others that will benefit by the new thoroughfare, is the Columbia Graphophone Co., for while the extension will take off a few feet from the side of the establishment, there will be a large gain through the splendid windows which the store will have for a distance of eighty-four feet, which is practically the depth of the store. This will give the Columbia unusual opportunities for the display of its machines and records, and it will keep Manager Erisman busy devising attractive window displays, something for which this store long has been more or less conspicuous. The city has not begun the work as yet, but will in a few weeks, and once it is under way there will not be any time lost in getting the job completed, and then the Columbia should blossom forth in its new glory late in the spring. Business with the Columbia has been of surprisingly large proportions and so large a stock is necessarily kept on hand that storehouse quarters have been taken on the third floor of the building at the corner of Chauncey and Essex streets, where 4,800 square feet of space are kept filled with equipments.

F. T. White with Harvey Co.

The C. C. Harvey Co., of 144 Boylston street, which heretofore has not especially forced its Victrola department, has started upon a new era, and it has appointed as the manager of this department, Francis T. White, formerly of the Henry F. Miller Co. Mr. White is familiar with the talking machine business and possesses many friends in the business. The department will always contain a complete stock of Victrolas and records, and Mr. White will pay especial attention to sending records on approval. This department of the Harvey Co., is comfortably fitted up and quite attractive.

Gilchrist Co. Takes on Columbia Line.

The Gilchrist Co.'s large store, which lately has come under new management, having become convinced of the value of a talking machine department, has installed Columbia quarters on the fifth floor, where 2,000 square feet of space are given over to Columbia equipments. There are three sound-proof rooms and from the start the department has been popular, and on the first day 159 different sales were made. The department is in charge of James C. Mason, brother of Norman

Mason, the indefatigable representative of the Columbia Co.

More Room for Talking Machines.

Two new rooms have been added to the suite occupied by George Lincoln Parker, of the Colonial Building, for his talking machine business, and although in use only a fortnight, they have already proved their usefulness, for Mr. Parker's business has been quite large in the past fortnight, and is growing fast. The manager of this department is John H. Alsen, a man of courtesy and ability. He lately has added to his staff Joseph Carlson, who is taking hold of the business most intelligently. Through a re-arrangement of some of the other rooms occupied by Mr. Parker, better facilities are afforded for the storage of discs, many new racks having been installed. These quarters, where one may find a large array of Victor, Edison and Columbia outfits, are among the best-equipped of any in the city.

How Gaby Deslys Was Entertained.

The dreadful storm which New York experienced the end of February, played its part at the Tremont street quarters of the Columbia Graphophone Co., for as Gaby Deslys could not play her engagement at the Shubert Theatre because of the non-arrival of her wardrobe and scenery, the passers-by were appraised of the situation by means of a big bulletin board in the window. The news was changed frequently according to latest advices from the environs of Camden, N. J., where the train bearing the paraphernalia was stalled. While she was in town, her opening performance having been delayed two days, she made her home at the Touraine, where she had a \$500 Grafonola grand to while away the time.

Harry Rosen in Back Bay.

Harry Rosen, whose School street quarters always are most popular with down town people seeking machines and records of either the Columbia, Edison or Victor types, has been so successful that he is going to branch out. He is negotiating for a stand in the Back Bay near Symphony Hall, which should prove a good center, as there is no talking machine store in the neighborhood. Further details will be announced in this magazine next month.

Important Edison Representatives.

Manager Silliman, of the Boston office of the Pardee-Ellenberger Co., makes a splendid report of business conditions, and he states that two of the strong concerns which have been signed up

through his office are the Cushman Furniture Co., at Attleboro, and the Allen Drug Co., at Hanover, N. H. This last is an especially important representation, as the demonstrations of the Edison disc machines have attracted many of the Dartmouth College faculty and students, with the result that numerous sales have been effected. Another connection which Mr. Silliman has formed is that of Fred W. Brown, of Plymouth, N. H. One of the recent callers on Manager Silliman was E. H. Dakin, of the S. L. Crosby Co., of Bangor, Me., one of the enthusiastic Edison dealers.

New Half-tone Needle Popular.

The Eastern Talking Machine Co. is having a wonderful success with its new half-tone needle, which it lately has put out, and of which nearly a million have been sold, so the store reports. Those who have tried it are said to be most delighted with it, especially as the scratching is minimized. Billy Fitzgerald says that the tango music has reached high speed at this store, and the demand for this type of music almost exceeds the supply.

Speaking of the tango, the "boys" of the Eastern company have been in great demand the past fortnight as teachers of this and other of the popular dances and the "Southport quartette, composed of Fitzgerald, Welch, Splaine and Reed, are getting to be real experts. If you want to learn more about their interesting experiences, just ask any of the boys.

To Concentrate on Pianos.

Charles F. Atwood, of the Walker Building, has given up his Victor representation, and hereafter will devote his time entirely to his piano business, in which he has been doing quite well since removing from his other quarters in Tremont street.

Edison Demonstration in Worcester.

H. R. Skelton, traveling man for Thomas A. Edison, Inc., who makes his headquarters when in Boston at the Pardee-Ellenberger Co.'s offices, has been spending a fortnight in Worcester, where he has been giving demonstrations of the Edison disc machines at the new Hotel Bancroft. He has been using a \$250 model, and many of the prominent people of the city have become interested in the proposition.

Visitors to Eastern T. M. Co.'s Quarters.

Visitors at the Eastern Talking Machine Co.'s quarters have been W. A. Condon, of New York, and Will Oakland, the famous counter-tenor, who has been signing at Keith's beautiful playhouse a few doors away. This singer records for the Vic-

THE main thing that you sell when you are an Edison disc merchant is music—real music—the kind of music that makes a man long to spend his evenings at home. This is the reason why so little salesmanship is required of Edison disc merchants, and low selling cost means big profits.

**P-E
SERVICE**

**P-E

IT isn't even necessary that you should have any experience as a phonograph man, for part of our service to you is along educational lines in order that you and your salesmen may do the greatest amount of business. This is real service and co-operation that means results.

THE PARDEE-ELLENBERGER CO., Boston, Mass., and New Haven, Conn.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

tor people. While in town, he presented Billy Fitzgerald with a large photograph of himself, which now hangs over his desk.

Professor Miller Pleased.

The Eastern Company is in receipt of a letter from Professor Dayton C. Miller, thanking the company for its courtesy in loaning a Victor machine for his recent lectures at the Lowell Institute course, given at the Technology. Professor Miller found the machine most useful in illustrating his talks on "Sound Analysis," and in his letter he writes of the great value of these machines in scientific research work.

Steinert Force Augmented.

Herbert L. Royer, manager of the Victor department of the M. Steinert & Sons Co., who has lately taken on several new and valuable men, now has as carefully chosen and well-equipped staff as any talking machine establishment in the city. Mr. Royer, who is a man of progressive ideas, lately mapped out some of his prospective plans to The World correspondent, and if they are carried out, should mean a rapid advance in Victor business.

Compliments for Columbia from Maggie Teyte.

Manager Erisman, of the Columbia Co., is in receipt of a beautiful letter from Maggie Teyte, the opera and concert singer, complimenting the wonderful tones which the Columbia record is able to produce, speaking particularly of the reproduction of her own voice, and adding that "now every one has a chance of hearing my songs." While she was stopping at the Copley-Plaza, Miss Teyte enjoyed the privileges of the Columbia \$500 Grand, thanks to Manager Erisman's courtesy.

No Cut in Columbia Outfits.

Although the Henry Siegel Co. is in the hands of receivers and goods in all departments are being offered at bargain prices, there has been no cut in the Columbia outfits, which have occupied a large department on one of the upper floors of this large establishment. In the display advertisements of the house the talking machines are featured as before, but the regular prices are obtained.

Victor Quarters at Chickering & Sons.

The Victor department of Chickering & Sons has undergone quite a change since Retail Manager Currier has taken hold. Instead of being in the basement, the Victor-Victrola outfits may now be had in special quarters on the second floor, where the new manager, Wilbur W. Longfellow, is ready to greet his old friends. Mr. Longfellow has had wide experience in the talking machine business, having been for four years with M. Steinert & Sons, where he handled much of the outside work.

Joins Henry F. Miller Forces.

Warren A. Batchelder, widely known in the talking machine business, is back at the old stand, having returned to the Henry F. Miller Co.'s house, where he now is manager of the Victor-Victrola department, of which he was in charge before associating himself with Chickering & Sons, nearly two years ago. Friend Bakér and Frank H. Jenkins complete the trio of hustling Victrola enthusiasts.

REPORT A LARGE BUSINESS

In the Thomas Attachment Which Enables the Owner of an Edison Disc Phonograph to Play Perfectly Records of Any Make.

(Special to The Talking Machine World.)

BOSTON, MASS., March 9.—Dealers have been quick to recognize the value of the new Thomas attachment which is made for the new Edison disc machines, to enable the owner to play records of other manufacture. The Thomas attachment, which is the invention of Chas. P. Trundy, is being manufactured and distributed by the F. H. Thomas Co., 689 Boylston street, this city, a concern of standing which some time ago added a phonograph department and now is one of the leading talking machine dealers in New England.

In chatting about the Thomas attachment, notice of which appears elsewhere in this issue, Chas. P. Trundy, the inventor, said: "The special feature of it is the ball bearing 'joint,' which permits a free and flexible lateral motion without the aid of a mechanical feed. The reproducer joint is of peculiar formation, and is built to allow 'up and down' play,

Charles P. Trundy.

taking care of inequalities of recording or warping of the record. The device is made of cast brass with a five-eighth inch core. It reproduces the full tone and is giving excellent satisfaction to the trade."

EDISON DISC SHOWN IN NEW HAVEN.

New Machines and Records Demonstrated with Great Success in Progressive and Live New England City by J. W. Scott—Supervisor of Music of City Schools Enthusiasm Over Musical Qualities of New Product in Letter.

(Special to The Talking Machine World.)

NEW HAVEN, CONN., March 10.—Among the demonstrations of the Edison disc machines, one in this city has been creating the greatest interest. It

is being conducted by J. W. Scott, the well-known Edison traveling man and the palm room of the Hotel Taft is crowded at every recital. Among the audiences one may see many of the Yale professors and their families. One of the pleasant results of the demonstration has come in the form of a testimonial letter, sent to the A. B. Clinton Co., 33 Church street, New Haven's oldest Edison retail dealer, from Professor B. Jepson, supervisor emeritus of music in the New Haven schools. Professor Jepson writes:

"I must confess that I was never more taken aback in my life than I was at the close of the Chamber of Commerce lunch at the Taft last Saturday. At the close of the lunch a beautiful soprano voice launched into a solo. I was not surprised at that, but very much surprised as I looked around the room in vain for the soloist. I supposed, of course, that I would find the lady in the center of a group of men gathered at the rear end of the room. I was really astonished to find that the beautiful voice emanated from a phonograph. To sum it all up, I must say that Edison's new diamond disc phonograph is the 'last word' in the rendition of vocal or instrumental music."

FIRE IN MONTPELIER.

Bushwell's Book Store Badly Damaged—Loss \$10,000—Temporary Quarters Secured.

(Special to The Talking Machine World.)

MONTPELIER, VT., March 9.—Buswell's Book Store, which suffered severely from the flood a year ago during the spring freshets, has again undergone a loss, this time from fire. A fortnight ago a fire was discovered in the building, and before it was extinguished the store was badly damaged. During the progress of the fire there was considerable playing, but it was by the hose and not by the records, hundreds of which were destroyed as well as some valuable machines. The store's loss was figured at \$10,000, on which there was an insurance of \$7,500. Mr. Buswell immediately after the fire secured temporary quarters near his old location, and in the meantime the burned structure will be rebuilt and in a few months Mr. Buswell should be installed in more beautiful and convenient quarters than before.

Skilled Workmanship Costs More In BAGSHAW-MADE Needles

FROM the time the steel enters our factory (made according to our exact formula), it goes through the various processes in the most efficient manner. Most of the work is done by machinery, but the pointing of the steel before it is cut off into needle lengths is done by skilled workmen.

It is this personal attention to making needle points that gives the quality touch to Bagshaw-made needles, and you can prove the value of this statement by playing Bagshaw-made needles in comparison with needles of any other make.

If you don't know Bagshaw-made needles, we'll send you a package for your personal use. Larger quantities may be obtained through your jobber.

R. NEWTON JONES' CLEVER WORK.

Takes Advantage of Visit of Arthur Friedheim, and This Famous Pianist Listens to His Own Columbia Records in Mr. Jones' Store.

One of the most enterprising dealers on the books of the Columbia Graphophone Co. is R.

As indicative of Mr. Jones' policy of up-to-date-ness, the advertising department of the Columbia Co. recently received from him the interesting photograph shown in the accompanying illustration.

In this picture Arthur Friedheim, the prominent pianist, is shown listening to one of his

sion houses and commercial bankers in New York are doing a legitimate business and that they are, in fact, a benefit to the business community. It was explained by counsel that the proposed bill had been drafted to help the commercial bankers and credit men and was aimed directly at those who solicit the secret assignment of accounts on the eve of a failure. The committee also approved the proposed amendment made to the Bulk Sales law, introduced into the Legislature by Assemblyman Horton, at the instance of the National Association, which seeks to make the present act in this State more on the order of the statute in Michigan, which has been held constitutional by the courts.

HORN MACHINES STILL POPULAR

In Australasia and Demand for Hornless Types Has Had No Serious Effect on Sales—The Views of S. J. Jackson, of Sydney, N. S. W.

We have become so accustomed to talking machines of the hornless type in this country that it is interesting to note that in other countries the talking machine with the horn is still a factor of importance and decidedly popular with buyers. This is true of many countries in Europe, but more particularly is it true of Australia. S. James Jackson, of Jackson & Macdonald, Sydney, N. S. W., who rank among the largest wholesalers of talking machines in Australasia, in writing *The World* recently, remarked:

"Up to the present the hornless talking machine has had no serious effect on the sale of horn type machines in Australia, but this is possible because the bulk of the disc machines sold are of European manufacture, and until the litigation regarding the Holzweissig patents is definitely decided there will be some restriction in the manufacture of hornless machines."

As a consequence of the conditions in Australia there is a great demand for horns, and many inquiries are reaching *The World* office for the names of manufacturers who can supply our friends in the Antipodes.

Australians have long been ardent supporters of the talking machine, and few countries outside of the United States, population considered, have been larger purchasers of records and talking machines. The people are most musical and are keenly appreciative of the remarkable advances made by the manufacturers of the United States in presenting such perfected products, both in machines and records, as are turned out to-day by our manufacturers.

Arthur Friedheim, Pianist, Listening to One of His Own Records.

Newton Jones, of Oshawa, Ont., Can. Although located in a small city off the beaten tracks of large city industry, Mr. Jones has nevertheless achieved a reputation for energy and business acumen that would be a credit to a dealer in the larger cities in the United States.

own records as played on a Grafonola in Mr. Jones' store, and although Mr. Friedheim made but a few hours' stay in Oshawa, Mr. Jones was successful in securing this photograph which he is using to excellent advantage in his publicity work.

TO REGULATE HYPOTHECATION

Of Outstanding Accounts the Subject of a Bill to Be Submitted in the New York Legislature—Credit Men's Association of New York Behind the Measure to Prevent the Secret Transfer of a Debtor's Accounts.

There will soon be another meeting of the legislative committee of the New York Credit Men's Association to discuss further the draft of the proposed model bill drawn by Julius Henry Cohen, at the instance of the National Association of Credit Men, to regulate the hypothecation of outstanding accounts by preventing the secret transfer of all or substantially all of a debtor's accounts, as previously outlined. Following a lengthy discussion on the various phases of the contemplated measure by the members of the committee and others it was decided to allow the members of the committee and others directly concerned further time to consider the matter before taking decisive action. The bill is also to be considered by the legislative committees of the five affiliated associations in New York State. The legislative committee took occasion to disapprove of the Greenberg bills, recently introduced into the Legislature.

Secretary-Treasurer J. Harry Tregoe, of the National Association of Credit Men, commenting on a letter written by a Baltimore concern to the effect that the proposed model bill was the result of the opposition of commercial bankers to the business of discount companies, said his denial of this statement could not be made too emphatic. He said the matter had come up over a year ago, through frauds perpetrated in Chicago and Milwaukee, and from a realization that no legitimate

business house could keep going if it entered into a deal to pay two per cent. a month for money. The point was made at the meeting by one of the speakers that ninety-nine per cent. of the commis-

LECTURER ATTACKS "CANNED MUSIC"

Percival Chubb's Lecture Provides Player-Piano and Talking Machine Dealers with Arguments Showing the Widespread Influence of Those Instruments—Dealers Discuss Lecture.

(Special to The Talking Machine World.)

St. Louis, Mo., March 9.—Percival Chubb, formerly of New York and now lecturer of the Ethical Society here, has run counter to the teachings of the talking machine dealers and player-piano enthusiasts. In a recent Sunday morning lecture on "The Menace of Low-Class Amusements and the New Hope Inspired by the Coming St. Louis Pageant," he denounced player-pianos, talking machines and moving pictures. The pageant, it might be explained, is planned as a gigantic out-of-doors show that will demand the services of 5,000 actors and will illustrate scenes in St. Louis history.

But to get back to talking machines. Mr. Chubb introduced this part of his lecture with the statement that the craftsman of a century ago was much happier than the workingman of to-day who learns to make one part of a shoe, and when he loses his job cannot again work unless he finds a job running the same sort of a machine. He said:

"He no longer sings at his work, as did old Hans Sachs, the cobbler poet of Nuremberg. He knows nothing of St. Crispin, his patron saint, and no longer celebrates the saint's day with his fellow journeymen in dance and song and ceremonial. His domestic life is narrowed to a small dimension. He is an absentee father. Compared with that of the old-time shoemaker, his culture is almost nil. His amusements are those of patronage and not of participation—bought and not self-provided; as a consequence it shows a steady tendency toward the machine-made type.

"The phonograph gives music, but it spells death to the home arts of song and instrumentation, to the family amateur performances, solos, choruses and instrumental music. The moving picture play banishes the living presence, the speaking personality, from the stage. The arts of the theater will be banished by the mute machinery of the movies. During the past week there was only one dignified play in St. Louis, the fourth city of the United States. This obtains in the first hundred cities of the United States."

Some of the talking machine enthusiasts said, "Oh, piffle!" Others who took themselves and their machines more seriously wrote to Mr. Chubb to express their opinion of a man who saw things in this light, also to tell him some of the things that the talking machine had done as an educator and stimulator of public taste.

OPENS STORE IN GLOVERSVILLE, N. Y.

The Darling & Denton Co., who handles the Victor talking machine line in Gloversville, N. Y., held a formal opening of its new quarters in the Darling Block recently. The demonstrating rooms for Victor records occupy a section of the second floor, while Victrolas are on display on the third floor with pianos and players.

NEW CONCERN IN KANSAS CITY.

Phonograph Co. of Kansas City, Organized to Job and Retail Edison Disc and Cylinder Lines in Middle and Southwest—Salesrooms Handsomely Fitted Up—Demonstration Booths of Concrete—Has Wide Territory.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., March 11.—The Phonograph Co., of Kansas City, has been formed here, and will job both the Edison disc and cylinder lines in the Southwest, as well as conduct a retail establishment at 1012 Grand avenue. The company will be managed by W. P. Hope, who has traveled for the Edison Co. for ten years past. The identity of other officers of the company will not be announced at present.

The jobbing territory of the Phonograph Co., of Kansas City, will comprise western Missouri, Kansas, Oklahoma, Arkansas, and west to Colorado. In this territory a limited number of dealers will be placed, though care will be exercised to keep the field from being overcrowded and overworked, in order that retailers of the Edison may be given a fair opportunity.

The spacious storeroom at 1012 Grand avenue, which will serve both as retail and wholesale quarters of the new company, is being renovated throughout, and when completed will be the most attractive establishment of the kind west of Chicago. A concert hall will be a feature of the first floor, which will be the retail department. A small stage will be installed, and the public invited to drop in at any time to rest and hear a few of their favorite selections. Desks for the public also will be provided.

The demonstration rooms will be as nearly soundproof as human ingenuity has been able to attain. Each room will be of concrete, and will be equipped with double glass windows and doors. The fixtures throughout the establishment will be particularly handsome, and will be constructed to order.

The basement, which is light and airy, will serve as the wholesale department. The basement floor is on a level with an alley in the rear; this fact facilitating shipping operations. Wholesaling already has begun, two earloads of Edison machines being on hand. The retail establishment will be ready for occupancy about April 1.

The establishment of the Edison house here adds a good deal of interest to the talking machine situation. The Columbia Co. has a branch here, while the Victor is well represented by the J. W. Jenkins' Sons Music Co. and other piano houses with talking machine departments. The Schmelzer Arms Co., which has jobbed the Edison cylinder, will continue to handle that line, the formation of the Phonograph Co. of Kansas City having no effect on the Schmelzer affiliations.

The Udell Works, manufacturers of cabinets, Indianapolis, Ind., paid signal honor to a life of devoted labor and loyalty to the firm when it closed down the plant Monday afternoon, March 2, that all the employes might attend the funeral of Wesley Kinder, sixty-five years old, who died suddenly.

CHANGES IN TWIN CITY TRADE.

W. J. Dyer & Bro. Take Over Talker Department of Kohler & Hinrichs—St. Paul Department Store Installs Talking Machines—Opera Season Helps Columbia Record Sales—Edison Discs in Demand—News of Month.

(Special to The Talking Machine World.)

MINNEAPOLIS AND ST. PAUL, March 9.—The extensive talking machine department of Kohler & Hinrichs has been taken over by W. J. Dyer & Bro. Kohler & Hinrichs were pioneer distributors of Victor goods in the Northwest until their business was taken over by their creditors. In the reorganization the talking machine department was eliminated. The addition of this stock, of course, is another feather in the cap of the old house of W. J. Dyer & Bro.

Following the example of two Minneapolis competitors, one of the big department stores in St. Paul is planning to install a talking machine department. As a matter of fact, deals already are closed, but the house is not ready to make a public announcement. Both Victor and Columbia machines will be handled. It is understood that the Minneapolis and Powers stores in Minneapolis are doing very nicely with their experiment with talking machines and phonographs.

The Columbia Grafonolas continue to increase in popularity in the Twin Cities and the Northwest, the \$100 Mignonette being a tremendous seller both in Minneapolis and St. Paul. Over in St. Paul, Manager C. P. Herdman is stocking up for the grand opera season.

It happens that many of the principals are Columbia artists, notable among them being Mary Garden, Maggie Teyte, Margaret Keyes, Henri Scott and Hector Dufranne. With such an array of artists in the city for more than a week, it will be strange if the record sales do not increase.

Archie Mathies, of the Talking Machine Co., is carrying on his educational recitals with both Victor and Edison machines in expectation of a successful opera season in April. Trade with this house has been uniformly good even during the dull period of February, and it is confidently expected that the coming year will show much greater results than did 1913.

"We have one big complaint" declared Laurence Lucker, head of the Minnesota Phonograph Co., "and that is that we can't get goods fast enough. Since concentrating our talking machine department solely on the Edison instruments our business has been conducted on more satisfactory lines, and everything would be fine if we only could get the goods. We are away behind with our regular customers and are holding back ten applications for country agencies, as we are not sure that we can provide them with stocks."

TO ERECT MONUMENT TO EDISON.

A movement was launched at Sandusky last week to collect funds for the building of a monument to Thomas A. Edison, the memorial to be constructed at Milan, O., his birthplace. It is planned to dedicate the monument on Mr. Edison's seventieth birthday.

The Most Attractive Stock Record System on the Market

It is Practical—An Attractive Fixture—And Made in any Finish

This photograph shows 5 sections

A ragged looking record stock unnecessary. Record envelopes will soil—but they need not be visible. MOST COMPACT RECORD RACK EVER DEvised. Each Section accommodates 1,000 records—size 6' 4" high, 14" deep at the base, and only 36" wide. 5,000 RECORDS IN THE 15 RUNNING FEET shown in cut. PRICE \$27.50 per section—F.O.B. New York.

DELIVERY BAGS

STOP BUYING WRAPPING PAPER AND TWINE. We have SOLD MILLIONS of these delivery bags. Each bag has a popular record list on it.

Record buyers MUST READ this list—either in taking records home or unpacking the parcel.

Our Dealers who are using these wrapping envelopes endorse them most highly, and give us reports of LARGE CASH SALES made of records selected from just ONE of these envelopes. PRICE \$11.00 per thousand, including imprint of Dealer's name.

STOCK SYSTEM

The record stock system, which has been installed by 90% of our larger Dealers, is something that would pay you to investigate. It is a system which makes you buy JUST WHAT YOU NEED—and in making you know your record stock better, gives you a GREATER SELLING CAPACITY.

Write us for the system that will DECREASE YOUR INVESTMENT IN SLOW SELLING RECORDS—and PUT THAT MONEY IN YOUR CASH DRAWER.

MORE COMPLETE STOCKS AVAILABLE IN PHILADELPHIA

Jobbers and Dealers in Better Position to Handle Large Business—New Agents for Edison Disc Phonographs Plan Active Campaigns for That Line—To Try for Fixed Interest on Instalment Sales—Pennsylvania Talking Machine Co. Plans Improvements.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., March 10.—The Philadelphia talking machine business during the month of February was most satisfying, and in every case the dealers report a considerable increase over last year, some of them having almost doubled their business of a year ago in spite of the very bad weather that prevailed during the end of the month.

About the only change in the situation during the month was the taking on, by several of our most substantial firms, of the Edison disc phonograph. Ramsdell & Son were the first of the piano houses to install the instrument, and while they have built no booths for its display, they have rearranged their warerooms in such a way that they can handle a full line of the Edison as well as a complete library. Already they report a most satisfactory sale of these instruments.

The Cunningham Piano Co. has entered into the business on a large scale. It has given over a considerable space on one side of its first floor wareroom, and has built several very attractive booths, and is advertising the Edison in many different ways, notably with an attractive electric sign in its window. The Cunningham Co. never does anything in a half way, and it will give the Edison a representation which will be bound to bring it trade. It has placed Mrs. M. L. May in charge. Mrs. May was formerly in charge of the Edison store on South Twelfth street, and is an enthusiastic Edisonite, and well capable of looking after the Cunningham department.

These are the only two firms who thus far have gotten in a stock of Edisons, but there will be a number of others to follow. N. Stetson & Co. will handle the Edison, but they have not yet made the necessary preparations. Strawbridge & Clothier will handle it if they will be able to get the required space. As it is they are very much crowded for room, for they now have a complete stock of Victor and Columbia machines as well as records made by both companies.

Strawbridge & Clothier will make a number of changes in their department. They have at present four large hearing rooms, entirely too large for requirements, and they will partition each room and make eight separate rooms, and then they will build a room at the rear of their grand organ, which will be used exclusively as a record room, and they will remove all of their records from their present position.

H. A. Weymann & Sons report that they have been receiving shipments from the Victor in good quantities the past week, which has enabled them to fill a good portion of the orders that have been placed on schedule. They report that their Victor business in February was more than double that of the corresponding month of last year, which is considered remarkable when taking into consideration the scarcity of the supply. When placing their advance order with the Victor Co. for March records and also the special dance records, they anticipated re-orders from their dealers and ordered their stock accordingly, which enabled them, much to the satisfaction of their dealers, to fill all their repeat orders in full and make shipment the day the orders were received.

"There is no question in my mind," says Harry Weymann, referring to the effort to get the dealers to charge a six per cent. on deferred payments, "but that we will be able to bring about the project. It is not likely that we will be able to get the dealers to agree as a body to charge this percentage, but each individual will agree to this proposition and thus evade any complications at Washington. There is no doubt that the small dealers will soon follow suit when the larger dealers take the initiative. An effort will also be made to have the dealers refrain from educating the public, in their advertisements, to know that talking machines can be purchased for \$10 down and \$10 a

month. Of course, where there should be exceptional cases where this was done, it would not hurt us all as it does to-day, for there are lots of people who would come in and pay cash if the customer knew that it was the rule to charge six per cent. interest on deferred payments."

The Pennsylvania Talking Machine Co. has had an exceptional February business. It has shown a hundred per cent. increase over last year, and the attractive record list of the past three months has in a great measure been responsible. The firm has been contemplating elaborate changes in its warerooms, but has not been able to put these into effect for the reason that it did not want to disturb business, and thought it best to wait to the end of the opera season and the close of the Metropolitan box office. It will build a gallery on the first floor, with a seating capacity for several hundred persons, where concerts will be given daily. It will be able to do this on account of the extreme height of its ceiling and yet not interfere with the convenience of its regular warerooms. Manager Eckhardt has gone West on a business trip of a week's duration.

Louis Buehn reports that he has had a most satisfactory month in February, and ran about ten per cent. ahead of last year in spite of the continued shortage of machines and records. He has been doing especially well with the Edison dictating machines and has placed a number of additional machines with the Pennsylvania Railroad, the Link Belt Co., the Biddle Hardware Co., and other prominent concerns.

COLUMBIA WITH ATHERTON-BYRD CO.

The Columbia Co. closed a very important deal this week when arrangements were consummated with the Atherton-Byrd Co., of Haverhill, Mass., whereby this prominent and successful furniture house will handle a complete line of Columbia machines and records. This same company handles the Columbia products in Worcester, Mass., and Lewiston, Me., and its success has been so emphatic that it has enlarged both departments since it was first opened a short while since. The Atherton-Byrd Co., caters to a high-class furniture clientele, who evidently appreciate the merits of the Columbia machines and records.

A NEW DEMONSTRATION IDEA.

Machines Placed in Rest Room of Famous-Barr Co. Serve to Attract Numerous Prospects for Department—Capable Salesmen, with Mind Reading Ability, Placed in Charge.

(Special to The Talking Machine World.)

St. LOUIS, Mo., March 9.—Manager Ligon, of the Famous-Barr Co., is getting some advertising from a novel plan of entertaining the visitors in the great department store's rest room. Perhaps 2,000 persons a day pass through this rest room and most of them stop to rest, to wait for some one or merely to loiter. Recently a player-piano and an Edison disc and Victrola have been placed there with one of the floor salesmen of the piano department in general charge.

A steady concert is given with the piano and talking machines alternating. If Messrs. Bollman and Harcourt, who usually are in charge of the demonstration, see any persons taking more than ordinary interest in the music they do a mind reading stunt and put on the selection that they think will strike home best. For instance, if the man is wearing a G. A. R. badge, they put on "Marching Through Georgia." If the veteran shows gray in his clothing, it is "Dixie." The women's walk often shows whether they are guilty of tangoing or merely walking up the aisle in church. Anyway a guess is ventured, and no one is the wiser if it misses, but if a hit is made the person often walks over to talk about it. The instant the person asks what make machine or player or what tune it is, there begins a lock step toward the elevator and on the sixth floor where all of the musical instruments are sold. The other salesman is keeping a weather eye out and he takes the next elevator to the rest room to stand guard. The possible customer who inquired for details is given opportunity to look over the stock of talking machines, player-pianos, records, rolls or whatever may have struck his or her fancy, and a good many times money changes hands before time is called. As a business getter, this informal stunt produces better results than the formal concert.

RETURNS FROM EUROPE.

Edward N. Burns, vice-president of the Columbia Graphophone Co. and manager of the export department, is due back in New York March 15 on the steamer "Imperator" after a five weeks' trip to Europe. E. E. Robinson, the well-known traveler for the Columbia export department will arrive in New York next Tuesday after an eight months' stay in the Orient, where he closed an excellent business and established many new agencies.

MUCH INTEREST IN EDISON DISC JOBBERS' ASSOCIATION.

Jobbers Throughout the Country Quick to Realize the Importance and Desirability of the New Organization and to Apply for Membership—Association Headed by Men of Recognized Standing in the Industry and in a Position to Accomplish Much Good.

The formation in New York last month of the Edison Disc Jobbers' Association, as was announced in the February World, has aroused great interest on the part of Edison disc jobbers and dealers throughout the country as mark-

H. H. Blish, President.

ing a distinct forward step in the presentation of the new Edison product to the trade and to the public.

Organized by a group of jobbers recognized as representative of the most substantial and best element of the trade, the new association has impressed the trade with its importance, with the result that those Edison disc jobbers who were unable for one reason or another to attend the sessions in New York last month have been quick to advise the officers of the organization of their

F. H. Silliman, Treasurer.

interest and desire to become affiliated with the body.

The result of concerted effort on the part of the Edison disc jobbers throughout the country in presenting the new disc proposition to the dealers and to the public is evidenced in the wonderful success that has attended the campaign up to this point, both in the matter of signing up dealers of standing and also in reaching the retail buyers. In all this the jobbers and the factory have worked together, following the meeting of the Edison disc interests held in New York last fall, and the value of a permanent organization for the discussion and development of campaigns and for taking up any other matters of interest and im-

portance to the trade at large is to be appreciated.

As announced in The World last month, the association is headed by H. H. Blish, one of the prime movers in its organization, and whose company, Harger & Blish, of Des Moines, Ia., has for years been a recognized factor in phonograph circles throughout Iowa and a large section of the Middle West. F. H. Silliman, of the Pardee-Ellenberger Co., New Haven, Conn., and Boston, Mass., has for years been one of the most active figures in the trade throughout New England, and H. G. Stanton, the secretary, is with the R. S. Williams & Sons Co., Ltd., Toronto, Ont., one of if not the most prominent concerns in talking machine and phonograph fields in Canada. C. B. Haynes, head of C. B. Haynes & Co., Richmond, Va., and the vice-president of the association, is one of the pioneers in the trade in Virginia and the Carolinas and enjoys an enviable position in that field. In addition to the four officers named, the executive committee includes Laurence H. Lucker, of the Minnesota Phonograph Co., Minneapolis.

H. G. Stanton, Secretary.

Minn.; C. E. Goodwin, of the Phonograph Co., Chicago, and B. W. Smith, of the Phonograph Co., Cincinnati, O., all men of recognized standing in the industry.

The Edison disc jobbers have at the head of their association men with ideas who have proven their ability to accomplish the results desired. The future of the organization will be watched with interest.

FROM WINTER TO SUMMER.

Several Members of Local Talking Machine Trade Escape Some of New York's Winter Weather by Sojourning in Bermuda.

J. H. Dodin, in charge of the talking machine department of Gimbel Bros., under Manager George W. Morgan, who has been spending several weeks at Hamilton, Bermuda, accompanied by Mrs. Dodin and a party of friends, returned to "Old New York City" just in time to "enjoy" the worst storm of the winter. There was quite a little convention of talking machine men in Bermuda about the middle of February, the "conventioners" being E. Paul Hamilton, manager of the piano and talking machine departments of Loeser & Co., Brooklyn, N. Y., with Mrs. Hamilton, Sol. Lazarus, the well-known dealer of New York, and Thomas Green, the popular Victor Co. salesman, accompanied by Mrs. Green.

In all your dealings, remember that to-day is your opportunity; to-morrow some other fellow's.

IMPORTANT ALBUM IMPROVEMENTS.

George Bates, of the New York Album and Card Co., Inc., Tells of the Improvements Recently Made in Company's Specialties.

"After extended experimentation and tests we have decided to equip our talking machine record albums with leather-covered ring pulls in the future, instead of metal ones," said George Bates, of the New York Album and Card Co., Inc., 23 Lispenard street, New York. "In addition to being considerably more attractive than the metal pulls, these leather-covered ring pulls eliminate any possibility of scratching the talking machine cabinet or furniture, as happens so frequently when the metal pull is used. This new ring pull is finished to match the album perfectly in color, making it most attractive and doing away with the glare of the metal pull, which has been the cause of considerable annoyance to talking machine owners. The elimination of all chances of scratching the highest polished cabinet or piece of furniture is in itself an advantage that will doubtless be recognized by the dealers throughout the country."

The New York Album and Card Co., Inc., which was incorporated last month, takes the place of the New York Post Card Album Manufacturing Co., continuing the business at the same address with the same officers and organization.

NEW YORK'S EDISON JOBBING CENTER

Will Be Located at 473 Fifth Avenue—Will Not Be Ready for Occupancy Until Late in the Summer—Lease Signed This Week.

A ten years' lease of the property 473 Fifth avenue, between Fortieth and Forty-first streets, New York, was signed this week. When the building is reconstructed it will constitute the Edison jobbing headquarters in New York City. The lease was signed by Babson Bros., of Chicago, but it is said that the new jobbing center in New York will not be operated under this name. Full details of this new Edison move, which is of interest to New York talking machine men, will appear next month. The building will not be ready for occupancy until late in the summer.

NEW COLUMBIA "JEWEL."

The Columbia Co. will make the first public announcement of its new "Jewel" machine through the medium of a striking advertisement in the March 21 issue of the Saturday Evening Post. In addition to featuring this popular \$35 machine, this advertisement will offer a special \$50 combination, including the "Jewel" twenty records, two record albums and 1,000 needles. In a letter to its trade the Columbia Co. suggested the advisability of placing orders for "Jewels" immediately.

A VISITOR FROM MIDDLETOWN.

One of the many visitors last week to the offices of the Columbia Graphophone Co. was President Holmes, of the Holmes Music Co., Middletown, N. Y., an enthusiastic Columbia representative. Mr. Holmes placed a substantial order for Columbia products, as he contemplates enlarging his Columbia department in the very near future to accommodate a fast-growing business.

OPTIMISTIC OVER CONDITIONS.

John Dorian, the popular treasurer of the Columbia Co., returned Tuesday from one of his frequent trips through the South and West. A keen student of industrial conditions, Mr. Dorian's optimism regarding his recent trip is a certain indication of good times with the Columbia dealers.

The Morse clarifier, made by Morse Bros., of Minneapolis, Minn., is an attachment for talking machines that consists of a number of small graduated pipes, so calculated in length as to bring vibrations to a hearer's ear up to the point where resonance occurs. It is built in several models so that it can be attached to all talking machines, where its function is to clarify sound reproduction.

Many a man mudds himself trying to splash his competitor.

CLEVER WINDOW DISPLAY

Made by the Columbia Graphophone Co. Branch in Cleveland, of Which G. R. Madson is Manager—Its Originality of Arrangement Wins Praise of Prominent Business Men—Great Business Getter for the Featured Records.

(Special to The Talking Machine World.)

CLEVELAND, O., March 7.—The accompanying photograph will give a fair idea of the originality and beauty of the latest window display presented

Columbia Co.'s Very Striking and Individual Window Display.

at the local store of the Columbia Graphophone Co., 913 Euclid avenue. George R. Madson, manager of this store, has been congratulated by many prominent business men on the exceptional characteristics of the display, and J. McClelland, of the local sales staff, who designed the window, has been the recipient of general praise and commendation from local members of the trade.

The window consists of a flooring of moss, with gravel walks, and contains the following arrangement of dolls and kewpies illustrating various records. Beginning at the left, there is a doll dressed in a gingham gown, with the label, "The Girl in

FLOODS HURT COAST TRADE

Particularly the Southern Section Where Great Losses Occurred—Talking Machine Dealers Report Increasing Interest in This Line at All Points—An Interesting Budget of News from Southern California Territory.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., March 7.—The unusually heavy rains, which were so destructive and did such a tremendous lot of damage, caused a slump in all business affairs, including the sale of talking machines and records. Old settlers claimed it was the worst storm of its kind in Los Angeles. All of the surrounding towns were completely isolated for several days, causing a general tie-up of the railroads and electric lines. Many people lost their homes and property throughout the Arroyo Seco section.

Barker Bros.' Furniture Co. has just moved its talking machine department into the main store building, and has equipped it in the most up-to-date fashion. Several soundproof rooms for demonstration purposes have been lavishly furnished and fitted with very attractive displays of Columbia and Edison goods.

Chas. S. Ruggles, local manager of Sherman, Clay & Co., is around after being laid up with a sprained ankle.

W. L. Davenport, of Chihuahua, Mexico, recently arrived in Los Angeles from Hermosillo, where he has had a very flourishing talking ma-

chine business, but has been compelled to give it up and get out, as the present conditions in Mexico were too hot for him.

the Gingham Gown"; directly in back of this doll is a toy express train containing three kewpies, with the name of "Honeymoon express." Then follows dolls dressed and arranged to illustrate the following records: "What Do You Mean, You Lost Your Dog?" "You're a Great Big Blue-Eyed Baby," "Peg o' My Heart," "Oh, You Million Dollar Doll," "Where Did You Get That Girl?" "Kiss Me Good Night," "On the Old Front Porch," "Get Out and Get Under," "Sit Down, You're Rocking the Boat," "When Silas Did the Turkey Trot to Turkey in the Straw."

The window has been in use for the past two weeks, and Mr. Madson states that it has been an absolute business-getter, the particular records mentioned having met with a remarkable sale. The cost of the window was exceptionally low, \$1.10 being the entire expense for this beautiful display. William Taylor, Sons & Co., Columbia dealers in this city, furnished and dressed the dolls and were very glad to do so, as the window has been an excellent advertisement for them in connection with their doll and kewpie department. The dolls are designed in a clever fashion, bearing apt reference to the songs they represent.

chine business, but has been compelled to give it up and get out, as the present conditions in Mexico were too hot for him.

Baxter & Northrop have recently made a change in their talking machine department by appointing E. L. Dornseiff manager of the department. Miss Annie M. Pennick, who was formerly connected with the Portland, Ore., branch of the Columbia Graphophone Co., is now one of the sales force.

The Southern California Music Co. reports through its manager, O. A. Lovejoy, a very good wholesale and retail trade. A very unique and attractive window display from February 9 to 16 marked the celebrating of the sixty-seventh birthday of Thomas A. Edison. In one window was displayed the Edison disc machine, the Edison cylinder machine and the Edison home kinoscope. The other window showed the equipment of a modern office using the Edison dictating machine. Another feature was the giving away of several thousand buttons with just the figures "67," indicating the sixty-seventh birthday of Mr. Edison. An attractive demonstration of the same goods was given at the Los Angeles Business Show the week following.

W. F. Stidham, manager of the Columbia Graphophone Co.'s local branch, reports a very active February business, the results being a material increase over the business of the same month of last year. The demand leans very strongly to the higher priced instruments.

G. Stewart Pooler, connected with the selling

force in the talking machine department of the Geo. J. Birkel Co., has been shipping over some of the best deals of the season in the Victor line.

The Edison Coast representative, A. V. Chandler, spent a few days in Los Angeles, then leaving for the Imperial Valley and Arizona. Throughout his travels Mr. Chandler has found the Edison disc machine to be very popular.

E. C. Polk, from Sidney, Australia, visiting Los Angeles for a short time, is much interested in the Edison disc line, which he would be much pleased to gain the privilege as a dealer in his section.

Newton I. Hancock, traveling representative for the Columbia Graphophone Co., of this city, returned from a trip through all Southern California and Arizona, reporting a very satisfactory condition of the talking machine trade.

INTRODUCE AUTOMATIC STOP.

Standard Gramophone Appliance Co. Exhibits New Stop at Industrial Show in Brooklyn—Described in Detail by Manager Thomas Kirkman—Simplicity a Strong Feature.

The Standard Gramophone Appliance Co., 173 Lafayette street, New York, manufacturers of the Standard fibre needle cutter, which has scored a most gratifying success in the short while it has been on the market, placed on the market last month a new automatic stop, which is designated the Standard. This new stop was exhibited for the first time at the Loeser & Co. booth at the Brooklyn Pure Food and Industrial Exposition, which took place the first two weeks of this month, and attracted considerable attention and praise.

In introducing this new stop, Thomas W. Kirkman, manager of the Standard Gramophone Appliance Co., remarked: "One of the most important features of our new stop is its extreme simplicity, which is indicated by the fact that it weighs but one and one-half ounces. This stop does not mar the appearance of the machine in the least, as its mechanism is so arranged that all the screws are invisible and leave no marks on the machine itself. We have tested this stop thoroughly before placing it on the market, and can now assure the trade that the new Standard automatic stop will positively perform all that is claimed for it."

The new Standard stop is manufactured in two styles, nickel-plated and gold-plated, the former is marketed to retail at \$2, and the latter at \$3, with the usual discounts to the trade.

A CANADIAN CORPORATION.

The National Talking Machine Co., Ltd., Winnipeg, Man., has incorporated as wholesale, retail and jobbing dealers in talking machines and accessories, with capital stock of \$50,000. Incorporators: Aylmer Everett Dilts, Alexander B. Alexander, David Wilson, Herbert E. Soal and Albert C. Ferguson.

RECORD MAKER WANTED

Wanted, a high-class, experienced record maker. State experience and salary. Address Martin Connor, 156 West Washington St., Chicago, Ill.

INTEREST ON INSTALMENT SALES

Formed the Subject of Discussion at a Meeting of the Managers of the Leading Talking Machine Houses in Chicago—Sense of Meeting That Six Per Cent. Interest Rate Should Be Charged on All Deferred Payments.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 12.—Pursuant to a call by L. C. Wiswell, a meeting of talking machine managers in the loop district was held at Kuntz-Remmler's this afternoon to consider various matters affecting the retail trade. The principal subject of discussion was the matter of interest on instalment sales. It developed that some concerns have been charging interest invariably while others have waived it providing the entire amount was paid up in a specified number of months or if in the monthly payments a stipulated minimum amount was maintained.

It was the general sense of the meeting that all such exceptions were against the best interests of the trade, and that in the future a 6 per cent. interest rate should be charged on all deferred payments. It is believed that all of the concerns in the loop will take the same view. In fact, since the meeting several of the absent managers have been communicated with and have so expressed themselves. Those present were: L. C. Wiswell, Lyon & Healy; F. A. Siemon, Wurlitzer Co.; Ed. Smith, Kimball Co.; George Davidson, Talking Machine Shop; G. H. Bent, George P. Bent Co.; P. T. Stark, P. A. Stark Piano Co.; Leonard Hall, John A. Bryant Piano Co.; E. A. Fearn, Tresch, Fearn & Co., and George C. Vining. Other matters were suggested, but lack of time prevented adequate discussion. Another meeting will be called in the near future at which the matters of terms of instalment sales and allowances on second-hand machines will be considered. The formation of a permanent association was not broached at the meeting, but it is not improbable that such an organization may result.

This movement has nothing whatever to do with the old Chicago Talking Machine Dealers Association composed entirely of dealers outside the loop district.

THE GRAFONOLA CO., INC.

Organized in Cleveland—Takes Over Columbia Store at 913 Euclid Avenue, Cleveland, and Will Feature Columbia Goods Exclusively.

(Special to The Talking Machine World.)

CLEVELAND, O., March 10.—The present Columbia store, at 913 Euclid avenue, has been purchased by the Grafonola Co., Inc. C. A. Routh, who was assistant manager of the Columbia, is at the head of the new company, and will handle Columbia goods exclusively.

Hereafter, the Columbia Co. will confine itself to the wholesale and distributing business exclusively. The new store is on the fourth floor of the new mammoth Kinney & Levan Building.

The H. M. Brainard Piano Co. will open at 1317-19 Euclid avenue on April 1, with a complete line of Columbia goods.

JOHN McCORMACK WAS GUEST

Of the Southern California Talking Machine Men's Association at Banquet at Union League Club on Way East from Australia—Given a Great Welcome—Evening Was One of Keen Enjoyment to All Present.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., March 7.—The Southern California Talking Machine Men's Association gave a banquet at the Union League Club on the evening of February 13 in honor of Mr. and Mrs. John McCormack, the great Irish tenor, who is just making his tour through the entire country. Aside from Mr. and Mrs. McCormack there were present Chas. F. Wagner, manager; Donald Macbeath, violinist, and Vincent O'Brian, pianist; L. E. Behymer, impresario, and his private secretary, Miss Rena McDonald.

After the sumptuous repast short talks were

John McCormack.

given by E. P. Tucker, manager of the Wiley B. Allen Co.; C. H. Rundel, secretary of the Southern California Music Co., and Impresario L. E. Behymer. Mr. McCormack gave a very interesting talk pertaining to the value of educating the people to a higher standard of music, stating that Irish music was not all jigs and reels, but real folk lore of Ireland. Mr. McCormack says this was the first time he was ever entertained by any talking machine association of this kind.

So impressive and congenial were the characters of this great artist and his little wife that it made a strong impression upon the members, their wives and friends of the association, that they unanimously elected Mr. and Mrs. McCormack to honorary membership.

Through the courtesy of Mr. Behymer all members of the association that were present at the banquet were given tickets to the McCormack

concert, which was immensely enjoyed by all who attended.

This Talking Machine Men's Association, under the official direction of Sibley G. Pease, president; B. H. Burke, vice-president; H. H. Fish, secretary and treasurer, and Lorenz Dornseiff, assistant secretary, has proven to be a great help in the talking machine trade. It is a little over three years old, with a membership of nearly a hundred, composed of both employers and employes. General questions pertaining to the welfare and condition of the trade are always under discussion and advisement, which has proven to be a great civic center for the talking machine trade.

APPOINT NEW EDISON AGENTS.

Four Connecticut Houses Take on the Edison Disc Line—J. W. Scott's Effective Work.

Reference is made elsewhere in this issue to the success scored by J. W. Scott, special representative of the phonograph sales department of Thomas A. Edison, Inc., in New Haven, Conn., where he has interested thousands of people in the new Edison disc phonograph. His recitals have attracted a great deal of interest and have been the subject of considerable mention in the New Haven papers.

During his stay in New Haven Mr. Scott closed a number of new agencies for the Edison line, among others the Calder Music Shop, one of the best equipped establishments in New Haven, which will give the Edison line a strong representation; the Alfred Fox Piano Co., which has stores in Stamford and Bridgeport, and C. L. Pierce & Co., of New Britain. These establishments placed large initial orders for Edison disc phonographs and records.

Mr. Scott is quite a veteran in the phonograph field, having been associated with the Edison interests for over fifteen years.

MASTERPHONE POPULARITY.

Demand for Fibre Needle Masterphone as Well as Original Steel Model Is Enormous—Prominent Dealers Are Placing Large Orders.

"The demand for the Masterphone is steadily increasing, both in the original steel model and the fibre needle styles," said an official of the Masterphone Corporation, 187 Broadway, New York. Although the fibre needle Masterphone has been on the market but a short time, we have been unable to supply the demand for it, and at the present time are behind on our orders. From all parts of the country we are in receipt of letters from prominent talking machine dealers, speaking in the highest terms of the improvement that is noticeable by the use of the Masterphone on all classes of records.

"The steel needle Masterphone is now being marketed by dealers in practically every fair-sized town in the country, and the consistent advertising that we have been placing in the national mediums has been of considerable benefit to our patrons in producing inquiries that resulted in ready sales."

Schafford Record Albums

17 new style cut envelopes, bound in either brown silk cloth or imitation leather in any color. Strongest bound Album made. Schafford Albums are of the highest quality and should not be confused with lower-priced, inferior albums.

Send for sample and prices. The quality will surprise you.

SCHAFFORD ALBUM CO., 27-29 Walker St., NEW YORK CITY

RELATIONS OF DEALER AND JOBBER AND VICE-VERSA.

W. E. Kipp, President of the Kipp-Link Phonograph Co., Indianapolis, Discusses "What Should a Dealer Expect of a Jobber; and What Should a Jobber Expect of a Dealer" in Current Issue of Phonograph Monthly—His Views Are Interesting to the Trade.

When asked to write on this subject, I knew it was one that could be made to cover many pages. It is not only a very broad subject, but one that carries with it an endless number of changeable conditions; and it must be remembered also that opinions along these lines vary quite a great deal.

I will therefore attempt to give my views on the subject in the fewest possible words.

First, I think that the dealer expects, and has every right to expect, that his jobber should carry a stock of goods at all times which is sufficiently large to meet his trade requirements. The jobber should remember that he is after all the dealer's real friend and support in the business and the one on whom he depends always for complete information regarding the line, as well as to furnish the goods promptly. The jobber should therefore always be prepared and willing to give the dealer every service possible.

He should pay particular attention to the small details which so often the dealer needs help on. He cannot be too careful to be prepared at all times to furnish all of the smaller repair parts as well as the larger and more staple items on a moment's notice; also, be always fully equipped with printed matter. The little items are the ones that the dealer often needs just as badly as a large order.

To do all these things the jobber is sometimes entirely at the mercy of the manufacturers and is helpless to give good service, because of his inability to secure a stock equal to the dealer's demands. However, it still remains true that sometimes the jobber has failed to anticipate properly what will be expected of him, and in this way he causes his dealers an annoyance that should be avoided. I do not believe there are very many Edison jobbers operating these days who are guilty of mistakes of this kind, as they have all known for a long time what a powerful and attractive line the Edison goods have developed into, and for this reason they are not only willing, but are constantly endeavoring to carry more liberal and complete stocks.

The dealer in my opinion has a right to expect good, honest advice from his jobber at all times as to what he should order and carry in stock. The jobber cannot always be depended on in this, but he is usually fairly able to know where one dealer's opportunities to handle certain items in the line are far better than those of another dealer. I think, therefore, that the jobber should always be as frank and conservative with his dealers as possible, and guide them toward carrying an attractive and complete stock, but no larger than is necessary in his locality. In this way he helps keep the dealer from becoming overloaded with unsalable goods. (Overloading a dealer always creates a feeling of uncertainty and should be avoided.)

The jobber, I think, should always be willing to go out of his way to help his dealers overcoming certain troubles which the dealer seems to be unable to cope with. He can do this because of his thorough knowledge of the business. The jobber should bear in mind that he is devoting practically all of his attention and effort to this one line of goods, while a great number of the dealers only carry Edison goods in addition to many other lines. For this reason it cannot be reasonably expected that the average dealer is as well posted as a jobber. It is perfectly true that when any important changes take place in the line that the factory immediately sends complete bulletins describing such changes to all of the trade. The jobber usually absorbs this information and makes it an important part of his business, while the dealer very often looks the bulletins over, takes it for granted that it is of no great importance, and soon loses sight of the information it contained. Right here is one of the important features of the jobbing business, and where the jobber should always be prepared to give information to the dealer that happens to need it.

There are many dealers who are unable to carry a complete stock of all the different types of machines, but who might have good prospects of selling some of the finer styles if they could show their customers the article itself. It is impossible for the jobber to send these fine machines out to the dealer on approval, and I believe, therefore, that every dealer should be made to feel thoroughly at home to send such prospective buyers directly to the jobber, and I think that the jobber should use every possible effort to help that dealer land the sale. In other words, the dealer should be made to feel that the jobber's display room is also his, and that every service will be rendered his customers should he send them to the jobber.

Having been in the jobbing business for a number of years myself, I have had the opportunity to make many personal calls on most all of my dealers, and I have heard many complaints from some that were, indeed, well founded; then again I have heard many that were not.

A dealer should remember that the jobber is not a performer of miracles, but just an ordinary human being like most any other fellow; that he has an endless amount of trouble to take care of just the same as every one else. The dealer should remember that the jobber is always trying to do the very best he can to deserve that dealer's business. It should be remembered that he is simply a middle man in the phonograph proposition; one who buys and pays outright for the goods he has to sell.

The dealer should always keep in mind that the jobber's risks are terrific, and that he very often has every dollar he owns at stake; in most instances Edison jobbers have absolutely nothing else to depend upon for a livelihood.

The dealer should remember also that the jobber's profits are very limited. It can easily be seen, therefore, that the jobber needs every dollar's worth of business that he can get.

I think that when a jobber is doing all he can to please a dealer and is giving him good service that it is absolutely wrong for that dealer to transfer his business elsewhere. Of course, if the jobber is unable to give satisfactory service or should be neglectful, the dealer is perfectly entitled to seek elsewhere for the goods.

Another demand that the dealer should not make

on his jobber, and which is always an imposition, is to ask the jobber to send goods on approval. This is unfair to the jobber because his greatest endeavor at all times is to keep his stock clean and fresh looking and in its original factory packing. Further than this, the jobber may receive demands most any time for the very goods that might go out on approval, and then lose opportunities to make bona fide sales on these goods; all of which robs him of profits that he is justly entitled to.

The greatest handicap that the dealer can possibly work on the jobber, after all, is to neglect paying his bills promptly. The dealer should remember that the jobber is buying from a company who insists on prompt settlements, and strictly according to their contracts. As his profits are very small and his expenses very heavy, it is wrong to abuse the jobber by holding him up in favor of some other creditor. Simply because the jobber has trusted the dealer with a liberal line of credit should make that dealer many times more anxious to send in returns promptly and so prove his appreciation.

As I said at first, this subject is one that could be made to cover many pages, and I realize there are many points at issue that I have not covered; but to sum up the whole matter, I would say, the dealer has a right to expect every attention, help and courtesy that the jobber can possibly give; that he in return should be as fair and liberal-minded with the jobber as he possibly can.

I believe that to-day a better understanding along these lines exists between the two than ever before, and I hope it may be improved as we go along.

READING THE CHECKERBOARD.

The story is told of a certain merchant who had dined and wined to the limit found his way home in the wee sma' hours. He reached the library just as he heard his wife's footsteps at the head of the stairs leading to her bedroom. He hastily reached for a book from the library shelves, dropped into a big easy chair and had the book spread across his lap, when his wife entered. "Will! what are you doing here at this hour?" she asked. "Just reading, dear. This book has been in the library five years. I've made up my mind dozens of times to read it. To-night I'm going to finish it. Don't worry, my dear. You can go to bed. I'll continue reading." "Will," replied the wife with authority, "close up that checkerboard and come to bed."

The Simpson-Crawford store, New York, with its talking machine adjunct was closed March 14.

UNION SOUND BOX

Gold plated, Nickel or Oxidized \$20 per dozen net

3 THAT SELL ON FIRST SIGHT

At the left is the new UNION Sound Box just out, taking Fibre or any make of needle. It is the latest improvement in sound reproduction, and fits all Disc Machines.

UNION TALKING MACHINE SPECIALTIES

The upper right-hand illustration shows the UNION Modifier, a quick selling device, giving Edison, Victor and Columbia owners absolute control over the volume of sound. The lower illustration shows UNION No. 1 for playing Columbia and Victor records on Edison Machines. UNION No. 1 contains the UNION Modifier feature.

Write to-day for descriptive folders and prices on these three easy selling specialties.

All persons selling goods infringing our patents are liable to suit for such infringement.

Patent No. 776-672, others pending.

When a customer wants a "Jewel" is a mighty hard customer

The announcement of the Columbia Grafonola "Jewel," \$35, was the most significant trade move since the announcement of the Columbia Grafonola "Favorite."

The "Jewel" has the hinged enclosing lid. It has the exclusively tone control leaves at the front which have supplanted the old idea of small doors. It has the new Number 6 Columbia reproducer. It has the regular standard Columbia motor—double spring drive. *And it is all of \$15 better than the market price of instruments of other manufacture.*

And the "Regent": to begin with, there's nothing else on the market that even looks like it.

In figuring up the reasons for the great Columbia advance during 1913, it becomes powerfully evident that the Columbia Grafonola "Regent" tables had a lot to do with it. Every dealer in the country who shut his doors against the \$100, \$150, \$200, and \$225 "Regent" models lost money on the deal. Shut his *own* daylight out. Lost his *own* money.

But there's a big field open and we have only just begun to plow. Show us how we can put the stronger, and you will still be inside the mark.

And all the way between we have a magnificent line of product—instruments and records both. But the product to be sold is no more important to the man who sells it than the selling policy behind it and the demand in front of it.

HANDLING COLLECTIONS OF INSTALMENT ACCOUNTS.

Some Important Suggestions on This Vital Department of Business Presented by Benj. Switky, the Well-Known Talking Machine Distributer, Who Has Given Much Serious Thought to Topics of This Nature—Views Presented Below Are of Much Value.

We are living in what might be called the "Instalment Age." To-day, about the only thing that cannot be had on credit is a ride on a street railway. In former years a store that sold on the instalment plan was in a class known as instalment houses; and families that cared for their reputation in the neighborhood were careful not to have goods delivered by a wagon bearing the name of a well-known instalment firm.

How things have changed! The tendency toward instalment buying is growing stronger each year. The best and biggest of stores are now urging their customers to avail themselves of the "club plan" in buying furniture, musical instruments, hats, caps, shoes, clothing, jewelry—in fact, everything. Of course, we must concede that the better stores for a time were reluctant to indorse or adopt such methods of merchandising, and drifted into easy-payment selling only as a result of keen competition.

While deploring the inroads made upon good, profitable cash business by the tempting instalment inducements held out, the object of this discussion is to deal with collections. Still, one cannot discuss collections without pointing out that *difficulty in collecting is the direct result of reckless extension of credit*. Reckless extension of credit includes selling on long time even to people who can be classed as good risks.

Most stores seem too anxious to write up a \$200 or \$300 contract just because it makes a good showing on the day's sheets. On the other hand, in the effort to surround themselves with the comforts and the pleasures of life, many individuals and families forget to ask themselves whether they can really afford these things which they are buying. How many of them, when they are about to sign a contract for a piano, or a Victrola, or a fine parlor suit, ever stop to realize that they are placing a mortgage upon their humble earnings—and that the mortgage is to run for a period of one, two or three years? How many persons can confidently claim that they will meet their payments regularly and honorably during one, two or three years without interference from unexpected misfortune such as sickness, unemployment or other unforeseen causes?

Although the work of collecting does not begin until after the deposit is taken and the goods delivered, nevertheless it is part of the work of collecting to have at hand certain data that will help to throw light on the account. For this purpose I would suggest that every dealer provide himself with a quantity of "application blanks"—a regular printed form, which can be made up very cheaply. (Specimen application blank follows.)

APPLICATION BLANK.

(No Contract executed with a minor.)

Name in full.....
 Residence..... How long?.....
 Former residence..... How long?.....
 Business address..... How long?.....
 Married or single.....
 Goods desired.....
 Terms.....
 References:.....
 Remarks:.....

The application blank, after being carefully filled in, should be pinned to the signed contract. In many cases, when an account becomes uncollectable after a year or two, particularly if the party has removed, you can trace him through friends who knew him at the old address, or through business associates, etc. If your customer is married and has children, you can locate their new whereabouts by inquiring of their playmates, or get the information at the public school which issued the transfer to another school.

Furthermore, in the course of verifying the facts and references given you will get a pretty good idea of the character and veracity of the applicant.

At the time of signing the contract you should impress on your customer the fact that the instalments are payable *at your store*. Tell him that you have no regular collector, first of all because of the expense, and secondly, because you wish to protect him against the inquisitiveness of his neighbors, who might gossip about the collector's visits. Impress upon him, however, that you will be after him should he allow his payments to lag.

Keeping Track of Payments.

Besides your regular method of bookkeeping you must have a system by which the names of customers will be brought automatically to your attention on the day when the payment falls due. For this purpose I would suggest that you or your bookkeeper have on the desk a little calendar pad. You can obtain one from your stationer for about fifteen cents. The pad is mounted on a metal stand and fastened by a screw. There is a separate leaf for each day of the year. Each leaf has on it the day and date, with a blank space above for memoranda.

Every time that a new account is posted in the ledger, the name should also be entered on the pad as follows: Say the sale was made on Monday, January 5, and payments are to be weekly. Write the customer's name on the leaves of the pad bearing the dates of Tuesday, January 13, 20, 27, and February 3, 10, 17 and 24. After that the entries on the pad need appear only twice a month, say about the tenth and twentieth. In this way you keep close watch on the accounts for the first two months. They cannot be overlooked. When a payment is past due a statement should be sent. When two payments are due together the customer should have his attention called to the fact. Ordinarily, it is not necessary to send statements to weekly accounts, except as a reminder.

Accounts payable monthly should likewise be entered on the pad, unless the payment falls due on or about the first of the month. The presumption is that all accounts in the ledger are reviewed monthly on the first, at which time statements are mailed.

Method of Collection.

As previously stated, it should not be necessary to incur any expense other than stationery and postage in collecting the bulk of the accounts. I find too many dealers neglecting their stores in order to call on accounts ninety per cent. of which could be handled from the office. Others, again, employ irresponsible collectors, placing themselves at the mercy of poor devils whom they cannot afford to pay liberally because it eats too deeply into the margin of profit.

Many a time I have heard the remark, "It's no use, you've got to go after it." True. The man who does not look after collections aggressively has no right to do instalment business, for he cannot get good results. On the other hand, a man cannot devote most of his time and energy to collecting alone. He must find time to look after the selling. I have known dealers to go out collecting while leaving a boy or girl of about fourteen or fifteen years in charge of the store. These may serve as monitors, but they cannot sell.

The time for you or your clerk to call on the delinquent payer is after Uncle Sam has failed to bring you results. Nor do I favor unnecessary letter writing. When a monthly payment falls due, or a weekly payment is past due, send a statement. The name of the weekly payer should be entered on your memorandum pad so that your attention will be called three or four days later. The monthly payer should be allowed a week or ten days, and entered on the pad accordingly. (Some dealers use a card system, advancing the card from one space to another; but often the cards are accidentally misplaced and confusion results.)

If the remittance has not arrived within the time allowed, mail another statement showing the amount of payments due. On the statement write: "Second request. Please remit." Allow from three to five days. If even then you have received no remittance, mail another statement, on which you write: "*Final request*. Unless remittance is received by return mail we shall be obliged to take action." This third statement should be sent by registered mail. Mark your envelope so that the postoffice will send you a card showing the signature of the addressee.

Fifty per cent. of the delinquents yield to the "second request" statement. Of those cases requiring registered "final request" statements I have found that positively nine out of ten respond with a remittance. The receipt of a registered letter, also the fact that they are required to sign the return card, impresses them with the seriousness of the whole matter. You will find some of them waiting for you when you open the store the following morning.

So far it has cost you either two, four or sixteen cents to obtain the remittance. In the last case it is still cheaper than spending time and carefare.

Handling collections by mail I have found to be better in many cases than through collectors. Personal contact with the debtor makes it hard for the collector to deal sternly with some cases, and gives an unscrupulous customer a chance to jolly or impose on him.

While I do not advocate harshness or heartlessness in handling instalment collections, nevertheless, in view of many experiences, I think it well that you emulate the proverbial landlord in the matter of exacting prompt payment. It is no uncommon occurrence for a collector to make fifteen calls and find only five "at home."

Once we lost track of a customer. Statements were returned by the postoffice marked "removed—address unknown." After diligent search we located her. She had changed addresses twice in the interval and now lived on the outskirts of Brooklyn. Of course she was glad to see us. She claimed to have worried greatly because we did not call, although she overlooked notifying us of change in address. She admitted that her husband was working as a motorman, but she could not pay anything that day (Friday). However, she very generously explained that if we would call every Thursday afternoon between one and three o'clock, when her husband came with his pay, she would give a dollar regularly every week hereafter. To quote the lady herself:

"Me Moike, he gits paid ivry Thorsdy; an' thim as calls on Thorsdy afternoon between one and three o'clock gits ther money."

As it was impossible to make a special trip every Thursday, I suggested to the lady that I would send her a quantity of self-addressed stamped envelopes with her name written on the back, and requested that she put a dollar in an envelope every week and have Mike mail it between one and three p. m. Thursday. I also instructed her to wait for a receipt for each dollar before sending the next one.

It is a good idea to inclose a self-addressed stamped envelope for the next payment when mailing receipts. This will often facilitate prompt remittance.

Just a final word about professional pullers and collection agencies. Most of them are either crooked or incompetent, and some of them are both.

NEW SOUND BOX POPULAR.

A specialty that is being sold with success to the trade is the "Balance" sound box, for use on the new Edison disc phonographs when it is desired to play other makes of disc records. It is manufactured by A. F. Meisselbaeh & Bro., Newark, N. J., who invested considerable time and money before they evolved a sound box that would come up to the requirements of the conditions under which it would be used. W. H. Meyer, of this concern, spoke of the remarkable success achieved since the introduction of the "Balance" sound box, adding that the demand is growing.

LIVELY TRADE IN BALTIMORE.

February Business Proves Excellent and March Starts Off with a Rush—F. A. Dennison Elected Member of Rotary Club—New Columbia Dealers—What the Various Prominent Houses Report Anent Business.

(Special to The Talking Machine World.)

BALTIMORE, Md., March 9.—“If the remainder of the present month keeps up the way that the first four working days of the present month have shown forth from a sales standpoint, you can just put it down that we will go on record as having done the biggest amount of business that we have ever done in any one month, and the largest amount that we ever will.” This seems like a rather broad statement to make, but nevertheless it is vouched for by F. A. Dannison, manager of the local branch of the Columbia Graphophone Co. Mr. Dennison said that February showed up in remarkably fine shape, and that business has started in during March with one of the biggest rushes that he has ever known.

That business in all lines of the trade was in excellent shape during February would seem to be further verified by the statement of William C. Roberts, manager of the local store of E. F. Droop & Sons Co., Victor and Edison dealers, that he has been compelled to augment his forces in order to properly handle the increased trade. Mr. Roberts made a trip during the week to the Victor factory to see what he could do in the way of hurrying along a number of orders that have not yet been filled.

Manager Dennison of the Columbia Co. was elected a member of the Rotary Club the past month.

Joseph Fink, proprietor of the Fink Talking Machine Co., reports a good February and states that the way March has started in he has good reasons to expect good results during the present month.

The A to Z Business Bureau has just opened up a place and has taken on a full line of Columbia goods.

Both the Columbia and Victor had a good run during the month at the Sanders & Stayman Co., Inc., according to the report of Manager Albert Bowden of that department.

SWITKY SUFFERS BY EXPLOSION.

Window of Store of Benj. Switky Blown in by Explosion of Gas in Street and Some Victrolas Damaged — Machines and Records Saved from Flood in Basement by Quick Work.

A great quantity of illuminating gas under the street near the junction of Twenty-third street and Fifth avenue, New York, on Sunday morning caused an explosion which broke several large water mains and badly damaged several neighboring buildings and stores, among them that of Benj. Switky, the prominent Victor distributor, at 9 West Twenty-third street. One of the large plate glass windows of the Switky store was blown in, the glass splintering a part of the case of a small Victrola and scratching the case of a larger instrument. The basement of the building was also flooded to the depth of several feet, but through the efforts of the staff of the Fifth Avenue Building, in which the store is located, a number of cases containing machines and records were moved to a higher level before the water reached them and thus saved from damage. Mr. Switky, who hurried to the store, upon learning of the damage, estimated his entire loss at less than \$100, and the business of the store was not interfered with.

That every cloud has a silver lining is proven by the fact that a motion picture concern took pictures of the damaged district, and the Switky store with the Victor dog prominently displayed on the remaining window will be flashed on screens in picture theaters throughout the city. Some advertising.

OUR FOREIGN CUSTOMERS.

Amount and Value of Talking Machines Shipped Abroad from the Port of New York for the Past Four Weeks.

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 10.—Manufacturers and dealers in talking machines will doubtless be interested in the figures showing the exports of talking machines for the past four weeks from the port of New York:

FEBRUARY 14.

Antofogasta, 3 pkgs., \$165; Callao, 3 pkgs., \$286; Cardiff, 2 pkgs., \$115; Havana, 27 pkgs., \$736; Havre, 14 pkgs., \$420; La Guayra, 10 pkgs., \$473; 5 pkgs., \$145; Libau, 70 pkgs., \$1,408; Liverpool, 20 pkgs., \$583; London, 33 pkgs., \$1,151; Manila, 7 pkgs., \$566; Newcastle, 4 pkgs., \$111; Puerto Barrios, 6 pkgs., \$381; Valparaiso, 4 pkgs., \$95; 5 pkgs., \$328.

FEBRUARY 21.

Barranquilla, 44 pkgs., \$1,237; Buenos Ayres, 3 pkgs., \$498; Glasgow, 5 pkgs., \$124; Guayaquil, 10 pkgs., \$140; Hamburg, 1 pkg., \$100; Havre, 4 pkgs., \$165; La Guayra, 14 pkgs., \$1,132; La Plata, 3 pkgs., \$198; London, 3 pkgs., \$12; 140 pkgs., \$5,066; St. Petersburg, 13 pkgs., \$251; Vera Cruz, 11 pkgs., \$398; Vienna, 24 pkgs., \$625.

FEBRUARY 28.

Amsterdam, 7 pkgs., \$561; Antofogasta, 8 pkgs., \$154; Barranquilla, 9 pkgs., \$231; Belfast, 3 pkgs., \$539; Buenos Ayres, 145 pkgs., \$18,172; Copenhagen, 40 pkgs., \$1,250; Geneva, 6 pkgs., \$205; Gibara, 9 pkgs., \$354; Hamburg, 31 pkgs., \$2,899; Havana, 18 pkgs., \$1,319; 22 pkgs., \$574; Havre, 2 pkgs., \$234; Leeds, 4 pkgs., \$164; Liverpool, 14 pkgs., \$432; 13 pkgs., \$858; Milan, 5 pkgs., \$616; Montevideo, 18 pkgs., \$638; Santa Marta, 2 pkgs., \$129; Rio de Janeiro, 18 pkgs., \$1,360; Shanghai, 1 pkg., \$144; Sydney, 40 pkgs., \$4,261; Vera Cruz, 32 pkgs., \$827; Vienna, 2 pkgs., \$155.

MARCH 7.

Bilboa, 3 pkgs., \$135; Bolivia, 7 pkgs., \$398; Callao, 5 pkgs., \$208; Haval, 2 pkgs., \$101; Havana, 30 pkgs., \$1,300; 15 pkgs., \$734; Kingston, 7 pkgs., \$182; Liverpool, 17 pkgs., \$667; 18 pkgs., \$585; Maracaibo, 5 pkgs., \$413; Manchester, 7 pkgs., \$226; Melbourne, 2 pkgs., \$144; Newcastle, 9 pkgs., \$277; Pernambuco, 7 pkgs., \$379; Puerto Barrios, 5 pkgs., \$787; Vera Cruz, 40 pkgs., \$1,984.

D. L. Hogan has leased rooms at 147 South Schuyler avenue, Kankakee, Ill., and will open a talking machine store.

Here Is A Chance For You

Mr. Talking Machine Dealer, if you are wide-awake you are looking for a way to **increase your business!**

Most progressive business men are so inclined, and right here is a **point** for you.

You can handle pianos very nicely in conjunction with your present line, but the main thing is to get the **right** piano.

Now, we have built up one of the **largest** piano manufacturing enterprises in the world within a brief period of time, and we have done it by the delivery of **values**—the largest kind of **values** to our customers.

We can deliver the same kind of **values** to you, and we can help you to show **bigger profits** at the end of the year.

The year is young yet, but do not let it get old before you take up this **profit** making plan with us.

We can supply you with pianos and player-pianos which will fit in **admirably** with your line.

SATISFIED
USERS

EXACT SIZE

You can order through your Jobber. He will supply you; if not, send your order to us.

The wonderful success of the Lyon & Healy Fibre Needle Cutter in the last two and a half years is due to the following facts about the cutter:

The Blades of the Lyon & Healy Fibre Needle Cutter are made of the finest grade of properly tempered tool steel. The upper blade is pivoted above and back of the cutting edge of the lower blade. It is held in place by a very high tensioned spring to insure correct leverage and a perfect point at every cutting.

The cutter is fitted with a guide that prevents the cutting away of too much of the needle, and also has a receptacle that receives all the waste. It is very simple and easy to operate, and with ordinary usage should last indefinitely without sharpening.

This cutter is invaluable to all users of the Fibre needle, as a needle may be used twelve to fifteen times where one of the cutters is in use.

Now is the time to get your order in and share in the profits.

FROM OUR CHICAGO HEADQUARTERS

CONSUMERS' BUILDING, 220 South State Street, E. P. VAN HARLINGEN, MANAGER.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 10.—Trade in talking machine circles is fine—it's great—especially in the record line, if the trade could only get all the records it wanted. Machines are fairly plentiful and factories have very few complaints on this score. The shortage in the record supply is due to a great extent to the dance craze which seems to grow rather than to diminish. The call for this class of records, in addition to the regular increase in record business which comes at this time of year, has caused factories to work full capacity and yet leaves a great percentage of unfilled orders—a percentage far in excess of last year's shortage. This, in spite of the fact that factory capacities have been greatly increased. Dealers are promised relief within a very short time, but, inasmuch as most of them heard this story some weeks back, there are some who are inclined to be pessimistic.

Harry Lauder Poses.

L. C. Wiswell, manager of the talking machine department at Lyon & Healy's, has on his desk, photographs of Harry Lauder, the great Scotch comedian, in two very new and attractive poses. The photographs were taken in Mr. Lauder's apartment in his recent visit to Chicago, and appeared to be the best likenesses of the "world's highest salaried entertainer" that have ever been taken

There is also a new photograph on Mr. Wiswell's desk of Pietro Diero, whose Victor records, accordion and concertina, have met with such a demand during the last few months of the dance craze.

L. K. Cameron Improves.

L. Keene Cameron, formerly retail manager of the Victor department of the Rudolph Wurlitzer Co., has written a letter to assistant manager, Fred A. Siemon, in which he says he is enjoying the climate of the Southwest immensely and that his health is much improved.

Henry Saak Wants More Stock.

Henry Saak, well-known Columbia talking machine dealer of Milwaukee, was in the city recently making arrangements with the Columbia Co. for the installation of a very liberal stock in his new store, 1602 Vliet street. Mr. Saak reports that he has built four large demonstration booths that give every opportunity for the proper demonstration of machines and records. Mr. Saak has extended the glass show windows of his store front so that they are conspicuous to the people on the street for a long distance.

Good Columbia Business.

C. F. Baer, manager of the Chicago office of the Columbia Graphophone Co., reports very satisfactory increase over the first three months of last year.

"There has been a tremendous demand for records," said Mr. Baer, "and our catalog of dance numbers has been drawn on very heavily. We anticipated these conditions and very fortunately were able to fill 90 per cent. of our record orders.

Prominent among the more popular records is our number 55531 which consists of 'Y Come La Va,' a tango, and 'Puppschen,' a one-step, played by Prince's band. As an illustration of the popularity of the record, I want to say that one dealer, in sending in his order, asked for five times as many of this number as for any other.

"The immense amount of advertising that we have been doing lately is making itself felt with irresistible force, and created such a demand that our stock of records and one style of our machines were nearly exhausted. This condition, however, was remedied at once."

Talking Machine Co. Notes.

A new and handsome edition of the booklet entitled, "Our 500 Best Sellers," has been prepared by Salesmanager Roy Keith of the Talking Machine Co., and is just being issued to the company's dealers. These booklets have been used to good advantage for some time past by dealers all over the West who use them in circularizing their patrons. The records listed in the booklet are the result of long experience in supplying records and are particularly interesting in view of the fact of the present great record shortage. Another interesting help, issued by the Talking Machine Co., is in the form of a pad listing ten popular favorites which is designed to be placed around the dealer's store where it can be secured easily by the record buyer and the sheets used to jot down the number of records, and, at the same time, offer a number of good suggestions that are often quickly acted upon.

E. L. Barker is a new addition to the traveling sales force of the Talking Machine Co., and left on his initial trip March 9. Mr. Barker has been assigned to Indiana and Michigan, formerly covered by Geo. P. Cheatle. Mr. Cheatle will continue to call on a number of the dealers in those two States and will also do some additional work the nature of which has not yet been decided upon.

Another addition to the company's force is in

the person of H. E. Whitman, formerly of Elmira, N. Y., who last week took up his duties as floor salesman.

To Enlarge Kimball Space.

The talking machine department of the W. W. Kimball Co. has enjoyed a remarkable business since its recent organization under Mr. Cullen's direction, and plans are now under way that will probably involve the removal of the entire department from the second floor to the third floor where a greatly increased space is possible.

Big Crowd Witnesses Dancing.

Kenneth Holman, manager of the newly organized La Grange Talking Machine Co., of La Grange,

The Chicago Office of The Talking Machine World has removed to new and larger quarters at 1024 Consumers' Building, 220 So. State Street.

Ill., last Tuesday and Wednesday nights gave the citizens of his town an opportunity to witness the dancing of Mr. Kucker and Martha Courtney, the young people who have been drawing crowds to the Talking Machine Shops. The program was arranged in much the same way as at the Shops with the tango, hesitation, maxixe and Brazilian demonstrated with the aid of the Victrola. La Grange came in a body, and crowded the shop so thoroughly, that show windows were endangered, and an officer had to be called to see that no damage was done.

Iowa Dealer Optimistic.

A. C. Moore, manager of the Edison and Victor departments of the Pelletier Co., Sioux City, Ia., was a visiting dealer of last week. Mr. Moore looks to a big year in 1914, and cites as one evidence of the prosperity that has visited that section of Iowa, the fact that at the recent Auto Show, held in that city, almost a million dollars worth of machines were sold.

Shops Dancing Continues.

The Talking Machine Shops continues to draw new customers to its attractive quarters through the medium of the dances described in last month's World, and probably will entirely through March. Mr. Kucker is now seen with a new

(Continued on page 34.)

The Practical Fibre Needle Cutter—THE WADE

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone.

The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade

Fibre Needle Cutter No. 1

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points.

No. 1 is a very popular cutter which has given excellent service. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made.

The Wade

partner, Martha Courtney, and they have introduced a number of new steps that have elicited much applause. Business has been greatly increased since the introduction of the idea and its advertising value has been tremendous.

"Business has been very good," said Geo. W. Davidson, "with February far in excess of the same month last year. If we could obtain records we would set a record that would last for some time. Among the dance records are 'Leg o' Mutton' and 'Some Smoke'; 'Isle d'Amour' and 'San Souci.' Vessella's band records are also selling well. They are the sextette from 'Lucia', 'Jewels of the Madonna' selection and Liszt Hungarian Rhapsody."

R. V. Hahn, formerly with the Knight-Campbell Co., of Denver, is a new addition to the sales force of the Shops.

Personals and Visitors.

J. D. Moore, manager of the talking machine department of the Lion Dry Goods Co., Toledo, O.; L. C. Parker, of Gimbel Bros., Milwaukee, and Mr. Abbott, of the Boston Store, Milwaukee, were three department store heads visiting Chicago recently.

Other visiting dealers included: M. B. Manor, Manor Bros., Hebron, Ill.; C. S. Sinclair, Dundee, Ill.; Mr. Robertson, of Lewis & Palmer, DeKalb, Ill.; S. W. Newburger, New Albany, Ind.; Mr. Briggs, Lamb Piano Co., Nashville, Tenn., and Mr. Jackson, of the Talking Machine Shop, Rockford, Ill.

P. G. Green, of Creighton, Neb., was a visiting dealer this week.

W. L. Eckhardt, manager of the Pennsylvania Talking Machine Co., in course of a trip that included Cleveland, Toledo and St. Louis, spent a day in Chicago.

Mr. Solomon is now touring Europe on a buying trip which includes a number of musical instruments.

George Israel, buyer for the talking machine department at Hillman's, has returned from a short business trip to New York.

Manager McCann, of the talking machine department of Rothschild's, is the proud father of a baby girl.

Mr. Patten, who is buyer for the talking machine department of the Boston Store, has just returned from a business trip to New York.

R. J. Nathanson, who for the past four years has been connected with the Universal Film Co., has decided to re-embark in the talking machine trade and is connected with Hillman's.

Phonograph Co. Items.

C. E. Goodwin, manager of the Phonograph Co., reports an excellent Edison disc business both wholesale and retail. He says that the great bulk of the business is on the higher-priced machine

The ad is laid out in a masterly fashion and the argument is convincing and sincere. The illustration by Earl Hildebrand is good, and there is

Resources of the VICTROLA

The Ever Ready Home Orchestra

for Dancing

A Special Service

We are prepared to render genuine assistance to anyone interested in dancing. We have made an exhaustive study of dance music as applied to modern conditions and we have a staff of trained salespeople who can tell you in a moment things which it would require much effort for you to ferret out for yourself. In addition to all the exceedingly popular and somewhat hackneyed numbers, we have a list of dances equally charming, but not so well known, which we will be glad to play upon request.

A Victrola, by means of its changeable needle, can play dance music practically as loud as the original or as soft as a whisper, this without destroying the beauty of the records by means of a shutter. You can use either a concert needle, a loud needle, a medium needle, or a bamboo needle.

Every home should be equipped with a Victrola. The price, considering its service, is purely nominal. Think what a Victrola means—Grand Opera every evening; Caruso and the Stars; all the greatest Entertainers; all the greatest Bands; all the greatest Soloists; and, finally, music for dancing as soft or as loud as you would like to have it by means of the needle control, and as perfect in time as the Metronome itself.

Something must wear—in the Victrola it's the changeable needle and not the record.

Caruso, Keffe, Mabe and many other great stars can be heard only on VICTROLA records. Remember this—and avoid counterfeits.

VICTROLAS SELL FROM \$15 to \$250. EASY TERMS

dealers, not only in Chicago, but in a number of other cities in the country, is the one herewith reproduced, which was shown in the Chicago daily papers a few days ago.

not too much of it. A number of advertisements might be criticised because of the fact that the illustration, by reason of its preponderance, has detracted from the "pulling power" of the copy.

The Edison disc concerts in the handsome recital hall on the third floor run from 11:30 a. m. to 5 p. m. and much of the time run to S. R. O. Mrs. Helen Louise Essen gives brief talks on the records and also a brief sketch of the artist.

Manager Wayne, of the retail, recently made an addition to his staff in the person of Mr. Tipton who comes from Nebraska and is making good.

Elect Officers.

The annual meeting of the stockholders of the Permanent Phonograph Disc Needle Co. was held at the Hotel LaSalle. Samuel Levin, the inventor of the needle, was elected vice-president and manager with power to act, and his son, Lester L. Levin, was made assistant.

S. O. Wade Optimistic.

S. O. Wade, manager of Wade & Wade, recently returned from an extensive trip through Iowa and other of the Western States and expresses it as his belief that there is every indication of a decided improvement and an increase in business that bids fair to break even the record of business done in January. Great credit is given the Wade fibre needle cutter by a number of dealers who have recently begun to specify that all records taken out on approval shall be played only with

fibre needles and trimmed with the Wade cutter, thus guarding against damaging the records.

Buys Evanston Shops.

W. E. Erickson, talking machine dealer of Evanston, has bought the Evanston Talking Machine Co. and will continue to operate it under the old name. Douglas Oriwig has been placed in charge of the new acquisition and Miss Steel, in charge of the other.

Miss McClelland Marries.

Miss Ella McClelland, who has been connected with the Victor department of the Bisell-Weisert Co. for quite a length of time, has resigned her position and will be married soon. Just who the lucky man is, is not divulged. Miss Blatch, formerly of Lyon & Healy's, has taken Miss McClelland's place.

Opens New Store.

The Wulschner-Stewart Music Co., of Indianapolis, Ind., has opened a general music store at 35 South Wabash avenue. An extensive stock of talking machines and records is displayed. Stock has evidently been brought from Indianapolis, and in all probability, the store will not continue as a Victor store after present stock is exhausted.

Are You On Our Mailing List?

If not, you are missing several letters a month in which are embodied different SALES IDEAS collected through the broad experience of the LARGEST EXCLUSIVE WHOLE-SALER OF VICTOR GOODS.

The above illustrations give you an idea of regular pamphlets we are issuing from time to time to our dealers.

EACH LETTER BRINGS SOME SALES IDEA—some new thought that we have gathered from our dealers. All may not be new to you and probably you have used a majority of them successfully—but ONE NEW IDEA GAINED IS WORTH THE EFFORT of writing us now and asking us to PUT YOUR NAME on our list of INTERESTED Victor dealers.

THE TALKING MACHINE COMPANY
 12 N. Michigan Avenue Chicago, Ill.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 34).

USES VICTROLA IN CHURCH.

Chicago Congregation Much Pleased with Novelty—Rector Testifies to Musical Qualities of Instrument in Interesting Letter.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 10.—One of the most interesting uses to which the talking machine has been put in Chicago for a long time was when the Rev. Arthur J. Francis, rector of the Pilgrim Congregational Church of this city, held his regular Sunday service, at which a Victrola did a great part of the work.

The numbers in the service that were rendered through the use of the talking machine were as follows:

- EVENING SERVICE, 7:45.
- Hymn Solo—"My Jesus, I Love Thee"..... Sung by Frederic C. Freemantle.
- Hymn Solo—"One Sweetly Solemn Thought"..... Sung by Frank C. Stanley
- Prayer—
- Prayer Song—"Lord, I'm Coming Home"..... Sung by Frederic C. Freemantle.
- The Lord's Prayer—
- Piano Solo—"Berceuse"..... Chopin, Op. 57
Played by Frank LaForge.
- Duet—"Contes d'Hoffman—Barcarole"..... Offenbach
Sung by Farrar and Scotti
- Quartette—"Festival Te Deum, E flat"..... Dudley Buck
Sung by Trinity Church Choir, New York City
- Offertory Solo—"Ring Out Wild Bells"..... Gounod
Sung by David Bispham
- Sextette from "Lucia di Lammermoor"..... Donizetti
Sung by Tetrzzini, Caruso, Journet, Jacoby, Bada and Anato.
- Soprano Solo—"The Swiss Echo Song"..... Eckert
Sung by Louisa Tetrzzini
- Benediction—
- Benediction Solo—"Cavatina"..... Raff, Op. 85
Played by Mischa Elman

After the service a number of the congregation spoke to the Rev. Mr. Francis and expressed their delight with the novelty of the service and their enjoyment of his very interesting address. So numerous were the expressions of approval of the part that the Victor had played that the Rev. Mr. Francis has decided to make it a monthly feature.

The machine was supplied by the George P. Bent Co. and was operated by Harry C. Meek. The machine was equipped with a new device known as the "Clear-a-phone" which was invented by Mr. Scotford, a friend of the rector. The satisfaction of the Rev. Mr. Francis is best expressed in the following letter to Mr. Meek.

"My dear Mr. Meek.—The Victor Victrola Service held in Pilgrim Congregational Church, Sunday evening, March 1, was a very great success and an exceedingly impressive service.

"I am free to confess that I engaged to carry through this service with more or less timidity. Innovation is rather shunned by me, but certainly this service proved to be all that could possibly be wished as an aid to the beautiful and the worshipful.

"In such a service, however, it must be borne in mind that nothing, but the best ought to be used. The best in solos, duets, quartets, and musical selections. With this as a working principle I do not hesitate to say that any church would do well to consider adopting such a service. We are anticipating a monthly service of this character, so happy were we over our first endeavor. With sincere regards, I am, yours always,
"ARTHUR J. FRANCIS."

INSPECTING MECHANICAL DEVICES.

Secrecy is a lost art, says the editor of the American Machinist. It is useless to go over the arguments, real or alleged, for no matter what we may think about it personally, secrecy, at the present time, is as impossible in most shops as the fourth dimension. There is a lot of good energy wasted in attempting to preserve secrecy in the shop, and this is doubly true of the machine after it is on the market. A recent occurrence showed the way in which salesmen lose their heads, and incidentally, customers. A visitor to an exhibition evinced considerable interest in the machines shown, and asked a number of leading questions. Knowing the attitude of the average salesman, he declined to give his name. It was soon discovered that he was a designer for a large machine builder with the result that he was promptly invited to go elsewhere.

It so happened that the manager was broad and level-headed and he proceeded to show the salesman the short-sightedness of his policy. He explained how foolish it was to try to hide anything about a machine which was on the market and could be seen, studied and even measured in a dozen shops; how, if the competitor really wanted to know, he would buy a machine and take it apart, as is often done. He tried to make clear the utter foolishness of attempted secrecy and the advantage of an interchange of ideas.

If a machine will not bear the inspection and criticism of competitors it had better never see the light of day, as they will find its weak spots anyhow, and not forget to mention them either. Secrecy in the great majority of cases is unwarranted, unsuccessful and goes hand in hand with inefficiency. Those who fear that others will steal their ideas seldom have anything which the really up-to-date shop can use. And many devices which are now jealously guarded were long ago abandoned by others.

AFTER CHINESE RECORD TRADE.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 10.—Sim Law, of 2209 Princeton avenue, this city, has built up an immense record trade among his constituency and his lists, which he sends out in Chinese, are most interesting. For instance, the accompanying is a list of Edison Blue Amberola records which he recently

sent his customers and in which he is receiving large orders. Record trade among the foreign element in the United States is steadily growing and they keenly enjoy songs and recitations in their own language.

NEW DEVICE TO IMPROVE TONE.

The "Clear-a-phone," the Invention of a Chicago Man, Embodies a Number of New Ideas—Much Claimed for It—Patent Applied For.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 10.—A novel device along comparatively new lines that is designed to improve the tone and volume of the talking machine is the "Clear-a-phone" the invention of L. K. Scotford of this city.

The "Clear-a-phone" consists of a pneumatic cushion, circular in form that is made of first quality rubber 12% inches in diameter, one-thirty-seconds of an inch thick. It has an aluminum base and there is an air space between the base and the rubber top three-eighths of an inch deep.

"We claim that it clears up the tone of the instrument such as no other improvement can. It brings out the quality of each voice or instrument, removes the hissing and blasting of the high notes, improving the resonance and otherwise taking the 'can' out of 'canned' music. It also counteracts the natural vibration of the record.

"We have our device in the Patent Office now and hope to market it in a short time."

The inventor, Mr. Scotford, is president of the Superior Type Supply Co. and also has large interests in the East.

THE CONCERT.

The night shall be filled with music,
 And the cares that infest the day
 Shall be multiplied by twilight
 In a most amazing way.
 The strains of "Traviata"
 Shall float around the square,
 With many another opera
 And old familiar air.

The man in No. 7
 Will play "The Magic Flute,"
 And the fellow on the corridor
 Will make a tooter toot.
 The great tones of Caruso
 Shall rise above the blast,
 And the din shall last till 9 o'clock
 Or thirty minutes past.

The man in 27
 Will turn on "Casey Jones,"
 And the whole apartment house shall rock
 With consequential groans.
 The night shall be filled with music,
 And the cares that infest the day
 Shall be multiplied at twilight
 In a most amazing way.

—From the St. Louis Post-Despatch.

BUILDING UP A SUCCESSFUL BUSINESS IN CHICAGO.

Joseph Klinenberg's Store on Ashland Avenue.

(Special to The Talking Machine World.)
 CHICAGO, ILL., March 8.—One of the enterprising dealers in Edison disc and cylinder phonographs and records in this city is Joseph Klinenberg, whose establishment is located at 4915 South Ashland avenue. He has attractive display and soundproof rooms, where the Edison line is shown to advantage. He also handles the Jesse French & Sons Co. pianos and players, and is a strong believer in the one-price policy of retailing pianos, having won success along these lines in conducting his piano business.

RECORD FEBRUARY BUSINESS IN NEW YORK CITY TRADE

Despite Scarcity of Both Machines and Records Jobbers and Dealers Handle Big Volume of Sales—Big Increase in Columbia Retail Trade—V. W. Moody Optimistic—Landay Bros.' New Store Soon to Open—Blackman Co. Grand Opera Record Demand.

A continued scarcity of machines and records, together with the closing of the best February business the trade has ever experienced, have been the most important features of business the past month. The word scarcity is used advisedly, as many of the local jobbers and dealers have drawn a distinction between a shortage and a scarcity of goods. They state that a shortage of product would necessitate the closing of less business than last year, while with a scarcity of machines and records the trade can still transact a better business than that closed in 1913, owing to the fact that there have been heavier shipments from the factories than ever before.

Aside from the scarcity of product, the most discussed topic among the local members of the trade has been the phenomenal demand for records. In addition to the dance craze, which shows no signs of abating, the dealers have been developing, both from choice and necessity, their trade in operatic and light opera records. The swamping of the factories with dance records orders has been so emphatic that the up-to-date and aggressive dealers are beginning to realize that their record trade will show a comparative loss if they do not pay attention to all classes of music and give the factories a chance to catch up with the back orders for dance records. In the meantime practically every dealer in the local trade closed in February the best month's record business ever experienced.

The situation in machines has cleared up somewhat during the past few weeks, the factories sending large shipments to their distributors that in many instances were shipped from the sidewalk to the dealers without being unpacked or placed in the distributor's stock room. The call for the moderate priced machines continues to take precedence over the very cheap and the more expensive types, machines selling from \$50 to \$150 being the heavy sellers at the present time.

The past month has witnessed an unusual activity in the consummation of many important new deals by all three companies. The prosperity of the talking machine industry is well evidenced by all these new connections, and, as a matter of fact, there are numerous applications on file for territorial rights that cannot be filled for some time to come, owing to the scarcity of stock and the inability of the companies to turn out enough machines and records for their present dealers. There seems to be a fast growing tendency on the part of the manufacturers to close dealers' agreements with the best known piano houses wherever territorial arrangements will permit. There is no doubt but that the piano store offers a splendid opportunity for the presentation of the talking machine, and the marked success of the leading piano houses throughout the country who have conducted talking machine departments for some time indicates that profitable results can be obtained when there is co-operation between the piano and "talker" sections. In a number of instances substantial player and piano sales have been closed as the result of the visits of talking machine patrons to a piano store.

Reports Gain of 63 Per Cent.

"We showed a gain of sixty-three per cent. over last February," said R. F. Bolton, manager of the wholesale store of the Columbia Graphophone Co.,

89 Chambers street, New York. "We were well pleased with this substantial gain, particularly in view of the fact that heavy storms ranging at frequent intervals during the month would naturally form good ground for pessimism. On the contrary, however, our business was excellent and the deals we closed in February represented new acquisitions to our representatives' lists that are most gratifying. Our dealers throughout the State all report the same phenomenal demand for dance records that was a feature of January business. Personally, I believe that the dance record craze will be with us for some time, and all indications point to an excellent summer business because of it. There will be very few house parties during the summer that will care to dispense with the latest dance music, and the live-wire dealer should be in a position to handle this summer business to the best possible advantage. Aside from its influence on record sales, this dance craze has evidenced itself in the steady increase of machine sales now being closed by the dealers. A lover of the modern dances is offered no better investment than that of a Grafonola with a selection of the latest Columbia dance records to satisfy his love for the modern dances, and, judging from the reports of our dealers, the 'Favorite,' 'Leader' and 'New Mignonette' are heavy sellers among dance lovers."

Why V. W. Moody Is Optimistic.

Notwithstanding the marked scarcity of Victor machines and records, there is one optimist in the local Victor distributing trade in the person of V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, who remarked as follows: "Although there is undoubtedly a tremendous scarcity of goods at the present time, it would hardly be fair to the Victor Co. to call it a shortage of goods, as we are receiving more machines and records from the factory than we ever received before, and selling more goods than ever before, but our stock report shows less on hand than ever before. Our shipments of new Victor records for March, together with the shipments of the special dance records put on sale during February, amounted to almost twice as many records as were purchased from the Victor Co. in the corresponding month last year. In addition to these shipments of newly issued records we received, of course, thousands of records from the regular catalog during the course of the month. I need hardly say that this February was the best in our history, as we closed a business that almost equalled our usual fall trade."

Excellent Edison Disc Trade.

"Our sales of machines during the past few weeks have been remarkable," said H. N. Purdy, of the Edison disc department of Hardman, Peck & Co., 433 Fifth avenue, New York. "We have really been surprised at the extent of our Edison disc machine trade, and notwithstanding that weather conditions were detrimental to retail trade during February, we closed a splendid machine business. The favorite Edison machine in our department is the \$200 type, and this preference of an expensive machine is a good illustration of the discriminating class of patrons that we cater to. We sell very few machines that retail for less than \$150, our customers appreciating the fact that the prices asked for the Edison disc machines are most

reasonable, considering their musical qualities."

Have Attracted Attention.

During the past few weeks the Columbia Graphophone Co. has had its products represented at the handsome store of the Melville Clark Piano Co., 335 Fifth avenue, New York, where they have attracted general praise and attention from passers-by along this high-class shopping thoroughfare. Many sales of machines have been closed in these warerooms and the new Columbia dance records are meeting with a ready sale with Columbia enthusiasts, who find this store on Fifth avenue a very handy place to secure some of the latest dance records.

Landay's New Store.

When this issue of The Talking Machine World is off the press the handsome new store of Landay Bros., the prominent Victor distributors, will in all likelihood be open to the public. Located at 427 Fifth avenue, New York, opposite the new Lord & Taylor store, between Thirty-eighth and Thirtieth streets, this store has been furnished in an artistic and refined manner. The new Landay store is probably one of the finest Victor establishments in the country. Eleven demonstration rooms, larger than most rooms of this nature, have been constructed on the main and mezzanine floors. These rooms are finished in typical French style, the color design being a gray and green, delicately blending to harmonize with the other artistic decorations. Every possible convenience is available for the use of the store's patrons, and this store takes its place as a tribute to the enterprise and progressiveness of Landay Bros., whose other stores in the centers of the city's very best shopping districts have all achieved marked successes. Roy Forbes, now connected with the Landay store at 400 Fifth avenue, will be manager of the new store.

Coincident with the opening of the store at 427 Fifth avenue, the Landay store at 400 Fifth avenue, a block further down, will be formally closed. With the closing of this store there passes into history one of the old land marks of the talking machine industry. It was to this house, many years ago, that Thomas A. Edison brought his very first tinfoil phonograph so that his old friend, Robert Ingersoll, the famous philosopher and writer, who lived there at that time, could speak into it and make history for future generations.

Activity at Blackman's.

"Our grand opera records are selling better than ever," said J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, New York, the prominent Victor and Edison cylinder jobbers. "Our dealers have turned their attention from the dance records to the opera records, appreciating that the shortage in stock of the dance selections should not hold them back from expanding their trade in the more expensive records. We are well pleased with the demand for our Cleanrite Brush No. 4, which is a combination brush for use on all Edison cylinder machines. We are having these brushes manufactured in large quantities and are now in a position to adequately take care of the demands of our trade."

Encouraging business reports, similar to those outlined above, were given The World representative by the following dealers: Tower Manufacturing & Novelty Co., Edison disc; Benj. Switky, Victor; F. G. Smith, Columbia; Gimbel Bros., Victor and Columbia; Greenhut-Siegel Cooper Co., Victor and Edison cylinder; John Wanamaker, Victor; B. Guy Warner, Edison disc; Kranich & Bach, Columbia; A. I. Namm & Sons, Edison disc; Hallet & Davis, Victor; Lord & Taylor, Victor.

Send 50 cents in stamps for sample "Standard Fibre Needle Cutter." The easiest selling accessory ever offered the trade. [Appeals to the women buyers. Retains chips. Artistic. Built like a watch. Compact. Powerful. Liberal discounts. Order through your jobber.

CALL FOR DANCE RECORDS FACTOR IN ST. LOUIS TRADE

Craze for the One-Step and Tango Serves to Increase Both Machine and Record Sales—Records of Popular Music Becoming Strong Favorites—Story of a Reaction—Grand Opera Season Expected to Help Business—What Various Houses Report for Month.

(Special to The Talking Machine World.)

St. Louis, Mo., March 10.—The dance records are still holding high favor with local buyers, and are the feature of the talking machine business as it is running to-day. The demand simply seems to be insatiable, and both Victor and Edison disc shelves show a pitiable degree of barrenness. The Columbia stocks thus far have been equal to demands.

It is reported among talking machine dealers that some of the tango parties that are given with the aid of a talking machine as an orchestra would make excellent Sunday magazine feature stuff. The tendency of the present vogue dances to undress appearance has raised such a storm of criticism that all such as are conducted in public are strictly proper, but with a talking machine, a bunch of records and a select party of trusted dancers all things are possible, and guests are careful about their selection of lingerie.

There is a story told of a local talking machine house that has some well-secluded record demonstration rooms. A party of wealthy and well-known women were left in one of these rooms by a busy salesman to pick out a selection of tango records. Later the manager was hurriedly summoned by a very youthful and very serious salesman to go to the demonstration rooms, "where a bunch of women were acting plumb nutty." The manager was busy and tried to turn away the summons, but the salesman insisted, and finally he went there. As he appeared the hilarity stopped and the women explained that they were merely trying out some tango records and hoped they "had not disgraced the house, but we did not think that nice boy would tell on us."

But the business is not altogether records. There is a fine, healthy machine demand, mostly for high-priced machines. The dances are but a part of the impetus that has been given the talking machine trade, and dealers who in the past have set their mark at doubling the last year's business are looking forward to a treble amount for 1914 over 1913.

Manager Robinson, at the Thiebes Piano Co., says of the trade's new tendencies: "The demand is turning more and more to popular music. I remember when we used to take a little machine and nail it to the top of a door and put on popular records as an advertisement. They were raw, too raw to sell. When the trade developed, everybody who bought a machine wanted real music, Caruso and records of that kind, and for years we sailed along appealing to the real lovers of music and real music records. Now we have interested the other crowd, the one we started for, and they are simply coming in droves. Talking machine music is considered better by these people now than their own music that any ear player can grind out on a piano or a cheap orchestra. It means a big business to convert this popular class that we once failed on but who now come voluntarily.

"Of course we are selling more good music as we go along. The proportion of that sort of music to the total of records sold is greatly less than it was a year ago, and still smaller in proportion than two years ago. It means that everybody is listening to talking machines or will be as soon as the factories can turn out the machines and the records."

Harry Levy, talking machine manager at Aeolian Hall, who is confined to Victor goods, says: "Our business is limited only to our ability to fill orders, wholesale and retail. The retail department has simply been swamped by requests for dance and other popular records. Of course that indicates the position of other dealers. We thought that when we had performed the problems in division that the Christmas trade forced onto us we had completed the course in fractions for several months, but if anything it is worse than ever. Some styles of machines can be had, but it is beyond the dreams of salesmanship to supply all sorts of trade with a few styles of machines, and there we have trouble. We simply do the best we can with the records and try to forget each evening."

The grand opera season reaches here next month, and Retail Manager Duffy, at the Columbia, is congratulating himself on the pickings for his records.

"We have Garden, White, Zepelli and Dufranne on our list," he said, "and we think they will prove popular. There is a light advance demand, but the history of these things shows that the big demand comes afterward, when the listeners can conjure up scenes from the actual opera. We have been doing very well indeed with Teyte and Ysaye records since the appearance of these two artists here. Both of these always have proved good record advertisers for us.

"The best things with us now, however, is our stock of the popular dance records. We have been supplying all comers despite the unexpectedly and very heavy continued demand for these records.

"The machine business has been very good indeed, better than we had anticipated, and we are piling up some nice totals for merchandising."

Manager Robinson, of Thiebes, proudly reported the sale of a horn Victor machine the first of the month, the first new machine of this kind sent out for some time. Its appearance in the delivery room caused consternation. It was a street car delivery and none of the force knew anything about carrying horns on a street car. They had forgotten the days when a delivery boy on a car platform with a horn was a familiar sight.

L. Benton Prince is a recent addition to the Thiebes Piano Co. talking machine sales staff.

Weekly meetings have become a fixed feature of the saleswork of the Victor department at the Vandervoort Salon. Manager R. A. Seagar has a force of twenty-two persons, and he finds the interchange of ideas very profitable. One of his recent business getters is a force of seven men to

canvass a district to ascertain what homes have talking machines and to pick up prospects. Behind this force are two expert salesmen, who close the deals and put in the machines. H. J. Harrison, of the sales force, is devoting his entire time to the schools.

Mr. Seagar announces a series of Tuesday afternoon concerts under the auspices of Victor Lichtenstein, of the Symphony Orchestra. The programs will take up one at a time the operas to be given here by the Chicago-Boston Company next month, and Mr. Lichtenstein will lecture on the music and demonstrate the music with talking machine records.

Manager Robinson, of the Stix, Baer & Fuller department, reports excellent business, and he is much elated at the prospect of immediate consolidation of his department with that of the piano department, where the musical instrument interests of the firm will be centered. In his efforts so far he has been considerably handicapped by an out-of-the-way location on the fifth floor.

At the Edison Shop they are talking of big things these days, such as new dealers on the wholesale list, of the promised day very soon when record orders will be shipped 100 per cent. when promises made in recent factory advices are fulfilled, and of Sunday magazine pages that are filled with President Mark Silverstone's talk on Thomas Edison as a host, a man that the everyday business man meets at the factory and a truly human institution instead of the marvelous working machine that the people have read so much about.

This magazine page was a splendid feature of the Post-Dispatch Sunday paper. After Mr. Silverstone's visit to the factory for Mr. Edison's notable birthday party he told a newspaper writer of the man he had met on that and previous visits, the man who was entirely human and who talked in language that sometimes required dashes. It made an excellent story coupled with an informal picture of Mr. Edison.

While Mr. Silverstone was at that birthday party the sales force at the Silverstone Edison Shop celebrated the birthday with a banquet for the sales force at the American Hotel. In the absence of President Silverstone, A. O. Reynolds presided, and all talked of the wonderful machine they were engaged in introducing to the public and of topics for the good of the business. After Mr. Silverstone's return Mr. Reynolds departed for Kansas, where he is sending frequent reports of new dealers who will sell the disc machines to the millionaire farmers of that great State.

C. S. Gardner, of the factory sales staff, was here for a few days to work with Mr. Silverstone, and then departed for the Silverstone trade territory in Illinois.

Of course there are some very good sales stories at the Silverstone store. A doctor was there the other day buying a machine, when the salesman told him of a doctor that had come in a few days before because he had become interested in a machine owned by a patient. "I can beat that," said the second doctor. "I am here because one of these machines made me forget a patient. I went to call on a patient the other day, and in the first room in the house that I visited I came across an Edison machine. I got interested and spent an hour there putting on and taking off records. At the end of that time I went upstairs to bid my patient good-bye, and she asked me with a smile: 'Did you come to see me or hear music?' I concluded I had better get a machine of my own and wear out my curiosity before I really neglected a patient."

Some of the new dealers on the Edison disc list are the Field-Lippman Piano Co., which handles the Victor in Piano Row; the Concordia Music House, which is moving from Eighteenth and Olive streets to 912 Pine street, only a block from Piano Row, Edison disc exclusive; C. A. Kleinhans, 2316 Chouteau avenue, city; Frank Halley, Louisiana, Mo.; Haynes A. Esbeck, Decatur, Ill.; Hornersville Music Co., Hornersville, Mo.; Harmony Music Co., Harmony, Kan.; J. H. Kayter, Nevada, Mo.; Wilson Bros., Aurora, Mo.; Rhodes Music Co., Lama, Mo.; Shellach Drug Co., Galena, Ill.; Charles Selig, Eldorado, Ill. It is intimated

that the St. Louis list is practically complete.

The jobbing business, Mr. Silverstone says, will show an increase each month, not excepting the December business, which Mr. Silverstone regards as material progress.

One of the recent would-be purchasers of an Edison machine offered to trade two town lots in Reno, Tex., for a suitable instrument.

WHY HE WANTED HYMNS "MADE."

A Danville, Ill., Man Offers Some Suggestions to the Columbia Co. Which Are Interestingly Put and Referred to the Record Department.

There is more logic and common sense to the following letter recently sent to the Columbia Graphophone Co. than would appear at a first glance. The appeal for music that can be easily understood is, undoubtedly, an excellent suggestion, but the company regretted its inability to record hymns to suit the fancy of each one of its many thousands of admirers.

"DANVILLE, ILLINOIS.

"Messrs. Columbia Graphophone Co.:

"Please let me know how much a dozen you would charge me for your double disc records? of the hymns that I will sand to you with musick al loud and plain, some that I will mark sung slow solmn. when the disk will not record the whold hymn be sure and use the last verse. the trouble with musick is the words of the Hymn cannot be well understood. and there is no com-

mon sence in musick that cannot be understood. Yours respectfully."

TALKING MACHINE IN CHURCH.

Chicago Pastor Illustrates Talk on Edison in a Thoroughly Effective Manner.

(Special to The Talking Machine World.)

CHICAGO, ILL., March 7.—The Rev. Arthur J. Francis, pastor of the Pilgrim Congregational Church, 6401 Harvard avenue, made use of a talking machine at his service last night to harmonize the musical program with his sermon on "Edison—His Value to Society."

"It was a great success," said Mr. Francis. "I shall probably use the machine at my evening services every other week from now on."

The church was packed.

In closing, the pastor said: "Where there is no vision the people perish," it is said. So long as America produces men like Thomas Edison, there is little danger of our perishing."

CATALOG OF REPAIR PARTS.

The Victor Talking Machine Co. sent out to its dealers this week new repair catalogs for Victrola XIV and XVI. The company also announced that it has secured a new style patented spring binder, which will accommodate about 200 pages, and is provided with an inside folder for retaining the repair part catalogs. This binder is much superior to the one formerly used.

YOUR OPPORTUNITY

HERE IT IS

If you are one of those VICTOR DEALERS who has not tried "BLACKMAN SERVICE," can you AFFORD to not try it NOW?

Will You Ignore It?

Will you simply GO WITHOUT records you need, or will you TRY BLACKMAN? We can't give you everything wanted, BUT our service will AT LEAST be a BIG LIFT.

97 CHAMBERS ST., NEW YORK

HOWARD T. GRIFFITH HONORED.

Advertising Manager of the Udell Works Re-elected a Director of the Chamber of Commerce—Holds Other Important Offices.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., March 10.—Howard T. Griffith, advertising manager of the Udell Works, of this city, has been re-elected a member of the board of directors of the Indianapolis Chamber of Commerce for another year. The Chamber of Commerce of this city has been in existence for one year, with ninety-five directors, but this year the number was reduced to forty-five, and of the forty-five directors chosen at this time only twenty-nine were re-elected. So it seems that Mr. Griffith in his re-election has achieved an unusual distinction.

Mr. Griffith is also vice-chairman of the publicity division of the Indianapolis Chamber of Commerce, and will be one of the reception committee to entertain the central division convention of the Associated Advertising Clubs of America, to be held in this city April 9 to 11. Some of the biggest men in the advertising field will be present.

The Santa Fé Watch Co., Topeka, Kan., hustling Edison disc representative, is displaying in its show window an attractive photograph of Governor Hodges of Kansas listening to an Edison disc phonograph in his home. The Governor's son, also shown in this photograph, apparently enjoys good music equally as well as his distinguished father.

H. T. Griffith.

EXHIBIT AT BROOKLYN SHOW.

Frederick Loeser & Co. Has Attractive Display of Victrolas and Various Well-Known Accessories at Pure Food and Industrial Show in That Borough—Closing Many Sales.

A complete line of Victrolas is being displayed this week by Fred'k Loeser & Co., Brooklyn, N. Y., at its exhibit at the Pure Food and Industrial Exposition, which opened March 2 at the Thirteenth Regiment Armory, Brooklyn, N. Y. This show, which is visited by thousands of people during the two weeks that it is presented, is an ideal place for a Victrola display, and a number of sales of expensive machines have been closed during the course of the two weeks.

E. Paul Hamilton, manager of the Victor and music departments of Fred'k Loeser & Co., secured the exclusive rights to the musical instrument section of the show this year, and paid particular attention to the display of Victrola products. Demonstration booths were constructed for the Victor exhibit, and every possible convenience is afforded visitors to the show. The new Victor dance records are meeting with a ready sale, and the prestige and musical standing of the Victrola is featured to excellent advantage.

Other exhibits in the Loeser Victor display include a number of accessories, among which are the Standard automatic stop, Standard fibre needle cutter, "Masterphone" and others. These are all attracting favorable comment.

THE WINDOW A TRADE DEVELOPER.

Attractive Display at the Phonograph Co.'s Store in the Taylor Arcade, Cleveland, Wins Praise from Visitors and the General Public.

(Special to The Talking Machine World.)

CLEVELAND, O., March 10.—The illustration herewith conveys an excellent idea of the window of The Phonograph Co.'s branch store in the Taylor Arcade, this city. The design is elaborate and attractive, and appeals unflinchingly to the thousands

Unusual Window Display of the Phonograph Co., Cleveland.

who daily pass through the Arcade. The value of a well considered window display is accentuated by the way this window attracts and holds people, thus proving an advertising medium of tremendous value.

You must learn not to overwork a dollar any more than you would a horse. Three per cent. is a small load for it to draw; six, a safe one, when it pulls in ten for you it's like working some place where you've got to watch to see that it doesn't buck.

Another Example of \$witky \$ervice

Victrolas XI Growing Scarce

But Our Dealers Need Not Worry

¶ Last summer we foresaw the condition that is coming. We took in all the Elevenths that the Victor factory could ship us, besides buying up a lot from other sources during the dull season.

¶ Although warehouse charges, interest and insurance have cut into the margin of profit, it was your benefit only that we thought of.

Telephone! Telegraph! Write! Get Busy!

**BENJ. SWITKY, VICTOR DISTRIBUTOR
NEW YORK CITY**

TO REMODEL ST. LOUIS QUARTERS.

Elaborate Plans Made for Housing Columbia Co. Branch in That City to Better Advantage—Recent Visitors—Managerial Changes.

(Special to The Talking Machine World.)

St. Louis, Mo., March 9.—Manager Irby W Reid, of the Columbia warerooms here, announces with a great deal of satisfaction that his store will not be compelled to hunt new quarters, as has been expected for several months. A year or more ago tenants of the property of which the Columbia store at 1008 Olive street is a part were informed that the buildings there were going to be wrecked. Several stores, including the Detmer Music Co. and the Silverstone Music Co., removed as their leases expired.

Now the prospect has changed and the Columbia Co. not only is going to stay in the present quarters, but the building will be entirely remodeled and renovated and made into an attractive and convenient store. The location is in the center of the district that has been known as the St. Louis headquarters for talking machines for a long time. The change also will give to the Columbia the additional space that has been needed for a long time. Recently this company has been leasing additional warerooms in the neighborhood.

Among other changes will be the removal of the Dictaphone department to the second floor. The offices will remain on the first floor, but will be remodeled for economy of space and efficiency. Stock and showrooms will be on the second floor.

Walter L. Eckhardt, of the Pennsylvania Talking Machine Co., was here the first of the month on a social visit and assisted Mr. Reid in making the plans for his new store with a view of getting the most out of the space.

J. J. Bennett, traveler for the Columbia Co., is back from a Northern trip and reports excellent trade. He reports new contracts with Allen Jewelry Co., Roodhouse, Ill.; George W. Brown, Jr., Hillsboro, Ill.; S. G. Smith, Jr., Edwardsville, Ill., Lombard Piano Co., 3540 Olive street, St. Louis.

Mr. Bennett says one of the marked developments of recent trade is the demand for foreign records and that his business in these records has increased fully 25 per cent. within three months.

R. S. Odell, of the Columbia sales staff, has been engaged as manager of the talking machine department at the F. G. Smith Piano Co. in the place of C. W. Smith, who left the Smith Co. to take charge of the talking machine department of the Sommers Furniture Co., also an exclusive Columbia agency. Mr. Odell will continue the policy of the F. G. Smith Co. to give occasional concerts, his next one being announced for March 27.

LISTS OF CREDITORS TOO LONG.

Causes That Lead Merchants to Expand Business Relations to the Danger Point—Better to Be Strong with Few Than Weak with Many—Suggestions Regarding Credit.

It is a rare business failure that does not show a list of creditors at least twice as long as it should be. It may be that a credit stringency was the cause; that in order to "keep going" it became necessary to go from one house to another until the list was swollen beyond all reasonable proportion. But it is very often the other way round; the many creditors come first, and the stringency follows swiftly enough.

The thing to do is to confine your business to as few firms as you can with justice to your stock. The merchant who does this makes his business important to his wholesalers. They are ready to give him of their very best efforts; he has their confidence; they are anxious to co-operate with him in every possible way because it is to their best interests to do so.

Don't split your business. Be strong with the few rather than weak with the many. This does not mean that you should not have two or possibly three lines of the same grades; that may be necessary enough to get the selection you want. It does mean that you should not have six or seven or more of the same grades—a smattering of everything. That is not necessary; it weakens credit and is an injustice to every line represented.

A. D. MATTHEWS' SONS IN LINE.

Brooklyn Department Store Opens Columbia Department with Harold Tuers in Charge.

The Columbia Graphophone Co. further increased its strong representation in Brooklyn, N. Y., last week, by closing arrangements with A. D. Matthews' Sons, Inc., whereby this prominent dry goods and department store opens a handsome Columbia department on the third floor of its building in the center of Brooklyn's busiest shopping section.

It is planned to have a complete stock of machines and records on hand in this department at all times, and to this end unusually large record racks and display rooms have been constructed. The department will feature six booths for demonstration purposes, all furnished in a comfortable home-like manner. Harold Tuers, formerly connected with the Twenty-third street store of the Columbia Co., is in charge of this Columbia department.

VACATION WEARIES EDISON.

Inventor Orders Phonograph Records Sent to Him in Florida.

Thomas A. Edison wrote to his personal representative, William H. Meadowcroft, in West Orange, N. J., this week, to send a large consignment of disc phonograph records and a machine to Mr. Edison's winter home at Fort Meyer, Fla.

"I can't feel right until I have some records and a machine with me," he wrote. "My friends here, Mr. Ford and Mr. Burroughs, I guess, will think me a quitter, but as soon as I have listened to the phonograph for a while, I will go with them to the Everglades and study bird life there."

EDISON DISC OUTFIT FOR ELKS.

The Elks Lodge of Green Bay, Wis., purchased an Edison disc phonograph last week after the members by a vote of 53 to 14 had expressed themselves in favor of this machine.

HOW ADVERTISING PAYS.

The Clever Publicity and Follow-up System of the Columbia Co. Bears Fruit in New Agents—Makes Most Favorable Impression on the Trade Throughout Country.

The advertising campaign being waged by the Columbia Graphophone Co. is undoubtedly one of the features of the talking machine industry at the present time. Impressive and strong in its appeal, this advertising has been generally commended by many members of the trade and has even attracted the attention of advertising experts throughout the country.

That this publicity campaign has been successful is indeed a tribute to its force and strength, but in the achieving of this success probably the most important factor has been the aggressiveness of the company's follow-up campaign. It is the motto of the advertising department of the company to make sure that everything that goes out reaches the place where it is sent, and to this end a well-nigh perfect and particularly comprehensive follow-up system is maintained at the executive and advertising offices.

The company has for some time been in receipt of communications from well-known dealers relative to the sales value of advertising campaign, but the following letter received this week from an enthusiastic dealer in Ohio furnishes an illustration of the influence of present day Columbia advertising:

"For some time past we have been getting your advertising and must say that it is very convincing. But why we have been getting it is a mystery to us, as we are not Columbia dealers but ——— dealers. But as I say above, your advertising is convincing and we are writing you with a view to putting in a stock of your records. Now you have another dealer or perhaps two in this city and you may not care to consider us. But if you do, send us your complete record list and discount by return mail. Kindly let us hear from you by return mail, and, if you can't consider us, let us have a reply to our letter any way."

INCREASE YOUR RECORD SALES

BY PLACING THIS HANDSOME FLEXIBLE COVER IN THE HANDS OF YOUR PATRONS

This attractive flexible cover is designed to hold the Victor or Columbia semi-annual record catalog, and is bound in mahogany colored imitation leather, and lined with black silk cloth. The price of this flexible cover is so low that it permits you to give same free to your customers with the record catalog inclosed, thereby making a useful souvenir and a permanent advertisement; or you may charge a nominal sum for it if you desire. In lots of 100 or more, your name will be stamped on face of cover in gilt lettering free of charge.

Send 20c. in stamps for a sample cover, with special trade prices.

No More Scratching of Cabinets and Tables by Record Albums

Our Albums are now equipped with LEATHER COVERED RING PULLS

This ring pull, which matches the album in color, makes the handling of the book easier than with the plain leather pull, and has all the practical advantages of the metal ring. This ring pull being leather covered cannot mar or scratch the highest polished cabinet or table.

NEW YORK ALBUM & CARD CO., Inc.

23-25 Lispenard Street New York
(Formerly New York Post Card Album Mfg. Co.)

GETTING RESULTS WITH "SERVICE."

How One Salesman for Talking Machine Jobber Got Business Away from a Competitor by Keeping Quiet and Helping Out in the Pinches—A Lesson in Business Building.

The man who serves is the man who wins, and this is a point well worthy of consideration by jobbers and dealers alike. Service is the key that unlocks the interest of patrons, wins their custom and enduring fidelity to an establishment. This point of view was well elaborated on by the Victor Co. some time since in the following pertinent preaching:

"Don't think I'm sore, for I'm not. I'm only curious. Our goods are the equal of So-and-So's. Our prices are right. Our deliveries are prompt. I know, too, that you are a friend of mine and want to treat me right. Now what gets me is how you ever happened to swing your recent orders over to So-and-So. Do you mind telling me?"

Thus spoke a salesman recently while sitting in the office of a manager who makes large purchases. In this, and in the rest of the story the Victor dealer should take a keen interest. Just imagine yourself in the place of the salesman and a good customer of yours in the place of the manager.

"The manager hesitated a moment, then he said:

"I believe you are broad-minded enough to hear the truth. So here it is. Yes, all you say about your goods and deliveries and our friendship is true. You have come to me in the past and sat here as you are doing now, and secured orders. But we are all learning all the time. And I have learned from this incident something vital about salesmanship which had never occurred to me before.

"Take this fellow So-and-So. He came on the scene while you were spending your time talking me into buying your goods. I will be frank with you and say that I hardly gave a thought to his existence at first. He didn't bother me at all. Just stayed around with my men—going out with them on their jobs—telling them little things, you know, and taking off his coat when occasion offered to help them out. Never saying anything about selling goods, mind you. Just *helping*. Next thing they knew my men were leaning on him. Were wishing he was around when they got stuck in some little detail or other. And he had a pat way of turning up at just such times, but never saying much. An unpretentious chap. Only happy, it seemed, when he could be tinkering with something—finding a better way to do a thing.

"That's enough of the manager's story—comes pretty close home, doesn't it?

"Now, then—how much effort do you really expend in helping your customers to get more joy out of the Victor you sold them? Don't, for goodness sake, get the notion that because you have sold 'em a machine that that's the end of it. The more those people enjoy the Victor, the more Victors will you sell to others. Here's an idea: The country is crazy, just plain crazy, right now over the tango and hesitation waltz, and the trot. To

be sure, they are not danced so very much in the ballrooms of the country, but they are being danced in thousands upon thousands of private homes, and that's vastly better business for you. On state occasions an orchestra is used—when a little coterie of friends get together evenings to dance, the Victor is the ideal thing. That's no joke. There are very real, very definite reasons for it, which were set forth last month.

"Now then, why not send a little note to the leaders of your smart set, suggesting that you'll be very glad to send a Victor and a demonstrator 'whenever miladi would like to give a little "thé dansant" "tango tea" to her friends.' That's helping people to get more joy out of the Victor, or helping more people get joy out of the Victor, as the case may be—and incidentally that sort of thing can make all the difference between a big success and a partial one."

COLUMBIA WITH KRANICH & BACH.

Famous Piano House in Harlem Secures the Representation of the Columbia Line—Will Be Featured and Exploited in a Progressive Way—Constructing Attractive Booths.

One of the most important deals consummated in some time was that made by the Columbia Graphophone Co. last month, whereby the retail store of Kranich & Bach, the prominent piano house of New York City, will handle a complete line of Columbia machines and records. This store, which is located on West 125th street, in the heart of the Harlem shopping district, is one of the most attractive piano establishments in that vicinity, catering to a high-grade clientele.

Approximately one-half of this spacious store will be devoted to Columbia products, a number of sound-proof demonstration rooms having been constructed for the accommodation of Columbia patrons, and a refined scheme of decoration characterizes the entire department. H. W. Acton, formerly connected with the Columbia retail department, is in charge of the Columbia department at Kranich & Bach.

Kranich & Bach, whose factory and executive offices are located at 237 East Twenty-third street, New York, is one of the best-known and oldest established piano houses in the industry. Their instruments are considered among the highest-grade pianos and player-pianos manufactured, and the firm sells its products through the leading dealers throughout the country.

FEBRUARY A RECORD MONTH.

"February was a splendid month, exceeding all our expectations," remarked A. W. Toennies, of the Eclipse Phonograph Co., 203 Washington street, Hoboken, N. J., Edison disc and cylinder jobbers exclusively. "Both in machines and records our disc sales have been excellent, and our dealers are all well pleased with the newspaper advertising that Thomas A. Edison, Inc., has been using, with the names of the dealers prominently displayed.

"Shipments of disc records are being received

from the factory more promptly than ever before, and disc dealers state that all the records in the disc library are meeting with a ready sale."

STRONG EDISON AD CAMPAIGN.

Persistent and Attractive Publicity in Behalf of New Disc Phonographs and Records Getting Results Throughout the Country.

Thomas A. Edison, Inc., is continuing its splendid newspaper campaign on behalf of the new Edison disc phonographs and records. These advertisements, which are designed along somewhat different lines than the average talking machine newspaper ads, are producing excellent results for the dealers mentioned in the copy, and many of the Edison disc representatives are enthusiastic in their reports of the inquiries which are being received from the individual advertisements. The present newspaper campaign is based along invitation lines rather than any attempt at direct sales. No prices are mentioned, but an invitation is extended to the public to visit any of the dealers listed on the lower part of the advertisement to hear the new Edison disc phonograph and records.

The list of Edison disc representatives presented in the latest advertisements is an imposing one, and in addition to the large number already mentioned in the columns of *The World* include the following new ones: Schultz Novelty & Sporting Goods Co., 118 Nassau street, New York; Spector & Son, 904 Prospect avenue, New York; Richard W. Olsen & Co., 617a Fifth avenue and 113 Flatbush avenue, Brooklyn; B. Poehland, 1592 Broadway, Brooklyn; Fred H. Ponty, Port Chester, N. Y.; Edward Waters, Oyster Bay, N. Y.; Hugo Traeger, 61 Wright street, Stapleton, S. I., N. Y.; William Ricker, 658 Newark avenue, Jersey City, N. J.; W. K. Muchmore, Morristown, N. J.; W. H. Morehead, 141 Main street, Somerville, N. J.; J. V. Flynn, Haverstraw, N. Y.; Rockland Talking Machine Co., Spring Valley, N. Y.; W. H. Pine, Asbury Park, N. J.; Estate of William Wright, Dover, N. J.; Gerber & Rau, Lakewood, N. J.; E. F. Glover, Plainfield, N. J.; The Jigger Shop, Princeton, N. J.; James McCollum, Rahway, N. J.; Frank C. Dobert, Rutherford, N. J.; C. F. Wolf & Bros., Somerville, N. J.; Stoll Blank Book & Stationery Co., Trenton, N. J.; Henry Bishop, Babylon, L. I., N. Y.; Benj. Rosen, Southampton, N. Y.; I. P. Hallock, Greenport, L. I., N. Y., and G. R. Pattison, West 125th street, New York. Mr. Hallock is one of the best known "talker" dealers on Long Island, catering to an extensive clientele, while Mr. Pattison but recently purchased the Harlem store of the Hallet & Davis Co., the prominent piano house.

PRESIDENT EASTON RETURNS.

Edward D. Easton, president of the Columbia Graphophone Co., accompanied by Mrs. Easton, returned to New York Thursday equipped with renewed energy and vigor after a short vacation to Bermuda.

IMPORTANT NOTICE TO EDISON DISC DEALERS

The New Thomas Attachment

Plays lateral cut records on the new Edison Disc Machine. It has a patented ball bearing joint, which makes it work flexible and free. You should not fail to have a quantity of these attachments in stock, as it will greatly add to your machine sales.

Write to your jobber for a sample,
if he hasn't it write to us.

Flood of Cheap Disc Records Causing Noticeable Reaction in Trade Circles—First Case of Record Infringement of Copyright in Court—Trade in Persia and Japan—The Edison Disc Line in England—Improvement Looked for in Reproduction—Leipzig Fair Visitors—New Records Placed on Market—Dinner to Paul H. Cromelin—Latest Record Lists Interesting—General News of the Trade.

(Special to The Talking Machine World.)

LONDON, E. C., ENGLAND, March 5.—Gramophone trade conditions on this side continue to excite a certain amount of nervousness, chiefly in relation to ruling prices for disc records. There is little or no cause for complaint on the ground of actual sales, for in this respect trade is undeniably good, time of year considered, but it requires an enormous turn over in order to ensure a reasonable amount of profit under present circumstances. Things went smoothly enough during the rush-time months prior to Christmas, but now that business has settled into a gradual decline, as we approach the summer season, traders are forced to abandon the policy of drift and concentrate on putting their house in order, if it is not already too late. In some cases this tardy realization of their serious position tends but to heighten the general instability prevalent in trade circles, and it will require more than ordinary commercial genius to find a successful solution of present difficulties. Time has revealed in no uncertain manner the futility of the policy which actuated the issuance of cheap records. The object aimed at may yet be achieved to some extent in the near future, indeed, if I read certain signs correctly, we shall experience more than one withdrawal from this market before next season. Competition will, however, be as strong as ever, for this field of activity seems invested with an attractiveness as fatal as a light is to a moth. Gramophone merchants come and go, and notwithstanding the obvious peculiarities of trade conditions here, we never lack the bright and hopeful "prospectors" who, somehow deceive themselves into the belief that they will revolutionize things and achieve success, where others of experience have failed. But that, by the way, whether or not competition becomes less active or otherwise, the fact remains that nothing can undo the irreparable damage sustained by the gramophone industry as the result of these cheap record issues. Indeed, I do not hesitate to state plainly that it is responsible for a substantial setback in the commercial development of sound trade, and the future alone can reveal the full extent of this damaging policy. A very undesirable class of trader has sprung into existence, price-cutting is more rampant than ever, decent dealers find it increasingly difficult to trade profitably, and the sales of records at half-a-crown are considerably on the decline. These are the apparent facts from a superficial survey of the situation, and I think it will be generally admitted they are bad enough. Optimism is for the time being under a cloud. The shilling records flourish as strongly as ever, and it is certain that if manufacturers do not withdraw this unsound trading, time itself will eventually compel them to, by reason of financial loss. The new policy of the Columbia Co. in introducing an eighteen-penny record, reduction of the Gramavox record to the same level, and as reported elsewhere the reduction of the Favorite record from a half-a-crown to eighteen pence, accompanied by the statement that the records will be marketed through an agency, is not without great significance in the light of present conditions. A large public has sprung into existence for the sale of medium-priced discs, and it is in keeping with the times that these firms should now cater for this extensive demand.

There are rumors that the Zonophone Co. would embark upon a new campaign, but in response to my inquiry direct, I am informed that it is mere

idle speculation—in short, the present policy of the company remains unchanged.

New Policy of the Favorite Company.

Under date of February 18, T. D. Addis, manager of the London depot of the Favorite Record Co., has intimated by circulars that "arrangements are now being made under which the English business * * * will be carried on through an agency." Pending completion of the proposed new arrangement, Mr. Addis will personally attend to all matters. Full particulars of a generous exchange scheme operative until the end of February, accompanied this circular, which also advised the trade that the price of Favorite records was now: Ten-inch, 1/6; twelve-inch, 2/6, retail. A revision of the trade terms, presumably comes into force simultaneously with this reduction.

I do not think there is any need to enlarge upon the importance of this drastic change of policy, beyond a mention of the fact that it has met with general approval, among dealers especially. The view exists, however, in more than one quarter, that the company should have taken this very necessary step several months ago, but, better late than never, it is meeting with all the success that may be expected of a high quality record at such a competitive price as eighteen pence. If price and quality determine sales, I can only say that the Favorite record is assured of unlimited popularity among the great army of gramophonists.

First Record Infringement of Copyright.

A most important case in the history of the gramophone trade came to light recently in the Tower Bridge Police Court. From the proceedings reported below, it will be seen that this is the first case of infringement under the Copyright Act, and it is particularly suggestive in relation to the position of dealers who, perhaps, unknowingly place such records on sale. The records may have been published in all good faith without a copyright stamp. I am not speaking of the present case—and trusting in the action of the record publishing house, the dealer is liable to find himself in a very awkward plight. There is, I think, little occasion, however, for the respectable retailing houses to anticipate trouble in this direction. If a recorded copyright composition is sent out unstamped by the manufacturer, I am open to say it is not so much his fault as that of the Act itself, which is a source of continual complication by reason of its all too-parliamentary phraseology, and the fact that it places upon the issuing house the onus of elucidating obscure and sometimes questionable copy-

right ownership claims. Notwithstanding, or rather perhaps because of this condition of things, it is a tribute to the thorough and careful manner of investigation of copyright ownership made by record manufacturers that the case in point is the first known, and withal an isolated one during close upon two years' operation of the Copyright Act! I do not seek to minimize the gravity of it. With so many cheap, and job lots of records on the market, there is an ever-present possibility of trouble for the dealer who buys indiscriminately. The law cannot recognize any plea of ignorance, and it behooves all buyers of records to exercise unusual precaution in buying under such circumstances as is revealed in the following case, as reported by the London Music Trade Review. The summons was taken out by the Mechanical Copyright Licenses Co., Ltd., against Adolf Knopf, of 62 Lower Marsh, Lambeth. Counsel stated that his clients, the plaintiffs, attached considerable importance to the case. He believed it was the first action for unlawful infringement of copyright under the act of 1911. The prosecutors were the duly authorized agents of Herbert Sullivan, who on the death of Sir Arthur Sullivan, became entitled to the benefits of his compositions. The defendant appeared to have two places of business—one at 25 Waterloo road, and another at 62 Lower Marsh. The five summonses were in respect of various dates in January, when representatives of the company paid visits to the two places of business and purchased gramophone records of "The Lost Chord" and a song from "The Gondoliers." The defendant, in selling these records without a stamp, knew that he was doing wrong; he had been in the employ of a company of high standing, and was now an agent for the same company. Counsel added that he proposed to ask for an order for the destruction of the records on the premises.

Mr. Benwell, for defendant, said his client was in Russia. What he (Mr. Benwell) was told was that about a month or six weeks ago the defendant purchased about 12,000 gramophone records, some of which were stamped and some unstamped. As to some of these records, the copyright had become extinct, and the vendors gave his client an indemnity. He was willing to give an undertaking to pay all royalties which might be due. An offer to do so had been given before proceedings were undertaken. Huntly Jenkins observed that an undertaking was of little value.

The magistrate, in imposing a penalty of 40s on each summons, with five guineas costs, directed that the records in question should be destroyed.

Persian Trade Conditions.

Two consular reports just issued on the trade of Ispahan and Bushire, simply reiterate what has been stated so often about the anarchic conditions of Persia. Neither life nor property is safe, and the prevalent insecurity makes trading well-nigh impossible. An instance is given where specie was sent to a town in southern Persia, the distance being 260 miles. It reached its destination ten months later! Under these conditions trading is much too hazardous, and at such risks it is only possible for those who charge very high prices in order to cover the all too frequent losses.

No Annual Report Yet Ready.

According to a German contemporary, the directors of Carl Lindstrom, A.G., Berlin, declare that no definite announcement can yet be made about the past year's dividends owing to the fact that it will depend upon the reports of their foreign companies. The dividend is expected to be not less than 15 per cent., but this will be announced at the General Board meeting to be held about the middle of this month.

According to a report from Germany, the Deutsche Gramophon Co. are taking steps to enforce their claim to the exclusive use of the word gramophone as applied to instruments and

(Continued on page 44.)

STROH VIOLS

VIOLIN, VIOLA, ETC.

The mellow and matured tone of these instruments, which are constructed largely of aluminum, yet possess none of the characteristics of the gramophone or wind instrument, is only one of its many points which are fully set out in an illustrated booklet which will be mailed free on request to the sole makers.

records. The German trade press seem to resent this, claiming that the word is a generic term, as in England.

Increasing Demand for Music from Japan.

The recently published particulars of export trade with Japan indicates that with the Japanese European music is becoming increasingly popular. The 1910 figures show that Great Britain exported to that country instruments and records to the value of only £340, but two years later, 1912, we find that the figures have risen to the extraordinary total of over £5,000, notwithstanding the active operations of new record factories in Japan. The German export figures for the years mentioned were £2,325 and £10,210 respectively.

Double Sided Records Most Popular.

There is no question of the popularity of double-sided records as against the single-faced in the United Kingdom, despite the difficulty of mating two titles acceptable to the buyer. In Germany, however, it has been a subject of question, and representations for a return to the single-faced records have been notified. To test the matter, the Deutsche Gramophon Co. intend to issue identical titles on both kinds of discs. Some permanent policy will result if it is shown that there representations are based on the proved requirements of the market. The verdict will be awaited with keen interest.

New Columbia "Regal" Record.

The Columbia Graphophone Co. have now entered the field with another new record—ten-inch double-sided, styled the "Regal," at eighteen pence retail. The official news reached me just in time to miss the mail for last month's issue. The announcement has caused much comment throughout the trade.

In announcing the "Regal," the company says (in part): "It is generally acknowledged in the trade that during the past twelve months the immense number of cheap machines and records sold has created an entirely new buying public for records.

"This new public, accustomed to a low price for records, at the same time realizes that it cannot expect on the cheapest records artists of acknowledged fame, and would therefore willingly pay a few pence more for artists whom it is not possible to give on cheap records. * * * The Regal catalog consists of 457 records transferred from the famous Columbia-Rena records, and fifty-five records of new recordings. * * * Regal records will be sold under strict price maintenance covered by our patents. Supplements will be issued monthly. * * * The name 'Regal' is well known in the trade in connection with the famous Regal instruments." A few of the well-known artists in the Regal catalog are: John Bardsley, Robert Howe, Jones and Van Brunt, Collins and Harlan, I. Gillette, Bela Berkes Orchestra, Austin, Kitchen, Beth Tate, May Moore Duprez, Loriner, Cunliffe, Sheridan, Will Evans, Champion, Jack Mills and company.

In connection with the "Regal" record issue, the titles deleted from the Columbia catalog are exchangeable on the basis of an order for twice the value in Columbia-Rena records, or three times the value in Regal records. The exchange ended February 14, and only new records were accepted.

Marketing the Edison Disc Line in England.

Considerable interest is evinced this side by an authoritative statement from Orange concerning the marketing of the Edison disc products in England. The news was conveyed by letter from the Edison Co. to a Glasgow correspondent, and in part is as follows: "Mr. Edison has issued strict instructions that no disc goods are to be exported until the large initial demand in the States has first been satisfied. * * * The records are practically unbreakable. * * * We are not supplying a change device so that our records may be played on other machines." Apparently it is the company's intention to develop an entirely new field when they are ready to market the product here, but somehow or other the impression exists that we are not likely to see much of the Edison disc for some considerable time

ahead. We shall most certainly await its advent in England with great interest.

Farewell Dinner to Paul H. Cromelin.

No better proof of the good fellowship that exists amongst members of the trade could be found than the complimentary dinner which was given to Paul H. Cromelin recently at the Connaught rooms by the Kinematograph Manufacturers' Association as a farewell following his retirement from the service of the Edison Manufacturing Co. after three years in England.

The feature of the evening was the presentation to Mr. Cromelin of a "All British" Old Spade Guinea from the members of the association, which was followed by the passing around of the loving cup with all due formality.

The chair was occupied by H. A. Browne in the absence of the official chairman of the association, J. F. Brocklis. Telegrams of regret were read from Messrs. A. Reed, H. Paulson, G. H. Smith and H. Hayman. Will Jury proposed the first toasts of the evening, namely, "Our Guest," and referred at length in most complimentary terms to Mr. Cromelin's connection with the trade and his fairness in all matters of business. The toast was supported by Messrs. Will Barker and H. A. Spoor, to all of which Mr. Cromelin replied with much feeling, especially when speaking of the kind treatment he had received at the hands of his British associates and competitors. A toast to "The Chairman" and the response by Mr. Browne brought the evening to a happy close.

Thorpe Bates' First Columbia Records.

In announcing the first records by Thorpe Bates, the Columbia Co. states that it considers them the finest examples of baritone recording yet issued. Thorpe Bates is one of the best known concert artists of the day, and he has built a reputation of strength upon the rich qualities of his voice and his own artistic versatility.

Thorpe Bates is represented by two records as his first Columbia contribution—a 10-inch record of "Youth" and "To Anthea" and a 12-inch record of Amy Woodforde-Finden's lovely song, "O

Flower of All the World," paired with the favorite ballad "Sincerity."

Latest Improvement in Reproducing.

It is, I think, generally admitted that under present methods we must look for gramophone improvement, not so much from the side of recording as of reproduction. I would not suggest that inventors have exhausted all efforts in the former direction, but the fact remains that greater attention seems to be devoted to the methods of reproducing sound, as witness the progress made within recent years by not a few of our leading concerns. Mechanical music is thought by many to have reached a stage little short of perfection, and certainly it is a marvelous thing to have produced from an inanimate black disc a sweet discourse of melodious sounds. Still, one cannot disguise that scope exists for improvement, and the man that can "show the way" to this end, will be a maker of history. Possessing a full measure of enthusiasm, without which it would perhaps be difficult to get a commercial hearing, the sponsors of new inventions often develop the idea of revolutionizing the trade, seldom for any purpose, unfortunately. There is always a welcome for "something better," and it can only possess the elements of success providing it fulfils all claims, is well supported financially and is marketed in an enterprising and energetic manner. These attributes I can partly vouch for in connection with a new kind of method for the reproduction of sound which is about to be introduced on this market. The inventor is Jose Hoffay, whose extensive experience with the American Columbia Co. at once invests his claims with all the weight of a man who "knows!" Your correspondent was recently accorded the privilege of a first confidential demonstration of Mr. Hoffay's new instrument, a description of which must be left until another time when it is ready for the market. At the moment I can but speak of its tonal qualities. Every kind of record was played—Columbia, H. M. V., new Edison disc, Marathon, etc., vocal and instrumental. I can frankly say the result was truly astonishing, all being reproduced with remarkable fidelity; in fact, in a more realistic manner than is possible on the ordinary instruments in use to-day. Somehow or other the volume of even the loudest records, bands, etc., seemed just right, as did also that of the lighter class of instruments. One or two experts who have heard Mr. Hoffay's machine declare its superiority over all other sound reproducing mediums and predict that it will meet with instantaneous success. Certainly I have never heard records reproduced in such a natural and musically perfect way. It is, in my opinion, the most important development in the history of this trade, and we shall await complete details of its construction with keen interest. The new instrument is covered by nine separate patents and is protected in all the leading countries of the world. It is a gramophone and yet, says Mr. Hoffay, so vastly superior in its beautiful results that he hesitates to use the word. For a suitable commercial name Mr. Hoffay therefore authorizes me to state that he will award a prize of £10. Communication to our London office will be duly forwarded to the right quarter.

Gramophone Co.'s Records for March.

A list of more than special merit is that issued by the Gramophone Co. for March; it is brimful of interest for the music lover, whose every mood is ministered unto with a range of titles of great variety. The Celebrity records include a gem in "Dreams of Long Ago," sung in English by Signor Caruso, and "Marechiaro" (Tosti), by the great Titta Ruffo. Miss Alma Gluck sings two little ballads. Miss Ruth Vincent, we observe, is down for "A Birthday" (Cowen), and the lady tenor, Miss Ruby Helder, the "Green Isle of Erin." Some idea of the quality offered this month by the H. M. V. company may be gained by a perusal of the complete list of titles as follows: Twelve-inch, double-sided—"Welsh Rhapsody" (German), and "Norwegischer Kunstler Carnival" (J. S. Svendsen), Bournemouth Municipal Orchestra; "The Land of Roses," Valse (Herman Finck), "Ecstasy Valse" (Sidney Baynes), Mayfair Orchestra; "A Dream of Egypt," "Introduction," "Beside the Lonely

Hill" and "I Envy Every Circlet" (A. Woodford Finden), band of H. M. Coldstream Guards; "Maximilian Robespierre op. 55, Part I and Part II (H. Litloff), band of H. M. Coldstream Guards; "Marana Tango" (Nat. B. Ayer), and "Seduction Tango" (G. Noceti), Le Petit Cafe Orchestra. Ten-inch, double-sided—"Jumping Jim" (C. Kat-taum), and "Devil-May-Care," two-step (Paul Lincke), Mayfair Orchestra.

Twelve-inch, single-sided—"Parsifal"—Verwandlungsmusik Part 1, Act 2 (Wagner: "Parsifal"—Verwandlungsmusik Part 2, Act 1 (Wagner); "Parsifal"—Verwandlungsmusik, Act 3 (Wagner), all by Berlin Philharmonic Orchestra; "Some of These Days" (Shelton Brookes), Miss Shirley Kellog; "Katzensfuge" (Domenico Scarlatti), Mark Hambourg (piano); "Hush-a-Bye Baby" (Archie Naish), Tom Clare; "The Fallen Star" (Chevalier), Albert Chevalier; "The Village Fire Brigade" (monologue), Alfred Lester (assisted by Miss Buena Bent; "Take Advice from One Who Knows" (Arthurs and David), Miss Jenny Benson; "How Are Ye?" (Judge and Williams), George Graves.

Ten-inch, single-sided—"All Soul's Day" (Richard Strauss), John Harrison; "The Vagabond" (Molloy), Thorpe Bates; "Offerings" (Monk Gould), Hubert Eisdell; "Down in Lover's Lane" (Easthope Martin), Miss Paolo St. Clair; "Irish Names" (Turvey), Reinald Werrenroth; "The Maiden in Gray" (Barnicott), Elsie Baker and Frederick Wheeler; "Soldier, What of the Night?" (Airlie Dix), Robert Radford; "I Have a Thrush at Eve" (Codman), John McCormack; "Narcissus" (from water scenes) (Nevin), Florence Quartet; "Serenata" (Moszkowski), Miss Maud Powel (violin); "I Want to Be in Dixie" (Berlin and Snyder), Willie Solar.

Leipzig Fair Visitors.

An unusually large number of gramophone men will be making their way to Leipzig for the opening of the fair on March 2. The majority will be away for five or six days. From all reports there is a promise of some especially interesting exhibits, and these I hope to deal with in my notes next month. A fairly close canvass of the trade reveals the following list of names which will doubtless be inscribed upon the fair register: S. W. Dixon, the Gramophone Co.; John A. B. Cromelin, European general manager; Louis S. Sterling, British manager; G. L. Funnell, factory manager, and E. M. Burns, New York export manager, all of the Columbia Graphophone Co. Christian Durve, Manchester; T. Llewellyn Davies, Wholesale Musical Supply Co.; George and Bernard Andres, Homophone; A. N. Gray and W. Denville Simons, National Gramophone Co.; A. Balcombe and E. Somerfeld, O. Ruhl, Ltd.; A. Hertzog and G. Ficker, New Polyphon Supply Co.; E. Oppenheim and F. Cassel, Scrutton street; G. Murdock and R. Fulton, John G. Murdock & Co.; W. Cooper, Coliseum Record Co.; W. Johnson, Liverpool; Frank and Edgar Samuel, Barnett Samuel & Sons, Ltd.; H. Bosman, Scala Record Co.; Messrs. M. S. J. and B. Woolf, M. & A. Woolf, Ltd.; Messrs. Nottingham, Anchor Record Co.; C. F. Harth, Syrena Record Co.; W. H. Reynolds, W. H. Reynolds Ltd.; P. Cowan, Alexander Record Co.; H. Lewin, Operaphone Record Co., exhibit, Peterstr. 26; José Hoffay, and N. Carlton, late of the London Record Co.

In addition to the foregoing the following are probable visitors, but at the time of my inquiry they were a little uncertain: W. Mauson, British Zonophone Co.; L. H. Kempe, National Gramophone Co.; Mr. Appleton, Leids, and T. D. Addis, Favorite Record Co.

Trade Commissioners on Visit.

In accordance with the practise that has been established for his Majesty's Trade Commissioners in the several Dominions to visit this country officially from time to time, so that manufacturers may have the opportunity of consulting them on any matters connected with their business, or of obtaining information as to the possibilities of extending their trade, it has been arranged that the Trade Commissioner for New Zealand (W. G. Wickham) shall come to this country, and will

doubtless have arrived by the time these lines appear in print. Representatives of firms will first be seen in London, and then trade and industrial centers in the provinces will be visited.

First Gorilla Records.

Colonel "Buffalo" Jones, the veteran hunter of the Wild West, who has spent his life facing every kind of wild animal, with no other weapon save his lasso, is in London preparing for an expedition to rope gorillas in the French Congo. The Buffalo Jones expedition is taking a graphophone with it, according to the Daily Mail, to obtain the first "voice-records" of these terrible animals, whose roar is described by those who have heard it as being terrific—far louder than that of the lion.

The Efficient Salesman.

In the course of a business chat with young men at a London hall recently, F. W. Moore said: "Salesmen of all ranks from the peddlers on Ludgate Hill to the diplomatists at the courts of Europe, render service to their employers, to their customers and to themselves, and no deal can be straight and clean unless the interests of all three classes are properly guarded." The efficient salesman was the man who studied his goods, his customers and himself. He must make a hobby of his work, always learning from his failures how to avoid a repetition of them in his strenuous game, and he must have nerve, courage and grit, together with loyalty to his employer. He must be physically fit in order to be mentally fit, and must be candid."

New Companies Incorporated.

Ebonitis, Ltd., manufacturers of plastic material for making gramophone records; capital, £10,000; office, 5 Willowbrook Grove, Camberwell, London, S.E. In addition to the manufacture of records, the articles of association provide for the manufacture of electrical switches and other goods. The secretary pro tem. is W. F. Robbins.

New Disc Record Placed on Market.

Yet another new disc has been placed on the British market. It is called the Syrena grand record, ten-inch double-sided, and is the product of a large Russian firm whose operations, we learn, are very extensive on the Continent and abroad in other directions. Additional interest is aroused in the new venture on account of the fact that its control is placed in the hands of C. F. Harth, whose experience with O. Ruhl, Ltd., and more recently as London manager of the Favorite Record Co., may be accepted as a valuable asset in the launching of the "Syrena Grand" on this market. In partnership with Mr. Harth is Mr. A. Dub, who comes from the company's Warsaw headquarters, where, of course, he gained great experience of talking machine trade in general. A linguist of no mean ability, Mr. Dub speaks English fluently, and he will of a surety soon become a leading personality in British trade circles. These gentlemen have opened offices at 56 City road, London, where they trade under the title of Messrs. C. F. Harth & A. Dub. In conversation with your correspondent the former gentleman said: "The Syrena Grand repertory includes practically all the best Jewish, Russian and Polish titles, and there exists already a fairly comprehensive list of English compositions. We intend to concentrate on increasing the latter as soon as may be possible, and we shall offer the British trade a substantially good record at a competitive price. We are not confined to the United Kingdom, and shall cultivate trade, especially with the British colonies and dependencies." Under test I found the Syrena Grand a record of pleasing qualities in all respects, and there seems every prospect of its success, given, as I am assured will be the case, an energetic policy and an increased repertoire of English titles. Both gentlemen have The World's best wishes for the complete success of the new venture.

The March Columbia Supplement.

The March Columbia supplement in its new colors affords the trade a magnificent opportunity to boom the popular Columbia-Rena series. It is a

(Continued on page 46.)

Nine out of ten people who hear record A-1448, "A Little Love, A Little Kiss" (instrumental)—buy it. A 65c. Columbia Double-Disc Record.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company

well-known truism that nothing increases public interest in any goods more than the presentation of those goods in a new form, and there will be few record buyers who will fail to be highly impressed with the new style Columbia supplement. An important reason why this handsome booklet should be well distributed by dealers is that it contains the month's new issues of Columbia "De Luxe" records, a feature which will stimulate a demand for Celebrity records with all dealers.

Reed Miller is one of the artists represented by a twelve-inch Columbia-Rena record this month, being heard in the tenor aria "When Other Lips," or, as it is equally well known, "Then You'll Remember Me," from the "Bohemian Girl."

The instrumental section of the March Columbia supplement is unusually strong, for among twelve-inch records we have the inimitable Sergeant Leggett in fine cornet records of the Berceuse de "Jocelyn" and Schubert's Serenade, while in ten-inch there is that other artist of the cornet, Arthur Laycock, in "Old Folks at Home" and "Robin Adair"—both with variations. In addition, there are pianoforte solos, instrumental trios and a brace of merry concertina solos—"The Wedding Glide" is one of them—by Alexander Prince.

The Columbia announcement this month of a first record by the Milan Symphony Orchestra will attract general attention, especially in view of the statement that this record was made by the famous orchestra under the baton of Maestro Romani. This great Italian conductor made himself personally responsible for the orchestrations for this recording, and the orchestra of fifty performers has, under his direction, produced a record that will assuredly be acclaimed a new achievement in recording. The first record—twelve-inch, by the way—is a fantasia on themes of "La Traviata" in two parts, and a more entrancing interpretation, marked by a delicacy that is little short of wonderful in its detail and definition, it would be difficult to imagine.

The famous American prima donna, Alice Nielsen, furnishes a beautiful record in the Columbia "De Luxe" series this month of Tosti's "Goodbye" and "Sweet Genevieve."

Orville Harrold, who has been enjoying the distinction of being pitted as an attraction against Caruso in New York, has his first ten-inch record in the Columbia Celebrity series this month, being heard in two English songs—"For You Alone" and "Absent."

Ysaye—the world's master of the violin—has a new record on Columbia this month, it being that lovely tenor aria, the prize song from "The Meistersinger."

American Mails—Important Alterations.

It is announced that the British Postmaster General has relieved the Cunard Co. from collecting mails at Queenstown (Ireland) owing to the risk incurred in entering the harbor there with their large ships during violent weather. All the Cunard packet boats, including the "Lusitania" and "Mauretania," will therefore proceed direct from Liverpool to New York. In consequence it is now necessary for all correspondence intended for conveyance by these steamers to be posted on Fridays before midnight at the London General Post-office, the times of posting at other London offices and in the Provinces being similarly advanced.

The Progressive Quality of Half-Crown Records.

It is significant of trade conditions in this country that the various companies still manufacturing records at two shillings and sixpence (they—the companies—are a diminishing quantity, by the way) would seem to be concentrating upon the production of lists which each month represent a higher standard of quality over preceding issues. This is doubtless as wise a provision as it is necessary, having regard to the growing influence of records priced below this one-time standard rate. Be that as it may, it cannot detract from the recognition which is due the enterprising policy, for instance, of the Zonophone officials in catering to a select

public with records of increasingly high merit and general value each succeeding month. Space precludes a detailed mention of the various items comprising the latest supplement, but I am moved to these thoughts because of its generally superlative quality, which throughout offers a typical example of the progressive nature of present-day recording in conjunction with all that goes to the production of good records.

TO SUPERVISE DANCE RECORDS.

Mr. and Mrs. Vernon Castle Engaged by the Victor Co. to Supervise Records for Dancing.

In a letter enclosing an advance copy of new records for the month of April, the Victor Co. sent out to its trade last week an important notice to the effect that Mr. and Mrs. Vernon Castle, the prominent exponents of the modern dance, had been engaged to supervise the making of all Victor dance records. The first records produced under this supervision are included in the April list.

Mr. and Mrs. Vernon Castle have acquired a country-wide reputation for their splendid interpretation of the modern dances, and Victor dealers are afforded a valuable selling argument in this announcement by the Victor Co. that the new Victor dance records will not only meet with the approval of Mr. and Mrs. Castle but will be recorded under their direct supervision.

John Cavanaugh, the popular manager of the Edison disc department of A. I. Namm & Son, Brooklyn, N. Y., is being congratulated on the addition to his family recently of a bouncing baby boy. Mr. Cavanaugh's enthusiasm over the Edison disc line is proven by the fact that the new arrival was named Edison Cavanaugh.

SWAMPED WITH THE DEMAND FOR RECORDS.

Volume of Record Business in Cincinnati Has Been Phenomenal—Leading Talking Machine Houses Make Most Encouraging Reports—A Policy of Expansion Is in Evidence Throughout the Trade and Everyone Is Most Optimistic.

(Special to The Talking Machine World.)

CINCINNATI, O., March 4.—During the past month the local talking machine trade has been swamped with demands on the part of record fiends. The volume of business of this class has been tremendous. The manager and assistants of the various places, while happy over the sales, would be willing to have a little rest. This is the state of affairs in Cincinnati. Even during the unusual blustery days of February, the customers found their way down town and loaded up.

The local situation, as a whole, appears very satisfactory. The arrival of the Cincinnati branch of the Phonograph Co., attracted much attention at the time, but the house is now taking its place in the ranks. Manager Peterson claims his main trouble is to secure sufficient supplies. J. B. Sims has joined the traveling forces of this branch. The company now has four local dealers. John Arnold, one of the latter, is still in the West, seeking health. Encouraging news comes from the little hustler, according to word given out at the store. Arnold is expected back about March 20.

Manager Dittrich, of the Rudolph Wurlitzer Co., said:

"Referring to the February business in our Victrola department, we can only say that the demand was practically as great as that experienced during December, not including the holiday week, and that the results were extremely gratifying, notwithstanding the great shortage of machines and records. The business has reached a basis where the supplies of instruments and records on hand determine the volume of business, and it looks as though this situation will continue indefinitely.

"The dance records have opened up a tremendous field for sales of Victrolas of all sizes, and this, together with the increasing popularity of the machines as a general entertainer, has opened new avenues which will make the business during the year 1914 grow far in advance of that of 1913.

"Applications for Victor agencies are coming in larger quantities than ever known before, and the initial orders are exceptionally large and usually include sufficient stock to guarantee the dealers being able to start from the very beginning with proper equipments for pushing the Victrola business most successfully."

"Yes," said Manager Whelen, of the local Columbia Graphophone store, "business continues good. February sales went far beyond our expectations, and every department ran ahead of any previous February in the history of the Cincinnati store. Record sales have been phenomenal and, despite the fact that we daily received large shipments of records, we ran out of certain records for which there is a great demand. The Columbia dance records have certainly filled a long-felt want

among the dance enthusiasts, and those who have tried them are unanimous in their opinion that the tempo is simply perfect, which of course is the most important feature."

When Mr. Whelen was asked about the school proposition, he was all smiles when he said: "Well, we certainly have got the schools acknowledging the desirability of Columbia instruments and records for that purpose. We have just closed with four more schools, the last sale being at the Windsor School, in competition with two other makes of instruments."

The Columbia Graphophone Co. states that it has closed with a large number of new dealers during the month of February, and the traveling men report that business is apparently good throughout the entire territory.

The Lyric's talking machine shop made a very good showing in February, according to Manager Ahaus. This, he said, was particularly true of the last week, when the big rush came.

The Victor department of the Otto Grau Piano Co. is doing very well. The company is gradually enlarging the line and expects to do quite a business this year.

Victor business continued at high tide all during the past month at Aeolian Hall. The exceptional showing of December and January were maintained; in fact the only complaint was about the difficulty of securing goods—both machines and records.

The Aeolian Victrola department is unquestionably most efficient, and well equipped in every way. The record service especially has been developed to a high point. All styles of machines went big indeed; it was largely a case of customers accepting any styles that could be gotten, as the shortage on some styles was keenly felt throughout the month.

The demand in records ran mainly to dance music, of which it was impossible to secure enough stock. The lists of special dance records scored a pronounced hit. The European one-steps and tangos scored heavily. Prospects at Aeolian Hall are for a continuance of boom business. The company continues to advertise Victrolas heavily.

BIG AUSTRALIAN SHIPMENTS

Of 240,476 Blue Amberol Records Within a Period of Six Weeks.

That Australians appreciate phonograph music is more and more evidenced every day. "The Star of India" recently sailed with one order alone for 140,476 Blue Amberol records. Another shipment of 100,000 has just been made by Thos. A. Edison, Inc., making 240,476 in the space of six weeks. And this is the dull or summer season in Australia, too.

SETTLED IN NEW QUARTERS.

The Schmelzer Arms Co., Talking Machine Jobber, Occupies Handsome New Home.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., March 5.—The Schmelzer Arms Co., the prominent jobbers of Victor talking machines and Edison phonographs in this city, is now settled in its handsome new building at 1214-1218 Grand avenue, between Twelfth and Thirteenth streets. The new building, especially designed under the direction of the company for the purpose of housing the various departments of its business, which includes the handling of an extensive stock of sporting goods, is of concrete throughout, with an elaborate tile front, and contains approximately 57,500 square feet of floor space.

NEW COLUMBIA AGENCIES.

Some Important Deals Made Recently in Connection with the Booking of New Representatives for the Columbia Line—Some Recent Additions to the Rapidly Growing List.

The Columbia Graphophone Co. has closed a number of important deals during the past fortnight which illustrate the rapid strides in popularity that Columbia products are making throughout the country. These new representatives, who are all located in near-by territory, form but a very small percentage of all the recent deals closed by the various Columbia distributors, as Wholesale Manager Yerkes has on his desk the names of many new representatives in all parts of the country, which will be announced in the near future.

Among the new Columbia dealers in near-by territory are the following: Joseph Michaels, a prominent and successful furniture dealer, with stores at 184 Smith street and 22 Grand street, Brooklyn, N. Y., and a third store at 503 Fifth avenue, Brooklyn, N. Y., under the name of Michaels & Co.; Columbia products will be handled in all three stores; R. D. Baker & Son, Warrensburg, N. Y.; the Franklin Parlors, Englewood, N. J.; B. Feldman & Sons, Little Falls, N. Y.; Eugene Weber, College Point, N. Y.

Wholesale Manager Yerkes was also advised last week of the closing of an important deal with the Gilchrist Department Store of Boston, Mass., one of the best-known stores in New England, which is arranging for an aggressive exploitation of Columbia machines and records.

HEAVY DEMAND FOR DANCE RECORDS

(Special to The Talking Machine World.)

BUFFALO, N. Y., March 4.—No sooner had the Columbia Graphophone Co. at 622 Main street announced the Columbia dance records when the store was rushed with orders from all over the city. Dealers in Victor dance records have also been swamped with orders so that it is nearly impossible to fill them all at the present time.

Don't try to kill time. Time can stand the racket longer than you can.

The only change in Columbia dealers' profits during the last month has been an improvement.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

STOCKS STILL REPORTED SHORT IN WISCONSIN.

Lively Business Prevents Jobbers and Dealers from Catching Up with Demands—Higher Priced Machines Have the Call—Miss Gannon on a Visit to the East—Arranging to Start New Columbia Dealers—John H. Becker Resigns—General News of Interest.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., March 9.—The shortage of machines and records which has been experienced by Milwaukee jobbers and dealers since the opening of the new year does not seem to have been overcome and the complaint is heard on all sides that more business than is being received could be handled if the goods were only available to fill orders. Stock of Victor machines and records seem to be especially low, and dealers are having trouble in meeting the demands of the trade. Stocks in dealers' hands were badly reduced by the Christmas trade, and they have been trying to replenish ever since.

Dealers in Milwaukee and about the State say that the February business was unusually good, but that their stocks have been badly depleted as a result. General business conditions have shown decided improvement since the first of the year, and this has reacted with favor upon the talking machine trade. General confidence is more widespread, money is a little easier and collections have naturally improved.

"Business has been very good during the past month or so," said Miss Gertrude F. Gannon, head of the Wisconsin Talking Machine Co., jobber for the Victor line. "We would probably be locating more new dealers if we were able to get more machines and records for distribution."

Miss Gannon recently returned from a short business trip in New York and other Eastern points.

The sale of high-class Victrolas at the Edmund Gram Piano House during February, more than doubled the number of machines sold during the corresponding period a year ago. The record business at the store has also been unusually good, according to Paul A. Seeger, manager of the Victor department.

L. C. Parker, the enterprising manager of the Victor department at Gimbel Bros.' Milwaukee store, has been making some more good sales of the Victor V and the small Victrolas to the Milwaukee schools. Mr. Parker was really the pioneer in selling Victors to the local schools, and he worked with Mrs. Frances E. Clarke, former supervisor of music in the Milwaukee public schools, now with the Victor Talking Machine Co., in arranging courses so that the talking machine could be utilized, especially in the grades. Mr. Parker and his sales force recently sold several machines to the Milwaukee Social Center, where they are being used to good advantage. General business in the Gimbel department is good, according to Mr. Parker.

The Columbia goods have been increasing in popularity to such an extent of late that A. G. Kunde, Columbia dealer and jobber, 516 Grand avenue, is preparing to start several new dealers who will handle the Columbia line in Milwaukee. "The most phenomenal feature of our business

during February was the big increase in the record trade," said Mr. Kunde. "Our sales of records showed a gain of 100 per cent., as compared with the corresponding period a year ago. The demand for machines has been exceptionally good also."

C. W. Abbott, manager of the Victor department at the Boston store, is meeting with an especially good business in the Victrolas X, XI and XIV at the present time. Demand is strong, he says, for all the high class machines. Mr. Abbott has found that the scheme of maintaining salesmen to cover the outside trade is working out favorably and he believes that it is a plan which every department store could follow with success. Work

MAKE MOST ATTRACTIVE DISPLAY.

The Furnishing and Decoration of the Store of the Columbia Co., Inc., in Norfolk, Va., Has Won High Praise from Critical Visitors.

(Special to The Talking Machine World.)

NORFOLK, VA., March 4.—One of the most attractive stores in the local talking machine trade is that of the Columbia Co., Inc., 67 Plume street, this city. Every detail in the furnishing and decoration of this store is in accord with the high-

will soon start at the Boston store for the purpose of doubling the size of the Victor talking machine department.

The J. B. Bradford Piano Co., which now maintains a highly successful Victor department, has consistently kept up its campaign of advertising the Victor goods in the Milwaukee newspapers, and the results have been more than satisfactory. Some especially fine sales of high-grade Victrolas are reported by officials of the Bradford house.

John H. Becker, Jr., one of the best known young talking machine men of Milwaukee, has resigned his position with the retail Victor store of Miss Gertrude F. Gannon. Mr. Becker has not completed his plans for the future as yet, but it is expected that he will again enter the Victor field at some point after he has enjoyed a short vacation.

U. P. Gibbs, well known traveler for the Rudolph Wurlitzer Mfg. Co., of Cincinnati, O., recently called upon the Milwaukee trade.

Co.'s line. In addition to the sales value of this type of machines, there is no doubt but that table machines lend themselves peculiarly to the distinctive arrangement of a store display, and this is well evidenced by the distinctive appearance of the company's main display room.

The Columbia Co., Inc., is closing an excellent business with Columbia machines and records which is aided considerably by its aggressive advertising campaign in the daily newspapers. In addition to this consistent advertising, the com-

Showrooms of the Columbia Co., Inc., Norfolk, Va.

est ideals of dignity and taste, and the many out-of-town visitors who have called at the headquarters of the company while on a visit to the city, have been unanimous in their praises of its artistic appearance and comfortable and home-like atmosphere.

As will be seen by the accompanying illustration, the Columbia Co., Inc., makes a specialty of displaying the popular table machines that form such an important part of the Columbia Graphophone

pany features informal concerts at its store, where the beautiful Columbia "Grand" is presented to excellent advantage.

To the credit men, with their ears glued to the ground, there is beginning to be very audible a growing rumble that presages a wave of good business and good collections. It's on the way, and the fellow that is ready is going to ride its crest to increased success.

TALKING MACHINE JOBBERS IN SESSION.

Executive Committee of the National Association of Talking Machine Jobbers Holds Mid-Winter Meeting in Philadelphia and Consults with Victor Co. Officials at Factory—Plan for Discussion of Important Matters at Convention at Atlantic City, July 6 and 7.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., March 3.—The regular mid-winter meeting of the executive committee of the National Association of Talking Machine Jobbers was held at the Bellevue-Stratford, on Sunday, February 15, with a second meeting with the officers of the Victor Co. at the factory at Camden on Monday, and the sessions proved to be among the most interesting and resultful of any ever held by the governing body of the association.

increase its output and to take care of the unprecedented growth in demand.

The jobbers came away with the feeling that though deliveries in some departments were naturally slow, the company was using every effort to bring the output to a point where it would meet demands promptly. The plant is at present working four nights each week and new record presses are being installed at the rate of two per week to meet a demand for records that sometimes reaches

problems that a member cares to bring up through that medium will be not only considered by the association, but also when desirable by the factory officials.

The arrangement committee of the association, represented by L. C. Wiswell, E. C. Rauth, A. A. Trostler, held its first meeting in Chicago later in the same week, for the purpose of making preliminary plans for Atlantic City sessions.

MILWAUKEE CONCERN EXPANDS.

Gensch-Smith Co., Victor Dealer, Adds Line of Automatic Pianos to Its Business.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., March 9.—The Gensch-Smith Co., operating an exclusive Victor shop at 700

Officers National Association of Talking Machine Jobbers.

First Row (left to right)—W. H. Reynolds, Treasurer; Geo. E. Mickel, Vice-President; J. C. Roush, President; Perry B. Whitsit, Secretary; James F. Bowers, Executive Committee. Second Row (left to right)—R. H. Morris, O. K. Houck, T. H. Towell, E. C. Rauth, also Members of the Executive Committee.

The meeting was attended by a full executive committee, including President J. C. Roush, Pittsburgh; Vice-President Geo. E. Mickel, Omaha; Treasurer W. H. Reynolds, of Mobile, Ala.; Secretary Perry B. Whitsit, Columbus, O., and Jas. F. Bowers, Chicago; R. H. Morris, Brooklyn, N. Y.; O. K. Houck, Memphis, Tenn.; T. H. Towell, Cleveland, O., and E. C. Rauth, of St. Louis, this being the second time since the convention that the full committee has convened, the first meeting having been held in Chicago. In addition to the committee members, there were also present of the members at large E. F. Taft, of the Eastern Talking Machine Co., of Boston; J. N. Blackman, Blackman Talking Machine Co., New York; Louis Buehn, Philadelphia; L. J. Gerson, with John Wanamaker, New York and Philadelphia; C. A. Bruce, president of the Standard Talking Machine Co., Pittsburgh, and Chas. F. Bruno, of C. Bruno & Son, New York, who took occasion to file an application for membership in the association.

The session on Sunday occupied all day and was given over to a general discussion of the problems that confront the jobber in the trade at large, including the completion of plans for the coming convention at Atlantic City, for which July 6 and 7 has been selected as the dates.

On Monday morning the jobbers went to the Victor factory, where they were met by Louis F. Geissler, general manager; Chas. K. Haddon, treasurer, and other officers and department heads. Various matters brought up by the jobbers were threshed out in conference with generally satisfactory and harmonious results, the committee being particularly pleased with the cordial manner in which they were received. Following the conference the jobbers were taken through the various departments of the factory and asked for suggestions that would tend to enable the company to

100,000 records per day. The facilities of the needle department have also been increased, and it is stated that in thirty days all back orders will have been filled. The company also took occasion to announce that a new and most liberal record cut-out and sales proposition would be issued in April.

One of the interesting features of the visit of the jobbers to the factory was the demonstration of the actual qualities of various needles for their benefit with a view to proving the claims of the needles for Victor records. Needles of the various makes were shown under a powerful microscope, which was very effective in emphasizing any imperfections that were hidden to the naked eye and therefore not generally appreciated.

Upon leaving Camden the majority of the jobbers went immediately to their homes, although Messrs. Taft, Towell, Roush, Bowers and Whitsit elected to spend some time in New York. In discussing the plans for the convention, President Roush said: "We wish specially to emphasize this year that the business of the convention will receive the first consideration and the social end will be relegated to second place, for it is the ambition of the officers to have every member leave the convention with the feeling that his time and money has been well spent, and that he goes home with increased knowledge regarding his business.

"We are making a special campaign to have the heads of the concerns attend the convention as well as the managers, for we feel that many of those not in closest touch with their talking machine departments have little idea of the extent of the business or what we are doing. This does not mean that we will not welcome the managers as in the past, we want them and want them badly, but we want the managers to bring the heads of their companies with them. One of the features of the convention will be a question box, and any

Grand avenue, has extended its field of activity and has launched into the piano field. The company has secured the Wisconsin agency for the Wurlitzer pianos and foot-operated players, and will henceforth give considerable attention to this phase of the business. An adjoining store has been leased, a connecting arch has been cut through and the Wurlitzer line will be displayed in the new quarters, which are 30 x 16 feet in dimension. Another new outside salesman has been secured, making three men now covering the city of Milwaukee and the surrounding territory. The company has just installed a large show case, where needles, talking machine supplies and a small line of musical merchandise have been placed on display.

WM. P. HOPE APPOINTED MANAGER.

Popular Milwaukee Talking Machine Man in Charge of New Kansas City Concern.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., March 7.—William P. Hope, traveling representative in Wisconsin and upper Michigan for Thomas A. Edison, Inc., for the past eight or nine years, and one of the most popular talking machine men in this section of the Northwest, has been made manager of the Western Phonograph Co., at Kansas City, Mo., a jobbing branch which is handling the Edison line. Wisconsin and Michigan dealers and the Milwaukee Phonograph Co., jobber for the Edison line in this territory, regret Mr. Hope's departure, but they all wish him the best of success in his new field. Mr. Hope's successor on the road has not been announced as yet.

A good guesser is generally a man who prides himself on his superior judgment.

**The Columbia Grafonola "Favorite"—\$50.
Still the most popular talking machine
in the industry.**

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

**Columbia Graphophone Company
Woolworth Building, New York**

COLUMBIA GRAPHOPHONE CO. INVADES FIFTH AVENUE.

To Have Splendid Quarters in Heart of Shopping District at Fifth Avenue and Thirty-third Street—Full Line of Instruments and Records to Be Displayed in Artistic Environment—The Booth Equipment Throughout Will Be of the Latest and Best Procurable.

The Columbia Graphophone Co. is invading upper Fifth avenue, New York City. By arrangement with its dealers, the F. G. Smith Piano Co., there is to be a Columbia corner at Fifth avenue and Thirty-third street.

Here, opposite the Waldorf-Astoria, and in the

all three are being most satisfactorily achieved.

The scheme of decoration followed is distinguished by artistic elegance and studied attention has been paid to the most effective display of product in every detail.

There will be, of course, an absolutely complete

Where the Columbia Line Will Be Handled at Fifth Avenue and Thirty-third Street, New York.

center of New York's most fashionable shopping district, the Columbia Graphophone Co.'s product is to be displayed in a store conspicuously handsome even on that great avenue of handsome stores. There is tremendous spread of plate glass show window facing on Thirty-third street and also on Fifth avenue, permitting a magnificent display of talking machine products.

The basement, ground floor and mezzanine of the store provide 7,500 square feet of space for this new home of Columbia. The entire interior of the store is being reconstructed, refurnished and redecorated, and the three essentials that have been adhered to in this work are the comfort of customers, the efficiency of the service and artistic presentation in all things. It is safe to say that

line of instruments and records. Demonstration booths are being built on each floor and every facility has been provided for the maintenance of a retail service in keeping with the locality.

This move may be regarded as an eloquent indication of the vigor with which the Columbia Graphophone Co. is strengthening its position in New York and the East in general.

DECISION ON RESALE PRICES.

Resale Decision Against Waltham Watch Co. Upheld by United States Supreme Court.

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 9.—The Supreme Court on Tuesday refused to review the decision of the Federal courts at New York, holding the Waltham Watch Co. could not fix the resale prices of watches by retailers.

* * * * *

The Waltham Watch Co. sought last month to enjoin Charles A. Keene, a Broadway jeweler, from selling a watch movement manufactured by the Waltham concern, and known as Size 16 Riverside, at less than the price fixed by the manufacturers. Mr. Keene, in his answer to the petition, alleged that the Waltham Co., though it charged \$28.50 for the movement in this country, sold it to exporters for \$10. In dismissing the application for the injunction the court here held that it was contrary to public policy to permit a patentee to prescribe the terms of resale.

HAS WON A MARKED SUCCESS.

Miss Clara B. Elting, Manager of the Victor Department of E. Winter's Sons in Kingston, Has Introduced Several New Sales Ideas.

(Special to The Talking Machine World.)

KINGSTON, N. Y., February 23.—Miss Clara B. Elting, who was recently appointed manager of the Victor department of E. Winter's Sons, the prominent piano house of this city, is achieving a very pleasing success. Although her connection with this firm is her first experience in the talking machine trade, she has already shown a peculiar aptitude for this line of work that seems to insure her an excellent sales record in a very short while.

In addition to maintaining a Victrola department that is in perfect accord with the high standing of E. Winter's Sons in the piano industry, Miss Elting has introduced several new sales ideas that have proven of considerable assistance in the conducting of her department. One of her recent selling helps was the thumb indexing of the Victor red seal catalog so that it is possible to tell a customer at a moment's notice just what records are presented by Caruso, Paderewski, Elman, etc. By this simple plan Miss Elting can show the names and numbers of the red seal records to her customers with a maximum of convenience and speed.

NEARLY FOOL-PROOF.

Advertising is nearly fool-proof. No persistent advertising of an article of merit has ever failed in the United States.

NEAL, CLARK & NEAL CO.'S NEW HOME

One of the Handsomest Talking Machine Establishments in Buffalo or Elsewhere—Artistically Appointed—Business Is Excellent.

(Special to The Talking Machine World.)

BUFFALO, N. Y., March 7.—The new store occupied by the Neal, Clark & Neal Co. is one of the handsomest talking machine establishments in this city. Nearly \$10,000 has been spent fitting up the premises.

The photograph showing one of the views of the establishment, which is reproduced herewith, does not do justice obviously to the color and decorative scheme employed and which makes the establishment one of exceeding attractiveness, with an atmosphere that tends to make one at home.

The booths are of French gray, light and dark, and the walls are finished with blue bur-lap. The rugs used are genuine Oriental, with

Booth Facilities in Neal, Clark & Neal Co.'s New Store.

having an especially strong call at the present time.

NEW MISBRANDING BILL.

Congressman Rogers Applies Law New Covering Only Food Products to All Articles Sold.

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 9.—Congressman Rogers of Massachusetts has introduced in the House a bill embodying the results of considerable research into the laws of this country and Great Britain to prevent the manufacture, sale or transportation of misbranded articles and for the regulation of the traffic therein. Mr. Rogers said today:

"The bill I have drafted is a misbranding act; that is, it protects the customer against fraud or negligent misrepresentation on the part of manufacturers or dealers. It differs from most of the proposed legislation, which applies only to fabrics and leather—it is universal in its application, covering all articles; I can see no reason why the purchaser of a piano or a watch should not be cared for as well as the purchaser of a pair of shoes. We have had since 1906 on our statute books a pure food law which prohibits the misbranding of food-stuffs. The pure food law has been extremely effective in its operations and its validity has been sustained by the courts. The proposed law, as it seems to me, supplies an inexplicable shortcoming in our Federal legislation by in effect extending the provisions of the pure food law to all commodities.

"Great Britain has had on its statute books since 1887 an analogous misbranding act which has worked very well. So far as applicable I have adopted the language of the pure food act and have embodied much of the very broad and detailed definitions in the British act of what shall be deemed misbranding."

VOICE CULTURE WITH PHONOGRAPH.

After a conference with Thomas A. Edison, Signor Uribe, of New York City, a teacher of voice culture and a grand opera singer, announces that he has adapted an Edison phonograph to aid him in his classes, and that the result is remarkable in promoting true tones and correct enunciation. The value of many of the grand opera and concert selections as examples of fine vocal power is readily conceded. So enthusiastic has the Signor become that he plans to give a public recital at an early date, showing how the Edison assists him in his classes.

Welcome trials, for remember it is usually difficulties and responsibilities that bring a man to the fore.

color effects in harmony with the general decorative scheme.

The business of the establishment is excellent and B. E. Neal of the firm stated to The World that their retail business had increased wonderfully since the work on their new quarters had been completed. There is an enormous demand for records of all kinds with dance numbers

company's balance surplus and reserve account on January 1, 1914, stood at \$866,588, as compared with \$601,128 on January 1, 1913."

INTRODUCE TELELECTROPHONE.

A Combination of the Talking Machine and Telephone Makes Its Appearance in the Gimbel Store in Philadelphia and Excites Considerable Interest and General Favor.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., March 9.—The telepho- phone, a combination of the telephone and talking machine, has been introduced for the first time in this country by Gimbel Bros.' department store and placed at the disposal of all who care to use it.

Beginning at 9 o'clock, the telepho- phone—there are thirty of them in use in the store—gives a concert, flashes news bulletins, recites menus for the benefit of the housewife, and during the afternoon rattles off current market reports and sporting events. Plans are under way to have the telepho- phone reproduce grand opera during the evening, when the service shall have extended to homes. This is another story, however.

JOINS RECORDING DIVISION.

Harold W. Lyle, a son of General Manager George W. Lyle, of the Columbia Graphophone Co., is now connected with the recording division of the company in the capacity of assistant to Manager Heindl, of the foreign record department. He is acquiring an intimate knowledge of the grapho- phone business, as he was a member of the selling staff of the Chambers street store for some time, and more recently was connected with the factory.

CONCERT HELPS RECORD BUSINESS.

(Special to The Talking Machine World.)

BUFFALO, N. Y., February 23.—According to W. J. Bruehl, manager of the Victrola department of the Neal, Clark & Neal Co., the demand for Tetrastini and Ruffo records was brisk during the past week. Mr. Bruehl said that after a concert by famous artists the demand for records is always heavy.

EDISON GOES ON VACATION.

Thomas A. Edison left West Orange, N. J., Saturday to "get back to nature." Accompanied by his family, Henry Ford, the automobile maker, and John Burroughs, the naturalist, the noted inventor left for his winter home at Fort Myers, Fla. Included in the party besides Mrs. Edison were their two sons, Charles and Theodore, and their daughter, Miss Madeleine.

Special

Send for a package of our Improved Half-Tone and Loud Tone Needles in New Style Envelopes.

If you want to advertise yourself, we will put your own name or trade-mark on the envelopes, or will pack in Puritone envelopes.

Quality Guaranteed

The Best Needles mean profit and satisfaction.

If you want to sell 1,000 Needles at a time instead of 100, use the "Dean-packed" Needles. Five boxes of 200 each, Extra Loud, Loud, Opera, Medium and Soft packed in a carton. The best package and fastest seller on the market. Write for samples.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 10.—SOUND BOX, Henry C. Miller, Waterford, N. Y. Patent No. 1,087,035.

This invention relates to improvements in sound boxes for talking machines.

The object of the invention is to provide a "fret" held spring plate fulcrum, a pad acting the same as finger pressure over the fret to give a certain note, as in the case of an instrument such as a mandolin or guitar.

A further object of the invention is to provide a self-adjusting means on the stylus lever to permit the latter to be in yielding contact with the diaphragm, irrespective of the adjustment of the fulcrum, also to recompense for the dishing of the diaphragm by an adjustable modifying element and its actuating means.

In the drawing Fig. 1 is a side elevation of the improved sound box. Fig. 2, is a view looking from the opposite side. Fig. 3, is a transverse sec-

tion on the line 3-3 Fig. 1. Fig. 4, is a detail perspective view of the stylus lever. Fig. 5, is a transverse section showing the adaptation of the invention when used in connection with a record having vertical indentations in its groove. Fig. 6, is a detail front elevation of the front of the casing to bring out clearly the formation of the fret. Fig. 7, is a detail section on line 7-7 Fig. 6. Fig. 8, is a detail perspective view of one form of modifying element. Fig. 9, is a detail view of a further modified form of modifying element.

TALKING MACHINE ATTACHMENT.—William C. Holland, Niagara Falls, N. Y. Patent No. 1,087,493.

This invention relates to talking machine attachments, and the principal object of the invention is to provide a simple and efficient device for automatically stopping the rotation of the record and for lifting the needle therefrom.

A further object of the invention is to provide a device of this character which may be adjusted for use on different sized records and for use on different types of machines, so that the attachment may be sold for universal use.

Further objects of this invention will appear as the following specific description is read in connection with the accompanying drawing, which forms a part of this application, and in which:

Fig. 1 is a top plan view showing the attachment applied to an ordinary disc talking machine. Fig.

2 is a side elevation thereof. Fig. 3 is a bottom plan view of the attachment removed. Fig. 4 is a horizontal sectional view through the attachment. Fig. 5 is a perspective view of the tripping dog supporting head removed from the attachment. Fig. 6 is a perspective view of the reproducer lifting arm removed. Fig. 7 is a detailed edge elevation of said arm showing its association with the reproducer or sound box. Fig. 8 is a side elevation

showing the position of the parts when operated.

SOUND BOX.—Peter Weber, Orange, N. J. Patent No. 1,087,339. In the manufacture of phonograph records as carried on by modern processes, it frequently happens that the record groove is slightly distorted; that is to say, it does not follow a theoretically correct helix around the surface of a cylindrical record, or a correct spiral around the face of a disc record. The best practice in phonograph construction requires that the sound boxes be mounted rigidly against lateral movement and that the box body be pivoted to oscillate in a plane perpendicular to the axis of the cylindrical record or to the plane of the disc record; or to provide means whereby the stylus may oscillate in a vertical plane where the entire sound box is held against movement in any direction. Unless some provision is made for a slight lateral movement of the stylus under the conditions above named, the stylus itself will not track properly in the record groove, with the result that the disagreeable scratching and the jumping of the stylus from the one groove to the next will take place.

The purpose of this invention is to provide the stylus and its connection with the diaphragm of the sound box with means whereby said stylus may oscillate laterally and thus be caused to follow the record groove no matter how distorted such grooves may be or how unevenly the mandrel upon which the record is mounted may run. The structure whereby this result is accomplished is applicable to either form of sound box; that is to say that form in which the sound box is permitted to oscillate bodily toward and away from the record, or that form in which the sound box is held rigidly against movement in any direction. This invention is also shown as applied to both forms of sound boxes and in the following description the full details of so much of said sound boxes will be set forth as will enable persons skilled in the art to which the invention pertains, to make, construct and use the same.

In the accompanying drawings forming a part of this specification, Fig. 1 is an enlarged side ele-

vation of a sound box and its connection, designed to oscillate about a pivot in a plane perpendicular to the axis of a cylindrical record. Fig. 2 is a bottom plan view of the same. Fig. 3 is a detached vertical section through the stylus arm bearing and stylus lever. Fig. 4 is a plan view of the stylus lever showing the tubular bearing for the stylus arm. Fig. 5 is a vertical section of a sound box which is designed to be held rigidly fixed. Fig. 6 is a bottom plan view of the floating weight. Fig. 7 is an end view of the connection between the floating weight and the sound box body. Fig. 8 is a view partly in section of the sound box body and the metallic retaining washer for the gaskets.

TALKING MACHINE.—Walter H. Pumphrey, New York, N. Y., assignor to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,087,256.

This invention relates generally to talking machines and more particularly to the construction and mounting of the sound conveying tube or tone arm employed in connection with such machines.

The object of the invention is to simplify the construction and dispense with small parts in mounting the tone arm and at the same time give it the required freedom of movement in planes parallel and at right angles to the surface of the record.

The accompanying drawings will serve to illustrate several forms suitable for carrying this in-

vention into effect. It should be understood, however, that the inventor does not limit himself to the exact constructions shown in the drawings, as various changes may be made therein within the meaning of the present invention.

In the drawings, Fig. 1 is a view in elevation, partly in section, showing the application of im-

proved form of mounting to a modern talking machine. Fig. 2 is a detail sectional view illustrating another form which the invention may assume.

PHONOGRAPH.—Pliny Catucci, Newark, N. J., assignor to A. F. Meisselbach & Bro., New Jersey. Patent No. 1,085,849.

The principal object of this invention is to so improve the construction of a phonograph as to materially increase its efficiency as a device for the reproduction of musical and other sounds, but also to reduce its cost of manufacturing to the lowest possible point, consistent with good material and workmanship.

In the development of the phonograph art it has been found that there is an increased demand for what is called the four-minute cylindrical record. The two-minute record—that is, a record that requires a period of two minutes to reproduce the entire matter placed thereon—has necessitated the use of a feed screw having 100 threads to the inch. The extreme fineness of this thread has laid it open to the objection that, in use, the thread was easily marred or damaged by coming in contact with other hard substances, and thereby, the delicacy and efficiency of this machine was very much impaired. If the pitch of the thread was decreased to, say fifty to the inch, the thread would be materially strengthened and much more capable of withstanding the hard usage to which such an instrument is usually put. Such a reduction in the pitch of the thread would correspondingly reduce the length of time occupied in reproducing the matter upon the cylindrical phonograph records.

By the former methods of construction, if a four-minute record was desired, it was necessary to correspondingly increase the number of threads on the feed screw to 200 to the inch. It will be readily seen that a feed screw of this extreme fineness would be too delicate for the practical application of the phonograph to ordinary use.

By this improvement, the inventor is enabled not only to reduce the number of threads upon the feed screw to fifty to the inch, and thereby correspondingly increase their strength and resistance to ordinary rough usage, but other features of the improvement enable him to utilize both the two-minute and four-minute records.

Fig. 1 is a plan view of the improvement with

the cover for the motor removed to disclose the interior. Fig. 2 is a side elevation partly in section of the completed structure. Fig. 3 is an end elevation partly in section of the motor, and its governing mechanism. Fig. 4 is a sectional view on line X, X, of Fig. 5. Fig. 5 is a vertical view on line Y, Y, of Fig. 4. Fig. 6 is a diagrammatic section of the subtransmission gear train for repro-

ducing two-minute records. Fig. 7 is a similar view showing the gear shifted to reproduce the four-minute records. Figs. 6 and 7 are taken in substantially the same positions as represented in Fig. 5, in the full line and dotted line positions of the shifting lever 57.

PHONOGRAPH.—Pliny Catucci, Newark, N. J., assignor to A. F. Meisselbach & Bro., New Jersey. Patent No. 1,087,106.

This invention relates to phonographs for use in connection with the reproduction of sound by means of records, and has for its object the general improvement of the various details of the phonograph, and is intended broadly to include means for relatively separating the sound box from the record support at a predetermined point or position, which in practise is fixed as at the end of the selection upon the record. This separation of sound box and record may be by permitting the record support to rotate at a relatively fixed position and providing means for elevating the sound box and its stylus free from the record, or on the other hand, the sound box itself may be made to occupy a relatively fixed position with the stylus point resting upon the face of the record, with means for withdrawing the record and its support from contact with the stylus and providing such means with additional parts whereby such withdrawal will stop the motor and consequently the rotation of the record support.

Other features of improvement relate particularly to the motor and the means for winding up the motor spring; the turn table and the method of mounting the same, whereby the table itself has a flexible connection with the drive shaft upon which the same is mounted, and important improvement is made in the sound conveyor whereby the sound box may be rotated through an angle of substantially 180 degrees to carry the stylus of the sound box out of and into position for engagement with the record disc; another important feature resides in the sound conveyor, the same being made

of telescoping parts with connections whereby the movable telescoping part may be actuated to be lifted through a distance sufficient to carry the stylus of the sound box entirely free from the record, as for example, at the end of the rendition of the selection upon the record; another feature of the invention embodies automatic mechanism whereby, at the close of a rendition of a selection, the sound box and its stylus are raised clear from the record and simultaneously the motor is automatically stopped. There is also provided a novel form of trap door for the outer end of the sound conveyor, so that the sound waves as they pass from the sound conveyor to the open atmosphere may be damped or muffled to any desired degree.

In the accompanying drawings, Fig. 1 is a front elevation of the improved phonograph showing the sound box and conveyor in elevated position. Fig. 2 is a plan view of the same. Fig. 3 is a view similar to Fig. 1 with the left hand end of the case broken away to expose a part of the automatic mechanism in the interior of the case, and showing the sound box and conveyor in elevated position. Fig. 4 is a view similar to Fig. 3, but with the sound box in a position occupied during the completing of a record. Fig. 5 is a sectional view showing the interior mechanism in the positions occupied by them when the motor is stopped and

the sound conveyor elevated. Fig. 6 is a vertical section of the mechanism showing the details of the mechanism and the various bearings connected therewith. Fig. 7 is an end elevation of the sound conveyor showing the stops for limiting the position of the sound box when the same is either in the position for playing or in reversed position for the readjustment of the stylus needle. Fig. 8 is a side elevation of a short portion of the telescoping conveyor tube showing the limiting set screw. Fig. 9 is a bottom plan view of the structure illustrating the position of the motor and the details of the stop mechanism. Fig. 10 is a top plan view of the motor showing the details of the winding mechanism and of the hand mechanism for stopping the motor. Fig. 11 is a side elevation of the motor disconnected from the case. Fig. 12 is a longitudinal section and a modification of the sound conveyor showing the means employed for elevating the same. The elevating device of this

modification contemplates the omission of the automatic elevating device as illustrated in the other figures. Fig. 13 is an end view of the modification illustrated in Fig. 12 showing the hand lever for elevating the sound box and telescoping sound conveyor by hand. Fig. 14 is a front elevation of the sound box showing the details of the stylus lever. Fig. 15 is a vertical sectional view of the same. Fig. 16 is a detached view in perspective of the operating rock shaft hereinafter referred to. Fig. 17 is a detached perspective view of one end of said shaft. Fig. 18 is a vertical sectional view of a still further modified form of a sound conveyor. Fig. 19 is a sectional view through the spring hinge structure for the amplifying part of the phonograph. Fig. 20 is a horizontal sectional view of the hinge through its axis. Fig. 21 illustrates the parts of the hinge structure separated to show their details. Fig. 22 is a rear view of the door section of the hinge. Fig. 23 is a sectional view of one of the hinge members. Fig. 24 is a sectional view similar to Fig. 19, showing the limiting position of the door and its various adjustments. Fig. 25 is a side elevation of the mechanism within the case, showing the structure whereby the record support may be raised and lowered, the general features of the structure being the same as illustrated in the preceding figures. Fig. 26 is a bottom plan view of the structure shown in Fig. 5.

BLANK FOR TALKING MACHINE RECORDS.—John Schumacher, Chicago, Ill., assignor to Joseph Sanders. Patent No. 1,082,709. The objects of the present invention are to provide a record blank which is less expensive, of less weight, and less liable to breakage than blanks made wholly of shellac or of a composition of which shellac is the principal ingredient, or of other plastic material.

With this object in view, the inventor makes the blank of a body or core of some flexible porous material, such, for example, as cardboard or blotting paper. This body or core is first sized in a

manner that wholly prevents the shellac from penetrating it. This body or core is coated on one or both of its faces with a plastic material, such as shellac or a composition containing shellac, which is adapted to receive and retain impression. The helical groove of the record is only an almost infinitesimal fraction of an inch in depth, and in order to meet the requirements in this respect it is

only necessary that the coating be of sufficient depth to receive the groove.

In its completed condition the blank is a normally flat disc of sufficient rigidity to maintain or substantially maintain its normal shape in ordinary handling. That is to say it may be handled precisely as the above described blanks or records at present in use are handled and if held at one side and in horizontal position, it will not bend appreciably under its own weight. At the same time it does not have the rigidity and therefore it does not have the fragility of the records of commerce.

In the accompanying drawing, which is made a part of this specification: Fig. 1 is a face view of a record blank embodying the invention, portions of the size and plastic coating being broken away. Fig. 2 is a transverse section thereof. Fig. 3 is a section of a fragment thereof, thickness being exaggerated. Fig. 4 is an exaggerated section of a fragment of a blank of different form, embodying some features of the invention.

NEW WONDERS PREDICTED.

London Editor Says That Improved Phonographs Will Recount the Events of the Day to a Public Too Lazy to Read—Every Reporter of the Future to Have a Portable Wireless Telephone Outfit.

Robert Donald, editor of The London Daily Chronicle and President of the Institute of Journalists, painted a striking picture of the newspaper of the future in his Presidential address at the annual meeting of the institute held recently in York.

Mr. Donald said if he were to attempt to forecast the future he would say that newspapers would be fewer in number. The tendency toward combination would increase and colossal circulations would continue to grow. He added:

"The newspaper of the future will not contain less reading matter, but its pages will be smaller, methods of distribution will be quicker, and circulation will cover greater areas.

"Airships and aeroplanes will be used for the most distant centres. Electric trains and motorplanes running on special tracks will also be used. In all the chief centers of population papers will be distributed by electric or pneumatic tubes. Morning and evening newspapers will be merged and editions will come out almost every hour of the day and night.

"News will be collected by wireless telephone and a reporter will always have a portable telephone with him with which he will communicate with his paper without the trouble of going to a telephone. The wireless telephone messages will be delivered to the sub-editors in printed column form.

"At people's recreation halls, with the cinematograph and the gramophone or some other more agreeable instrument of mechanical speech, all the news of the day will be given hot from its source.

"People may become too lazy to read, and news will be laid out to house or office just as gas and water are now. Occupiers will listen to an account of the news of the day read to them by much-improved phonographs while sitting in the garden, or a householder will have his daily newspaper printed in column form by a printing machine in his hall just as we have tape machines in offices now."

Don't waste time explaining your actions; people prefer to draw their own conclusions.

2239	My Old Kentucky Home Fantasia (Otto Langey) Edison Concert Band	

BUFFALO T. M. DEALERS TO ORGANIZE

Expected to Follow Lead of Piano Dealers in That City—Said to Be Badly Needed.

(Special to The Talking Machine World.)

BUFFALO, N. Y., March 10.—Spurred on by the actions of local piano dealers and manufacturers in forming a protective organization, an association of dealers in talking machines and supplies is being contemplated in this city. Thus far the project has only been discussed and no definite actions have been taken in the matter. However, it is likely that before long the organization of talking machine dealers will be realized, as its need is being distinctly felt in this section of the State.

When the organization is formed it will be for the protection of all local dealers in the talking machine trade. This association will, if organized, promote not only the trade in this city, but also in this entire section of the State. It is hoped by local men that the project will be a success.

NEW VICTOR WINDOW HANGER

Designed to Emphasize in Attractive Manner the Testimonial of Richard Strauss.

The Victor Co. has just announced to its trade the publication of a very attractive window hanger presenting a testimonial from Richard Strauss, the celebrated composer, in which he pays a tribute to the musical qualities of the Victor. This hanger is designed in a distinctive manner, showing an excellent portrait of Strauss, together with his praise of the Victor in both German and English. The attention of the trade is called to the fact that Mr. Strauss speaks of the Victor as the gramophone, which is the name by which it is known in Europe.

The text of Richard Strauss' testimonial is as follows: "The gramophone which was demonstrated to me to-day reproduced with approximate perfection, worked faultlessly and was very pleasant in tone and volume of sound, so that I can conscientiously bear witness to the fact that it provided a most delightful treat to a very sensitive ear.—Dr. Richard Strauss."

NEW VICTOR FOLDER.

The Victor Talking Machine Co. has just announced a new folder, showing in detail the complete line of Victrolas, accompanied by adequate descriptions of the various machines. It is the company's intention to introduce in the very near future another folder devoted to the horn types of machines.

The folder featuring the Victrolas is neat and attractive, presenting, in addition to clearly defined cuts of the machines, several pithy selling arguments on behalf of the Victrola. Victor dealers throughout the country are requested to place their orders for this new literature as soon as possible, as there will undoubtedly be a heavy demand for the folders.

READ your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

GRAND OPERA IN ATLANTA.

Engagement of the Metropolitan Opera Company Booms Talking Machine Sales in Gate City—Fifth Engagement Under Auspices of the Atlanta Music Festival Association.

(Special to The Talking Machine World.)

ATLANTA, GA., April 6.—Although it is some weeks before the Metropolitan Opera Co. stars will make their Southern flight, Atlanta and indeed the whole South is centering its attention on the seven performances that will be given beginning the evening of April 27 and closing the evening of May 2.

The operas to be given are: Massenet's "Manon," "Il Trovatore," "Der Rosenkavalier," "Un Ballo in Maschera," "Madame Butterfly," "Lohengrin," "Cavalleria Rusticana," "Pagliacci."

Indications point to the largest attendance and the most successful engagement that has yet been filled, and already the seating capacity of the immense Auditorium is taxed to its utmost.

The local talking machine dealers are experiencing great benefit from the coming engagement and the sale of grand opera records and talking machines has been very much stimulated.

M. Rich Bros. & Co. are giving recitals from the opera on each Friday afternoon, using the Grafonola grand for playing the records, and at the first recital given on the afternoon of March 27 the recital room was filled to overflowing. The recital is accompanied by explanatory readings and a brief outline of the stories of the different operas.

Beginning with Tuesday, April 7, each evening the Cable Piano Co. will give in its Victrola rooms similar recitals of the opera with interpreted readings by Miss Dora Hood, one of the best known musical critics in the South and also a talented elocutionist.

In lighter vein there is one thing that stands out alone, "dance music." They buy it in person, they send for it by the children, they write for it, telephone for it and even telegraph for it. We tango the first thing in the morning, before meals, after meals, between meals and the last thing at night. No, the talking machine dealer doesn't worry. He simply plays "Too Much Mustard" on his cash register and offers a fervent prayer that their shoes and energy will not wear out.

INNOVATION IN CHURCH SERMONS.

Phonograph Used in Place of Minister for Delivery of Sermon—Creates Quite a Sensation and Wins Most Favorable Comment.

(Special to The Talking Machine World.)

SPOKANE, WASH., April 4.—An innovation in church services in this city was the phonograph sermon at the Bethel Presbyterian Church, Seventh avenue and Sherman street, last Sunday night. Owing to the church being without a pastor the phonograph occupied the pulpit, taking the place of the regular evening sermon.

The phonograph sermon, which was preached for phonograph use by the Rev. Dr. Wm. H. Morgan, of Pittsburgh, Pa., was greatly enjoyed by the congregation, an intense silence prevailing throughout its delivery.

The phonograph used was the Edison Amberola V loaned by Mr. Nat Dumphy, of the Graves Music Co., of this city.

Moving pictures have been used in some churches, but the phonograph sermon is the latest. It has been used in other cities with great success, and judging from the way it was received here it will be utilized more frequently in local churches.

One price! The fixed, uniform, fair price is the one strong protection of the small dealer against his big competitors who can afford to slaughter prices to control trade. Price-cutting in its essence is in restraint of trade. Let Congress make note of this fact.

TELEGRAMS AS TRADE DEVELOPERS.

Suggestion That Live-Wire Dealers Could Reap Considerable Benefit from Timely Display of Telegrams in Show Windows—How Idea Can Be Utilized in Divers Ways for Publicity.

It was suggested recently by a prominent talking machine man that live-wire dealers could reap considerable benefit from the timely display of telegrams in their show windows. In connection with this idea it is interesting to note that a manufacturing firm in the Middle West recently sent out a series of telegrams to its dealers dealing with appropriate bulletins or messages of interest that it deemed the dealer could utilize to profitable advantage. Accompanying this series of telegrams the firm sent out the following explanatory letter: "The psychological effect of a telegram is too well known to explain here. We have made inquiry of a number of our agents to whom during the last month we have sent out telegraphic bulletins on the small regular telegraph blanks such as are furnished by the telegraph companies. Those dealers who displayed these telegrams in their windows have been so enthusiastic over the results achieved that we have decided to send you regularly a telegram similar to the one enclosed. Paste this, with the stickers provided for the purpose, in your window and watch the crowds stop and read. It will draw people, and once you get them in your store it's up to you."

There is undoubtedly sound logic to this letter, as there is a certain attractive influence attached to telegrams that make a peculiar appeal to the general public. It is probably curiosity that is the most powerful factor in this attitude, but whatever it may be, it attracts crowds to the dealer's show window and this in itself is excellent publicity.

The talking machine dealer can utilize this telegram idea in divers ways. For example, he can simply give instructions to his distributor to wire him at frequent intervals regarding some new record or some particular feature of a forthcoming or just issued supplement of new records. As soon as these telegrams are received the dealer should paste them inside his window, not with care of position as if by design, but in a careless, off-hand manner that will appear natural and unstrained. These telegrams will surely attract passers-by and prove an excellent publicity medium.

HERE'S A LIVE "TALKER" DEALER.

(Special to The Talking Machine World.)

WEST PALM BEACH, FLA., April 9.—The recent visit to this hustling city of Maud Powell, the famous violinist, was turned to good advantage by Frank Idner, an aggressive and up-to-date Victor dealer. Mr. Idner as soon as he learned of Miss Powell's visit to West Palm Beach trimmed his window along artistic and attractive lines, featuring Maud Powell and her excellent records in the Victor library.

In addition to this show-window, Mr. Idner mailed a postcard to each person attending Miss Powell's concert, showing a splendid portrait of Miss Powell, together with a partial list of Victor records corresponding with the evening program. This timely and appropriate publicity had its desired effect as Mr. Idner closed many sales of Maud Powell records, in addition to securing the names of several live machine prospects.

THINGS NECESSARY TO SUCCESS.

To know every detail, to gain an insight into each secret, to learn every method, to secure every kind of skill, are the prime necessities of success in any art, craft or trade. No time is too long, no study too hard, no discipline too severe, for the attainment of complete familiarity with one's work and complete ease and skill in doing it. As a man values his working life, he must be willing to pay the highest price of success in it—the price which severe training exacts.—H. W. Mabie.

OPEN ATTRACTIVE DEPARTMENT.

The Rhodes-Mahoney Furniture Co., Victor and Columbia Dealers in Chattanooga, Tenn., Has Handsomely Arranged Quarters—Large Attendance on the "Opening Day."

(Special to The Talking Machine World.)

CHATTANOOGA, TENN., April 5.—With the opening of the new talking machine department of the Rhodes-Mahoney Furniture Co. to-day, one of the most complete, best arranged and most attractive departments in the South was created. The Rhodes-Mahoney Furniture Co. has long been one of the most prominent Victor and Columbia dealers in Tennessee, and with its new quarters and improved facilities for handling stock and for demonstration purposes there is no question that its already large business will experience a gratifying increase. On the opening day the rooms were tastefully decorated with immense vases of pink and white carnations and the walls banked with beautiful ferns. From 2 to 6 o'clock the patrons of the department were entertained by a recital on the Grafonola grands and tea was served to several hundred visitors who called to inspect the new department and to congratulate members of the firm and Manager Neece on the opening of the new booths.

One of the features of the day was the playing of the first Columbia double-disc record by Oscar Seagle, the brilliant young baritone, himself a native of Chattanooga. The selections, "Prologue from Pagliacci" and the famous "Drinking Scene from Hamlet," were well received by Mr. Seagle's fellow townsmen.

PHONOGRAPH GETS GIRL CONTRACT

At the La Scala Opera House in Milan—Prodigy Discovered by Bonci During His Visit to San Francisco—Had Records of Her Voice Made from Which Engagement with Italian Opera Company Resulted.

Charmed with the voice of a young girl which they have heard only as produced by a phonograph record that has been sent to Milan, the management of the world-famous La Scala Opera House has by cable offered her a contract to sing in grand opera there.

The girl, who is only eighteen years old, is of Italian parentage, and comes from San Francisco. Her name is Iole Pastori, and she was discovered with her brother singing in the streets of the Golden Gate City by Alessandro Bonci, the renowned tenor, during his visit there some time ago. Mr. Bonci was greatly impressed with the wonderful natural coloratura voice of the young singer, and sent for her. He questioned her and made her sing for him everything that she knew. The result was that Bonci pronounced the child as destined to be one of the greatest prima donnas the world has ever known.

He succeeded in getting a wealthy Italian resident of San Francisco to agree to defray the expense of the child's musical training and brought her to this city, where he placed her under the tuition of Mme. Valeri. The progress the girl has made in her vocal and musical studies has been remarkable, and a month ago Bonci had her make several records for the Columbia Phonograph Co. One of these records, the "Caro Nome" from "Rigoletto," was sent to the managing director of La Scala, and when he heard it he promptly cabled an offer of a contract.

The girl herself has sung for Caruso, Toscanini and Gatti-Casazza, of the Metropolitan Opera House, who all declare that she is a marvel. It is predicted that she will make a sensation when she appears in Milan.

WILL JOB TRITON PHONOGRAPHS.

A. M. Fiske has been appointed State jobber for New Jersey for the Triton Phonograph Co., 41 Union square, New York.

HOUCK'S DANCE EXHIBITION CAUSES SENSATION.

The O. K. Houck Piano Co., Victor Distributer in Memphis, Tenn., Engages Two Professional Dancers for Window Exhibition, in Which the Latest Dances Were Exploited to the Music of the Victor, Arousing the Greatest Possible Interest.

(Special to The Talking Machine World.)

MEMPHIS, TENN., April 5.—The O. K. Houck Piano Co., the successful Victor distributor of

The crowds grew from day to day until Saturday night, when they put on an extra and special performance between 7 and 9 p. m., and that evening the crowd was so large that it extended all the way from the window across to the pavement on the opposite side of the street, and once or twice the regular policeman on the block had to move the crowd to let the cars pass by.

Saturday afternoon there was a strong counter attraction for about 30 minutes. A man drove by in his automobile and was so much interested in the dancing that he inadvertently turned into the street car, resulting in the dismantling of his machine, but did not do any very serious injury to himself or the street car.

The company expects to place this attraction

Dancing to Victor Music in O. K. Houck Co.'s Window.

this city, which has on a number of occasions put over advertising stunts that have made Memphis sit up and take much notice, capped the climax last month when the company arranged to have two of the best amateurs in Memphis illustrate the various new fashioned dances in one of the large show windows of the company's store each afternoon for a week. The exhibitions lasted two hours each day and the repertoire of dances included the following: One-Step, Two-Step, Turkey Trot, Horse Trot, Lame Duck, Tango, Memphis Tango, Waltz, Waltz Boston, Waltz Hesitation, Hesitation a la Memphis, and Maxixe.

The couple danced three, four or five minutes; then retired to a small dressing room and remained there until some of the crowd moved on. In order to keep their identity unknown, both the lady and the gentleman wore wigs and masks.

In order to eliminate any chance of having the sixteen foot glass in the front window broken, a carpenter built a very substantial wooden rail all around the front of the window, and, as a further safeguard, the company had the Commissioner of Police detail two of the best looking and best dressed policemen, who were on guard every minute during the two hours' entertainment.

Crowd Around Window to See Dances.

for a week's engagement at its Nashville Store and another week at its Little Rock Store, and these two engagements will be followed by one in our Concert Hall in Memphis, which will accommodate about 150 people, and the dancing will be done on the stage.

At one time it was rumored that the genial O. K. himself was to illustrate the Boardwalk Limp direct from Atlantic City and a flock of the belles of the city headed for the Houck Co. store with hearts fluttering and ambitious to be selected as dancing partner for one of the most prominent and eligible bachelors in Memphis. Mr. Houck didn't come across with the dance, however, and the result is that he will probably stay single for some time to come at least.

MAKES RECORDS OF BIRDS' VOICES.

Thomas A. Edison, Upon Return from Vacation in Florida, Brings Most Interesting Collection of Records of Birds' Songs—Secures Special Record Carrier.

Thomas A. Edison, who returned to his home in Orange a few days ago, after a sojourn of several weeks with his family at Fort Meyer, Fla., brought back with him a unique and most interesting collection of records of birds' voices. Mr. Edison is a bird lover, as well as his companions on his vacation—Henry Ford, the automobile man, and John Burroughs, the aged naturalist.

Several weeks ago they set out in the underbrush of the Florida Everglades a number of machines which could be set in motion by a push button a mile away. These were for the purpose of catching the songs of the shy swamp birds. The experiment was successful, and scores of strange bird songs were obtained.

To bring them back Mr. Edison will use a new record-carrier which he invented while away and was made at West Orange from his written specifications. It will also be used in the future for the transportation of delicate records so that they will not crack or chip.

The carrier consists of an iron receptacle, which is fur-lined. The records are placed in this, with soft rubber between them. Then they are screwed down compactly and pneumatic coverings are placed over the top and bottom so that the records cannot move in any direction.

TO CONTINUE THE BUSINESS.

The Pooley Furniture Co., bankrupt, has made application through its receiver, M. Weinmann, to be permitted to continue the business for five months, or until such time as it may be turned over a going business, under pending negotiations. In this way it is estimated the best results will be secured for the creditors, as the sale of the property at this time would be disastrous.

The Success Of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.

This admitted makes it important that you secure the best service obtainable.

AND THAT IS EASTERN SERVICE

To use it is to swear *By* it not *At* it.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., March 31.—Talking machines seem to have held their own remarkably well the past month, in view of the fact that general business was rather slow here during March. The extreme hot weather the first half of the month, when the thermometer registered higher than it has been in March in the San Francisco Bay district for twenty-two years, was not conducive to great activity in retail business, especially when school children were enjoying spring vacations and a good many families were out of town. However, complaints about business did not emanate from talking machine quarters in many instances. Two weeks of grand opera stimulated interest in operatic records, and no great falling off in the demand for dance records has been noted during Lent. As evidence that the talking machine business here is in a healthy state, two houses have announced their intention of moving to more desirable quarters within the next few weeks.

Leases Quarters in the Sachs Building.

The Pacific Phonograph Co., of which A. J. Pommer is proprietor, has taken a lease on a large floor space in the Sachs building in Geary street, which is a modern structure centrally located, with excellent shipping facilities, as well as special elevator accommodation and other features of importance in connection with a jobbing business in talking machines. Mr. Pommer will occupy the entire third and fourth floors of the building with his Edison business, and will have them fitted up in first class shape for occupancy at an early date. He says orders came in in satisfactory volume from the travelers the past month.

Babson Bros. to Move.

The other move already referred to happens to

be an Edison proposition also. New quarters have been secured at 235-237 Geary street for the local branch of Babson Bros., which afford much better facilities than their present location at 65 Post street. The Geary street store is to be thoroughly renovated before occupancy, and will be fitted up as modern phonograph parlors, with special accommodations for the demonstration of the disc products. The move will take place some time in May.

Conditions with Columbia Co.

The local headquarters of the Columbia Graphophone Co. were visited the past month by E. E. Robinson, representative of the Columbia Co., on his way to New York after a year in the Orient. Coast Manager W. S. Gray has been making short visits to near-by points the past few weeks, and reports Columbia dealers in very good spirits generally. He has just returned from San Jose, where conditions are especially favorable in view of the prospects for unusually heavy crops in the Santa Clara Valley, which suffered greatly last year from lack of moisture. Mr. Gray is devoting considerable attention now to preparations for the Columbia exhibit at the exposition. He has received preliminary plans for the display, which, if carried out, will undoubtedly make a splendid showing.

Medium-Priced Machines Popular.

F. Anglemier, local wholesale manager for the Columbia Graphophone Co., says country trade has kept up in fine shape the past month. Dealers in the Bay cities have also ordered quite freely, bringing up the totals for the month to a satisfactory figure. He notes a particularly strong demand for the \$75 and \$100 machines, and finds the demand for dance music on the increase.

Prominent New Columbia Agents.

W. S. Gray closed a deal with the Weil Furniture Co. at Modesto, Cal., recently to handle Columbia

goods in that district, and he considers the company in position to give the line very good representation. He says talking machines and furniture are being featured together quite extensively now with very good success. The Sonoma Valley Furniture Co. at Santa Rosa, Cal., took on the Columbia line also a short time ago.

Expansion in San Jose.

The Columbia department of the Madsen Furniture Store in San Jose, Cal., has been greatly improved. It has been given more floor space on the second floor of the establishment, and a manager has been appointed to devote his entire attention to that part of the business. He is A. L. Hascall, who has been connected with the business in another capacity for several years. He is a Columbia enthusiast, and has already inaugurated Thursday night concerts and other special features to get the people interested. Mr. Hascall was a recent visitor in San Francisco.

LECTURED ON "THE MESSIAH."

Great Oratorio Explained with Aid of Victrola by Rev. Henry R. Ross.

(Special to The Talking Machine World.)

NEW BEDFORD, MASS., April 8.—The Rev. Henry R. Rose, a prominent clergyman of this city, has been giving an interesting lecture on "The Messiah" before the leading clubs and organizations of New Bedford at which he uses the Victor Auxetophone in connection with a stereopticon to illustrate the lecture. His lecture has attracted the attention of the leading newspapers of this city who have commented on it at length, paying particular attention to the important part that the Auxetophone plays in the success of the lecture.

A salesman should never cease studying the possibilities of his goods. He should know them from start to finish; everything connected with their manufacture. In this manner he will gain knowledge and confidence in his line, and knowledge in any line is power.

PROCESS FOR ENLARGING AND REDUCING DISC RECORDS

The Invention of M. Georges LeRoy, Director of the Chemical Laboratories of the City of Rouen, France, Interestingly Described—Of Exceeding Importance to All Engaged in the Manufacture of Records—Technique of the Process Set Forth in Detail.

A new, original and ingenious process for enlarging or reducing the size of disc talking machine records, the invention of M. Georges LeRoy, director of the chemical laboratories of the city of Rouen, France, is described as follows by R. Arapu in a recent issue of the Scientific American:

Phonograph records, i. e., the traces made on wax discs or cylinders by the needle of a recording phonograph, can be enlarged or reduced by the following physico-chemical process, without the aid of the pantograph, by which such reproductions have hitherto been made exclusively. In the first place it should be observed that the new process is superior to the pantographic method because it excludes the employment of levers and other mechan-

attained the desired size it is made insoluble by immersion in a solution of formol, and is then molded in wax or plaster. From the wax or plaster mold is made a galvanoplastic copper matrix, or master record, with which the working records are stamped. The diameter of the soft gelatine disc can be tripled by immersion, and the enlargement can be increased indefinitely by repeating the process on gelatine copies of the enlarged plaster or copper matrices.

For reduction the copper plate made from the primary wax record is used to produce a copy in weak gelatine, containing 10 to 25 per cent. of dry gelatine, which is dehydrated by immersion in dilute alcohol, a solution of sodium sulphate or of

Rochelle salt, by exposure to a current of dry air, or by the action of a vacuum desiccator. The gelatine record, thus contracted and reduced, is copied successively in wax or plaster and in copper, in the manner described above. The diameter of the gelatine disc can be contracted to 60 per cent. of its original value, and the reduction can be continued indefinitely by contracting gelatine discs made from the reduced copper plates. In the accompanying photograph No. 2 represents an original record of 120 millimeters diameter, No. 1 a reduction to 80 millimeters, No. 3 an enlargement to 190 millimeters, and No. 4 a second enlargement to 340 millimeters.

How a Talking Machine Record May be Magnified or Reduced in Size

1. Shows a reduction to 80 millimeters diameter. 2. The original record of 120 millimeters. 3. An enlargement to 190 millimeters. 4. A second enlargement to 340 millimeters.

ical organs, which inevitably affect the record by means of their own vibrations and reactions. On the other hand, the record may be improved by employing the new process. In current practice, the primary wax record is made by means of sounds of exaggerated loudness in order to produce a strong impression, and injurious secondary vibrations are thus evoked and recorded. By the new process a record made with tones of moderate intensity, free from disturbing secondary vibrations, can be enlarged until it produces tones as loud as may be desired. Conversely, a record made with loud tones can be reduced, and thereby softened, in addition to being compressed into smaller compass.

Principle of the Process.—The enlargement is effected by the dilatation of molds of the primary record, made of material which is greatly dilated by prolonged immersion in appropriate solutions; for example, gelatine immersed in aqueous solutions, or vulcanized rubber immersed in carbon disulphide. Conversely, the reduction is effected by the contraction produced in similar molds by appropriate treatment, as by the desiccation of a mold composed of highly hydrated gelatine.

Technique of the Process.—From the primary wax record a copy is made in copper by galvanoplasty. For enlargement a mold of this copper record is made in a concentrated solution of gelatine, containing 30 to 50 per cent. of dry gelatine. The gelatine mold is immersed in cold or tepid water, pure or containing substances that promote the expansion of the gelatine. When the mold has

WHY THE SALESMAN WORRIES.

Often Forced to Use Quick Wit in Understanding Customers' Translation of Names.

Quick wit in selling a customer is exemplified by a salesman in California who was approached by an intelligent customer asking for a record called "Pork and Beans." After thinking a moment, without saying a word or expressing any surprise, the salesman asked his patron to be seated. Then as he went to rear of the store to get the record he bethought himself of which record it might be. In a flash it dawned upon his memory. "Ciribiribin—that's it," he said to himself. (Pronounced Cheer-ee-beer-ee-bee-an.) The name suggested the nickname, "Pork and Beans." Then he looked up the catalog number (1,825), put the record on the cylinder machine and played it. It filled the customer's expectations, and was sold. Then another record was asked for and sold, says the Edison Phonograph Monthly. Now that customer always asks for Mr. Schwartz because she gets intelligent service. The clerk is to be commended for his quick wit and for his acquaintance with the list.

SPECIAL LECTURE-CONCERT

Given by Mrs. Erwin Craighead in the Grafonola Parlors of the Smith Piano Co., Mobile, Ala., Attracts a Large and Fashionable Audience of Local Music Lovers.

(Special to The Talking Machine World.)

MOBILE, ALA., April 3.—During the past month the Smith Piano Co., one of this city's leading piano houses, has been conducting an energetic campaign on behalf of its talking machine department that has produced excellent results. This company handles the products of the Columbia Graphophone Co. in this department, and has been cultivating a clientele that would appreciate the musical worth of Columbia operatic and semi-classic records.

To properly introduce this class of music the company issued invitations to a select list of this city's music lovers inviting them to attend a special lecture-concert given by Mrs. Erwin Craighead in the company's Grafonola parlors. Mrs. Craighead's concert was a marked success, and the lecture she delivered on the musical beauties of Columbia records proved a treat.

To further increase the sales possibilities of its operatic record department, the company also sent out a four-page folder giving a few pocketbook arguments on the excellence of Columbia opera records. A feature of this circular was the listing of a number of the famous artists whose recordings for the Columbia Co. have met with emphatic success. These operatic and concert stars included Emmy Destinn, Olive Fremstad, Alessandro Bonci, Leo Slezak, Mary Garden and many others.

INTERESTING PRIZE CONTEST

Inaugurated by the Voice of the Victor for the Best Talk on the Victor.

An interesting prize contest in the nature of three original talks on Victor records was announced recently in the "Voice of the Victor," the house organ of the Victor Talking Machine Co. The first prize in this contest will be \$20, the second prize, \$15, and the third prize, \$10.

The contest is open to all Victor dealers and salesmen or saleswomen and was conceived so that the members of the selling staffs of the Victor dealers could exercise their knowledge of the Victor library in describing any chosen Victor record. There is no limit to the number of words that the competitor may use in this contest, but is suggested by those in charge of the contest that from two to three hundred words should prove sufficient for an excellent descriptive story. It is also suggested that the competitor assume that he is talking with a prospect and wished to present a particular record interestingly and informatively. The results of this contest will be announced in the May issue of the "Voice of the Victor."

SINGER HEARD 125 MILES.

Successful Test from Brussels to Paris of New Wireless Telephone.

An interesting experiment in wireless telephony was made between Brussels and the Eiffel Tower in Paris one night last week, when by a new microphone invented by Signor Marzi, an Italian engineer, a tenor singing at Laeken, a Brussels suburb, could be heard in the French capital.

The shrill notes were clear, but the words were indistinguishable. The distance is about 125 miles.

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

Gun Metal, \$2.00 list. Nickel Plated, \$2.50 list. Gold Plated, \$3.00 list.

May be adjusted to both Columbia and Victor disc machines. Order from any Columbia Distributor.

Three Edison Salesmen want jobs with you today

Tone, Variety and Mechanical Excellence are three Edison Salesmen that your customers can't get away from.

Edison Sweet Tone is *Head* Salesman—don't forget that. The others help but *Tone* makes the sale.

Then *Variety* steps in with *three* convincers—prices for every purse—*two* types of machines—eight distinct cabinet designs in Disc Phonographs alone.

Mechanical Excellence closes, and he's able to close on *any* feature—Blue Amberol Records, Diamond Reproducer, Diamond Disc or New Motor. Whether he signs them up for a \$250 Diamond Disc Cabinet or an Edison Gem at \$15 you'll say his is a snap job.

Put all three of these salesmen to work for you—*to-day*.

QUANTITY ORDERS FOR STANDARD BIG SELLERS

Should Be Placed by Dealers Who Desire to Keep Ahead of Record Demand, Says V. W. Moody in Discussing Record Situation—Reasons Why Many Dealers Have Not Sufficient Stock on Hand to Fill Substantial Percentage of Their Record Business.

In connection with the tremendous scarcity of Victor records at the present time, there is no doubt but that many Victor dealers have realized that the placing of their record orders must be in accord with current conditions, and instead of ordering two or three records of a number several times in the month they have placed one large single order, knowing that they can easily dispose of the shipments of this number as based on the factory output at the present time. Many other Victor dealers, on the other hand, have not given due consideration to this feature of their business, but have continued along as in former years, with the result that they have no stock to fill a substantial percentage of their record business.

To the latter dealers the recent remarks by V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, one of the best known Victor distributors in the country, should prove of particular advantage and interest.

"Many of our dealers are ordering records to-day along the same lines as they did a year or even six months ago," said Mr. Moody. "They are ordering the exact same quantities, and in accordance with their methods of some time since, are placing orders for one of a certain selection, regardless of how good it may be. They are even ordering the same selection eight or ten times a month, just as they have in the past. But to-day, on account of the tremendous record shortage, the dealer who is doing any considerable amount of business is working at a serious disadvantage and is badly handicapping himself by ordering in that way.

"Last week we received an order from a dealer who is selling over \$30,000 worth a year. His order covered three closely written pages and totaled about 350 records. He had ordered certain records in quantities of one to five apiece, according to the record's popularity. Realizing the situation in the record field, we had our representative make a special trip to this dealer in order that he might explain the status of the Victor record business to him and impress upon the dealer the necessity of ordering along the proper lines, emphasizing the following points:

"Because of the extreme record shortage the majority of Victor distributors are out of the same selections and, due to this fact, each distributor is receiving requests from numerous dealers who ordinarily would have called on some other distributor to fill their orders. This means that when

the distributor receives a quantity of a popular record, sufficient ordinarily to last him about ninety days, they are disposed of within a few hours, because of the multiplied dealers' requests and the fact that all dealers are in need of that particular number.

"To a large extent we anticipated tremendous record sales this spring, and in December and January ordered accordingly, and these orders are being shipped by the Victor Co. in small quantities almost daily. We have received as high as 2,000 of a single dance number, which, by the way, was issued last year, and disposed of them all within less than twenty-four hours, whereas the sales of this same number last year averaged about 300 a month with us. This particular lot of records was received on Tuesday at 2 p. m. In other words, this means that the dealers' orders for this number that were received on Monday and up to noon Tuesday were *not* filled. The entire lot was sent out by noon on Wednesday and therefore, even had the dealer followed out a system of ordering small quantities three times a week he would not have received any of this particular number. Moreover, we had had none of this number in stock for more than a month previous and have received none since.

"In view of the foregoing the absolute necessity of ordering large quantities of the standard big sellers is apparent, and the necessity of 'back-ordering' these numbers is even more obvious. By back-ordering we mean the placing of a general order for records with instructions to ship such numbers as are in stock at that time and transferring the unfilled portion to be shipped as rapidly as deliveries from the factory will enable the distributor to make shipments to the dealers in sufficient quantities to justify transportation charges.

"Our Mr. Doty was the representative who made the special trip to the dealer referred to above, and the morning following his visit we received this dealer's revised order, which was condensed to a single sheet instead of three, and totals 3,465 records instead of the 327 records on the original order. Since that date we have shipped this dealer large quantities of such popular numbers as 17,222, 17,231, 17,311, 35,295, 35,304, 35,346, 64,311 and 64,343, and we shipped enough of these records to last him several months."

Here Mr. Moody remarked to the representative of The World, "As you continue on your rounds suppose you just ask the dealers and distributors that you call on what the condition of their stock

is on these numbers and the service we are rendering this dealer will be fully appreciated.

"Just think of the amount of work that the dealer incurs in ordering the same numbers over and over again, where he might better order the numbers once, lay aside his empty envelopes, mark them 'ordered' and forget them until the distributor receives factory shipments which will fill up the holes in the dealer's stocks. Few dealers realize that distributors are receiving twice as many records from the factory as ever before. This fact is overlooked because the distributor is out of so many numbers. Many dealers are complaining because of the 'horrible condition that exists,' but it is not difficult to make most of them smile by inducing them to admit that they are doing the biggest business they have ever closed, and asking them what it is they are selling if they are not receiving more stock than ever before.

"The Victor Co. is not to be blamed, neither is the distributor, nor is the dealer, but it is the public who is to be most severely criticised. It seems impossible to satisfy the public. It is the consumer who loudest of all is shouting 'records, records, records and more records,' and I wonder if the dealers or distributors or the Victor Co. would be pleased to hear them stop shouting just that very thing. I know that I would not."

NOVEL PLAN OF WINNING BUSINESS.

Louis Gilman, Eastern representative of the Philadelphia Press, tells Printers' Ink how he obtained some Edison business for his paper by means of a phonograph record sent by parcel post to the advertising department of Thomas A. Edison, Inc., Orange, N. J.

Mr. Gilman explains that for the day on which the Edison business was to be placed he had an engagement with a client in Pittsburgh. As he couldn't be in both places, Mr. Gilman dictated a solicitation to his machine and sent the record to L. C. McChesney, advertising manager of Thomas A. Edison, Inc.

The Press secured some of the Edison business and the "canned" solicitation is credited with having obtained it.

HAS WON HOST OF ADMIRERS.

Admirers of Lucretia Bori, the remarkably clever soprano of the Metropolitan Opera House, and they are legion, will be delighted with her latest Edison records. She is represented by three double records in the disc line and one in the Blue Amberola catalog. Miss Bori has scored a phenomenal success during the opera season now coming to a close.

When a man gets old enough to take advice and wise enough not to give it, he isn't on earth to profit by either.

The DITSON Pledge

Is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind, not to mention cabinets, needles and trade-marked accessories.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

OLIVER DITSON CO., Boston, Mass.

Much of the success of Columbia opera recording is due to the personal interest of Mr. Henry Russell, director of the Boston Opera Company.

CREDITORS TAKE CHARGE OF BUSINESS OF J. ARNOLD

Take Step to Protect Their Own Interests Following Financial Difficulties of Cincinnati Talking Machine Dealer—Ill-Health Largely Responsible—General Trade in Cincinnati Very Good—Record Sales Heavy—What the Various "Talker" Houses Have to Report.

(Special to The Talking Machine World.)

CINCINNATI, O., April 7.—During the past week creditors of John Arnold, talking machine dealer at Fifth and Elm streets, took charge of their stock and in that manner closed out the business of this dealer. The action is the outcome of a series of misfortunes which have befallen Arnold, and it probably leaves him penniless, without even his homestead exemption.

Arnold has been laboring under difficulties for months. Illness at his home, then located in Hyde Park, took up a greater part of his capital. Besides looking after his business, Arnold tried to nurse his wife back to health. The two conditions resulted in his becoming a nervous wreck, and he was compelled to leave his affairs in the hands of an employe at his store. Developments show that Arnold did not make the necessary arrangements to protect his affairs. No instructions were given to any of his friends, and it is intimated that not even the creditors knew of what was transpiring.

After Arnold left town suit was brought to foreclose on a mortgage on his home. He placed this matter in the hands of an attorney but did not confide anything about his business. Notes which were due the latter part of last month could not be taken up, and it is asserted that those who made an investigation found that no books were kept nor a bank account existed during the absence of Arnold. The Kipp-Link Co., of Indianapolis; the Phonograph Co., Cleveland, and the Rudolph Wurlitzer Co., this city, were the principal creditors. The amount of their losses could not be learned. The firms simply stepped in and closed out the business. One business man intimated that failure on the part of Arnold to establish a more confidential relation with the houses that he did business with brought about the drastic steps. The difficulties of Arnold were intimated in this column several months ago. Arnold is now at Denver trying to recover his health. So far as is known, he has not taken any steps towards a future career. He is still a young man.

While the individual reports would indicate an exceptional business yet, in a general way, the trade suffers from the general condition of the labor market. There have been a few repossessions. The smaller houses are holding their own. The large firms are bothered with a shortage of records, which has proven a serious handicap to the trade at a time it needs the most encouragement.

One of the features of the local market during the past month was a monthly display at the Columbia store favoring the \$35 Grafonola. Small cuts, showing a reproduction of the instrument, were pasted on the window, forming a border. The case contained several "Jewels" and a bunch of records. It was a neat combination and an attractive talking machine display.

When Manager Whelen, of the local Columbia store, was asked the usual stereotyped question,

"How is business?" he said: "The sale of records seems to have been the principal feature of our business this past month. I personally believe that this wonderful stimulus is due to the dancing craze, and the craze becomes more pronounced each week. Perhaps one-half of the records sold are dance records, and when you consider that the demand for the other class of records has not diminished; in fact, has increased, you can get some idea of just how good this end of the business is. Never in the history of the Cincinnati store has the demand been so great, and I tell you it kept us humping some checking in shipments to keep our racks even partly up to date. This wonderful record business also stimulates the machine business and on a whole March was a record breaking month. If we had had twice as much room and double the number of booths there were many times every day when we could hardly handle the trade. It looks like a case of 'everybody's doing it.'" Mr. Whelen concluded by saying: "We get similar reports from all over the territory, and during the last month we have opened up some very attractive accounts and added many new names to our list of dealers."

Mr. Brown, the assistant manager of the local Columbia store, who has been specializing on the school proposition, says that he is more than satisfied with increase in the school sales and has closed quite a few competitive trials, winning out in every case on the merits of the Columbia instruments for school purposes.

One month has passed at the Rudolph Wurlitzer Co. without carpenters and other members of the building fraternity pounding away making changes in the talking machine department. Manager Dittrich has summarized the situation in the following interesting manner:

"The month of March was very good in spite of the bad weather conditions, but as the conditions this year are so infinitely better than last year there is absolutely no complaint to make in that respect. Last year at this time the Ohio Valley was under water and many dealers were absolutely ruined financially. To-day these dealers have prosperous stores, and are enjoying a greater volume of business than they have ever had before. Reports from throughout our territory indicate that the Victrola business is in splendid condition, although the shortage of records has caused some loss of trade. However, the retail consumers have taken very kindly to the dealers' explanation as to the cause of the shortage, and it has impressed every one with the vast growth of the Victrola business and the tremendous future which is in store. The shortage has accomplished one thing, and that is it has proven to the dealer that there are other records besides the selected list which are known as the best sellers. In that way it has proven a vast benefit to the talking machine trade at large." Victor business picked up with a rush at Aeolian Hall during the past

two weeks, the most gratifying feature being the large sale of the most expensive styles and the amount of cash taken in. In fact, the percentage of cash sales during the month was about the largest on record.

A very large increase of business is looked for immediately following Easter, when the dancing season, interrupted by Lent, will be resumed.

A great deal of special sales effort was put forth at Aeolian Hall the past few weeks. The Victor department is unquestionably at its highest point of efficiency right now. The company is undoubtedly making good on its "Aeolian Victor Service," which is so much advertised.

Aeolian Victor advertising has not slackened one iota because of ante-Lenten dulness. On the contrary, the store has used more newspaper space on the Victrola and Victor records than ever before and results have been perfectly satisfactory.

TAKE ON EDISON DISC LINE.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., April 6.—Clark Wise & Co. have added the Edison disc line and are featuring it quite extensively as well as Victor and Columbia goods. Mr. Wise says business has kept up better in the talking machine department since the first of the year than pianos.

J. T. Bowers & Son, who took the agency for the Edison disc line a short time ago, are now pretty well stocked. Heretofore they had confined their attention to pianos, but F. T. Bowers is very well pleased with the interest shown in the new department. He made a pleasure trip to Honolulu the past month, accompanied by his wife and an Eastern piano manufacturer and his wife.

If the whale were a more persistent advertiser he wouldn't get in so bad. As it is, he comes up to blow about himself, and gets the harpoon.

Write today for our new catalogue giving you rock bottom prices of our specialties.

NEW YORK, APRIL 15, 1914

A YEAR ago a great section of the Middle West was just recovering from one of the worst floods ever experienced in this country. The receding waters had left wreck and ruin behind. Scores of towns suffered losses of life as well as staggering property losses, and many business houses were placed in a very serious position by reason of the staggering losses endured.

In fact, it was a very serious condition, and many, in viewing the flood-swept districts, figured that business would suffer in those localities for years to come; but such is the recuperative powers of Americans that in the very sections where business interests seemed to have been most seriously affected trade has been particularly brisk, and it serves to illustrate that Americans lose no time in bemoaning what they have lost.

There is no use in losing time in bewailing past conditions and business losses, because "the mills will never grind with water that is passed." It is the active present and ambitious future which interests the men of to-day.

And sometimes adversity brings out the best that is in a man.

Some of our great business leaders all graduated from the University of Hard Knocks, and while they received some good heavy blows, they were not of the down-and-out class. They possessed courage and were resourceful.

Many a man has been developed by reverses. His best qualities probably would not have been brought out under ordinary conditions.

It, however, is to be hoped that the courage of the men in the flood-devastated districts of 1913 may not be put to the test in a similar manner for at least a long time to come.

THE talking machine men are getting to understand more and more the benefit of advertising. Surely they have the best kind of examples constantly before them in the publicity campaigns carried on by the great manufacturers.

Advertising has made the talking machine business, and there is no question that if the great national campaigns were abandoned in six months business would slump very materially, notwithstanding the tremendous impetus which it now has. The directors of the great enterprises fully understand the advantage of this, and the dealers themselves, even in the smaller districts, are waking up to the fact that they must do their share in the great campaign. They are putting out advertising, some of which is most attractive.

THE advertising field is constantly changing. Years ago advertising smacked of dishonesty—of misrepresentation; in fact, much of the public exploitation was simply to lure people into the stores and strip them of their money after they had arrived.

To-day, however, the successful business man tells the truth in his advertising, else he is not successful.

If a man tells an untruth in advertising he is quickly found out.

In New York there has been a lot of dealers in various lines who have misrepresented in their advertising, and some of the daily papers have refused to carry the announcements of such concerns, knowing that they misrepresented.

How a man must feel to be turned down by a newspaper because he has gained the reputation of being a dishonest advertiser!

So far as talking machines are concerned, a man is advertising a single product, and one that has individual advertising powers. It talks for itself, to use the colloquial saying; but there are so many attractive ways to put forth advertising matter, so that it is pleasing to observe that the dealers themselves are advancing along lines of public exploitation.

WE are in constant receipt of communications from readers of The Talking Machine World in every part of the universe expressing their admiration and approval of the policy of this paper, and its power as a constructive force in the industry.

It certainly is very pleasing to note the approbation of a widespread clientele of readers, and it shows that our policy has been appreciated and has received the stamp of universal approval.

We have always contended that a trade paper must be constructive in its work, else its true functions would be lost. That The World is a splendid advertising medium is generally conceded.

We have received letters from advertisers commending the business building powers of this publication, and below is one received recently from the New York Talking Machine Co., 81 Chambers street, New York, large and important Victor distributors:

"We wish to express our entire satisfaction with the service rendered us by you in the last issue of The Talking Machine World advertising our record cabinets. We have received many nice responses and a number of orders for cabinets and envelopes, together with a large number of inquiries from good, substantial dealers who read the advertisement.

"Kindly accept our compliments on the pulling power of your organ. It is not alone a good advertising medium, but, in our opinion, a good, live root of the talking machine industry."

That communication shows what a power The World is to the jobbers, and yet there are but few jobbers out of the entire list who avail themselves of the splendid opportunities which The World presents for the exploitation of their wares.

Every talking machine jobber in this country should be represented in every issue of The Talking Machine World.

It is the only publication which thoroughly and completely reaches the small dealers as well as the large ones. It is working for them day and night. It not merely aids the dealers, but makes suggestions to them along advanced lines, so that it is a constructive power of virility and strength.

Now it would seem as a natural sequence that the jobbers themselves should appreciate, as a whole, the advantage of such a publication, and not permit a few men to monopolize the business opportunities offered by the paper.

If the talking machine jobbers of America desire such a paper as The Talking Machine World—and they all admit its strength—then the next question that logically comes up is why should they not patronize its columns to a greater extent?

WE are desirous that The World shall be close to its readers everywhere, and we shall be pleased to receive at any time either criticism or comment from our readers, no matter where located.

If there are any paths which we can make smoother by suggestions we shall be pleased to do so. In other words, The World is the forum of the trade, and all are invited to enter as close as they like into a discussion of matters of interest and business importance.

The closer a trade paper comes to its constituency the more aid it can be to them, provided it is fairly conducted, and unless it performs a useful mission it is missing its opportunity, and we do not care to miss any opportunities which may come to us in any particular way to serve our constituency in a better manner.

THERE is no part of America, so far as we are able to learn, where the dance craze has not appeared, and talking machine dealers are asking if the abnormally large demand for dance records is to continue.

Why should it not?

Old men and women have joined the youthful army of dancers, and the talking machine is used by teachers of the art all over this country.

The tango mania has certainly created new business, not only for dance records but for the machine themselves, because a new profession has sprung up and dancing teachers now have regular studios where machines are installed and are almost swamped with people who are anxious to be taught the art.

Here is a new and astonishing field developing, and it does not look as if it would be temporary.

Talking machine dealers write us that it is difficult to keep up with the demand for dance records, and the factories are rushed to the utmost, and they cannot keep up with the orders that the new tango mania has brought about.

In thousands of homes where the talking machine was only used at intervals, to-day it is being used daily and nightly to

produce music for an ever increasing army of family dancers.

It certainly has developed the demand not only for records, but for machines in every part of the land.

IN the January issue of The World a remarkable offer was made of a \$250 outfit by the Columbia Graphophone Co. to The World reader who would suggest the best method by which closer and more profitable relations might be enjoyed with talking machine customers. This offer resulted in bringing in hundreds of communications embodying suggestions from every part of the country.

This Columbia move is along the lines of business uplift which is decidedly commendable. It means that on the part of the Columbia Co. there is a definite effort to get in closer touch with their dealers, seeking to get from them an expression of opinion as to how their interests could be served in a manner which would result in more profitable business.

The reward offered was simply made with the purpose of drawing out opinions from the men who are on the firing-line, and for opening up ideas which might help in a general distributive plan.

It may be said that many valuable suggestions have been received and while it is not possible to put them all into practice, yet many of them are being put into use so far as practicable.

The advantage of this kind of work will be seen when we understand that this offer did not apply exclusively to Columbia dealers, but to everyone in the talking machine trade.

There is no reason why we should follow out certain business plans simply because they may have been in use for a number of years. The whole world is changing and men change their business organizations to conform with this change.

The talking machine industry is young. It has much to learn and an interchange of ideas is bound to bring out some thought along advanced lines which will be for the benefit of all.

GIVE DANCING EXHIBITION.

Illustration of Latest Dances in Recital Hall of Fulton Music Co. Store, at Waterbury Conn., Attracts Much Favorable Attention—Victrola and Edison Disc Phonograph Featured.

(Special to The Talking Machine World.)

WATERBURY, CONN., April 4.—The Fulton Music Co., the prominent piano and talking machine house of this city, which recently occupied its handsome new building at 158-162 Grand street, created a distinct sensation late last month by arranging for the appearance of Miss Lesley L. Hyndes and her partner, Elton Goldsmith, in a complete repertoire of the latest dances.

The dancing exhibition took place in the recital hall of the Fulton Music Co.'s building on Saturday afternoon and the dance music was furnished by a Victrola and an Edison disc machine phonograph. An impromptu concert filled in the intermissions between the dances and afforded an opportunity for the featuring of the latest records. Admission was free to the public, and as a result the recital hall was crowded to capacity by an audience of over three hundred people.

During the course of the afternoon Miss Grace

Gaylord, of Waterbury, and Kendrick Brown illustrated some of the latest society dances.

So successful was the first dancing exhibition that the Fulton Music Co. was compelled to repeat the feature the following Saturday for the benefit of those who were unable to attend the first performance, and the effect of the novelty upon the sale of dance records was immediately apparent.

BACK TO THE SOIL FOR MUSIC.

South Carolina Paper Claims That by Producing Denatured Alcohol from Potatoes and Farm Waste the Farmer Really Makes Talking Machines Possible.

Everything comes to the farmer these days. Even the new dances promise to pay him tribute. The popularity of these dances has created enormous demand for phonograph records of dance music. Now phonograph records are made out of a composition into which denatured alcohol largely enters, and the demand for it is causing manufacturers to look around for new sources of supply. This according to the Charlotte, N. C. Observer, means new locations for factories. But denatured alcohol is strictly a farm product, be-

ing made from potatoes and farm waste. And so it comes to pass that the farmers exert themselves to produce a larger supply of some of the ingredients of denatured alcohol, in order that more phonograph records may be manufactured, in order that more people may have music to which they may dance the new dances—which many a farmer holds to be an abomination.

HELPFUL IDEAS FOLLOW EACH OTHER

The results obtained by Victor dealers from the distribution of the lithographed folders entitled "Will you open your door" and "Will there be a Victrola in your home this Christmas," were so highly satisfactory that the Victor Co. has just issued a third lithographed folder named "After dinner introduce your guests to," the inside double page showing a beautiful scene in many colors wherein a Victrola XVI is the center of attraction in the drawing room of a fashionable home while a distinguished party of guests is present. This is the same drawing which has been reproduced by the company for use in national advertising. This folder forms a valuable addition to the comprehensive line of Victor folders already issued.

BIG BOOST GIVEN THE TALKING MACHINE BUSINESS

By the Southern Indiana Teachers' Association in Indianapolis—Acknowledge Its Educational Value in the School Room—E. L. Lennox Piano Co. Takes on Edison Disc Line—Stewart Co.'s Great Victor Business—Columbia Activities—Other Items of Interest.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., April 8.—Talking machine men of the Hoosier capital are still rejoicing over the boost given the talking machine business by the Southern Indiana Teachers' Association at its annual convention here, when it went on record as favoring talking machines and player-pianos.

Use of the talking machine in bringing direct to the schoolroom the voices of the master singers of the world was advocated. Men who have made a life-long study of bringing learning to the pupil in the most direct manner asserted before the convention that the talking machine is a modern step in the education of the young of Indiana.

Talking machines are being used in the schools all over the State, both for the purpose of entertainment and for the purpose of studying the voices of the great singers.

Walter E. Kipp, president of the Kipp-Link Phonograph Co., jobbers for the Edison machines, has won over E. L. Lennox, of the E. L. Lennox Piano Co., 311 North Pennsylvania street. Mr. Lennox is the first downtown piano dealer to put in a line of the new Edison disc machines. Praise for the new Edison disc has been heard often in the Lennox showrooms in the last week.

The E. L. Lennox Piano Co. occupies artistic quarters in the Meridian Life building just opposite University Park, and Mr. Kipp is happy over the acquisition of the Lennox store as one of the downtown depots for the new Edison disc machine. Mr. Kipp says he is making arrangements to have two or three other downtown houses put in the Edison disc line of talking machines.

W. S. Barringer, of the Stewart Talking Machine Co., distributors of Victor machines, says the line of orders waiting to be filled are so far ahead of the stock that everybody around the Stewart house is afraid to look back. It's the same old story with the Stewart Co.—it's got that Oliver Twist appetite for talking machines and records.

Morley Somers, of the Victor Talking Machine Co., is working in Indiana for a few weeks.

Business conditions with the Columbia Graphophone Co.'s local store at 27 North Pennsylvania street, are also way beyond "par," according to A. W. Roos, manager. Business so far this year has been about three times as good as it was in the same period of last year, Mr. Roos says.

Morris Stegner, in charge of the wholesale department of the Stewart Talking Machine Co., recently made an extended trip through the South.

Mrs. Agnes Kimball-Affleck, formerly of Indianapolis, who has made a number of records for

COLUMBIA GRAND AIDS AT BANQUET.

Affords Pleasing Entertainment at Banquet of Department Heads of Butler Bros. to Their Manager—Diners Express Appreciation.

"I wish to thank you personally for the use of this beautiful instrument which did a great deal toward making the evening a complete success. It fitted in very beautifully with the evening's entertainment and was appreciated by every one present."

That's what Daniel D. Osttost said to R. R. Souders, who had lent a Columbia "Grand" to help along the festivities at a recent banquet given by the department heads of Butler Bros., in Dallas, Tex., to A. M. Mason, their manager, who recently returned from a European trip.

AGAIN IN HARNESS.

Chester Beekman, of the traveling staff of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, resumed his work on Wednesday of last week, after a month's absence from his territory pending his convalescence from an operation for appendicitis. Mr. Beekman was given a hearty welcome.

the Victor Co., sang in public for the first time since she was married last December, when she appeared Tuesday night, March 31, in Aeolian Hall here.

Many were unable to see the singer, since their seats were on the stairways and the floors above and below the concert hall. It was a genuine "over-flow" meeting. B. F. Traub played the concert numbers for the instruments and the accompaniments for the singer. Mrs. Affleck's pure, clear soprano voice was at its best as she sang "Belletella," from "Il Pagliacci." For her second group of songs Mrs. Affleck selected "Down in the Forest," the "Mattinata," by Leoncavallo, and lastly, another ballad by Ronald, composer of "Down in the Forest."

The management of the Aeolian Co.'s local store here has asked Mrs. Affleck to appear at an invitational concert in one of the city's larger auditoriums, that all of her friends may have the opportunity to attend.

ENTHUSIASTIC VICTOR YOUNGSTER.

(Special to The Talking Machine World.)

HARRISBURG, PA., April 9.—O. F. Baker, energetic Victor dealer in this city, numbers among his best patrons one of the youngest Victrola enthusiasts in this section of the State and probably in the country. His name is Harvey Beaumont, and although he is but fourteen years of age, he is the personal owner of a Victrola and an extensive library of Victor records, including quite a number of Red Seal selections. The machine and records have all been purchased from his own savings, and Harvey makes several trips a month to Mr. Baker's store to keep in touch with the latest developments in the Victor record library. His enthusiasm in the Victrola is unbounded, and, moreover, he is a real music lover.

TO MAKE AND SELL PHONOGRAPHS.

The Cumberland Royal Phonograph Co., Portland, Me., has been incorporated with capital stock of \$250,000 for the purpose of manufacturing and dealing in phonographs, records, etc. The officers of the new company are: T. A. Sanders, president, and R. A. Worth, treasurer.

BREAKING EVEN—A DIABOLICAL REVENGE.

R. L. Goldberg in the New York Evening Mail. (Copyrighted.)

Cartoonist's Idea of How to Get Square With the Man Who Always Starts His Talking Machine as Soon as You Get in the House.

H. B. RAY NEW ADVERTISING CHIEF.

Of the Columbia Graphophone Co.—Experienced in This Field, Having Been Assistant Advertising Manager of the Company for the Past Three Years—Has Assumed Duties.

Herbert B. Ray has just been appointed advertising manager of the Columbia Graphophone Co., New York, succeeding George P. Metzger, who has become a partner in the Hanff-Metzger Co.,

Herbert B. Ray.

New York, a very successful advertising agency. Mr. Ray has assumed his new duties.

Herbert B. Ray has been assistant advertising manager of the Columbia Graphophone Co. for

the past few years, and his promotion to the management of the advertising department is in line with the policy of the Columbia Graphophone Co. to promote men from their own forces to the most responsible positions in all departments. Mr. Ray filled the position of assistant advertising manager with signal ability and success, and his intimate familiarity with all the details incidental to the Columbia Co.'s country-wide advertising insures his achieving a gratifying success in his new and important post. As advertising manager of the Columbia Graphophone Co. Mr. Ray occupies one of the most responsible positions in the company, as the advertising appropriation of the Columbia Co. has steadily increased each year until it now totals an immense sum that is being distributed to the best possible advantage of Columbia dealers throughout the country.

Mr. Ray has been connected with the Columbia Co. for the past fifteen years, occupying various positions of responsibility. Most of this time was spent at the factories in Bridgeport, Conn., where he secured a detailed practical knowledge that he has found invaluable in the preparation of result producing advertising matter.

J. G. BREMNER TO SUPPORT BILL.

J. G. Bremner, president of the Eastern Talking Machine Dealers' Association, is one of those representing trade organizations who will appear before the Interstate and Foreign Commerce Committee at Washington for the purpose of supporting the Stevens Bill (H. R. 13,305), which, among other features, is aimed to prohibit price cutting.

Any new business idea that offers to help a man get more profit out of his business is hailed with welcome—mixed with suspicion of the motives of the man offering it.

NEW COMPANY IN CLEVELAND.

Incorporation of the Grafonola Co. of That City Marks Success of C. A. Routh in the Talking Machine Field—Store Handsome and Well Located in City's Best Business District.

(Special to The Talking Machine World.)

CLEVELAND, O., April 6.—The incorporation of the Grafonola Co. is a good example of a youth starting with ambition and vigor and working up from the lower ranks to be president and manager of a company. C. A. Routh started as a boy working for the Starr Piano Co., of Richmond, Ind., learning action regulating, etc. He left the factory work and engaged in the sales department, and was considered one of the foremost salesmen in the piano line. At that time piano men generally could not see anything in the talking machine business, and Mr. Routh's associates were very much surprised at his going into it. He, however, looked ahead and is now reaping the benefits of his foresight. Mr. Routh had been with the Columbia Co. for some time as assistant manager, and when the company decided to close out its retail business in Cleveland, in his own words, he "immediately saw a great light," and laid his plans accordingly to get control of the old location; the result is that the Grafonola Co. was incorporated, with C. A. Routh, president and manager, and F. S. Federman, secretary and treasurer, with a capitalization of \$15,000.

The Grafonola Co. is handling Columbia goods exclusively, and carries a complete stock of machines, records and accessories. The store is centrally located in the business heart of the city, and is considered the largest retail talking machine store in Cleveland. During Mr. Routh's long association with the Columbia Co. he has made a host of acquaintances and friends, all of whom he will retain and make many more.

GIVES ELABORATE RECITAL.

Fred H. Ponty Features Victrola and Edison Disc Machines and Other Instruments in His Line at Elaborate Affair Held in His Recently Opened Store in Port Chester, N. Y.

(Special to The Talking Machine World.)

PORT CHESTER, N. Y., April 7.—Fred H. Ponty, the well-known piano and talking machine dealer of this city, attracted much attention to his business last week through the medium of an elaborate musicale, at which a number of prominent artists from New York appeared. The lengthy program consisted of piano and violin solos, vocal selections and grand opera gems by famous stars through the medium of the Victrola and the Edison disc phonograph. The musicale was given in the afternoon and repeated in the evening, and on both occasions the recital parlor in the store was crowded by a select and appreciative gathering of local music lovers.

From the interest displayed in the music furnished by the Victor and Edison machines, the musicale will result in a number of profitable sales.

BENJ. SWITKY IN BERMUDA.

Prominent Distributor Visiting Talking Machine Man's Haven of Rest.

Benj. Switky, the prominent Victor distributor of 9 West Twenty-third street, New York, accompanied by Mrs. Switky and their two children, sailed for Bermuda on Wednesday, April 1, for a vacation of several weeks. In view of the number of members of the local trade who have visited Bermuda during the past couple of months it would appear that the name of the resort should be changed to "The Talking Machine Man's Haven of Rest."

"LIVE" DISPLAY OF DANCE RECORDS.

(Special to The Talking Machine World.)

NEW ORLEANS, LA., April 9.—The Victrola department of Philip Werlein, Ltd, the large piano house in this city, is still being congratulated on a novel idea which it introduced a short while since in connection with the craze for dance music. The many dance records in the Victor record library suitable for all the latest dances furnished the firm with material for an unusually clever stunt which took the shape of a personal demonstration of the adaptability of Victor music to the proper performing of the latest dances.

A show window measuring 9x12 feet was decorated elaborately to give the impression of a fashionable ballroom, and in this space a well-dressed couple, masked, danced all the new dances to the music of a Victrola. Cards were displayed announcing each dance, and the grace and skill of the couple as they danced to the strains of Victor records formed a topic of general discussion that was both sales productive for the Werlein Victor department and the best kind of advertising.

GIVING MACHINES DOUBLE VALUE.

Success of the Union Devices Testifies to Their Value—Factory of the Union Specialty and Plating Co. Very Busy.

Columbia Graphophone Company
Woolworth Building, New York

T. H. E. PUBLIC, ESQ., THE GENTLEMAN FROM MISSOURI.

Prospective Purchasers of To-day Demand Lucid and Reasonable Explanations from Merchants in Place of the Old-Style Meaningless Generalities Regarding Products to be Bought—Something of the "Department of Detail" for Talking Machine Stores.

The age of lavish explanations has arrived, Mr. Dealer, and in order that you may retain the patronage of the supercurious, you must expound your trade gospel exhaustively as well as entertainingly. You must also develop your Department of Detail to a state of high efficiency. The times demand these things from you.

To-day, in order that a talking machine salesman may take his place in the proficiency class, he must be a veritable encyclopedia of phonographic lore. He must be able to speak the 'ola language as fluently and exactly as a college professor emits Tschechisch or Croatian. Summing up concisely, he must know it all.

Every establishment where talkers are dispensed should pay particular heed to the development of its Department of Detail. Never before was attention to the smaller things of such vital importance. This situation has been brought to light largely through the medium of various worthy sundries which, when attached to the talking machine, add to its musical excellence. I have found in my tramps along the trade trail that this subject of detail is not given the care it deserves. I have visited a half dozen talker shops in Brooklyn, New York City and Philadelphia within the past few weeks where the matter of sundries was a dead issue. Does not this illustrate my point that the detail end of the talking machine business is being neglected?

Such a state of affairs is a menace to trade for this reason: When T. H. E. Public, Esq., reads in a popular magazine an attractively displayed advertisement regarding an article that promises to make his Musicola more melodious at the modest outlay of a dollar or two, he determines to investigate. He calls forthwith upon John Jones, proprietor of The Graph & Phone Co., Inc., and asks for the article he has seen advertised. He goes further than that; he demands a demonstration, and he desires it in a hurry. Then, by way of making his remarks emphatic and acquainting Mr. Jones with his identity, he shouts that he is from Missouri. To his supreme disgust, he finds that not only has Jones neglected to put the attachment he is interested in in stock, but has never heard of it. He departs amid vituperative fireworks, and his opinions regarding The Graph & Phone Co., Inc., are not publishable.

It seems to the writer that the best and easiest way to overcome this difficulty would be to peruse more carefully the pages of your trade journal. If you made it a rule, Mr. Dealer, to pass The Talking Machine World among your employes when you were through with it, and made it clear that you desired it read carefully, good results could not but accrue. The salesman who makes a practice of becoming thoroughly familiar with the contents of such a publication monthly will find himself in a position to answer any question put to him lucidly and to the point.

One dealer of my acquaintance keeps a tabulated list of sundries on hand for the use of his salesmen. His stenographer has charge of this work, and as The World arrives she looks it over and adds to her list whatever invention of moment has come to life during the month. She simply writes down the name of the article, together with the volume and month of the magazine in which it was advertised or described. Carbon copies of this typewritten list are posted in conspicuous place throughout the store.

A few items from one of the pages of this sundry list follows:

LIST OF TALKING MACHINE SUNDRIES FOR USE OF SALES FORCE.

As the trade journal subscribed to by this dealer is carefully filed, it is easy for the salesman to ar-

He Demands a Demonstration.

rive at the desired information at a moment's notice. By adopting this method, Mr. Dealer, it is practically impossible for a patron to go away from your store without having learned all about talking machines and their accessories.

Another page in the salesman's book of knowledge that is seldom read is the one which deals with the care of the "talker." Most chaps are so saturated with the mania for making sales that they do not give a thought to anything beyond the disposal of the outfit. The dealer of sundry list renown has a repair catalog for the various makes of machines. This, too, is displayed at different points in the store where the eyes of the salesman can reach it, and by consulting it he is very often enabled to prescribe successfully. Of course, where the condition of the patient is such that an operation is necessary, the services of the surgeon from the Department of Restoration are

required. Where a dose of oil, graphite, etc., administered in just the correct proportions, is sufficient to renew activity, the repair catalog is invaluable.

A salesman can sell goods much more intelligently if he has seen them in the making. This being true, would it not be advantageous to manufacturer and merchant alike if some arrangement was arrived at whereby salesmen were given access to the factories and laboratories of the builders of talking machines and the entire process of production witnessed and described? Henry Ford, of profit-sharing fame, has adopted this method of educating not only the folks who are interested in his car as a business proposition, but T. H. E. Public, Esq., as well. He even goes so far as to include a moving picture show in the course of instruction.

What will work out successfully in the world of automobiles should apply to the talker fraternity also, and it would aid him very materially, I am sure, if every young man who derives a livelihood from the sale of talking machines could pay a visit to the producing plant in order that he might become enlightened as to the practical side of their creation.

Do not take my word for it that the matter of a comprehensive knowledge of talking machine manufacture is non-existent in the mind of the average salesman. Take your star sales expert aside and ask him about it. Methinks I hear the echo of his answer: "I'm sellin' goods, not makin' 'em. 'Isch ga bibble!"

HOWARD TAYLOR MIDDLETON.

ANNUAL DINNER OF DEALERS.

Eastern Talking Machine Dealers' Association Making Elaborate Plans for Annual Gathering on May 6—Meeting to Be Held a Week Later to Elect Officers and Hear Reports.

The annual dinner of the Eastern Talking Machine Dealers' Association will be held on May 6, according to plans announced following a meeting of the Executive Committee of the association held at Keen's Chop House on April 6. The place for the dinner has not yet been selected.

John G. Bremner, president of the association, announces that the program for the dinner will be particularly interesting, and a number of speakers of note, including at least one man of national importance and prominence, will be present.

The annual meeting of the association, for the election of officers and for the transaction of other regular business, will be held on the week following the dinner in order to avoid the confusion that would arise by having the dinner and meeting on the same evening.

If Terpsichore were to return to earth and watch a tango tea some evening, she'd probably apply to the Olympian courts to have her name changed the next morning.

It's a modest man who doesn't think the photographer could have made a better looking picture of him if he'd only tried.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., April 10.—Beginning on April 2 and continuing through to-day there has been a Business Efficiency Exposition at Mechanics' building, and among the notable exhibits were the dictaphone, shown by the Columbia Graphophone Co., and the Edison business phonograph, exhibited by Mershon & Klinefelter, of 18 Tremont street. Both of these exhibits were in the main aisle of the hall, their locations being about the best among the 100 exhibitors of time and labor saving devices. The Columbia exhibit was in the midst of handsome mahogany furnishings, these including tables, chairs and desks, and the machines sent over to illustrate the facility of dictating were the best that the home office could exhibit. Palms and plants helped to make the display attractive. Andrew Atwell, the manager of the dictaphone department of the Columbia, was in charge of the exhibit. Similarly the Edison dictagraph was in artistic surroundings and it received its share of well-merited attention.

Reports Good Month's Business.

Manager Batchelder, of the Victor department of the Henry F. Miller Co., reports a very good month's business. The April list of records has proved especially popular, and the office staff has been busy attending to the wants of many customers.

Will Continue Columbia Department.

Mr. Navin, of Navin & Kelley, of 757 Washington street, has bought out the Columbia department in the Henry Siegel Co.'s store, which recently went into insolvency. The new firm of W. & A. Bacon, an old-established Roxbury house, which bought out the Siegel store, has been agreeable to the proposition that the Columbia department be continued there, and Mr. Navin has some progressive ideas as to how the department should be conducted. William L. Dunn, of the Columbia offices, has been chosen to be the manager and he starts in with high endorsements.

George W. Lyle a Visitor.

George W. Lyle, general manager of the Columbia Graphophone Co., was a hurried visitor to the Boston warerooms a fortnight ago, and he found Manager Erisman right on the job. Another Boston visitor was H. A. Yerkes, the Columbia's wholesale manager, whose trip to Boston was of a meteoric character.

To Visit the Victor Factory.

Business at the Eastern Talking Machine Co.'s establishment continues good, and already there

is considerable of a call for equipments suitable for country homes and shore cottages. Billy Fitzgerald, Mark Reed and Mr. Splaine are looking forward expectantly to their trip over to Camden and Philadelphia on the 18th of this month, where they are going to inspect the Victor laboratories and study the manufacture of machines and records. The trip will give them a renewed fund of knowledge as to Victor workmanship. They will be away three days.

Renewed Acquaintanceship.

H. A. Beach, of the Victor Co., came over to Boston for a few days and renewed acquaintance with the boys of the various Victor distributors, those of the Eastern Co. in particular. Mr. Beach is the general representative of the factory.

More Room for Ditson Department.

Henry A. Winkelman, manager of the Victor department of the Oliver Ditson Co., has been forced to make several changes in his second floor suite because of the rush of business. Most of the records are now kept at the rear of the floor in rooms especially prepared for them, and by this rearrangement space is allowed for an additional demonstration booth toward the front half of the suite. Mr. Winkelman's bland smile tells the story of good business. His many friends enjoyed meeting him at the dinner of the Boston Music Trade Association at the Hotel Lenox a few weeks ago.

Columbia Dance Records in Demand.

Manager Arthur Erisman, of the Columbia Co., reports that it is an even toss up between school propositions and dance music, for the latter, since the tango and other modern forms of dancing came in, has made heavy demands on the Columbia equipments. Although Manager Erisman laid in a large stock of this kind of dance music he is constantly obliged to send over to headquarters for fresh invoices of records.

Talks with Sales Staff.

A busy man is Manager Royer of the Victor department of the M. Steinert Co.'s Arch street quarters, these days, especially as he had been away for several days paying a visit to the Victor laboratories. During his absence business piled up so he has had to bend all his energies to get it dispatched with some degree of promptness. Mr. Royer lately has held two sales talks with his staff, discussing business methods and getting an exchange of views from the men as to new ideas that will aid in promoting business. At the conclusion of these conferences the boys all repaired to a near-by hotel for supper.

Changes in Columbia Co. Quarters.

When the changes are completed in the two floors of the Columbia Co. made necessary by the cutting off of a few feet of the store for the Avery street widening, which was referred to in last month's issue of The World, the establishment will be almost new. Just now Manager Erisman and his large staff are working under adverse conditions, Mr. Erisman's private office in particular being quite inadequate for present needs. On the second floor two new demonstration booths will be installed, which will greatly facilitate business.

Rosen Artistic Quarters.

Henry Rosen, of School street, has taken a lease of a large apartment at 246 Huntington avenue, opposite Symphony Hall, as mentioned briefly last month. He is equipping the room in a highly artistic manner, and will place this branch under the management of a competent man, but at this writing the right man has not been selected.

Take on the Edison Line.

The Shawmut Furniture Co., of 269 Tremont street, has lately taken on the Edison line and its rooms devoted to these goods are visited by all the patrons of the store whose attention is directed to the value of Edison equipments.

W. E. Getchell Ill.

W. E. Getchell, who has charge of the New Hampshire and Vermont business of the Columbia Co., has the sympathy of his hosts of friends because of his long continued illness. Mr. Getchell was taken sick in Brattleboro, and on the advice of friends went over to New York to consult a specialist and hospital treatment followed.

Increase Sales Staff.

Manager Erisman has made several additions to his already large staff. A. G. Haskell and S. B. Bowman have been taken on at the retail department, and E. W. Graham has come East from the Chicago office to travel for Manager Erisman's branch of the Columbia. All three are excellent men.

Signs Up Many New Accounts.

W. O. Pardee, of the Pardee-Ellenberger Co., was in town a few days ago and he told your correspondent that he had signed up a number of good accounts at New Haven, Norwich, New London, Bridgeport, Stamford and New Britain. He says that everywhere he goes he hears the most enthusiastic things said of the Edison disc machines.

Columbia Brieflets.

Miss Mabel Jones, who has been doing splendid work for the Columbia in demonstrating the Co-

**Real Music

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

lumbia grand, was taken ill at Nashua, N. H., lately, and her condition was such that she has been ordered by her physician to take a long rest. Accordingly she has gone to her home in Maine, where she will spend the summer.

John L. Gately, the New England representative of the Victor, has been quite ill at his home in Somerville, but last reports were that he was well on the road to recovery.

These fine spring days are when Manager Erisman, of the Columbia, tries to get a few hours in the afternoon for a game of golf, and he often finds himself matched up with some of the most prominent players of the day. Erisman is pretty good with the sticks, too.

CANNED 'POSSUM A LA EDISON.

Brer 'Possum's name is famous;
He's known throughout our land.
Milady pays good money for
His hide when it is tanned.

II.

The muff that nestles softly
Against her dimpled cheek,
Was once this midnight prowler's coat
So smooth, and gray, and sleek.

III.

"He's good to eat," says Rastus,
"When roasted, stewed, or panned."
Behold him in his latest role:
His voice is being canned.

HOWARD TAYLOR MIDDLETON.

HEAVY DEMAND FOR NEEDLES.

Products of W. H. Bagshaw Popular in All Parts of the World—An Up-to-Date and Well Equipped Plant.

(Special to The Talking Machine World.)

LOWELL, MASS., April 9.—In a chat with C. H. Bagshaw, general manager of W. H. Bagshaw, of this city, he spoke enthusiastically about the condition of business and the demand for Bagshaw made talking machine needles. No doubt this house will do the largest business that has ever been transacted in its career—not only shipping their production to this country, but to South America, Australia, Japan, Argentine, England and other foreign countries. The plan of this organization in creating a high grade line of products and catering only to the class demanding this character of goods shows the success of a sane merchandising plan.

Recently was installed a machine at the Bagshaw plant capable of automatically counting needles operated by the force of one needle, which shows how delicately it must be adjusted in order to fulfil requirements of the machine.

The house of Bagshaw is continuously adding new and efficient machinery in order to always better the character of its production.

ENLARGE EDISON DEPARTMENT.

E. P. Hart & Co., of Great Barrington, Mass., Preparing for a Large Summer Business.

(Special to The Talking Machine World.)

GREAT BARRINGTON, MASS., April 7.—E. P. Hunt Co. of this town has lately enlarged its department store so as to make adequate room for a well-equipped Edison department and this enterprising house now takes its place among the leading Edison dealers of Western Massachusetts. The company is preparing to do a large summer business among the many who annually go into the Western part of the State for their vacations.

VISIT MARKETS MORE FREQUENTLY.

Wholesale Buyers Visit Big Centers Several Times a Year Instead of Once or Twice, as Formerly—Taken to Indicate the Passing of Seasons in the Placing of Orders.

Twenty years ago, according to experienced local wholesalers, it was only on the rarest occasions that a retail merchant came to this market more than twice a year. At that time, they say there was by no means the number of individual buyers there are to-day, which usually meant that the merchant himself did all, or nearly all, of the buying. In those days the individual purchases were much larger than they are now, despite the increased population of the country and the greater number of retail outlets. Then a whole season's merchandise was often contracted for at one time, and if the merchant were not a good buyer he paid for his ignorance or ill luck.

With the separation of stores into departments and the resultant increase in the number of buyers per store, the individual purchases became smaller and more frequent. Buyers used to come to market twice a year, or they came three or four times if they were not too far from Boston. Now they come more frequently, and it is not a rare thing for many out-of-town buyers to visit this market every month. Never before have the hotel registers borne the names of so many buyers at this time of the year. In some quarters this is taken as a definite sign that the retail distinction between the seasons is passing, but in other quarters the delayed visits of buyers.

FULTON MUSIC CO. IN NEW QUARTERS

(Special to The Talking Machine World.)

WATERBURY, CONN., April 7.—The Fulton Music Co. has just moved into larger quarters in the central part of this city and on one of its floors it has installed a large talking machine department where it is featuring the Edison line. The rooms are attractively furnished and many persons have paid the place a visit which has resulted in many sales and numerous good prospects.

"TOO BUSY TO READ."

He is a familiar type—the fussy, fretful man who imagines that he is about the busiest fellow in town. He often dumps in the waste basket, unwrapped copies of business or technical magazines that contain valuable articles bearing directly on his problems. He fondly believes that he is too busy practicing to bother with what others are "preaching."

The trouble with this type of man is that he has not learned that the real executive is the man who so plans his work as to leave a reasonable amount of time for reading and planning, says *Printers' Ink*. There are shoals and breakers ahead when the accumulation of new ideas ceases. The man who declares he has no time to read is unconsciously advertising his small caliber, his slavery to detail, his arrested development.

ADD MORE SOUND-PROOF ROOMS.

(Special to The Talking Machine World.)

NEW HAVEN, CONN., April 7.—The A. B. Clinton Co. of this city has just completed some radical changes in the interior of its establishment, and several sound-proof booths are proving highly advantageous to customers. In the last few weeks the company's business has developed to large proportions.

HOW COULD HE?

The Girl—Do you enjoy music with meals?
The Man—Rather!
The Girl—What do you prefer, a waltz?
The Man—No, a chew-step!—London Opinion.

It requires tremendous energy to handle millions economically

WHILE brains count to the fullest degree, still in making talking machine needles it is necessary to have the most modern equipment, for the tiny needles have to be handled in lots of millions. This branch of our business is receiving constant attention by our engineers who are continuously improving our machinery and enabling us to MAKE THE BEST NEEDLES.

A NEW SALTER STYLE

SALTER STYLE No. 20.
Separate sections for 10-inch and 12-inch records.

THAT EVERY DEALER
SHOULD KNOW ABOUT—

is this elegant and novel cabinet that our designer has just completed and which we now offer to the trade.

This new Salter feature has been designed to match the EDISON Disc Phonograph, and holds 132 Edison records in separate felt-lined compartments. It is also constructed with 159 such compartments to receive VICTOR or COLUMBIA records.

Many owners of the latter named machines are using this cabinet as a "record stock" or "overflow" cabinet, and it fills the bill most satisfactorily.

The Style No. 20 is 44 ins. high and $17\frac{1}{4} \times 24\frac{1}{2}$ ins. across the top. It has a simple and accurate indexing device. It is finished in beautiful mahogany and oak veneers in a number of different shades.

MARCH A RECORD MONTH FOR CLEVELAND TRADE.

Excellent Increase in Business Reported by the Majority of the Talking Machine Houses
—Columbia Co., Disposes of Retail Business and Opens Exclusive Wholesale Quarters
—H. M. Brainard Piano Co., Moves—All Lines of Machines and Records in Demand.

(Special to The Talking Machine World.)

CLEVELAND, O., April 6.—March was a month of uncertainty and hesitation in business generally, yet in that month Cleveland made a fine record in several important phases, particularly in the substantial status of the talking machine trade, the increase in bank clearings and in the number of building permits issued, all showing remarkable evidence of exceptional vitality. The supply of machines is apparently ample, although there is a scarcity of two or three types, while the complaint of a shortage of Victor records is general. The fact is the growth of the business has created a demand for records far in excess of the supply, and which is likely to continue.

The recent notable event in talking machine circles was the disposal by the Columbia Phonograph Co., of its retail business, and the establishing of an exclusive wholesale quarters for Columbia graphophones and records and the dictaphone, at 1375 Euclid avenue. The new store is located on the fourth floor of the Kinney & Levan building, which has a Euclid frontage of 100 feet, and extends 450 feet to the rear. The store has been fitted up in fine style for the business purposes of the company. Mr. Madson, manager, says the business is growing by leaps and bounds.

Another event was the removal of the H. M. Brainard Piano Co. from 6525 Euclid avenue, to 1317-19 Euclid avenue. The company has fitted up a magnificent store for the piano and talking machine business. Six large talking machine demonstration parlors have been installed, together with manager and cashier's offices. The company handles the Columbia goods exclusively, and the manager says he expects to do as large a talking machine as piano business.

In a talk with T. H. Towell, president of the Eclipse Musical Co., he said everything was very satisfactory, except that they were handicapped by a shortage of both machines and records, especially the latter. P. J. Towell, brother of the president, and who looks after the interests of the Eclipse Musical Co., generally, said business was good and would be 50 per cent. better, if he could get the goods. His birthday (he is still a boy) occurred a few days ago, and a luncheon was tendered him by the employes of the store. He was presented with a beautiful diamond pin by his brother.

"Notwithstanding the fact that our record stock has been in awful conditions since January 1," said Wm. G. Bowie, manager of the Victrola department of the B. Dreher's Sons Co., "our business this year to date is almost double that of 1913."

"Business is very good," said Norman H. Cook, of the W. F. Frederick Piano Co.—"in fact, is of such volume as to exceed our expectations."

The magnificent window display continues to attract the attention of crowds daily at the Caldwell Piano Co.'s store. R. W. Schirring, manager of the Victrola department, said trade in the talking machine line, along with the piano business, was very satisfactory, but would be much more so if a sufficient supply of machines and records were obtainable.

The Victor department of the Wm. Taylor Son & Co., is one of the attractive sections of the store. T. A. Davis, Jr., reports trade as brisk and constantly increasing.

O. E. Kellogg, manager of the piano and Victrola department of the H. E. McMillan & Son Co., reports a very fine business for the month of March. He said several \$200 machines were sold during the month, also a number of \$100 ones.

Evidence of increasing business is quite manifest at the store of the Phonograph Co. There has been an addition to the clerical force and activity prevails in all departments. L. N. Bloom, secretary, stated that trade, both wholesale and retail, during the past month, had been unusually good. "There were," he said, "a number of the high-grade Edison disc machines sold in the best homes in Cleveland during the month, and a number of new dealers were assigned to handle the Edison goods, among others, the Moorehouse-Martens Co., Columbus, O.; H. Ackerman, Galion, O.; the National Phonograph Co., Steubenville, O., and Cooley & Bentz, Wheeling, W. Va."

Trade is reported excellent and conditions generally very satisfactory at W. H. Buescher & Sons Co., as well as at the Bailey Co., the May Co., Collister & Sayle Co., and the Euclid Music Co.

EFFECTIVE DITSON ADVERTISING.

One of the most attractive Victor advertisements that has appeared recently in the daily newspapers was that used this week by Charles H. Ditson & Co., 8 East Thirty-fourth street, New York, the well-known musical instrument house, whose Victrola department has been steadily enlarged to handle a fast-growing trade.

This advertisement took cognizance of the widespread demand for dance records, and, in addition to an appropriate cut, mentioned the various dances, such as the maxixe, hesitation, tango and Boston, by name under the heading, "A Victrola for Every Home." The different models of Victrolas were featured with their respective style numbers and prices and attention was called to some of the most important records in the new April list. As a whole the text in this advertisement was interesting and convincing and well calculated to produce excellent results, in addition to forming strong publicity.

Sometimes it seems as if a man ran for office merely to find out from his enemies how utterly outrageous his past life has been.

We still talk the Columbia "Leader" Grafonola, because it is the biggest thing in the industry to talk about.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

THE REAL REASON FOR THE SHORTAGE IN RECORDS.

Present Conditions Reflect Tremendous Volume of Business That Has Been Handled and Should Be Cause for Rejoicing Rather Than for Condemnation, Says Benj. Switky, the Prominent Victor Distributer of New York—Situation Carefully Analyzed.

For the past two or three months Victor dealers have suffered from a shortage of records never before witnessed in the history of the trade. This condition, which on the face of it would seem to be unfortunate, is the direct result of the tremendous record sales enjoyed by all prior to and during the holiday season. Therefore it is self-evident that there should be rejoicing instead of condemnation over the present state of affairs. A little mature reflection would prove to us that the present is no time for pessimism.

Let us analyze the causes leading up to the shortage, and then try to realize what it all means. I am sure that from the analysis we will be able to draw much comfort and inspiration, and that the gloom and discontent that have enveloped the minds of some will be dispelled, giving clearer vision and more cheerful disposition; likewise, we owe it to the manufacturers to express appreciation of their valiant efforts to relieve the situation.

On November 1, 1913, all jobbers' stocks were ready for the anticipated holiday demands. The record bins at the factory were loaded with hundreds of thousands of records that had been pressed during the summer and fall. By December 15 it seemed that nothing had been overlooked in the way of preparedness to supply the demand, no matter how great it might be.

But, lo and behold, the country's record sales of the next two weeks were like the breaking loose of a fierce Western cyclone sweeping everything before it! The standard sellers were in tremendous demand; the dance craze, which had been gathering momentum during the several months preceding Christmas broke in upon us like a volcanic eruption. We were prepared for an abnormal demand, but no one could foresee a condition such as confronted us on December 24.

The factory poured forth its reserve record stock in tremendous shipments, but they were powerless to stem the rush of the flood. The record business of December, 1913, was unique. It surpassed all other years.

A Comparison with Other Industries.

Let us pause to see what we can see. What was the condition of the country in general at about this time? How were other industries faring? What was the tone of the money mart? Were stocks going up or were values decreasing? What was the condition of the labor market as a whole? The answers are all negative. In some quarters there was despair, in others gloom, and in still others uncertainty that boded no good. Capital stood idle, trembling, undecided. There were advancing clouds and distant rumblings that foretold the approach of a storm. Men were speculating as to whether the clouds would pass or whether the storm would break over their heads. All sorts of causes were blamed for the general business depression: the November elections, the tariff tinkering, the currency bills, proposed anti-trust legisla-

tion, international complications, the unseasonableness of the weather, etc., etc., etc.

Wherein lies our lesson? It is this: The popularity of talking machines and records is so great that even unfavorable times cannot dim the brilliance of our prosperity. There seem to be no barriers tall enough or strong enough to retard the onward march of our progress. When we think of the records sold in December, 1913, in spite of hard times, what may we not expect for our harvest when the country shall bathe in the sunshine of general prosperity?

There is no room for pessimism. To complain because of the present shortage is equivalent to finding fault with last December's business on the ground that it was too big.

The Problems of the Factory.

But some men may ask, what is the factory doing to refill the empty record bins? Very little, we must admit. This is not because the presses are idle—on the contrary, they are working to full capacity—but because the orders for the new monthly records are so great that there is very little chance left to press catalog stock. The jobbers, having discovered that they cannot count with certainty on receiving duplicate shipments on reorders of popular sellers, have adopted the plan of plunging when placing initial orders for monthly records. Instead of ordering conservatively, and then reordering every three or four weeks, they now try to corner a three or four months' supply. This, of course, works additional hardship on the factory and delays the refilling of the bins devoted to the older selections.

It has been suggested that relief would be had by eliminating one of the monthly lists; but the factory does not deem it wise to withhold from the buying public for a period of sixty days certain hits that are in great demand and which should be issued as quickly as possible. Besides, it is better to give the trade records that are in immediate demand than to press a lot of staple records merely for the sake of replacing old numbers.

If I had my way I would grasp the present as an opportune time for performing a radical operation upon the Victor record catalog. There are many selections in the catalog that sell so slowly that it is a waste of jobbers' and dealers' capital to carry them in stock. The needless repetition of the same selection by many different artists serves no other purpose than to squander capital and make retail selling more burdensome.

There seems to be a feeling among the trade that the present record shortage has another and deeper significance; that the failure on the part of the factory to replenish stocks during the past three months is part of a plan to prepare for the introduction of new product—possibly a new record composition, or something of that sort. Although the factory has given assurance that such a move is not now contemplated, it will do no harm

to discuss the attitude of the factory toward such a contingency.

That there would some day be certain radical changes and improvements in Victor products was announced at the jobbers' convention at Atlantic City not quite two years ago. Louis F. Geissler, general manager of the Victor Co., in the course of his address made it plain to his audience that the Victor Co. was prepared to defend and retain its title of champion against all newcomers and oldcomers. I cannot quote him verbatim, but the essence of his talk was this: That the Victor Co. did not believe in making changes or issuing new product faster than the public could digest them; but that there were several hundred patents filed away for future reference of which it had not yet availed itself; and that when the proper time came the Victor Co. would issue product that might necessitate making a bonfire of then existing machines and records.

And when that time comes the trade can depend on it that everything possible will be done to prevent a radical depreciation in the value of the salability of its stocks. The Victor Co. has in the past year given many evidences of its ability to cope with situations requiring heroic treatment. The welfare of its dealers has always been uppermost when changes were found necessary.

The Victor Co. can be depended upon. It has never offered a sink-or-swim proposition to its trade when important changes were imminent.

Therefore, with an illustrious selling career behind us, with present good conditions prevailing, and with such bright prospects confronting, can any man say that he is justified in being aught but an optimist? A little patience at the right time accomplishes a heap of good.

NEW MUSICAL INSTRUMENT

Announced by J. Hoffay, of London, Exciting Much Interest in the Trade.

Jose Hoffay, who is well known in the talking machine trade in the United States and South America, and who is now residing in London, makes an important announcement on page 47 of this issue of The World regarding a new musical instrument which will play every kind of disc record and in a most perfect manner.

The English trade seem very much interested in this new instrument which was referred to in the London correspondence of The World last month, and great things are expected of it.

NEW YORK CITY TRADE CLOSES GOOD MARCH BUSINESS

Despite Continued Shortage of Records and Some Types of Machines—Dance Craze Still an Important Trade Factor—With the Advent of the Summer Season a New Demand Will Materialize—What Leading Dealers Report to The World—News of the Month.

Despite the continued shortage of all types of machines and records, talking machine dealers in New York City with practically no exception reported the closing of the best March they ever experienced, but nevertheless could not refrain from commenting on the sales totals they might have reached if more machines and records had been available. Here and there is a dealer who remarks point blank that neither the manufacturers nor the distributors are to blame for the tremendous shortage in all lines, but rather the public, who recognizing the value of the talking machine as a medium for the ideal interpretation of the modern dances, has swamped the dealers with orders for machines and records.

In connection with the modern dance craze, those pessimists who a few months since voiced the opinion that this craze would not last after the first of March are finding themselves greatly mistaken, as judging from all present indications, the dance craze has not yet reached its summit by and means, but is gaining and gaining month after month. With the advent of the summer season outdoor life will undoubtedly mean a continued heavy demand for appropriate dance music with corresponding machine orders, and the local talking machine dealer is indeed a confirmed pessimist who feels that the coming summer will not be a profitable one from a business standpoint.

The Question of Publicity.

One noticeable feature of the past month's business was the absence from the daily newspapers of a goodly percentage of the talking machine advertising that is usually found in local advertising columns. This was particularly true in the middle and last week of March, when the dealers realized that they could not supply the demand for dance music, and felt that it was too early to spend money advertising appropriate Easter music. With the approach of the Easter season, however, newspaper advertising showed a marked increase from the talking machine dealers, and this advertising produced splendid results. The live-wire local dealer realized some time since that with the scarcity of dance records it would be advisable and profitable to educate the public to the real beauties of the many kinds of music in the record catalogs, and this publicity has resulted in marked increases in the demand for opera, light opera and musical comedy selections.

Opening of Landay Bros.' New Store.

One of the events of the local trade the past month was the opening of the new store of Landay Bros., the prominent Victor distributors at 427 Fifth avenue. This store is undoubtedly one of the finest Victrola establishments in the country, and is indeed a credit to the remarkable strides being made by the Victor products. The furnishings and decorations are beautiful and decidedly unique, and, as one newspaper account remarked, really baffle adequate description. Landay Bros., upon the opening of this new store, which is their fourth in the best shopping centers of New York, were accorded the unique honor by the local newspapers of having their store described in detail in the Sunday newspapers following the formal opening day. Such newspaper recognition has been accorded very few local establishments, and indicates the standing of the Victrola and Landay Bros.

New Columbia Store Doing Well.

The Columbia department in the new F. G. Smith store at 335 Fifth avenue is already closing an excellent business, although it has been open but a few weeks. Hayward Cleveland, the popular Columbia veteran, is in charge of this department, the Columbia store on Twenty-third street having closed coincident with the opening of the new department on Fifth avenue. This latest Columbia department marks the entrance of the company on the best sales district of Fifth avenue, and when all improvements and changes are completed these Columbia warerooms promise to form one of the most attractive talking machine departments in the local trade. Additional booths are being constructed to adequately handle the department's high-class trade.

Excellent Condition of Business.

"Business is really splendid," said H. N. Purdy, of the Edison disc department of Hardman, Peck & Co., 433 Fifth avenue. "During the past few weeks our machine sales have been steadily increasing, and the new Edison dance records are achieving a splendid success. Our \$150 and \$200 types of machines are still proving the best sellers in our line, but we expected this in view of the high-grade clientele that our institution caters to. Practically our entire business is conducted on a cash basis, only a very small percentage of our sales calling for deferred payments."

Co-operating with the Dealer.

"In these times of record shortage we are co-operating with our dealers in every possible way," remarked V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor. "We explain to them in detail how they can increase the efficiency of their record department, and co-operate with them in the proper selection of their record stocks. This co-operation is proving of real value to our numerous clients."

Opened Many New Accounts.

"Probably the most important feature of our business the past month has been the large number of new accounts that we have opened," said R. F. Bolton, manager of the Columbia Co.'s wholesale store, 89 Chambers street, New York. "Aside from the many new Columbia agencies entered on our books the past few weeks, the marked shortage of dance records is one of the trade's features. The prestige and standing of many of our new accounts is indicative of the rapid strides that Columbia products are making in the minds of the city's leading retail establishments. Our gain over last March was 60 per cent., which we are naturally very proud of, considering general business conditions."

New Edison Disc Records Admired.

"The new Edison disc records are being praised by each and every one of our customers," said Dana F. Parkhurst, manager of the Edison department of the Tower Manufacturing and Novelty Co., 326 Broadway. "These new disc records are proving welcome additions to our patrons' record libraries, as they are typical of the true musical qualities of the Edison disc product. The most popular seller in our line is the \$200 machine, which bids fair to take its place as one of the standard sellers of the phonograph industry."

Reports Good March Business.

Charles Bobzin, manager of the Silas Pearsall Co., 16 West Forty-sixth street, New York, Victor distributor, reports the closing of an excellent March business, particularly in the wholesale department, where the company gained many new accounts in the past few weeks.

What Others Report.

The talking machine department of the Pease Piano Co., 128 West Forty-second street, handling Victor and Columbia products, is being enlarged to handle the company's fast-growing trade. Additional soundproof booths are now being constructed for this department.

At the Victrola section of the John Wanamaker store two well-known dancers have been appearing in interpretations of the modern dances, the music for which is furnished by a Victrola. These dances have attracted city-wide attention.

Among the local dealers and talker departments reporting satisfactory March business were the following: Benj. Switky (Victor), Cowperthwait's (Columbia), Blackman Talking Machine Co. (Victor and Edison cylinder), Kranich & Bach (Columbia), Hallet & Davis (Victor), Eclipse Phonograph Co. (Edison disc and cylinder).

OTILIE METZGER MAKES RECORDS

Of Her Wonderful Contralto Voice for the Columbia Graphophone Co.—A Valuable Acquisition Owing to Her International Fame.

The Columbia Graphophone Co. made one of the great conquests of the season in arranging with Mme. Otilie Metzger, the distinguished German contralto from the Hamburg Opera House, to have her voice perpetuated for the benefit of her admirers in this country through the medium of Columbia records.

Mme. Metzger has just closed one of the most successful concert tours of any artist in the United States, and has won the unanimous approval of leading critics in New York and other cities. The visit this year followed her special engagement for two appearances with the Philharmonic Society Orchestra in New York last year. She made such a favorable impression that the concert tour this year resulted.

Mme. Metzger has demonstrated conclusively her claim to a place in the front rank of lieder singers. She possesses a genuine contralto voice of great depth, power and range, which is, moreover, of unusual richness and charm. Her interpretations and diction are impeccable. Indeed her English serves as a model for our native singers, and this may also be said of her enunciation in French, as well as in German.

Such a large, vibrant, powerful voice, with its uncommon purity and capable of potent expressiveness, should afford delight to the admirers of Mme. Metzger when heard through the medium of the talking machine, for few artists have made such a host of friends as has Mme. Metzger during her present concert tour.

An unusual feature of Mme. Metzger's engagement by the Columbia Graphophone Co. was the fact that she met the representatives of the company at 9 a. m. on March 30, signed a contract at 9.30 a. m. and was recording in the company's laboratory at 10 a. m., probably breaking all records.

If you happen to think you really don't know a lot more than the boss about the business, you're probably on the way to promotion.

COLUMBIA GRAPHOPHONE CO'S. 25th ANNIVERSARY

Celebrated on Saturday Night at the Arcola Country Club, Arcola, N. J.—Dinner in Evening Presided Over by Edward D. Easton, President of the Company.

A party of fifty, including directors, officials and employes of the Columbia Graphophone Co., foregathered at the Arcola Country Club, Arcola, N. J., on Saturday night in order to celebrate the twenty-fifth anniversary of the founding of the Columbia Graphophone Co.

Most of the guests arrived at Arcola in the afternoon, and the club held open house indoors and out. In the evening Edward D. Easton, president of the company, presided over a dinner, at the conclusion of which many of those present

made speeches of congratulation and compliment. The feature of the evening's oratory was the large and sincere tribute paid to Mr. Easton as the man who had founded the company, and whose inspiring personality had been such a dominant factor in its development to its present magnitude. The guests included employes of the company from all parts of the country as well as England. The latter country was represented by Louis Sterling and G. L. Funnell, of London, while A. G. Farquharson, of Toronto, represented Canada.

CALL FOR DISC RECORD ALBUMS.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., April 8.—The National Publishing Co., of 230 South American street, this city, is having a constantly increased demand for its disc record albums, due undoubtedly to their distinctive merits. For they are artistic in design, most durable and well finished.

Leading talking machine men throughout the country are handling them with satisfaction to themselves and to their customers, and a big trade is being built up with these albums, which are suitable for Victor, Edison, Columbia and all other makes of records.

Jobbers can greatly increase their sales to dealers by a free use of the large record album circular, which is supplied in quantities by the National Publishing Co. with the name and address of the user, as well as the prices at which the albums can be sold. Sales have been doubled by using this literature and sending it out with the regular lists of records, as well as by distributing them to callers. The circulars have four pictures on them showing the record album open and closed. These can be supplied to retailers and used to good advantage in soliciting orders.

The six-page index in every album facilitates the instant location of any record, for the labels are seen through the openings and the titles of the records can be read without removing the records.

The National Publishing Co. offers to send a sample album by parcel post for examination, so confident is it that the album will at once interest talking machine men.

A NOTABLE DINNER.

Edward D. Easton, president of the Columbia Graphophone Co., and Mrs. E. D. Easton tendered a dinner Wednesday, April 1, to Miss Gertrude Lyle, daughter of George W. Lyle, general manager of the Columbia Graphophone Co., and her fiancé, Richard Arnault, who were married at Hackensack on Wednesday of last week. The dinner was given at Mr. Easton's beautiful home in Arcola, N. J.

A noteworthy feature of this dinner is the fact that there were present four engaged couples, representing the families of Edward D. Easton and George W. Lyle. These four couples were Miss Gertrude Lyle and Richard Arnault, Miss Frances Ogden and Harold Lyle, a son of George W. Lyle; Miss Helen Easton, daughter of President Easton, and Norris Mumper; Miss Mary Rankin and Mortimer D. Easton, a son of President Easton. Other guests at the dinner included Mr. and Mrs. George W. Lyle, Mrs. Rankin, C. W. Woddrop, secretary of the Columbia Graphophone Co., and Mr. and Mrs. E. D. Easton, the host and hostess.

The table decorations were unusually tasteful and charming and each guest received an appropriate favor with a snatch of poetry contained therein. The dates of the other three weddings in these two prominent families have not yet been announced.

UTILIZING VICTOR PUBLICITY.

V. W. Moody Has Some Recent Illustrations Framed Which Tell an Impressive Story of Victor Enterprise and Advance.

V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, recently had framed an interesting picture that makes a valuable piece of publicity for the live-wire Victor dealer. This picture shows the \$500,000 yacht "Vanadis," belonging to C. K. G. Billings, the multi-millionaire, and internationally prominent. Four views of the yacht's interior are shown, including the lounging room, the gymnasium, a bedroom and the smoking room, wherein is prominently displayed a Victor talking machine. These pictures appeared in a recent issue of the New York Sunday Times, and when framed present an artistic appearance.

Alongside of this picture Mr. Moody has displayed a number of framed colored pictures that represent to what excellent advantage the splendid publicity sent out by the Victor Co. may be utilized. One of these pictures shows the famous McCutcheon painting used in the Victor advertising in the national magazines, while others show the Christmas folder sent out last year and the group of operatic artists that has been used in the Saturday Evening Post and other national periodicals.

TALKER MEN HELD FOR GRAND JURY.

H. A. C. Howard and A. D. Pilpot, Organizers of United States Phonograph Co., Held on Charges of Fraud Brought by Railroad Man—Defendants Emphatically Deny Guilt.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 13.—Following charges of fraud brought by James F. Dart, a local railroad man, who stated that they had induced him to invest money in the United States Phonograph Co. under false pretenses, Harry A. C. Howard and Albert D. Pilpot, organizers of the United States Phonograph Co., were held for the Grand Jury on Friday of last week by Judge Wells. The phonograph company retired last summer, but the defendants emphatically deny the charges of fraud and look for a speedy acquittal.

\$25,000,000 MUSEUM OF INDUSTRY

Planned in New York—Projectors Guarantee Amount for Stadium and Other Buildings.

A scheme was projected at a meeting in the Lawyers' Club, 115 Broadway, early this week for an industrial museum, to cost about \$25,000,000, to be devoted to the study of practical subjects by the public. The idea is to have a circle of buildings enclosing a stadium, the stadium to be partially covered and used for assemblage. Within the buildings would be housed permanent expositions of twenty branches of industrial and peaceful arts.

It is intended to establish the museum as a memorial of the centenary of peace among English-speaking people. Three sites are in prospect, one in an old reservoir basin in Central Park, another north of Ninetieth street and the third on property the owner of which offered it some time ago for public use by the city.

It was announced at the meeting by John A. Stewart that the financial undertaking will be one of the factors most easily handled in the development of the project, because the money can be raised among the projectors, if need be.

An association has been formed and the meeting was of the directors, those present being George F. Kunz, Frank A. Vanderlip, Charles H. Strong, A. Barton Hepburn, Calvin W. Rice, Prof. Martson Taylor Bogart, Thomas Commerford Martin and John A. Stewart. Elbert H. Gary, Henry R. Towne, Thomas A. Edison, H. E. Huntington, Theodore N. Vail and H. J. Hardenberg are among the other directors. A committee on plan and scope was appointed to report April 23.

This museum would be similar to those in Germany and France, but on a much larger scale.

THE ILLINOIS CALLOPHONE CO.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 11.—The Illinois Callophone Co. has been incorporated with a capital stock of \$100,000 to sell callophones and enunciators. This is a subsidiary of the International Callophone Co. of New York, and offices will be opened May 1

The parcel post weight limit has been increased. But nothing has been done to give the purchaser of stamps by wholesale an inside price! in the New York Life Building.

TRADE REACHES NEW HIGH POINT IN MILWAUKEE.

Considerably Ahead of a Year Ago and Would Be Larger if Jobbers and Dealers Could Secure Sufficient Talking Machines and Records—A Visit to the Leading Stores Reveals a Spirit of Hustle and Optimism That Bodes Well for Summer Trade.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., April 9.—The talking machine business in Milwaukee seems to be holding up unusually well, considering the fact that general business conditions are still a little quiet. Both jobbers and dealers report that trade is considerably better than at this time a year ago, while most of them believe that the outlook is good. The sales of machines and records during the month of March climbed to a new high point, and the indications are that this activity will be kept up during April.

The total volume of business up to this time this year would have been much larger but for the shortage of machines experienced with all the leading lines. Jobbers have been doing their best to get larger shipments from the factories, but they have been only partly successful, and stocks are remarkably low all along the line. The shortage seems to be especially noticeable in the Victor field and dealers handling this line say that their stocks, especially in Victrolas, are far from being equal to the requirements of the trade. Some of the leading houses have only two or three Style XI Victrolas in their stores, while the supply of Styles IX and XVI is getting low.

L. C. Parker, enterprising manager of the Victor department at Gimbel Bros.' Milwaukee store, has had his responsibilities doubled by having been made manager of the Gimbel piano department. E. S. Bridge, who has had charge of the piano sales at the Gimbel store for several years, resigned recently, and the management of the store decided that Mr. Parker had met with such remarkable success in handling the talking machine business that he was the only man to take charge of the piano department. In order that Mr. Parker might more readily handle the piano business, the department has been moved down from the sixth to the second floor, where it has been given quarters adjoining the Victor hall at the Gimbel store. Mr. Parker has built up a live, enterprising sales force and the business of both departments is climbing to a new high point.

A. G. Kunde, Columbia jobber and dealer, 516 Grand avenue, proved recently that he is a real philanthropist by donating a big Columbia machine to the patients of the Blue Mound tuberculosis sanatorium, located just west of Milwaukee. The main building of the sanatorium was destroyed by fire recently and the patients lost their talking machine, a pool table and various other means of pastime, and Mr. Kunde's sympathy was aroused.

D. C. Preston traveler in Wisconsin and Minnesota for the Talking Machine Co., of Chicago, will henceforth be a citizen of Milwaukee. Mr. Preston, whose wedding was scheduled to take place on Easter Sunday, is establishing a home of his own, and he believes that Milwaukee offers the most central location and best railroad facilities of any city in his territory.

Paul A. Seeger, manager of the Victor department at the Edmund Gram Piano House, has been meeting with such a brisk demand for Victrolas that his stock is lower than at any time since the department has been opened at the Gram store. Mr. Seeger says that the call has been especially strong for Victrolas IX, XI and XVI.

One of the display windows at the store of the Hoefler Manufacturing Co. blew in during a heavy wind storm on March 25 damaging a Victrola and an automatic piano, which were on display.

E. F. O'Neil and Sam Goldsmith, traveling representatives of the Victor Talking Machine Co., recently called upon the Milwaukee trade. W. P. Gibbs, traveler for the Rudolph Wurlitzer Manufacturing Co., of Cincinnati, O., was another recent Milwaukee visitor.

D. M. Groulx, Victor dealer at Green Bay, Wis., has established a successful branch agency at Oconto, Wis., with Oscar C. Watterich. Mr. Watterich, who is a jeweler of Oconto, is carrying a large stock of Victor goods and finds Oconto

offers an excellent field for talking machines.

The Edison line has been placed with two well-known Milwaukee houses by the Milwaukee Phonograph Co. Edison jobber in Wisconsin and Upper Michigan. Charles H. Scheff & Sons, 849 Third street, also carrying the Victor goods, have put in a full line of Edison machines and records and are featuring them in special quarters. C. Niss & Sons, Inc., one of the leading retail furniture concerns of Milwaukee, 697-709 Third street, is opening a new talking machine department and has taken up the agency for the full Edison line. It is understood that several other Milwaukee houses are negotiating for taking on the Edison line. Since the opening of the new year the Milwaukee Phonograph Co. has secured eighteen new dealers in Wisconsin for the Edison disc line.

William Idle, special traveling representative of Thomas Edison, Inc., has been in Milwaukee for some time, assisting Manager William A. Schmidt, of the Milwaukee Phonograph Co., in establishing new Edison dealers in this city. Mr. Idle expected to give a special Edison recital at the Hotel Pfister in Milwaukee on April 15, when several of the new Edison disc machines were to be featured.

Invitations were issued to several thousand Milwaukee people.

The Gensch-Smith Co., 730 Grand avenue, handling the Victor line, has met with such an increase in business since it opened its new piano department, where it features the Wurlitzer pianos and players, that it is planning on increasing its sales force once more.

Henry Sask, who has conducted a successful Columbia store at 1602 Vliet street for several years, has opened in handsome new quarters on Vliet street, between Sixteenth and Seventeenth streets. Mr. Sask has considerably more space than in his old store, while everything is new and modern. His window displays at the new store are attracting much favorable attention.

The Victor business at the Boston store during March established a new high record, according to C. W. Abbott, manager of the Victor department. The demand for high-grade machines was so strong that Mr. Abbott has been unable to keep his stock up to the normal point.

Victor sales at the J. B. Bradford Piano Co.'s store have been climbing to a high mark of late, due to the fact that every salesman in the piano department has been taking an interest in the talking machine end of the business. The salesmen are encouraged to sell all the machines that they can and most of them have been making good use of their opportunities. The Bradford house regularly gives up half its window display room to exhibiting the Victor goods.

WE DON'T—DO YOU?

Do You Believe These Claims?

What does it mean to say, "We are the largest"—"We are the best"—"We always ship complete the same day," etc., etc.?

"Bosh"—Idle, Careless Claims

Who wants them? We don't know who is the "BIGGEST," etc., because it is not possible to get the details of a competitor's business.

You Want A Jobber to "Make Good"

We are here to SERVE YOU and have you JUDGE by what WE DO.

Try It Now—Send An Order

Let it be MACHINES or RECORDS. Don't let your Competitor be a "BLACKMAN DEALER" at your expense.

Very sincerely

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, Pres.

97 CHAMBERS ST., NEW YORK

RETURNS FROM ORIENTAL VISIT.

E. E. Robinson Places Important Columbia Agencies in Java, Ceylon, Singapore, Hong Kong and North China—Pleased with the Results of His Trip—Trade in Hawaii Expanding—Recuperating After His Extended Trip.

E. E. Robinson, one of the Columbia Co.'s traveling representatives in its export department, returned to New York late last month after nearly a year's trip to various parts of the Orient. While this was Mr. Robinson's first extended trip since he joined the Columbia export department some time since, he achieved a very pleasing success, establishing several important new connections and

E. E. Robinson.

securing large-sized orders that indicate the popularity of Columbia records and machines in this part of the world.

Among the countries Mr. Robinson visited was Java, where he placed a number of new agencies for Columbia products, particularly for the sale of native records. In Java one class of dealers handles the usual types of machines and records, while other dealers concentrate on native records, for which there is a large demand. At Ceylon Mr. Robinson closed arrangements with one of the best known retail merchants in that country to handle the Columbia line. At Singapore he also made a valuable connection for both native and English trade.

At Hong Kong, one of the greatest ports in the world, Mr. Robinson established a new Columbia agency which promises to be a very successful and prosperous one. In North China Mr. Robinson found that Mustard & Co., Columbia dealers for this territory, had been closing an excellent busi-

ness both in machines and records, and notwithstanding the difficulties of transportation, had sent Columbia machines far into the interior, sometimes on the backs of camels. Columbia products in Hawaii are maintaining a long-established popularity that bids fair to be steadily augmented in future years.

VICTROLAS IX AND X IN FUMED OAK.

The Victor Talking Machine Co. made the following announcement last week, which is of considerable interest to all the company's distributors and dealers:

"To meet a growing demand, due to the steady increase in popularity of the fumed oak finish in home furnishings, we have decided to furnish the Victrolas IX and X in fumed oak." We probably will be in a position to make shipments in this finish some time in June, but suggest that the dealers and distributors place their orders immediately so that we may determine to some degree what percentage of our output to devote to this finish."

The machines referred to in the above letter, Victrolas, Nos. IX and X, are among the most popular models in the Victor catalog, retailing at \$50 and \$75 respectively. These machines in fumed oak finish should prove welcome additions to the Victor dealer's line.

INCREASE FLOOR SPACE.

The Columbia Co.'s wholesale establishment at 89 Chambers street, New York, has found it necessary to increase its floor space to adequately handle its fast growing business. To this end a half of another floor in the same building was leased this week. This extra room will be used for storing purposes, permitting of the store's keeping considerably more stock on hand than is now possible with its present floor space.

SECURE IMPORTANT CONTRACT.

New York Board of Education Closes Contract with Columbia Co. for Supplying Graphophones and Records to the Public Schools—Initial Order Is for Sixty Machines.

The educational department of the Columbia Graphophone Co. has been awarded the contract by the New York Board of Education for supplying the New York public schools with graphophones and records during 1914. The Columbia department secured this contract last year, and

Columbia Machine in Use by New York School on Field Day.

supplied a large number of Columbia school Grafonolas and Columbia records to many of the local schools. That this school equipment gave perfect satisfaction in every respect is indicated by this new contract for the 1914 equipment. An initial order for sixty Columbia school machines and an adequate supply of records was received by the Columbia Co. last week.

In discussing the awarding of this important contract, Frederic Goodwin, head of the Columbia Co.'s educational department remarked as follows: "We are naturally greatly pleased to receive the contract for furnishing the school equipment for the New York schools during 1914. In view of the fact that Columbia school product was used in

Mr. Robinson is now recuperating from the strain of his long and arduous trip, which although it was a very successful one, was naturally fatiguing and tiring to a degree. Needless to say, Mr. Robinson returned to this country a still more enthusiastic admirer of and believer in Columbia goods than when he left these shores a year ago.

TAYLOR'S VICTROLA STORE.

In Jackson, Miss., Is One of the Liveliest and Most Successful in That Section—Doing an Enormous Business with the Victor Products—Catering to a High Class Trade.

(Special to The Talking Machine World.)

JACKSON, Miss., April 6.—One of the liveliest talking machine concerns in this section of the State is Taylor's Victrola Store at 244 East Cap-

M. E. Taylor's Store in East Capitol Street, Jackson, Miss.

tal street, this city, of which M. E. Taylor is proprietor.

Mr. Taylor has been in the talking machine business for about ten years, most of that time as manager of the department for the E. E. Forbes Co., in this city, and when that concern closed out the local branch Mr. Taylor took over the talking machine department under his own name. He carries a complete assortment of machines and records and caters to a high-class trade with much success. Incidentally, it may be stated Mr. Taylor is an enthusiastic reader of The Talking Machine World, from which he has received great benefit in many ways.

the local schools in 1913, we are convinced that the recent school award to our company was based on the excellent service that we rendered during 1913. The New York school contract is, in my opinion, the most important school contract in the country, and the recognition of Columbia prestige and service is indeed a gratifying tribute to our progress in this special division of our business.

"This award indicates conclusively the realization by boards of education and educational authorities that the talking machine is an indispensable article in the school room as an educational

factor, and not merely as an entertainment. Our slogan from the very start of this department has been to impress upon the school authorities the educational value of the Grafonola in the school room. The entertainment feature was but a minor consideration in our estimation, and by continually aiming to emphasize the true educational value of the Grafonola we have secured prestige and standing in the eyes of the school world that we would otherwise have been impossible to secure. Columbia dealers throughout the country should use this New York award to excellent advantage, as the recognition by the New York school authorities of the value of Columbia school products is worthy of the widest publicity."

Talking Machine Dealers

Who are desirous of adding new features to their line should consult

The Music Trade Review

This is the oldest music trade publication in this country, having appeared without interruption since July, 1879.

It is published every Saturday, and contains a thorough and exhaustive resume of all departments of the music trade industry.

Its editions vary from 60 to 150 pages.

It is conceded to be the most influential paper representing the music trade, and if you are interested in the topics with which it deals, do not fail to receive this paper regularly.

Regular subscription price is \$2 per year.

EDWARD LYMAN BILL
EDITOR AND PROPRIETOR

373 Fourth Ave., New York

TO MANUFACTURE IN GERMANY.

E. N. Burns Who Recently Returned from Europe States Plant Has Been Secured at Biersfeld, Saxony, to Make Columbia Machines to Supply the Trade in All Points Outside the United States—Columbia Business Active in Europe, Says Mr. Burns.

Edward N. Burns, vice-president of the Columbia Graphophone Co. and manager of the company's export department, who returned to New York late last month after a three months' trip abroad, made the important announcement this week that the Columbia Co. had completed arrangements to manufacture machines in Germany to take care of the demands of its export trade. These machines will be ready for shipment some time this month,

One of the "Columbia-Europa" Styles.

and will be distributed to Columbia dealers in all parts of the world outside of the United States.

The Columbia factory abroad is located in Biersfeld, Saxony, Germany, in the "Black Forest," where manufacturing and shipping facilities are ideal. This factory is now working to full capacity both day and night, and sample machines were brought over by Mr. Burns on his trip home.

These machines, which will be known as the "Columbia-Europa" product except in England, where they will bear the name of "Regal," are designed to permit Columbia dealers to successfully compete with the cheaper types of machines made in Europe at the present time, and will be furnished in two styles, horn and hornless. One attractive model that is undoubtedly destined to achieve world-wide popularity sells at \$3 net for the hornless machine and \$3.50 net for the horn machine, f. o. b. Bremen or Hamburg.

The machines will be furnished in three colors—mahogany-colored cabinet with brown panel and mahogany-colored horn; oak-colored cabinet with oak panel and oak-colored horn; black cabinet with a light panel or one with gold medallions carrying a dark red or black horn. These panels are ten centimeters in width and encircle the entire body of the cabinet, and the horns are decorated with gold lines. The machines are packed in individual corrugated containers and will be packed twenty to a case. The horns will be packed sixty to a case. There are at present six models in the Columbia-Europa line and four more will probably be added in the near future. One of these will probably be cheaper than the \$3 model, while the others will be more expensive. The machines carry a ten-inch turntable and the motor will play a twelve-inch record. Coincident with the introduction of these new Columbia machines for export trade the following machines are withdrawn from export distribution: BZ, list \$17.50; BWT, \$18 list, and Harmony, \$15 list.

"These machines will be carefully made in every particular," said Mr. Burns, "and will afford the Columbia export trade a splendid sales proposition that will give them substantial profits and place them in a position to meet any and all competition.

"Business conditions in Europe are generally satisfactory. Our London house closed the best year it ever experienced, while our business in Austria Hungary was very gratifying. Europe is fast recovering from the disastrous effects of the Balkan wars and the outlook is decidedly encouraging.

"American music is scoring an emphatic success abroad, and wherever one goes, England, France

or Germany, the popular American songs are the ones that are continually heard. For example, on one song, 'You Made Me Love You,' over 250,000 records were sold, making it one of the best selling records ever introduced."

NEEDLE COMPANY INCORPORATES.

The Velvetone Wood Needle Co., 509 Hall Building, Kansas City, Mo., has been incorporated with a capital stock of \$20,000 for the purpose of manufacturing and marketing a new form of wood talking machine needle. The officers are: F. Alexander, president and manager; Clarence Alexander, vice-president, and O. A. Schramm, secretary and treasurer.

Clifford R. Ely, the popular traveling ambassador for the Columbia Co.'s wholesale department, left Sunday night for an extended trip through the South. Mr. Ely has been spending the last few weeks in New York, and during this time had closed arrangements with a number of prominent

local concerns in various mercantile lines to handle the Columbia products.

SUPPORT THE STEVENS BILL.

Dealers Should Write Their Senators and Congressmen in Favor of Fair Trade Principles.

The Victor Talking Machine Co. sent out a letter to its dealers this week calling their attention to the importance of the measure now before Congress known as the Stevens bill (H. R. 14,305). The letter to the Victor dealers reads in part:

"You know, of course, how important it is that this bill should become law, as it would be national recognition of the fair trade principle, and effective prohibition of the predatory price-cutting methods that are ruining so many dealers and creating trade monopolies. We trust that you will promptly take similar action and write immediately to your Senators and Congressmen in favor of this bill, mentioning it by name and number—Stevens bill (H. R. 14,305)."

Announcing the Pathéscope

YOUR ATTENTION IS RESPECTFULLY INVITED TO THE LATEST AND GREATEST INSTRUMENT FOR HOME ENTERTAINMENT, INSTRUCTION AND AMUSEMENT—

THREE NEW VICTOR ARTISTS.

Emmy Destinn, Lucrezia Bori and Julia Culp to Be Represented by Important Musical Numbers in the Victor Library.

The Victor Talking Machine Co. has just closed arrangements with Emmy Destinn, the famous soprano of the Metropolitan Opera Co.; Lucrezia Bori, the new soprano of this same prominent opera company, and Julia Culp, the great Lieder singer, and announces that these internationally prominent artists will record exclusively for the Victor Red Seal library. The first recordings of these celebrated artists will be announced in a supplement of the Red Seal catalog to be issued in the near future.

Emmy Destinn's first Victor recordings consist of a lovely air from the first act of "Mignon" and a highly dramatic air from Act II of "Madame Butterfly." Both of these selections are admirably well suited to Mme. Destinn's beautiful soprano voice, which is heard at its best in these two familiar and popular operatic airs.

Lucrezia Bori, the popular operatic soprano, is well known both here and abroad, her interpretations of many difficult soprano roles having been highly praised by musical critics. Her latest success at the Metropolitan was the portrayal of the wife in "L'Amore die tr re," in which she scored one of the greatest successes in the history of opera in America. Mme. Bori has chosen for her first Victor records two numbers from Verdi's "Traviata" and Leoncavallo's "Pagliacci," both of which are charmingly sung.

Mme. Julia Culp, the distinguished Holland mezzo-soprano, has won fame on the concert stage in all parts of the world, and famous critics have praised her warm, rich tones in the most eulogistic terms of appreciation. Mme. Culp has chosen for her first Victor recordings a favorite German cradle song and an old English ballad, "Drink to Me Only," which is exquisitely sung in the clearest of English, while the singer's rendering of Brahms' beautiful "Lullaby" is a tender and lovely one.

AGAINST FALSE STATEMENTS.

National Association of Credit Men Back of New Federal Bill That Would Prohibit the Mailing of False Statements for Purposes of Obtaining Credit—Text of the Bill.

The National Association of Credit Men, which was largely responsible for legislation strengthening the bankruptcy law, has recommended to Congress the enactment of a law prohibiting the transmission through the mails of false statements for the purpose of procuring credit. A bill (H. R. 14,328) to that effect has just been introduced by Representative Sabath. It reads as follows:

"That any person who shall deposit or cause to be deposited in any post office or station thereof, branch post office or street or other letter box of the United States, or authorized depository for mail matter to be sent or delivered by the post office establishment of the United States, or shall knowingly cause to be delivered by mail according to the direction thereon, any letter, writing or circular containing or being a materially false statement and known by him to be materially false respecting the financial condition or means of himself, or any other person, firm or corporation, in whom he is financially interested or for whom he is acting, for the purpose of procuring, either from the person, firm or corporation to whom such statement shall be delivered or addressed, or from any other person, firm or corporation, either the delivery of personal property, the payment of cash, the making of a loan or credit, the extension of a credit, the discount of an account receivable, or the making, acceptance, discount, sale or endorsement of a bill of exchange, or promissory note, for the benefit either of himself or such person, firm or corporation in whom he is interested or for whom he is acting, shall be punished by a fine of not more than \$5,000 or by imprisonment of not more than one year, or both by fine and imprisonment, at the discretion of the court."

The National Association of Credit Men, in conjunction with the American Bankers' Association

in 1909, prepared a draft of the so-called uniform false statement law. This statute, substantially in the model form, has been enacted in New York, California, Connecticut, Delaware, Indiana, Louisiana, Maine, Missouri, New Jersey, Pennsylvania, Rhode Island, Utah and Vermont. In other States there are in force statutes dealing with this question, though differing considerably from the model statute. Until such time as the uniform statute has been generally adopted the false statement act by States, while adequate in punishing offenses wholly within a State having the law, is not protective against false statements in interstate commerce, which is usually consummated through the agency of the mails. This difficulty, it seemed to the association, could best be met through the enactment of a law by Congress prohibiting the transmission through the mails of false statements in writing for the procuring of credit thereon.

HOLD GRAND OPENING.

Cowperthwait & Co. Celebrate Opening of Its Talking Machine Department.

Cowperthwait & Co., the prominent furniture house with stores at 103 Park Row and 121st street and Third avenue, New York, held the grand opening of its new Columbia department on April 4. Edward Woolley, connected with the Columbia Co. for several years, has been appointed manager for the two departments, and his lengthy experience with Columbia policies and products well equips him to achieve a pleasing success in his new position. The Columbia department in the uptown Cowperthwait store is an unusually attractive one, the company having spent considerable money to make the numerous demonstration rooms sound-proof and artistic. Cowperthwait & Co. cater to an extensive and fast-growing clientele, and should find Columbia machines and records a valuable addition to their business.

Some men believe the almanac; some think the weather bureau accurate; still others have a hunch that this year the home baseball team's going to win the pennant, you betcha!

THE "OGDEN" RECORD SECTIONAL UNIT and FILING SYSTEM

The First and Only Satisfactory Record Cabinet on the Market. Simple and Inexpensive.

THE most complete record filing system ever offered. It enables you to file records so you can put your hands on any record in stock in four seconds. Equipped with spring in each compartment that holds all records in upright position regardless of quantity of records filed and keeps them from warping.

Simple, adjustable signal system for quick filing and keeps record of duplicates before you at all times. Enables you to put your hand on any kind of record without reference to catalog, and work off dead records.

Requires small space and has big record capacity. Cut shows three-section cabinet, each section having 300 record capacity. Accessory and supply drawer at base. Base furnished without legs if desired.

Whether you stock the full catalog or just a few records you need this cabinet—and you need it now! Cabinets finished in all standard woods.

THE "OGDEN"

(Patent Applied For)

ENTER JOBBING FIELD IN NEW YORK.

Phonograph Corporation of Manhattan, Recently Incorporated, Opens Wholesale Headquarters at 433 Broadway, with Frank K. Dolbeer in Charge as Manager—To Handle the Entire Edison Line at Wholesale—Retail Quarters to Open on Upper Fifth Avenue.

Frank K. Dolbeer, for the past fifteen years manager of phonograph sales for Thomas A. Edison, Inc., and its predecessor, the National Phonograph Co., and who is well known and popular in the trade throughout the country, resigned recently from that position for the purpose of becoming manager for the recently organized Phonograph Corporation of Manhattan, jobbers and retailers of Edison machines and records in New York City.

As recently announced in The Talking Machine World, the new company, which has the backing of Chicago and New York capitalists, has leased the building at 473 Fifth avenue, in the heart of the exclusive musical and business district near Forty-second street, of which possession will be taken on May 1. Contracts are now being let for the re-

F. K. Dolbeer.

modeling of the structure throughout in a most elaborate manner, with a conspicuous but artistic tile front, a commodious recital hall in the rear of the first floor and other fittings in keeping. The cost of the work will be in the neighborhood of \$50,000, and it is expected to be finished in time for the company to occupy the quarters about the middle of August.

The Phonograph Corp. of Manhattan has already taken possession of a large floor at 443 Broadway, running through to Mercer street in the rear and including over 10,000 square feet of floor space, which will be used as a storage and shipping center for the jobbing end of the business. Only sufficient goods will be carried in stock at the Fifth avenue quarters to meet the demands of the retail trade.

Mr. Dolbeer and G. L. Babson, one of the Babson family of Chicago, well known in the phonograph trade, his assistant, opened for business at the Broadway address on April 6. A stock of sample instruments were placed upon display at once and shipments of disc and cylinder machines and records have been coming from the factory in a steady stream since that time. A number of pleasing orders for goods were received from local Edison dealers during the first week, and Louis F. Barg, of 7810 Third avenue, Brooklyn, was the first dealer to be signed up by the new company.

In speaking of the plans of the Phonograph Co., of Manhattan, Mr. Dolbeer said: "New York is practically a virgin territory for the exploitation of the Edison phonographs and records of the newer types, and it is the plan of our company to go after the business in a most aggressive manner. When our uptown quarters are opened the offices of the company will move to that address and a campaign of advertising will be carried on in the broadest sort of way and in a manner that will not only aid our own business, but will tend to benefit materially the business of every concern in New York and vicinity handling the Edison products. From our own experience and that of other Edison jobbers already established we are on the threshold of a new era in the talking machine trade."

DINNER TO FRANK K. DOLBEER.

Tendered a Farewell Banquet by the Heads of the Various Departments of Thomas A. Edison, Inc., Upon His Resignation as Manager of Phonograph Sales for the Company.

The esteem in which Frank K. Dolbeer is held by his former associates with Thomas A. Edison, Inc., was indicated on Saturday evening, April 4, when, following his resignation from the post of manager of phonograph sales for that company, which he held for fifteen years, to become manager of the newly organized Phonograph Corp. of Manhattan, the heads of the various departments of the Edison Co. to the number of thirty-six tendered him an elaborate farewell dinner at the Hotel Washington, Newark, N. J.

During the course of the dinner Mr. Dolbeer was presented with a handsome gold watch of the latest model, suitably engraved, which was accompanied by a valuable chain of platinum, set with pearls. The presentation speech was made by Charles H. Wilson, vice-president and general manager of Thomas A. Edison, Inc., to which Mr. Dolbeer responded and expressed his sincere appreciation in his usual enthusiastic manner.

Wm. H. Meadowcroft, who has been private secretary to Thomas A. Edison for the past thirty-five years; E. H. Phillips, credit manager, and N. C. Durand, manager business phonograph department, made brief speeches. At the conclusion of the dinner Mr. Dolbeer was the recipient of an elaborate autographed menu, which contained a photograph of Mr. Dolbeer, with a little history of his life, and "moving pictures" of some of the striking moments of his career.

The dinner broke with the drinking of the following expressive toast:

Here's to you, Frank Dolbeer,
Here's to you, our jovial friend!
And we'll drink the toast before we leave the company,
We'll drink before we part,
Here's to you, Frank Dolbeer.

A. C. IRETON PROMOTED TO MANAGER

Placed in Charge of Phonograph Sales Department of Thomas A. Edison, Inc.

A. C. Ireton, who has been connected with the Edison phonograph interests for seventeen years, most of that time as assistant to the manager of phonograph sales, has succeeded Frank K. Dolbeer as head of the phonograph sales department, following the recent resignation of the latter to be-

come manager of the Phonograph Corp. of Manhattan. Mr. Ireton is well known to the Edison jobbers and dealers throughout the country and is well fitted to fill his new and responsible position in a most capable manner.

DEATH OF GEORGE A. LONG.

Head of Long Furniture Co. and George A. Long Cabinet Co., Hanover, Pa., Passes Away After a Brief Illness—A Prominent Business Man and Citizen—No Change in Conduct of Business.

(Special to The Talking Machine World.)

HANOVER, PA., April 3.—George A. Long, head of the Long Furniture Co., and of the George A.

George A. Long.

Long Cabinet Co., of this city, died at his home here last week after a very short illness. He was fifty-six years old and was born in Hanover, where he spent his entire lifetime.

The Long Furniture Co. was established thirteen years ago and the George A. Long Cabinet Co. was organized several years later for the purpose of making talking machine cabinets for the prominent manufacturers and also record cabinets for the general trade. With both classes of cabinets the company met with particular success, due largely to the business ability of Mr. Long in manufacturing and marketing his product.

Mr. Long was one of the most prominent citizens of Hanover, took a lively interest in the civic and social affairs of the city. He was one of the organizers of the Hanover Trust Co., a member of the Masons and other orders, and a pronounced lover of music, which influenced him to organize the local choral and oratorio societies.

Mr. Long was highly respected by his friends and associates as a man of high principles and whose word was as good as a written contract in any transaction. The funeral on Tuesday was largely attended.

The business of both the Long Furniture Co. and the George A. Long Cabinet Co. will continue as before the death of Mr. Long with Clement Beechcroft continuing to represent the latter company in the talking machine trade.

A COMPANION EDUCATOR

To the Talking Machine is the Pathscope, a Compact Home Cinematograph—Will Interest Trade—Chat with Willard S. Cook.

Many talking machine dealers in New York and nearby territory recently visited The Pathscope

dealers from Maine to California, and we are enthusiastic over the future of the Pathscope in this country."

Mr. Cook also pointed out that the Pathscope, by means of an ingenious arrangement, generates its own (incandescent) electric light. This is done by the simple action of turning a handle. Other

The Pathscope in Operation—An Entertainer and Educator.

Salon in Aeolian Hall, 33 West Forty-second street, New York, in response to an invitation sent out by Willard B. Cook, manager of this salon. The Pathscope, which is a very simple and compact home cinematograph, is manufactured by Pathé Frères, the world-famous moving picture house, and has already achieved considerable popularity abroad.

In a talk with The World Mr. Cook remarked that the talking machine dealer furnishes the ideal distributor for the Pathscope, as it forms a companion entertainer to the better grades of talking machines. "While investigating the sales of Pathscopes in Great Britain and France, where many thousands are in daily use, I found that the dealers in talking machines were the most successful distributors. After a year spent abroad, I came back convinced that the Pathscope will become as popular here as the phonograph. Our first shipment was sold out before it arrived here, and the cable order we placed for the second shipment has already been doubled. Inquiries are coming from

larger models for use where electricity is available take current from any electric light socket, doing away with the use of a crank. The Pathscope uses a special narrow-width film that is absolutely non-inflammable and may be handled without the slightest danger, which is responsible for its being approved for home use by the fire authorities. The owner of a Pathscope may exchange films purchased with the machine as often as desired by the payment of a small fee through the Pathscope film exchanges which are being established in all principal cities.

The Winner of The Columbia \$250.00 Prize

In the January issue of The Talking Machine World the Columbia Graphophone Co. offered a \$250 prize for the best suggestion made by any World reader, following which it would be possible to secure closer and more profitable relations between manufacturer and dealer.

The offer included every dealer in the United States and Canada, and it afforded an opportunity to get original, co-operative suggestions into a definite, concrete form.

Inasmuch as I was appointed by the Columbia Graphophone Co. to act as a judge in the matter, I have concluded, after going over hundreds of letters received, that H. W. Gray, of Wilton, N. Dak., should be awarded the prize.

EDWARD LYMAN BILL

yet. The first three months of this year have been the best in the history of the concern. We believe our output is now the largest of any organization in the world that is devoted to the manufacture of talking machine needles."

If anybody wants to see optimism in the talking machine business the foregoing example of the John M. Dean Corporation, of this city, shows that the energetic work being done by this house is proving resultful.

The Dean Corporation is making a specialty at the present time of its improved half-tone and loud tone needles in new style envelopes. It will put a jobbers name on these envelopes or will pack them in Puritone envelopes, guaranteeing the quality. It also features the "Dean-packed" needles, in which 1,000 are sold at a time instead of 100, for there are five boxes of 200 each, extra loud, loud, opera, medium and soft, all packed in one carton.

MANUFACTURE A LARGE LINE.

The Triumphon Co., Ltd., of Berlin, Makes Not Only an Immense Line of Talking Machines, but Accessories of All Kinds for Present or Prospective Manufacturers.

(Special to The Talking Machine World.)

BERLIN, GERMANY, March 30.—One of the busiest concerns in this country, devoted to the manufacture of supplies and talking machine accessories, is the Triumphon Co., Ltd., of this city, who has long made a specialty of supplying motors, sound boxes, tone arms, as well as complete talking machines built along novel and interesting lines.

They turn out forty different models of complete talking machines, with or without horns, giving expression to almost every line of taste. Their advertisement (which appears on page 41 of this issue of The World) is well worth reading, as those engaged in the manufacture of talking machines will find news of interest therein. The Triumphon Co. claim to meet all competition in the matter of price, quality and facility of output. A new catalog, No. 32, has been gotten out by this company in the English language, which will be sent to those interested on request.

GREAT TRIBUTE TO THE VICTROLA

As an Educational Developer in the School Room Paid by Ernest G. Hesser, Supervisor of Music in the Schools of Pasadena, Cal.—Details of Great Work Accomplished.

With the rapid strides which the educational department of the Victor Talking Machine Co. has been making in the short while that it has been established, it is indeed pleasing to note that this

shown in use in the school room of a large school in Pasadena, Cal., where it is assisting the teacher in telling the children the story of "Lohengrin." The teacher is personally explaining the story of this famous opera and by throwing the scenes from the opera on the screen and accompanying it on the Victrola, is giving a detailed lesson on this opera which is being greatly appreciated by the pupils.

In connection with this photograph, Ernest G. Hesser, supervisor of music in the schools of Pas-

Using the Victor to Explain "Lohengrin" in Pasadena School.

department is in daily receipt of photographs accompanied by letters of appreciation, portraying in detail how the Victrola is being used in school rooms from coast to coast. These photographs indicate clearly the practical value of the Victrola in the school room as an educational factor, and the endorsements by the supervisors of music and individual teachers signify impressively the co-operation which exists between the educational authorities and the school room talking machine.

In the accompanying illustration a Victrola is

adena, has written the following letter of appreciation to the Victor Talking Machine Co.:

"Last year I put five Victrolas and five sets of records into our twenty grammar schools, one school keeping it a month and then moving it on to another. This year two of the schools have bought their own. They have been of special value in our seventh, eighth and ninth grades, or intermediate schools, where we study the musical forms, both vocal and instrumental. After the music form has been explained then we illustrate with the best records. The use of the Victrola has made this study of forms very interesting to the children.

"We also use them for folk dancing and marching, and for general culture work in all the grades from the kindergarten on up. They are also used at our parent-teacher association meetings both for culture and enjoyment.

"It has been of great value to the teachers and to me personally in that it has brought such a great wealth of music literature to us and, too, so much that we do not often hear. It is the greatest educational device of the age.

"I have been giving our pupils in the upper grades something new—I think it is original, at least I have not heard of it being done elsewhere. After having finished with the explaining of all the component parts of grand opera, then telling the children the story of "Lohengrin" act by act and throwing the scenes from the opera on the screen (lantern) and accompanied with the Victrola, giving the music that goes with the picture. It has been very successful—not only the children enjoying it, but the parents have turned out and filled our auditorium. I will send you a picture of this work which shows the class of eighth grade pupils, the lantern, screen, Victrola, etc. (Signed) Ernest G. Hesser, Supervisor of Music."

J. H. BECKER WITH HOEFFLER CO.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., April 7.—J. H. Becker, Jr., one of Milwaukee's best known talking machine men, has returned to the Hoeffler Mfg. Co., 306 W. Water street, where he has assumed his former position of general manager of the talking machine department, where the Victor line is featured. Mr. Becker, who has been engaged in the talking machine business in Milwaukee for the past ten years, has been away from the Hoeffler house for the past two years, during which time he has been manager of the Victor department, formerly conducted at the Espenhain department store, and manager of retail sales for Miss Gertrude Gannon.

NEW EDISON STORE IN MILWAUKEE.

Milwaukee Phonograph Co. Formally Opens Handsome New Quarters at 213-215 Second Street, That City—More Than 2,000 Visitors.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., April 7.—The Milwaukee Phonograph Co., jobber for the Edison line in Wisconsin and Upper Michigan, formally opened its handsome new retail Edison store at 213-215 Second street on March 21. More than 2,000 people visited the establishment, and the Edison line has been given such wide publicity in Milwaukee that sales of machines and records climbed higher during the first two weeks than Manager William A. Schmidt had ever anticipated. The honor of making the first sale on the opening day went to Miss Margaret Schumacher, office manager of the Milwaukee Phonograph Co. The machine was a \$250 Edison disc and was sold one hour after the store was opened.

True to the predictions of Manager William A. Schmidt, the new Edison store proved to be something entirely different and more elaborate than any retail talking machine establishment ever opened in Milwaukee. More than \$7,000 was spent in remodeling and in the fixtures and decorations. The fixtures and woodwork are in silver gray oak and the interior of the store shows excellent taste. The general color scheme is black, gray and gold. The walls in the main demonstration room and in the various other demonstration parlors are covered with silk tapestry, while the stencil work on each panel is different and is done in six different colors.

The various lighting fixtures are of special design and have attracted much favorable comment. The entire work of arranging the store and providing the fixtures was done by the Niedecken-Wallbridge Co., interior architects of Milwaukee.

There is more than 15,000 square feet of floor space in the two floors. Five large demonstration rooms, the offices and shipping rooms take up the first floor, while the second floor is given up to the warerooms of the wholesale department of the Milwaukee Phonograph Co.

The new retail department is in charge of Frank Tipton, formerly with the Phonograph Co., of Chicago, although William A. Schmidt, manager of the Milwaukee Phonograph Co., has general supervision. Three new sales people have been added, while the office force has been increased.

VISITING THE UNITED STATES.

(Special to The Talking Machine World.)

LONDON, ENGLAND, April 5.—Two prominent graphophone men left these shores March 28 on a few weeks' visit to the States. They are Louis S. Sterling, British manager, and G. L. Funnell, works manager, of the Columbia Graphophone Co., London. They were given a hearty send-off by a select gathering of trade friends who journeyed to Waterloo for that purpose.

NATURE OUTDOES TALKER MAN.

Benjamin Switky, the well-known local Victor distributor, sends the following characteristic paragraph on a postcard from Hamilton, Bermuda, where he is spending a short vacation with his family: "Nature has been so wonderfully kind and generous to Bermuda that local talking machine men find it hard to interest the people in man-made wonders." Incidentally, Mr. Switky reports that he is enjoying himself immensely.

THE TALKING MACHINE CO.
12 North Michigan Avenue : : : Chicago

FROM OUR CHICAGO HEADQUARTERS

CONSUMERS' BUILDING, 220 South State Street, E. P. VAN HARLINGEN, MANAGER.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 11.—Conditions in the local machine trade, both wholesale and retail, show little change over last month. There still exists a very unfortunate record shortage in certain of the lines, and little relief is expected for some time yet. There is also a shortage in practically all makes of smaller machines, which works little harm, however, for more expensive types benefit correspondingly. The sale of dance records continues to be very heavy, and Lent appears to have had little effect on the tango. A fair amount of Easter records has been sold, however.

Lyon & Healy Business Keeps Up.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, reports that wholesale business in his department is very good; in fact, shows a big gain. Retail trade is also reported as keeping up in fine shape. Mr. Wiswell reports comparatively little relief from the shortage in records that has existed so long.

Lyon & Healy continue to produce some very fine advertising matter exploitive of the Victrola. One of the latest novelties to be used is a cardboard clock, two feet four inches high and nineteen inches wide. The hands are so shaded as to create the illusion that it is real. On the face of the clock is written in red letters, "Time for a Victrola." In place of the hours, photographs of twelve Victor artists are reproduced. Melba represents one o'clock, and following in order are Tetrizzini, Ruffo, McCormack, Kreisler, Lauder, Schumann-Heink, Farrar, Pryor, Victor Herbert, Evan Williams and Caruso. In reading the hours one might say, "It is almost Tetrizzini after Pryor." On the pendulum is written "Always ready," which can be taken to mean either that the Victrola is always ready or that Lyon & Healy are always ready to serve their dealers.

Another bit of advertising that is striking is in the form of a sixteen-sheet poster to be used in Chicago by Lyon & Healy and which is sold for use by Victor dealers in other cities. The poster represents a veranda at a summer resort. The young couple dancing to the music of a Victrola which is characterized as the "Ever Ready Home Orchestra," which name was given to the Victrola by R. B. Gregory.

Mr. Wiswell leaves the latter part of next week for an Eastern trip which includes a stop at Atlantic City, where he will arrange for hotel accommodations for the talking machine jobbers'

convention which will be held there July 6 and 7. Although it has not yet been settled, the Chalfonte Hotel will probably be the scene of the jobbers' activities.

Geissler on Tendencies.

Arthur D. Geissler, general manager of the Talking Machine Co., of Chicago, and also of the New York Talking Machine Co., of New York City, N. Y., is in Chicago for about a three weeks' stay. Mrs. Geissler accompanies him and they are stopping at the Blackstone.

"There is still a very marked difference in the volume of business being done by the talking machine trade as compared with any other line," remarked Mr. Geissler in a chat with The World. "The business of the two jobbing houses with which I am associated, for instance, has shown between 30 and 40 per cent. increase during the months of January, February, March and so far in April, as compared with the corresponding period of last year, and the period last year was the best in our history.

"Dealers come in here and in New York complaining of the enormous amount of business they are losing because of the shortage in Victor machines and records. When you pin them down, however, as to the amount of business they are actually doing this year as compared with last year they freely admit that it is way ahead, many saying the increase is between 40 and 50 per cent. The fact is that the great American pulse is keyed up to the point where dealers simply cannot bear to see sales going out of the front door and in their chagrin they lose sight of the really remarkable business they are doing.

"Two instances" occurred recently right here in Chicago which illustrates phases of this remarkable talking machine business which you may care to place before the readers of The World.

"A large Illinois dealer came into my office and was talking of the wonderful Victor business, how it had grown, how it was keeping up, and how difficult it was to secure stock enough at all times to take care of the demand. He said:

"I have had to turn down several trade propositions recently. I have had a number of propositions to take in pianos in exchange for Victrolas. The trouble, however, seemed to be that the people expected too much for their pianos. I did not make the trades, for I was not anxious to take back the pianos, inasmuch as I knew I could sell the Victrolas and might not be able to place the pianos so easily. Then, again, you know that we

can get all the pianos we want of most makes.

"Then take this and consider it. A Chicago dealer phoned us up and asked if we could furnish him with a piece of wood having the fume oak Victrola finish. He had an order for a piano which was to be finished to match the Victrola, which the customer had in the house. I did not treat the request as anything unusual, but simply told him that I would be glad to send him a sample of the fumed Victrola finish and suggested that he might send a finisher to the office to see just how the fumed oak Victrolas come through. This is the first request of that kind we have had, and I thought that it was not only very interesting, but probably very significant."

Harnden Leaves Wurlitzer's.

F. H. Harnden, who has been assistant to Fred A. Simon, assistant manager to the house of Wurlitzer and actively connected with the wholesale talking machine department, has resigned his position and has become interested in an extract manufacturing concern. No successor to Mr. Harnden has as yet been appointed.

Larger Machines in Demand.

Local Manager C. F. Baer, of the Columbia Co. reports that one of the most satisfactory features of the business during the last month has been the fact that the \$100, \$150 and \$200 machines are being called for in far greater numbers than ever before. Mr. Baer accounts for this in that the talking machine is being looked upon more and more favorably by people who are able to pay the higher prices. "People who were prejudiced a short time ago are now buying heavily, not only the high grade machines, but also the better class records.

Mr. Baer reports an excellent Columbia business taken generally that is decidedly better than last year. The main trouble at the present time lies in the difficulty in getting machines, which reminds one of the condition at Christmas time.

"Increased freight rates will also mean another big increase in this business," said Mr. Baer. "When one realizes the far-reaching effects of the railroads upon general business and of its countless ramifications, we can see what a wonderful further uplift general business will enjoy when the railroads proceed to improve their roads and continue the work of extension as in years past. Of course, there are many arguments against allowing the railroads to increase their rates and cries of 'watered' stocks are not without foundation. It is true,

The Practical Fibre Needle Cutter—THE WADE

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone.

The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade
Fibre
Needle
Cutter No. 1

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points.

No. 1 is a very popular cutter which has given excellent service. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made.

EXACT SIZE

You can order through your Jobber. He will supply you; if not, send your order to us.

The wonderful success of the Lyon & Healy Fibre Needle Cutter in the last two and a half years is due to the following facts about the cutter:

The Blades of the Lyon & Healy Fibre Needle Cutter are made of the finest grade of properly tempered tool steel. The upper blade is pivoted above and back of the cutting edge of the lower blade. It is held in place by a very high tensioned spring to insure correct leverage and a perfect point at every cutting.

The cutter is fitted with a guide that prevents the cutting away of too much of the needle, and also has a receptacle that receives all the waste. It is very simple and easy to operate, and with ordinary usage should last indefinitely without sharpening.

This cutter is invaluable to all users of the Fibre needle, as a needle may be used twelve to fifteen times where one of the cutters is in use.

Now is the time to get your order in and share in the profits.

nevertheless, that unless the railroads get an opportunity to promote the many improvements that are contemplated, a depression that will affect almost every business will result."

Record Demand Well Balanced.

Mr. Baer sums up the record situation when he says that the entire Columbia catalog is selling well in each of the different classes. Numerous of the order numbers are receiving a bit more attention than one used to expect.

W. C. Fuhri, district manager, returned this month from a trip to Kansas City, Louisville and Indianapolis. Mr. Fuhri also reports business very good, with prospects considerably better. While Mr. Fuhri was away he noticed the large amount of dance records that the dealers were selling and also the unusually large number of "De Luxe" machines.

"Record sales continue to be very heavy," said Mr. Fuhri, "but with our immense capacity we are filling 95 per cent. of all our record orders. A big increase in the record business was anticipated by our company some time ago, and we were well prepared when the call came."

George P. Cheatle Promoted.

George P. Cheatle, well-known traveling salesman of the Talking Machine Co. and formerly in charge of the Michigan territory, has been made traveling sales manager and assistant to Roy Keith. Mr. Cheatle, whose portrait is reproduced herewith, now calls on certain dealers in the larger cities that are reached by his company and also supervises and assists the regular State travelers in the performance of their work.

Geo. P. Cheatle.

Mr. Cheatle's promotion comes after a long period of intelligent and thorough work in his old territory, and while the many friends he has made will miss him, they, of course, are gratified to learn that he has been given a wider field in which to exercise his abilities. Mr. Cheatle has been an ardent advocate of the idea of having professional dancers perform in talking machine shops, believing it to be a good medium by which the retail merchant may advertise himself and at the same time take advantage of the tremendous dance craze. While at Madison, Wis., recently Mr. Cheatle aided the "staging" of dances that were given in the warerooms of the Aton Piano Co. The dances were successful in every way.

Grocer Gives Victrola Concert.

One of the largest retail grocers of Chicago recently made arrangements with George W. Miller, a prominent Victor dealer of Ravenswood, Ill., whereby Mr. Miller gave a Victrola concert, with the assistance of H. L. Flentye, of the Talking Machine Co., in connection with a miniature exposition that was designed to advertise all of the many articles that are to be found in the modern grocery store. Between 1,000 and 2,000 invitations were issued to residents in the locality and the majority of them were used.

Mr. Miller was given ample opportunity to advertise his shop in connection with the display and gave a complete Victor program, which ranged from grand opera to the popular dance selections, made up to a great extent of the March and April lists.

Mr. Miller believes that in this manner he has acquainted many housewives in the neighborhood with the beauty of the Victrola and familiarized them with his institution. The idea is a very good one and was a success in every way.

Dictaphone Business Increases.

W. W. Parsons, local manager of the dictaphone department of the Columbia Co., reports a very substantial increase during March over the previous month and also over March of last year. Factory facilities have been strained in keeping up with the demand. Mr. Parsons reports that some recent agents for the dictaphone that have been appointed are: The B. F. Swanson Co., of Des

Moines, Ia.; A. E. Burt, of Peoria, Ill., and the Butts Typewriter Co., Omaha, Neb.

Visitors and Personals.

George Wheelock, of South Bend, Ind., was a recent talking machine dealer visiting the Great Central Market.

L. Keen Cameron, manager of the retail talking machine department at Wurlitzers, who is on a furlough in the Southwest, is said to be rapidly improving in health.

W. J. Becker, 801 Dempster street, Evanston, has installed a large Columbia stock and now handles both the Victor and Columbia lines.

J. B. Simoney has bought out the stock of Joseph Kral at 1217 West Eighteenth street and has added a large stock of Columbia goods.

A recent visitor from Rockford, Ill., was E. G. Ogren.

Mr. Simon, of Simon Bros., of Gary, Ind., who was in the city a short time ago, announced his removal into a fine new store. Mr. Simon arranged for a large stock of Victor goods.

Other Victor dealers who were in the city the past month are John Dahlin, St. Charles, Ill.; Ray E. Bannon, Morris, Ill., and Anton Molle, Antigo, Wis.

C. W. Copp, of South Bend, Ind.; L. Lambeck, Beaver Dam, Wis.; G. E. Lester, Hoopston, Ill., and W. S. Vowels, Vincennes, Ind., were also recent visiting dealers.

James Clark, buyer for the James Black Dry Goods Co., Waterloo, Ia., was in the city replenishing the company's much depleted Victor stock.

Mr. McLogan, of McLogan & Pierce, Calumet, Mich., was in the city some time ago and reported that despite the copper strike business was exceedingly good in that section. Mr. McLogan said that in one day he sold eight large machines. While here Mr. McLogan placed a very large order for the coming season.

Other visitors from out of town included Mr. Hanners, of the Hanners Organ Co., of Hanners, Ill., and Messrs. McConnell and Hoy, from Woodstock, Ill.

Mr. Solomon, buyer for the talking machine department at Rothschild's, has just returned from Europe.

James Lyons, who carries the Edison, Victor and Columbia lines, has built five soundproof booths that are models of their kind.

Mr. Becker, manager of the Hoefler Manufacturing Co., of Milwaukee, Wis., was a recent visitor to the Talking Machine Co.'s offices. Mr. Becker reported that business in Milwaukee was very good, but he, like dealers in other parts of the country, was experiencing a shortage on a majority of the records that his customers were asking for.

Miss Katharine Jones is the latest addition to the forces of the talking machine department of the W. W. Kimball Co. Miss Jones is an adept at the new dances and on many occasions uses her knowledge of the terpsichorean art to advantage in dealing with calls for dance records.

Working Out New Sales Ideas.

Despite the tremendous call for records that the Talking Machine Co. has been receiving the past month and the vast amount of work in supplying the demand, Sales Manager Roy Keith has found time to carry on much instructive work and the formulation of many sales ideas for the company's dealers.

One of the first letters to be sent out during the past month was in relation to the list of "500 Best Selling Records," which Mr. Keith had brought up to date and which included the March list. This list of 500 has proved immensely popular with dealers all over the Middle West and with their customers. It furnishes a convenient reference whereby people of average musical taste can find practically all of the records that they should have in their libraries—at least, all that they should have at this time. The pamphlet listing musical shows in Chicago at the time the letter was mailed was also much appreciated inasmuch as the theatrical and musical ideas of the entire Middle West are well typified by the taste of the average Chicagoan.

NEW COMPANY TO MAKE RECORDS

Is Being Organized in Chicago and Incorporation Papers Will Be Filed in Ninety Days.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 11.—Information was received by The World to-day to the effect that the "National Talking Machine Record Co." is being organized here for the manufacture of records, and that within about ninety days incorporation papers will have been filed, officers elected and the entire organization perfected.

It is said that the new company will manufacture both lateral cut and "hill and dale" disc records and that a large space is already under consideration for the manufacturing plant.

A number of Eastern and Western business men are interested in the venture, including several theatrical men. The latter plan, in making the regular theatrical contracts, to include a provision for the making of talking machine records by the different artists booked by them.

HEAR THOSE WEDDING BELLS.

Don C. Preston and Miss Edna Fletcher Married—Will Reside in Milwaukee.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 10.—Two days more and Don C. Preston will hear Victor record No. 31,227

Don C. Preston.

played under entirely different circumstances than ever before. Likewise every one of the Easter lists will probably be put on 'cause it's a great big day for Don. Easter Sunday will find him in Des Moines, Ia., all ready for his wedding to Miss Edna Fletcher, of Winterset, Ia.

After "Lohengrin" Mr. and Mrs. Preston will leave for

Milwaukee, where they will make their home. Mrs. Preston has represented the Talking Machine Co. in Wisconsin and Minnesota for some time and is well known and well liked by the Victor dealers in that territory.

The popularity of the Style IX and X Victors in the general trade was well demonstrated by the remarkable response the Talking Machine Co. received, following the announcement of these styles as produced in fumed oak. So remarkable has been the call that many dealers are insuring a supply for the fall and winter trade.

Another of the Talking Machine Co.'s sales ideas has been in the form of a strong letter designed to be sent out previous to Easter week and used in connection with a list of records of hymns and sacred music by many famous singers, choirs, etc.

"The shortage in the record supply is still felt," said Mr. Keith, "although the factory's output has been tremendously increased. At least double the records are being sold at the present time as at the same time last year. The shortage is to be expected. We have built a number of additional racks in our record rooms and by offering a selected list of records that are comparatively easy to get, we are managing to keep our customers fairly well satisfied."

Dealer Bitten by Mad Dog.

H. S. Chesrown, Columbia dealer from Mansfield, Ia., has been in the city for about three weeks receiving treatment at the Pasteur Institute in Chicago. Mr. Chesrown was attacked by a mad dog in his home city and was severely lacerated about the hands in defending himself. He was obliged to bring the head of the animal to this city for examination by the officials of the institute. Mr. Chesrown reports a good business in the Columbia line, with especially heavy sales of grand opera records and popular numbers.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 34).

THE "W. & W." FIBRE NEEDLE CUTTER.

Details of the Perfection of Its Manufacture That Will Enlighten the Trade.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 10.—It should prove a subject of interest not only to talking machine dealers, but also to everyone who is the owner of one, to know something about the manufacture of the Wade fibre needle cutter.

S. O. Wade.

A very large proportion of those who use fibre needles are acquainted with the Wade cutter.

The accompanying illustration shows a corner of the Wade & Wade factory, where a very interesting

part of the manufacturing process occurs. In this room the delicate adjustments of the blades and the guides take place. As the cutters are received from the casting rooms after having first been well polished, they are prepared for the attachment of uprights and guide holders by first having the necessary holes punched in them.

The blades are made of imported Swedish steel, which comes in long strips and from which the blades are stamped out by a powerful die. They

Corner in Factory of Wade & Wade, Chicago.

are then tempered in a furnace which is heated first to 1,400 degrees Fahrenheit. It is soon reduced to 700 degrees Fahrenheit, which is the temperature best suited to holding a fine edge. Guides and guide holders are stamped out and formed in similar fashion to the blades, but instead of being tempered they are heavily nickelized. The uprights and the blade springs used in the No. 1 cutters are stamped out of a steel of great tensile strength. Springs used in the No. 2 cutters are coiled and are the most efficient springs obtainable for the purpose.

The blades are first ground on a high powered stone that operates under water. They are then given an added finish by hand and then hand polished. After all the parts are carefully assembled and adjusted the cutter is tested forty or fifty times to make sure of a perfect point that the Wade cutter is noted for. If any flaw is found in the blade the blade is thrown away, or if by any chance there has been a variation in the punchings or if the adjustment is incorrect, the entire cutter is thrown away.

S. O. Wade, president of Wade & Wade, states that business during March was very nearly double that done in February.

F. J. BOWERS, PATHÉ FRÈRES, TELLS OF WORLD TRIP.

Visiting Old Home in the West After Agency Trip to South Africa, the Antipodes, Oriental Points and Italy—His Interesting Impressions.

(Special to The Talking Machine World.)

CHICAGO, ILL., April 11.—Probably the youngest salesman in the world who is connected with the talking machine industry is Frank J. Bowers, of Pathé Frères, who has just completed a trip around the world for Pathé Frères, returning April 7 to Chicago to visit his old home, his family and his friends.

Mr. Bowers, who is to-day twenty-two years old, began his travels before he was twenty. He has always been interested in the talking machine and the music trade in general, and so when his good friends, Gene Greene, "Emperor of Rag Time," and Charley Straight, Greene's pianist, went to England and France to teach Europe rag time, Frank went along. He thought it might be interesting, and it was.

"We arrived at London just as rag-time began to be featured in English music halls and Gene opened at the Palace Theater in London with great success," said Mr. Parsons to The World.

"To me the English seemed slow in getting the spirit of syncopated music and regarded it at first as a novelty that would live but a short time. Once they got it, however, their enthusiasm never waned; and, between 'Everybody's Doing It,' 'Waiting for the Robert E. Lee,' 'Alexander's Rag Time Band,' and the coming of the tango and turkey trot dances, they soon became extremely enthusiastic over it and actually 'dropped their dignity,' as Irving Berlin has it, and were snapping their fingers and swaying as they sang, just like our own rathskeller performers. In fact, on several occasions, when great parades were held, at least half of the music of the regimental bands was American rag-time. I could hardly believe I was away from home, I heard so much of it. I liked the English for it—they seemed more like our own people, and it prevented homesickness on my part.

"While in London I had the pleasure of meeting M. Jacques Pathé, in charge of the English division of Pathé Frères, and made arrangements with him whereby I was given the position of appointing sales agents in the territory of the English division. I was then instructed to go to South Africa, and sailed for Cape Town, where I made my first calls on J. W. Jagger and Stuttaford & Co. The trip from England to South Africa was, of course, most interesting, and I was much in demand among the passengers for my Pathé recitals and my knowledge of the new American dance steps. I also arranged recitals for the crew and in turn for this they were very careful in unloading the ten machines that I carried with me, and my 200 records, so that at Port Elizabeth, where everything, including passengers, was unloaded in baskets, no machines were smashed nor wet.

"My first stop in the interior was at East London in Cape Colony, where I called on Baker, King & Co., who deal directly with the Kafirs and a large number of East Indians, who are employed there in various industries, such as mining, agriculture, etc. The Kafirs buy 'Taal' records. 'Taal' is a combination of English, French, Dutch and Kafir—a sort of 'kitchen Dutch' or what we

would call 'pidgin English.' These 'Taal' records are made up specially for this trade and many of the natives spend practically all the surplus of what they earn in acquiring a machine with a few of these records. They love music so well, and a talking machine is so prized that they will work for several months in order that they may own one of the cheapest of the machines. The owner of one is looked upon as being an aristocrat, and the owners themselves are oftentimes afraid of their own possession, believing that something is within the machines. They are afraid to attempt to open them and handle a machine most gingerly at all times.

"I was obliged to transport my machines and records from Port Elizabeth to East London on a railroad that had a two-foot gauge—almost as small as the little trains we have in our amusement parks. Four passengers sit abreast, and the two on the ends are sitting well out over the track. In spite of the fact that we ran far behind our schedule, the train crew and several of the men passengers took time during the trip to play a half hour of what I would call scrub football. From Pietermaritzburg I traveled to Durban, where I witnessed an African hurricane.

"The South African people pleased me very much. They have the spirit of the pioneer and are very enterprising. I aided in exhibiting machines at various agricultural shows and had an opportunity to get close to the South African farmer and his ideas.

"From Cape Town I sailed direct to Australia, which took twenty days, and landed at Adelaide, Australia is most like America. The people are enterprising and quick to do business. The sale of religious records there is very heavy. Rag-time records were also very popular, and I arrived there at the same time that Gene Greene did on his travels. Of course it seemed good to see him, and the tremendous hits that his songs made in the music halls boomed the sale on this class of goods. Melbourne, Sydney, Brisbane and Adelaide are all fine cities and, as our business is well established there, the main part of my work was in distributing smiles and cigars.

"New Zealand was next on my route list. I found it very dull and slow, comparatively, and I think Mark Twain was justified in asking why the cow-catcher was on the front of the train instead of the rear. Visitors in the hotels are not allowed to remain after 10 o'clock, and if this rule is violated, the visitor, the visitor, and the hotel keeper are all heavily fined. I soon returned to Australia.

"I next sailed for Ceylon, where I made only a short stop. From there through the Arabian Sea to Port Said, and from Port Said through the Red Sea and through the Suez Canal. It took us a day and a night to pass through this great water way. While passing through it, we were visited by a day and a night of cold weather that broke all records, and many of the superstitious Arabians were utterly frightened at what seemed to be a refusal of the sun to shine.

"My next stop was at Naples. Here, and in fact through all Italy, there is a wonderful market for talking machines. Next I went to Marseilles, France, and then to Gibraltar, and at last to England. After arriving at London I went to France and spent two months in our factory at Chatou, which is near Paris. After a few minor trips I then prepared for my return home; and, believe me, I was glad when the 'Mauretania' pushed her way into New York harbor.

"I will be here two or three weeks to visit my family and my friends; and, after making a four months' trip through Canada, will return to London. From there my future is yet undetermined and probably I will be sent to Shanghai, China, to manage the branch there, and I will have an opportunity to study the Japanese and Chinese trade in our great industry."

QUAKER CITY TRADE WELL PLEASED WITH CONDITIONS.

Majority of Dealers Declare That March Was an Excellent Month for Business—Gimbel Bros. Buys Balance of Keen-O-Phones from Pooley Furniture Co.—Meeting of Retail Dealers' Talking Machine Association—What the Dealers and Jobbers Are Doing.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., April 6.—The talking machine business in Philadelphia is forging nobly ahead, and there has never been as much activity and as much excitement as exists at the present time. The Victor dealers are all highly elated, for they have just emerged from the biggest month of the year thus far, in spite of the shortness of goods and records that are mostly in demand. The Edison has made a big stride forward during the month. The entire line of Edison phonographs has been installed in the Cunningham Piano Co.'s ware-rooms, N. Stetson & Co., Snellenburg & Co. and Ramsdell & Sons, as well as many other less important places, and in the course of a week there will be a large Edison establishment on the southwest corner of Eleventh and Walnut streets, which is now being fitted for that purpose. The Edison will be conducted there by Herbert F. Blake, and he will have fine warerooms, as well as a fine location.

The final wind up of the Keen-O-Phone Co. is now taking place through a sale of the remaining machines at Gimbel Bros. stores in this city and New York. The Keen-O-Phone Co. still has the warerooms on Broad street, but there is practically no stock with the exception of a few cheap machines which it is offering at very small figures.

When the Keen-O-Phone Co. ceased to exist the Pooley Cabinet Co. had upward of four thousand cabinets on hand, and the men who have the Keen-O-Phone Co.'s affairs in charge arranged that that company should produce sufficient machines for these cabinets in order that the Pooley Co. could come out of the deal. This was done and then the Gimbel Bros. and the Pooley Co. entered into an arrangement for the disposition of these machines at the Gimbel stores in New York and this city.

They were placed on sale there on Monday of last week. Gimbel Bros. allotted a considerable amount of space on the first and fourth floors, where these instruments are sold. Fifteen additional salesmen were added to the force to handle the customers, and it has been the most remarkable sale of talking machines ever held in this city. Every machine was marked at half the former selling price and some of them even less. In demonstrating the machines Edison and Columbia records have been used, but they have been cautioned by the Victor people against using Victor records and they are observing the caution. It is said that the Rex Co., which has taken over the record end of the Keen-O-Phone Co., will go extensively into the manufacture of records and will make a small machine which will be presented to a purchaser under an agreement to take so many records and continue to take them at specified times.

The Cunningham Co. has been dissatisfied with the arrangement of its warerooms and has removed its Edison disc talking machine hearing rooms to the rear of the store. A good business is being done, the only complaint being that it is

unable to get machines of a certain type fast enough.

N. Stetson & Co. has erected two large booths in the rear of its store and in mahogany to conform with the other finishings of the room. The selling is being handled by the old force, but it is expected that the new department will be placed in the hands of an experienced man.

The Girard Phonograph Co. at Tenth and Berks streets is the distributor of the Edison disc machine in this city, with Manager Cope, of the Snellenburg talking machine department, in charge. The machines are shipped to that point and from there are distributed to the Philadelphia dealers. The Girard Co. is also doing good missionary work in introducing the machine among out-of-town dealers.

The Wanamaker talking machine department is going to be considerably changed in the very near future. It will make one big display room and concert room out of the Louis XV. room, and will build new hearing rooms adjoining—twenty-six in all. At the present time it has eleven. It will rearrange the entire department. It has also rearranged its system and will follow up its sales and prospects closer than ever before. It will also handle more extensively in the future all kinds of talking machine supplies. Its stock will be very nicely displayed when the new arrangements go into effect.

C. J. Heppe & Sons had a satisfactory March in spite of the fact that they have been quite short on certain styles. Conditions are easing up a little bit. Among the recent out-of-town visitors at the Heppe store were J. Harry Halt, of Mt. Holly; Charles McLaughlin, of the Stoll Blank Book & Stationery Co., of Trenton, N. J.; S. C. Evans, of Milford, Del., and Samuel Stephens, of Norristown, Pa., all of whom report a fine March business.

Manager Eckhart is highly elated over the month's business done by the Pennsylvania Talking Machine Co. March was the largest month it has ever had, with the exception of last December. He says that he has not pushed his goods by advertising nearly as strong as last March, and yet his sales have been more than 50 per cent. greater. During the month quite a number of big accounts were opened, among which were the Kline-Eppihimer Co., of Reading, Pa., and the Regal Umbrella Co., of York, Pa., both firms having opened complete Columbia departments fully equipped in every way. Mr. Eckhart visited both places and helped plan the departments and was present to help start them off.

The Pennsylvania Talking Machine Co. has also had good success with the dictaphone. Among some of the firms supplied in March were the Atlas Power Co., the Armour Co. and a number of smaller concerns.

There will be a meeting of the Retail Dealers' Talking Machine Association at Estey Hall on

Wednesday evening, April 8, at which business of importance will be taken up, including shortage of records and what has been accomplished in the matter of stated charges on lease sales. All the new Edison dealers in Philadelphia have been invited to connect themselves with the organization.

H. A. Weymann & Sons note that their business in Victor talking machines for January, February and March was one-third greater than the corresponding three months of last year. Among the recent visitors at the Weymann store were C. H. Lichty, of Reading, Pa., and Charles H. Godfrey, of Atlantic City, N. J.—two active dealers. Mr. Godfrey intends to devote, in the very near future, considerably more space to the Victor line. Both of these gentlemen have been for many years active patrons of H. A. Weymann & Sons.

Louis Buehn notes that business for March has shown a very decided improvement, due partially to better shipments from the Victor factory. He had an increase over last year of over 35 per cent., which he considers is going some. His Edison dictating machine business for March has also been very satisfactory, and he sold quite a number of machines to the Witney-Kemmerer Co., the Frontier Press, and a very large order was placed by the Atlas Powder Co. in Wilmington, and it will also very shortly install a number of machines with the Du Pont Powder Co. The Business Show, which has just been concluded here and in which Mr. Buehn had an exhibit, was very satisfactory in its results. It had a great number of visitors and developed a number of very excellent prospects. Mr. Buehn is quite sure the results will fully warrant the expenditure in going into this show.

NEW HOME FOR GRAVES MUSIC CO.

Prominent Music House of Spokane, Wash., Now Settled in New Four-Story Building—Handsomely Decorated and Well Arranged.

(Special to The Talking Machine World.)

SPokane, WASH., April 7.—One of the finest music stores in the Pacific Northwest is the new home of the Graves Music Co. at 149-151 Fourth street, and to which the company moved this week from its old quarters at 111 Fourth street. The arrangement of the new store is according to the ideas of Fred W. Graves, president and manager of the company, and is up to date in every particular.

The building contains four floors and basement, with a mezzanine balcony running around the ware-room floor. On the second floor is a large recital hall, on the third floor separate parlors for the player-pianos, as well as the repair department, and on the top floor the musical merchandise department with all the instruments displayed in handsome new cases. The front of the main floor is devoted to the main warerooms and reception hall and the back is given over to the talking machine department and its seven soundproof testing booths, where both Victor and Edison machines are handled.

The main wareroom is floored with fancy inlaid marble, with the woodwork in mahogany finish. On the second floor the large showroom and the recital hall are finished in Circassian walnut and the decorations throughout are most elaborate.

The Graves Music Co., which was established in this city eighteen years ago with limited capital, now operates large stores both here and in Portland.

VISITING NEW YORK.

Russell Hunting, well known in the talking machine industry in London, England, arrived in New York last week, it being his first visit to this country in sixteen years. Mr. Hunting has many friends here who will be pleased to greet him while in this country.

If you feel that you must go about looking for trouble, carry a chip on each shoulder. It helps keep your balance when someone makes a football of your head.

The folks who do the least usually complain because other folks don't do more.

Edison DISC Phonograph Dealers

THE "Perfection" Attachment is built to play lateral cut records on the Edison Disc Phonograph. The ball bearing hanger joint gives it a free and flexible motion when traveling across the record; also it can be used with or without the feed rake. If you haven't seen or had this attachment, send us an order. You will surely buy more, as it is one of the best accessories ever placed on the market in the history of the phonograph business. It will surely increase your machine sales, as it gives perfect satisfaction to the retail purchaser. Dealers' price, \$2.50 net for all three finishes, gold, oxidized bronze and nickel.

REMINISCENCES OF EARLY TALKING MACHINE DAYS.

John H. Bieling, One of the Best Known Recording Artists in the Victor Library Prior to Becoming Connected with the Sales End of the Business Takes The World Representative Back to Early Days in Trade History and Relates Interesting Experiences.

"It certainly is pleasing and gratifying to see the marvelous development of the talking machine of to-day as compared to the small and primitive beginning of the work as I knew it twenty-two years ago," said John H. Bieling, of the sales staff of the New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor.

Mr. Bieling, who as one of the best known recording artists in the Victor library prior to becoming connected with the sales end of the business, is well qualified to comment on the growth of the talking machine business, and his reminiscences which he gave the representative of The World last week make unusually interesting reading, telling as they do of the real developments of recording art.

As told by himself, Mr. Bieling's reminiscences follow:

Some twenty-two years ago I belonged down in the old Fourteenth Ward—born and raised there; around Spring street and the Bowery. Four of us fellows used to "barber shop" on a Saturday night and Sunday, and by constant practice our voices blended in great shape in the real thing—good, old fashioned melodies and sentimental ballads. The quartet at that time was George J. Gaskin, Joe Riley, Walter Snow and myself. We called it the Manhasset Quartet.

In 1892 we had been working together about a year, when one day Gaskin told us about a man named Emerson who was manager of a concern over in Newark, N. J., called the United States Phono Co., who wanted a good quartet to make some records for him. All of us fellows worked in the day time and did our quartet work evenings. I was making stained glass windows at the time and never thought of making a regular profession of singing. Gaskin had to do some tall talking to persuade us to go over to Newark and work till all hours making these records. I assure you we were a pretty nervous quartet. The first time we went there we knew nothing of what was expected of us, but we took a chance.

Over the ferry, the train brought us into Newark and Gaskin steered us into a loft over some meat packing house about 50 by 100 and 20 feet, littered with machine boxes and barrels in every state of shipping and handling piled up everywhere. We at last got ready to make our first record and I assure you a funny sensation came over all of us. They had about nine horns all grouped together, each one leading to a separate machine connected with a piece of rubber hose. The operator then put the soft wax cylinders on the machines and let the recorder down and then said "All right, go ahead." I assure you I almost forgot to sing when I heard the sizzling noise coming out of the horns. However, we got through with that round fairly well, considering our nervous state, and after that we began to make some records and they sounded pretty good. Well, that was the first time I got real money for singing and I felt like a millionaire

going home that night. We worked contentedly along these lines for about a year, in the meantime holding down my job at my trade during the day. All was serene.

When—crash—someone invented a dubbing machine which meant that they could make any amount of records from a master record, and we could see fewer engagements coming our way with this new scheme. It certainly gave us a shock when we discovered that this new idea meant that one "Master Record" could be used to make duplicates until the wax wore out. This is how it was done: They built a machine with

John H. Bieling.

two mandrels, one under the other; on one they would put the cylinder with the song on and on the other a blank cylinder; then start the machine and throw the sound from one to the other without the services of the quartet. It was tragic, but, like all labor-saving devices, it gave birth to a greater field of work to develop records in. Where we formerly sang the same song forty times, now we sang forty different selections, satisfying the rapidly growing market for "canned music."

By this time our success as a quartet was quite famous, and we worked for all the record making companies then doing business. About this time, say 1895, we used to go over to Philadelphia and sing about once a month for a man named Berliner, a quiet, modest little German, who had us work in his little attic workshop and register our selections on a flat matrix. The machine and disc were his own ideas and manufacture, and independent of any other model then in use, so small and insignificant was the beginning of the greatest of all mechanisms in sound reproduction.

About 1896 I decided that I would let stained glass work get along without me. I took a chance

on an "artistic career." We sang for years into the same little old wax cylinders. However, Gaskin signed an exclusive contract with the Columbia Co., consequently breaking up the Manhasset Quartet. Next you find me in a quartet the members of which were Harry McDonough, S. H. Dudley, William F. Hooley and myself.

In 1898 C. G. Child, whom I had met through singing for Mr. Berliner, got us interested in a new company being formed, called the Victor Talking Machine Co. Eldredge R. Johnson was its founder, and, looking back over the years, in all seriousness I can say he is the one man responsible for the present marvelous development of the Victor talking machine of to-day. His "vision" and imagination has made possible the universal appeal of the talking machine and disc music as rated to-day.

Mr. Child suggested that the quartet contract to sing exclusively for the Victor Talking Machine Co. This is where the "Hayden Quartet" swung into line, and along with Caruso and the other stars, behold us for many years, about fifteen to be exact, singing harmoniously together in every sense of the word for the exclusive use of the Victor Talking Machine Co.

We went to London in 1902 and showed the British how to make "real records." For two months we had a large time as American representative singers. The longer I worked for the Victor Co. the more I became interested in the machine itself.

It was like getting religion! You want everyone else to get the same experience, and so make yourself the village pest. I talked machines into the homes of all my neighbors, friends, even the man I was paying off the mortgage to. By degrees the selling, or rather distributing, end of the business got hold of my imagination. Having sung for the public for twenty odd years, I wanted to make it my business to see that they all heard what I had sung. To do that they had to buy a Victor talking machine, and the managers of the company seemed to realize that my enthusiasm might be used in a very practical fashion. So Mr. Child suggested to A. D. Geissler, vice-president of the New York Talking Machine Co., that I be put to work and help tell the folks about the Hayden Quartet and the only original disc machine. I am now combining business and pleasure every day of my life by convincing all that I meet that it is the only machine to have whereby you get the exact reproduction as originally made.

Talking machine disc records composed of vulcanized India rubber were held recently by the Board of United States General Appraisers to be properly dutiable under the Tariff act of 1909 at 45 per cent. ad valorem, as parts of talking machines. The steel points used in talking machines to reproduce sound were assessed at the same rate as the discs.

Owing to the famine in Victor records at the present time, the Victor Co. announced to its trade last week that its commercial committee had decided to postpone the exchange cut-out of records until July or August, by which time the company will be in a better position to take care of it.

MISS WILSON'S COLUMBIA RECORDS.

Miss Margaret Woodrow Wilson, Eldest Daughter of President Wilson, Who Is a Singer of Unusual Attainments, Has Made Records for the Columbia Record Library Which Will Be Announced in June.

The Columbia Graphophone Co. closed one of the most important deals announced in some time when it completed arrangements last week whereby Miss Margaret Woodrow Wilson, eldest daughter of the President of the United States, will record exclusively for the Columbia record library. Miss Wilson has already visited the Columbia laboratories for recording purposes, and her first records, which will be announced in June, are said to be unusually successful, and certain to meet with a ready sale throughout the country.

That Miss Wilson is a singer of unusual attainment has long been known to her own circle of acquaintances, as her voice is naturally an organ of singularly beautiful tone. It has been developed under the direction of the world's leading teachers and this training has made Miss Wilson's voice of exceptional charm and merit.

The Columbia Co. discovered this for itself a little over two months ago, when it received instructions from Miss Wilson to make a limited number of records of her voice for private distribution among her friends. The records were made and the very first samples submitted from the factory were such a revelation that the company immediately started negotiations to the end that it might secure further records for the Columbia library. Miss Wilson was amenable to the proposal and the result is the present successful series of ballad recordings to be placed on sale in two months.

In the accompanying photograph by Edmonston, Washington, D. C., Miss Wilson is shown listening to one of her own records, "The Low-Backed Car," through the medium of the Columbia "Grand," which is one of Miss Wilson's most favored entertainers when in the privacy of her own home.

Miss Wilson's opinion of Columbia records is

Miss Margaret Woodrow Wilson Listening to Her Own Records.

well evidenced by the following enthusiastic note written the company under date of March 12 from the White House:

"The making of records of my voice in your laboratory has been a unique experience for me and it will be long before I forget the wonder and

fascination of your process. I consider the Columbia records to be on the whole the most beautiful I have heard. They are especially remarkable for their clarity of diction and tone. My own records I must frankly say have delighted me."

"MARGARET WOODROW WILSON."

CONTAINS IMPORTANT INFORMATION.

Victor dealers received this week a valuable instruction book on the repairing of Victor motors and the Exhibition sound box. This book contains twelve pages of detailed information relative to these important parts, mentioning among other

things lubrication, adjustment, how to take down the motor, examination of parts, how to replace spring, reassembling, etc. Splendid illustrations of each repair process accompany the various repair hints.

FIBRE NEEDLE "MASTERPHONE"

Is Appreciated by Record Users, Judging from Increasing Fame—Its Merits Apparent.

"We are receiving orders for the new fibre needle 'Masterphone' from all parts of the country," said an officer of the Masterphone Corporation, 187 Broadway, New York. "Although this new model has only been on the market two months, it is already proving a strong rival to the steel needle 'Masterphone' from a sales standpoint. All our dealers are well pleased with the service the 'Masterphone' is rendering, as they state that it increases the clarity of the records, improves the detailed enunciation and adds to the life of the record. Its extreme simplicity is also an important feature in its favor, as the 'Masterphone' requires no screws or nails for adjustment nor does it mutilate the machine or sound box in any way."

LYLE-ARNAULT.

The marriage of Miss Gertrude Lyle, daughter of George W. Lyle, general manager of the Columbia Graphophone Co., to Richard Arnault was celebrated Wednesday evening at the Second Reformed Church, Hackensack, N. J. The wedding was one of the events of the society season, the officers of the Columbia Co. and their families being among the prominent invited guests. Mr. and Mrs. Arnault are at present away on a three weeks' honeymoon, and upon their return will reside in Bridgeport, Conn. Mr. Arnault is connected with the Columbia factories in that city, occupying an important technical post.

CONTRACTS FOR SCHOOL OUTFITS.

The educational department of the Columbia Graphophone Co. was advised this week that it had been awarded a contract for seven school outfits, including seven horn machines and seven Mobiles, with a large supply of records, for the public schools of Springfield, Mass.

Many a man mudds himself trying to splash his competitor.

The TRITON Phonograph

Retails at \$10

At last a real talking machine at a price within reach of all. This perfect machine is the result of years of experience and experiment in the manufacture of talking machines. It is as perfect in the reproduction of records as any high-priced machine. It plays any size of popular disc Needle Records made for other talking machines.

Every Machine Guaranteed for One Year

Sample machine sent for \$10. To secure sample you must enclose check or P. O. order; money refunded if machine is not satisfactory.

LIVELY TIMES REPORTED IN THE ST. LOUIS TRADE.

Shortage of Certain Styles of Machines and Records the Only Cloud—New Wholesale Store for Aeolian Co. Opened—Numerous Recitals Being Given—Columbia Co. to Remodel Quarters—Piano Dealers Succeed with Talking Machines—New Dealers.

(Special to The Talking Machine World.)

St. Louis, Mo., April 7.—March did not make the entirely creditable showing in the St. Louis talking machine business that did the previous two months of this year. The fault, however, is not with the dealers, nor the trade, but at the supply point for goods. There has been a marked shortage in certain Edison and Victor goods, and a good many of the dealers have been handicapped in meeting demands made upon them.

The trade is here, and only the goods are needed to boost the trade at any time. Dealers are placing small machines in homes temporarily, to fill the want of music, until the style of machine the purchaser wants can be obtained. Whenever the supply is equal to the demand, there will be a rush of trade in these stores.

Two downtown piano stores now are offering comparison of the three makes of machines for prospective customers, and this is proving a lure to persons who are of even mind after reading the advertisements of the three chief companies. It is peculiar, the salesmen say, how the choice falls first one way and then another under exactly the same circumstances and with the same records, and yet each customer leaves the store firmly convinced that he has made the wisest choice.

April opened with the dance records still in sharp demand, despite the handicap of Lent. The penitential season, however, has not proved much of a drawback, and a good many persons who dropped public or formal invitation dances during the forty days of mortification did not cut out the home dances, and this increased demand offset any lessened sale of those who gave up all dancing for the period.

All of the downtown houses were preparing for the after-opera demand for records of the several operas to be sung here during the month during the brief grand opera season.

Harry Levy, talking machine manager at Aeolian Hall, was busy the first of the month opening his new wholesale store on the sixth floor of the Furniture Manufacturers' Building at Fourteenth and Locust streets, where ample space has been taken for an excellent display of talking machines for the wholesale trade and for the keeping of the entire stock of machines and records in compact form. The Pine street warerooms that have served this department will be given up.

The old quarters never were entirely satisfactory, because of the crowded condition of the record warerooms and the lack of packing space for machine use. It never has been so that all of the machines carried in stock could be kept there, and another wareroom three blocks away was kept for storage purposes. The office quarters, too, were not ample for the demands, as only a balcony was available for this use, and this was not always a pleasant place to work, especially on hot days, when breezes were hard to locate. The greatest drawback to the new quarters is the distance from most of the downtown talking machine retail stores, but this will be overcome by messenger service.

The department stores have been making good use of the talking machines during the past few weeks in educating the public to the features of the operas to be sung here this month in the short grand opera season and, incidentally, planting in the minds of the people that after they hear these operas they can obtain the chief parts by investing a few dollars in records and always have direct souvenirs of the evening's enjoyment. At the Vandervoort Salon a member of the symphony orchestra was engaged to lecture on the operas and to illustrate his talks with talking machine rendition of the operas. In the Famous & Barr store special numbers were given, and at the Grand-Leader there always was opera music before the visitors.

The F. G. Smith Piano Co. gave a pretentious recital last month in Bradbury Hall to illustrate the musical points of the Columbia, which is handled exclusively by that firm.

Preparations are under way by local dealers to catch the open-air trade that comes with the motor boat and automobile coming season. These dealers have educated a part of the public to believe that an outing outfit is not complete unless it contains a talking machine with a bundle of records. Sales Manager Duffy, of the Columbia, who has enjoyed a considerable trade of this sort, was early planting the seeds from which he expected to reap a harvest later.

Mr. Duffy has discovered an office benefit from the dance craze. He says that the office force used to work by grand opera time, but since the tango records have become about the only kinds that are being demonstrated in the display rooms everybody

is moving, both at desks and on the floor, to the time of the new dances, which is about the most rapid of anything so far as display. "So, you see, we close sales and get the reports made up in less time than previously," he said.

The Columbia Co. has continued to enjoy an excellent trade on the dance records, the supply of which has been ample for all demands. Also this company has had a full supply of small machines that have come into new popularity with the dance vogue, as a good many persons who have the better class of machines buy cheaper ones for garage and barn dances, and keep them handy with a supply of the dance records for quick service in any room where there is space to dance, leaving the regular machine undisturbed in the music room or wherever it is kept.

This company is getting ready for the alterations that are to be made to the warerooms, following the signing of a new lease for a long term. The plans are complete and Manager Reid promises a surprise when his store is made over, both in convenience of the working force and for customers. In looking to the future he is preparing to handle greatly increased wholesale and retail trade with less trouble than the present traffic causes. Also he is planning for the beauty of the warerooms.

C. R. Salmon, the Columbia traveler in Arkansas, Kentucky, Tennessee and southern Missouri, was at the store a few days the first of the month and reports excellent business in these States. "The smaller town merchants are beginning to appreciate the talking machine as an easy money and satisfactory side line," he said. "Mostly they like to handle our Favorite machine and find that it suits the purses of their customers. You would be surprised if I would show you the business handled from some stores and then go down and look at their surroundings. In most of my territory the country is developing and the small towns do not make an adequate showing for their wealth, and the country around has not yet taken on the settled air. Because of the undeveloped state of society and the lack of acquaintance the people like home amusements and they buy talking machines.

"The company stores, too, are becoming good customers for talking machines. They send a good many of them into the coal mining towns and lumber camps. These orders are chiefly for small machines, but they order them in bunches and they are great consumers of popular records. Altogether this country is coming rapidly, for many persons who are buying cheap machines to-day are coming into the market again pretty soon for better machines."

The Columbia Co. recently placed a stock of machines with Childs & Anderson at Granite City, Ill., a suburb, and these men are creating a sensation in their merchandising community by their up-to-date window display and other aggressive methods of getting business. They like the trade and have decided to make the best of it in their thriving, highly paid, industrial community.

The Field-Lippman Piano Stores, the Thiebes Piano Co., the Concordia Music House, all of which are prominent firms in Piano Row, are new retail customers signed by the Columbia Co. recently. The Field-Lippman and Thiebes firms also handle Victor and Edison disc lines, and will place all three lines on display in their talking machine warerooms for comparison by prospective customers, which condition is very pleasing to Manager Reid. Other new houses on the Columbia list are Samuel Block, 3540 Olive street, city; A. E. Blackmore, Winfield, Mo.; Allen Jewelry Co., Roodhouse, Ill.; S. G. Smith, Jr., Edwardsville, Ill.; D. C. Richards Piano Co, Hot Springs, Ark.; Phil A. Lehman, 1135 Olive street, city, and George W. Brown, Hillsboro, Ill.

Miss E. Schroeder has been added to the sales force at the Columbia warerooms. She is experienced in the talking machine line and is the first woman salesman to be employed in this store, and is making a record that will make some of the young men get busy.

General Manager Irby W. Reid is the proudest man around the Columbia store at present. He was too busy to talk long and Sales Manager Duffy explained that Mr. Reid was "doubling business at home," being the father of twin girls.

How Is Your Supply of Dance Records?

Let us help you out if the tango craze in your city is so great that you find it difficult keeping up to the record demand. Stocks of Edison Cylinder and Victor Disc Records, both Foreign and Domestic, and as complete as large orders and factory deliveries can make.

Test Buehn Service on Records

Louis Buehn Philadelphia, Penn.

At the Edison Shop, as the Silverstone music warerooms are becoming known, there is much talk of the fast growing wholesale trade. "Everything with us is going just as fast as 'factory conditions,' as Mr. Dolbeer says, will permit," said Mr. Silverstone. "We are doing our very best to keep the stocks of our customers balanced to meet the trade, but when we have no machines of a certain style and the factory has none to send us, we cannot always fill orders 100 per cent.," he added.

Mr. Silverstone has just got through adding two additional demonstration rooms to his first floor equipment, making a total of six on this floor, and now he is figuring on partitioning off a small concert hall on this floor. He is undecided whether to disturb the present arrangement or to build this room on the opposite side of the corridor. The space to be gained is the chief point. It appears to have resolved itself into a matter of matching figures and the size necessary for a satisfactory sized room into which to take customers. The idea of the first floor concert room is to accommodate fifty or fewer persons. Larger parties will be taken to the second floor, where 100 or more can be seated.

F. R. Roschle, recently with the Dyer Music House in Minneapolis, has been made manager of the wholesale department by Mr. Silverstone.

Several records were made recently at the Silverstone parlors of selections sung by a Miss Reedy to be sent to the factory for inspection. A well-known local woman, who was buying records, remarked to Mr. Silverstone that some of the operatic airs in the list were not as well sung as a friend of hers rendered them, and added that she believed that this friend's voice was peculiarly adapted to talking machine rendition. Mr. Silverstone invited her to bring her friend in. It was quickly found that she possessed a remarkably accurate voice and handled her music with great ease. Her voice so greatly impressed the Edison Shop critics that several records were made, and it was with no surprise that they learned later that the young woman had taken voice lessons from an internationally known teacher, but has strong objections to singing before an audience.

Some of the new Edison dealers are: E. H. Bess Hardware Furniture Co., Fredericktown, Mo.; Frazier La Belle Music Co., Kansas City, Mo.; Hurd's Music House, Fulton, Mo.; Homersville Mercantile Co., Homersville, Mo.; W. H. Moreland, Jr., Metropolis, Ill.; A. R. Meyer, Havana, Ill.; Charles Oldendorf, Mt. Carmel, Ill.; Lutts & Feeny, Poplar Bluff, Mo.; H. Schrieber & Son, Red Bud, Ill.; J. C. Witt, Clinton, Mo.; John N. Taylor, Moberly, Macon and Columbia, Mo.; C. E. Webber, El Dorado, Ill.; W. F. Wall & Co., Cairo, Ill.; Shellack Drug Co., Galena, Ill.; Southern Illinois Music Co., DuQuoin, Ill.; C. H. Selig, Eldorado, Ill.

A framed reproduction of Thomas A. Edison's first patent papers, issued in 1878, have been attracting much attention in the Silverstone Music Co.'s windows. The drawings have been much commented upon by those who have investigated their own machines sufficiently to know the inner construction.

Fred W. Watson, of Mt. Vernon, Ill., and J. H. Bennett, of Sullivan, Mo., were recent callers at the Edison headquarters.

E. C. Rauth, secretary of the Koerber-Brenner Music Co., Victor jobbers, reports an excellent tone to the trade and that the dance craze is reaching out into the rural highways and byways and after Easter he expects a great country demand for the new records.

"In general terms," he said, "the business is just as good as it can be. If we had more business I hardly know what we would do with it. We are opening fine new accounts without trouble and all of our retailers are putting their best efforts into the work."

Recently the Koerber-Brenner Co. has been insisting to its customers suggestions for window displays and for keeping record stocks in shape, suggestions that go to make more and easier business and increased profits through less waste. One very popular move on its part has been to supply to small dealers at cost a record rack that will keep its records out of the dust and from coming into contact with each other in a way that is likely to cause damage. "The keeping of the record stock is the hardest trial to the small dealer," said Mr. Roth, "and I have found that suggestions and conveniences for lessening this part of the work are

BALTIMORE TRADE VERY ACTIVE.

Slump in Some Lines of Business Does Not Affect Talking Machine Men—General Improvement in Sales Volumes Reported.

(Special to The Talking Machine World.)

BALTIMORE, MD., April 10.—The talking machine dealers in this city and surrounding territory certainly have their rabbit feet working overtime these days; for, while persons engaged in many other lines of business are kicking about the slowness of business, these dealers of the Victors, Columbias and Edisons continue to plug away with exceptionally fine results. There is no letup in the claims made ever since the beginning of last fall that every month shows a better volume of business than the month previous. The same thing is the case with reports coming in concerning the March business.

The slate on the wall back of the desk of Manager S. A. Dennison, of the Columbia Phonograph Co. branch, is still holding up its reputation as a barometer of good luck, for this month the statement is just as encouraging as it has been for many months past. It shows that the Columbias have had a good demand and that the records have also been very popular.

W. C. Roberts, manager of E. F. Droop & Sons Co., simply sits back at his desk and wears the smile that won't come off. He explains local conditions by saying that he will be perfectly satisfied if business continues to boom the way it has for the past several months. The firm had a splendid Victor and Edison month.

The department stores report that their talking

machine departments are among the best paying ones. Both Hochschild & Kohn and Stewart & Co. make fine reports for March.

The Kunkel Piano Co., who handle the Victor and Edison lines, has had a good month. This firm is boosting the talking machine end of the business for all it is worth, with very satisfactory results. The firm has a most elaborate Easter window display, consisting of Victor and Edison machines and records arranged most artistically, intermingled with streamers of purple and white.

The Fink Talking Machine Co. is also keeping up with the band wagon and report many good sales for March.

The Fink Talking Machine Co. is also keeping up with the band wagon and report many good sales for March.

DEVELOPING FOREIGN TRADE.

Victor Literature That Will Stimulate Interest in This Branch of the Business.

The Victor Co. sent out to its trade recently its usual list of well-conceived publicity, including the April supplement, two hangers for this supplement, copies of the April magazine advertising and supplements of new German, Italian, Swedish, Norwegian and Polish records.

These foreign record supplements are very valuable to the Victor dealer, as this division of the talking machine business is fast assuming imposing proportions in sections of the country which never recognized the possibilities of this field until a year ago. Many Victor dealers have assigned one salesman to devote himself exclusively to the development of foreign record trade, believing that this is the logical way of increasing a profitable division of their record business.

DANCE CRAZE BOOMS RECORD SALES

J. J. Black, manager of the talking machine department of the Wiley B. Allen Co., San Francisco, says the dance craze is the most important influence for the stimulation of the record business, and he does not consider the craze at its height yet. He says business has been fully normal the past month, with \$100 and \$150 Victor Victrolas in good demand.

TRIUMPHON CO., Ltd.

ESTABLISHED 1884

**Berlin, S. W., 47/5
MANUFACTURERS**

OF ALL ACCESSORIES SUCH AS

MOTORS

10 different models, ready and complete to be fitted into cabinets. From the cheapest to the best.

40 DIFFERENT MODELS

Piccolo is a complete Talking Machine. Easily to be carried like a portmanteau. Most suitable for picnic or rover parties in summer, and easily carried to social gatherings in winter. Plays 12-inch records. Is not a toy. Weight without records only 5 kg. Measurements: 11x13 3/4 x 7 3/4 inches.

SOUND BOXES

for Gramophone or Edison Cut Records. First-class workmanship.

TONE ARMS

For Horn and Hornless Machines. To fit all size cabinets.

COMPLETE TALKING MACHINES

WITH AND WITHOUT HORN

Apply for Catalogues

Special Motors HYDRA SYSTEM

Single and double spring, 6 different models. Are the only existing construction which allows the exchanging of the spring and spring case without taking the motor out of the cabinet. After loosening one nut, a child is able to replace any defective spring or springbox within 20 seconds.

TO DISCUSS ANTI-TRUST BILLS.

Retailers in All Lines of Trade Interested in Meeting to Consider New Legislation, Including the One-Price Plan of Merchandising—John G. Bremner Member of the Committee of Local Retail Merchants.

Retailers in all lines of trade are displaying much interest in a mass meeting to be held here in the near future to discuss the relation of the dealer to pending anti-trust legislation at Washington including the proposed one price to all plan of merchandising and kindred issues. The committee for promotion of the interests of retail merchants, which was organized at a meeting held last week in New York in the assembly room of the Fifth Avenue building, has not set a definite date for the demonstration, but it is supposed that the meeting will take place on April 24. Francis L. Plummer, 169 West Seventy-eighth street, New York, is secretary of the committee.

W. G. Anderson, well known in retail circles and a member of the faculty of the Brooklyn College of Pharmacy, was chosen as chairman of the committee, the other members being John G. Bremner, president Eastern Talking Machine Dealers' Association; Nicholas Ehrlich, president Independent Retail Tobacconists' Association of America; Alfred D. Woodruff, manager Food Supply Store, New York Association for Improving the Condition of the Poor; Carl E. Ackerson, representing the Photographic Dealers' Association of America; R. J. Atkinson, president Brooklyn Hardware Dealers' Association; J. M. Kohlmeier, Hardware and Supply Dealers' Association of Manhattan and Bronx Boroughs, Inc.; Caswell A. Mayo, secretary-treasurer New York Pharmaceutical Conference. Representatives of other trades will be added to the committee.

It is understood the tentative list of speakers includes well-known public men and trade authorities of national reputation. The plan of the committee is to encourage similar gatherings all over the country for the purpose of bringing retail dealers in closer touch with legislative matters that concern them vitally. It is pointed out that some

lines of trade have displayed apathy in past years, but that there is now a notable tendency of retailers everywhere to assert their influence. It is pointed out further that the retail population of the country, together with those depending on them for support, equals one-tenth of the nation's total population. The retailer's voice, according to the committee, should command a corresponding degree of attention in State and national legislature. The main purpose of the meeting therefore will be to increase respect for the dealer as an important element of society.

BETRAYING CREDIT INFORMATION.

Violations of Trust Properly Condemned by a Writer in the New York Times—Confidence Should Be Preserved If There Is to Be an Interchange of Views.

Although credit men have repeatedly emphasized the duty of preserving confidences where credit information is given or obtained, violations of this trust crop up from time to time that lead to very unpleasant results. While it is necessary for a house, which has been asked to extend a line of credit, to know how an account is checked by other concerns, it is considered an unpardonable breach of confidence to turn over such information to the prospective customer. An instance is being related in the trade at present where an investigator violated the trust imposed upon him in this manner, and it is doubtful if he or his house will receive in the future the information they desire from the parties they offended. It is the general sentiment in credit circles that a breach of this kind deserves drastic treatment.

ENLARGING "TALKER" DEPARTMENT.

The Haverty Furniture Co., Savannah, Ga., which has been a very successful Columbia dealer for several years, is enlarging its talking machine warerooms and constructing six new demonstration booths. These improved show rooms will be decorated and furnished in an attractive manner.

NEW CONCERN IN PITTSBURGH.

Liberty Talking Machine Shop Opens in Central Business District.

(Special to The Talking Machine World.)

PITTSBURGH, PA., April 7.—The Liberty Talking Machine Shop is the name of a new store opened at 819 Liberty avenue April 1. The Victor Victrolas are handled exclusively. This store is a part of the building occupied by the Greater Pittsburgh Piano Co.

J. E. Hornberger is the manager of the new store. Mr. Hornberger was formerly connected with the Pittsburgh store of McCreery & Co. as manager of the talking machine department; was also manager of the Talking Machine Shop in the Jenkins Arcade Building and, until assuming this position, was special representative of the W. F. Frederick Co. talking machine department.

REPORTS HEAVY VICTOR TRADE.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., April 4—A. G. McCarthy, of Sherman, Clay & Co., reports a very good month's Victor business, both wholesale and retail, the books showing a substantial increase over the corresponding period of last year. The company has its new music room on the eighth floor of the building ready for use now, and a Victor Victrola forms a part of the furnishings. This room is said to be the most elaborate room of its kind in any music store in the country, and fully as nicely carried out in design and furnishings as the music room in any home in this vicinity. A better setting cannot be imagined for the demonstration of a Victor Victrola.

Victrolas and Record Stocks Short

Be just to yourself and your customers

You owe it to yourself and your customers to give us a trial at filling your orders before you lose a sale by telling them that you "haven't got it and can't get it."

We cannot truthfully boast

about the completeness of machine and record stocks; nevertheless you can get from us certain types of machines and many selections of records that are not to be gotten elsewhere. New numbers are coming in daily.

TAKE NOTHING FOR GRANTED UNTIL YOU HAVE TRIED

SUPERVISING DANCE RECORDS.

Illustration of the Manner in Which G. Hepburn Wilson, Dance Expert, Insures the Accuracy of the Columbia Dance Records During the Actual Recording by Dancing Before the Orchestra to Indicate Tempo.

The accompanying photograph, taken recently in the local laboratory of the Columbia Graphophone Co., gives an excellent idea of the detailed supervision which characterizes the production of Columbia dance records. As announced in the columns of The World some time since, all Columbia records intended for dancing purposes are manufactured under the personal supervision of G. Hep-

G. Hepburn Wilson Dancing for Columbia Record Makers.

burn Wilson, M. B., one of the company's leading interpreters of the modern dance, and conducting a number of successful dancing schools in the most fashionable sections of the city. His corps of teachers are skilled in all the intricacies and finer points of the modern dances, and in the illustration herewith Mr. Wilson is shown dancing

to one of the Columbia Co.'s new dance numbers, accompanied by one of his star teachers.

"The supervision of Columbia dance records by Mr. Wilson is far more than a mere formality and a stereotyped O. K.," said a member of the Columbia recording staff. "When dance records are to be made at our laboratory, G. Hepburn Wilson brings along two dancers from his corps of instructors and when Charles Prince and his band start to play the dancers start to dance. As expert dancers, they are, of course, sensitive to every detail of rhythm and if it is not absolutely as it should be—they stop dancing. That brings the band to an abrupt halt. The fault is discussed and corrected and the record is begun all over

CONDITIONS IN THE TWIN CITIES.

Talking Machines and Records Apparently on the High Wave of Popularity in That Section of the Northwest—New Departments Making Good—L. H. Lucker Home from Visit to Edison Factories—News of Moment.

(Special to The Talking Machine World.)

MINNEAPOLIS AND ST. PAUL, MINN., April 8.—Dealers in all classes of machines for reproducing sound are on the crest of a wave of prosperity—at least they all speak in superlatives when discussing trade conditions, and as they are honest men business must be good. The department stores may have cut into their legitimate trade somewhat, but whether or not this competition has effected the business of the straight talking machine merchants the latter are not grumbling.

The piano men who have talking machine and phonograph adjuncts are very pleased for the side line is paying the expenses, and in some instances are running a neck and neck race with the piano departments for supremacy.

The Talking Machine Co., Archie Matheis manager, is finding itself in clover with business on the increase, March returns far in excess of those of March, 1913, and prospects rosy. The house is giving special recitals as a prelude to the grand opera season, and finds much interest shown therein. The aftermath unquestionably will be run on records.

The department stores, two in Minneapolis and one in St. Paul, which recently established talking machine departments, report a satisfactory volume of business from an experimental standpoint.

Columbia stores continue to do a pleasing business, both in Minneapolis and St. Paul, and also in the rural sections. The new \$100 machine seems to be the favorite, and these go about as fast as they can be obtained. Most of the soloists in the grand opera season are Columbia artists, and naturally the Columbia records will be in demand for some time, both before and after.

Laurence H. Lucker, of the Minnesota Phonograph Co., returned Saturday from a visit to the factories and headquarters of the Edison Co. He made arrangements that will expedite the filling of orders for his house. His complaints for some months have been that he was unable to obtain goods in sufficient quantities to keep pace with the demand, and that the trade suffered materially in March on this account.

"Shipments will be coming more rapidly from now on," declared Mr. Lucker. "We received a whole carload to-day, but nearly all had been ordered previously, but other shipments are coming. This is imperative in a way, as we have established a large number of Edison agencies throughout the Northwest and must have the goods, and particularly the records."

Clark & Co., well-known book sellers and office outfitters, Vicksburg, Miss., have secured the agency for the Edison disc phonographs and have opened up very attractive quarters in that city.

again. This procedure is followed until the entire record has been played absolutely right.

"A few days later a sample record is sent to the laboratory from our factory. Again Mr. Wilson is called in, and if, after listening, he is satisfied, he O. K.'s it; otherwise the record is condemned and destroyed."

in 1908. In addition to several prominent makes of pianos and player-pianos, making up a regular stock of over eighty instruments on the wareroom floors, the company also handles the Victor Victrola with marked success.

A COMPLIMENT.

Mark Hambourg, the pianist, tells in the Strand Magazine of an incident that happened to him when he was a visitor at the house of a friend. He was practising away for all he was worth when a woman friend of his hostess called and was shown into the adjoining room. The visitor listened to Mr. Hambourg's playing for a few moments, and then remarked, with a seraphic smile: "Why, Mrs. Blank, how your little girl is improving on the piano!"

THE HUMES CO. TO REMOVE.

Well-Known and Successful Concern in Columbus, Ga., to Have Handsome New Building.

(Special to The Talking Machine World.)

COLUMBUS, GA., April 7.—The Humes Music Co., at present located at 1127 Broad street, this city, will shortly occupy the new Illges Building now being completed at 1032 Broad street, and which is especially designed to meet the requirements of the business of the company. The various floors of the building are fitted up with a series of soundproof demonstration booths for pianos, player-pianos and Victrolas and an electric elevator serves to connect the floors for the convenience of customers.

The Humes Music Co. has had a most successful career in the local field since its establishment

DETROIT PIANO DEALERS TAKE ON TALKING MACHINES.

Frank J. Bayley to Handle the Edison Line and Ruediasale Co. Opens Columbia Department—Talking of Organizing Local Talking Machine Association to Check Numerous Trade Evils—Previous Attempt Failed—Dealers Finding That Service Pays.

(Special to The Talking Machine World.)

DETROIT, MICH., April 8.—Two more Detroit piano dealers have taken on talking machines this month. They are Frank J. Bayley, who is president of the Detroit Music Trades Association, and the William J. Ruediasale Piano Co., which has a large store at Gratiot and Van Dyke, in the rapidly growing East End.

Mr. Bayley is handling the Edison. He will put in the full line as soon as the jobbers can furnish him the instruments.

"I think the talking machine business is a very good business to engage in," he said. "I have seen stores that have started in a modest way grow until they are larger than many piano stores. While I do not intend to let the talking machine business curtail our piano business, I do intend to develop the talking machine end as far and as fast as it will grow."

The Ruediasale Co. has taken the Columbia, ordering several hundred dollars worth of the Grafonolas and records to start with. The store is a large and well located one, in a district well adapted to the sale of talking machines, and particularly to the sale of records. S. E. Lind, city sales manager of the Columbia branch store, always impresses upon the dealers in the outlying districts the advisability of carrying as complete a line of records as facilities will permit, because the sale of machines means a constant demand for records, and if the suburban dealer has a good stock patrons will not take the trouble to go downtown to buy.

There is a movement on foot among the Detroit talking machine houses to organize a trade association. It germinated in the agreement made last fall to charge interest on instalment sales. That agreement has brought much benefit and much profit to the dealers, and has given them an insight into what can be accomplished by concerted action.

An attempt was made about five years ago to form an association. It looked like a success for a few minutes, officers being elected and dues being paid in. Nearly every dealer in the city was represented. But when it came to the matter of rules and by-laws, the association split on the proposition of the establishment of two prices, the regular price for cash and a higher one on instalments. That was long before the interest arrangement went into effect. The latter agreement removes the necessity for a double price. And the dealers discern that there are several other matters which would make an association a valuable adjunct to the business and a benefit to all members.

For one thing, the people who manage to have talking machines, or new records, in their homes most of the time without paying a dollar, could be checkmated. Records kept by some of the dealers show that nine out of ten people who desire to have talking machines sent to their homes on

approval fail to buy. They simply considered that a good way to obtain a machine for some entertainment without expense.

Other people, who own machines, ask to have new records sent to them on approval. Some of them manage to hang onto them for a week, and then return them all as unsatisfactory. In the interim they have played them until they are tired of them. Next month they play the same trick on some other dealer. There are so many dealers in the city now that they can keep the game going indefinitely.

If there was an association such grafters could be listed with the secretary. There would be no black list, no telling by one dealer to another that So-and-So was not exactly square in his dealings and thus cause danger. The names simply could be listed with the secretary, and when a dealer wanted to be protected he could go and examine the list.

That would be of double benefit. It not only would prevent the losses incident to such operations, but, with their free supply cut off, the grafters would be compelled to buy.

A monthly banquet and an exchange of ideas and experiences also would be of much benefit to the members. The talking machine dealers of Detroit are on very friendly terms with each other, though keen competitors. They speak well of each other and of each others goods and business methods, and it seems as though such banquets could not help but be amicable and productive of still better feeling and still better success.

In every business there are some chronic "outsiders"; objectors to everything and anything that others may propose. But in such an association as the talking machine dealers have in mind the membership of all dealers would not be necessary to make it a success. It would be a sort of mutual benefit association. The only ones to lose anything if some dealers remained aloof would be the ones who remained aloof.

Business is still good. Every month shows an increase over the previous month and a bigger increase over the corresponding month of last year.

Selling service as well as the machines is becoming a policy of nearly all the dealers. They find that it pays. It means not only pleasing a customer when he buys a machine and some records, but keeping him pleased and therefore naturally keeping him as a customer. If some little thing goes wrong with a machine a man is sent out to fix it. If certain records are not satisfactory, and a good, legitimate reason is given for their not being satisfactory, the party is given his choice of new records or a return of his money. Almost any man knows when he is being treated liberally and will return there for more of the same.

Service in records consists principally in having the records the people want when they want them. The stores which carry everything get new cus-

tomers for records almost daily—people who have had machines for some time, but have not been able to get all they desired in the way of records at the places they bought the machines. Of course, having once located an unabridged stock of records, they become permanent patrons of it.

K. M. Johns, manager of the Detroit branch of the Columbia Co., has the sincere sympathy of the trade this week on the death of Mrs. Johns. He has not been at his desk for several days.

MORTIMER D. EASTON TO MARRY.

The engagement was announced on Sunday of Mortimer D. Easton, son of Edward D. Easton, president of the Columbia Graphophone Co., to Miss Marie Rankin, a prominent society belle of Goshen, N. Y. No date has been set for the wedding. On the same day the engagement of Miss Helen Easton, a daughter of President Easton, to Morris M. Munton, Trenton, N. J., was also announced.

Mortimer D. Easton has been connected with the Columbia Co. for a number of years, having achieved a pleasing success as road ambassador for the Dictaphone Department in both domestic and export territories. Mr. Easton is at present a member of the Columbia Co.'s advertising department, where he is acquiring a detailed knowledge of this important branch of the business.

Isaac Lesem, talking machine and musical merchandise dealer, Kansas City, Mo., has filed a petition in bankruptcy with liabilities of \$4,100 and assets of \$850.

The world is pretty full of men who hand out a five-cent cigar expecting a \$50 favor in return. But you don't need to give up smoking on that account.

Trade Generally in Very Fair Shape—Credit Situation Far from Being Satisfactory—Blamed by Many on the Flood of Cheap Records—Spring Leipzig Messe Very Successful—Some of the Exhibitors—Music Publishers Making Own Records—Copyright Societies Active in Protecting Interests of Members—Some Recent Cases—Operatic Records in Increasing Demand—Latest Instrument on the Market—Some of the Recent Record Issues—Pathe Freres Win in Hornless Machine Patent Suit—To Mark British Origin of Goods—General News of Month.

(Special to The Talking Machine World.)

LONDON, E. C., April 6.—Trade in this country continues to make a very fair showing, period considered, although as may be expected, retail sales have a tendency to decline in volume as the summer approaches. Traders, however, profess themselves well satisfied with the spring business and are optimistic regarding future prospects. This is all very well in its way, but when one considers the conditions of gramophone commerce to-day, more especially from the financial viewpoint, things do not appear so bright as collective party opinion would have us believe. Take, for instance, the position of credit. I have made special inquiry among those who can speak with authority, and almost without exception they have a deplorable tale to tell. "Credit in England," said the cashier of a large house, "is akin almost to philanthropy. At the present moment we have outstanding many thousands of pounds approximating in the neighborhood of 40 per cent. of our annual turnover. This is a very serious item in relation to profits, and as you may imagine, causes us not a little anxiety. Only a small percentage of dealers pay at thirty days; the average credit period taken is anywhere between six and nine months, and even longer if bills are obtainable."

Replying to a query, my informant assured me that the practice of passing bills for discounting was a growing evil in the gramophone trade, and it made a big inroad into profit which manufacturers could not really afford. One specialty maker with whom I conversed spoke very pessimistically of the question. He said: "I am about to finish up with dealers altogether, for they do not pay. They want nine or twelve months' credit and I cannot afford to give it, therefore I will endeavor to conduct my business direct with the public."

Several others assert that since the advent of cheap records credit conditions have become increasingly worse because these records are in themselves not profitable to handle and they have seriously reduced the sales of higher-priced discs. In this view there is unfortunately much truth, and it is frankly endorsed by more than one manufacturer of this class of record. I even heard of one large company who, more as a test than anything else, perhaps, actually offered their agents a special 10 per cent. discount above the usual terms for prompt monthly payment. It may be accepted as a significant index of conditions in this market that not five per cent. took advantage of this generous offer. A well-known fact, too, is that another very big concern has on its books debits against dealers to the extent of something like £60,000. Undoubtedly a goodly percentage of this money is safe, but conditions which allow of such enormous credit are obviously commercially unsound. What we need is a central bureau under the control of all the leading gramophone companies, where may be blacklisted the names of dealers who systematically shirk their monetary obligations. A plan along these lines would soon bring them to book or force them to suspend in favor of more responsible traders.

Spring Leipzig Messe a Big Success.

There is a good deal of sentiment attaching to a visit to the Leipzig Fair, and, from the talking

machine point of view, not a little habit. It is customary for many of the leading members of the trade to make this pilgrimage every year in the hope of finding something new, but the trade has now developed to such an extent that the chances of so doing become fewer and fewer with each recurring season.

Anything really good and new in this year of grace finds its way to London as quickly as it does to Leipzig, so that even the stay-at-home British trader generally has an equally good chance as does he who goes to Leipzig.

There is, however, this distinct advantage in going—one is enabled to see practically side by side all the novelties that there may be and thus, with the aid of the direct comparison, form a more satisfactory conclusion as to the merits or demerits of each article. All this is preliminary to stating that there was really nothing of practical interest to be seen this year, outside of course what may be termed novelties.

Lindstrom & Co., for example, were showing an exceptionally ingenious automatic machine in which every process, including the changing of the record and needle was carried out mechanically. This remarkable cabinet instrument is well called "The Miracle." It is described as automatically playing any record from a selection of ten without touching the record or sound box. There are ten records, placed in a moving platform. All that the person desirous of hearing a tune has to do is to put the indicator at the selection of his fancy, place a penny in the slot, or touch the stop or start lever, and the instrument will do the rest—that is to say, it will automatically put a needle in the sound-box, bring the record up to the turntable, play the record through, return the record to its original place after being played, and throw out the old needle. This instrument, it is said, is so wonderfully constructed that it is practically "fool-proof." A penny cannot be put in the slot until the tune is finished. "The Miracle" was very much admired by all who saw it, and I am given to understand that large orders have already been booked in Germany for this article.

The Beka Co. obviously intends to enter into serious competition with the phono-cut manufacturers, as they were showing a new record of the ordinary phono-cut type which is shortly to appear on the market.

The Beka Record Co.'s exhibits also included a new model called the "Perplex," which by means of a cleverly arranged mechanism can be adapted

into a sideboard. The Odeon people were showing an apparatus in the style of an elegant sideboard.

Attention was centered upon the Zonophone exhibit of a new kind of instrument in the form of a miniature piano which attracted much favorable comment.

The Industria Blechwaren Fabrik exhibited a new design of iron horn, very similar in shape to the well-known Music Master Wood Horn and enameled to imitate wood. Metal cabinets were another novelty exhibited by this go-ahead concern, various designs for hornless and ordinary horn models being on view.

The ingenuity of German manufacturers is strikingly exemplified in the exhibit of Messrs. F. A. Anger & Sohn, Jöhstadt Sachsen, who are exhibiting an extensive range of disc record cabinets; among the many attractive designs shown, one in particular having a roll top front with a removable record holder, attracted considerable attention.

Great interest was taken in the National Gramophone Co.'s complete exhibit of their Marathon instruments and records at 41 Peterstrasse (Clemens Humann). These fine products are more or less new to Continental traders, and to say they met with keen approval gives but a faint idea of the extraordinary interest displayed.

Other exhibits included excellent displays of gramophone parts and accessories by German, French and Swiss manufacturers, and in addition there were to be noticed representative exhibits of complete instruments, tone-arms, motors, horns, sound boxes, cabinets, needles and records, etc. The business at the Fair this year is said to have been in every way highly satisfactory. Buyers were present from all parts of the world, an especially strong contingent being present from England. A list of English visitors appeared in my last report.

Another Important Copyright Case.

In protection of their interests the members of Copyright Societies must be expending quite an amount of money of late. The case reported last month resulted in costs and fines against an infringer of certain copyright works, and now we have another case where infringement of copyright is alleged. As reported in the newspapers, summonses were taken out at the instance of Frank Mabe, an inspector of the Mechanical Copyright Licensees Co., Ltd., against William Jennings, trading as the Runwell Cycle Co., 16 Great Eastern street; Blum & Co., Ltd., Old street, and W. H. Reynolds, Ltd., 95 Great Eastern street, London. There were four summonses against each defendant for "unlawfully and knowingly offering for sale an infringing copy of a copyright work, contrary to the provisions of the Copyright Act, 1911," and the dates of the offences were given as the 5th, 6th and 7th of March. H. Houston, barrister, appeared to support the summonses. Travers Humphreys appeared for Mr. Jennings. A. Richardson defended Blum & Co. The subjects of the summonses were gramophone records of "The Gondoliers," "The Pipes of Pan," "Onward, Christian Soldiers," "The Lost Chord" and "Your Eyes Have Told Me So." In opening the case Mr. Houston said he should like to read the particular section (Section XI.) of the Act, which bore directly on the point, the wording of which ran, "If any person knowingly sells or offers for sale or hire any such copy of a copyright work, he shall be liable to a penalty not exceeding 40s. for a single offence or not exceeding £50 for any one transaction."

Mr. Biron: It does not mention gramophone records.

Travers Humphreys: There is no point raised as to that.

Frank Mabe said he was an inspector employed

FROM OUR LONDON HEADQUARTERS—(Continued from page 45).

by the Mechanical Copyright Licensees Co., Ltd., of 27 Regent street. In accordance with his instructions, he called at 16 Great Eastern street on March 5 and there obtained a catalog of gramophone records. He found the said catalog contained titles of various works in which copyright subsisted and in which his association had an interest. He still had that catalog in his possession. In pursuance of the offer contained in the catalog he attended at 16 Great Eastern street on the following day and purchased three gramophone records, entitled "The Gondoliers," "The Pipes of Pan" (erroneously printed on the record as "The Pipers of Pan") and "Your Eyes Have Told Me So," which were numbered 14, 35 and 43 in defendant's catalog. He examined the records and found there was no "royalty" stamp on any one of them. He produced the invoice showing the purchase.

Cross-examined by Travers Humphreys, witness said there was nothing on the records in question to show they were the subjects of copyright. On one of the records the title was printed "The Pipers of Pan."

Travers Humphreys: That is a mistake, obviously.

Continuing his replies, witness said he knew the songs in question were the subjects of copyright, because his association acted for the composers. It sometimes happened that more than one person claimed the copyright in a song. He did not think that defendant personally acted as salesman during the purchases in question.

Travers Humphreys said he had not yet heard that the songs in question were the subject of copyright.

Mr. Houston: I have two certificates of copyright here, and they are evidence under the Act of 1842. "The Pipes of Pan" has been composed since, and we have not the certificate for that. Section 6 of the Act, sub-section 3, deals with the evidence of copyright. It says that "in any action for infringement the work shall be presumed to be—"

Travers Humphreys: This is not an action.

Mr. Biron said he did not think the reference applied. He supposed there was some record kept of copyrights.

Mr. Houston said he could get certificates, but for that purpose he would have to ask for an adjournment.

Travers Humphreys: I wish him to satisfy us that these certificates are evidence. The Act of 1842 has been repealed.

After other members of the trade, including Sir Edward Elgar, had given evidence, Mr. Biron said that at present there was no evidence before him, and perhaps an adjournment would be advisable.

Defendant: I wish the case disposed of. I have an indemnity against any action, and I do not want to waste my time.

Mr. Biron: I do not think I can deal with the case at all as there is no evidence, but I shall consider this on the question of costs on the next occasion.

The further hearing was adjourned.

During the hearing of these summonses, some interesting points in regard to the scope of the copyright act were brought to light. Emphasis was placed upon the fact that the onus of putting copyright stamps on records rests with the record manufacturers, and a dealer cannot therefore be convicted of selling a record without a stamp thereon unless he does so "knowingly." Another matter mentioned by counsel and endorsed by the magistrate was the need for the registration of copyrights at, for instance, Somerset House, where a dealer or manufacturer could inspect the list of copyright works. It was further suggested that such registration should be made by application, and that a person seeking to register his copyright should attest his nationality and give satisfactory reasons why the copyright should be granted to him. And further, that the present anomalous position of the various societies selling stamps should be so prescribed that only one concern could claim the right to sell stamps. It is

said that no less than five different claims to sell stamps on one particular work have been made. For the "arrangement" of certain non-copyright works of which an edition has been printed and published, we are informed a publisher is claiming royalties from record manufacturers. Altogether this copyright act is causing our trade a lot of trouble and expense on account of its vagueness.

Demand for Operatic Records.

Signs are not wanting of a greatly increased demand in this country for operatic records among sections of the community which hitherto confined their purchases to comic songs and sentimental ballads. Three or four of the leading concerns have largely specialized this class of music in their publicity announcements during recent times, and to this in no small measure is due perhaps the increased popularity of celebrity issues. In this connection the "H. M. V." Co. occupies a leading place. Last month witnessed the inauguration of a special celebrity campaign lasting one week, during which period "H. M. V." agents all over the country made an effective window display of celebrity records. The company co-operated with large advertisements in the big London and provincial organs, and needless to say, the whole scheme proved a fine success. Many dealers, in fact, are still keeping it up, at it were, reaping the after-harvest of sales.

Coincident with the opening of this campaign, the "H. M. V." company announced the publication of a fine piece of publicity work consisting of an illustrated catalog of records by international artists. This brochure provides a wealth of biographical and otherwise interesting particulars of "H. M. V." artists, indexed and classified for easy reference. A magnificent production which is indeed deserving of a prominent place in every record enthusiasts library.

Grand Opera at Popular Prices.

Some twelve months ago the Columbia Co. announced a series of fifty records in the Columbia-Rena "Opera" catalog. They were wonderful

FROM OUR LONDON HEADQUARTERS—(Continued from page 46).

value, for they were sung by the picked opera singers of Italy, specially selected from a large repertoire of Italian records, all recorded in Milan, and issued at the popular price of 3s. 6d. Their reception was gratifying, and they sold steadily.

Since then, of course, many notable records have been added, such artists as Armanini (of Covent Garden), Amelia Karola, Pagganelli and Taurino Parvis among them.

This month sees further issues in this notable series, one of them a record by the great tenor Garbin, for whom Puccini wrote the tenor roles in two of his greatest operas. Another addition is Ferruccio Corradetti, never before available at this price, while Polverosi, a tenor of great renown in Italy, sings Lohengrin's Song from Wagner's opera in a style that would put many greater singers to the blush. And, finally, there is a remarkable record, by the Milan opera chorus, of "Glory to Egypt" from "Aida," which was specially sung for the Columbia complete issue of that opera, and is the only record extant of this magnificent chorus.

Chappell & Co. as Record Makers.

A recent event of great importance to the gramophone industry is the issue of disc records by one of our largest sheet music publishers, Messrs. Chappell & Co., Ltd., of New Bond street, London, W. The record is ten-inch double-sided, to retail at half a crown, and will bear the company's title, i.e., "Chappell." With such vast resources and influence at their command it is certain that quite apart from the good merits of the record itself, the issue will meet with a ready demand from the best class of dealers, and from the public at large. In conversation with your representative, Messrs. Chappell state that they have embarked upon this venture in order to ensure the publication in record form of their own copyrights as originally scored in so far as the limit of records will permit. The first five "Chappell" discs carry some of the latest musical comedy successes, and others are in course of preparation, in addition to a select number of the popular Chappell ballad concert favorites. From a tonal viewpoint, the "Chappell" record leaves nothing to be desired. It is marked by an all around excellence of quality and good volume, and traders are agreed that it will make a very wide appeal to all lovers of the musical art. Naturally, its advent has aroused keen interest in trade circles, where opinion is very divided concerning its effect. To our mind it is a significant move, and likely to exert a far-reaching effect upon the future policy of record companies, particularly in relation to the thorny question of orchestration, and as the copyright act says, "reasonable adaptation." These points, by the way, form the subject of a law action which is shortly to be heard. The result is being awaited by all gramophone houses with the keenest of interest.

Another New Instrument.

Inventors of late have been exercising their ingenuity along the line of improving the hornless gramophone. One of several which has recently made its appearance is "The Hornette," devised by F. W. Alderman, of the Pelham Trading Co., this city. This natty instrument occupies about a cubic foot of space, and as may be imagined, is very compact. It presents many new features of construction, the principle of which is its division into two parts, of course, hinged together. The lower part carries the motor outfit and tone arm, while the upper, which is in the nature of a lid, carries an interior horn. Thus the sound can be directed at any reasonable angle, a distinct advantage over the usual under-trumpet style of construction. In point of tone quality and volume the Hornette is quite the equal of any exterior-horn instrument. It is put up in solid oak and retails here at £5 10s.

To Imitate Wood.

Quite a new style of gramophone trumpets will be the vogue next season. They are of metal and enameled to imitate wood, mainly oak and mahogany. Those I was privileged to inspect at a large wholesale depot were so cleverly executed in the graining that at a short distance the differ-

ence between the real and imitation-wood horns was scarcely distinguishable.

New Companies Incorporated.

H. Morley Phillips & Co., Ltd., musical instrument dealers; capital £2,000. Office, 5 Aberdeen Buildings, Bromley, Kent.

Performing Right Society, Ltd. Limited by guarantee. Office, 32 Shaftesbury avenue, London, W. C.

New Columbia Artists.

The Columbia Co. list in its April supplement the first selections played by Cristeta Goni, the juvenile Spanish violinist, known abroad and in this country as "the Little Sarasate." Cristeta Goni is only fourteen years of age, but she has already achieved noteworthy fame as a finished artist in every respect. She was recently honored by being called to play before their Majesties the King and Queen of Spain.

This month again we have another important addition to the ranks of the artists represented in the half-crown records of the Columbia Co. in the person of H. Lane-Wilson, the celebrated baritone.

Mark to Denote British Origin.

The British Empire League recently convened a meeting under the presidency of the Duke of Argyll, in support of the proposal to institute a mark of origin to denote goods manufactured or produced in the British Empire. Among the reasons urged in favor of the scheme are that such a mark would provide a simple means of identifying British manufactures and produce; that it would support British industries and labor; that it would prevent the sale of foreign goods as British; and that, at the same time, it would bind more closely together the Mother Country and the Oversea Dominions. A resolution was unanimously adopted strongly urging the Board of Trade to proceed with the registration of the mark applied for.

Decision in Favor of Pathé Frères.

From time to time I have chronicled the legal proceedings in connection with what is known as the Holtzweissig hornless machine patent owned by the Gramophone Co., who recently took action in Germany against Messrs. Pathé Frères for alleged infringement. The matter has been argued first in favor of one and then the other company in two courts, and finally on appeal to the highest tribunal, the Reichsgericht, who find that the patents apply only to a special structure where the trumpet or sound amplifying chamber is placed underneath the cabinet. Messrs. Pathé Frères instrument is constructed differently, and therefore the result of this latest phase is in their favor.

Interesting List of Records.

His Master's Voice program for April constitutes an exceptionally fine aggregation of pleasing selections by their special artists, and although there can be no question of sifting wheat from chaff we would draw our readers' particular attention to just a few of the "star" records itemized on this supplement. Art in relation to the gramophone all must admit becomes more closely allied each month with the making of records by such distinguished and exclusive talent as the "H. M. V." company presents. This is exemplified in the list under review, for we are offered Sir Edward Elgar's newest work, "Carissima," by the Symphony Orchestra, under his own baton. It is a record of superlative excellence and very naturally has aroused wide interest in the trade. Another fine issue is "Die Beiden Grenadiere" (The Two Grenadiers), by Dr. George Henschel, with pianoforte accompaniment by himself. As singer, pianist, teacher, conductor and composer, this talented musician bears a reputation of world-wide fame, and this first record will therefore make a special appeal to record enthusiasts everywhere. The complete list as hereunder presents an amazing variety of music—something to meet every whim, every taste. Twelve-inch, double-sided: Slavonic Rhapsody, Op. 114 (Carl Friedmann), and "La Feria," Suite Espagnole (P. Laceme), Bournemouth Municipal Orchestra; Petite Suite Moderne I, "In a Country Garden," and II,

"Nocturne" (F. Rosse), Mayfair Orchestra; "On the Old Fall River Line," medley, one step or turkey trot (Von Tilzer), and "You're My Girl," medley, two step, Metropolitan Band.

Ten-inch, double-sided: "A Lover in Damascus Suite," "Beloved in Your Absence," "How Many a Lonely Caravan," and "Allah Be With Us"; "A Lover in Damascus Suite," "Where the Albana Flows" and "Far Across the Desert" (Amy Woodforde-Finden), arr. by Percy Fletcher, Band of H. M. Coldstream Guards; "Prehistoric Zig Zags," intermezzo, two step (Norman Kennedy), and "I want Some Loving" (Ben Styler), Mayfair Orchestra.

Twelve-inch, single-sided: "Parsifal," Charfreitagszauber (Good Friday music), part I. (Wagner), Berlin Philharmonic Orchestra; "Parsifal," Charfreitagszauber (Good Friday music), part II. (Wagner), Berlin Philharmonic Orchestra; "To Mary" (M. V. White), Ben Davies; "Sweet Early Violets" (L. F. Sherrington), Hubert Eisdell; "The Way, the Life" (del Riego), Miss Alice Lakin; "Hosanna" (Granier) (in French), Caruso; Pizzicato, Sylvia Ballet (Delibes), Mme. Lydia Lipkowskaya; "In Sheltered Vale" (old German song), Robert Radford; "Andante Spianato" (Op. 22) (Chopin), Mark Hambourg (piano); "Developing a Photograph" (Graves and Evans), Geo. Graves and Will Evans; "A Tango Dream" (Elsa Maxwell), Miss Grace La Rue; "Oh! Lor!" (Winifred O'Connor), G. P. Huntley; "Cheer, Boys, Cheer!" (Tom Clare), Tom Clare.

Ten-inch, single-sided: "There is a Flower That Bloometh" (Wallace), John McCormack; "The Brook" (Dolores), Miss Alma Gluck; "The Harvest Dance" (R. Batten), Stewart Gardner; "Berceuse" (Townsend), Fritz Kreisler (violin).

Some Excellent Issues.

The standard of quality on half-crown records to-day is even higher than that of the five-shilling records of a few years ago, says the Columbia Co. in drawing attention to their April list of talent.

Some excellent issues are to be found, such as the Peerless American Quartette's singing of "Salvation Nell"; the playing of "Semiramide," by the Milan Symphony Orchestra under Maestro Romani; Mme. B. de Pasquali's beautiful singing of "Thou Brilliant Bird" and "Villanelli"; Thorpe Bates' ten-inch record of "Fairings," and Haydn Woods' "The Sea Road."

A new record by David Bispham is always greeted with delight, for it may be safely said that no records offer such a satisfying return for the purchase price as those by this great artist at four shillings on Columbia-Rena. His admirers will be glad to hear his artistic rendition of Hodson's dearly loved song, "Tell Me, Mary, How to Woo Thee."

"WHAT COME YE OUT TO SEE?"

Whole-hearted criticism of Reed Miller, the tenor, is found in the following from the Emporia Gazette: "As a general thing, tenors assay at the rate of thirty cents a car in Emporia, but Reed Miller can come back here any old time, and find a room with a bath waiting him. After listening to him for a few strains, one doesn't have to wonder why phonograph companies fight for his oratorio records. Miller closely resembles Bill Colyar's head barber; otherwise he is a perfect Apollo."

GRAFONOLA AT WINTER RESORT.

Management of Tampa Bay Hotel, Tampa, Fla., Testify to the Satisfying Quality of the Columbia "Mignonette" for Entertaining Their Guests During the Past Season.

(Special to The Talking Machine World.)

ATLANTA, GA., April 6.—The local store of the Columbia Graphophone Co. received a few days since a very interesting letter from the Tampa Hardware Co., Tampa, Fla., Columbia dealer, enclosing a note of appreciation from the management of the Tampa Bay Hotel, Tampa, Fla., one of the best known winter resort in this section of the country. This hotel was but recently equipped with a Columbia "Mignonette," and the manager states that the machine has given his guests more pleasure than anything he ever introduced.

He is particularly delighted with the Columbia dance records, and remarked that his guests would rather dance to the music of Columbia records than with the regular hotel orchestra. This, the manager ascribes to the perfect tempo of the Columbia dance records, due to the supervision given their production by G. Hepburn Wilson, the prominent New York dancing expert. The Tampa Hardware Co. closed the sale of this machine to the Tampa Bay Hotel, and is now featuring to excellent advantage the letter that was sent them.

Westervelt Terhune, the popular manager of the local store, states that during March he secured more new Columbia dealers of the best ranking than in any month of this store's history. Among these new dealers are John A. Cunningham, Jacksonville, Fla., a prominent piano dealer, handling the Steinway and Aeolian lines and the Hamilton Green Piano Co., of Tampa, Fla.

HAVE TWO THRIVING STORES.

The R. L. Seeds Co., which now has two thriving exclusive Columbia stores in Columbus, O., this week signed a lease for ten years for a large and spacious building on High street near Town, at an average annual rental of \$3,600.

DUTY ON STEEL NEEDLES.

Held to Be the Same as the Talking Machines in Which They Are Used.

Steel needles used in talking machines were held last week by the Board of United States General Appraisers to be properly dutiable as parts of talking machines at 45 per cent. ad valorem, as provided for in Par. 468 of the tariff act of 1909. Landay Bros., of this city, were the importers. Judge Sullivan, in overruling the contention of the protestants to have the needles classed as manufactures of wire, says that it is established beyond dispute that the needles are of no use except in connection with the machines, and are used entirely in the production of records.

SUCCESS WITH THE LAUDER RECORDS

C. A. House & Co., Wheeling, W. Va., Feature the Records by the Famous Scotch Comedian During His Engagement in That City.

(Special to The Talking Machine World.)

WHEELING, W. VA., April 7.—A splendid follow-up to the theatrical engagement of a Victor artist was used recently by the C. A. House Music Co., the prominent Victor dealers of this city. Harry Lauder, the world-famous Scotch comedian was billed for several performances here, but owing to his fame and prominence, many of his admirers were unable to secure tickets to hear him.

Realizing the true state of affairs, the C. A. House Music Co. staged a Victrola recital immediately following Harry Lauder's engagement for the benefit of those who were unable to attend his performances. At this recital the Lauder records in the Victor library were featured, and the success of this timely recital work may be gleaned from the fact that the C. A. House Co. closed sales of fifty Lauder records and a Victrola XIV. and XVI. the day following the recital. In addition to these direct sales, it is hardly necessary to state that the company considerably enhanced its prestige by its thoughtfulness and consideration.

PHONOGRAPH'S SOCIAL VALUE.

Big Favorite with Boys in Social Center Clubs —Its Value Demonstrated.

Fifty boys attended the first meeting of the Social Centre Club for boys and young men in the Doylestown, Pa., high school the other night. They were reluctant to leave at 10 o'clock when Principal Carmon Ross, who is at the head of the movement, announced that it was time for boys to "turn in," "Give us more selections on the phonograph," they shouted.

So, there was interest, certainly, for one night. At least fifty boys were kept off the streets and from unworthy associates and associations.

The idea of Mr. Ross and his associates have in this work is to give the boys something better than they will find on the streets and to get them in the habit of wanting these better things rather than corner loafing. In reaching that end it is proposed to have the larger boys help with the work and be a part of the movement. The Edison phonograph was used and the Blue Amberols did the entertaining.

APPRECIATION OF THE VICTROLA.

A copy of Gossip, a paper for the home, published in Austin, Tex., contained recently the following appreciation of a Victor-Victrola, incidentally forming an excellent piece of publicity for the J. R. Reed Music Co., Victor dealers in that city:

"To keep the family gathered around the home and fireside, or to amuse the lonely man or woman without a family, there is nothing better than a Victor Victrola. At your own sweet will you merely slip in a record and Caruso or Melba will sing, a noted pianist will play or a famous orchestra will give anything from a frivolous rag-time to the most classical composition. If interested in Victrolas and the late records, be certain to visit the J. R. Reed Music Co.'s Victrola rooms."

THE RIMINGTON COLOR ORGAN.

Elaborate Battery of Colored Diaphragms Produce Color Music Which Works on the Emotions as Sound Music Does—Future of Instrument Lies in Combination with Music.

We may soon be dancing to the silent rhythm of colored lights if an instrument described in the Scientific American by John W. N. Sullivan should ever come into popular use. This is called the Rimington Color Organ. It consists of a keyboard controlling an elaborate battery of colored diaphragms, through which the light of a powerful arc lamp pours. Any color or combination of colors can be played and their intensity can be heightened or lessened at will, just as musical sounds can be played upon a piano. "Color music," Prof. Rimington calls it. It is intended to work upon our emotions much in the same way as sound music does.

"Imagine a darkened concert room," writes Prof.

Diagrammatic Section Showing How the Color Music Is Produced.

Rimington in his book, "Color Music." "At one end there is a large screen of white drapery in folds surrounded with block and framed by two bands of pure white light. Upon this we will suppose, as an example, that there appears the faintest possible flush of rose color, which very gradually fades away while we are enjoying its purity and subtlety of tint, and we return to darkness. Then, with an interval, it is reported in three successive phases, the last of which is stronger and more prolonged.

"While it is still lingering upon the screen a rapid series of touches of pale lavender notes of color begin to flit across it, gradually strengthening into deep violet. This again becomes shot with amethyst and afterward, changing into a broken tint of ruby, gives a return to the warmer tones of the opening passage.

"A delicate primrose now appears, and with little runs and flushes the pulsation leads through several passages of indescribable cinnamon color to deep topaz. Then suddenly interweavings of strange green and peacock blue, with now and then a touch of pure white, make us seem to feel the tremulousness of the Mediterranean on a breezy day, and as the color deepens there are harmonies of violet and blue-green which recall its waves under a tramontana sky. More and more powerful they grow, and the eye revels in the depth and magnificence of the color as the executant strikes chord after chord against the bass notes of the instrument.

"Then suddenly the screen is again dark, and there is only a rhythmic and echoing beat of the dying color from time to time upon it. At last this disappears also, and there is another silent pause, then one hesitating tint of faded rose as at the opening of the composition.

"Upon this follows a stronger return of the color, and as the screen once more begins to glow with note after note of red and scarlet, we are prepared for the rapid crescendo which finally leads up to a series of staccato and forte chords of pure crimson which almost startle us with the

force of their color before they die away into blackness."

The mechanism is better understood from the accompanying diagram than it would be from a description. The illumination is furnished by a 13,000 candle-power arc lamp. An octave of the keyboard responds to a complete spectrum, the intensity of the color depending upon whether one, two or more octaves are played. There is an ingeniously devised screen for making a color appear and disappear gradually.

Prof. Rimington believes that the future of this instrument lies in combination with music. The colors of sounds are no new discovery. Lavignac, for instance, says the timbre of an oboe is rustic green and the blast of a trombone is heavy crimson. The art of color music is in its infancy, but its possibilities are wide.

The great trouble with the orchestration of colors is that different persons hear the same color differently—a note that is blue to one might be pink to another.

COLUMBIA WITH CHRISTMAN.

Arrangements Closed Last Month Whereby Christman Sons, 25 West Fourteenth Street, Will Handle the Complete Line of Columbia Products—Will Be Given a Very Handsome Display in Their Attractive Warerooms.

The Columbia Graphophone Co. closed arrangements on March 25 whereby Christman Sons, 35 West 14th street, New York, the well-known and successful piano house, will handle the complete line of Columbia products. This deal has been under consideration for some time, and with the consummation of arrangements recently, the Columbia Graphophone Co. adds to its list of local representatives another live-wire and progressive piano house.

Christman Sons handle the products of the Christman Piano Co., New York, and their marked success is evidenced in the fact that the firm but recently more than doubled their available wareroom space. Christman Sons are planning to institute an aggressive campaign on behalf of the Columbia products, and will display the machines prominently in their show-window and demonstration booths.

RECOVERS FROM SEVERE ILLNESS.

A. J. Smith, proprietor of the A. J. Smith Piano House in Clinton, Ia., who was recently operated on for appendicitis at Mercy Hospital, is improving after a very critical period of illness, much to the gratification of his many friends.

DECISION IN HILL PIANO CO. CASE.

Judge Hazel, in United States District Court Affirms Order of Referee in Bankruptcy Regarding Disposition of Property of Company.

(Special to The Talking Machine World.)

BUFFALO, N. Y., March 31.—Judge John R. Hazel, here in United States District Court, handed down an opinion in the matter of the Hill Piano Co., of Jamestown, N. Y., bankruptcy case, the opinion affirming the order of Referee in Bankruptcy Leslie A. Pease as to the disposition of the property of the company by the trustee. The opinion was written on the petition for a review of the referee's order. The question submitted to the attention of Judge Hazel was that as to the right of the unsecured creditors to decide as to the disposition of the property pledged to certain secured creditors, and as to the right of the referee to direct delivery by the trustee of this particular property. The meetings of the Hill Co. creditors have been filled with arguments and disputes as to whether the unsecured creditors had a voice in the sale or other disposition of the property. Finally the referee made this order affecting the trustee's action and certain other creditors immediately petitioned for a review by Judge Hazel.

In the court's opinion it was stated that while there was a suggestion in a measure of collusion and connivance among certain of the unsecured creditors at the beginning of the proceedings, this suggestion lost force in view of recent bankruptcy sessions of the case. Confirmation of the order directing the delivery of the property removes the necessity of litigation in the State courts.

TALKING MACHINE EXPORTS.

The Figures for January Presented—Reports Show Falling Off for the Month.

(Special to The Talking Machine World.)

WASHINGTON, D. C., March 30.—In the summary of the exports and imports of the commerce of the United States for the month of January (the latest period for which it has been compiled), which was recently issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for January, 1914, amounted to \$209,805, as compared with \$210,770 for the same month of the previous year. The seven months' exportation of talking machines, records and supplies amounted to \$1,671,680.

PUTNAM, CONN.

"STAGE FRIGHT" BEFORE THE TALKING MACHINE.

Thomas Chalmers, in the Century Opera Program, Tells of Embarrassment Felt by All Singers When Facing the Horn in the Recording Laboratories Which Is Never Completely Overcome—Constant Fear of Making a Break the Cause of Nervousness.

Many singers, if not all, have felt the particular variety of "stage fright" that attacks one when making phonograph records. Although it diminishes as one continues to record successfully, it never wholly disappears. There is something about a recording room—with the devouring horns that face a singer, and the feeling that the sins of commission and omission are never to be forgiven nor even forgotten—that is more demoralizing than the ordinary "stage fright" of the theater.

The unforgivable sin in a record is a "frog" (a slight break or huskiness), a thing which, in the theater, is almost imperceptible, but which, on the record, is a blemish that is fatal. It may be easily understood that hearing a singer sing the same song hundreds of times, and always hearing him break on the same spot, is enough to cause the average listener after a few hearings to hear only that one blemish and finish by hurling the record out of the window and vow solemnly never to buy another record made by that singer.

It is this very fear of "frogs" and determination to avoid them that very often are their cause—given a few bad starts, and it seems almost impossible to get away from them; although a singer may leave the recording room after such an experience and when the nervous strain is over find his voice as clear as a bell. A similar nervousness that I feel in the theater is caused by the dread of forgetting the words; and in that case also your fear is your worst enemy.

A very real and considerable difficulty in the making of records is that the singer does not hear his own voice in the same way that he hears it when singing in a large auditorium. You hear it—but differently. It is gathered into a horn and never comes back to you as it does under other conditions, a fact which is very disconcerting at first and always makes it difficult. You have to sing by "feeling" alone and are denied the aid of your ears, which aid is very great, as every singer knows. I have sung in many acoustically bad auditoriums, but never in one as bad (from the singer's standpoint) as the recording room.

However, in spite of, or on account of, these difficulties (probably the latter), it is extremely interesting work. In these days when there seems

to be a general understanding of the educational and moral influence of music, when financiers and governments are spending large sums of money to provide music for all, and are being lauded for their philanthropy, let us give Mr. Edison the credit and thanks for the greatest work of all—the phonograph. In the last few years it has done more to make music a part of every man's life than all the opera houses, symphony orchestras and musical organizations in the world. It has made the success of the Century Opera House in New York a possibility.

The experiment had been tried many times of giving New York popular-priced opera and always disastrously, but in the last few years, thanks to the phonograph, a sufficient musical taste among the public has been created to support such an institution. A small but surprisingly illuminating example of the power of the phonograph is found in the fact that one of the big publishing houses, quite a number of years ago, published an English translation of the great tenor-baritone duet from "Forza del Destino." They did so probably from the knowledge of its great musical worth and trusted to that to secure a sale for it. It was practically unknown and the sales were so small that the plates were destroyed. Thanks to a very well-known record of that number made by two great singers, it is to-day almost universally known. It is one of the most popular of concert numbers; has been retranslated and extensively sold.

Recording is one of the greatest aids to a singer's diction. If more singers recorded in English there would be less talk of bad diction for the primary requirement for a good record is that the text be understood, and unless a singer is able to sing the words distinctly he is useless from a phonograph standpoint. The sooner the general public are as critical as the phonograph public in this matter of diction, the better it will be for opera in English, for half of the value of opera or music drama lies in the audience understanding the dramatic value of the text.

Without that comprehension it is not complete. When it is sung in a foreign tongue, or in the vernacular indistinctly delivered, it ceases to be music-drama and becomes music and pantomime.

over Buffalo are now talking of the stunt and say it is one of the greatest ever publicly displayed.

WILL REWARD INVENTORS.

Marshall Heads Evans Committee to Lessen Industrial Mortality.

(Special to The Talking Machine World.)

WASHINGTON, D. C., April 8.—Vice-President Marshall, Speaker Clark, Secretary Houston, Secretary Wilson, Robert McKay, editor of The Railroad Man's Magazine; H. C. Young, editor of Popular Electricity, and President Samuel Gompers, of the American Federation of Labor, have accepted membership on a committee to select judges who will award prizes of \$1,000, \$300 and \$200 to inventors of the best devices to prevent accidents in industrial pursuits and the contracting of vocational diseases. The prizes are offered by Victor J. Evans, a Washington patent attorney, who paid Harry Atwood, the aviator, a cash prize of \$10,000 for flying from St. Louis to New York.

The formation of the committee, headed by Vice-President Marshall, is the outgrowth of agitation over a pending bill creating a Bureau of Labor Safety in the Department of Labor. The bill has passed the House and is now under consideration by the Senate Committee on Education and Labor.

R. S. Williams & Sons Co., Ltd., Toronto, Can., Edison disc jobbers, celebrated its 65th anniversary recently by a special musical program and an "at home" reception. It was the anniversary also of the company's first year in its new store.

How To Make Dollars

Yes, and how to make them grow with a comparatively small outlay of time and money.

That topic ought to interest you, Mr. Talking Machine Dealer!

Just figure how admirably you could work in pianos with your present line.

By pianos we mean those which are called both straight and player-pianos—in fact, every member of the piano family, including grands; but the main thing is to get your instruments right. In other words, at values which insure you liberal profits.

We have helped many a piano merchant to become a successful business man, because we have given him values which were not obtainable elsewhere, and we can help you. We can help you to show profits which will be particularly pleasing.

We would suggest that you do not delay an investigation of this matter, but take it up to-day—right now.

Don't waste your most valuable asset—time—by delaying too long!

VICTROLA SCORES GREAT HIT.

New Invention of the Federal Telephone Co., the Muslaphone, Utilized to Convey Victor Music Throughout Elmwood Music Hall, Where the Great Electric Show Took Place.

(Special to The Talking Machine World.)

BUFFALO, N. Y., March 30.—Buffalo's great electric show which recently closed proved to be a great success. It is estimated that more than 50,000 people went to the Elmwood Music Hall during the show to view the great modern achievements in the world of electricity. All the latest inventions in the electrical mechanism were exhibited and the throngs of onlookers marveled at the great show.

The feature of the entire week was a continuous concert given by a Victrola machine. The way this was worked is simply something wonderful. The Federal Telephone Co. has a new invention called the muslaphone, which is similar to the telephone. At one end of the spacious and brilliant hall was a Victrola. To this was attached wires which connected several hundred funnels in the ceiling. As the sound of the Victrola issued forth, the sounds came from these funnels simultaneously, bringing out the strains of sweet and cherished music, while the crowd looked on in wonder. Despite that one night there were over 8,000 people passing in and out the hall the noise which the crowd naturally created did not dim the sounds of music from the Victrola. Even the band which was in attendance could not drown out the sounds from this wonderful machine with the aid of the muslaphone. People all

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., April 10.—PHONOGRAPH RECORD, F. H. Gregory, Philadelphia, Pa. Patent No. 1,089,835.

One object of the invention is to provide a novel form of record and supporting structure therefor whereby in conjunction with suitable mechanism it shall be possible to obtain and reproduce a sound record of practically any length; it being further desired that the "record" made according to this invention shall have its parts so disposed as to occupy but relatively little space, even though it be of comparatively great length.

Another object of the invention is to provide a record for a talking machine of such a nature that notes indicating its subject matter may be conveniently applied to it without material loss of

space and at any desired portion of its length; it being thus possible to provide a musical record with any desired directions for its rendition.

Another object of this invention is to provide a record supporting structure in the form of a ribbon or strip of any desired length, having a sound

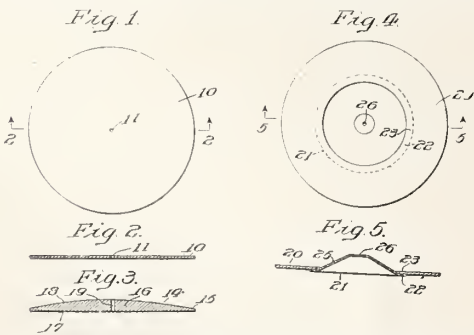

record in the form of a line of varying depth or of an undulatory nature, arranged or placed upon it in such manner as shall utilize to the best advantage the record receiving surface.

Fig. 1 is a plan of a portion of a phonograph record constructed according to this invention; Fig. 2 is a diagrammatic view illustrating one method of using the record; Fig. 3 is a fragmentary section on a greatly enlarged scale, showing one of the features of the invention; Fig. 4 is an enlarged side elevation showing the disposal of the ends of successive sections when the record strip is folded; Fig. 5 is a plan of the strip shown in Fig. 4; Fig. 6 is an enlarged plan showing another of the features of the invention, and Fig. 7 is a fragmentary plan of a modified form of sound record.

SOUND BOX DIAPHRAGM.—John C. English, Camden, N. J. Assignor to the Victor Talking Machine Co. Patent No. 1,091,202.

This invention particularly relates to vibratory diaphragms for sound reproducing devices such as are co-operatively employed in connection with sound reproducing mechanism of a talking machine.

It is believed that diaphragms which in themselves are more or less resonant, and emit individual tones peculiar to their material or struc-

ture, produce vibrations which are sympathetic with, and to a considerable extent tend to interfere with tones produced by vibrations effected by sound waves of similar frequency, which it is desired to record, and which tend to cause disturbances which produce unpleasant and disagreeable sensations upon the ear of the hearer in the reproduction of a record.

The principal object of this invention is to pro-

vide a diaphragm which tends to obviate the difficulties experienced in diaphragms having an individual resonance by forming the diaphragm of substantially non-resonant material, preferably composed of a subereous formation.

Other objects of this invention are to provide a diaphragm of such extreme lightness and flexibility as to be capable of responding to, and reproducing the most minute and delicate sound waves, with all their overtones, and consequently to produce substantially the full volume of the original sounds; to provide a diaphragm of such uniformity as to produce substantially perfect recitation or reproduction of the original sounds; to provide a diaphragm formed of such resilient material as to be capable of being supported without employing gaskets and prevented from rattling by rigidly engaging its peripheral edge between the opposed faces of the relatively adjustable members of the sound box; and to provide a diaphragm which will adhere to the faces of the sound box members.

Further objects of this invention are to provide a diaphragm which is formed of a material readily obtainable; and to provide a diaphragm which is simple in construction, efficient in operation and which may be cheaply produced in any desired quantity.

In the accompanying drawing Fig. 1 is a face view of a diaphragm conveniently formed in accordance with this invention; Fig. 2 is a central transverse sectional view of said diaphragm, taken on the line 2-2 in Fig. 1; Fig. 3 is a view similar to Fig. 2 showing a possible modification of the diaphragm shown in Figs. 1 and 2; Fig. 4 is another form of diaphragm constructed in accordance with this invention, and Fig. 5 is a central transverse sectional view of the diaphragm shown in Fig. 4 taken on the line 5-5 in said figure.

SOUND BOX.—Thos. Macdonald, Bridgeport, Conn., assignor to the American Graphophone Co. Patent No. 1,091,001.

This invention relates to sound boxes for talk-

ing machines, particularly those of the type operating upon "zigzag" sound records. The objects of the invention are to cheapen and simplify the construction of the sound box, and to improve the quality of its audible reproduction.

The invention comprises the pivoting of the stylus lever upon a positive axis, consisting preferably of cone bearings and the locating of the stylus and of said axis in the plane of the diaphragm.

The invention further comprises the secure yet readily detachable mounting of the diaphragm in such manner that it is unconfined against vibrating with the utmost freedom. And, finally, the invention consists in the various details of construction and arrangement here pointed out and claimed.

Fig. 1 is a front view or elevation of this improved sound box; Fig. 2 is an edge view thereof, partly in section, and Fig. 3 is a detail, on an enlarged scale, showing the manner of securing the diaphragm in place.

A successful manager believes: That a sales manager's job is no bed of roses, and he must always keep ahead of his organization. He is always pushed to the limit by the live-wire men under him, who are always coming with new methods and ideas, their hearts filled with ambition to secure his job.

A HUSTLING WESTERN JOBBER

Is W. E. Kipp of the Kipp-Link Phonograph Co., Who Has Built Up an Excellent and an Expanding Business with the Edison Line.

One of the most strenuous and successful Edison jobbers in the West is W. E. Kipp, president, treasurer and general manager of the Kipp-Link Phonograph Co., Indianapolis, Ind. He has built up a solid business by tireless effort and closest attention to those minor details which are often overlooked, but which are ever essential to the man who desires to move ahead.

Year after year his Edison jobbing business has been expanding. He has an excellent line of dealers in his territory who rely on him and his com-

W. E. Kipp.

pany with the utmost confidence that their needs will be looked after with the greatest promptness and surety.

One of his greatest hobbies is taking care of the little things, for he well understands that it is the little things that count in building business. In fact, Mr. Kipp and his associates in the company are known as the 'Can't-Be-Beat Edison Jobbers of Indiana.' They are well maintaining this reputation and they have in vogue a system for handling the dealers' orders that is most admirable.

The Kipp-Link Co. has gained not only a host of friends in Indiana territory, but has lately reached out over the States of Illinois and Ohio, with no small degree of success.

There are evidently no slow ones in the Kipp-Link outfit, for every man in the house from the porter right up through the stock room, office, traveling force, to the men at the head of the business all are "on the job" developing business.

The success of Mr. Kipp, whose portrait is reproduced herewith, is a model that others may well emulate. Close attention to details, consideration of every need of customers—in brief, hard work—arc the means to the end.

There are probably sadder things in life than the man with an indifferent musical ear trying to play the accordeon. But no man, Manuel!

PUSHING WILLIAMSPORT DEALER

Is the Pennsylvania Music Co., Controlled by Sweet, Reed & Franciscus, Who Handle Columbia Goods in Very Attractive Quarters.

(Special to The Talking Machine World.)

WILLIAMSPORT, PA., April 6.—One of the most attractive talking machine stores in this section is that of the Pennsylvania Music Co., controlled by Sweet, Reed & Franciscus at 209 West Fourth street. Columbia goods are handled exclusively and branch stores are controlled in State College, Jersey Shore and Muncy, Pa.

When noted artists come to this city they make this establishment their headquarters, and the com-

Showroom of the Pennsylvania Music Co.

pany is showing with some pride a photograph of Godowsky taken in the store listening to one of his records. Other recent visitors were Alice Nielson and other celebrities. The view of their store which appears herewith gives an excellent idea of its appearance and perfection of its equipment.

Mr. Franciscus, the general manager of this establishment, was for a number of years connected with the Metropolitan Opera House in Philadelphia, and became interested in the talking machine through the offices of Mr. Eckhart.

OLD ONE IN NEW DRESS.

Henry T. Finck tells an amusing story which he calls a new version of an ancient tale: "At a rehearsal Richard Strauss stopped the band and told the first trombonist that he was not playing the right note in a certain bar. The musician insisted that he was playing the note as printed; whereupon R. S. walked over to his desk, inspected his part, and found sticking to the page a dried fly which the trombonist had played as a note. Removing the fly, and returning to his desk, R. S. said: 'Now, play it as I had it printed.' The trombonist did so, whereupon R. S. again stopped the band and said: 'The fly was right.'"

RECORDS IN ALL LANGUAGES.

Proofs of Covers of Foreign Record Catalogs Just Sent Out by the Victor Co. Give an Idea of the Wide Scope Covered by This Company.

One of the most attractive announcements Victor dealers have received in some time was a multi-colored sheet recently sent out to introduce the front covers of all the new foreign record catalogs that the Victor Talking Machine Co. can now supply. This announcement sheet showed the covers of these new catalogs in their actual colors and designs, making a striking and impressive sheet that could not fail to hold the dealer's attention.

Among the foreign languages for which new Victor foreign record catalogs are now ready are the following: Portuguese, Dutch, French, French-Canadian, German, Russian, Ruthenian, Lithuanian, Slovak, Croatian-Servian, Servian, Roumanian, Turkish, Arabian, Swedish, Danish, Norwegian, Finnish, Spanish, Greek, Hebrew, Yiddish, Italian, Bohemian, Hungarian, Polish.

Accompanying this lithographed sheet of new catalog covers was an interesting announcement to the Victor dealers reading in part as follows: "There is a foreign population in your neighborhood.

Find out what nationalities are in your territory, the numerical strength of each, and then go after the business. We are ready to give you very substantial help by supplying various catalogs in foreign languages free of charge. The illustrations on this sheet show the front cover of all the different kinds we can give you—they are record catalogs and machine catalogs combined. In each separate catalog, and in each different section of any catalog covering more than one language, there are two pages setting forth the merits of the Victor in the languages of the people addressed. There are also two pages showing the various types of instrument. With these catalogs we will also supply window cards in French, German, Italian, Bohemian, Polish, etc., announcing the fact that records in that particular language can be obtained at your store." Surely good advice for the live dealer.

TRITON PHONOGRAPH CO. PLANS.

Disc Phonograph That Sells at \$10 to Be Handled Through State Agents or Jobbers, Who Will Sell to Dealers in Due Course.

The Triton Phonograph Co., 41 Union square, New York, is doing a lot of energetic work to promote the sale of the "Triton" phonograph—a machine that retails for \$10. The "Triton" is designed to accommodate the regulation size of disc

The Triton Phonograph.

needle records. It can be used in a small or large size room, and being only 11 x 13 inches in size and weighing but six pounds, it is easily carried on various excursions, outings, etc. In fact, the company also manufactures a traveling case of imitation leather with metal corners which holds this machine and a dozen records. The case itself retailing for \$1.

J. R. Kraus, manager, in discussing the policy of the company with reference to selling plans, stated that it is the intention to appoint State agents or jobbers, who in turn will look after the dealer market in each territory. It is Mr. Kraus' aim also to restrict the sale of this machine to one dealer in a city.

UDELL DISC CABINET CATALOG

Will Soon Be Ready for the Talking Machine Trade.

The Udell Works, Indianapolis, Ind., announces that it will soon have ready a catalog covering disc cabinets for the three makes of machines.

This concern has discontinued a number of styles, believing that it is better to concentrate upon the styles that are most in demand.

As this new volume will show the line as it is up-to-date, the dealer may feel sure that all of the models are of the style and quality that is guaranteed by the Udell Works.

THE PEOPLE SEEK FACTS.

Let the advertiser first know the ground floor, facts about his product and then tell them, steadily, persistently and all the time, right in the face of all ignorant criticism, however perverted it may be, and he will win out in time, for the people seek facts and ride over biased and self-seeking comment.

SELECTED RECORDS LIST POPULAR.

Some Co-operative Work That Is Appreciated by Columbia Dealers and Customers.

As a valuable adjunct to its recently issued comprehensive catalog of records, the Columbia Graphophone Co. announced to its trade last week the compilation of a selected list of popular-priced Columbia double-disc records chosen from the general Columbia catalog and arranged alphabetically under various classifications.

The records listed on the pages of this catalog were chosen from the general catalog with special regard for the convenience of Columbia patrons in selecting a representative library of the popular-priced records that have been accorded the greatest favor by the public up to the present time.

Some idea of the scope of this auxiliary catalog may be gleaned from the fact that it lists records under every possible heading that a customer would be likely to desire. These headings include band music, dance selections, accordion numbers, hymns and sacred songs, orchestra records and many others.

WOULDN'T KNOW HOW.

"Have you any last words to say?" they asked the man about to be electrocuted. "I wouldn't know how," he said, "I'm married."

READE your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

W. STEVENS HOME FROM EUROPE.

Manager of Foreign Department of Thomas A. Edison, Inc., Completes Arrangements for Transferring European Business of Company to Orange—Increasing Popularity of Edison Products Abroad—Blue Amberol Liked.

Walter Stevens, manager of the foreign department of Thomas A. Edison, Inc., returned to Orange, N. J., recently after an extended trip to Europe, during which he visited, London, Berlin, Paris and other prominent European cities, but spending the major part of his time in London looking after the interests of the Edison companies.

Prior to Mr. Stevens' leaving for Europe the officials of Thomas A. Edison, Inc., had decided to transfer the entire European phonograph business to the main offices at Orange, leaving the various European branches free to concentrate their efforts on the development and cultivation of their moving picture film business. While abroad Mr. Stevens took care of the many details incidental to this important transfer.

Mr. Stevens found Edison products in Europe increasing their popularity steadily and consistently. The Blue Amberol records are proving ready sellers with the trade, while the advent of the Edison disc products is awaited with keen interest and expectation. In discussing the sale of records on the other side of the Atlantic Mr. Stevens remarked that there is a continued demand for ragtime selections, although there is a very heavy demand for dance selections. England particularly is manifesting an unusual interest in dance music.

SUIT AGAINST THE VITAPHONE CO.

Fred Stern, President of Chamber of Commerce of Newburgh, N. Y., Brings Action Against Plainfield Concern on Charge That It Failed to Keep Agreement to Move to Former City as It One Time Planned.

(Special to The Talking Machine World.)

NEWBURGH, N. Y., May 6.—Claiming that the Vitaphone Co., of Plainfield, N. J., a Delaware corporation, failed to live up to its agreement to locate a factory in Newburgh, N. Y., Fred Stern, president of the Chamber of Commerce of the latter city, has started suit in the New Jersey Supreme Court to recover \$500 paid for stock of the Vitaphone Co.

Papers in the suit were forwarded to Plainfield last week by Jacob L. Newman, attorney for Mr. Stern. As the parties concerned live in different counties the suit is brought in the Supreme Court. The Vitaphone Co. is authorized to do business in this State and has an officer here upon whom service may be made.

According to Mr. Stern's complaint, the Vitaphone Co. agreed to purchase property in Newburgh and build a factory for the manufacture of cabinets to contain the Vitaphone talking machine. With that understanding, Mr. Stern says, the citizens of Newburgh were prevailed upon to subscribe for stock. The Chamber of Commerce head says he bought fifty shares for which he paid \$500, receiving twenty shares of common stock as a bonus. He asserts that the Vitaphone Co. failed to buy any Newburgh property or locate a factory there.

The Vitaphone Co. manufactures its motors and assembles the metal parts in its factory at Plainfield. Mr. Stern says the agreement was that the motors were to be shipped to Newburgh for mounting in the cabinets to be manufactured there.

The Vitaphone Co. contends that the citizens of Newburgh failed to support the project and that it could not afford, therefore, to locate at Newburgh.

It is not so much what you are going to do as what you are doing that counts in the credit sheet.

MOVIES TO LEAD ORCHESTRAS.

Famous Conductors May Appear in Films in Dozens of Concerts at the Same Time.

A despatch to the New York World under recent date says that by means of films just placed on the market by the Meister Film Co. of Berlin the most famous musical directors will be enabled to conduct a dozen or more performances in different cities at the same time, and audiences of the future will be able to enjoy the conducting of great masters long after the musicians are dead.

This has been achieved by the use of master conductor films, and the film company will shortly give a huge concert here when all the most famous conductors will conduct by film-proxy.

Felix von Weingartner, after witnessing the first private performance, said:

"The success was extraordinary. The opera conducted was 'Carmen,' and the machinery for producing the film was so exact that after one trial the musicians were able to play with exactly the same accuracy as they would have done if a living conductor had been present. There is nothing mechanical about the performance, and the result is genius. A clever conductor can be transferred to a living orchestra for generations to come."

A number of well-known musicians have been invited to play in front of the moving films and a majority of them declare that the suggestive effect of movements shown on the film are quite as powerful as those of a living conductor.

The films already prepared show Weingartner conducting the "Egmont" overture, Geheime von Schuch of the Dresden Royal Orchestra conducting "Tannhauser" and Oscar Fried in Berlioz's symphony fantastique.

Arthur Nikisch says the new films are an epoch-making invention and adds:

"How valuable, for instance, it would be to the present generation if it could see exactly how Wagner conducted the ninth symphony at the famous Bayreuth festival in 1872!"

COLUMBIA CO. BRINGS SUIT

Against Several Companies for Infringement of Patents—Statement by Legal Department.

The legal department of the Columbia Graphophone Co. made the following announcement this week:

"The American Graphophone Co. owns and controls a number of United States patents relating to talking machines, records and accessories, and is the intention of the Graphophone Co. to attack infringements of their patent rights; and in earnest of its purpose it has already instituted several suits, among others against the American Parlograph Corporation, the Triton Phonograph Co., Inc., Gimbel Bros., and other suits are in course of preparation.

"Owing to changes in the practise in the Federal Courts it is uncertain at this time when these cases will be reached for trial; but the legal department of the American Graphophone Co., Mauro, Cameron, Lewis & Massie, New York City, expresses itself as ready for immediate trial and as entirely confident of success.

TAKES ON TALKING MACHINES.

(Special to The Talking Machine World.)

ANAHEIM, CAL., May 3.—The Graham Furniture Co., one of the largest and finest furniture houses in this part of the country, located in this city, has just taken on the agency for the Edison disc phonograph. Albert Graham, who owns and conducts the enterprise, will take a strong personal interest in the new department.

One realizes that what you get for nothing is worth just that, when a lot of voluntary advice is handed to you.

VICTROLA WINS SUPERVISORS.

Mrs. Clark Demonstrates Value of Victrolas in Schools at National Conference in St. Paul—Many Noted Musical Authorities Present.

(Special to The Talking Machine World.)

ST. PAUL, MINN., May 6.—The value of talking machines in school work was exemplified in a striking manner at the seventh annual meeting of the National Conference of Music Supervisors. Mrs. Frances E. Clark had almost a full line of Victrolas in the West Hotel, the headquarters of the convention, and her intelligent demonstrations of the use that talking machines might have in the schools attracted much favorable comment from the teachers. Many of the Minneapolis schools have instruments of various kinds and have been trained to distinguish between good music and trash, and the visitors were much interested to hear the young critics place their seal of approval or disapproval on a long series of musical numbers of varying order of merit. The program was made up of numbers which the youngsters had never heard before, and their unerring judgment, in picking out the good music, highly entertained the teachers.

Among those in attendance were: P. P. Claxton, United States Commissioner of Education; Will Carhart, Pittsburgh, Pa.; Theodore Fitz, Greeley, Col.; Miss Mary Conway, New Orleans, La.; Miss Elsie Shawe, St. Paul, Minn.; Charles Fansworth, Columbia University; P. W. Dykema, University of Wisconsin; Mrs. Elizabeth Casterton, Rochester, N. Y.; Charles Miller, Lincoln, Neb.; Dr. E. A. Winship, Boston, Mass.; Miss Frances Wright, Des Moines, Ia.; Ralph Baldwin, Hartford, Conn.; C. A. Fullerton, Cedar Rapids, Ia.; D. A. Clippinger, Chicago, Ill.; Arthur Mason, Columbus, Ind.; Miss Estelle Carpenter, San Francisco, Cal.; Miss Ida Fischer, San Jose, Cal.; D. B. Gebhart, Missouri Normal School, Kirksville, Mo.; Osburne McConathy, Northwestern University; Miss Lillian Watts, Marquette University, and numerous others of equal prominence in the musical world.

Their appreciation of Mrs. Clark's demonstration was universal, and the general verdict, if one had been called for, would have been that talking machines are indispensable in modern schools.

SETTLED IN NEW HOME.

American Phonograph Co. Completes Removal of Headquarters from Gloversville to Albany, N. Y.—Occupies Handsome and Commodious Quarters in the Latter City.

(Special to The Talking Machine World.)

ALBANY, N. Y., May 6.—The American Phonograph Co., the well-known Edison jobber, formerly of Gloversville, N. Y., is now fully settled in its handsome new home at 707-709 Broadway, this city. The building covers a floor space of 40x200, and the company occupies two entire floors.

The main floor is occupied by the executive and sales offices, and several attractively furnished soundproof booths are also located on this floor. Every possible convenience for the company's dealers is incorporated in the furnishings and sales systems in the new building, and a cordial invitation is extended to all Edison dealers to visit the American Phonograph Co.'s headquarters when in Albany. A splendid trade has already been closed in the new home, and the company is well pleased with the outlook. This company, which is an exclusive Edison jobber, has two traveling men who cover northern New York, northern Pennsylvania, Vermont, part of New Hampshire and western Massachusetts.

Don't keep shifting your footing on the Ladder of Success. You're apt to step on the fingers of the man below you.

BEAUTIFULLY ARRANGED TALKING MACHINE ROOMS

Are Those of the Silas E. Pearsall Co., the Old-Time Talking Machine House of New York, and of Which Charles Bobzin Is Now Manager—Illustrations Give an Idea of the Equipment and Artistic Arrangement—Possess a Certain Charm That Always Attracts.

The characteristics of splendor are fully in evidence at the Victor warerooms of the Silas E. Pearsall Co., of which Charles Bobzin is manager, 16-18 West Forty-sixth Street, New York,

seen the view in the Pearsall warerooms from the first booth looking toward the street. It is really but a glimpse of the actual store, and a visit to this place must be taken to really appreciate to

View of Pearsall Warerooms Looking Toward Street.

yet so artistically has the floor been arranged, that every detail is harmoniously related to its neighbor.

EDISON DISC FOR MASONIC LODGE.

New Outfit Provides Excellent Means for Entertainment According to Officers of the Lodge—What De Witt C. Smith Has to Say.

(Special to The Talking Machine World.)

SAVANNA, ILL., May 7.—R. M. Garrett, the enterprising Edison phonograph dealer of this city, closed a sale of unusual interest recently when he sold a handsome Edison disc phonograph with a large supply of records to the Mississippi Lodge

385, A. F. and A. M., of this city. Edison disc machines have been placed in the lodge rooms of a number of prominent societies in this section of the country, and in every instance have given perfect satisfaction.

Mr. Garrett is featuring to splendid advantage the following expression of hearty praise sent him by De Witt C. Smith, the secretary of the lodge which recently purchased the Edison disc outfit:

"Since we have placed the Edison disc in our Temple it has been used very generously by members as a means of entertainment, and the unani-

Record Stock Room of Pearsall Co.

and furnished as luxuriantly as the Fifth avenue home, it is no wonder that this fashionable Victor headquarters numbers among its clients many of the wealthiest members of society.

This store is also the headquarters for the wholesale Victor business of the Pearsall Co., which has increased ten-fold since Mr. Bobzin assumed the managerial duties of the house. The record room, which is shown herewith, holds 100,000 records, while the storage rooms for machines contain a great many machines of all models. Thus the service rendered the dealers may be called "of speed and completeness," for Mr. Bobzin believes that the dealer comes first, and he aims to protect him in every instance. A great student of business conditions, Mr. Bobzin sees nothing but prosperity for the talking machine world in general, and, particularly, for his field mates in the Victor business.

mous verdict is that it is the right machine in the right place. Particular mention is frequently made by those who hear it that this is the last word in perfect tone reproduction."

MARRIAGE OF ABRAHAM DAVEGA.

The marriage of Abraham Davega, son of I. Davega, the well-known talking machine jobber, 125 West 125th street, will take place on June 18. This will be preceded by a bachelor dinner, at which time hosts of friends will tender him their good wishes.

The Success of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.
This admitted makes it important that you secure the best service obtainable.

AND THAT IS EASTERN SERVICE

To use it is to swear *By* it not *At* it.

May we not have the opportunity to convince you that our service is exceptional?

EASTERN TALKING MACHINE COMPANY

177 TREMONT STREET, BOSTON, MASS.

EDISON

FOR NINETEEN YEARS TALKING MACHINES EXCLUSIVELY

VICTOR

The newest additions to
the exclusive Victor group
of the world's greatest artists

The policy of the Victor is to secure only the very best artists.
And it secures them because the Victor and Victrola alone
are able to reproduce their voices and art to absolute perfection.

Five artists who are the most recent to decide that only the
Victor can do justice to their voices, and are now under contract
to make records exclusively for the Victor, are:

Margarete Ober

the newest contralto addition to the Metropolitan Opera Co.

Emmy Destinn

the famous soprano of the Metropolitan Opera Co.

Giovanni Martinelli

of the Metropolitan—this season's "discovery" among tenors

Lucrezia Bori

the Metropolitan's new lyric soprano

Julia Culp

one of the most successful concert artists

Every new addition to the Victor ranks gives new prestige to the Victor and Victrola.

Victor Talking Machine Co., Camden, N. J., U. S. A.

Berliner Gramophone Co., Montreal, Canadian Distributors

Always use Victor Machines with Victor Records and Victor Needles—
the combination. There is no other way to get the unequalled Victor tone

FAMOUS RECORD ALBUMS

AT VERY LOW PRICES TO MEET COMPETITION

For Durability, Artistic Design and Finish, our Albums have no equal. They are made in the most substantial manner by skilled workmen.

Our Albums are first-class in every particular, and are sold at very low prices.

OUR SUPERB ALBUMS SHOWN OPEN AND CLOSED.

MADE IN TWO SIZES TO FIT ALL 10 AND 12-INCH DISC RECORDS.

These Albums contain 17 pockets made of strong fibre paper, each pocket having a hole in the center, as shown in the picture. These pockets are so made that they show very plainly both the single and double face titles on the Records. The Albums are bound in the finest quality of Brown Silk Finish Cloth, with gilt title on front cover. They are also bound in imitation leather. Write for sample and prices of our Albums, which are superior to all others.

TWIN CITIES DANCE MAD.

Talking Machine Dealers Hard Put to Fill Demand for Dance Records—Tango Dancers Prove Strong Attraction at Cable Piano Co. Store—Records by Margaret Wilson Make Big Hit—Advance Demand Was Very Large.

(Special to The Talking Machine World.)

ST. PAUL, MINN., May 5.—St. Paul and Minneapolis have gone mad over dance music, and the dealers, whether they handle Victor, Columbia or Edison goods, hardly can supply the demand for terpsichorean records. The tango craze probably is responsible for the public craving for dance music, but, whatever the psychology of the condition may be, it is a gratifying one to the dealers.

One half of the Cable Piano Co.'s store in St. Paul is given up every afternoon to a pair of clever tango dancers, who draw capacity houses at each performance. Interest in the tango also is highly intensified by the appearance this week of the renowned Castles, both in Minneapolis and St. Paul. After their local engagements, it is fair to assume that the cities will be in an ecstasy of dance madness—and, at any rate, the dealers will try to help it along.

Columbia dealers receive many inquiries for the Margaret Wilson records, and C. P. Herman, manager of the St. Paul store, is looking for a big rush of sales. He reports the April sales as very satisfactory on the whole, though there was a falling off in business at the close of the month. His Dictaphone department is doing well, and the machine is making steady inroads in the business offices of St. Paul.

Archie Mathies, of the Talking Machine Co., handling Victor and Edison instruments, has discontinued the recitals for the summer season, but will resume the programs in the fall when people can be prevailed to come inside. Now they prefer the great outside.

The grand opera season, true to all predictions, helped the talking machine dealers considerably,

particularly in the matter of selling records. On the whole, there is a marked tone of satisfaction when the twin city dealers discuss local conditions.

HELD PARADE OF VICTROLAS.

W. H. Reynolds, of Mobile, Ala., Takes That Means of Impressing Local Residents with the Extent of His Victor Business and Stirs Up Much Interest and Good Business.

(Special to The Talking Machine World.)

MOBILE, ALA., May 8.—W. H. Reynolds, the well-known Victor distributor, recently received two carloads of Victrolas and decided to impress upon the music loving public of Mobile just what this large shipment signified, through the medium of a parade through the streets of the city before the Victrolas were placed in his store. This unique parade attracted general attention and comment, a number of newspapers mentioning it and referring to the rapidly growing popularity of the Victrola in this territory.

WANTED CARUSO IN "MISERY."

Geo. M. Richter, Jr., manager of the talking machine department of the Clark Music Co., Syracuse, N. Y., writing to The World under recent date, says:

"GENTLEMEN—Your comment in the April issue about salesmen having to be quick-witted at times, reminds me that very often we have such instances occur in our department. A few days ago a lady came in the store, and asked one of our salesladies if she had 'Caruso in Miserere'—but what she actually said was 'Have you Caruso in Misery?' To avoid embarrassment our clerk quickly handed her record No. 89,030, sung by Caruso and Alda. This suited her and she left contented and satisfied that she had it."

Diogenes didn't find the honest man because honest men haven't any great desire to be held up before the populace as worthy examples.

DISC RECORD ALBUMS

ARE WHAT EVERY

Talking Machine Owner

NEEDS AND MUST HAVE

With the index they make a complete system for filing away all disc Records, and can be added to, Album by Album, as Records accumulate, like books in a library.

A SUMMER SENSATION!

Two Dazzling Chicago Blondes Plan Unique Descent Upon Eastern Resorts—To Teach the Tango by Phonograph on the Beach.

Two beautiful blondes have arrived from Chicago to do something new in tango teaching.

Tall, lithe and fair, and with blue eyes, and Ethel Sykes and Dorothy Coffee by name, they were the tango sensations in the Windy City's lobster district all winter.

Their ultimate object in descending upon New York is to get speaking parts in stage plays. Heretofore their efforts in the uplift of the drama having been confined to motion pictures.

To keep their motor car in gasoline until September, the Misses Sykes and Coffee are going to take their tango scheme to the summer hotels along the Atlantic Coast.

These dazzling beauties purchased a Victrola on the instalment plan and thus will carry their own music with them.

They will put up at the Nassau Hotel at Long Beach, the Oriental at Manhattan Beach and the Marlborough-Blenheim at Atlantic City, and be ready at a moment's notice to teach the tango to anyone who may have the price, and their charges will be on a sliding scale, depending upon what the applicant has.

When they go in the surf, they will use alluring bathing suits, especially adapted to purposes of the turkey trot, and the Victrola will accompany them to the beach, and the sands will be turned into a ballroom. Those who have seen Miss Sykes and Miss Coffee in their bathing togs predict for them an overwhelming class when they teach on the beach, unless Anthony Comstock happens to wander along that way, when, well, you know what happened to September Morn!

An arbitrator is sometimes one who hears both sides of a quarrel and then decides to call the police.

JOBBER GET READY FOR REUNION AT ATLANTIC CITY.

Next Convention of the National Association of Talking Machine Jobbers to Be Held July 6, 7 and 8—Will Be Noteworthy in Many Respects Because of Its Educational Features—Committee Active in Perfecting Plans—Latest Developments of Interest.

The eighth annual convention of the National Association of Talking Machine Jobbers will be held at Atlantic City on July 6, 7 and 8.

The reason for choosing Atlantic City as the meeting place is set forth in the words of our talented and genial friend, James F. Bowers, of Lyon & Healy, Chicago, who once said: "There are only three places at which to hold conventions. The first is *Atlantic City*; the second is ATLANTIC CITY; and the third is ATLANTIC CITY!"

On April 18 J. C. Roush, of Pittsburgh, president of the association; L. C. Wiswell, of Chicago, chairman of the committee of arrangements, and Benj. Switky, of New York, met at Atlantic City to perfect plans for the most successful convention ever held.

The next convention will be noteworthy by reason of the educational features embodied in the program. The committee realizes that the mere offer of a good time is not in itself sufficient inducement for a jobber to travel from the Pacific to the Atlantic Coast. Therefore, they have set for themselves the task of making the next convention a good business proposition for every member who attends. This means that to be absent is to lose money.

In addition to the personal attendance of every member of every firm of distributors it is urged that association members bring along their managers, superintendents and right-hand men. There will be a mechanical exhibit and demonstration in Atlantic City such as has never before been attempted. It will be like bringing the mountain to Mahomet.

The why and wherefore of many things and policies that have puzzled the trade will be explained authoritatively by the men responsible for those things and policies. Questions of momentous

interest to both distributors and dealers will be discussed, debated and acted upon.

Members will find it to their interest to inspect the various lines of supplies and specialties that will be represented at the convention. Likewise, the opportunity of greeting factory officials should not be overlooked. Matters of personal interest can be taken up while visiting the East.

In order to induce members to bring along their wives, families and friends, a delightful social program has been arranged, in charge of special reception and entertainment committees. Automobile rides, luncheons, dances, cabarets, banquet, etc., are merely a hint of what is in store for members and their guests.

In addition to the business features, the plans of the arrangement committee include a banquet that promises to be one of the most enjoyable ever held under the auspices of the association. Arrangements have been made with Barney's Hotel, one of the most popular places in Atlantic City, to provide an enticing menu at a moderate price and to give the use of the regular hotel cabaret entertainers and orchestra for the entertainment of the diners. The banquet will be held on Tuesday evening, July 7, and the committee has also arranged for Mr. Barney to reserve the balcony in his cafe on Monday night for the association members and their friends, and from where they can watch the dancing on the main floor. Barney's will take the place of the Old Vienna this year, the latter place having closed, following the death of the proprietor.

Among the arrangements made for the entertainment of the ladies, while the convention is in session, is included an automobile trip to the Atlantic City Country Club on Monday, with luncheon at the club before returning.

The National Association of Talking Machine Jobbers has more than justified its existence. By reason of mutual interests it has banded together the jobbers of the United States. Through the officers and the executive committee many far-reaching and profitable results have been achieved. It is the duty of every member of the association to answer in person the roll-call at Atlantic City, if for no other reason than to show his appreciation of the excellent work of the executives and committeemen.

While the strength of the organization is measured by its membership, its vitality is gauged by the attendance at the annual convention. So get together, gentlemen. Don't shift it onto George. Be there yourselves. The convention dates were purposely chosen so as to blend with your Fourth of July celebration or your summer vacation.

CONCERTS FOR SHOPPERS.

An Excellent Means of Bringing the Talking Machine to the Attention of the Public.

A very excellent suggestion was that made by the Edison Phonograph Monthly, when it said: "Many dealers are located right in the shopping district. Here is a decided advantage if rightly used, and the advantage consists in the fact that so many women are doing the shopping and would be glad of a resting place just about noontime or shortly thereafter. The alert Edison dealer will not miss the opportunity. A recital planned at that time, will undoubtedly be well patronized, but some strong feature must be announced. One store recently announced that a contralto singer, prominent in a certain local church, would sing. The place was filled!

"But apart from the attracting of shoppers, there is great importance to be attracted right now to store recitals. By all means get the machinery in working order. Have an attendant who understands the Edison. See that the machine itself is in good shape and the records selected and ready to play. Make it a high-tone affair by a neat program, which may be varied from day to day.

Victrolas and Record Stocks Short

Be just to yourself and your customers

You owe it to yourself and your customers to give us a trial at filling your orders before you lose a sale by telling them that you "haven't got it and can't get it."

We cannot truthfully boast

about the completeness of machine and record stocks; nevertheless you can get from us certain types of machines and many selections of records that are not to be gotten elsewhere. New numbers are coming in daily.

CINCINNATI TRADE CONTINUES TO BE OPTIMISTIC.

Messrs. Rugles and Ahaus Invent New Needle Which Will Soon Be Put on the Market—
Millner Enlarging Victor Department—Whelan Tells of Columbia Expansion—Victor
Activity at Wurlitzers and Aeolian Hall—News of the Month Recorded in Detail.

(Special to The Talking Machine World.)

CINCINNATI, O., May 4.—P. B. Ruggles, a Cincinnati chemist, and Louis Ahaus, manager of the Victrola department of the Lyric Piano Co., have invented a new needle, which gives free use of the music without the scratching which so often mars the reproduction.

Messrs. Ruggles and Ahaus are preparing to put their invention on the market, though no company is to be formed for the present. The needle is said to be made of the quill of a feather, chemically treated. One can be used for ten selections, and soft, medium and loud effects can be secured through the new needle. A special holder will be required for the new contrivance. These are to be manufactured by the Cincinnatians. The needle is in the shape of a spear.

There have been no further developments in the affairs of John Arnold. Nothing has been heard of Mr. Arnold by his former business associates.

The Milner Musical Co. has discarded its sheet music department, and in about a week the Victrola section is to be enlarged. The latter work has been given in charge of Willis H. Strief. Manager Stotler expects to do considerable newspaper advertising very shortly.

Manager Whelen, of the Columbia Graphophone Co., expressed no dissatisfaction over the outcome of the month's business. He said: "During the first part of the month business was certainly on the 'boom,' but toward the latter part it sort of fell off, that is, as far as machines were concerned, but the record business held its own to the end. We have found it difficult to get in some of the larger types of machines from the factory, owing to the large demands, which the factory has been unable to supply. We are looking forward to a greater business as the summer season opens up, when the demand is great for machines and records for camping purposes. The 'Tango Outfit' has been greatly in demand, and inasmuch as it looks like the 'dance craze' is a permanent feature, machines and records will be more than ever in demand this summer."

Speaking of business in the outside territory, Mr. Whelen said: "We have closed with a large number of new dealers during the past month, all big accounts, and business seems to be good throughout the entire territory."

Victor business at Aeolian Hall has been entirely satisfactory the past month. The last week was especially active and gives promise that it will continue so during the next month.

Record sales picked up, especially in the dance music, which fell off during the Lenten season.

One of the most pleasing features of the month's business at Aeolian Hall was the demand for higher priced Victrolas. Victrola XVI was a big seller and a number of \$200 cash sales went through.

The record stock is in much better shape now than for some time past. Good use is being made of the attractive record catalogs recently gotten out by the Victor Co., and the Aeolian Co. continues to use large space in the daily papers in its advertising of the Victrola and Victor records.

The Rudolph Wurlitzer Co. makes the following report:

"In reviewing the business of the last thirty days and comparing it with the corresponding period in 1913, a splendid increase was found. During two

A VALUABLE ACQUISITION

To the Talking Machine Establishment of W. D. Andrews, of Buffalo, Is Prince Lei Lani, a Musically Gifted Hawaiian.

(Special to The Talking Machine World.)

BUFFALO, N. Y., May 7.—In musical circles in this city, Prince Lei Lani, who is a native of Hawaii, has made quite a number of friends. It was in 1901 that he came to the United States, spending his first two years in Stanford University improving his voice, which already possessed all that natural sweet quality peculiar only to the native Hawaiian.

His first appearance in public was with the famous Royal Hawaiian Band, which toured the world and played before the principal royalties of Europe, the prince appearing at each performance as a tenor soloist and a member of the Hawaiian octet.

During the great success of the "Bird of Paradise" the prince took a prominent part for two seasons as a member of the Hawaiian quintet. At the close of the season, in the spring of 1913, two of the number were killed in an automobile

Prince Lei Lani.

weeks of this period the record trade was rather light owing to unfavorable weather conditions, but taken as a whole the results were most satisfactory.

"The dance records continue to hold the interest of the public, and instead of showing a decrease the records are showing an increased sale, probably on account of larger shipments arriving, and a correspondingly more complete stock.

"We look forward to the summer without any misgivings as to trade conditions, and are already considering ways and means of handling the tremendous fall business which will surely result from the favorable conditions which now exist.

On May 13 Mr. and Mrs. Castle will give a performance in this city, and at this writing (May 4) the greatest interest is being shown in this event by Victrola owners, and the various demonstrating rooms are devoted almost entirely to demonstrating the new dance records.

"That the impression made upon the trade by this fad will have far-reaching results is beyond question, and there is no doubt when the dance craze dies out, if it does, the versatile Victrola will be no less an attraction in the homes where the dance craze has placed it."

accident near Boston. He has played the Orpheum circuit—also the Sullivan & Considine circuit. He was engaged at the Winter Garden for ten weeks during the late season of 1913 and scored quite a measure of success.

Prince Lei Lani, or E. K. Rose, as he is known off the stage, has a phenomenal voice. He sings with perfect ease tenor, baritone or soprano, and has a range of four octaves. During his appearance in Philadelphia in April, 1913, his ability attracted the attention of the Victor Talking Machine Co., which made Mr. Rose and his associates a flattering offer to appear at the laboratory and sing for the Victrola. These records were a success and have had a wonderful sale among all music lovers.

After the death of Mr. Rose's associates he decided to quit the stage and locate permanently. He selected Buffalo as the most desirable city. Since locating here last October Mr. Rose has appeared in many churches and clubs. His different voices, and several changes of costumes, enable him to give a full evening's entertainment. He has also had many out-of-town engagements in Western New York, Pennsylvania and Ohio.

Mr. Rose is permanently connected with the Victrola department of W. D. Andrews, 632-634 Main street, where he daily demonstrates his records to visitors.

MEDIUM IS IMPORTANT.

A drop of ink can still make millions think. But it has to be turned into live-wire language and printed in the right kind of paper to do it.

The DITSON Pledge

Is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind, not to mention cabinets, needles and trade-marked accessories.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

Columbia Graphophone Company
Woolworth Building, New York

PRICE CUTTING KILLING THE TRADE IN ITALY.

Interesting Review of Talking Machine Situation in Italy by F. Passadoro, General Manager of Columbia Co.'s Italian Business—Price-Cutting Discouraging Legitimate Dealers—Horn Machines in Great Favor in That Country—Branch in Rome.

"The most serious draw-back to the development of the talking machine business in Italy is the terrific price cutting which is indulged in by the great majority of dealers in the country," said F. Passadoro, general manager of the Columbia Graphophone Co.'s Italian business, with headquarters at Milan, Italy. Mr. Passadoro sailed for Europe May 9th, on the steamer "Olympic," after a three week's stay in this country, during which he spent considerable time at the company's factories in Bridgeport, Conn. Mr. Passadoro has been connected with the talking machine industry for more than a score of years and is well acquainted with every detail of talking machine merchandising.

"As a result of this pernicious price-cutting," continued Mr. Passadoro, "we are losing many of our best types of dealers who prefer to place their investments in other lines of business, where they need not indulge in price-cutting wars and continually lose money. Price-cutting is the sole reason for the Italian talking machine dealer's failure to show any profits in his business. There are very few dealers, indeed, in our country who are making any money out of their business, and all because of their failure to maintain fixed prices on their products. They have the market and they have the product, but their lack of business foresight is driving many of them to ruin or out of the talking machine business.

"We are doing our utmost to convince the dealers that the one-price method of merchandising machines and records is their only salvation, if they wish to show a profit at the end of their year's work. We are handicapped, however, by the fact that we cannot compel the dealers by law to maintain a fixed price on any of our products. We have no association, and there is no concerted action in this direction, but at the present time several of the larger and more responsible companies, including ourselves, have in mind a co-operative plan whereby we can present the one-price doctrine to the dealer in an impressive and convincing way which may have the desired effect. There are only about 450 dealers in the entire country of Italy as a result of the continual kniving of prices, and many of the more successful of these merchants will retire from business in the near future, if conditions do not improve.

"Notwithstanding these handicaps, however, we closed in 1913 a very satisfactory year, and showed 40 per cent. increase over 1912 business. This increase was doubly gratifying in view of the general industrial depression of 1913, and the scarcity of money. With all the vast business that we and the other companies have closed in the past, we have just begun to scratch the surface of the talking machine possibilities in Italy. Our country is industrially improving steadily and consistently, and with this improvement of business

conditions, the field for talking machine development will increase in proportion.

"Italy, as is well known throughout the world, is an intensely musical country. Its inhabitants love and appreciate the better class of music, and this is well evidenced by the fact that the great majority of our record business consists of grand opera and vocal selections. It is a peculiar feature of our record business that we sell practically the same selections year after year. For 20 years I have known a large number of records that maintain a high average of annual sales, and will probably never lose the affection of the public. We differ radically from the American music-loving public, for with us there are no selections that score 'hits' one month and are practically 'dead' the next. The Italian talking machine dealer is, therefore, never in the position of having considerable dead stock on his hands, as his records sell year in and year out. This was illustrated when we cleaned out our cylinder record stock several years since; for, out of a total of more than 70,000 records, there were only 60 records dead stock, and these were all of one selection.

"Hornless machines are just beginning to make

LIVELY BUSINESS IN BUFFALO.

Prominent Makes of Machines in Strong Demand in That City According to Reports from Dealers—All Makes Popular.

(Special to The Talking Machine World)

BUFFALO, N. Y., May 2.—The advent of modern dances into the talking machine world has enlivened the trade considerably here in the last few weeks, according to reports of managers of the various stores. There has never been such a rush for dance records as has prevailed during the last few weeks, it is said, and there promises to be a bigger trade than ever this year.

The Victrolas are said to be selling rapidly and establishing records for sales. W. J. Bruehl, manager of the Neal, Clark & Neal Co., talking machine department, declared the Victrola and the Victor machines are at this time witnessing the biggest and most successful sales in their history.

The Columbia is also establishing records for sales and endorsements. The Buffalo branch of the Columbia Co. reports a most remarkable sales record during the past month. According to the manager of the store the Columbia branch in Buffalo has never before done such a good and steady business.

The Edison machines are also in the limelight and are doing better than holding their own. The Loud Piano Co., which handles this line, is elated over the sales during the past month. "Going good" is the way Mr. Loud put it.

some impression in Italy, although this impression is not yet of any particular depth. Personally I believe that the horn machine will never die in Italy, as it is firmly entrenched with the musical public. There is a certain form of reproduction possible with the horn machine and not with the hornless that is thoroughly appreciated by the Italian public, who believe the ideal machine is one that is equipped with a wooden horn.

"Over 80 per cent. of our business is closed with the poorer classes of people in our country. The laboring folk are passionately fond of good music, and the talking machine offers them the cheapest and best possible solution to gratify this love for music. The favorite method of merchandising machines and records in Italy is by means of the special outfits. These outfits, which consist of a machine, records and needles, are offered at various prices, and the most popular one at the present time is the outfit which retails at \$29. This outfit consists of a \$15 machine, \$14 worth of records and 300 needles, and is meeting with a ready sale throughout Italy.

"We have established dealers throughout the country, and in addition maintain a large distributing branch at Rome, with our executive offices at Milan. We also have a recording plant at the latter city which is kept busy all the year round. The outlook for this year is very bright, and I see no reason why our business in 1914 should not show a greater increase over 1913 than the 40 per cent. gain that we registered last year."

H. A. Yerkes, manager of the wholesale department of the Columbia Co., returned to his desk last week after a short trip through New England. Mr. Yerkes was well pleased with general conditions in this territory

NEW YORK, MAY 15, 1914

THERE are a number of timid Americans who seem to think that the strained relations now existing between Mexico and the United States will develop to such a point that a long and expensive war will result therefrom which will have a very depressing effect upon the business interests of the country.

Hardly true, and there is no use of borrowing trouble as to what the future may develop. As a matter of fact, war is not pleasant to contemplate from any viewpoint, but it has never meant immediate depression, particularly when a country has such resources as is possessed by the United States.

Far from having a depressing effect upon business, war, if it comes, will have a decidedly enlivening effect. The men who are hanging back to-day will then join with the President and will support him in whatever he does.

As a matter of fact, no matter how much we may criticize the treatment of the Mexican subject up to the present time, the fact remains that we, as a country, will have to face whatever develops. We will have to stand back of the President.

Many of us who have become personally acquainted with conditions in Mexico through travel, have been unable to understand how the Government at Washington should have been so misinformed as to the actual conditions, but there is no use to discuss that at the present time.

We are facing the present and will have to stand by future developments, be they what they may.

IF war comes, however, it will have a stimulating effect upon many lines of trade, and such a war as would be carried on in Mexico would be conducted without serious interference with the business affairs of this country, and, in our opinion, there is no reason to borrow trouble concerning the effects of war upon the trade of the nation.

If it comes some of us will suffer, but the country as a whole will hardly feel the shock, so let us go ahead and make our plans and forget about war troubles until they come. It will then be quite time enough to figure developments.

In the meanwhile, the spring promises to be active in many lines of trade, and the talking machine men should see to it that they get their full share of the business that is going around.

Business is not going to come easily—it rarely ever did, for that matter. It requires good, progressive work all the while.

It would seem to us that at such times as this, the collection

end of the business should be watched in a most careful manner, also the costs of doing business.

The causes of many business failures can be traced directly to ignorance of the actual cost of conducting a retail establishment, and the result of not knowing how to run your business spells business disaster at some time. The length of time is dependent entirely upon the resources of the house, but the final result is bound to be the same in the end, and the man who does not realize this will come to financial grief.

IT is, therefore, of the utmost importance that every business man should know the actual cost of conducting business and not fool himself with the idea that because he is doing what appears to be a fairly satisfactory bulk trade that he is making money. He may not be, because it is the net results that count. If he has permitted his expenses to grow to such an extent that he is not keeping track of his outlay he may face failure.

Probably 30 per cent. of the business failures of the country may be charged against ignorance and incompetence—then, of course, the granting of unwise credits.

The retailer oftentimes in his haste to get out goods does not ascertain as to the standing and ability of his customers to meet their deferred payments. A talking machine is very poorly sold to a party who is not financially able to own a machine, and, yet, if the character of people is thoroughly ascertained, there is no question but that talking machine leases constitute the finest kind of trade property, but in the talking machine trade there are a good many young men who do not safeguard their business interests in the manner in which they should. They should start in right, and most inexperienced young men think that the managing end of the business is quite easy. Some of them think it is no trouble at all, provided a man has a moderate amount of capital. It figures out finely in theory and looks very simple to take so many dollars worth of merchandise and sell that merchandise for a good liberal percentage of increase over its original cost, then figure the difference as clear profit!

Easy, indeed, in theory but it does not work out that way.

ANY man, however, can add to his store of knowledge if he carefully analyzes the conditions which surround his business operations day by day. Do not let them get away from you.

Many a good man, with splendid business possibilities, has permitted himself to drift out of contact with his business affairs, and the result has been failure which could have been easily avoided had he kept in touch with the business situation.

There is nothing easier than to permit business to get away from you, and there is nothing more expensive than to permit it to stay out of touch.

Some of the greatest business men of the country have a most intimate knowledge of all the interior workings of their great enterprises. They do not worry themselves much with details because they have men employed who supply them with reports, but they have a system so perfect that they are enabled, through reports from every department, to have at all times the closest contact with the workings of the great machinery which they are directing. There is where the enjoyment of conducting an enterprise comes in, is directing it and feeling that your thoughts, your energies, your inspirations, are directing a piece of machinery which is accomplishing greater results all the while, and the results—the tangible results—illustrated by the net profits—are what interest business men.

It is easy to figure out profits on paper, but the next thing is to translate them into bank balances. That is the real thing.

THE circular trade letter is not growing in favor with national advertisers. A good many who have tried the letter plan have not found it successful. One reason is that retailers are receiving too many circulars of various kinds to pay serious attention to any of them.

Much good brain matter is wasted in the preparation of attractive letter circulars which are supposed to whet the appetites of prospective customers, but they do not swallow this kind of bait with avidity.

When a man receives ten, twenty and sometimes fifty, circular

letters a day, it is but reasonable to suppose that he does not consider any of them seriously. A great portion of them reach the waste basket without even so much as having them scanned by the merchant to whom they are addressed.

The expense of this kind of advertising is tremendous when we consider the preparation of the circulars and the time spent in getting them ready to mail. The postage bills all mount up, and the result is that many who have tried this form of advertising are not satisfied with the results obtained.

Trade papers with a legitimate circulation receive careful attention from the same class of merchants who would cast the circular into the waste basket without glancing at it.

And why?

Because the trade paper represents an organized attention center and medium of publicity comparable to a clearing house or public market.

The merchant knows that there is a variety of information contained in the trade papers and a large portion of it is extremely valuable to him in his business, and he objects to being flooded with circulars, and incidentally the advertisers are beginning to find this system unsatisfactory.

WE know of some men who have sent as many as six circular letters to the same individual, and when they sent a representative to call upon him, he did not recall having received a communication from the house, and so this kind of literature did not even help the salesman; whereas the same money expended in a trade paper would have attracted attention. Proof of that is seen in the returns which advertisers receive from trade papers of reputation and standing.

The Talking Machine World in this respect occupies an unique position. It is the only paper reaching the talking machine trade, and it is read by thousands of people monthly who look upon it as the only medium from which to secure a fund of information obtainable from no other source.

We are in constant receipt of letters from subscribers who say they could not keep their business house in order without The World—that they would even pay \$10 a year for it rather than be without it.

We also are receiving constantly letters from advertisers who express themselves as pleased with the results obtained through advertising in its columns.

Talking machine jobbers do not use The World in the way which they should. It circulates among their local trade, and yet many of them do not patronize it through a false conception of the business situation.

Some figure that the manufacturers should do the advertising while they sit back and enjoy the results. That is the kind of policy which some of them adopt. Others—the most progressive—continue to use the columns of The World and they are getting results. They are going far ahead of their competitors, who, through their trade narrowing vision and lack of progressiveness fail to improve the avenues which lie open to them.

Here is an extract from a communication from a well-known

New York jobber, Silas E. Pearsall Co., who does not hesitate to credit The World with results:

"Emergency calls require special treatment and the shortage of records in the talking machine trade brought about a condition that made the Pearsall stock exceptionally valuable to the trade. There were several ways of reaching the people we desired to acquaint with the fine condition of our stock and we tried all of them. The way that brought best results was the way of The Talking Machine World. The terse advertisement in The World added a great many customers to our already large list and added them within two weeks after our advertisement was placed in the February number."

That is a communication from a business house which has tried the business building powers of The World with excellent results.

Others can secure the same results, for The World is a paper for everybody in the talking machine trade.

THE last issue of Good Storekeeping, commenting upon trade papers as a class, takes occasion to single out The World as a wonderful publication. It says, editorially:

"There is not a branch of modern business but has one or more publications devoted to it. It is difficult to understand how enough information can be procured to make all the papers interesting to their readers, especially in some cases where the field of discussion appears to be so limited. For instance, one would wonder where The Talking Machine World could possibly find enough material to fill its columns. Still Edward Lyman Bill, its publisher, makes this paper one of the most readable of the trade publications. How would the average editor like the job of getting out a sixty-page magazine every month on the single subject—the little talking machine?"

The constructive force of this publication is unquestioned and is not denied by the business builders of this industry.

IN the light of Governmental activity against restricting agreements in this country, the business practices of some other countries are most interesting. Consider this news from Uruguay:

The wholesale merchants of Montevideo have decided to enter into a ten-year mutual agreement, with liberty to extend it for another five years, to regulate trade operations. Control of the agreement is to be intrusted to a committee consisting of a bank manager and four importers, who will inflict a fine of \$2,000 for any infringement of the agreement. Some of the principal clauses of the agreement follow:

Sales are not to be effected on credits exceeding six months.

Goods sold must be invoiced in the same month, it being forbidden to deliver them in one month and date the invoice another.

A maximum of 6 per cent. discount to be allowed to purchasers paying for goods before the 15th of the month following the sale.

Payments made in the same month as the sale to be entitled to an extra discount of one-half of 1 per cent. Interest at 12 per cent. to be charged on any notes renewed.

Delivery of goods on consignment prohibited.

IDENTITY OF WRITER REVEALED.

Under the Nom de Plume "D. A. Esrom" Mrs. Theo. Morse Has Written a Great Number of Songs Which Have Won National Popularity Through the Phonograph.

For many years lovers of popular songs have enjoyed those written by an unknown writer named D. A. Esrom. The identity of this lyric writer remained a secret for a long time. The songs were almost invariably adapted to music by Theo. Morse, of New York, and published by

D. A. Esrom (Mrs. Theo. Morse).

him. It remained for a representative of the Thos. A. Edison, Inc., to discover the secret of D. A. Esrom's identity.

Mr. Morse had been asked repeatedly on this point, and one day he very blushingly acknowledged that D. A. Esrom was his wife. "You see," he explained, "my wife's name is Dolly A. Morse—Esrom is merely Morse spelled backwards."

Of course after this the secret was out, and Mrs. Morse speedily became known as one of the great women writers of popular songs in the United States. Although she has originated enumerable lyrics that are especially clever, still she does not

think that a professional career is the best for women, for as she puts it, she does the housework with her hands and composes the songs in her head at the same time.

A large number of Mrs. Morse's songs have been made for Edison records and are especially popular. Among those that all Edison owners will remember are the following: "In the Land of Plankity Plank," "Luella Lee," "Sweet Anna Marie," "The Village Band," "Another Rag," "Bobbin Up and Down," "Lizabeth Ann," "Love Me Like I Love You," "Lets Buzz," "Something's Going to Happen to You," "Way Back Home," "When You're Lonesome Don't Forget My Number," "When Uncle Joe Plays a Rag on His Old Banjo," "Whistling Jim," "Who's Going to Love You When I'm Gone," "You Need a Rag."

The following have been written by D. A. Esrom but are not on the records: "When You Sang the Rosary to Me," "Until You Say Goodbye," "Three Things I Love," "Call Around Any Old Time," "When We Were College Boys."

MASTERPHONE CAMPAIGN

Of National Advertising Is Bound to Help Dealers' Sales Most Materially.

The Masterphone Corporation, manufacturers of the popular Masterphone device for clarifying and amplifying the tone of records, moved this week from 187 Broadway to Suite 1921, 61 Broadway where it will have increased floor space for its rapidly growing business.

"We are now in the midst of a national advertising campaign that should produce numerous inquiries for talking machine dealers throughout the country," said an official of the company. "This campaign is being confined to the leading national magazines, and the copy we are using, though not very large in size, is designed to attract general attention and, what is more important, produce live inquiries. We are planning to issue in the near future numerous dealer helps in the nature of window and store displays that will be attractively arranged and certain to attract interest."

The Masterphone Corporation has just issued an interesting and informative folder which explains in detail the value and workings of this clarifying

and amplifying attachment for talking machines. This folder shows by the means of excellent illustrations the simplicity of the Masterphone and shows how the device is adjusted on fiber or steel needles. The merits of the Masterphone are set forth clearly and lucidly, and dealers can use this folder to excellent advantage.

THE DOME RECORD CASE.

This Cleverly Constructed Device Holds Twenty Records—Useful for Concert or Demonstration Purposes—Distributed by W. D. Andrews, of Buffalo.

W. D. Andrews, 632 Main street, Buffalo, N. Y., has closed arrangements whereby in the future the Dome Record Case will be distributed by him. This record case—illustration of which is shown elsewhere—holds 20 records, all accessible for instant use. The case swings open so that the repertoire is displayed, while a convenient index shows where each record is located.

The Dome Record Case is very valuable, because not only does it permit the safe keeping of records, but it is a case that permits one to carry a small stock of records for either demonstration or concert use. Furnished in two sizes, 10 and 12 inch, and Mr. Andrews is making a specialty of sending samples of these filled with records, as selected by the customer.

For instance, if a dealer has 20 records that he is in need of and wants a sample Dome Record Case, Mr. Andrews will send the entire thing to him at the regular wholesale prices, and in the matter of deliveries, this house has thirteen lines of railroads, five express companies and the best lines on the Great Lakes, so deliveries can be made very quickly.

WURLITZER CO. IN HAMILTON.

An entire room in the new quarters recently opened at 119 South street, Hamilton, O., by the Rudolph Wurlitzer Co., of Cincinnati, has been set apart for Victrolas. There will be also several booths for the trying out of Victor records, of which this agency has over 10,000.

CO-OPERATION BETWEEN JOBBER AND DEALER NEEDED

So That the Latter May Be Afforded Every Opportunity to Make His Record Business as Profitable as His Territory and Stock Will Permit—Well-Considered Remarks by V. W. Moody, Sales Manager of New York Talking Machine Co. on This Subject.

With the continued shortage of records and with the dealers throughout the country complaining at the marked scarcity of many of the most popular records in the library, it has long been apparent that there should exist perfect co-operation between the jobber and the dealer in order that the latter may be afforded every opportunity to make his record business just as profitable as his territory and stock will permit.

As an example of this co-operation between jobber and dealer, a new idea introduced this month by V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, is well worth careful attention. Mr. Moody has for many years made a detailed study of sales methods and stock systems and his extended knowledge of this important branch of the Victor business has been largely offered to dealers who were desirous of improving or increasing the efficiency of their sales policies and systems.

Mr. Moody's latest dealer help was concerned with the dealers' advance order blank for new Victor records for the month of May. This advance order sheet is a very important factor in the dealer's business, as adequate ordering of the newly issued records means the closing of many a record sale that is lost if the new records are not on hand. The manufacturers and jobbers are invariably in a position to fill all advance orders for the new records, while the supply of certain records is frequently exhausted before the dealer places his second order.

Realizing the importance of this advance order sheet, Mr. Moody went to considerable trouble and expense to prepare a special revision sheet which he purposed to use in connection with the dealers' May advance record order. This revision sheet contained three columns headed, "You Ordered

Originally," "Our Suggested Revision" and "Your Final Order." The names and numbers of the May records, together with a special approval space for the dealer, formed the balance of this sheet.

As soon as the New York Talking Machine Co. started to receive its dealers' May advance orders, Mr. Moody began active work on his co-operative plan, which consisted of taking the dealers' orders and averaging them in order to secure a general average for each record. Mr. Moody waited until over 60 per cent. of the company's dealers had sent in their orders and then made up his averages. Using these averages as a basis for revising the individual dealer's order and working out a standard of comparison for each dealer's order sheet, Mr. Moody was enabled to send each dealer a revision sheet that represented suggestions based on actual figures as averaged from the large number of May orders received.

The dealer therefore received a suggested revision for his advance orders that was worth far more than a personal opinion or belief, and which represented the combined average orders of his fellow Victor dealers. Accompanying this revision sheet was a short letter which explained to the dealer the purpose of the revision sheet, how the suggested figures were arrived at and requested that the dealer give the order blank his careful attention before placing his final order.

"The results achieved by this revision sheet were entirely satisfactory," said Mr. Moody in a chat with *The World*. "Over 75 per cent. of our dealers who received the sheets replied immediately, placing their final order in accord with our suggestions, the great majority O. King the suggested revision in its entirety and others making changes here and there. In many cases our suggested revision order did not exceed the dealer's

original order, while in other instances the total was quite in advance of the dealer's first order.

"Many of our dealers expressed their appreciation of our co-operation and thoughtfulness, remarking that they were glad to be afforded this opportunity of benefiting from the ideas of their associate dealers. From our own standpoint, the revision sheet idea was a gratifying success and, in accord with our dealers' request, we are planning to continue the plan with the June advance order sheets."

TO CONTINUE CYLINDER LINE.

C. H. Wilson Issues Emphatic Denial That Thomas A. Edison, Inc., Plans to Stop Manufacturing Cylinder Phonographs and Records—Arrangements for Future Indicate Policy of Company.

C. H. Wilson, vice-president and general manager of Thomas A. Edison, Inc., made the following interesting announcement this week:

"On several occasions we have been told that a rumor is abroad to the general effect that we intend ultimately to abandon the manufacture of Edison cylinder phonographs and records and that there will be a diminishment of our activity in respect to these products. We wish to deny this most emphatically.

"The confidence of this company in the continued demand for the Edison cylinder product is proven by the enormous investment we have made in recent months in the improvement of this line and the further expenditures that are now being made with the same purpose in view.

"We expect to push the sale of the Edison Blue Amberol records and the Edison Diamond Amberols with renewed vigor, and are at present investigating several new methods of sales exploitation in order to find those best suited to this product.

"Such methods as test out satisfactorily will be submitted to the trade in due time. We expect to make an unusually vigorous campaign—commencing during the coming season."

HOW THE PATHESCOPE APPEALS.

Interesting Experience That Throws Light on the Value and Use of This Home Moving Picture Machine—W. A. Condon Joins Pathéscope Interests—Will Visit "Talker" Dealers.

Willard B. Cook, manager of the Pathéscope salon, 27 West Forty-second street, New York, relates the following incident with reference to the ease with which these home moving picture machines are selling through the country:

"A Brookline, Mass., gentleman happened to notice a Pathéscope advertisement in one of the newspapers, sent for a catalog, and then wrote to inquire if a person, who had never seen one of the instruments, could set it up and operate it without previous instructions. Upon our assuring him that the printed instructions were adequate, he promptly forwarded a check for \$250 for the most expensive model of the cabinet machine.

"Nearly a week elapsed and I was beginning to feel a little uneasy for I had not heard from the gentleman since he sent in his check, when one morning a smiling caller remarked, 'I am Mr. _____, of Brookline.

My wife and I enjoy the instrument immensely, but I haven't had time yet to read the instructions for operation; in fact, I didn't seem to need any.' Before leaving our salon, this gentleman had purchased a number of reels and had taken a year's subscription to the film exchange.

"If our instruments can be bought from the catalog description, and give perfect satisfaction, there is certainly a splendid field for the live-

wire talking machine dealer with the Pathéscope. We have received territory requests from a number of dealers who realize that the Pathéscope and the talking machine form the ideal home entertainment, and all our dealers are enthusiastic over the possibilities of the Pathéscope field." Mr. Cook is at present abroad, arranging for prompt shipments of instruments to meet the demand in this country.

W. A. Condon, well known in the talking machine trade, has joined the Pathéscope as travel-

A Corner in the Pathéscope Salon, Aeolian Hall.

ing ambassador, and will concentrate on the development of the Pathéscope trade with talking machine dealers. Mr. Condon's lengthy experience in this field well equips him to achieve a marked success in his new connection.

When angry, think twice before speaking. That will give you time to call him a more resounding name.

BUSY MONTH IN BALTIMORE.

Reports from Leading Houses Most Encouraging—With All Concerns April Was Busy Month—More Room for E. F. Droop & Sons.

(Special to The Talking Machine World.)

BALTIMORE, MD., May 5.—Unlike the piano dealers, those engaged in the talking machine business in this section are making most encouraging reports concerning business conditions for April. The sum of all these reports would indicate that April was right up with the other months and that the dealers have every reason to look for just as good results during May.

Joseph Fink, of the Fink Talking Machine Co., declares that April was the largest month for sales since December as far as his firm is concerned. This firm handles both the Victor and Columbia lines.

E. F. Droop & Sons Co. has acquired the property in the rear of its present building, which it has been after for some time. The firm will make some elaborate improvements and will devote the additional space to the wholesale end of the business for receiving and distributing goods. Manager W. C. Roberts reports a big April with the Victor and Columbia lines, and is looking for May to keep up the good work.

The Kunkel Piano Co., handling the Victor and Edison lines, has a pretty window display in the shape of a music room in which it shows off to advantage the various styles of machines and records of the two lines.

S. A. Dennison, manager of the local branch of the Columbia Graphophone Co., has his monthly report posted conspicuously on his trustworthy slate, which says that April receipts were the largest ever taken in at the Baltimore store.. This gives some idea of what was done during April in the Columbia line. Mr. Dennison looks for as good results during May.

H. R. Eisenbrandt Sons, 306 and 308 North Howard street, one of the original Victor distributors, report a good month with the Victor line and records during April.

The first Safe, Simple and Perfect Home Motion Picture Machine

AN opportunity for you to double the volume of your business from your present clientele.

Why?—Because—

Phonographs and Pathéscopes Give the Ideal Combination of Music and Movies

—and you, as a Talking-Machine Dealer, are the logical distributor of the Home Motion Picture Machine.

The first Dealers to recognize the business possibilities offered by the Pathéscope will reap the largest profits. The field is ready and waiting.

Be the leader—the first Dealer in your neighborhood to show and sell Pathéscopes.

This space does not permit a full description of the machine nor the scope of your opportunity, but a postal will bring our catalogue and further data.

Columbia Graphophone Company
Woolworth Building, New York

DETROIT MAKES CHEERY BUSINESS REPORT.

New Stores of the Columbia Co., and the J. L. Hudson Co. Will Be Ready for Christmas Trade—Business as a Whole Most Excellent—Dancing Craze Still Helping Record Sales—Many New Suburban Accounts Being Added—News of the Month.

(Special to The Talking Machine World.)

DETROIT, MICH., May 7.—The Victrola and Columbia lines will be at home in a swell and commodious new salesroom when the next Christmas season rolls around. The music trades department of the J. L. Hudson Co., which handles both lines, will occupy three floors of the new building, which is to replace the present old structure and two adjoining ones on Woodward avenue, and it is likely that one entire floor will be devoted to talking machines. This will give them a space of 84 feet front by 100 feet deep,

stories of hard times that certain interested politicians have sent broadcast over the country in an effort to create a belief that Detroit was about to go into bankruptcy.

Business Better Than Last Year.

Business also is better than last year, as much as 30 or 40 per cent. with some houses. The effects of Lent and Easter have passed, and the business has settled down for its usual excellent summer run. Detroit always is an exceedingly good point for talking machine business in summer time, owing to the many ways these prod-

Show Window of J. L. Hudson Co. Displaying Victrola.

and will constitute the largest talking machine department in the city.

Besides this, the talkers will have a magnificent show window on the street floor in which to advertise themselves to the passing throng. It will be a finer window than the present one, and the real significance of that statement can be judged by the photographic view of the existing one which is reproduced herewith. The feminine "salesman" in the picture is wax, but is so perfect and so elegantly appareled, and the "corner of the music room" is so elegantly laid out that the window has a big audience constantly. The machine in the window at the time the photo was taken, was a Victrola. Sometimes a Columbia grand is there.

Collections Are Excellent.

The most pleasing feature of the talking machine trade in Detroit just now is the excellence of the collections. They are better than last year, and with some houses, better than ever before, thus giving the direct retort courteous to the

ucts are used for outdoor entertainments—on boats, yachts, in camps and in summer resort cottages. Lent generally manages to crimp business a bit, because buying a talking machine is one of the easiest things to forego. Easter crimps it a little because the money is needed for new hats and other personal decorations. With these two periods by, sales always pick up rapidly.

It is likely that the agreement of the dealers to charge interest on time sales made last year has a good deal to do with the good collections, though the fact that thousands of men have resumed work on summer occupations after several months' lay-off helps. If there have been any lapses from the interest agreement, they are not specifically known. The agreement has a splendid effect in getting large first payments and in inducing prompt payments thereafter.

Keeping Track of Suburban Business.

The Columbia branch store here makes it a point to keep the new suburban business districts well covered. Every year Detroit builds on its

outskirts three or four new cities as large as good sized up-to-date municipalities. These suburbs have one or more lively business streets, and City Sales Manager S. E. Lind, of the Columbia, places an agency in all spots where the prospects for trade look good to him. He has several big prospects in the city, some down town, in view at present, but will make no announcements until contracts are closed. A new account has been opened in Delray, a down-river suburb.

Dancing Craze Still Prevalent.

Detroit is particularly ripe for the books issued by the Victor Co. and the Columbia Co. giving instruction in the steps and figures of all the new dances. While the sale of talking machines for the sole purpose of furnishing music for home dancing has been large for several months, this new aid to the terpsichorean art has given it an added impetus. In Detroit there is a fashion nowadays of building houses with large living rooms, thirty or more feet long, so that there is plenty of room in them for dancing, for small parties. With such a layout, a big talking machine in a corner furnishes all that is needed for a "swell time."

New Accounts Being Added.

Out in the State new accounts are being added constantly by the Detroit representatives of all companies. Agencies are placed in towns as small as 500 population. Of course, the business of the town is not much, but the sales to farmers in the surrounding territory are well worth while. The dealers in cities up to 2,500 population sell to farmers as much as they do to the residents of the cities.

Grinnell Bros., Victor jobbers, have an effective plan for inducing competition among salesmen, and thereby getting good results in the matter of terms as well as in volume of sales. Each salesman has an efficiency card. It shows the character of all sales, the size of first payments, the size of instalments, whether the customer keeps up his payment and other details of every sale made.

The firm is thus able to know to a dollar whether the salesman's work is profitable, and the salesmen know "who's ahead" and vie with each other for the supremacy.

As an example of the results of this system in the last fiscal year of the company, the leading salesman averaged in volume of first payments 40 per cent. of the value of the machines he sold. Several of them exceeded 25 per cent., and the lowest of all was 17 per cent.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., May 11.—The feature in the local talking machine business is the advertising "stunt," really a gigantic undertaking, wherein the Boston American and the Columbia Graphophone Co. co-operated. It took several weeks to work out the details of this large scheme, and the American every day, for a week in advance, gave its readers some hint of what was to be expected on the following Sunday, which was May 3. On that day readers must have been aghast when they opened their American and found more than three pages devoted to the dance records of the Columbia. It is the latest dances that are featured and liberal space is given to a lesson on how to dance the one-step and several illustrations tell even more graphically how to perform it. In the course of the advertisement there is a coupon, which, with 25 cents, procures a Columbia disc, on one side of which is the music for the one-step, preceded, however, by some verbal directions how to start out. All the Columbia distributors throughout New England were well supplied in advance with this record, and promptly on Monday morning a big demand was made at all points, and several times the call came near exceeding the supply.

This is the first of a series that is to keep running for four successive weeks and there will, therefore, be three more. In the plan of advertising practically all of the Columbia distributors took space, so that in the sum total there was a large representation of advertisers. G. Hepburn Wilson, who supervises the dance records for the Columbia, was on the scene early, as he had a part in the general plan; and Arthur Erisman, the Boston manager of the Columbia, worked early and late superintending the arrangement of the advertisements and keeping a general oversight over the work. Naturally, he is getting his full mead of praise for the enormous amount of work he put into the scheme.

Arthur W. Chamberlain Resigns.

One of the surprising pieces of news of the month in talking machine circles, was the resignation of Arthur W. Chamberlain as manager of the wholesale department of Eastern Talking Machine Co. Mr. Chamberlain has hosts of friends in the business and his associates in the Eastern Co. were more than sorry to have him sever his connection, which had been very pleasant. It is understood that Mr. Chamberlain has certain plans

in view which have been maturing for some time. Next month your correspondent hopes to be able to make some definite announcement of Mr. Chamberlain's plans.

Mr. and Mrs. Vernon Castle in Dances.

Many talking machine men were numbered among the large audiences that packed the Boston Opera House on the afternoon and evening of April 27, when Mr. and Mrs. Vernon Castle gave two exhibitions of their famous dances. Dealers say that since they were in town, there is scarcely a home with a talking machine that has not gone fairly wild over the new dances and their accompanying music.

Move Will Eventually Help.

Work on the demolition of the neighboring building to the Columbia quarters in Tremont street is going on rapidly, and it will only be a short time now before it will be razed to the ground. Then will begin the work of rearing the side walls for the Columbia, and, if there is more or less inconvenience in the handling of goods inside the warerooms, the condition is easily offset by the thought of the unusual facilities that will be enjoyed when the new street is finally laid out, giving the Columbia such unequaled opportunities for advertising itself and its goods.

Working in Wholesale End.

James McDonald, who was one of the shining lights in the retail department of the Columbia Co., is now working in the wholesale end of the business. He is assisting Norman Mason, who has been making a great success since he devoted his attention to the outside end of the Columbia interests. Another transfer is that of George Krum-scheid, who also is now working in the wholesale department.

Busy Times with Oliver Ditson Co.

All the office staff working in happy conjunction with Manager Henry Winkelman, of the Victor department of the Oliver Ditson Co., are finding business more than good these days. Since the installation of the new sound-proof booths, the increased facilities are proving just what the company needed to properly cope with the increasing demand for goods.

Pleased with Visit to Victor Factory.

Billy Fitzgerald, Mark Reed and Mr. Splaine came back from the Victor laboratories with a sounder knowledge of the intricacies of the manufacture of records than they ever before possessed. Incidentally, they had a jolly good time, and their

three days' holiday put them in good shape to handle the business of the Eastern Co.

Business and Salesmanship.

The Columbia Business Building Club held an enthusiastic meeting on one of the last evenings of April, and there was a spirited talk on business and salesmanship. The mechanical construction of the Columbia machines was gone into quite thoroughly, and the Columbia staff was able to extract much useful knowledge out of the meeting.

Sylvester Makes Change.

Roy Sylvester, formerly on the floor of the Columbia Phonograph Co., has severed his relation with that house and now is with the Atherton Furniture Co., at Worcester, where he is in charge of that large concern's talking machine department.

Larger Quarters for Pardee-Ellenberger Co.

So large has the Edison business of the Pardee-Ellenberger Co. become, that Manager Silliman has been forced to look about for larger quarters. These have been found at 26 Oliver street, not a great way from the present location at 66 Battery-march street. The new quarters, which, it is hoped, will be fully occupied by June 1, comprise two floors of 10,000 square feet of space. Manager Silliman is planning to so move as to interfere with business as little as possible. The readers of this department will learn more about the new Edison quarters in next month's issue.

Expansion of Victor Business.

The Victor department of the C. C. Harvey Co., which has taken on a new lease of life since Francis White has assumed management, has been moved to larger and more convenient quarters on an upper floor. The department has been located in the basement, and it was expected that the move would have been made some time ago, but the quarters were not ready. The rooms are reached by excellent elevator service.

Exhibition of Modern Dances at Steinert's.

To the accompaniment in part of the music of a Victrola, the M. Steinert & Sons Co. entertained its friends with an exhibition of some of the modern dances a short time ago in Steinert Hall. The admission was by invitation and the hall was crowded with a fine audience. The exhibition was a success in every particular.

New Rosen Store.

Although Henry Rosen has not placed a permanent manager in charge of the new store at 246 Huntington avenue, he is already doing business there and has contracted with the Victor Co. for

IT IS the real music feature of the new Edison Diamond Disc Phonograph that has sent it flying into the homes and hearts of music loving people—of whom there are many more who haven't purchased an Edison. This is the class that will give you a profit in your own city if you will be an Edison man.

We'll back you up with the P-E Service, a composite organization of men, brains, money and action, instituted primarily to give you a co-operative service that is of business building character.

Ask us today for the entire story.

a large stock of goods. Mr. Rosen, judging by the many customers that drop into the place, made no mistake when he established this new store.

H. A. Yerkes a Visitor.

H. A. Yerkes, the wholesale manager for the Columbia Co., was in town yesterday for a short visit. He had been on a tour of the New England agencies and before coming to Boston had made several stops throughout Connecticut and Rhode Island, and, after leaving Boston, he was on his way to points in Northern New England. Mr. Yerkes expressed himself as well satisfied with the trend of business, and especially enthusiastic was he over the way the new dance records are going.

Walter Van Brunt Welcomed.

Walter Van Brunt, who was playing a good engagement as he always does at Keith's Theatre a short while ago, was a frequent visitor to the quarters of the Eastern Co., which is only a few doors away from Keith's. The boys are always glad to welcome this excellent entertainer.

Columbias for Brookline Playground.

Manager Erisman tells your correspondent that ten Columbias have been ordered for the Brookline playground, and will be put into use as soon as the weather will allow the children getting more out of doors.

To Entertain the "Jackies."

When the battleship "Georgia" steamed away from the Charlestown Navy Yard the other day for the Mexican coast, it was well equipped with musical instruments, and among other things it had a fine talking machine with plenty of records. Wonder who can guess who furnished the equipment, and did it well too?

ADVISES SALESMEN NOT TO "KNOCK"

Buyers Inclined to Lose Faith in Man Who Knocks Former Line of Goods.

"Knocking" a line on the part of salesmen after they have changed positions was heartily condemned this week by a buyer for one of the big local stores, said the New York Times. "I always lose faith in a man who 'knocks' his former line after he makes a change," he said, "for I can never escape the thought that he was selling me those 'rotten' goods before he made the change. If the goods really were what he said of them, it shows me that the salesman has been trying to stick me; if they were not, how can I believe him when he commends his new line? Many a salesman who has been selling me for years has changed his base and 'knocked' his old line with the idea of selling me the new. What he has succeeded in doing, however, has been to lose my trade entirely."

FRATERNAL BODIES AS PROSPECTS.

Recording of Music of Various Organizations Adds Interest to Machine Outfits for Meeting Rooms—Popular Wherever Used.

In every town—we might almost say in every hamlet—there is at least one fraternal organization. It's either a Masonic, Knights of Columbus, O. U. A. M., Knights of Pythias, Y. M. C. A., Press Club, Boys' Club, Women's Club or some similar organization. They are usually excellent prospects for phonographs. The important point is to get in touch with the head part in each one and arrange for a recital at such times as is easiest for all the members to attend.

Out in Illinois recently our representative sold to the lodge rooms of a Masonic order at Savanna a \$150 Edison disc with several records. In Des Moines the Knights of Columbus purchased an Edison disc, and have installed it in their lodge rooms. The Press Club, also of Des Moines, having very elaborate rooms, purchased an expensive Edison disc with a large number of records, says the Edison Phonograph Monthly. Thereupon their secretary ordered another disc for his own home, with several records.

FORGOT WHAT HE WAS SELLING.

Fable of the Dealer Who Was So Full of Arguments That He Couldn't Stop to Sell Goods—A Hint as to the Handling of the "Man from Missouri" and Its Application.

There was once a phonograph dealer whose mentality was cluttered up with arguments. He was muscle-bound in the mind.

Whenever a customer came in to be shown, Mr. Dealer turned on the conversation. He called special attention to the fine old Circassian walnut in the cabinet and laid stress on the graceful lines.

Then he would open up the phonograph as if he were going to take it apart. He would call over the customer and hold a clinic, going into every phase of its anatomy.

Every time the customer started to say something he would interrupt with, "Just a minute, please," and then he would be off on another discourse; this time a technical rhapsody about motors.

Following which came several speeches from Mr. Dealer on the subject of acoustics. Overtones and timbres were all mixed up in the customer's mind and he was looking for a chance to break away and come up for air.

Suddenly Mr. Dealer was called away to answer a 'phone call. The customer beckoned to an assistant.

"Do you know how to work this phonograph?" said he.

The assistant allowed he did.

"Then make it play something," urged the customer.

Mr. Dealer was gone quite a while and he didn't see the smile of appreciation that broke over the customer's features. When he finally came back, says the Edison Phonograph Monthly, he found that the assistant had made a sale and had the money in the cash drawer. Also, he found a note left by the customer. It read:

"I came here to get a musical instrument, not a cross between a mechanical toy and a piece of furniture. Your assistant helped me to find what I wanted."

Moral: Hearing is Believing.

Sometimes silence means only that the man who listened has his opinion unchanged.

C. B. GORHAM MAKES A CHANGE.

Resigns from Denholm-McKay Co. to Become Associated with Worcester Phonograph Co., a Recently Organized Concern.

(Special to The Talking Machine World.)

WORCESTER, MASS., May 9.—C. B. Gorham, of the Denholm-McKay Co., has severed his relations with that concern, and has become associated with the Worcester Phonograph Co., which is a comparatively new concern. W. F. Howes, who at one time was the manager of the talking machine department of the Houghton & Dutton establishment in Boston, has succeeded Mr. Gorham, and he plans some new features for the Denholm-McKay Co. One of his plans is to screen off a part of the rug department and have demonstrations of dancing by a couple three afternoons each week, using a Columbia graphophone to furnish the music. Attention will be called to the demonstrations through the medium of some attractive window display.

SELLS HIGHER PRICED MACHINES.

G. W. Lord Meets with Success in Featuring the Better Grades of Machines in Lynn, Mass.—Reports a Growing Demand.

(Special to The Talking Machine World.)

LYNN, MASS., May 7.—G. W. Lord, of 34 Central square, is one of the large Columbia dealers who is making a great success of the higher priced machines. He has been featuring the \$100 mignonettes for some time past, and his sales have increased tremendously. Mr. Lord makes it a point of running up to Boston quite frequently and conferring with Manager Erisman, and, in this way, he keeps right up-to-date in everything.

NATICK, MASS., A LIVELY CENTER.

(Special to The Talking Machine World.)

NATICK, MASS., May 7.—Though this town is not a large place and is comparatively near to Boston, a large percentage of its citizens can boast the possession of a talking machine; and the medium of distribution for the Columbia outfits is Fairbanks & Sons, who have been doing a most creditable business, especially in the past month. The demand is largely for the higher priced outfits.

More needle styles than you actually need are made in this plant

THERE are many styles and kinds of needles; it is admitted that Bagshaw-steel is the best material, and we make all the styles of needles that have been tested by experts and are acknowledged to be the best means of reproducing sound. Some of these styles are LOUD, SOFT, DUPLEXETONE, which with the many different sizes gives a dominating needle line of unusual strength.

NEW YORK TALKING MACHINE CO.

81 Chambers Street,

New York City

NEW YORK TRADE SHOWS UP WELL DURING THE MONTH.

Continued Demand for Dance Records Proves Strong Factor in Business Despite Stock Shortage—Noticeable Increase in Local Advertising—Big Gains in Sales Reported—What the Various Jobbers and Dealers Say Regarding Present Conditions.

Business in local talking machine circles the past month has maintained a steady, even gait that has developed nothing startling nor extraordinary aside from the fact that the majority of jobbers and dealers closed the best April in their history. The pronounced record shortage continues to be the main topic of discussion and, in some instances, complaint, while the more popular models of machines are also extremely scarce in most parts of the city.

As was predicted six months ago, the dancing craze shows no signs of abating, although there has been a noticeable switch to some of the newer dances in preference to those introduced last fall. This change, however, has had no effect on the demand for dance records, as all of the new dances find their ideal interpretation through the medium of the talking machine. As it now stands, the dance craze has been the greatest boom to the record business that has ever been introduced. Many dealers can trace a considerable portion of their 1914 profits to the sale of dance records, and with the advent of the summer season there is no real reason why any dealer should complain because of lack of record business. The companies are making every effort to co-operate with their trade in developing their dance record business, and this co-operation is taking the forms of practicable selling helps that are producing results.

A feature of local trade the past few weeks has been the consistent advertising that has appeared in the leading newspapers on behalf of talking machine warerooms or departments. There was a noticeable let-up in "talker" advertising around Lent and Easter, but the past month has witnessed the use of very nearly as much printers' ink as usually appears about Christmas time. Service is the keynote of this advertising, the uniformity of selling prices of the machines and records eliminating the price question from the dealers' advertisements. Machine and record service is extended to all prospective customers, with the assurances that the records carried in stock are perfect and up to date.

Dance Posters Catch the Eye.

The Blackman Talking Machine Co., 97 Chambers street, New York, prominent Victor and Edison distributor, is displaying in its spacious show window a number of dance posters that have attracted the attention and praise of all passers-by. These window posters are distinctive and individual, having been made specially at the company's order. The testimonial on behalf of Victor records given by Mr. and Mrs. Vernon Castle is featured to excellent advantage, while the color schemes of these window displays harmonize with the quality of the illustrations.

Big Business Gain Reported in April.

"Our April business showed the substantial gain of 76 per cent. over that closed last April," said R. F. Bolton, manager of the Columbia Graphophone Co.'s wholesale quarters at 89 Chambers street, New York. "We are naturally well pleased with this splendid report, particularly in view of the fact that last April's business was generally satisfactory, and was ahead of April, 1912. Last month was a record-breaker in several respects, although the most important feature was the fact that the higher priced machines outsold by far the less expensive ones. Our 'Leader' and 'Mignonette' models are selling particularly strong."

Shipping to Summer Resorts.

"Sales of machines during the past few weeks have been very steady," said H. N. Purdy, in charge of the Edison disc department of Hardman, Peck & Co., 433 Fifth avenue, New York. "We have been shipping many machines to well-known summer resorts, together with substantial supplies of dance records, and judging from all indications, this phase of our business will assume imposing proportions during the rest of the month and in June. Our clientele is still evidencing a marked preference for the better grade of ma-

chines, our best selling machine being the handsome \$150 model."

Book on Dancing Stimulates Business.

Apropos of the recently issued Victor book on the modern dances, V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, Victor distributor, remarked as follows: "The Victor Co.'s book of instructions on the three modern dances, one-step, hesitation and tango, is creating more interest than any piece of literature ever issued by the Victor Co. The demands for "Form 2338," the official ordering number for this book, are actually in excess of the call for the Victor complete record catalog, and the tremendous demand for the latter book is a matter of common knowledge. Due to the fact that all dealers, large and small, urban and interurban, are demanding so many of these dance books, the allotments have of necessity been small and the dealers are all circularizing their best trade and prospects, asking them to come in and get a copy."

Notable Increase in Agencies.

"The various new Columbia agencies around New York established during the past few months all report the closing of a healthy business in April, due to consistent advertising and the demand for the product. The Grafonola Shop, opened May 1 at 143 West 125th street, is located in the best shopping district of Harlem, and is already closing an excellent business. The store is situated in a most convenient spot, being accessible to all lines of transit and opposite the leading Harlem department store.

Takes Charge of Department.

John Y. Shepard has been appointed manager of the Victrola department of the Lawson Piano Co., Third avenue and 150th street, New York. Although Mr. Shepard is inexperienced in the merchandising of Victor machines and records he has started work in his new connection with vim and vigor, and his sales for the past fortnight have been very gratifying, showing a substantial increase over the corresponding period of last year. Before assuming charge of the Lawson Co.'s Victrola department Mr. Shepard visited the establishment of one of the leading local Victrola distributors, where he spent several days acquiring a detailed knowledge of stock system and selling methods.

New Machines Win Praise.

"Edison disc records are being praised by all our patrons," said Dana F. Parkhurst, manager of the Edison department of the Tower Manufacturing & Novelty Co., 326 Broadway. "The tonal quality of the latest shipments from the factory has been termed 'superb' by our customers, and this branch of our business is steadily increasing. The outlook is very bright and our list of live prospects is constantly increasing."

General optimism prevails in the trade just now, the following dealers expressing their satisfaction with business conditions: Benj. Switky (Victor), Christman Sons (Columbia), Krakauer Bros. (Edison disc), Landay Bros. (Victor), Kranich & Bach (Columbia), Greenhut-Siegel Cooper Co. (Edison and Victor), and many others in the local trade.

PROTEST PRICE CUTTING.

Prominent Retail Merchants of New York Hold Large Meeting in Aeolian Hall— Favor Bill Introduced in Congress by Representative Stevens of New Hampshire.

Several hundred independent retailers, representing many different branches of trades, including many prominent talking machine jobbers and dealers of this city, attended a meeting at Aeolian Hall April 24, under the auspices of the Committee for the Promotion of the Interests of Retail Merchants, at which the price-cutting practise of department and "chain," or syndicate stores were severely scored by the speakers. Dr. William C. Anderson, president of the New York Pharmaceutical Conference, presided, and spoke in favor of the bill introduced in Congress by Representative Stevens of New Hampshire, authorizing manufacturers of standard, advertised goods to prescribe the price at which the goods shall be sold by all retailers.

Alfred D. Woodruff, manager of the food supply store maintained by the New York Association for Improving the Condition of the Poor, spoke, and among the other speakers were Congressman Herman A. Metz, of Brooklyn; Ellis L. Holland, of The Journal of Commerce, and J. Leyden White, of Washington. The speakers said the public derived no benefit from price cutting, as the amount taken off the price of one article by the big stores, was added to another.

It was announced that similar meetings are to be held in Baltimore, Denver, St. Louis, San Francisco and Philadelphia and that plans are under way for a large protest meeting in Madison Square Garden on a later date.

**Dome Record Case**

It holds 20 records, which are readily accessible for instant use. A convenient index shows just where each record is. Notice how the case swings open so the repertoire is displayed. It is constructed along different lines, being reinforced at the bottom with a nickel-plated metal support to keep the records in position.

Keeps Valuable Records Under Lock and Key

Try a sample of each, 10" and 12". If not satisfactory you may return them. Include record numbers you need and perhaps you want a particular model Victrola, which you are unable to get elsewhere. We have every model in stock. Our shipping facilities are the best; thirteen lines of Railroad and five Express companies; also boat lines on the Great Lakes.

By sending us your order you have two of the largest jobbing stocks at your service.

W. D. ANDREWS**Buffalo, N. Y.**

We will help you make money in 33 languages

How many foreigners are there in your locality? Italian, Hungarian, German, Poles—or whatever their mother-tongue may be?

Do you realize how anxious they are to spend their money in your store?

Columbia Records—a splendid repertory in all of the following languages—and a correct catalog for each:

- | | |
|---------------|--------------------|
| Arabic-Syrian | Finnish |
| Armenian | French-Canadian |
| Bohemian | Gaelic |
| Chinese | German-Austrian |
| Cuban | Greek |
| Danish | Hawaiian |

YOU know well enough that music means ten times more to the foreigner in your town than to the American citizen. Especially the music of his own native land—and even more especially if it is sung by the best known artists and played by the best known instrumentalists of his own country—names as familiar to him as your own front door is to you.

We are now prepared not only with a remarkable series of records in 33 languages and dialects, but with the means of getting the business for you.

Our Foreign Record Department will co-operate with you to the limit; we can tell you very nearly how many foreigners there are in reach of your store—and we have a pretty clear idea of what language they speak, too. And we can tell you just how to go about bringing them in. It's the easiest thing in the world—once you have been put in touch with them they will come to you.

The Columbia repertory of foreign records is by far the biggest and best in every language. Most of them were recorded in Europe, and all of them are in the pure native language or dialect.

Good business in every month of the year—no dull June, July or August for you if you have this highly profitable foreign trade coming in.

We can tell you how, and we can help you do it!

TALKING MACHINE DEALERS HOLD ANNUAL DINNER

Members of Eastern Talking Machine Dealers' Association and Their Friends Participate in Enjoyable Affair at the Kaiserhof—Listen to Able and Interesting Addresses by Dr. Lee Galloway, Ernest John, Clinton E. Woods and Others—Association Plans.

The fourth annual dinner of the Eastern Talking Machine Dealers' Association, the largest and most successful affair ever held under the auspices of that association, took place at the Kaiserhof, Thirty-ninth street, New York, on Wednesday, May 6, with a particularly large number of dealers and their guests, the jobbers and factory representatives, in attendance. The general acquaintanceship among those present made the affair distinctly informal, and that fact added materially to the enjoyment of the occasion.

The arrangements for the dinner reflected the interest taken in the matter by the officers of the association, John G. Bremner, president; R. Montalvo, Jr., vice-president; Henry Rau, treasurer, and F. L. Steers, secretary, and of a number of the members, and the attendance indicated the growth of the association and the interest taken in it since its organization with a scant dozen members.

Following the dinner proper, President Bremner assumed the duties of toastmaster and introduced the first speaker in the person of Dr. Lee Galloway, professor of commerce and industry of the New York University School of Commerce, Accounts and Finance, who had for his subject "The Principles of Price Maintenance."

Dr. Galloway Speaks on Price Maintenance.

Dr. Galloway, who is one of the recognized authorities of the country on matters of commerce and business economics, handled his subject in a most comprehensive manner and presented a number of forceful and unusual arguments in support of the legal right of the manufacturer to control the resale prices on his trade-marked products.

"Many economists start out by ignoring price," said Dr. Galloway, "but all finally end by acknowledging that price is the most wonderful of all social phenomena. It is the one medium by which society tries to express its estimates of economic values—would it be too much to say social values as well?"

Dr. Galloway then explained in detail the two kinds of commodities—staple and merchandise—the first characterized by their relationship to human wants and the second including manufactured products not of that character.

"The first real distinction between staple and merchandise rests in the nature of the articles themselves. There are only a few grades of steel, but there are thousands of articles made from steel. Each of these articles has certain specific qualities. What corporation, for instance, could get a monopoly of watch springs, or of carving knives, or of razors? Therefore, with the ordinary legal safeguards against the restraint of trade, the manufacturer of merchandising products must set his price under competitive conditions."

After explaining at length the manner in which competitive conditions govern the question of price fixing by an independent manufacturer or dealer as compared to price fixing under monopolistic conditions, and the manner in which the great markets have been developed, Dr. Galloway said: "Not only must the manufacturer adopt the agency method if he would preserve his trade name, but he must adopt this manner of distribution if he would avoid the creation of enormous distribution corporations which would gradually monopolize not only the outlets of distribution but force the manufacturers themselves into a dependent position. The rapid growth of chain stores, mail order houses and department stores indicates the tendency toward concentration in the marketing of goods. Either the manufacturer must be given the right to maintain his resale price—in which case the position of the small distributor might be maintained—or he must establish his own branch house or agency to hold the market for him."

The speaker also dwelt upon the quantity price versus the one price to all from different angles, and likened the present conditions of trade, without fixed retail prices, to the primitive bartering methods wherein both buyer and seller spent much

time and effort in an endeavor to take unfair advantage of each other. He credited national advertising and the general acceptance of advertised trade-marked articles as the standards in their respective classes with placing modern merchandising on its present high plane.

In support of the inherent right of the manufacturer to fix the resale price on a trade-marked and advertised article of his manufacture, Dr. Galloway offered the following original and thoroughly convincing argument: "The manufacturer who spends millions of dollars in advertising his goods to the public creates, as we say, in the minds of the public a disposition to buy and to trust the concern which makes them. An important part of the advertising and an important element in establishing good will is the fixed price which is put upon the article. The community began to associate a certain article with a certain quality at a certain price. The right to this favorable social impression is regarded by the manufacturer as a good will property right, and he claims that when he disposes of his goods to the retailer he cannot in the nature of the case transfer to him also the right to dispose of or sell his reputation or good will at the same time. Therefore he wishes to divide the idea of possession which accompanied all goods, namely, the property right in the physical goods and the property right in the good will. The first of these he is willing to sell to the merchant, but the second he is unwilling to surrender unconditionally into the hands of any other person than himself. Thus he claims that when he sells a razor or a watch with his trade-mark on it, he is not

giving the merchant absolute title to all the property rights connected with it, and hence maintains that he should be permitted to name the resale price to the merchant. In this way the manufacturer can protect the name of his advertised goods against the price cutter, who, by selling it lower than advertised prices, creates an impression that the quality of the goods is not as advertised and so destroys the good will of the manufacturer.

"The whole question of price maintenance is closely associated with advertising. No man can afford to put a brand upon his goods and then spend millions of dollars in advertising if he is making a poor commodity and expects to remain in business. Every dollar he thus spends is advertising inferiority rather than establishing for himself a valuable property right and good will. Advertising in its early stages was almost a synonym for sharp practice merchandising, and the patent medicine advertisement was a type which was very prevalent. However, with the increase in trade-marked goods, advertising became more dependable, and to-day few reputable magazines would dare to take advertising which was palpably fraudulent. Thus the trade-marked goods have not only established standards for the consuming public but they have set standards for the advertising world. The special bargain, the fire and removal sales, etc., which have built up the fortunes of many big department stores and their like, are to-day bringing these stores more and more into ill repute with the public.

"Thus we predict that within a few years laws will be proposed and passed which will define fraudulent advertising, and severe punishment will be meted out to those who attempt to build up a business on the ignorance of a credulous public. And when this time comes we will see more plainly than ever the part that the standard trade-marked goods are playing in elevating business ethics and creating a broader field of commercial dependableness."

ERNEST JOHN, OF VICTOR CO., DISCUSSES "CO-OPERATION".

The next speaker was Ernest John, of the Victor Talking Machine Co., who had for his subject "Co-operation." He was listened to with interest and said in part:

"Co-operation means co-operation and nothing else—it does not mean co-operation up to a certain point. If I attempted to go into all its phases you might, by the time I had finished, have gone home or gone to sleep. You are safe, however, for I myself have suffered too often and too keenly from those who talk 'not wisely but too much.'

"We think we know a lot about the value of gold and diamonds and such things, but the value of co-operation is greater still. The whole social system is built on it. Whether it is a question of mailing a letter or making war on Mexico, we are dependent upon the co-operation of others. A man who earns \$50,000 salary is dependent upon the co-operation of someone else for food and clean shirts. It is true that he pays for them, but if there was no co-operation procurable at a price or otherwise he would have to do these things himself.

"That's how broad the subject is, but we no doubt are more interested in its specific application.

"First: You employ clerks to co-operate with you. Co-operation here means that two or more parties unite their mutual efforts for mutual benefit. When either one of the parties does less than his share we no longer have co-operation, but parasitism.

"Paradoxical as it may seem, there is such a thing as co-operation with competitors. Don't you know how, in a prize fight, there are certain mean tricks which no clean fighter will use, because in the long run they are likely to spoil the sport. For their mutual good they refrain from doing certain things.

"That's co-operation.

"You may say that they refrain from mean tricks because there's an umpire watching them. It may be so, though I would rather hold the other view; but don't forget that there's an umpire watching

the retailer, and instead of one man it is that powerful combination of men we call the public.

"Just as a community, a store or a nation thrives

Ernest John.

only so long as there is a reasonable co-operation for the common good, so with a trade. Every time a man tries to get the best of a competitor by foul means he does, to that extent, help to make business conditions harder for himself.

"The talking machine business has been fortunate—more fortunate than most—but if you remember nothing else that I say remember this, that every time you cut a corner off profitable business the loss is permanent for others, can, will and indeed must, follow you.

"I am not talking about price cutting because I believe you realize how impossible and disastrous that is. I am talking about giving terms which are unprofitable, and all that sort of thing. Depend upon it, you will all have to do business

(Continued on page 24.)

The Columbia sales policy is that of the open shop for the dealer. He can make his own business decisions—and we will boost both his demand and his supply.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

**Columbia Graphophone Company
Woolworth Building, New York**

TALKING MACHINE DEALERS HOLD ANNUAL DINNER—(Continued from page 23).

on the same basis, and whether that basis is profitable or unprofitable depends upon your policies. It depends on whether you realize that there is a benefit to each individual through co-operation with competitors. You may be positively certain that you yourselves will have to pay the piper for the tune to which you dance.

"On this point my message to you is—get together on the basis of friendliness and good will. To all intents and purposes you gentlemen are like a regiment of soldiers on a battlefield—at least you should be. Your interests are identical with those of your competitors just as surely as the individual soldier's interests are one and the same with those who march at his side.

"I said get together on the basis of friendliness and good will, and I mean just that. Get to know one another—know one another better than you know your customers.

"Here's Brown doing business on one side of the street and Smith doing business on the other side. They are rivals in business, but barring that they're friends. A customer comes to Brown and tells him that Smith has offered to let him have a Victrola for nothing down and a dollar a month. What happens? Brown can laugh in his customer's face if he wishes to, for he knows Smith; they're friends, they've talked over their business affairs, credit extensions and so on, each knows the other and trusts him, each knows that he isn't such a fool as to do business that way. Then the customer's bluff (and such tactics are often used) can safely be called. Without that mutual friendliness, that mutual respect, Brown will try to go one better perhaps, and then what?

"Gentlemen, what is it that you get out of that sort of thing? I'll tell you what you can get and all you can get—rotten business! That and nothing else. Rotten business that isn't worth the having and serves no other purpose than keeping you awake o' nights. What is the use?"

After asking the dealers for their earnest support of the Stevens bill now before Congress, Mr. John continued:

"I have had my say on co-operation from two points of view. For instance, you have a right to the co-operation of your clerks. You have a right to co-operation from your competitors—when you co-operate with them. It is also true that you have a right to co-operation from your manufacturer—when you co-operate with him.

"You have heard what happens to the man who is between two stools, and there is excellent authority for the statement that 'a house divided against itself falls.' Let me tell you that the best co-operation between dealer and manufacturer exists only in the exclusive store, the store which handles one line.

"Do you know what it is that the dealer does when he handles two or more similar competing lines? He acknowledges his own uncertainty as to their respective virtues.

"Before I knew anything about the talking machine business I went into a store where the three most prominent makes were carried in stock. I

was open to conviction to a very great extent, for my experience was very limited. In other words, I was in the same condition of mind as the average buyer. Among other things, I asked the salesman which instrument he thought was the best. His reply was: 'I really can't say.'

"Of course there was nothing else for him to do, but I was actually more confused when I came out of that store than I was when I went into it. Is that the condition of mind, think you, which is most likely to lead to a purchase? Was it co-operation, real co-operation with any one of the manufacturers in question? It wasn't.

"The retailer accepts certain obligations to the public when he becomes a retailer. He assumes the responsibility of supplying his customer with the best article obtainable when the customer on his part assumes the responsibility of paying for such article.

"In most commodities the customer knows nothing of values—he depends on the retailer's integrity. Incidentally, let me say that once that integrity is open to impeachment the end of that retailer comes swiftly. How then, under circumstances such as I have outlined, can a retailer look his customers squarely in the eye and say: 'This is the best,' when there is a monument to his own uncertainty grinning at him from the corner of the store?

"I repeat. When a dealer handles two or more similar competing lines he does acknowledge his own uncertainty, and by so doing he does not help but hinders the making of sales. In other words, he is not co-operating to the best advantage with himself. I know very well that the retailer puts his own money and his own energy into his business for his own benefit, but he defeats his own ends when, instead of stimulating the enthusiasm, he stimulates the confusion of his customers. I shall be told that there are two sides to every question. There are. But both of them can't be right. I think I know most of the arguments which are used in favor of having more than one line, although it has been my misfortune to have met no argument which justifies the practice.

"The one most commonly used is that in catering to the general public a merchant must be able to satisfy varying tastes. If that were so, the only successful retail establishments would be the de-

partment stores. But I would rather own Tiffany's than the best jewelry department in town, and so, I think, would you.

"Take the case of—well, a shoe dealer. When shoe dealer offers the public the best available shoe, the shoe which gives the greatest satisfaction to the greatest number of his customers, he does not, in handling that line, debar the public from procuring some other shoe—at some other store. I grant you he may lose the sale of an occasional pair of shoes, but what of that, if the line he carries is, generally speaking, the most satisfactory to the public with whom he does business?

"No one can get all the business there is, no matter how many lines he carries. Is it wisdom or policy to spend money and effort in pushing less satisfactory goods when the same money and effort might have been more profitably expended on the goods best suited to your own particular market?

"You can't possibly inject into your customers more enthusiasm than you yourself possess. Straddle the issue and you will find that your customers will follow suit. They, too, will 'straddle' until someone else, by the sheer force of his own convictions, carries off the prize bodily before your eyes.

"Please don't misunderstand me. I did not come here to-night to proselytize. I came to talk about co-operation as I see it, and I am dealing only in co-operation's first principles.

"I do not say to you, 'Throw out every other line and handle the Victor.' What I say to you is this: 'If you feel that the Victor will suit the majority of people best, handle that, and that only. If you think the Columbia is best, handle that, and that only.'

"A man cannot serve two masters. If you haven't any convictions of your own you can't expect to convince your customers. True enough, if your guess goes wrong you may be out of business in three months, but you will have learned the lesson in the cheapest way, and you will have paved the way for a future success.

"There would be no possible use in my coming here and rehashing for your benefit a quantity of second-hand platitudes. My only chance to say anything of real value is to express my honest convictions. That, Mr. President, is what I have endeavored to do."

CLINTON E. WOODS TALKS ON "SOUND RECORDING"

One of the most interesting and instructive addresses of the evening was that of Clinton E. Woods, E.E., M.E., of the American Graphophone Co., who offered "An Explanation of Sound Reproduction as Related to Talking Machines."

"Generally speaking, sound is primarily created by four things: First, by a fractional rubbing of some kind, such as drawing the bow of a violin across its strings; second, by a blow of some kind, such as the tongue of a bell on the bell itself; third, by the rapid movement of air over a vibratory medium, like the reed of a clarinet, the vocal cords

of the throat, etc., and fourth, the movement of air through certain forms of confinement, like a flute or the pipes of an organ, the results, which in turn disturb the air and set up a wave movement, the air thus acting as a medium of travel for the sound so created, different sounds being represented by a difference in the number of vibrations per second, with a resulting difference in the form of the sound wave.

"Sounds are audible to the human ear from about thirty vibrations per second to 16,000 or

(Continued on page 25.)

TALKING MACHINE DEALERS HOLD ANNUAL DINNER—(Continued from page 24).

20,000 per second, but in music sounds are used for about seven octaves only; that is, from forty vibrations per second to a little over 4,000 per second, and it is this range of vibration in sound that we have to contend with in the design of a recorder for talking machines.

"From this we can see that for musical reproduction the needle arm on a reproducer is called upon to make anywhere from forty to 4,000 vibrations or blows on the diaphragms a second, and to jump from perhaps forty to 4,000 times in the thousandth part of a second, and we can well wonder at the possibility of its being able to do so,

"We wonder at this still more when we consider the fact that all the different vibrations from instruments of an orchestra are put into one wave line on a record. We would naturally suppose that as each different instrument has a different tone wave and a different set of vibrations for each note, such a confusion of sound would be set up when they went into a recording instrument as to result in nothing but a conglomeration of noise, but such is not the case, for when the sound of an orchestra is recorded it imprints on the wax record a single composite wave line corresponding to a composite photograph; in other words, there is one general sound wave formed of all the other sound waves, which precipitates itself onto the diaphragm of the recording instrument and thus produces in the wax record a single wave line corresponding to it, and this in turn is used in connection with the reproducer in such a way that it throws off the same identical composite sound that was put into the original wax.

"This is brought about by the well-known process of putting a pointed needle in the groove of the finished record and allowing the record to rotate under the needle at the same speed at which the record was made. This causes the needle arm to vibrate (according to the wave groove on the record) against a flexible diaphragm, it might almost be called a miniature drumhead, and this in turn agitates the air on the inner side of the reproducer by setting up vibrations and consequently corresponding tone waves in the air, whose only means of exit is out through a tone arm and horn of proper proportion to amplify the volume required.

"Amplitude is another thing that must be taken into consideration in the proper design of a reproducer; that is, the minimum and maximum length of stroke to be made in order to get perfect vibration for long or short tone waves; that is, loud or soft tones. Right here is where we come to one of the most difficult things in reproducer design. If the diaphragm is too thick we do not have elasticity enough in it to give a full length stroke and so get a tubby sound; if it is too thin we have what is known as a raspy or edgy sound. At no point in the operation of a needle arm must the diaphragm be subjected to any mechanical strain; in other words, it must not exceed the limits of its elasticity. From this it can be seen that there is a mathematical relation between the diameter and the thickness of a diaphragm and the length of the needle arm in both directions from its pivoted center.

"Next, let us consider what a record is. It is a flat disc with a spiral groove, commencing at the outer edge and running in toward the center, which groove represents a sound recording of some kind. A record which will play about four minutes has, in the total length of its groove, an average of about 480,000 waves or vibrations; therefore, in playing a tune once through, the needle is made to oscillate against the walls of this groove something like 480,000 times, which, in turn, is delivered to the diaphragm of the reproducer. The depth of this groove is three one-thousandths of an inch; its average width is six one-thousandths of an inch, while the thickness of the wall between the spirals is on an average four one-thousandths of an inch, from all of which we can see that a tremendous amount of energy is required from an infinitesimal amount of material.

"We do not consider a record good in its wearing qualities unless it will play on an average at least 200 times; therefore before a record is worn out it will have delivered something like 96,000,000

complete strokes of the needle arm to a diaphragm, and the energy that will have been consumed in this work will have been equivalent to 18,000 foot-pounds, or the raising of 18,000 foot-pounds one foot high in one minute. This gives us some idea, in a general way, of the work the face of a record has to be constructed to do.

"Therefore a matter of great consequence is the selection of proper materials to do it with, as this terrific vibratory bombardment must have a material that will not only give great wearing qualities but will run as frictionless as possible; that is, must be as free from scratching due to the mechanical slide of the needle as possible; and, furthermore, must be a material that is absolutely impervious to moisture; otherwise the records will be very short lived, due to atmospheric or climatic variations.

"Such, in brief, are the elements that we have to deal with down to the present time in the development and use of the talking machine. Recent experiments and developments, however, lead me to say that I believe the talking machine business to-day is about as near being in its infancy as any industry in this country. For instance, the whole development of the art to-day has been practically

Clinton E. Woods.

one that is purely mechanical. Recent experiments in our laboratory show possibilities of coupling electricity up in connection with this work, and I have no hesitation whatever in saying that the time is now near when there will be some remarkable, some most remarkable, changes in the talking machine art and product.

"There are no great obstacles at the present moment to making a record in New York from a band playing in any other city within a radius of 100 or even 1,000 miles, and this can all be done by some well-known electrical methods in connection with some recent inventions which we are working on, and, gentlemen, this means a great deal to us.

"For instance, there is no reason whatever for confining the reproduction of sound to individual appliances as we do now. There is a possibility of there being a general diffusion of this throughout a room, so that it is not localized at any one point but will be the same in any part of the room and have a much greater volume and far superior quality of tone. There are, in fact, two paths before us for making electrical recording. One purely electrical, by which we cut into wax, and one magnetically, in which we will not use wax.

"There is another proposition which I think to be still more wonderful in its possibilities. Within sixty days I have actually seen a photograph of sound, which opens up an entirely new and wonderful field for us in the art of sound reproduction, which again leads me to say that we are approaching a new era in the talking machine business. If sound can be photographed we can enlarge such a photograph as many times as we want to, the same as they do in moving pictures. This will give us an opportunity to make a full analysis of any one

voice, instrument or concerted piece of any kind. Therefore we could take the voices of great artists and make a very minute analysis, a mathematical analysis, if you please, of the relative value of such voices. We could take the voice of a young singer and make an analysis of it and determine just what possibility lay before its possessor, often times saving a vast amount of time and money in its development, if not found up to some certain standard, or again, often encouraging to a complete development voices which might otherwise stay hidden.

"That home recording will soon be with us I have no doubt whatever, which means that a large amount of correspondence in the future will be dictated to a machine and reproduced by the recipient. The time is not far away when we will possibly have voice studios where anyone may go and have a record of their voice made as they now go and have photographs of themselves made. Posterity records, they might well be called. I said before that our work at the present time was very mechanical, and notwithstanding all talk to the contrary, we do not get perfect reproduction at present. To illustrate this: If tone waves were an inch in length in each of their vibrations, out of this original source of sound we have to perform a certain mechanical work, namely, the cutting of wax for preserving the sound or reproducing it. If we absorb two-tenths of an inch in the tone wave in the mechanical work of cutting the wax it is utterly impossible to get a perfect reproduction, because we are going to have only eight-tenths of an inch swing to the sound in the groove on the wax as against a full inch in the original sound, and by this difference there will always be a difference in the actual reproduction from its original source, this difference varying in different voices and different kinds of music. As I said before, there are two paths open to us for the making of sound recordings which are different from those now used, in which there will absolutely be no loss in the registration of the original source of sound. This is very important to a commercial development other than one of entertainment; within the last three or four months I have had some wonderfully satisfactory experiences in these things. You can readily understand that if we can reproduce sound, giving the full value of the original source, also without mechanical contact, we will probably reach as near a state of perfection in this science as it will be possible to go.

"The strong commercial phase in the near future of sound production is going to be in the taking of telephone and telegraphic communications, whereby we will get an actual record. The necessity of this you will perceive at once if you will stop to consider the tremendous volume of business which is daily transacted over the telephone, of which there is absolutely no record that could be produced in court or otherwise as a business transaction. I have seen this performed within the last month and I have taken, myself, telephone communications and put them on record from widely different sources, so this is not only a possibility but a probability, for I have seen apparatus that would do this work over a 1,500-mile circuit."

Other Addresses Made.

After a short address by G. W. Hollowell, manager of sales for Thomas A. Edison, Inc., the toastmaster introduced Francis L. Plummer, of the American Fair Trade League, who made a plea for the support of the talking machine dealer in the work of the league for price maintenance, and who also discussed the Stevens bill at length.

The final speaker was Edward Lyman Bill, editor of The Talking Machine World, who spoke of the benefits of association to talking machine men, and who advocated that the jobbers and dealers of New York get together in one large mutual association for general trade protection and betterment, with increased individual benefits as the final aim.

John G. Bremner, president of the association, also announced that he favored the bringing together of all the various jobbing and retail interests in the local talking machine trade into a large association that would prove a big factor in handling the many business and legislative problems that face the talking machine men to-day.

A NOVEL MUSICAL INSTRUMENT.

Much Interest Being Manifested in the New Instrument Regarding Which Mr. J. Hoffay Expects to Make an Announcement at an Early Date—Possesses Many Distinctive Features That Have Aroused Attention.

Matters have greatly advanced with J. Hoffay, of 67 Egerton Gardens, South Kensington, London, England, who expects to put on the market his greatly looked for instrument at an early date. Mr. Hoffay is very sanguine as to the trade field waiting for him. His instrument is fully protected by patents, which are already applied for in as many as forty-two countries.

Mr. Hoffay expects to have some definite information ready during the current month. His line of goods will be very attractive. He asserts that several features of his inventions will make certain the capture of the world's market, among which stands prominently the magnificent round musical and natural tone of the reproduction and also the point that one soundbox, without being detached, is all that is necessary to play perfectly all sorts of records. Such arrangement ensures perfect reproduction at all times with all makes of disc records—phono or zig-zag cut.

Other features will count as well, although the main one is perhaps the extreme simplicity of every part composing the instrument.

The announcement as to the trade-mark or name under which these instruments are to be known will be made shortly in this paper, together with the name of the winner of the £10 prize.

Catalogs are now being prepared and will be ready for distribution at an early date. Dealers should apply for same at once.

If you wish to be popular with other people don't show everybody how popular you are with yourself.

Some men are so afraid of hurting other people's feelings that they won't even grin when the weather man falls down on his prediction.

AN AID TO MERCHANTS.

Edison Advertising Compiled from Newspapers Which Is Used to Good Purpose by L. C. McChesney—Other Plans to Help Agents.

A striking aid for retail phonograph merchants was recently created under the direction of L. C. McChesney, advertising manager of Thomas A. Edison, Inc., Orange, N. J., when the department compiled from newspapers some twenty-four advertisements from all sections of the country in which the new Edison Diamond disc phonograph is exploited. These were reproduced in the regular size, and the various sheets were sent to all the Edison dealers to show them just what was being accomplished by their fellow merchants throughout the country. Under each of these advertisements were brief criticisms and suggestions for improvement, so that new dealers might be guided in their advertising work to the end that their publicity work would be of the strongest possible character.

In addition to the foregoing, Thomas A. Edison, Inc., also publishes a set of advertisements for dealers, covering many important points of construction and publicity, which, together with the foregoing set of proofs, furnish this trade with a tremendous amount of ammunition for creating new business.

Mr. McChesney spoke very highly of the methods and space used throughout the country by Edison dealers in featuring the new Diamond disc phonographs, and the trade is receiving the co-operation of this advertising office in order to secure the maximum results from their work.

NEW COLUMBIA REPRESENTATIVES.

Among the latest additions to the lists of Columbia representatives are the Thiebes Piano Co., St. Louis, Mo.; Daly & Poole, 181st street and St. Nicholas avenue, New York, and W. H. Becker & Co., Gloversville, N. Y. The Thiebes Piano Co. is one of the most successful piano houses in St. Louis and is planning to institute an aggressive

ARTISTIC ENVIRONMENT COUNTS.

Its Value Demonstrated in the Display of Edison Disc Phonographs at Hardman House, New York—An Idea of Its Effectiveness Apparent from the Photographs Below.

As symbolic of the standing of the present-day talking machine business, the accompanying views of the Edison disc department in the establishment of Hardman, Peck & Co., New York, furnish an

Hardman, Peck & Co. occupy an important position in the ranks of high-grade piano manufacturers and cater to a high-class clientele. Their products are sold by aggressive dealers throughout the country, and in arranging to handle the Edison disc products in their beautiful home office, Hardman House, the company paid a marked tribute to the merits of these machines and records.

The Edison disc department is located on the fifth floor of Hardman House and, as will be

fyng success, the company's piano clientele being quick to appreciate the musical worth of Edison disc machines and records. The higher priced machines have been the heaviest sellers in this department, while all types of records have met with a ready sale. Ashley B. Cohn, vice-president of the company, exercises a general supervision over the Edison department, while H. N. Purdy, well known in the local trade, is in personal charge of the Edison business.

TRITON CO. STATEMENT

Sent to the Trade in Answer to Certain Legal Phases in Connection with the Triton Phonograph and Its Manufacture.

The following letter is being sent by the Triton Phonograph Co., 41 Union square, New York, to its representatives and other members of the trade: "To Our Customers.—We are informed that the American Graphophone Co. is advising the trade that it has brought suit against us on certain of its patents. We wish to notify our customers that this suit will be vigorously defended by us, and we have the utmost confidence in the outcome of the litigation. We are advised by our patent counsel, Waldo G. Morse and John L. Lotsch, of 10 Wall street, New York, that we do not infringe any valid and existing patents owned by the American Graphophone Co. or any other company, and that we stand ready to defend our customers against all litigation. If you are served with any papers, communicate with us immediately.

"To the Trade—If you are sued, it will be to your interest to communicate with our patent counsel or us immediately.

"TRITON PHONOGRAPH CO., INC.,
"By Joel A. Kraus, as President."

VICTROLA CONCERT IN CLEVELAND.

Eclipse Musical Co. Provides Elaborate Program and Attracts Large Crowd of Music Lovers—Local Quartet Helps Out.

(Special to The Talking Machine World.)

CLEVELAND, O., May 8.—On Wednesday evening of this week the Eclipse Musical Co. gave a most interesting complimentary concert at the store of the company, 1130 Euclid avenue, and at which the music of the Victrola, in a variety of standard and operatic selections, was interspersed with selections by the Cleveland Apollo Quartet, with Charles T. Ferry as accompanist.

The concert was well advertised and attracted a large and representative crowd of music lovers. In order to make the concert of practical value the numbers of the Victor records used and the names of the artists making them were printed in the program.

EDUCATIONAL RECORD CATALOG

Which Will Prove of Real Assistance to Dealers in Developing Business.

The educational department of the Columbia Graphophone Co. issued the early part of the month a catalog of educational records which should prove of real assistance to Columbia dealers in developing their business in this field. This catalog was compiled with detailed care and consideration, containing an index that lists 24 sections under which Columbia educational records may be classified.

Among the various classes of music listed in this book, the majority of which are also sub-classified, are the following: Band selections, chamber music, choruses, dance music, glee clubs, grand opera, holy days, instrumental duets, light opera, lullabies, oratorios and cantatas, orchestral, overtures and suites, patriotic, piano solos, quartets, sacred songs, secular songs in English, solo orchestral instruments, standard songs (foreign) symphonies, talking, whistling.

It isn't always the brainiest man who forges ahead. A low-brow will often cause the crowd respectfully to make way for him—if he happens to be carrying a ladder.

Exterior and Interior of Their New Building, 483 Fifth Avenue.

INCREASING BUSINESS VOLUME AND DECREASING LOSS.

The Work of the Credit Man in Helping His House to Meet and Overcome Diminishing Business by Making Forced Expansion of Trade Really Safe—Speeding Up the Slow Accounts—Some Excellent Advice by Norman Fetter, of St. Louis.

Norman Fetter, vice-president of the St. Paul Association of Credit Men, made some timely remarks recently when he said:

The question that confronts every mercantile establishment is how to maintain the net profits in the face of the diminishing margin of profits and the increased expenses. So far only one solution has been found, and that is to increase the volume of business. By turning over the capital more frequently a fair return can still be obtained even with smaller profits and increased expenses. It should be borne in mind that the increased volume of business is not an end, but merely a means towards the end; and that is, the net profits.

Furthermore, when merchandise is sold, not for cash or delivery, but under an agreement on the part of the purchaser to pay at some future time—whether a day, a week, a month or a year hence—another factor enters into the calculation of the net profits, and that is, will the purchaser pay as agreed? Now, it is at this point that the credit man's duties begin, and in their performance he is confronted by two indisputable and at the same time antagonistic propositions. The first is, that the house must do a certain volume of business in order to show a net profit at the end of the year, and if the merchandising end of the business is properly conducted, the larger the volume of business the greater the net profits will be. The second proposition is, that losses on bad accounts must not be so great as to materially impair the net profits. Hence it may be stated that the fundamental duty of the credit man towards his firm is to assist in doing the largest possible volume of business with the least possible amount of losses.

Problem That Confronts the Credit Man.

If the problem that confronted the credit man were merely to avoid all losses on bad accounts, his task would be a great deal easier than it really is. By declining business from all doubtful customers and insisting upon prompt payment as soon as accounts become due he could probably escape losses, or very nearly do so; but it is safe to say that, by pursuing such a course he would reduce the volume of business of an ordinary wholesale house all the way from 25 to 50 per cent. It is superfluous to ask what would happen to the net profits if such course were pursued, or to ask what would happen to the credit man.

On the other hand, by accepting all orders without regard to the safety of the account, his firm would soon cease to be in business. It would become an asylum for all the financial decrepids or derelicts in his territory, and ultimately the losses on bad accounts would become too heavy to carry.

Combination of Two Elements.

It is, therefore, the combination of these two elements, the doing of the largest possible volume of business with the least possible amount of losses, that constitutes the problem of the credit man. This is the circle that he must forever attempt to square, for it must be admitted that no perfect solution of the problem is possible.

There should be harmonious co-operation between the sales department and the credit department. Let every salesman thoroughly understand that the credit department is alive to the necessity of doing a satisfactory and increasing volume of business, and that it is willing to run reasonable credit risks in order to get new business; but also let every salesman thoroughly understand that he is to co-operate with the credit department in preventing losses on bad accounts, and that he is not expected to solicit business from people who are known to be in poor credit standing. The result of such co-operation will be that the salesmen will avoid undesirable customers, and will devote their time, energy and the firm's money to securing a good line of customers. Such a course will head off a lot of trouble before it ever gets started, always a desirable thing to do.

The Slow Accounts.

Of course, we all have a great many accounts on the books, and, therefore, to accomplish results it is necessary for the credit man to concentrate his attention on the slow accounts.

As a rule, the customers who discount their bills or pay at maturity need comparatively little attention. In dealing with the slow accounts it is necessary for the credit man constantly to bear in mind that they form an important part in the volume of business done by his firm, and, what is still more important, the net profits realized from their business is considerable, for a slow customer is not nearly as apt to haggle about prices as the one who discounts his bills.

On the other hand, a slow account always presents to the credit man's mind the possibility of making a loss sooner or later. There is a proverb that "a long sickness is sure death," and usually long continued and chronic slowness in meeting bills presages business death. The credit man must, therefore, watch each slow account individually and constantly with a view to noting whether or not there is any improvement. He must ascertain, if possible, the reason for the customer's slowness. It will be readily seen that if the credit man can obtain the reasons for slowness of payment, he will have a flood of light to guide him in handling each individual account.

Clinton E. Woods, supervising engineer of the American Graphophone Co., Bridgeport, Conn., gave a very interesting address last week on "Reproduction of Sound" before the Men's Club of the Second Reformed Church, Hackensack, N. J. Mr. Woods gave a brief explanation of the construction of the reproducer. He explained the number of vibrations measured in the various notes, including the scope of music as well as scope of sound that could be heard by the human ear, and he explained the enormous energy represented by the surface of one disc record in the number of strokes which the needle arm of a disc reproducer gives to the diaphragm, measured according to the number of vibrations, etc., during the playing of one ordinary finished record.

MUTUAL.

"This," said the police judge, in the throbbing silence of the court room, "this is the seventeenth time you have been arrested. The country is wasting money trying to make you behave. I never want to see your face again—do you understand?"

The prisoner nodded an unsteady head.

"Judge," he whispered, "I asshure y' zat feelin' 's entir—hic!—tirely mutual. I re—hic!—reshiprocate!"

NEW TYPE OF VICTROLA XI.

Announcement Regarding This Latest Addition Just Made by Victor Co.

The Victor Talking Machine Co. sent out to its trade this week an announcement of a new type of Victrola XI, the \$100 model. This new style, which is designated as Victrola XI, Type "F," embodies a number of distinctive improvements over the model now on the market, including an interior arrangement for holding the records so that they may be kept lying in a flat position instead of standing on edge as formerly. Each shelf will hold eighteen records, with a portion cut away to allow free access to the records. There are eight shelves in this arrangement.

The company announces that the new type will be slightly larger in this three dimensions than the Victrola XI now being sold, and that shipments will be made in about two weeks. No change in price is announced and the company states that it contemplates no further changes in this model during the balance of this year.

SUPERVISING DANCE ROLL MAKING.

Miss Emily O'Keefe, assistant inspector and teacher of athletics, is supervising the making of all folk dance records for the Columbia Co. Miss O'Keefe is well known to educational authorities throughout the country, as she is assistant to Dr. Crampton, who is director of physical training in the New York public schools. The Columbia Co.'s educational department has just issued a very comprehensive catalog of educational records which should prove of considerable value to the dealer.

RETURNS TO EUROPE.

Louis S. Sterling, manager of the British interests of the Columbia Graphophone Co., sailed for England Saturday on the "Oceanic" after a month's stay in this country. While here, Mr. Sterling attended the wedding of General Manager Lyle's daughter and the twenty-fifth anniversary dinner of the Columbia Graphophone Co. A. H. Brooks, superintendent of the London recording department of the Columbia Co., will probably sail for England early next week.

WHERE THERE IS NO BARGAIN DAY.

New ideas are slow getting into some quarters. Who ever heard of a bargain day at a coal yard, for instance?

Things go so fast nowadays that the "model" husband of 1914 is hopelessly out of date by the time spring gets here.

TRITON MOTOR

is simplicity and perfection combined. Not a surplus piece of metal about it—every part has its definite function to perform. So the cost has been kept exceedingly low. All parts of which are made in our Factory at Berlin, Germany. The TRITON MOTOR is simple, solid and durable. It is noiseless and may be wound while the instrument is playing.

CONTINUED ACTIVITY IN QUAKER CITY TRADE.

Growth Most Marked as Compared with Last Year—Blake & Burkhart's Attractive Quarters—Alterations at Wanamaker Talking Machine Rooms—Buehn Progress—Columbia Wholesale Business Expanding Enormously—New Edison House—News of Month.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., May 8.—The Philadelphia talking machine business, during the month of April, has shown the same satisfactory increase as during the other three months of the year. The increase is quite marked over last year, and each of the four months thus far shows a substantial gain with the prospects, as they look at present, of a continuation of such business for the rest of the year.

The Victor Co. has been keeping the dealers fairly well supplied, both with machines and records, and there is very little complaint at present of a shortage of goods. The only change of any note in the Victor is their announcement that the No. 11 will shortly come out with a new case design. The machine will be an inch higher and an inch wider, with a series of flat shelves similar to a music cabinet, giving a sufficient capacity to hold as many records as the average person cares to possess.

There has been no change in the Edison situation within the month. The local newspapers have been carrying large advertisements of this firm, and the dealers here seem to be doing well. On April 15 the new firm of Blake & Burkhart opened their warerooms at Eleventh and Walnut streets. They have most attractive parlors, richly furnished, and two large hearing rooms. In the basement they keep their stock. Every Monday afternoon they have special recitals from 3 to 5 o'clock, which have been attended by select guests brought there through personal mail effort. This firm consists of Herbert E. Blake and Irvin H. Burkhart. This is their first venture in the talking machine business, but they have been successfully engaged in a similar line of merchandise.

The Talking Machine Co., with three large stores in Philadelphia, has been doing a very fine business. It is arranging to make quite a change in its Broad and Walnut street store during the summer. It will cut through and have a number of salesrooms upstairs in addition to those on the first floor, in order that its customers will have more privacy. Its business is growing daily and it needs more room. The Columbia avenue and Broad street store has also been doing a very good business, and it is the best location outside of the center of the city.

Extensive alterations are to be begun at once in the Wanamaker talking machine department. A row of booths, which have already been constructed and are ready to be placed in position, will be erected in front of their Louis XV. room. The space will permit of double the number of rooms they have at present. The large room, which at present is filled with instruments, will hereafter be used merely as a concert room, and will be handsomely furnished and with a raised platform at one end, on which machines will be placed and concerts given from time to time.

Louis Buehn reports that his business in April was substantially ahead of last year; in fact, it ran ahead by a greater per cent. than any previous month of this year. His Edison dictating machine business has also been most satisfactory in April. An order has been closed for sixteen machines with the Atlas Powder Co., of Wilmington, Del., and at present a demonstration is being conducted with the Dupont Co., where he hopes to place a number of machines.

A new talking machine needle is about to be placed on the market in this city. It is not a diamond point, and it is made by a process known only to the manufacturers. When adjusted, no change is necessary for a long period, each needle playing at least 500 records before it becomes in any way impaired. It is said to be perfectly noiseless, and with no wear on the record. These needles will be retailed for 35 cents a piece.

H. H. Stewart, manager of the Gimbel Bros.' department, has been ill for a couple of weeks

with pleuro-pneumonia. For a long time little hope was entertained for his recovery, but he is now passed the critical point and is rapidly improving.

H. A. Weymann & Sons report that their Victor business has been most satisfactory. They have been having splendid success with their dance records, which they have been advertising heavily, giving away a little booklet that explains the dances to every purchaser of the records. Harry Weymann states that the first four months of the year have shown the greatest increase in the Victor line that they had in any four months in the history of the house. The demand still exceeds the supply. Their William H. Doerr is at present traveling through New Jersey, and Norbet Whately is through the State on his usual monthly trip. William Brewton is looking after the business in this city.

The retail business of the Pennsylvania Talking Machine Co. has been all that the management anticipated, and the Columbia wholesale business has been growing in a most satisfactory way. April of this year, Mr. Eckhart says, their business was better by 75 per cent over last year. "One thing that is particularly gratifying," he

says, "is the very prosperous condition of most of our accounts. Every dealer on our books is enjoying a very big business, which I attribute to the fact that we are giving them perfect satisfaction and perfect service. We have made a number of new and important accounts and have added several that were most desirable to our list during April."

The Pennsylvania Co. has rearranged its working force in the basement of its store—its shipping department. It has entirely reconstructed its stock rooms to better facilitate its business and give the dealers better and quicker service than ever before. By this rearrangement, it has been able to increase its Columbia record capacity by fully 100 per cent.

PAUL H. CROMELIN IN NEW FIELD.

Paul H. Cromelin, well known in the talking machine trade as vice-president of the Columbia Phonograph Co., and later as manager in Great Britain for Thomas A. Edison, Inc., is now located in New York as American representative for the Cosmofotofilm Co., with headquarters at 110 West Fortieth street. Mr. Cromelin has sent out an invitation to many of his friends in the trade to attend the first performance of the London Film Co.'s big photo play, "The House of Temperley," by Sir Arthur Conan Doyle, at the New Strand Theater, New York.

Premonition is one of many apprehensions which has happened to be fulfilled.

DEVELOPMENT OF AD SERVICE.

Success of the Abbott-Young-Adair Co., Chicago, in Catering to the Publicity Demands of the Talking Machine Trade—Most Convenient Cover for Mailing Record Supplements—Speeds Up the Reorder—Sales Aid.

(Special to The Talking Machine World.)

CHICAGO, ILL., May 9.—A business that has developed with proportionately the same speed as the talking machine business itself is that of the Abbott-Young-Adair Co., 542 South Dearborn street, Chicago.

The business of this company is that of providing an advertising service and sales promotional aid that is designed for the entire music trade. The success which the company has found in the talking machine trade has been especially noteworthy, due, in a great part, to the response that dealers the country over have met with following the use of the Chicago company's covers for mailing out record supplements.

These covers are permitted to be used by but one dealer in a town or territory, and possess every requisite of result-producing copy. They are attractive in design, are strikingly individual and link the dealer's name to his product in a fashion that creates an inseparable association between the two.

As the record buyer goes through the monthly supplement he can check without the slightest inconvenience the records desired on the detachable post card which forms a part of the cover.

It is by the use of such aggressive and forceful ideas that many talking machine dealers are forging far ahead of their competitors.

A FORCEFUL ADVERTISEMENT.

In this week's issue of the Saturday Evening Post the Victor Talking Machine Co. is using a striking double-spread advertisement in colors devoted to the company's dance records. This advertisement, which is one of the most forceful pieces of talking machine copy presented in some time, is certain to attract considerable attention by reason of the human interest touch given it by the numerous dancing figures and its effective coloring. A few well-chosen paragraphs on Victor dance music and the formal announcement of the Victor Co.'s new book on "How to Dance the One-step, Hesitation and Tango" complete this excellent advertisement.

A hen doesn't quit scratching just because the worms are scarce.

BUILDING BUSINESS IN TEXAS.

Southwestern Talking Machine Co. Using Attractive Billboards and Other Means of Publicity to Bring the Columbia Line to the Attention of People in That Section.

The Southwestern Talking Machine Co., Dallas, Tex., Columbia distributor, is closing an excellent

publicity. Rafael Cabanas, president of the company, is a firm believer in the value of aggressive consistent publicity, and utilizes all forms of high-grade advertising to present the Columbia products most effectively.

The accompanying illustration depicts one of the company's numerous bill boards, which are scattered throughout its territory. This bill board is well conceived in every detail, and in its orig-

A Billboard That Has Attracted Attention.

business in its territory, which is due, in a considerable measure, to its up-to-the-minute

inal coloring made a striking display wherever it was put on exhibition.

5-CENT FILM OPERA GOAL OF EDISON.

Inventor Is Working Bigger Part of Every Day to Improve the "Talkie-Movies."

Thomas A. Edison, to whom life is a deadly bore when he isn't working nineteen or twenty hours a day, is said to be defying his doctor and his family again and toiling pretty nearly all the way around the clock. He admitted Monday that in the last week he had spent fewer than six hours in his home, Glenmont, at Llewellyn Park, N. J.

Every night and every day he has been busy in his laboratory in West Orange, only occasionally snatching a few hours' rest on a couch. He is trying to perfect the details of the "talkie-movie."

"Opera and drama for the poor workingman and his family for a nickel is what we should

have, and what we eventually will have," Mr. Edison said. "The moving picture, like the phonograph, has been a great educator. Children can see the pyramids of Egypt on the screen, and can hear the strange music of the Orient on the disc. Both of these things are now as perfect as they can be, but we should have the combination of picture and sound perfected."

The phonograph and the moving picture—because they have brightened so many lives—have always been Mr. Edison's favorites among all his inventions.

MINUS MEAT, BUT PLUS ENERGY.

F. K. Dolbeer Reports Great Physical Improvement After Year of Abstinence from Meat and Looks the Part—Enables Him to Work at Full Speed at All Times.

Just a year ago to-day F. K. Dolbeer, the well-known phonograph man, stopped eating meat. He might go on and make a great many comments about this, but the only real comment that is necessary is that he is a better man physically to-day than ever, and has an energy surplus that gets him up at 5 o'clock mornings and makes him sleep soundly nights. To say he works hard is superfluous, for everyone knows this. That he will work harder he knows, for the problems in connection with the exploitation of the Phonograph Co. in New York, both wholesale and retail, will consume a great deal of time. Mr. Dolbeer states that he will keep on his meatless diet, for, as he puts it, this policy is extremely valuable for health building.

HOLDS SERIES OF TANGO TEAS.

A. D. Matthews' Sons, Inc., the prominent Brooklyn department store, which recently opened an extensive Columbia department, has been holding a series of tango teas, which has been drawing crowded houses at every performance. The Columbia Colonial "Grand" has been featured at these recitals, and the adaptability of Columbia dance records to the proper dancing of the modern dances is well evidenced by the gratifying comments of all the visitors to these tango teas.

NO, HE DOESN'T MIND.

A salesman doesn't mind turning into a mere "order taker"—after he has created a desire for goods in his customer's heart.

NO UNCERTAINTY WITH "TALKERS."

Dealers in Talking Machines and Records in Los Angeles Among Few Business Men Doing Normal Business—Recent Trade Visitors—Southern California Music Co. Makes Change in Managers.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., May 6.—April closed as a month of uncertainty in all general mercantile lines, except the talking machine line, which marks an era of exceptional vitality. The Mexican situation has caused uneasiness among merchants owing to the fact only that this section is so close to the so-called region of war and excitement. There is still a great shortage of Victor records, and dealers are hoping that their wants will be supplied in the near future by some mysterious means.

W. A. Manson, an enterprising Edison dealer of San Bernardino, Cal., was in Los Angeles for a couple of days and stated that prospects for future Edison disc and cylinder goods were very encouraging in his section.

J. W. Van Sant, of Raynard & Van Sant, Santa Monica, Cal., has recently sold his interests to his son and his former partner, W. J. Raynard. The firm will continue under the same name.

Barker Bros., 716-738 South Broadway, have very lately installed a complete line of Victor talking machines and records. F. C. Boothe, manager, states that wonderful returns have already come from this newly added line.

Ralph Paulin, who has been with the Gurnsey S. Brown Music Co., Santa Barbara, Cal., for many years, was in Los Angeles for a few days en route to the Imperial Valley, where he is very much interested in large land holdings in that rapid developing district.

The Eilers Music Co. is closing out its entire line of pianos, talking machines and musical merchandise and will discontinue the branch in this city.

One of the largest transactions in the musical line ever in the history of Los Angeles was recently completed when the Southern California Music Co. purchased and took over the entire stock of merchandise of the J. B. Brown Music Co., of this city. This not only increases the stock of the purchasing company, but gives it the agency for the Apollo player and other well-known pianos.

Chas. S. Ruggles, manager of Sherman, Clay & Co., of this city, reports the Victor distributing as doing unusually well considering the fact that the volume of business would have been much greater if it were not for the shortage in Victor records.

A number of changes has taken place within the past month at the Southern California Music Co. Jas. A. Stitt has taken over the managership of the

branch at San Diego, Cal. A. J. Morse, filling the same capacity in that city, becomes the head of the piano department here, and Geo. S. Marigold, first vice-president, has resigned and retired from active duties with the company. Fred E. Peterson resumes the duties of Mr. Marigold.

The Musical Record Co., 814 South Broadway, has added a complete line of Edison discs in connection with its large Victor stock.

The Victor department of the Geo. J. Birkel Co. has hit a high mark, according to the report of Manager A. Graham Cook.

A. C. Wisegarver, a prosperous Edison disc dealer of San Fernando, Cal., is scoring a big business.

Wm. Hobbs Richardson, department manager of the talking machine department of the Southern California Music Co., has left on an extended trip for several weeks, visiting New York and other Eastern cities. Mr. Richardson is accompanied by his wife.

INTERESTING RIEDEL CATALOG.

Noted German House Issues Volume in English That Is Invaluable to Talking Machine Men Who Need Supplies of All Kinds.

A very complete and striking catalog has been issued in English by Emil Riedel, of Chemnitz-Gablenz, Germany (P. O. Box 10). It covers a complete list of springs and a full line of supplies for talking machines. It is correct to a wonderful degree and shows a tremendous study of this particular field. This catalog also lists Riedel Patented Spring Winder, which is a necessary tool for every dealer in a repair shop. This machine is of unusual importance, being made in a practical way for universal use. This company also manufactures a complete line of stock springs, break-lever springs, screws and plates of various kinds. As for quality, the Riedel springs are made of Swedish clock spring style of the toughest quality, and a guarantee of quality and durability goes with each order.

REX CORPORATION IN WILMINGTON.

The Rex Talking Machine Corporation, of Philadelphia, has leased a building in Wilmington, Del., where it expects to locate within as short a time as it is practical to do so.

Philip Wohlstetter, general manager of this industry, advises The World that to secure a modern plant is in line with their policy, for they are rapidly making preparations for a seasonable autumn trade.

The man who insists on testing the silver lining of all his clouds deserves to get the acid in his eye occasionally.

PHONOGRAPH AS A BOOSTER.

Ad Club Quartet, of Los Angeles, Sings Booster Songs Into Edison Phonograph in Order that They May Be Circulated Among Advertising Organizations of the Country.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., May 5.—A new local organization which has given its charm and peculiarity among music lovers is the Ad Club Quartet, which will leave Los Angeles June 1 for Toronto, Can., to attend the convention of the Associated Advertising Clubs of America. After leaving Toronto a general tour of the Eastern States will be made, and while in New York it will make records for one of the talking machine companies.

This unique quartet is composed of E. A.

Ad Club Quartet of Los Angeles.

Borgum, bass and banjo; Kenneth Wiseman, baritone and ukelele; Henry Hainert, first tenor and mandola, and Paul E. Adams, second tenor, guitar and piano. Mr. Borgum, the promoter of this club, has spent the last sixteen years in the talking machine business along the Pacific Coast. He is a live wire, and through him this organization has become very popular.

The Ad Club Quartet is carrying out a novel idea for advertising southern California, and all in a musical way. Many old song melodies have been set to new words by them and are often either in the form of an invitation to come to southern California or a brief description of the country's charms. Another novel feature of this quartet is their method of helping to teach and circulate their own songs so the public may quickly learn the words and melody, and that is by singing into an Edison phonograph to be recorded on a blank record. The result is that while the quartet itself cannot be in several places at the same time, the record speedily becomes circulated among all sorts of clubs, homes and civic organizations.

Many a man thinks he is full of ideas when he is simply full of talk.

Notes

The more you realize that in the future of this industry, the best results are yet to come, the more freely you must admit that the Columbia is the line best worth the investment of your time, your energy, and your capital (Printing this every little while. Proving it all the time).

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

USES FOR WORN OUT WAX RECORDS.

May Serve to Take the Place of Paraffin for Many Purposes Especially in Electrical Work—May Be Handled as Solder.

That worn out phonograph records of the old style wax cylinder type, though of no value for the purpose of producing music, may still prove useful in another field is to be learned from the following contribution to the Technical World Magazine by a New Yorker with an experimental turn of mind, who says:

"When sealing up some windings, such as magnets, resistance coils, etc., and not having a sufficient quantity of wax or paraffin for the purpose, I made use of a few broken wax phonograph records. I was much surprised at the properties of this wax. In the first place, it was very hard compared with paraffin and had a rather high melting point, so that it would not soften and bend as paraffin, that is, it could not be made as flexible. I used this wax in constructing and repairing electrical instruments by coating the outer windings of the magnets, coils, etc., and then shaving down the wax. This looked exactly like hard rubber and had the advantage of being firmly fastened to the wire. I also used it in repairing broken magnet covers, filling the spots chipped out with the wax, with the result that it would take a close examination to detect the repair. Similarly it was used as insulation in constructing a one-inch coil, and although I could not test its dielectric

properties, I have had no trouble from leakage.

"This wax may be used for innumerable other purposes, as it can be melted and the article soaked in it, but it also can be handled in a more convenient manner, similar to soldering, by melting it with a piece of hot iron and applying it where needed, whereupon it is finished with a file and sandpaper, or turned in a lathe.

"The wax can be obtained from any dealer in phonographs, especially those keeping record exchanges. Be sure to get the wax records, not the indestructible ones made of vulcanized composition, as these will not melt. Various colors may be had, but black resembles hard rubber and gives a better appearance. The final finish may be done by polishing with a little benzine on a rag."

ORDINANCE AGAINST FAKE ADS.

Text in Full of the Ordinance Against Misleading Advertising Recently Passed by the Board of Aldermen of New York City.

Following the receipt of several inquiries from the trade regarding the recent ordinance passed by the aldermen of New York City against fraudulent advertising, we herewith reproduce the text of the ordinance in full.

The ordinance, as passed by the board, is as follows: "Any person, firm, corporation, or association who, with intent to sell or in any wise dispose of merchandise, securities, service, or any thing offered, directly or indirectly, by such person, firm, corporation or association to the public for sale or distribution, or with intent to increase the consumption thereof, or induce the public in any manner to enter into any obligation relating thereto, or to acquire the title thereto, or any interest therein, makes, publishes, disseminates, circulates, or places before the public, or causes directly or indirectly to be made, published, disseminated, circulated, or placed before the public in this city in any newspaper or other publication sold or offered for sale upon any public street, sidewalk, or other public place, or on any sign upon any street, sidewalk or public ground, or in any handbill or advertisement posted upon any street, sidewalk or public ground, or on any placard, advertisement, or handbill exhibited or carried in any street or public ground, or upon any sidewalk, or on any banner or sign flying across the street or from any house an advertisement of any sort regarding merchandise, securities, service, or anything so offered to the public which advertisement contains assertion, representation or statement which is untrue, deceptive or misleading, shall be fined not less than twenty-five (\$25) dollars nor more than two hundred and fifty (\$250) dollars, or by imprisonment not to exceed six months or by both such fine and imprisonment."

MANAGER OF GRAFONOLA SHOP.

August Bowers, formerly manager of the talking machine department of Bloomingdale Bros., Fifty-ninth street and Third avenue, New York, has been appointed manager of the Grafonola Shop, 143 West 125th street, the new Columbia representative, which was formally opened last week.

PROFITABLE AS A SIDE LINE.

Are the Vacuum Cleaners Made by the Regina Co.—Models Appeal to All Classes Owing to Their Variety and Their Prices.

Quite a few talking machine dealers have seized the opportunity to add to their profits by selling vacuum cleaners, which, by the way, are now being recognized as the most efficient way of keeping the home clean. Those who have handled these goods, particularly those who have featured the Regina products, report a profitable business that is constantly growing—a business that bids fair to make a remarkable showing in the course of a year.

Among the styles of vacuum cleaners made by the Regina Co., 47 West Thirty-fourth street (Marbridge building), New York, is electric model "C," which is the result of long and careful experimenting by competent engineers, and is capable of producing a greater vacuum and larger air displacement than can be obtained from any machine of its type. It is mounted on rubber-tired wheels; is powerful enough to remove not only

Electric Regina, Model C.

dust, but germs as well, and costs about one cent per hour to operate.

Then there is the Regina vacuum sweeper, model "J," which is a combined carpet sweeper

Regina Sweeper, Model J.

and vacuum cleaner, very easy to handle. A strong suction is produced by three bellows, while the sweeper is in motion on the floor in either direction. When desired, a hose and tools can be furnished for cleaning upholstered furniture, mattresses, curtains, etc.

All the Regina models constitute a line of vacuum cleaners suitable for all purposes—a line that includes high-grade machines at a price within the reach of those of modest means and of a quality to satisfy those who demand the best.

For Sale

8,000 10-inch single face records—Italian, French, Columbia, Zonophone and Spanish. Brand new clean stock at 8c. each. Fifty disc talking machines, all different makes, in good condition, which came in exchange, must be disposed of at any price. About 800 horns, fit the Columbia or any make, with a screw on the bottom size, 45 centimeter Red and Blue brand new in crates at 15c. each. Address "Records," care Talking Machine World, 373 Fourth avenue, New York.

For Sale

Talking machine business in live growing Southern California city of 15,000; fine country surrounds; practically no competition. Stock and fixtures will invoice about \$3,000. Have Victor, Edison Disc and Cylinder agencies. Don't answer unless you have the money. Address "Chance," care The Talking Machine World, 373 Fourth Ave., New York.

FOR SALE

The only music store in growing city of over 50,000 in Northern Ohio, with long lease; old established business, centrally located; complete but clean stock, including Victor and Columbia agencies; excellent reason for selling; great opportunity for right party. Address Mrs. H. E. P., care The Talking Machine World, 373 Fourth Ave., New York.

VICTOR BOOK ON POPULAR DANCES.

"Three Modern Dances" Contains, Among Other Features, Reproductions from Motion Pictures of Leading Dances as Posed for by Mr. and Mrs. Vernon Castle.

The Victor Talking Machine Co., with its customary aggressiveness and dealer co-operation, sent out to its trade recently a most valuable publication entitled "Three Modern Dances." This book illustrates by the means of moving pictures the one-step, hesitation and tango, the three popular dances of the modern dance series. These moving pictures were all posed by Mr. and Mrs. Vernon Castle, the most successful exponents of the present day dances, who supervise the production of all Victor dance records.

Illustration from Victor Dance Book.

The detailed moving pictures of these three dances are remarkably clear and distinct, giving simple instructions that will help the beginner to learn all the dances when used in conjunction with the rhythm and tempo of Victor dance records. The value to the dealer of this new book is incalculable, as he can undoubtedly use it as a medium for attracting new trade to his establishment, in addition to its use as a means for selling the latest dance records to his present customers.

The fame and prestige of Mr. and Mrs. Vernon Castle give a weight and influence to this Victor publication that will give it a ready entree in the homes of the most enthusiastic lovers of the modern dances, as every dance is shown step by step through its various formations. Five different styles of the one-step, five hesitation waltz steps and six different versions of the popular tango are all illustrated in this dance publication, affording a wide range of steps for all dance lovers.

The supply of these new books is limited, and the company suggests that Victor dealers distribute them discriminately, making the presenta-

tion of each book a personal matter, and asking the customer to visit the store for an individual copy.

The Victor Co. is to be congratulated on the high-class and dignified appearance of its latest aid to Victor dealers, as every page is typical of the high-grade character of all Victor publicity.

"STANDARD RECORD CLEANER"

Recently Placed on the Market by The Standard Gramophone Appliance Co., Is Winning a Large Measure of Favor in the Trade.

The Standard Gramophone Appliance Co., 173 Lafayette street, New York, placed on the market this month a cleaner for disc talking machine records which is officially designated as the "Standard Record Cleaner." Although this new cleaner has been on the market but a very short while, it has already won the general praise of the company's trade because of its numerous merits.

In a letter to the trade announcing the advent of this cleaner the company called attention to the fact that the device is fully protected by United States patent. The letter also remarks as follows: "Kindly pass this cleaner over a record; note how it automatically tends to grip and stay on the record, much as if it ran on rails. This highly desired result is due to the shape of the cleaning surface. Also note that the carpet area is sufficient to cover all lines of the record, first to last, the result being that one or two times around the record cleans it perfectly." The cleaner is made up very attractively and is designed to retail at 50 cents. The company is making an offer to the trade whereby responsible dealers may receive a sample cleaner on receipt of 10 cents.

In introducing this "Standard" record cleaner the Standard Gramophone Appliance Co. is adding to its already comprehensive line a valuable accessory which will doubtless be equally as successful as the well-known "Standard" automatic stop and the "Standard" fiber needle cutter which have achieved country-wide popularity. Both of these products are meeting with a ready sale from coast to coast and their perfected construction and practicability have been responsible for many testimonials that the company and dealers handling the devices have received from time to time.

The success of the company's various products can be attributed in a considerable measure to the careful supervision which is bestowed on every single device that is turned out of the plant, as Thomas W. Kirkman, general manager of the company, is a practical mechanical engineer, who personally directs the manufacturing end of the business.

PHONOGRAPH PROVES A SURPRISE.

Professor Jepson, of New Haven, Supervisor of Music, Enthusiastic Over Reproduction of Edison Disc Phonograph at Chamber of Commerce Luncheon in That City.

Professor B. Jepson, for many years supervisor of music in the public schools of New Haven, Conn. (and now supervisor emeritus), recently attended a luncheon at Hotel Taft, that city, given by the Chamber of Commerce. At the conclusion of the repast an Edison disc phonograph did the entertaining. The professor, who had never heard the Edison disc, thus expresses his surprise and delight:

"I must confess I was never more taken back in my life. A beautiful soprano voice launched into a solo. I was not surprised at that, but very much surprised as I looked around the room in vain for the soloist. I supposed, of course, that I would find the lady in the center of a group of men gathered in the rear of the room. I was greatly astonished to find that the beautiful voice emanated from a phonograph. To sum it all up I must say that Edison's new Diamond Disc is the 'last word' in the rendition of vocal or instrumental music."

Professor Jepson's opinion in musical matters is regarded with the highest respect. For over fifty years he has directed the musical functions and destinies of the New Haven schools, and stands high in the musical world.

How To Make Dollars

Yes, and how to make them grow with a comparatively small outlay of time and money.

That topic ought to interest you, Mr. Talking Machine Dealer!

Just figure how admirably you could work in pianos with your present line.

By pianos we mean those which are called both straight and player-pianos—in fact, every member of the piano family, including grands; but the main thing is to get your instruments right. In other words, at values which insure you liberal profits.

We have helped many a piano merchant to become a successful business man, because we have given him values which were not obtainable elsewhere, and we can help you. We can help you to show profits which will be particularly pleasing.

We would suggest that you do not delay an investigation of this matter, but take it up to-day—right now.

Don't waste your most valuable asset—time—by delaying too long!

H. P. NELSON COMPANY

(Special to The Talking Machine World.)

CHICAGO, ILL., May 9.—What should be a most careful bit of information to the talking machine trade is found in the report issued May 7 by the Department of Agriculture.

Uncle Sam's experts promise that 1914 will produce the largest crop of winter wheat ever grown, even exceeding by one-fifth the record yield of 1913. The wheat belt has been visited by a large amount of rainfall and the soil has been so thoroughly soaked that a yield of 630,000,000 bushels has been promised. We of the Middle West find much that is pleasant in the fact that Kansas will grow 132,000,000 bushels; that Nebraska will grow 63,000,000 bushels, and that Indiana, Illinois, Michigan, Ohio and Missouri have nearly perfect prospects. With this tremendous amount of wheat and the correspondingly good crops in other grains, 1914 should be a record breaking year in the sale of talking machines and records. Let us hope that every farmer in the Mississippi Valley will see fit to invest a little of the money that these crops will bring in a fine talking machine and a good library of records.

Present conditions in the local trade indicate that the major part of the business being done is in records of the popular sort, with an especially heavy call for dance records. A let-up in the dancing craze has been predicted by numerous people for a long time, but the immense sales of dance records have made it clear to the talking machine dealers that there is more strength behind this revival of the love of dancing than anyone thought. There seems to be a decided leaning by talking machine buyers toward machines running about \$100 in price. The more expensive machines also are enjoying a good demand. There is rather a lull in talking machine sales generally as compared with the past few months, though a comparison with April and May of last year shows an improvement.

"Start Them Off Right."

H. H. Schwenker, expert repair man from the Victor Co.'s factories, is on a trip through this territory instructing dealers in the art of repairing machines and keeping them in adjustment. "The problems with which I come in contact," said Mr. Schwenker, "are almost invariably different, but if I were asked what maxim I would suggest to the dealer I would say 'start the machines off right when you sell them,' that is, when

a machine leaves the dealer's hands it should be in perfect condition. In all probability he will have no further trouble. If the machine goes out, however, with some slight trouble, it is probable that the buyer, who knows nothing of machinery, will endeavor to fix it himself and does more harm than good. No matter how carefully packed, a talking machine is liable to suffer some little damage in transit, and the dealer should, upon receipt of machines, clean them, oil them and see that the adjustment is correct. The dealer should also be sure that he himself understands the mechanism of the machines which he sells."

Columbia Retail Growing.

Charles F. Baer, local manager of the Columbia Graphophone Co., reports that a most pleasing feature of the company's local business is that of the retail store on the first floor of the Ward building. This department has shown a steady increase every month since it was started, and the prospects for the continuance of the increase are of the brightest kind. The "De Luxe" style has been practically sold out in both the wholesale and retail departments, and steps are being taken to avoid the inability to deliver these machines. Other styles running around the \$100 mark are also in great demand. Columbia dance records continue to enjoy a tremendous sale and "Puppen" continues to lead in this direction. The complete revised catalog of foreign records has just been received and it is being used to great advantage by dealers all over the country. A big demand is also being met with on the new booklet on dancing entitled "How to Dance the Modern Dances," by G. Hepburn Wilson, who supervises the making of all Columbia dance records. These booklets are being furnished gratis to all Columbia dealers, who are receiving big demands for them. District Manager W. C. Fuhri announces that General Manager Geo. W. Lyle is expected to arrive here from New York about May 15.

John P. Byrne Dead.

John P. Byrne, one of the pioneers of the musical department business and at one time vice-president and treasurer of Lyon & Healy, died yesterday afternoon at his residence following a long illness. Mr. Byrne was sixty years of age and spent the greater part of his life in the music trade. Mr. Byrne is well known to the talking machine trade and the news of his loss will be received with great regret.

Big Call for New Style Victrola.

R. J. Keith, sales manager of the Talking Machine Co., announces that he is receiving a large advance demand on the new style Type F Victrola XI, which will make its appearance in a week or two. This style is about an inch larger all around than the preceding styles and which is made with an interior arrangement of eight shelves, each holding eighteen records and lying flat. This arrangement can be changed to receive records vertically. A number of dealers, Mr. Keith says, have ordered liberally for their fall stocks to insure deliveries when wanted.

Mr. Keith in a recent trip to Indianapolis aided in the installation of a fine up-to-the-minute Victor department in the large department store of the Pettis Dry Goods Co. The booths are remarkably soundproof; are constructed of solid mahogany and fitted up beautifully. Elmer Gay is the manager.

Mr. Keith also aided in the installation of a new Victor store at Kenosha, Wis., for O'Shea & Biddinger.

Dan Creed, credit manager of the Talking Machine Co., is spending two weeks at French Lick Springs recuperating from a long season of hard work.

Personals and Visitors.

Frances E. Clark, head of the educational department of the Victor Talking Machine Co., was in Chicago a few days on her way to Minneapolis, where she will attend a convention at which she will make an address.

William H. Richardson, manager of the Southern California Music Co., of Los Angeles, was a recent visitor to Chicago. Mr. Richardson is an old music trade man and has been connected with this house for a long time. He reports that although business lately on the Coast has not been all that could be desired, nevertheless a decided improvement is beginning to make itself felt. Mr. Richardson will visit the principal cities of the East, stopping at the Victor, Columbia and Edison factories.

N. Wurth, Escanaba, Mich., and W. & J. W. Sproesser, of Watertown, Wis., were visitors to the local trade this week. Mr. Wurth handles the Columbia goods exclusively.

R. W. Smith is a new Illinois traveler for Lyon & Healy, succeeding L. C. Cummings, who is to be married shortly. Mr. Smith has also a number of Iowa river towns.

S. M. Field, formerly floor manager of the Chi-

THE TALKING MACHINE COMPANY
12 North Michigan Avenue : : : : Chicago

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 36).

Chicago Columbia store, was a recent visitor to Chicago. Mr. Field was lately appointed manager of the Grafonola department of the Gus Blass Dry Goods Co. at Little Rock, Ark.

Don C. Preston, traveler for the Talking Machine Co., who was recently married, spent a few days of his honeymoon in Chicago. Mrs. Preston is now accompanying her husband on a trip through the northern part of his territory, which includes Minnesota and Wisconsin.

Mr. Stewart, of the Stewart Bros. Furniture Co., of Columbus, O., was a recent visitor.

Lew Collins, manager of the contract department of the Victor Talking Machine Co., was a visitor for a few days to this section.

B. F. Dvorak is once more with the retail department of Rothschild & Co.

To Make a Fibre Needle, Also.

Louis K. Scotford, president of the Cleartone Talking Machine Co., 32 South Clinton street, announces that his company will not only manufacture the pneumatic turntable disc which it manufactures and which was recently described in *The Review*, but it will also manufacture an improved fibre needle, which has been prepared in such a manner as to greatly increase its durability by making it possible for each needle to be used four or five times without repointing. It is probable that the company will also handle additional talking machine accessories. The factory on South Clinton street is being rapidly put into shape and a large volume of the company's product will be turned out within the next month. The officers of the company are: Louis K. Scotford, president; M. L. Willard, vice-president; Arthur F. Agnew, secretary, and George A. McGriff, treasurer.

George Ade Delivers Speech

W. W. Parsons, manager of the Dictaphone department of the Columbia Co., made arrangements to-day whereby George Ade, the famous humorist and playwright, will deliver a speech to his fraternity brothers assembled in convention at Cleveland next week through the medium of the Dictaphone. After giving his talk into the Dictaphone, the record will be shipped to the committee in charge of the arrangements at Cleveland and the speech will in turn be delivered with the aid of a large horn. It is expected that 300 or 400 members will be in attendance and will have the opportunity of hearing very clearly every word that is spoken by Mr. Ade. Although an uncommon occurrence, this has been done before, and it is related that an octogenarian college professor once delivered a speech in this way to his former pupils, gray haired men themselves, who when they heard the voice of their old mentor remarked with tears in their eyes, "Isn't that just like him?" and "He hasn't changed a bit."

Lyon & Healy Start Children's Hour.

Lyon & Healy have started "The Children's Hour," a period of from 10 to 12 o'clock on Saturday mornings when the little sons and daughters of Lyon & Healy's patrons and the general public are entertained through the medium of the Victrola. The abundance of the Victor records listed under the caption of "Educational Series" gives a wonderful opportunity to instruct as well as to entertain the children and they will also be given an opportunity of hearing the beautiful standard works of musical art in such a way as to aid in the development of their musical sense. Miss Elsie Stein has been placed in charge of this work and explains the records to the children as they are played.

Manager L. C. Wiswell announces that Lyon & Healy business continues to be good and that May shows a decided increase over May of last year. "Machines around \$100 are selling very good," said Mr. Wiswell, "and in the record department those of the dance variety continue to be the big sellers. 'Cecile' leads, I believe, and all of the Castle House Orchestra records are going well."

Shop Presents the Castles.

The Talking Machine Shop scored another big hit when Mr. and Mrs. Vernon Castle were exhibited to a throng of enthusiastic admirers last week. The famous dancer and his very pretty

and equally capable dancing wife were introduced to visitors to the shop just before they took part in a matinee performance at Orchestra Hall. At this performance there was a dancing contest for the Castle cup, the winner of which was engaged by the management of the shop to dance all week. Mr. Castle gave a few instructions for dancing, dwelt on what not to do, and spoke of the excellency of the Victor dance records which he supervises. The winners of the contest were Mr. Youngs and Miss Hill, and they are dancing all this week and continuing to make publicity and friends for the shop and its management.

Klingsor Recital Soon.

The Klingsor Talking Machine Co. will give its introductory recital and demonstration within a week or two, according to a statement made by officers to-day. The line is being photographed and prepared for exploitation by July 1.

Great Singer Some Day.

The little girl born to George W. Davidson, of the Talking Machine Shop, last month is doing nicely, as well as her mother. The young lady gives promise of some day being a great singer, and no doubt her proud father will at some future time sell Red Seal records of her voice.

C. L. BYERS ADDRESSES CHICAGO BOARD OF ADVERTISING.

Retail Sales Manager of Columbia Graphophone Co. Gives Interesting Talk on Salesmanship and Has Something to Say Regarding the Progress of the Talking Machine.

(Special to The Talking Machine World.)

CHICAGO, ILL., May 7.—An interesting little talk was delivered by C. L. Byers, retail sales manager of the Columbia Co.'s store, Chicago, before the Board of Advertising, which consists of almost 200 advertising men and sales managers of Chicago concerns—at one of its recent meetings.

Mr. Byers, in his preliminary remarks, stated that salesmanship was a subject worthy of deep study, scientific investigation and philosophical speculation—that there was no vocation of man so comprehensive in its demand on all of the available elements of the entire being.

He discussed the evolution of the talking machine from the days when it was merely a toy to its present position in the musical world, where it has assumed a position of overwhelming importance, and said: "The talking machine to-day is truly entitled to be classed as a necessity just as much so as your newspaper, your magazine or your telephone. Its double educational and entertaining features make it indispensable in every home. I am sure you will admit that a home without music is a home without soul. Can you conceive of a more versatile, useful or reasonable priced musical instrument to-day than the talking machine?" He emphasized how the one-price system in vogue in the talking machine field was a boon to the merchant, and said: "While it does not eliminate competition between dealers of different lines, it does remove all possibility of the cut-throat competition between dealers of the same line. It also stimulates a splendid co-operative spirit among the dealers, each feeling that the interests of one is the interest of all."

Mr. Byers then proceeded to discuss the principal matter at issue, as follows:

Retail Selling of a Grafonola

To begin with, I will give you some idea of what is necessary in a successful Grafonola salesman.

First. Versatility—There is no business in which you are required to deal with every strata of society more than in the selling of the talking machine. One must have a personality of a chameleon nature. It must be able to harmonize quickly with every type of human character if it would be successful; for in our business you are not dealing with a particular class, but with every class. The rich and the poor, the ignorant and the learned, and the American and the foreigner. This versatility can be cultivated, it is not necessarily innate.

Some people think success in life depends upon circumstances, or upon chances. It is not to be denied that these things have their influence, and yet nine times out of ten, the men who win have cultivated qualities which have brought them their success and those who lose, have simply neglected this cultivation. Ninety-nine out of a hundred, who fail, could have succeeded if they had used their opportunities aright. And so the qualities which blend into versatility can surely be cultivated.

Second. Industry—A polite word for hard work. No profession is more responsive to hard work than salesmanship. And the measure of responsiveness is especially noticeable in the talking machine business.

Work is a word so comprehensive in its meaning

that the most indolent finds shelter in some technical sense of its use. But my conception of work is a real red-blooded, energetic, enthusiastic use of the mind and body to the end that definite results may be accomplished. This is the kind of industry that succeeds in the talking machine business. We have no fixed hours, our time being controlled entirely by the exigencies of the business. In fact, a real wide awake talking machine salesman sacrifices many an evening's pleasure in order that he may make a call and thus close a sale that might otherwise be lost. It is a peculiar fact that when a musical instrument is to be purchased the whole family buys it, and unless you make a call in the evening, when you can concentrate your versatility on the whole family, your chance of closing a deal is often lost. It is usually necessary to convince the parents that the spiritual life of the home cannot be better conserved than by one of these instruments with the beautiful sacred selections; and Amy, a blue-eyed beauty must be convinced that her tango and maxixe can be wonderfully improved with your instruments; and then too, wee Willie, though but a ruffle-haired boy, who usually must be seen and not heard, is a real important member of the board of strategy when a talking machine is to be purchased. He too must know that his cultivated taste for good music can be pampered by one of your instruments and your classic records, such as the Dill Pickle Rag, the International Rag or the Raggedy Rag. Then in order to make your work easier and your heart lighter, your prospective customer invites a number of his neighbors in to help decide the matter. In this manner you are the victim of soirees, and Kaffeeklatsches, whether you choose to be or not. Yet as an industrious patient and long-suffering salesman, you wait the time when with a real vengeance you get the name on the dotted line. Here is a real test for your versatility. This will either make a diplomat or a diplomaniac out of you.

In our business, sales are truly commensurate to the industry of the salesman.

Third. It takes a thorough knowledge of the business. The very first preparation of a salesman in any business is to familiarize himself with that business. Not merely the manufacture and merit of the goods, but every branch of the business, the policy of the firm, the advertising plans, the selling plans and the various methods of promoting and developing the market for the goods. After all the salesman is the firm incarnate in an individual. The better equipped the individual, the better represented is the firm. Though a man be a caddy, he should increase his efficiency by a thorough knowledge of golf. No work you engage in is so unimportant that it is unworthy of your study and investigation. Like the great Epaminondos of old, when elected garbage collector of the city, by his enemies accepted, and said: "If the position reflects no honor on me, I will reflect honor upon it." In our business, knowledge of the business is truly a great factor.

I have found in my experience that a salesman equipped with versatility, industry and a knowledge of his business has the three big elements that make for success.

You can order through your Jobber. He will supply you; if not, send your order to us.

The wonderful success of the Lyon & Healy Fibre Needle Cutter in the last two and a half years is due to the following facts about the cutter:

The Blades of the Lyon & Healy Fibre Needle Cutter are made of the finest grade of properly tempered tool steel. The upper blade is pivoted above and back of the cutting edge of the lower blade. It is held in place by a very high tensioned spring to insure correct leverage and a perfect point at every cutting.

The cutter is fitted with a guide that prevents the cutting away of too much of the needle, and also has a receptacle that receives all the waste. It is very simple and easy to operate, and with ordinary usage should last indefinitely without sharpening.

This cutter is invaluable to all users of the Fibre needle, as a needle may be used twelve to fifteen times where one of the cutters is in use.

Now is the time to get your order in and share in the profits.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 38).

The retailing of the Grafonola is done in two ways. In the store or outside of the store. With a well-organized sales force, as much is sold outside the store as in it.

The inside salesman takes the name and address of each customer to whom he has demonstrated but not sold an instrument, and turns it over to the prospect department. In addition to the name and address, he gives full information concerning the instrument which the prospect seemed most interested in, and above all, gives any information he has acquired concerning the nationality, personality or peculiarity of the prospect.

A card containing all of this data is given to the outside salesman as a lead, and is followed up systematically by the retail sales manager.

The detailed information is valuable assistance to the salesman, as it forearms him with the necessary intelligence of the customer's personality. The securing of this information concerning the customers, who seem only slightly interested is very important, since I have found very often that the tiniest nibble often proves the biggest fish.

In passing, I might say also, that the distribution of the prospects is the opportunity for the retail salesmanager to use his ability. If he is alive to every situation he has studied the respective abilities of his outside men, and is guided largely by this in the distribution.

Salary and commission is our plan of compensation. The salary to maintain a mutual and reciprocal sense of obligation as to hours, system, co-operation and duty. The commission to render the compensation fair and just and in exact accordance with the work and results of the salesman. I am heartily in favor of commission to sales people. I contend that on an exclusive salary basis one of two things exist. The salesman is either getting more than he is worth, or he is getting less than he is worth. Commission establishes an equilibrium in the compensation. It is especially successful in our line, since a good proportion of our sales are closed at night, and unless the compensation for each sale is worth while, the salesman, for lack of an incentive, will neglect the night calls and thus curtail the sales of the firm as well as his own.

The store and its arrangement is a great subject in itself, and one that cannot get too much consideration. Time will not permit me to dwell on this, but suffice it to say that the store must be nicely furnished and kept immaculately clean, especially where it is catering to the best people. The goods must be arranged with the element of human appeal in mind. Remember always the merchandise is primarily to sell, and secondarily to exhibit, and that the latter is merely the means to the end.

The window display surely comes very close to the advertising man. This is the place to work in the individuality of your sales manager. Here is where originality should play a prominent role. I make it a rule at our store to change the windows

completely once a week. All signs are made and outlined to harmonize with the display or season. The window to-day is considered the reflector of the store. It bespeaks the quality of your goods. It should be a forceful invitation to the passer-by to come in. There is a growing appreciation of the window as a very important part of a store's advertising, and a big asset to the business.

To close I want to call your attention to an element that has done more than anything else to make our sales continually increase: that is enthusiasm. It means to do what you do with all your might, it means to be "red-hot," in earnest, or enthusiastic in what you do. When a man is talking an article of merit, and he has no business talking any other kind, enthusiasm is necessary. One can feign enthusiasm, but it is not genuine. Enthusiasm that is not felt is false fire, but when it comes from the heart it accomplishes great things.

In the fields of salesmanship and advertising we have need of an all-consuming, fiery spirit of enthusiasm, and I am sure that the advertising men and the salesmen of this twentieth century, prompted by such a spirit, will blaze a path through the industrial world, solving all commercial problems, developing the best and crushing the worst in all business enterprises, and above all, rendering man a ruler over his commercial destinies, rather than a victim.

WILL SELL TALKING MACHINES.

(Special to The Talking Machine World.)

CHICAGO, ILL., May 11.—The management of the new \$8,000,000 mail order house of Lundin & Co. informs us that they will have a complete department of talking machines, pianos and accessories. The management referred inquiries as to the details to R. B. Handley, the new buyer for this department, but he was absent from the store for the day.

The new mail order house of Lundin & Co. is a combination of several concerns, of which the only ones at present made public are Lundin & Co., at present in the mail order business at 117 North Elizabeth street, and James A. Pugh and the Pugh Terminal Warehouse Co. at 365 East Illinois street. The new concern has been incorporated under the laws of Maine for \$8,000,000, and Mr. Lundin was very positive in his statement that all of the stock had been sold for par and that it was nearly all sold. The officers of the new incorporation are Frederick A. Lundin, president, and James A. Pugh, treasurer. The present offices are at 117 North Elizabeth street and the permanent address will be at 365 East Illinois street.

COURT DEBATES AT HOME.

Paris Palace of Justice to Have Phonographic Arrangement.

A novelty in the new buildings of the Palace of Justice, in Paris, France, is a "themisophone,"

which will be offered to all telephone subscribers for a small fee, so that they can hear all the debates in their homes.

Plates have been installed before the bar of the tribunal, in order, according to French journals, that the judges, knowing themselves heard by such a large audience, 'will be more strictly inclined to justice and intelligence.'

NEW STYLES IN SALTER CABINETS.

Latest Styles 60 and 80 Designed for Use with Edison Phonographs of Corresponding Numbers—Harmonize Perfectly with Finishes of Machines—Some of the Structural Details.

(Special to The Talking Machine World.)

CHICAGO, ILL., May 9.—The accompanying photograph shows the No. 60 Salter cabinet, which has been designed by the Salter Manufacturing Co. to be used with the No. 60 Edison disc machine.

Like the No. 80 Salter cabinet, which is advertised on another page of this issue, the No. 60

Salter Cabinet Style 60, Open.

harmonizes in every way with the machine it is designed to be used in conjunction with. The cabinet is finished in a fine grade of fumed oak, is mission in design and no doubt will enjoy the same popularity that all of the other cabinets designed by the Salter Manufacturing Co. for use with cabinetless machines have met with.

The No. 60 and the No. 80 cabinets are both fitted with the felt-lined compartments that have distinguished the Salter product. They also both possess a simple and accurate index that enables the owner to find the desired selection instantly.

Increase Your Record Business by Using This New Cover FOR MAIL-ING OUT Victrola Record Supplements

GETTING THE ORDER—The records desired can be marked on the return postal while the recipient is perusing the supplement. No inconvenience—no chance to forget. This means increased business for you.

ATTRACTIVENESS—Illustrations that create attention and tell their story vividly and convincingly at a glance. Color changed monthly to harmonize with the color scheme of the supplement.

DISTINCTIVENESS—A service that is open to but one Victrola dealer in a city.

INDIVIDUALITY—Your name and address printed on the cover. The cover appears to be of your own construction.

RESULT PRODUCING COPY—Appropriate for different occasions.

LINKING YOUR NAME WITH YOUR PRODUCT—Your message is placed before the recipient on every reference to the supplement. It creates an inseparable association between Victrolas and your store. One recalls the other.

PRACTICABILITY—These covers reach you monthly, prior to the arrival of your supplements. You have time to address them before supplements arrive. Merely draw the edge of the supplement over a moist sponge, insert the supplement and fold.

PLANNING FOR SUMMER TRADE IN MILWAUKEE.

Talking Machine Men Expect Big Business from Vacationists—New Records Very Popular—Tisch-Hine Co. in New Quarters—Edison Recital Proves Big Attraction—What the Various Houses Are Doing to Capture Business—Edmund Gram Dansant.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., May 11.—The retail talking machine business in Milwaukee is beginning to ease up somewhat, but dealers are confident that they will meet with a fair trade before the usual summer dullness settles down. One of the most hopeful signs of the situation is the fact that the annual summer resort trade will soon make its appearance. Wisconsin and Michigan are dotted with lakes of all sizes and descriptions, making an ideal summer resort territory. Not only Wisconsin and Michigan people, but people from many of the surrounding States have their summer homes in this district. It is only natural that these people want talking machines in their summer homes and camps, so an excellent field is opened up for the Wisconsin talking machine dealer. The Wisconsin dealer found several seasons ago that summer resorters were good customers for the purchase of smaller styles of machines to be taken to their summer homes. The owner of a large machine does not want to ship this away from his city home, but he is willing to take along a small machine, so that he can play his records and have his usual entertainment.

Dealers and wholesalers report that there is a considerable relief from the shortage of machines and records which has been experienced in Milwaukee during the past few months. Trade is not quite so brisk and dealers have been able to get their stocks up in fairly good shape once more. Jobbers still have some trouble in getting enough of the most popular styles of machines to meet the demands of their dealers, but this situation is not general with every style of machine as was the case a couple of months ago.

Business Outlook Is Excellent.

The general outlook is fairly good and dealers

and jobbers are inclined to be optimistic. Of course, the industrial situation is not quite as brisk as it might be, although it is improved over a month ago. The recently issued report of the Wisconsin Industrial Commission on the free employment bureaus about the state shows that there are few men out of employment. All the big heavy machinery plants in Milwaukee are in operation, although not all are working full time. The crop outlook all over Wisconsin is exceptionally good and reports from adjoining States in the Northwest are just as favorable. Farmers have completed their early spring seeding, and grain is up in most sections of the State. The soil has been in the best of condition all the spring, and, unless something unforeseen happens, a bumper grain crop ought to be harvested. Farmers are now preparing for their corn crop. When crops in this section of the Northwest are satisfactory, it always means that general business is pretty liable to be good.

The New Records Popular.

The new May records put out by the different companies have been selling especially well. Of course, all the dance records, particularly those of the tango type, are decidedly popular, and dealers are put to it to secure enough records in this line to meet the demands of the trade. The booklet just issued by the Victor Talking Machine Co., giving instructions in the new and popular dances, has been in big demand in Milwaukee, and dealers say that it has been a great business getter. Much favorable comment is heard on the excellent manner in which the book has been prepared, showing various poses of Mr. and Mrs. Vernon Castle and moving pictures of the various dance steps.

May Take on Talking Machines.

Frederick D. D. Holmes, manager of the Milwaukee branch store of the F. G. Smith Piano

Co., may take on the agency for a well-known line of talking machines if the necessary quarters can be arranged in the company's store at 90 Wisconsin street.

Move Into New Quarters.

The Tisch-Hine Co., handling the Edison dictating machine in Milwaukee, Wisconsin and upper Michigan, has moved into new and larger quarters at 450 Jackson street. The company has been meeting with such a brisk business in the dictating machines that it was absolutely necessary to secure larger and more quarters.

Crowds Enjoy Edison Recital.

The interesting Edison recital, given recently in the red room of the Hotel Pfister by William Idle, special representative of the Thomas A. Edison, Inc., was a decided success and brought out large numbers of people who were anxious to hear the new Edison disc machines. Mr. Idle, who has been in Milwaukee for several weeks, assisting the Phonograph Co., of Milwaukee, in securing new dealers and otherwise getting the public thoroughly acquainted with the Edison goods, had issued invitations to hundreds of Milwaukeeans. It is said that sales of the Edison disc machines at the handsome new Edison Shop, operated by the Phonograph Co., of Milwaukee, and at all the other Edison agencies, have shown a steady increase since the recital at the Hotel Pfister.

New Edison Agents.

Among the many concerns about Wisconsin, which have taken up the agency for the Edison goods of late, is the Heppes Cash Store at Hartford, Wis. The firm has arranged attractive new parlors on the second floor of its store and has been holding a series of public recitals to acquaint the public with the new Edison disc machines. The Phonograph Co., of Milwaukee, now has several hundred Edison dealers in Wisconsin alone.

Mrs. Frances E. Clark a Visitor.

Mrs. Frances E. Clark, formerly supervisor of music in the Milwaukee public schools and now head of the educational department of the Victor Talking Machine Co., is in Milwaukee at the

(Continued from page 41.)

present writing as the guest of Miss Margaret L. Canty, supervisor of primary work in the local public schools. Mrs. Clark stopped over in Milwaukee on her return from the music supervisors' national conference in Minneapolis. Mrs. Clark, while connected with the Milwaukee schools, was the first to introduce the talking machine as an agency in the teaching of music, and her phenomenal success here attracted the attention of educators all over the country.

Closed Many Victrola Sales.

Paul A. Seeger, manager of the Victor department at the Edmund Gram Piano House, has been especially fortunate of late in securing a large number of high-grade Victrola sales. The talking machine business at the Gram house is double that experienced a year ago.

Gimbel Bros. Concentration.

The recent action of Gimbel Bros., in combining their piano and Victor departments in connection with the Victor quarters on the second floor, seems to have been a most satisfactory arrangement, as L. C. Parker, manager of both departments, reports that business in both lines has shown steady increase of late. The Victor business at the Gimbel store during April attained a new high mark.

To Enlarge Quarters.

C. W. Abbott, manager of the Victor department at the Boston store, has completed plans for enlarging the present Victor quarters at the store. Handsome new booths will be installed and double the space will be available. It is expected that the work will be done before next fall. A brisk business is reported by Mr. Abbott.

Record Shortage Still Noticeable.

Harry T. Fitzpatrick, manager of the Wisconsin Talking Machine Co., jobber for the Victor line, says that several new Victor dealers have been secured in Milwaukee and about the State during the past month. Mr. Fitzpatrick reports that his company is now able to meet the demands

of dealers for Victor machines, but that a record shortage is experienced at times. Miss Gertrude F. Gannon, head of the Wisconsin Talking Machine Co., has returned from a visit to her former home at Dixon, Ill.

Battin Managing Schuster Department.

A. H. Battin has assumed the management of the Victor department of the Edward Schuster & Co.'s department store at Twelfth and Vliet streets. Plans are under way for arranging new and larger quarters for the Victor department at the Schuster store on Third and Garfield streets. Miss Elizabeth Hughes is in direct charge of this department. Miss Hughes has been meeting with a fine business of late.

Window Displays Interest.

J. H. Becker, Jr., manager of the Victor department of the Hoeffler Manufacturing Co., 306 West Water street, has been arranging some unusually interesting window displays since he assumed charge of his former position at the Hoeffler store. Mr. Becker has been engaged in the talking machine business in Milwaukee for the past ten years and the many friends whom he has made have followed him to the Hoeffler store, so the business of the talking machine department of that store has shown a decided increase of late.

Prominent Dancers Interest.

Mr. and Mrs. Vernon Castle, the well-known society dancers of New York, were scheduled to appear at the Pabst Theater in Milwaukee on May 11, and every Victor house in the city has made the most of the advertising opportunities which the event has afforded. The Castles' testimonial regarding the Victor line has been featured in the local papers, while dealers all over the city have begun sending to their customers the little booklet, issued by the Victor Talking Machine Co., called "Three Modern Dances," illustrated by moving pictures, with complete instructions and full size photographs of Mr. and

Mrs. Castle. The sales of dance records have, naturally, increased at a remarkable rate as a result of the visit of the Castles.

Kunde Featuring Columbia Line.

A. G. Kunde, Columbia jobber and retailer, has moved from his former location at 516 Grand avenue to temporary quarters at 915 Grand avenue, where a very attractive and high-class store has been opened to the public. Three new booths have been erected and new fixtures have been installed throughout. The Miller Brewing Co. is preparing to erect a large store and office building on the site of the store formerly occupied by Mr. Kunde and, when it is completed, probably about October 1, Mr. Kunde will open a large and handsome store in the new structure. Mr. Kunde says that the new store will be one of the finest in Milwaukee, and one that will do justice to the Columbia line.

Report Big Business.

Officials of the Gensch-Smith Co., featuring the Victor line at 730 Grand avenue, say that if business in both the talking machine and piano line continues to improve as it did in April, it will be necessary to seek larger quarters. The sales force covering Milwaukee has been increased several times of late.

Fashionable Dansant Attracts.

Something new for Milwaukee piano houses was inaugurated by the Edmund Gram Piano House on May 8, when it featured a "dansant" in its Steinway parlors. Miss Frances Pritchard and Chester Hemmer, both of New York, demonstrated the new dances and showed what perfect music is furnished by the Victrola and the Pianola. Two programs were rendered, one at 4 o'clock in the afternoon and one at 8.30 in the evening. Tea was served in the afternoon and refreshments in the evening. Large crowds of people attended, and the affair proved to be a great advertising scheme for the Victrola and the dancing records. Paul A. Seeger, manager of the Victrola department at the Gram store, operated the Victrola XVI., which was used.

No One Can Tell THAT THE MACHINE AND CABINET Are Not Built As One

This pleases customers and helps sales. Other features of all **SALTER** Cabinets are powerful influences for sales. The separate, felt-lined compartments assure a customer. He can see that Records will not scratch or warp, but remain as good as new.

ENTERS TERPSICHOREAN FIELD.

R. M. Hunting Resigns from New York Talking Machine Co. to Exploit Modern Dances.

R. M. (Bob) Hunting, Jr., one of the popular members of the road sales staff of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, resigned from this position last week in order to devote all his time to the exploitation of the modern dances. Mr. Hunting ranks with the most successful professional dancers now before the public, being exceptionally gifted in this direction.

At the present time Mr. Hunting is confining his dancing primarily to the presentation of the modern dances in conjunction with Victor products. Mr. Hunting is calling on many of the leading Victor dealers and arranging to demonstrate at their warerooms the adaptability of Victor dance records to the artistic interpretation of the modern dances. His many years of experience in the Victor selling field, coupled with his remarkable dancing talent, have enabled Mr. Hunting to offer real co-operative service that has resulted in the

dealers' closing numerous sales of machines and dance records.

MORTIMER D. EASTON MARRIED.

Mortimer D. Easton, son of President Easton, of the Columbia Graphophone Co. and advertising manager of the Dictaphone, was married last Saturday to Miss Marie Rankin, of Goshen, N. Y. The wedding, which was held at the home of the bride, was a very simple one, only the near relatives of the bride and groom attending.

Mr. and Mrs. Easton sailed Tuesday for a six weeks' trip abroad and according to their present plans will visit England, France, Switzerland and Italy, returning to America by way of the Riviera. While abroad Mr. Easton will pay a visit to the London office of the Columbia Co.

NEW J. N. ADAM VICTOR MANAGER.

Westley R. Clifford, formerly connected with the Victrola department of the Forbes & Wallace store at Springfield, Mass., has been appointed manager of the Victrola department of J. N. Adam & Co.,

Buffalo, N. Y., one of the stores controlled by the Musical Instrument Sales Co., New York. E. P. Cornell, Victrola purchasing agent of the M. I. S. Co., visited Buffalo this week to attend Mr. Clifford's installation as manager.

CHANGE MADE IN WAREROOMS.

Talking Machine Department of Pease Piano Co., Brooklyn, Moved to First Floor.

The talking machine department of the Pease Piano Co.'s branch at 34 Flatbush avenue, Brooklyn, handling both Victor and Columbia products, has been moved from the basement to the first floor of the store, with the convenience of customers as the main object. Three attractive sound-proof rooms have been fitted up in the rear of the main warerooms for the display of talking machines and the demonstration of records.

DANCING HELPS BUSINESS.

Up-State Merchant Says Demand for Music Records Is Active.

"Business up the State is dull," said a merchant from a northern town yesterday. "There is only one line of my trade that is active, and that is growing so fast I can hardly keep up with it. It is due to the craze for dancing.

"I put in a talking machine department some time ago, and business in it has been pretty regular until people began to dance. Lately I have had to increase my force in that department, and it is doing a big trade. The biggest demand is for dancing records. I cannot get them in sufficient quantities to supply the demand."—New York Times.

TRUTH WELL STATED.

"When a manufacturer puts his business name and the retail price on his merchandise, he has practically signed a contract with the public to deliver goods worth that price. His success depends upon public approval of the quality at the price."—American Fair Trade League.

Edison DISC Phonograph Dealers

THE "Perfection" Attachment is built to play lateral cut records on the Edison Disc Phonograph. The ball-bearing hanger joint gives it a free and flexible motion when traveling across the record; also it can be used with or without the feed rake. If you haven't seen or had this attachment, send us an order. You will surely buy more, as it is one of the best accessories ever placed on the market in the history of the phonograph business. It will surely increase your machine sales, as it gives perfect satisfaction to the retail purchaser. Reproducer and Attachment, \$5.50, for all three finishes—gold, oxidized bronze and nickel.

NEW ENGLAND TALKING MACHINE CO. 132 Boylston Street BOSTON, MASS.

Pavlowa, the incomparable, rehearses to the music of Columbia instruments and Columbia dance records. Do you grasp the significance of such an endorsement as an advertising possibility in your locality?

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

TALKING MACHINE TRADE BOOMING IN ST. LOUIS.

Jobbers Report Excellent Volume of Orders from Out-of-Town Dealers—Aeolian Co., Department Getting Settled in New Quarters—Columbia Co. Store to Be Remodeled—Many New Additions to List of Edison Disc Dealers—Recent Visitors to the City.

(Special to The Talking Machine World.)

St. Louis, Mo., May 9.—The talking machine business in this vicinity is keeping up the merry clip that it has set for this year. There may be a slight lull in the retail business, but what has occurred there is more than offset by the pace set by the jobbing business. The jobbers, without exception are declaring that out-of-town trade has been excellent and gives every indication of continuing so. The orders, too, are very satisfactory in that they are for fairly high-priced machines. The day of shipping any old thing to the country evidently has passed. The same is true of records. The jobbing business on records has been along the same numbers as that demanded by the town trade. The dance continues to be the thing.

Harry Levy, manager of the Aeolian Co. talking machine department, reports excellent jobbing business while he is getting settled in his new quar-

ters at the Furniture Exchange Building at Fourteenth and Locust streets. Already, he says, it has been demonstrated that business can be handled with more facility in the new quarters, where his force has sufficient space to handle several orders at once, than in the old cramped quarters. He also is learning how much time it takes to build the necessary furniture for a healthy jobbing talking machine business. At the old plant they built here and there as the furniture was required, and when it came to moving this plant and building what was needed in addition, he finds that it is more of a job than he anticipated and, instead of being ready for business in the best form by the 1st of May, he is counting on getting to regular pace in dispatching orders by May 15.

Stocks are in better shape, Mr. Levy reports, and despite handicaps, he has been handling the business in excellent form.

"The record business has been the retail feature," Mr. Levy said. "While the grand opera season made a demand for records of that class, it cannot be denied that the dance is the thing and that most people would rather remain at home or go to a neighbor's and dance to a talking machine than go to hear any of the real opera stars. The free book showing how to execute three of the new dances is going to be an excellent business promoter."

At the Columbia Co.'s warerooms General Manager Duffy and Retail Manager Duffy each have one principal object in their present work. Mr. Reid is looking forward to the remodeling of the store, and he hopes to see this work begin any day now. The start has been delayed because of the weather, which has been decidedly uncertain, and as the contemplated changes include the practical taking off of the building, none there is anxious that it shall begin until they are at least assured of tarpaulin weather until the changes can be made. The company will stay in the quarters while the changes are being made and expects some inconvenience while the work is under way, but it expects to more than make up for lost time when the new store is attractive to visitors.

Mr. Duffy's principal object of attack is that purely summer form of trade that comes from summer clubs, outing organizations and the like, and he has a nice line of this business lined up, some of them for rather high-priced machines, and he has delivered a number of the smaller machines for the outing clubs that do not have quarters sufficient to justify the investment in a high-class machine. The Columbia sales force believes that the dance fad of this year will bring increased trade along this line.

The Columbia made considerable effort to realize on the grand opera records after the brief season of that music, and is convinced that it captured its share of the trade that resulted.

Mark Silverstone, of the Edison Shop, says that he has at last found an insurmountable difficulty to

selling an Edison disc machine. He did not think there was such a thing until a few days ago, when he voluntarily took back a machine that had been placed in the home and the sale signed, sealed and delivered in the most proper form. The obstacle to the deal came from a most unexpected quarter. It was a note from the agent of the apartment house in which the purchaser lived to the owner, notifying him that phonographs were not permitted in the building and that he had waived the privilege of such music when he had signed the lease for the apartments. The letter continued:

"The other tenants are complaining about your machine, not so much because of objections to a phonograph, but rather in the spirit that if you are permitted to have a phonograph they should be permitted to have one too."

The purchaser of the Edison disc was probably the most disappointed person concerned in the deal. He had had the machine in his apartment long enough to get very much attached to it, and it was with regret that he returned it.

Miss M. L. Sutter, secretary of the Silverstone Music Co., has given notice of her intended retirement in the near future, as she will be married to W. W. Ohlweiler the latter part of June.

M. L. Reynolds, the Silverstone traveler, is in Arkansas and southern Missouri this month, and is reporting some excellent business and new disc dealers.

The Silverstone Music Co. list of Edison disc jobbers has reached the century mark, twelve of whom are in the city. The 100th firm put on the list was the Hollenberg Music Co., of Little Rock, Ark. Some other new dealers are: A. B. Carne, Pierce City, Mo.; Benedict-Boyce Music Co., Galesburg, Ill.; McQueen Bros., Carrollton, Mo.; C. W. Hess, Butler, Mo.; Bush & Carne, Dyersburg, Tenn.; T. J. Evans, Pittsburg, Kan.; W. H. Moreland, Jr., Metropolis, Ill.; N. T. Holbrook, Carthage, Mo.; H. L. Hoover, Springfield, Mo.; J. W. Guisinger, Fayetteville, Ark.

E. E. Paddon has been added to the office force of the Silverstone Music Co.

Some recent visitors from near-by territory were: J. J. Dowdy, of Dexter, Mo.; F. J. Haley, Jr., Louisiana, Mo.; Miss Benedict, of the Benedict-Boyce Music Co., Galesburg, Ill., and John Prader, of Paris, Mo.

A COMPREHENSIVE TRADE LINE.

Attractive Specialties Carried by the S. B. Davega Co. Which Will Interest Dealers.

The S. B. Davega Co., 831 Broadway, New York, is a business enterprise conducted in an up-to-date manner in every respect. Aside from being large jobbers of talking machines, this company jobs a line of specialties which have been found by many to go perfectly with the talking machine line. Included in this are Ingersoll watches, sporting goods of various kinds, Gillette razors, Thermos bottles, roller skates, etc. During the dull season the talking machine dealers have found that these accessories blend closely with the talking machine business, making it possible to create a patronage for the various lines which help to meet overhead expenses.

FINE QUARTERS IN PITTSBURGH.

Work of Remodeling Store of Columbia Co., Burned Out Some Time Ago, Progressing Rapidly—Kaufmann Bros. Elaborate Department Now Completed—Talker Department for Sterling Piano Co.—Other News.

(Special to The Talking Machine World.)

PITTSBURGH, PA., May 8.—Work on the local Columbia branch, which burned out the first of the year, is progressing rapidly and Manager S. H. Nichols says it will be ready for occupancy by about May 15. When completed, the store will be one of the finest and most up to date in this section of the country. The demonstrating rooms, which have been increased to nine, are finished in mahogany and will be made practically sound-proof. The entire inner part of the building has been rebuilt and the mezzanine floor, which will be occupied by the offices and bookkeeping department, has been greatly enlarged. The company has had temporary offices in the Bessemer building and also opened a temporary store in the Fulton building, as soon as a new stock could be se-

cured after the fire. In spite of the great handicap under which business has been carried on, Manager Nichols reports that the trade for April was much larger than that of the same month last year.

The Kaufmann Bro.'s Victrola department, which started out last January under many disadvantages of lack of equipment, has been brought, within the past few weeks, to a point that closely approaches perfection, through the untiring efforts of the manager, H. N. Rudderow. The department is on the eleventh floor of the splendid new Kaufmann building. It contains eight demonstrating rooms, measuring ten by ten feet, and made of double French plate glass. These booths were planned by Mr. Rudderow in conjunction with the architect, and alone cost \$17,000 to erect. Another feature is the record shelves, also designed by Mr. Rudderow, to accommodate the two complete stocks of records which are kept on hand. Taken as a whole, the department is of the most complete and carefully appointed to be found anywhere. Just off of the Victrola and piano departments there is under construction a

large concert hall, which promises to be unique in every way. In size and from the viewpoint of architecture and decoration it will rival many of the local theaters. The lower floor will seat close to 1,000, and the balcony, which surrounds three sides of the auditorium, will accommodate four or five hundred more. Victrola concerts will be held here at regular intervals, Saturday being set aside for entertaining juvenile audiences. Manager Rudderow, who was formerly with E. F. Droop & Sons Co., Washington, D. C., feels justly proud of what has been accomplished thus far in the Kaufmann Bros. new department, and he declares that the outlook is exceedingly bright.

An indication of the tremendous demand for Victor talking machines in this territory is apparent on a visit to the busy quarters of the Standard Talking Machine Co., of which J. C. Roush is manager. The output of Victors is breaking all records, and the indications now point to a year that will mark a new precedent.

The Sterling Piano Co. is contemplating the installation of a talking machine line, but plans have not yet fully matured, nor has any particular line been decided upon.

The S. Hamilton Co.'s talking machine department reports a splendid business for its first month at 815-817 Liberty avenue. The S. Hamilton Co. has been featuring the "V. E. C. Triplets."

The Boggs & Buhl talking machine department, recently removed from the second floor to its splendid up-to-date quarters on the fourth floor with the new piano department, has had a very encouraging amount of business. A large addition has been made to the stock of records, and preparations are being made to handle a rapidly growing trade.

The McCreery & Co. Victrola department, under the new management of Chas. S. Hotaling, reports an exceptionally good business for the past month, and a promising outlook for the future. Although the department is not as large as some in the city, there are few anywhere that can compare with it in point of furnishing and equipment. There are five elegantly furnished demonstrating rooms and one large parlor for displaying instruments. All are lit by the indirect system, which brings out the beauty of the instruments, furniture and draperies to the fullest extent. The highest class of trade is catered to exclusively, and no expense has been spared in making this one of the finest sections in the McCreery store. The department was installed a year and a half ago by the Musical Instrument Sales Co., of New York, making this another link in their long chain of Victrola and piano departments in many large cities all over the country. Mr. Hotaling, who has been with the company ever since its coming into existence, was recently sent to put the Pittsburgh department on a higher basis. With the hearty co-operation of McCreery & Co. his success here has exceeded even the highest expectations.

A. N. THOMAS TO GO TO MANILA.

A. N. Thomas, connected with the Columbia Graphophone Co.'s retail department for a number of years, will sail next week for Manila to become manager of the talking machine department of I. Beck, Inc., a large and progressive store in that enterprising city.

PATHE FRERES CO.'S NEW QUARTERS.

The Pathe Freres Phonograph Co. has leased the entire second floor of the building just erected at 29-33 West Thirty-eighth street, New York. The company will announce its plans for the usage of this 5,000 square feet of floor space in the very near future.

LYNCH APPOINTED MANAGER.

W. Lynch, formerly connected with Landay Bros. and Sol Bloom, well-known local Victor representatives, was this week appointed manager of the Victrola department of the O'Neill-Adams Co., New York. John L. Post, manager of this store's piano department, had also been acting as manager of the Victrola department prior to Mr. Lynch's appointment.

41 Union Sq., New York**TO OUR CUSTOMERS:**

We are informed that a certain company is advising the trade that it has brought suit against us on certain of its patents.

We wish to notify our customers that this suit will be vigorously defended by us, and we have the utmost confidence in the outcome of the litigation. We are advised by our patent counsel,

Mr. Waldo G. Morse and
Mr. John L. Lotsch, of 10 Wall Street,
New York, N. Y.,

that we do not infringe any valid and existing patents owned by *any* company, and that we stand ready to defend our customers against all litigation. If you are served with any papers, communicate with us immediately.

TRITON PHONOGRAPH CO., Inc.

By JOEL A. KRAUS, As President.

TO THE TRADE:

If you are sued it will be to your interest to communicate with our patent counsel or us immediately.

ACTIVITY IN INDIANAPOLIS.

The Leading Talking Machine Establishments Handling the Various Lines Are Doing a Very Satisfactory Business—Stewart Talking Machine Co. Removes Its Wholesale Rooms—News of Month Worth Recording.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., May 4.—Although there has been a great deal of unrest in connection with the county and township primaries which will be held Tuesday, May 5, the talking machine business has not been affected. All dealers report good business conditions.

The Columbia Graphophone Co.'s store at 27 North Pennsylvania street, reports a large sale of the records made by Margaret Woodrow Wilson. An attractive window display was put on by the Columbia Co., showing a photograph of Miss Wilson and a small American Flag which was kept flapping by a hidden electric fan.

The Stewart Talking Machine Co. is enjoying a good business, and W. S. Barringer, manager, and his help is somewhat more cheerful as the result of the Victor factory sending some goods out this way. The Stewart company has the faculty of getting the orders. Its only difficulty has been to get the goods to fill the orders.

The Stewart Talking Machine Co. has moved its wholesale warerooms from North Alabama and Court streets to the Wulsin building, a new industrial block, in East Ohio street, just east of North Delaware street. The new wholesale department of the Stewart Talking Machine Co. is very attractive and much more roomy. The additional business which is being handled by the company made necessary the move into larger quarters.

The Kipp-Link Co., distributor of the Edison machine, is enjoying a decided increase in the sale of the new Edison disc machines. Announcement of several downtown depots where the Edison disc machine may be obtained is expected from the Kipp-Link Co. in a few days. It is known that contracts for several places have been made between downtown stores and the Kipp-Link Co.

OPERATIC RECITALS IN DALLAS.

The Dallas Talking Machine Co., of Dallas, Tex., has been featuring extensively during the past few weeks a series of operatic lectures by Prof. Hans Kreissig, a well-known musical authority. The operas presented by Prof. Kreissig included "Tosca," "Rigoletto," "La Boheme" and "Aida." Victor records were used to illustrate each opera, and the series of lectures attracted crowded houses.

VICTROLA FOR IMPERSONATOR.

Miss Ruth Graham Purchases Instrument from Neal, Clark & Neal Co. After Many Tests.

(Special to The Talking Machine World.)

BUFFALO, N. Y., April 30.—Miss Ruth Graham, an impersonator, who has made the Littlest House at Williamsville, N. Y., her permanent home, has purchased a Victrola from the Neal, Clark & Neal Co., Main street, this city. Miss Graham is a New York artist, playing chiefly for New York's four hundred. When Miss Graham bought the Victrola she told W. J. Bruehl, manager of Neal, Clark & Neal's, that she decided to take the Victrola because of its fine tone and the remarkable range of music at her disposal.

INTRODUCES THE TRITON MOTOR.

Quite a large demand is being created for motors for talking machines, and, it is said, that this field of endeavor is proving very prolific to the companies having the proper line of merchandise. The Triton Phonograph Co., 41 Union Square, New York, in addition to selling the Triton Phonograph, which retails for \$10, is offering a line of talking machine accessories among which is the Triton motor.

This is illustrated elsewhere in this issue, the main feature of the Triton motor, being its simplicity. "There is not a surplus piece of metal about the Triton motor," added Mr. Kraus, manager, "and every part has its definite function to perform. This makes the cost exceedingly low. All parts of it are made at our factory at Berlin, Germany, and we guarantee it to be solid and durable. It is noiseless and may be wound while the instrument is playing."

BREAKING ALL RECORDS.

"Up to the present time we have closed the best year in our history," said G. T. Williams, manager of the New York Talking Machine Co., 81 Chambers street, New York, the prominent Victor distributor. "Month for month we have shown a splendid gain over the preceding months of 1913, and our business up to the 20th of April exceeded that of the entire month of April of last year, which was, by the way, the best April in our history."

When you look about in a moving picture show in the afternoon and wonder how in the world so many men fool away time in that fashion, you can be sure that's just the thought that occurs to the other men!

FIVE NEW ARTISTS IN LINE.

Mme. Kitty Berger, of Harp-Zither Fame, and Elias Breeskin, Violinist, and Three Vocalists Make Records for Thos. A. Edison, Inc.

Five artists are being featured by Thos. A. Edison, Inc., in its July list of records, all of whom make contributions of merit; two, in par-

Eugene Emmett.

Homer Rodeheaver.

ticular, have won a national reputation which will insure their records being received with consideration and approval.

Elias Breeskin, who got his early instruction in the Imperial Conservatory of Ekaterinoslav, Russia,

Irving Kaufman.

Elias Breeskin.

and who was a student of Franz Kneisel after his arrival in this country, is represented by two numbers for the violin—Schumann's "Traumerei" and "Romance." This young Russian produces a full, rich, authoritative tone of noble quality.

Mme. Kitty Berger, the celebrated harp-zither player, who is unique in this field and widely known and esteemed in musical circles, introduces herself and this beautiful instrument in that lovely Irish melody of Moore: "Believe Me If All Those Endearing Young Charms." The harp-zither makes a remarkable record, and as played by Mme. Berger is an artistic treat.

Kitty Berger.

Eugene Emmett sings with rare charm and native ability "Norah McNamara," a typical Irish song, in which he displays a tenor voice which is a keen delight. Irving Kaufman, tenor, sings "I Love the Ladies" with vim and enthusiasm, while Mr. Rodeheaver, who is musical director of the evangelist meetings of "Billy" Sunday, makes admirable records of six revival hymns, which he sings in a robust baritone voice with tremendous force and conviction.

RECEIVER FOR ALBUM MAKER.

Charles L. Brookheim has been appointed receiver in bankruptcy for Edwin F. Skinner, manufacturer of albums for holding talking machine records at 27-29 Walker street, New York, under the title of the Shafford Album Co. A meeting of the creditors will be held on May 1 at the office of Peter B. Olney, referee in bankruptcy, at 68 William street.

PUTNAM, CONN.

TRADE PULLING POWERS OF CLOSE OBSERVATION.

Ability to Observe Closely Is of Inestimable Value to the Talking Machine Dealer—An Art That Should Be Developed—Represents the Key That Has Unlocked the Doors of Success to an Army of Business Men—Practical Talk for Practical People.

When that troublesome customer, Business Depression, pays you a visit, as he has a way of doing with every member of the "talker" fraternity at some time or other, and you find yourself groping about in the murk of despondency, bring your forces of observation into action. Find out what your more fortunate competitor is doing and follow his lead, adding thereto, sundry elaborate variations of your own.

All that any business man endowed with a normal brain needs nowadays in order that he may achieve at least a modest portion of success is an idea in embryo to work upon. Therefore, when the storm clouds heralding the approach of the failure tempest loom blackest, go out and find that idea. A simple solution of the problem, is it not? Your journeying need not be extensive. You may find what you want in the same block. It may be gazing out at you from the window next door or from the one across the way. At all events, you will find it somewhere and in short order if your power to observe has been developed to a sufficient sensitiveness.

A very good way to get at the wished-for idea is to make a comparison between the other fellow's store and your own. This proceeding being carried out with care and deliberation, arrive at a conclusion from the data at hand, whether the said comparison is in the other fellow's favor; and if so, in what particular? That point being made clear, all you have to do is to borrow a little of his superiority. Then the storm clouds dissolve, and the sunshine of success invades your establishment once again.

Were I a talking machine dealer, Mr. "Talker" Man, my method of getting at a trade-bringing idea in the shortest possible space of time would be through the medium of a trade journal. Do you ever peruse the pages of The World for any other purpose than to run through the local news and the advertisements? Let me ask you a personal question: Do you see this periodical every month? In the mountains of Kentucky there are folks who cannot call the President of the United States by name, and who have never heard the strains of a phonograph—two deplorable proofs of their primitiveness. It seems to me, Mr. Dealer, that the "talker" man who does not subscribe to The World resides in the vicinity of the Kentucky mountains, so far as trade doings are concerned.

The function of a trade journal is to provide a rich mine of information relating to the particular field of which it is the representative, and to neglect taking advantage of the opportunities it presents to acquire valuable recipes for big business is a great mistake and shows a poorly developed sense of observation.

Believe me, I am not writing this to curry favor with my editors. They may think this story sounds too much like an advertisement, and return the manuscript, for all I know. However, my deep-seated respect for what The World means to every talking machine dealer who subscribes to it, bids me take a chance. Therefore I boldly state that some day I hope; yes, and expect, to see it in the hands of every "talker" man on the globe. It is unique in its line. Why should it not be thus widely circulated.

Another thing that I desire to get off my chest is the fact that The World is mighty good reading for the owners as well as the sellers of talking machines. Its instructive articles relative to the latest developments in graph and phone manufacture, the advance record lists, the able editorials, the latest patents, etc., are all of vital interest to everyone who owns a "talker."

In glancing through the April number I find no less than eleven stories which I guarantee to provide absorbing entertainment to the public at large. I back up my assertions as follows:

- Page 4, Makes Records of Birds' Voices.
- Page 7, Process for Enlarging and Reducing Disc Records.

Page 36, F. J. Bowers, Pathé Freres, Tells of World Trip.

Page 38, Reminiscences of Early Talking Machine Days.

Page 39, Miss Wilson's Columbia Records.

Page 43, Supervising Dance Records.

Page 50, The Rimington Color Organ.

Page 51, "Stage Fright" Before the Talking Machines.

Page 51, Will Reward Inventors.

Page 52, Latest Patents Relating to Talking Machines and Records.

Page 54, Record Bulletins for May, 1914.

Read the above list carefully, and you cannot but agree with me.

I don't suppose you ever thought to show The World to your customers, or to explain to them why they should subscribe? It will be to your interests to do this, because after a careful perusal of its pages they will not only cease to be tyros at the "talker" game but will come to you equipped to talk trade in your own tongue. This will save your vocal organs from the exertion of answering what must often seem foolish questions and place you on a mutually agreeable footing. Try it and see.

There is no reason whatever why a business periodical as newsy and instructive as The World should confine its circulation strictly to trade boundaries, and the sooner you realize this and pass the good word along to your patrons, the better it will be for everybody concerned.

Returning to the subject, "The Trade Pulling Power of Close Observation," the Philadelphia Evening Telegraph has this to say:

"The power of observation is indeed a wonderful gift, a gift no worker on the success road can afford to slight or overlook. It is the factor that causes men to rise from obscurity to fame.

"Strange as it may seem, at times a perfect stranger to the inner workings of a business can suggest ideas and innovations which the person who is on the inside fails to observe, simply because he lacks concentrated power of observation. As an example, the owner of a small store in the outlying district of the city was one day observed by a salesman looking intently at his windows, at the same time scanning the store front of his

neighbor, and also competitor, in the next block.

"He noted that trade seemed to pass by his store and make for the store in the next block, but for what reason he could not fathom. Both stores sold about the same line of goods at almost identical prices; both rendered about the same service; the location of both was on a par. The salesman also noticed the store front of the concern that seemed to be getting the business was brightly painted; presto! he had the solution.

"Turning to the merchant he said: 'The reason your trade is falling off is that your store presents an antiquated appearance, the front is badly in need of a coat of paint; the passer-by thinks the goods on your shelves are on a par with the exterior of your store. Note the bright, spic and span

How Keen Observation Counts.

appearance of your rival; the paint and woodwork fairly glisten in the sunlight.'

"The merchant for the moment was insulted.

"Said he to the observant salesman: 'What do you know about storekeeping? You never kept a store.'

"No," replied the alert salesman, "I never did; on the other hand, I never laid an egg, but I know a good omelet."

By way of finale, Mr. Dealer, allow me to suggest that you consider with sufficient gravity two questions:

First—The great stimulus that can be given your business through the faculty of keen observance.

Second—that the relations between your patrons and yourself can be mutually enhanced by introducing to them The Talking Machine World.

OPEN NEW VICTOR DEPARTMENT.

Elaborate Preparations Being Made for Handling the Line in the Store of Lindsay & Morgan Co., Savannah.

(Special to The Talking Machine World.)

SAVANNAH, GA., April 27.—A Victor talking machine department has been added to the business of the Lindsay & Morgan Co. Workmen are now engaged in the construction of booths and the converting of space on the main floor for the new department.

The matter of the new department has been under the consideration of the officers of the company for some time and it was decided that the time was ripe for the company to enter the field. The decision carried with it provision for an extensive line of Victor machines and records.

The new department will be under the management of Benjamin F. Rensing, who has been connected with the company for a number of years as cashier.

HIGH PRICED EDISONS SELLING.

A. W. Toennies, Jr., of the Eclipse Phonograph Co., Tells of Business Developments.

"The higher priced models of Edison disc machines are continuing to outsell by far the cheaper machines," said A. W. Toennies, Jr., of the Eclipse Phonograph Co., 208 Washington street, Hoboken, N. J., exclusive Edison disc and cylinder jobbers. "The machines retailing from \$150 upward are the types that are meeting with a ready sale in our dealers' establishments, and the demand for this class of goods has naturally created splendid clientele for our patrons.

"April business showed a gratifying increase over last April, although each month so far this year has been ahead of the corresponding 1913 month. The outlook is generally satisfactory, and during the past few weeks we closed contracts with a number of well-known dealers to handle the complete Edison disc line."

A NEW FILING SYSTEM.

The Ogden Invention Meets with Requirements of Talking Machine Men.

The Ogden Record Sectional Unit and Filing System is one which will appeal to talking machine men. This constitutes a complete record filing system and enables the filing of records so that it is possible to locate any desired record instantaneously. It is equipped with spring in each compartment that holds all records in upright position regardless of quantity of records filed. Warping in any way is prevented.

One feature of the Ogden system is the small space required for its big record capacity. It has a large accessory and supply drawer at base. It constitutes a simple, adjustable signal system for quick filing. The manufacturer, J. B. Ogden, Lynchburg, Va., will be pleased to supply descriptive circular and price list to all interested parties.

A number of talking machine men who investigated this system have been pleased with the results.

Sweet, Reed & Housed, who have succeeded the Penna. Music Co. in Williamsport, Pa., report a steadily increased business in Columbia talking machines in their very attractive quarters in the Y. M. C. A. Building in that city. The members of the firm are all progressive men who intend to be heard from.

Philadelphia can be likened to the palm of the shipping hand, for as the thumb and fingers extend, so does the delivery service of

Louis Buehn Philadelphia

cover all important points within several hundred miles of this city. This enables speed in delivery, and you can rest assured that our stocks are as complete as it is possible to get them.

Edison Cylinder and Victor Disc Products

"HOW TO DANCE MODERN DANCES."

Title of an Important Publication Issued by the Columbia Co.—Comprehensive in Its Scope.

The Columbia Graphophone Co. issued this month an important publication entitled "How to Dance the Modern Dances" that should prove one

Illustrations from Columbia Dance Book.

of the most valuable dealer helps the company has ever offered its trade. There is no doubt but that the present-day dances have not yet reached by any means the summit of their popularity and any assistance that is rendered the dealers in developing this profitable field is greatly appreciated.

The new book issued by the Columbia Co. is edited and compiled by G. Hepburn Wilson, M. B., one of the best known dancing teachers in the country and a leading exponent of the modern dances. Mr. Wilson has for some time been supervising the making of all Columbia dance records and it is due in a considerable measure to his careful supervision and detailed knowledge of the present-day dances that Columbia dance records have scored such a country-wide popularity.

The dances presented in this publication include the one-step, hesitation, maxixe and Argentine tango. Mr. Wilson discusses these popular dances as though he were giving private instructions in one of the many artistic studios and every movement is illustrated by pictures which were posed for by Mr. Wilson and one of his capable staff teachers. Every change of step in each of these dances is included in the description of the dance and suggestions as to the proper carriage, position, swing, etc., of the dancers accompany each illustration and general description.

In referring to this new volume a member of the Columbia staff said: "With the completeness of this new dance publication Columbia dealers can offer it to their patrons or prospective customers with the assurance that its careful perusal will give the reader a proper and thoroughly adequate understanding of the most popular modern dances.

"As a dealer help this dance book is entitled to premier consideration in the realm of talking machine literature and the Columbia Co. in offering its dealers this important co-operation is carrying out its fixed policy of giving Columbia dealers every possible assistance in the development of their business and the consistent growth of their profits."

"TALKER" RECORDS FOR HOSPITALS.

The New York visiting committee of the State Charities Aid Association has been making an appeal through the medium of the local press for talking machine records for use in New York City's hospitals and almshouses. Attention is called to the fact that the great majority of institutions have some kind of talking machines, though many more could be used to advantage. There is a great need of records, however, and the committee states that every kind of record is acceptable.

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

EDISON DISC PHONOGRAPH JOBBERS DINE F. K. DOLBEER

Tender Him Testimonial Dinner at Hotel Knickerbocker—Presented with Chest of Silver—Initiated into Jobbers' Association After Due Ceremonies—A Most Enjoyable Occasion Which Closes with a Lively Session at Churchill's—Those in Attendance.

Frank K. Dolbeer, who recently retired as manager of phonograph sales of Thos. A. Edison, Inc., to assume the management of the Phonograph Corporation of Manhattan, 443 Broadway, New York, received a welcome into the ranks of the Edison jobbers on April 20, when he was tendered a testimonial dinner at the Hotel Knickerbocker by the Edison disc jobbers of the United States and Canada. H. H. Blish presided, and the dinner committee consisted of W. O. Pardee, L. N. Bloom, N. D. Griffin and C. B. Haynes. Men journeyed from Canada, Minnesota, Iowa, Virginia and other far away points to pay a tribute of honor and respect to their old friend, eighteen being present.

After the dinner proper, during the course of which the party was entertained by a pianist and a monologue artist, the candidate, in the person of Mr. Dolbeer was prepared for the ceremony

tory information, and was then shown and advised regarding the details of a new style of Amberola, about three inches high.

There were a number of impromptu speeches and countless tokens of esteem, ending with the presentation of a beautiful chest of silver. Mr. Dolbeer was overwhelmed by this splendid manifestation of friendship on the part of his new associates in the jobbing field, for he is now a full-fledged member of the Edison Jobbers' Association, having been elected unanimously after a very "trying ordeal" and "duly initiated into a knowledge of the Edison line" and its splendid merits.

At the conclusion of the initiation, the party left the Knickerbocker and, following Walter Kipp and his "nanny" goat, paraded up Broadway to Churchill's where tables had been reserved. A pleasing surprise was the presence in Churchill's of Elizabeth Spencer, the well-known singer, who

OPENS STORE IN MONTGOMERY.

(Special to The Talking Machine World.)

MONTGOMERY, ALA., May 7.—E. W. Dahlberg, for several years business manager of the talking machine department of the E. E. Forbes Piano Co., has purchased the entire department from this concern. He has opened the Dahlberg Talking Machine Co. at 110 Dexter avenue, this city, where he intends to augment the following, which he has won through his very successful methods in developing business.

AIDS CHURCH FUNDS.

The Koch & Droge Piano Co., well-known Victor dealer, lent a Victrola recently to the Christ Lutheran Church, of that city, which was giving a Victrola concert to raise funds. This concert was a gratifying success, and the company's courtesy and consideration were greatly appreciated by the congregation.

Clarence, you can rest assured that when a man cannot think of anything to kick about it is a sure sign that he is failing mentally.—New Orleans States.

Pattern your facts after dollars. If they ring true and are full weight, they're "legal tender" anywhere.

Well-Known Men at Dinner in Honor of Frank K. Dolbeer.

of initiation into the ranks of the Edison Disc Jobbers' Association and it was a "trying ordeal." First came the election, and, upon opening the ballot-box, it was discovered to have been stuffed outrageously with white and black balls about equally proportioned.

A rising vote, unanimous, made Mr. Dolbeer a regular member of the association without further ado, although he still had to pass through the "second degree." The final degree consisted of being requested to ride a toy "nanny" goat with a large, although artificial voice, in approved lodge style, and then accept a loving cup. The latter was a plain tin cup with three handles, roughly soldered on, and from which all present drank the health of their guest. Having passed through the mysteries of initiation, the candidate was then declared entitled to all inside fac-

has made many Edison records, and who sang a verse directed particularly at Mr. Dolbeer, and paying tribute to his many good qualities, arousing great applause.

It was a great evening, thoroughly informal and exceedingly enjoyable. It shows the esteem in which Mr. Dolbeer is held when men journey thousands of miles to pay him honor. It is indeed worth while living to attain such a position of esteem in the trade world.

The various firms represented at the dinner, greeting, were the Girard Phonograph Co., Philadelphia, R. P. Cope; Harger & Blish, Des Moines, Ia., H. H. Blish; Hayes Music Co., Toledo, O., W. H. Hug; C. B. Haynes & Co., Richmond, Va., C. B. Haynes; Kipp-Link Phonograph Co., Indianapolis, Ind., W. E. Kipp; Lawrence H. Lucker, Minneapolis, Minn.;

Columbia Graphophone Company
Woolworth Building, New York

ACTIVE DEMAND FOR MACHINES ON THE PACIFIC COAST.

Increased Interest in Talking Machines Attributed to Dancing Craze—Exposition Bringing Many People to City—New Columbia Department Opened at Sacramento—Sherman, Clay & Co. Open Branch with Victor Line in Eureka—New Edison Agents.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., April 29.—Various talking machine interests here emphasize the fact that the demand for machines was particularly good the past month. In some instances it is reported that the machine part of the business was almost equal to December, and by others that the machine sales were the best for any month in a long time, with the exception of December. The increased interest in machines is attributed to the continuous appeal to the public to use the talking machine in connection with dancing, the craze for which continues unabated in this vicinity, as shown by the ever increasing demand for the new dance records. Local dealers have reason to anticipate business keeping up fairly well all summer. The exposition is already bringing many people to the city and the work to be done between now and the opening of the fair will require not only the presence of mechanics, but large clerical and executive forces as well to look after the concessions and the installation of exhibits. This, it is expected, will compensate to a large extent for the regular exodus from the city during the vacation season.

Pacific Phonograph Co. in New Quarters.

The move of the Pacific Phonograph Co. to its new quarters in the Sachs Building on Geary street the past month marked a decided forward step for that concern. The new establishment has been fitted up on an elaborate scale for a jobbing business. The building is new and of modern construction, designed specially for offices, so the company was particularly fortunate in securing large quarters in it, occupying, as it does, the entire third floor and nearly all the fourth.

A. G. McCarthy Interested in Exposition.

Andrew G. McCarthy, who looks after the Victor-Victrola part of Sherman, Clay & Co.'s business, as well as Phil T. Clay, is giving considerable attention to exposition work. Both served on the special committee which arranged for the elaborate Phoenix Fête on the grounds May 1, 2 and 3. Mr. McCarthy visited the company's wholesale Victor warerooms in Los Angeles the latter part of April, and reports things in good shape down there. He says all the Sherman, Clay stores did a satisfactory talking machine business the past month, the reports being particularly good from the Northwest.

Lively Columbia Business for April.

W. S. Gray, district manager for the Columbia Graphophone Co., left for the Northwest a few days ago on a short trip with the intention of bringing A. Glenn, manager of the Portland office, who has been ill for some little time, to California thinking that he might improve more rapidly down here. F. R. Anglemeier, who looks after the wholesale end at the local warerooms, says the sales of machines proper for April was almost equal to December, the \$75 and \$100 styles coming in very strong. Record business for the month

was also ahead of the other months so far this year. C. P. Leroy, traveler from this office, has just returned from a trip down the Coast, on which he found dealers enjoying a normal business, and preparing for better times in the fall.

Chas. S. Mauzy Married.

Chas. S. Mauzy, who is associated with his father in the Byron Mauzy music business on Stockton street, having charge of the talking machine department, was married on April 29 in this city to Miss Mildred Alice Dovey. The young couple are now away on a honeymoon trip and upon their return will make their home here. Byron Mauzy reports a very good showing for April in the talking machine department, where Victor, Columbia and Edison products are handled.

New Columbia Department in Sacramento.

A new Columbia department was opened in Sacramento, Cal., the middle of April, by the Wasserman-Gattmann Co., who conduct a general department store business there. The formal opening of the new department was one of the most elaborate events of its kind ever held in that city. Large floor space has been assigned to that part of the business, and a large stock of machines and records was assembled prior to the opening, which was heralded by large ads in the daily papers. The store was specially decorated for the occasion and much interest was shown in the expansion of the business.

Bacigalupi's Good Report.

Peter Bacigalupi, Jr., who operates the Bacigalupi talking machine business, reports a very good business the past month in both Victor and Edison products. He enjoyed an outing the first of the month with Leon F. Douglas of the Victor Co., who resides in Marin County, California.

Better Trade with Kohler & Chase.

P. H. Beck, proprietor of the Kohler & Chase talking machine department, says business for March and April showed improvement over the first two months of the year in both machines and records. Higher priced records are in better demand than for some time, and the \$100 Victor-Victrola is having a big call.

New Edison Disc Dealers.

Several more California dealers have signed up for the Edison disc line recently. They include the Avery Drug Co., Yreka; Sisson Drug Co., Sisson; Hawthorne & Broderman, Long Beach, and the Weed Mercantile Co., Weed.

New Store in Richmond, Cal.

P. C. Hawley has opened a new music store in Richmond, Cal., under the name of the Hawley Piano Co. He has a well-stocked Victor-Victrola department, and is making a strong feature of that part of the business.

Sherman, Clay & Co., Branch in Eureka, Cal. Sherman, Clay & Co., who are distributors for the Victor Talking Machine Co. for the Pacific

Coast, and who retail Victor products at their various branch stores, are opening a new branch in Eureka, Cal., under the management of Geo. C. Dillon, who was connected with the trade in that city some time ago.

The appearance of several artists making records for talking machines on the Coast the past month, including Mischa Elman and David Bisham, has stimulated interest in high-class records generally.

SECURE EDISON DISC AGENCY.

The Flanner-Hafsoos Music House Selected by the Milwaukee Phonograph Co. to Handle Edison Line on East Side.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., May 8.—The Edison disc phonograph line has been taken up by the Flanner-Hafsoos Music House at 417 Broadway, handling the A. B. Chase, Estey, Christman, Lauter, Wegman, Lyon & Healy and Brinkerhoff pianos.

The Milwaukee Phonograph Co., jobber in Wisconsin and upper Michigan for the Thomas A. Edison, Inc., has been desirous of letting one of the east side piano houses carry the Edison goods, and chose the Flanner-Hafsoos house because of its high standing and because it did not carry any other line of talking machines.

A full stock of the Edison goods has been received at the store and is being featured in the windows of the establishment. Florian F. Flanner, junior member of the firm, says that three large parlors will be installed on the main floor so that the Edison line may be featured properly.

The master minds of constructive statesmanship molded the American Government. The master mind of an inventive genius forced Edison to reveal to the world the wonders of electricity.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

Trade Conditions in London and Throughout England Are Certainly Not Overbright—Various Reasons Assigned in Explanation of Sales Slump—Cheapening of Record Prices, Better Quality of Goods and the Class of Trade Indulged Have Been Factors of Moment—German Manufacturers Combine to Fight Price Cutting—A Momentous Move—Scala Record Co., Ltd., Suffers from Fire—Interesting Issues of Records for the Month—New Columbia Artists—Edison Cylinder Records Will Continue to Be Made—News of the Month Worth Recording.

(Special to The Talking Machine World.)

LONDON, E. C., May 2.—Elements adverse to the sale of musical instruments and records have obtained this last few weeks, and not a few traders assert that the period has arrived when the official season may reasonably be regarded as over. One must admit that gramophone trade conditions are certainly not bright; indeed it would really seem that business is, for the time being, suffering under a cloud of depression of unusual duration and strength. Various reasons are assigned in explanation of the sales slump, notably the fine summerlike weather, holidays, strikes and disturbed industrial conditions generally, all of which does not militate in favor of sales progress.

The aftermath of the shilling record proposition has also contributed largely to an unsettled market, payments being exceptionally bad, and credit doubtful in several cases. Confidential information discloses anything but a pleasing prospect in relation to the future welfare of some of the cheap record houses. The class of trading indulged in has been all along more or less unprofitable, and the inevitable consequence is gradually yet surely making itself felt. Leading gramophone men and others whose interest in the talking machine trade is more than superficial, regard the situation as being very unsatisfactory, alike from the viewpoint of its immediate as well as its ultimate effect upon an already severely tried market. I have it on unquestionable authority that a deal was recently made in good double-sided records at the remarkable figure of four pence halfpenny each, this price including copyright dues and freightage. Such amazing evidence as this is clear indication that the cheap record proposition is still a live one. Far from nearing its doom, it is a bright hope within whose comforting protection many a financially depressed house may (on paper) temporarily recover a questionable equilibrium. For how long necessarily depends upon circumstances. One or two have already piled up their obligations, and news is not wanting of the closing of other firms within the near future. Financially exhausted, these latter are existing from day to day more or less indifferent to what the morrow may bring forth. It is altogether an unedifying situation, and we can but fervently hope that next season may commence with a clean bill of health for the good of the whole trade. From a report elsewhere it will be seen that the leading German gramophone houses have associated together with a view to serious co-operation in fighting the price cutting, record duplication and other trenchant evils which have for too long hampered the progress of an otherwise growing industry. When will the British trade do likewise?

To Fix Record Prices in Germany.

An important development in German record manufacturing circles is made known by our esteemed contemporary, the Phonographische Zeitschrift. The report gives currency to the formation of an organization consisting of the large manufacturing firms in Germany whose object is the fixing of retail prices for records and the regulation of other important trade matters of general effect. While this arrangement assures to all sections of the trade a reasonable profit, it in no way places a premium on competition, except in so far

as may result from a rather peculiar clause affecting the yearly profits of each concern. This point is really interesting; it stipulates that "should the record output of any one maker exceed in 1914 the production of 1913, for every record over the value of 2.20 marks, 20 pfennig must be paid into the convention cash account for distribution among those firms whose turnover shows a decrease." A remarkable idea, to say the least. It has too many possibilities. However, we read that competition will be mainly confined to the quality of the records. A number of firms have refrained from joining the Convention of Manufacturers, as it is called, but they are at liberty so to do if they wish. It is intended to control the various distributing sources, and to this end a list of factors and dealers has been prepared. Although each manufacturer has a free hand in the choice of wholesale distributing agencies, no one must be supplied outside the agreed list. An agreement also covers the relations of the manufacturers and the chosen retailers, the gist of which is that the latter bind themselves to handle exclusively the productions of associated makers, who include the following important companies. Deutsche Gramophon, International Zonophon, Carl Lindstrom, Beka, Favorite, International Talking Machine, Odeon, Lyrophon, Dacapo, Homophon, Anker, Kaiuope and Polyphon Musikwerke. For the different makes of records a standard price agreement has been drawn up and ratified by the convention, which has also sanctioned a limit being placed upon the number of records to be issued per month by each concern. Another clause provides for the regulation of wholesale and retail profits, and the practice of annual or bi-yearly exchanges is considerably revised. Unsalable records may, however, be returned for partial credit under certain prescribed conditions. For breaches of the agreed terms and stipulations a system of fines has been instituted. The convention agreement operates as from July 1 next, and remains in force for twelve months. Leo. B. Cohn, H. Eisner and Mr. Seligsohn are entrusted with the management of this praiseworthy endeavor to clean the Augean stable.

New Hearing in Big Copyright Case.

The adjourned proceedings in the great copyright case (reported in my last contribution) again came on for hearing before Mr. Biron, the magistrate, at the Old street police court, London. Defendants were William Jennings, trading as the Runwell Cycle Co., of 16 Great Eastern street; Blum & Co., Ltd., of 220 Old street, and W. H. Reynolds, Ltd., of 95 Great Eastern street, all of London. There were four summonses against each defendant for "unlawfully and knowingly offering for sale an infringing copy of a copyright work, contrary to the provisions of the Copyright Act, 1911." The subjects of the summonses were records of "The Gondoliers," "Pipes of Pan," "The Lost Chord" and two other songs. Through their counsel the Runwell Cycle Co. and W. H. Reynolds, Ltd., pleaded that they were not the makers of the infringing records, and as dealers they did not "knowingly" offer them for sale and could not therefore be held responsible in law. After very considerable legal argument this view was eventually accepted by the magistrate, whose finding clearly demonstrates that a dealer cannot be mulcted in damages for selling records without a copyright stamp unless it is proved that he did so "knowingly." The case against Blum & Co., Ltd., as manufacturers of certain of the records proceeded after an adjournment to another court. The summonses were taken out by the Mechanical Copyright Licensees Co., Ltd., whose counsel succeeded in making good their complaints in three instances, although defendants brought evidence that the records in question were circulated by accident. The magistrate said he considered the case proved and imposed a penalty of 40 shillings on each of the three summonses, with

£10 costs. An order was made for delivering up of the unstamped records and masters, which, it was said, had already been destroyed.

Scala Record Co. Suffers Fire Loss.

The premises of the Scala Record Co., Ltd., 80 City road, London, were the scene of a somewhat serious fire on the afternoon of April 27. Just after the luncheon hour flames were discovered issuing from the basement, which contained a large stock of records, gramophone cabinets, wooden trumpets, motors, etc. A strong contingent of firemen with their engines and apparatus were soon at work, but owing to the dense black smoke, attributed to the burning records, by the way, it became necessary for several men to descend into the basement and so secure a direct attack on the flames. For this purpose smoke helmets or breathing apparatus were utilized, and as soon as possible men with powerful hydrants got to work. By this time the basement and ground floor had been very severely damaged. After an hour's hard work, however, the firemen gained control and completely extinguished the outbreak. The damage to premises and stock is roughly estimated in the neighborhood of four figures. Messrs. Lockwood's premises situated next door to the burnt building, fortunately escaped, apart from some slight damage from smoke and water.

Your representative arrived on the scene early, and afterward was enabled to make what was necessarily but a superficial survey of the damaged building. Everywhere was confusion and wreckage. A more complete examination on the next day revealed the power of fire and water. To wreak such havoc as was apparent in so short a time as sixty minutes was really surprising. The basement had received over four feet of water; the floor was still slightly covered, and piles of half-burnt stock, soaking wet, were to be seen all around. At the time of writing the actual cause of the fire had not been ascertained and no information was available beyond the fact that it had originated in the basement, where it is believed some wood shavings used for packing purposes caught fire.

Harold Bosman, a director of the Scala Record Co., informed your representative that he had received many expressions of sympathy and offers of help from the trade. He was very much indebted to Mr. Cullum, proprietor of Lockwood's, for assistance rendered, his many kind acts going a long way toward mitigating the great business inconvenience caused. O. Ruhl, Ltd., also gave great assistance and has offered the Scala Co. the use of a warehouse for the time being.

From later evidence it is obvious that the Scala officials mean to lose no time in straightening out matters so that business may be as little interfered with as possible.

New Summer Model of "H. M. V." Machine.

A special summer model of extreme value at the price, 6 guineas, is announced by "His Master's Voice" Co. Of particularly handsome appearance, this new instrument carries the following specifications: Fumed oak cabinet 16¾x20¼ inches (height 12¾ inches), with lid; internal horn with wooden grille; double-spring motor; "H. M. V." tapered tone arm with gooseneck and exhibition sound box, etc. It makes a fine table-grand machine and should be an excellent line for summer trade.

The news was not conveyed to dealers in the ordinary way; it reached them by registered letter post. A smart and enterprising idea, without a doubt, for it is questionable whether any other method would have aroused such great interest in the new article as that adopted. One expects "value" by registered package; "H. M. V." dealers say they've got it.

Short Time from Sydney to San Francisco.

The announcement is made that from June next

Sounds
that are
truly
MUSICAL!

✿

✿

Voices
that are
truly
HUMAN!

✿

PLAYS TO PERFECTION,

without change of sound-boxes, EVERY disc record ever made and in such a realistic manner as never heard from any "Talking Machine," "Gramophone" or "Disc Phonograph" before.

(Read the views of the able Representative of this paper in London, about this new Instrument, on page 45 of March 15th, 1914.)

J. HOFFAY

67 Egerton Gardens, South Kensington, London, England.

IN THE PAST

A certain reproducing instrument brought its owners success and fame—it was about the best!

Competitors did not possess the same reproducing means to show off their records, which perhaps were just as good.

Dealers were compelled to bind themselves!

IN THE FUTURE

“The World’s Musical Instrument”

will sell, on equal merits, records of ALL makes.

All competitors will have the same means to “fight” with, and “quality” in recordings will predominate exclusively.

Dealers will surely stock all makes.

Dealers will surely gain their liberty.

Dealers will surely dominate the field.

Ask for catalogues, etc., at once.

J. HOFFAY

67 Egerton Gardens, South Kensington, London, England.

FROM OUR LONDON HEADQUARTERS—(Continued from page 51).

the new vessels of the Oceanic Steamship Co. will perform the journey between Sydney and San Francisco in sixteen and one-half days, and that, linked up as they are with the express boats of the Cunard and other Atlantic lines and by the mail trains of the United States, a great saving of time all around will be effected.

In Voluntary Liquidation.

The Britannic Record Co., Ltd., of City road, London, has gone into voluntary liquidation. The liquidator is Joseph Misener, 205 Willesden lane, London, N. W.

Be a Record Business for 1913.

Advance information anent the Beka Record, A. G., turnover for last year is published by a German contemporary. The figures quoted disclose a net profit of 593,910 marks, after deducting 121,977 marks for working expenses. At the general meeting a dividend of 12 per cent. is to be proposed.

German Record Concern in Liquidation.

The Jumbo Record Fabrik, G. m. b. H., Berlin, is in voluntary liquidation. Richard Seligsohn, the former manager, has been appointed liquidator.

Performing Rights, Ltd., Organized.

Apropos of the formation of the new corporation, Performing Rights, Ltd., I learn that a somewhat similar move has been made by the American publishers and authors, who have registered a company with the title American Society of Authors, Composers and Publishers. Both societies will be run on similar lines to the Societe de Authors in Paris. The objects are the collection of fees for performing rights and like royalties. I believe I am correct in saying that the three societies will co-operate for the mutual protection of their members' interests in the various countries in which each society operates.

Latest "His Master's Voice" Records.

In the latest batch of record issues announced by "His Master's Voice" Company for May, the live agent will, undoubtedly, find much upon which to justify a special campaign; a special effort to make known the magnificence of these records to

the great gramophone public. It is certainly a grand musical program, and we are assured it will make a very wide appeal alike on account of its general merit, and its comprehensive choice of titles. A special feature of the list is an exceptionally strong presentation of Russian music, sung by native artists, and these record offerings one may reasonably expect to create quite an unusual amount of interest. A careful perusal should be made of the full program as follows: 12-inch, double-sided—"Bavarian Dances, Op. 27, No. 3 (Elgar), and "Mignon Overture" (Thomas), Bournemouth Municipal Orchestra; "Ent'r Acte à la Gavotte" (Eric Coates), and "Sunshine and Shadow," waltz, (W. Piercy), Mayfair Orchestra; "Prince Igor," Overture, Parts I. and II. (Borodin), Borodin Symphonic Orchestra; "Sur la Riviera" (Daniderff), Jacobs and his Trocadero Orchestra, and "Verviene Valse" (Robt. Cox), Mayfair Orchestra. 10-inch double-sided—"Bobbing Up and Down" and "International Rag" (Irving Berlin), Metropolitan Band; "Patria Jova" (A. Marcet), and "La Vica de Casa" (E. Morera), Spanish Band of La Principal del Prelada. 12-inch single-sided—"Fifth Symphony," First Movement, Part I. (Beethoven), Berlin Philharmonic Orchestra; "Fifth Symphony," First Movement, Part II. (Beethoven), Berlin Philharmonic Orchestra; "Der Erl König" (The Erl King) (Loewe), (Sung in German), Dr. George Menschel (bass); "Nobody Else" (Crimp), Miss Alice Lakin (contralto); "Who Can Tell Me Where She Dwells," ("Rob Roy," Act 3), (R. de Koven), Wakefield and Pollock; "Valse-Coppetia Ballet" (Déliibes), Lipkowskaya (Russian soprano), (Sung in Russian); "Les Filles de Cadiz" (Déliibes), Neshdanava (Russian soprano), (sung in Spanish); Aria from "A May Night"—"Sleep My Beauty" (Rimsky-Korsakoff), Smirnoff (tenor), (sung in Russian); "Arise, Red Sun" (Russian Folk Song), Chaliapin (bass) (with chorus), (sung in Russian); "The Devout Lover" (M. V. White), Stewart Gardner (baritone); "Prize Song—Meistersinger" (Wagner, aria by A. Wilhelm),

Mischa Elman (violin); (a) "Study, Op. 10, No. 7," (b) "Waltz in D flat" (Chopin), Wilhelm Backhaus (piano); "Lack-a-Day" (Crampton), Ernest Crampton. 10-inch, single-sided—"A Farewell" (Liddle), John McCormack (tenor); "Song of the Shepherd Lehl," "Snow Maiden" (Rimsky-Korsakoff), Alma Gluck (soprano); "Come to Me" (Wadham), Hubert Eisdell; "Thou Art Risen, My Beloved" (Coleridge-Taylor), Robert Radford (bass); "A Rose Memory" (Deacon), John Harrison (tenor); "My Fairy Prince" ("Her Little Highness") (R. de Koven), Olive Kline (soprano); E Lucevan le Stelle "Tosca" ("The Stars Were Shining") (Puccini) Martinelli (tenor), (sung in Italian); "A Hundred Years Ago" (Crampton), Ernest Crampton.

New Zonophone Records.

This month's (May) Zonophone records comprise an exceptionally well chosen program of good music with a plentiful sprinkling of each class: classical, sentimental, humorous, etc. The famous Royal Irish Fusiliers Band is again in evidence with a superb contribution, "The Jolly Village Smith," coupled with which is the waltz song "Il Bacio," as a cornet solo by Corp. Williams. Another special is record No. 1281, containing two pretty songs by Sidney Coltham, the great Zono tenor who has in a few short months secured renown as a record-maker of exceptional merit. A really good banjo duet record is listed as the work of "the world's greatest duettists," Alfred Cammeyer and Oly Oakley. In addition, there is to be noted exclusive contributions by Miss Violet Oppenshaw (contralto), Mary Law (violin), Black Diamond Band, Peerless Orchestra, Peter Dawson, Church Choir with Organ, Florrie Ford, Harry Fay, and other favorites.

Has Many Popular Songs.

"Hullo Tango!" the London Hippodrome Revue is most prolific in its provision of attractive songs, and the various record companies have, naturally, been very busy. "His Master's Voice" company, as usual, has secured the original artists to make

To T.M. the King and Queen of Spain

To H.M. the King of Sweden

To H.H. the Khedive of Egypt

To H.M. the King of Italy

To H.M. the Shah of Persia

By Appointment To H.M. Queen Alexandra

some sparkling records of the most popular numbers, and these were recently announced in a special colored supplement, fully illustrated, and most pleasingly produced.

Two New Columbia Artists.

Two more big names are added to the Columbia catalog this month, and, in each case, an especially fine record serves as introduction. The celebrities in question are Madame Carolina White, the prima donna soprano of the Philadelphia-Chicago Opera Company, and Henri Scott, the famous American basso. Mr. Scott is the leading basso of the New York and Philadelphia-Chicago opera houses, and is known for the exceptionally deep and rich timbre of his voice, features which immediately strike the hearer of his first record carrying "The Heart Bowed Down" and "In Happy Moments."

To Continue Making Edison Cylinder Goods.

Concerning the rumors in trade circles that the Edison Co. would ultimately abandon the manufacture of phonographs and records, Mr. Walter Stevens, manager of the foreign department of Thomas A. Edison, Inc., very strongly disclaims any such intention. He writes (in part)—"We wish to deny this most emphatically. The confidence of this company in a continued demand for the Edison cylinder product is proven by the enormous investment we have made in recent months in the improvement of this line and the further expenditures now being made. We believe this assurance will dispel any uncertainty existing in the minds of our friends abroad regarding our future policy. We expect to push the sale of the Blue Amberol record and Edison phonographs with renewed vigor * * * In a recent interview with your representative, A. F.

Wagner, the British manager of the Edison Co., made pertinent reference to the fact that while all cylinder business was being conducted direct from the States, it had not in the slightest degree militated against British trade interests. "As a matter of fact," continued Mr. Wagner, "we are doing a very large and satisfactory business, and I believe that for many a year to come, the Edison phonograph and records on musical merit and as a sales proposition will continue to offer dealers a lucrative field for development."

Columbia Record Notes of Interest.

The announcement of a record by Ivor Foster on Columbia-Rena this month is an interesting event, for Mr. Foster is an old Columbia friend, his first introduction to the record world being, if we remember rightly, on Columbia some nine or ten years back.

In the Columbia May list we have such great names as the Scots Guards Band, the Ellery Band, Hans Kronold ('cello), George Barrere (flute), Anderson Nicol and Gertrude Woodall in duets, Ivor Foster, H. Lane Wilson, Thorpe Bates, Cooper Mitchell, and others.

Henry Burr, the famous American tenor, is announced on this month's Columbia-Rena records in a beautiful song "Sing Me 'The Rosary,'" founded on the Nevin's famous melody, and in a barcarolle duet with Miss Clara Moister.

Another of the two-part orchestral records, for which Columbia-Rena has become famous, is announced this month. It provides Weber's wonderful "Der Freischütz" Overture, the opera thus represented having been termed the foundation of German opera.

The first ten-inch record of Sir Edward Elgar's much-talked-of new work, "Carissima," is issued

on Columbia-Rena this month. It has interested a great many buyers of high-class music.

The Milan Symphony Orchestra, under Maestro Romani, has created a new monument to Columbia recording quality. This month's issue should be even more popular, for while the previous records have shown the orchestra in delicate work, this record displays the players in "Lohengrin" and "Tannhauser" selections calling for power and volume, and the most exacting critic on these points will find he has all he could wish.

H. Lane-Wilson, the celebrated baritone, sings on Columbia-Rena this month, his own new song, "Before You Came."

"Deiro, the marvelous," the Italian wizard of the accordeon, offers two dashing march selections ("Bersaglieri" is one of them) as his Columbia-Rena contributions this month.

Reed Miller, the popular American tenor, is represented by a twelve-inch record of oratorio on Columbia this month. He sings "If With All Your Hearts" and the companion aria "Then Shall the Righteous," from "Elijah."

Cristeta Goni, the fourteen-year-old violinist, whose first record on Columbia-Rena last month caused quite a flutter in the trade, will be found on a twelve-inch record this month, in a "Nocturne" of Ambrosio, and Drdla's "Serenade."

Three further remarkable records are issued in the Columbia "Grand Opera at a popular price" series this month. One is the celebrated Polverosi in "La donna e mobile" and "Questa o quella," another two "Barber of Seville" numbers by Coradetti, and the third two "Dramatic Moments" from "Aida," to-wit, the consecration scene in the temple of Fta, and the concerted piece sung in honor of the sacred Nile.

BUSINESS LIVELY IN BELFAST.

Talk of "Revolution" and Home Rule Question Does Not Interfere with Business—Talking Pictures Much in Evidence and Are Successfully Shown at Panopticon Theatre.

(Special to The Talking Machine World.)

BELFAST, IRELAND, May 1.—Despite the talk of "revolution" and troublesome times over the Home Rule question, business goes on uninterruptedly in this city. This is particularly true so far as the talking machine trade is concerned, which is constantly expanding.

Talking pictures are now very much in evidence in all the picture theatres, and one of the most successful combinations of picture and Gramophone is that which has been in evidence at the Panopticon Picture Theatre situated on High street. For the purpose the proprietor, Frederick Stewart, has adopted the celebrated Auxetophone which he secured from Thos. Edens Osborne, of 11 Wellington place, who carries one of the largest stock of talking machines and records in the north of Ireland. The cabinet of this instrument is of Flemish style and is of Spanish carved oak, the selling price of which is £110 (\$550). The Auxetophone, by the way, is the invention of a celebrated Irishman, the Hon. Chas. Parsons, of Turbine engine fame.

The reproduction of Gramophone records by this instrument is loud, clear and distinct, and every word—in fact, every syllable—can be heard distinctly throughout the entire picture theater. The synchronization is remarkably good, and the habits of the Panopticon seemed to be all charmed not only with the instrument but with the pictures shown in conjunction with the Auxetophone, which is the most expensive and loudest disc talking machine in the world.

THE "WIZARD" HOMOPHONE.

A new harmony gramophone, called the "Wizard" Homophone, has been put on the market by Andres Bro. Ltd., of London. It is a portable horn-hidden instrument, constructed of dark colored wood and is fitted with a 10-inch turntable, speed regulator, spring brake and a strong and very silent running board. One of the prominent characteristics of the machine is the reflex horn,

which is devised in the lift up cover of the cabinet. The instrument emits a surprisingly clear and full tone and is expected to be a popular seller.

SEES BOUNTIFUL BUSINESS.

C. H. Bagshaw Looks for an Enormous Trade in Needles the Present Year Owing to the Dancing Craze Which Is Steadily Growing.

Asked to give his opinion on the remaining months of the year's business on talking machines, C. H. Bagshaw, general manager of W. H. Bagshaw, Lowell, Mass., the big talking machine needle house, said:

"From my observation of the industry, I can see nothing but a very bountiful business for both manufacturers and dealers, in 1914. The craze for dancing has demonstrated the versatility of the talking machine, and indications point to the fact that this craze will not die out for a long while. As far as the needle business goes, this bears out what we say, and the orders, now on our books, show that there will be a great many more needles used this year than ever before. I can see nothing but prosperity for the talking machine industry, not only for the balance of this year, but for many years to come."

Occasionally a man can be judged by the company he keeps away from.

TRIUMPHON Co., Ltd.

COLUMBIA STAFF ENJOYS DANCE.

Heads of Departments and Employes of Executive Offices of the Company Participate in Informal Affairs at St. George Hotel, Brooklyn—Demonstrate Finer Points of Terpsichorean Art Like Famous Dancers.

There were sounds of revelry and great joy at the St. George Hotel, Brooklyn, N. Y., on the night of April 27, when the heads of departments and the employes of the Columbia Graphophone Co.'s executive office in the Woolworth Building

most important virtues of this brand of music is that you can get all the encores you want without being obliged to persuade or placate an obdurate orchestra leader.

The Columbia executive staff and employes gave a splendid account of themselves in the performance of the terpsichorean art, and it was a very small percentage indeed of those present who decided to watch the dancers in preference to participating. Usually the heads of the departments were to be found dancing the hesitation or the one-step with the best of the younger folk, and in

flavor was given the event by the appearance of three of the company's European representatives, F. Passadora, Louis Sterling and Arthur Brooks.

Portion of Columbia Staff Enjoying Dance at St. George Hotel, Brooklyn.

gathered at this prominent hostelry to participate in an informal dance.

The music furnished for this enjoyable affair was exclusively Columbia, consisting of dance records and a Columbia machine, and in the opinion of all those present it was "some music." Almost every dance was encored, and one of the

fact everybody had such a good time that another dance will be held in the very near future.

President Easton had intended to be present, but was prevented at the last moment from attending. Edward N. Burns, vice-president, put in five hours of steady dancing, and H. L. Willson, assistant general manager, did the same. Quite an international

No. 1—New England—dignified but sprightly and always educational. No. 2—The English delegation. No. 3—Piracy and highway robbery. No. 4—Export Department providing American-Mexican entente. No. 5—Scientific dancing by Advertising Department. No. 6—Recording Department, strenuous and conscientious.

The export department sent a strong representation from Latin-America. Every department was well represented, and many came as personal guests of the Columbia folk or friends of the company.

Theodore Novakoski, of the treasury department, and Prof. Frederic Goodwin, of the educational department, were in charge of the arrangements for the dance, and both gentlemen did their work well.

Time is like a typewriter eraser. It rubs out our disagreeable experiences—but leaves the paper of life thinner in that particular spot.

TENDENCY TOWARD IMPROVEMENT IN CLEVELAND

Noticeable in All Branches of Talking Machine Trade—The Phonograph Co.'s Expectations Being Realized—Various Dealers Report Great Demand for Victors—Columbia Co.'s New Store—Call for Union Specialty and Plating Co. Products.

(Special to The Talking Machine World.)

CLEVELAND, O., May 9.—Conditions in the talking machine business have remained about the same and are still in an unsettled state, although there is an evident tendency toward improvement. In spite of deterrent conditions, the aggregate volume of business in both machines and records in April was generally satisfactory, notwithstanding a shortage in the Victor line.

The demand for the May records is excellent. This includes the Victor, Columbia and Edison lists, and sales are expanding.

When John McCormack, the celebrated tenor, was in the city recently he made it a point to visit the Eclipse Musical Co., where he was entertained with his own Victor records. He is an appreciative listener to his own productions, as well as are the thousands of his admirers. The Eclipse people were highly pleased with his visit.

A. W. Robertson, for a number of years with the local Columbia store, is now with the William Taylor, Son & Co.

The business expectations of The Phonograph Co., distributor of Edison phonographs, are being more than realized. L. N. Bloom, secretary, said: "Both in the wholesale and retail line business was very good during the past month. There has been a big demand for dance records. Dealers all through the State are ordering heavily. The dancing parties held in our beautiful recital hall drew the society people of the city, and it was necessary to hold two sessions daily to accommodate the crowds." Harold E. Moore, who for a number of years was manager of one of the largest talking machine houses in London, has joined the store's selling force.

The Eclipse Musical Co. reports business good in both the wholesale and retail departments. Mr. Towell says the annoyance of a shortage in both machines and records still continues. The company has just added a new auto truck to its service. It is very attractively finished and painted, showing the Victor dog in a most life-like form. The company gave a complimentary concert on the evening of May 6, the program consisting of selected Victor records interspersed with selections by a quartet of local note.

Business is moving along smoothly and prosperously at the new quarters of the Columbia Graphophone Co. Having disposed of the retail department to the Grafonola Co., the Columbia is now confining operations exclusively to the wholesale trade and the Dictaphone. All Columbia dealers appreciate the change in the policy of the Cleveland store. The new quarters are most thoroughly equipped for conducting the business, being convenient for handling stock and ideal for receiving and shipping. "We can fill all orders the same day received," said G. R. Madson, manager, "and give dealers practically 100 per cent. efficiency in filling orders."

The following new dealers are reported in the Cleveland territory: O. B. Marvin & Co., Findlay; F. E. Shaw Piano Co., New London; the Gentz Co., Canal Dover, and the Grossman Drug Co. (three stores), Cleveland.

"Yes, I know people say business is slack," said E. A. Friedlander, manager of the Bailey talking machine department, "but our business is considerably better than it was a year ago."

Ethel M. Volk, manager of the May Co.'s phonograph department, is busy these days and reports that business is excellent both in machines and records.

Business at the new store of the H. M. Brainard Piano Co. has opened in the most satisfactory manner. The store is particularly attractive and is located in the new piano center of Cleveland, on Euclid avenue at the junction of Huron road. One-half of the store has been dedicated exclusively to the Columbia graphophone machines and records. The sound-proof demonstrating booths of heavy plate glass, the top border of art glass, with the invisible lighting system and elegantly furnished, are especially attractive. This department is under the management of G. E. Morton, who comes to Cleveland from the Columbia Graphophone Co., of Atlanta, Ga. The company has retained from the local Columbia store force Miss Letha Touby, J. H. McClelland, Earl Hamler and Miss Martha Francek. The company features in pianos the Kranich & Bach line, which is notably popular here. The officers of the company are: H. M. Brainard, president; F. J. Ott, vice-president, and George M. Ott, secretary and treasurer.

Considering business conditions generally, trade at the store of the W. F. Frederick Piano Co. was very satisfactory. "Quite a large number of Victor machines have been sold during the past month," said N. H. Cook, manager of the talking machine department, "and the demand for records, especially from the dance lists, is quite up to the average."

Phil. Dorn, while apparently immersed in the sporting goods line of the Collister & Sayle Co., is watchful of the talking machine department, and his judgment of the condition of that business is always pretty accurate. Business, he says, is coming along all right, although a little slow owing to the inability of the manufacturers to supply the increasing demand. He reports trade equally good in both the wholesale and retail departments.

Business is fair in the Victor machine line, with a good record trade, at Buescher & Sons Co. W. J. Roberts, Jr., who has been with the company for some time, has resigned to engage in other business.

The Grafonola Co., successor of the Columbia Phonograph Co.'s retail business, is doing fine. C. A. Routh, manager, said: "Business is exceed-

ing our most sanguine expectations. Our trade is increasing day by day, and we are meeting with wonderful success. The popularity of Columbia machines and records judging from our sales, is unquestioned."

The large and growing clientele of the B. Dreher's Sons Co. is the result of persistent effort and a liberal publicity policy, backed with a complete stock of Victrolas and records in connection with its piano trade. William G. Bowie, manager of the talking machine department, is quite optimistic in view of the increase of business thus far this year. He reports sales of a number of machines during the past month, with good sales of records.

There is an ever increasing number of side line dealers who are adding the talking machine to their business, and all are having a promising trade.

The Union Specialty & Plating Co. is as busy as ever supplying the trade with the Union attachments. Mr. McNulty says the business is constantly expanding to surprisingly large proportions.

BIG BUSINESS IN ALTOONA, PA.

Occupancy of New Warehouse Marks Progress of W. F. Frederick Co. Store Under Manager Nestor—Immense Victor Stock Carried.

(Special to The Talking Machine World.)

ALTOONA, PA., May 8.—The local branch of the W. F. Frederick Piano Co., under the energetic management of French Nestor, is now fully settled in its commodious new five-story building at 916-20 Eleventh avenue, which will be used as a storage house annex to the retail store of the company at 1208 Eighth avenue. The new building will be used chiefly for the storage of Victor talking machines and records, in which the company does an enormous business as distributor and retailer.

The first floor of the building contains, besides the offices of Mr. Nestor and his assistants, the garage and shipping department, the commodious record rooms, containing racks measuring 180 feet in length and 8 feet high, which are designed to hold about 75,000 records when the stocks are complete. The second and third floors are given over to the storage of machines of various models, cabinets and accessories.

One of the interesting features of the new building is the completely equipped repair and tuning department on the fourth floor, which equals many smaller factories in the facilities. The machinery equipment is up to the minute and is driven by individual electric motors.

The success of the Frederick Co. business in this section is especially noticeable since Mr. Nestor became manager about two years ago, during which time the business of the company has increased wonderfully throughout central Pennsylvania.

Habit and appetite are products of the mind. Bad habits and abnormal appetites are formed either by a weak or an unorganized intellect. Habits are of man's own making because he has the power to organize, train and strengthen the mind that forms the habit.

COLUMBIA GRAPHOPHONE CO.'S 25th ANNIVERSARY

The Occasion of a Most Interesting Reunion and Dinner of the Directors, Officials and Executives of the Company Held at the Arcola Country Club, Arcola, N. J., on Saturday, April 11—Some Interesting Remarks by President E. D. Easton and Others.

There was a large and festive noise, indicative of much jubilation, in the neighborhood of the Arcola (N. J.) Country Club April 11, when Edward D. Easton, president of the Columbia Graphophone Co., and a large party of the directors, officials and employes foregathered to celebrate the twenty-fifth anniversary of the founding of the company. Most of the guests made the club early in the afternoon, for the weather was perfect and the club kept open house, indoors and out. The golf course claimed a good many and some remarkable scores were made.

It was one of the occasions—they do happen every once in a while—when the Columbia organization lifted the lid and cut loose, and the invited guests were permitted to see something of the good fellowship, co-operation and mutual loyalty that exists in the organization—the spirit which, in short, has been the dominant factor in building it up. It is a thing about which not much has been said, but it is there. It is a constant and wholehearted reinforcement one of another by everyone, from the president down to the executive office door boy.

It is that spirit which has created and recreated the Columbia Graphophone Co.—and it started from the top. President E. D. Easton's personality, never blatant, tremendously magnetic, together with his genius for the selection and inspiration of his forces, has been one of the biggest things that the talking machine trade has known since its very inception. And Saturday night's foregathering early resolved itself into a large and enthusiastic utterance of tributes to the man.

At the dinner in the evening covers were laid for fifty. President E. D. Easton himself was in the chair, and those present were as follows: George W. Lyle, vice-president and general manager; E. N. Burns, vice-president and manager of the export department; Senator William M. Johnson, director; Dr. David St. John, director; F. J. Warburton, director; C. W. Cox, director; C. A. L. Massie, director and patent counsel; H. L. Willson, assistant general manager; Mervin E. Lyle, factory manager; H. A. Budlong, assistant factory manager; C. E. Woods, supervising engineer; Horace Sheble, efficiency engineer; E. K. Camp, counsel; Ralph L. Scott, patent counsel; Marion Dorian, auditor and treasurer; T. Allan Laurie, assistant auditor; G. L. Funnell, London factory manager; J. I. Brereton, purchasing agent; G. C. Jell, chairman record committee; V. H. Emerson, manager record department; C. W. Woddrop, secretary and assistant treasurer; T. E. Novakoski, assistant treasurer; A. E. Garmaize, export department; Louis Sterling, European sales manager; A. G. Farquharson, Canadian manager; Otis C. Dorian, assistant Canadian manager; E. B. Jordan, Jr., guest; W. S. Scherman, advertising department; F. L. Capps, experimental department; F. E. Goodwin, education department; H. B. Ray, advertising manager; M. D. Easton, dictaphone advertising manager; G. P. Metzger, advertising counsel; H. A. Yerkes, wholesale department manager; Frank Dorian, dictaphone manager; J. D. Westervelt, manager of dictaphone agencies; John Button, assistant dictaphone manager; N. F. Milnor, New York dictaphone sales manager; Thomas F. Murray, guest; Homer W. Reid, chief accountant, Bridgeport, Conn.; Hayward Cleveland, manager Thirty-third street store; H. C. Grove, manager Washington store; R. F. Bolton, New York wholesale manager; Anton Heindl, manager of foreign record department; J. C. Ray, assistant to Mr. Willson; Harold Lyle, foreign record department; Walton Mayer, Pittsburgh, guest; E. E. Robinson, representative of the export department in the Orient; Henry E. Parker, advertising department.

There was no set program of speeches, but a whole lot of interesting talk followed the dinner.

President E. D. Easton, arising amid cheering, said:

"Gentlemen, the Columbia Phonograph Co. was

born on January 15, 1889, so that it was twenty-five years old nearly three months ago. But we were not quite ready then to celebrate, therefore it was postponed until to-night in order that more of us could meet together. I want to express to you all my very great affection and regard and appreciation of your services. We have no program for this evening, but I will exercise the privilege of calling upon many of those who, are present for impromptu speeches. I only want to say that I am very happy indeed to be here with you and to see all these splendid men, and hope that you may carry away pleasant memories of the evening. I think the first speaker should be the

Edward D. Easton, President.

man who has, next to myself, been longest in the service of the company—Frank Dorian—who has had the full twenty-five years' service with us."

Frank Dorian Heard From.

Frank Dorian, general manager of the dictaphone, spoke briefly—so briefly, in fact, that someone suggested that he felt embarrassed because there was no dictaphone to dictate to. He said: "I can only echo the words of our president. It is indeed a great pleasure to be here and with the company, and a great privilege to have been associated with Mr. Easton. I may not hope for another twenty-five years, but I do not feel that my education is yet completed, and I hope to be associated with him for many years to come."

H. A. Budlong, assistant factory manager, who was called upon, expressed his pleasure at being present.

Men Who Have Distinguished Themselves.

E. D. Easton arose at this juncture and said that he had been struck with the presence of so many of his previous secretaries—Mervin E. Lyle, Otis C. Dorian, M. D. Easton, Frank Dorian, J. C. Button, H. L. Willson and H. A. Budlong. Said he: "My secretaries have many of them distinguished themselves since. Frank Dorian was for many years our European general manager. Mervin Lyle has just taken one of our biggest posts as manager of the factory in Bridgeport. Otis Dorian is now assistant manager in Canada. Mr. Willson is now serving as assistant general manager of the company. Mr. Budlong has long had charge of very responsible work in the factory, of which he is the assistant manager, and J. C. Button and M. D. Easton are doing important work in the executive office."

Elisha K. Camp's Remarks.

Elisha K. Camp, of the legal department, said: "It does seem to me on an occasion of this sort, when brief speeches are the order, that I am the most inappropriate person to be called on. Because if any one man, more than another, should be expected to be able to speak a lot it would be the attorney for a talking machine company. Of

the many cackling chicks hatched by the North American Phonograph Co., the Columbia was the only one that was able to last for any length of time. Mr. Easton, as you all know, was the man who got the exclusive rights from the North American Phonograph Co. for Delaware, Maryland and the District of Columbia, which he transferred to the Columbia Phonograph Co., and he was very careful at the time—with his usual foresight—to have read into his contract the express covenant of the grantor that it would not come into the ceded territory. I think that, of all those sub-licensees, the Columbia Phonograph Co. was the only one with that express covenant, and that was due to Mr. Easton's foresight. While the celebration to-night is in itself a great event, I think we have even greater cause for celebration in that we have preserved to us the man who originally made the Columbia Phonograph Co. and who has brought it along up to the present time to what it is now. You all remember what a serious illness he recently passed through and how successfully he has recovered, even as we had all prayed that he would come through as well as he has. And while we are celebrating to-night we should be very thankful to think that he is with us in such splendid health and spirits, ready to be with us for another twenty-five years or even more (applause). I do not know of any man who has the ability to infuse the same enthusiasm into his colleagues as Mr. Easton. I do not know of a body of men who have responded more loyally to their chief than the men who are here and the men who have served the company of which he has been such a distinguished head." (Cheers.)

Some Other Speakers.

Marion Dorian, auditor, next made a few brief remarks, and was followed by Louis Sterling, European general sales manager, who declared that he had "been having such a very good time that he didn't want to interrupt it by saying anything. His only cause for regret was that he had never served as a secretary to Mr. Easton (laughter). It was a pleasure and an inspiration to come across to this side of the water every once in a while and to realize the magnitude of the business with which he was connected. During the four and a half years during which he had been with the Columbia they had carried the Columbia flag throughout Europe and they had succeeded in showing Europe that American ideas could be worth a very great deal indeed."

George P. Metzger, advertising counsel, made a humorous speech, mainly about golf, and was followed by Mervin Lyle, manager of the Bridgeport factory, who said that although his actual service with the company only covered a period of twelve years, he had really been associated in a commercial way a long while before that, as far as 1892, when it had a store in Baltimore.

Big Improvements Coming Say Woods.

C. E. Woods, supervisor of engineering, arising amid cheers, said that he felt pretty young in the business. "It seems to me," he continued, "that I have never seen a more glorious opportunity for the development of the business. Our future is full of possibilities, and it does seem that we can't get to them quick enough. There is almost virgin field in many directions. We are making the talking machine to-day as we have made it for many years, but yet I think there are big improvements coming. I am looking forward to the time when we can bring the talking machine up to a point where it will be regarded just as much a household necessity as the piano, and more so. It is only a matter of education." Mr. Woods spoke at further length on the eminent prospects of extensive improvements in the science of sound reproduction.

Horace Sheble's "Experiences."

Horace Sheble, formerly factory manager and at present efficiency engineer, said his experiences with the company dated back over twenty years, and said over twenty years ago he had been a salesman selling to the company. He had sold them their first typewriter. Mr. Easton had reciprocated by selling him one of the first graphophones. And then he himself got even by supplying the company with sapphire points at ten cents apiece.

C. A. L. Massie was another one to express his

"Cohen on the Telephone," the most humorous record issued since the famous Weber & Fields series. A 65c. Columbia Double Disc Record.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

**Columbia Graphophone Company
Woolworth Building, New York**

COLUMBIA GRAPHOPHONE CO.'S 25th ANNIVERSARY.

(Continued from page 58.)

high satisfaction at being present in very brief terms.

V. H. Emerson, the company's recording superintendent, was next on the list, and gave flashes of championship form as a monologist.

Messrs. Farquharson and Willson were others who spoke with excessive brevity, and J. C. Button made a hit with a humorous and appropriate story.

Why Prof. Goodwin Is an Optimist.

Prof. Frederic Goodwin, head of the educational department, said his personal association with the company did not go very far back into its history. He only knew of its past record and its present

guard that I feel for you." Speaking from his own present individual experience, although his crew of men might look very small in comparison with the company's forces, at the same time one of the biggest pleasures that he had to-day came from the fact that he had a selling organization in New York of every man of which he was mighty proud. They had neither a "boozier" nor a "borrower" in the whole force. There wasn't a man who had ever attempted to misrepresent the product he had to sell and their drawing accounts were never overdrawn. He had never seen an organization that pulled together as did their own.

Snap Shot Taken at Banquet of Columbia Forces at Twenty-fifth Anniversary Dinner.

prosperity. The history of the graphophone was the history of most inventions: First, a matter of smiles, then a subject of amusement, and then it came into its own field of real usefulness. He himself was an optimist, and from what he had already seen of the advances they had made in conjunction with national education, he anticipated a tremendous development in the future.

Messrs. E. B. Jordan, Jr., and T. F. Murray followed, the latter making the briefest speech of the evening. Anton Heindl, New York manager of foreign recording, then drew on a fund of personal reminiscences of past happenings and anticipated the future with a magnificent optimism.

A Strong Body of Men.

N. F. Milnor, Dictaphone sales manager, of New York, said that as he looked back at his own past experience in sales organizations in many cities he had never in his life met a force of men whose acquaintance had been worth more than those who were in the service of the Columbia Graphophone Co. To Mr. Easton was the credit due for having assembled and inspired as clean a body of men as any organization ever had. Mr. Easton in his remarks that evening had used one phrase that had appealed to him very strongly, a phrase which it seemed to him served to indicate the foundation of the Columbia spirit. He had said, "I want you to know the affection and re-

mercial corporation. This one is remarkable in that the head of the organization who first founded it is still the honored head of the company to-day. I have often wondered how it was and where it was that you got together such a magnificent force of enthusiastic, brainy, earnest, industrious and successful men. I suppose it is because you catch them young—like Mervin Lyle. Of course, you naturally get good results, but that could not have been achieved if it had not been for the enthusiasm and the untiring example that Mr. Easton has demonstrated to the forces of this company for all these years. I never knew a man possessed of a greater degree of enthusiasm and confidence nor one who has a greater faculty than he has for inspiring that spirit in others. That is a very big part of the success this organization has achieved. Mr. Easton selected the right men and then inspired them with his own enthusiasm.

"This company's success is traceable in a large degree to the unusual character of that one man. This argues well for the future of the company. It has taken a good many years to build up this body of men. And the result is that the Columbia Graphophone Co. to-day has more than its mere financial and physical existence. Imagine for a minute what would happen were this magnificent force to be disbanded! How many years would it take to build up an organization equal to this? You and I know that it would be the task of years. Therefore we are proud to know that this period of twenty-five years has resulted in establishing an organization which now we regard as in its prime, in its full maturity, and prepared to go forward to greater victories even than it has accomplished in the past. I want to propose the health of our honored president, E. D. Easton.

The toast was drunk standing and with cheers.

Mr. Easton briefly acknowledged the toast and again thanked the men for their devotion and services. After a short speech by Dr. St. John, who said he would sooner remove an appendix than make a speech any day, the gathering adjourned.

PEASE PIANO CO. EXPANSION

To Cope with Growing Business—P. Decker Again in Charge of the Department.

The Pease Piano Co., 128 West Forty-second street, New York, has enlarged its talking machine department to take care of its fast growing trade. P. Decker has again taken charge of this department after spending some time with the Berliner Gramophone Co., Montreal. Mr. Decker opened the Pease talking machine department two and a half years ago, and is therefore well acquainted with the Pease clientele. A complete stock of Victor and Columbia products is handled in this department.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., May 6.—PHONOGRAPH—Newman H. Holland, assignor to the New Jersey Patent Co., of West Orange, N. J. Patent No. 1,092,911.

This invention relates to phonographs and more particularly to new and improved means whereby the record of a phonograph may be readily disengaged from its support without damage to the record surface.

As ordinary phonograph records change in diameter to a considerable extent under different temperature conditions expanding under heat and contracting under cold, and as the supports upon which the records are mounted change but little in diameter under the same conditions and are so constructed that when the records are slipped thereon, a tight engagement will be maintained between the same and the records, it frequently happens that the latter become so tightly locked to their supports that it is practically impossible to remove them by hand without damage to them.

It is the principal object of this invention to overcome this difficulty by providing improved means for automatically loosening the record from its support so as to permit it to be readily removed by hand. In conformity with this object,

a movable record support is preferably provided and means mounted in proximity thereto for shifting the record relatively to the said support when the mandrel is moved from its normal position.

Other objects of the invention consist in the construction of parts and combinations of elements as will be more particularly pointed out in the claims.

Figure 1 represents a vertical longitudinal section through the center of the mandrel of a phonograph embodying my invention; Fig. 2 represents a similar view of a modification; and Fig. 3 represents a plan view of the left hand end of the mandrel.

SOUND BOX.—William W. Zackey, Philadelphia, Pa. Patent No. 1,092,552.

This invention relates to sound boxes for sound recording and reproducing machines, and has for an object to provide a diaphragm and mounting therefor, whereby not only is the sound reproduced in a desirable volume, but it is also perfect in quality and tone being free from metallic, grinding or scratching sounds.

It has for a further object to provide a sound box in which a portion of the diaphragm substantially floats within the box, and operates in conjunction with a flexible member formed of a

suitable fabric whereby a sensitive and delicate means of transmitting sound waves is provided.

It has for a further object to provide a novel mounting for the stylus bar which operates in conjunction with the novel diaphragm construction to produce a balanced condition which materially increases the effective action of the diaphragm in the reproduction of sounds.

Figure 1 represents a perspective of a sound box embodying my invention. Fig. 2 represents a section on line x-x of Fig. 1. Fig. 3 represents a plan of a portion of the sound box showing details of the stylus bar mounting. Fig. 4 repre-

sents a side elevation of the part shown in Fig. 3. Fig. 5 represents a perspective of one of the diaphragm springs. Fig. 6 represents a perspective of one of the stylus bar supporting ears.

RECORD-HOLDER.—Julius Roeber, New York City. Patent No. 1,094,476.

This invention relates to improvements in record holders for phonograph records and especially to that class of holders which are mounted on a wheel or other rotary device, so that the records can be brought into successive operation. In record holders of this kind it has been found difficult to get a structure which would permit of a record being easily slipped on or off the holder, and at the same time permit of the record being easily adjusted so that the needle of the reproducer will strike exactly in the right point of the record.

The object of the invention is to produce a record holder which will permit a record to be instantly slipped on endwise over the holder without the necessity of operating or adjusting any mechanism, and in which the record can then be accurately adjusted in relation to the stylus of the reproducer.

A further object of the invention is to produce a holder which is cheap to manufacture and simple in construction, and one in which the friction of rotation is reduced to a minimum.

Other objects of the invention are to produce a record holder upon which a record can be easily placed or removed, and on which the ends of the record are left entirely free so that there is no danger of breaking them, and nothing to interfere with their adjustment, and further to produce a record holder which can not only be adjusted in and out on its supports, but has a central driving

spindle extending through the support, and which can be entirely removed when necessary.

Another important feature of the invention is this: Phonograph records are of two general kinds, known in the trade as "wax records" and "indestructible records." The indestructible records can be carried on a skeleton holder, but the wax records cannot, because they are likely to collapse. Moreover, on record holders having a solid face, the wax records in either very warm or very cold weather are likely to stick so that they break in taking them off. I provide my record holder, however, with longitudinal corrugations so that it presents a good gripping surface to the inner wall of the cylinder, but will not stick closely to the wax record, and so such records can be easily placed on or taken off the record holder, while the holder is also as well adapted to securing a so-called indestructible record.

Figure 1 is a longitudinal section of a record holder embodying my invention, and Fig. 2 is an end view of the holder proper.

TONE-ARM FOR TALKING MACHINES.—Edmund Peltovitz, East Orange, N. J. Patent No. 1,094,166.

This invention has reference, generally, to improvements in tone arms for talking machines; and, the invention relates, more particularly, to a novel form of accordion-plaited stem for use with machines of the character above stated and with the amplifying horns employed with such machine, with a view of providing a means which will permit the sound box to be readily raised from its reproducing contact with the record cylinder of the phonograph, or from the record-disc of the gramophone or talking machine, without in the least affecting the relatively fixed position of

the amplifying horn; and, also to provide a tone-arm which will swing laterally as the sound box moves along the cylinder or from the central portion of the disc to the outer circumferential edge of the latter.

The invention has for its further object to provide a simple and effectively operating means which will modify the sound and will overcome absolutely the metallic or squeaky sounds caused by the usual amplifying horns.

The said invention consists, primarily, in the novel accordion-plaited tone-arm for phonographs and talking machines of the various constructions, and the amplifying horns therefor, hereinafter set forth; and, the said invention consists, furthermore, in the general arrangements and combinations of the various devices and parts, as well as in the details of the construction of the same, all of which will be more fully embodied in the clauses of the claim which are appended to and which form an essential part of this specification.

Figure 1 is a side elevation of one form of

talking machine and amplifying horn, with an accordion-plaited tone-arm made according to and embodying the principles of the present invention, said view illustrating also in connection with the said devices, one means for securing the tone-arm in its operative position with relation to the record-disc of the machine and to the amplifying horn. Fig. 2 is an enlarged top view of portions of the said accordion-plaited tone-arm, said view illustrating, also, the oscillatory relation of the parts of the said arm to each other. Fig. 3 is a view similar to that represented in said Fig. 1, showing the application of the accordion-plaited tone-arm to that style of talking machine or gramophone in which the amplifying horn is contained in the case or box of the talking machine.

Fig. 4 is an enlarged longitudinal vertical section of the accordion-plaited or bellows-portion of the tone-arm; Fig. 5 is a horizontal section of one form of supporting bracket for the tone-arm, said section being taken on line 5-5 in said Fig. 4, looking in the direction of the arrow x, and the parts of the supporting bracket being shown in their normal initial positions. Fig. 6 is a view

similar to that represented in said Fig. 5, the parts of the supporting-bracket being represented in their operated positions when one of the arm-sections, with which the sound box is connected, is slightly raised so as to elevate the sound box above the surface of and out of contact with the record-disc or cylinder. Fig. 7 is a horizontal section taken on line 7-7 in said Fig. 4; Fig. 8 is a transverse vertical section, taken on line 8-8 in Fig. 5; and Fig. 9 is a similar section, taken on line 9-9 in Fig. 6, all of said views being made upon a much larger scale.

TALKING MACHINE.—Joshua Green, of London, Eng. Patent No. 1,094,067.

This invention relates to improvements in talking machines and has mainly for its object to provide a machine which, while possessing a horn of full, or approximately full dimensions, yet when not required for use can be packed into a small space, thus rendering the machine eminent-

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 60).

ly suitable for many purposes, for example, for transport from place to place.

According to the invention the talking machine is constructed with a horn made in a number, preferably two, of parts, one of which is fixed within the casing of the machine and the other or others is or are adapted to telescope relatively thereto, so that when not required for use the said part or parts can be pushed partially or wholly within the fixed portion, but when required for use can be drawn out and turned into position to receive the tone-arm.

The invention can be advantageously employed in combination with the known type of machine in which the horn is placed below the motor and in which the case of the machine is of cylindrical construction. With such a machine I combine a horn consisting of a fixed or stationary portion arranged within the said cylinder so that its larger or flared end is flush with one end thereof, and of a second movable elbow shaped portion which can telescope into the fixed part. This movable part, which slides within the fixed portion, is preferably also of a taper shape so that when the complete horn is extended, it is of the normal, or approximately the normal contour. The meeting ends of the two parts of the horn are preferably screw-threaded, or provided with any other suitable device, by means of which they can be locked in position when the movable elbow part is drawn out and turned to bring it into the proper position for receiving the tone-arm, which, in the form of gramophone under consideration, is at the top of the cylinder body. The end of the casing which receives the moving elbow part of the horn is closed with a cover, which, however, is provided with a slotted portion at its lower part to

with during recording. It is also desirable that the recorder-reproducer be capable of lateral as well as vertical play when reproducing, but he locked absolutely against lateral play during recording; and in said patent this is accomplished by means of the engagement of the forward portion or nose of said weight within a fixed support. However, in the practical operation of the device of said prior Macdonald patent, it has been found that during the operation of recording, the suspended weight is so connected to the stem or neck of the recorder-reproducer as to exert upon the latter a drag, which although slight, is sometimes appreciable in preventing perfect accuracy of operation; and it has also been found that, owing perhaps to lack of utmost precision in wholesale manufacturing operations, the unintended looseness of the parts sometimes permits a slight lateral play of the diaphragm-head during recording.

According to the present invention, the vertically-swinging weight, though mounted upon the diaphragm-head or recorder-reproducer, is pivoted

thereon concentrically of the horizontal pivot or axis of the latter, so that the weight and the recorder-reproducer, in swinging vertically, swing independently of each other and without interference from each other.

One feature of the invention, then, consists of the novel arrangement and mounting of the weight.

Another feature of the invention consists of improved means for securing the recorder-reproducer against lateral play when recording. And the invention consists further in the various features of construction and arrangement hereinafter pointed out and claimed.

Figure 1 is an end view, partly in transverse section, of a dictation graphophone equipped with a preferred embodiment of the present invention; Fig. 2 is a longitudinal section through the novel mounting of the speaker and of the weight; and Fig. 3 is a similar view on an enlarged scale.

SOUND BOX AND MOUNTING THEREFOR.—Thomas H. Macdonald, assignor to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,093,710.

This invention relates to talking machines, particularly the type for carrying a disc record with lateral undulations and comprises an improved construction of sound-box and an improved manner of mounting it, preferably upon the well-known horizontally-swinging hollow arm that connects with the flaring horn.

The invention consists further in certain details that will be pointed out and claimed.

In the drawings, Figure 1 is a side elevation of the sound-box and arm attached to a machine.

Fig. 2 is a top view of the sound-box and the arm on which it is mounted. Figs. 3 and 4 are details on a larger scale showing respectively the adjacent faces of the sound-box and of the end of the arm. Fig. 5 is a transverse section, through the line V-V of Fig. 2. Fig. 6 is a detail show-

ing the manner of securing the stylus-bar to the sound-box.

TALKING MACHINE.—Eugene A. Friedlander, of Cleveland, O. Patent No. 1,093,611.

The present invention relates in general to talking machines, and is intended particularly to provide protection for the delicate mechanism employed in such machines.

The general object of the invention, therefore, is to provide a protective inclosure for talking machines which will still allow the swinging move-

ment of the tone-arm, and which will also allow easy access to the reproducing mechanism.

In said annexed drawings:—Figure 1 is a side elevation of a machine embodying my invention, certain parts being diagrammatically shown; Fig. 2 is a top plan, certain parts being diagrammatically shown in alternative positions; Fig. 3 is a front elevation, and Fig. 4 is a section on the line A A of Fig. 2.

CONTAINS INTERESTING FEATURES.

The Victor Co.'s Semi-Annual Catalog, Complete to Date, Just Issued—Publication Devoted to Dance Records Exclusively.

The Victor Co. sent out recently its regular semi-annual complete catalog of all Victor records issued to date. Arranged and compiled in the usual thorough and high-grade Victor style, this catalog embodies certain additions and improvements which should considerably enhance its value. Accompanying this record catalog was an attractive publication listing Victor dance records exclusively. Mr. and Mrs. Vernon Castle, the popular interpreters of the modern dances, are shown dancing all the latest dances, while an original feature of this publication is the listing of the number of measures or bars to each minute, after the name of each selection. Customers can thus select records played at any speed desired.

T. A. EDISON HOME FROM FLORIDA.

Thomas A. Edison returned to his home April 20 after an outing to Florida which he enjoyed very much and which benefited him considerably. On his trip South Mr. Edison was accompanied by a number of prominent captains of industry, including Henry Ford, the well-known automobile manufacturer.

receive the extremity of the horn when the latter is turned down and telescoped into the fixed horn part. It will thus be seen that when the machine is dismantled it occupies a space which practically corresponds with that of the casing. Furthermore, means may advantageously be provided in conjunction with the flared end of the horn whereby the said end may be adapted to receive a carrier or holder for records or the usual turntable when the machine is not required for use. The holder or turn-table thus constitutes a cover to the open end of the horn which may serve as a receptacle for the tone-arm.

In the accompanying drawings—Figure 1 is a sectional side view of one form of gramophone machine made according to the invention. Fig. 2 is a plan view thereof. Fig. 3 is a view similar to Fig. 1 but showing the horn in the collapsed position, and Fig. 4 is an end view showing the parts in the position illustrated in Fig. 3.

COMBINED RECORDER AND REPRODUCER.—John J. Scully, assignor to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,093,732.

This invention relates to talking machines whose "speaker" or "diaphragm-head," sometimes referred to as the "recorder-reproducer," is provided with two styli upon the one diaphragm, and is adapted to be shifted longitudinally for use interchangeably as a recorder or as a reproducer.

More particularly, the present invention may be regarded as an improvement upon the structure set forth in the prior Macdonald Patent No. 1,003,625, granted September 19, 1911. In instruments of this character it is desirable that the recorder-reproducer be comparatively light when recording, but comparatively heavy when reproducing; and in said Patent No. 1,003,625, this is accomplished by means of a vertically-movable weight pivoted upon the neck of the diaphragm-head in such manner that it will bear its full weight upon the upper face of said head during the operation of reproducing, but will be held out of contact there-

PAVLOWA AND THE GRAFONOLA.

The Internationally Famous Russian Dancer Pays a Great Tribute to the Grafonola and Columbia Records in Recent Letter.

A most notable testimonial to the merits of the Grafonola was received last week by the Columbia Graphophone Co. from Anna Pavlowa, the famous Russian dancer, whose tour in this country has been a continual chain of triumphs. From coast to coast Mlle. Pavlowa has been the subject of the most enthusiastic praise from well-known critics and artists, and her interpretations of numerous beautiful dances have been commended even through the medium of editorial articles in the country's leading newspapers. Her exceptional grace and charm have given a prestige to the terpsichorean art that has made her internationally famous.

Mlle. Pavlowa's praise of the Columbia Grafo-

Mlle. Anna Pavlowa, the Famous Danseuse.

nola and Columbia records, dance selections in particular, is embodied in the following interesting letter written under date of April 20:

"Since I have been in your country I have been amazed to see the popularity of the talking machine record when used with the dance. This so excited my curiosity that I have made it a great study and think it is due you to say that Columbia instruments and Columbia dance records over all others have my unqualified endorsement.

"I used your Grafonola and dance records in my rehearsals with complete satisfaction, and find your dance records truly represent the very spirit of the dance. Their tempo, rhythm, clarity and musical qualities simply charm me. I am convinced that all who dance can get great satisfaction from the use of your Grafonola and records. Sincerely yours, (Signed) ANNA PAVLOWA."

EMPHASIZED VICTOR CO-OPERATION.

In sending out its usual monthly batch of newspaper advertisements the Victor Co. called attention to the article published in the Philadelphia Ledger some time since, wherein the consistency of Victor advertising was described in detail. The company suggests that Victor dealers should take advantage of the co-operation offered them by the use of these regular Victor advertisements.

WHY OWN WEBSTER'S NEW INTERNATIONAL DICTIONARY

THE MERRIAM WEBSTER?

BECAUSE it is the only new unabridged dictionary in many years. BECAUSE it defines over 400,000 words, 2700 pages, 6000 illustrations. BECAUSE it is the only dictionary with the new divided page. BECAUSE he who knows *Why Succeed*. Let us tell you about this new work. WRITE for specimens of the new divided page, full particulars, etc.

G. & C. MERRIAM CO., Springfield, Mass.

Mention this paper, receive FREE, set of Pocket Maps

READ your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

ALL READY FOR BIG CONVENTION AT ATLANTIC CITY.

Officers of National Association of Talking Machine Jobbers Have Perfected Plans for Big Gathering to Be Held at the Hotel Chalfonte, Atlantic City, on July 6, 7 and 8—Indications Point to a Large Attendance—Arrangements Committee Working Hard.

Plans have all been completed for the big annual convention of the National Association of Talking Machine Jobbers to be held at the Hotel Chalfonte at Atlantic City on July 6, 7 and 8, and the only thing now lacking is the enthusiastic crowd of association members. The present prospects are that the Convention will be the best attended and most successful ever held under the auspices of the association, and the committee in charge of the arrangements, of which L. C. Wiswell is chairman, has spared no pains to lay out a program that will make every moment interesting.

In addition to a number of talks and discussions of a strictly business nature, but of great importance to the jobbers, and which will take up most of the time in the regular session, the matter of pleasure has also received due attention. The entertainment under this head will be automobile rides for the ladies, lunches, dances, cabarets and a big banquet on Tuesday evening, July 7.

The indications are that the banquet will be a record-breaker on the point of pure joyousness, for it will be held at Barney's Hotel, one of the most popular places in Atlantic City, and the excellent menu will be supplemented by an entertainment provided by the regular hotel orchestra and force of cabaret artists. One of the principal speakers in addition to the prominent members of the trade will be the Hon. Walter I. McCoy, Congressman of the Ninth District of New Jersey, who will address the jobbers on the subject of "Unfair Competitions."

On Monday night, after the strenuous day of association work, the members and their lady folk will adjourn to Barney's, where a balcony has been reserved for the party.

The officers of the association and the various committees have worked hard to insure a record-breaking attendance at the meeting. Postcards and letters galore have been sent to members to preclude any possibility of their forgetting the Atlantic City session. One of the reminders is in the form of a shipping tag, on the back of which appears the words, "Tie this string on the middle finger of your left hand so you won't forget the date of the big show. Selah!"

In his efforts to insure a big attendance, Chairman Wiswell, of the Arrangement Committee, even lapsed into verse, and was responsible for the following effusion in one of his letters to association members:

GOOD RECORD TURNS TRAITOR.

Old Couple Shocked When Sacred Record Produced Air of Popular Song—A Joke That Worked to Perfection—Has a Happy Ending.

The World of Records, the bright little magazine issued every month by the London organization of the Columbia Graphophone Co., tells the following good story:

"An elderly friend of mine once won a graphophone in a competition. One record only accompanied the instrument, a sacred piece, which was played over and over again, to the great delight of the old gentleman and his wife. Their knowledge of graphophones was very limited and they had no idea that records of other songs could be bought and played by the instrument. Getting to know this, I thought I would have some fun with the old couple. Having some records of the right size, I called on my 'victims' one evening and managed to substitute 'Salvation Nell' for their sacred tune record. Out came the instrument in due course,

BE A BOOSTER.

"Be a Booster, friend of mine,
It cannot do you harm;
'Twill give you prestige every time
To tell where you are from.

Don't be ashamed of what you do,
Speak out and let them see;
That you're a Booster thru and thru,
And a Booster you will be.

For the meeting place, Atlantic City face,
July, the merry time
We're going to make that Boardwalk shake,
With song and jolly rhyme.

It's up to you, it's up to me,
To Boost along the game;
Just be on hand and then you'll see
All troubles put to shame.

Get in line, say you'll go,
Let the other fellow see,
That you are ready now to show
What the Association ought to be."

Benj. Switky, chairman of the Reception Committee, not to be outdone, took "The Eighth Annual Convention" as the subject, and developed the following bit of verse, in which will be noticed that the first letters of each line taken together have a meaning all their own:

DEAR FELLOW-JOBBER, ATTENTION!

THE EIGHTH ANNUAL CONVENTION,
Hotel Chalfonte, Atlantic City, N. J.,
Expects your presence without fail.

Every Jobber should attend
In the interest of his business.
Go to Atlantic City, July 6, 7, and 8.
Hear, see and profit.
There will be lots to learn.
Have a jolly time incidentally.

And bring your wife and friends along.
No money was ever spent more wisely.
Never was time put to better account.
Urge your fellow-Jobber to attend.
All should work for the welfare of the Association.
Let's make this Convention a howling success!

Compare notes with fellow-members.
Opinions are wanted regarding certain policies.
New ideas will be proposed and discussed.
Victor record shortage will be explained—satisfactorily.
Everything of interest and profit will be reviewed.
No Jobber can afford to stay away.
The Victor Co. has some thing to show you.
Important announcements will be made.
Organized action begets results.
Notify Chairman Wiswell that you're coming.

This is going to be a wonderful convention! Everybody says so. Atlantic City is the favorite resort of the jobbers, and they will prove their interest in both the resort and the association by arriving there in large numbers.

and I think I never saw such a look of blank amazement as was pictured on the faces of that couple as their graphophone gurgled out the words of that song. They were as mystified as a prehistoric man might have been in similar circumstances. Before I went home I contrived to replace the original record, and until I took pity on them and explained how it happened, some weeks later, the pair were quite unable to account for that sad lapse of their strictly moral and religious graphophone."

RECORD DISPLAY STAND.

The Chambers street headquarters of the Columbia Co. sent to local dealers this week a record display stand that embodies a number of distinctive features which are making it very popular with the trade. The stand is very attractive in its design and a complete service of new record strips, together with the stand, is furnished the dealers at a cost of seventy-five cents per month for a period of six months.

DOLBEER GOES WITH VICTOR CO.

Popular Talking Machine Man Joins Victor Organization, Succeeding Oliver Jones, Who Resigns to Enter the Real Estate Business.

(Special to The Talking Machine World.)

CAMDEN, N. J., June 10.—Louis F. Geissler, general manager of the Victor Talking Machine Co., issued the attached announcement to-day:

"It is with much pleasure that we announce to the many business friends of F. K. Dolbeer, his affiliation with this company in the capacity of credit manager and for such other duties as his long experience in the talking machine trade has so eminently fitted him.

"Mr. Dolbeer will assume his duties with us on July 1, and we feel sure that his personal friends and ours will extend to him an unusually warm welcome to the Victor fold."

Frank K. Dolbeer, who recently resigned from his position as sales manager of Thomas A. Edison, Inc., to engage in the jobbing business in New York, is one of the most popular men in the trade, and has an intimate acquaintance with the talking machine jobbers and dealers throughout the country, all of whom entertain the warmest personal and business regard for him.

This new move will come somewhat in the nature of a surprise to his many friends throughout the trade, and he is assured of a warm welcome from Victor representatives everywhere.

Mr. Dolbeer will not begin his connection with the Victor Co. until the first of July, and he is at present taking several weeks' vacation at the Thousand Islands.

Oliver Jones, who has been connected with the Victor Co. ever since its formation, and whom Mr. Dolbeer succeeds, has resigned in order to enter the real estate field in Atlantic City and Philadelphia, where he has considerable holdings.

ARE THERE IDEAL DAYS?

The Advantage of Present Hustle—Many Salesmen Quick to Lay Down at Complaints.

The man that comes back a little stronger for every obstacle he encounters gets there just the same.

Good times in any locality are when everybody is feeling good and full of push. If there is any complaining in a certain section 80 per cent. of the salesmen, that is those with a weak spine, lay down.

Generally speaking, there is just as much business done in that locality as there was the year before, and the other 20 per cent. of the men that cannot be run out have a good deal better chance for business than they had before.

The business man gets to feeling that business is bad sometimes when there is only as much doing as there was in the year previous. He may be doing just as much business as he did the year before, and is just as well off. The only difference is in his condition of mind.

Of course, every business man likes to see business increase, but if it does not increase it is because he is waiting for something to turn up and does not go out and turn it up himself.

Everybody has his own troubles and succeeds in spite of them, or fails because his power of resistance is weak.

As a rule the man that glories in obstacles gets the most happiness out of business.

THE PORTER PHONETOSCOPE CO.

(Special to The Talking Machine World.)

DOVER, DEL., June 8.—The Porter Phonotoscope Co. filed a certificate of incorporation this week with the Secretary of State to manufacture phonetic apparatus for talking, singing and moving pictures. The capital is mentioned as \$1,500,000 and the incorporators as F. R. Hansell, Philadelphia, Pa.; George H. B. Martin and S. C. Seymour, Camden, N. J.

DEALERS AFTER SUMMER TRADE ON PACIFIC COAST.

Cheaper Grades of Portable Machines Being Advertised for Use at Cottages and Camps
—Various Houses Carrying Out Improvements in Their Quarters—Good Reports from
the Interior—New Manager in Seattle—Talker Music for Convicts.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., June 6.—Emphasis is now being placed on the cheaper machines suitable for summer cottage and camp use, and considerable business has been done on this class of talking machines in the past two weeks, with indications that the demand will increase as the warm weather sets in and schools close, which marks the opening of the vacation period proper. The demand, however, is not confined to the cheaper products, as May generally was a very good month. All prices of machines had a normal call, and record business was thoroughly satisfactory, considering the general level of business in other lines. Some managers report a larger volume of business for May than April, and no complaints were registered in April. No falling off is noted as yet in the demand for dance records and none is anticipated by the local trade for some time to come. The tendency among talking machine interests of this city to seek more desirable locations and provide increased facilities is very good evidence that the trade is in a healthy condition.

P. H. Beck & Co. Plan Improvements.

P. H. Beck & Co., who operate the department on the mezzanine floor of the Kohler & Chase building, are the latest concern to signify intention of making improvements this summer. They are negotiating for additional space in the building adjoining, which will give them practically double the floor space now available. Mr. Beck has felt the need of larger quarters for several months and will begin the remodeling of the department as soon as possible. He plans to install seven demonstration rooms in the new space, which will be connected with the present quarters by an archway. He says May business in his department showed a gain over April.

Work on New Babson Bros.' Store.

Alterations started two weeks ago at the store, 235 Geary street, upon which Babson Bros. secured a lease a short time ago, and work is progressing nicely. The plans call for the installation of a new front and a general renovation of the interior, including the installation of several sound-proof demonstration rooms and a recital hall. Upon moving to the new quarters the firm name will be changed to the Phonograph Co. of San Francisco, which is a newly formed local corporation organized to take over the business. J. S. Baley will continue as manager, and Edison products will be handled exclusively at the new establishment the same as heretofore.

W. S. Gray Spends Much Time on Road.

W. S. Gray, Coast manager of the Columbia Graphophone Co., has not been at headquarters much the past month. A few days after his return from the Northwest he left for Modesto, Cal., to attend the formal opening of the new Columbia department installed by the Weil Furniture Co., of that city. While in that vicinity he called on the trade in the neighboring towns and later in the month made a trip up into Sonoma County, with Santa Rosa as his objective point, the principal object of his visit being to attend the formal opening of a new Columbia department by the Santa Rosa Furniture Co. Both the Weil Co. and the Santa Rosa concern have arranged to devote particular attention to their new departments. They have fitted up well-appointed quarters and have started with complete stocks of machines and records. Mr. Gray says the country looks fine all along the line and that dealers are in very good spirits over the outlook for fall business.

Columbia Business Keeps Up Well.

F. R. Anglemier, wholesale manager at the local Columbia warerooms, says business in both machines and records kept up in good shape the past month.

"Talker" Man on Long Auto Trip.

Charles Moran, manager of the talking machine and small goods departments of the Hauschildt Music Co., accompanied Henry Hauschildt, head of the firm, and family on an eight-day motor trip up to Lakeport, Mendocino County, the latter part of May.

Frank and Clarence Anrys in the East.

Clarence Anrys, of the Wiley B. Allen Co.'s talking machine department, left for the East on May 20 with his father, Frank Anrys, general manager of the Allen Co. They planned to be gone for five or six weeks, visiting various factories whose lines are handled by the company, including a visit to the factory of the Victor Talking Machine Co.

Retail Victor Business Grows.

Andrew G. McCarthy, treasurer of Sherman, Clay & Co., says their retail Victor Victrola business for May this year showed a gain over the corresponding month of last year, while the wholesale department held its own very well also.

New Manager in Seattle.

The Kohler & Chase talking machine department in Seattle, Wash., is now under the management of Andrew Love, who was formerly with the Columbia Graphophone Co. in that city, succeeding Mr. Dawley, who resigned a short time ago.

Columbia Leader Machines Popular.

A. A. Schell, manager of the Emporium music department, has just returned from a combined business and pleasure trip to Portland, Ore. He says business is keeping up in fine shape in the talking machine section, where the demand runs strongly to Columbia "Leader" machines. Many people were attracted to the department one day last week when a special recital of Margaret Woodrow Wilson's records was given.

Talking Machine Music in Jail.

An innovation has been introduced at the Alameda County jail by Sheriff Frank Barnet in the way of providing music during the social half hour from 4 to 4.30 each afternoon. For this purpose he has had a phonograph placed in the main corridor of the jail and has donated 100 records to start with, promising to buy more from time to time as requests are made. The entire expense of the machine and records was borne by the Sheriff, who stated upon making the purchase that he believed that the innovation would not only give pleasure to those serving sentence, but would serve as an aid in discipline.

Trade Shift at Long Beach.

The stock of talking machines, small goods, etc., of the Mason Music Co., of Long Beach, Cal., has been purchased by the Carlton Music Co., of that city. The Carlton Co. already had the selling agency for the Columbia Grafonola line, and by buying out the Mason Co. secured the agencies for the Victor and Edison lines. The son of Mr. Mason, of the retiring company, who was associated with his father in the business, has accepted a position with the Carlton Co.

IN NEW QUARTERS JUNE 1.

Ray Bros., who have built up a large talking machine business in Louisville, Ky., moved on June 1 from their old store at 308 West Jefferson street, to the new Paul Jones Building on Fourth street, where they have spacious quarters with a full equipment of sound-proof booths. The officers of the company are: C. A. Ray, Jr., president; L. J. Ray, secretary; H. G. Ray, treasurer.

TAKES ON TALKING MACHINES.

(Special to The Talking Machine World.)

ANAHEIM, CAL., June 6.—The Graham Furniture Co., one of the largest and finest furniture houses in this part of the country, located in this city, has just taken on the agency for the Edison disc phonograph. Albert Graham, who owns and conducts the enterprise, will take a strong personal interest in the new department.

Many a man who is credited with being wise enough to keep silent, is really growing deaf—but won't acknowledge it.

The Success of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.
This admitted makes it important that you secure the best service obtainable.

AND THAT IS EASTERN SERVICE

To use it is to swear *By* it not *At* it.
May we not have the opportunity to convince you that our service is exceptional?

Address NATIONAL PUBLISHING CO., 235 South American St., Philadelphia, Pa.

THE EDISON SHOP IN ST. PAUL

To Be Opened by Laurence H. Lucker on July 1—Mr. and Mrs. Matheis on Auto Tour—Columbia Products with Golden Rule Store—Dance Instruction Records Much in Vogue—News of Month.

(Special to The Talking Machine World.)

MINNEAPOLIS AND ST. PAUL, June 8.—St. Paul will have a new talking machine palace about July 1 under the management of Laurence H. Lucker. It will be called the Edison Shop and will be located in the center of the best business district. Mr. Lucker says that he purposes to make this the finest retail phonograph store in the Northwest and will work hard for the retail trade in that city. It will have no connection with the Minnesota Phonograph Co. at 58 East Seventh street, St. Paul, which is controlled by Mr. Lucker's brother.

Speaking of the May business, Mr. Lucker said that the volume both in the wholesale and retail departments exceeded that of May, 1913, by 100 per cent. The indications are that the demand for Edison's instruments and records not only will continue but will greatly increase. A carload of \$80 disc machines, received June 2, is disappearing like mist before the sun.

Mr. and Mrs. Archie Matheis, of the Talking Machine Co., Minnesota, are planning an automobile tour from Minneapolis to the Victor works at Camden, N. J. They will leave about June 25 and are to be gone five or six weeks, camping out every night. They will tour through Iowa, Illinois, will make a short stop near Columbus, O., at Mrs. Matheis' former home and will then proceed east. A sleeping tent and a full camping outfit will complete their caravan. Mr. Matheis states that he has had great success of late with the new Victrola No. 11, which seems to fill a general demand, in Minneapolis at least. May business was beyond all expectations and June is likely to show equally large returns, as the annual migration from town to the lakes is stimulating the demand for machines, but particularly for records.

The new dance instruction records issued by the Columbia Co. are making a most decided hit in St. Paul and Minneapolis. With a set of these records any of the modern dances can be learned without a teacher, and that in short order, while the dance music selections are the best in their class. These records are being featured in all the Columbia publicity work campaigns in the Twin Cities and are expected to make a wide appeal to cottagers and campers at summer resorts of the Northwest.

C. P. Herdman, manager of the Columbia St. Paul store, will leave soon on a two weeks' vacation, which he will spend among friends and relatives in Cincinnati.

A rather unique advertising feature is being introduced by the Minneapolis Brewing Co., which, in order to advertise its new brew, "Zumalweiss," is giving away free talking machine records of a song in which the name of the new brew appears.

The Golden Rule department store, in its new building in St. Paul, which covers almost an entire block, will put in a full line of Columbia instruments and records in its talking machine department. It now handles only the Victor line.

WIN IN COLLECTING CONTEST.

Employees of the Branch of the Columbia Graphophone Co., in Washington, D. C., Prove the Victors and Are Entertained at Dinner—Some of Those Present.

(Special to The Talking Machine World.)

WASHINGTON, D. C., June 6.—Employees of the Columbia Graphophone Co. were tendered a banquet recently in celebration of the victory of the Washington office force in winning first prize in an account collecting contest, conducted by the main office. Those present included Harry C. Grove, local manager; William T. Graves, Howard E. Stewart, Raymond H. Keller, LeRoy McDowell, Charles Hill, Harry Green, Milton McIntosh, Charles Thomas, William Matthews, John Affatica, Henry McGee, Edward Wittier, Waldon Fawcett and Paul Cromelin.

"CANNED" TRAVEL TALKS NEW IDEA.

Hamburg-American Line Introduces Records Reproducing Lectures by Noted World Travelers Big Library Being Prepared.

A new attraction has been added to the talking machine by the introduction of travel talks, or illustrated lecture records. A famous lecturer is engaged to speak on some popular subject and his voice is "canned" just as in the case of some great singer. To complete the illusion of listening to an illustrated lecture in one's own home the record is illustrated by an attractively illustrated booklet. As the voice of the lecturer describes many famous scenes one has merely to turn the pages of the booklet to have the scene actually before the eyes.

A complete library of travel records delivered by the most popular lecturers is being prepared so that every taste may be satisfied. The records are of standard make and every care is taken to obtain perfect reproduction. The "canned" travel talk has many advantages over the original lecture. If one wishes to linger over a particular scene the lecturer will very obligingly repeat his travel talk or any part of it.

The first of these travel records entitled "A Day in Berlin," prepared and delivered by E. M. Newman, has proved an instantaneous success. Thousands of owners of phonographs who are constantly looking for some new record have taken advantage of this unique educational feature.

The records are prepared by the Travel Record Department of the Hamburg-American Line and sold at the nominal price of twenty-five cents, to cover packing and shipping. The record will be followed by similar travel talks on Paris, London and Hamburg. Other records will describe and illustrate a trip in a Zeppelin air ship, and short trips in Germany, France, England, the Land of the Midnight Sun, and a description of the "Waterland," the world's largest ship.

Idle clerks are a sign of a lazy manager.

THE VALUE OF ADVERTISING

is Now Recognized by Progressive Men in All Trade Fields—Like the Magnet It Draws Trade in Unexpected and Unaccountable Ways—How It Compares with Electricity.

Advertising is a magnet of unmeasured strength. It draws trade in unexpected and unaccountable ways. Like electricity, it is an art yet in its infancy, and while it has been wonderfully developed its unknown possibilities are far greater than those with which we are all familiar.

Electricity is daily surprising us with new miracles, none of which is more marvelous than wireless telegraphy. An apt illustration of the way in which wireless spreads to every quarter of the world is that given by a country school teacher, who likened it to the effect on a pool of water when a stone is cast into it and causes rippling waves to spread out over a large surface. The same idea can be applied to advertising. Words placed in a good advertising medium are distributed over large areas and messages sent out reach many people who would otherwise never know of the existence of the advertising firm.

Like electricity again, advertising is a wonderful current revivifying and oftentimes rejuvenating a business that has fallen into a rut or become dormant. Yet, like electricity, advertising is dangerous to fool with. Woe to the man who advertises falsely! His business electrocution, or at least severe burns, are sure to follow a current of words carelessly handled.

The results of advertising are measured in dollars and cents, the meter being the cash drawer—again proving similar to the electrical current, its strength being measured in watts and candlepower.

Both are mighty factors in the modern development of business, but both advertising and electricity have often been improperly employed in the past, being used as trick performers use other novelties to confuse and puzzle, rather than to enlighten the people. However, the public is only momentarily dazzled, and, unless these strong fac-

tors are properly handled, like a flash the power is short-circuited and the value lost.

The wise advertiser will store up his energy and charge his batteries only with reliable information, and will find that, with truth as a foundation, his messages will be considered of sufficient value to be carried far beyond their measured destinations, and returns will flow in from various unknown quarters.

NEW DEPARTMENT IN INDIANAPOLIS.

New York Store, One of the Largest Department Stores in the City, to Handle the Victor Line—General Run of Trade Excellent—Fraud Advertising Receiving Attention.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., June 8.—The New York Store, one of the largest department stores in the Middle West, situated in East Washington street, Indianapolis, has opened a Victor talking machine department. Practically all the large department stores now have such a department. The New York Store will obtain its machines and records from the Stewart Talking Machine Co., jobbers in Indiana for the Victor Co.

Although the mercury has been climbing higher, the demand for dance records has not diminished in the Hoosier capital. The record put out by the Columbia Graphophone Co. explaining the tango step is having a large sale.

While there appears to be a slump in the piano business, talking machine dealers assert that they are surprised at the manner in which business in their line is holding up. Slack trade is expected at this time of year, but the talking machine dealers say they have no grounds for complaint.

The Victor department of the Aeolian Co.'s branch house here is enjoying an excellent trade for this time of the year. While this department is filling the big demand for dance records, classical records are also being sold often. More records are available now than for the last few months.

One of the windows of the Columbia Grapho-

phone Co., in North Pennsylvania street, is attracting wide attention. Life-size plaster paris figures of an infantryman and a dreadnought gunner occupy the center of the window and several army muskets which could tell tales of bloody battles in the Civil War are on display. The window was designed by H. M. Wright especially for Memorial Day. The large crowds in the city for the speedway automobile race paid particular attention to the unusual display.

One division of the Chamber of Commerce is paying attention to fraudulent advertising. This division is paying for advertisements in the local newspapers, requesting persons who suffer through such advertising to make known to the division that advantage has been taken of them. An attorney has been employed to handle such cases.

Little sensational or alleged fraudulent advertising from musical instrument houses has found its way into Indianapolis newspapers, but there have been one or two complaints. It is the object of the Chamber of Commerce to wipe out fraudulent advertising and thus strengthen the confidence of the buyer in the representations made in newspaper advertisements.

Local talking machine men and managers of piano houses are thoroughly in accord with the plans of the Chamber of Commerce along these lines.

ATTRACTIVE VICTOR FOLDER.

The Victor Talking Machine Co. sent out to its trade recently an attractive four-page folder giving a list of the Victor dance records that have been personally selected by Mr. and Mrs. Vernon Castle for use at Castle House and on board the Hamburg-American line steamer "Victoria Luise," where a Castle House instructor will teach the modern dances on her various cruises. The cover showed, in two colors, Castle House on Forty-sixth street, New York, and the "Victoria Luise," which is one of the most popular ships now making cruises to different parts of the world. The Victor records listed include tangos, maxixes, hesitation waltzes and one-steps.

Victrolas and Record Stocks Short

Be just to yourself and your customers

You owe it to yourself and your customers to give us a trial at filling your orders before you lose a sale by telling them that you "haven't got it and can't get it."

We cannot truthfully boast

about the completeness of machine and record stocks; nevertheless you can get from us certain types of machines and many selections of records that are not to be gotten elsewhere. New numbers are coming in daily.

Edison Phonographs Speak for Themselves

Always, everywhere, the Edison Phonograph, whether Diamond Disc or Amberola, has proved itself its own best salesman.

It does more than speak for itself—it sells itself.

Most people know a good deal about phonographs these days. They know a good phonograph when they hear one.

They know what it means to have all the bother of changing needles completely eliminated.

They can appreciate Edison tone, the full sweet tone that brings out the true quality of the original music—and *all* of it.

LOUIS XV

Model A425, Circassian
Walnut, \$425.00
Model A375, Mahogany,
\$375.00

They are mighty glad to find records that the children can easily handle.

They like a phonograph with volume of tone that suits it for singing music and out-of-door use.

They are quick to notice Edison steady speed and constant pitch.

And last, but by no means least, they appreciate the tastefully finished Edison cabinets that fit in with any scheme of interior decoration.

That is why Edison dealers have found that people who really love phonographs are always their best prospects.

The nearest Edison jobber will give you full details as to price and terms.

We shall be glad to give you his name.

A FEW BUSINESS SUGGESTIONS FOR THE DEALER.

Benj. Switky the Prominent Victor Distributer of New York Discusses Means for Improving Summer Business and Proper Methods of Store Cleaning and Urges Early Preparation for Fall Trade—Machine and Record Stock Should Be in Perfect Trim.

Even at the risk of being called a garrulous, meddlesome, would-be-know-it-all, I can conceive of nothing more beneficial than to talk to dealers and salesmen about their own affairs. The object is not so much to impress upon them my own ideas as to spur them on to devote more time and thought to the upbuilding of their business. Should some of my suggestions sound so simple as to seem silly or superfluous please remember, dear reader, that I am talking to the other fellow and not you.

What are you going to do this summer? Have you any definite plan of action? While we don't like to admit it, it is a fact, nevertheless, that business falls off somewhat with most dealers during the summer months.

Suppose we were to plan a campaign of activity to offset the inactivity. I would suggest dividing the campaign into three sections, as follows:

1. How to improve summer business.
2. General store-cleaning.
3. Anticipating fall business.

How to Improve Summer Business.

Feature as strongly as possible the small size Victrolas and the dance records. Right now is the time to make an attractive window display, calling attention of passers-by to the advantages offered by the little Victrolas as regards quality, price, portability and easy terms.

Many owners of large Victrolas will welcome the suggestion that they take a small machine with them to the country, rather than risk carting the big machine to and fro.

Some of the prospects that you have been working on and which are not likely to be consummated as sales until next fall can be closed at once by offering to sell them a small Victrola for summer use, with the promise of redeeming it at full value in the fall when they are ready to get the big machine.

It might also be well to offer to rent a number of small machines at moderate charge, to encourage the sale of records during the summer.

This summer there will be a golden harvest for those dealers who will plug hard for the suburban, country and seashore trade. House-to-house canvassing, with a sample machine and records for demonstration, will bring the results.

The dance craze is neither a past nor passing fancy. The European love of outdoor dancing will yet be transplanted to this country—and this summer you will see the beginning. The small machines, from \$15 to \$50, together with popular

dance records, will surely be greatly in demand.

Of course, it is to be hoped that the manufacturers will be on the job and see to it that the supply shall be plentiful; otherwise it will be another case of "the best laid plans of mice and men (jobbers and dealers) aft gang alee."

General Store-Cleaning.
