Begin by taking inventory, if you have not already done so recently. The benefits are two-fold: If the returns show favorably, you cannot help but feel optimistic in spite of the lull in business—which is a good way to feel in the summer time. If the stock taking figures poorly, it will act as a warning that something is wrong somewhere.

Next you will tackle the instalment and the charge accounts—those which have been overlooked or neglected. You should make these accounts mark time and keep in step. Then you will get after the surplus stock. In the summer time you are able to devote a little extra time and effort in trying to work off surplus.

Some dealers will discover, through their inventory, that they have scattered about the store a lot of miscellaneous machines which were taken in exchange during the past few months. With a little attention, these nondescript, more-or-less junky outfits can be put in salable condition—missing parts replaced, motors overhauled, etc. Every time you sell one of these outfits it feels like finding money, or at least like doing business on a hundred per cent. margin.

Do you regularly run your fingers through your record stock just to see if any records are misplaced? If not, try it! You will find it worth your while.

Overhaul your mailing list. Cut out those names which you know to be valueless. There are several ways of testing the value of names on your list. Have made a little rubber stamp, which will imprint on every envelope the words, "If undeliverable, sender will forward postage for return," or words to that effect. Or, by using two-cent stamps occasionally, instead of one-cent stamps, the post-office will return all mail that is undeliverable for any reason.

A still better way is to send out double post-card asking your customers to use the reply card to let you know whether they are interested in receiving the monthly supplements. You will then be in a position to strike off the list the names of those who did not feel it worth while to respond.

Every retail store will supply quite a lot of just

such work, and summer is the best time to do it.

Anticipating Fall Business.

There are still a goodly number of stores that are not tuned ready for playing. There is room for inexpensive, but much-needed improvement in the way of attractive interior decoration and arrangement. The installation of soundproof rooms is a good summer resolution. This work should be done now. Don't be like the fellow that Uncle Josh tells us about—the chap whose house had a leaky roof. When it rained he couldn't fix it, and when it wasn't raining it didn't need fixing. It is no excuse to say that when you are busy alteration or building is impossible, and when you are not busy you do not feel like spending the money. Remember the past and prepare for the future.

The outside appearance of the store should receive some thought, also. A good impression is the first requisite to a sale. Outside signs that catch the eye from a distance of 100 or 200 feet are equivalent to a saving in rent. They give you the prominence to be had only by a store near the corner, and we all know that rent is highest at the corner.

The final act of preparedness in anticipation of fall business is to get your machine and record stock in perfect trim—as perfect as conditions will allow at least. You are now ready for the real rush. It will come, and you will get your share because you will have done everything to deserve it.

CONDITIONS IN TEXAS

Discussed by Rafael Cabanas, President of the Mexican Phonograph Co. and the Southwestern Talking Machine Co. of Dallas and El Paso—Mexican Situation Discouraging.

Rafael Cabanas, president of the Mexican Phonograph Co., Mexico City, Mex., and the Southwestern Talking Machine Co., Dallas and El Paso, Tex., all of which are exclusive Columbia dealers and distributors, was a visitor for a few days this week at the executive offices of the Columbia Graphophone Co., Woolworth building, New York.

In a chat with The Review Mr. Cabanas spoke very encouragingly regarding the Dallas house of his company, stating that so far this year all previous records for corresponding months have been broken. The company but recently moved into larger quarters, which were made necessary by its increased and rapidly growing business. The El Paso branch is also making satisfactory headway and doing a very pleasing business notwithstanding its close proximity to the Mexican border and a general business depression in this part of the State. The Mexican situation shows no change for the better and the immediate outlook here is not encouraging.

The DITSON Pledge

Is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind, not to mention cabinets, needles and trade-marked accessories.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

OLIVER DITSON CO., Boston, Mass.

As an aid in the schoolroom the talking machine now ranks foremost, and in addition it is recognized as the greatest assistance in acquiring a correct understanding of music. The layman in the home of refinement considers music a necessity, and the talking machine as an entertainer in home life is becoming a wonderful force.

EFFECTIVE means of publicity has helped very materially to increase public interest in the talking machine and the advertising end of the business is more than kept busy with the rapid strides in popularity made by this product the past year.

A word regarding a national advertised product.

This is maintained by experts as symbolic of the very highest type of modern publicity, and in view of the consistent and impressive magazine and newspaper advertising carried on by the great manufacturers it is not to be wondered at that the sales of talking machines and records are steadily growing.

PPRICE maintenance on patented articles does not mean a monopoly. On the contrary, it affords a legitimate protection to the trade and to the public.

In order that business may be conducted along sound, progressive lines, it is necessary that the customer should have confidence not only in the quality of the article, but in the fairness of the price which he pays.

There is a tremendous element of strength afforded talking machine dealers by standardizing prices, and price maintenance is a trade principle that every talking machine merchant, as well as every merchant in other lines should be interested in, for price maintenance means that uncertainty and haggling are eliminated—like-wise unjust discrimination among customers.

It guarantees for the purchaser a standard of quality, and there is no other way in which a high standard of value is secured in the retail world than through a uniform selling price.

The large department store, with its millions of patrons, cannot sell standardized or price-regulated articles cheaper than the small man who has a small store stowed away in an inconspicuous place in a town remote from the great cities.

Price maintenance is protection for all, and it does away wholly with the system of cut-throat practices which in the end are bound to demoralize business.

American people are becoming better and better educated as to value all the while, and they have, through arguments which have been made in many journals throughout the land, become acquainted with the advantages of fixed prices. They realize that it means protection to the public, and it behooves every business man to use his influence to the greatest extent to see that fixed prices are maintained.

WHEN the manufacturer maintains his price he is naturally compelled to maintain his quality, and as a result, throughout the mercantile world, a number of standard articles have been familiarized to the people of the country who can judge the qualities of articles within their own class.

National advertising of trade-marked articles has cleared the atmosphere, and has removed many disagreeable features from the retail department. Had there been no standard trade-marked creations there would have been comparatively little national advertising, and with no national standards.

By maintaining standards the people have been gradually educated in special values so that to-day they know that when claims of quality are made by national advertisers that those claims can be substantiated in a large degree.

Price maintenance is closely associated with national advertising, for no individual or corporation can afford to advertise a certain brand of goods if the quality of the advertised products are lowered as the demand grows through advertising.

No one can afford to advertise inferiority and expect to remain in business.

SPECIAL World reports from various parts of the country indicate that general business is not up to grade. There is little buying of merchandise, save to meet with present demands, but one of the best reasons for optimism at the present time is found in the promise of bountiful crops.

The new official estimates of the combined winter and spring wheat prospects indicate a promise of a total wheat harvest of 880,000,000 bushels, or 127,000,000 bushels more than last year. That fact alone is pleasant to contemplate, because it affords a foundation for stable business, and adds confidence in the trade situation which needs all the bolstering up possible.

THERE ought to be no more doubt as to a business man's duty when he hears false business doctrines presented than there is about the physician's duty when he hears a man putting false notions into the minds of the untutored regarding, we will say, the germ theory of disease.

Everybody is interested in business, and if they only knew it, not simply in the innumerable details which enter into business transactions, but in the principles which underlie these transactions, principles which the vast number have no grasp of.

Our time is so mortgaged to the succession of events that we fail to realize what significance there is in them, with the result that when things go wrong we make a hit and miss guess at the cause and probably lay the blame on some incident having no more relation to the wrong results than gold buried 400 fathoms under the sea has to the high cost of living.

Every decision in business based upon prejudice is helping to build up the mountain of obstacles in the progress of business toward a stable position. Therefore is it not the duty of business men to shake men out of their prejudices, not roughly, nor with that air of superiority which always defeats good purposes, but perhaps humorously, always good-naturedly, through that power of persuasion which comes by studying men's whims?

Many are all the while letting slip the opportunity to give a new or wider vision. In other words, to lead the men prejudiced by narrow outlook into a rational view. If a man has a lazy streak in him, the temptation is to let the fellow with the false notions wallow in them.

ANALYZING THE HUMAN SINGING VOICE.

Some Developments of the Research of New York Professors That Should Prove of Interest to Makers and Uses of Talking Machine Records—The Human Voice as Compared with the Tones of Various Instruments—How It Appears on the Records.

Until the present day the nearest approach to accuracy in the gauging of musical tone has been afforded by the human ear. Those interested in the development of their own voices or of the voices of singers or students have been as dependent upon the not altogether faithful and infallible judgment obtained by the individual sense of hearing as the importer or distributor of tea or coffee is dependent

nature and derived from abstract and not from physical subjects. This is shown by the indefinite terminology used by the voice teachers and critics in their work of vocal tone description. On the other hand, the sense of sight is held to be the most accurate and unfailling, because it has the advantage of a permanent material object that may be deliberately studied and analyzed. It is by far the most discriminating sense we have, and therefore impressions received through it are capable of exact description.

Soprano Song, "My Dreams."

upon the verdict of the professional sampler, or taster.

As the sense of taste is seldom exactly the same with two persons, and tea tasters will often be found to disagree as to the flavor and quality of a brand they may be sampling, so the sense of hearing is subject to disagreement—the more so, indeed, because its impressions are of a transitory

Photographic tone analysis is an ultra-modern device of science, which promises to exert a vital influence upon the development of the voice, as, indeed, it may also, upon the manufacture of musical instruments. It is in the formulation of the theory of correct tone production that the exact analysis of tone by photography has accomplished its most valuable function thus far.

Dr. Floyd S. Muckey, of New York City, who was associated with the late William Hallock, professor of physics at Columbia University, in a scientific investigation of the physical laws of the voice which lasted more than twenty years, has

evolved a scientific method of voice production, a method which especially takes into consideration the factor of interference with the correct action of the voice mechanism. It is by photographic tone analysis that he specifically sets forth the part which interference plays in preventing the full use of the vocal capabilities. Interference is also shown to be the direct cause in the deterioration of the vocal instrument. He accomplishes his analysis of vocal tones, and, likewise, his analysis of instrumental tones by the use of the Koenig manometric flame

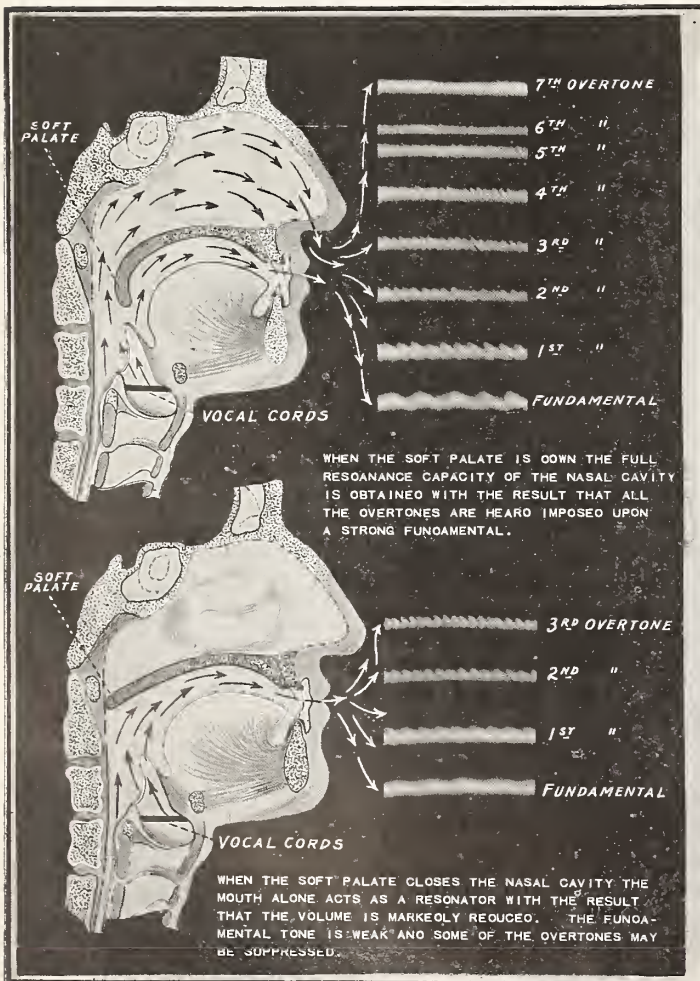

A E I O U
Tenor Voice Sounding Vowels in E Flat.

analyzer which has been greatly improved for this work by Prof. Hallock.

The photographic "tone analyzer," as the apparatus might more popularly be termed, provides an actual and permanent record of tone quality and shows the definite convention of cause and effect between interference with the mechanism and the resulting tone. How these tone photographs bear out the principles advocated by him is thus outlined by Dr. Muckey in the Scientific American:

"The roof of the mouth ends posteriorly in the soft palate, which rises in the act of swallowing to prevent the entrance of food into the cavities of

—Illustration by courtesy of Scientific American.

The Koenig manometric flame analyzer consists of a number of Helmholtz resonators connected by tubes with gas jets. As the subject tested sings, the flames vibrate. They are reflected in the vertical mirror, which the operator can turn by hand, so that the vibrating flames are seen as in the photographs on the left hand side of this page. The mirror is not used in making the photographs; a plate holder in a camera is merely shifted laterally during exposure, thus producing the effect shown in our picture. Before the late Prof. Hallock of Columbia University improved the Koenig manometric flame analyzer photographs such as those reproduced on this page could not be made. Experimenters made drawings by watching the reflection of the flames in the mirror. The photographs herewith reproduced are among the first ever obtained by means of the Koenig apparatus.

Tones of the pianoforte and violin, respectively, sounded upon lower C. In the piano record the fundamental tone represented by the first line is weak, but the overtones are highly developed. In the violin record the lower line, being bass C (128 vibrations), records no air-waves, because air-waves of that length were not sounded; the second line is the octave of bass C (256 vibrations) and the fundamental of this set of partials

The effect of correct and incorrect placing of the soft palate is shown by the photographs of tones appearing opposite the mouths. Note that when the full resonance capacity of the nose is used, as in the upper picture, a strong fundamental tone with good overtones is obtained; the lower picture shows how markedly poor is the effect when the soft palate is up. The photographs of the fundamental tones and the corresponding overtones, appearing opposite each drawing of the human head, were obtained by means of the Improved Koenig manometric flame apparatus shown in the center engraving on this page. They give instrumental evidence (better than any personal opinion) of the effect which the position of the soft palate has on tone production.

SHOULD A JOBBER ADVERTISE AND WHY?

By B. W. Smith, of The Phonograph Co., Cleveland and Cincinnati.

The question at the head of this article belongs to the same class as the classic "Is water wet?" The answer is so obvious that one wonders why it should be asked at all. As a matter of fact, however, it is asked for the main purpose of bringing out how and when the jobber should advertise in order to stimulate trade in his territory.

In the first place it needs no argument to prove that the most complete co-operation between the dealer and the jobber is necessary in order to produce the best results, and as a step in this direction a systematic advertising campaign on the part of the jobber is one of the most useful and profitable undertakings that can be entered upon.

The dealer, especially the small dealer, has neither the ability nor the knowledge to advertise in a business-building manner, with the result that whatever money he may spend in this direction is largely wasted and quite likely to have the adverse effect of making him think that because his advertising did not sell phonographs there is something wrong with the machine, for he will certainly never admit to himself that the trouble is with his own inefficient advertising.

The jobber, however, with his greater experience, wider knowledge and general grasp of the entire field and the problems in it, is in a position to secure the knowledge of just when and how to advertise. He is able to appreciate the fact that there is very little to be gained by haphazard methods, and everything by planning and carrying through a systematic, carefully worked up campaign. In certain cases he will find it to his advantage to furnish copy and advice for the publicity work of the dealer, but entirely apart from this he should maintain a distinct plan of his own, carefully worked out on a proved scientific basis such as will inevitably produce results in due time.

The old days of hit and miss guesswork in advertising have gone never to return, and in their place has come a scientific knowledge of the principles of publicity, as well as the appreciation of the fact that no one medium is sufficient in itself to answer all the requirements of any given campaign. In other words, the advertiser must study his field and make use of every possible means of securing legitimate publicity.

When a jobber does this he cannot fail, in the course of a reasonable time, to impress upon the minds of the public at large the fact that the Edison phonograph is something to be reckoned with, that it has features superior to all other phonographs, says Mr. Smith in the Edison Phonograph Monthly, that its merits do not have to be taken for granted, because the public is invited to compare it rigidly with any other machine and to note its superiority. There is no cause for evasion of any kind, because the Edison is actually the best and, as such, invites rather than wishes to avoid competition.

Should a jobber advertise? Most certainly and

decidedly, yes. But let him not go blindly into the wide field of publicity and stray around without fixed ideas. Let him carefully plan his line of action with the advice and assistance of someone who knows, and then he is able to go ahead with the absolute knowledge that every dollar he spends is an actual investment that will bear fruit in due season.

A NOCTURNAL RECORD ARTIST.

When the creek's silver mirror,
And the moon rides round and high,
And the whip-poor-will is calling
Across the windswept sky—

Then the great horned owl sits blinking
On the gnarled old maple limb.
Why don't you get your phonograph,
And make a date with him?

For his bass is rich and mellow,
And his song, though quite forlorn,
Will thrill all nature lovers
When rendered through a horn.

So I pray you, record makers,
To consider my avowal,
And list within your catalogs,
Solos by G. H. Owl.

HOWARD TAYLOR MIDDLETON.

Recently some office men with Chinese signatures have started the commendable practice of having their names written in type at the left of the signature. Splendid! Let us hope that others who delight in executing fancy strokes to the inconvenience of their friends will do likewise.

The egotist wouldn't be satisfied with himself unless he felt that everybody else was also satisfied with him.

BIG CONVENTION ATTENDANCE.

Arrangement Committee Believes That All Previous Attendance Records Will Be Broken at the Big Talking Machine Jobbers' Meeting at Atlantic City—Business Session Will Be Consummated in One Day—Interesting Demonstration by the Victor Co. of Departmental Work—Attractive Program Arranged.

Preparations for the 1914 convention are shaping themselves rapidly under the able management of the arrangement committee of the association, headed by L. C. Wiswell.

The tentative program given out by the arrangement committee shows the business session of the convention on Monday, July 6. It is the intention of the officers to inaugurate this year a one-day business session by calling the meeting to order on Monday morning and not considering a motion to adjourn before the meeting is all closed up. It is thought that this plan will be an improvement over the one previously used of having three or four business meetings of short duration. A buffet lunch will be served in the meeting room. Ladies will be entertained at luncheon and taken for an automobile ride during the afternoon. Monday evening there will be an entertainment at Barney's for all. Plans for Tuesday are not in shape as yet to announce. Tuesday evening the annual banquet will be held at Barney's. Wednesday's arrangements will be announced later.

A campaign is being carried on having as its purpose the breaking of all attendance records at National Association of Talking Machine Jobbers meetings. The officers figure that the increase in the talking machine business in the last twelve months alone has been something tremendous with every member, and are hoping to prevail upon the heads of all jobbing houses to attend the meeting along with their department managers. In hopes of getting these gentlemen to attend, a strong appeal is being made to them.

A distinct feature of this year's convention is going to be the presence of all the Victor officials as well as their department managers and superintendents. The Victor people propose to give actual demonstration of different departments of their work and their product at Atlantic City on the 7th. Nothing of this nature has ever been attempted before. It is safe to say that every jobber who attends will see things which he has seldom seen—even at the factory. The Victor Co. is anxious to have the heads of the Victor jobbing firms present at the 1914 meeting of the association, as it is going to considerable trouble and expense to put on this educational stunt.

Naturally the annual banquet will occupy a prominent place on the program. It will be held Tuesday evening the 7th, at "Barney's." James F. Bowers, of Lyon & Healy, will be toastmaster. Excellent speaking, a fine orchestra and a cabaret show are already assured to instruct and amuse the banqueters. Hon. Walter I. McCoy, Congressman from the Ninth New Jersey District, has been obtained as one of the principal speakers, and will deliver an address on "Unfair Competition."

Louis F. Geissler, general manager of the Victor Talking Machine Co., and Edward Lyman Bill, editor The Talking Machine World, will be heard from.

PRAISES DANCE RECORDS.

The St. Louis, Mo., branch of the Columbia Graphophone Co. received last week an interesting letter of endorsement from W. T. Clark, 3806 Oliver street, that city, proprietor of the Westminster Dancing Academy, one of the best known exponents of the modern dances in St. Louis. This letter reads as follows:

"Our experience with the Columbia dance records has proven more than satisfactory. We have used them daily in our studio this season for private dancing lessons and find them unsurpassed in music, time, durability and also saving the expense of a musician. They are without doubt the modern musician of the day, and I gladly recommend them to our patrons. Very truly yours,
(Signed) William T. Clark."

Every talking machine sold without an Automatic Stop means lost profit to the dealer, distributor and manufacturer. Are you treating the trade right?

The simplest to attach; the most accurate; the one giving you the largest profit is the

STANDARD GRAMAPHONE APPLIANCE CO.

173 LAFAYETTE STREET,

NEW YORK

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., June 6.—May certainly has been the dance month in Boston, for with dancing exhibitions at two theaters and one large hall there have been crowds of people given a new interest in the latest movements. Besides this one large concern in co-operation with a leading daily paper spread a wide knowledge of the hesitation, tango, one-step, etc., throughout New England, and this has helped the sale of dance records. Many of the local houses are getting ready to supply outfits for summer cottages at mountain and seashore, and this has helped to increase the volume of business most perceptibly.

Enlarging Chickerling Victor Rooms.

The Victor warerooms of Chickering & Sons, 169 Tremont street, show constant evidences of popularity, and Manager W. W. Longfellow is finding business good for this season of the year. He will not be able to get away on his vacation quite as early this year as he otherwise might like, as he must be on hand to superintend some improvements that are to be made in a few weeks. These include an enlargement of the quarters on the second floor by taking a large middle room which just now is used for a piano wareroom. This will give the Victor department just double the capacity, but it is figured that this space will be used to good advantage, as the business is increasing rapidly under Manager Longfellow.

Donates Fifty-eight Prize Cups.

The Boston dancing contest at the Boston Theater, in which a number of well-known exponents of the new dances took part, was a marked success and large audiences were the rule at every performance for an entire week. The Eastern Talking Machine Co. was especially interested in the contest, as in all it offered fifty-eight cups as trophies, fifty-six of which were small ones, and two large ones for final competition on Saturday night. "Billy" Fitzgerald, of the Eastern Co., was especially active in the success of the week's exhibition, and he had installed on the stage an Auxetophone, which was used for the dances in which the amateurs took part. Throughout the week fully 10,000 copies of the book of modern dances issued by the Victor Co. were distributed.

W. J. Fitzgerald Promoted.

Speaking of the Eastern Talking Machine Co., it is pleasant to note the fact that W. J. Fitzgerald—Billy to all his friends—has been raised to the responsible post of wholesale manager for the

Eastern Co. Billy is a capable man, has had considerable varied experience in the talking machine business and has been especially prominent in introducing the machines into the schools in and around Boston. Any promotion that comes to this popular man in the trade will be welcomed by his many friends, as he has a large following throughout the trade.

Enters Supply Business.

A. W. Chamberlain, who formerly was wholesale manager of the Eastern Co., and who resigned a couple of months ago, has established himself at 120 Boylston street, where he makes a specialty of talking machine supplies. Mr. Chamberlain is the inventor of a safety needle device that is well spoken of by those who have tried it, and this he will make a special feature of.

Dance Carnival a Success.

On the afternoon and evening of May 14 there was a dancing carnival in Mechanics' Hall under the personal direction of G. Hepburn Wilson, M.B., who is the supervisor of dance music for the Columbia Co. He was assisted by Paul Swan and teachers and pupils from Mr. Wilson's seven dancing studios in New York. The music was furnished by the entire dance orchestra of the Columbia Graphophone Co., which came over to Boston especially for this carnival. The program was a long and varied one, and was heartily enjoyed by two audiences.

New Victor Warerooms Completed.

Now that the Victor department of the C. C. Harvey Co. is permanently established on the second floor of this concern's large warerooms at 144 Boylston street, Francis T. White is better able than ever before to meet the needs of his customers. The quarters pleasantly overlook Boston Common and are comfortably furnished and fully equipped with various styles of Victors and a large assortment of records to suit all tastes.

Returns After Six Months' Trip.

"Billy" Ellsler, who has been away from the Columbia Co. on a six months' leave of absence, during which he was manager for Holbrook Blynn, the theatrical star, is back at his post of floor manager, and the trade is glad to welcome him again. Two other new men with the Columbia Co. are S. B. Bowman and A. G. Haskell, both salesmen in the retail department.

Record Sales to Theatrical Folk.

Sallie Fisher, the comedienne, and her husband, Arthur Houghton, who is manager for Montgom-

ery and Stone, the stars of the theatrical world, were recent callers at the Eastern Co.'s warerooms, and left a large order for records to be sent to their summer place, Fisher Camp, Songo Lock, Lake Sabago, Maine.

Moving to Summer Home.

Manager Arthur Erisman, of the Columbia Co., and family, have planned to spend the summer on the Shore drive at Lynn, and will move there from the Cambridge within a fortnight.

Visits New England Dealers.

Manager Royer, of the Victor department of the M. Steinert & Sons Co., has lately been making a tour of the Southern New England agencies. He reports quite a good demand for goods for the uses of summer cottagers and he has mapped out an extensive summer campaign program on which his sales force will shortly embark. Mr. Royer expects to go to the Atlantic City convention of talking machine men.

Opening for Successful Manager.

Although Henry Rosen, of School street, has had his Back Bay talking machine store open several weeks and is doing a good business there he has thus far been unable to find just the right man to manage the establishment. This despite the fact that he has advertised for an experienced salesman and one that possesses initiative. Mr. Rosen is planning to take a trip to Chicago and other Western places this summer, a trip that he has wanted to start upon several times before. On the trip he will make a careful study of ways and means as they pertain to the talking machine business.

Splendid Record Business.

Manager Batchelder, of the Victor department of the Henry F. Miller Co., finds his customers busily engaged these days making a careful selection of records for use during their summer recreation at the shore or country cottages. One of his good customers for many weeks past has been D. C. Jennings, of the "Under Cover" company, playing at the Plymouth Theater, who runs in every few days. This piece has been running for twenty-four weeks thus far, so Mr. Jennings feels like a regular Bostonian. A large shipment of records was made lately to Peru, where a Miller customer is making an extended visit.

New Columbia Representatives.

Manager Erisman has closed contracts with several large houses for the handling of Columbia goods, which should considerably add to the out-

GO WHERE you will and there is only one universal opinion to the Edison Diamond Disc Phonograph—that it is an almost human means of producing human music. It is this feature that so appeals to music lovers.

Those who are Edison men now are building a business on the foundation of satisfaction, and there is no limit to their profits.

If you sell the Edison, you will have the same opportunity. We will help you with our organization, too.

The
Pardee-Ellenberger Co.
BOSTON, MASS.

**Real Music
At Last**

The
Pardee-Ellenberger Co.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

put. Among these are Kennedy & McInnis, of Pittsfield, which is a large concern of Western Massachusetts; Mason Bros., of Bellows Falls, and the Household Supply Co., of Rutland, Vt., which is one of the leading houses of the Green Mountain State.

Close Successful Year.

The Eastern Talking Machine Co. has just closed a most successful school year and much of the credit belongs to "Ed" Welch, who has labored long and hard to popularize the Victor outfits with institutions of learning in Boston and the suburbs.

Imperial Phonograph Co. Opens.

The Imperial Phonograph Co. is the name of a new concern which is now open for business in Boston. The company has established offices at 9 Doane street, in the downtown section of the city, where it has a suite of offices on the third floor. The president of the company is O. B. Cole and Charles F. Simes is the sales manager, and the latter now is engaged in assembling his field force. The machines and records are being manufactured in the city, and already the first invoice is ready for the trade.

Columbia Used at Harvard.

The Columbia Grafonola is being used with much success at Harvard in the teaching of the German language. The pronunciation of the Teutonic speech has been difficult for some of the students and so the head of one of the German courses has fallen back upon a machine to help him out. German folksongs have been used considerably for the desired purpose, as the accent is thus given to a musical accompaniment.

Looking Forward to the Convention.

Henry Winkelman, of the Victor department of the Oliver Ditson Co., is looking forward to his trip to Atlantic City on the occasion of the annual convention early in July. Likewise he is planning for his summer vacation, which he will embark upon soon after his return home.

A LUBRICANT TO TRADE.

How Men in All Trades Are Waking Up to the Necessity of Publicity.

Ability of a high order is required to successfully conduct manufacturing and retail establishments. It is one thing to create and another to successfully market. Each function is interdependent, and both are of prime importance. The sales manager or the executive must be well grounded in the principles of advertising even if the details of that department are entrusted to a manager.

It is advertising which acts as a great lubricant to business, whether it be wholesaling or retailing. Talking machine men are understanding this great necessity more and more. It is true that some of them still deserve to be awakened, but the great majority of them have become alive to the fact that their business cannot survive unless they use up-to-date methods of publicity.

Everyone is an advertiser to-day. The only man who does not advertise is a "dead one." Advertising means making known, and practically every word or act in this world is an advertisement. We give up our seats in a car to ladies to advertise that we are gentlemen. We attend the opera to advertise that we are cultured. We keep out of jail to advertise that we are honest. The man who stands pat on four hearts tries to advertise that he has a flush. If he is called, it is not the fault of the advertising, but due to the fact that he failed to observe the cardinal law of business, "have goods to back your advertising." Each year makes a terrible loss in the ranks of the once mighty host whose battle cry is "My business is different; it can't be advertised." The banks, doctors, schools and public service corporations have surrendered. Everyone is an advertiser. The only one who isn't is a dead man. Whether one's advertising is a success or not depends upon methods. The word

advertising has been localized until it has come to mean the art of making known certain facts for the purpose of inducing certain people to follow a specified course of action. It makes no difference whether one is trying to make a man buy a certain make of "talker," or make a woman get off a car the right way, the method by which it is made known is an advertising campaign.

The purpose of an advertisement is to sell goods. Newspaper space is too expensive a medium to be used for the exploitation of the writer's wit or cleverness. The ad writer who constantly bears this purpose in mind will produce effective ads despite faults of grammatical construction or display. When the simplicity of purpose of an ad is realized, it will be seen that its preparation is merely a matter of salesmanship. The duties of the ad writer and the salesman are identical and their methods should be the same. Every salesman should have a well defined system of approaching, interesting and selling goods to a customer, and the principles of this system can be applied equally well to an advertisement. Any successful salesman who is capable of analyzing his system of selling goods, who can tell just how and why he induced the customer to buy, is also capable of constructing an advertisement if he applies the principles of his salesmanship to his advertisement.

BUSINESS BEST IN SMALL TOWNS.

Salesmen who cover the smaller cities and towns of the country have no reason to envy their brethren who take in the larger ones. According to one of the prominent local manufacturers fully seventy per cent. of the present business is coming from cities and towns under 75,000 population. The reason for this, it appears, is that stocks are not so heavy in the smaller centers of the country because of the more limited purchasing power, and that these stocks are consequently turned so frequently that the small buyer is ready to take on new merchandise in fair quantities at almost any time. The fact that the buyers for the smaller stores are as a rule not hampered by the supervision of a merchandise man is also cited as a reason for the small center's better buying. While these men are said to make for a better and safer system of merchandising, they are sometimes responsible for the buyer's losing some

specially attractive offerings because his or her appropriation has been temporarily exhausted. From the present condition of business in most lines, the opinion is advanced that many appropriations are exhausted at the moment.

OCCUPYING HANDSOME QUARTERS.

Pardee-Ellenberger Co. Located in New Home, Which Is Up-to-Date in Every Detail—Immense Floor Space at Company's Disposal.

(Special to The Talking Machine World.)

BOSTON, MASS., June 9.—The Pardee-Ellenberger Co. is now comfortably located in its new quarters at 26 Oliver street, and handsomer warerooms it would be hard to find. The main quarters are on the ground floor, and the whole interior is finished in Circassian walnut of handsome grain. The clerical office occupies a large part of the Oliver street front, and the clerks can work under the best possible conditions, and there is an abundance of daylight. All the furniture is brand new, even the large safe. Off this apartment is Manager Silliman's private office, and he too has an entirely new equipment of office furnishings. Directly at the rear is the main show room, off of which is a smaller room, where dealers can take customers privately and give a demonstration of the Edison disc machine. The main show room, like the rest of the floor, is finished in Circassian walnut, and a large, handsome rug covers most of the floor. All about the sides are the various types of Edison machines. All the ceilings are of the metal type, and the artificial lighting is by the indirect electric system. The shipping room occupies the entire rear half of the floor, and looks out into an alley, where the wagons can take on their goods to be shipped with very little handling. This shipping room is unusually large. The head man of the shipping room has a private office, and beside it is a good-sized repair shop, fully equipped to meet all emergencies. One entire side of the shipping room is given over to record racks, filled with thousands of discs and cylinders. In addition to this enormous ground floor space, the Pardee-Ellenberger Co. has still another floor for storage purposes. Thus is the company now in a better position than ever to meet the requirements of its growing trade, which covers entire New England.

An almost railroad schedule of deliveries of Bagshaw-made Needles

IN OPERATING a needle manufacturing business the size of ours, it is absolutely necessary to follow certain well-defined lines as regards deliveries, for we recognize the importance of filling the requirements of our customers as needed. So you can be sure that an order placed with us for so many millions of needles monthly for a year will be shipped promptly.

We wish to make this statement now as to shipments, for this is an important link to the Bagshaw service.

Jobbers: "On To Atlantic City"

¶ This year the Mecca for Victor jobbers will be Atlantic City the 6th and 7th of July.

¶ Object: The eighth annual convention of the National Association of Talking Machine Jobbers.

¶ "'Taint always the biggest Rooster that has the most sand in his crop."

¶ This convention isn't as large as some others, but—

¶ If you are the head of a Victor jobbing business, you preferably—or at least one representing you—or better, both, ought to be there to learn what the foremost men in the Victor business are thinking, saying, doing.

¶ These conventions are full of Optimism, Good-cheer and Inspiration; you are welcome to bring along all the ideas you have and to take home more than you bring. If you are an optimist, you will want to come; if you are a pessimist you certainly need to.

¶ There will be talks by able men. Daily discussions. Friendly arguments. Ideas galore. You may have had the ideas yourself but mislaid them somewhere.

¶ You surely don't want to miss this chance to meet or renew acquaintances with the worth-while people in your line of business. It is a duty you mustn't neglect.

¶ For your entertainment an arrangement committee has been working faithfully for months, and it has up its sleeve several innovations which it is claimed will make even the regular attendants sit up and take nourishment. Some of these will be announced shortly, while others are said to be too good to announce, but must actually be seen to be appreciated.

¶ It isn't too early now to talk it over with the city ticket office and reserve accommodations to the "Playground of America" for Saturday, July 4; earlier if needs be.

¶ The Association officials are going to handle all the business in one big day—and Tuesday will be devoted to the usual open meeting, at which Victor officials will talk and listen.

¶ Even though you do not admit it, you need the "change"; besides think of those delightful daily dips in the briny.

¶ Of course you are busy, but come to Atlantic City and forget it.

¶ Just communicate with L. C. Wiswell, care of Lyon & Healy, chairman of the arrangement committee, and say "count on me."

LANDAY BROS. NEW FIFTH AVENUE STORE.

The Latest Addition to the Landay Victor Establishments, at 427 Fifth Avenue, is Most Palatially Equipped and Superbly Furnished to Meet the Demands of the Clientele of This Firm—Description and Illustrations Will Give Idea of Its Completeness.

The accompanying illustrations showing the exterior and interior of the new Landay Bros. store at 427 Fifth Avenue, New York, will give a fair idea of the attractiveness of this latest addition to the chain of Landay Victor establishments. This store,

the booths and furniture and the total absence of the "cramped" atmosphere which is frequently found in high grade specialty stores. A cozy corner near the right hand side of the entrance enhances this feeling of good cheer and comfort.

The illustration depicting the exterior view of the new Landay store is especially worthy of attention as representing one of the finest pictures of this kind that has ever been produced. This photograph is a faithful and accurate view of the appearance of the store at

View Upon Entering New Landay Store.

which was recently opened, is one of the show places of the local Victor trade and has won the admiration of business men all along Fifth Avenue.

Located between Thirty-eighth and Thirty-ninth streets, in the heart of Piano Row, and directly opposite the new home of Lord & Taylor, this store has been furnished throughout in a quiet, subdued tone, entirely in keeping with the character of its surroundings. Eleven demonstration rooms, larger than most rooms of this nature, are placed along the main and mezzanine floors, all furnished with a view of offering customers and visitors every com-

night time, the picture having been taken at 1 o'clock in the morning.

The favorable impression that this new Landay establishment has created is well summed up in the following letter sent Landay Bros. last month by the Fifth Avenue Association, one of the most influential organizations of its kind in

Looking Towards Fifth Avenue from Center of Store.

fort and convenience. These rooms are finished in typical French style, the color design being a gray and green, delicately blending to harmonize with the other decorations.

Upon entering the store the visitor is immediately impressed with the spacious arrangement of

jectionable, and, after all, we are all working together for a common object, the preservation of this great thoroughfare as an asset for high-class business. Yours very truly, (Signed) Robert Grier Cooke, President."

Roy Forbes, connected with Landay Bros. for

several years, is manager of the store at 427 Fifth Avenue and, assisted by a capable corps of sales people, has already laid the foundation for an extensive clientele among Fifth Avenue's shoppers and music lovers.

FORM A PERMANENT ASSOCIATION.

Committee of Retailers of New York Brought Together in Support of the Stevens Bill Will Prove a Permanent Body and Extend Its Activities in a Mutual, Protective Sense.

The committee of retail merchants of New York and vicinity which attended the big mass meeting held recently at Aeolian Hall under the auspices of the American Fair Trade League for the purpose of supporting the Stevens bill for price maintenance, has taken the form of a permanent organization and will branch out in its efforts to aid retail merchants.

The temporary committee held another meeting later and decided to proceed with a permanent organization, to embrace any retail organiza-

427 Fifth Avenue, Night View of Landay Bros.' Store.

any city of the country:

"On behalf of my associates, as well as myself, I hope you will allow me to extend to you my congratulations upon the exceedingly attractive place which you have at Thirty-eighth street and Fifth Avenue. The general layout and the details you have worked out are most alluring. In fact, I should think it would be very difficult for anyone, musically inclined, to pass your place without going inside.

"You see we are just as ready to give due credit for things that we believe deserve it as we are to criticize what we consider ob-

jections which may desire to affiliate with it. Already something like twelve associations in and around New York City are enrolled and plans are to be made for adopting a constitution and by-laws and superseding the temporary officers, who will serve in their respective capacities till their successors are elected.

It is planned to make the committee a conference, composed of probably three delegates from each affiliated body and a certain number of outside independent members not connected with definite bodies; to open permanent offices and to be supported by a per capita tax on the several affiliated associations. The committee on by-laws comprises the following: William G. Anderson (pharmaceutical conference), John H. Steeneck (retail grocers), John G. Bremner (talking machine dealers), J. H. Booze (photographic trade), J. M. Kohlmeier (hardware and supply dealers) and Nicholas Ehrlich (retail tobacconists).

TO HANDLE COLUMBIA LINE.

E. L. Ward, Oneonta, N. Y., has completed arrangements to handle the Columbia Graphophone Co.'s line. Mr. Ward is planning to institute an energetic campaign for Columbia products, making a special effort to promote dance record business.

ORDERING IN ADVANCE VS. HURRY-UP ORDERS

Discussed in a Most Interesting and Illuminating Way by H. G. Stanton, Vice-President and General Manager of the R. S. Williams & Sons Co., Ltd., Toronto, Can., in Edison Phonograph Monthly—Has Had Long Experience as Jobber and Is Popular.

The importance of a plan that will insure delivery of goods when most desired is unfortunately overlooked by many dealers, for lack of that one successful element in business—looking ahead. So many merchants form the habit of leaving everything to the last minute instead of anticipating the future as far ahead as they can, laying their plans out to meet it successfully, and thus be always ready. Many dealers have no conception of how the step in anticipating their wants or planning ahead will simplify matters for them, increase their business, increase their profits, and relieve the worry, confusion and loss which follow inevitably as a result of "scrambling." Lack of preparation, confined specifically to placing of advance orders, is usually the result of lack of capital, resulting in fear of being overstocked and unable to meet obligations; lack of confidence in the goods you are selling, and the ability of your organization to sell them, or lack of ordinary business observation covering local trade conditions. Any man in business, with ordinary business prudence, should be able to estimate with reasonable exactness how many machines and how many records he will sell six months in advance, and still more exactly what his sales will be for three months in advance. Many dealers, however, give this phase of the business no consideration, because of the service they get and because they meet their requirements with reasonable satisfaction. As a result of this, when the heavy fall and Christmas season approaches, the habit of placing orders only as actually required is formed, and the thought of anticipating requirements for fall and Christmas is not taken seriously by them. As a consequence of this, there is what might be termed a "jam," to the jobber, to the manufacturer, to the transportation companies and to themselves, which results in aggravating delays, serious loss of business and an unknown but undoubtedly serious loss of future patronage.

We contend that anywhere from 75 to 95 per cent. of this trouble can be eliminated by the placing of advance orders. This can be done by every dealer, and instead of placing an order for what he will be requiring to-day or to-morrow, place one order now for what he may want for immediate shipments, another order for what he may want for shipment on the first of next month, and another order for what he may want on the first of the second month, and so on, as far ahead as local conditions may warrant; this depending, of course, largely upon his distance from source of supply, transportation facilities, etc. The only problem that presents itself in ordering in advance (and this is a slight one) is that of properly recording orders placed, so that if they are to be added to or in any way altered, it can be done without confusion either to the dealer or the jobber. If orders are placed ahead, and then for want of some system are not recorded, but left to memory, and later on the order duplicated, confusion will, of course, follow; but by having a card system or a book so arranged that each type of machine is represented, and on the page so headed, the number of machines on order, the whole proposition is simplified and results in having improved business and many other benefits to the satisfaction of all.

CARD SHOWING ORDERS.

			12	Nov. 1, 1914.

To permit of our travelers co-operating with our dealers, in placing advance orders, we furnish our representatives each week with a record showing the amount of monthly business done by each dealer in the town visited. With this knowledge brought to the dealer's attention, it is a simple

matter to show him that his business should run 10 or 20 per cent. ahead of the previous year (or whatever percentage of increase or decrease trade conditions in their judgment, warrants) and ordering a proportionately greater or lesser amount than was done in the same month of the previous year. Even if this is carried out in the most conservative manner possible, and orders placed for one, two or three months ahead (and at distant points, four months ahead) and dealer subsequently requested to add as much again to each month's order, there is a decided gain; even if, finally his advance order is for only one-half, that assists us materially. We are sure every dealer will appreciate these facts if brought home to him by his jobber; the only condition which works against it is lack of system. Therefore, we think if a card system, such as herein shown, were adopted it would relieve the situation materially, and it would be appreciated by jobber, dealer and the public.

If the same plan were followed in connection with records—standing orders for so many each of new issues, so many each of any special issues, the same convenience would apply to these.

This problem has been such a serious one with phonograph dealers for so many years, we believe the situation can best be met by each jobber reaching his trade frequently and persistently throughout the months of August and September, so that when his traveler calls during September and October, material increase in "advance orders" would be made; and if a little improvement is made this year and developed along still better lines next, undoubtedly conditions will improve to the advantage of all.

The above conditions would apply to every dealer, whether he is the exclusive Edison dealer in his town or has numerous competitors; but where there are competitors, certainly the necessity for placing advance orders will be even greater than where there is a limited or no competition. Why one dealer will permit his competitor to excel him in the matter of service when it is so simple to anticipate wants thirty or sixty days ahead, we cannot account for, unless it is that the neglectful dealer deliberately tries to help his opponent, for we know of few better ways of doing this than to be out of stock of popular selling types of machines or records when you competitor has them.

The placing of advance orders for new issue records is of such vital importance to the development of the trade that we think it should be the dealer's first duty after the establishing of a dealership.

The regular dealers' order sheet for new issue records, sent direct from the factory, and the forms generally used by dealers in placing their advance orders for new issue records are undoubtedly good ones, but we have found that dealers sometimes mislay or neglect to place their advance orders, so that in addition to the form referred to from the factory, we have a special postcard bearing our address on one side and on the reverse the following,

"Kindly enter my order for each of the new issue records until I notify you to discontinue,"

which we send to each of our Edison dealers, accompanied by a letter, drawing his attention to the advisability of becoming acquainted with the new records that are being issued each month. It permits of his more intelligently ordering for his regular stock requirements, and at the same time to permit his customers to know that on a certain day or evening of each month they can hear the entire list of new issue records, all of which means better service, better satisfaction to his patrons and more business for him.

When the cards are returned to us we place a standing order on our files for the quantity of records mentioned. These records are sent out on the date of shipment, but in the meantime should we receive one of the order blanks from the same dealer (who overlooked he had placed a standing

NYOIL

For polishing varnished woodwork it is extremely satisfactory. No oil is so clean.

Ask your watch repairer whose oil he uses on your watch.

order with us for one or two or three of each record each month) we would take his order blank, but not increase his order beyond his standing order if it was for just two records. But where he ordered four or six or ten, we would send this quantity. In any event, by his returning the postcard placing a standing order with us for one or more of each record, he would be assured of receiving the quantity specified promptly on the new issue dates.

Where advance orders cannot be obtained and the jobber has to depend upon "hurry up" service, it is necessary, of course, that the jobber anticipate his own wants. Sufficient stock room space in which to conveniently arrange records for the quick filling of orders, and an efficient staff of order clerks and shippers must be kept available; but it is hard to accomplish all this without some check upon service and despatch. To obtain this we have a time stamp with which every order received is not only dated, but timed as to the minute of arrival. The order of "write off" to the department is also so dated and timed, and the schedule of the department provides that every order received in his department up to 2 p. m. must be shipped that day if a freight order, and up to 4.30 p. m. if an express order, and there must be some very good reason for deviation from this schedule.

Many dealers wire orders or indicate a special necessity for their being rushed, in which case special attention is given them from the time they are received until the time they leave our shipping room. They are, in other words, given express service. They are specially marked when written off, they are specially followed through by the senior clerk of the department, and they are specially marked when they reach the shipping room, so that if they reach that department after the hours above specified, they are given special attention. In this way we try to serve our urgent dealers in the most efficient manner possible.

There are, of course, frequent delays from causes beyond our control; and, no matter how efficient the service, there cannot be the same convenience and assurance with rush orders as there are with advance orders, to say nothing of the big saving between freight and express charges.

If the card system was adopted more than half the worry during the fall and Christmas season will be turned into pleasure.

THE SECRET OF TRUE SOUND.

"The Secret of True Sound" is the name of a card issued by the Little One-Der Co. featuring the correct color value of sound and incidentally claims about the merit of the Little One-Der, which is an attachment for talking machines. A. S. B. Little, the inventor and manufacturer, reports that this Little One-Der is selling rapidly all over the country, and the outlook for it is very encouraging, particularly for the fact that it sells wherever practically introduced.

The decease of Mme Nordica has created an increased demand for her records. If you don't carry them, you lose.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

NO OCCASION FOR PESSIMISM IN CLEVELAND.

Talking Machine Business Seems to be Exempt from Many of the Complaints Which Attach Itself to Other Lines of Trade—Talking of a Victor Dealers' Association in Cleveland—Grafonola Co.'s Handsome Quarters—What Run Around the Trade Reveals.

(Special to The Talking Machine World.)

CLEVELAND, O., June 8.—The talking machine dealers of Cleveland are doing nicely, and during the month of May the general business transacted was of large proportions. Notwithstanding the times seem to be out of joint, money appears to be plentiful with all classes, and sales of machines, of the various types, from the cheapest to the most costly, are in daily evidence. The following reports of the various dealers clearly demonstrate that there is no occasion for pessimism in the talking machine trade.

J. Laurie, auditor of the Columbia Graphophone Co., spent several days at the local office the first of the month. He expressed himself pleased with the condition of the company's business in this locality.

W. J. Roberts, Jr., practically the pioneer in the talking machine business in Cleveland, and who recently retired from the Buescher Co., has, following in the footsteps of several other talking machine men, engaged in the automobile business. He has hundreds of "talking" friends who wish him success.

H. E. McMillin, Jr., vice-president and general manager of the McMillin Co., who was absent from his office for several days, owing to illness, is back at his desk, having fully recovered.

A. O. Peterson, manager of the Cincinnati branch of the Phonograph Co., spent a few days in the city recently, enjoying a visit with his many friends here. He is highly pleased with the success he is meeting with in that city.

The Cleveland Victor dealers, of which there are a large number in the city, are agitating the formation of a talking machine association. A number have already signified their intention of becoming members.

The summer season has opened up auspiciously with the Eclipse Musical Co., especially in the educational line, as it has sold quite a few school machines recently. Mr. Lane and Mr. Dinslow, of the company, have both had years of personal, practical experience, and know how to handle Victrola prospects with tact and skill. They have jointly started on a follow-up campaign, in the way of a canvass, and within two weeks nineteen machines and several hundred records were sold.

L. N. Bloom, secretary of the Phonograph Co., says business for the month of May was very good. Reports, he said, from dealers locally, and throughout the State, indicated that the sale of Edison machines and records was as brisk as ever.

Owing to the peculiar business conditions generally, the warm weather and building operations going on in enlarging and remodeling the store, business, said W. J. Davies, manager of the talking machine department of the Wm. Taylor Son & Co., is slowing down. This company, however, is doing a very fair business.

Manager Madson, of the local Columbia store, is

highly pleased with the new location, and the increasing volume of business, which he says is way ahead of last month. The demand for the Leader and the Mignonette types of machines was said to be especially good. One of the last piano houses in the Cleveland territory, that were not handling talking machines, has just taken on a complete line of the Columbia goods, handling them exclusively.

At the talking machine department of the Bailey Co., business is reported very good in the machine line, with a large record trade. The larger call at present was said to be for the smaller type of machines and for dance records, for the summer resorts and boating parties.

The Grafonola Co. of Cleveland, who fell heir to the old location of the Columbia Graphophone

TRADE CONDITIONS IN BALTIMORE

Have Been Very Satisfactory During May and Early June—Large Suburban Business Being Done Owing to the Movement of Citizens to the Country—All the Leading Makes of Machines Are in Active Demand.

(Special to The Talking Machine World.)

BALTIMORE, MD., June 5.—The talking machine situation in this section has kept up in its usual good shape during May, and the dealers feel that they will be able to make just as satisfactory reports for the present month. Thus far the business for June has been very desirable and the dealers predict that it will continue right on through the summer.

The dealers have received a number of orders for suburban homes and from those persons who spend the summer in the mountains or at some of the watering shores. These instruments at such places are very popular, especially at night, when the young folks gather for an impromptu dance.

Reports show that the Victrolas and Columbias are becoming a great fad with the dancers and these machines are used at times in preference to some other musical instruments because they give good time and keep the dancers in their proper stride all through the time that they are on the floor.

H. R. Eisenbrandt Sons, who are among the regular distributors for the Victor line, report an excellent May, and have reasons to believe that the good things will continue indefinitely.

Manager W. C. Roberts, of E. F. Droop & Sons Co., says that he has no reason to change his usual statement with regard to the business done by his firm with the Victors and Edisons. He says that sales have gone along in fine shape all during May, and the prospects on hand are a good indication that his sales force will be kept busy all during the warm weather in an effort to reduce these prospects to real sales.

Co., at 913 Euclid avenue, is prospering beyond all expectations. Mr. Routh, manager, said: "Business is on the increase, and even though some other dealers are complaining. If the business of the Grafonola Co. continues increasing at the present rate, we will not have room next fall to take care of our trade."

The Buescher & Sons Co. report business moving along prosperously, and that daily sales are being made of the various types of Victor machines, with a good record trade. The June list was said to be popular and taking especially well.

"The Victrola business of the McMillin Co.," said Mr. Kellogg, "has shown a marked increase over that of any previous year. The sales show a demand for the higher priced instruments, a number of \$200 Victrolas having been sold during the past months. The noticeably increased demand for the more expensive machines is owing to the fact that the dance craze has taken the whole country by storm, and the larger Victrolas are more popular and suitable for dancing purposes, especially for the summer hotels and country homes."

Manager F. A. Dennison, of the local branch of the Columbia Graphophone Co., talks in the same enthusiastic strain as his fellow dealers. Mr. Dennison declares that May was a great month, and that prospects for the future were as bright as they could ever expect to be.

Joe Fink, head of the Fink Talking Machine Co., has similar words of cheer to say with regard to the business he has done during May with the Victor and Columbia lines.

Albert Bowden, who is head of the sales force for Sanders & Stayman Co., Inc., states that it gives him great pleasure to be able to say that the talking machine business is in such excellent shape and this alone will help to make him enjoy his two months' trip in Germany. Mr. Bowden will sail on June 24 for his home in Cologne, where he will visit his parents. Mr. Bowden has not been to his home for twenty-five years, and looks forward to his trip with a great deal of enthusiasm. Mr. Bowden is booked to sail from Germany for America in the latter part of August.

WINNERS OF VICTOR PRIZES.

Those Who Secured Awards in Record Describing Contest and the Records They Selected.

The prize winners in the contest announced a short while since in the "Voice of the Victor" for the three best descriptions of Victor records are the following: First prize, Robert Walsh, Rudolph Wurlitzer Co., Cincinnati, O.; second prize, Miss Besse Patterson, with Frank L. Young, Mount Vernon, O.; third prize, Miss Bertha Moselle, Arison's Music Store, New York, N. Y.

Mr. Walsh described the selection "From the Land of the Sky Blue Water;" Miss Patterson discussed "Erlkoenig," and Miss Moselle described the "Monologo from Hamlet."

Perhaps the man who is looking for trouble is better prepared to dodge it when it comes,

An Amazing Sale of the World's Greatest Machines

Style No. 25

The Keen-o-phone—most marvelous producer the age has known and the absolute masterpiece of all talking machines—offered the trade at give-away prices for quick clearance.

There are very few dealers who are not familiar with the wonder of the Keen-o-phone—how the inventor, after realizing his ideal of the world's perfect talking machine, lost out because he failed to realize that "making" is one thing and "creating a market" another; how the factory went on turning out these superb instruments with no real market developed. When the crash came shrewd dealers snapped up most of the surplus, but there are still about

2000 of these machines left and offered to you at a discount of 70%, which means:

We can supply this machine with same style top as No. 20 if desired.

Style No. 20
Albums not included

\$100,000 Worth of Machines for \$30,000

Style 5
Containing a Famous Filing Device

Read the High Lights on this Remarkable Machine

- ☐ *The Keen-o-phone will play any Disc record made.*
- ☐ *Its patented features eliminate all scratching, rasping and all foreign noises of any kind.*
- ☐ *This silvery clearness and purity of tone in itself marks the Keen-o-phone's decisive supremacy over all other machines.*
- ☐ *All the cabinet work was designed and made by Pooley—evidence enough that these are among the most artistic finely finished oak, mahogany and Circassian walnut cabinets built.*

There are five styles left—more of some than others. Several styles are equipped with the famous Pooley Filing Device. And remember! all are perfect high-grade machines—and cannot last long. Hurry your reservation to-day! Reserve *the first time* as many as you can use, or write quick for appointment at address below, or for any information wanted.

CLOSES IMPORTANT DEALS.

Clifford R. Ely Arranged with Prominent Houses in Memphis, Tenn., and Washington, D. C., to Handle the Columbia Graphophone Co.'s Products—The Two Concerns Distinctly Prominent in Their Territories.

Clifford R. Ely, road ambassador for the wholesale department of the Columbia Graphophone Co., returned to New York last week after a month's

C. R. Ely.

trip through the South and near-by Eastern territory that was unusually successful even for this result-producing road man. Mr. Ely reached New York headquarters in time to greet the host of dealers attending the annual convention of the National Association of Piano Merchants, many of whom are Columbia advocates, maintaining extensive and successful Columbia departments.

Two of the more important deals closed by Mr. Ely on this trip were the D. B. Lowenstein Co., of Memphis, Tenn., and Woodward & Lathrop, Washington, D. C. In a chat with *The World* Mr. Ely called attention to the importance of these new accounts, which he states are deserving of far more than passing attention.

"The D. B. Lowenstein Co., of Memphis, Tenn.," stated Mr. Ely, "is known as the 'Marshall Field' and 'John Wanamaker' of the South and caters to a class of people who thoroughly appreciate quality and value. The D. B. Lowenstein Co. is the largest store in Memphis, and the fact that it has decided to maintain a Columbia department is indeed a valuable indication of the prestige of Columbia products. The store is planning to go after business energetically and has already erected five demonstration booths which are furnished in a dignified and high-class way. Earl Silliman, formerly assistant manager of the Columbia Graphophone Co.'s headquarters in Birmingham, Ala., has been appointed manager of this new and important department.

"Woodward & Lathrop, Washington, D. C., which is one of the finest department stores in the country, is the aristocratic store of the capital city. This store has never heretofore carried on anything but a strictly cash business, and the placing of Columbia products in this famous establishment is indeed a tribute to our company and its standing. About five booths are now being constructed, and John Affitica, formerly connected with the Flatbush avenue Columbia department of F. G. Smith, has been appointed manager. These two deals are but a part of the total results of this Southern trip, but they give a fair idea of the success that Columbia products are achieving."

The whole business world rests on a foundation of confidence. When confidence is gone business is gone. Individual salesmanship depends upon confidence as much as any other transactions in business.

MISAPPREHENSION AS TO COPYRIGHT.

When Can a Copyright Be Obtained—Modus Operandi—Numerous Inquiries Answered in Connection with the Present Interest Displayed in the Designed Registration Bill.

The interest in the "design registration" bill now in Congress has caused numerous inquiries to come to us from manufacturers and dealers who wish to know what rights they have in designs and names at the present time, and this has also brought forth the question from many sources whether or not they could not "copyright" this word, or title, or device, sometimes referring to a letterhead, sometimes to a trade-mark, sometimes to a descriptive phrase and sometimes to a design. These inquiries indicate that there is a general misapprehension as to copyright which should be corrected, and which will be clearly seen when it is understood that the only things that one can possibly copyright under the law are works of literature, music, drama and the fine arts. A title, a name, an outline cannot be copyrighted.

Sometimes protection may be had for trade-marks or trade names under the State laws or under the trade-mark laws of the United States, but this protection has nothing to do with copyrights. Trade-marks are registered in the Patent Office as are design patents, which are issued for various terms of years. However, trade-mark right may not be obtained in a geographical name or an adjective or phrase of description or in a proper name, while a design patent must show some novelty and invention.

Under the proposed design registration law protection would be afforded to the registrant who is first to register a particular design, irrespective of whether it contained novelty or invention, and the registration would practically date from the time the same was sent to Washington with the fee, without any waiting for the same to be passed upon by the Patent Office. Every original production in the way of a design would be entitled to registration protection as against imitation or duplication, one of the advantages of the proposed registration being the facility and cheapness by which the registration would be obtained. There is no doubt that under the present laws as to design patents greater protection is afforded the manufacturer than under the proposed design registration law, because if a manufacturer now receives a design patent he can restrain as an infringement any design that looks to the casual buyer to be the same as his, whether or not the outlines are identical. But the trouble with the present law lies in the delay in getting the design patent and the expense incurred.

To those who have proposed the use of the copyright as a substitute for both, we assure them, says *The Jewelers' Circular Weekly*, that their suggestion is absolutely without merit or reason, as the copyright law contains no provisions under which any such protection can be granted.

To guy visitors or to give short, flippant answers even to stupid or impudent people is a great mistake. Meet rudeness with unfailing patience and politeness and see how much better you feel.

DEVELOPING COUNTRY TRADE.

How J. J. Bennett, of the Columbia Traveling Staff, Toured the Ozark Mountain Foothills—Made Some Important Connections.

(Special to *The Talking Machine World*.)

St. Louis, Mo., June 10.—J. J. Bennett, of the Columbia traveling staff here, returned early this month from four days at Sullivan, Mo., in the Ozark Mountain foothills, where he assisted J. H. Bennett, not related, in getting started in rather a novel talking machine undertaking, at least for this section:

Sullivan is only a small town, and is not equal to supporting a pretentious talking machine business, but Mr. Bennett proposes to make the "whole mountains and valleys" his field. He is a former real estate man, and knows well the character of the residents in and about Sullivan, and he has concluded that they are as anxious to welcome the talking machines in their homes as their fathers and mothers were the sewing machine, and he is going to present it to them in exactly the same way.

As a starter, Mr. Bennett has bought two automobiles and two horse rigs, and has hired men as solicitors. Each will take a capacity load and go out and demonstrate wherever he can get an audience, and sell wherever he can get the money. Mr. Bennett believes there are great possibilities in his field, and he is going into the business on a large scale, expecting to have fully 100 men in the field before the summer is over. His activities during the winter will depend largely upon the weather and other conditions, but he believes that he can keep his force at work during the winter, too, when the evenings are long and entertainment is needed.

The first four days the four rigs were out eleven sales were reported. That, Mr. Bennett says, was a fair record for the untrained men. He thinks they will do even better after they get into the work. "The dance craze is reaching everywhere, and music is becoming a necessity, even in the mountains," says Mr. Bennett, "and I am going to carry good music where a piano would be useless."

There is a peculiar feature about Mr. Bennett's territory, in that scores of city families have summer homes on the mountain sides, and many of these have good machines at home, but have not taken them to the summer cottages, and a good many have expressed a willingness to buy low-priced machines for use in summer. Indeed, it was these expressions that gave to Mr. Bennett his idea, and then he saw the great void in hundreds of prosperous farm homes that he knew, and decided it was both a mission and a business field.

As a starter for his business, Mr. Bennett bought more than sixty of the United States machines when that stock was sold out. He will make the Columbia line his leader, and will sell Edison cylinder machines.

The Columbia warerooms in this city have been following a somewhat similar line of work in developing the summer hotel and clubhouse trade. Along the Meremac River, a popular boating stream, are hundreds of clubhouses and farm homes where city folk spend the heated weeks. Salesman Odell has been traveling this country and other summer resort territory, giving concerts at clubhouses and at farm homes wherever there is a sizable party of summer boarders. After an evening of splendid entertainment or dancing, and this dancing thing will not down even for a terrific heat that marked the last of May and first weeks of June in this country, he talks sale. Very few clubs or landlords fail to come across, for the average summer host, even if he is a farmer, fully realizes that a contented party of boarders is a whole lot more easily fed than those city folk who find the attractions of the pig pen and the cow lot growing stale to their city-trained ideas.

Miss Bessie Fireside, of the Columbia staff, will spend her vacation in Vienna, Ill.

When you have found out what line of goods attract the most people in your store, go into that line as strong as you can.

173 LAFAYETTE STREET,

NEW YORK

NEW YORK TRADE CLOSING GOOD SUMMER BUSINESS.

Jobbers and Dealers Co-operating to Secure Hotel and Camp Trade—Record Shortage Not So Acute—Higher-Priced Machines in Demand—Recitals Attracting Many Out-of-Town Callers—Red Seal Records Maintain Popularity—New Columbia Record Stand.

The local talking machine trade the past month has been generally satisfactory to all members of the industry, although here and there some of the dealers have complained that the business depression which has been hurting business throughout the country affected their sales during the past few weeks. On the whole, however, the talking machine business has fared exceptionally good, and May kept up the excellent record attained by the previous four months' sales totals.

There is no doubt but that the active and progressive talking machine dealer realizes that the summer season should not be passed up as the natural dull season of the year. On the contrary, the majority of dealers are making energetic efforts to make the summer months compare favorably with the other seasons of the year. With the dance craze continuing unabated, the 1914 summer months should prove profitable to the aggressive dealer who takes advantage of the various summer amusements to drive home the fact that the talking machine with a goodly supply of records is practically indispensable to ideal summer camp or bungalow life. The hearty endorsements given the talking machine and records by the leading exponents of the modern dances can be used to excellent advantage by the dealers who really try to secure summer business.

Summer Hotel Prospects.

New York's proximity to so many watering places permits the local dealers to make a special effort to develop the possibilities of summer business, and the results to date have been very gratifying. The consistent solicitation of the summer hotels has convinced the dealers that this class of sales has been sadly neglected during the past few years and even though the present dance craze should subside, the opportunities for closing sales to summer hotel owners, campers and general vacationists will be followed up closely by the members of the local trade.

Record Situation Clearing.

The jobbers and dealers have not complained as emphatically during the past month regarding record shortage as they did in the first four months of the year, although this does not signify that record business has fallen off. As a matter of fact, the majority of the dealers and jobbers closed a splendid May record business, but the cessation of general complaint is probably due to the fact that the trade as a whole realizes that the manufacturers are turning out more records than ever before, and that the scarcity of records can be attributed to the remarkable increase in the demand for records that has taken place in the past six months.

Blackman Co. Closes Good Month.

The Blackman Talking Machine Co., 97 Chambers street, New York, the well-known Victor and Edison cylinder distributor, reports the closing of a very satisfactory business during the past month, particularly in its Victor record department. The company is not only selling large quantities of dance records, but is steadily increasing its Red Seal record business. This class of trade is being consistently developed by the Blackman dealers, and a growing appreciation of the better class of music by the general public can be traced indirectly to the activities of talking machine dealers to increase their sales of Red Seal and operatic records.

New Columbia Record Display Stand.

"May was one of the best spring months we ever experienced," said R. F. Bolton, manager of the wholesale headquarters of the Columbia Graphophone Co., 89 Chambers street. "Our gain

over last May was about 30 per cent., and we are very well pleased with this figure in view of the general business depression that has been current in all mercantile lines. We are selling more of the higher priced machines than ever before, and the "Leader" at \$75 is gaining popularity week after week." This wholesale branch recently sent out to its dealers in New York a handsome and attractive record display stand that is winning favor wherever it is introduced. The stand is constructed of oak finished boards, and the coloring harmonizes perfectly with the neat and refined layout of the design. The stand, together with record strips to the number of forty, are sent to Columbia dealers in local territory at the nominal cost of seventy-five cents per month for a period of six months.

New Victrolas Sell Well.

"The new types of Victrolas X and XI are being praised by all our dealers," said G. T. Williams, manager of the New York Talking Machine Co., 81 Chambers street, Victor distributor. "The many points of refinement in these new types are appreciated by our clientele, who state that the new designs are meeting with a ready sale. The month of May just closed was the best in our history, showing a substantial gain over last May, which was a record-breaker. Both in machines and records our sales were considerably in advance of last year, and the outlook just now is very encouraging. Our efforts to co-operate with our dealers are being more and more appreciated, particularly in view of the recent record shortage, as we have endeavored to point out to our trade just how they can secure the most profits out of their record stocks."

Holding Edison Recitals.

The Edison disc department of Hardman, Peck & Co., 433 Fifth avenue, is holding informal recitals at its showrooms on the fifth floor of Hardman House, at which the Edison disc products are featured. H. N. Purdy, manager of this department, states that these recitals are proving very successful, attracting many interested music lovers, who are enthusiastic regarding the tone qualities of the Edison machines and records. Sales of high priced machines continue to have the call at this department, the high grade Hardman clientele evidently preferring to have the better grades of machines in their homes to harmonize with their decorations and furnishings.

Occupying New Home.

The new Fifth avenue home of the Columbia Graphophone Co. in the handsome establishment of F. G. Smith, 335 Fifth avenue, is now entirely completed, and Manager Hayward Cleveland can well afford to look upon his department with pride and admiration, as every detail in this new store is in complete accord with the prestige of Fifth avenue trade and surroundings. Assisted by a capable sales staff, Mr. Cleveland is already proving the value of this location, and being situated in the heart of the high grade piano and shopping district, is in an excellent position to secure high class business.

New Records Well Received.

In a chat with The World, A. N. Struck, the newly appointed manager of the Edison department of the Tower Manufacturing & Novelty Co., 326 Broadway, states that the new Edison disc records now being issued are winning words of approval from all his patrons. This particularly applies to the new dance records, which are making a hit with summer vacationists, who wish to take them along for their week-end parties.

In the Department Stores.

The Victor and Columbia department at Gimbel Bros. store, Thirty-third street and Sixth avenue, is making a special display of dance records, a separate table being allotted to each popular dance, with appropriate records displayed at each table. This unique arrangement is attracting attention and producing sales.

The Columbia and Victor department in the Simpson-Crawford store, Twentieth street and Sixth avenue, was moved this week from the third to the fourth floor, where it occupies handsome quarters immediately adjoining the piano ware-rooms. A number of booths have been fitted up in modern, up-to-date fashion, and Manager Allan Welburn states that business has shown a steady increase during the past few weeks.

FEATURING EDISONS IN ST. LOUIS.

Silverstone Relegates Piano Stock to Standing of a Side Line and Goes After Phonograph Business in Energetic Manner.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., June 9.—Mark Silverstone, Edison jobber, is featuring the name Edison more and more strongly in his advertising, and he makes no secret of the fact that he would use the name for his store except that he is still handling pianos as a side line to his talking machines, a department that he established when he first removed into the large building that he now occupies. He did not then anticipate the record-breaking jobbing business that would result from the Edison disc introduction.

Already plans have been completed for this summer's work of giving to the store increased facilities for the demonstration of the Edison machines. The present plan is to remove the cylinder machines and records to the second floor, which can be reached either by stairway or elevator, and converting three of the present demonstration rooms now used for cylinder trade into a recital hall, which will be soundproof, and will have a eleven-foot vaulted ceiling, and will seat sixty persons in comfortable chairs. Two additional demonstration rooms will be built on the main floor, and the general decoration scheme will be changed.

O. A. Reynolds, of the Silverstone sales staff, is making an extended trip into Mississippi, Tennessee, Alabama and Georgia. He is making an excellent record in the establishment of selling agents in the Southern country, and they promise much business if the cotton crop develops.

Mr. Schulte, of the sales force, recently went to the Roe Grammar School in this city and made cylinder records of the chorus work in each of the grades. The records will be kept at the school for future demonstration.

EILERS T. M. CO. INCORPORATED.

The Eilers Talking Machine Co. was recently incorporated at Seattle, Wash., for \$3,000, the incorporators named being C. H. Hopper, E. P. Kelly and J. W. Roberts. The new firm takes over the business of the Eilers Music House but will not present any new faces to the trade, for both Messrs. Hopper and Kelly are well known in talking machine circles in Seattle as being connected for a number of years with the Eilers house, Mr. Hopper being assistant manager. The officers of the company will be C. H. Hopper, president; J. W. Roberts, vice-president; E. P. Kelly, secretary. The headquarters are in the Alaska Building.

BASIS OF GOOD HABITS.

Good habits are produced by an organized mind. The more good habits a man has the more efficient and useful he becomes. For a habit once formed acts with very little expense of energy, thus energy is conserved for the pursuit of other work. A well organized mind is one of the most valuable possessions within the reach of man. Just how to secure it is too large a problem to discuss in the short space allotted here, except to say, conscientious, constructive work is the basis of its possession.

Collect Your Over Due Accounts WITH "RICKERT'S" COLLECTION PICTURES

The newest and most successful collection method ever devised. Printed on imported gummed paper, in startling colors, size of a postage stamp—humorous so as not to offend—yet serious enough to make the money come. Simply moisten them and stick to statement or invoice and mail. No dunning letters required. Fifteen designs. Illustration shows one. For \$1.00 bill, will mail prepaid 1,000 assorted. Sample free.

CANADIAN TALKING MACHINE DOINGS SUMMARIZED.

Demand for Foreign Records Growing in Canada—Pathé Freres Appoint Special Representatives—Nordheimer Piano & Music Co. to Remove—Will Have Spacious Quarters as Well as Recital Hall—Columbia Demonstration by Miss O'Brien Interesting.

(Special to The Talking Machine World.)

TORONTO, CAN., June 10.—H. V. Smith, of Smith & Smith, North Sydney, C. B., was a recent trade visitor to Toronto en route for Chicago, New York and other United States points. This eastern Canadian firm has a growing talking machine and record business.

A new 46-page catalog of Columbia-Rena records has been recently issued by the Columbia Graphophone Co., Toronto, containing the cream of its English records.

Miss Mary O'Brien, special school representative of the Columbia Graphophone Co., Toronto, is carrying on important educational work for that firm. Three demonstrations and lectures have been given in Toronto before the Catholic teachers and separate school boards, one at each of the Loretto Abbey, St. Joseph's Convent and De La Salle Institute. Miss O'Brien, who has gained valuable experience in newspaper work, was assisted by Professor Frederick Goodwin, head of the Columbia firm's educational department at New York.

I. Montagnes & Co., European manufacturers' agents, whose special agencies include talking machine needles, have removed to new premises in the new Ryrie building, Toronto.

The well-known European house of Pathé Freres, London and Paris, have now a special representative in Canada in the person of Frank J. Bowers, who is here in the interests of that firm.

Mr. Bowers spent a week in Toronto, and while

C. & C. SALES CO.

120 BOYLSTON STREET, BOSTON, MASS.

here practically concluded arrangements for the distribution in Ontario of Pathéphones and Pathé disc records. It is his purpose to arrange for a wholesale agency in each Province. Mr. Bowers departed for the West, and on his return to Toronto those of the local trade who have not already inspected the Pathé line will be given an opportunity to hear disc records on the Pathéphone. This machine uses a sapphire reproducer, and the Pathé line is well-known the world over. Pathé Freres have factories in London and Paris, and arrangements are now being made for a United States plant.

Field for Foreign Records Widening.

There are dealers in Canada who have awakened to the possibilities there are for the sale of talking machines and records to foreigners. The key to the situation is, of course, the wide range of foreign records. Although some retailers are deriving a good substantial profit from the sale of foreign records, it is a field ready for harvest that has been only scratched over on the surface.

According to the last census there were in Canada 107,535 Scandinavians, or persons of Scandinavian descent; 75,681 Jewish; 27,774 Chinese; 45,411 Italian; 2,054,890 French; 393,320 German; 15,497 Finnish; 33,365 Polish; 9,021 Japanese, and other nationalities varying from 2,500 up. These amounts since the census was concluded some time ago have increased by many thousands.

Plans Out for New Nordheimer Building.

After seventy years on King street East, Toronto, the old established firm of Nordheimer Piano & Music Co., Ltd., has gotten out plans for a new building on the northwest corner of Yonge and Albert streets, opposite Eaton's, having a frontage of 110 feet on Albert street. There is a lane at the rear from which goods will be despatched and received directly to and from the freight elevator to be located in the northwest corner of the building. The new building is to be of six stories and basement, with entrances from Albert street and from Yonge street. A recital hall with a seating capacity for 500 persons is to be located on the first floor, and ample provision will be made for artists' studios. The basement will be devoted to the talking machine department, which it is proposed to enlarge, and the sheet music retail department will have a prominent location on the ground floor, where also will be located large piano showrooms. The immense frontage of plate glass on two streets will give an unusually large window display space, the pedestrian and vehicular traffic being particularly heavy at this point.

Successful selling depends on three things:

Getting a Customer.
Selling Him.
Keeping Him.

BUSINESS OUTLOOK EXCELLENT.

Schmelzer Arms Co. Break All Banner Records in Trade Growth.

(Special to The Talking Machine World.)

KANSAS CITY, MO., June 6.—A. A. Trostler, manager of the talking machine department of the Schmelzer Arms Co., is enthusiastic over present trade conditions. He remarked to The World that the first five months of 1914 had surpassed any five months in the talking machine business since the

Schmelzer Arms Co. Showroom.

firm was established. Last year was the biggest Victor year in the history of the Schmelzer Arms Co. Mr. Trostler added: "We are frank to say that prospects for the balance of the year, with the two hundred million bushels of wheat in the State of Kansas alone, and the same proportion of crops in the States of Oklahoma, Nebraska and Missouri, will create a business which will correspond to any twelve months that we have ever enjoyed."

The Recital Hall.

The views shown herewith represent the concert hall, one of the Victor display rooms, which is used for demonstrating. The company devotes a space of seventy-five feet frontage by 135 feet deep to the retail Victor department. Complimentary concerts are given daily in the concert hall from 10 a. m. to 5 p. m.

ENLARGE "TALKER" SPACE.

The Denver Dry Goods Co., of Denver, Col., has greatly enlarged the space devoted to its talking machine department to the new quarters, superbly decorated, have attracted many customers. W. C. Wyatt is manager.

The reason there is plenty of room at the top is because most of the people who get there fall off.

ANTI-BUSINESS LEGISLATION.

Should Congress Create an Interstate Commission, the Consumer Would Bear the Brunt of Total Yearly Cost of \$58,000,000, According to James E. Bennett—"Talker" Trade No Exception to the General Rule.

Not long ago a New York newspaper printed an article in which it stated that about \$10,000,000 would cover the total yearly cost to the consumer of the proposed Interstate Trade Commission. The creation of this commission is now being discussed by Congress, and according to good authority there seems every likelihood that the legislators at Washington will establish such a body.

If such is the case every corporation will be amenable to investigation by the commission. The piano industry will not be exempted.

Concerning the stupendous expense of such a commission, which cost will ultimately be paid by the consumer, James E. Bennett, general secretary of the Printing Press Manufacturers' Association, has written the following letter:

"The total yearly cost of this commission, which Congress seems determined to create, will amount to approximately \$58,000,000, all of which ultimately must be paid by the consumer.

"There are about 309,000 corporations which filed income tax reports, and after deducting the 7,500 national banks, 17,000 State and savings banks, 3,000 railroad corporations under the Interstate Commerce Commission, and making allowance for corporations which do no business across any State line, it is estimated that there are about 150,000 corporations which will be subject to this erroneously named 'anti-trust bill.'

"The commission of five men will have many tasks. One is 'to investigate the organization, business, financial condition, conduct, management, and its relation to other corporations of any corporation engaged in commerce.' If it investigates one corporation and makes its report public, it ought in fairness to investigate all; and if it does not investigate all, then some guilty corporations may escape. Now if one examiner can investigate an average of one corporation each week, he could look after fifty a year. That would require 3,000 examiners. They, being experts, would require salaries of at least \$3,000 a year, or a total of \$9,000,000 for this item.

"Each corporation must also file annual reports. Such reports to be useful for the purposes of the commission must be very specific and include copies of all trade agreements and contracts and be under oath and certified by public accountants. To make up such reports would easily cost each corporation an average of \$150 a year, or a total of \$22,500,000 for this item.

"These reports must all be indexed, filed, analyzed and compared for traces of possible shady stock issues, baseless bonds, derelict directors and interlocking interests of monopolistic tendencies. This would take a large and very competent office force. The cost of tabulating and publishing the 1910 census will be \$8,500,000, so it is safe to say that this item of the operation of the trade commission will be at least \$4,500,000.

"Every person who is a director in two or more corporations carrying on a competitive business must either resign or file a petition with the commission, have a hearing and try to get an order permitting him to serve in both corporations. To employ attorneys, attend hearings in Washington and get this proceeding through will cost on an average

\$300, and as probably 20,000 such applications will be made the first year, this item would cost the corporations \$6,000,000.

"All 'holding' companies must either dissolve or within one year make application for permission to continue business. Such applications will entail tedious hearings and exhaustive evidence taking, and will easily cost an average of \$1,000 to the corporation. There are probably 10,000 such corporations, and to carry out these proceedings would cost the corporations \$10,000,000.

"To cap the climax, Section 12 provides that where stock is to be issued for property the commission shall investigate the value of the property and issue a certificate before the stock can be issued. There are at least 20,000 corporations organized each year in the various States which contemplate engaging in commerce and which buy some property with stock. All of these would have to submit their inventories and appraisals to the commission and probably have hearings and offer evidence. The question of value of 'good will' would be a very troublesome problem, and each of these proceedings would undoubtedly cost the corporation on an average of \$300, or a total of \$6,000,000. Incidentally, with all these duties and many others, the commission would soon be years behind in its work and the business men would have to await their turn for relief.

"Of course, this looks absurd, and it certainly is. Nevertheless it is true, and if this ridiculous trade commission is formed with its far-reaching and preposterous powers, the ordinary citizen will have

to pay this penalty. The benefits derived will be nothing except to the employes of the commission, who will nearly all be exempt from civil service requirements and only need a 'pull' to get positions.

"Millions spent to spank the industries of the country in order to regulate them! This bill in principle is an attempt to work the 'third degree' upon every business corporation, and is the essence of 'Government by Suspicion.'"

WHAT DANCE EXPERTS SAY.

The Haverty Furniture Co., Savannah, Ga., Columbia dealer, recently received the following letter from Mr. and Mrs. Sol C. Rice, prominent dancing instructors in this city:

"We are using the Columbia 'Favorite' Grafonola and Columbia records at our dancing academy, where they are attracting extraordinary attention. The records are played in perfect dance time, and our patrons are delighted and frequently encore them. If at any time we can be of any assistance to you, we are at your command, Yours very truly (Signed), Mr. and Mrs. Sol C. Rice."

SUFFERED FROM FIRE.

In the fire which occurred recently in Marion, Ind., the Butler Music Co., which occupied quarters in the Wyandotte Block, suffered considerable damage to its stock of supplies and instruments in the basement of the storehouse.

KRAKAUER AND THE EDISON.

The Well-Known Piano House of New York Featuring the Edison Disc Phonograph to Excellent Purpose — Handsome Display Quarters and Special Recitals Interest the Public and Win Customers and Friends.

Krakauer Bros., one of the old-time distinguished piano houses, which recently secured the agency for Edison disc phonographs, are displaying them to great advantage in their ware-

A. Edison, Inc., they say: "We find the Edison instrument a worthy adjunct, as to quality of tone, to the Krakauer pianos. The disc has given entire satisfaction and has caused many surprises to musicians and critical minds." And the sales of records prove the correctness of this deduction.

Andrew H. Mangold, manager of the Krakauer establishment, has demonstrated the Edison instruments at a number of musicales recently and has attracted most fashionable audiences, who have been aroused to great enthusiasm in connection

founder, Simon Krakauer, of whom a portrait appeared. The house of Krakauer has long been noted for its adherence to the highest ideals in the constructive department of piano making, having paid particular attention to the development of tone quality.

H. C. BROWN ADDRESSES PIANO MEN.

Advertising Manager of Victor Co. Emphasizes Importance of Truthful Advertising and the One-Price System at Banquet of National Association of Piano Merchants.

Henry C. Brown, advertising manager of the Victor Talking Machine Co., was one of the speakers at the annual banquet in connection with the convention of the National Association of Piano Merchants at the Hotel Astor on June 9 and which was attended by over 650 piano men and their friends. Mr. Brown delivered an interesting address on the importance of truthfulness in advertising and the necessity of the one-price system as conditions precedent to success in business, and closed with an appeal for the piano men to do all in their power for the support of the Stevens bill, which provides for the maintenance of prices on trade-marked articles. The arrival of Governor Glynn, of New York, the guest of honor, during Mr. Brown's address, forced the latter to deliver his speech in sections, as it were, but nevertheless he created an excellent impression.

PLAYED GREAT GAME.

At Least We Are Sure the Winning Team of the Forces of the New York Talking Machine Co. Did—Particulars Later.

There was great excitement in Van Cortlandt Park last Saturday afternoon. Diamond No. 3 was surrounded by the forces of the New York Talking Machine Co., carrying on an active campaign of "rooting" for their favorite team. The participants in the struggle for baseball honors were the Married vs. the Single Men of the New York Talking Machine Co. As The World closed its last form before the result was known, we are safe in saying that the best team won. But even that will be determined later, for a return game is inevitable.

Make sure of your aim—no one feels meaner than the fellow who sends a wink across, and it doesn't land.

Exterior and Interior Views Krakauer Bros., New York.

rooms at 17 East Fourteenth street, New York. The illustration herewith will give an idea of the extent and equipment of the Krakauer quarters.

Krakauer Bros. have expressed the greatest pleasure and satisfaction with the wonderful tone qualities of Edison discs, and in a letter to Thomas

with the interpretation of the programs prepared by him.

The Edison Phonograph Monthly, by the way, recently devoted considerable space to the Krakauer establishment, giving a history of the house and extended reference to its distinguished

DEALERS: Write for our Victor Pennant. Sent with our compliments.

SIX NEW EDISON ARTISTS

Who Will Make Their Debut in the Blue Amberol List for August—All Prominent in Their Respective Spheres of Activity—Have Made Some Very Notable Records.

Six new artists will make their appearance in the list of Blue Amberol records for August issued by Thomas A. Edison, Inc. They will include

Paul Althouse, Tenor.

Mildred Howson Hartley, Contralto.

Paul Althouse, one of the distinguished members of the Metropolitan Opera House Co., a tenor of distinction, who has been heard with great appreciation and interest. He is a pupil of Oscar

Arthur Blight, Baritone.

Edwin Swain, Tenor.

Saenger, the New York teacher, who has turned out so many eminent artists. Mr. Althouse has selected that beautiful number from "Faust," "All Hail, Thou Dwelling Lowly," in which to make

Hendrika Troostwyk, Violinist.

Fred Duprez, Monologist.

his debut. Other artists who will be heard in the August list are Mildred Howson Hartley, contralto, who has appeared in opera and concert with great success. She sings Blumenthal's "Sunshine and Rain." Arthur Blight, a baritone of recognized worth, will be represented in the August list by "Beauty's Eyes," a lovely song, which will undoubtedly appeal to his admirers. Another gifted artist who makes her debut for the Edison Co. is Hendrika Troostwyk, violinist, who has played with a number of orchestras, winning great acclaim. She is heard in a composition of her own entitled "Springtime," which displays her technique and musicianship most effectively. A concert singer widely known is Edward Swain, who long occupied a position as soloist with the Lafayette Avenue Presbyterian Church, New York. Mr. Swain's

voice is a remarkable one, and he is especially noted for his perfect diction—a valuable acquisition. This varied list is made complete by the appearance of Fred Duprez, monologist, who has chosen as his initial selection for the Edison Co. "How to Be Happy Tho' Married." This monologue has been given by him in theaters all over the world and has been laughed at by millions. It now enters into a new sphere of publicity.

HE USED THE ECLIPSE ALL RIGHT!

The Columbia Co.'s advertising department was greatly surprised the other day to receive a proof from one of the local newspapers wherein a cut of an eclipse of the sun was prominently displayed. It seemed that this advertisement was intended for the exploitation of the company's "Eclipse" machine and dance records, and as no cut of the machine was available, the newspaper was instructed that a cut of an "eclipse" was to be inserted. The compositor read these instructions literally, and the proof as submitted showed a glorious illustration of an eclipse of the sun or moon that would have delighted astronomers but

would hardly have been appreciated by talking machine prospects.

TO TEACH MUSIC CRITICISM.

There is a class at the Chicago Musical College where students are taught how to become music critics. It would be interesting, remarks the London Daily Telegraph, to know the methods adopted. But no matter. For evidently the pupils are on the right road to achieving distinction in that particular walk in life. Edward Moore, their teacher, asked them recently to write their impressions of a certain "soulful" composition. "Whenever I hear it," wrote one girl pupil, "I feel like putting my head on some one's shoulder." To which the professor appended the comment: "Concert seats next to yours are bound to be at a premium when you become a critic."

Women wear so much false hair nowadays that it is extremely difficult to tell which is switch.

The man who feels that he has a message for the world generally sends it collect.

(From Scientific American, May 23, 1914.)

"An Attachment for Talking Machines and Gramophones Which Improves Their Reproduction"

IN THE Scientific American of September 27th, 1913, we published an article on an invention patented by Mr. M. B. Claussen for amplifying the reproductions of talking machine records, which invention consisted in inserting the steel reproducing needle through a specially formed celluloid disk. Simple as the invention is, the effect is remarkable. With a fine needle a volume of sound can be obtained which exceeds that produced by a coarse needle, with the additional result that all the delicate shades which only a fine needle can reproduce and which escape a coarse needle, are heard. Mr. Claussen has patented a modification which permits the use of the fiber needle. If anything, the effect of the celluloid disk is even more pronounced than with the steel needle. Those who use fiber needles know that they are superior to steel points because the scratching is reduced, the tone is purer, and the records are not worn away so quickly. Mr. Claussen passes the fiber needle through a ball and socket joint in the center of the disk, so the needle can be adjusted to any angle. It is now possible with this invention to use the fiber needle with those records for which it is peculiarly adapted, with the assurance that the sound to be obtained is greatly amplified and a richness of quality obtained otherwise quite impossible."

(Special to The Talking Machine World.)

CHICAGO, ILL., June 11.—Talking machine dealers feel assured of not only a good but a large fall business. The Farmer (with a big F) is going to have money to spend this year, and he has already evinced a predilection for talking machines, which the dealers and makers will try to satisfy. The reason for this feeling is the continuance of the highly favorable crop reports from the territory most immediately tributary to Chicago. The wheat situation is most unusual. The acreage is larger than ever before, the condition better than before known, and the reports from our chief foreign competitors are such as to promise that prices will remain at least fair. On this basis of facts the American farmer will be some half a billion dollars better off on account of his wheat crop alone, while the other small grains, especially oats, are in almost as good a position as wheat, except that there is not so much of them. If corn fulfils its present promise the barns of the country will be actually bursting with wealth of this season's harvest—and what will the farmer buy? Apparently, from recent examples, autos to go about in and talking machines and player-pianos to amuse him at home.

G. W. Davidson Painfully Injured.

G. W. Davidson, of the Talking Machine Shops, was painfully injured a short time ago, when an automobile which he was driving came into collision with a truck. Three fingers of one hand were badly lacerated and Mr. Davidson suffered severely from the pain and loss of blood.

Miss I. Caldwell, of the Shops, leaves for a trip through Europe June 18, sailing on the "Calgary" of the Allan Line leaving Quebec. Miss Caldwell will be gone for three months and will visit England, Scotland, Holland, Belgium, France, Spain and Italy, also making other stops at Mediterranean ports. She will return by one of the White Star steamers over the Southern route.

Attractive L. & H. Window.

Lyon & Healy are showing by illustration how essential to the proper equipment of a family camping-out party is a talking machine. In their window they have placed a graphic representation of a party of campers, consisting of father, mother and child. The child is playing around with a dog, the mother is listening to a Victrola, and father—he is catching fish, as is quite proper when a father

of a family takes his wife and offspring out into the wilds beyond the end of the horsecar line or more modern trolley. The scene is pretty and suggestive that a Victrola would not be out of place on such an excursion. The scene is made the more complete and realistic by the introduction of a real babbling brook, beside which the tents are set, and squirrels and turkeys and other presumable residents of the locality to which our campers have hid themselves to be near to nature and her charms and away from the distractions of the city. Seriously, it is worth many times the trouble of carrying to have even a small machine and a limited selection of records to while away rainy days and evenings in camp and to entertain the welcome visitor.

C. E. Goodwin on Vacation.

C. E. Goodwin, manager of the Phonograph Co., is on a three weeks' trip to the East. The journey is made as a combination business and pleasure trip, for Mr. Goodwin plans to put in several days of hard work at the Edison factories at Orange, N. J.

Fibre Needles in Summer Use.

That fibre needles are constantly increasing in popularity and are being used even by machine owners who are taking their instruments with them to their summer homes is the conclusion reached by Wade & Wade, for the big sales of the Wade fibre needle cutter at the present time can be quite clearly traced to the summer influence.

Columbia Notes.

Wholesale business of the Columbia Co. is reported by District Manager W. C. Fuhri as being very good for this time of the year, with especially heavy calls from dealers on the summer dancing outfits that the Columbia Co. has so generously advertised. Dance records continue to be the main call in the Columbia record warehouses.

A distinguished visitor of the month was George W. Lyle, who came to the city on a short tour of inspection. Mr. Lyle is well satisfied with conditions generally and viewed the business situation with optimism.

C. E. Baer and his wife started for New York June 8, accompanied by Mr. and Mrs. Edward Blimke. They will motor the entire distance and will be gone about three weeks. While in the East the two Columbia men will visit the factory.

An All-Efficiency Office.

W. W. Parsons, local Dictaphone manager, has

made his office the ultimate in the matter of business efficiency by installing a Dictagraph outfit, whereby he may talk to or listen to any one of the other people in the office, or to all at once, without rising from his desk or even reaching out his hand for a telephone. The Dictagraph is similar to that made use of by many detective agencies, although much changed to meet the requirements of business institutions. It is very interesting to see Mr. Parsons at his desk dictating letters into a Dictaphone and directing the employes of the big offices at almost the same time. His is the all-efficiency office. Mr. Parsons reports that B. F. Swanson & Co., of Des Moines, Ia., and C. H. Rollins & Son, of Keokuk, Ia., are two new agents for the Dictaphone.

Mr. Herdman, manager of the St. Paul office of the Dictaphone Co. was a visitor to the local offices.

New Wurlitzer Man.

L. E. Noble is the new man in the wholesale talking machine department of Wurlitzer's, succeeding F. C. Harnden. Mr. Noble is a young man who has had extensive sales experience and under the direction of Assistant Manager Fred A. Siemon he is making such experience felt. Mr. Noble is devoting considerable time in the solution of dealers' problems and no doubt his ideas will prove to be of great value.

Special Summer Sales Plans.

Some very effective sales promoting plans designed to answer the requirements of summer conditions have been prepared by the Talking Machine Co. and are already being made heavy use of by numerous dealers. The immense call for Styles IV, VI and VIII to be used by vacationers in the woods and on the lakes suggested what the possibilities of the summer trade could amount to. Customers who have entered stores in answer to advertisements of summer and dancing outfits have been appealed to by the talking machine's wonderful possibilities for perhaps the first time and the result in many cases has been that the prospective buyer has left after ordering one of the larger machines. The buyer is easily impressed with the fact that the additional cost of a larger machine can soon be paid off and the result to buyer and seller is always most satisfactory.

The past month has shown good business for the Talking Machine Co., due in part to the replenished record stocks and to the generous purchases of Styles IX and X in fumed oak and the new Style X and XI machines.

(Continued on page 36.)

THE WADE—THE PRACTICAL—THE WADE Fibre Needle Cutter

The WADE embodies the *right principle*, worked out through *long experience*. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone.

The WADE cutters are made of the best steel and are absolutely guaranteed.

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made. No. 1 is a very popular cutter which has given excellent service.

Two Successful Ideas

Lyon & Healy's Idea of the Victrola

From the very beginning we have advocated the highest and best in the handling of the Talking Machine proposition. We have always felt that its rightful place was in first-class surroundings. Dealers, whose conception of the business agrees with ours, can obtain many helpful hints from us. Write to us about your problems. We will tell you what we would do under similar circumstances.

Lyon & Healy's Idea of Service

Years ago we inaugurated so high a standard in taking care of the wants of dealers that many said we were aiming at the impossible. To-day our standard is higher than ever, but we have a host of imitators. Dealers will find EXTRAORDINARY ALERTNESS to be the keynote of our Victrola and Record business.

Send your orders to us and you will find that you will have strong co-operation. We have made a success of our own retail Victrola business and we can greatly help you by means of the unique Lyon & Healy Service to make a success of your business.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 34).

R. J. Keith, sales manager, recently made a short trip which included a stop at Indianapolis to witness the motor races. While there Mr. Keith was the guest of James Whitcomb Riley, the famous Hoosier poet, and together with Howard Chandler Christy, the illustrator; Mr. Johnson, owner of Century Magazine, and Carl Fisher, one of the owners of the speedway, enjoyed the courtesy of the judges' stand.

Increases and Improves the Tone Values.

A talking machine attachment has been invented and placed on the market by A. S. B. Little, of Nashville, Tenn., which is highly spoken of by those who have heard it. The object of this invention is to do away with the more or less destructive influences and effects of rigidly held needles on the records. In playing his records on his own machine Mr. Little noted the damage done and the imperfect renditions obtained by rigidly held needles and made and applied to his own machine the "Little One-der" attachment. This attachment can be used on any standard disc Victor or Columbia record on any standard machine. It cannot be used on the new Edison talking machine. The claim is made that it will play any record much better than a rigidly held needle, and while it improves the playing of new and perfect records and much prolongs their life, it is also stated most positively that by the use of the "Little One-der" records that have been discarded as useless because of some scratch or crack can be played anew. The use of the "Little One-der" necessitates no change in the machines or the needles. The price is low and it should prove a good seller with little pushing.

Notes and Visitors.

H. G. Power, manager of the talking machine department of the Taylor Carpet Co., was a visitor to the local trade.

L. C. Parker, manager of the piano and talking machine departments of Gimbel's, of Milwaukee, passed through the city on his way to the piano men's convention at New York.

Word has been received here that Mr. Haile, formerly with the Eggleston Music House at Champaign, Ill., is now with Geo. H. Wheelock, of South Bend, Ind.

John Green, a talking machine man of Grand Rapids, who is well-known to the local trade, is on a motoring trip to New York City.

Ike Kupfenberg, Milwaukee avenue Victor dealer, recently made an Eastern trip which included a visit to the Victor factories at Camden.

A. H. Forson & Son, of Austin, are the latest to establish a Victor department.

W. E. Ericson, Inc., are conducting a series of Victrola dancing exhibitions at its Evanston shop.

E. J. Melich has moved into new and larger quarters at 3938 West Twelfth street.

M. C. Conlin & Sons, Madison and Western avenues, have resumed business following a serious fire suffered recently. The shop has been remodeled and the stock much enlarged.

George Mickel, of Mickel Bros., Des Moines, Ia., called at the offices of the Talking Machine Co. on his way to Detroit, where he will spend a vacation.

The P. A. Starck Piano Co. attracted much business and attention recently with an elaborate "Queen of the Movies" window. The arrangement of photographs of the company and the prominence of the records displayed did much to produce a large sale.

News has come from Peoria that Mr. Kiess, formerly with the Wookey Co., is now the head of the new talking machine department of the Block & Kuhl department store.

P. H. Hughes, formerly with the Wisconsin Music House, of Janesville, Wis., has opened a piano and talking machine store at Oshkosh, Wis.

Some of the month's visiting dealers were: H. B. Eger, Libertyville, Ill.; B. A. Zechlin, Frankfort, Ill.; Mr. Willis, Mayview, Ill.; John Danlin, St. Charles, Ill., and S. L. Cook, Indiana Harbor, Ind.

Miss Theresa Dondero, for seven years in the local Columbia offices, will on June 24 become Mrs. Clarence O'Donnell. Best wishes.

J. B. Ryde has been appointed assistant manager of the wholesale talking machine department of Lyon & Healy. Mr. Ryde is one of the well-known

stand-bys of the house, having been with Lyon & Healy for the past sixteen years. He has covered the State of Illinois for the firm and is popular with the trade.

Congratulations are being offered Miss M. O. Tapper, of the wholesale talking machine department of Lyon & Healy, on her approaching marriage. The date has been set for June 27, and the name of the happy groom that is to be is R. E. Nordquist.

A. G. Nelson, manager of the Tri-City Piano Co., of Moline, Ill., has been a visitor, but found time to devote to something besides talking machines. He visited the races at Indianapolis, motor-ing with a party of friends from Chicago.

L. C. Wiswell, manager of the wholesale talking

more than ordinarily attractive, and Lyon & Healy offer a rare opportunity for Victor dealers to secure splendid publicity.

DEMAND FOR KLINGSOR NEEDLES.

Manager Reports Receipt of Twelve Million Needles of Various Styles with Twenty-five Million More in Transit.

(Special to The Talking Machine World.)

CHICAGO, ILL., June 9.—The American Klingsor Works has established offices in rooms 1316-18, North American building, under the management of Arthur Soudek, a man who is not only well acquainted with the needs of the American market, but who has also had extensive experience in the European trade.

AMERICAN KLINGSOR WORKS

1316-18 North American Building

CHICAGO

Omaha, Neb., is one of the first of the vacation-bent talking machine dealers to visit Chicago—the great central summer resort.

Mr. Sanderson came armed with all of the equipment of one determined upon having a good time, including a kodak wherewith to record the said good time for future reference.

Mr. Sanderson reported an excellent Edison year, saying that the past month's sales more than doubled those of the corresponding period of last year, and had the supply of goods been sufficient to supply the demand the record would have been

an even better one. "The larger Edison machines have been our long suit," said Mr. Sanderson. "They seem to sell easier than the cheaper grades.

"While I have the opportunity I want to tell you how much I appreciate The Talking Machine World. I receive copies both at my home and office and the minute The World comes I start to read it through. There is not a paragraph I do not see. I get something good out of it every month—things that give me a little more 'backbone' and a few more ideas. I think The World is the best thing that a man in this business can invest in."

and four days later the sale had to be called off until another order could be placed for additional stock.

There was no definite announcement as to the total of the sales, but it was understood they reached something like \$5,000 in the two weeks the sale ran.

One of the most important features of the plan, as it was found to work out, was a discount of 10 cents on each payment made in advance. The result of this offer was that a very large number of purchasers made several payments ahead at the time the machine was delivered. This insured the company against the person who might consider the plan an easy means to obtain a machine for a few weeks and then return it. The discount, carried through the entire course of payments, amounted to \$3.90, or nearly 10 per cent. As a matter of fact, many took advantage of discounts, running from \$2 to \$3.

It was reported, says Printers' Ink, that there were a few cases—less than a dozen—where purchasers had desired to return the machines after making two or three small payments, but in practically every case a little straight-from-the-shoulder talk convinced such purchasers that it would be better for them to keep the machines and pay for them. The discounts, however, in the hands of trained salespeople, minimized such troubles to a great extent.

THE SALES FORCE REFLECTS POLICY OF THE HOUSE.

Interesting Paper Read at Recent Convention of Indiana Piano Merchants' Association by Fred L. Paige, of Terre Haute, Which Possesses Many Points of Interest for Members of Retail Branch of Talking Machine Industry—Views of a Practical Man.

The employing of salesmen results from the desire on the part of the employer to do as much business as his capital warrants, and sometimes from his personal inability as a salesman or his lack of ambition in that direction. Whatever may be the reason the employing of salesmen seems to be a very necessary part of the piano business, and to get, make and keep good men is certainly one of the largest problems of the employer.

A salesman to be successful must have a personality, making for himself and his house hosts of friends, not only the real buyers, but the kind that will go out of their way to point out a real sale and help boost the making of it. He must first of all be absolutely honest, not only to his house, but to his customers also, and conscientiously give to them the value he has represented to them as giving. He must be ever and always on the job, alert and strenuously careful that his house has a hearing with every customer, if not a successful one. He must work ever with the aim of closing his sales to the best advantage as to terms, not being content with simply following the line of least resistance, and closing on the minimum terms, just because a customer thinks it to be to his advantage to make the terms low. He should use extreme care in the selection of his sales, yet exercise a judgment born of experience, and not be afraid to make a sale even if the payments are low, providing it can be safely made and at a sufficient profit to justify. He must be able to discriminate between the customer who pleads poverty and talks for low terms, when an investigation will show that there is absolutely no reason for his not paying even better terms than asked for.

A salesman should and I think usually does reflect the policy and business morals of the employer, and one brought up in a house of tricky tactics and immoral surroundings usually brings to his next job many bad habits hard to break. The selling of pianos should be on a plane with works of art and other artistic merchandise, but I am sorry to be compelled to admit that through the exploiting of ruthless money grabbers, not merchandise, it has in many sections fallen to the level of the despised sewing machine and lightning rod business. It is the mission of the best class of salesmen to raise the standard of the business, and this can be done only by a strict adherence to honest methods.

It has always been considered that salesmen are born not made, and while many are called, few are chosen. The gift of salesmanship seems to fall on few, and some do not recognize it early enough to get out of the kindergarten class, while others take up some line in which they are especially interested, and so thoroughly acquaint themselves with that line that with tact, persistence and persuasion, the average customer falls a willing victim and forever afterward sings his praise. Salesmen are employed under various forms of contract, their compensation depending on their ability to sell goods, to do a clean business and to maintain for their employer a reputation which admits of no criticism. While there are many in the trade whose qualifications along these lines fail to measure up as they should, there are still a limited number of those bright intelligent fellows particularly endowed with powers of argument and persuasion, and possessed of a keen sense of honor and morality, making them salesmen of whom a house may justly be proud.

Our experience with salesmen has been somewhat limited, as we have not hired promiscuously and have for the most part taken young men and educated them along the lines of our own methods and house policy. We have usually hired on the straight salary basis, feeling that with our one-price system and simple organization our interests are best served by this arrangement. We pay salaries ranging from \$12 per week up, and expect of a salesman sufficient business during a period of six months or a year to make the "salesman cost" from 15 to 19 per cent. While we must confess we fall short of this ideal and still retain the services of the man, it is because of the character of his business and his ability to make himself of service in many other ways outside of selling. I believe that there are many salesmen whose services are valuable to their employers who are not producers of high business.

The out-of-town business we find cannot be produced on as low a per cent. as the city business, and it is a grave question with us if the out-of-town business is at all profitable except as an advertisement and for its swelling the number of sales made and incidentally assisting the manufacturers to dispose of their stock. I believe the business has undergone some radical changes during the past few years, and in one way this is seen in the doing away by some houses of outside canvassers or the ringing of door bells, as it is commonly called, and the business of to-day is being brought in to the house more and more.

Business also has turned largely from the old methods of argument in which the salesmen depended almost entirely on the credulity of their customer and their own ability to so color the unbelievable as to make it appear a fact. The present day salesman must know his goods and be able to describe them so vividly as to make a catalog unnecessary. But, as before said, of much more importance is his personality and ability to inspire confidence both in himself and his house. The selling of pianos being specially a personal appeal, it is very difficult to lay down any absolute rules.

"PROGRESSIVE INSTALMENT PLAN"

Recently Introduced in Indianapolis Strikes a New Chord in This Line of Merchandising, Particulars of Which Will Interest Piano Men—Size of Payments Increase Steadily Until Goods Have Been Fully Paid For.

In view of the many forms of instalment sales that prevail in the music trade industry, it is interesting to note how this form of work is conducted in other lines—for instance, the sewing machine field. "The progressive instalment" plan recently inaugurated by L. S. Ayres & Co., of Indianapolis, will interest a great many in the piano field because of its novelty and rather ingenious means of attracting the attention of the public.

Ayres & Co. advertise the Standard Rotary sewing machine, on payments starting at 5 cents for the first week and increasing 5 cents a week until the total is paid, and is reported to have had excellent returns from the sale.

The price of the model so sold is \$39, and the payments on this basis extended over a period of thirty-nine weeks, the last payment being in the neighborhood of \$2.50. It is said that forty machines were sold the first day of the novel sale.

EDISON BANS CIGARETTES.

Workers Can't Use Them, Though He Smokes Cigars and Chews.

The 6,700 employes of the Edison shops in West Orange, N. J., the other day were confronted on every side with printed signs bearing this warning:

.....
: Cigarettes NOT TOLERATED. They :
: Dull the Brain. :
:.....

As a result of correspondence with Henry Ford, the Detroit automobile manufacturer, Thomas A. Edison decided to be a crusader against the cigarette. At the request of Mr. Ford Mr. Edison made an analysis of at least twenty brands of cigarettes. While he found the tobacco contained in them was of all qualities, he found poisonous matter in all the papers in which they were rolled. Said Mr. Edison:

"That poison attacks the brain and works havoc with a man's mental activity. His mind becomes clouded. Evaristo Madero, brother of the late President of Mexico, told here a few days ago that men, women and children are inveterate smokers of cigarettes in the Southern republic."

Mr. Edison has always abhorred cigarettes, but he is a heavy smoker of cigars, and he likes to chew tobacco.

ADVERTISING SCHEMES THAT INCLUDE PRIZES

Which Are Dependent Wholly or in Part Upon Chance, Stand a Poor Show at the Post Office Department These Days—Interesting Information on This Subject Submitted For Benefit of Readers of Talking Machine World—What Is and What Is Not Affected.

Advertising schemes that offer prizes dependent wholly or in part upon lot or chance stand a poor show at the Post Office Department these days. The use of the United States mails for the promotion of lotteries is, as is well known, prohibited, but it is not so generally realized that the Department is little, if any, more lenient toward certain prize schemes, gift enterprises and guessing contests. This policy has an especial significance for advertisers since the recent revival by the Postmaster-General of the practice of issuing fraud orders against offenders pending the disposition of the cases in the courts. This method has, of course, the effect of shutting off an advertiser's mail without waiting for the courts to pass upon the case.

In a recent report to the Postmaster-General, the assistant attorney-general for the Post Office Department declares that a very voluminous correspondence between his office and postmasters throughout the country is necessary in connection with the enforcement of the statute which declares unmailable all letters, cards, circulars, certificates and other matter concerning lotteries and gift enterprises.

Outlining his policy in such cases, the law officer of the Department says:

"Postmasters throughout the country make requests daily for rulings from this office upon the mailability of matter handled by them relating to every conceivable kind of contest contemplating the award of prizes of one nature or another. Many of the enterprises, such as 'guessing' or 'estimating' contests, certain classes of prize card-parties, contests in which prizes are to be distributed according to the priority of receipt of the answers, prize-package schemes, all drawings, raffles, etc., also 'endless-chain' enterprises designed for the sale or disposition of merchandise or other things of value through the circulation or distribution of 'coupons,' 'tickets,' 'certificates,' 'introductions,' 'contracts' and the like, which are as well inherently fraudulent, are invariably held to be embraced in the terms 'lottery, gift enterprise, or similar schemes offering prizes dependent, in whole or in part, upon lot or chance' as used in the postal lottery statutes; and in the administration of these laws postmasters and other postal officials are instructed as occasion arises to with-

draw from the mails all publications, circulars, cards, pamphlets and other matter containing advertisements or notices or other information of any kind concerning such schemes.

Window Displays Affected.

"There are also presented numerous other propositions which may not in themselves be in violation of the lottery statutes but which, when first submitted, usually embrace some features rendering them unmailable under the law in question. They include such enterprises as those involving the offer of prizes for the most votes secured in newspaper subscription and other contests, for the correct, or nearest correct, solutions of puzzles, problems, etc., and for the supplying of words, letters, or sentences missing from published matter; for the best window displays of different articles; for the best names to be used for various purposes; the best essays, compositions, productions, etc.; also some in which are involved the distribution of lots or tracts of land in town-site and other land-openings, etc. When the objectionable features are eliminated and certain required conditions incorporated in such of these contests as admit of reformation, the matter is allowed admission to the mails."

For advertisers, the significance of this pronouncement is found in the final sentence wherein there is seemingly indicated the willingness of the Department to pass in advance upon the mailability of advertising matter relative to schemes and contests of one kind or another. Presumably, to be sure, the matter must be submitted through the advertiser's local postmaster, but the important point is that the matter can be referred direct to headquarters with the presumption that an advertiser can obtain an authoritative opinion on his copy ere he has gone to the expense of printing and posting his literature.

In short, this is much the same sort of advance advisory policy which has been adopted by other departments, with reference to manufacturers' labels on food and drug products. And in the case of the Post Office Department, says Printers' Ink, such a policy is assuredly in marked and gratifying contrast to the policy which has obtained at certain stages in the past when the officials of the division of classification and others in authority were wont to refuse to give any advice to an ad-

vertiser or to intimate what their decision would be with reference to any submitted piece of advertising literature. They took the absurd position that an advertiser must "put his head in the noose" by actually mailing the matter regarding the status of which he was in doubt, ere the Department would give any indication whether or not such matter was deemed to be clearly in violation of law.

COLUMBIA LINE FOR WESER BROS.

Prominent Piano Concern to Handle Grafophones and Records in Retail Stores.

The Columbia Graphophone Co. closed arrangements recently with Weser Bros., 131 West Twenty-third street, New York, whereby this well-known piano house will handle a complete line of Columbia products in its warerooms at this address. Weser Bros. are well-known in the piano industry, as their pianos and player-pianos are handled by representative dealers from coast to coast. Their warerooms on Twenty-third street are very successful, and Columbia machines and records will undoubtedly meet with a ready sale there.

NEW CONCERN IN BUTTE, MONT.

(Special to The Talking Machine World.)

BUTTE, MONT., June 6.—Joseph Lutey and L. V. Williams, of this city, have just opened a new talking machine store under the name of the Butte Phonograph Co., and will handle nothing but talking machines and records. The new quarters are fitted up in first-class style, there being three large soundproof demonstration rooms, with attractive furnishings and decorations. A complete line of Edison products will be carried in the new store, and George A. Renner, Northwestern representative of Thomas A. Edison, Inc., directed the arrangement of the store and the selection of stock. He will also assist the company in staging demonstrations for the next few months.

PRAISES DANCE RECORDS.

The Columbia Co. received this week an interesting letter from the Georgia Brown Dramatic School of Art, Kansas City, Mo., relative to the merits of Columbia dance records. This school is one of the best known institutions of its kind in Kansas City, and has numbered among its pupils many well known Middle West actors. The letter reads as follows:

"I wish to extend my congratulations to the Columbia Graphophone Co. upon the splendid records for dancing which I am using in my school. My pupils enjoy the perfect dance time and superior quality of music. Columbia records are beyond doubt a joy forever. Very truly yours, (Signed) Mrs. Georgia Brown."

WEBB TELLS HOW HIS "TALKIE-MOVIES" WORK.

Interesting Personality of George R. Webb, Who Is Giving His Attention to Synchronization of Talking Machine and Film—While a Capitalist and Organizer, He Also Possesses a Mechanical Turn—How Investigation Was Conceived and Obstacles Overcome.

George R. Webb, whose "talkie-movies" are being shown here for the first time in the Fulton Theater, isn't at all the usual type of showman. Mr. Webb is rather a capitalist, an organizer, with a mechanical turn. Before he became interested in the synchronization of the talking machine and the film he was a railroad man, a telephone man and a dozen other things.

His first venture into a field remotely resembling his present one was the installation in Wilmington of a system by which telephone subscribers might be able to hear music in their homes, music which was produced by a talking machine at "central" and carried over the wires to the subscriber. The plan is still in operation.

His Friends Scoffed.

The step from this to the synchronization of the record and the film was a short one. Mr. Webb, telling of his work, said that when he first conceived it and told of it, his friends laughed and told him he was in his dotage.

"The trouble with them was," said Webb, "that they didn't realize, as I did, that the motion picture was to be the popular amusement of the future, and that a fortune awaited the man who made even the most unimportant improvements in its manufacture.

"Most persons have seen the crude earlier attempts to harness the talking machine and the cinematograph, which from time to time have made their appearance in this city. They were never satisfactory. It seemed, in the first place, that the "talker" was always a talking machine and the motion picture always a motion picture, and that when even the nearest approach to perfect synchronization was made the task of believing that the picture on the screen was actually talking or singing was too much for the most agile imagination.

"I had seen this trouble, too, and had noticed further that the power of a single talking machine was all too slight for use in a large hall.

Utilizes Electricity.

"I thought of coupling up a half a dozen talking machines, but I realized how impossible it would be to keep them all together. After casting about for months I suddenly thought of the telephone. Why not use the electrical current for carrying the sound from a single record to half a dozen horns? By such multiplication I could be sure of a sufficiency of sound, and of a complete unison between the horns. That, briefly, is the plan I have adopted.

"Of course, that is the merest outline. There are a hundred details. You will want to know, for instance, how I can have talking machine records of the voices of Caruso or Farrar singing to the motions of persons who are evidently not Caruso and Farrar.

"Well, I begin with a Caruso record. I play that record half a dozen times, or a dozen times, if necessary, before the person who is going to act for the camera, until he is entirely familiar with the tempo, the enunciation, the breathing and all such technical details. When he is letter perfect I put the record on a talking machine which is electrically connected with the motion picture camera. I start the record and the projecting apparatus at the same time, and the person whose picture is being taken sings in entire unison with the original record. It so happens then, as you will see, that I have a motion picture film of a man or a woman singing exactly the words on the record.

Only One Talking Machine.

"When the time for the show comes I simply start the record and the projecting apparatus at the same time. There is only one talking machine, remember, which is directly connected with the lantern.

"From this talking machine run wires to half a dozen horns arranged around the screen on which the picture is connected. Each one of these horns has a reproducing apparatus similar to the receiver in the telephone, only so sensitized that instead of giving forth a mere whisper, as the telephone does, it magnifies the sound to the power of the original.

"The operator turns the crank. The film starts, and the music starts with it. If the start is right, anything less than perfect synchronization is impossible. The audience looks at the singer pronouncing his words, or the banjoist fingering his stops, and they hear the sounds at the same instant the mouth forms the requisite consonant. It sounds complicated, but the principle is simple."

SECURES VERDICT.

Architect Recovers \$600 for Plans Drawn for Vitaphone Co.

Philip Raque, a Jersey City architect, was awarded \$600 by a jury in Judge Speer's court with interest from January 1, 1913, in his suit to recover compensation for professional services rendered to the Vitaphone Co., of New York.

The plaintiff had drawn up plans for buildings to be erected in Plainfield.

JOAN SAWYER WITH COLUMBIA CO.

Well-Known Conductor of Persian Garden Arranges to Supervise the Making of a Special Series of Dance Records for the Columbia Graphophone Co.—A Columbia Enthusiast.

The Columbia Graphophone Co. announced recently that it had closed a deal with Joan Sawyer whereby this well-known artist would supervise the production of several series of special dance records for the Columbia library. Miss Sawyer has already supervised the recording of one of these series by the Joan Sawyer Persian Garden Orchestra and these records are now being sent out to the trade. Joan Sawyer conducts the Persian Garden at 50th street and Broadway, New York, and is one of the best-known exponents of the modern dances in the country, having been markedly successful with her magnificent Persian Garden. Miss Sawyer, who will leave shortly for an extended tour of the country, accompanied by her orchestra, speaks in the following terms of Columbia dance records:

"I think it is only fair that having found Columbia dance records so immeasurably superior to all others, I should write you a line in appreciation of your successful endeavors to supply the dancing public with the very best in dance music that can be possibly had. Personally I am so impressed with Columbia dance recording that I have decided to have you make records for me of the dances I have been using in my own work and shall loan you for the purpose my special dance orchestra from the Persian Garden, New York. I look for some unusually interesting and excellent results. Believe me, Sincerely yours (Signed) Joan Sawyer."

ON TRIP THROUGH THE WEST.

Dan W. Moor Calling on Trade for Standard Gramophone Appliance Co.'s Specialties—New Record Cleaner Popular with Dealers.

Dan W. Moor, road ambassador for the Standard Gramophone Appliance Co., 173 Lafayette street, New York, is at present in the West on an extended trip that will include visits to all the leading trade centers. Mr. Moor will return the early part of next month in order to be on hand for the annual jobbers' convention, which will be held this year at Atlantic City, N. J.

"We are greatly pleased at the heavy demand for our new 'Standard' record cleaner," said Thomas W. Kirkman, manager of the company, in a chat with The World. "Although this cleaner has been on the market but a few weeks we are already receiving repeat orders, and Mr. Moor, our road ambassador, is booking gross orders from all the leading jobbers. The convenient form of our cleaner, coupled with its artistic appearance, combine to make it an accessory of unusual value and sales possibilities. The call for our 'Standard' fibre needle cutter also keeps up very strong, and at the present time we are working to full capacity to handle the orders of our patrons for this cutter."

All the music—and nothing else.

Our slogan: "Please thy neighbor as well as thyself."

Modify and clarify the music. Play old favorite records now discarded because of the scratches.

ANNUAL OUTING OF BLACKMAN CO.'S EMPLOYEES

Which Occurred on June 6, Most Enjoyable in Every Way—Sports of All Kinds Part of the Program—Annual Distribution of Dividends a Feature of the Outing—Entire Party Attends Palace Theater in the Evening—Sales Force Wins Ball Game.

June 6 was a red letter day for the employes of the Blackman Talking Machine Co., 97 Chambers street, New York, Victor and Edison cylinder distributor, as it marked the holding of the fifth annual outing and banquet tendered to the employes by the company. For the first time in these

The Winning Nine. J. N. Blackman Standing Second from Left.

five years the day scheduled for the Blackman outing was an ideal one, the four previous outings having been marred by rains and thunderstorms. Needless to say, the employes, together with the officers of the company and a few invited guests, determined to take full advantage of the blue skies and tempting sunshine, and it was a happy party of 35 that left the Blackman warehouses at 12:15, bound for Whitestone Landing, on the Sound, where the 1914 outing was scheduled to take place.

By special arrangement with the Long Island Railroad, a special car had been ordered, and this car left the Pennsylvania Terminal at 1:20, bringing the party to Whitestone Landing about 2 p. m. A varied program of games had been prepared for the early afternoon amusement, and at 2:15 the first race was called.

This race, which was termed a shoe race for men, was won by J. B. McGovern, with John Mills a close second. A 440-yard relay race between the office and sales forces and the shipping room force was next on the program, and after a nip and tuck struggle, the office and sales force team was returned the victor; the winning team consisting of President J. Newcomb Blackman, J. B. McGovern, L. W. Bishop and F. R. Burnham, Jr. A potato race for ladies furnished general amusement, Miss Hattie Ott being returned the victor, with Miss M. Hennig second and Miss C. A. Pratt third. This order of finishing also held good for the 50-yard dash for ladies, which was on the program later in the afternoon.

The 220-yard dash for men resulted in a neck

Frank Roberts and a Bevy of "Fanesses."

and neck finish between L. W. Bishop and John Hanley, the former winning on the last few strides, with Albert M. Blackman, son of President Blackman, a good third. The next event, the running broad jump, proved the star event of the afternoon's games, as it brought out some splendid jumps and keen competition. L. W. Bishop of the

sales force, who had distinguished himself in various other capacities in the earlier part of the program, also won this event with the remarkably good jump of 16 feet, which is "some" jump for the average amateur performer. John Hanley finished second and J. B. McGovern third. A 150-yard relay race for stout people (two men and two women) was won by Miss L. Peters and George Thaw, after an exciting race between the two ladies. The ladies then held a five-frame bowling contest, which was captured by Mrs. M. G. Smith, with Mrs. George Thaw second and Mrs. John Spillane third.

The entire party then adjourned to the ball-field, where the main event of the day's entertainment, in the nature of a ball game between the shipping room and the office and sales force, took place. Interest in this game was at fever heat, as the rivalry between the two forces was intense, and good natured bantering as to the probable result had been going on for a fortnight prior to the game.

The teams lined up as follows: Office and sales force nine—Albert M. Blackman, shortstop; J. B. McGovern, 2d base; F. R. Burnham, Jr., 3d base; J. Newcomb Blackman, 1st base; J. F. Ashby, centerfield; John Spillane, right field; Charles Reinhart, left field; L. W. Bishop, pitcher; R. B. Caldwell, catcher. Shipping room nine—Edward Steinecker, 3d base; John Mills, shortstop; John Hanley, catcher; Charles Krauss, 2d base; A. G. Camerano, 1st base; Robert Harkins, left field; C. W. Cornwall, right field; Charles Marquis, center field; George Thaw, pitcher.

J. N. Blackman Fouling Off a Good One.

The game itself was unusually close and well played, and although it had been freely predicted that the shipping room team would be the winners by a one-sided score, a big surprise was in store for the entire party, as the office and sales force team was returned the winner after an exciting tussle by the score of three to two, regular major league figures.

Vice-President Caldwell sent in the winning run in the second inning when his two-bagger sent two runs across the plate, breaking the tie score. President Blackman, on 1st base, fielded his position in topnotch form, and let nothing get away from him. Albert Blackman at short and J. B. McGovern at 2d base were also prominent in the office nine's victory,

while L. W. Bishop pitched air-tight ball after the second inning. For the losers George Thaw is deserving of special mention, as his control was perfect, and his speed baffling. A. G. Camerano at 1st base covered a lot of ground, and was also there with the "willow." The game as a whole was well worth seeing, and was thoroughly enjoyed

by all the spectators. F. R. Burnham umpired a fair, impartial game, judging the balls and strikes with the precision of a league arbiter.

After the ball game excitement had subdued the party adjourned to Duer's Hotel, where an elaborate Long Island shore dinner was served, amidst continual laughter and good cheer. This dinner was typical of Long Island culinary achievements, and formed a fitting finale for the afternoon's fun. A feature of the dinner was the distribution of humorous and appropriate postcards, together with trick souvenirs that kept the table in an uproar. A few of the more timorous ladies refused to eat their asparagus because of the appearance of monster beetles thereon, which on closer investigation proved to be made of colored paper. Score one for practical jokers J. Newcomb Blackman and R. B. Caldwell.

At 7:16 the Blackman party boarded their special car for New York, en route to the "Palace"

Shipping Room Team.

Theatre, the city's leading vaudeville show-place. While en route to New York, President Blackman announced the annual distribution of dividends which always takes place at the yearly outings. Mr. Blackman believes in the policy of permitting his employes to share the profits of his business with him, and the efficiency of the Blackman organization is a tribute to his generous policies and liberal methods. Every employe who has been connected with the company for a year or more is entitled to a share in the dividends, and whereas there were fourteen participants last year, this year there were sixteen. The first one to receive a dividend was Frank Roberts, the veteran of the Blackman forces, and personally known to every Blackman dealer on the books. Following Mr. Roberts, dividends were handed to the following

R. B. Caldwell in His "Armor."

members of the Blackman staff: John Spillane, J. F. Ashby, A. G. Camerano, Charles Reinhart, L. W. Bishop, Miss L. Peters, H. C. Lansell, Miss M. V. Ward, Robert Harkins, George Thaw, Miss

Our forty-two distributing centers are ready to supply you promptly with the biggest dividend diggers in the trade today—including the very latest in dance music.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

H. Ott, F. R. Burnham, Jr., C. W. Cornwall, Miss M. Hennig.

At the Palace a splendid bill was all that was needed to make the day a long-to-be remembered one, and at the close of the performance, Mr. Blackman was given a hearty vote of thanks by all present for the thoroughly enjoyable day that they had passed as guests of the Blackman Talking Machine Co. These guests included the wives of the officers and staff, while Mrs. Ada L. Blackman, secretary of the company, was an important factor in the entertainment of the ladies.

As indicative of the modern trend of co-operation and liberal attitude towards employes, the annual Blackman outings are in the right direction of progress and humane ideas as applied to mercantile life. The loyalty of the Blackman forces and the efficiency of the entire staff is but the outward sign of the results that these outings are achieving, while the good-fellowship and bon camaraderie that exists among the Blackman employes the year round is another tribute to the broad policies of its president and officers.

NEW VICTROLA MODEL PLEASURES.

New Victrola XI "F" Delights Visitors to the Showrooms of New York Talking Machine Co., New York—Great Success Predicted.

The New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, is displaying in its show window one of the first models to be seen in the local trade of the new Victrola XI, type "F," which, as announced in a recent issue of *The World*, embodies certain distinctive refinements which should insure its popularity with Victor dealers throughout the country.

V. W. Moody, sales manager of the company, states that every dealer who has visited the showrooms during the past month is enthusiastic over the artistic appearance of this new \$100 Victrola, and they all predict that it will be favorably received throughout the country. The new arrangement in this model whereby the records may be filed horizontally instead of vertically, as heretofore, is praised by the trade as being a decidedly valuable selling argument.

POLLACK IN NEW QUARTERS.

Well-Known Talking Machine Dealer of Poughkeepsie Locates in Heart of Business Section of That City—Handles the Columbia Line.

(Special to *The Talking Machine World*.)

POUGHKEEPSIE, N. Y., June 8.—S. Pollack, the well-known talking machine dealer of this city, has just moved into new quarters at 209 Main street, the leading business street in Poughkeepsie. Mr. Pollack formerly occupied a store at 2 Garden street, but his rapidly increasing trade made it necessary for him to secure more pretentious quarters. The store at 209 Main street is a large and attractive one, and is furnished in a tasteful manner. Mr. Pollack handles the Columbia line exclusively, making a specialty of foreign record business.

Second thoughts are best, when they are less expensive.

"TALKERS" FOR JOHN SHILLITO CO.

Prominent Talking Machine Store to Add This Line—Drabelle Opens Grafonola Department in Dine's Furniture House—Victor Business with the Leading Stores Very Active—Manager Whelen of Columbia Headquarters Optimistic Over Trade Outlook.

(Special to *The Talking Machine World*.)

CINCINNATI, O., June 4.—One of the real surprises of the past month was the resignation of Harry B. Drabelle from the Victor department of the Rudolph Wurlitzer Co., and his blossoming forth as the manager of the Grafonola department of Dine's Furniture House, 1123 and 1125 Main street.

The move therefore is of double interest to the trade, since it means that the Columbia folks have opened another local outlet for their business and Drabelle is in charge of the department. Drabelle was supposed to be one of the fixtures at the Wurlitzer store. He has quite a following about town.

The John Shillito Co. will soon take on a talking machine line. Overtures are now being made with the different companies. The exact status cannot be learned at this time. It appears to be a question as to how the manufacturer or the jobber is willing to place his goods there.

Generally speaking, business is somewhat quiet. The dealers are featuring the smaller instruments in order to attract the attention of the campers, and in some respects have been quite successful.

Manager Whelen, of the local Columbia store, seemed to be very optimistic about the general outlook. He said, "I cannot complain, as the final wind-up in May showed an increase over last year and the prospects for a lively summer business look good. The first part of May started out very brisk, but toward the latter part of the month there seemed to be a "dropping off," but June has been holding its own very nicely. We give the "dance craze," which continues to hold a foremost place in the minds of the general public, credit for a large part of the summer "boom" in our line, and

also the popularity of the Grafonola for summer cottages and camps. This, of course, creates a demand for the smaller machines, although the demand for the larger machines continues to hold its own."

Mr. Whelen further stated that the wholesale business throughout the entire territory seemed to be holding its own, with the exception of the dealers in the milling districts, where they depend on the mill hands to stimulate business.

Clifford Ely, special traveling representative of the Columbia Co. was in the Cincinnati store for a few days, stopping over on his way to New York.

Ben L. Brown, who has been concentrating his efforts on the school proposition this winter, seems to be perfectly satisfied with the net results, and when asked about conditions, said: "There is no doubt in my mind but the time is coming and coming fast, when Columbia Grafonolas and records will be part of the legitimate equipment of every public school in the country."

Victor business at Aeolian Hall has been very satisfactory the past month, both in machines and records. The demand for dance music continues active. A great many Victrola owners arranged to have their machines packed up and shipped to their summer homes—more, in fact, than in any previous season at the same date. This is due, largely, it is thought, to the interest in dancing and plans for home dances during the heated term.

A number of sales of the lower-priced Victrolas have been made, due, no doubt, to the Aeolian Co., featuring the light-weight, easy-to-carry styles in their newspaper advertising.

One of the most attractive Victrola window displays seen in a long while was gotten up for Decoration Day. It showed a camp scene with a Style VI Victrola placed on a tree stump. All the details were carefully worked out and the window attracted a great deal of favorable notice.

Watch the new customers and cultivate their acquaintance, for they sometimes turn out to be the best customers.

Perfect In Every Detail

As artistic, compact, and powerful as this illustration suggests.

Thousands of satisfied users signify surpassing excellence and substantial profits.

STANDARD GRAMAPHONE APPLIANCE CO.

173 LAFAYETTE STREET,

NEW YORK

PITTSBURGH A LIVELY CENTER.

Frederick Co. Opens Talking Machine Store at Woodlawn—Kaufmann Bros.' New Auditorium—Busy Month with Buehn—Columbia Store Being Remodeled—Most Attractively Arranged—News of the Month.

(Special to The Talking Machine World.)

PITTSBURGH, PA., June 10.—The W. F. Frederick Piano Co., on June 1, opened a talking machine store at Woodlawn, Pa., where the Victor line is being handled exclusively as at the Pittsburgh headquarters. During the past few weeks the W. F. Frederick Co. has given over one of its large Smithfield street windows to a Victrola camp outfit display in which a typical camp scene is depicted. The Victrola is shown in use with the shipping box used as a cabinet. It is this feature of the outfit that makes it particularly adaptable for outing purposes.

The Kaufmann Bros. Victrola department during the past month has been brought to a point that approaches perfection in every particular. The new auditorium, in which Victrola recitals will be given from time to time, is being rushed to completion and will be open to the public within the next few weeks. The decorators are now at work finishing the interior in gold and terra cotta, which sets off the weathered oak woodwork to an excellent advantage. Manager H. N. Rudderow reports that the Victrola department is doing a splendid business for this season of the year and that two men have been assigned to outside sales work. There has also been a marked improvement in record sales during the past few weeks.

The Schroeder Piano Co. opened its new talking machine department about May 18 and reports an exceptionally fine business from the start. A full line of Grafonolas is being carried, as well as a complete stock of records costing \$7,000. Six up-to-date booths have been installed on the first and second floors, and the arrangement is one of attractiveness and convenience throughout. The opening of the department was most auspicious, as fifteen machines were sold on the first two days. Miss H. R. Dunn, formerly of the McCreery department is in charge.

A. A. Buehn, of the Buehn Phonograph Co., reports that the month of June has started off very briskly and promises to be much better than May. The company has recently added to its list of dealers handling its line the Edison, Clyde Ament at Apollo, Pa., and the Poling Music Co. at Elton, W. Va. Both of these carry the disc line. Mr. Buehn, in discussing the present condition of business, said that the improvement noted during the past few weeks is due largely to the fact that the railroads are putting on more men and that if the mines resume their operations to a greater extent trade will continue to improve.

J. C. Roush, of the Standard Talking Machine Co., declares that trade is as good as can be expected at this season of the year and is considerably better than at this time last year.

George S. Hards and French Nestor, of the W. F. Frederick Co., and J. C. Roush, of the Standard

Talking Machine Co., will be among those who will attend the jobbers' convention.

The Pittsburgh branch of the Columbia Graphophone Co. has reopened its store at Sixth street and Duquesne Way after remodeling it into one of the finest in the city. Within the past two weeks the entire stock has been transferred from the second floor of the Fulton building, where temporary quarters had been occupied, into the company's new home. The office force has also moved its quarters from the Bessemer building onto the new mezzanine which has been erected in the rear of the store. In point of appearance and equipment there are few talking machine stores that can rival the new Pittsburgh home of the Columbia. A brisk business is being carried on and, in spite of the inconvenience experienced by the fire which occurred the first of the year, the branch has lost little time.

THE VALUE OF COURTESY.

How Business Establishments May Be Materially Aided.

Business is frequently turned away from many business establishments through lack of courtesy on the part of someone connected with the establishment.

Some railways in this country have built up an enormous patronage and made millions of dollars by a policy of helpfulness and courtesy by their employes to their patrons, while some parallel roads have been unsuccessful and have gone into the hands of a receiver largely because of the lack of courtesy, kindness and obligingness of their employes. Courtesy pays in every business institution. Human nature is so constituted that people will often put themselves to great inconvenience, will even put up with an inferior article or with discomforts, rather than patronize houses that treat their customers rudely. Courtesy is to business and society what oil is to machinery. It makes things run smoothly, for it eliminates the jar and friction and the nerve-racking. The officers of a bank, for instance, know that they must win and hold the favor of the public or go to the wall. They know that they cannot snub their customers to-day as they once would when there were fewer banks, without losing business. With a score of banks soliciting his business and offering every possible inducement to secure it, it does not require a very keen insight into human nature to know that, other things being equal, the business man will patronize the bank that has the most pleasing, the most agreeable officers and clerks. It is human nature to like to be treated with courtesy, with consideration. Bank officials often wonder why Mr. So-and-So has withdrawn his patronage, and they will probably never know that it turned upon a hasty remark of a teller, a little disposition on the part of some petty official to be unaccommodating. On the other hand, men often go out of their way in order to deposit at a bank where the cashier or tellers have been kind to them and have always shown a disposition to accommodate. A successful business man has tried to impress this idea upon the minds of his force: "Always think of what the cus-

tomers will say when he gets out of the store." Competition has become so keen and the bid for public patronage so insistent that it is a matter of first importance for the business institution which would succeed to-day to be popular to have the good will of its patrons.

TRIBUTE TO ADOLPH GLENN.

One of the Noble Silent Workers in the Trade Field in Portland.

(Special to The Talking Machine World.)

PORTLAND, Ore., June 1.—Henry Eilers, founder and head of the Eilers Music Co., was a great admirer of the late Adolph Glenn, manager of the Columbia Graphophone Co. interests in this city. Mr. Eilers says: "He was one of the silent workers of the trade, doing big things in a big but quiet way; beloved by all with whom he came in contact, a good man whose purposes and aims were high, whose tongue was gentle and whose life was clean and who deserves this little tribute from his friends and business associates throughout the States."

TO RESTRICT USE OF SOUNDBOXES.

Victor Talking Machine Co. Prohibits Use of Victor Soundboxes or Connections on Other Machines—Customer Must Sign Agreement.

The Victor Talking Machine Co. sent out a letter to its trade recently, wherein it prohibited the use of Victor soundboxes in connection with any other talking machine. This letter enclosed a Victor soundbox certificate, which is to be signed by the customer who desires to replace or secure a new Victor soundbox. The order for the extra soundbox in the future from dealer to distributor or from the distributor to the Victor Talking Machine Co. must be accompanied by this certificate, which reads as follows:

"Fully understanding that the Victor Talking Machine Co.'s patented soundboxes are licensed for use only in connection with Victor talking machines and Victor records, I,, of, certify that I have in my possession a Victor talking machine, style, serial number, type, and agree that the Victor soundbox, style, serial number, will be used only on the Victor talking machine named above. (Signature of purchaser.)"

"I,, of, a regularly licensed dealer in the Victor Talking Machine Co.'s products, have witnessed the signature attached hereto, and have satisfied myself that the soundbox also enumerated is to be used only on the said Victor talking machine. (Signature of dealer.)"

REMOVE TO NEW QUARTERS.

Parks & Weiss, a well-known advertising agency handling among other accounts that of the Pathe-scope, Aeolian Hall, New York, moved this month from 141 West Thirty-sixth street to 56 West Forty-fifth street, New York.

TRITON MOTORS

Spring may be replaced within a few seconds.

The Triton Phonograph
Retail at \$10.00

This machine gives you a chance to make a lot of money. Plays any needle disc record. Solidly built. Beautiful tone. Send for wholesale prices. Sample \$10.00.

TRADE CONTINUES VERY ACTIVE IN MILWAUKEE.

Summer Resort Trade Makes Its Appearance Earlier Than Usual—Miss Gertrude F. Gannon Married—Flanner-Hafsoos House Adds New Parlors—Effective Columbia Publicity—Affairs of Goodale—Large Victor Trade at Gimbels—New Edison Disc Dealers.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., June 9.—The retail talking machine business is holding up well, considering the dulness which is being experienced in some lines of trade. While sales are beginning to fall off somewhat, the total volume of business is very satisfactory. Record sales have been unusually good during the past month, due in part to the brisk demand for dance records of all kinds. The new June records seem to be taking exceptionally well with the trade.

The annual summer resort trade has made its appearance considerably earlier this season, a result probably of the hot weather experienced since the latter part of May. Milwaukeeans will make their exodus to their summer homes from now on, the real rush beginning just as soon as the schools are out. Nearly everybody who owns a summer home owns a talking machine, and, in case the machine is a large one, the owner does not usually care to move it to the summer home, but prefers to buy a smaller machine. The sale of records to summer resorters has been remarkably good thus far, as no one wants to go to the lake without a liberal supply of the latest records.

Dealers and jobbers are confident that the coming fall trade will be satisfactory. One of the most hopeful signs is found in the first Wisconsin crop report of the present season, recently issued by James C. MacKenzie, secretary of the State Board of Agriculture. The condition of winter wheat is reported at 92.2 per cent, as compared with a year ago. The condition of practically all other crops shows satisfactory gains, while the general acreage is considerably larger. When crops in Wisconsin and surrounding States are good, it is an unerring sign that general business will be good. Retailers about the State seem to have confidence in the outlook, as most of them have been placing good orders for machines and records.

An event of more than usual interest in Milwaukee talking machine circles took place on June 1, when Miss Gertrude F. Gannon, until recently head of the Wisconsin Talking Machine Co., jobber for the Victor line in this State, was married to Edward J. Yockey, District Attorney of Milwaukee County. The ceremony was performed at St. Patrick's Roman Catholic Church in Dixon, Ill., the former home of the bride, by the Rev. Father Michael Foley. Among the wedding guests were Mrs. Yockey, mother of the bridegroom; his brother, Chauncey Yockey, exalted ruler of the Milwaukee Elks; Sheriff and Mrs. Lawrence McGreal, sister and brother-in-law of the bride; Assistant Superintendent of the Chicago, Milwaukee & St. Paul James Davoy and wife, of Milwaukee. Mr. and Mrs. Yockey are spending most of their honeymoon at Asbury Park, N. J., and on their return to Milwaukee will reside at 476 Bradford avenue.

Mrs. Yockey long had the distinction of being the only woman talking machine jobber in the United States, and there have been few young women in the talking machine business who have been as widely known as she. Mrs. Yockey also owned the McGreal retail Victor store at 312 Grand avenue, where she built up an extensive retail trade. The goom has acquired prominence in the office of district attorney as a prosecutor of unusual ability, and he is known as one of the youngest district attorneys in a city of this size in the country.

The Flanner-Hafsoos Piano House, 417 Broadway, recently opened its three new and handsome parlors, where the Edison line of machines is being featured to advantage. The parlors are separated by sound proof walls and are decorated in conformity with the other portions of the main floor of the piano establishment. The house has had the agency for the Edison line less than two months, but both Florian F. Flanner and Eric S. Hafsoos say that business has far exceeded their expectations.

Victor sales during the month of May at the Edmund Gram Piano House established a new high record, according to Paul A. Seeger, manager of the Victor department. Mr. Seeger and family recently returned from a business and pleasure trip to his former home at Milton Junction, Wis.

The Columbia line of machines, as well as A. G. Kunde, 615 Grand avenue, Columbia jobber and dealer, received some fine publicity during April and May, as the result of Mr. Kunde's action in disposing of five Columbia graphophones to the Milwaukee Free Press for distribution as prizes, in the big \$20,000 circulation contest, recently brought to a close by the Milwaukee daily. Pictures of the machines, together with Mr. Kunde's name, were published frequently by the Free Press during the contest, and the result was that Mr. Kunde has been meeting with a decided increase in business. Those who won Columbia machines in the contest included: August Motha, Theresa Schumann, F. A. Jewett, Delvigne Zeller and Floyd Bienfang, the latter a resident of Jefferson, Wis.

With their fight against extradition to Milwaukee pending before the United States Supreme Court, where it had been taken from the Court of Appeals of the District of Columbia, Franklin C. Goodale and his wife, Pearl, charged with obtaining money under false pretenses in selling stock in the Goodale Phonograph Co., of Washington, D. C., returned voluntarily to Milwaukee recently. They were accompanied by a Washington attorney, and they immediately began efforts to have the case brought against them by Miss Hattie Kluber dismissed. Goodale and his wife assured District Attorney Yockey that they were ready to refund \$250 to Miss Kluber, and that they would settle any other claims which might be brought against them in Milwaukee. On request of the district attorney, the case against the Goodales was dismissed. It had been alleged that Goodale and his wife had disposed of considerable stock in the Goodale Phonograph Co. to many working girls of Milwaukee, after having painted in rosy colors the great future of the concern and the big dividends which might be expected.

"These hard working girls will get their money back," said Assistant District Attorney Sloan, to the court, "and that is all we want. I had rather settle the case this way than to go to trial, for in that event the girls would get nothing."

According to the assistant district attorney, the Goodale Phonograph Co. is incorporated in Washington, D. C., and Goodale has an invention that is highly thought of by many.

The H. C. Block Co., 445 Milwaukee street, representative of the Columbia Dictaphone in Milwaukee, has been making sales to some of the largest business houses in Milwaukee. H. H. Block, secretary-treasurer of the company, says that business is double that of a year ago.

C. W. Abbott, manager of the Victor department at the Boston store, reports an exceptionally fine demand for machines and records from people who are preparing to leave for their summer homes. An unusually good business from this source is also being received by L. C. Parker, manager of the Victor department of Gimbel Bros. Mr. Parker says that trade during the month of May was considerably in excess of the corresponding month of 1913.

Since J. H. Becker, Jr., resumed the management of the talking machine department at the Hoeffler Manufacturing Co., 306 West Water street, he has been keeping the trade busy watching the attractive window displays which he has been arranging. Mr. Becker reports some fine Victrola sales during the past few weeks.

William A. Schmidt, general manager of The Phonograph Co., of Milwaukee, jobber in Wisconsin and Upper Michigan for the Edison line of machines, is in Northern Michigan, where he is establishing several new Edison disc dealers. The

Edison list of dealers in Wisconsin and Upper Michigan has been showing steady increase of late. A brisk retail trade in The Edison Shop, also under the supervision of The Phonograph Co., of Milwaukee, is reported by Miss Margaret Schumacher, office manager of the company.

L. F. Bidinger & Co., of Kenosha, Wis., have leased the Kent building at 458 Market street, that city, where they have been enabled to double their Victor quarters. The Kent building has been thoroughly remodeled for the Bidinger concern.

Joseph F. Gannon, brother of Mrs. E. J. Yockey, formerly Miss Gertrude F. Gannon, until recently head of the Wisconsin Talking Machine Co., was married on June 3 in Dixon, Ill., his native city, to Miss Gladys Roddenbau, a well known young woman of Milwaukee. Mr. Gannon, who is a deputy sheriff of Milwaukee county, was formerly assistant manager of the Wisconsin Talking Machine Co., jobber for the Victor line.

When you hear a fellow boasting that he has money to burn, don't be in any hurry to call out the fire department.

THE COST OF DOING BUSINESS

Should Be Understood by Merchants in Every Line in Order That They May Know Exactly Where They Are at and Develop Their Business Along Successful and Healthy Lines.

Ignorance regarding the actual cost of doing business is frequently the cause of many business failures. "During the next few years some of the tidiest profits in American industry will be saved out of operations. Heretofore, much of our profit has been made; but saving profit is a different thing altogether." That is the keynote of the remarkable interest in manufacturing and most of production systems which has appeared since 1905. A nation of born salesmen and advertisers, we have heretofore solved the problem of making more profits by getting more sales. Competition has now forced us to realize that an increase of advertising and selling expense will not continue to increase the business in direct proportion to the increase of expense. Such conditions must be met not only by advertising and good salesmanship, but we must go a step further. It means better systems of bookkeeping, closer inventories, more careful checking of every item of income and outgo, more accurate methods of knowing what each employe produces—in short, one must know what it really costs him to sell goods in order to make the right price. The same principle rules business in all lines. Cost, more than price, fixes profits. The public fixes the price it will pay. The dealer may keep it high, but the public fixes the limit, low or high, of what that price must be.

Many manufacturers depend on their balance sheets to determine cost, and their competitors to fix price. This is guesswork of the most treacherous and deceiving sort. Even the street faker selling collar buttons knows what his costs are, and in this respect knows more than some large enterprises, which really know surprisingly little about how much it costs to put their output down at the point of final delivery. Many a retailer doing a business of \$50,000 a year will tell you that "a cost system is only for manufacturers." It has been well said that the average business executive fails to get more than a small fraction of the vital facts and statistics that he should have to intelligently control the activities of a business. The desire to dodge the expense of the necessary system that will bring such vital statistics to the executive desk has made this condition. Contrary to the somewhat prevalent idea, however, there is no inherent complexity in system just because it is a system. It may, however, be suggested that the observance of any logical routine in the handling of business is so repugnant to the training and style of some business men that they take refuge in the absurdity that "all system is red tape," with the often painful result that they fail without knowing why, therefore being denied the important lesson their failure could have taught a man with a more analytical mind. That this attitude on the part of business men is too general and often fatal is generally conceded by those whose occupations, such as bankers, lawyers, judges, expert accountants, referees in bankruptcy, etc., bring them into close contact with business troubles or failures.

Every talking machine merchant should keep in close touch with his selling cost.

When you leave your customer before she gets her change and package, don't forget the package. Be on the alert to hand it to her as soon as ready.

AN ARTISTIC CUT-OUT WINDOW DISPLAY

Is That Which is Now Being Issued by the Columbia Graphophone Co. and Designed to Assist Dealers in Developing Their Dance Record Business—Where Properly Displayed It Has Won Universal Approval and Has Been a Big Factor in Increasing Business.

The Columbia Graphophone Co. has just issued an artistic cut-out window display that is attracting considerable attention wherever it is shown. Designed to assist the dealers in developing their dance record business, this window display certainly fulfills its mission well, as many dealers

panying illustration, is attractively conceived in every detail. The machine featured is the new "Mignonette," which is quite a favorite with Columbia dance enthusiasts. The human interest poses of the dancers adds to the appeal of this window display, and the harmonious blending of

have written letters of praise to the company's advertising department relative to the display's distinctive merits.

The new Columbia dance display stands over two feet in height, and, as will be seen by the accom-

panying illustration, serves to further emphasize its high-class finish.

As an aid to the talking machine dealer in increasing his dance business this sign possesses many novel and commendable features.

RETURNS FROM WESTERN TRIP.

George W. Lyle, general manager of the Columbia Graphophone Co., returned to his desk Tuesday after a short trip to several of the leading trade centers of the country, including St. Louis, Chicago, Indianapolis and Pittsburgh. Mr. Lyle was very optimistic in his reports of business conditions in these cities, stating that everyone he met was well pleased with the outlook, and predicted a prosperous fall trade. Mr. Lyle also advised the managers regarding a number of important deals while on his trip whereby the Columbia products will greatly enhance their prestige. These new deals will be announced in the near future.

Mr. Lyle was the recipient of congratulations from all the Columbia staff on the occasion of the celebration of his twenty-fourth wedding anniversary, which took place on Wednesday. There are rumors of some large happenings among the Columbia employes on the same date next year.

A certain eminent lawyer has said, in reference to the Sherman act: Strictly speaking, it would be a violation if you and I were to agree to live until the year 1920, for this would constitute a combination in restraint of the undertaker's trade.

There is just as much difference between fact and fiction as there is between a woman and her photograph.

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

Gun Metal, \$2.00 list. Nickel Plated, \$2.50 list. Gold Plated, \$3.00 list.

May be adjusted to both Columbia and Victor disc machines. Order from any Columbia Distributor.

COLUMBIA GRAFONOLA PARLOR

In Atlantic City, N. J., Is Meeting with Great Success—Is Operated by Joseph Piacentini, Who Is a Former Member of the Well-Known Vessella's Band—Building Up Good Trade.

One of the many live-wire Columbia dealers near New York is the Columbia Grafonola Parlor, Atlantic City, N. J., operated by Jos. Piacentini, and

products through his ability to discourse informatively on this subject.

Aside from his musical ability, Mr. Piacentini is a most aggressive merchant and takes advantage of every opportunity to profit by Columbia publicity, co-operation or service. On the occasions of the visits of Columbia artists to Atlantic City, which are frequent occurrences, Mr. Piacentini uses excellent copy in the daily newspapers calling attention to the appearance of the various artists and

rheum, or pink eye. Every man we come to has a grouch, complains of dull times, and doesn't believe in advertising any way. If we are out early, we are too early, and if we come later, we are too late.

If they have good times, the buyers tell us they do not need to advertise because they are getting more business than they can take care of. If somebody tells them times are dull, they pull a long face that would make an undertaker green with envy, every time they see a salesman.

By the way, we have our old friend Dull Times with us always. There is always some locality somewhere in the United States any month in the year where the calamity howlers rule things with a high hand, and pessimism is like a pestilence.

PATHÉ FRERES PHONOGRAPH CO.

Now Established in New Home at 29 West Thirty-eighth Street, New York—Occupying Entire Second Floor of Spacious Building—Expects to Be Ready for the American Market Early in August.

The Pathé Freres Phonograph Co. is now established in its new home at 29 West Thirty-eighth street, New York, where it occupies the entire second floor of a new building with a floor space of 5,500 square feet. The officials of the company state that they will be ready for the American market about the first of August, and, in the meantime, they are conducting a recording laboratory at this address, in addition to maintaining showrooms.

T. Labrely, chief engineer of all the Pathé industries in Paris, France, is at present in New York, supervising the equipment of a pressing plant, which will probably be located in Brooklyn, N. Y. Russell Hunting, well known in the talking machine industry, has been appointed chief director of recording.

There are now on display at the showrooms a complete line of the machines which the company expects to market this summer, including the Pathephone, Pathegraph and Pathedisks.

MANAGING TOWER'S DEPARTMENT.

A. N. Struck, formerly connected with the Edison disc department of Krakauer Bros.' warehouses, 17 East Fourteenth street, New York, was recently appointed manager of the Edison department of the Tower Manufacturing & Novelty Co., 326 Broadway, New York. Mr. Struck succeeds Dana F. Parkhurst, who returned to his home in Topeka, Kan., prior to starting on an extended concert tour of the country. Mr. Parkhurst is a baritone of considerable prominence.

Columbia Grafonola Parlor at Atlantic City, N. J.

the interior of which is shown in the accompanying illustration. A former member of the popular Vessella's Band, Mr. Piacentini has succeeded in securing an extensive list of patrons in his territory who are frequent visitors at his establishment. Mr. Piacentini finds his comprehensive musical knowledge invaluable to him in his present business, and has won many friends for Columbia

emphasizing the fact that they have recorded for the Columbia library.

The up-to-date appearance of the Columbia Grafonola Parlor is in keeping with its owner's progressiveness and up-to-date methods, and by the use of ear cards, theater program advertising and high-grade publicity of every description Mr. Piacentini keeps the booths in the store well filled.

Either the weather man spills something disagreeable, or the thermometer is trying to break the record, or there has been seventeen salesmen ahead of us (maybe eighteen), everybody says he has bought, or that we are robbers, or that our goods are not up to snuff, or there is a local agent that is trying to monopolize everything, or we are troubled with a cold in the head, rheumatism, salt

DEMAND FOR RECORD ALBUMS.

The National Sales Are Steadily Growing with Live Talking Machine Men.

The demand for the disc record albums manufactured by the National Publishing Co., 235 South American street, Philadelphia, is growing steadily in popular favor. They are made in the most substantial manner by skilled workmen and are very substantially built, so that hard handling does not wear them out. They will fit in any library cabinet or bookcase, or they will lie flat on one and other.

There are seventeen pockets for records, which are made of extra strong manila paper and firmly secured to heavy guards in the back of the album. They are bound in a fine quality of brown silk finish cloth, the cover being stamped Record Album on the front. An embossed border line enhances the beauty of both front and back cover. For the convenience of customers who at any time desire to rearrange their discs, there are six pages for indexing, three in front and three in the back. Each page of the index contains seventeen consecutive numbers, each number having two lines, thus making a title page to register records as placed in the pockets, the pockets being numbered one to seventeen in regular order.

Talking machine men have had very satisfactory results from the sale of National albums, and the demand for them is greater than ever before, showing that where they have been properly displayed there has been a steady demand for same.

GETTING RID OF THE GROUCH.

Did you ever notice how many ideal days there are, and how many there are of the other kind? By an ideal day we mean one in which it is neither too hot nor too cold, it does not rain or snow, every man we come to is ready to talk business, nobody has ever tried to sell him any goods, nobody says our price is too high, nobody kicks about anything, and every man gives us an order.

Some houses do more business

than others, and the only explanation of this feature, when the products are the same, is the quality of the service rendered by the jobber to the dealer. This explains the rapid development and large growth of

Louis Buehn
Philadelphia

for in catering to your wants and aiding you to close sales by giving quick deliveries, you know and appreciate the value of our work.

Edison Cylinder and Victor Products

We told you so!

Told you what?

That 1914 would be *the* Columbia year in the talking machine trade. The middle of 1914 is here—and we're right here with it, where we said we would be.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

THE QUAKER CITY TRADE AHEAD OF A YEAR AGO.

This Satisfactory Condition Exists in Very Few Lines, but the Talking Machine Is an Exception—Dealers Handling all Makes of Talking Machines Active in Developing Their Business and Making Their Stores More Attractive—News Budget of Month.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., June 8.—The talking machine business in Philadelphia during May progressed in a most satisfactory way, and while there has been some falling off in comparison with the business done during the previous four months of the year, yet this was naturally to be expected, and generally May was better than the May of 1913. There is very little complaint among the dealers at present, for the factories are keeping them pretty well supplied.

During the month of May there have been no changes in Philadelphia in the way of new dealers, and there are not likely to be any during the summer. There is a lull in the booming of the little talkers for the reason that the dealers recognize that business is bad and we are getting into the mid-summer season, and that money would be wasted by an aggressive campaign.

The Victor Co. has again sent out an appeal for the support of the Stevens Price Standardization bill, known as H. R. 13305. The intention of this bill is to establish the one-price-to-all principle on branded merchandise, and to militate against price-cutting, dishonest advertising and other unfair practices of great trading monopolies.

Gimbel Bros. still have a great many Keen-ophones on hand which they were able to dispose of at their recent sale, and they are running a bargain sale on these instruments this week.

Louis Buehn reports that his business in May was most satisfactory, although showing a slight falling off in comparison with the previous months of the season, but an advance over May of last year. He has at present the biggest stock on hand that he has ever had in the history of his business. His Edison dictating machine business has shown an increase during May. He completed the installation of these machines with the Atlas Powder Co., of Wilmington; placed additional machines with R. G. Dun & Co., and placed a number of machines with the Frank H. Stewart Electric Co. and with other firms.

Lit Bros., whose talking machine department is in charge of A. L. Münchweiler, have been making a feature of dance records and have been advertising them heavily. Their sales on these records have been large.

The business at Gimbel Bros., during the month of May, was at least double that of last year, owing, no doubt, to the great publicity brought to their department by their advertising schemes. Manager H. H. Stewart, who is in charge of the department, and who has been ill for some weeks, has so far recovered that he is able to be removed to Atlantic City to recuperate. He has gone there with his family for an indefinite period. David Davidson, who was connected with the talking machine department as salesman, has resigned.

Manager Elwell, of the Heppe wholesale depart-

ment, notes that business in May was very satisfactory, "when you consider that it was May." "We more than held our own," he says, "and we look for a good summer business, and will be able to take good care of it now that machines and records are coming through so promptly."

The Pennsylvania Talking Machine Co. reports that it has been having a remarkably good retail business in May—very much better than last year, and Manager Eckhart says: "We feel, considering what others say, that we have been very fortunate." The firm has placed no new agencies during the month, but it has some good prospects pending. Mr. Eckhart will go to Atlantic City at the end of this week to rent a cottage where he will take his family during the summer.

After about two months of renovation the Wanamaker talking machine department has finally been completed, and, in its present improved condition, not only presents a much better appearance, but it greatly facilitates the department in handling customers. The hearing rooms have been more than doubled, and the large concert hall will be an appreciated attraction when the fall activity sets in.

A CHANGE IN MILWAUKEE.

Miss Gertrude F. Gannon, Who Recently Married, Disposes of Her Interest in Wisconsin Talking Machine Co. to C. M. Backus.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., June 11.—Following the announcement of the marriage on June 1 of Miss Gertrude F. Gannon to Edward J. Yockey, district attorney of Milwaukee county, comes the news that Mrs. Yockey has disposed of her interests in the Wisconsin Talking Machine Co., jobber for the Victor goods, and has sold her retail store at 312 Grand avenue.

C. M. Backus, of Chicago, who was formerly a stockholder in the Wisconsin Talking Machine Co., purchased most of Mrs. Yockey's holdings, although there are other stockholders in Chicago and Milwaukee. The Victor jobbing business will be conducted under the same name, the Wisconsin Talking Machine Co., but the retail store, conducted for many years under the McGreal name, will be designated under a new name, not yet selected. Officers of the Wisconsin Talking Machine Co. have not been definitely selected at this writing.

Harry R. Fitzpatrick, who so efficiently served as general manager of the Wisconsin Talking Machine Co., during the time that Miss Gannon was president of the company, remains in charge and has plans under way for pushing the business with even greater vigor than in the past. L. E. Dresel, formerly of Chicago, will be in Milwaukee as representative of the main stockholder, C. M. Backus, and will act as treasurer of the company.

Blake & Burkart, the Edison dealers, with parlors at Walnut and Eleventh streets, have still further improved their handsome rooms, and although they have been in the talking machine business only about two months, they have established an excellent trade and their business has been very good. It dropped off a little bit the end of May, but thus far in June it has been elegant. They were favored this week with a visit from Greger Skolnik, the eminent violinist, who makes records for the Edison. His "Andalusia Romanza" is one of their most popular instrumental sellers. They have closed their weekly concerts, which have been very well attended, and will not resume them until the cool fall weather. They have taken on a new salesman named Harry Wilson, who has been doing very well. On the back of the Edison machine, as well as their record catalogs, they are using an excellent picture of the interior of their warerooms, which are the finest talking machine rooms in this city in elaborateness and taste in furnishing.

H. A. Weymann & Sons have never had as many orders booked ahead for their fall business on the Victor as at present. Not so long ago they sent each customer a letter calling attention to the desirability of ordering early, and that they had gotten an unusually big supply of both machines and records on hand, and in consequence their dealers are placing their orders with the view evidently that business was going to be excellent this fall.

SOME NOTABLE ARTISTS.

The July list of Victor records will present the first records made by four new Victor artists, Margaret Ober, Paul Althouse, Margaret Romaine and George MacFarlane. All of these artists are well known in either the concert or operatic world.

General Review of Trade Conditions Shows Pessimism Having a Firm Hold in Industry—Nevertheless Profit Figures for the Year Will Compare Favorably with Those for the Same Period of a Year Ago—The Cheap Record Policy Comes in for Severe Criticism—Room for Uniform Remedial Action—Lack of Co-operation Among Manufacturers a Subject of Regret—Important Musical Copyright Case Comes Up Again for Consideration—Papers Read at Music Trade Convention—News of the Month Worth Recording.

(Special to The Talking Machine World.)

LONDON, E. C., June 6.—Talking machine trade in this country would seem to be in a somewhat parlous state if one's opinion be guided or influenced by the pessimistic section, whose mission in life is to decry any and everything. Not for one moment do I suggest that trade conditions are anywhere near as healthy as we should like, nor can it be said that sales are altogether satisfactory. Business is certainly quiet, but, circumstances and time of year considered, I do not believe that, comparatively, we are much behind the profit figures of even time last year. Present-day figures may in bulk show even an increase; it costs considerably more, however, to secure a given turnover, and thus on the profit side a slight setback may obtain. This, of course, is one effect of the cheap-record policy introduced at the commencement of this last season and vigorously maintained ever since. Special inquiries made around the trade elicit information which tends to confirm the belief that manufacturers will not withdraw the shilling proposition except under general agreement. The British Zonophone Co. has intimated to me that it does not propose to vary its policy in respect of the half-crown Zono records, or the thirtepenney "Cinch" record, but all other manufacturers, I believe, would be quite willing to eliminate this unprofitable business. Briefly, the lack of co-operation among manufacturers has resulted in the gradual introduction of cheap records until to-day the market is flooded with passably good discs at one shilling retail. These may be sold at anything from 4s. 6d. per dozen upwards to 8s. 6d. wholesale. The former price is absolutely below first cost, and whatever reason determined such trade, the result, with which I am mainly concerned at the moment, is obviously appalling in its effect. Its pernicious influence is felt right along the line to all sections of the trade and we find all classes of dealers descend to price cutting, if the term can be applied to records, of which many do not even carry a semblance of fixed selling price. Now arrives a talk of agreement among manufacturers to abolish records below eightpence in price, establish a definite policy of trading, rigidly enforce price maintenance, fix wholesale and retail prices and generally control the distribution of goods even to the extent of refusing supplies to those dealers who do not exclusively handle the products of the associated houses. There would be no attempt to exploit the retailers, the plan in all its phases being devised for their protection. Both the manufacturing and wholesale sections should bind themselves under monetary penalty against a breach of any "understanding" come to, and it is further planned to exclude any free and open competition.

Musical Copyright Again Up.

Notwithstanding the general assumption of the sheet-music publishers that the Copyright Act of 1911 was framed along lines more favorable to gramophone record manufacturers than themselves, a totally different complexion is given the case by the judicial bench in its searching examination of the many obscurely worded clauses and provisions of this contentious act.

Several important actions have been tried out, with results mainly adverse to the gramophone

record industry. These actions have from time to time been fully reported in our columns, and those who have followed with care the growing favorable position of the publishers as disclosed by the judicial findings in question realize that at least the latter's complaints have little foundation in fact under the copyright laws, whose gradual elucidation is not so palatable as the gramophone trade would wish.

An assignee's right in musical copyright formed the subject of a recent case for judicial opinion, in the result of which, of course, general trade interest was keenly manifest. Messrs, Chappell & Co., Ltd., the great music publishers, claimed the right to restrict record manufacturers from copying the music of songs of which the copyright was vested in them under an assignment. It was purely a test action and the Columbia Graphophone Co. was cited as the defendant. Infringement was alleged in regard to a song called "Where My Caravan Has Rested."

Judgment.

Justice Neville: The defendants in this case copied the music of the song the copyright in which was vested in the plaintiffs under an assignment. The assignment was made prior to the Copyright Act of 1911. The music was copied in this way. It was published with a pianoforte accompaniment and the defendants adapted it for an orchestra in a written score. I think if this were all it would amount to an infringement to the plaintiffs' copyright. It is a copy of the musical work and it is not within the exceptions enumerated in Section 2 and the act. The orchestration was, however, for the purpose of obtaining a gramophone record of the song with orchestral accompaniment. Does the purpose for which the copy was made exonerate the defendants from the charge of infringement? Prior to the act of 1911 it had been held that rolls constructed for the purpose of mechanically reproducing the music were not copies and no infringement. See *Boosey vs. Wright*, 1900, 1 Chancery 122. Nor would I think, having regard to that decision, the creation of a gramophone record to be a copy or an infringement. The act of 1911 gives a limited right to the author or owner of a musical work in respect of records created for the purpose of mechanically reproducing the music. In the case of an assignment prior to the act this right is given to the author and not to the assignee. Assuming what the defendants have done to have been no infringement of the author's right in respect to the record, can that alter or limit the right of the assignee to the protection for the musical work which vested in him at the date of the assignment? I do not think it can. The act of 1911 does not purport to affect or diminish the copyright of the assignee and I think that such right is not altered. I have already said that what the defendants have done would in itself, and taken by itself, be an infringement, and I think it remains so notwithstanding the right to protection given to the author in respect of mechanical records.

I think, therefore, the plaintiffs' action should succeed and that they are entitled to the relief asked under claims 1, 2 and 3 and to the costs of the action.

Mr. Gore-Brown: I do not know whether my learned friend would be content with a declaration in this case. Of course it has been treated quite fairly as a test case by those concerned.

Mr. Jenkins: My instructions are to ask for an injunction and I think in the absence of instructions your clients must communicate with mine, and I must take your Lordship's order for the present.

Justice Neville: If you are both agreed you can draw it up in the form of a declaration;

otherwise I think I am bound to grant the injunction asked for.

Mr. Gore-Brown: In paragraph 2 of the statement of claim they ask for "an injunction to restrain the defendants, their servants and agents from using any copies of the music of the said song without the plaintiffs' consent." I want the word "made" in before the word "without."

Justice Neville: Very well.

Mr. Gore-Brown: We have only one copy and we will deliver that up.

Mr. Jenkins: Yes.

The Music Trades' Convention.

The papers read and subjects discussed at the fourth music trades' convention, held at beautiful Bournemouth, May 7 to 12, inclusive, were for the most part of a highly practical nature and well calculated to exert a powerful influence in the campaign against the several commercial troubles peculiar to the music industry. A conspicuous feature of this convention was the total absence of anything bearing upon the talking machine trade beyond the importance of the musical arrangements of the "His Master's Voice" Co. The chairman of the convention paid a well-merited tribute of thanks to the company for the talented artists who, at its instigation, had so immensely added to members' enjoyment by the excellence of their concerts. The whole musical program was organized by S. W. Dixon, a director of the Gramophone Co., Ltd., assisted by Messrs. Ricketts, Colledge and Langley. Aside from the high importance of this representation, it is a matter for very great regret that the gramophone industry was not otherwise in evidence on the business side of the convention. H. J. Cullum filled the gap last year and it must be heartily desired that we shall not again lose so fine an opportunity of associating this trade with other branches of the musical industry.

The Death of Barry Owen.

The recent death of Barry Owen calls to mind that he was mainly instrumental in founding the Gramophone Co., Ltd., then styled the Gramophone & Typewriter, Ltd. In 1898, I believe, Mr. Owen came to this country from America with the object of introducing what was then regarded as a wonderful toy. He it was who brought over the first gramophone that operated by hand. In those days such a thing as mechanical drive for rotating the turntable had scarcely been thought of. Anyway, this talking instrument created enormous interest. For the exploitation of this novel invention of Berliner's, Barry Owen endeavored to float a big company, Trevor Williams, the present chairman of the company, quick to perceive its commercial possibilities, went right in and soon incorporated a large company. It proved phenomenally successful, so much so that when the sanguine Barry Owen found the public willing to subscribe, as they did, by the way, enormous sums of money, it is said, he had misgivings as to the ability of the concern to pay any dividend on such a large capital. Not to rely, therefore, upon the gramophone alone, he persuaded the directors to take up the sale of a new typewriter—the Lambert, I think it was called—and so was born the name Gramophone and Typewriter, Ltd. Although the company has long since dropped the word typewriter, even to-day it is occasionally used by correspondents and visitors. But that by the way. Barry Owen never quite recovered his confidence in the business and he eventually sold out his shares, I am informed, at twelve shillings each. Since then those same shares have reached over £4 in value and to-day stand at 28s. 6d.!

Trade with China.

The need of a thorough investigation into the conditions and prospects of British trade in China
(Continued on page 48.)

FROM OUR LONDON HEADQUARTERS—(Continued from page 47).

has been urged by manufacturing circles and on the recommendation of the advisory committee on commercial intelligence the president of the Board of Trade has appointed T. M. Ainscough as a special commissioner to proceed to China for the purpose named.

Louis Sterling Returns.

Underlying the world-wide ramifications of the Columbia Graphophone Co. is a commercial organization second to none in efficiency and foresight. It has reached that pitch of perfection which should count in round figures as an asset in their balance sheet. Preparations for the season's campaign have to be made months ahead. That is where organization tells. Special attention is given to the individual requirements of each market and no stone is left unturned to insure perfection in every detail. In accordance, therefore, with this policy we find the executive of the Columbia company in conclave at the American quarters with prominent officials from the London branch. Louis Sterling has just returned and your correspondent seized an early opportunity of indulging in a short chat with him on trade matters in general. "It would be somewhat premature at the moment to review our arrangements for the season," said he, "but in conformity with our policy of developing trade, particularly in the high-grade Columbia lines of records and machines, we have made certain arrangements for still further improvement and intend to push this end of the business vigorously during the coming season."

Notwithstanding increased competitive conditions here, the Columbia trade progress is comparatively unaffected; indeed as against any previous year the company's sales figures are substantially up.

"The position of this company," continued Mr. Sterling, "was never stronger than it is to-day; our policy is a settled one and the trade confidence we enjoy in consequence is good enough encouragement for us to continue and even strengthen a service which is obviously productive of such mutual satisfaction."

While in the States Mr. Sterling naturally spent much time with his people, whom he found fit and well. He met several old friends there, notably Paul H. Cromelin, whose thoughtful message of remembrance to friends this side has been received with evident pleasure. I am desirous on their behalf to proffer per this medium hearty reciprocations.

Already in Harness.

Although but a few weeks old, the Performing Rights Co. has already got to work in a very practical manner. One of its objects is the collection of royalty fees from bands, orchestras and other public performers of copyright songs and musical selections. Places affected include hotels, restaurants, theaters, cinemas, kiosks, seaside pavilions and similar institutions. The company has acceded to the society's demand, although the hotel's manager expresses himself as dissatisfied. "We think ourselves not too well treated, as our musical performances are not for actual gain," he said, "but there is a legal point involved which it would be long and costly to fight, and so we respond to the demand for payment on the basis of a yearly contract." The figure involved is said to reach three figures. P. Sarpy, secretary of Performing Rights, Ltd., states: "We are only getting for British musicians and publishers what foreign musicians have had for years past. England has been the only country where music-makers were not organized for the purpose. Not all composers have joined us yet, but it is, I think, only a matter of time; already Messrs. Paul Rubens, Lionel Monckton, Hermann Lohr, Howard Talbot, Hermann Finck and Archibald Joyce are members. I don't think there is any likelihood of the work of these popular composers being

dropped because a fee is chargeable on performances.

"The fees will be strictly graduated in proportion to the size and importance of the establishment. We are exercising a legal right which has been in abeyance."

Excellent Selection of Records.

A prominent feature of "His Master's Voice" list of records for June is the excellence and number of the dance selections issued on double-sided records. As will be seen, the orchestras chosen for this work represent the very cream of the world's musicians, and the sparkling morceaux they contribute range from the one-step to the very latest vogue, that of the "hesitation." Other "jems" may be noted from a perusal of the full list, as follows:

Twelve-inch, double-sided: "Madame Butterfly," selection (Puccini), and "Dream Pictures" (Lumbly), Pryor's Band; "Queen of the Movies," two-step ("Kino Konigin") (Jean Gilbert), and "Somebody's Coming to My House," medley, Metropolitan Band; "La Boheme," selection I and II (Puccini), Mayfair Orchestra; "You're My Baby" (Nat. D. Ayer), and "Je Lais que vous etes polie" (Christiné), Jacobs and his Trocadero Orchestra.

Ten-inch, double-sided: "On Jhelum River"—Will the Red Sun Never Set, and "Oh Jhelum River"—The Song of the Bride (A. Woodforde-Finden, arr. by P. E. Fletcher), Band of H. M. Coldstream Guards; "Admiration," Waltz Hesitation (Carza), and "Toreador One-Step or Turkey Trot" (Gascon), Metropolitan Band; "If I Only Knew," waltz; "Schwindelmeier & Co." (R. Nelson) and "Valse Boston" (R. Drigo), Palais de Danse Orchestra.

Twelve-inch, single-sided: "Sylvia Ballet," intermezzo and valse lente (Delibes), New Symphony Orchestra; "Sylvia Ballet," cortege de Bacchus (Delibes), Ney Symphony Orchestra; "A Furtive Tear," "Elixir of Love" (Donizetti), Charles W. Harrison; "Comfort" (C. Novello

Davies), Miss Alice Lakin (contralto); "What's It Got to Do With You" (Tennent), Miss Margaret Cooper; "An Old World's Garden" (Crampton, Ernest Crampton and Marjorie Vernon); "The Raven," Part I and II (on two records) (Edgar Allen Poe), Percy Hemus (dramatic reciter); "Beautiful, Beautiful Bed" (Murphy and Tipton), Alfred Lester.

Ten-inch, Single-sided: "Have You Seen But a Whyte Lillie Grow," Miss Alma Gluck (soprano); "The Carnival" (J. L. Malloy) Stewart Gardner (baritone); "Sweethearts Three" (Robert Coverley), Harry Dearth (bass); "Bye and Bye You Will Miss Me" (Stamper), Ethel Levey.

Real Bird Records.

A few years ago the Gramophone Co. issued a record upon which was engraved the sweet notes of a captive nightingale (this record, by the way, is still one of my treasured possessions), and now comes the welcome news that after very considerable patience a further series of real bird trills have been secured. These include two records by a captive sparrow, two more of a nightingale and one each of a blackbird and thrush. The records are most successful. Herr Carl Reich, of Bremen, who owns the birds, explains in an interesting manner some of the difficulties of securing these records. He says in part:

"Four years passed before we attained success. Only when I was alone with the bird would it sing; as soon as the recording machine was put into operation the bird would stop abruptly. Even if we do get the bird to sing with all his might he will cease singing the moment the machine is set in motion. He simply flies off to another spot. Where we have trained a bird to sing just in front of the horn he invariably slips to one side the moment he hears the noise of the machine working—and, of course, half the sound is lost, and often he will stop singing altogether.

"These difficulties seemed to point to the impossibility of success. I persevered, however, until at length I overcame this timidity of the birds. First of all I allowed the birds to fly about in the room. They were taught to return to the proper cage always. Their favorite food was placed in the mouth of the horn, behind which was erected a dummy recording machine. Whenever they went into the horn to fetch their pet food the clockwork was set in motion. To give more confidence to the birds I often got them to eat food out of my own hand. Inborn love of the birds, together with endless patience, enabled me after many years to get the birds accustomed to losing all their shyness and fear. In this way the machine and the horn became familiar to them. It was, so to speak, part of their life, like the beautiful park and woods they could see from their windows."

New Kind of Trumpet.

A new kind of trumpet is announced by the National Gramophone Co., Ltd. It is named "Resopan" and is made of a skin so cleverly treated as to represent a perfect imitation of wood, mahogany, chestnut, maple, etc. Without detriment to shape, it gives slightly under pressure, but cannot crack or break. Compared with a

wood horn, the "Resopan" gives forth a bright and solid tone and is in some respects much superior. The retail price of the new product is one guinea.

Must File a Balance Sheet.

Replying to a query in the House of Commons, the president of the Board of Trade said: "By Section 274 of the Companies (consolidation) Act, 1908, every company incorporated outside the United Kingdom which establishes a place of business within the United Kingdom is under the same obligation to file a balance sheet as a company registered under the Companies Act.

To Open in Manchester.

The Coliseum Record Co. informs me of its intention to open up a central depot in Manchester. This move is necessitated by its rapidly expanding trade up north. In addition to full stocks of records, the depot will carry full equipments of every known accessory and part connected with talking machines.

The Great Tenors in Duets.

The standing of Morgan Kingston as an English tenor of whom we have every reason to be proud, has been considerably enhanced by the news of his glowing success in grand opera in New York. This success, too, invests with particular interest the twelve-inch record bearing Mr. Kingston's name in the Columbia-Rena list for June, for on it that fine artist is to be heard in duets with Louis Kreidler, the leading baritone of the Grand Opera Company, in which Mr. Kingston has been singing. We thus have an additional attraction in the record, the two great voices giving us the duet, "Mimi's So Fickle-Hearted," from "La Boheme," and that favorite ballad, "The Moon Has Raised Her Lamp Above."

Plantor Home Recorder.

An interesting apparatus just introduced is the Plantor Home Recorder for disc machines. Its chief advantages as a commercial proposition are vested in extreme simplicity of construction, rendering it adaptable for use on any make of instrument, sensitiveness to even a whisper, and cheap recording-blank equipment. This latter represents a cardboard disc with wax surface, which is easily made, and can be sold very cheaply. Of ten-inch diameter, its capacity is an average of 1,000 words, although a rapid speaker could dictate to the tune of double this number on one disc. Your correspondent recently inspected this appliance, and found it in every way of practical value. As a commercial dictating machine, or as a home entertainer, this invention should fill adequately the proverbial long-felt want; for, in the latter connection especially, if there is anything lacking to complete the triumph of the gramophone, it is the means to record and reproduce one's own vocal efforts, without great expense. In this regard, therefore, a hearty welcome should await the Plantor Home

ATTRACTS WORLD-WIDE ATTENTION

Nearly Five Hundred Inquiries Received by J. Hobbay from United States and Canadian Dealers as a Result of Two Advertisements in the Talking Machine World.

(Special to The Talking Machine World.)

LONDON, ENGLAND, June 3.—Information has reached us from J. Hoffay, of 67 Edgerton Gardens, South Kensington, London, who is bringing out a new gramophone which some have called "the world's musical instrument," that widespread interest is created in this new product. Mr. Hoffay is expected to announce in The World within the near future the trade name under which the instrument is to be sold. He says he has found it more difficult to get hold of the right name than to complete his invention. He speaks very highly of the interest aroused among the dealers in the United States and Canada, and says that he has received over 400 letters, for which he gives credit to the advertising power of The Talking Machine World.

Mr. Hoffay is sure that his instrument will satisfy the expectations of the trade in every particular and will constitute an important asset to the dealer for the sale of records.

Definite information as to its selling policy, terms, etc., will soon be ready. He expects certain developments in his patent at an early date which will enable him to send out particulars, together with catalog.

Recorder, for which B. Frankel, of the British Plantor Co., 63 Theobald road, London, W. C., holds the exclusive agency covering Great Britain and its colonies.

Recordings of London String Quartet.

The famous London String Quartet is represented by exclusive recordings on a 12-inch Columbia-Rena record this month. The selections they play include Tschaiakowsky's beautiful "Andante Cantabile" (a record which has been much in demand of late), and Haydn's Hymn to the Emperor, also known as the Kaiser Quartet, but perhaps best known for its melody as the Austrian Hymn. It is doubtful whether two better titles could have been chosen to display the artistry and consummate mastery of the quartet, and our congratulations are due alike to Columbia and the record world on the issue of so notable a record in a standard catalog.

New Records by Mme. Fremstad.

A new record by the great Wagnerian soprano, Mme. Olive Fremstad, is always an event of moment, but the issue on the Columbia Celebrity series this month is rendered doubly so by the fact that it shows her in excerpts from two of her greatest Wagnerian roles. As heard in Brunnhilde's battle cry, we have the wonderful voice in superb control, while in "Du bist der lenz," the lyrical passage from the same work ("Die Walkure"), we have a number of immense beauty, both revealing the famous soprano in flawless voice.

One of the most interesting announcements of the month is that of a new Columbia record by Madame Cavalieri. She sings "O Solo Mio," while Tosti's popular "Nattinata" is given on the reverse of the 10-inch disc.

ST. LOUIS TRADE GIVES GOOD ACCOUNT OF ITSELF.

Because of Excellent Volume Despite Extraordinary Heat and Talk of Business Depression—Month's News Record One of Advance with All Leading Concerns Who Are Doing a Good Business or Planning for Immense Activity During the Fall Season.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., June 10.—The talking machine business is giving a very fair account of itself despite the extraordinary heat, the dry weather and general depression that is affecting all other lines and is making so many business houses hustle to equal totals of the current months of previous years.

Not so with the talking machines. The month's totals look better each month as compared with a year ago, and the business generally appears on a sounder basis than ever before, despite the new comers who might be expected to split the trade in many directions. The Victor jobber, the Aeolian Co., and the Koerber-Brenner Music Co., report a very satisfactory business, as to the Columbia wholesale departments and the Silverstone Music Co., of the Edison. The retailers have grasped the summer trade idea, that it must be gone after in the homes, on the porches or lawns, or at the clubhouse, wherever people are amusing themselves, but that is ready. Most dealers agree with Manager Robinson of the Thiebes Piano Co., that the summer trade, even that for the clubhouses and canoes, is of a higher class than ever before. That where \$15 and \$25 machines were in demand in previous years, \$40 to \$50 is the average investment this year.

Mr. Robinson printed a very attractive drawing in connection with a House of Thiebes ad. the first Sunday of this month. It presented the prow of a motor boat, with a talking machine dispensing music to the great gratification of the young man and woman seated in the boat. The head of the ad. was "Don't fail to take a Victrola, new Edison (diamond disc) or a Columbia gramophone with you on your summer outing." Mr. Robinson says the ad. has been an excellent puller and many of the later inquiries were traced directly to it.

The fact that the Thiebes Piano Co. has the three machines and offers a trial of all three side by side, the same numbers and in the same demonstration room, has been an excellent card for this firm. "Every time a single line dealer knocks a machine that he does not handle, it is a boost for our ads," says Mr. Robinson. "It is easy to make a prospective customer suspicious, and nowadays practically every purchaser knows the names of the three machines, and if the salesman says anything

to make them suspicious, he comes where he can hear all of them. We let them choose, and we often get much interested in watching to see which way the choice is going to fall. It is very difficult to predict until the sale is closed."

The Field-Lippmann piano store also have the three machines on exhibition, but they have not made the comparison idea as strong as the Thiebes Piano Co., in their advertising.

Alex Robinson, at the Grand Leader department store, reports some excellent business along the summer lines.

W. C. Ligon, who was in charge of the talking machine department at the Famous-Barr department store, has been transferred to the piano staff and Miss Elizabeth Vandeventer is in charge of the talking machines, under the direction of James B. Campion, of the piano department. Miss Vandeventer, who was in charge of the Victor department at Bollman Bros. Piano Co. for a long time prior to the failure of that company, is well known to the local trade.

Recently the Famous-Barr has been giving dual recitals with Victrolas and Edison disc machines, and Mr. Campion says that it is interesting to watch the conclusions reached by persons who hear the two machines under exactly similar conditions, and what peculiar advantages that go to make the sales.

The Columbia warerooms here were in sad disarray for three weeks, beginning May 20. The delayed work of remodeling the building was then begun in earnest, and one of the first things the working men found necessary was to tear out the demonstration booths and oust the office force, including Manager Irby Reid. The latter found refuge in the stockroom, which is apart from the main warerooms. Retail Manager Duffy remained on the job, sometimes here and other times there, wherever the workmen did not want to be. He had stock for three demonstration rooms near-by, and grouped his machines just as though they were surrounded by walls, and did the best he could under the circumstances. He spent most of his time planning stunts for the sales force, that would keep them and their prospective customers away from the store, but still bring in some business. Under the new plan, the retail department will have six demonstration booths and almost double

the machine display space as previously, and much better arranged. The entire main floor will be thrown together or divided by glass partitions, the office force having smaller but more workable quarters than before. The dictaphone department, which formerly held forth near the front door, will go to the second floor, where a large stock room will be arranged on a scientific plan. The changes include a convenient stairway to the second floor, new ceilings and complete new decorations for the entire building, and greatly increased light throughout the building. Mr. Duffy says:

"Without the shadow of a doubt we are going to have the handsomest talking machine store in this section of the country. We are staying right on the job while the duty is being added and we are taking care of all of our trade, but we cannot do much of the initiative under our present handicap. By the middle of this month we will have a worthy home for the Columbia, and then we will go abroad and invite everyone in to see our home and our machines, and to listen to the music and, of course, buy to meet their requirements."

New dealers added to the Columbia list are: J. M. Cline, druggist, Marion, Ill.; W. J. Fitzgerald, hardware, West Frankfort, Ill.; Busy Bee, candy, Shelbyville, Ill.; L. Shaver, Paris, Ill.

George Brown, Jr., of Hillsboro, Ill., has gone into the talking machine business on rather extensive lines for a small city dealer in this section. He is selling Columbias and Edison disc machines. He intends to thoroughly cover his community, and has established branches in the small towns and villages where one or more machines will be on demonstration, and he will be at call if the local salesman needs aid or different model machine than in carried in stock there. J. J. Bennett, of the Columbia sales force, was recently over the local territory with Mr. Brown, spreading cheer and confidence among the salespeople. Mr. Bennett says that with an automobile, such as Mr. Brown will use, any person who believes in talking machines can stir up a wonderful business in the country, for the farm homes are all open to some such intelligent entertainment as the talking machine brings. Mr. Bennett predicts that within a few years every county in the Middle West will have at least one energetic dealer who will cover the country districts and will make an excellent revenue from his work.

Only a few years ago the talking machine furnished the excuse for a piano house to keep open Saturday afternoons and late each evening, the idea being that the wage earners who bought talking machines as substitutes for pianos, organs or other high-priced music instruments, could not get in at other times to pay on their accounts.

This year, when the summer closing movement was started, no such excuses were presented. Instead, the leading talking machine stores are the leaders in early closing. The Field-Lippmann piano stores, Thiebes Piano Co., and Aeolian Hall were the first three to agree to close Saturday afternoons and at 5 p. m. during June. The Silverstone Music Co. moved up to 5.30 for June.

DISPLAYS OLD-TIME MACHINE.

Berliner Gramophone of the 1899 Model Compared with Modern Victrola XVI. in Window of Benj. Switky's Store.

Much attention was recently attracted to the show window of the store of Benj. Switky, the prominent Victor distributor at 9 West Twenty-third street, through the display in juxtaposition of one of the first of the old Berliner gramophones, placed on the market in 1899, and a modern Victrola XVI. The presence of the Victor dog added much to the effectiveness of the display, and suitable signs told just what the old machine represented as compared with the latest Victrola.

A merchant's success depends much upon his knowing the profitable sellers. It may be easy to sell nails, "but what's there in nails?" It may be good business to make every effort to increase your volume of business, but "what's in the volume" if you are selling mostly articles that are sold at a low or cut price?

PUTNAM, CONN.

SERVES NOTICE OF LEGAL ACTION BEING TAKEN.

Suit for an Injunction and an Accounting Filed Against Thomas A. Edison, Inc.—Claimed That Disc Machine and Attachments Infringe Victor Patents—Warning Against the Handling of Records Labeled to Imitate the Red Seal Records.

The Victor Talking Machine Co. sent out to its representatives recently a letter giving information relative to certain legal action which it is contemplating, portions of which are appended:

"It becomes our duty to notify the trade and the public generally that the Victor Talking Machine Co. has filed a suit for an injunction and an accounting of profits and damages against Thomas A. Edison, Inc., under the United States Letters Patent Nos. 785,362, 814,786 and 1,060,550, issued to and owned by the Victor Talking Machine Co. This suit was filed in the United States District Court for the Southern District of New York on April 29, 1914, Equity No. E 11/190.

"In this suit against Thomas A. Edison, Inc., for infringement of the letters patent enumerated, we contend not only that the disc talking machine manufactured and sold by that company is an infringement, but also that the attachment manufactured and sold for use with the Edison disc machine by which Victor records may be played thereon is also an infringement.

"Not only attachments supplied by the Edison Co. itself, but other attachments made and sold by other parties, hereinafter referred to, for use upon the Edison machine by means of which Victor records may be played thereon clearly infringe, among others, the letters patent above referred to.

"Under the letters patent owned and controlled by the Victor Talking Machine Co. it is contended all disc records of the gramophone type (laterally undulating or zigzag groove), all Victrola types of machine, and all taper tone-arm constructions now upon the market come under the claims of the letters patent enumerated and others owned by

this company, and there is an apparent tendency of increasing activity in such infringements, which will be dealt with as the occasion requires.

"The companies referred to which have been notified of the infringement of certain of the Victor Co.'s letters patent are as follows: Crescent Talking Machine Co., 106-108 Reade street, New York, N. Y.; Diamond Talking Machine Co., 401 Prospect avenue, N.W., Cleveland, O.; Independent German-American Talking Machine Co., 155 East Fourth street, New York, N. Y.; A. F. Meisselbach & Bro., Newark, N. J.; New England Talking Machine Co., 132 Boylston street, Boston, Mass.; F. H. Thomas Co., 689 Boylston street, Boston, Mass.; Triton Phonograph Co., 41 Union square, New York, N. Y.; Union Specialty & Plating Co., 409 Prospect avenue, N.W., Cleveland, O.; United Patent Co., 75 Fifth avenue, New York, N. Y.; Unit Motor Co., 108 Worth street, New York, N. Y.

"Recently there have also appeared in the United States gramophone disc records of the Victor type, both from Europe and from Japan, having red labels thereon. These records not only infringe the Victor Co.'s letters patent, but also this company's trade-mark No. 49,364, registered January 30, 1906, in the United States Patent Office. This registration covers the exclusive right to the use of the trade-mark consisting of a red disc applied to the center of a talking machine record. Therefore, all who handle or use these records so having the red disc are also infringing this company's exclusive trade-mark, and suitable warning is hereby given of such infringement to the trade and public generally."

NOTICE FROM THOMAS A. EDISON, INC.

Issues Answer to Circular of Victor Co. Announcing Suits for Infringement of Patents—Deny Claims Made by Plaintiff Company.

Thomas A. Edison, Inc., Orange, N. J., under date of May 26, issued the following notice to the talking machine trade:

"Our attention has been called to a circular issued by the Victor Talking Machine Co., under date of May 20, and addressed 'To the Trade.' It contains a statement to the effect that the disc phonographs and attachments for playing lateral cut records put out by this company are infringements of three United States patents upon which suit has been brought against this company in the United States District Court for the Southern District of New York.

"We wish to assure the trade that a careful examination of these three patents has been made by our patent counsel and that in his opinion there is no basis whatever for any charge of infringement by reason of the use or sale of our apparatus. Jobbers and dealers should not be alarmed or mis-

led by any circularized statements of this character, and in case of any suit being brought against them or of any threats being made, they should immediately communicate with us. We stand ready to assure the defense of any patent suit brought against any jobber, dealer or user based upon the sale or use of any of our disc phonograph apparatus. Yours very truly,

"THOS. A. EDISON, INC.,
"C. H. Wilson, Vice-President."

MOVE TO LARGER QUARTERS.

The Newark Talking Machine Co., of Newark, N. J., has removed just next door to its former location, corner Broad street and Central avenue, to much larger elaborate quarters, having four large demonstration booths and one large display room. M. Buchner, president, and Chas. Buchner, treasurer, report an excellent volume of Victor business with their house.

Some men are so wise that it seems as though they must have been born at a much earlier age than the rest of us.

COULDN'T SELL THE RECORDS.

Maxwell Corkedale Could Give Away Talking Machines, but the Records Proved White Elephants—Settles Suit with Company Who Started the Plan—So Ends the Tale.

(Special to The Talking Machine World.)

NEWBURGH, N. Y., June 6.—After being out less than an hour last week the jury in the action brought by Thomas F. Johns, doing business as Harmony Talking Machine Co., against Maxwell Corkedale, decided that if Mr. Corkedale would pay to the plaintiff the amount he claimed and admitted he owed to the company it would satisfy the ends of justice. Mr. Corkedale had accepted representations of an agent of the talking machine and then signed a document calling for the shipment of goods. The first shipment was valued at \$61.85, and a year's interest will go with it. As Mr. Corkedale had tendered the amount prior to the case coming to trial the costs will fall on the plaintiff, and there will be small chance of meeting expenses out of the case.

Corkedale, who runs a store in this city, made a contract on June 24, 1912, with B. Blankman, representing Thomas F. Johns, who was doing business under the title of the Harmony Talking Machine Co., of Chicago, Ill., whereby Corkedale became agent for the company in this city. The machines were to be furnished in dozen lots and to be given away as prizes when buying goods to the value of \$35 or more. The profit was to be made in selling records to those who received the machines, the records to sell at 65 cents and costing the agent 39 cents. The needles and other accessories were also to be sold. All goods were to be paid for in thirty days after delivery. The first shipment included a machine, carton of records and needles, etc., to the amount of \$23.15, and shortly after there came another shipment of a dozen talking machines and twelve cartons of records, valued at \$234.

Corkedale testified that he had not ordered these and had sent them back after finding there was no sale for the records. After having given the first machines away he found that people would not buy records at 65 cents.

The settlement effected was for the goods received under the first bill, supplemented by other articles disposed of from the second shipment, the total value of all being \$61.85.

MISS EDISON TO BE MARRIED.

The marriage of Miss Madeline Edison, daughter of Mr. and Mrs. Thomas A. Edison, and John Sloane, son of Dr. and Mrs. T. O'Connor Sloane, will take place on Wednesday afternoon, June 17, at the home of the bride-elect's parents. The wedding promises to be one of the social events of the season.

NEW CONCERN IN BUTTE, MONT.

The Butte Phonograph Co., composed of Joseph Lutey and L. V. Williams, has opened an exclusive talking machine store in Butte, Mont., where Edison products will be handled.

"TALKER" AND PLAYER COMBINED. GAIN OF 35 PER CENT. IN BUSINESS.

Two Furniture Men of St. Louis Evolve a Simple and Practical Combination of the Two Popular Instruments—How the Desired Result Is Obtained Interestingly Described.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., June 6.—The very simple and practical combination of player-piano with talking machine which is here reproduced is the invention of Isadore Fry and Jacob Shanks, two young furniture men of this city.

It has been prophesied that when a successful combination of these two instruments was made it would be by some one outside of the music trade,

Showing Operation of the Player and the Talking Machine.

and the simplicity of this instrument, together with its accurate synchronization, makes this seem true. The talking machine is operated by the same motor as the player and receives its power by means of a delicately adjusted sprocket wheel and chain located on the left side of the lower spool. A clutch is also provided whereby the talking machine may be thrown into gear or not as desired. Either machine may be worked separately.

The bellows are adjusted to carry the additional

Showing Outside of Instrument.

load in a novel way. The sound box of the talking machine sits back in the piano, close to the plate. The aperture or bell of the machine is brought out on the left-hand side of the upper panel as shown in the picture.

The inventors claim this machine can be installed in an hour's time in any piano that is of ordinary depth.

CLEANNOTE PAD saves tunes, talks. Improves tone. Lessens scratch. Trebles life records. 25c. Get circular. Agents wanted.

VOX HUMANA TALKING MACHINE CO.
Nantucket, Mass.

This Is the Record of Louis Buehn, of Philadelphia, in Comparing Business with the First Five Months of This Year with the Same Period of 1913—An Invitation to Jobbers Visiting Atlantic City to Make His Place Their Headquarters.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., June 9.—In a chat with a representative of The Talking Machine World, Louis Buehn, Victor jobber of this city, made the very interesting statement that, notwithstanding the business transacted by him, last year was the largest in its history; that the first five months of this year in comparison had shown a gain in volume of business of approximately 35 per cent. This is a remarkable increase, and simply shows what can be accomplished in this day of commercial activity when the pessimist is about with his large pitcher full of cold water.

Mr. Buehn aims first to co-operate with the retail merchant, and naturally this assistance on his part so pleases the trade that it is their endeavor to use every means to aid him in maintaining the co-operative service that the house of Buehn is noted for.

Mr. Buehn is planning to attend the convention at Atlantic City, and in this connection he invites all the visitors to drop in and see his establishment at 825 Arch street, in this city, which is in a very convenient location, and in addition Mr. Buehn would be pleased to have the visitors use his office as their headquarters while in this section.

MACHINE TO DETECT SOUNDS.

New York Inventor Thinks Device Will Prevent Sea Collisions.

Elias E. Ries, an electrician and inventor of 116 Nassau street, wrote recently to President Wilson asking his aid in getting a Government test of a sound detecting apparatus, which Mr. Ries believes will enable ships at sea to find the position of icebergs or any approaching object by means of echoes long before it has come into the range of normal hearing. This apparatus, Mr. Ries thinks, would have prevented the "Empress of Ireland" disaster.

The principle of the system, which is now before the United States Patent Office, is the same as that of human hearing, only the mechanical ears are microphones at either end of a long arm attached to the mast of a ship. This arm moves about and explores sound waves reaching it, and when the sound in both receivers is of equal intensity a special device, the inventor says, reckons the exact distance and direction of the object from which the sound comes.

The receivers are connected with ear pieces for the ship's lookout and also for the captain. At the bow of the boat the ordinary siren sends out its sound waves and it is the echo from these that the lookout waits for. With ordinary sounds a man instinctively turns his head until the sound wave strikes equally on both ear drums. The long arm with the receivers on it has length enough to fall into the circle of the sound wave from afar and when this has been exactly accomplished, Mr. Ries says, a device shows the distance without any reckoning on the part of the lookout.

A STARTLING INSCRIPTION.

A traveling salesman died suddenly in Kalamazoo and his relatives telegraphed the florist to make a wreath, ordered that the ribbon should be extra wide with the inscription, "Rest in Peace" on both sides, and if there was room, "We Shall Meet in Heaven." The florist was out of town and his new assistant handled the job. It was a startling floral piece which turned up at the funeral. The ribbon was extra wide and bore the inscription, "Rest in Peace on Both Sides, and If There Is Room We Shall Meet in Heaven."—Sel.

Benjamin Franklin undoubtedly possessed the best organized mind that history records. How his master mind was organized is interestingly told in his autobiography.

A Great Business Opportunity

Are you looking for opportunities to increase your net profits?

Are you interested in lines which blend satisfactorily with talking machines which will add materially to your business success?

If you are, we can help you, and the sooner you get in communication with us the more rapidly your profits will accumulate.

Do you realize how splendidly pianos and player-pianos blend with talking machines?

We have created one of the largest manufacturing enterprises in the world in a short space of time, and we have done it through the delivery of values.

We are in a position, through our unexcelled factory facilities, to supply you with pianos and player-pianos at prices which will enable you to make splendid profits.

Our instruments are reliable in every particular, and our prices will appeal to people of moderate means.

Let us take up this subject with you.

It will pay you!

Columbia Graphophone Company
Woolworth Building, New York

MY FRIEND THE DEALER PUTS OVER A FEW NEW ONES.

An Informal Interview in Which a Prominent Talking Machine Man Suggests Some Timely and Remunerative Stunts for the Good Old Summer Time—A Mexican War Record Wanted—Some Hints Relative to Revitalizing the Art of Home Record Making.

It was deliciously cool and quiet in the sanctum of John Jones, The Elite Talker Shop proprietor, after the heat and hubbub of the street, and I sank into the easy chair he pushed toward me with a sigh of contentment. An electric fan purred above his desk and an iced jar of spring water, aglitter with moisture, reposed invitingly at his right hand. It was an ideal place for the making of big business and I told Mr. Jones as much.

He shrugged his silk-shirted shoulders and smiled.

"There are two things most essential to me in the manufacture of my trade ideas, viz: comfort and quiet. The brain works fastest when the body is at rest and when there are no jarring discords of sound to divert the attention."

He looked at me inquiringly: "Is The Talking Machine World representative seeking an interview, I wonder? and will he have a cigar?"

"He is and he will, and he thanks his hospitable host very kindly."

A moment of stillness, broken by the scratching of our matches, then Mr. Jones asked another question: "How can the present situation in Mexico be turned to account by the 'talker' man?"

"I would be charmed to have you tell The World readers about it," I replied feelingly.

With a puff at his weed, he continued: "Well, I have been indulging, along with the scholarly Woodrow, in a policy of watchful waiting. I have eagerly watched the monthly bulletins and I have waited most impatiently for a special announcement from one or even all of the great triumvirate regarding a series of records describing the capture of Vera Cruz, the funeral of Poinsett, etc. The demand for records celebrating events of this character is enormous. My customers ask me every day why such selections have not yet been issued. I have invariably told them that they have only to be patient for a little while and their wishes will be gratified. Let us pray that this is true.

"Please ask the manufacturers for me through the columns of The World to bring out a "Capture of Vera Cruz" record at once; I need it in my business."

He laid his cigar in the ash tray and leaned forward in his chair: "Let us go back to the time of the Spanish war. Do you remember the records made by the chief bugler of Roosevelt's Rough Riders?"

I nodded an affirmative.

"The calls played over the graves of Hamilton Fish and Captain Capron, and marketed by what was then the Columbia Phonograph Co., of New York and Paris, were wonderful sellers; I couldn't get enough of them. "The Capture of Santiago" and "The Charge of Roosevelt's Rough Riders," put out by the same company, made pronounced hits also.

"There are several ways in which our present misunderstanding with Senor Huerta can be suc-

cessfully utilized by the talking machine dealer, and it is a great surprise to me that a movement of this kind has not been started ere this."

Mr. Jones reached for his dead cigar. He relighted it with much care and leaned comfortably back in his seat, sending smoke rings ceilingward.

"Now that Miss Margaret Woodrow Wilson is singing into the horns, would not a record of her voice in "La Paloma" create a sensation?"

More smoke rings.

"I can see the advertisement now:

Mexico's Most Popular Song

La Paloma, The Dove

Sung by America's Most Prominent Vocalist
MISS MARGARET WOODROW WILSON

Daughter of the Nation's Chief Executive
"Some combination, what?"

"The talking machine business should be con-

"Taps."

ducted along the same lines as a newspaper, so far as taking care of unusual occurrences is concerned. Just as a city daily indulges in extra editions to keep its readers posted upon the latest developments of a war, so should the 'talker' manufacturer get out special descriptive selections recorded with care and brilliancy. A representative should be sent to the front if necessary in order that the records may be faithful reproductions of the real conflict"

"Are you sure it would pay to go to that extremity, Mr. Jones?" I asked skeptically.

"My dear boy, there is no doubt about it. If the public had reason to believe that the records

were echoes from a genuine and bloody war, and not imitations concocted from the barren imagination of a laboratory manager, they would fall over one another like suffragettes in an art gallery to get them. Oh, yes, they'd sell all right, believe me."

Opening a drawer of his desk he drew forth a magazine and handed it to me.

"Ever go in for photography?" he inquired.

"Yes, I'm exceedingly fond of it, why?"

"That copy of Popular Photography, which, by the way, is a corking good periodical for the amateur picture maker, gave me an idea. If you will turn to the editorial page you will learn that they offer monthly prizes for photographs. Glancing through the pages you will find from the generous amount of worthwhile pictures displayed there, that the contest is exceedingly popular and widely patronized. Such being the case, why would it not pay a talking machine dealer to inaugurate a prize recording contest? For the purpose of boosting home record making, it seems to me this scheme is a winner, and I wonder why this also has not already been done.

"Every live 'talker' man has a fat list of patrons who have machines which will record. What will stimulate their interest like asking them to sing, play or talk for a prize? Offer them whatever inducement you deem consistent with your business and your pocketbook and watch the shaving machine whirr and the stock of blanks melt away.

"Mention the contest in all your advertising matter. Everything in the line of publicity that leaves your store should talk about the contest."

"Are you trying it out?" I asked curiously.

"Uh huh! Stop in the packing room on your way out and you'll think so.

"Just a moment"—as I rose to depart—"and I will explain with becoming brevity how I conduct my recording contests. I leave the choice of selection entirely to my patrons. I simply state that the record must be made with an apparatus purchased from me, and that a prize of \$5 will be paid each month for the record which seems from every possible standpoint to be the best. A committee of three, selected from my sales force, judge the records and make the awards. You see, home recording is a very fascinating pastime; especially when there is the possible chance of making something out of it in the way of a small financial return. The element of honor also enters in to a small degree, and it is very satisfying to Mr. Record Amateur to know that his success as a 'talker' artist is worthy of a prize.

"When the scheme is put into effect by several dealers, thus increasing the market for amateur records, the demand for blank cylinders and recording outfits will soar by leaps and bounds."

How about this contest idea, Mr. Dealer? Worth a thought or two, is it not?

DETROIT DEALERS LOOK FOR A VERY BUSY FALL

Following a Lively Summer Season with Its Demands for Dance Records—Hudson Co.'s Talking Machine Department—Max Strasburg Co. Completes Alterations—General Conditions Analyzed with Favorable Conclusions—Developing Near-by Territory.

(Special to The Talking Machine World.)

DETROIT, MICH., June 8.—Though May was a quiet month in the talking machine business in Detroit, the dealers have every reason to believe that a revival is close at hand. The summer months always are good ones in Detroit, because of the extensive summer resort facilities of the city. The present-day propensity of all dancers to dance to talking machine music is expected to add to the normal summer activity in the trade. Dance music will get into many a summer home on lake shore and island where it hitherto has been unknown because orchestras are too expensive. It also will be heard at hotels and aboard yachts. Very few yachts, and only the largest ones, ever have orchestras aboard, but many of them have enough deck room for dancing. And dancing afloat is the most enjoyable kind.

March and April were good months, and there is no particular reason for the falling off in May. This is taken as further ground for belief in a prosperous summer. Collections are good. Selling terms also remain good there seeming to be plenty of cash in evidence when a purchaser discovers that he can save 6 per cent. by using it. Basic business conditions in Detroit are good, this being evidenced by the tremendous activity in the building trades. People are building their own homes in newly created suburbs. Temporarily, this may affect the talking machine business, for the home builders will need their spare cash for real estate payments, but eventually thousands of them will want phonographs in their new homes.

Detroit now extends along Detroit River and the shore of Lake St. Clair for a distance of thirty miles, and all along the east, west and north city lines new subdivisions are being built up. This gives employment to an army of many thousands of workmen, with the resultant increase of purchasing power. Still there are idle men here. But most of them are outsiders who came here in search of prosperity.

The talking machine department of the J. L. Hudson Co. now is in new quarters on the seventh floor of the main building of the company, there to remain until the completion of a new ten-story building next November, one of the principal fea-

tures of which will be a grand music trades department. There the talking machines will have an entire floor.

For the present the Victrolas and the Grafonolas are adjacent to the pianos, but have an elevator entrance of their own. The record cases are with them, placed in a very handy arrangement. While the main body of the music trades department is finished in ash gray, the talking machine division is made distinctive by white enamel.

The Hudson Co. is laying in a very large stock of machines, following the policy of last year, which protected it from the annual scarcity of

Exterior of Max Strasburg's Establishment.

machines at Christmas time. More will be needed than can be accommodated in the present quarters, but they will be brought to town and stored until the doors of the new store are thrown open. The company, with millions of capital, has promised Manager Andrew that his department shall be one of the finest talking machine stores in the United States.

The Max Strasburg Co. recently completed alterations which make this exclusive Victrola and Columbia shop finer than ever. The accompanying photograph shows the exterior of the store. The many plate glass partitions between the demonstrating rooms queered all efforts to make a picture of the interior, the refraction of light on the glass making more scintillations than the camera could stand for. The automobile, used for delivery of talking machines and records, is one of the additions to efficiency instituted by the company.

The store is a corner one, with entrances on two streets. The rows of Victor dogs in the windows show the extent of it. The Victrola electric sign is not as prone to partiality as would seem, as it says "Grafonolas" on the other side. The store is a

deep one as well as a wide one, extending back 100 feet from the street. The entire basement has been divided into demonstrating rooms. Only two years and a half have passed since it was established, and its growth has been truly wonderful. It caters to a very high class of trade. This is what made the automobile necessary. Regular patrons 'phone their orders for records. Each day these orders are routed and filled in the same manner big mercantile houses handle their various lines of goods. The records are sent on approval, selections to be made within twenty-four hours. This system has made the record end of the business very profitable for the Strasburg Co.

The extension of the number of Detroit accounts seems to have ceased for the time being. The city is about as well covered as it can be, though incipient outlying business districts soon will open up new fields for agencies.

NEW EDISON AGENTS APPOINTED

In Various Points Adjacent to New York City—Edison Output Grows.

Thomas A. Edison, Inc., is continuing to add many new names to its already extensive lists of Edison disc dealers in near-by territory. During the past month a number of live-wire dealers arranged to handle Edison disc machines and records, including the following: W. B. Thompson, Port Richmond, S. I.; Louis Barg, Bay Ridge, Brooklyn; and Dutcher Bros., Nyack, N. Y.

All of these new representatives are enthusiastic admirers of the Edison disc product, and are planning to conduct their Edison departments on lines entirely in keeping with the musical value of the Edison disc machines and records. These products are increasing in popularity rapidly.

LOSS BY FRAUDULENT FAILURES.

Statistics show that manufacturers and jobbers lost more than \$2,000,000 last year in questionable, if not fraudulent failures. This loss has shown such a marked increase each year that the National Association of Credit Men and other organizations undertook the work of investigating many of these failures with the view of punishing the guilty, as a warning to others inclined in that direction, and thereby stop the growth of the losses on this account and get them back to a nominal figure. That this work has been successful is evidenced by the fact that only a few months ago a gang engaged in this work on a large scale, with headquarters in St. Louis and branches in five other large cities extending as far East as Baltimore, were rounded up through the work of these associations and convicted. The evidence showed that the gang in six or seven months prior to their apprehension defrauded creditors out of more than a half million dollars. These prosecutions also will tend to benefit the small, honest retailer in more ways than one. So society generally will be benefited by reducing this practice to the minimum, or stopping it entirely, if possible. Wide publicity by newspapers of such prosecutions is the best means possible for educating those inclined to this practice of the folly of their ideas.

(Special to The Talking Machine World.)

WASHINGTON, D. C., June 8.—PHONOGRAPHIC DOLL.—William Rotter and Richard S. Arthur, Newark, N. J. Said Arthur assignor to said Rotter. Patent No. 1,097,771.

The objects of this invention are to provide a doll in which sound reproducing apparatus is arranged so that the doll will appear to talk; to obtain the issuance of sound from the proper part of the doll's body; to enable the sound reproducing apparatus to be conveniently operated and controlled, and records to be readily and easily changed; to arrange the parts of the apparatus so that they will not be easily tampered with; to provide means for retaining the record drum in idle position to receive the thrust required to insert a record; to provide improved means for releasing the feed nut from the thread bar when the record has been played; to provide improved means for returning the record to its initial position after having been played and the feed nut removed; to

provide means for positively removing the sapphire from the record during the return of the record to initial position; to maintain the feed nut in true relation to the thread bar; to secure simplicity of construction and operation, and to obtain other advantages and results as may be brought out in the following description.

Referring to the accompanying drawings, in which like numerals of reference indicate the same parts throughout the several views, Fig. 1 is a central sectional view through a doll, looking from the back toward the front of the same, and showing our improved mechanism mounted therein;

Fig. 2 is a view of said mechanism from the front with the doll body removed; Fig. 3 is a top view of the same; Fig. 4 is a view similar to Fig. 2, showing the operating lever partly depressed; Fig. 5 is a sectional view on line A—A of Fig. 4 looking down; Fig. 6 is a view similar to Fig. 2 showing a modified construction with a detent for holding certain levers while the record is being played; Fig. 7 is a similar view showing said levers engaged by the detent; Fig. 8 is an elevation looking from the right hand side of Fig. 6; Fig. 9 is a vertical sectional view taken on line B—B of Fig. 6; Fig. 10 is a perspective view of the detent for retaining said levers; Fig. 11 is a perspective view of the arm for raising the reproducer; Fig. 12 is a perspective view of the feed nut and its attached brake; Fig. 13 is a perspective view of a certain raising lever, and Fig. 14 is a similar perspective view of a locking lever.

DIAPHRAGM FOR PHONOGRAPH SOUND-BOXES.—Peter Weber, Orange, N. J. Patent No. 1,098,340.

This invention relates to diaphragms and has for its object the provision of a central stiff vibrating zone surrounded by an elastic, flexible, annular zone, and it has for its object the preservation of the clearness and distinctness of sound transmitted by the diaphragm as well as the obviation of the deflection of sound waves and their consequent interference with one another.

It also has for a further object the provision of means whereby the diaphragm may be properly centered within the sound box without contact with the metallic portions thereof.

These and other objects will appear from the following detailed description taken in connection with the accompanying drawing, wherein—

Fig. 1 illustrates a plan view of this improved diaphragm. Fig. 2 is a central or diametrical section of the diaphragm. Fig. 3 is a vertical section through a sound box showing the improved diaphragm in position.

HORN-SUPPORT.—Pliny Catucci, Newark, N. J. Assignor to A. F. Meisselbach & Bro. Patent No. 1,098,313.

The object of this invention is to provide a rigid, substantial support, to be secured to the motor plate of a phonograph, for carrying the amplifying horn, and also for supporting the sound box in a position adjacent the sound record to be played upon the instrument.

In the design patent No. 41,499 dated June 20, 1911, the inventor has shown substantially the same form of structure, and in his patent application

filed May 29, 1911, Ser. No. 630,170, he has shown similar horn supports, specially adapted to the purposes disclosed therein, and my present application may be considered a division of said application so far as it relates to common subject matter.

In the accompanying drawing Fig. 1 is a side elevation of the support. Fig. 2 is a front elevation. Fig. 3 is a plan view. Fig. 4 is a sectional view taken on line 4—4 of Fig. 2. Fig. 5 is a side elevation showing the support in connection with a well known form of horn.

PHONOGRAPH.—Charles S. Osborne, West Orange, N. J. Assignor, by mesne assignments, to New Jersey Patent Co., West Orange, N. J. Patent No. 1,097,987.

This invention relates to phonographs, particularly those adapted for commercial purposes, al-

though obviously its use is not limited to machines of this type.

In transcribing a commercial record the transcriber frequently finds it necessary to repeat a portion of the record. It has accordingly been customary to provide commercial phonographs with mechanism whereby the carrier arm supporting the reproducer may be stepped in a rearward direction along the record as shown, for example, in U. S. Patent No. 847,631, granted on March 19, 1907, to E. L. Aiken. With devices of this character, however, as heretofore known and constructed, it has been impossible to place the controlling member for

the repeating mechanism in a convenient position for actuation by the transcriber while operating the typewriting machine.

The principal object of the present invention is to obviate this difficulty by providing means whereby the carrier arm may be readily raised and stepped in a rearward direction from a point in proximity to the keyboard of the typewriter or from any other desired point.

The invention also comprises certain other details of construction which will be hereinafter more fully set forth.

Referring to the accompanying drawing in which like parts are designated by the same reference numerals, Fig. 1 is a plan view illustrating a phonograph located in proximity to the keyboard of the typewriter and embodying one form of the invention; Fig. 2 is an end elevation partly in section on the line 2—2 of Fig. 1; Figs. 3 and 4 are elevations illustrating details of construction; Fig. 5 is an end elevation of a modification; Fig. 6 is a plan view of a detail of construction employed in the modification shown in Fig. 5; and Fig. 7 is an elevation partly in section of another modification.

PHONOGRAPH-REPRODUCER.—Adolph F. Gall, West Orange, N. J. Assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 1,097,972.

This invention relates to phonograph reproducers of the Edison type in which a floating weight is

pivoted to the body of the reproducer, and the stylus is carried by a lever pivoted to the floating weight and connected to a reproducer diaphragm or other means for producing sound vibrations.

The invention has for its object the mounting of the said lever in such a way that the stylus shall be free to move up and down and also horizontally or laterally, but which mounting will not permit the stylus lever to move longitudinally or to turn about a longitudinal axis, whereby the stylus responds very readily to irregularities in the record groove, is adapted to track a record groove having a pitch as small as one two-hundredth of an inch or less, and produces at all times a loud and clear reproduction.

Reference is hereby made to the accompanying drawing of which

Fig. 1 is a central vertical section of a phonograph reproducer constructed in accordance with this invention; Fig. 2 is a section on line 2—2 of Fig. 1; Figs. 3, 4 and 5 are similar views of modifications, and Fig. 6 is a section on line 6—6 of Fig. 5.

FLEXIBLE JOINT FOR THE TONE ARMS OF TALKING MACHINES.—Alex Fischer, Kensington, London, England. Patent No. 1,097,618.

This invention refers to flexible joints for the tone arms of talking machines and has for its object the removal of the tendency to bind, that in joints for which the inventor obtained Letters Patent No. 879,755 has been found to occur between the convex portion of the flange attached to the moving member and the concave portion of the flange attached to the fixed member.

The flexible joint made according to the present invention comprises as in the previous case, two members, a fixed member in connection with the trumpet and a movable member in connection with the tone arm, but in place of providing curved flanges with their center of curvature on the same side of the joint as the moving member, the inventor provides a flange in connection with one of the members which flange is curved and has the center of curvature located on the same side of the joint as the fixed member, the other member being provided with a bearing surface corresponding to and concentric with the aforesaid flange and being in addition provided with parts extending beyond and around the edge of the flange carrying means coming on the other side of the flange to keep the flange and the corresponding surface in contact.

In one way of carrying out the present invention,

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 56).

in place of providing a convex flange on the moving member coming between two flanges attached to the fixed member, the inventor provides the fixed member with a convex flange, such flange being convex at the outer and concave at the inner surface, the curvatures being both struck from the same center and also provides the moving member, that is, the tone arm, with two flanges curved so as to correspond to the inner and outer surfaces of the aforesaid fixed member and connected together so as to form a species of cap. The moving member is thus supported by the two flanges attached to it and enabled to move in conformity with the convex flange of the fixed member.

There may either be two flanges attached to the moving member coming directly into contact with the convex flange attached to the fixed member in a manner analogous to that described and shown in connection with Fig. 3 of the aforesaid specification, or balls may be employed coming between any of the bearing surfaces either resting directly upon

such surfaces or working in grooves therein. Where it is desired to adjust the balls screws are provided coming at the back of the balls, which screws pass through the cap. The directions in which the holes or grooves for the reception of the balls should be drilled shall be radial with respect to the center of rotation of the joint.

In another way of carrying out the invention the moving member is provided with a flange and the fixed member with two flanges forming a species of cap. In this case the center of curvature is on the trumpet side of the joint, corresponding alterations being made in the rest of the construction.

Fig. 1 shows side elevation of one form of the joint; Fig. 2 shows same in vertical longitudinal section; Fig. 3 shows similar view to Fig. 2, but with the moving member in its extreme position. Fig. 4 shows plan of Fig. 1. Fig. 5 shows plan of Fig. 2 with a portion cut by the line A B Fig. 2 in section. Fig. 6 shows sectional elevation similar to Fig. 2 of another form of the invention. Fig. 7 shows plan of a detail. Fig. 8 is a diagram of the essential features of the invention.

REPRODUCER FOR TALKING MACHINES.—Clinton E. Woods, Bridgeport, Conn. Assignor to American Graphophone Co. Patent No. 1,096,661.

This invention relates to reproducers for talking machines, and while the invention in some of its phases is applicable to the reproduction of either the vertically undulating or the laterally undulating style of record, the greatest benefits through its use are secured in connection with the laterally undulating or zig-zag form of record groove.

In many records there are portions in which the amplitude of vibration of the recorded sound greatly exceeds that of the main body of the record. So also in some records the amplitudes of the vibrations of the record taken as a whole greatly exceed those of other records in which the amplitude is comparatively small. Little difficulty is experienced in reproducing the sounds represented by the undulations of minute or of the average amplitude of vibration, but when the stylus bar is actuated by the undulations of great amplitude a sudden blow is struck upon the diaphragm, producing harsh and disagreeable reproductions, commonly referred to in the art as "blasts," and it is one of the objects of the present invention to provide a reproducer which shall avoid the "blasts" or harsh and foreign noises referred to. This is accomplished in the present invention by providing a connection between the stylus bar and the diaphragm which shall be sufficiently rigid and unyielding to transmit all of the smaller or more minute vibrations from the record to the diaphragm undiminished, which connection, however, is slightly yielding in character under the influence of a sudden or harder blow

which would be transmitted as the result of the stylus of the reproducer being actuated by the undulations of great amplitude. The result of this construction is that the blow which would be imparted to the diaphragm by the undulations of great amplitude is cushioned, thereby softening down the resultant note in reproduction, and avoiding the "blast" or harsh and foreign noise heretofore resulting from this cause.

It has heretofore been proposed in reproducers for talking machines to employ a diaphragm of metal, such as aluminum, having annular corrugations on the central portion of the diaphragm with radial corrugations extending from the annular corrugations out toward the periphery of the diaphragm. Such diaphragm, when made of aluminum, possesses many superior and desirable qualities, but it has been found that in actual practice it is liable to become buckled, thus materially lessening the fine qualities of the reproducer.

A further object, therefore, of the present invention is to provide means whereby the buckling of such diaphragm may be avoided and its fine qualities preserved.

In its preferred form, therefore, the invention consists of a metallic diaphragm, preferably of aluminum, having an axial opening of some considerable extent, preferably from three-eighths to one-half inch in diameter, surrounding which opening there is a plurality of annular corrugations on the central portion of the diaphragm with radial corrugations extending from the annular corrugations outward toward the periphery of the diaphragm. Secured over the axial opening is a cork disc which is much thicker than the diaphragm itself and of a diameter approximating that of the outer annular corrugation, the cork disc being secured to the diaphragm in any suitable way, as by cement. The end of the stylus bar opposite the stylus proper is connected preferably to the center of this cork disc, and the diaphragm is mounted in a suitable frame or box of metal between cork gaskets, the whole being held in place in any suitable manner, as by an elastic split ring, whose outer

periphery enters an undercut groove in the walls of the diaphragm casing. If desired, the diaphragm may be, and preferably is, protected by a suitable shield or cover which likewise may be held in place by the split ring.

The inventive idea involved is capable of receiving a variety of mechanical expressions, one of which, for the purpose of illustrating the invention, is shown in the accompanying drawings, but it is to be expressly understood that such drawings are for the purpose of illustration only, and are not designed to define the limits of the invention, reference being had to the claims for this purpose.

In the drawings Fig. 1 is a perspective view of the reproducer mounted in position on the end of a suitable tone arm; Fig. 2 is a central sectional view on the line 2-2 of Fig. 1; Fig. 3 is a perspective view of the diaphragm, cork disc, and the stylus bar separated from the sound box or casing. Fig. 4 is a plan view of the diaphragm alone.

METHOD OF MAKING ACOUSTIC DIAPHRAGMS.—William W. Young, Agavam, Mass. Assignor by mesne assignments to Lucy A. Young. Patent No. 1,097,499.

This invention relates to improvements in methods of making acoustic diaphragms for talking machines, telephones and the like, and consists broadly and generally in roughening or indenting one or both surfaces or faces of a diaphragmal member and applying thereto a compound, emulsion, solution, or mixture which is capable of hardening and forming a coating and of permanently uniting with said member, as hereinafter set forth.

The object of the invention is to produce an acoustic diaphragm, of the class mentioned above, which possesses superlatively in addition to the ab-

solutely essential the otherwise desirable and long sought characteristics and qualities of a device of this kind, among which characteristics and qualities mention may be made here of durability and stability, resiliency and resonance, capability of giving out clear, loud and distinct tones of great volume and depth, and of evenly distributing the sound

waves and immunity from blasts and scratching sounds and other alien and discordant noises.

Other objects will appear in the course of the following description.

A diaphragm constructed in accordance with the method broadly and generally outlined above may be improved for some and probably many purposes by perforating it and transforming the perforations or perforated parts into lesser diaphragms, or even by perforating and leaving the perforations open, as will be subsequently explained.

In the accompanying drawings, which form part of this application and in which like characters of reference indicate like parts throughout the several views, Fig. 1 is a face view of an imperforate diaphragm, and Fig. 2 a similar view of a perforated diaphragm, both made in accordance with this method; Figs. 3, 4 and 5 each a face view of a diaphragm including some form of the lesser-diaphragmal feature and made in accordance with said method, and Fig. 6 a face view of a diaphragm produced in the same manner as the others, except that it is checked instead of pitted.

ONE STYLE OF FIBRE NEEDLES.

The Victor Talking Machine Co. sent out last week the following letter announcing the discontinuance of one of the styles of its fibre needles:

"Our experience has shown us that it is unnecessary to market two styles of fibre needles. This seems to be the judgment of the trade also, as our sales have run mainly to the No. 1 size.

"We will, therefore, no longer supply the No. 2 Victor fibre needles, but will continue to furnish the No. 1 in envelopes of 100 and cartons of 250 at the established prices. All orders on file with us for the No. 2 will be canceled, and we suggest that you place your additional orders for the No. 1 needle accordingly."

An ounce of prevention may be worth a pound of cure, but it is just as well to be supplied with a little of both.

NEW YORK'S NEW TRADE MARK.

Merchants' Association of New York Announces Prize Award for Suitable City Emblem to Be Used by All Shippers—Many Designs Submitted in Contest—Other Cities Have Emblems—A Handsome Design.

New York now has her own trade-mark, designed so that the products of Gotham that find their way throughout the world may carry an advertisement of the city and thus emphasize the commercial importance. The new city emblem was evolved by the Merchants' Association after a prize competition in which a large number of drawings were submitted. It is a circular design, showing a three-quarter view of the Statue of Liberty upon its pedestal, thrown into relief against a background displaying the harbor and shipping and a typical portion of the skyline of lower Manhattan, with the name "New York" above. The design lends itself admirably to reproduction either in colors, in half-tone, in line drawing, or as a stencil.

COPYRIGHT, 1914 THE MERCHANTS' ASSOCIATION OF NEW YORK

The emblem was announced at the dinner given by the members' council of the Merchants' Association for the sons of members at the Waldorf-Astoria on Tuesday of this week.

The competition which resulted in the production of the emblem was inaugurated by the Merchants' Association several months ago. Its terms provided for a prize of \$150 for the most meritorious design, and a second prize of \$50 for the design which was judged to be next in merit.

The first prize was won by David B. Hills, of Brooklyn. Mr. Hills is a student in the Art Students' League of New York, and is employed by the Iron Age. He has won several other competitions.

The second prize was awarded to Raphael Beck, of Buffalo, an artist who holds prizes awarded to him at several expositions.

When the contest closed 248 designs had been submitted from all over the country. The designs offered a great variety of treatment and of artistic merit, some of them being only rough sketches to serve as suggestions, while others were elaborately worked out.

In making the award it was necessary to take into consideration the adaptability of each design for reproduction as a stencil, as well as for printing in black and white or in colors. This eliminated many meritorious designs which were too elaborate for reproduction to stencil form.

It is the intention of the association that merchants and manufacturers who ship goods from New York to all parts of the country shall attach to each package shipped a reproduction of the design in the form of a paster, stencil, tag, or in any other form that the shipper may prefer. In this manner the immense volume of merchandise which goes out annually from this city will advertise New York's supremacy as a commercial center all over the world.

The design has been copyrighted by the Merchants' Association as a precautionary measure. Permission to use it will gladly be given to merchants, manufacturers and others upon application to the association.

Most other cities already have commercial emblems which are used for advertising purposes, but no such emblem has heretofore been adopted by New York.

READE your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

The best-known trade mark in the world

"The Victor talking machine's design, 'His Master's Voice,' has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world's great masterpieces"—*Collier's Weekly*.

The Pathéscope and Motion Pictures

Were the Great Features of the Jobbers' Convention at Atlantic City

The Pathéscope was Demonstrated and Universally Endorsed as

The Companion Entertainer to the Talking Machine

Pathéscope Motion Pictures taken of the jobbers at the Chalfonte, on the Boardwalk, and Tangoing on the Beach, can be seen at the Pathéscope Salon, Aeolian Hall. Copies of this film furnished gratuitously to Pathéscope dealers requesting them.

Phonographs and Pathéscopes Combine Music and Movies

A heart to heart Talk with the Dealer in Talking Machines.

Wherein is suggested an opportunity for making two sales grow where only one grew before

YOU, as a Dealer in Talking-Machines, have helped to bring to the homes of an enormous public the opportunity of enjoying all kinds of music, ranging from the vaudeville parody to grand opera scores of the world's greatest composers.

The Motion Picture has made it possible for this same public to enjoy all kinds of acting, from poor comedy to the master-pieces of the world's greatest dramatists, but heretofore only in the Theatre.

Probably you have felt the competition of the Motion Picture Show as a rival Entertainment to the Talking Machine.

Instead of buying new machines or more records, thousands of people, with money to spend for Entertainment or Amusement, are yielding to the fascination of the Motion Picture.

Instead of losing business by the competition of Music and Movies, why not increase your business by their combination?

The First Safe, Simple and Perfect Home Motion Picture Machine.

THE PATHÉSCOPE

YOU CAN!!

The Talking-Machine and the Motion Picture Machine should go together and give the owner of both the fullest measure of Entertainment and Amusement.

You, as a Talking-Machine Dealer, are the logical distributor

of the Home Motion Picture Machine. In Europe, where the Art of Cinematography is far more advanced than in this country, the great firm of **Pathé Frères** (Capital 30,000,000 Francs), has been working for years perfecting the *Pathéscope*.

In its simplest form it requires no electric connections whatever. The simple act of turning the handle actuates the film, generates its own (incandescent) electric light and protects the picture in **living, fascinating motion on the screen.**

Other models take current from an ordinary electric light socket, project a larger picture, and require no cranking.

These instruments are a marvel of mechanical construction, combining a beauty of finish with a perfection of operation that create the greatest enthusiasm and delighted amazement wherever shown.

The use of a special, narrow-width, **non-inflammable film** insures absolute safety, without fire risk, or insurance restrictions. In this respect the *Pathéscope* stands unique and alone. The only instrument and film **approved by the National Board of Fire Underwriters.**

The owner of a *Pathéscope* may exchange his Reels as often as desired by the payment of a small fee to the *Pathéscope* Film Exchanges.

Progressive Dealers can readily see that a new field of profitable opportunity awaits development.

Every customer who has bought a good Talking-Machine, or Player-Piano, is a prospective purchaser of a *Pathéscope* in addition.

You don't have to develop new clients constantly as you do in your sale of Musical Instruments. You can commercialize the good will of your old customers and increase their appreciation by selling them a *Pathéscope*. Double your volume of business and, without a corresponding increase in your rent, or overhead expenses, **you may triple or quadruple your net profits.**

Why not investigate the profitable possibilities in owning a local Film Exchange?

BIG COLUMBIA DEPARTMENT.

Western Fancy Dry Goods Co., Sole Distributors for Columbia Products in Large Section of Western Canada, Opens Separate Quarters for Department Under Management of Robert Shaw Assisted by Competent Staff.

(Special to The Talking Machine World.)

WINNIPEG, MAN., July 3.—The Western Fancy Dry Goods Co., sole distributor for the Columbia Graphophone Co. for the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, has made special preparations to take care of the rapid increase in the business in that department, which has been located in special quarters in the Gowans Kent building, this city, and placed under the direct management of Robert Shaw. Mr. Shaw is an aggressive and thoroughly experienced talking machine man and a Columbia enthusiast, and is well known to the trade in the States owing to his having attended several of the conventions of the National Association of Talking Machine Jobbers.

Mr. Shaw has brought together an increased staff of assistants and has started a live campaign in favor of the Columbia line among the trade in Western Canada, and in which strong letters and bulletins are proving big factors.

VICTOR MUSIC, FOR DANCING. A HIT.

Exhibition of Dances to Victor Music in Store of Southern California Music Co. Attracts Large and Enthusiastic Crowd.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., July 4.—Demonstrating the practicability of the modern talking machine as a desirable instrument for furnishing the latest dance music, more than 300 visitors yesterday enjoyed the exhibition given by Miss Norma Gould, assisted by Erwin Volze, at the store of the Southern California Music Co. and declared it an unqualified success.

The initial exhibition proved so popular that the company has decided to give instructions and demonstrations each Tuesday and Friday from 2 until 4 o'clock, and invites the public to participate.

WILLSON INTERVIEW FEATURED.

The greatly increased demand for talking machines and records due to the present dancing craze formed the subject of a lengthy and interesting article which appeared in the New York Tribune of June 21. A reporter for that paper visited the headquarters of the Columbia Graphophone Co., and in a chat with H. L. Willson, assistant general manager, he referred to the development of the business and its varied aspects in a most comprehensive way. The interview was most readable and informing to that section of the general public which has not kept in touch with the remarkable growth of the business of the Columbia Graphophone Co. and the expansion of the talking machine business generally.

GLOBE TROTTER GRAHAM.

A line from Jake Graham, the globe trotter, from Melbourne, Australia, says, according to his version, the dealers in Auckland, New Zealand, and in Melbourne lack the progressiveness of the American and English dealers. Mr. Graham sends kindly remembrances to all of his American friends.

VICTROLA WITH THE ORGAN.

Charles H. Demorest gave a novel program on the organ in Tally's Broadway Theater in Los Angeles, recently in which the Victrola was used with organ accompaniment in Leoncavallo's arioso from "I Pagliacci," sung by Caruso, and in John McCormack's singing of Marshall's "I Hear You Calling Me."

SELECTING THE CHORUS GIRL.

Using the Phonograph for Tests of Voice—How the Record Is Replacing the Army of Stage Struck Girls in Managers' Offices.

There will be a visible decrease in the size of the army of stage struck girls who invade Broadway this summer.

R. H. Burnside and Bruce Edwards, Charles Dillingham executives, are busy listening to a phonograph in the Globe Theater these days. They are picking chorus girls from records which have been sent to them.

In order to get a wider selection than heretofore, Mr. Dillingham recently announced that any girl

How the Artist Pictures Present Conditions.

who was ambitious or crazy to go on the stage could go to the nearest phonograph store, make a record of her voice, and send it, together with her photograph to his office.

"We have discovered three remarkable voices possessed by beautiful girls, if the photographs submitted are their own," said Mr. Burnside recently. "We have sent for these young women, and if they are what we think they are, they will be members of one of our companies next fall. From the number of records and photographs which we are receiving, I believe we can announce a canned peach chorus for next season."

E. BLOUT ENLARGES QUARTERS.

Prominent Victor Distributer and Dealer Installs Series of Demonstration Booths in Store Adjoining Present Quarters—Handles High Class of Trade in His Territory.

Emanuel Blout, the prominent Victor distributor of 2799 Broadway, New York, who does a large and growing retail business in the exclusive residence section in which he is located, has found it necessary to secure the store immediately south of his present quarters on Broadway for the housing of additional demonstration booths to the number of five, making twelve booths in all now in service. The booths are enclosed in plate glass, and the wood work is finished in a rich shade of light gray with just enough decoration to make it attractive.

Mr. Blout enjoys a strong demand for the higher priced types of Victrolas and the records of the Red Seal quality from his retail customers. The record racks in the basement have also been increased in number and the facilities for handling both machines and records greatly improved. An automobile delivery service, with uniformed attendants is also an attractive and convenient feature of the Blout system. A storage warehouse in 110th street takes care of reserve and surplus stocks of machines and records.

It is well to remember that a fifteen-foot diameter balloon holding hundreds of thousands of cubic feet of gas can be punctured by a ten-cent pocketknife.

TO HEAR OPERA STARS IN ADVANCE.

Patrons of Grand Opera in Baltimore to Listen to Records Made by New Opera Singers Before the Season Opens in that City.

(Special to The Talking Machine World.)

BALTIMORE, MD., July 3.—At a conference between Bernard Ulrich, general manager of the Chicago Grand Opera Co., and Wilbur F. Kinsey, manager of the Lyric, last week, it was tentatively agreed that early in the fall the patrons of the grand opera will be invited to the assembly hall of the Lyric to hear the new opera stars, who will appear here this coming winter, on the phonograph.

The records have never been played in America, and both men think that the plan is a good one.

MUSIC MAKES BETTER RACE HORSES

Particularly Ragtime Soothes Equine Nerves, Says Trainer Who Uses Talking Machine.

(Special to The Talking Machine World.)

CINCINNATI, O., July 3.—Bill Perkins, noted horse trainer, is a believer in music to soothe nervous racers.

Perkins is at the Latonia race course, and has installed a talking machine in his stable. The stable hands have been working it overtime. The trainer says there is nothing like music to quiet a nervous horse just before it goes to the post or returns from a race. He says the animals prefer ragtime.

Perkins thinks he has solved a great problem. Nervousness is characteristic of the thoroughbred, something trainers have been unable to cure. Perkins believes his idea in soothing strained nerves with music may mean an evolution of training methods. Already his innovation is working wonders, he says.

DEATH OF ADEMOR M. PETIT.

(Special to The Talking Machine World.)

WEST ORANGE, N. J., July 2.—The friends of Ademor M. Petit will be sorry to learn of his sudden death, which occurred in this town last week. Mr. Petit at one time worked in the laboratory of Thomas A. Edison, Inc., and later conducted a business in Baltimore. During the past few years he was not connected with any concern and carried on experimental work for the manufacture of talking machines. He had invented parts of some of these machines. His inability to sell a few recent inventions, among them a process for manufacturing chewing gum, resulted in periods of melancholia.

The deceased was born in Canada some forty-eight years ago, and had made his home for about twenty years in West Orange. Besides his widow and daughter he is survived by two brothers and a sister.

BUY BUILDING IN MERIDIAN.

(Special to The Talking Machine World.)

MERIDIAN, MISS., July 3.—The A. Gressert Music House, which handles the Victor and Edison lines of machines and records in this territory with great success, has just secured what is known as the Wagner property, adjoining the Citizens' Bank building, this city, and at the expiration of present leases will remodel and occupy the entire building. The consideration was \$21,000. The Gressert Music House owns the property on Fifth street it occupies at present, and which it will occupy until the new store is ready.

SUCCESSFUL SELLING FORCE.

Says a merchant of wide experience: The successful selling forces of to-day are made up of men who can think and who do think, and men who can be relied upon to do the right things at the right time; men who are always capable of taking advantage of any situation that may arise.

SUBSTANTIAL GAINS THE FIRST HALF OF THE YEAR

Reported by the Talking Machine Trade of San Francisco—General Outlook Most Pleasing—Eilers Planning Expansion—Sherman, Clay in Spokane—Columbia Co. to Make Records of Best Exposition Song—Interesting Budget of News from the Pacific Coast.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., July 3.—Talking machine interests in this city are fairly well pleased with the outcome of the first half of the year's business. In some instances the gains were hardly so large as were anticipated at the first of the year, but few complaints are being registered, as it is generally conceded by both wholesalers and retailers that talking machines have held their own better so far this year than most other lines of business, and now things seem to be taking a turn for the better all around, so no uneasiness is felt regarding the prospects for fall. Country trade is already showing the effects of the harvesting of bountiful crops, and activity is being resumed in all the principal underlying industries of this section. One effect of the rather quiet spring is that business men generally are conducting more active campaigns for summer trade than in former years. Heretofore summer dullness has been accepted as inevitable and dealers in most lines of business, including music houses, have relinquished their efforts noticeably during the vacation period, but this year various ways and means are being tried out to stimulate business during what is normally the quietest period of the year. In the talking machine quarters the extra exertion is making itself felt, as no falling off in sales of either records or machines has been noted the past month. Additions and improvements of talking machine departments continue in order along the coast. The past month two more firms have inaugurated extensive alterations at certain stores, which will give talking machines considerable more prominence.

Larger Department for Eilers.

Eilers Music House in this city, which has given but little attention to talking machines in the past, is installing a well equipped department, and is preparing to carry a large stock, including Victor, Columbia and Edison products. The new department is being fitted up on the main floor of the establishment, where four large soundproof demonstration rooms are provided, besides general display space. Additional space is also available on the floor above. H. P. Rothermel has been named manager of the department. He is well known to the Coast trade, and particularly in San Francisco, as this was his home until a few years ago, when he became identified with Eilers Music House in Portland. He expects to have his stock sufficiently complete to make a compre-

hensive showing by time the department is ready for use, which will be in about two weeks.

Modernizing Stores Everywhere.

(Sherman, Clay & Co., Coast distributors of Victor products, who have spent large sums of money in the last few years modernizing their stores in various Coast cities, with the result that they have a chain of stores which would do credit to any section of the country, are this summer making extensive improvements in their Spokane establishment. Heretofore they have occupied only one floor of the building in which they are located there, but in the future they will have the entire four-story and basement. The plans for the alterations in the structure amount practically to its rebuilding, and necessitates the removal of the business to temporary quarters while the work is in progress. All departments will benefit by the enlargement of the store and none more than the talking machine section. The retail department will be located on the ground floor, and quarters will be fitted up in the basement for the wholesale department. F. W. Stephenson, secretary of the company, visited the firm's interests in the Northwest the past month, and reports conditions improving in that section.

Substantial Gain for Wiley B. Allen Co.

J. J. Black, manager of the Wiley B. Allen department, reports sales for June showing a substantial gain over the corresponding period of last year. The demand for the smaller machines for vacation use was a feature of the month's business, but interest was not confined to the smaller outfits by any means. The new models X and XI Victrolas especially in fumed oak attracted very favorable attention. Clarence Anrys of the sales-force returned from the East recently after an enjoyable trip to the markets with his father, Frank Anrys, manager of the Allen Co. They combined business and pleasure, attending the national piano convention at New York, and visiting various factories with which the company does business. F. P. Corcoran and C. E. Edwards spent their June vacations in the Santa Cruz mountain district.

Visitors to Columbia Co.

The local headquarters of the Columbia Graphophone Co. were visited the past month by W. E. Henry, manager of the company's interests in Pittsburgh, and also by Chas. A. Prince, musical director of the Columbia Co. The latter is a native of San Francisco, and was visiting his

parents and renewing acquaintances in this city.

Records of Best Exposition Song.

An announcement published recently in one of the local daily papers has already brought many inquiries to the office of the Columbia Graphophone Co. It stated that the paper had arranged with the Columbia Graphophone Co., through the Pacific Coast manager, W. S. Gray, for the production and wide circulation of records containing the best exposition song composed by a California writer, the details of the contest to be announced later. Mr. Gray says there will be a substantial prize for the winner of the contest, and he thinks such a composition would do much to boost the Golden State and the exposition. In a telegram to Mr. Gray, Geo. W. Lyle, general manager of the Columbia Co., said: "Assure the Bulletin that our confidence in the musical ability of California authors is such that we pledge ourselves to make records of and widely advertise prize-winning song obtained through its contest."

Personals and Visitors.

C. P. LeRoy, traveling ambassador of this office of the Columbia Graphophone Co., was married here recently, and is now away on his honeymoon. Wholesale Manager F. R. Anglemeier says country business is keeping up in splendid shape, and he attributes much of the increasing interest in talking machines to the dance records, which he says are in demand everywhere.

Mr. Ridgeway, representing Lyon & Healy, Chicago, was a recent visitor to the Coast trade.

J. E. McCracken, representing the Pacific Phonograph Co., jobbers of Edison products, called on the trade in southern California the past month, and A. R. Pommer, head of the business, says he was successful in lining up several new accounts in that section.

HUSTLING BALTIMORE HOUSE.

Cohen & Hughes Have Developed a Thriving Jobbing Trade.

(Special to The Talking Machine World.)

BALTIMORE, MD., July 7.—Cohen & Hughes, the well-known Victor distributors, are splendidly located in this city, where they have superb facilities to take care of the jobbing trade. This firm is conceded to be one of the most progressive in this part of the country, and the talking machine dealers in Baltimore and contributory territory have found that their service is excellent. They carry a large stock of Victor talking machines, records and accessories of all kinds and make a specialty of filling orders with promptness.

In Baltimore this company stands admittedly high in business circles, and its enterprise has always been conducted along consistent and progressive lines.

The Success of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.
This admitted makes it important that you secure the best service obtainable.

NEW DEPARTMENT FOR ATLANTA.

Chamberlain-Johnson-DuBose Co. Opens New Parlors with Three Complete Lines of Products—T. F. DeLaney in Charge.

(Special to The Talking Machine World.)

ATLANTA, GA., July 8.—This month witnesses another entry into the hustling company of local talking machine dealers.

The Chamberlain-Johnson-DuBose Co., one of the oldest, largest and best-known department stores in the South has entered the talking machine game with the same thorough method that characterizes its business in other departments.

The firm has built five beautiful and commodious demonstration booths at the entrance to its furniture department on the first floor and have stocked a full line of Columbia, Victor and Sonora machines and records.

The new department is in charge of Thomas F. DeLaney, formerly with the Columbia Chambers street headquarters, and later manager of the talking machine department of Otto Wissner, Inc. Mr. DeLaney is a man of broad experience and sterling ability, and on this account, as well as by reason of his genial personality, is making friends and good business for his new connection.

Yes, it has been hot; no question about that, but not too hot for porch dances nor too hot for the enterprising talking machine dealer to make full capital of the public's amiable weakness in that direction.

Every one of Atlanta's six most select clubs has its talking machine and a full supply of dance records, and there is hardly a moment from sundown to midnight when they are not playing for some dancing party, large or small. This, of course, breeds an endless number of prospects for the dealer, and the various departments are showing almost mid-winter activity.

It is just as hard for a man to mend his ways as for a woman to patch up a quarrel.

IMMORAL RECORDS IN GERMANY.

Strong Effort Being Made to Stamp Out Evil in That Country—Record Censors Suggested as Solution of Difficulty.

The German trade press has lately devoted quite an amount of space to the immoral record question, which is evidently much more acute on the Continent than in this country. One of the subjects of legislation in the next Parliamentary session has reference to the suppression of immoral literature, and it is expected that records will be brought within this category. In view of this prospect the German trade has before it a suggestion to institute a voluntary censure committee, whose duty would be to adjudicate upon any new records the character of which might be called into question. There is some sort of law in existence, but it is not regarded as strong enough to meet the case. Although the confiscation of "questionable" records is not infrequent, they are still issued, doubtless unwittingly, having regard to the liberal temperament of the people. The trade now desires to avoid giving offense even to the most puritanical sect, and the best means to this end is the proper organization of a committee of representative men as record censors. The Phonographische Zeitschrift avers that the expenses of such a committee would be more than counterbalanced by the saving of the substantial costs involved by the confiscation of indecent records. It is on this very point, however, that the proposal hangs fire, for although many manufacturers recognize the advantage of it, they fear the cost of administration. But for protection's sake the gramophone trade is urged to solve the problem in the way suggested.

Judge Hand in the United States District Court last week confirmed a composition of Edwin F. Skinner, trading as the Schafford Album Co., 27 Walker street, New York, with creditors at twenty cents on the dollar.

BELIEVES IN WINDOW VALUE.

How the Wallace Co., of Pittsfield, Mass., Features the Columbia Line Which It Handles—Notable Artists Introduced.

The Wallace Co., of Pittsfield, Mass., which recently arranged to handle the products of the Columbia Graphophone Co., certainly has the correct idea of the value of attractive window displays, as the accompanying illustration evidences. The win-

Window Display of Wallace Co., Pittsfield.

dow shown herewith was the first display used by the company to feature its Columbia agency, and the excellent results achieved by the display have encouraged the Wallace Co. to plan other original and artistic windows for use throughout the year.

The featuring of various Columbia artists in this window display was one of the factors that contributed to the success of the window, as the personal element invariably attracts attention from passers-by, and particularly when the products are displayed for the first time in new quarters. The pleasing arrangement of the machines and records in this display is well worth commendation and notice.

Don't judge by appearances. The fellow who indulges in hot air usually lacks steam.

SEE HOW THE JOBBERS IN THE WORLD CAN SUPPLY YOUR WANTS.

MORE NEED OF CO-OPERATION.

The Final Settlement of the Rooney Bankruptcy Matter Serves to Illustrate the Value of Creditors Co-operating with One Another and Appointing a Receiver Who Is Interested in the Adjustment of the Bankrupt's Affairs.

Judge Hand last week confirmed a composition of John J. Rooney, a dealer in talking machines at 1983 Broadway, New York, with creditors at 33 1-3 cents on the dollar. The Rooney stock of machines and records was purchased from the receiver in bankruptcy some time ago by A. H. Mayers, of 790 Ninth avenue, New York.

The final settlement of this bankruptcy case serves to illustrate the value of creditors co-operating with one another, and of appointing as a receiver one who is actively interested in the successful adjustment of the bankrupt's affairs. In this case the principal creditors held a meeting as soon as the bankruptcy was an established fact, and as they realized that a business administration would be best given by someone experienced, J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, New York, and one of the largest creditors involved in the bankruptcy, was appointed receiver.

Mr. Blackman immediately took hold of the business, and conducted it for a short while in order to find out just how matters stood. Incidentally, in connection with his work as receiver, Mr. Blackman ascertained that there were further assets obtainable other than those outlined in the schedule. By careful work, which was due in a considerable measure to the co-operation of the principal creditors, the receiver was able to get the bankrupt to raise sufficient cash so that a compromise settlement was eventually obtained of 33 1-3 cents on the dollar, whereas under ordinary conditions, with legal matters interfering, a settlement of 15 per cent. would have been the maximum amount offered the creditors. Of course, it should be considered that Mr. Blackman saved the

creditors from \$600 to \$700, through his detailed knowledge of the business and by acting as receiver, as he asked no customary receiver's compensation, which is usually considerable.

When interviewed by a representative of The World regarding his connection with this case, Mr. Blackman remarked as follows: "My experience in this case has merely confirmed what I have always maintained, namely, that any dealer who is in financial troubles will find it advisable to get in touch with his creditors, and secure their co-operation and help, rather than hurry to the nearest attorney, who is not in a position to render him the assistance that his creditors can and are willing to offer.

"The dealer will often find that by securing the co-operation of his creditors he will be actually saved from bankruptcy instead of being plunged into it by hurrying for legal help. The people who have every reason to help the dealer in his financial troubles are his creditors, and even in this particular case we could have rendered the dealer valuable help if he had co-operated with us long ago."

TERRITORY MUCH ENLARGED.

Columbia Store in Spokane Now Has Western Half of Montana, Which with Eastern Washington and Northern Idaho Makes One of Best Working Territories in the Country.

(Special to The Talking Machine World.)

SPokane, WASH., July 3.—Willis S. Storms, local manager of the Columbia Graphophone Co., has just returned from a trip into Canada, where he visited the cities of Vancouver and Victoria. He found that while conditions in these cities are below normal the talking machine trade seems to be exceptionally active. T. A. Switzer, managing director of Fletcher Bros. in these cities, stated that their business had been very satisfactory. This firm are Columbia jobbers for British Columbia and report a big demand for the new Mignonette.

In a chat with Mr. Storms, he said: "We are preparing for the largest fall trade in our history. George W. Lyle, general manager of the business, has recently given us the western half of Montana, which territory was originally handled by the Sheuberg Drug Co., of Livingston. With this territory added to eastern Washington and northern Idaho, which we now control, we have one of the best territories in the United States in which to operate. It is safe to say that there are probably more goods in our line sold right in the State of Montana than in any other State in the Union. I expect to make an extended trip through Montana the latter part of August, calling upon the trade."

The local Columbia store has placed an order with the Curran Electric Sign Co., of Spokane, for a large electric sign, reading, "Columbia Gramophones." This will be one of the most attractive and largest signs in the city.

MUSIC SOOTHES HIS COWS.

Tunes from the Phonograph Also Make Them Give More Milk.

(Special to The Talking Machine World.)

MIDDLETOWN, N. Y., July 8.—Robert A. Harrat, a dairyman at Bloomingburg, near here, reports that he has installed a phonograph in his barn for use at milking time. The dairyman's object has been to increase the flow of milk from the cows through the playing of soothing melodies, and he declares that the experiment has fully equaled his expectations.

There has been a marked increase in the flow of milk and the cows appear to fully appreciate the music, as they are as gentle as lambs. Harrat claims that the average increase from each cow is about two quarts, and he believes that it will be still larger as the season advances.

I. W. Guisinger, a well-known piano dealer of Fayetteville, Ark., was a visitor to New York early in the month. While here Mr. Guisinger, who maintains a successful Victor department, spent some time at the headquarters of the New York Talking Machine Co., 81 Chambers street.

Twelve Years of Service Giving

That's our record.
We know the thing a dealer appreciates most is service—quick service.

The principal Victor dealers throughout Ohio "bank" on us to give them the goods—quick.

To be sure, at times we are short on goods, but who isn't?

What we have you get quick.

Just let us have that next order, please.

Permanency

Ever think how many things there are about an Edison Phonograph associated with the idea of permanency?

There's the permanent diamond point that has done away forever with the bother of changing needles. There's the Edison record, impervious to wear, practically indestructible, and there's the never changing efficiency of the motor. Above all, there's the permanency of the Edison Phonograph's tone quality that makes it the constant leader.

All these things mean the permanent enthusiasm of permanent customers. In

parasmodic sales to stray purchasers there's no profit to you. You want customers who will come back to you with new trade because they are convinced that the Edison Phonograph is the one instrument that they can go on enthusing over. You're after the type of customer who shares his enthusiasm with his friends, and who's interested in every phase of the phonograph's development.

To meet every demand of all sorts of customers it is necessary that you handle the full line of Edison Phonographs. It's no trouble to create the desire for an Edison Phonograph. The customer who hears a few records played inevitably and instantly acquires it. But you do not want to let that man go out of your store unsatisfied because he cannot find the type of instrument that he wants at the price he wants to pay.

We will gladly send you the name of the nearest jobber who will tell you about terms and prices.

TRADE ADVANCE IN OUAKER CITY

For the Six Months of 1914 Reported by Majority of Talking Machine Men—Preparing for Lively Fall—Wanamaker Department Enlarged—Attend Jobbers' Convention.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., July 9.—And still the business in Philadelphia is showing a substantial advance. During every one of the first six months of this year the Philadelphia dealers in talking machines have run considerably ahead of last year. The dealers are not so certain that this condition will continue, although naturally they are hoping for the best.

There is very little change in the situation here and no new dealers have entered the field. The firms all seem to be preparing for a hot fall campaign. The Edison proposition was sprung upon the dealers pretty late in the active season, and those who have taken that instrument are laying low, awaiting developments.

Wanamakers have made a great improvement in their talking machine department and have doubled their number of booths, which brings their Louis XIV room in the center of the department, and which they will hereafter use as a demonstration room for the general public. On the days following the arrival of the new Victor records this room is overcrowded with enthusiasts. They will not use all of the new rooms they have constructed for their talking machine department, but will devote several of them to small goods, which are now across the aisle on the same floor. They will go more extensively into the handling of such goods the coming active season. Both Manager Comerer and J. C. Angle attended the sessions at the Atlantic City convention this week.

All three members of the firm of H. A. Weymann & Son are at Atlantic City most of the week, and will be at Harry W. Weymann's cottage at Chelsea. The head of the firm reports that the talking machine business has been very active.

The past several weeks have been active at the Victor factory in Camden on account of the Lubin Co. taking moving pictures of the various departments, which were shown to the dealers during the convention. This exhibition was no doubt one of the features of the convention.

Connor & O'Neill report their business at 103 South Twelfth street has been keeping up very well. They are doing an exceptionally heavy repair and adjustment work, which is in charge of W. A. Sheppard, a man of wide experience.

Emil Bauer is continuing to act as special selling agent for the Keen-o-Phone talking machines, with offices at 214-18 South Twelfth street. He is disposing of all the stock still on hand.

Manager Eckhart, of the Pennsylvania Talking Machine Co., who has refurnished his private office, says he is very optimistic over the business situation and believes he is justified in getting ready for the biggest fall business his firm has ever had. He has been making a flying visit among

increased business, which affected its piano and talking machine departments to the extent that in the latter it sold more than double the number of machines it did during June of a year ago, and an even greater percentage of records.

Gimbels have their plans laid for an extensive enlargement of their talking machine department this fall.

NORTHERN OHIO DEALERS ORGANIZE.

Form Organization at Meeting Held in Cleveland and Elect Officers—Plan to Hold Monthly Meetings to Discuss Trade Promotion.

(Special to The Talking Machine World.)

CLEVELAND, O., July 8.—The Victor talking machine dealers of northern Ohio have organized an association, and held their first meeting in the Advertising Club rooms at the Hollenden Hotel, June 1. There were twenty of the local dealers and jobbers present. The following officers were elected: W. G. Bowie, president, of the B. Dreher's Sons Co.; O. E. Kellogg, vice-president, of the H. E. McMillin & Son Co.; G. F. Smith, secretary, of the Euclid Music Co., and R. W. Schirring, treasurer, of the Caldwell Piano Co. The executive committee consists of the officers and Phillip Dorn, of the Collister & Sayle Co.; P. J. Towell, of the Eclipse Musical Co., and James Card, of the W. H. Buescher & Sons Co. The association will meet the second Monday of each month and discuss plans for the promotion and elevation of trade interests, and for social intercourse.

Valabhdas Runchordas, of the Talking Machine & Indian Record Co., whose main office is in Bombay, India, sailed from that city recently for Europe. It is his intention to visit Switzerland, and from there he goes to London, Berlin, Hamburg and possibly New York. The Talking Machine & Indian Record Co. has built up a great business in India, and issues a lot of literature covering talking machines and records, which is published in English and in the native languages.

Keeps

You

'Satisfied

SERVICE

NEW YORK CITY

all of his dealers and is well satisfied with conditions as he found them. Mr. Eckhart is shaping matters so that he will be able to take a short trip to Europe at the end of July. One day early this week Mr. Eckhart was in Atlantic City assisting in the installation of the Columbia Grafonola at "The Garden of Dances," one of the greatest dance halls in America.

Louis Buehn has added another man, George L. Austin, to his Edison dictating machine department. He has done a heavy business in this department in June, having placed new machines with the Barber Asphalt Co., the Millville, N. J., Manufacturing Co., H. C. Kahn, the big instalment man; John T. Lewis Bros., R. G. Dun & Co., the Philadelphia Electric Co., the Lehigh Coal & Navigation Co. and the New England Cotton Co. Like the other firms here, Mr. Buehn notes a substantial increase in his talking machine department.

During June the Strawbridge & Clothier firm held its forty-sixth anniversary and advertised it heavily, and in consequence it had a greatly

Columbia dealers are holding a mid-summer Convention of their own, largely attended by people who have money to spend.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

**Columbia Graphophone Company

CLEVELAND DEALERS ARE REPLENISHING STOCKS.

Will Not Be Caught Napping the Coming Fall and Winter—Business, However, Not Quite as Brisk as Previous Months—W. H. Buescher & Sons Co. Lease Warerooms for Exclusive Jobbing Business—Masters of Dancing Praise the Columbia Grafonola.

(Special to The Talking Machine World.)

CLEVELAND, O., July 8.—There has been no material change in the talking machine trade in Cleveland during the past month. Business was not quite so brisk generally, but the volume was sufficient to keep the dealers busy and hopefully confident. Dealers are all putting forth efforts to increase business and are replenishing stocks to meet increasing demands. While there is still some complaint among Victor dealers, supplies are more readily obtained than heretofore, and there is a better feeling in the respect all around.

The W. H. Buescher & Sons Co. has leased a wareroom containing 11,000 square feet of space on Chestnut street, where an exclusive Victor jobbing store has been opened. The new store is one block from the present retail location. It has been fitted up in attractive style, with special facilities for handling the business expeditiously.

Warren L. Kellogg, traveling representative of the Victor Co., Camden, a brother of O. E. Kellogg, secretary of the H. E. McMillin & Son Co., was a visitor at the store recently.

F. D. Witt, of the Witt Music Co., at Lorain and Elyria, Columbia dealer, was a visitor at the local Columbia store this week. He said business was satisfactory and as good as expected at this season of the year. The following new Columbia dealers were scheduled at the local store the past month: W. H. Hetrick & Co., Oak Harbor, O.; J. V. Hartel, Barberton and Wadsworth, O.; Carnahan Music Store, Ravenna, O.

Notwithstanding the fact that weather conditions have been adverse, the business of the Grafonola Co. has far exceeded the expectations of Mr. Routh, who says he believes in going after outside business strong, and that even in the hottest weather, when people will not stir from their homes, they will buy if the goods are taken to them. An auto, he says, is of great assistance in cooling the customer off on a hot evening and putting him in a frame of mind to purchase a \$200 Grafonola when he contemplates an investment of a \$50 machine.

The Eclipse Musical Co., notwithstanding the slowing down in business, is doing nicely in both the wholesale and retail departments. Good sales of Victor machines are being made.

Phil Dorn, of the Collister & ayle Co., says business is good, considerably ahead of last year at this season, and that the prospects are flattering.

Manager Madson, of the Columbia store, was greatly pleased at the receipt of the following communication, dated Pittsburgh, Pa., June 15, 1914, and addressed to the Columbia Graphophone Co., Cleveland. It read:

"Gentlemen: At a regular meeting of the American National Association Masters of Dancing, in convention at the Hotel Statler, Cleveland, O., this convention highly indorses and recommends the

use of Columbia Grafonolas and Columbia dance records for the use of our members. Your records are played in perfect dance time and their reproduction by your instruments enables us to enthusiastically indorse your product for our use. Very truly yours, The American National Association Masters of Dancing, Thomas McDougall, Secretary."

The Phonograph Co. registered the usual quota of Edison business during the past month. Mr. Bloom, secretary, stated trade was moving briskly, about normal for the season. Retail dealers, he said, were doing well all along the line.

The H. E. McMillin & Son Co. has been making a number of improvements in the Victrola depart-

BUYING A RECORD.

An Experience Rather Familiar to Salesmen in the Talking Machine Store, but Which Is Interesting to the General Public.

He rushed into the talking machine department of the store about 5 o'clock in the afternoon and said to the young woman in charge:

"My wife told me to run in here and get a 12-inch record of—let me see; oh, what is it? Well, I can't remember it. I've got it written down somewhere. Just let me find it."

But a five minute search through his multitudinous pockets failed to find a trace of his memorandum, and he was much perturbed.

"She's got to have it to-night, too," he continued. "Lot of people coming to spend the evening. Very musical, too. They'll all want to hear this."

"Is it a song or an instrumental number?" helpfully asked the young woman.

"Blamed if I can tell you," rasped the customer, "and I've only ten minutes to get my car, too. Have to wait twenty minutes if I miss that one. Let's see. As near as I can remember it's something about pegs. I think I'd know it if I heard it. Pegs, I think it is. Yes, pegs. What have you got in fresh pegs, I mean just pegs?"

The nonplussed saleswoman thought a moment and suggested "Peg o' My Heart."

ment during the past month, but it evidently has not interfered with the demand for sales of Victors. Mr. Kellogg expressed himself pleased with the showing.

Mr. McNulty, of the Union Specialty & Plating Co., is a very happy man these days, owing to the fact that there is no let-up to the demand for Union talking machine specialties. He says everything is running nicely, and that the factory is kept busy continuously on its products.

Activity is manifest in the talking machine and music department of the Bailey Co., and Mr. Friedlander reports some excellent sales of machines and records during the past month.

The various members of the trade are all most optimistic regarding the prospects for the late summer and fall, and this is the report made by T. A. Davies, manager of the talking machine department of William Taylor, Son & Co.; R. W. Shirring, manager of the talking machine department of the Caldwell Piano Co.; the Euclid Music Co., W. H. Buescher & Sons Co. and H. M. Brainard Co.

"No, that isn't it," fumed the little man, "nothin' as sensible as that. I'd 'a' remembered that."

"Well, perhaps it's a violin solo of Paganini's." "Nope. You're nearer, though. It's about as crazy as that. Try again."

"Well, we have a comic number called 'Peg Along;' could that be it?"

"Oh, no, no, no! That isn't it. It's something highfalutin."

"Well, it may not be peg at all. Might it not be nail, tack, screw or tie? How about 'Thais?'"

"Nothin' doin'. It's peg, as near as I could get it on the paper wife wrote out for me."

After another five minutes had been wasted the young woman had an inspiration. She handed him a catalog and said:

"Suppose you look over this; you may see it."

He grabbed it out of her extended hand, clapped a pair of eyeglasses upon his eyes, opened his mouth and was soon going down the list with an index finger. In a minute more he was pointing to the prologue from "Pagliacci," as sung by Scotti, and exclaiming:

"Here it is! Here it is! Didn't I tell you it looked something like peg? Get me one and wrap it up, quick. How much? Here you are, even change. Now give it to me and let me run. I'll make that car yet. And next time wife wants some of that dago canned stuff she can get it herself!"—The Sun.

NEW YORK, JULY 15, 1914.

THE 1914 Convention of the National Association of Talking Machine Jobbers is fully reported elsewhere in this publication, and unquestionably every member of the trade who journeyed to Atlantic City to attend the national meet felt more than repaid by what he heard and what he saw.

The members of the Committee of Arrangements certainly deserve credit for the excellent manner in which they worked out all the details in connection with the Convention program. They overlooked nothing which would make for the entertainment of the delegates, and certainly a record was established which will be difficult to overtop in future years.

The demonstration given by the Victor Talking Machine Co. by a series of moving pictures of the different departments of the Victor factory was a remarkable contribution to the entertainment of the Conventionists. Never before in the history of conventions have the selling forces of an industry been permitted to view in detail by a series of moving pictures an entire factory organization. At an expense of thousands of dollars the Victor directors presented an actual demonstration of the different departments of their enterprise. Even if all of the beholders had been permitted to view the factories individually they could hardly have gotten such a comprehensive idea of the entire manufacturing enterprise as was presented to them by the means of moving pictures at the Atlantic City Convention.

There are few manufacturing firms in the world, if any, who would have gone to such an expense in order to show the workings of their creative department to their representatives. The Victor Co., however, has never stopped at the cost of any enterprise which it deemed of benefit to its factors.

The inner glimpses of the Victor factory were entertaining and instructive, and needless to add, the social part of the Victor entertainment was along the same generous lines which has characterized the hospitality of the Victor officials on former occasions.

When you say that an entertainment was up to the Victor grade, it means that there was nothing left undone that could have added to the pleasure and comfort of the guests.

THERE is no denying the fact that the general business of the country is not up to grade.

There is no denying the fact that trade in all lines is suffering, and there is no denying the fact that this condition is not merely psychological. You cannot supply a man with psychological business and psychological money and help him out of a depressed condition when he wants actual trade and hard cash.

There is no denying the fact that the people as a whole are interested in seeing this country adjust itself to the present conditions before new and possibly indigestible laws are placed upon our statutes.

There is no denying the fact that the country as a whole will take an optimistic view of the business future if the politicians will only permit them an opportunity to do so.

There is no denying the fact that one of the best reasons for optimism at the present time is found in the promise of abundant crops.

There is no denying the fact that this condition will help immeasurably to pump new life into the dried arteries of trade.

The wealth of the harvest fields will soon be a powerful factor in aiding stagnant trade, but how about the talking machine business? That is of particular interest to World readers.

Talking machine dealers certainly rank among the most fortunate of all men engaged in trade, and, during the summer, which is admittedly dull, the talking machine institutions are busy.

And why?

Because the summer hotels, camping out parties, country clubs and yacht clubs are all purchasers of talking machines and records.

Now that all of the world is out of doors, all the world demands to be entertained, and the great big national entertainer is the talking machine.

It is surprising how the talking machine has superseded instrumental musicians in every way. Take the thousands of informal dances—it is the talking machine that supplies the music rather than some local orchestra. Now that the "thé dansant" has captured the world, the talking machine comes in as its chief accessory. Go out to almost any summer hotel and you will find not merely one little dancing party, but a number during the evening, and you will find the one source supplying the musical entertainment is the talking machine.

The unusual summer activity in talking machine circles is but a logical development of the tango spirit which has been pulsing through all America during the winter months. This is a spirit that the live talking machine dealers are profiting by. They realize the strength of their position and they are improving it as they should.

VACATION time makes the talking machine business good in every part of the country, and there is precisely where the men in the trade to which The World directly appeals are in an enviable position compared with the general merchant; but this business will not come to every man unless he improves his opportunities. That is hardly to be expected, but we are perfectly correct in saying that the talking machine dealer belongs to the trade elect more especially this summer than during any other. Instead of the season being a stagnant one, it should be particularly good, and it will be if the progressive element of the trade realizes what taking advantage of the tango, hesitation, maxixe, one-step condition means.

If every dealer would make a systematic campaign of his local territory—figure out the number of summer hotels, boarding houses, outdoor clubs and parties and canvass them, he would win profitable trade in return for his efforts. Get out attractive literature to the managers, show them how the talking machine will aid as an entertainer, that it should be a feature that they cannot overlook. Make all those points clear, not once but several times. In other words, improve the present opportunities to the utmost. Go at the development of summer trade with well directed effort, because to succeed even moderately well one must concentrate, and in that way direct results may be secured.

IT is useless to say that trade will come crowding in at your door, even if you have a most attractive proposition. To assume such a condition is to admit business defeat and to show incompetence.

The day of random effort is past. Definiteness and concentration make for the elimination of useless effort.

Concentrating your efforts intelligently upon the building up of the talking machine trade during the summer months will insure you success. It will stamp you as an efficient business man and show that you realize the trade possibilities of your profession.

Scan the history of the big and successful houses in this trade,

or in any other trade for that matter, and you will find invariably that they pursued a definite business policy—that they concentrated their efforts along certain lines until they succeeded, and then moved on to other points.

THE man who wins is the one who concentrates and who devotes himself to his work, and does not the talking machine with its wonderful entertainment possibilities come in as a rare trade stimulator during vacation?

Try concentrated action on the development of your summer trade. Get right down to brass tacks and make up your mind to do your work well.

Succeed! Of course, you will. But do not stop in thinking success—work for success. Keep at it and the results will astonish you.

Really the more one goes into the entertaining powers of the talking machine the more admiration must be developed for it, and right here is where salesmen could materially aid in building up their own income earning powers—if they would place a little more enthusiasm—ginger, if you will—into their work.

This can be accomplished by increasing their interest in the possibilities of the talking machine, not merely as a means to build an income for themselves, but as a means to entertain and charm purchasers.

It truly is a marvelous creation and the more you analyze it, the more you go into it, so much the more those essential features become impressed upon our being.

Develop new trade in hot weather? Of course, you can, and plenty of it.

EVERY talking machine dealer in these good old United States should read *The World*. Thousands of them do, and they secure from it pointers which are of value to them.

Live advertisers know that *The World* is read, and that as a business getter its power is growing all the while.

The progressive jobbers know that publicity in *The World* columns pays them and it keeps their business constantly before the dealers of their territory.

Here is a communication received from the manager of the Little One-der Co., of Nashville, Tenn., manufacturer of a recently perfected accessory. Under date of June 20 the manager writes to *The World*:

"During the last 20 years I have spent possibly millions of dollars in advertising in trade papers—more particularly in engineering papers, steel papers and those devoted to the coal industry. I have come across some good ones, but, speaking of trade papers, I want to tell you that *The Talking Machine World*, in my opinion, is the 'daddy' of them all.

"I got my copy last night, containing our advertisement, and, of course, there has hardly been time for your subscribers to read their copies and send a letter through the mails to reach here. Notwithstanding this fact, in this morning's mail we have four orders—which, I may say, is more than I got from all of my advertising in some of the big associated magazines and in some of the well-known weekly and monthly national magazines—the cost of advertising in same being an approximate total of \$200.

"I look upon this morning's mail as a beginning, and, if it keeps up this way, I don't know just where we will finish.

"Another thing, whereas the orders from the magazines are from consumers who order one attachment, your orders are from dealers who order in bulk.

"Needless to say, I want you to continue the advertisement—although the results are so good we do not seem to need any more advertising.

"This letter is quite unsolicited, and if you care to use it in advocating your magazine as the most successful medium for bringing quickly to dealers the merits of a new device, you are at perfect liberty to do so."

Get *The World* habit—it is good to have. J. H. Hoffay, London, writes: "I have received four hundred replies to a single advertisement in the *May World*."

These are just two of the many illustrations showing that *The World* as a stimulating power to trade is excellent. If you are a jobber be proud of your business, as you should be, represented in every issue of the one paper which fairly and thoroughly represents your trade.

DITSON Victor Service

Is Supreme in New England

Your first order will prove

Machines and Records.

OLIVER DITSON COMPANY
BOSTON, MASS.

THE DITSON BUILDING AT BOSTON.

We will help you make money in 33 languages

How many foreigners are there in your locality? Italian, Hungarian, German, Jewish, Bohemian, Russian, Swedish, Polish—or whatever their mother-tongue may be?

Do you realize how anxious they are to spend their money in your store?

Columbia Records—a splendid repertory in all of the following languages—and a correct catalog for each:

- | | |
|---------------|--------------------|
| Arabic-Syrian | Finnish |
| Armenian | French-Canadian |
| Bohemian | Gaelic |
| Chinese | German-Austrian |
| Cuban | Greek |
| Danish | Hawaiian |
| | Hebrew-Jewish |
| | Hungarian |
| | Italian-Neapolitan |
| | Japanese |
| | Javanese |
| | Lithuanian |
| | Mexican |
| | Norwegian |

| | Ruthenian |
| | Scotch |
| | Serbo-Croatian |
| | Slavish-(Krainer) |
| | Slovak |
| | Spanish |
| | Swedish |
| | Turkish |
| | Welsh |

YOU know well enough that music means ten times more to the foreigner in your town than to the American citizen. Especially the music of his own native land—and even more especially if it is sung by the best known artists and played by the best known instrumentalists of his own country—names as familiar to him as your own front door is to you.

We are now prepared not only with a remarkable series of records in 33 languages and dialects, but with the means of getting the business for you.

Our Foreign Record Department will co-operate with you to the limit; we can tell you very nearly how many foreigners there are in reach of your store—and we have a pretty clear idea of what language they speak, too. And we can tell you just how to go about bringing them in. It's the easiest thing in the world—once you have been put in touch with them they will come to you.

The Columbia repertory of foreign records is by far the biggest and best in every language. Most of them were recorded in Europe, and all of them are in the pure native language or dialect.

Good business in every month of the year—no dull summer months for you if you have this highly profitable foreign trade coming in. We can tell you how, and we can help you do it!

Write for particulars to the Foreign Record Department
102 West Thirty-Eighth Street, New York City

Graphophone Company, Woolworth Bldg., N. Y.

For every argument that might occur to you as to the wisdom of not carrying Columbia Grafonolas and Records along with competitive product we will show you a letter from a dealer who has gotten by the argument stage and has the proof right in his bankbook.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

TRADE NEWS FROM CINCINNATI.

Cable Company Installs Victrola Department—Leading Jobbers Report an Excellent Volume of June Business Despite Unusually Hot Weather—Second Hand Talking Machines Utilized for Children's Playgrounds.

(Special to The Talking Machine World.)

CINCINNATI, O., July 7.—One of the real surprises of the past month was the announcement that the Cable Company's branch in this city would soon have a Victrola department. In fact Wholesale Manager Summey is now looking for an enterprising manager, and is already figuring on letting contracts for a series of booths with a view of having these ready for business by August 1. Some stationery, calling attention to the new field of this piano house, has made its appearance.

Manager Rudolph Dittrich, of the talking machine department of the Rudolph Wurlitzer Co., left Thursday evening for Atlantic City, to take part in the annual meeting of the talking machine jobbers which opened Monday. Just before leaving, in speaking of the business in his department, he said:

"The month of June being one of the hottest and driest on record in Cincinnati, naturally did not show favorable conditions for the talking machine trade, but even with adverse conditions existing, we made a very creditable showing. With the people leaving in large numbers for summer resorts, and with the remaining number much interested in planning their vacations, there was comparatively very little opportunity of pushing the sale of Victor goods very extensively. The exception which the demand for small Victrolas created modified the conditions somewhat."

The new Victrolas, Styles Nos. 10 and 11, have been received and have made a great impression on the trade. There is no question but what these improvements will greatly increase the sales of these two popular types and that they will develop a field of their own without injuring to any great extent the sales of Victrolas Nos. 14 and 16.

The local Columbia store reports remarkably good business, both wholesale and retail, in June.

In speaking of the matter Manager Whelen said: "When you consider that it was June, we more than held our own and we anticipate a good summer business. We feel, considering what others say, that we are fortunate. The dance craze still continues and is an added stimulus to the summer business. We have had especially heavy calls for the new dance instruction records both retail and from the dealers.

"The exclusive engagement of Joan Sawyer, the famous dancing star, and her Persian Garden Orchestra brings another of the most famous dancers of the day into association with the Columbia Co., and her records have created quite a furore among the dance loving public."

Ben L. Brown, the assistant manager of the local Columbia store, was in New York the first of the month visiting the executive offices and making a tour of the factory at Bridgeport.

Cliff Herdman, formerly connected with the Columbia Graphophone store in this city, but now manager at St. Paul, Minn., spent ten days in Cincinnati renewing old acquaintances. Mr. Herdman was always a favorite and his visit was very much enjoyed by his former associates in the Cincinnati store.

J. D. Westervelt, supervisor of Dictaphone agencies made a flying trip to Cincinnati and left very well satisfied with the local Dictaphone situation.

The Lyric Piano Co. enjoyed a fairly good business last month. The Victrola department of the Otto Grau Piano Co. is now well established and has proven quite a success. Mr. Strief, manager of the Victrola department of the Milner Musical Co., is disposing of all second-hand talking machines of obsolete makes, but which are in good running condition and capable of making good music in an original and very useful manner. He is turning these machines over to the Board of Park Commissioners for use in the Children's Playgrounds. Cincinnati takes considerable pride in her splendid parks and playgrounds. A number of the playgrounds already have pianos and with a talking machine furnished by the Milner Musical Co. their equipment along the musical line will be complete.

Business with the Milner Musical Co. has been extremely satisfactory during the past month. Many small outfits are being sold to campers and to parties leaving the city for summer homes along the Great Lakes.

THE MAN WHO TOOK ADVICE.

The Merchant Who Actually Succeeded in Spite of the "Listen to Me Stuff."

Once upon a time (as all good fairy stories begin) there was a man who actually took advice. He was the joy and satisfaction of the entire neighborhood; and whenever any gabby resident of those parts ribbed up a lot of "now-listen-to-me" stuff, he knew that the man who lived in the little gray house on the corner would eat it up and ask for more.

The strange part of it was that after years of advice-taking the man in the gray house kept right on prospering. He didn't fail; he didn't go into the hands of a receiver; he didn't have to shoot his life insurance into a pawnshop in order to pull out a beefsteak, says the Whitaker Paper Co.'s Paragraph.

So one day the Curious Guy in the middle of the block spread his feet out, poked his finger at the prosperous man's middle vest button, and demanded:

"What's your recipe?"

To which the Prosperous Man replied promptly: "Why, I take everybody's advice. I've taken a lot of yours, if you must know. It's hard to do, but—"

The Wise Guy shook his head. "I never knew it to work before," said he in a whispered aside.

"But," continued the Prosperous Man, "I took your advice and the advice of everybody else and—coppered it—went the other way.

"Your advice is all in perfectly good condition, stored away down cellar; any time you want it, or any time any of my other good friends want it, it's yours for the asking. Perfectly good, unused, and worth exactly as much as the day it was given to me."

Moral—But all of us don't know when to play the red in place of the black!

Albums for Victor, Columbia and Edison Records

We are making the most complete line of record albums on the market, including the regular 16 or 17 pocket styles, and a new 12-pocket album, which adapts itself for use in the new cabinets with flat shelves.

The new album for Edison disc records is made with the same care and precision and of the same high-grade materials as our regular albums, except that it is spaced wider and has ten pockets.

No More Scratching of Cabinets and Tables

All our albums are equipped with the new LEATHER COVERED RING PULL, which makes the handling of the book easier than with the plain leather pull and has all the practical advantages of the metal ring.

MONTHLY TOTALS SHOW NO DULL TIMES IN ST. LOUIS

Despite Complaints in Other Lines—Collections Rather Slow, However, with Jobbing Trade—Those Who Attended Convention—Jobbers Benefiting from Package Car Service—Missouri Music Teachers Approve of Talking Machines—Columbia Co. News.

(Special to The Talking Machine World.)

St. Louis, Mo., July 8.—The talking machine dealers of this community are not complaining, although they have been hit somewhat by the dull business that appears to have pervaded all lines throughout the country, but they will make a better mark than they have in previous years in monthly totals, which they says is about all that they can expect. Advertising has been rather light of late and the very unseasonable hot weather that held this entire section of the country in such close grip for three weeks caused a let up in the very sharp demand for dance records. There was the usual sharp increase in record sales for the Fourth of July. The demand for the last few weeks has been running to rather smaller machines.

The jobbing trade reports rather slow collections, but that always is the case in this country during the season when farm work is especially heavy, as the banks are making unusual demands because of the country's need for money. Cash expenses keep the farmers from paying bills and the flow of cash through the regular channels is restricted, but the increase within a few weeks will soon even things up.

Orders are fairly plentiful and of fair volume despite the vacations everywhere and all jobbers report excellent prospects for new dealers in the early fall months.

Harry Levy, of the talking machine department of Aeolian Hall, was not able to get east for the Victor convention this year as he had hoped. He is getting well settled in his new jobbing quarters in the Furniture Exchange building and reports that business is running smoothly under the new arrangement.

E. C. Rauth, secretary of the Koerber-Brenner Music Co., Victor jobbers, is planning a pleasant trip after the Atlantic City Convention. He went from here to Chicago to join the special car of Northwestern jobbers, and after the conclusion of the sessions he will join Lester Burchfield, of Sanger Bros., of Dallas, and W. H. Reynolds, of Mobile, and they will go to New Orleans on a non-stop boat. Parham Werlein, of New Orleans, is expected to join them on this trip, and Mr. Rauth probably will go from New Orleans to Mobile with Mr. Reynolds for a few days fishing on the Snapper banks near that city.

Mr. Rauth is now writing with his left hand, much to the surprise of his associates, who declare

that he writes better than he formerly did. The change came about through a severe case of writer's cramp which made his right hand entirely undependable for writing, and he was forced to learn to use his left, which he does very readily, and reports writing complete letters in long hand by his new method.

Mr. Rauth recently has been giving considerable attention to the movement to push the one-cent postage bill and is meeting with a great deal of success in organizing for this movement. He is practically a pioneer in this field.

Talking machine jobbers are among those who are profiting largely through the package car service recently inaugurated on the railroads out of St. Louis through the Business Men's League, the chief commercial organization in the city. The service is designed to load merchandise for certain districts in full cars to break bulk at a definite point for distribution. It puts Nashville, Tenn., and some Carolina in the second day delivery points and maps are issued showing in circles just what way points can be reached on the second day. The bulk breaking point usually is designated as the beginning of the local freight run so that the car can be taken out that day on the local freight run and all points reached the same day. It has been thoroughly organized on all roads and for the Southwest often solid freight trains leave for a second and third day point. The cars leave in the evening on preferred freight runs and so seldom miss their destination time that the result is practically an express delivery on freight platform at freight rate. As talking machines are seldom delivered from the jobbers in carlots, this gives to them exactly the service they have been seeking and supplies up to a five-day service which reaches the Coast both in the Northeast and Northwest. It is not infrequently the case that local talking machine jobbers ship regularly into towns within 100 miles of other jobbers and perhaps 500 miles from here with greater definiteness of arrival than the near-by jobber where this service is not organized.

At the Silverstone Music Co. the Edison disc machine continues to hold the entire force close to high speed work, and they talk of jobbing business "100 per cent. better than a year ago."

A recent caller there was J. H. Bennett, the Missourian, who recently concluded to go into the talking machine business on the ground plan of the sewing machine men of a generation ago, and who has out a number of teams and men and some crews working with autos selling machines into the homes where summer boarders are, as well as the prosperous Ozark mountain home where boarders are not needed. Mr. Bennett was looking for stock and was a liberal buyer of Edison cylinder machines, as he confines his efforts to these machines and Columbias. He entertains no doubts as to the success of his enterprise.

Miss Minnie Louise Sutter who, for a number of years, was in charge of the offices for Mr. Silverstone, was married June 30 to W. W. Oelwiller at the home of the bridegroom in Bethel, Conn. She resigned a month ago. The Silverstone

BY PLACING THIS HANDSOME FLEXIBLE
COVER IN THE HANDS OF YOUR PATRONS

This attractive flexible cover is designed to hold the Victor or Columbia semi-annual record catalog, and is bound in mahogany colored imitation leather, and lined with black silk cloth.

The price of this flexible cover is so low that it permits you to give same free to your customers with the record catalog inclosed, thereby making a useful souvenir and a *permanent* advertisement; or you may charge a nominal sum for it if you desire. In lots of 100 or more, your name will be stamped on face of cover in gilt lettering *free of charge*. Send 20c. in stamps for a sample cover, with special trade prices.

NEW YORK ALBUM & CARD CO., Inc.

23-25 Lispenard Street, NEW YORK

(Formerly New York Post Card Album Mfg. Co.)

force sent to the bride a congratulatory telegram and a handsome present.

C. S. Gardner, the Edison factory representative who has been working in this territory for six months, has left for the East. During his stay in this vicinity, Mr. Gardner placed Edison disc machines with more than forty dealers and became well known to the trade and was much in demand for straightening out sales tangles and machine difficulties.

The Missouri Music Teachers' Association gave the stamp of approval to talking machines, if applause is a reliable judge. W. L. Calhoun, a music college proprietor of Carthage and Joplin, declared in an address that approval of classical music was more general than a few years ago. He declared that the increased appreciation was due chiefly to the influence of the talking machine and player-piano.

"Mechanical music devices," he said, "have put good music into the home." It is only necessary for a man to hear good music for him to prefer it to the popular kind." The remarks were freely applauded by the music teachers present.

Probably by the time this issue of *The World* reaches its readers the Columbia Co.'s local staff will be thoroughly settled in its new home. There is practically nothing of the old building left except the four walls. Floors, ceilings, roof and all interior arrangements have been changed. A ventilation system is installed and the interior is being finished at this writing and then will come new furniture, carpets, etc.

On the main floor, besides a handsome office suite that can be enclosed or thrown open as may be the wish, there are six demonstration booths with record racks of easy access. The front part of the floor will be used for machine display. The show window, larger than the two former windows, is one of the handsomest on Olive street and will admit of a splendid display. Retail Manager Duff will have desk room at one corner of the display floor space. General Manager Reid will have a private office and reception room at the rear of the main floor with both the accounting department and the order department within call and the shipping rooms and repair departments only a step away. Convenience, comfort and beauty have all been considered in the new arrangement. The lighting system is by the indirect system with silver hangings for the glass bowls that fits well into the dove and cream color scheme for the entire room.

Of course, while these changes were being made the departments were somewhat handicapped as to business, but Manager Reid says the record for a month will be a creditable one, and Retail Manager Duffy has kept his force engaged by working on the summer trade, which is sold chiefly away from the store.

The entire Columbia force is looking forward to a season of big trade. Manager Reid talks of the rain that came the first of the month in the ideal season to relieve the fears in this section that there would be no late fall crops to support the bumper wheat crop that has been harvested.

Manager Seager, of the talking machine depart-

ment of The Vandervoort Music Salon, is doing some unusual advertising work this summer. One of his first ventures was sending a fine Victor machine to Kansas City on the special train for the Elks who went there to attend the State meeting. The B. P. O. E. boys fell in with the idea for their amusement and they arranged for a "Tango Car" which was devoted to music and dancing. B. F. Martin, of the sales staff, accompanied the car to attend to the talking machine and have general charge of the amusement. The music made quite an impression on members of the party.

His second move was to present a Victor machine and \$200 worth of records to the museum department of the Board of Education for the training of teachers who care to investigate. This part of the Board of Education work is practically a training school for the city school teachers and the records available for the machine are those which fit into the scheme of the school work and they will be explained to the teachers who then can carry the idea into their own work. In this city about the only way to provide talking machines for the school is for the Patrons' Association to buy the machines with funds which are raised in connection with these organizations. Most of the pianos in the schools are bought in the same way and the teachers' wishes and expressed desires have much to do with these purchases, as the committees of the Patrons' Associations keep in close touch with the school work.

A third innovation to the credit of Mr. Seager is the introducing of a \$200 Victrola into "Dream-

land," a popular dance hall, in the place of the orchestra that is on duty in winter. The Victrola is much liked because of the different character of music that is possible for the intermissions.

The Field-Lippman Piano Stores are using the billboards to inform the public that in their talking machine department the Victor, Columbia and Edison Disc machines can be compared and the customer is free to choose the one he likes the best. The announcement is in rather unusual form, as it is a full size, eight sheet bill and carries its message in the fewest possible words in large, plain type, and adds no comment and stands out well on the large boards.

TEL-ELECTRIC CO. FALLS INTO LINE.

Arranges to Handle Talking Machines and Will Carry the Entire Columbia Line.

The Columbia Graphophone Co. closed a deal last week with the Tel-Electric Co., 299 Fifth avenue, New York, whereby this well-known piano player house will handle the complete Columbia line. Gilbert A. Pond, general sales manager of the company, is well pleased with the outlook for closing an excellent Columbia business with the Tel-Electric clientel, and has made arrangements to have constructed seven sound-proof demonstration rooms, which will be ready in a very short while. The manager for this new Columbia department has not yet been selected, but will be announced next week.

VICTOR

A complete line of Victor products, from the smallest repair part to the biggest model of machine. Every shipment made promptly.

EDISON

Cylinder goods, machines and records; full stocks and immediate deliveries. A good popular-priced line for most any territory.

Louis Buehn Philadelphia

SUMMER ADVERTISING CAMPAIGN IN MILWAUKEE

Is Being Carried on with Great Success—The Satisfactory Crop Outlook Means Enormous Business in the Fall—Milwaukee System and Service Co. to Handle Edison Dictating Machines—New Columbia Agencies—Some Striking Displays—News of Month.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., July 9.—Milwaukee talking machine men believe that the excellent crop outlook gives promise of a good future business, and everyone is looking for a good fall trade.

There probably has not been a summer when Milwaukee dealers have advertised so consistently as they are doing this season. Practically all the leading houses are running good-sized advertisements in the local papers at stated intervals, and the results which are being obtained have been entirely satisfactory. One of the houses which has been advertising especially strong is the J. B. Bradford Piano Co., featuring the Victor line, and officials of the company say that sales have held up remarkably well.

McGreal for Congress.

Lawrence A. McGreal, formerly Edison jobber in Milwaukee, and one of the former presidents of the National Association of Talking Machine Jobbers, has announced that he will be a candidate for Congress on the Democratic ticket from the Fifth Congressional District, comprising a portion of the city of Milwaukee. Mr. McGreal is now sheriff of Milwaukee County.

To Handle Edison Dictating Machines.

The Milwaukee System & Service Co. has been organized to succeed the Tisch-Hine Co., 450 Jackson street, representative of the Edison dictating machine, and will now act as distributor of this machine for the entire State of Wisconsin. Officers of the new company have been elected as follows: President, Julius Tisch; vice-president, William Finger; secretary and treasurer, A. B. Cooper. William Tisch is acting as manager.

L. C. Parker, enterprising manager of the Victor and piano departments at Gimbel Bros.' store, was the only talking machine man in this city who attended the annual convention of the National Association of Piano Merchants held in New York June 8, 9, 10 and 11. The Victor business at the Gimbel store during the month of June attained a new high mark for that month.

Takes the Victor Agency.

The Young Cash Store, at Hartford, Wis., has taken up the agency for Victor goods in that city. The store has arranged handsome new booths for the demonstration of the Victor machines and is meeting with much success in handling the line.

Paul A. Seeger, manager of the Victor department at the Edmund Gram Music House, is especially well pleased with the way the demand for the large Victrolas has been maintained thus far this season.

Enthusiastic Over Trade Outlook.

Officials of the Flanner-Hafsoos Piano House are enthusiastic over the manner in which the Edison disc machines are selling in Milwaukee. The house took on the line only recently, but it has met with a much larger business than it had anticipated. Charles H. Schefft & Sons, 849 Third street, carrying both the Victor and Edison goods, and C. Niss & Sons, 697 Third street, featuring the Edison goods, have been meeting with a brisk business.

William Idle Succeeds Hope.

William Idle, who has been assisting William A. Schmidt, manager of the Phonograph Co., of Milwaukee, in locating new Edison dealers about Wisconsin, has been made traveling wholesale representative of the Thomas A. Edison Co., Inc., in Wisconsin and upper Michigan, succeeding William P. Hope, who is now Edison jobber in Kansas City. Mr. Idle is now spending his vacation at his home in the East. Mr. Idle and Mr. Schmidt established eight new dealers on their recent trip through Northern Michigan.

New Columbia Agents.

A. G. Kunde, 615 Grand avenue, Columbia jobber and dealer, has established two new Columbia agencies in Milwaukee. Otto Hausmann, who conducts a retail business at 1208 Kinnickinnic avenue, has taken on the agency for the Columbia goods and is meeting with excellent success. Otto F. Leidel, who opened a new retail piano store in this city some time ago, is now featuring the Columbia machines and records and is meeting with a brisk business. Mr. Leidel has just moved into first floor quarters at 879 Third street, where he is arranging some attractive new booths. Mr. Kunde expects to be located in his handsome new store in the building which is being erected at his former location, 516 Grand avenue, by September 1. The new store will have seven demonstration rooms and will be one of the finest retail stores in Milwaukee.

Change of Name.

The name of the McGreal retail Victor store at

312 Grand avenue has been changed to the Backus Victrola Shop. The final organization of the Wisconsin Talking Machine Co., the jobber in this State for the Victrola line, will be completed within the near future, when officers will be elected and other details perfected.

Victrola for Steamship Minnesota.

The Gensch-Smith Co., 730 Grand avenue, recently sold a Victrola Style XIV. to the Crosby Transportation Co., for use on the company's lake vessel, "Minnesota," plying between Milwaukee and Buffalo. An order for \$50 worth of records accompanied the sale of the machine.

Striking Fourth of July Window.

J. H. Becker, Jr., manager of the Victor department of the Hoeffler Manufacturing Co., attracted attention to the Hoeffler windows by a novel Victor ante-July 4 display, bearing these placards: "Celebrate the Fourth of July with a Victrola;" "Fireworks Dangerous and Don't Last Long—A Victrola Keeps on Entertaining the Year Around;" "Spend a Safe and Sane Fourth—The Victrola Plays Patriotic Music." Other interesting window cards illuminated, showed photographs of Alma Gluck, John McCormack and other Victor stars, and called attention to the records by these artists. The attractive windows, arranged by Mr. Becker, have been a strong factor in bringing a big business to the Hoeffler company. Manager Becker says that trade during the month of June was better than that experienced during April and May.

Brieflets.

Roy J. Keith, of The Talking Machine Co., of Chicago, and U. P. Gibbs, representing The Rudolph Wurlitzer Co., recently called upon the Milwaukee trade.

THE EILERS TALKING MACHINE CO.

The Eilers Talking Machine Co., which was recently incorporated in Seattle, Wash., with a capital stock of \$25,000, is transacting a very excellent business. The new firm is composed of C. H. Hopper, president and treasurer; John W. Roberts, vice-president, and Edward P. Kelly, secretary and sales manager. They are all practical business men and have had a long experience in the talking machine field. The company is occupying spacious and well equipped quarters on the second floor of the Eilers building, and all concerned are most sanguine regarding the future of the talking machine business. The Victor, Edison and Columbia lines are handled.

EASY TO CRITICISE.

It is easy to sit in the sunshine
And talk to the man in the shade;
It is easy to float in a well-trimmed boat,
And point out the place to wade.
But once we pass into the shadows,
We murmur and fret and frown,
And our length from the bank we shout for plank,
Or throw up our hands and go down.

It is easy to sit in our carriage
And counsel the man on foot;
But get down and walk, you'll change your talk,
As you feel the peg in your boot.
It is easy to tell the toiler
How best he can carry his pack;
But no one can rate a burden's weight
Until it has been on his back.

—The Poster.

"ANALYZING THE HUMAN VOICE."

In connection with the article on "Analyzing the Human Voice," by Dr. Floyd S. Muckey, which was reprinted on page 14 in The Talking Machine World of last month by permission of the Scientific American, there were several cuts used, two of them showing a soprano solo and a tenor voice sounding vowels, as they appear on Edison phonograph records. Through an error this fact was omitted under the captions of these cuts, thus confusing them with the illustrations and data in Dr. Muckey's article.

Dr. Muckey desires it understood that the two cuts were unauthorized by him and were not a part of his original article. The extra cuts were inserted by The World merely for the purpose of adding to the trade interest in the article, and with no desire to discredit Dr. Muckey or his work, and we feel that this explanation, which we gladly make, is due him.

The greatest musical industry in the world

The center of music trade activity. The dominant factor in the prosperity of the music trade.

Its influence extends to every part of the world. Its products have brought success to music dealers everywhere.

The growth of the immense Victor plant is co-incident with the growth of Victor dealers. Every new addition has carried them from one success to another still greater—and the Victor factories and Victor business keep right on growing.

Factory extensions, costing more than \$1,500,000, are being added this spring and summer to the Victor plant as pictured above.

This is the Victor Company's answer to the demand for more Victors, Victrolas and Victor Records.

THE IMMACULATE SHOP AS A TRADE BOOSTER.

Have Your Store Clean to the Point of Spotlessness, Mr. Dealer, and Attract the Particular Folks—A Few Illustrations of How Much a Spic and Span Establishment Will Aid Its Owner in Acquiring the Most Exclusive Trade—Critical but Constructive Hints.

I do not mean to insinuate, Mr. Talker Man, that you are not careful as to the general appearance of your place of business; I am very sure you are. The point is this: Are you careful to the point of being what your employes may term finical? If not, I would suggest that you acquire the habit at once, for by so doing you will attract a class of trade which now passes you by on its way to the immaculate shop up the avenue.

The immaculate shop makes a specialty of cleanliness. From its show window to the most inconspicuous corner of its record racks you may search all day, if you like, and no fleck of dust or plague-spreading fly will reward your efforts. This place is clean!

The word "record" brings to mind an experience of the writer along the proper channels for narration at this time, so please bear with him as kindly as you can. He had occasion once, during his brief career as a talking machine salesman, to purchase fifty records for a finical woman. Her house, I will have you know, was famous for its antagonism toward dirt. The most bescrubbed cottage in Spotlestown had nothing on her abode, I assure you.

Well, to resume, he bought the records for her at a long-established and highly successful talking machine store in his home town, never glimpsing the storm clouds lifting themselves above his trade horizon. He delivered the order in due course, and was very much surprised to find in his morning mail a few days afterward, instead of the check he expected, a letter from Mrs. S. asking him to call and get his goods. Upon his arrival at her home, she informed him in very strenuous terms that she would not accept the filthy things, and, with more force than diplomacy, accused him of selling her a second-hand product. This accusation naturally made the writer rather sore, for he had spent the greater part of a day picking out the selections he thought would most tickle her fancy. Having done so, he felt that to be treated in this absurd fashion was unpardonable, and he told the lady so. By way of answer, she raised a record carton from among its fellows and blew sharply upon it. Like unto a sandstorm upon the Sahara was the result.

"Now, young man," exclaimed the outraged customer between coughs, "take these records back and bring me some that are clean!"

This experience was made possible simply through neglect on the part of the jobber in keeping his stock free from dust. It put the writer in bad with a good patron also, but at the same time it proved beneficial, viz., thereafter when he had an order to deliver he saw to it that the goods were clean. They had to pass the high standard set by Mrs. S., and that was going some.

Let us gaze into the show window a moment, Mr. Dealer. The general effect is very good. The display is well executed and correctly set up, but there prevails a certain lack of freshness. The snap and ginger which the window gave out to the passer-by when newly dressed has disappeared, and in its place has come an air of dowdiness. Milady is impressed with pretty things, but she demands them freshly and daintily served. When she goes tripping into the Cafe Dansant and orders her

lettuce sandwich and pot of tea, the lettuce must be crisp and the napery well laundered, or Louie is soundly scolded and made to try again. Thus it is with your show window, Mr. Dealer, for she will pass by your store on her way downtown some day, and if you would have her pause and admire, you must bedeck it in the style that will most attract her, which means that it must be immaculate as well as artistic.

Another thing that goes far toward making a good impression along the line of cleanliness is the careful dressing of employes. It is really rather disgusting to do business with a talker shop where the clerks are slovenly apparelled; where soiled collars, rusty footgear and dark finger nails are the rule. I am very glad to be able to vouch for the fact that this lack of attention to dress among talking machine employes is greatly in the minority, but it does exist, and therefore, is a menace to trade.

Even though this condition of inelegance may not be noticeable in your place of business, Mr.

Makes Specialty of Cleanliness.

Dealer, why not look the boys over when they come in to-morrow, and, if there is room for improvement, suggest, in a fatherly manner, that they take a few moments' more time each morning in the preparation of their toilets. There is absolutely no reason why they should take offense at this request when they understand what it will mean to you mutually to have the establishment immaculate.

Oh, by the way, while upon this subject it might be well to speak to them upon the theme of immaculate conversation. There is a tendency among young clerks to prove their manliness by indulging in remarks that are verging on the risqué. I have been in talker shops where I have listened to stories fit only for a barroom, and, very often, during the rendition of such a yarn there was a lady within hearing. Is not this very wrong? Does it not place the establishment where it is allowed to occur upon a low plane?

I do not mean to infer that these young raconteurs of the risqué are vicious citizens; far from it. They are entering the borderland of maturity, when all things blasé seem clever, and a heart-to-heart talk with their boss will give them just the proper impetus in the right direction, and if delivered at the psychological moment will correct this evil. Try it and see.

I received from a talking machine dealer the other day a beautiful booklet. From the standpoint of the author, the artist and the publisher it was a triumph, but from cover to cover it was decorated throughout with grimy finger marks. The hands that prepared that pamphlet for mailing

had not been on speaking terms with soap and water for "some considerable period," as Harry Lauder says it. Now, honestly, is it not lamentable that an artistic creation, upon which three skilled minds labored with infinite success, should be marred through the medium of a pair of dirty hands?

Are you sure, Mr. Dealer, that your literature is going out to your customers as clean and bright as it comes to you from the printer or the factory? I would look this matter up if I were you and satisfy yourself that your advertising is as clean as your shelves, your window, and the collars of your clerks.

I will end this little talk about immaculate things by telling you of how great value the talking machine has proven to the Chautauqua. The Chautauqua of which I speak has its home in Swarthmore, Pa., from which quaint town it sends out to the country at large 200 branches. Each branch gives, inside its spacious tent, clean and highly entertaining concerts, lectures by great men and band recitals. I was fortunate enough to be present last week at the Mount Holly, N. J., Chautauqua. It was Junior Chautauqua Day, and the youngsters of the town were gathered together under the wing of the superintendent and drilled in a little play entitled "In Mother Nature's Flower Garden." They all went through their many parts splendidly, due to the fact that the music supplied for the songs and dances was in perfect tempo and rendered most melodiously. Of course, this music was furnished by a talking machine. A clean instrument in a clean field. Let us see to it that the present standard is maintained.

HOWARD TAYLOR MIDDLETON.

"TALKER" MUSIC WHILE YOU WAIT.

How the Shoe Shining Parlors of Indianapolis Entertain Their Customers.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., July 9.—Shoe shining parlors in Indianapolis are equipped with talking machines, and while the energetic Greek boys shine and polish shoes the customers are entertained with the latest music of the day. Some of the better equipped parlors have talking machines of which no person would need to be ashamed, while others have the very small instruments. But whatever the size, the music is there. The Greek boys appear to enjoy this innovation as much as does the customer. In one instance one of the boys stopped work long enough to put on a new record and then he went back to work cleaning and shining shoes, singing and humming the tune being played on the machine.

SIGNS UP NEW EDISON DEALERS.

(Special to The Talking Machine World.)

St. Louis, Mo., July 6.—M. L. Reynolds, traveling salesman for the Silverstone Music Co., Edison disc jobber of this city, is signing up many new Edison dealers in southern Missouri and Arkansas. Among the new Edison dealers recently enrolled are the Hollenberg Music Co., Little Rock, Ark.; A. B. Carne, Pierce City, Mo.; the Benedict-Boyce Music Co., Galesburg, Ill.; McQueen Bros., Carrollton, Mo.; C. W. Hess, Butler, Mo.; Bush & Carne, Dyersburg, Tenn.; T. J. Evans, Pittsburg, Kan.; W. H. Moreland, Jr., Metropolis, Ill.; Holbrook, Carthage, Mo.; H. L. Hoover, Springfield, Mo.; J. W. Guisinger, Fayetteville, Ark.

BE WITH THE LIVE ONES!

Exclusive Victor Distributors

DENVER, COLORADO

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., July 6.—The Salem conflagration continues to enlist the attention of the talking machine trade, for in that \$12,000,000 blaze there were a number of machines destroyed. One, the property of a resident of Lafayette street, was a Columbia "Grand" but for the most part they were the more inexpensive equipments. As far as known, the only talking machine house burned out was that of Jacob Schare, in Lafayette street, a Columbia dealer. Two concerns, distributors of Edison goods, who fortunately escaped, as they were not in the fire zone, were the Salem Talking Machine Co., at 87 Central street, and W. W. Ballard, of 175 Essex street. Both houses had a number of machines out in the burned district, however.

One of the Heroes of the Fire.

One of the heroes of the fire was Norman Mason, wholesale man for the Columbia Co., who happened to be near the scene of the fire just as the alarm was sounded. He was only a few blocks away and, seeing the smoke, rushed to the immediate vicinity and with a group of others was instrumental in carrying or leading several women and children to places of safety. Mr. Mason remained on the scene for nearly six hours, and some of the scenes he witnessed, he says, it will take a long time to forget.

Business Is Normal.

Summer business in the talking machine trade has been about normal, and most of the orders now come from the country or seashore homes of city people. Some of the houses report a good call from summer camps, some of them camps for boys or girls, of which there are many in Maine, and others of a more private character, family camps one might call them. As this letter is being written many of the local managers are leaving for the Atlantic City convention and some of the delegates are looking for a busy time, and all of them to a merry one. As most of them have been to Atlantic City before they know just what that resort has to offer.

Making Rapid Progress in Building.

Work on the changes in the building occupied by the Columbia Graphophone Co. continues to make rapid headway, and it will be only a few weeks before the Avery street side will be completed. Large plate glass windows will make the long line of demonstration booths among the most attractive in the city, and the advantages for advertising will be unsurpassed. As the outside be-

gins to assume more normal conditions, similarly is the inside of the Columbia quarters taking on a new dress, and Manager Erisman will be all ready for the fall business, which promises to set in unusually early this season.

Looking Forward to Vacations.

The camp crowd at the Eastern Talking Machine Co. is looking eagerly forward to their vacations at Southport, Me., where "Tisours" is always ready to welcome guests, especially as the boys take enough of good things down with them to make camp life quite bearable. Billy Fitzgerald and Jerry Spillane will be the first to go, and Hark Reed and Ed Welch will follow a fortnight later. So through August there will be something doing all the time, especially as the boys are planning to charter a motor boat.

Chamberlain's Western Trip.

A. W. Chamberlain, who lately established himself in Boylston street, has been on a tour through the West, taken in the interests of business. Mr. Chamberlain has invented a talking machine device which promises to be a favorite with the trade. He and his friend Gately, likewise widely known in the trade, have been taking week-end trips up to New Found Lake, N. H., where Mr. Chamberlain has a cottage.

Handsome Fourth of July Window.

The window of the C. C. Harvey Co. contained a handsome display for the Fourth of July holiday, and in the arrangement of red, white and blue the Victrolas played an important part. These had been carefully arranged by Francis T. White, manager of the Victor department, and as the window was brilliantly illuminated at evening many persons stopped to enjoy the display.

Vacations at Henry F. Miller & Co.

Vacations are now in order at the Henry F. Miller & Co. Victor department, and the first to go away is Frank H. Jenkins, who has gone over to New York. Percy Baker starts the last two weeks in August. Manager Warren Batchelder is not planning to go away, but will spend his vacation at home, as he is expecting to entertain visitors.

Rearrangement at Steinert's.

Manager Royer, of the Arch street Victor quarters of the M. Steinert & Sons Co., has undertaken quite an extensive rearrangement of the Victor department, and on the ground floor new demonstration booths are being installed, which will add considerably to the facilities for caring for customers. When the changes are completed there will be

four new good-sized booths leading off an aisle which can be kept quite apart from the main room. At the rear there will be a small chute to the floor above so that all desired records can be sent down from the stock room without the salesman going out to the front of the store at all. On the second floor all the offices will be changed about, and Manager Royer's private office will be near the door rather than at the other end of the floor, as is now the case.

In Charge of Lowell Branch.

Manager Royer announces that L. P. Comet, who formerly was in charge of the Victor department of the Steinert's New Haven, Conn., store, has been placed in charge of the company's Lowell establishment, and he already has entered upon his new duties. Mr. Comet knows the talking machine business thoroughly, and the Lowell store should forge ahead under his supervision.

The First Batch of Vacationists.

The first four persons to leave the Eastern Talking Machine Co. for their summer vacations are Miss Crowley, of the memorandum department; Miss Sheehan, of the office; William Doherty, one of the shippers, and the errand boy. One of the additions to the staff of the Eastern is Miss Held, formerly with the Kahn talking machine house in the Arcade.

Attended the Convention.

Manager Royer, of the Victor department of the Steinert Co., and A. M. Hume, of the Hume and Jewett piano companies attended the Atlantic City jobbers' convention. They will later visit the Victor laboratories at Camden.

Pardee-Ellenberger New Quarters.

Manager Silliman, of the Boston quarters of the Pardee-Ellenberger Co., can now rest easy nights, as most of the work incident to removal to the new quarters in Oliver street is finished. When mention was made last month of the change there were a number of small things to be done before the house was permanently settled, but now that everything is just as it should be, one cannot but marvel at the change that has come over this well-known distributing agency, and never before in this city were the Edison goods shown under just such advantageous conditions as now. The main showroom with its handsome carpet and the various styles of Edison disc machines placed conveniently about the room show up unusually well, especially when the inverted lighting system is turned on.

WE FORMALLY announce the opening of our new headquarters at 26 Oliver Street, Boston, Mass., where we have secured greatly increased floor space and have installed the most modern facilities for the quick handling of Edison goods.

Special attention has been given to the shipping department, which is of unusually large size, where will be maintained a most complete stock of Edison Disc and Cylinder Machines and Records.

You are invited to call and inspect our new building.

The
Pardee-Ellenberger Co.
26 Oliver Street, BOSTON, MASS.

Southern New England Offices at
NEW HAVEN, CONN.

With the big demand for Edison Disc Phonographs, you should transact a big Summer business, to say nothing of the Fall and the years to come. Want us to tell you how?

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

Going to Make a Record.

Billy Fitzgerald, so his friends say, is plugging for all he is worth as the new head of the wholesale department of the Eastern Talking Machine Co., and he is destined to make a record both for himself and for the company.

Summering at Nantasket.

Harland R. Skelton, of the Edison Co., is spending the summer at Nantasket, where he and his family have a cottage.

Rusticating in Maine.

Guy R. Coner, of the Pardee-Ellenberger Co., left a few days ago for his annual vacation in Maine; L. H. Ripley is going away this week, and Robert C. Peck will follow soon after.

Reports Busy Times in New Haven.

W. O. Pardee, of the Pardee-Ellenberger Co., of New Haven, when he was in town this week reported that business down his way was very fair and there was more activity noticed than in some time. Several of the concerns in his city, he said, are canvassing among the hotels, and with considerable success, and this has led to looking into the shore resort proposition, which promises to be a fruitful field. Mr. Pardee instanced several cases where small orchestras were being supplanted by Edison disc machines, the managers having become convinced that these equipments could furnish greater variety than the players because of the vocal as well as instrumental concerts they were able to provide. In such cases where the hotel managers have had any trouble with their musicians there has been prompt decision to resort to these Edison machines, and everywhere that they are in use they are giving much satisfaction, besides furnishing a splendid medium of advertising among the guests.

Ellenberger Motored from New Haven.

H. L. Ellenberger, of the Pardee-Ellenberger Co., was in town with his family a few days ago, making his headquarters while here with Manager Silliman, the Boston manager of the company. Mr. Ellenberger and his family motored up from New Haven in their new car, which ran very smoothly. Mr. Ellenberger does not get over to Boston very often, and therefore was doubly welcome.

Winkelman at Atlantic City.

Henry Winkelman, manager of the Victor department of the Oliver Ditson Co., was one of those who took a few days off from business to go to the Atlantic City convention last week. In August Mr. Winkelman will go with his family to Swan's Pond, Me., where they have summered for several seasons.

HASSETT BUYS PEABODY STORE.

(Special to The Talking Machine World.)

PORTSMOUTH, N. H., July 6.—Fred W. Peabody has disposed of his store in this city to Joseph N. Hassett, who for a number of years was manager of Mr. Peabody's interests. Mr. Peabody was able to build up a large business in talking machines in this city, and Mr. Hassett is not only perfectly familiar with the business but has a host of friends who are wishing him all kinds of good luck in his new undertaking. The store is centrally located and Mr. Hassett should be able to push even further a business so well established.

Enthusiasm is the white heat which fuses all a man's business qualities—ability, initiative, knowledge, tact, industry and the rest—into one effective whole.

TALKING MACHINE JOBBERS WHO ADVERTISE IN THE WORLD ARE LIVE ONES, TRY THEM!

Dignity is powerful. Familiarity weakens your cause.

AN ATTRACTIVE SUMMER WINDOW

Is That Recently Arranged and Brought to Public Notice by the Grafonola Parlors of Boston—Has Been Highly Commended.

(Special to The Talking Machine World.)

BOSTON, MASS., July 6.—This city has long been known as the home of unusual window displays in all lines of mercantile life, and in this well-deserved praise the talking machine trade is entitled

even in the picture. As a summer scene this window embodies every detail that should insure its sales value, and the many machine and record sales closed as a direct result of the display were certainly warranted by its originality.

A BIRD'S-EYE VIEW.

Took a bird's-eye view to-day, along and over the whole glad way that reaches out across the year, and there is nothing we need fear.

The way has been a little rough, but you've kept

Grafonola Parlor's Seasonable Window Display.

to a good-sized share. As a matter of fact, the various members of the talking machine trade have produced timely and attractive displays throughout the year that have won the praise and admiration of many merchants in other fields, who expressed regret that their products did not adapt themselves so favorably to artistic display and arrangement.

An excellent example of this progressiveness of the local trade is shown in the window herewith, which was designed and arranged by the Grafonola Parlor, the successful Columbia representative. The timeliness and value of this display as a magnet for summer trade is beyond doubt, while the detailed perfection of the display is evident

going—that's the stuff—and haven't brought yourself to think that everything is on the "blink." That's right—and now stay on the ground, no matter who may come around and whisper loudly in your ear, that this will be one awful year. Let 'em whisper, then forget it, never for a moment let it hinder you from going on, nor hide from you the unclouded dawn of that glad era—overdue—yet coming sure for us and you. Even now we're just that near it lots of folks have caught the spirit, and are pushing back the gloom that might choke off the coming boom. But there isn't any danger, pass the word to friend and stranger; tell 'em in this bird's-eye view nothing but the sky looks blue.

MANY kinds of needles have been introduced to the trade recently, made of many materials, all launched with a view of improving the "tone" of the talking machine but none "make good" except to prove the superiority and reliability of the renowned steel needles made by

W. H. Bagshaw
LOWELL, MASS.

Our sales are constantly growing, for the steel needle as we make it is the true, scientific factor of tone reproduction. Bagshaw-made needles are BEST—remember this!

NEW YORK

Eighth Annual Convention

of the

National Association of Talking Machine Jobbers

Atlantic City, N. J., July 6 and 7, 1914

(Special to The Talking Machine World.)

ATLANTIC CITY, N. J., July 7.—In the matter of full attendance and harmony the eighth annual convention of the National Association of Talking Machine Jobbers' which was held at the Chalfonte Hotel yesterday will stand forth in the association's history as the most successful annual session ever held by the body. In regard to the attendance, particularly, the success of the meeting was not accidental. The officers of the association, L. C. Wiswell, the chairman, and other members of the arrangements committee, and Louis F. Geissler, general manager of the Victor Talking Machine Co., by means of his recent letter to the jobbers urging them to attend the session, all put forth strenuous efforts to make the gathering a notable

ishing condition of the association at the present time is doubly pleasing in view of the fact that conditions have changed wonderfully during the past year in the talking machine industry.

"The Edison disc jobbers have formed an association which should be of immense value to those handling the Edison disc line, and this has created a condition in our membership which should tend towards bettering our association, inasmuch as our association now virtually consists of Victor jobbers, this feature bringing us much closer to our source of supply, as is shown by the tone of General Manager Louis F. Geissler's letter to the jobbing trade, under date of June 20, inviting the heads of Victor jobbing firms to be present at our eighth annual convention.

"Your various committees have been received by the Victor officials during the past year with every consideration and every possible attention has been given our various requests.

"Financially, the association is stronger than ever and in its present form much can be expected in betterments during the coming year.

"During my term I considered it advisable to appoint an advisory committee to consist of all ex-presidents still actively engaged in the jobbing of talking machines, the junior retiring president to be chairman, this committee to be subject to call of the executive committee for any advice and work deemed necessary by them. I would recommend that our by-laws be amended to make this committee a permanent one.

"I would further recommend that our by-laws be changed at this meeting in order that our membership be strengthened. For instance, we have a number of jobbing firms who are jobbers in two or more cities yet who are members of the association only at one point. I believe it would be wise to amend our by-laws to read that jobbing firms having two or more jobbing branches be admitted to membership at the regular dues of \$15 per year at the home office, and \$5 per year for each branch house.

President Roush, in his report before the executive committee at its final meeting on Sunday, also suggested that the by-laws of the association be amended as outlined, and the amendments were adopted in the meeting unanimously.

Secretary Whitsit next presented his annual report as follows:

Secretary Whitsit's Report.

"The membership of the N. A. T. M. J. September 15, 1913, was 108 members, composed of fifty-nine jobbers of Victor goods, twenty-five jobbers who handle both Edison and Victor, and twenty-four jobbers who handle only the Edison product. Since that time we have had thirteen resignations of jobbers who were handling Edison goods only, and your executive committee dropped from mem-

J. C. Roush, Retiring President.

one. The result was that seventy-four of the eighty-five jobbing houses, now members of the association, answered to the roll call in the meeting and representatives of two other houses reached convention headquarters on the day following, making the wonderful total of seventy-six out of eighty-five members represented, or 90 per cent. It is, indeed, rare that in any association convention such a record is made.

Following the roll call, reading of minutes and other preliminary business, Joseph C. Roush, president of the association presented his report for the year, which was as follows:

President Roush's Report.

"Since taking office, September 15, 1913, I have deemed it necessary to call two meetings of the executive committee to discuss matters of importance to the talking machine trade, the first meeting being held in Chicago, September 21, 1913, and the second at Philadelphia, February 15, 1914. I am happy to say that at each meeting the entire executive board was present. Many matters of interest were discussed and Secretary Whitsit will give complete details in his annual report.

"The work accomplished during the year has been very gratifying to your officers, and the flour-

Perry B. Whitsit, Retiring Secretary.

bership nine concerns for non-payment of dues. There have been four jobbers who have discontinued business, therefore have been dropped from membership in the association, making a total loss of twenty-six members in the association. We have had two new members, which makes the association now stand at a total of eighty-four members.

"There has been collected and turned over to the treasurer through this office the sum of \$1,380.

"The executive committee since the seventh convention has had two meetings, one at Chicago, September 21, 1913, and one at Philadelphia, February 15, 1914.

"Every member of the executive committee was present at the Chicago meeting, as well as a number of other members of the association. A number of subjects of interest to the association were acted upon at this time and a committee was appointed to confer with the Victor Co. in regard to them.

"The following resolution was unanimously adopted at that time:

"Resolved, That an advisory committee be created, this committee to be made up of the ex-presidents of the N. A. T. M. J. actively engaged in the wholesale distributing of talking machines

(Continued on page 28.)

Officers of the National Talking Machine Jobbers' Association for 1914-1915.

President—George E. Mickel, Nebraska Cycle Co., Omaha, Neb.

Vice President—E. F. Taft, Eastern Talking Machine Co., Boston, Mass.

Secretary—E. C. Rauth, Koerber-Brenner Music Co., St. Louis, Mo.

Treasurer—W. H. Reynolds, Reynolds Music Co., Mobile, Ala.

"In closing, on behalf of your retiring officers, executive committee, and myself, I wish to thank each and every member for the courtesy and support given your officers and executive committee during their term of office. We also wish to thank you for your promptness in answering various communications which were very important to our association."

Next Convention City San Francisco

A View of Conventionists Taken in Front of the Chalfonte After the Day's Session. The Satisfied Expression Upon Their Faces Shows That the Atlantic City Breezes Blew Dull Care Away.

who are members of the association in good standing, the duty of this committee being to confer with the executive committee upon matters of moment, the retired president each year to become automatically chairman of this committee.'

"At the meeting held in Philadelphia February 15 all members of the executive committee were present, as well as J. N. Blackman, chairman of the advisory committee, and a number of other members of the association."

The Treasurer's Report.

The report of the treasurer, W. H. Reynolds, was next presented and showed that the finances of the association were in excellent shape, with a substantial balance on hand. Every active member of the association had paid up dues to October 1, 1914, an excellent record.

Topics Discussed.

A number of discussions of great importance to Victor jobbers and the trade in general were considered, among them being a discussion of the desirability of charging interest on all instalment sales. It was the consensus of opinion that the charging of interest was fast becoming an actual necessity and it is probable that the manufacturers will be asked to arrange their contracts to provide for interest charges.

General Improvement in Stocks.

Reports from members indicated that there had been a general improvement in the stocks of the Victor jobbers throughout the country, though there was still a decided shortage in certain of the more popular records despite the tremendous increase in the record output of the Victor Co. The transfer bureau, operated at heavy expense by the bureau, has proved a most valuable aid to the jobbers in keeping their stocks of machines and records balanced and in good shape by reducing much of the surplus.

Report of Traffic Committee.

One of the interesting committee reports filed at the meeting was that of the traffic committee, of which L. C. Wiswell is chairman, and which was as follows:

"It would seem that the hand of fate was especially considerate of the talking machine industry during the past year, for so far as your committee can learn, no changes in the rates of transportation or classification have been made, other than the proposed 5 per cent. horizontal increase in the freight rates on the territory east of the Mississippi and north of the Potomac and Ohio rivers, which proposed advance was suspended by the Interstate Commerce Commission in November last, and is still held in abeyance by them, nor are any under contemplation by the various classification committees, in fact, the condition is one of which we should congratulate ourselves.

"Your committee received from the entire membership of the association only two complaints during the past year, one of which concerned the seeming overcharge on the transporting of some record cabinets, and the other was in relation to delays to shipments en route from the factory to destination. Your committee in each instance gave the matters careful and immediate attention.

"Your committee has noted with keen interest the hearings which were held by the Interstate Commerce Commission, relative to the proposed 5 per cent. horizontal increase in freight rates for the Eastern roads, and took occasion at the meeting of the executive committee, which was held at Philadelphia on February 15, to inquire of the executive committee as to their position relative to this proposed increase and requested instructions. The executive committee's opinion was that the association take a stand in the premises affirmatively.

"It is the desire of the committee to be of genuine assistance to the entire association membership and any communications addressed to the committee with reference to delays in shipments, errors in freight expense bills, etc., will be given prompt and careful attention."

Mr. Wiswell and Associates Thanked.

The arrangement committee, of which L. C. Wiswell was chairman, also presented its report, but the success of the committee's work was too evident to make a written report necessary. The as-

CONVENTION OF THE NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 28).

sociation tendered a rising vote of thanks to Mr. Wiswell and his associates for their earnest efforts in making the present convention a memorable one.

New Officers Elected.

Next in order came the annual election, and as a result the following gentlemen will preside over the destinies of the association for the ensuing twelve months:

President, George E. Mickel, Omaha, Neb.

Vice-president, E. F. Taft, Boston, Mass.

Secretary, E. C. Rauth, St. Louis, Mo.

Treasurer, W. H. Reynolds, Mobile, Ala.

Executive committee: O. K. Houck, R. H. Morris, Parham Werlein, C. J. Schmelzer and W. O. Crew.

Following the election the thanks of the association was tendered to the retiring officers for their efficient service.

E. R. Johnson Elected as Honorary Member.

In appreciation of the efforts of the Victor Co. in furthering the work of the association in many directions, the association, by unanimous vote, elected Eldridge R. Johnson, president of the Vic-

Oliver Jones Sends Greetings.

While the meeting was in progress a telegram dated Albany, N. Y., was received from Oliver Jones, formerly credit manager for the Victor Co., and now in the real estate business, expressing his

George E. Mickel, President.

regret at being unable to be present at the convention and sending his best wishes to the jobbers. The association then adopted a resolution testifying to the high esteem in which Mr. Jones was held by the jobbers, with best wishes for his success.

One Continuous Session a Success.

The announced plan of transacting the entire business to come before the convention in one continuous session was an unqualified success. An elaborate buffet luncheon was served in the meeting to preclude any possibility of the members scattering, and there was absolutely no lost motion from the time the meeting was called to order at 9.30 a. m. until it adjourned at 3.30 p. m. The result was that the members left the meeting free

E. F. Taft, Vice-President.

to enjoy the elaborate program of entertainment provided by both the association and the Victor Co.

Ladies Entertained.

While the jobbers were in session the ladies in attendance at the convention were taken in automobiles to the Atlantic City Country Club, several miles from the hotel, where they were entertained at luncheon. After a rest at the club the party was driven back to convention headquarters by a cir-

cuitous route, which enabled the ladies to observe the various points of interest in and near the city.

Those Present.

Those present were W. D. Andrews, Syracuse, N. Y., W. D. Andrews, Mrs. E. C. Babcock, Miss Rhea McEvers; W. D. Andrews, Buffalo, N. Y., C. N. Andrews, Mrs. C. N. Andrews; American Talking Machine Co., Brooklyn, N. Y., R. H. Morris, Wm. Barker; The Aeolian Co., New York, Miss Ruby Spaulding; Andrews Music House, Bangor, Me., M. H. Andrews, W. G. Jordan; Blackman Talking Machine Co., New York, J. Newcomb Blackman, Mrs. J. Newcomb Blackman; Emanuel Blout, New York, Mr. and Mrs. Emanuel Blout, Misses Jeanette and Mildred Blout; Louis Buehn, Philadelphia, Pa.; W. H. Buescher & Sons Co., Cleveland, O., Mr. and Mrs. W. H. Buescher, A. H. Buescher, Mr. and Mrs. J. G. Card, Miss E. Volk, Mr. and Mrs. MacCall; C. Bruno & Sons Co., New York, Chas. F. Bruno, E. G. Evans; Cressey & Allen, Portland, Me., Frank C. Allen, Louis W. Fickett; the Corley Co., Richmond, Va., F. W. Corley, Fred R. Kesney, J. W. Greenor;

E. C. Rauth, Secretary.

Cohen & Hughes, Baltimore, Md., Mr. and Mrs. Cohen, E. Greensfelder; I. Davega, Jr., New York, Mr. and Mrs. I. Davega; C. H. Ditson & Co., New York, Paul Carlson; E. F. Droop & Sons Co., Washington, D. C., Mr. and Mrs. C. L. Houser, Miss Jones, Carl A. Droop, W. C. Roberts; W. J. Dyer & Bro., St. Paul, Minn., G. A. Mairs; Oliver Ditson Co., Boston, Mass., H. A. Winkelman; Elmira Arms Co., Elmira, N. Y., W. O. Crew; Eclipse Musical Co., Cleveland, O., T. H. Towell; Eastern Talking Machine Co., Boston, Mass., E. F. Taft; E. F. Eisenbrandt & Sons, Baltimore, Md., C. H. Eisenbrandt; Elyea-Austell Co., Atlanta, Ga., Mr. and Mrs. E. N. Upshaw; Finch & Hahn, Albany, N. Y., Mr. Finch, Mr. Young; Florida Talking Machine Co., Jacksonville, Fla., W. N. Dunham; W. F. Frederick Piano Co., Altoona, Pa., French Nestor, W. F. Frederick; J. B. Greenhut Co., New York, Mr. and Mrs. N. Goldfinger; Grinnell Bros., Detroit, Mich., Mr. and Mrs. H. Rupp, Mr. and Mrs. I. L. Grinnell, Miss Grinnell; Thos. Goggan & Bros., San Antonio, Tex., Fernando de Arredondo; C. J. Heppe & Son, Philadelphia, Pa., H. E. Ziegler, W. J. Elwell, F. J. Heppe; O. K. Houck Piano Co., Memphis, Tenn., O. K. Houck; O. K. Houck Piano Co., Little Rock, Ark., J. F. Houck; O. K. Houck Piano Co., Nashville, Tenn., Olney Davies; A. Hospe Co., Omaha, Neb., A. Hospe; Charles Jacob, New York; J. W. Jenkins' Sons Music Co., Kansas City, Mo., Burton J. Pierce; Knight-Campbell Music Co., Denver, Col., Col. R. H. Arbenz;

W. H. Reynolds, Treasurer.

tor Co., to honorary membership in the organization.

At the present time only eight jobbers of the Victor goods are not members of the association and of the present membership of 85 only two concerns are not exclusive Victor jobbers.

During the course of the meeting numerous inner trade problems of importance to Victor jobbers were taken up for discussion and action and were referred to the incoming executive committee for what final action might be considered necessary.

Next Convention in San Francisco.

At the close of the session invitations from a number of cities were read and it was decided to hold the next annual convention of the association in San Francisco at a time approximating that fixed by the National Association of Piano Merchants for its 1915 meeting, owing to the fact that a number of the jobbers are also piano dealers and members of the merchants' association.

The choice of San Francisco as the next meeting place was made largely as a result of the efforts of L. S. Sherman, head of the prominent Pacific Coast music house, of Sherman, Clay & Co., who made a trip to the convention for the special purpose of securing the next convention of the association for his home city. Mr. Sherman was armed with a letter of invitation from the Hon. James Rolph, Jr., Mayor of San Francisco, and also a letter from Chas. P. Moore, president of the Panama-Pacific International Exposition.

Others present at the convention festivities were Jos. Fink, Fink Talking Machine Co.; A. C. Fen-

Co.; E. H. Lansing and wife, Boston; M. A. Cappel, Herzog Art Furn. Co., Saginaw, Mich.; M. Mazur Mazur Piano Co., Baltimore; Chas. F. Johnson, Pooley Cabinet Co., Philadelphia; Edw. G. Schloss, E. Schloss & Co., New York; Mr. and Mrs. Max Strasburg, Mr. and Mrs. W. D. Trump, the Max Strasburg Co., Detroit; Wm. A. Condon, Willard V. Cook, Pathscope, New York; Geo. P. Troyer, J. R. Jones, National Publishing Co., New York; Wm. Reiser, Stewart & Co., Baltimore; J. B. Ogden, Lynchburg, Va.; Mr. and Mrs. S. O. Wade, Wade & Wade, Chicago; H. A. Dalley, Geo. W. Smith & Co., Philadelphia; S. Semels, L. Bamberger & Co., Newark, N. J.; B. B. Wilson, Talking Machine World; R. Montalvo, Jr., New Brunswick, N. J.; Milton Isaacs, New York; M. B. Clausen, Masterphone Corporation, New York, and George E. Bates, New York Album & Card Co.

Motion Picture Views of Victor Co.'s Plant.

Impressive Exhibition of the Process of Manufacture of Victrolas and Records From the Lumber Yard to the Shipping Platform, Given in Atlantic City During Convention—C. G. Child Discusses Recording Problems—Mrs. Frances E. Clark Gives Illustrated Lecture on Progress of Educational Campaign.

(Special to The Talking Machine World.)

ATLANTIC CITY, N. J., July 8.—Never before in the talking machine trade and probably not in any industrial field has the process of manufacture of an article been set forth so completely and in such detail as was the making of Victor talking machines and records when motion picture views of each of the departments of the factory from the lumber yards to the shipping platform were flashed upon the screen at the Apollo Theater yesterday for the benefit of those attending the convention of the National Association of Talking Machine Jobbers.

The pictures required three weeks of constant work on the part of the operators and much careful thought and effort on the part of the factory officials for their production, and although the jobbers had learned through indirect channels that the films were of an elaborate character, they were not prepared for the magnificent and impressive exhibition that was offered to them.

Beginning with the immense lumber yard, the great piles of lumber, some as high as a four-story house, were first shown on the screen, with the men at work stacking newly received lumber, or, preparing stock for removal to the dry-kiln. From this point the consecutive operations connected with the manufacture of Victrola cabinets were shown in detail including the cutting and carving of various parts, with scores of wonderful automatic machines of original design making for both speed and absolute accuracy; the staining and finishing of the complete cabinet after the parts had been assembled in a trifle over a minute, and the final inspection.

Next came the pictures of motor making which included views of the machines making all the various parts, even to the tiniest screws, the powerful presses for stamping out the spring cases and the machinery for making the springs themselves. The inspecting, testing and assembling of the motors was shown in a most comprehensive manner.

The pictures then lead through the various other departments to the shipping department, where machines were shown as they were finally inspected, crated, checked, and, lastly, placed in the waiting trucks for shipment.

No detail was overlooked and every operation was shown as actually carried on, general views of entire departments being supplemented with close up views of the actual operation of the various and wonderful machines.

C. G. Child Discusses Recording Problems.

After the presentation of the views of the manufacturing departments as relating to the machines, Louis F. Geissler, general manager of the Victor Talking Machine Co., introduced Calvin G. Child, head of the Victor recording laboratories, who gave a most interesting summary of the problems faced by those whose duty it is to secure the artists and select the music from which to make up the record lists. He said:

Some years ago, we conceived the idea that the only way to protect our business was, in the words of the phrase which we coined at that time, "to take it out of Coney Island." By that I mean to give it a permanent and authentic standing in the musical world; to make the Victor an acknowledged musical instrument by obtaining for you the best music and the greatest singers that were to be had in the world.

We have our dance craze; we have our rag-time craze; we have our good old summer times; we have the days of the Banks of the Wabash, and you know as well as we do, how short lived most of these sudden popular crazes are, they come as quickly as they go.

The backbone of the Victor business has been the Red Seal work, the records and music given to you by the great singers of the world who are

represented in the Victor catalog. It is just as necessary for me to make the contracts and arrangements for the Victor Co. with these people interesting and profitable as it is for the Victor Co. to give you a fair and generous profit on the business which you are doing, and we can only do this with your help.

The field of what is known as the bel canto music and style of singing of the older Italian composers grows more and more limited each year, and we are compelled to turn to the concert field and the concert repertoire to give our artists a certain number of new representations each year. It is a fact that Mme. Marcella Sembrich goes on concert tour through the United States and fills the theaters in which she sings, giving a wonderful program of Brahms, Schubert, Schumann, and that her audiences are always interested and instructed. It is a fact that perhaps one of the most successful concert tours in the history of concert managers was that of Miss Geraldine Farrar in the fall of 1913, and it is a fact that selections of this kind when listed in the Victor Co.'s catalogue meet with little recognition from our dealers, and a great many come back to us on exchange propositions.

I have in mind a little song of Mme. Schumann-Heink's "Die Forelle" ("The Trout") a little fishing story in German. The sales on this record have been so very small that we feel almost compelled to withdraw it from the catalog; yet all my friends who have heard this record are delighted with it. Some friends from Chicago said on hearing the record, "that brings me nearer to Schumann-Heink than I have ever been before."

We listed quite a number of the selections which Miss Farrar was to use from coast to coast in her concert tour last year and the majority of them have met with the usual lack of success of concert songs listed in our catalog. I do not know to just what cause this lack of interest in this better music may be attributed. It is not quite as easy to sell as "Care Nome" or the Miserere from "Il Trovatore" or the Quartet from "Rigoletto," but as soon as the patron becomes interested in these better things, he will turn more and more to them.

I find with much regret that quite a few of the Victor jobbers with whom I have talked, do not really know the monthly bulletin. It would seem to me that with the great interests which you have in this business, a serious study of the monthly bulletins would be of wonderful help.

We must go on making records by our big artists; we must show them each year an increasing royalty account for selling their records; royalty is the only way in which we can keep the artists alive to the interests of the Victor Co., therefore, I ask you gentlemen if you will not try and aid us in an effort to make this really better historical music in Victor records move faster than it is doing at present.

The profits on the Red Seal records are greater to you than any, and we believe that a careful study of the lieder and concert songs by your sales people will awaken them to the possibilities of this kind of music, and we hope that you will see the real necessity of helping us to get better results from this field.

The activity of the records in our Red Seal catalog is one of the greatest importance to the Victor business, and I hope that you gentlemen will consider my appeal to look into the class of music to which I have referred and see if it cannot be handled and put before your customers in a way that will create a greater interest in it. There are few left of the older operas which we have not already drawn on very heavily. The new grand opera of to-day is largely a musical drama with recitative work and not with the

wonderful melodies which we find in things like "Traviata," "William Tell," "Faust" and the older operas, but the field of the lieder and concert songs is almost unlimited and we must draw upon it for future work and we must not permit our artists to become discouraged at their small sale.

I wish it were possible for you gentlemen and you good ladies to know these great singers as I know them. I am asked frequently: "Do you not have all sorts of trouble with these singers?" And I say frankly, very little. They have their temperamental side, without which no singer can be great; but I find them very human and I could tell you story after story of the great singers which would show you that they are all real people, with a very human side, all keenly interested in what we are doing with them and anxious above all things, to have their records just as good as it is possible to make them.

When we first began this work, almost anything was considered good enough by some of the singers, but they very quickly realized that if they did not sing the very best they knew how for their records, it reflected on them and not on the machine, and it is quite a common thing to have a date with one of the big singers cancelled, because while they feel that they are perfectly fit to go through an operatic performance before an audience in the opera house, they feel that they are not just in condition to hand down a record of their work to posterity.

We have had, at times, some criticism from you gentlemen on repetition of repertoire, but I ask you to look at your sales on such things as the Prologo from "Pagliacci" and other popular operatic numbers of this kind and I have to tell you that when a new baritone comes and makes a great success in "Pagliacci," we must give to you for the friends and admirers of that singer the "Prologo" and your sales show that this has been a wise policy.

I thank you very much for the attention which you have given these few remarks and I hope that they will have the effect of calling your earnest attention to the class of music to which I have referred.

Views of the Recording Laboratories.

Following Mr. Child's address there were thrown on the screen views of the recording laboratories with six prominent members of the Victor Light Opera Co. in the act of recording the Sextet from "Lucia," accompanied by the Victor Symphony orchestra. Next was shown the other side of the partition with the master record in the actual process of the making and then the record was followed through the various details of manufacture from the raw material and to the placing of the finished record in the envelope for delivery. The exhibition wound up with pictures of over six thousand employes of the Victor Co. leaving the various buildings of the plant—a veritable army of men and women of a distinctly high-type—and finally views of General Manager Geissler addressing the employes, and the members of the light opera company singing the Sextet from "Lucia" in the open.

The exhibition was opened with a short address by Louis F. Geissler, general manager of the Victor Co., and as the pictures were thrown on the screen they were explained by Henry C. Brown, advertising manager of the company who, with the assistance of the department heads, had gathered together a great fund of valuable and interesting information regarding the various sections of the work. He made an excellent lecturer.

The entire exhibition was both impressive and inspiring, showing, as it did, the inner workings of one of the largest manufacturing industries in the United States. It proved that the enormous

(Continued on page 32.)

MOTION PICTURE VIEWS OF VICTOR CO.'S PLANT—(Continued from page 31).

business of the Victor Co. is built upon a foundation of progressiveness and efficiency, although with all the progress it has not kept pace with the enormous increase in the demand.

Mrs. Frances E. Clark's Interesting Address.

Before the presentation of the motion pictures Mrs. Frances E. Clark, head of the educational department of the Victor Co., delivered an address on the progress of the campaign to place the Victor in the schools during the three years she has been engaged in the work.

Mrs. Clark's address, which was illustrated with an interesting series of slides showing the Victor in schools in various sections of the country, was as follows:

Education is and has always been the highest function of the State. Of what that education shall consist has furnished material for controversy in all ages, and yet, the processes of learning, the methods of teaching, the subject matter for instruction, have remained more stable than any other phase of the evolution of government. Recent translations of ancient tablets, buried for eons of years, give their mute testimony of the learning of ancient people in the forgotten civilizations of Babylon and Nineveh.

In the past decade our schools have been undergoing more vital changes in the fundamental purposes of education than has taken place in hundreds of preceding years.

Our colleges are based squarely on the traditions of Cambridge and Oxford; our medical and scientific schools largely on the great universities of Germany; our law and theology on that of ancient Rome, by way of the wonderful schools of England.

Our high schools were but modified, miniature colleges, and the grammar schools were forced to adapt their courses of study to serve the high schools in the latter's efforts to fit the entrance requirements of the colleges.

As standards advanced, the entire cycle became enslaved to pedantic courses of study, growing more and more away from the real needs of life of a great majority of the people, and at the worst, artificial, stilted and inadequate.

The great impetus given to industry and manufacture by the discovery of new methods of making iron and steel with anthracite, the discovery of gas and oil, the discovery of gold and silver and copper and other metals in commercial quantity, the invention of many labor-saving machines, and more than all these by the stupendous movement of immigrants from caste ridden Europe, rushing here to better their condition, demanded a revolution in educational methods. The schools were slow, frightfully slow, in responding, and so steeped were they in tradition that not until ten or fifteen years ago did the movement gain much headway. Then manual training was cautiously introduced, trade schools were established, a taste of domestic science, cooking and sewing were tried for girls, and finally trade schools for these as well as for boys. Finally the whole educational world became intoxicated with the new idea, and went literally mad with zeal to introduce vocational training. Industrial topics filled the program of our conventions to the exclusion of other subjects. Out of it come a great awakening in our greatest asset, agriculture. Boys and girls' clubs were formed and two ears of corn were made to grow where one grew before. School gardens have taught a great art. The agricultural schools have brought scientific farming, which, with irrigation, has transformed millions of waste acres into homes. A healthful respect for manual labor has come, and in all the schools has arisen a desire to aggrandize real knowledge of real things.

At one commencement a few weeks ago, all the graduation exercises were concrete illustrations of helpful things learned in the course. One girl with tubs and modern equipment, taught how washing should be done. One boy illustrated, with a real pony, the care of horses—another with block and cleaver, and a dressed veal calf, taught the science of meat cutting. This is an improve-

ment over the "Beyond the Alps lies Italy" stage, and argues well for the future.

With all this much needed reform there has been a very grave danger of too radical a departure from time honored standards amounting in places to a sort of moblike cry for throwing away everything save a smattering of the sacred three R's. Leading educators are now counseling caution and pleading for a clinging to the cultural studies that must be taught if we would not subordinate our schools wholly to the commercial, industrial and utilitarian. A program being given this week at the National Education Association in St. Paul has such titles as "Training For Social Responsibilities," "The Humanities, Old and New," "Vocational Education, its Menace," "Let Both Grow Together Until the Harvest." Some culture for the masses we must retain or forfeit utterly the respect of Europe's civilization and descend to the mere money grubbing of which we are accused.

Next to reading and literature, music contains more elements of culture, refinement and beauty than any other one thing. It is universally innate and touches individual and community life in more places and in more ways than any other one branch taught in the schools. It possesses also remarkable powers in mental development, quickens the imagination, stirs and controls the emotions, and takes high rank in disciplinary, remedial and medicinal powers.

It was not then wholly theory that led up to the inauguration of this nation-wide movement of using "The Victor in the Schools" but a knowledge of conditions in the education world.

Co-incident with the recent great awakening in music in all lines, the school people were discovering that music possessed intrinsic merit—at once cultural, delightful and strongly educational. How to get enough of it to do any good was the problem; sight-singing was not enough; rote songs were not adequate; very occasional concerts by local artists only isolated cases in a great desert—and then—under Divine Providence—came the perfection of the Victor and Victor recording of the great music of the world which could be brought into every school, suburban or rural—and to the hearing of every child—not for amusement, not for entertainment (although it is entertainment of the highest order) but for a great and vital power in education.

Lincoln once said, "You can fool some of the people all the time, and all the people some of the time, but you cannot fool all of the people all of the time," and the great underlying fact which accounts for over 1,760 cities accepting our educational plan is, that it has in it inherent truth—it is of real use and genuinely educational—it suits the needs of the school people everywhere and furnishes at a most opportune moment an acceptable diversion from the industrial craze, and, happily, one that is entirely democratic, equally loved by all the children of all the people.

While we have sought to furnish special records to fit in with the special activities of the school day, the great field lies in the realm of appreciation of great music.

Just what is meant by appreciation of music? It is a term being used and abused indiscriminately. Appreciation of anything means that one understands it or can assimilate it and make it one's own, or that one can compare things known and relate them to the like unknown; or to estimate or judge of the merits; or to esteem and value highly. To appreciate an ideal thing, to build a vivid mental picture of things not seen, or to create a tonal conception of things not heard requires an experience in like sights and sounds as material for evolving such ideals. Our ideals are mirrored in our reals. No ideal is attained without having achieved many reals on the way.

Aspiration is creating images of the ideal from the materials of the real things at hand. Dr. Winship says, "Appreciation is the real thing while aspiring to the ideal thing." Appreciation is picking a bale of cotton while aspiring to "Wear a white robe all over God's Heaven." Appreciation is building a home in a two acre lot full of beautiful trees while aspiring to walk down "Unter den Linden" or visit Westminster Abbey.

One person can appreciate a great painting, because he has studied balance, tone, perspective, values and color. Another sees only a picture.

One walks through a woods and finds beauty at every step—trees are recognized by bark, leaf, limb—here a medicinal plant—there an orchid—on that twig hangs an oriole's nest—in that hole a flicker's—in that tuft of grass a flock of quails

—over on that swinging reed a red wing and on that thistle a gold finch; here a trillium, or May apple, or a Judas tree, or a thorn apple. Another walks stumbling along, merely grateful for shade. "A primrose by the river brim, a yellow primrose was to him—and it was nothing more."

One walked through the electrical display at the Buffalo Exposition and saw visions—another thought the lights pretty. One goes into a great machine shop and is thrilled and learns something from every bolt and screw—another is merely annoyed at the noise.

To appreciate music, in one sense, means that one must know enough music to be able to judge correctly of relative values—in another sense, that one has heard enough to have created a love and desire for hearing more of it.

A Victor in a school, properly used and sufficiently equipped with educational records, is a well spring of Victor publicity, and an open sesame to every home in the community. The school Victor is only the Joshua who spies out the Victorland for the whole army of people, who hear of it through the children.

We are proud of our 1,760 cities and the thousands of schools who have followed our plan. Without any doubt six or seven million children are now becoming Victor enthusiasts through the schools and considering the three years of effort, this is astonishing and most gratifying, but we have only just begun. The great field of the rural school is not yet touched. There are 212,000 one-room rural schools enrolling 6,700,000 children. In two or more room rural schools there are enrolled 4,466,000. We have only nicely started in the best of our States and cities. There are over 525,000 schools in this country enrolling 22,900,000 pupils, and we have as yet reached but a comparatively small per cent. In 1911 there were 10,234 public high schools and 1,781 private high schools, enrolling 1,115,326 pupils, in every one of which should be a Victor. Since 1911 this number has been materially increased.

This present year there were graduated from the elementary schools 1,600,000 pupils; from the high or secondary schools 160,000; from the normal schools 35,000, and from the colleges 25,000, totaling 1,940,000. As each June sends out of the schools a new army of graduates to take their places in the world, each September fills the broken ranks with many times as many more.

In addition to these schools there are evening schools, continuation schools, business schools, music schools, the prison and reformatory schools and the entire list of Governmental Indian schools, totaling 1,300,000 pupils.

Is it not plain that if 1,940,000 pupils graduating from the schools this year (and a like or greater number next year, and the next) may, by means of the Victor service, hear the music of the masters during their school life, that we shall have set in motion the greatest force ever known in the history of the world for the building of music appreciation—a love for and working knowledge of music in all forms?

These pupils going out into life, forming homes and furnishing the most valuable addition to our labor quota, must, in the next ten years, form the most vital element in our body politics, for our schools are the melting pots which transform all elements into our composite civilization.

If the 20,960,000 undergraduate pupils may have the same opportunity to learn to appreciate and know the music of all nations, in all ages, we have an immediate audience of startling proportions. If even 75 per cent. of all these pupils carry this enthusiasm and much of the actual music into the homes to three other persons, which is the average, our audience is multiplied to the astonishing number of 74,425,000. Here is missionary work worthy the devotion and consecration of our best efforts. A missionary brings good tidings to needy souls. The schools need good music—we have it.

The Victor Co. is sending good music to the children of America and through the children to the homes. The desires, wants and needs of the children are the most potent appeal that can be presented to fathers and mothers, relatives and all lovers of children. The Master knew this when he said, "And a little child shall lead them." Victor music in the hearts and on the lips of the children of America is not only the highest possible endorsement from a commercial standpoint, but it is far more and infinitely higher than that. It is our power for good under God's hands for the betterment of the race to each life touched. "The Victor in the Schools" brings "Light in dark places," carries joy, delight and happiness to the children of whom Dickens said:

They are idols of heart and of household;
They are angels of God in disguise;
His sunlight still sleeps in their tresses;
His glory still gleams in their eyes.
Oh those truants from home and from heaven,
They have made me more manly and mild.
And I know now how Jesus could liken
The kingdom of God to a child.

Annual Banquet of The Jobbers' Association

Held at Barnay's Restaurant, Atlantic City, on July 7, Was a Notable Affair—Over Two Hundred Jobbers and Guests Present—Addresses Made by Louis F. Geissler, Col. Edward Lyman Bill and Congressman McCoy.

(Special to The Talking Machine World.)

ATLANTIC CITY, N. J., July 8.—The annual banquet of the National Association of Talking Machine Jobbers, for which elaborate preparations had been made, was held at Barnay's Restaurant last night and was particularly notable for the large attendance, over 200 jobbers and their guests being present. The committee had worked hard to make the banquet a success, and despite certain drawbacks due to the service offered achieved its purpose in a most satisfactory degree.

The menu was presented in a most attractive form in a folder of sky blue, printed in dark blue and silver; a most effective combination. The dinner proper was carried on amidst general jollification. Burton J. Pierce and his famous "Angel Chorus" to the number of thirteen occupied a large round table in the center of the room and made themselves heard at the slightest excuse. The banqueter who did not make an effort to add to the general joyousness was mighty lonesome.

Following the lighting of the cigars, James F. Bowers was introduced as toastmaster by Joseph C. Roush, the retiring president, and proceeded to attend to the duties of his office in his well-known and inimitable manner, first paying a most graceful compliment to the many ladies present, and thus insuring respect and attention.

The toastmaster introduced as the first speaker Louis F. Geissler, general manager of the Victor Talking Machine Co., who was received with tumultuous applause by the assembled diners and who said:

Louis F. Geissler's Address.

I express my appreciation of the honor of being again requested to address your association.

This is the eighth consecutive year that this compliment has been paid me as the representative of my company, and, as the years have rolled by, the members of your association and your families have grown closer and closer to me and entered into my business life, until you have pre-empted the recesses of a very friendly heart.

In consequence of the frequent and pleasant meetings with your committees, and our distributors in person, it becomes increasingly difficult to hit upon a subject for discussion here that has not already received attention at such meetings, and I will refrain from recapitulating statements made at past annual banquets, as it seems to me that I have covered in past talks all the main points of our own company's organization and its condition as well as the patent field in its generalities as far as you would be interested.

I have also, from time to time, appealed to you for co-operation and assistance in defending your own and our position in the fields of patents and commercial methods and I may say that, with very few exceptions, we have to thank you for the heartiest response.

Improved Methods of Merchandising.

We are, moreover, thankful to-day for the very evident disposition on the part of dealers and merchants generally throughout America to take a prominent and assertive position in the ranks of those merchants committed to broad, decent and fair methods of merchandising.

Since your last annual meeting, we have passed through one of the most crucial tests in our history; I refer to the unsettlement and doubt relative to the maintenance of the one price system as engendered by recent court decisions and agitations, which happily have almost disappeared and our dealers have gone on their way, with the least possible inconvenience to their business, endorsing and showing thereby the utmost confidence in the newly adopted distributing methods of our company.

No one can expect uninterrupted and unqualified success in any enterprise or undertaking—there will always be ups and downs—but, during

this time, there has been no toleration of the degrading practices of price cutting nor will such practices, in the future, become more than a passing incident in the history of the art.

A Prophecy That Was Fulfilled.

I would like to quote one of the opening paragraphs of my talk to you last year at Niagara Falls, touching on the business conditions then existent. I said, that:

"While probably few of you have been affected and some sections of the United States are absolutely free, there is no doubt that taken in its entirety, i. e., including the field of industrial securities, there is a declining tendency noticeable in total business results. However, the continuous and increasing demand of ninety-five million popu-

Louis F. Geissler.

lation in this country, to say nothing of our wonderfully increasing export trade, is always sufficient to make certain a vast volume of business for the merchant and manufacturer."

Notwithstanding the demonstrated truth of that statement of a year ago, you all know how we have been blessed with a peculiar success, not only during the last half of 1913 but the first half of 1914; but, to claim that business conditions at the present time are generally satisfactory would be foolish.

There are several and various causes for business depression apparent to us all, but every man of business experience and thought realizes that it is only a question of time when we shall see a decided improvement and this country will again surpass her past records for prosperity. Evidence accumulates that nature is this year determined to compensate us for the afflictions or deficiencies of business or politics.

Your ever increasing success—which is reflected in our own—at times when other industries are not prosperous, is inconceivable to outsiders, and, in some cases, has aroused a spirit of jealous envy.

The failure of imitators and usurpers to successfully detract from your success must be apparent on all sides. The "bigness" of your success has been, and will continue to be, the magnet to draw the attacks of pigmies.

The "big things" that our Government has accomplished and the big things that private citizens have achieved were once the glory of America and have been our boast.

It is an easy matter to find people who will whack and hammer the prosperity of the successful. Few people realize how interwoven are the interests of all.

A Mania for Littleness.

The recent proposal of one of our senators that no corporation in any line of business should be allowed more than a specified capital is characteristic of the mania for littleness which has seized on the legislators, but, when the destinies of nations are determined by most colossal international trade wars, who shall and how can we restrict the assets of American giants without respect to the enormous resources of their competitors; it would conduce only to America's downfall, for there is no place for pigmies in a war of titans.

Roosevelt remarked but a few days since—and I hope his sentiment may be a plank in the platform of any winning party: "That we must encourage honest business and allow that business concentration which will give the power necessary to serve. This policy of the encouragement of decent business is as important to the welfare of our people as is our other policy of effective warfare against corrupt and unfair business."

Size and strength are, however, by no means synonymous; sad is the lot of the giant in business who lacks the strength to bear the burden of his size.

Abraham S. Hewitt once remarked that "Many large combinations carried within themselves the seeds of suicide." He referred particularly to abuse of power to control output and prices, and, through the unfortunate history of great business concerns which have unduly expanded within the last generation, this fact has been frequently illustrated.

Fortunately for us, and our constituents, there are no entangling alliances, no combinations or understandings with competitors to hamper us in an expansion with which we hope to successfully cope.

I should like to take this opportunity to impress upon the minds of my merchant auditors, in connection with the laudable ambition to do a big business, that all important—but recently hackneyed—phrase of "Safety First"—"Safety First."

For Permanent and Healthful Increase.

The Victor Co. is very anxious to go on increasing its business, but along permanent and healthful lines—through certain mediums and a certain quality of concerns, which are, in a great measure, a guarantee of permanent success.

Relative to expansion, it may be that even we do not appreciate nor grasp the possibilities of expansion in the talking machine trade, but, at least, we have been proof against allurements and blandishments on dozens of occasions where our goods have been sought in enormous quantities by those whom we considered undesirable representatives.

We have inveighed against inordinate expansion on the part of those with more enterprise and imagination than cool judgment and capital.

We quite naturally desire our distributors and dealers to continue successfully in their present expansions; but—"Safety First"—not a permanent dollar is to be gained by dangerous accounts. Your own bad debts and your own overstocked dealers are our liabilities; we would pay, in the end, by a decreasing business and loss of enthusiasm for our wares. We do not consider a machine nor a record really sold until it has reached the hands of the consumer.

On the Subject of Credits.

Your credit department is either one of your most expert salesmen or a serious drag upon your business.

(Continued on page 34.)

BANQUET OF THE NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 33.)

I would not for a moment create the impression—I would not dare to talk on this subject if I thought to create an atmosphere of ultra-conservatism. I plead for extensions of credit, with judgment; for a credit that can safely be extended, not meaning to coldbloodedly extend or restrict credit on a mercantile report—I mean to suggest most careful personal investigation of your debtors by your credit man.

The fact is, our business lends itself peculiarly to extensive credits and more especially on the part of those who are dealing in talking machines exclusively—practically, those dealers must fail in business to cause you loss and this is not a frequent occurrence and will not be unless they fail to exercise proper business judgment and precaution by limiting their credits and enforcing their collections.

You are not doing the overambitious young merchant a kindness by encouraging him to go too far beyond his capital or immediate good prospects for business; you would be spoiling your customers and you would soon have them in an unhealthy and hopeless condition, harassed by a financial condition that detracts from their efficiency as a salesman.

* * * *

In those of you who retail largely, there lurks a germ which I fear—I refer more especially to the piano and instalment houses.

I know just how easy it is for a concern, habituated to piano instalments, to attempt or incline to apply piano reasoning and financing to the Victor or Victrola business.

I beg of you to see that your Victrola department stands on its own feet; that the small percentages of piano payments are not applied to your Victrola department—it is not necessary; your customers do not expect it, and, in some cases, it will quickly consume your capital, and stop healthy progress if you persist in it.

If each of you would make up your mind to let the "other fellow" have the undesirable business, the undesirable business would disappear.

I was once told by a senior partner that "There are plenty of good people in this world to sell goods to without going after lame ducks." This is absolutely true.

A Lesson from the Piano Men.

You all have had experience with piano salesmen who seem to be totally unfit to talk to anybody that can afford to pay over \$6 a month on a piano and who always meet with the utmost success in reducing a \$20 a month prospect to a \$10 a month payment and then exult over their doubtful success.

You all know that there are peddlers by the thousand who could never think higher than 25 cents a week payment on a rug or a clock—don't employ that kind.

The Victor Co. does not propose to finance that kind of a distributor and the distributor should not, and cannot (if the prescribed Victor credit terms are conscientiously complied with) carry that kind of a dealer. Your aim and ours must be to so conduct our business as to conduce to the longevity thereof—to reiterate—"Safety First."

Forming Dealers' Association.

I am pleased to note that my suggestion of last year that "You form and encourage to be formed dealers' associations in the respective cities" has been acted upon to some extent.

The talking machine trade people are a friendly people—generally more friendly than many other lines of competition—and the spirit of fraternity and courtesy, one to another, will change the entire atmosphere, remove damaging and cutthroat competition, and, if this association effort is persisted in, there can be established, through it, in each city a spirit of friendly, though active, competition and a confidence and candor as gratifying as that which we can flatter ourselves exists between us here.

I will not attempt to make promises or prophecies at this time relative to Victor goods nor Victor improvements or innovations. I have

nothing sensational to spring—I will only state, generally, that our laboratories are as busy and enterprising as ever. You will have new goods or improvements as rapidly as we think you can healthfully digest or take care of them.

We shall continue our efforts to justify your confidence in us and our policies, and I beg for your continued interested assistance in carrying them out in every detail.

I beg that you will not be sidetracked or attracted by seemingly profitable "side lines" of a

James F. Bowers, Toastmaster.

claptrap character. You are directly attacking your own interests as well as ours by such.

In closing, I desire to congratulate your association on this wonderful convention; you have attracted this year many faces unfamiliar to previous conventions, and I hope you will all return to your homes feeling that you have done yourselves and the manufacturers much good by your visit.

The next speaker was Col. Edward Lyman Bill, editor of *The Talking Machine World*, who spoke as follows:

Col. Edward Lyman Bill's Speech.

Caruso, a link in the artistic chain with which you are all familiar, was motoring in the country recently when his car broke down in the midst of a severe storm, and while the chauffeur was repairing it he entered a farmhouse to get warmed up a bit. He chatted with the farmer before the wood stove in the kitchen, when the latter asked him his name and he told him it was Caruso. At that he threw up both his hands. "Caruso,"

Edward Lyman Bill.

he exclaimed, "Robinson Caruso, the great traveler! Little did I expect ever to see a man like you in this 'ere humble kitchen." Even the farmer was a link.

Link by link the chain of business success is forged, and it is of the utmost necessity that each link be strengthened in every possible way, because, should there be a weak link, when the crucial moment comes the chain is parted, and to repair it may mean material loss. It may mean a serious setback while the machinery is halted undergoing repairs.

Chains should be constructed with a careful avoidance of weak links, because when the stress and strain comes a sad collapse may occur.

A great link in the business chain is the manu-

facturer, the one who produces. This link should be strongly welded and should be composed of forces which will stand any strain, for if a weakness occurs in the producing link then disaster is bound to follow.

In the talking machine trade the manufacturing links have been composed of elements which have withstood the strain and wear to which industrial and commercial usage subjects them.

Another important link is the jobber—the intermediate link between the manufacturer and the dealer. The jobbers are dealing with large interests, and it is necessary that their link be composed of fine metal capable of standing terrific strain.

Then the next link is the retailer, the man who sells to the ultimate consumer. This link in the business chain is brought into the most intimate contact with our purchasing public. It is perhaps more delicately susceptible to public sentiment than any other composing the chain. It is a link which easily gathers a big accumulation of grievances, and it is too close, perhaps, to the consuming masses to ever be wholly removed from them.

Another important link is advertising; the power that creates demand; the power that acquaints the public with what man has accomplished in the special fields of human endeavor; the power that makes the industrial world move on. This is a chain that creates vast aggregate buying power, and, I may add, that it was not long ago when this power constituted an exceedingly weak link in the chain, by reason of the dishonest methods adopted by some national advertisers.

If it be criminal for a salesman to lie and to deceive one man in trying to close one sale, is not the advertising man or the publisher equally criminal when he spreads that lie before the confiding eyes of millions of Americans? But happily that link has been strengthened and some of the men who years ago were putting forth misleading, dangerous and lying advertisements have now materially changed their policies.

The people are entitled to protection, and advertising is too vast a power—too noble a calling, to suffer from the misdeeds of the few.

In the old days trickery and deceit in retailing was aided and encouraged by fraudulent methods of publicity, but as in everything else the world had to be educated. It has been a slow process, but no one can deny that within the past ten years marvelous steps have been taken which makes merchandising better and advertising cleaner in all lines. We see these conditions reflected in the publicity world, in the link in the chain in which I am specially interested.

There are plenty of papers that will not accept questionable advertising, or advertising in which there is an element of doubt as to the ability of the advertiser to live up to the statements made in his announcement. In other words, the advertising pages of the big publicity mediums reflect honesty in merchandising in a greater degree than ever before. Hence it means, as a natural sequence, that out of these conditions there should come price standardization.

Now, unless there be fixed prices, what is the real object of manufacturing institutions spending millions of dollars to create a trade-mark value in the homes of purchasers? If advertised articles can be cut and slashed according to the whims of the price-cutter, then why advertise to reach the public because everyone knows that price-cutting has no other effect than the lowering of the standard of values, and surely the individual or corporation whose money is invested in a manufacturing enterprise has the right to say what the public shall pay for their articles. Surely the public will not pay more than an article is worth and continue to purchase it.

The manufacturer's rights should be respected, and when one price is established generally by manufacturers, the unscrupulous merchant will be forced to abandon his plan of substituting cheap and inferior articles for the standard. In this way the producer will be a stronger link in the chain, for he will secure in a larger degree his rights as a maker, and the retail link will be

BANQUET OF THE NATIONAL ASSOCIATION OF TALKING MACHINE JOBBERS—(Continued from page 34).

strengthened because it will have a guarantee of protection in so far as price and quality are concerned, and the whole system of bartering and haggling, which almost amounts to a battle of wits, will be done away with.

The Supreme Court, by a hardly understandable decision, has stated that the maker of a nationalized product has no right to say how much the retailer shall ask the public for it, and yet the Government compels the railroads to maintain one price for all, and would not this provision prevent the manufacturer of trade-marked articles from doing the same thing which the Government exacts from the railroads?

With a standard trade-marked article the small dealer can meet in successful competition the large trade organization which has millions of assets, and yet cannot offer a standardized article at a less price than the small dealer who may occupy an obscure position in a great city.

The trade-mark is the rainbow of trade—without it modern advertising could not exist, and one of the great links in the business chain would be materially weakened. There could be no standardization of values and prices—no profit assurance for the future.

With a trade-marked article, a good merchant is always able to cope successfully with unfair competition and he is assured of a continuity of profits to a degree not deemed possible through any other means.

And so, we are all links in the great business chain, and we should remember that the chain is no stronger than its weakest link.

George D. Ornstein Arouses Enthusiasm.

The toastmaster next called upon Geo. D. Ornstein, manager of salesmen for the Victor Talking Machine Co., who was enthusiastically received by the assembled jobbers, who took the occasion to show their great respect both for Mr. Ornstein's personal characteristics and his ability in his chosen field.

L. S. Sherman's Address.

Mr. Ornstein delivered a short talk in a happy vein and was followed by L. S. Sherman, of Sherman, Clay & Co., San Francisco, who gave some interesting reminiscences of the manner in which Mr. Geissler first became connected with the talking machine end of the business while employed by Sherman, Clay & Co. and cast his lot in a new field to meet with the success that has attended his efforts.

Mr. Sherman told of the employ of Mr. Geissler to take charge of the small goods department of his house nearly a quarter of a century ago, and said regarding subsequent happenings: "In the very infancy of the talking machine industry, even before it had fairly started in this country, to use a Frenchman's expression, a wholesale liquor dealer came to me in the 'garbage of a gentleman,' stating that a sample talking machine had been sent out to him from New York with the request that his house take on the representation of it or place it with some responsible concern.

"As it was claimed to be a musical instrument he came to see me.

"If we were to take it on I realized that it should be handled by our small goods department, so I took the gentleman to Mr. Geissler's office.

"From the result of that interview the sample was sent us to inspect. The machine told some funny stories and made an attempt at being musical.

"A sample order was placed, soon followed by many others, and we became fully launched in the talking machine business. The business at the factory end was poorly handled. I believe they tried to run the factory from the lawyer's offices, where most of the stock was owned.

"The principal owners wanted us to buy some of the stock. There seemed to be signs of approaching disintegration that gave no hope for future permanency with them.

"Mr. Geissler was so dissatisfied with existing conditions that he came East to thoroughly canvass the situation.

"The result of that trip was that Mr. Geissler decided to cast our lot with Mr. Johnson and Mr.

Douglass; the wisdom of that throw has long since been verified.

"I do not have to tell you the history of the talking machine business since Mr. Johnson and his associates entered the talking machine arena, for you all know of the foes they have vanquished and of the victories they have achieved.

"When Mr. Douglass' health became impaired, necessitating his taking a complete rest, the Victor Co. needed a big man to fill a big position; they complimented our house in placing their choice upon our most important man.

"Mr. Geissler was an honored director and officer in our corporation; he resigned his position with us to assume the great responsibilities which now devolve upon him.

"You can now appreciate the importance of the little ad I wrote more than twenty-five years ago and its present influence upon the talking machine industry in transferring Mr. Geissler from the Doman Music Co., of Nashville, Tenn., to the responsible position he now occupies with the Victor Co. All credit to him for the transfer."

F. K. Dolbeer Well Received.

Frank K. Dolbeer, who recently joined the forces of the Victor Co. as credit manager, was next introduced and was accorded a hearty reception by his many friends among the guests. Mr. Dolbeer expressed his appreciation of the honor paid him in a graceful manner.

Walter I. McCoy Discusses Price Maintenance.

The final speaker was Congressman Walter I. McCoy, of the Ninth New Jersey District, who delivered a lengthy address on the subject of unfair competition and who dwelt at some length on the question of price fixing. Mr. McCoy explained the Sherman law and its aim and objects in a broad way, and cited a number of decisions of the Federal courts in some of the best known cases tried under that law, including the Standard Oil and the tobacco cases. He outlined just what the law was designed to accomplish. In the matter of price fixings Mr. McCoy said in part:

The court, as you know, has in several cases passed upon the question adversely to the right to control resale prices. Your contention is that under certain circumstances and surrounded by proper safeguards the fixing of resale prices, especially if it is accompanied by standardization of prices, is an economically sound proposition which, put into operation, will in the end and on the whole result to the benefit of the consumer, and so far as I am concerned I believe that your contention is sound. I do not propose to elaborate the arguments which to my mind lead to this conclusion. I have heard them made so ably before the Committee on the Judiciary of the House of Representatives by persons whose competency to make them is based on large experience and deep study, and whose arguments I know you have read, so that I should be simply carrying coals to Newcastle if I were to attempt to go into that particular part of the discussion.

Selfishness Behind Price Cutting.

I have been satisfied by those arguments that many of those who indulge in price cutting do so solely for their own selfish purposes; that they have not the slightest desire to serve the public by giving them good value at a low price; that in using standard and largely advertised goods as leaders at cut prices they are morally, if not legally, taking another man's property for their own benefit without any return for its use; that in the long run the net result of these unfair methods will be to deprive the community of its power to purchase some standard articles bearing a good reputation at any price at all, and in many other instances to put communities, especially small ones, to great inconvenience through their inability to have such articles at hand where they can easily be purchased, thereby forcing them to do business with non-resident dealers. I believe that many other evils result from these unfair practices, but, as I say, you know them better than I do.

Is there any ground for hope that the Supreme Court, in view of these considerations, may change its view as to price fixing? Very little, I should say, notwithstanding that, as I have stated, it has

apparently left to itself by its opinions on the Sherman act the power largely to guide a development of the law as though there were no statute; and, of course, courts have been known to reverse their previous decisions.

It is strange that it is possible for a man to part with the good will of his business and to agree legally not to compete with the purchaser of it while, on the other hand, a man may not sell the product of his business, but may not protect the good will of it by making a reasonable contract as to that product—the man who is going out of business may protect another, but the man who stays in business may not protect himself though injuring no one.

Remedy in Legislation.

If I am right you are left to legislation for your remedy, and it will probably have to be legislation like the Stevens bill directly establishing your right to fix prices, for it is not likely that any bill creating a trade commission will for the present at least give you relief, though the bill entitled "Act to Create a Federal Trade Commission" proposes to make unfair competition unlawful. The Sherman law will still be in your way.

You have before you a hard task and you might better admit it, however clear to your minds is the justice of your contention. Legislative sentiment is against you to-day, I feel certain, and so perhaps is public sentiment—at any rate, the majority of members of Congress whom I have talked to have that belief. If public sentiment is against you you will have to change it. If, in addition to that fact, Congressional sentiment is hostile, you will have to demonstrate to Congress through the public as well as by hearing that none of "the evils which led to the public outcry against monopolies and the final denial of the power to make them" are likely to result from legalized price fixing. Those evils are stated by the Supreme Court as appears from one of my previous quotations, to be (1) injury to the public; (2) limitation of production; (3) deterioration in quality, demonstrate not only that none of these evils come from price fixing, but show affirmatively that the very opposite is the case and you will succeed especially if you can demonstrate further that if you are not given the right which you seek, the practice of retail distribution as now prevailing may be seriously curtailed if not wiped out and a retail monopoly established in its stead.

How the Stevens' Bill Will Help.

As I read the Stevens bill, which undertakes to give you the right which you want to have, it successfully guards against the evils which were enumerated in the Standard Oil case, for it gives you nothing if you have any monopoly or control of the market for articles belonging to the same general class of merchandise as that in which you are dealing; or if you have even so much as an "understanding" with a competitor in regard to prices, and it is the possibility that such understandings can be more easily arrived at if you have the power to fix prices, which is used as one of the strongest arguments against your contentions. The provision in the bill for a standard and publicly announced price will go a long way, I believe, in bringing public sentiment to your side of the proposition.

It has occurred to me to suggest that maybe you will have to accept a provision which will provide that the prices fixed for any article shall be reasonable. Of course, the objection which is immediately raised to such a proposition is that it will lead to uncertainty and litigation, but the fear of unreasonable prices is one of the things that have stood in your way so far as Congress is concerned, and, in fact, is the very fear which leads to the enactment of the Sherman law, namely, that under monopoly or partial monopoly prices are raised to an unreasonable height.

The only people who can be flattered by telling them they are clever are those who aren't.

PROGRESSIVE JOBBERS ADVERTISE IN THE TALKING MACHINE WORLD. CONSULT THEIR ANNOUNCEMENTS.

View of the Banquet Hall on the Roof Garden of the Bellevue-Stratford on the Evening of July 8 During the Banquet Given by the Victor Co. to the Visiting Jobbers. This Was the Great Function of Convention Week, and at the Close of the Banquet the Assemblage Adjourned to the Dome Room Directly Connecting, Where It Was "On with the Dance; Let Joy Be Unconfined," "Till the Wee Sma' Hours.

The Victor Co.'s Royal Entertainment.

Members of Jobbers' Association Taken to Philadelphia as Guests of the Company for an Entire Day of Festivities—
Attended Interesting Baseball Game and See the Champion Athletics—Brilliant Banquet and Entertainment on Roof Gardens of Bellevue-Stratford Completes Enjoyable Day.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., July 9.—The word "royally" has been used on many occasions to describe happenings of particular splendor, but the word has seldom been used with greater accuracy than in describing the manner in which the Victor Talking Machine Co. entertained the members of the National Association of Talking Machine Jobbers and their families who were the all-day guests of the company yesterday.

From the time the jobbers and their families boarded the special train at Atlantic City at 11 a. m. until they left for their respective homes this morning, every detail had been planned for them and set forth in a cleverly conceived time-table, illustrated with humorous sketches and which provided for every hour in the day. There was nothing left to guesswork. When the guests of the company arrived at the Bellevue-Stratford Hotel they found rooms assigned to them and their baggage carefully placed therein as the result of forethought of the Victor officials, and other carefully thought arrangements for their comfort and peace of mind were in evidence throughout the day.

Upon arrival at the hotel an elaborate buffet luncheon was served in the Clover Room, a luncheon thoroughly delightful in every detail. The party next entered automobiles, over fifty of them, flying the Victor pennant with the famous dog prominent thereon and started for Shibe Park, where the famous Philadelphia Athletics of the American League and world's champions for 1913, were scheduled to cross bats with the Detroit Tigers and face the peerless Ty Cobb. A large section of the upper grandstand of the park had been reserved for the Victor Co. guests, and a large sign running across the front of the stand proclaimed the fact with the Victor dog, highly magnified in profile board, prominent in the center.

Before and during the game the jobbers were entertained by the playing of the Victor Military

Band, which made its first appearance in public on that occasion. As the lively music was rendered between the innings, visitors kept time with the music by waving the Victor pennants with which each one had been provided, and the general effect was most beautiful.

That baseball is the national game was never more thoroughly demonstrated than by the jobbers. Men from Maine and Texas, from Illinois and Florida, vied with each other rooting for one or the other of the teams and in giving advice to the players in the recognized manner. The Athletics cleaned up with a score of 3 to 0, probably in honor of their distinguished guests, and immediately after the game the party was whisked back to the hotel to prepare for the elaborate entertainment of the evening.

It is probable that never before in the history of the trade has there been such a brilliant banquet tendered to its members, for the famous facilities of the Bellevue-Stratford were drawn upon to provide dinner and service measuring up to the exacting demands of those in charge of the arrangements, though the dinner itself was but a section of the program. Each guest found at his or her plate a beautifully engraved menu and program in book form and for the ladies there were also provided handsome bouquets of flowers. The menu was as follows:

Clover Club Cocktails		
Crab Meat Flakes Cocktails		
Consomme Bellevue, Whipped Cream on top		
Relishes		
Salted Almonds	Pecan Nuts	Celery
Barsac		Olive
Bonnd Brook Trout, Saute Meuniere		
Cucumber Salad, Pink Dressing		
Moet & Chandon White Seal—Cup		
Filet Mignon, Oriental		
Young Lima Beans		
Kirschwasser Sherbet		

Cold Pressed Rouen Duckling in Jelly		
Hearts of Lettuce Salad		
Coupe aux Peches, St. Jacques		
Flutes		Macarons
Cigarettes	Cigars	Liqueurs
Special Coffee		

During the banquet the diners were entertained by a vaudeville bill of exceptional excellence, supplied by professionals of reputation in the "big time" and who included Walter C. Kelly, "The Virginia Judge," and one of the most popular monologists on the stage; "The Five Seminary Girls"; Mlle. Meserau, Parisienne danseuse; several comedy and cabaret acts and other features of high class, including selections by the Neapolitans, a capable quintet of instrumentalists and singers.

Cablegram from Eldridge R. Johnson.

Just as the guests were seated Louis F. Geissler, general manager of the Victor Co., read the following cablegram from Eldridge R. Johnson, president of the company, who is at present in London:

"The Victor Co. has now reached the enviable position when it has the right to expect the respect and confidence of the trade. Tell our guests that my greatest ambition is for the Victor Co. to maintain that position and to continue the prosperity of all concerned with it in Victor policies by fair dealing. I congratulate you, the Victor organization and jobbers, on a splendid half year. Our business will prosper as we deserve it."

Mr. Johnson's message was received with great enthusiasm by the jobbers, and the following answer was cabled from the banquet hall to Mr. Johnson:

"E. R. Johnson, Gramophone Co., London:

"From the dinner table at the Bellevue-Stratford, the National Association of Talking Machine Jobbers sends to you best felicitations, and wishes for your continued good health and prosperity."

"GEORGE E. MICKEL, President."

(Continued on page 38.)

View of the Banquet Hall on the Bellevue-Stratford Roof Garden When the Victor Program Was Being Carried Out and Mlle. Meserau Was on the Stage. In the Center of the Room Will Be Seen the Neapolitan Orchestra Which Was Taken from New York for This Special Occasion.

THE VICTOR CO.'S ROYAL ENTERTAINMENT—(Continued from page 37).

Mr. Geissler then welcomed the guests of the evening in an eloquent manner, a welcome which the many members of the Victor organization supported by arising.

Edward Lyman Bill, for the guests, next proposed a toast of appreciation to Mr. Geissler, which was drunk standing and amid great enthusiasm.

Exhibition Dancing Interests.

Following the banquet proper, the guests repaired to the Dome Room of the hotel, where Holton Herr, the distinguished dancer and his partner, Miss Janet McIlwaine, with a corps of assistants, demonstrated the modern dances for the edification of the jobbers. A most interesting feature of this section of the entertainment was the exhibition dancing of Henry C. Brown, Jr., son of the advertising manager of the Victor Co., who, with his graceful partner, rank close to the top among the amateur dancers of the country.

The guests then took the floor and gave themselves up to the enjoyment of the art of Terpsichore until the early morning hours.

An Elaborate Entertainment.

The elaborate character of the entertainment, the machine-like precision with which the program was carried out, and the brilliancy of the whole affair will long remain fresh in the memories of those who enjoyed the privilege of being present.

The success of arrangements was due largely to the untiring efforts of Henry C. Brown, the popular advertising manager of the company, who was here, there and everywhere throughout the day and evening to see that there was no hitch in the plans. Mr. Brown had the assistance of F. K. Dolbeer, Ernest John, C. K. Bennett and other members of the Victor staff in looking after the comfort of the guests.

The spirit of camaraderie existing between the company officials and their distributors was never more forcibly illustrated than during the entire entertainment. It was a fitting climax to what is universally acknowledged to have been the best convention ever held by the talking machine men.

The Guests of the Victor Co.

The guests of the Victor Co. and the officials of the company who acted as hosts included Frank C. Allen, M. H. Andrews, Mr. and Mrs. C. N. Andrews, W. D. Andrews, J. C. Angle, R. H. Arbenz, Wallis F. Armstrong, A. W. Atkinson, Mrs. E. C. Babcock, Wm. H. Barker, Mr. and Mrs. T. W. Barnhill, Harry Beach, C. K. Bennett, Edward Lyman Bill, Mr. and Mrs. J. N. Blackman, E. P. Bliss, Mr. Blount, Mr. and Mrs. Emanuel Blount, Chas. Bobzin, J. F. Bowers, Mr. and Mrs. H. C. Brown, H. C. Brown, Jr.; C. A. Brown, Miss Editha Wells Brown, C. A. Bruce, C. F. Bruno, Louis Buehn, A. H. Buescher, Mr. and Mrs. W. H. Buescher, Miss Frances Bullard, Lester Burchfield, Mr. and Mrs. I. F. Burton, Mr. and Mrs. J. G. Card, Paul Carlson, C. G. Child, Mrs. Frances Elliot Clark, The Misses Cohn, L. W. Collings, D. P. Comerer, B. B. Cope, F. W. Corley, W. O. Crew, Mr. and Mrs. I. Davega, S. B. Davega, Olney Davies, Fernando DeArredondo, Mr. and Mrs. Albert Deisinger, W. C. Dierks, J. H. Dietrich, E. J. Dingley, Mr. and Mrs. F. K. E. Ziegler.

* * * *

Talking machine jobbers who visited New York on their way home to their respective cities were loud in their expressions of appreciation of the really magnificent reception given them by the Victor Co.—something absolutely unique in its way, and conducted in a manner so perfect and satisfactory as to show the extreme care with which everything had been handled in preparation for this event. It only goes to show that when the Victor Co. does anything in a public way it does it well.

Convention Snap Shots and Impressions.

O. K. Houck, of Memphis—there is only one O. K., so further details are unnecessary—arrived late on Sunday at Atlantic City, N. J., with his brother Jesse Houck and Olney Davies, and feeling fit for a strenuous session.

Mr. Houck, who is the Big Mastiff of the Ancient and Effervescent Order of the Yellow Dog, came to the convention with the paraphernalia for conducting the initiation of candidates into the noble order, and was busy every minute of the day initiating classes of candidates gathered together by

Big Mastiff Houck Conferring the Yellow Dog Degree Upon an Enthusiastic Class.

squads of willing workers. No one was overlooked, from Louis F. Geissler and other Victor officials, down to the hotel staff. Mr. Geissler's speech in German dialect after his initiation on the train bound for Philadelphia should be preserved in the archives of the order for all time. It was a classic.

Big Mastiff Houck explains the objects of the order to the candidates as follows:

"This is a little social order founded on friendship, fidelity and fun, fun being the potent factor of the degree.

"We call it the Yellow Dog. You might wonder why we would call such a magnificent order as this the Yellow Dog, but fidelity also cuts a part in this order, and there is nothing in this world so faithful to his master as a little yellow dog.

"You can kick him and cuff him around and starve him to death, and yet he is willing to lay at

Houck and His Yellow Dog.

your feet and guard you while you sleep; hence we take that name for our noble order. It matters not where your travels may lead, you will find Yellow Dogs, and when you find one you will have found a friend."

This is followed by the secret work of the order, much appreciated by those who can answer to the hailing sign of the Yellow Dog. Mr. Houck's work was the hit of the convention.

O. K. Houck, just to be remembered, brought with him and distributed nearly a hundred huge nickel-plated keys to the city of Memphis, each tied with a red ribbon and bearing the name of the O. K. Houck Piano Co. The keys were tried, but failed to open any of the refreshment parlors of Atlantic City until after midnight on Sunday, when the doors were opened to the thirsty hordes.

If the various jobbers have their way, the films showing in detail the manufacture of Victrolas and records will be shown before audiences in all sec-

tions of the country. Several of the jobbers are particularly anxious to show the pictures to their dealers, even if the public is not invited, believing that the immensity of the Victor Co. plant and its efficiency, to say nothing of the army of high-class workers employed and shown as they march from the buildings, will serve to leave a strong impression on the dealer and arouse his enthusiasm over Victor goods.

One of the jobbers to receive a particularly cordial reception was L. S. Sherman, head of Sherman, Clay & Co., and dean of the music trade on the Pacific Coast. Mr. Sherman made the trip for the fixed purpose of getting the next convention of the association for his own city, and his letters from the Mayor of San Francisco, from the Director-General of the Panama-Pacific Exposition, and other officials, coupled with his own eloquence, won the convention for the Exposition City without a dissenting vote.

Mr. Sherman declares that, although the distance is calculated to frighten some of the jobbers, the

The distinguished gentleman in the foreground is L. S. Sherman of San Francisco. At his right is H. C. Brown, Advertising Manager of the Victor Co. Just behind Mr. Brown stands Andrew McCarthy, of Sherman, Clay & Co., San Francisco.

fact remains that, with the special inducements offered by the railroads and hotels during the period of the Exposition, the cost of attending the convention will be surprisingly low and the presence of attractions of world-wide importance made the spring of 1915 a most favorable time for visiting the Pacific Coast. Mr. Sherman came armed with folders, rate sheets and other printed arguments in support of his contention, but he won his victory without being compelled to use them. "San Fran-

cisco Bound" is the watchword of the association for the coming year.

The Lone Star State was particularly well represented at the convention this year, and the showing should convince the trade of the interest that the Texans are taking in the talking machine business. Those who registered included G. G. Neville,

Four Long-Horns from Texas.

Left to right: Lester Burchfield, Sanger Bros., Dallas; W. E. Parker, Talking Machine Co., of Texas, Austin; G. G. Neville, W. G. Walz Co., El Paso and Fernando de Arredondo, Thos. Goggan & Bros., San Antonio.

with the W. G. Walz Co., El Paso; Elihu A. Sanger and Lester Burchfield, of Sanger Bros., Dallas; F. De Arredondo, with Thomas Goggan & Bro., San Antonio, and W. E. Parker, with the Talking Machine Co., of Austin, Tex. All the Texans were

S. O. Wade and Mrs. Wade Watching the Sights at Atlantic City.

enthusiastic over the conditions and the outlook in their State, with its immense territory and constantly increasing growing population.

Among the officials and representatives of the Victor Co. who attended the convention or looked after the comfort of the visiting jobbers in Philadelphia, were Louis

F. Geissler, general manager; Charles K. Haddon, vice-president and treasurer; Walter J. Staats, comptroller; Belford G. Royal; Henry C. Brown, advertising manager; Frank K. Dolbeer, credit manager; W. B. Fulghum; George D. Ornstein, manager of salesmen; Ernest John, C. K. Bennett, E. E. Hipple, Jr.; H. A. Beach, C. H.

(Continued on page 41.)

Khaki Moving Cover Showing How Two Machines May Be Carried With Ease By a Single Messenger.

The Lansing Khaki Covers can be so easily adjusted that there is a large saving in time over the ordinary method, which, of course, means money as well.

The durability of these covers will be apparent to all. The service which they will render with reasonable care will be long, no matter how hard the usage to which they are exposed. With the Lansing Cover the machine is effectually protected from wet and cold weather, dust, scratches, bruises, finger prints, etc., which makes possible the delivery, of machines in the homes of purchasers in as perfect condition as when taken from the warerooms, thereby pleasing the customer.

It has four sides and a top especially for lettering.

No other covering is necessary, hence a large saving is made in time and material that would otherwise be used—also in expense of repairing and repolishing.

The manufacturer has such confidence in this product, and its aid to talking machine men everywhere, that he will send these covers on approval to interested parties. Covers so ordered may be returned at once to the factory if not found satisfactory.

The fullest information given concerning prices upon application.

The Lansing Khaki Moving Cover

Did You See It at the Convention of Talking Machine Jobbers at Atlantic City?

All Who Examined This Special Creation Were Quick To See Its Dollar Saving Power and Dollar Earning Power To Their Business.

The Lansing device is not only unique and original in every essential, but it provides talking machine dealers with a device which simplifies the delivery of talking machines and saves the cabinets from injuries which might come through careless handling in the way of varnish scratches and bruises.

A word of description in this connection: The outside of the Lansing Moving Cover is made of Government Khaki and the inside lining of cotton flannel. Four thicknesses of heavy felt are used for interlining, and all of these are firmly quilted in order to provide uniform thickness and durability. The large coverings have heavy straps passing underneath the machine terminating in handles half way up the sides, which are held closed in by heavy horizontal stays. This distributes the weight entirely upon the straps, there being no weight whatever upon either the machine or the cover.

These covers are made to fit all of the different talking machine models, and they effectually protect against scratches or other damage in transit, and the covers have been found invaluable in making deliveries.

A description of this product hardly suffices to convey to the mind of the reader just what it means to talking machine men. It saves much time in preparing machines for local delivery, and it prevents them from receiving any damage in transit through scratches or bruises. It saves money in doing completely away with paper and all wrapping material.

CONVENTION SNAP-SHOTS AND IMPRESSIONS—(Continued from page 39).

North, Thomas F. Green, Howard Shartle, Jas. E. Corneal, B. M. De Cou and others. Will Oakland, Steve Porter and several other recording artists were present at the banquet.

Through the efforts of L. C. Wiswell, chairman of the arrangements committee, a number of the Western distributors assembled in Chicago and

L. C. Wiswell.

came to the conventions in a body, leaving Chicago on a special car attached to the Manhattan Limited of the Pennsylvania Road on Saturday morning and arriving in Atlantic City on Sunday morning. The party included C. J. Schmelzer, Kansas City, Mo.; A. A. Trostler, Kansas City, Mo.; L. Burchfield, Dallas, Tex.; A. Hospe, Omaha, Neb.; G. E. Mickel, Omaha, Neb.; B. J. Pierce, Kansas City, Mo.; W. H. Reynolds, Mobile, Ala.; E. C. Rauth, St. Louis, Mo.; Geo. Mairs, St. Paul, Minn.; Fred. Seimon, Chicago, Ill.; Mr. and Mrs. S. O. Wade, Chicago, Ill.; J. E. Meagher, Chicago, Ill.; Robt. Fenton, Chicago, Ill.; Fred. Putnam, Peoria, Ill.; L. C. Wiswell, Chicago, Ill. At Pittsburgh the party was joined by J. C. Roush, president of the association; Perry B. Whitsit, F. C. Bruce and T. H. Towell.

The trip was a thorough success in every way.

Putting the "O. K." on the Landay Bros.

James B. Landay (left), Max Landay (right), O. K. Houck, (center).

though some of those on the train arrived a trifle red-eyed from lack of sleep. The car was well stocked with the materials essential to keeping dust and cinders out of the throat and the time-tried prescriptions were in considerable demand. Playing cards and swapping drummers' yarns served to pass the time pleasantly.

When Mr. Wiswell's small son placed a package of "sparklers" in his grip to insure his daddy enjoying a pleasant July Fourth celebration, the little fellow did not realize the trouble he was stirring up. A member of the Chicago party, who shall be nameless for this occasion, retired early on the train and was deep in the arms of Morpheus when Lester Burchfield lit a sparkler and held it in the berth. The slumbering one awoke to see the berth filled with fiery stars, and yelled "Fire!" and reached for the emergency cord simultaneously. It was some time before the atmosphere of the car got back to normal.

James and Max Landay, the Landay Bros. of New York, for the first time attended the convention together and mingled with the crowd on every occasion. The convention was somewhat new to James Landay, but Max took his brother over the ropes at a fast clip and saw to it that there was no lonesomeness.

Victor H. Rapke, the former jobber, who was elected mascot of the association some years ago,

Victor H. Rapke in Argumentative Mood.

was very much on hand at Atlantic City and was full of information regarding the developments of the trade and how things are and should be done. Mr. Rapke, who is at present in the automobile business, is shown in the accompanying snapshot just settling a discussion regarding conditions in some of the horn factories of days long past. Everybody knows Victor, 'cause he doesn't hide his light under a bushel.

A goodly group of travel-stained conventioners held a "death watch" in the hotel parlors until midnight Sunday when, it then being Monday, the thirst parlors could open for a short time. At the stroke the crowd hustled out, only to discover that a party who had been sitting on the curb, waiting, had gotten the first table.

One of the most enthusiastic of the conventioners

Autos Ready to Leave Hotel for Country Club.

was L. S. Sherman, who had never met with the talking machine men before. Mr. Sherman was not only impressed with the harmony existing in the association ranks, but was particularly interested in

Group of Ladies Ready for Auto Trip. Photo by Prince.

the exhibition of the Victor Co. and the abundant information regarding manufacturing and selling problems supplied to the jobbers by the department heads and other members of the Victor organization. Mr. Sherman stated that, though he had been in the talking machine business since its infancy, he had gained much new and valuable knowledge of trade matters during his stay at the convention.

Only two of the jobbers traveled to the convention city in their automobiles, they being Emanuel

Mr. and Mrs. Emanuel Blout on the Boardwalk.

Blout, of New York City, who was accompanied by Mrs. Blout and the two Misses B'out; and Benj. Switky, of New York, who brought down with him Mr. and Mrs. J. H. Dodin and George W. Morgan. Both gentlemen loaned their cars to the committee for taking the ladies on the auto trip to the Country Club on Monday.

Lester Burchfield as usual came to the convention with so many new tricks in his trunk there was hardly room for his clothes. A musical clothes brush was only one of a number of nerve destroyers.

E. N. Upshaw, of the Elyea-Austell Co., Atlanta, is possessed of a "Rebel yell" which was probably handed down from the last generation, but has

CONVENTION SNAP-SHOTS AND IMPRESSIONS—(Continued from page 41).

lost none of its force. Mr. Upshaw brought the yell with him to the convention and insisted upon letting it loose whenever the bands or orchestras played "Dixie," and which was very frequent. If the Upshaw yell had been with Lee, the late unpleasantness might have ended differently.

As though the sessions of the conventions and the entertainments in connection therewith did not furnish enough excitement, those visitors having rooms on the ocean side of the hotel were awakened on Tuesday morning by cries coming from the water, and saw a thrilling rescue of two drowning men by a trio of hotel porters before the regular lifeguards were on

Benj. Switky Always Spic and Span.

C. K. Bennett, of the Victor Co. Taking an Order for a Carload of Needles from G. A. Mairs, of W. J. Dyer & Bro., St. Paul.

duty. Several of the talking machine men also had unpleasant experiences with the heavy undertow, though not sufficiently serious to require rescuing by the guards.

Fernando De Arredondo was particularly interested in the convention and things generally in the East. Mr. Arredondo is a native of San Antonio and until his trip to Atlantic City had never been beyond the borders of his native State, and found much during the journey to demand his attention.

One of the features of the ball game that appealed particularly to many of the visitors was the parade of the "bleacherites" after the game. The crowd from the open stand crossing the

View Across the Ball Field After the Game Closed.

field in the sun gave an excellent idea of what constitutes a crowd of fans. The accompanying snapshot was taken from the Victor Co.'s section of the stand while the guests were waiting for the crowd to pass out before proceeding to the automobiles waiting for them.

Charles Bobzin, of the Silas Pearsall Co., New

York, one of the veterans of the trade, was early on the ground greeting old friends and exchanging reminiscences of the former days when the Victor dog was a pup. Mr. Bobzin is full of information regarding trade conditions that is based on a long and broad experience.

To all intents and purposes James F. Bowers' annual job as toastmaster at the banquets of the association will last just about as long as Mr.

Bowers is willing to favor the jobbers with extracts from his rich fund of wit and humor, a wit which has a distinctly Celtic touch to it and is therefore never lacking in point. One jobber dubbed Mr. Bowers the "toastmaster laureate" of the association which phrase describes his standing in perfection. Incidentally Mr. Bowers' ready wit and ability to put things clearly has saved more than one situation in the meeting room during business sessions.

THE EXHIBITS AT THE JOBBERS' CONVENTION.

There were a number of manufacturers of accessories, cabinets, needles, etc., who had exhibits in the various rooms of the Chalfonte and other hotels during the convention though an arrangement between the hotel, and the association barred exhibits in the public rooms and corridors as was formerly the case.

Among those who had displays at the Chalfonte was Clement Beecroft, of Philadelphia, representing the Long Cabinet Co. The various popular models of Long cabinets for the leading makes of machines were exhibited and the jobbers who were not already familiar with the quality of the Long cabinets were generally impressed. Mr. Beecroft also represented the well-known Bagshaw needles and other specialties at the convention.

J. T. Edling, head of the Velvaton Wood Needle Co., Kansas City, Mo., was early on the ground with samples of the Velvaton needles for the purpose of demonstrating them before the jobbers. Mr. Edling also showed the process of manufacturing the needles from the time the lumber was first sawn until the finished needle came from the hardening solution. It is the claim of the company that by giving the needle a quarter turn after each reproduction ten or more records may be played without changing the needle.

M. A. Carpell, representing the Herzog Art Furniture Co., was also on hand with a cabinet exhibit, which included a new style revolving cabinet.

M. B. Claussen, of the Masterphone Corporation, New York, was also on hand for the purpose of demonstrating the Masterphone for the benefit of those few jobbers not already familiar with the merits of this device in the improvement of tone.

KHAKI MOVING COVERS

For Talking Machines Displayed by E. H. Lansing During Convention Attract Attention—A Genuine Convenience.

Among the prominent exhibits at Atlantic City during the jobbers' convention was the display of E. H. Lansing, 611 Washington street, Boston, Mass., manufacturer of khaki moving covers for talking machines, which are designed for the convenient and safe carriage of talking machines and other musical instruments. In the delivery of these instruments, it frequently happens that the highly polished surfaces of the cabinet work is scratched, which not only mars the appearance of the instrument but causes a repair bill that is liable to total more than the cost of one cover, to say nothing of the uncertainty of matching the damaged spot with the balance of the varnished surface. Lansing covers protect machines from rain, snow, dust, extreme cold or heat, as well as from scratches, bruises, finger prints and other damage.

Lansing khaki covers are made in two styles, one for the dealer and the other for home use, both of which are sold under the unconditional guarantee of absolute satisfaction or money refunded.

The outside of Lansing covers is made of Government khaki and the inside lining of cotton flannel. Four thicknesses of heavy felt are used for interlining and all is firmly quilted to keep it of uniform thickness and durability. The straps are heavy (three-ply) webbing and are not riveted to the cover but held in place by tapes. Patent buckles are used. The foregoing covers the description of the covers designed for commercial

purposes while the home covers are made of cotton flannel, print, felt, rubber, mackintosh, etc., the prices of the latter running from 50 cents to \$3.

Mr. Lansing was personally in charge of his Atlantic City display, and the booth was visited by not alone the delegates but by many other people, to whom the value of the Lansing cover was apparent without much discussion on his part, and he took a number of orders for all the styles of covers that he manufactures.

NEW EDISON ARTISTS

To Make Their Debut in the Edison Blue Amberol List for September.

Three prominent artists will make their debut in the Thomas A. Edison Blue Amberol list for September. The trio is headed by Alessandro Liberatti, the distinguished bandmaster and cornet

A. Liberatti.

F. Martin

S. Gardner.

soloist, who has been touring the United States with great success for the past thirty-six years.

In the September list Liberatti's Band is represented by "The March of the Inland Tribes," "La Mia Speranza Waltz" and "The Suffragettes March." These compositions of Liberatti are played by his band with a finish and charm that is inspiring. The instrumentation of the band is admirable for recording purposes.

Frederic Martin, who will make his debut in September with the Edison talent, is a basso of

international fame, having appeared with all the leading orchestras and musical festivals throughout the country. He has a large and noble voice, rich in quality and well controlled, notable, moreover, for a wide range. Mr. Martin, who is basso of the Fifth Avenue Presbyterian Church Quartet, sings that notable song of Schubert's, "The Wanderer."

Last but not least comes Samuel Gardner, a clever young violinist, who made his debut last year in New York. He is a pupil of Franz Kneisel, and one in whom he has taken a great interest. Although born in Russia, he is essentially an American product. Comparatively a youngster, he plays like a veteran, as is evidenced in his rendition of Dvorak's exceedingly popular "Humoresque." There is authority, charm and perfection in his playing that will make his records popular.

EX-GOVERNOR DOUGLAS A BUYER.

Among the Victor sales to noted people by the Oliver Ditson Co., Boston, Mass., was a machine to Ex-Gov. Wm. L. Douglas, who, in addition to his public life, is a well-known shoe manufacturer.

TALKING MACHINE JOBBERS WHO ADVERTISE IN THE WORLD ARE LIVE ONES, TRY THEM!

FURNISHES FUNERAL MUSIC.

(Special to The Talking Machine World.)

NEWTON, LA., July 9.—An Edison disc phonograph furnished the music at a funeral in this city last week. The music had been overlooked until next to the last minute and the local talent in this town was both mediocre and scarce. Accordingly an Edison disc phonograph was used to play "Lead Kindly Light," "In the Sweet Bye and Bye," and "One Sweetly So'lemn Thought." The substitution was pronounced highly appropriate by the mourners.

TO HANDLE COLUMBIA LINE.

The Columbia Graphophone Co. closed arrangements this week with the New Jersey Piano Co., Plainfield, N. J. whereby this well-known piano concern will handle a complete line of Columbia products and feature them in an extensive publicity and selling campaign.

A TRIO OF NOTABLES.

Edward D. Easton, president of the Columbia Graphophone Co., accompanied by H. L. Willson, assistant general manager of the company, and Senator William E. Johnson, a prominent captain of industry, sailed recently on the steamer "Imperator" for a four weeks' trip abroad, visiting England and Continental Europe.

C. E. GOODWIN TO EUROPE.

C. E. Goodwin, of The Phonograph Co., Chicago, is visiting Europe on his annual vacation, expecting to return in about one month.

A Practical RECORD System FOR DEALERS

The New Tamaco Stock Record Rack

Capacity 1000 Records

Price All Oak Finishes, \$27.50
Mahogany and White Enamel, \$31.50

Write for circular describing this record rack—it has new features—you'll be interested.

OUR new Record Stock System Pamphlet is ready. This system shows you which are the big, live sellers in your record stock—shows you just how many you have sold during the past month or year of any number, enables you to order without fear of overstocking—prevents an accumulation of slow selling records, and the loss of profits by not having records your customer wants. It shows your exact investment and turnover—is a perpetual inventory and automatically reorders—is simple and inexpensive to install and operate.

You'll be interested in our Summer Sales Ideas, too.

THE TALKING MACHINE COMPANY

12 North Michigan Avenue : : : : : Chicago, Illinois

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., July 9.—The talking machine men are not complaining about dull times, and everywhere throughout this specially favored section of the country crop reports are excellent, and they tend to give a new life and impetus to business.

A number of our well-known local talking machine men have been absent attending the national convention of Talking Machine Jobbers at Atlantic City. J. F. Bowers has never missed a meeting since he was instrumental in founding the organization at Buffalo, and this year Marquette Healy has paid his first visit to the national meet of talking machine men, and no doubt he will be impressed with what he sees and hears at Atlantic City.

Edward H. Uhl, local manager of the Wurlitzer interests, and Mr. Simon, as well as S. O. Wade and Mrs. Wade, journeyed down to enjoy the cooling breezes of the favorite Eastern resort during convention week.

While chatting with the talking machine men locally, one is more and more convinced that the talking machine trade is one of the very few which is enjoying prosperity, and of course with the big crops which we seem reasonably sure of securing now, there will be a greater demand than ever before upon the manufacturing resources of the industry.

The talking machine trade has grown some since its inception and is continuing to go forward by leaps and bounds. The conditions surrounding it were never better than to-day, and one delightful thing about the trade is that there has been no price cutting and slashing. Pick up the papers containing the advertisements. They are always of the appealing, educational character rather than of price cutting. How much better it would be if some of these methods were engrafted upon the piano business. It would be refreshing indeed to turn to papers containing announcements of pianos and find that the intent of the advertiser was to interest purchasers on the basis of supplying them with useful, necessary and valuable home accessories rather than to catch them on a price baiting proposition.

Certainly, there are arguments everywhere for standardized prices and the fixed price principle must commend itself to merchants everywhere, because it will do away with price haggling very materially.

Safeguarding Deferred Payment Contracts.

The attention of the Chicago Association of Credit Men has been called to the necessity of some legal action to safeguard merchandise sold on deferred payment contracts. The party pushing the move is the Moneyweight Scale Co. It sells its scales on deferred monthly payments and finds that the only protection it has against the attaching creditor or a court action is the filing of a chattel mortgage. Of course, when a chattel mortgage is given it must be by the owner of the article, so that it becomes necessary, to have complete protection, to pass the ownership with the first payment and then take back a chattel mortgage for the deferred payments. The making and recording of the mortgage is expensive, unnecessarily so, the makers of the scale contend. They believe that the same end would be attained and even greater security afforded the seller if a law were placed on the statute books by which the contract of sale could be made a matter of record.

This matter is one that deeply interests the music trade of Illinois, where a majority of the instruments are sold on contracts of sale providing for payments extending through a term of many months, during which almost anything is likely to happen. The piano dealers have tried to secure such a law several times, and have also tried to secure a modification of the chattel mortgage act which would permit of their being acknowledged before a notary instead of going before the municipal court. In both cases the attempt was futile.

A law similar to that asked for in Illinois is in force in New York State, and there seems no good reason why the same rule should not prevail in this State. As it is, the seller of a piano or talking machine, unless he goes to the trouble and expense of taking a chattel mortgage and recording it, is at the mercy of an insolvent buyer. The bankruptcy courts positively refuse to recognize these sales, and the contract has been declared of no effect as against an innocent purchaser of the instrument so that some such action as urged by the Moneyweight Scale Co. would be very welcome; and now that the music dealers are reinforced by lines other than their own they may be able to secure some action. The Credit Men's Association has the matter before the legislative committee, of which Mr. Whitlock, of Belding Bros. Co., is the chairman.

At the W. W. Kimball Co. Mr. Blanchard said: "You can put this company down as heartily in favor of any legitimate effort to accomplish the above reform in relation to the recording of contracts of sale. I, personally, worked for this object in previous attempts and am aware of the obstacles that the measure had to pass in the Legislature. It may be that present conditions will make it easier to do something. At any rate we should try and have the united support of all parties who will be benefited by the proposed change in the law. It is useless for individuals to try and accomplish anything."

At Lyon & Healy's the credit department was very strongly in favor of some such move or any move that would give safety. "The bankruptcy courts absolutely refuse to allow claims under a contract, and all we can do is file our claim with the other creditors for the unpaid balance and see the piano or Victrola that is really our property included in the assets of the bankrupt. We heartily hope that the attempt will succeed."

Mr. Whitlock, chairman of the legislative committee of the Chicago Association of Credit Men, is receiving co-operation of a number of members of the music trade throughout the State. Those wishing to co-operate are invited to communicate with him.

Big Columbia Record Sales.

Charles F. Baer, local manager of the Columbia Graphophone Co., reports that the past month has shown an excellent sales record with a particularly heavy business in the record department. Sales of the Columbia records have been mounting steadily in the past thirty days and have shown what a wonderful impetus the liberal Columbia advertising machine has created. Sales of the medium-priced machines for use in summer homes are also marked, and in this the Columbia advertising department must also be thanked. Mr. Baer returned to his office from a three weeks' motor trip to the East in excellent health and well prepared for a heavy fall business.

W. C. Fuhri, district manager of the Columbia interests, is on a three weeks' vacation at Spring Lake, Mich., and is enjoying boating and fishing.

A. J. Tucker, who is in charge of the wholesale order department, is confined to his home by a serious illness that his physicians fear may develop into typhoid fever.

Increases Capital Stock.

The Phonograph Co., local Edison jobber, has

recorded an increase of the capital stock from \$50,000 to \$100,000. The increase was necessitated because of the greatly enlarged business that the company is doing.

Personals and Visitors.

Some recent visitors to the local trade were F. R. Pancoast, Hastings, Ill.; Herman Marks, Emmetsburg, Ia.; C. B. Tousley, Fort Atkinson, Wis., and W. H. Hale, manager of the Victor department of G. W. Wheelock & Co., South Bend, Ind.

Other talking machine men visiting the Great Central Market were H. G. Power, of the Taylor Carpet Co., Indianapolis, Ind.; L. C. Peck, of the Peck Hardware Co., Berlin, Wis., and Mrs. Weise, of Bradford Weise & Co., of Waverly, Ill.

Mr. and Mrs. Fulton De Forest spent a part of their honeymoon at Chicago during the past month and called at the offices of the Talking Machine Co.

Guy Miller, T. J. Miller & Sons, piano and talking machine dealers of Dixon, Ill., was a visitor to the Lyon & Healy offices this week.

E. S. Wilson, of the Wilson Music House, was also a caller at the big Wabash avenue institution, motoring in from Oshkosh, Wis., where his business is located.

George Israel, formerly buyer of talking machine department of Hillman's, has taken charge of the same department at Rothschild's succeeding Harry Solomon, who now has charge of other departments. Mr. Price, formerly of Grand Rapids and Detroit, Mich., has been selected to take direct charge of the talker department.

J. Stanislanis, Thirty-second and Halsted streets, prominent Lithuanian music dealer, has just placed a large order for Victor goods and will cater chiefly to the Lithuanian trade.

Mr. Davies, manager talking machine department of John Taylor & Sons, Cleveland, O., was in Chicago during the month. His firm is making

Albert M. Mansfield, Eastern representative for Lyon & Healy, was a recent visitor to Chicago.

George C. Jewel, Rhinelander, Wis., was a visiting dealer this month.

S. M. Ladd, of Morrison, Ill., and John Dahlin, St. Charles, Ill., were Edison dealers in Chicago recently.

A. D. Wayne, retail manager of the Edison Co., is on a vacation at Fox Lake, Ill.

W. C. Motershead, assistant advertising manager of Lyon & Healy, is spending a two weeks' vacation at one of the Wisconsin lakes.

Edmiston's Ingenuity.

H. E. Edmiston, retail manager of the F. G. Smith Piano Co., was seized with a brilliant idea the other day and proceeded to put in into execution. A Columbia Grafonola sign representing a stage where a young man and a pretty girl are dancing to the music of the Grafonola was placed in the window. The sign was not intended to be an illuminated one, but Mr. Edmiston, in a few minutes, rigged up an electric lighting arrangement which gave the sign the most realistic appearance and which, in the late hours of

the night, stood out in the Wabash avenue darkness like a cameo. As late as 11 o'clock, passers-by were stopping to admire the display and reading the prices of the various instruments in the window.

Reasons for His Faith.

Arthur Soudek, manager of the American Klingsor Works, reports that dealers all over the country are preparing for a big fall business. Mr. Soudek said to The World: "I base my belief on the big demand we are receiving for our needles, and when calls for such an accessory come in so heavily at this time of year it would seem that the dealers themselves believe that 1914 and 1915 will break all records. The remarkable response to our announcement in The World last month has satisfied me that there is a big demand for needles suited to the requirements of the different kinds of records. The fact that the Klingsor needles can be used with either the Victor, the Edison or the Columbia machines is another point in favor of the dealer who handles our product as every owner of a machine, no matter what kind, is a prospect."

HOW LYON & HEALY UTILIZE WINDOW DISPLAY SPACE.

Window Trim Connecting Vacation Season with the Victrola Which Has Won High Praise—
Enjoyment of Camping Enhanced by Music—Suggestions for Dealer with Small Window.

(Special to The Talking Machine World.)

CHICAGO, ILL., July 9.—About this time of the year thousands of city dwellers, both business men and those not so busy, are thinking of the delights of the North woods, are overhauling their camp equipment, replacing that which has served its time, eliminating those articles which have been proven unnecessary and adding those new devices that experience has proven will be of value and add to the pleasure of the trip.

Aware of this fact, Lyon & Healy have so deco-

well-pitched tent beside one of those clear Northern brooks, the backlog glowing and the fire blazing fitfully, the clear, crisp air fragrant with the odor of the forests and through the trees the stars glowing and sparkling with the brilliancy peculiar to those Northern woods, and then think of listening under such conditions to Tito's Serenade or the sextet from Lucia or the voices of the great singers, with all the beauty and haunting melody of their greatest successes. Would this be a little bit of all right?

Clever Window Display Made by Lyon & Healy and Devoted to the Victrola, Which Is a Model in Every Respect.

extensive improvements in his department.

Otto F. Leidel, formerly at 875 Third street, Milwaukee, has opened a new and very commodious ground floor store at 881 Third street in that city. Mr. Leidel features the Columbia line.

Robert Fenton, of the Wilson Avenue Talking Machine Co., was one of those present at the jobbers' convention at Atlantic City.

J. E. Meagher, Lyon & Healy traveler in Wisconsin, was in the city for a short stay and reports excellent business prospects.

Archie Mathias, talking machine dealer of Minneapolis, passed through Chicago on his way to Pittsburgh and Columbus. Mr. Mathias made the trip of automobile.

Miss Steel, expert saleswoman of the W. W. Kimball forces, is taking advantage of the dull season to take a vacation.

Ellis B. Hansen, head window dresser for the Wurlitzer stores, suffered considerable anxiety recently because of the serious illness of his wife. Mrs. Hansen is now much better.

rated their great front display window that it suggests most emphatically the necessity of including in the outfit for this season is a portable Victrola. And could there be a better suggestion? Take a

trola, which commands the attention of the lady of the party. Her son restrains a dog, while to the left the man of the party is engaged in casting the fly. The background shows a Northern forest and the foreground is trimmed to represent a glade with a brook running through the foreground. This brook is the great attraction, and all the more because it contains a number of genuine brook trout from Michigan. The running water and the fish gliding about as if thoroughly at home in their environment make this the most interesting part of the scene to many spectators. This very attractive window picture is the work of W. J. Stewart, the window trimmer for Lyon & Healy. The large size of the display space in this window makes such work possible as this window and that of a year ago, when a full-sized electric launch was shown in motion, the party on board listening to the music of a Victrola.

There are few windows that could reproduce this set scene in its entirety, but there are many that could use motives from it. For example, that

portion of the scene showing the tent flap with the Victrola on a stump could be easily set. If the figures were not available the display would be suggestive and accomplish its purpose with only the tent and the Victrola. A still smaller window could be made from the idea by showing a tent directly across the back, making the end of the tent the background for the window. In the foreground could be placed a stump or log of wood, either being usually obtainable. On this place the Victrola. The floor of the window should be covered with some imitation of grass unless the window trimmer wishes to be very realistic, in which case a flooring of sod might be used. But in this case, as in most other cases of stage work, the imitation will be found to look more life-like than the real article. Trim the sides and top with branches of trees with plenty of green leaves, add anything that can be had in the shape of stuffed wild animals, and the trick is done.

A companion scene would be a representation

of a campfire at night, the fire burnt low and the figures shown lying down, wrapped in their blankets. No figures would really be needed, as the blankets could be arranged around piles of cloth or any substance that could be shaped to represent the outline of a human figure. The fire is easily represented by making a pile of partly burnt sticks and ashes against a backlog and under the pile placing an electric light with a red bulb. This can be made to glow from the center of the campfire in a very realistic fashion.

In all cases appropriate window cards would make the lesson plain by announcing that you could supply portable Victrolas to vacationists immediately or whenever wanted. Another card would call attention to your stock of records.

YEAR'S CROPS OF RECORD VALUE.

Wheat, Corn, Oats, and Barley Worth the Stupendous Total of \$3,418,000,000—Promise 5,210,000,000 Bushels—Corn Crop Will Be a Larger One Than Usual, Government Reports Show, with Wheat a Bumper.

(Special to The Talking Machine World.)

WASHINGTON, D. C., July 8.—It will be joyful news to talking machine men and to all lines of trade that the four leading American cereal crops this year will cross the 5,000,000,000-bushel mark for the first time, which an approximate increase of \$200,000,000 in value over the average production and price for the last five years.

This staggering fact is contained in to-day's announcement by the Crop Reporting Board of the Department of Agriculture, forecasting the 1914 crop of wheat, corn, oats and barley. The forecast is based on the condition of the crops on July 1 as reported by the correspondents of the Government throughout the country.

The total crop of wheat, corn, barley and oats is expected to amount to 5,210,000,000 bushels. The five-year average production of these crops from 1909 to 1913 was 4,777,000,000 bushels. On the basis of the prices per bushel actually prevailing for these products on July 1 the estimated crop of wheat, corn, barley and oats this year will be worth \$3,418,000,000. On the basis of the average price for the last five years, \$3,218,000,000. The aggregate of these crops will be 433,000,000 bushels above the five-year average production.

The most valuable of these crops this year will be corn. The forecast is 2,868,000,000 bushels. The price of corn on July 1 was 75.5 cents a bushel, giving this crop an approximate value of \$2,151,000,000. The corn crop forecast is expected to exceed the five-year average by 160,000,000 bushels, and its value would correspondingly exceed the average annual value by \$283,000,000.

The forecast for winter wheat is 655,000,000 bushels, as compared with the annual average production for five years of 523,561,000 bushels. On the basis of the July 1 price of 76.9 cents a bushel, the crop will be worth \$503,695,000. This year's crop, on the basis of July 1 prices, will be worth only \$1,186,000 more than the annual average crop for the past five years.

The forecast for spring wheat is 275,000,000 bushels compared with an annual average of 239,819,000 bushels. This year's crop is expected to be worth about \$209,000,000 on the basis of the July 1 price of 76.9 cents a bushel.

The forecast for the oat crop is 1,201,000,000 bushels compared with an average production of 1,121,768,000 bushels a year during the last five years. At the July 1 price, 38.8 cents a bushel, this year's crop is expected to be worth \$456,380,000 as compared with \$504,450,000, which represents the average value of our oat crop for the last five years.

The forecast for barley is 211,000,000 bushels, as compared with 178,189,000 bushels on the average for five years. Barley was worth 47.5 cents a bushel on July 1. On that basis this year's crop will be worth \$99,170,000.

VICTROLA XVI. BEING FEATURED.

The Victor Talking Machine Co. sent out to its dealers this week an attractive summer folder featuring the Victrola XVI., which retails at \$200, as a machine particularly adaptable for dancing purposes. The company also mailed one of these folders to every summer hotel, yacht club and country club in the United States, in order that Victor dealers might reap the fullest possible benefits from this wide field of summer prospects.

H. A. Yerkes, manager of the Columbia Co.'s wholesale department, left last week for his summer vacation, which he will spend, as usual, at his old home in Washington, D. C.

TALKING MACHINE JOBBERS WHO ADVERTISE IN THE WORLD ARE LIVE ONES, TRY THEM!

WANTS BUSINESS PHONOGRAPHS.

The secretary of a prominent and progressive wholesale hardware house in the United Kingdom has manifested an interest in securing the agency for a phonographic machine for registering dictated correspondence, etc. No machine of this type have as yet made their appearance in the district, which has a population of over 1,000,000, and includes a number of good sized cities.

GREATEST OF EDUCATORS.

The talking machine is the greatest of all educators. It puts the artisan on speaking terms with the great composers. Humanity at large enjoy their masterpieces—a pleasure formerly confined to a favored few among professional musicians.

THE CORTELLA TALKING PICTURE CO.

(Special to The Talking Machine World.)

DOVER, DEL., July 7.—The Cortella Talking Picture Co. filed a certificate of incorporation this week with the Secretary of State to manufacture talking machines. The capital is given at \$300,000, and the incorporators are: A. Antonelli, W. T. Jones and H. L. Tourney, Philadelphia, Pa.

NEW NOISE PRODUCING MACHINE.

(Special to The Talking Machine World.)

CHEBOYGAN, MICH., July 7.—W. A. Rideout, Jr., is erecting a factory in which to manufacture a French noise producing machine to be used in theaters, imitating all sorts of noises and operated by a system of keys similar to those of a piano.

The "OGDEN" Record Sectional Unit and Filing System

IS A BIG SUCCESS!

Popular demand for this ideal record filing system has made it necessary to double the order with the factory. Illustration shows 10 section outfit (3,000 record capacity) all sections dust proof. Springs in each compartment, positively keeps records from warping.

GETS ANY RECORD IN 4 SECONDS

By the use of adjustable numerical signals Class (Color) Signals show you every similar record in stock. Without referring to catalog they indicate all Modern Dance records, Sacred Songs, etc. Also marks "slow-sellers" and "cut-outs" and prevents reordering. You can attach these signals 1 a second.

Each section has a capacity of 300 records. Finished to match your interior. Condenses stock, saving time and space and increases sales to pleased customers because of speedy record service, filed in a dignified system.

Finding, Filing and Re-ordering in one-half the usual time.

WRITE FOR DESCRIPTIVE BOOKLET,

naming your jobber. If he has secured the agency they can be shipped direct to you and billed by him.

Guaranteed as represented.

J. B. OGDEN, Lynchburg, Va.

"Puts Any Record in your hand in 4 seconds."

The number of talking machine dealers who restrict their business to one line of product alone is becoming less by every mail.

**Columbia Graphophone Company
Woolworth Building, New York**

TO BOOM OUR FOREIGN TRADE.

New Downtown Club Organized, of Which James A. Farrell, President of United States Steel Corporation, Is President—To Develop Interest in Foreign Markets for American Goods—Prominent Men Interested.

For the accommodation of those engaged in or devoted to the development of American foreign trade a new downtown club has been organized in New York, to be known as India House.

At a recent meeting of a number of persons interested in this project, James A. Farrell, president of the United States Steel Corporation, was elected president; J. P. Grace, president of W. R. Grace & Co., treasurer, and Willard Straight, of J. P. Morgan & Co., secretary. Alba B. Johnson, president of the Baldwin Locomotive Works, Philadelphia; Edward N. Hurley, president of the Machine Co. of Chicago, and James R. Morse, of the American Trading Co., were elected vice-presidents.

The three-story building at No. 1 Hanover square, long occupied by W. R. Grace & Co., and formerly the New York Cotton Exchange, has been leased and is now being remodeled and decorated in harmony with the early traditions of the United States, which it is the purpose of the club to perpetuate. The membership will be national in character.

The organization committee consists of prominent men in New York, Philadelphia and Chicago. The organization will be promptly completed and it is expected that the club will be opened on November 15.

Mortimer D. Easton, son of President Edward D. Easton and advertising manager of the Dictaphone, arrived in New York recently on the steamer "Hamburg," accompanied by Mrs. Mortimer D. Easton. Mr. and Mrs. Easton had spent their honeymoon abroad, visiting during the past six weeks all the leading countries on the Continent. Mr. Easton also spent some time at the Dictaphone headquarters in London.

AN ENTHUSIASTIC LETTER.

The Boston branch of the Columbia Graphophone Co. received last week the following interesting letter from Don S. Ferguson, Beachmont, a prominent dancing instructor, who is the owner of a "Mignonette" machine and practically every dance record in the Columbia library:

"I received my graphophone in good condition and desire to thank you for the promptness in delivery. While acknowledging receipt of machine, I take pleasure in extending my appreciation for the splendid results obtained by the use of this instrument. There is nothing more worthy to receive than praise that originates from complete satisfaction. You are the receiver of my congratulations upon the product you are now marketing for dance records. My pupils and myself are unanimous in the opinion that they cannot be excelled. The tempo is perfect, the music inspiring, the tone inviting; three essentials for modern dancing. May our future relations continue in accordance. (Signed) Don S. Ferguson."

TO VICTOR DEALERS:

Between now and Fall, PROGRESSIVE VICTOR DEALERS will try and IMPROVE THEIR SERVICE and thus BE PREPARED for INCREASED BUSINESS during the coming season.

They will study the methods of others, SUCCESSFUL in their line, and will PROFIT accordingly.

PROGRESSIVE DEALERS are also realizing that they must study the METHODS OF ALL JOBBERS--TEST their SERVICE--be sure they have the EXPERIENCE, ORGANIZATION and CAPITAL to meet demands at ALL times.

The steady, healthy growth of this Company is the result of "BLACKMAN SERVICE" and it enters every transaction.

If you are not a "BLACKMAN DEALER", we extend you a cordial invitation to become one and IMPROVE YOUR SERVICE.

Yours truly,

BLACKMAN TALKING MACHINE CO.

J. Newcomb Blackman
President

CARRY LARGE STOCK OF GOODS

In Their Spacious Quarters at 351-353 Fourth Avenue, New York, C. Bruno & Son, Inc., Carry an Extensive Line of Victor Talking Machines and Records for Ready Shipment to Their Dealers in Territory They Control.

It is interesting to note the service extended by C. Bruno & Son, Inc., Victor distributors, 351-353 Fourth Avenue, New York. The accompanying

Showing Section of C. Bruno & Son, Inc., Record Stock Room.

illustration showing a portion of the record rooms gives an idea of the large stock carried. In addition to handling a large amount of merchandise, the company make a specialty of prompt shipment, it being their custom to forward goods on the same day that the order is received.

The record racks, the ends of which may be seen in the photograph showing a section of the record stock room, extend a considerable distance to the left as well as in the direction shown in the photograph, and these racks have a very large storage capacity. The records on the counter are being prepared for shipment to dealers. By maintaining an adequate stock it is possible to be of the greatest assistance to the dealer.

A visit to the rooms showing a part of the machine stock clearly indicates the volume of

goods constantly carried by this house. Not only is a large stock carried here, but additional storage facilities are secured in a warehouse in another section of the city. For the convenience of visiting dealers, the company maintains a display room on the Fourth Avenue and Twenty-sixth Street corner of their premises, where a complete line of Victor machines is on exhibition.

The Victor department of C. Bruno & Son, Inc., is under the direct charge of Charles F. Bruno, one of the officers of the corporation. Mr. Bruno devotes his entire time to the promotion of this particular department, the merchandising of Victor goods being not alone a hobby with him, but a feature of the business that has secured his interest for many years. Frequently dealers go to him for counsel and advice on business problems which always receive his careful attention.

The House of Bruno, which has been established for 80 years, the cornerstone of which was laid in 1834, is a monument to a successful business policy that is enjoyed by but few concerns. Its standing in the musical merchandise field is high.

One of the most forceful and helpful policies of this house is its exclusive wholesale plan, which never interferes with any retail sale of a merchant, wherever that merchant may be located.

NEW USE FOR RECORDS.

"I've found a new use for those phonograph records you bought last week and which cost such a lot of money," said his wife, according to the San Francisco Chronicle.

"How clever you are!" he exclaimed. "What is your latest?"

"In the first place," she began, "I hold a skein of wool over my arm, tie one end of the wool on a reel, place the reel on the graphophone pin and then start the machine. The wool is wound up in no time."

PROGRESSIVE JOBBERS ADVERTISE IN THE TALKING MACHINE WORLD. CONSULT THEIR ANNOUNCEMENTS.

The fond husband gasped in admiration.

"But that is not all," she continued. "To-morrow I shall place a little bath brick on one end of the records, start the gramophone, and so clean the knives."

He is still gasping.

INCORPORATED.

The Hutz Automatic Phonograph Co., of Brooklyn, N. Y., was incorporated this week with a capital stock of \$25,000 for the purpose of manufacturing and retailing musical instruments. Those interested are M. and H. Hutz and H. T. Reeb.

'Twould be great if people, when they want to air their views, could hang them on the clothesline in the backyard, as they do an old coat.

TALKING MACHINE JOBBERS WHO ADVERTISE IN THE WORLD ARE LIVE ONES, TRY THEM!

Retails at \$10.00

This machine gives you a chance to make a lot of money. Plays any needle disc record. Solidly built. Beautiful tone. Send for wholesale prices. Sample \$10.00.

TRADE CHANGE IN 50 YEARS.

Vast Growth of Exports Over Imports in the Last Half Century—Some Interesting Figures Set Forth That Are Worth Study.

The annual report on the commerce and navigation of the United States in the fiscal year 1913, just issued by the Bureau of Foreign and Domestic Commerce, reveals conditions of trade and industry in marked contrast with those prevailing in earlier years.

In a total trade of \$4,279,000,000 last year, exports exceeded imports by \$653,000,000, while at the middle of the last century, as shown by earlier reports of the series, imports were largely in excess of exports. Then imports of manufactures were more than five times the exports thereof, while in 1913 exports of manufactures were more than six times the imports of like classes. Meanwhile manufactured articles have largely replaced farm products and raw materials, except cotton, as the leading articles contributing to the export trade. Only in the carrying trade has the United States lost ground in the last half century. In 1850, for example, 70 per cent. of the foreign commerce was carried in American bottoms, while last year 80 per cent. was carried in foreign bottoms.

Additional interest attaches to the 1913 report, entitled "Commerce and Navigation of the United States," by reason of the fact that it contains the final statistical exhibit of the commerce handled at individual ports, many of which, under the reorganization effective July 1 last, lost their identity and are now included in rearranged customs districts bearing general titles, such as Massachusetts, Michigan and St. Lawrence. The continued relative advance in importance of the Southern ports is strikingly brought out in the report. While New York still holds a pre-eminent position, having handled \$2,000,000,000 of the \$4,500,000,000 worth of merchandise making up our foreign trade, Galveston has rapidly gained and is easily the second port of the country. Other Southern ports and certain of those on the Ca-

nadian border and Pacific Coast are also growing rapidly in commercial importance. New Orleans is the third port, Boston fourth, Philadelphia fifth, Baltimore sixth, San Francisco seventh, the Puget Sound ports eighth and Buffalo ninth, closely followed by Detroit.

Customs revenues last year aggregated \$313,000,000, and particulars regarding over 3,000 classes, varying in importance from such great groups as cotton laces, embroideries, etc., which paid \$22,000,000 in duties, to snowshoes, paying \$633,000,000.

NO INSIDE DISCOUNTS.

Printers' Ink Comments on a Recent Action of the Victor Talking Machine Co. and Tells Why It Came Into Being.

The July 9 issue of Printers' Ink contained an interesting article by one of the staff writers, relative to the new rule which the Victor Talking Machine Co. has inaugurated, whereby all discounts to employes and stockholders are abolished. This article reads as follows:

"Along with the increasing sentiment against the quantity discount has come a feeling that the granting of 'inside' discounts to employes, stockholders, etc., is likewise a danger to fair-trade principles. Especially among concerns which try to maintain resale prices, it is coming to be recognized that any variation from the principle of treating every buyer exactly alike as regards price is a mistake in policy.

"That the situation has become acute in some quarters may be surmised from a new ruling just announced by the Victor Talking Machine Co., to the effect that henceforth 'not an officer, director or stockholder of the Victor Co. can secure a Victor or a record at less than full list royalty.' Simultaneously with the announcement of this ruling, which is declared to 'conserve the real interests of our distributors and dealers,' there has gone forth from the general offices of the company at Camden a notice to all wholesalers and retailers handling

Victor goods that reads as follows: 'We shall construe it a violation of our license agreement if any discounts whatever from the full license royalty upon Victor machines, records or other patented appurtenances are given to any member of your firm, officer, director or stockholder of a corporation, or employe of either.'

Why the Victor Co. Changed Its Policy.

"Formerly the Victor Co. did not raise any objections to the trade giving complimentary discount to legitimate employes, and the Victor Co. followed this practice with the 6,000 workmen in its manufacturing plant. The circumstances which led to the present radical change of policy may not be without significance for advertisers and manufacturers who are marketing specialties of wide popular appeal. It has all come about from the fact that various department stores throughout the country took advantage of the Victor Co.'s leniency in this regard to inaugurate what practically amounted to a cut-price campaign. The offer of a ten per cent. discount was made openly in the pay envelopes of all the department-store employes, and the possibilities of this wholesale shaving of prices—there being 50,000 department-store employes in New York City alone—aroused the Victor Co. to action.

"The matter would be serious enough if the loss to manufacturers and distributors through the advantage taken of the ten per cent. discount were confined to legitimate employes and the relatives that they might endeavor to favor openly or surreptitiously. However, manufacturers who have studied the situation say that it has a yet more serious side in that employes have been tempted in not a few instances to split the discount with comparative strangers who desire to purchase the goods and who contract to buy them through an employe, in order to save a fraction of the list price—say five per cent., while the employe retains five per cent. for conducting the transaction."

Flexible Star Needle

"One Plays Twelve"

The complete attachment—simple, quick and easy to handle.

THE right hand illustration shows the Flexible Star Needle and Holder in proper position on a disc record. It can be easily applied to any sound-box having a screw fastening to hold the needle.

TO APPLY

To apply the needle holder, insert the shank into the needle opening in the same way as an ordinary pin and tighten the screw firmly.

TO CHANGE NEEDLES

The illustration at the left shows the clamp-nut open in position to change Star Needle. The needle is placed over stud as indicated. The clamp-nut is dropped down over stud and tightened firmly.

AFTER PLAYING

After playing a record to bring a new point into position, the crank-handle is turned one revolution.

Price—Complete Set

Needle holder and 300 points... \$3.00
Extra points, package of 300... 1.00

Complete descriptive folder mailed on request.

REMODEL "TALKER" QUARTERS.

Rosenblatt Piano Co., Bristol, Tenn., Installs New Soundproof Booths and Makes Other Improvements of Importance.

(Special to The Talking Machine World.)

BRISTOL, TENN., July 6.—The Rosenblatt Piano Co., of this city, which handles the products of the Victor Talking Machine Co., has just completed a number of changes in its Victor department which greatly enhance the attractiveness and facilities of this division of its business. Oscar Simmons, well known in the local talking machine trade, is manager of the Victor business of the Rosenblatt Piano Co. and to date has achieved a well-deserved success.

Among the improvements introduced by the company in its Victor department is the construction of three sound-proof demonstration rooms for the convenience of its patrons. This is especially noteworthy as showing the rapid strides that the Victor products are achieving in the smaller cities of the South, in company with the larger trade centers. As recently as two years ago sound-proof demonstration rooms in a city the size of Bristol were practically unheard of, but to-day they can be found in small towns from coast to coast.

IMPORTANT TESTIMONIAL.

Another important addition to its valuable collection of testimonials on behalf of Columbia dance products was received the other day by the Columbia Co. from Morgan D. Stern, head of the modern dance society study bearing his name at Broadway and Fifty-seventh street, New York. Mr. Stern, who is prominent throughout the East as an authority on the present dances, writes as follows:

"Kindly place on record my order for an additional 'Dengozo' matchiche record. The perfect rhythm and beautiful tone which this record possesses, aside from its greater length and lower price, places it superior to any other matchiche record so far produced—in fact, all Columbia dance records embody the one important requirement toward perfection—namely, accurate time. The Columbia dance records are in continual use in all my studios, both in private and class instruction. For the latter purpose I consider them preferable to other musical instruments. Yours very truly, (Signed) Morgan D. Stern."

CHARTERED TO DO BUSINESS.

The M. G. H. Corporation has been chartered under the laws of New Jersey to engage in the phonograph business. The capital stock of the new concern is \$500,000 and the incorporators are J. T. Magee, B. McCall and A. J. Stobbart.

TO MAKE LOW PRICED MACHINE.

It is reported that a company is being organized in Chicago for the manufacture of a talking machine that will retail for from \$5 to \$10, and which is said by the promoters to be a remarkably serviceable instrument. Records will be made to fit it that are but a few inches in diameter.

When you get to the store in the morning be sure that you look and feel like work. If you don't feel that way there is something the matter.

**Columbia Graphophone Company
Woolworth Building, New York**

PLEASED WITH TRADE PROSPECTS.

Indianapolis Surprised at Summer Activity—Cultivating Canoe Trade—Piano Houses Take on Victor Line—News of the Month.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., July 9.—Indianapolis talking machine dealers assert they are surprised at the manner in which the talking machine business is holding up during the hot weather. None of them

is complaining of business conditions. All are predicting that they will have more trade this fall than ever before.

A. W. Moos, manager of the local store of the Columbia Graphophone Co., has a salesman in H. M. Wright who believes in going to the river for business. Mr. Wright has created a great deal of favorable comment, and, what is more important, has been making a large number of sales by equipping a canoe with a Columbia Grafonola. The canoe is painted red. On the end of the canoe, in silver leafing, is the name "Columbia Grafonola." The craft flies two flags—the American flag and a Columbia pennant. Concerts are given by Mr. Wright every Saturday afternoon and evening. As a result nearly every canoe on the river at Riverside Park is equipped with a talking machine.

Mr. Wright also has designed an attractive mid-summer window. A real Indian wigwam, surrounded by real grass—which Mr. Wright sprinkles each day, and several rabbits make up the window display. Back of the wigwam is an old-fashioned rail fence. On a stump is a Columbia talking machine. Hundreds of passers-by pause at the window every day.

"Business is holding up good," said Mr. Roos in discussing business conditions. "The prospects are that it will continue to be good all summer."

George W. Lyle, general manager of the Columbia Graphophone Co., visited the Indianapolis branch recently.

Alexander M. Stewart, and his son, George Stewart, both of the Stewart Talking Machine Co., have left Indiana for an extended trip through the East. They expect to attend the convention at Atlantic City. They will visit a number of the Eastern cities before returning.

The installation of Victor talking machine departments by the Pearson Piano Co. and the People's Outfitting Co. is announced by the Stewart Talking Machine Co., through whom these companies will get their Victor goods.

The Pearson Piano Co. is planning extensive improvements, and when the company's building has been remodeled the talking machine department will have adequate quarters on the first floor. The People's Outfitting Co. also will make room for a special talking machine department. Both will handle the entire Victor line.

"Business conditions are fine," said W. S. Barringer, manager of the Stewart Talking Machine Co. "We placed our expectations away up and they are now being fulfilled ahead of what we expected."

To add to the efficiency of the Stewart Talking Machine Co. a motor truck for rapid service has been bought by the company. The company will use this truck in addition to a large horse truck.

The Kipp-Link Phonograph Co., which handles the Edison line of talking machines, reports good business conditions for the time of the year. Walter E. Kipp left Indianapolis recently on a visit to the Edison factory.

Some people have so little confidence in themselves that they really don't think they could plan a house better than the architect.

PROGRESSIVE JOBBERS ADVERTISE IN THE TALKING MACHINE WORLD. CONSULT THEIR ANNOUNCEMENTS.

The **VELVATONE** talking machine needles can be used on all disc records. Perfect music with the **VELVATONE**—no scratching. Jobbers and dealers who have seen and heard them are enthusiastic over their merits. Get in your order now; be on the right side of the needle argument. It will help you to sell talking machines by making them more popular.

One needle will play a number of records by simply turning the needle **ONE-QUARTER** way round after playing each record.

VELVATONE NEEDLES are easy and convenient to use, and you add a great deal to the enjoyment you now derive from your instrument.

The tone is soft and sweet, and just the proper volume for the home. It is possible that in the first trial you may not obtain the best results, as it is necessary to play the records over a few times with **VELVATONE NEEDLES**, as they will lubricate and polish the grooves of the record. The production will then be clear and smooth, and the **RECORDS** will last indefinitely.

One Velvaton Needle Will Play A Surprising Number of Records

The Chemical process with which **VELVATONE WOOD NEEDLES** are treated contains an oily substance, which acts as a Lubricant, and thus polishes and smooths the grooves of the record to a great extent each time the record is played.

Write for Jobbers' discounts.

Instructions for Using Velvaton Wood Needles—Self Sharpening

Place the needle in the sound box in the same manner as an ordinary steel needle, then, in order to avoid injuring the point of the needle, place it carefully into the groove of the revolving record; let the needle remain in the same position in the sound box as long as it will reproduce perfectly. When it is necessary to change the needle do not throw it away, but turn it one-quarter way round and it will reproduce as clearly as at first. This can be repeated a number of times before the needle is worn out.

The number of records that can be played with a single **VELVATONE NEEDLE** depends upon the condition of the record.

Before perfect results are obtained with some records it may be necessary to play them over several times with a **VELVATONE NEEDLE**.

Jobbers who heard the **VELVATONE** at the Atlantic City Convention were surprised at the wonderful effects produced, and they placed goodly orders for them.

Do likewise—do it now, and quicken your business pulse.

50c. Per Package of 100

Liberal discounts to Jobbers. Full information given upon application

MANUFACTURED ONLY BY THE

VELVATONE WOOD NEEDLE CO.

THE PATHÉSCOPE WITH WANAMAKER

The Great New York Department Store to Establish Pathéscope Salon to Demonstrate This Amazingly Successful Machine—Pathéscope Exchange of Philadelphia Organized.

It was announced this week at the offices of the Pathéscope, 27 West Forty-second street, New York, that arrangements had been completed with John Wanamaker, New York, whereby this prominent department store would establish a Pathéscope

EDUCATORS KEENLY INTERESTED

In the Talking Machine at Their Annual Convention in St. Paul—New Building, Perhaps, for Lawrence H. Lucker in St. Paul for His Edison Interests—News of Month.

(Special to The Talking Machine World.)

MINNEAPOLIS AND ST. PAUL, MINN., July 8.—Twelve thousand teachers assembled in St. Paul for the fifty-third annual convention of the National Education Association have put the talking machine dealers of the twin cities on their mettle to engage the hungry-eyed, information-seeking pedagogues. The Victor Co. went right into the camp of the teachers with an educational exhibit in the National Guard Armory, where all the teachers registered and where the book publishers and school-supply dealers had their exhibits.

Educators realize the tremendous benefits obtained by the intelligent use of talking machines, and the time will come when every school, in addition to its piano and stereopticon, also will have a high-class phonograph, and the present convention is likely to give a greater impetus to the movement than its predecessors. While the Victor is the only house to get right in to the inner camp, the other houses, through local dealers, are making strong appeals to the teachers through window displays and newspaper advertising.

The Columbia is making a big card of its Grafonola Mobile, which can be trundled from one room to another on its rubber-tired wheels in a moment and without any disturbance. That the device will appeal to principals of large schools is quite natural.

P. P. Claxton, the United States Commissioner of Education, while declining to commit the Government wholly to the use of mechanical devices as aids in teaching and entertaining, said that his bureau workers had made considerable study of phonographs and stereopticons, and while there had as yet been no official report as to their investigation it is well known, he said, that both can be made useful under intelligent administration.

F. A. Westerfeld, superintendent of Dictaphone

agents of the Columbia Co., was in the Twin Cities last week. He stated that the dictaphone was growing in popularity among lawyers and others having large correspondence, and nowhere more rapidly than in the Middle West. Every up-to-date office, even a small one, in time will have an arrangement as part of the necessary furnishings of the office. T. A. Lowrey, traveling auditor of the company, has also been through the Northwest, and it is believed that he found the branch houses doing well.

It is reported in St. Paul that Laurence H. Lucker has obtained the triangular building at Sixth and St. Peter streets, St. Paul, for his proposed Edison shop. The location is in the heart of what is expected to be the new department store district, while the building itself hardly could be improved upon for display purposes, as it has a conspicuous position and ample street frontage. No public announcements have appeared, but there is no question but that Mr. Lucker will put through his plans.

General trade has resolved itself to midsummer conditions. The record trade keeps up among the lake resorters, but the sale of machines is not especially brisk. Still it is as good as last year, and with many dealers a whole lot better.

A CLEVER FILING CABINET.

The Ogden Invention Captures Good Orders from the Trade.

J. B. Ogden, Lynchburg, Va., had one of his new patented record filing cabinets at the Chalfonte, which was greatly admired by visiting jobber at the Atlantic City convention. As a result of the interest which it created, Mr. Ogden took back a substantial number of orders with him.

The Ogden record cabinet enables the dealer to place his hands on any record in stock most quickly. It is equipped with a spring in each compartment that holds all records in an upright position regardless of quantity of records filed and keeps them from warping. It has a simple adjustable signal system which makes quick filing possible and enables the salesman to locate a record immediately. It requires but small space and has a large record capacity. These cabinets are made on the sectional unit system. The record capacity of these cabinets is unusually large and dealers would do well to write to Mr. Ogden for full particulars. He has a special proposition for jobbers.

The fellow who is always forgetting himself has no right to kick when he is forgotten.

Pathéscope Booth at the Moving Picture Exposition.

salon to demonstrate this successful machine. Loujs J. Gerson, manager of the Wanamaker talking machine departments has carefully investigated the merits of the Pathéscope and is enthusiastic over its future in this country. Mr. Gerson is planning to visit the factory of Pathé Freres, Paris, this summer on his trip abroad.

When seen by a representative of The World, an official of the Pathéscope remarked as follows regarding the firm's progress: "The Pathéscope Exchange of Philadelphia, organized solely to market the Pathéscope in southeastern Pennsylvania and southern New Jersey, has just received its first order of over fifty instruments and sufficient films to conduct a film exchange for their owners. One of their initial transactions was a sale of ten instruments and 16,000 feet of film to a prominent Philadelphia industrial concern.

"One of our recent sales from this office was a motor-driven instrument for the Indian school at Sitka, Alaska. The purchase was made by the Presbyterian Mission, which supports the institution and which has also arranged for monthly service of new films to be supplied regularly from the New York Pathéscope Exchange.

"Our booth at the recent Exposition of the Moving Picture Art at Grand Central Palace, New York, was a decided success. This was partly on account of the smooth operation of our instruments and very largely because, after the first few days, every other motion picture machine on the first floor was stopped by the insurance authorities. On account of its approval by the National Board of Fire Underwriters the Pathéscope was allowed to continue its exhibition without interruption."

It may be a lofty ambition to hitch your wagon to a star, but it is safer to drop your anchor in the mud.

2795-2799 BROADWAY (At 108th Street,) NEW YORK

TRADE IN NEW YORK RUNNING AHEAD OF LAST SUMMER.

Jobbers and Dealers Now Placing Their Orders for Expected Fall Trade—No Evidences of the Slightest Business Depression in the Reports of Local Members of the Industry—Sales to Yacht Owners—Noteworthy Speed Record of Well-Known Sales Manager.

The most important topic of discussion the past month among talking machine dealers has been the marked contrast of their business to general mercantile affairs. It is indeed gratifying to visit the various dealers and find that, with practically no exceptions, their business during the month just closed showed a substantial increase over the corresponding period of last year.

To the business man in other mercantile lines this optimism is a great surprise, as general conditions the past month have been very poor and unsettled. The Claffin failure was a bomb-shell in all lines of business throughout the country, and particularly affected New York industrial conditions. Notwithstanding this unrest, however, talking machine distributors and dealers in this territory are emphatic in declaring that their business the past three months has been entirely satisfactory, and that their trade as a whole gives every indication of breaking all previous records by the end of the year.

The local talking machine trade has been an important factor in newspaper advertising the past few weeks. The advent of vacation time, with the consequent demand for dance records and small machines, impressed the dealers with the fact that their advertising in the newspapers would be both timely and effective, and accordingly, good-sized advertisements featuring machines, records and service were inserted at frequent intervals and produced excellent results.

The record problem has steadily improved, and at the present time there is scarcely a ripple of complaint among the distributors or dealers regarding record shortage. The factories are to be congratulated on this excellent situation, as the record demand has been tremendous and beyond all expectation. The increased facilities provided by the manufacturers and the efficiency of their sales organizations have been very important factors in handling this phenomenal record trade.

Business Better Than Normal.

"Our June business was much better than normal," said J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, New York, Victor and Edison cylinder jobber, "because stocks have been so low that factory shipments are coming through much better than heretofore. This, of course, produces considerable business for the jobbers and dealers who are stocking up at the present time. I believe that the dealers also realize that it is a good, safe plan for them, and to their advantage, to put in machine and record stock now, and carry a larger stock than usual for this year's fall trade.

"Summer business so far has been somewhat better than ordinarily, due in a considerable measure to the continuance of the dance craze. Talking machines are being taken away to summer resorts by their owners for dancing purposes, which also stimulates the demand for the regular catalog records. On the whole, the talking machine business seems to be in remarkable contrast with general business, which is dull and psychologically poor, consequently the talking machine business must be in turn psychologically better than other lines of business, all of which would tend to the belief that psychology is a friend of the talking machine business."

Victor Distributor

PROMPT AND ACCURATE SERVICE

DEALERS: Write for our Victor Pennant. Sent with our compliments.

Reports Gain of 50 Per Cent.

"We showed a gain of over 50 per cent. in our last month's business, as compared with June, 1913," remarked R. F. Bolton, manager of the Columbia Graphophone Co.'s wholesale headquarters, 89 Chambers street, New York. "This gain is doubly pleasing when the general business depression is taken into mind. Collections have been very satisfactory, everything considered, and the outlook is decidedly encouraging. The most important phase of our business in June was the steady demand for the higher priced machines as compared with last June, when the cheaper machines were more in demand."

Demonstrations Attract Trade.

"Our daily demonstrations have proven very successful," said H. N. Purdy, manager of the Edison disc department of Hardman, Peck & Co., 433 Fifth avenue, the prominent piano house, "and we believe they have contributed materially to the excellent June business which we closed in both Edison disc machines and records. As a matter of fact, our sales totals last month exceeded our expectations, and for a summer month were really fine. The Edison disc records are meeting with a ready sale and winning the admiration of all our clients."

A Remarkable Achievement.

Apropos of the recent disastrous fire which almost cleaned out the New York Talking Machine Co., Victor distributor, as noted in detail in another section of this paper, some idea of the tremendous labor involved in replacing the company's stock may be gathered from the following incident: V. W. Moody, sales manager of the company, as soon as the temporary quarters at 77 Reade street had been rented the day after the fire, started, with the help of several men from the Victor factory, to reorder the company's record stock, which had been practically destroyed in its entirety, and to replace the 1,500 machines, which had also been ruined by fire and water. The reordering of the machines presented a comparatively easy problem, as a definite order of the machine number and the style of finish was sufficient. The Victor records could not be ordered in that way, however, as every one of the 5,000 records in the Victor catalog required individual consideration.

It was on this day and night job that Mr. Moody was busily engaged on Thursday morning in company with the factory men when he received a long-distance telephone call from Philadelphia requesting his presence there that afternoon to give testimony in a certain case before the court. At 11:35 Mr. Moody and his three co-workers left the company's headquarters, and at 12 o'clock were on their way to Philadelphia. A table was provided for their use in the dining car, and they continued working until the train reached the "Quaker City" at 1.50. In ten more minutes Mr. Moody was on the witness stand, and, after finishing his testimony, crossed the Delaware River at the other end of Philadelphia and rejoined the factory men at Camden, N. J., at 4.10, which, we may remark, is some traveling.

Columbia Trade Active in New York.

H. A. Yerkes, wholesale manager of the Columbia Co., in a chat with The World, remarked on the excellent reports which are being sent him by all the new dealers who have recently opened Columbia departments in local territory. The aggressive and high-class methods which these dealers have used to secure machine and record business have produced excellent results, as evidenced in the letters Mr. Yerkes is receiving. The enlarged Columbia department at the F. G. Smith store, 335 Fifth avenue, is achieving noteworthy success under the management of Hayward Cleveland, one of the veterans and best-known men in the trade. The Columbia departments in the Kranich & Bach store, Cowperthwait stores and Christman Sons' piano house are all gaining new patrons with pleasing regularity.

Sales to Yacht Owners.

A. N. Struck, manager of the Edison department of the Tower Manufacturing & Novelty Co., 326 Broadway, New York, has been making energetic efforts to develop his trade in specialized fields. Discussing this phase of the Edison business, Mr. Struck remarked as follows: "During the past few weeks we have sold four \$250 Edison disc machines to owners of private yachts who are planning to leave on extended summer cruises. These purchasers, who include prominent business men and financiers, are enthusiastic regarding the tonal qualities of the Edison disc machines and records, and I expect to close several other machine sales to yacht owners within the next few days. The \$250 machine is the most popular seller with all our trade, who consider it the ideal machine from all standpoints."

MICA PRODUCTION LARGE.

North Carolina Yields More Than Half of Country's Output.

(Special to The Talking Machine World.)

WASHINGTON, D. C., July 3.—Mica, which is used to such good purpose in the talking machine field, is found in crystals ranging from small ones to those several feet across. Crystals two feet in diameter are not uncommon. The value of the mica produced in the United States in 1913 was \$436,060, North Carolina contributing \$267,913. The total value of the output in 1913 was \$104,164 greater than in 1912 and was the largest ever reported. The production of sheet mica as reported to the United States Geological Survey amounted to 1,700,677 pounds, valued at \$353,517, compared with 845,483 pounds, valued at \$282,823, in 1912. The production of scrap mica in 1913 amounted to 5,322 tons, valued at \$82,543, compared with 3,226 tons, valued at \$49,073, in 1912.

The survey has just issued its annual report on the production of mica, by Douglas B. Sterrett, but in addition to the statistics of production, markets, etc., this report contains an interesting statement of the mode of occurrence of mica and the kinds of rocks in which it is found, methods of prospecting and mining, and treatment of the product for market, as well as the economic uses of the various kinds of mica.

INCORPORATED IN DELAWARE.

(Special to The Talking Machine World.)

DOVER, DEL., July 6.—The Cortella Talking Picture Machine Co. this week filed a certificate of incorporation with the Secretary of State to engage in the manufacture of talking machines. The capital is given as \$300,000, and the incorporators are A. Antonelli, W. T. Jones and H. L. Touray, Philadelphia, Pa.

VICTOR FOR CHURCH USE.

The Talking Machine Co., of Philadelphia, Victor representative, recently furnished the large congregation of the Bethany Evangelical Lutheran Church with an excellent concert of hymns and sacred music.

It is just as well, when you bottle your wrath, to throw away the corkscrew.

THE CORLEY SERVICE APPRECIATED.

Splendid Enterprise Built Up by Progressive Richmond Jobbers—Conducting a Business Over a Large Territory—Attribute Success to the Service Given to Customers.

(Special to The Talking Machine World.)

RICHMOND, VA., July 8.—Mention of Richmond conjures up visions of an historic past, rich in memories of bygone days when all the South acclaimed it the logical location for its capital. It is not, however, of the glories of the past that we have to

three years, until to-day the annual business will approximate a quarter-million dollars! This department is under the direct supervision of Frank W. Corley as general manager, assisted by Fredk. Kessnich, wholesale manager, and a very capable and efficient force of assistants. Hardly a town or village in the entire South is too remote to receive the benefits of the Corley Co.'s Victor service, and the territory is practically bounded by the Gulf Stream, thousands of dollars' worth of goods being shipped annually to New Orleans and even further points. It is a striking com-

service. Particular attention is paid to the exploitation of the latest and most popular numbers of the foreign records, and a stock sufficient to fill any order at a moment's notice is always carried in the record vaults of the company. Another feature worthy of mention adopted for the benefit of their customers is that wherein suggestions for advertising and advertising literature prepared to meet the individual requirements of the customer are designed gratis by the Corley Co.'s advertising department and furnished freely upon request. The success of the Corley Co. in the jobbing line has been marked and emphatic, and it shows what splendid results may be attained from a business built on efficient service.

Part of the Vaults of the Corley Co., Richmond, Va.

do with in this article, but of the tremendous commercial activities of the present day in general and the wonderful expansion in the Victor department of the Corley Co. in particular. In the ten years since this department was established the growth has been phenomenally great, exceeding even the wildest dreams of its founders, forging ahead by leaps and bounds from year to year, actually doubling the sales for each of the past

mentary on the business sagacity of the Southern dealers that they have been quick to grasp the manifest advantages of dealing through this progressive house, for the admirable location insures quick deliveries, low freight rates and excellent shipping facilities, and a complete stock of "Everything the Victor Co. makes." makes a combination of irresistible attractiveness, and doubtless explains the success of Corley

piano advertising of a sensational nature for some time past. This law reads:

"Any person, firm, corporation or association who or which in a newspaper, circular or form letter or other publication published in this State wilfully or knowingly makes or disseminates any statement or assertion of fact concerning the quality, the quantity, the value, the method of production or manufacture or the reason for the price of his or their merchandise or the manner or source or the possession of awards, prizes or distinction conferring a gain on such merchandise, or the motive or purpose of a sale, intended to give the appearance of an offer advantageous to the purchaser which is false and fraudulent, shall be guilty of a misdemeanor."

Violations of the new law are punishable by fines of not less than \$25 or more than \$100 for each offense.

"TALKER" MUSIC ON TRAINS.

Talking machines furnish novel amusement on transcontinental trains of the Union Pacific & Northwestern Railroads, where the passengers dance up and down the cleared buffet and dining cars to the merry strains of the latest Victor tango records as played on the Victrola.

STANDARD GRAMOPHONE APPLIANCE CO., 173 Lafayette St. NEW YORK

TAKES ON THE COLUMBIA LINE.

The Schoen Music Co., Who Recently Took on This Line Reports Encouraging Business—Schroeder Piano Co. Doing Well in Talking Machines—Henry's Taken Over by A. J. Meyer—Kaufmann Bros.' Big Victrola Business—Other Pittsburgh Happenings.

(Special to The Talking Machine World.)

PITTSBURGH, PA., July 9.—The Schoen Music Co., 119 Federal street, North Side, has taken on the Columbia line and reports a very encouraging business. One of the large show windows has been given over to an effective display of machines and records and is attracting much attention. Mr. Schoen says that the sales of records have been unusually high during the past few weeks. The Schoen Music Co. has heretofore confined its business almost exclusively to pianos.

The new talking machine department of the Schroeder Piano Co. has far exceeded all expectations by its business for the first month of its existence and the outlook is very promising. The sales of \$200 machines are reported as having been especially good. The Columbia line is being handled exclusively. Miss H. R. Dunn, who is so successfully managing the department, is planning to leave soon on a three weeks' vacation trip, most of which she will spend on the Great Lakes.

H. N. Rudderow, manager of the Kaufmann Bros. Victrola department, states that business has been very good especially during the past two or three weeks. The two outside salesmen are handling some very good trade, and the inside salesforce has been increased by the addition of another saleslady. Mr. Rudderow reports that the new style Victrolas are meeting with a very favorable reception. Since the beginning of the camping and vacation season a large space of the eleventh floor just off of the Victrola and piano department has been given over to a realistic camping scene with the Victrola camp outfit in use. Tents, hammocks, canoes and the indispensable Victrola are shown in the environ-

ment of an ideal camp among the woods and hills. The exhibit is one of the finest and most pretentious of its kind ever shown here.

Henry's, 614 Penn avenue, in the last week of June was taken over by A. J. Meyer who is now almost sole owner, although the company still remains a corporation with several others holding a small amount of the stock. E. A. Grau has retired from the business and is contemplating entering some other line. Mr. Henry, who now resides in California, sold his interests in the firm to Mr. Meyer about three years ago. The name of Henry's is being retained, however, on account of the prestige acquired by the old firm of Powers & Henry, which was one of the pioneer talking machine houses of Pittsburgh. Mr. Meyer is very sanguine over the outlook of the Victrola business and reports that there has recently been a marked increase in both inquiries and sales.

Among Pittsburghers attending the national convention of the Talking Machine Jobbers' Association at Atlantic City, are J. C. Roush, of the Standard Talking Machine Co., and French Nestor, manager of the W. F. Frederick Co.'s stores.

Mr. Harned, of the W. F. Frederick Co.'s Victrola department, reports that for the first six months of 1914 a gain of 90 per cent. has been made over the sales of the same period of last year. Camp outfits are being featured with splendid success.

SOME BALTIMORE BRIEFLETS.

Convention Attracts Some Baltimoreans—Droop Enlarges Store—Business Is of Fair Volume—Vacations Now Under Way at All Stores.

(Special to The Talking Machine World.)

BALTIMORE, MD., July 9.—Most of the Victor jobbers are in Atlantic City this week attending the convention, but despite this fact, reports at the various stores indicate that the summer months are having little effect upon the sales. Business has been keeping up in good shape and many substantial sales have been placed on the books. These include a number of the high-priced machines of the various makes.

W. C. Roberts, of E. F. Droop & Sons Co., and Joseph Fink, of the Fink Talking Machine Co., are among those taking in the Atlantic City convention. Before leaving for the seashore both of them reported that they had a very satisfactory June with regard to sales of machines and records.

The store of E. F. Droop & Sons Co. has been greatly improved and enlarged during the month so that the firm now has twice as much room as it had formerly. The offices have been placed in the rear where the new addition was made and the salesrooms are in the front and have been doubled in capacity.

F. A. Dennison, manager of the local branch of the Columbia Graphophone Co., is away on his vacation for two weeks. Mr. Dennison is spending his time at Rehobeth Beach, Del. Reports at the store show that June was likewise an excellent month for the Columbia trade.

Reports from H. R. Eisenbrandt Sons show that this firm enjoyed the fruits of a good June trade and that indications point to a duplication of the good results during the present month. This firm handles the Victor lines.

The Kunkel Piano Co., which also handles the Victor line, is playing up the talking machine business very elaborately and with good results. The firm has a very neat Victor window display this month.

The Sanders & Stayman Co., Inc., which handles both the Victor and Columbia lines, announces that both ends of the business have been quite prosperous during June.

BURGLARS DESTROY STOCK.

A band of motor-car thieves visited Yonkers and robbed several residences and a number of stores last week. Among the stores visited was that of the Yonkers Talking Machine Co., where little was taken but considerable property wantonly destroyed.

SOME INTERESTING CUSTOMERS I HAVE MET

As Told by Benj. Switky, the Prominent Victor Distributer of New York—The Necessity of Studying Human Nature with a View to Reading the Minds of Customers, Illustrated by Some Actual Experiences—A Great Diversity of Desires to Be Catered To.

If the boss isn't looking, I would like to whisper something into the ear of his salesman, to the effect that he is getting, over and above his salary, a certain compensation or advantage not nominated in the bond. I hope not to be taken too seriously when I point out the fact that a salesman in a talking machine store has a beautiful opportunity to study psychology without going to college and without paying any tuition fee.

Psychology is the study of the mind. It is recognized as a distinct branch of science. It has to do with observation of the workings of the human brain—whether normal or abnormal—marking the deviations, the conscious and subconscious impressions made on the brain, and the subsequent thoughts and actions.

"But what has all this to do with selling records?" you may ask. A great deal. Every salesman depends on his "instinct" in handling his customer. He sizes up the clothes, deportment and features of the prospective buyer. Whether demonstrating the line of machines or playing records, the salesman tries to read the thoughts of his customer. He watches his expression to learn what class of music he prefers. He tries to impress his own thoughts on the mind of his customer, so that he will buy a higher priced machine or decide to take home certain records which the salesman feels sure his customer should buy. All this mental work involves psychology.

The better the salesman the more proficient is his ability to read his customer's mind; and I don't know of any business that yields a better opportunity to study psychology—or human nature, as it is sometimes expressed. But no matter how expert the judgment, it often goes wrong.

An Aristocratic Buyer Misjudged.

I once waited on "a lady of quality." She was recommended by a customer of mine, with whom she made an appointment to meet at my store, to buy a Victor. She arrived in grand style, with carriage and pair, liveried coachman and footman, and all the trappings that accompany a grande dame living on Fifth avenue, right off Central Park, New York City. At that time our best machine was the Victor VI. Without deigning to examine the machine, she wanted to know if that was the best made. Likewise we had to assure her that there was not likely to be a better one marketed in the near future.

Then came the selection of records. By all means she wanted all the fine records that her friend suggested. In addition she must have the expensive Red Seals which she had heard around the homes of her many friends. After that I got the shock of my life when she beckoned to me with her lorgnette that I should step closer. With a most engaging smile she asked me sort of confidentially, "Have you got anything in the way of a real nice, refined coon song?" When she heard "Nigger Loves His Possum" she was delighted.

After that I made up a special collection of coon songs, ragtime music, minstrels, etc., which she kept as her very own. The others were intended for company only.

Real Lovers of Music.

New York is a wonderful city—wonderful because of its extremes. The superlative in everything abounds here. The greatest wealth and the most abject poverty; hundreds of amusement palaces catering to the gay, and hundreds of ill-smelling lodging houses patronized by the miserable; awe-inspiring skyscrapers rubbing elbows with two-story shanties. Likewise, it is nothing unusual to be selling records to a millionaire in one booth and to a collarless mechanic on the other side of the partition. The former may be selecting tangos and trots to help him in his dancing lessons, whereas the other wants the heavenly kind of music, the kind that will help him to forget his troubles for the time being.

One of my most appreciative customers was an Italian tailor. He and his wife would call regularly on Saturday on their way home from the cloak shop where they were both employed, of which there are many in the vicinity of Fifth avenue below Twenty-third street. They always carried with them a thumbworn catalog in which they had marked off the records bought to date, as well as those they intended to own just as quickly as their meager earnings would permit.

After listening to two or three selections they would choose one and assure me that they meant to buy the others also—but not to-day. Every Saturday for nearly two years they would spend two or three dollars—rarely four—for a new record.

I shall never forget the ecstasy with which they listened to the seven-dollar Sextet. I played it for them on several different occasions just to give them a treat. At last they fell. The temptation was too great. The wife's birthday was near at hand, and they decided to buy it on my suggestion that they could pay for it in two or three payments.

It is a well-known fact that Caruso's voice is to be heard floating through more than one open window any summer's evening or Sunday in Mulberry street or Elizabeth street.

The Educational Value of the Talking Machine.

About two years ago a gentleman and a little girl came into the store. It was just before Christmas. They had spent the greater part of the day "rubbing" in the department stores, enjoying the holiday exhibits and decorations for which this class of stores is famous, particularly in the metropolis. It seems that this little girl coaxed her father to enter the store under the pretext that she felt tired, and possibly because the big leather upholstered armchairs looked so inviting.

It just happened that there was a lull in business, so I offered to play for them a record or

two by way of diversion. Turning to the gentleman, I inquired whether there was any particular selection that he would like to hear.

"Me? No, thanks. I wouldn't give one of them things house room!" was the reply.

"Wouldn't you like to hear something nice?" I inquired of the girl, nothing daunted. "We have some nice records for children. There's 'The Tin Gee Gee,' or a laughing song by Harry Lauder, or a funny story by Uncle Josh."

"Oh, no," she answered, "my favorite is the 'Barcarolle,'" and she hummed the air from the "Tales of Hoffman."

"My girl has outgrown all that baby trash," chimed in the father, proudly.

There was my cue, and I followed it up. First, I complimented him on the fine home training that his little girl showed. Then I argued with him that in justice to the child it was his duty to provide her with a Victrola; that, being susceptible to good music, she should be surrounded with every possible musical influence that would aid in educating and refining the child. I pointed out to him the fact that the girl evinced decided talent musically and that he should lose no time in obtaining for her a piano teacher. This suggestion delighted the girl.

But the interesting part of my story is not only that the thought-seed sown in the father's mind took root, but in addition to her music lessons, he surprised her one year later with a Victrola as a Christmas present to aid her in her studies. And, what is more, the father finds pleasure and comfort in listening to the Victrola.

Parental interest and pride in their offspring is the most vulnerable spot in the armor of indifference which the salesman often is called on to combat.

If we but knew how many machines are bought just for the sake of the children we would make it our business to cater still more to the little ones. "Suffer little children to come unto me" is a teaching that is as good and true for us to-day as it was when Christ uttered it. And the conversion of the parents from a state of indifference to the state of music lovers has been the mission of the talking machine. Oliver Goldsmith expresses the thought beautifully in one of his works, when he says, "And those who came to scoff remained to pray."

Customers That Don't Want What They Want.

"I want a funny record for a child," declared a lady one day, as she seated herself prepared to listen. I played six records, each of different

**ANDREWS MUSIC
HOUSE CO.**

98 Main Street
BANGOR, MAINE

VICTOR DISTRIBUTERS

character, but all that I thought would surely please any child. Not even the slightest sign of approval could I get from the lady. I was commencing to size her up as a time-killer. I'll admit that my patience was well-nigh exhausted. However, I thought I would stick to it just a record or two longer.

"What is that record being played over in that other booth?" she inquired.

"That, madam, is Liszt's 'Hungarian Rhapsody,'" I replied.

"Beautiful! I want that by all means."

After I had sold her about \$10 worth, all classic music; I still tried to learn why she could not decide on a record for the baby.

"Well, you see, while I wanted to get a record especially for the baby, I realized that it would be played all day long and that we would be obliged to listen to it—and I just couldn't stand it!"

Helping the Customer to Select Records.

It is surprising to notice how abnormally some people can behave while choosing records. I have known otherwise good-natured customers to, tax the patience of the salesman, have him play a dozen or more of the finest and best selling records, find nothing that appeals to them, and finally, from sheer desperation, select a record just to repay us for our trouble.

It was not because of any cussedness, or meanness of spirit, or economy of purse. They would gladly buy if they could be suited. The fault lies in the fact that they have no musical taste or judgment. Fearful of the criticisms of the folks at home, they feel helpless, vacillating, undecided. It requires the dominating judgment of the salesman to force upon them the good records, assuring them and convincing them that after several hearings the records will surely appeal to them more strongly.

Every salesman can recall from experience making sales of certain selections which were rejected on first hearing one day and bought on second hearing another day. While this fact may occasionally be attributed to the difference in the buyer's mood or disposition on the two different occasions, it is more likely that the second playing pleased because the customer became more familiar with the music by repetition.

It is a well-known fact that familiar music sells more readily. While there are certain compositions that are so striking and so abstrusively good or catchy that they appeal instantly to the average listener, there are, on the other hand, many beautiful compositions, particularly among the classics, which must be heard several times to be appreciated.

Why Certain Records Sell Readily.

Such compositions as the "Anvil Chorus," "Toreador Song," Intermezzo from "Cavalleria Rusticana" and the "Merry Widow Waltz" are ready sellers for one of two reasons: either because the selection is a familiar one, or, as in the case of the "Merry Widow Waltz," because the melody is sing-song, very simple and oft-repeated from start to finish of the record. These selections are grasped by even the weakest of musical brains.

On the other hand, selections such as "The Angelus," from "Sweethearts," "Merry Wives of Windsor Overture," "Song of the Soul," "Le Nil"—all of them beautiful compositions—do not sell so readily because they must first filter or percolate through the average brain. On the first hearing such music does not usually quicken the pulse sufficiently nor stir the hearer into decisive action. It is good salesmanship to play over such selections a second time for the customer.

We must try to reason out and appreciate the workings of the customer's brain, so as to be able to help him to arrive at a decision in the selection of records. The gratitude of the buyer will well repay the salesman. He will feel that nowhere else could he receive such good treatment.

I hope that I have made clear to the reader the benefit, pleasure and self-culture that falls to his lot as the result of intelligent intercourse with the many different specimens of humanity that circulate in every talking machine store wherever located.

We Do Not Retail

THERE is a world of support and profit to the dealer in *this policy of ours.*

We are here to serve *you only*, without exception, and thus our efforts are entirely and continually applied to that purpose.

An adequate stock, complete and modern equipment, and a superior organization make it possible for us to serve you well and that is the result we strive for and attain.

NEW YORK

A PROFITABLE SIDE LINE.

Many Talking Machine Dealers Realize the Possibilities That Exist for the Promotion of a Successful Musical Merchandise Business, but There Are Others Who Overlook This Fact—Importance of Getting in Touch with Buegeleisen & Jacobson and the Advantages Therefrom Interestingly Set Forth.

"I am certain that if talking machine dealers throughout the country fully realized the possibilities that exist for the development of the musical merchandise business there would be very few dealers indeed who would not be carrying sufficient stocks of musical instrument strings and the smaller wares to take care of the demands of their trade," said Samuel Buegeleisen, head of the prominent musical merchandise house of Buegeleisen & Jacobson, 113 University place, New York, and one of the best informed men in the industry.

"There was a time, and not so long ago, that talking machine dealers who contemplated han-

The Durro String Pouch.

dling small goods as a part of their business were confronted with the problem of securing additional floor space, experienced sales people and other incidental requirements which would soon eat up all the profits. The question of room was a particularly troublesome one, and many talking machine dealers, who would otherwise have arranged to handle lines of musical merchandise, were deterred from so doing because of a lack of sufficient floor space and disinclination to increase their rent.

"Realizing this condition, we labored for some time to perfect a series of dealer helps and articles which would occupy a minimum amount of room in the dealer's establishment, practically act as silent salesmen, and contain sufficient merchandise to give the dealer an adequate stock to cater to the needs of his patrons. Our 'Silent Salesmen' glass show cases solved this problem,

as these practical display cases permit the dealer to carry a full line of up-to-date small goods, show them to the best possible advantage, and all in a space five by twelve inches. These glass show cases can be placed on top of each other, and in every way are well worth the attention of the live-wire talking machine dealer.

"We carry quite a number of these 'Silent Salesmen' show cases in stock, and particularly feature those cases displaying the violin bridge assortment, clarinet pad assortment, mandolin pick assortment, violin tail-piece and tail gut assortment, violin peg and mute assortment. The merchandise contained in these glass show cases is of first class quality, and so priced that the dealer may secure an excellent profit from its sale. The glass show cases are furnished free of charge with the various assortments.

"In presenting our No. 6 show case, which is an attractive cabinet designed to display strings for all instruments, we believe that we have perfected an article that the talking machine dealer can use to splendid advantage. The importance of the string business is generally recognized, but the dealer has heretofore found it difficult to secure enough of the right stock and was often at a loss just how to display it. Our string cabinet occupies very little room, measuring actually 12½ inches by 16¼ inches and 4 inches in depth. In this very small space the dealer can display assortments of strings for the violin, mandolin, banjo and guitar. This handsome show case is also furnished free of charge with the strings, and I may say that the strings furnished with this cabinet are fully guaranteed in every detail.

"We are constantly aiming to introduce novelties that will help dealers close sales and increase their profits, one of the most recent of which is our 'Durro' string pouch. This pouch has been on the market a short while, but has already won the approval of our trade throughout the country. It is of practical value to the violinist, and we are including it without charge with the orders for the Durro strings contained in the pouch."

WIRELESS MUSIC 200 MILES.

Strains from a Gramophone Picked Up by a Ship at Sea.

Strains from a gramophone playing "The Merry Widow Waltz" and "God Save the King" were heard lately by wireless in the Nelson Line steamship "Highland Scot" during a voyage from London to Buenos Aires by the third officer. The boat was passing Vigo at the time, and afterward it was found that the ship from which the wireless came was a private yacht 200 miles away.

Mr. Marconi, commenting on this report, said: "They were probably experimenting with a gramophone and a wireless telephone transmitter aboard the private yacht. Tunes are transmitted and caught up in this way. I never heard of its being done over such a long distance, but it is quite possible. Gramophone tunes have been sent by wireless telephony from Marconi House to my house at Fawley, near Southampton."

For polishing varnished woodwork it is extremely satisfactory. No oil is so clean.

Ask your watch repairer whose oil he uses on your watch.

WALZ'S VICTROLA SIGN

In El Paso, Tex., Is Attracting Attention—Is Imposing and Well Arranged.

(Special to The Talking Machine World.)
EL PASO, TEX., July 6.—The W. G. Walz Co., the prominent talking machine establishment of this city, has recently erected a very imposing electric sign devoted to the exploitation of the Victor talk-

Imposing Victrola Electric Sign.

ing machine, a small cut of which appears herewith. As may be judged, the sign is a very large one and very effectively arranged, so that it never fails to attract the attention of the public. The Walz Co. reports a very large business in the talking machine field, and with the excellent crop prospects throughout its territory looks for a very large volume of trade the coming fall and winter.

TALKING MACHINE JOBBERS WHO ADVERTISE IN THE WORLD ARE LIVE ONES. TRY THEM!

All the music—and nothing else.

Our slogan: "Please thy neighbor as well as thyself."

Modify and clarify the music. Play old favorite records now discarded because of the scratches.

PATENTED MAY, 1914. By A. S. B. LITTLE

THE "LITTLE ONE-DER" ATTACHMENT

THE LITTLE ONE-DER CO., Calvin Ave., Nashville, Tennessee

It fits Victor and Columbia Machines and Records.

Place it in the needle-holder and insert needle in the orifice.

Uses standard needles.

Eliminates the scratch and scrape noises in new or old records.

Retails for \$1.00.

Low prices to dealers in lots of fifty.

Get literature and send for sample.

The Unusual Attractiveness of the Victor Plant.

A Tour of the Factories is an Inspiration and a Revelation—A Million and a Half of Money to be Expended in New Productive Facilities—An Industrial Organization in Which Everything Moves With Mathematical Precision—The Work Conducted Under the Most Favorable Conditions.

Visualize upon the little insert illustration shown in the upper right hand corner of the scene depicted below, then halt a moment to survey the wonderful array of factories pictured underneath it. What a view of industrial expansion is shown here! Can there be a better illustration of the marvelous—almost miraculous—development of a business within a brief period of time?

This illustrates in concrete form what the forces behind the Victor enterprise have accomplished

A tour of the Victor plant is an education in itself, and no one can inspect the productive departments of this enterprise without departing with a greater admiration than ever before for the industry itself. One must feel a new pride in the talking machine industry, a new inspiration to carry on the work in relation thereto, and yet the growth of this immense business is reflected in the corresponding growth of Victor dealers. Every time new additions are made it means, nec-

statement will give some idea of the system and exactness necessary in every department in order to successfully utilize such a vast working force, avoiding congestion or delay at any point, every department moving on in perfect harmony, so that there is no deviating from the fixed rules throughout the entire factory organization. This system is in evidence straight down to the shipping department, where the crating of Victrolas shows that every departmental system has been

The Immense Plant of the Victor Talking Machine Co., Camden, N. J.

since 1898, and surely, as one surveys this magnificent array of buildings devoted to the creation of Victor products, one would think that a halt—a breathing space—might be indulged in by the creative departments; but no, there is no halting—that word is not in the Victor vocabulary.

In the illustration, where the numbers "18" and "19" appear, will shortly be erected a magnificent administration building which will contain the general offices of the company. This will cost \$50,000. Then, if we trace down the picture toward the river, we locate ground where shortly space will be devoted to the enormously increasing present factory facilities of the Victor Co. In brief, there will be during the next twelve months a million and a half of money spent on factory betterments by this corporation. That fact alone emphasizes the resources of the Victor Co. and its desire to fill the orders which are constantly pouring in upon it for machines and records.

Thus, by a study of the factory panorama, it will be seen how the little acorn planted in 1898 has grown into a mighty industrial oak whose branches are constantly extending their sheltering influence to all parts of the world.

One should not pass by this illustration without careful study, and talking machine representatives in every part of the world should feel a thrill of pride in having an organization with such immense resources behind them.

A study of this picture should be supplemented by a visit to the Victor plant, because all the descriptive matter which might be written fails to give an adequate impression of the tremendous Victor manufacturing resources. It is easy to say on paper, "Acres and acres of floor space devoted to the production of machines and records," but yet that statement slips off the tongue easily without perhaps conveying the proper impression to the mind of the reader.

essarily, to jobbers and dealers, a vaster outlet for Victor products. In other words, greater prosperity for Victor representatives everywhere.

At Camden one can go through Victor buildings where, for hundreds of feet, nothing can be seen but an endless row of men and machinery busily engaged in carrying on detailed work, and on and on through acres of floor space until the brain is appalled at the magnitude of the enterprise.

Every part is moving in such complete harmony with every other part. To tell the story of the operations would require a volume in itself, but there is in every department the same rhythmic movement, the same exactness and thoroughness which wins the admiration of all beholders.

In each department there are special features which are of great interest, and this becomes intensified as the visitor moves on through the several buildings.

One thing that must particularly impress sight-seers in the Victor factories is the splendid sanitary conditions under which the operatives work. In all of the buildings every point which makes for health advance has been considered, so that there is splendid light and ventilation afforded on each floor. Even in the motor working rooms, where under ordinary conditions there would be an accumulation of metal dust, all of this is taken care of by exhaust pipes which render the air pure and clear.

There is probably not a factory in the world where there has been greater care and attention given to the healthful condition of operatives than in the Victor plant. Perfect light and air are factors in keeping up the highest grade of efficiency on the part of the workmen, and when we consider what an army of men enters the Victor factories each day the importance of this environment will be made clear. Over six thousand operatives constitute the Victor army. That

figured out in the most exacting and painstaking manner.

It would be difficult to tell which factory department possesses the greatest interest for the sight-seer. All in turn possess charm and attractive power which is maintained right through to the finish, where the speed and exactness with which the Victrolas are crated and shipped is a revelation to the uninformed.

NEW RECORD DISPLAY STAND

Put Out by the Local Headquarters of Columbia Graphophone Co. Has Made Quite a Hit with Dealers Who Find It a Most Effective Means of Attracting the Attitude of the Public.

"The success of our new record display stand has exceeded all our expectations," said R. F. Bolton, manager of the wholesale headquarters of the Columbia Graphophone Co., 89 Chambers street, New York. "Although we have not given this stand any publicity aside from our salesmen carrying a sample stand with them on their trips, we have received orders for the stand and the

record slips from all parts of our territory, and even from the adjoining States.

"Our dealers appreciate the fact that an attractive display of the month's new records cannot fail to be commented on very favorably by their prospects, customers and passers-by, and the high-grade character of this display has served to make it a prime favorite. We furnish the stand and the record slips to our trade at a cost of 75 cents a month for a period of six months."

Dome Record Case

It holds 20 records, which are readily accessible for instant use. A convenient index shows just where each record is. Notice how the case swings open so the repertoire is displayed. It is constructed along different lines, being reinforced at the bottom with a nickel-plated metal support to keep the records in position.

Keeps Valuable Records Under Lock and Key

Try a sample of each, 10" and 12". If not satisfactory you may return them. Include record numbers you need and perhaps you want a particular model Victrola, which you are unable to get elsewhere. We have every model in stock.

Our shipping facilities are the best; thirteen lines of Railroad and five Express companies; also boat lines on the Great Lakes.

By sending us your order you have two of the largest jobbing stocks at your service.

TRIUMPH FOR MARRIED MEN.

Great Combat on the Ball Field Between the Single and the Married Men of the New York Talking Machine Co. Results in Victory for the Latter—Game Aroused a Great Deal of Enthusiasm—Some "Star" Work.

An event of unusual interest was staged on Saturday, June 13, when the married men of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, engaged in combat on the ball field with the single men of that company. This game is an annual affair, and invariably proves exciting and even thrilling. This year's game was no exception, for after a hard-fought match, replete with sensational catches and fierce batting rallies, the married men emerged victors with the long end of a 11 to 9 score. This victory upset all traditions and precedents, as the bachelor contingent had confidently expected to "walk away" with the game.

The game was played on diamond No. 3 at Van Cortlandt Park, New York, and the weather conditions were ideal, the temperature being just right to make for the comfort and convenience of the players and the spectators. After preliminary practice had occupied the attention of the "fans" for a short while the following line-ups for the two teams were announced: Married men—Davin, left field; Hambridge, right field; Bieling, second base; Moffatt, third base; Moody, center field; Owens J. Doty, first base; Beers, shortstop; Arthur D. Geissler, pitcher; Heimberger, catcher. Single men—Radke, left field; Graham, right field; Turner, second base; Dansinger, third base; Pyatt, center field; Howells, first base; Miller, shortstop; M. Owens, pitcher; Slattery, catcher. Messrs. Kingston and Revis, representing the benedicts and the bachelors, respectively, were announced as the official umpires for the pastime.

The first inning proved an easy one for both teams, Davin of the married men missing a sure hit through a remarkable catch by Turner. A. D. Geissler, pitching for the benedicts, was invincible in this inning, only three men facing him. The second inning, however, was the occasion of some old fashioned slugging on the part of the married men, seven runs crossing the rubber through clean hitting, coupled with a brace of errors; Davin of the married contingent sending in three runs and scoring himself on a hit which should have been an "out," or at best a single, but was fumbled and badly handled by the bachelors' infield.

In nowise dismayed or daunted by this terrific batting spree, the single men turned their entire attention to the game for the next few innings,

and Pitcher Owens refused to let the married men add to their already imposing total. In the meanwhile the "singles" were batting the ball at a merry clip, and when the smoke subsided at the end of the seventh inning the bachelors had the game in hand by a score of 8 to 7, and to all appearances had plenty of reserve force for the next two innings. Home runs by Miller and Howells featured the heavy artillery batting during these "joy fests" on the part of the single men.

In the eighth inning a triple play, that rarity of baseball, was pulled off by the bachelors when the married men had three on bases and seemed on the sure road to victory. The ninth inning opened with the score still 8 to 7 in favor of the single men, and with strong resolution evidenced in their every motion, the married men prepared to place the game where they believed it justly belonged—in their victory column. Sales Manager Moody, the first man up, to the great surprise of himself, his friends and the fans, tripled to deep center. Doty followed with a double, scoring Mr.

My, but the Benedicts Felt Joyful.

Moody, and Beers worked Pitcher Owens for a pass. With the score tied and two on the bags, Pitcher A. D. Geissler faced the opposing pitcher with confidence and grim determination. With the grand stand imploring him to send in the winning runs, Mr. Geissler's college baseball training came to the fore, and a hot liner which no one could touch sent two runs across the plate and enabled Connolly, who was running for Mr. Geissler, to also score, giving the married men a total score of 11. In their half of the ninth the single men tried hard to pull the game out of the fire, but fell just a little short, being only able to score a single run before Radke ended the game by striking out.

The grand stand was filled with the wives, friends and children of the company's employes, among those rooting for the married men being the following: Mrs. A. D. Geissler, Mrs. V. M. Moody, Mrs. John Owens, Mrs. Doty and Mrs. Donovan. All the young lady employes of the company, it is needless to say, were enthusiastic rooters for the single men's nine.

GRANT DRAWBACK ALLOWANCE.

The Treasury Department has granted to the Sonora Phonograph Corporation, of New York, a drawback allowance on phonographs manufactured with the use of imported motors, sound-boxes, tone-arms and automatic stops.

George Brown, Jr., has opened a talking machine store in Hissboro, Ill. He will handle Columbia and Edison machines and records, and use automobiles for covering a wide territory.

Many a man is so small that even his own opinion of himself doesn't fit him.

TALKING MACHINE JOBBERS WHO ADVERTISE IN THE WORLD ARE LIVE ONES. TRY THEM!

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

Comparatively Good Trade Showing Maintained During Dull Months—Plenty of Time for Vacations and Plans for New Conquests—Chappell & Co. Copyright Action Creates Comment—Ramifications of New Copyright Law Being Disclosed—Utility Trading Co. Representing Favorite Record Co.—Recently Formed Understanding Among German Talking Machine Manufacturers Not Working Along Satisfactory Lines—Hoffay's New Gramophone—Cupid Buys at Columbia Headquarters—Conditions with Lindstrom.

(Special to The Talking Machine Wor.)

LONDON, E. C., ENGLAND, July 5.—Considering that business generally is not overbright, the leading gramophone companies are to be congratulated upon the comparatively good trade showing maintained during the past month. It is, of course, an ever-green subject of discussion why the average dealer will persist in regarding summer trade prospects with indifference when proof in many directions is available to show that with persistent effort fairly good business is possible, and were it not for this apathy, at least the belief exists in manufacturing quarters, there would be eliminated the chief cause for much of the unilluminating explanations anent so-called seasons. Be that as it may, at the moment we can but deplore this absence of intelligent interest and neglect of the hundred and one channels of prospective sales which the summer months furnish the enterprising minority of retailers who laugh at rising temperatures and pursue their work unswervingly. To pass on, I find during a round of the trade the majority of firms are by no means busy. It is not, therefore, surprising that gramophone men should be studying timetables and making preparations for a vacation. Several are already on holiday, enjoying themselves at the seaside, on the breezy moors or where fancy leads.

The copyright action between Chappell & Co., Ltd., and the Columbia Graphophone Co. continues to excite great interest in gramophone circles, chiefly on account of the defendant's intention to appeal against the lower court's decision. In this Justice Neville ruled that to orchestrate a copyright song in place of its original pianoforte accompaniment for purposes of recording was an infringement of the copyright in that it was not a "reasonable adaptation" within the meaning of the act. The result of the appeal will therefore be awaited with keen interest, since the point at issue is of vital importance to all makers of records.

For purposes of accompaniment the chosen instrument or instruments must be those calculated as most suitable in the production of good records. In recording with the pianoforte many difficulties arise, more so than with other instruments, and as sales to a large extent depend upon the production of successful records, it is perhaps only natural that the pianoforte is not so widely used as one might wish for recording song accompaniments.

Having regard to the action mentioned above, it is rather significant, however, that an increasing number of records bear accompaniments with a piano in place of the usual orchestral setting. The latter is still regarded by manufacturers as the more desirable for record-making purposes, although one cannot really criticise the copyright owner's right to indicate in what manner his work shall be offered in record form to the public. It may be mentioned, however, that many copyright owners leave record makers free to choose the kind of accompaniment most successful for recording.

An instance of the new order of things is found in the latest Zonophone list, which contains no less than six vocal records with pianoforte accompaniment, as against two with orchestra.

Power of New Copyright Act.

The full scope and power of the copyright act is gradually being disclosed by new claims almost

every month. The latest is brought to light by Performing Rights, Ltd., recently established in the interests of British composers. It has started right in for the collection of fees from musicians performing at theaters, hotels, restaurants, kinema shows, seaside pavilions, etc. Controlling a number of big hotels, the Midland Railway Co. has made a contract for a yearly payment in respect of performances by hotel orchestras of the works of members of the society. The amount is said to reach three figures. To a newspaper reporter Mr. Towle, the manager of the Midland Co.'s hotels, said on the subject: "We think ourselves not too well treated, as our performances seem to us hardly performances of music for gain; but, of course, there is a legal point involved, which it would be long and costly to fight, so it seemed simpler to agree to the demand."

For the other side, P. Sarpy, secretary of Performing Rights, Ltd., said: "We are only getting for British musicians and publishers what foreign musicians have had for years past. England has been the only country where music makers were not organized for the purpose. Not all composers have joined us yet; but it is, I think, only a matter of time; already Paul Rubens, Lionel Monckton, Hermann Lohr, Howard Talbot, Hermann Finck and Archibald Joyce are members.

"I don't think there is any likelihood of the work of these popular composers being dropped because a fee is chargeable on performances.

"The fees will be strictly graduated in proportion to the size and importance of the establishment. We are exercising a legal right which has been in abeyance."

Favorite Record Co. Appoints Agent.

Some few months ago the Favorite Record Co. announced its intention to retire from this market and place its interests in the hands of an approved agent. The plan is now fait accompli, the new agent being the Utility Trading Co., of 21 Paper street, London, E. C. As representing the talking machine press of two continents, your correspondent was given some exclusive particulars of this departure at an interview with Mr. Gilbery, one of the directors of the Utility Co., who, by the way, has been actively interested in the gramophone business for some time past. Indeed Mr. Gilbery is an enthusiast, and, in common with his partner, Mr. Hessel, possesses unqualified confidence in the Favorite records and instruments, the market for which, it may be mentioned, is an expanding one in all directions. Said Mr. Gilbery: "Yes, we have been appointed sole sales agents of the Favorite goods for the United Kingdom. At the same time we shall not lose sight of the colonial market, which is quite open to us as selling agents. The present prices, i.e. 10-inch 1s. 6d.; 12-inch, 2s. 6d., remain unaltered. Of special interest, however, is the fact that all our new records will be recorded in England, and in future pressed at the Beka factory in Hertford, so that the Favorite record will be entirely of British manufacture."

Upon the policy of the company Mr. Gilbery said it would encourage a good class of trade and had in course of preparation for issue in August a fine de luxe list of titles by leading Continental vocalists and popular instrumentalists; this being quite apart from the ordinary issues, which would total not less than twenty-four new titles each month regularly. "We are out to fulfil all orders promptly," continued my informant, "and with that end in view have equipped our premises to hold enormous stocks of records, in addition to machines. Furthermore, we will follow this up by aiding dealers all we possibly can by the provision of good publicity literature, as a sample of which I may mention our new catalog, printed in three-color illustrations throughout." Another matter of important trade interest mentioned by Mr. Gilbery was his company's plans to cater for the cheap record business by the issuance of a

10-inch double disc at the competitive price of one shilling retail. This is expected to be ready within a few weeks, and further details as to name, etc., will then be announced.

Finally, I would take this opportunity of conveying to the Utility Trading Co. The World's hearty good wishes for the complete success of its new undertaking.

Chappell & Co., Ltd., vs. the Columbia Co.

In the Chancery Division on June 19 Justice Neville had again before him the test action brought by Chappell & Co., Ltd., song and music publishers, of Bond street, to restrain the Columbia Graphophone Co. from infringing their copyright in a song called "Where My Caravan Has Rested."

On May 19 His Lordship held that there had been infringement by the defendants, and granted plaintiffs an injunction. The matter now came up on a motion by the plaintiffs to vary the minutes of the judgment.

Mr. Jenkins, K.C. (for plaintiffs), said that in addition to the paper MSS. and band parts, the defendants had in their possession or control certain records made from these copies of plaintiffs' song. These, he submitted, were equally an infringement, and were restrained by the injunction, and the delivery up followed as a matter of course. They presumed on their pleadings that they would get everything that could be called a copy, and therefore did not specifically ask for the delivery up of the records. That was what they wanted now. The defendants had served notice of appeal, and it was common ground that it was likely to go to the House of Lords. Therefore they should like to have the point decided, as they desired to know where they were.

His Lordship—How can I decide it when it was never put to me?

Mr. Jenkins admitted that the actual relief to be given was never on record.

His Lordship—I cannot rehear it.

Mr. Jenkins—You can have it put in the paper for reargument. The point was not present to our minds.

His Lordship—If a thing has escaped the attention of the Court, you cannot have it put in by asking to vary the minutes. It must be set down for rehearing, unless you are agreed.

Gore Brown, K.C. (for defendants), said he wanted to consider the point. The plaintiffs never asked for an injunction restraining defendants from continuing the use of their records, but only copies of the MSS.

His Lordship—No, it was not considered.

Gore Brown—No case was made out for it.

His Lordship said he thought the point should be decided, and he would have the case put down for the point to be tried on a motion to amend the pleadings.

The matter was again argued on Tuesday, June 23, and in the result His Lordship said he thought that the records ought to be delivered up to be destroyed under the circumstances of this case. It seemed to him that the records were the product of a wrongful act, and that as such they could not be retained by the defendants. That he thought it was just as equitable to-day as before the act of 1911, but having regard to the fact that this was a test case he was of opinion that it would be better if the records were delivered into the hands of the plaintiffs' solicitors, to be held by them pending the result of the appeal.

Trouble Among German Combination.

The recently formed convention of German gramophone manufacturers, particulars of which have been published in our columns, is reported to be meeting with considerable opposition from firms outside the compact and from certain wholesalers and dealers. There is a possibility of a rival organization coming into existence for the purpose of combatting the growing influence of the conven-

(Continued on page 70.)

FROM OUR LONDON HEADQUARTERS—(Continued from page 69).

tion houses, and in addition certain concessions from the latter are demanded by the German Dealers' Association, which recently met to consider the convention agreement. The Hamburg section wants to know whether or not its members may handle Pathé products if Pathé Frères decide to remain outside the convention. Dealers who have in stock records other than those of the convention manufacturers seek to have them exchanged, one for one, for any of the latter's make on October 1. In addition, other minor requests are put forward by the dealers' association members in North Germany, to which the convention will doubtless reply in due course. Following the Hamburg discussion a general meeting of the association resolved that members would be ill-advised to sign the convention agreement in its present form. At this meeting considerable dissatisfaction with the convention in general was apparent. It remains to be seen what attitude manufacturers will now adopt in the face of this undoubtedly serious opposition.

J. Hoffay's Gramophone.

Pending the christening of J. Hoffay's new gramophone, the title applied to it pro tem., i. e. "The World's Musical Instrument," is becoming so familiar as almost to convince us that it should remain a permanent one. In any case we believe the description will continue as subsidiary to the chosen title. This latter we hope to announce in our next issue, when doubtless we shall also be in a position to satisfy the interest of our readers the world over by the publication of detailed particulars of this much-debated instrument. We are assured it is not the inventor's fault that a certain amount of secrecy is observed regarding its exact principle of construction and the method whereby such marvelously natural tone quality is possible, but the fact is that, pending the complete acceptance of the several patents covering this instrument, it is perhaps only natural that Mr. Hoffay should adopt this means of safeguarding his interests. From all parts of the globe inquiries have reached him through his announcements in this trade news-

paper, and as one might reasonably expect, Mr. Hoffay is anxious to publish definite particulars at the earliest possible moment.

At a second private demonstration of "The World's Musical Instrument" on June 11 I was agreeably surprised to note an improvement upon the first test of its tonal quality, wonderfully pure and faithful as that was in strength and detail. Questioned upon this, Mr. Hoffay laughingly admitted that he had made what he was pleased to describe as some little adjustments, but he remained severely mute as to their nature. Anyway, in its present shape I am of opinion the instrument will cause not a little astonishment in gramophone circles that such close alignment to art from the merely mechanical is not only possible but is fait accompli in Mr. Hoffay's invention. I write in no spirit of exaggeration, the opinion set forth here being the result of my own observation at the two demonstrations given me of this new gramophone.

Of the financial, manufacturing and sales arrangements, Mr. Hoffay informed me that everything is shaping out as he would wish, good progress having been registered in all departments.

Blum & Co., Ltd., gramophone manufacturers; capital, £50,000. Registered office: 220 Old street, London, E. C. Dictators, Ltd., manufacturers of dictating machines; capital, £5,000. Office: 14 Red Lion Court, Fleet street, London, E. C.

Sound Transmitted Long Distance.

The strains of a gramophone were recently heard by a steamship when passing Vigo, and upon subsequent inquiry the officials found that the sound was transmitted by wireless from a private yacht over 200 miles away. Commenting on this report, Signor Marconi is stated to have said: "They were probably experimenting with a gramophone and a wireless telephone transmitter on board the private yacht. Tunes are transmitted and caught up in this way. I have never heard of it being done over such a long distance, but of course it is really quite feasible. From Marconi House in

the Strand I have sent gramophone tunes by wireless, telephony to my house at Fawley, near Southampton."

Not the Fault of the Columbia Co.

An unusually interesting item of news reaches me this month from the Columbia Co., which takes pardonable pride in announcing that no less than seven members of its staff contemplate marriage this year. With unerring aim Cupid has dispatched many arrows, but surely never so many in one comparatively little trading community as this. It pleases us mightily, and we hasten to extend to all the happy ones right hearty felicitations and general good wishes for their future prosperity and happiness. The full list is as follows: The Misses Maud Schindel, Hetty Durrant, Rose Green, and H. Moorby Smith, A. E. Norman, Sidney Hulme and D. O. Jeffery.

Advertising Summer Records.

"Hot Sellers for the Hot Weather" is the slogan used by the British Zonophone Co. descriptive of its excellent program of vocal and instrumental records for July. The description is well justified by the general high quality of the records in question, which bear a wide variety of suitable music by artists whose reputation alone is quite sufficient to insure a big demand for their record contributions.

Carl Lindstrom's Good Report.

At the general meeting of Carl Lindstrom, A.G., at which, by the way, a dividend of 15 per cent. was approved, the chairman gave voice to some significant words regarding the fluctuations of record prices. To check this the board had decided to join the Deutsche Grammophon, A.G., and other principal makers, in the convention. With the same object in view they had absorbed the business of Dr. Grünbaum & Thomas, embracing the taking over of the Favorite concern, Linden, Hanover, and arrangements now carried out would, in the opinion of the board, eliminate any necessity for further amalgamations. It is common property that the Lindstrom people now control a big pro-

"MIRACLES HAPPEN EVERY DAY"

That is what an old Philosopher said, and it is certainly true in our case.

The Miracle we have perpetrated is in producing Gramophones and Records in such extraordinarily marvellous qualities and at such astounding low prices as to compel Talking Machine men to say emphatically that we "have wrought a miracle."

For instance, we can supply a Gramophone with an Oak Case, measuring about 13 x 13 x 6½ inches high, with Tapered Tone Arm, a Crackerjack Sound Box, 10-inch Turn Table, and a Motor to run one 12-inch Record good, for the low price of \$2.50. Further, we give a year's unequivocal guarantee with each. We have other machines which cost more money, and they're all of "Top-Notch" value.

The charm of the Gramophone or Talking Machine is in the variety of Records which one can obtain. Now let us send you some of our Double-Sided 10-inch "DIPLOMA" or "PIONEER" Records, which regularly sell here for 37½ cents each. Our price to you is a terrific cut on that. Or, if you can give a big enough order, we will make you records with your own label thereon.

We make and sell everything for the Talking Machine Factor or Dealer, so why not write us now and get our Record Lists and Illustrated Catalogue of Machines. Don't pay fancy prices. Don't pay for Expired Patents. Don't pay for Names. Just pay for the goods and the intrinsic value of them. Our goods sell all the time just as well as the much-boasted ones, because Talking Machines, when all is said and done, "Speak for Themselves."

FROM OUR LONDON HEADQUARTERS—(Continued from page 70).

portion of the record trade on the Continent, and one may reasonably expect that this fact, in conjunction with the policy of the manufacturers' convention, will go far to regulate prices and place the gramophone trade in Germany on a healthier footing.

Records by International Artists.

A grand list of new records by international artists is announced by "His Master's Voice" Co. The list makes a timely appearance, coinciding as it does with the performances of these famous singers in London. Melba, Caruso, Chaliapin, Frieda Hempel, Destinn, Amato, Martinelli, Kirkby Lunn, in addition to Titta Ruffo and Cicolini, contribute to the list some really exquisite records which all operatic lovers should not fail to hear.

Records of "The Passing Show."

The latest London revue, "The Passing Show," now being played at the Palace Theater, offers many attractive numbers, which "His Master's Voice" Co. was quick to appreciate as good material for recording. Seven fine records is the result, two orchestral, one by the Light Opera Company, one by Basil Hallam, two by Miss Elsie Janis, and last, but not least, one as a duet by these popular vocalists. It is said that the Palace authorities doubted whether Miss Elsie Janis' big American salary could be made "good" here. The public decided, and that American salary has been paid very willingly ever since she captivated her first audience.

Good Business Report.

Brown Bros., Ltd., the big cycle and gramophone manufacturing house on Great Eastern street, this city, announce particulars of their balance sheet, which discloses a very healthy condition as regards last year's trading. The report is as follows: "After making provision for depreciation of leaseholds and fixtures, the profit for the year to December 19, 1913, is £26,938. It is proposed to pay a dividend of 7½ per cent., free of tax, on the ordinary shares, to place £5,000 to reserve (making

it £50,000), and to allocate £306 to depreciation of investments, to bring them to market value, carrying forward £15,618, against £15,429 brought in."

To Introduce New Record.

The "Ajax" is a new record to be placed on this market at the retail price of one shilling. It is 10-inch double-sided, and will sell under fixed price maintenance conditions. The first list comprises some 350 records, and new supplements will be issued regularly each month.

"Casse-Noisette" Suite on Columbia.

A special supplement announces the issue of four Columbia-Rena 12-inch records, comprising the complete "Casse-Noisette" Suite of Tchaikowsky. With its invariable rule of "doing the thing properly," the Columbia has issued the Suite in an artistic album containing an art print of the composer and details of the numbers making up the Suite. The Suite is a collection of the pieces written for the fairy scenes, and consequently abounds in light and delicate melodies in keeping with the fairy setting. It contains eight distinct numbers:

1. Miniature Overture.
2. Marche.
3. Dance of the Sugar-Plum Fairy.
4. Russian Dance, "Trepak."
5. Danse Arabe.
6. Chinese Dance.
7. Danse des Mirlitons (reed-pipes).
8. Valse des Fleurs.

These Columbia records were specially recorded by the justly famed orchestra of the Palace Theater, London, and conducted by Hermann Finck, the composer of "In the Shadows," etc., who has done so much to raise the standard of music in London variety theaters.

Budget of New Records.

Leo Ornstein, the nineteen-year-old pianist who attained quite some notice in London during the past two months, has made a record of two piano Classics, Grieg's "Butterfly" and Poldini's "Marche Mignonne." These are in the Columbia-Rena 10-inch record list this month.

Charles W. Clark, the prominent American baritone, is another newcomer in the Columbia list, having made records of two sacred numbers for

the Columbia De Luxe series. Alice Zeppilli is also represented in the Columbia list this month, coincident with her appearance at Covent Garden.

The Columbia Supplementary List for July in its design makes an interesting departure, the two-color illustration on the cover depicting a scene from "Parsifal," and thus pertinently drawing attention to the two records of the opera which lead off this list. These records, by the way, have been especially recorded by the Milan Symphony Orchestra, under Maestro Romani, and, coming at a time when "Parsifal" has met with renewed success at Covent Garden, make an opportune appeal. It is interesting to observe that the writer of the descriptive notes concerning these new Columbia issues remarks that "'Parsifal,' to be appreciated musically, must be approached with a mind free to receive impressions, its moods and motives are so varied, yet withal so clearly defined, that, heard in a receptive spirit, the music cannot fail to make a profound impression."

A remarkable record of two splendid grand opera choruses finds a place among the Columbia-Rena 10-inch records this month—the "Soldiers' Chorus" from "Faust," and "Lombardi," Pilgrim's Chorus.

"The Cinema Star" is the title of the new play by Jean Gilbert at the Shaftesbury Theater. Its original title is "Kinokonigin," which, when produced in America, was changed to "Queen of the Movies." It is from the "Queen of the Movies" that two vocal selections appearing on the Columbia-Rena July list are quoted. One of them, "In the Night," we already know here instrumentally, it having been a very popular orchestral selection for some months past, but this is, we believe, the first vocal record of the charming air. The other, "Oh, Cecilia," is a vocal setting of a light and jingly one-step tune.

H. Lane Wilson's third record is listed in the Columbia-Rena July Supplement, and his commanding voice will be highly appreciated both in the fine character song, "Brian of Glenaar," and the old English air "Twankydllo."

RECOVERS RAPIDLY FROM THE EFFECT OF BIG FIRE.

The New York Talking Machine Co., with Indomitable Energy and Enterprise, Conquers Damage Caused by Great Fire Which Visited It on Chambers Street, June 21—Shipments Being Made in Regular Order—Will Get Back to Old Home Shortly.

A fire which started at 4 p. m. Sunday, June 21, and lasted for nearly two hours destroyed over 170,000 Victor records and about 1,500 Victrolas and Victor machines which were stored in the basement and sub-basement of the New York Talking Machine Co., 81 Chambers street, New York, one of the largest Victor distributors in the country. The fire was one of the wickedest that the New York firemen have encountered for some time, and the fumes of various poisonous substances and leaking gas overcame nineteen fire fighters, who were restored to consciousness through the use of the pulmator and other modern appliances. No lives were lost in the fire, which, it is thought, was started through defective insulation. Both the company's stock and the building it occupied are fully covered by insurance.

The New York Talking Machine Co. occupied the store floor, basement and sub-basement of the building at 81 Chambers street, all three floors running through to 63 Reade street. The store floor was devoted to the company's executive and sales offices, while the lower floors contained the stock, shipping and repair departments. The company also utilized as a warehouse for additional stock a floor in the building at 77 Reade street.

The length of the floors, together with the inflammable nature of the stock, handicapped the firemen from the very start of the fire, and the damage wrought by water exceeded that caused by the flames. The lower floors were completely destroyed, while the store floor was considerably damaged and the demonstration booths flooded with water.

Arthur D. Geissler, vice-president and managing director; G. T. Williams, manager, and V. W. Moody, sales manager of the company, were advised of the fire as soon as it started, and were on the scene before the firemen had it under control. Together with other members of the sales and office staffs they labored indefatigably through the greater part of the night, and on Monday morning announced that they had secured temporary quarters at 77 Reade street, where they would be doing business before the close of the day.

All of the books, stock records and accounting paraphernalia had escaped the ravages of the fire, and were removed at once to the new quarters.

With indomitable energy the officers and staff worked incessantly putting the new offices in shape by Tuesday morning. Shipments of machines and records were started at once and have continued since that time. The company's surplus stock at 77 Reade street was a salvation, and Vice-President Geissler availed himself of some of the hearty offers of assistance which were extended to him by Victor distributors in all parts of the country, who sent telegrams offering all possible help as soon as they learned of the fire.

The July records were sent out to the company's dealers on schedule time, and the aggressiveness of the staff is well exemplified in the

hustling activity that is now apparent in the Reade street quarters.

The record stock is rapidly being replaced, and at the present writing is almost as large as it was before the fire. Machine shipments are being received daily, and, in short, the company has recovered with exceptional rapidity from a fire which would dishearten the most optimistic business man.

The space now occupied by the company includes the store floor, cellar, sub-cellar, third and fourth floors of the building at 77 Reade street and lofts in buildings at 63 Reade street and 9 Murray street. A portion of the executive staff and the showrooms remain at 81 Chambers street, the home of the company, where a force of workmen are working day and night to remove the wreckage from the three floors.

When seen by a representative of The World the day after the fire Mr. Geissler said: "This fire has been, of course, a severe blow, but we are now making shipments from our temporary quarters and can assure our dealers that our service will continue without interruption. We have already started to rebuild the floors which were destroyed, although we do not expect to be back in our building for the next few weeks. Shipments of records and machines are being received daily, and the assistance offered us by Victor jobbers throughout the country is greatly appreciated.

"Our safes and records all remained intact, and we are utilizing every possible means to give our dealers the prompt service to which they are accustomed. Our surplus stock at 77 Reade street has enabled us to continue shipments with only a few hours' interruption, and we wish to thank our dealers for their hearty co-operation."

BUILDING UP A LARGE BUSINESS.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., July 6.—One of the aggressive representatives of the Victor lines, which gets its goods through the jobbing house of the Stewart Talking Machine Co., is the Holloway-Wright Co., of New Castle, Ind. This company's main line is furniture, but the talking machine line is not neglected. Instead, the Holloway-Wright Co. figures that in pushing the talking machine line it not only increases its sales in that line, but gets customers for its other lines. The company has been arranging very fine Victor windows.

NEW OFFICE BUILDING FOR VICTOR CO.

The Victor Talking Machine Co. has just had plans prepared for the erection of an eight-story office building, 75x150 feet, which will house the executive offices and clerical departments of the company's business. The new office building is expected to cost in excess of \$50,000.

The New Brighton Talking Machine Co. is the title of a new concern in Beaver Falls, Pa.

A Great Business Opportunity

Are you looking for opportunities to increase your net profits?

Are you interested in lines which blend satisfactorily with talking machines which will add materially to your business success?

If you are, we can help you, and the sooner you get in communication with us the more rapidly your profits will accumulate.

Do you realize how splendidly pianos and player-pianos blend with talking machines?

We have created one of the largest manufacturing enterprises in the world in a short space of time, and we have done it through the delivery of values.

We are in a position, through our unexcelled factory facilities, to supply you with pianos and player-pianos at prices which will enable you to make splendid profits.

Our instruments are reliable in every particular, and our prices will appeal to people of moderate means.

Let us take up this subject with you.

It will pay you!

MAKING THE STEEL NEEDLE ARM.

An unusual photograph is shown herewith, depicting the process of making the steel needle arm used on the products of the Columbia Graphophone Co. As explained by operations, this photograph shows the following:

Evolution of the Columbia Steel Needle Arm.

1. Shows first operation to form needle holder end under drop press.
2. Shows second forming which completes the outline of the needle arm under the drop press.
3. Shows the third operation in trimming press, cutting away all surplus metal.
4. Shows fourth operation of drilling the four

holes and tapping for the needle-holding screw.

5. Shows the broaching for the triangular hole for the fibre needle.
6. Shows the rough polishing and grinding.
7. Shows the finishing, polishing and buffing.
8. Shows threading on small end of arm for nuts that hold the diaphragm.

cessful piano house will open a new department for the exclusive presentation of Edison disc products. This department is now practically completed and includes all modern perfections for the comfort and convenience of patrons. Miller Bros. but recently moved into new quarters, which give them increased space and facilities for handling their fast growing business.

TWO YEARS OF PROGRESS.

Thos. W. Kirkman, Manager of the Standard Gramophone Co., Tells of Growth in Popularity of Various "Standard" Specialties.

"It is now two years since we first introduced our automatic stops at the Atlantic City convention," said Thomas W. Kirkman, manager of the Standard Gramophone Appliance Co., 173 Lafayette street, New York. "The automatic stop that we introduced at that time was the well-known 'Simplex,' and the practical nature of this stop was an important factor in its emphatic success. During the past two years the market for automatic stops has steadily increased, and to fill the demand that exists for automatic stops at a nominal price we perfected our 'Standard' stop, which is every bit as effective as our 'Simplex,' and which, in the short time it has been on the market, has achieved country-wide popularity.

"About a year ago we decided to market our 'Standard' fibre needle cutter, which we had had in course of perfection and manufacture for nearly a year. The labor and expense we had bestowed on the preliminary details of this cutter practically insured the success of this accessory, and the sales of this cutter have grown so rapidly that we are now devoting a separate department of our business solely to its manufacture. We have a special department where every cutter is tested by actually taking a number of cuts on a fibre needle.

"The most gratifying feature of our business the past few months, however, was the remarkably cordial reception accorded our 'Standard' record cleaner, as the orders received for this cleaner have been so heavy that we have been obliged to run two presses constantly to handle the demand.

"As we consider this convention a second anniversary, we wish to thank the trade for its generous and hearty co-operation and appreciated patronage during the past two years."

Mr. Kirkman also remarked that the company had recently consummated a deal to double its available manufacturing space by leasing another entire floor in its present location.

UNIQUE CABINET EFFECT.

The Victrola section of the New York store of John Wanamaker, Eighth street and Astor place, introduced something new this month in the nature of a Victrola on wheels, designed especially for summer use. This unique combination consists of a Victrola IX, which retails at \$50, with a wheel cabinet that permits of the convenient moving of the Victrola from one part of the house to the other. The cabinet portion of the arrangement contains racks for the usual number of records. The complete wheel-cabinet retails at \$75.

PUTNAM, CONN.

HIGHER RANGE OF PRICES PREVAILS IN DETROIT

For All Makes of Talking Machines—The Demand Now Is from \$100 Up—June Trade Somewhat Slow in Detroit—Special Store for Hudson Co.—Bayley Discusses Salesmanship of Pianos and Talking Machines—Looking Forward to a Large Fall Trade.

(Special to The Talking Machine World.)

DETROIT, MICH., July 8.—June was not a very good month for the talking machine business in Detroit. In fact, it was the dulllest summer month in a long time. This was somewhat of a surprise, for generally Detroit is a good summer town for the business, because talking machines are in demand for yachts and boats of all kinds and for the thousands of summer cottages which are established on lakes, islands and rivers within a radius of thirty or forty miles from the city.

There is no reason for the slackening, for business in the city is good. Real estate is booming, new business buildings, hotels and factories are being erected, including a doubling of the already mammoth Ford plant, and residences by the thousand are being built. Contracts indicate an even more active month in July. All this makes jobs for workmen and business for commercial enterprises of all kinds. So the falling off in talking machine sales is regarded as but momentary, and due to the inexplicable "luck" which causes short periods of dulness in any line of business occasionally, always to be followed by greater activity than ever. As a matter of fact, business is not bad—simply not as good as it has been in other summers.

That confidence in the situation is unshaken is evidenced by the fact that the largest houses already are looking forward to the fall trade, and providing for it by placing big orders with jobbers for early delivery. One house paid spot cash, in the first week in July, for \$10,000 worth of Victrolas for delivery this month. The same house is placing orders with other jobbers.

Range of Prices Working Higher.

The range of prices seems to be working higher than ever. The fashionable demand now is from \$100 up. A year ago it was from \$75 up, and two years ago the \$50 styles marked the dividing line between the active machines and those only desultorily sold. The answer seems to be that a better class of people, that is, a better-off financially class, than ever are buying them. They want the finest cases as well as the finest tone. This class of trade augments the record sales materially, for talking machine owners who have wealth do not hesitate to select liberally of the new catalogs. If in doubt, they take it, and if they don't like it particularly they throw it away. Several weeks ago a wealthy Victrola owner purchased a big bunch of records. A daughter entertained a party of young people with them. As she finished playing them she laid them on top of a steam radiator, where they remained all night. In the morning they were warped out of shape. So pater bought another cargo. Of course, the dealer didn't mourn, particularly.

"Whereas a few years ago wealthy people would not have a phonograph in their basements, or

anywhere else, now they are placing them in their front parlors, and entertaining their most honored guests with them," said this dealer. "The talking machines are becoming more and more educational. The fact that classical records of the best standard can be obtained at any time is weaning people from ragtime. After they have been accustomed to the best music they decline to listen to ragtime at all. In these days people of refined tastes cannot get away from the sound of ragtime altogether, no matter how hard they try. It is heard on the streets, in hotels, in parks and summer resorts and in theaters. Educated people detest most of it. The talking machines give them their own selection of good music. Moreover, the talkers educate them more and more to prefer the good music. The records render the good music properly. People know that it is properly rendered, and accept the renditions as a standard of excellence. People of education like this excellence, and people who desire to acquire musical education want it to teach them. That is why trade trends continually to higher levels."

Attending the Jobbers' Convention.

Harry Rupp, manager of the talking machine department of Grinnell Bros., and Max Strasburg, of the Max Strasburg Co., are in the East in attendance at the annual convention of the talking machine jobbers at Atlantic City. Mr. Strasburg is en tour in a motor car. He traveled by boat to Buffalo, then took to the motor roads. Besides Atlantic City he will visit Philadelphia and Washington. He will be gone a month. Mrs. Strasburg is with him. When Mr. Strasburg was manager at Grinnell Bros. a few years ago he was a member of the association, and he is now anxious to renew old acquaintances for a day or two.

Important J. L. Hudson Co. Move.

The talking machine department of the J. L. Hudson Co. will be in a separate building with the pianos again next year instead of on certain floors of the main building. The Hudson Co. has acquired another building especially to house its music trade departments, it having been decided that this would be more appropriate and better business than losing the individual identity of the store in a much larger establishment.

As a matter of fact, the piano and talking machine business of the company is very large. Standing by itself, its magnitude is instantly apparent to all, and prestige in accordance with its merit is conceded it. But merged with a great general store its magnitude is lost.

Also, a ground floor location and show windows are now generally recognized as indispensable. This is especially so of small trade, and in the talking machine business the sale of records is a very large item. People want to buy them

handily. If one store has them on upper floors and another on the ground floor, the latter will get the trade. To a large extent the same is true of the talking machines themselves. If a nice talking machine is displayed in a window, and the people who are attracted by it can just step inside and see a lot more of them and hear them without trouble, they are much more apt to buy.

The building is five stories in height, has thirty feet frontage on Woodward avenue, in the very best location, and will be fitted up regardless of expense. The talking machine business is recognized by the company as a most profitable enterprise, and every facility will be provided for its efficient transaction.

Bayley Discusses Edison Phonograph Addition.

Frank J. Bayley, who recently added the Edison line of talking machines to his piano business, is rapidly becoming proficient in his new line of salesmanship. "It's easier than selling pianos," he remarked. "While there isn't as much profit in a single deal, we make more deals, and in proportion to the amount involved we get much better terms. Consequently it does not require so large an investment to make a given profit. Then, it adds variety to the business. Every piano house ought to have the talkers on hand. Often we find that people who come in for the purpose of buying a piano cannot find exactly what they want, either in price or instrument, and we interest them in the talking machines and make a sale. It is business we would have lost entirely without the phonographs. I sometimes wonder why I failed to consider this long ago, and did business so many years without them."

INTRODUCE TWO NEW ALBUMS.

The New York Album & Card Co. Tells of Latest Addition to Its Line—Report an Excellent Demand for Its Various Products.

The New York Album & Card Co., Inc., 23 Lispenard street, New York, the well-known manufacturer of talking machine record albums, has just added two new albums to its already comprehensive line which should prove valuable additions. These new albums consist of a new 12-pocket album which is particularly adapted for use in the new cabinets with flat shelves and an album for holding Edison disc records. This latter style is made like the regular albums turned out by this company, except that it is spaced wider and has ten pockets. Both of these new albums have won praise from all of the company's customers, who predict a splendid sale for them.

George Bates, secretary of the company, stated in a chat with The World that the various products manufactured by the New York Album & Card Co. are meeting with pleasing success throughout the country, notwithstanding the general business depression. Mr. Bates remarked on the widespread popularity of the company's flexible cover designed to hold the semi-annual record catalogs, which, he states, is one of the most successful articles the company has yet introduced.

(Special to The Talking Machine World.)

WASHINGTON, D. C., July 8.—PHONOGRAPH.—Alexander N. Pierman, Newark, N. J. Assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 1,097,989.

This invention relates to phonographs and allied talking machines and particularly to improvements in the lever which carries the reproducer ball or point. In the reproduction of sounds by means of a phonograph it is of the utmost importance that the vibrations imparted to the stylus in its travel over the minute undulations of the record surface be faithfully transmitted to the diaphragm without any change whatever due to foreign causes, such, for example, as lost motion. Since the extreme width of the record groove in the standard phonograph record cylinder is not over one one-hundredth of an inch and it does not exceed in depth one one-thousandth of an inch, it is evident that the slightest lost motion will affect very seriously the reproduction of sound, and this is the more true because it is the practice in instruments of this type to amplify the vibrations of the stylus which are imparted to the diaphragm which results also in multiplying any lost motion which may be present. This amplification is usually accomplished

by mounting the reproducing ball or point on the shorter arm of a pivoted lever the opposite and longer arm whereof is connected to the diaphragm. In this art the reproducing ball or point is often termed the reproducing stylus, and for convenience of reference the lever carrying the same is hereinafter called the stylus lever.

It is the object of this invention to provide a stylus lever for the phonograph so constructed that all possibility of lost motion due to the pivoting of the said lever in its support shall be overcome.

In order that the invention may be fully understood, attention is directed to the accompanying drawing wherein the same reference numerals are applied uniformly to the same parts, and in which

Fig. 1 is a view in side elevation of a phonograph reproducer equipped with this improvement, and Figs. 2, 3 and 4 are sectional detail views, Fig. 2 being taken on the line 2—2 of Fig. 3 and Fig. 3 being taken on the line 3—3 of Fig. 2.

ATTACHMENT FOR SOUND-REPRODUCING INSTRUMENTS, Sylvain Dayan, Montreal, Quebec, Can. Patent No. 1,095,195.

This invention relates to attachments for sound-reproducing machines, and more particularly for gramophones of a type similar to the Victor.

The object of the invention is to provide a jointed tube adapted to be inserted between the sound box and goose neck, so that the sound box may be suitably adjusted to use either steel or sapphire needles.

A further object is to provide a device of this character which will not require to be removed each time a change is made from steel to sapphire needles.

There are several important recognized principles in connection with sound reproduction which must be thoroughly understood before the full importance of the present invention becomes apparent. First it must be understood that the disposing of the diaphragm or sound box, whatever the character of the needles used is dependent upon the nature of the record groove, whether vertically undulatory or laterally undulatory, that when using either steel or sapphire needles, the best results are obtained when the needles are arranged at an angle of approximately forty-five degrees to the record groove, that the arc of movement of the needle should pass through the axis of rotation of the

record. In other words, a line drawn through the axis of rotation of the tone arm and the needle point should be at all times substantially tangent to the grooves of the sound record. The drag of the moving record on a properly placed needle has absolutely no tendency to move it either toward or away from the record center and therefore the needle presses equally against each side of the record groove. If, however, the needle is placed

on the opposite side of the record axis from the tone arm axis, the needle will drag against the inner walls of the record grooves and be uncertain in action. The pressure of the needle, however, upon the groove walls when the needle is located between the record and tone arm axes is the same for the same distance from the axis, but in opposite direction.

This invention consists in providing a flexible tube made of relatively revoluble sections connected by elbows adapted to be permanently inserted between the goose neck and sound box, so that the sound box may be arranged in any position and the needle adjusted to any angle for playing with either steel or sapphire needles, and may be adjusted either inside or outside of the record center, so that the needle will press against one side or the other of the record grooves to overcome centrifugal force and to correct any skipping tendency.

In the drawings which illustrate the invention Fig. 1 is a side elevation of the device in operative position, showing in full lines the adjustment for using a sapphire needle, and in dotted lines the adjustment for using a steel needle. Fig. 2 is a plan view corresponding to Fig. 1. Figs. 3 and 4 are front elevations of slightly modified forms of the device.

TALKING MACHINE.—Giuseppe di Stanislao, Camden, N. J. Patent No. 1,095,747.

This invention has for its object to provide a device in which the different supports, the horn, a number of records and other accessories used in the playing of a talking machine may be held in the casing and cover thereof, making a relatively small compact package, permitting the same to be readily transported from place to place in a single covering.

A further object of the invention is to provide a collapsible bracket or support for the horn which may be readily placed in the drawer of the casing or cabinet.

A further object of the invention is to provide an adjustable rest for the smaller end of the horn in order that the reproducer may be held out of

contact with the record disc or turn table while the needles are being changed or when the machine is not being played.

Another object of the invention is to produce a sectional horn, the sections of which may be taken

apart and telescoped one in the other within the cover of the cabinet.

Figure 1 is a side elevation of the improved talking machine, the cover of the cabinet being removed and showing the horn engaging the rest. Fig. 2, a side elevation of the horn support or bracket, a portion thereof being broken away to clearly illustrate the construction. Fig. 3, a similar view at right angles to Fig. 2. Fig. 4, a side elevation of the hinged or pivot number for mounting the horn upon the bracket. Fig. 5, an edge view thereof. Fig. 6, a vertical sectional view of the cabinet and cover thereon, showing the horn in said cover and illustrating the position of the different parts when the machine is ready for transportation. Fig. 7, a side elevation of the horn disconnected and having portions thereof broken away to clearly illustrate the construction. Fig. 8, a vertical sectional view of a portion of the cabinet, showing an edge view of the rest. Fig. 9, a similar view illustrating the front elevation of the rest, and Fig. 10, a perspective view of one form of cover or carrying case.

TALKING MACHINE.—Eugene Earl Norton, Bridgeport, Conn., assignor to James Albert Whitman, New York. Patent No. 1,095,225.

This invention relates to talking machines, and especially to propelling devices for the sound boxes thereof.

The invention is distinguished by a propelling device for disc records, having up and down cuts. The records are distinguished from the zig-zag records, where the variations are in horizontal planes, while the records for which this invention is applicable have surfaces inclined to horizontal

planes. The sounds with this device are produced by the contact of the needle point with said inclined surfaces, and the mechanism of the invention propels the point across the horizontal plane of the records.

The invention also relates to means for rotating and instantly starting or stopping the disc carrying the disc record.

In the accompanying drawings Fig. 1 shows a top plan view of the invention, Fig. 2 represents an enlarged partial section of Fig. 1 on the line 2, 2, Fig. 3 is similar to Fig. 2 with some of the elements in a changed position, Fig. 4 is a partial section as on the line 4, 4 of Fig. 2, Fig. 5 is an enlarged right-hand view of Fig. 1 with a portion of its case broken away, Fig. 6 shows a left-hand view of Fig. 5, Fig. 7 represents a left-hand view of Fig. 6 with the case broken away, and Fig. 8 shows a section of Fig. 7 on the line 8, 8.

GRAPHOPHONE.—John A. Weser, New York, N. Y. Patent No. 1,100,107.

It has been proposed to control the operation of

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 76).

a graphophone by means acting automatically and in proper sequence whereby the proper starting and stopping thereof is effected and different records successively placed in operative position. Such means have usually been mechanically connected to the actuating mechanism of the disc turn table, and once the device was set in motion various controlling devices had to perform their respective functions before a different record could be placed in position and the parts reset. Further, in these prior devices it was not possible to repeat a portion of the composition on the particular record in operative position. The transfer of records in such arrangements has usually been effected by the bodily movement of suitable frame supports therefor, and the means to effect the movement of the frames when desired have necessarily been too complicated and delicate for general use and did not admit of the application of the devices to any graphophone. Further, the control mechanisms have never been so related to each other and to a common source of power that those movements which should properly be co-ordinated and yet independent of other sequential control movements could be initiated independently. Neither has any arrangement been provided to permit the operations of a graphophone to be controlled from a distance by an attendant.

Accordingly, it is an object of this invention to overcome the disadvantages hitherto encountered in automatically controlled graphophones and to provide a machine which shall be of comparatively simple construction, substantial in its nature, of relatively few moving parts, inexpensive to manufacture, invariable in its operation, susceptible of control at all stages of its operation and at a distance, and generally of a character which shall commend itself to users of all classes.

A further object is to construct the controlling devices so that they may be readily attached to any graphophone without altering materially the construction of the latter.

In accordance with the invention, several records may be placed in superposed position on the turn table of the graphophone, after which the prime mover therefor may be started. By an independent source of power and a pneumatic control disposed at any desired place the sound box, together with the needle, may be lowered to operative position in engagement with the disc, whereupon the composition thereof will be rendered. When desired, other pneumatically controlled devices may be set in motion to lift the needle from the record and permit the sound box to be returned to a predetermined starting position; the rotation of the turn table stopped; the uppermost record removed from its position on the turn table, thus bringing the record immediately thereunder into operative position; the turn table released to permit its further rotation, and the sound box and needle lowered to engage operatively the uppermost record, after which the operations above outlined are repeated or modified at the will of the operator until the lowermost record has been removed from the turn table.

In the embodiment herein illustrated the several control devices are actuated pneumatically, a switch being provided at any desired place between the source of power and the several independent pneumatic controlling devices, whereby the latter are set in operation at will.

Further improvements will appear as this description proceeds, among which may here be mentioned the means for controlling the volume of sound to regulate the expression, means to insure automatically the return of the sound box to any desired predetermined position with respect to the record and a multiple needle holding device for the sound box.

The invention will be more fully described with reference to the accompanying drawings, in which Fig. 1 is a view in plan of a graphophone embodying the present invention and showing certain of the pneumatic controlling devices, the latter being in the normal position immediately prior to the rotation of the turn table. Fig. 2 is a sectional view taken on the plane indicated by the line

2-2 of Fig. 1 looking in the direction of the arrows. Fig. 3 is a diagrammatic view of the several control devices, showing their connections to the common pneumatic control through the switch, which is located at any desired place and adapted to be manually operated to set in motion any one of the series of pneumatic controls. Fig. 4 is an enlarged detail view in side elevation of a fragment of the sound box, showing the pneumatic control device for raising and lowering the same. Fig. 5 is a view in end elevation of the bellows shown in Fig. 4 and illustrating the automatically actuated valve connected thereto and operable to

Fig. 1.

Fig. 2.

place one of the independent control devices under the influence of the master bellows. Fig. 6 is a plan view of the bellows shown in Fig. 4, illustrating in dotted lines the independent connections thereto from the master bellows. Fig. 7 is a view taken on the plane indicated by the line 7-7 of Fig. 6. Fig. 8 is a detail view partially in section of an adjustable stop whereby the return of the sound box to a predetermined starting position is insured. Fig. 9 is a fragmentary view showing the relation of the record changing means to the records. Fig. 10 is a fragmentary view in plan of the devices shown in Fig. 9. Fig. 11 is a fragmentary

view in side elevation of the two bellows controlling respectively the starting and stopping of the turn table, the parts being shown in released position. Fig. 12 is a fragmentary view in end elevation of the devices shown in Fig. 11. Fig. 13 is a view in plan of the controlling switch, which may be located at any desired place and connected through suitable tubing to the master bellows and the several pneumatic controls. Fig. 14 is a view in side elevation thereof. Fig. 15 is a view taken on the plane indicated by the line 15-15 of Fig. 13 and looking in the direction of the arrows. Figs. 16 and 17 are detail views of an improved multiple needle-holder. Figs. 18 and 19 are detail views of a modified form of multiple needle-holder. Fig. 20 is a view in plan of the master bellows illustrated in Fig. 3.

TALKING MACHINE.—Graham W. Brogan, Mount Vernon, N. Y. Patent No. 1,099,913.

In sound producing machines, such as those commonly called "talking machines," "graphophones," and the like, it has been customary to manually apply and remove each sound record or disc for each musical composition, speech, or the like, to be rendered, entailing considerable pauses in the continuity of rendition of the pieces required by the time necessarily consumed in removing and replacing the records.

The object of this invention is to provide means to support one upon another a series of sound records for discs, and to automatically apply, one after another, the records or discs in position for co-operation with the pin of the soundbox, and to automatically cause the required movement of the soundbox to and from the records or discs after the latter have been successively placed in position for rotation, whereby when a series of superposed records have been placed in the machine, and the driving mechanism is started, the musical compositions, speeches or the like, will be rendered from said records one after another, without requiring the machine to be stopped until all of such records have been used.

In carrying out this invention there is provided in a sound producing machine having any suitable means for supporting and rotating sound records or discs and the sound box to coact therewith, means to support a series or plurality of superposed records or discs, means to lower and raise said records and to separate from the series the lowermost record and deposit it upon the record or records that have been used upon the record rotating devices, and means to cause the sound box to be raised and moved away from the records that have been used, and to be moved back over and lowered toward the new record that has been deposited for use, whereby the records may be used successively with the sound box while the machine continues to operate.

Fig. 1 is a side elevation of a talking machine embodying this invention; Fig. 2 is an end view of Fig. 1, looking from the right-hand side, parts being removed, and showing the parts in the playing position; Fig. 3 is a cross-section substantially on the line 3, 3, in Fig. 1; Figs. 4, 5 and 6 are detail views illustrating, in different positions, the dog for separating and depositing one after another

other the superposed records or discs; Fig. 7 is a side elevation illustrating the parts in the positions assumed when the records are lowered to deposit an unused record in position for use, parts being omitted; Fig. 8 is a plan view of Fig. 7; Fig. 9 is

a section substantially on the line 9, 9 in Fig. 7, and Fig. 10 is an end view showing the parts in the position illustrated in Fig. 7, parts being removed; Fig. 11 is an enlarged section on the plane of the line 11, 11 in Fig. 1; Fig. 12 is a similar view on the line 12, 12 in Fig. 1, and Fig. 13 is a detail view of part of the sound pin operating device.

GOOD CHEER CONVEYOR.

The Williams Phonograph Co., of Pueblo, Col., possesses an energetic salesman in J. D. Williams who has operated a "Phonograph Wagon" through the snow-bound farmlands simply to keep the farmers supplied with blue amberols.

PHONOGRAPH CO. OF THE ORANGES.

(Special to The Talking Machine World.)

TRENTON, N. J., June 22.—The Phonograph Co. of the Oranges, with headquarters at East Orange, N. J., filed a certificate of incorporation this week with the Secretary of State. The capital is given as \$10,000, and the incorporators are W. L. Eckert, R. J. Bolan and W. A. Hardy.

THE EDISON AT CLINICS.

Among the many uses which have been devised for the Edison phonograph is one proposed by a prominent London hospital surgeon to record the characteristic changes in the voice—sounds which mark the presence and progress of a variety of diseases. The whoop of the whooping cough and also the hoarse utterances of those suffering from acute or chronic diseases of the throat or lungs were successfully reproduced.

This new application of the phonograph to the purposes of diagnostic and chemical instruction will revolutionize chemical teaching in medical colleges.

BUSINESS AND THE EUROPEAN WARS.

The Effect on Our Industries Will Temporarily Be Bad—But Disturbed Conditions May Be Followed by Domestic Activity and Merchant Marine Development to Handle Exports.

In discussing the effects of the European wars on business in this country the financial expert of the New York Times on Sunday said the fact that it would have a profound and lasting effect on the principal industries of the country was everywhere conceded. War on a large scale between the nations in Europe which manufacture for the world's markets would curtail, if not destroy for the time being, their export trade. There is only one nation that could take that trade, and that is the United States. This country would export less raw cotton and more cotton goods. The same would be true of other fabrics as well as of manufactures of metal, and, of course, foodstuffs. Means would be discovered or created to attend to the carrying of exports where they were needed. Temporarily, at least, this country would show a tremendous expansion of foreign trade, and the same causes would prevent the importation of many things that in ordinary times come from abroad. American manufacturers would not only monopolize the domestic field, but would go far toward doing the same in many of the foreign ones as well. The only check would be in the things which would be declared to be contraband of war. And, even as to the latter, there would be many venturesome enough to take chances.

All of this would stimulate hugely the productivity of factories and workshops and give employment to labor in vast volume. It would also result in articles of American manufacture being introduced, and put to use in many countries, where the products of foreign origin are now the vogue.

PRESIDENT GEO. E. MICKEL APPOINTS COMMITTEES.

Complete Roster of Official Committees of the National Association of Talking Machine Jobbers Just Announced—Representative Trade Members on Lists.

Geo. E. Mickel, president of the National Association of Talking Machine Jobbers, has just announced his appointments for the various committees for the ensuing year, as follows:

Executive Committee.—O. K. Houck, O. K. Houck Piano Co., Memphis, Tenn.; R. H. Morris, American Talking Machine Co., Brooklyn, N. Y.; C. J. Schmelzer, Schmelzer Arms Co., Kansas City, Mo.; W. O. Crew, Elmira Arms Co., Elmira, N. Y.; P. Werlein, Philip Werlein, Ltd., New Orleans, La., and officers.

Advisory Committee.—J. C. Roush, chairman, Standard Talking Machine Co., Pittsburgh, Pa.; J. F. Bowers, Lyon & Healy, Chicago, Ill.; P. B. Whitsit, Perry B. Whitsit Co., Columbus, O.; J. N. Blackman, Blackman Talking Machine Co., New York City.

Membership Committee.—O. K. Houck, chairman, O. K. Houck Piano Co., Memphis, Tenn.; L. Burchfield, Sanger Bros., Dallas, Tex.; M. Landay, Landay Bros., New York City; F. A. Simon, Rudolph Wurlitzer Co., Chicago, Ill.; F. Nestor, W. F. Frederick Piano Co., Altoona, Pa.

Legislative Committee.—J. F. Bowers, chairman, Lyon & Healy, Chicago, Ill.; C. Droop, E. F. Droop & Sons, Baltimore, Md.; L. H. Clement, Whitney Carrier Co., Toledo, O.; F. W. Corley, the Corley Co., Richmond, Va.; J. C. Roush, Standard Talking Machine Co., Pittsburgh, Pa.

Traffic Committee.—L. C. Wiswell, chairman, Lyon & Healy, Chicago, Ill.; B. L. Crew, Philips & Crew, Atlanta, Ga.; C. A. Mairs, W. J. Dyer & Bro., St. Paul, Minn.; B. J. Pierce, J. W. Jenkins' Sons Music Co., Kansas City, Mo.; H. L. Royer, M. Steinert & Sons Co., Boston, Mass.

Press Committee.—J. C. Roush, chairman, Standard Talking Machine Co., Pittsburgh, Pa.; P. B. Whitsit, Perry B. Whitsit Co., Columbus, O.; T. H. Towell, Eclipse Musical Co., Cleveland, O.; R. Rogers, Robert C. Rogers Co., Washington, D. C.;

The persons in such countries would become accustomed to the American things and familiar with their merits, and would continue the use of them thereafter. In other words, there would be a constant demand created for the American goods that would result in a permanent increase of the export trade. This would show itself with regard to the nations of South America as well as those of the Orient, the Far East and Africa. Ultimately, of course, war of the kind would hurt trade with the countries engaged in it, because of the reduced purchasing power of the peoples caused by the strife and the ruinous taxation that would follow.

CHAS. F. THAYER BECOMES MANAGER

Of the New Columbia Department of the Tel-Electric Co., New York City.

Charles F. Thayer has been appointed manager of the new Columbia department in the warehouses of the Tel-Electric Co., 299 Fifth avenue, New York. This department will probably be ready for formal opening in a week or two, and in the meantime a number of sound-proof demonstration booths are being erected and every possible detail being embodied in the decorations and furnishings to conduce to the comfort and convenience of visitors to the department.

Mr. Thayer is well known in the local trade having been connected with the Columbia Graphophone Co. for the past three years in various sales capacities. His first Columbia connection was under the capable guidance of Hayward Cleveland, the veteran Columbia retail manager. Mr. Thayer also accompanied Frank R. Robertson, the noted travelogue lecturer, on a country-wide tour with the Columbia product, and subsequently joined the sales department of the Columbia educational division.

EFFECTIVE CAMP WINDOW DISPLAY

Made by the Ross P. Curtice Co., of Lincoln, Neb., Wins the Highest Praise—How It Was Prepared Explained for Benefit of the Trade.

(Special to The Talking Machine World.)

LINCOLN, NEB., August 8.—A very attractive camp window display recently made by the Ross P. Curtice Co., Victor jobbers, of this city, made a tremendous sensation, and through the interest it accentuated well repaid those interested in its construction. In telling of its construction C. W. Long, for the Curtice Co., said:

"The 'grass' we made out of excelsior dyed green with green aniline mixed with water; the campfire was made to glow in a very realistic manner by placing a red globe under the red cloth, which was mounted over wire netting to hold it up; the globe we placed in a shade and laid it on

Ross P. Curtice Co.'s Attractive Window.

a mirror so that the light was reflected, and the window had a border of red lights all around it, so that it had an excellent appearance from the outside, and by placing twigs over the fire the leaves and branches diffused the light so that the fire was 'almost' real.

"The accompanying photograph was taken at 2 o'clock in the morning so that there would be no reflection from the street lights, and was made with the aid of 2,250 watt lights, with a twenty-minute exposure. The crowds that were around the window certainly repaid us, and many comments were heard about it, especially the coffee pot, which we beat almost out of shape and blackened with a candle so as to give it a 'used' appearance."

THE ELECTRIC DISC-STOP CO.

The Electric Disc-Stop Co., of Monroe, N. Y., filed a certificate of incorporation this month with the Secretary of State at Albany, N. Y., to manufacture talking-machine accessories. The capital is given as \$6,000 and the incorporators are S. V. Dowling, F. B. Knowlton and D. A. Cashin.

TRAVELING IN WISCONSIN.

William Ide, who was formerly associated with the Phonograph Co., of Milwaukee, Wis., Edison distributor, has been appointed traveling wholesale representative for Thomas A. Edison, Inc., in Wisconsin and upper Michigan, succeeding Wm. P. Hope, who is now Edison jobber at Kansas City, Mo.

A. M. Stewart, Stewart Talking Machine Co., Indianapolis, Ind.

Grievance Committee.—E. F. Taft, chairman, Eastern Talking Machine Co., Boston, Mass.; C. H. Eisenbrandt, E. F. Eisenbrandt & Sons, Baltimore, Md.; H. W. Weymann, W. A. Weymann's Son, Philadelphia, Pa.; F. H. Putnam, Putnam Page Co., Peoria, Ill.; B. N. Neal, Neal, Clark & Neal, Buffalo, N. Y.

Resolution Committee.—R. H. Morris, American Talking Machine Co., Brooklyn, N. Y.; L. Buehn, Louis Buehn, Philadelphia, Pa.; H. A. Winkelman, Oliver Ditson Co., Boston, Mass.; W. N. Dunham, Florida Talking Machine Co., Jacksonville, Fla.; C. N. Andrews, W. D. Andrews, Buffalo, N. Y.

Arrangement Committee.—A. G. McCarthy, chairman, Sherman Clay & Co., San Francisco, Cal.; L. S. Sherman, Sherman Clay & Co., San Francisco, Cal.; C. S. Ruggles, Sherman Clay & Co., Los Angeles, Cal.; A. A. Trostler, Schmelzer Arms Co., Kansas City, Mo.; B. Switzky, Benj. Switzky, New York City.

In sending out this list J. C. Roush, chairman of the press committee, mentions that plans already are being prepared for the 1915 convention to be held at San Francisco. Many special features in connection therewith will be outlined in an early issue of The World. It is expected that a great many members of the association will take in this trip to the convention and the Panama-Pacific Exposition, accompanied by their friends and some of their largest dealers.

The officers of the association elected at the convention in Atlantic City for 1914-1915 are George E. Mickel, president, Nebraska Cycle Co., Omaha, Neb.; Elton F. Taft, vice-president, Eastern Talking Machine Co., Boston, Mass.; Edwin C. Rauth, secretary, Koerber Brenner Music Co., St. Louis, Mo.; William H. Reynolds, treasurer, Reynolds Music House, Mobile, Ala.

PANAMA CANAL WILL HELP PACIFIC COAST MERCHANTS

This Method of Shipping from the East Will Effect a Great Saving in Freight Rates—
San Francisco Pleased at Its Selection for Next Jobbers' Convention—The Phonograph Co.'s New Store to Open This Month—News of the Month Worth Recording.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., August 5.—Vacations have about gone the rounds at the various music establishments here, and the forces are in good trim to begin fall campaigns. City schools opened the last week in July, bringing many families home from the country, which naturally acts as a stimulus to business in practically all lines. For this reason most of the business houses arrange their vacations to coincide pretty closely with the school vacations, and the reopening of schools is the signal for resumption of regular duties all round. In the talking machine quarters no time will be lost during the remainder of the year. Business kept up fairly well even when the vacation season was at its height, and all indications point to a good fall. Particular attention is now being called to the new records which were placed on the market while certain patrons were out of town, and the record sections are quite busy. Dealers and distributors of musical instruments generally are looking forward with considerable interest to the opening of the Panama Canal for commerce about the middle of August, as the new method of shipment will mean a great saving to Coast interests receiving goods from the Atlantic seaboard.

Pleased at Selection of San Francisco.

The local trade is elated over the selection of San Francisco as the next meeting place for the annual convention of the National Talking Machine Jobbers' Association. Every effort will be exerted by the trade to make the session a big success, and with the added attractions of the exposition, a large attendance is expected.

Sherman, Clay & Co. were well represented at the national convention last month, L. S. Sherman, Andrew G. McCarthy and Chas. S. Ruggles attending, all having gone East for that purpose exclusively. Naturally they and their houses are especially gratified at the recognition given their city. Mr. Sherman came home directly after the festivities at Atlantic City were over, but Messrs. McCarthy and Ruggles remained over a few days to visit the factory of the Victor Talking Machine Co. Mr. McCarthy, who is treasurer of Sherman, Clay & Co., gives his personal attention to the Victor department of the business, and Mr. Ruggles is manager of the company's Victor distributing branch at Los Angeles. Upon their return to headquarters they pronounced the convention a big success in every particular, and spoke enthusiastically over the hospitality extended to the delegates by the Victor Co. Sherman, Clay &

Co. have just completed the redecoration of their first floors and windows and are celebrating the end of their renovations by a fine display of Victor goods and high class pianos and players.

Peter Bacigalupi, Jr., Retires.

The tendency in the local trade for some time has been toward additions and expansions, but the order of things has been reversed this month by the announcement from Peter Bacigalupi, Jr., that he is retiring from the talking machine business immediately. In fact, he has already vacated the old quarters on the second floor of the Douglas building, 908 Market street, and moved the remainder of his stock to a smaller room in the same building. The name of Bacigalupi has long been identified with the talking machine trade of this city, the business having been conducted under the name of Bacigalupi & Son to date, although the father and son divided their interests about two years ago, Peter, Jr., as he is generally known, taking the talking machines, and Mr. Bacigalupi, Sr., assuming full charge of the electric pianos and Edison dictating machine parts of the business. In the talking machine department a retail and jobbing business in Victor and Edison products was conducted. Peter, Jr., has not announced future plans, but his retirement does not affect his father's business.

Columbia Co. News.

W. S. Gray, district manager of the Columbia Graphophone Co., spent most of the past month away on vacation. He and Mrs. Gray enjoyed a pleasant outing at Lake Tahoe. It was the first real vacation Mr. Gray had taken in about five years and he made the most of it, returning to work with renewed vigor and optimism. F. R. Anglemeier, wholesale manager at the local Columbia warerooms, is spending two weeks in Sonoma County. During his absence C. J. Moore, traveling ambassador for the establishment, is keeping up his end of the work.

The contest for an exposition song, which was announced by the Bulletin a few weeks ago, is now open and full details will be announced shortly. The assurance of the Columbia Graphophone Co., through Pacific Coast Manager W. S. Gray, that the song will be made into a record and will be published by Jos. W. Stern & Co., of New York, has aroused much interest in the contest even at this early date.

Formal Opening of Phonograph Co.

The Phonograph Co., of San Francisco, expects to hold its formal opening in the new Edison

shop on Geary street early in August. The remodeling of the premises is rapidly nearing completion and some of the stock is being moved from the old location on Post street, where the business was conducted under the name of Babson Bros. The new place has been fitted up in first class shape and increased business is anticipated by Manager J. S. Baley in the new location. He reports a good July business in spite of the attention given to preparations for moving, and with the improved facilities and more desirable location he considers prospects bright for fall trade.

Morgan Resigns.

J. J. Morgan has resigned his position with the Emporium as manager of the talking machine department. General Manager A. A. Schell, of the Emporium music sections, says each month so far this year has shown an increase over the corresponding period of last year in the talking machine section, where Columbia goods are handled exclusively.

Pacific Phonograph Co. Plans.

R. A. Pommer, head of the Pacific Phonograph Co., has resumed his duties incumbent upon his business after a vacation at Lake Tahoe. J. E. McCracken, traveler for the company, spent several weeks in southern California and secured several new accounts in that section. He returned to San Francisco a few days ago, and is now establishing his bride in a home here, having been married just before leaving for the South. Arrangements have been made with Edw. Borgum to represent the Pacific Co. in the southern part of the State, with headquarters in Los Angeles. He was formerly with the Southern California Music Co., of that city. Mr. Pommer reports a better business for July than for June.

Manager J. J. Black, of the Wiley B. Allen talking machine department, says the demand for dance records continues a potent factor in the business, and the new style No. XI. Victor Victrola is the favored machine.

FAVORITE WITH SCHOOL CHILDREN.

(Special to The Talking Machine World.)

STUBENVILLE, O., August 3.—At a recent outing given the pupils of the Washington School of this city, a Columbia "Favorite" machine played a prominent part in the day's festivities. The school owns this machine and a goodly number of records, which were purchased from the National Talking Machine Co. after the energetic sales efforts of Lambert Friedl, the company's manager. The school-children danced to the music of the "Favorite" and evidently thoroughly enjoyed and appreciated the various records.

Opportunity has knocked at many a man's door when he was down at the corner saying, "Here's good luck."

The Success of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.

KIPP-LINK CO.'S STREET PARADE

Makes Indianapolis "Sit Up and Take Notice" When Twenty-two Drays of Edison Phonographs Paraded the Streets Recently—Only a Partial Shipment—Columbia Business for July 50 Per Cent. Better Than Last Year.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., August 9.—Indianapolis literally "sat up and took notice" a few days ago when the Kipp-Link Phonograph Co., 345 Massachusetts avenue, jobbers for the Edison disc phonographs, put on a parade in the streets of Indianapolis the equal of which probably was never seen before in this city.

Passers-by on the downtown streets, seeing a dray loaded down with boxes, glanced at it for a moment and then looked in another direction. Then they happened to look again and they paused and wondered. There was not one dray, but twenty-two drays, all loaded to the "brim."

The drays were appropriately decorated with placards announcing that in the boxes on the twenty-two drays were boxes containing the first partial shipment of Edison disc phonographs to the Kipp-Link Phonograph Co. The procession w nearly two blocks long and it passed through all of the downtown streets and finally proceeded to the Kipp-Link warehouse. The entire shipment, valued at \$50,000 by Walter E. Kipp, president and general manager of the Kipp-Link Co., was brought from the freight house to the warehouse in the remarkably short time of five hours.

Enthusiasm was rampant in the vicinity of the Kipp-Link house for a few hours after the shipment had arrived. Persons who had seen the parade came in to inquire about the Edison goods.

Mr. Kipp said the shipment just received represents approximately one-fourth of the goods which have been ordered for the fall trade by the Kipp-Link Co.

"We have been working every night for the last two weeks preparing for fall business," said Mr.

Kipp. "While business is not flourishing in this hot weather, the indications are that we will have an extraordinarily large business this fall. Reports from our dealers in this part of the country point to that end. There is every reason to count on good business this fall, and we are preparing to meet all demands."

Business conditions in the talking machine line have not been flourishing, but still business has been fairly good. A. W. Roos, manager of the local Columbia Graphophone Co.'s store, says an examination of his records shows that business in July was 50 per cent. better this year than it was a year ago in the same month. Mr. Roos is also counting on rushing business early this fall. He says the indications are that business in his line will be especially good.

The Stewart Talking Machine Co., jobbers for the Victor machines, reports good business conditions and is preparing for a large fall trade.

The Carlin Music Co., 23 North Pennsylvania street, has put in a line of Crescent talking machines. It is claimed that all disc talking machine records can be played by this machine.

THE SALESMAN OR THE CONCERN.

How the Personal Friendship of the Dealer and Salesman Can Be Utilized as an Advertising Asset for Their Establishments.

Salesmen as a rule are not life fixtures with a manufacturer. They are very apt to be here to-day and with some competitor to-morrow. For this reason many concerns hesitate to help the salesman build personal good will by the use of personal letters, which might make it easier for him to carry a string of customers with him when he leaves. For the same reason it is also the practice of some to circularize their dealers with this object in view, emphasizing the fact that the service and co-operation they are receiving comes from the company and not the salesman. Yet it is obvious that the personal friendship of dealer and

salesman is an advertising asset too great to overlook.

Commenting on this idea, Printers' Ink proceeds to tell about one method of constructing a letter so as to cash in on a salesman's personal acquaintanceship, and yet making it strictly a company appeal, illustrated in the following letter used by the Parry Manufacturing Co., Indianapolis, Ind.:

"Mr. Brown, who calls on the Massachusetts trade, feels that in pursuing your sales activities you cannot afford to overlook features that have made our line the hardest hitting and most liberal money making proposition now before the local dealer. He suggests the following reasons why:

"Our * * * line is the very line you are going to need. It meets your wants, maintains your custom and makes you money. It is a lie that stands out pre-eminently in Massachusetts to-day because of its peculiar adaptability to the specific trade conditions, and Mr. Brown is convinced that you are the logical dealer in Blank to handle it."

Here one has a good example of getting the personal element into the letter without submerging the company. The value of the introduction of the salesman's name is the more apparent if considered with the name omitted. This little personal touch makes all the difference in the world—it takes the letter out of the circular class and puts it into the letter class.

NARROW ESCAPE FROM FIRE.

The lumber yards of the Victor Talking Machine Co., Camden, N. J., had a narrow escape from fire at the foot of Market street recently, causing damage to the amount of \$10,000. The firemen battled for nearly four hours with the flames before they were subdued.

FEATURING NATIONALLY ADVERTISED GOODS

Notable Exhibition Made by J. L. Hudson Co. of Detroit—Victor Display of Significance and Attracts Great Attention—Columbia Graphophone Co. and Other Concerns Look for Immense Trade This Fall—European War Will Not Hurt as Much as Expected.

(Special to The Talking Machine World.)

DETROIT, MICH., August 9.—Victor talking machines formed a part of a noteworthy exhibition in Detroit during the last two weeks of July—a manufacturers' exposition of nationally advertised goods held by the J. L. Hudson Co. The object was to make the citizens of Detroit familiar with the mercantile establishment at which could be obtained the lines of goods which are advertised throughout the country by means of the magazines and other publications of country-wide circulation and prestige. Only manufacturers who do national advertising were invited to participate and, space being comparatively limited, though the store is a

Display of Victors in the J. L. Hudson Co. Window.

very large one, not more than one line of any kind of goods could be accommodated. As a line must be drawn somewhere, it was decided to limit the number of manufacturers participating to 100, this including all kinds of articles from pianos to tooth powders.

The most important articles were exhibited both in the salesrooms and in the show windows. The accompanying photograph shows the Victor exhibit in one of the windows.

The exposition was a large success and will be repeated next year, though it will not be held until September. In September the natural autumn quickening of trade will bring many more people to the store than in July, and there will be more national advertising to be interested in. Talking machines are so widely and consistently advertised that the exposition was of particular benefit to this line of merchandise.

Inquiry from talking machine dealers of both

city and State indicates that the coming fall and winter season will be by far the best the trade ever has known. The branch house of the Columbia Graphophone Co. has several new accounts lined up in Detroit to be opened in September, and inquiries from the smaller cities of the State have been so encouraging that S. E. Lind, assistant manager, will make a personal trip through lower Michigan within a few weeks to take up the good business that has been offered.

Advices received from present representatives of the company indicate that many of them will use a great many more machines this year than they formerly have. It is in the small towns that the

effects of the big crops will be felt first. The farmers already are beginning to spend their money, though they will not be over-active in this way until they get a rest from harvesting. Life with them, in the late summer, is "just one darn crop after another."

Grinnell Bros., Victor jobbers, are having similar experiences. Dealers from a wide range of territory are planning to lay in big stocks for the fall trade. Unsolicited orders and inquiries have come from several States some distance away, and in greater numbers from Ohio, Indiana and Michigan, which Grinnell Bros. cover quite thoroughly.

"We haven't been able to accumulate any large stock, though we have tried," said Harry Rupp, manager of the talking machine department of Grinnell's. "We are constantly short of the \$25, \$75 and \$150 styles. We do not get any too many of the other styles. They seem to go out as fast as they come in. The indications are that in spite

of the greatly increased production of the factories, there is likely to be a shortage again next December, because of the greatly increased demand. If we are just playing even now, what may we expect when the real activity comes?"

Detroit dealers are not much perturbed by the war in Europe. It is likely to abstract from 10,000 to 20,000 men from Detroit's citizenship, but the bulk of the foreigners called away are not of the buying kind. Their departure may cause a shortage of labor in the city, but it will give more work to Americans, at better pay, and the Americans will spend more money, and spend it right at home, whereas the foreigners, most of them, spend but little and send the bulk of their earnings to Europe.

They are not valuable citizens for that reason. They live as cheaply as they can, thousands of them in absolute squalor, recent investigations have developed. In the way of business they produce nothing, because they consume hardly anything except food. Even their food is of the cheapest kind. The money they earn, therefore, does not help make business for anybody. Detroit business men will not be a bit sorry to see a big decrease in population if that is the class to leave.

Max Strasburg, of the Max Strasburg Co., has returned from an automobile tour of several thousand miles through the East. He took in the talking machine jobbers' convention at Atlantic City for a while, meeting old friends, then went on to Philadelphia and Washington. Mr. Strasburg is the most optimistic of all the talking machine dealers in Detroit. He never has known really dull times since he established his store three years ago. The visitor does not need to be informed of this, for always there is at least one customer in the store, and generally several; sometimes a crowd.

TRADE IN AUSTRIA-HUNGARY.

In a commercial review of Austria-Hungary, published in the July 28 issue of the Daily Consular and Trade Reports, Consul General Charles Denby, stationed at Vienna, Austria, refers to the piano situation in that empire as follows:

"The piano trade is almost German, the American imports being noticeable only in pianos (small upright pianos) and reed organs, and in the trade in these goods no great figure was reached."

The official figures in this article show that Austria-Hungary exported to the United States musical instruments to the value of \$173,457 in 1912 as compared with \$200,244 in 1913. It is also stated that Austria-Hungary imported phonographs valued at \$1,000,000 direct from Germany in 1912, while from the United States the importation of phonographs valued only \$3,600. The consul general remarks, however, that a large proportion of the imports of phonographs from Germany are undoubtedly American goods.

The DITSON Pledge

is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

CINCINNATI TRADE RATHER QUIET

For the Past Month Owing to the Absence of People at Summer Homes—Outlook for Fall Is Exceptionally Good and This Is the Report of Leading Houses—News of the Month.

(Special to The Talking Machine World.)

CINCINNATI, O., August 9.—Generally speaking, business was quiet in the talking machine field during July. This was due to the average dullness and the absence from the city of the best record buyers. Business was practically confined to records, the volume of sales for the month being fairly good. This might be said to be due to the manner in which the attaches of the various houses are keeping in touch with their clients.

The Sheriff's office next Saturday morning will offer at auction, under foreclosure proceedings, the home of John Arnold, former Elm street dealer, who left the city earlier in the year. The disposal of his home in Hyde Park will mark his actual passing away from the local field. Mr. Arnold is now supposed to be in Denver.

Manager Dittrich, of the Rudolph Wurlitzer Co., in discussing business for the past month, said:

"The month of July, in spite of the general business conditions, showed a very satisfactory increase over last year. The last two weeks were especially good, and at the present time we are enjoying a big demand for Victor goods, both wholesale and retail. As usual, our fall shipments were ordered well in advance. We are now storing Victrolas so as to be better able to meet the demand when the rush for orders will begin and when the stock will not be so plentiful.

"From reports reaching us through our representatives, and also from correspondence and orders from our wholesale trade, we gather that conditions are exceptionally good. The talking machine dealer is surely in a position 'all by himself,' as he is enjoying a most active trade at the time of year when the product would be considered as out of season, and the best period of the year will shortly be reached without any intermediate dull period. The new styles, No. 10 and No. 11, have made a most favorable impression, and these two popular styles will undoubtedly enjoy even greater popularity than heretofore. The fumed oaks, No. 9 and No. 10, have taken this part of the country by storm, and our estimate, although we made it very large, was not miscalculated. We have already booked a number of orders for fall delivery, and every day

is adding to the number. The good prospects are especially appreciated at this time because of the probability of a plentiful supply.

"In our retail department we never before were holding so many orders for fall delivery, and our files never held so many prospective purchasers at this time of the year. The fall business will undoubtedly be a record-breaker."

When approached on business conditions, Manager Whelen of the local Columbia store, said: "Despite the fact, the inevitable fact, that business is bad, I must say that we have held our own and made a slight increase over the same period of last year. The 'dance craze' has to a certain extent held up the retail end, and dealers throughout the territory do not appear to be discouraged in any way, in fact, talk very optimistic of the summer business so far and are very enthusiastic about the fall prospects."

No one has been engaged as yet to take charge of the Victrola department of the Cable Company, which will be in operation before the end of this month. Mr. Summey hoped to have this department ready by last Saturday. His goods have reached the city, but there has been a delay in putting up the booths as well as getting the right kind of a man for handling the work.

The record wants was the feature of the Lyric Co.'s business during July, according to Manager Ahaus.

RETURNS TO ITS OLD HOME.

The New York Talking Machine Co. Again at 81 Chambers Street—Many Improvements Installed—Great Achievement in Handling Business While in Temporary Quarters.

The New York Talking Machine Co., Victor distributor, which had been occupying temporary quarters at 77 Reade street, New York, since its disastrous fire on June 21, moved back this week to its building at 81 Chambers street. Workmen are still engaged in removing all traces of the conflagration at this latter address, although the progress that has been made in the past five weeks is really remarkable.

In order to give its patrons every possible convenience, the New York Talking Machine Co. took advantage of the incidental renovating and remodeling to make several changes in the equipment of their warerooms which should prove of value to visiting dealers. One of these improvements is the construction of additional demonstration booths for the use of the company's dealers. These booths are being built along somewhat novel lines, and when completed will be as soundproof as human ingenuity can make them. The new booths will give the warerooms an equipment of ten rooms, all furnished and arranged in a dignified, tasteful fashion.

The basement and sub-basement at 81 Chambers street, which were practically destroyed by the fire, have practically regained their normal appearance, and Sales Manager Moody, assisted by a corps of assistants, is busily engaged in refilling the thousands of stock bins. According to present plans, the company will retain its auxiliary stock rooms in several buildings nearby, as it has in the past.

When it is considered that the New York Talking Machine Co. did not cease its shipments for a single day after the fire destroyed its stock of 170,000 records and 1,500 machines, some idea of the efficiency and calibre of its sales organization may be gleaned.

The fire, as a matter of fact, had not been halted in its ruinous course when Vice-President Geissler secured temporary quarters for the executive and sales departments. Since June 22 the company's business has been conducted at these quarters with thoroughness and dispatch, and Manager Williams and Sales Manager Moody have worked indefatigably to give the dealers every possible co-operation in the face of terrific handicaps.

Habit is a master of man's own making, but one he serves with unconscious zeal. An organized or trained mind is the best of masters. It cannot be defined. It is progressive and expanding. A complete description to-day would not apply to the mind of to-morrow.

CHICAGO

PHILADELPHIA TRADE PLANS FOR IMMENSE BUSINESS.

War Troubles Abroad Do Not Daunt Quaker City Trade, Which Is Enlarging and Making More Attractive Its Talking Machine Quarters Preparing for an Immense Fall Business—New Office Building for the Victor Co. Now Under Way—News of the Month.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., August 8.—The talking machine business in Philadelphia has been very much better in the month of July than it was in 1913, and as every month of this year thus far has shown a good substantial increase it is easy to be seen how well satisfied the dealers should be, and they apparently are. At houses where the piano business has been running slightly behind last year they have been forging ahead on talking machines and the outlook is most promising for a continuation of the same conditions during the remainder of the year.

Several of the firms are making extensive improvements in their stores, getting them in shape for the fall and winter business. The Talking Machine Co. has taken the second floor of the building at 143 South Broad street and is having a wide stairway installed from the first floor to the second. This will practically double its space. It will have two private hearing rooms on the first floor and the appearance of the place will be very much improved. A fourth store will shortly be opened at Forty-second street and Lancaster avenue. This will give the firm four locations that are wide apart and yet in densely populated sections.

H. A. Weymann & Sons are having the entire first floor of the store repapered and repainted. This includes the talking machine department. It will be bright and attractive when finished. They have been doing a splendid business all through July, especially in their wholesale department, where the circulars they have sent out urging the trade to order early have had the effect desired, and to-day they have more than double the amount of advance business over last year. Of the Weymann sales force the following have been away on vacations: Malcolm Fox, J. W. Walsh and Mau-

rice Luckenbach. Mr. and Mrs. William A. Weymann and their daughter, Miss Helen Weymann, are summering at Wildwood.

C. J. Heppe & Sons have added at least a third more record racks to their already extensive department in the wholesale section. Manager Ellwell notes that the business is much better than last year and he is of the opinion that the trade will enjoy an excellent fall and winter business.

The Pennsylvania Talking Machine Co., the headquarters for the Columbia in Philadelphia, is having the interior of its store entirely redecorated and is otherwise making the place more attractive than ever before. Its business all summer has been showing wonderful gains and if the present ratio is kept up it will not surprise the management if they gain nearly 100 per cent. over last year. Joseph Patrick Murphy, for a long time head floor man at the Pennsylvania company, was married on June 10. The announcement came somewhat suddenly, for the rumor that Joe was to be married had been in the air off and on for the past two years. He has taken his bride to a dove cote in Germantown. Walter L. Eckhart, manager of the Pennsylvania company, will spend several weeks at Atlantic City this month. Business interests in that city have brought about this decision to spend his holidays at Philadelphia's popular resort.

G. F. Wuertle, of the Gimbel Bros. talking machine department, is responsible for the statement that they have run way ahead every month of the current year. Mr. Wuertle will take his vacation the second and third week in August. A. Carabine has just returned from his vacation, which was spent in New York State and at and near his old home in Meriden, Conn.

John Wanamaker has completed the improvements in his talking machine department, and I

doubt whether there is a finer department in the United States. Additional hearing space is represented in twelve rooms, which are built about the large concert hall in which will be given, during the fall and winter, the most remarkable series of recitals ever heard in this city. The Victor will be exploited, and artists will play with the machine showing its great breadth as an entertainer.

The trade here is generally pleased with the prospects of the Victor Co. adopting the proposed clause in its contract that interest be charged on deferred payments. This, they all feel, is the only sure way of securing the relief so much desired, for a Victor suggestion is always carried out to the letter.

The Edison dealers, Messrs. Burkhart & Blake, who have fine warerooms at Eleventh and Walnut streets, contemplate the addition of an extra hearing room shortly. They have enjoyed a very good business all summer and have been doggedly keeping at it and their success has been far beyond their expectations. They believe the public is going to recognize the marvelous clarity of tone of the Edison this fall and that that instrument is going to forge right ahead.

The great office building which is being erected for the Victor Talking Machine Co. is now well under way, and when completed will cost \$500,000. Activity continues unimpaired at the Victor works, although there is much talk of some of the employes who were born in Europe going off to fight for their Fatherlands. This is rather doubtful now in view of the fact that the consuls of the various countries claim they cannot transport the men abroad. This, of course, will keep those who had proposed fighting for their country at their work.

Among the incorporations filed with the Secretary of State at Delaware this week was that of the Symphony Instrument Co., with the object of manufacturing phonographs and other musical instruments; capital \$250,000. The incorporators are: F. R. Hansell, Philadelphia, Pa., G. H. B. Martin and D. T. Vennel, Camden, N. J.

Saint Louis is at your door!

THIS map shows just how long it takes a freight shipment to reach you from our **COMPLETE Victor Stock** in Saint Louis.

Every day in the year over twelve hundred "Package" cars leave Saint Louis with small freight shipments—and these cars arrive at their break-bulk destinations **ON SCHEDULE!**

Each circle on the map represents one day from Saint Louis by "Package" car.

Express and parcel post shipments from Saint Louis travel faster, of course. But the map shows that Saint Louis is at your door even on a freight basis.

And so you see, our COMPLETE Victor Stock is at your door!

The BIG Victor Stock is in Saint Louis!

HERE, at the very center of the country is a Victor stock so big that we easily fill a large part of the orders other jobbers are short on.

So high a percentage of such orders are filled by us that we now SOLICIT the "short" orders your regular jobber can't fill.

We couldn't solicit such business if we were not prepared to take care of it! But we ARE prepared. We have the one BIG Victor Stock—Records, Machines and Accessories—and if anybody in America has what you want and can't get from your regular jobber, we are that house.

Send US your "Short" orders.

Buy your Victor goods from whomsoever you will—but when you get a letter of regret, just send us the short items and we'll fill them mighty quick.

All over the country, the big dealers now depend upon us for this sort of service. And we're glad to get the business. Just send us the orders your regular Victor Jobber can't fill.

THE TRADE OUTLOOK NEVER BETTER IN MILWAUKEE.

Crop Conditions and General Spirit of the People Indicate That Talking Machines and Records Will Be in Great Demand This Fall—Plans of the Badger Talking Machine Co.—Summer Advertising—Leading Jobbers Report Business Expansion.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., August 10.—Plans for a big fall trade are being made by Milwaukee jobbers and retailers and there is every indication that these preparations will not be made in vain. Jobbers say that dealers all over the State have rather light stocks of both machines and records on hand, and that more active buying will start at any time. Just at present dealers are inclined to buy only for their immediate needs, but even this trade is amounting to a considerable total, according to jobbers. The outlook was never better than it is at the present time. A bumper crop is being harvested in Wisconsin and surrounding States, and this is naturally going a long way toward increasing general confidence. The corn crop seems to be in excellent condition all over the State, and this will go a long way in furthering prosperity. Industrial conditions in Milwaukee are showing steady improvement. Most of the large machinery manufacturing plants are now operating from 65 to 80 per cent. of their normal capacity, which is a decided improvement over conditions which existed a couple of months ago.

Promotion for Paul A. Seeger.

Paul A. Seeger, manager of the Victrola department of the Edmund Gram Piano House, is slated for the first vice-presidency of the Edmund Gram Piano Co., the successor to the Gram-Richtsteig Piano Co., and operating the factory which is manufacturing the Edmund Gram pianos and players at Winnebago and Eleventh streets. The stockholders of the company will meet within the near future and complete the organization of the concern by the election of officers. Mr. Seeger is now enjoying a vacation of two weeks' duration with his family and other relatives at Sister Bay, Wis., a well-known summer resort on Lake Michigan.

Good Sales of Edison Disc Phonographs.

Officials of the Flanner-Hafsoos Music House, 417 Broadway, have been making some good sales of the Edison disc phonograph, even during the hot summer months. Both Eric Hafsoos and Florian F. Flanner, members of the firm, are enthusiastic regarding the possibilities to be derived from the talking machine line, and are encouraging their salesmen to push this business in connection with the piano trade.

Continue Advertising Campaign.

Most of the Milwaukee talking machine houses have been continuing the campaign of advertising which was started earlier in the season in the effort to keep business up to the normal mark, despite the hot weather and the depression in some lines. The J. B. Bradford Piano Co., the Edmund Gram Piano House, Gimbel Bros., and the Boston store, all featuring the Victor line; the Flanner-Hafsoos Music House, the Charles H. Schefft & Sons, and the Edison Shop, handling the Edison goods, and A. G. Kunde, carrying the Columbia,

have been carrying on a persistent campaign of advertising in the Milwaukee papers which has been bringing results.

Another Piano House to Handle Talkers.

It is rumored that another of the large downtown piano houses is seriously considering the plan of taking on the agency for a well-known line of talking machines. Those piano houses which have added a talking machine line have been meeting with such success that it has been encouraging other houses to follow the same plan.

Victrola Music for Picnic.

One of the most popular features of the annual picnic of the employes of the Espenhain department store in Milwaukee recently, was a Victrola furnished by John H. Becker, Jr., manager of the Victor department of the Hoeffler Manufacturing Co. Mr. Becker was formerly manager of the Victor department at the Espenhain store, when this department was in operation, and it had always been his custom to furnish a Victrola for the various gatherings of the store employes.

Using Street Car Advertising.

The George H. Eichholz Co., featuring the Victor line, at 542 Twelfth street, has been securing wide publicity and has been doubling its business as a result of the campaign of street car advertising which it is carrying on. An attractively written card, bearing the pictures of both members of the firm and a Victrola, is to be found in nearly every car in Milwaukee.

Advertising Pays.

Persistent advertising, combined with unusual personal efforts, is bringing C. W. Abbott, manager of the Victor department at the Boston store, a business which is showing a decided gain over the summer months of 1913.

Badger Talking Machine Co. in Charge.

The Wisconsin Talking Machine Co., formerly jobber for the Victor line and the former McGreal retail store, one of the well-known downtown Victor shops in Milwaukee, were taken over last month by the Badger Talking Machine Co., launched with a capital stock of \$50,000 by George F. Ruez, of Ishpeming, Mich., Samuel W. Goldsmith and Harry A. Goldsmith. The jobbing business is being conducted under the name of the Badger Talking Machine Co., and the retail store, at 312 Grand avenue, under the name of the Badger Victrola Shop. George F. Ruez has been elected president; Samuel W. Goldsmith, vice-president, and Harry A. Goldsmith, secretary.

The jobbing and retail business had been purchased only recently by C. M. Backus, of Chicago, from Mrs. Edward Yockey, formerly Miss Gertrude F. Gannon, but Mr. Backus decided to confine his attention to his real estate and loan business in Chicago and so disposed of his talking machine interests. The change places the business in the hands of three most enterprising and

capable young men. S. W. Goldsmith, who will have general charge of the jobbing business, is well known in the Wisconsin trade, having traveled over the field for the Victor Talking Machine Co. for several years. Both H. A. Goldsmith and George F. Ruez have been engaged in the brokerage business. H. A. Goldsmith will pay particular attention to the retail store, but will also assist in the general management of the jobbing business. Mr. Ruez, the president of the company, will move to Milwaukee within the near future and will take an active interest in the business.

Harry R. Fitzpatrick, formerly manager of the Wisconsin Talking Machine Co., who made a host of friends in Milwaukee and about Wisconsin during the years that he was engaged in the jobbing business, has gone with his wife to Philadelphia, his former home. He will either resume his position of traveler for the Victor Co., a position which he formerly filled before coming to Milwaukee, or will become a Victor jobber at some point.

Adding Many New Dealers to List.

William A. Schmidt, general manager of the Phonograph Co., of Milwaukee, jobber in Wisconsin and Upper Michigan, has been making good use of the summer months to establish new Edison disc dealers all over his territory. The Edison line has been in good demand for this season of the year, and Mr. Schmidt is confident that the coming fall trade will establish a new high mark. Mr. Schmidt expects to leave on his vacation during the latter part of August. William Idle, traveling wholesale representative in Wisconsin and northern Michigan, has returned from his vacation spent at his home near the Edison factory in the East, and is again on the job.

Summer Trade Ahead of Last Year.

The Gensch-Smith Co., 730 Grand avenue, featuring the Victor line, has not been experiencing any of the usual summer dullness, as sales made during July and August have been more than double those of a year ago.

EDISON DISC LINE IN BIRMINGHAM.

(Special to The Talking Machine World.)

BIRMINGHAM, ALA., August 7.—One of the most recent of the prominent houses in this vicinity to take on the Edison disc line is the large department store in this city of Foreman, Joseph & Loeb, which sent its initial order this week. This store, which is one of the finest in the South, has an attractive department for the display of Edison disc products and has already closed quite a number of important machine and record sales. Their account is being taken care of by the Silverstone Music Co., St. Louis, Mo., well-known Edison distributor.

According to the latest advices received in the East, quite a large number of progressive dealers in California have arranged to handle the Edison disc line. This fertile field is receiving the careful attention of "boosters" of the Edison disc product, with the result that new accounts are being signed up regularly. Among the most recent are the following: Wilson Music Co., Pasadena; Merle & Son, Escondido; William Torkington & Son, San Andreas; John Breuner Co., Sacramento.

Elbert Hubbard, writing in the July issue of "The Fra," says of the Little One-Der attachment for talking machines: "It restores lost chords and takes the wreck out of records." This is only one of the many very strong endorsements we have received for our patent needle holder (shock absorber)

from the hundreds of delighted owners of talking machines. A \$10,000 man writes that he is able to play perfectly with the Little One-Der attachment records 10 years old.

Here is a "Little Hint" for the dealer: In addition to trying out a sample on your own perfect demonstrating machine, using perfect new records, and getting demonstrations of the fine color-value, ask your customers to bring in their old records.

You will thus make a sale of an attachment and yourself get enthusiastic over our patent.

You will bring old customers into your store to investigate, and it is a simple matter then to get them to try out some of the new records. Result,

sale of a Little One-Der and of several new records.

Another way to sell attachments, if you cannot induce all your customers to come in for a demonstration, offer to send one out to the home for trial. We guarantee you will make a sale every time.

Write for 2 or 3 dozen attachments, which we will send on approval. At the end of 30 days return those you have not sold, and we will not charge you for them. Our introductory price on this trial offer is 60c. each, and you retail for \$1. Special price on quantities.

Seven will buy Edison Phonographs from you right off the reel—and each one buy for a different reason. These seven buyers are:

- The one who wants no bothering with needles.
- The one who wants *all* the original music, overtones as well as fundamental tones.
- The one who wants long playing records.
- The one who wants records that the children won't break.
- The one who wants steady speed and steady pitch.
- The one who wants the only phonograph whose tone is suited to outdoors.
- The one who wants his cabinet to match his indoor furnishings.

You want each of these seven customers to bring in seven more, and each of those bring in still another seven, then you want the *full* Edison Line. Get in touch with your nearest jobber. Write us for his name now—to-day.

NEW YORK, AUGUST 15, 1914.

BANNER crop products, now practically assured, are aiding business everywhere. Americans, almost to a man, are anxious to go ahead, and it would seem that the reports which indicate a record-breaking wheat yield, a good corn crop and a generous yield of all others would help along business very materially, and should do away in a large degree, if not completely, with the business gloom which has depressed the country during the past few months.

Certainly every business man in every part of the country, in every trade, should be interested in doing his utmost to get the gloom and grouch out of his particular locality. In other words, to get men out of the pessimistic rut, for the more we talk hard times or the effect of European wars the more we emphasize them and the longer they will remain with us.

Now why not discuss the other side? Why not emphasize the fact that the natural resources of this country are greater than ever?

Why not emphasize the fact that the crops, which promise to be most abundant, will add from ten to twelve billions to the wealth of the nation? Whether it is ten or twelve it does not matter, because a billion is a tidy sum.

Why not emphasize the fact that the business men who create the industrial wealth of the country were never so mentally equipped before in their lives?

Why not emphasize the fact that they are ready to increase their business and increase their sales in every possible way?

The President says that the depression in business is "merely psychological." Call it what you will, but let us get out of the state of mind whereby we emphasize business depression in such a prominent way.

The great essential in everything is confidence; and it is confidence in the management of the great industrial affairs which makes for success, and public sentiment based on the confidence of the American nation to do things will loom up larger and stronger than any men or set of men who may be placed temporarily in charge of the political destinies of the nation. Therefore, instead of talking depression, and going around with bowed heads and sorrowful tones, why not emphasize the big resources of the country?

Why not go at business with a gingery touch which makes for success?

THE talking machine trade has been particularly fortunate over any other line which we may mention. Possibly this

may be due to the dance wave which has swept over the entire country.

Be that as it may, the fact remains that the talking machine industry has been peculiarly blessed, not only during 1913 but the first half of the present year as well. Business has been ever increasing even when other industries have been declining.

Of course, this cannot forever go on unless the general conditions be prosperous as well, because every industry is in more or less sympathetic relation with every other industry; and while our lawmakers are evidently not in touch with the necessities of the business interests of the country, yet it is not probable that the great force of public opinion will fail to influence the lawmakers of the land.

The talking machine men have been blessed in many ways, and there is no reason why there should be any influence injected which should detract in any way from the stability of trade.

There is no good reason why dealers should announce in the daily papers that a talking machine can be purchased for so many cents a day. It has the effect on the public mind to cheapen the talking machine, and that is the very thing the men who are directly interested in its future should avoid. The talking machine should not be cheapened, and to our minds the public should not be encouraged in the belief that talking machines can be purchased for a mere trifle per day. Better a mighty sight to educate the public to the fact that talking machines are on a dignified plane and not upon a bargain basis. They are sold on strict business principles—sold at their real value and at fixed prices, and there is no reason why ridiculous monthly payments should be accepted when machines are sold on the deferred payment plan.

There is no good reason why interest clauses should not be inserted in every talking machine lease.

Simply why?

Because it is good business. It is healthy and it is keeping business up in a dignified manner, where it should ever remain.

TRADER stability should be encouraged by every talking machine association in the land, and dealers in the great cities should form local talking machine associations. These could be extended in territorial area, so that practically all of the trade might be gathered together with local associations covering the entire country.

In this way many matters of interest could be discussed and business principles which make for permanent betterment would be rigidly adhered to.

There are some men who need education.

No doubt about that; and in order to secure the dollar of to-day they would be willing to sacrifice the dollar and a half of to-morrow.

After all, business in every line can be built only through a process of education.

When the attention of men is drawn to a variety of ways in which a product may be successfully exploited they see it in a different way, and there is where the influence of local associations comes in. It not only generates a healthful and more friendly spirit, but it makes men see the necessity of buttressing their business future about with all of the strength possible.

PRICE maintenance has been the sheet anchor of the talking machine trade.

The Supreme Court, by a decision hardly understandable to the lay mind, has said that the maker of a nationalized product has no right to say how much the retailer shall ask the public for it, and yet the Government compels the railways to maintain one price for all, and would not this provision prevent the manufacturer of a trade-marked article from doing the same thing which the Government exacts from the railroads?

With a standard trade-marked article the small dealer can meet in successful competition the large merchant who has millions of assets and who cannot offer a standardized article at a less price than the little fellow who may occupy some small store in close proximity to his great competitor.

Congressman McCoy stated before the talking machine men at Atlantic City, while discussing the Stevens bill, that the believers in fixed prices would probably have to accept a provision

which provides that prices fixed for any article shall be reasonable, and he said that fear of unreasonable prices is one of the things that has influenced Congress thus far. In fact, he added, that under monopoly, or partial monopoly, prices are raised to an unreasonable height.

We can hardly say that the correctness of this assertion is borne out by trade history.

In any line fixed prices for national products have not brought about unreasonable prices, and so far as we are able to determine fixed prices are not brought about by unreasonable pricings.

NATURALLY, we are interested in the permanent success of the line to which The Talking Machine World directly appeals; but if price maintenance were not right in principle it would not appeal to the talking machine trade any more than to any other. It is, however, a protection to the public against dis-

honest prices, and that one point seems to have been overlooked by the enemies of price control in Congress.

The American people will not pay more than an article is worth for a very long time, and no manufacturer can succeed in his enterprise by asking a price which exceeds the actual worth of the product offered and expect to remain long in business.

Trade expansion and trade stability are materially aided through a fixity of prices.

Much must be brought about by the power of education.

The public has been educated to the belief that fixed prices on various products has meant a standard of values, and the public expects to secure value for every dollar expended.

In the Clayton bill it is proposed to deprive manufacturers of all products, patented included, of the power to fix prices on the articles created by them. This clause appears in the bill which is popularly known as the administration measure, and which has powerful forces behind it.

STIMULATING BUSINESS BY 'PHONE.

Personal Equation Can Be Brought Into Play Even by Long Distance Use of Voice—How and When to Use This Form of Approach.

One of the most successful salesmen we know uses the telephone for an hour or more every day. And we are disposed to think that this method which proves so successful in his case might be followed by others to excellent advantage, says the Voice of the Victor. When a record customer begins to show signs of cooling off there is no better way of reawakening interest. The telephone offers the best possible substitute for a personal visit because all the enthusiasm, the good will and the magnetism that the tones of the voice convey can be conveyed over the telephone. In other words, it is vastly easier to introduce the personal equation over the 'phone than by letter or any other such method, and every salesman realizes the value of the personal equation in business.

Not long ago a Connecticut merchant, with this very idea in view, provided each of his salesmen with a separate telephone and a separate order table, putting in an exchange so that customers could immediately be put in touch with the man with whom they were accustomed to do business.

It is one thing to call up a store and complain that goods delivered were something less than satisfactory, but it is quite another thing to be able to reprove the man who was directly responsible. There is more satisfaction in it and it does more good—moreover, a feeling of mutual trust is developed more quickly than in any other way. The direct contact of individuals diminishes the likelihood of error, because personal tastes and personal abilities are more clearly understood.

Like everything else, salesmanship by telephone may be overdone—it can, indeed, become offensive, and then more harm than good will result. Call up half a dozen people haphazard and try to get an order and you will more than likely find that your efforts instead of being appreciated quite possibly will produce the opposite effect.

There must be a reason for telephoning, and the tactful salesman uses his brains in finding a number of suitable reasons. Having done that, the rest is comparatively easy.

It will occur to anyone, for instance, to call up some good record customer with a weakness for violin records and say: "By the way, Mrs. Blank, there's an exquisite record of the 'Largo' out this month by Fritz Kreisler. His interpretation is as big as the music itself, and of course plenty of tone and the clean precision that the man is famous for. I want you to hear it."

That's one reason—one opening wedge for a nice little order—and there are plenty of others.

You learn that one of your Victrola prospects is about to give a dinner, and you will run small risk of giving offense if you telephone and say: "It occurred to me that you might like your Victrola in time for your dinner. Suppose you let me send it up."

On rainy days, when most people are likely to feel a trifle blue, you may be sure that the suggestion of a few new dance records will not be taken amiss. Watch out for every little occasion and make use of it.

This sort of thing is possible only when the salesman regards his customers as business friends and makes a point of keeping in touch with their varied interests. The man who never sees and

never thinks of a customer after the store door has closed behind that customer had better leave telephone salesmanship alone. To be more exact, he had better leave salesmanship alone.

Lansing Khaki Moving Cover. Showing Ease of Adjustment.

Arrangement of Straps on Khaki Moving Cover Showing Use of Straps Going Upstairs.

No More Dust, Scratches, Bruises or Finger Prints

on your talking machines, either in stock or in delivering, for the Lansing method of protection keeps the finish of machines in perfect condition. These covers fit all makes of machines, and the straps on the outside of the covers facilitate the work of delivering. Clothe your machines with the

Lansing Khaki Moving Cover

and don't deliver them "naked." Saves time and expense of polishing, fixing scratches and other marks, and enables a perfect-finish machine to go from your store to the house without a mar. Protection in cold and hot weather, too. Place for your name and address on the outside. Price very low and sold on the "satisfaction or money refunded" basis.

Description

Made of Government khaki, lined on inside with cotton flannel. Interlined with four thicknesses of heavy felt, firmly and evenly quilted. Furnished with straps and handles to facilitate carrying. Made strongly for durability.

Send for booklet and prices. Better include a request for a sample cover, too.

VICTOR
DISTRIBUTOR

TRADE SITUATION IN CLEVELAND.

August Opened Propitiously and Gradually Increasing Demand for Talking Machines and Records Is in Evidence at the Principal Houses—Talking Machine Used for Variety of Purposes—News of the Month.

(Special to The Talking Machine World.)

CLEVELAND, O., August 8—The close of last month was a rather quiet one in the talking machine trade, although the aggregate volume of business was large, covering all types of machines and records. August has opened rather more propitiously and trade was somewhat improved during the past week, but is considerably less than normal at this season of the year. A gradually increasing demand is noted by the wholesale dealers, accentuated by the recent establishment of an exclusive Victor distributing store, and both the retailers and wholesalers are well stocked with machines, cabinets and records and are in excellent position to meet every requirement of the trade.

Good fortune is favoring the farmers of Ohio, this year, and their prosperity will largely redound to the talking machine trade.

A great many of the lower priced machines have been sold this season to excursionists on the lake boats, to the camps and numerous lake shore resorts. Added to this demand for machines there has been large sales of records, which materially improved conditions.

Business at the Columbia Graphophone Co.'s store is moving along conservatively, although with a fairly good volume of trade. Mr. Madson, manager, said reports received from dealers throughout this section, especially in the farming districts, are very favorable. All the dealers, he said, are exceptionally enthusiastic over the prospects of a big fall trade.

Conditions with the Eclipse Musical Co. are reported favorable. Mr. Lane, manager, said: "Vacationists are returning with renewed energy for the fall campaign. A Victrola furnished by the Eclipse is being used at a local theater this week very ef-

fectively. A twelve-inch record by John McCormack is played entirely through, the Victrola giving every prominent part in the act. C. H. Denslow, the progressive outside salesman of the Eclipse, has just returned from an automobile trip to Pennsylvania. He says black bass fishing where he was is fine, and that after drinking about a barrel of Cambridge Spring water he feels fine and in good condition to tackle the big fall business which we all expect to do.

Mr. Morton, manager of the talking machine department of the Brainard Piano Co., says that although business is at present rather quiet, it will undoubtedly be very good the coming fall. He says they are making sales of machines daily and have a good record trade, while the piano sales round out a most satisfactory business.

An "Ideal Garden Exposition" has been an attraction here for several days. The Columbia Co. has installed a graphophone, and with a select list of records entertains the crowds daily.

company's large piano business, results in a very satisfactory situation.

The W. H. Buescher & Sons Co. has installed a complete line of Victor goods at the new wholesale store on Chestnut street and is already doing a thriving business.

The Phonograph Co. reports business satisfactory in the entire line of Edison goods, Mr. Blom, manager, said trade was quite as good as he had reason to expect, and that Edison instruments and records were growing in favor, as the daily sales demonstrated.

The other dealers in the city are doing their full quota of business and hopefully looking forward to a large fall increase.

POINTERS FROM MANCHESTER, ENG.

The United States Consul There Tells How Talking Machines and Records Can Be Profitably Introduced in That Territory.

In a very interesting article published in the July 9 issue of the Daily Consular and Trade Reports, Consul W. Henry Robertson, stationed at Manchester, England, calls attention to the fact that talking machines and talking machine records could be profitably introduced in this prosperous district.

Referring to Manchester as a market for American goods, the Consul remarked as follows: "The Manchester consular district, with its tremendous population of well-paid consumers, should be one of the best markets in the world for American products, especially when the similarity of American and European tastes is considered. During the last year this consulate has endeavored to show many excellent openings for articles here that are not being properly pushed at present. In some cases these articles could be readily sold directly here, while in others they could best be marketed through general selling agencies in London. But the chief point is that they are in demand and that they can be disposed of at competitive prices, especially if sent through the cheaper and more direct route of the Manchester Ship Canal."

Keeps

You

'Satisfied

SERVICE

NEW YORK CITY

The Grafonola Co., which succeeded to the retail business of the Columbia Co., is sailing on the high tide of prosperity. "Business," said Mr. Routh, manager, "during July was greatly on the increase over that of a year ago, and the outlook for August is even better. I find that when you can get salesmen interested in looking for and working up future business, as well as taking care of to-day's sales, one need not worry over to-morrow's sales. I have heard salesmen, having a fit of the blues, say, 'I wish I knew where I could sell an instrument,' when within an hour's time, on the phone, he could get two or three good orders, and if he had been keeping the phone hot in his spare moments he would not be lamenting his lack of prospects. I attribute our increase in business to a great extent to the liberal use of the telephone in spare moments of our entire sales force."

Improvement in business within the past two weeks at the B. Dreher's Sons Co. is reported by Mr. Bowie, manager of the talking machine department. The talking machine trade, with the

A fall and winter season of unparalleled commercial activity is already in sight. For those dealers still inclined to linger over the Columbia proposition there never was a worse time to hesitate.

Come right in.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

BLACKMAN ENJOYS OUTING.

Eleven Days' Automobile Trip Through the Berkshires and White Mountains Source of Pleasure—Stores Energy for Fall Campaign.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, New York, Victor and Edison cylinder distributor, returned to his desk last week after an eleven days' automobile trip through the Berkshire hills,

Between Manchester and Lake Sunapee, N. H. covering the routes and territory of what is familiarly known as the "Ideal Tour" for automobilists. This tour takes the visitor over a thousand miles of the best highways in New England and through sections which are noted far and near for their beautiful scenery.

Mr. Blackman, who was accompanied by Mrs. Blackman and their son Albert, made the trip in his new six-cylinder 1914 model "Buick" which gave him perfect service from start to finish. All of the ordinary hills were climbed at high gear, and the smooth running of the car was a source of great pleasure to the party.

While on this tour Mr. Blackman played his first game of golf, turning in a very creditable card on the Poland Springs Links. Judging from his enthusiastic reports and his expressed admiration for the game, Mr. Blackman will be an ardent golfer in a very short while. The trip on the whole was a most pleasant one, and Mr. Blackman returned to his office with a store of accumulated energy and optimism to combat the exigencies of the fall and winter seasons.

DISC PHONOGRAPH FOR ELKS' LODGE.

The G. B. Baker Piano Co., of Ottumwa, Ia., Edison disc representative, has reported the sale of a \$250 Edison disc phonograph to the Elks lodge of that progressive and hustling city. This sale adds another lodge of this famous organization to the ranks of Edison disc phonograph owners, as quite a number of sales have been closed of expensive disc models to local Elks lodges.

PROGRESSIVE JOBBERS ADVERTISE IN THE TALKING MACHINE WORLD. CONSULT THEIR ANNOUNCEMENTS.

ADVERTISING DURING "BAD TIMES."

Writer in Printers' Ink Points Out How Prominent Advertisers Increase Appropriations During Times of Depression.

Referring to the way in which national advertisers have handled advertising problems in times of financial depressions or panics, a writer in a recent issue of Printers' Ink commented thus on the policies of the Victor Talking Machine Co.: "You may remember how Hart Schaffner & Marx, instead of "cutting down expenses" that year, opened the advertising throttle wide—and their timid competitors paid in the sales they lost and H. S. & M. got.

"The Victor Talking Machine Co. met the situation similarly.

"Just to emphasize our own belief in the efficiency of good advertising, let me recall a little incident that happened during the financial scare of 1907," said Advertising Manager H. C. Brown at the Baltimore Convention.

"With the executive board of our company I sat at a little table in the office of our advertising agents discussing ways and means of meeting the emergency that threatened serious curtailment in the sales of many established lines of merchandise, and, following the suggestion of one of our officers, \$287,000 was added to the regular appropriation and made immediately available for extending our magazine advertising.

"The wisdom of this move was absolutely proven when the Victor Co. held its sales up through those panicky times and went into 1908 facing a demand far in excess of our factory capacity.

"This extra appropriation has since continued available for each year's advertising, and the results gathered each year, by which the value of our advertising is measured, will undoubtedly see it increased before any part of it is taken away."

"Mr. Brown might have added that in 1907 and 1908 the Victor Co. paid its usual 7 per cent. dividends on its \$500,000 preferred, and its usual 6 per cent. on its \$5,000,000 common stock. Also he

might have mentioned that in 1912 the Victor Co. paid 7 per cent. on its preferred, and began paying 20 per cent. on its common—and, in addition, had \$3,655,260 undivided profits.

"Do you think this would have happened if the Victor Co. had rushed to cover and canceled everything. I don't."

EDISON FOR WM. JENNINGS BRYAN.

Secretary of State Writes Enthusiastically on the Merits of the Edison Disc Phonograph in a Letter to the McKee Instrument Co.

(Special to The Talking Machine World.)

WASHINGTON, D. C., August 7.—The McKee Instrument Co., of this city, successful Edison disc representative, recently closed a sale of unusual importance and prestige when it sold a handsome \$450 model Edison disc phonograph to William Jennings Bryan, Secretary of State.

Secretary Bryan stopped in at the show-rooms of the McKee Instrument Co. a few weeks since, and after listening to two records was so well pleased with the tonal qualities of the Edison disc product that he instructed the company to send an Edison disc phonograph to his residence pending his final decision as to its purchase. Notwithstanding that the Secretary of State has had momentous matters for consideration ever since he entered the Cabinet, he evidently found a little spare time to listen to the phonograph, for he purchased it and a generous supply of records. Secretary Bryan's delight with his phonograph is outlined in the following letter he recently sent to the McKee Instrument Co.:

"I have been enjoying the Edison disc phonograph long enough to be sure that I shall like it, and from your list of records we have selected a number that please us very much. I am not surprised that there is an ever-increasing demand for these instruments. They give to families, at small cost, the best there is in music, and are a real and permanent addition to the amusements of the masses."

STANDARD GRAMAPHONE APPLIANCE CO., 173 Lafayette St. NEW YORK

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., August 9.—Business up to the first of the month has been much better in the talking machine stores than one would expect; in fact, it showed a marked improvement over last summer. There has been a surprising demand from shore and country, and this despite the fact that the resorts have not been so liberally patronized as formerly. Since the first of the month, however, there has been a little falling off, due, as is the case with many other branches of trade and industry, to the scare occasioned by the declaration of war and the consequent fear of a money stringency. Now that there is a better feeling growing as to the safety of the monetary question on this side there is likely to be a general resumption of business, momentarily suspended. In anticipation of big business, many houses are considerably enlarging their facilities.

Need of a Local Organization.

Harry Rosen, the hustling School street talking machine dealer, is anxious to see some sort of an organization effected among the dealers and salesmen of the city, for he believes that great good could come through having a closer cooperation among the trade. Mr. Rosen has talked this matter over with a number of "the boys," and they are all agreed that much could be gained through a solidifying of interests such as is done among so many business men, those allied with some single industry; practically all trades have their own organizations, and the Boston Music Trade Association and the Boston Music Publishers' Association may be cited as types of organizations whose members are allied to musical interests. "And why not the talking machine business?" asks Mr. Rosen. Mr. Rosen believes that there is much yet to be learned about the business and a general exchange of ideas might prove of benefit all around. One of the especial needs, he thinks, is a more comprehensive knowledge of salesmanship, and he thinks there would be more of a future for a class of men who have just about remained stationary for years simply because they have not taken the trouble to know the business better, to study human nature, and thoroughly understand the fine art of properly selling goods. Then, again, a good organization could serve as a clearing house, and it could be in possession of a central bureau where dealers, without each making a personal investigation on his own account, could learn of the standing of those who might wish to do business with them, how they stood in their

accounts, whether they were good pay or slow pay, and so on. It is Mr. Rosen's hope that in the early fall some such movement may take definite shape; and it would be well, he believes, to first assemble a group of leading men in the business to informally discuss the feasibility of the plan. Then later a meeting of all dealers and salesmen could be called.

Columbia Changes Near Completion.

The changes in the Columbia Phonograph Co.'s Boston store, made necessary by the continuation of Avery street into Tremont street, are nearly completed, and in a few weeks, by September 1, probably, the large number of patrons will find welcome in an almost completely new establishment. Already the side of the building has been rebuilt and all the windows along the Avery street side are in place and, as previously mentioned, this will give ample light and will afford a splendid opportunity for advertising. The location under its new conditions will be an admirable one to attract people. All the demonstration booths are to be rebuilt and will be only eight feet high, and this will give a free circulation of air across the whole top of the first floor, and the sashes will be pivoted so the various rooms can be thrown in together if needed. There will be the inverted system of lighting. The tone of the warerooms will be French gray. Manager Erisman has worked exceedingly hard to make this one of the handsomest and best arranged talking machine establishments in the city.

Completes 1,400 Mile Automobile Trip.

Manager Royer, of the Arch street Victor headquarters of the M. Steinert & Sons Co., has just completed a 1,400 mile automobile trip into Canada, and he had as his guests a group of his faithful sales force, who enjoyed the trip quite as much as the hospitable host. With Mr. Royer were Frank Cunningham, Perley White and Charles Morrill, all of the Victor department, and a fifth one of the party was a relative of Mr. Royer's. The party was gone eight days, and the route lay through Keene, N. H.; Rutland and Burlington, Vt., to Montreal and Sorel, Canada, where Mr. Royer's wife is spending the summer. The return route was by way of Burlington, skirting Lake Champlain, St. Johnsbury, into the White Mountains, on to Bretton Woods and back to Boston. Much of the trip was over superb roads, and the famous King's Highway was found to be all that is claimed for it. Later, when Mrs. Royer decides to come home, Mr. Royer will again take

his Paige-Detroit car up to Canada, and the two will motor back leisurely.

Pardee-Ellenberger Co. Vacations.

Manager Silliman, of the Pardee-Ellenberger Co.'s Boston establishment, says that the demand for the Edison disc outfits has been surprisingly large for midsummer and July proved an unusual month, the business from all of New England during that time quite surprising everyone connected with the office. Mr. Silliman has not been away on a vacation as yet, but probably will plan to get off toward the end of the month. His son, H. H. Silliman, who will enter Harvard this fall, is spending the summer giving Edison disc recitals at a number of the summer hotels, and what an Edison machine can do has been ably demonstrated by him at Watch Hill, Block Island, Jamestown and Narragansett Pier. Young Mr. Silliman has certain traits, both of social and business worth, that should make him valuable to the Edison people.

Chickering Add the Edison Line.

Manager W. W. Longfellow, of the talking machine department of Chickering & Sons, in Tremont street, which has been confined to Victor outfits, has taken on a line of Edison disc machines, and already there has been considerable of an inquiry for them. The quarters at Chickering's at the rear of the second floor are quiet and exclusive, and thus one is able to have a demonstration of the machines under the best possible conditions. Manager Longfellow has laid in a large stock, so a customer has plenty of styles from which to make a selection.

In the meantime, in order to prepare for the expected large business this coming fall, the quarters are being considerably enlarged and three handsome booths are now in course of construction. These will be as soundproof as thick plate glass and walls lined with hair and paper can make them. Manager Longfellow has postponed his vacation so as to see the improvements completed before starting away. He will go to East Dennis, on Cape Cod. His brother, Ralph W. Longfellow, who is with him, has just returned from East Harwich.

Dudley Takes Columbia Line for Three Stores.

Manager Erisman reports that H. H. Dudley, who conducts a chain of stores at Brockton, Whitman and Bridgewater, has become interested in the Columbia proposition, and he has equipped all of his establishments with a large line. Davis Brothers, of 683 Washington street, who also

EDISON DIAMOND DISC PHONOGRAPHS

Are conceded to be the greatest sound reproducing machines ever made and the country is going wild about them. You ought to have this line in your store and if you will write to

THE PARDEE-ELLENBERGER CO., Inc.

conduct stores at Providence, Lawrence and other places, have become Columbia enthusiasts, says Manager Erisman, and they have taken on a large assortment of outfits. Manager Erisman states that the July business of his store was 62 per cent. greater than July of last year.

Expects Big Fall Business.

The Eastern Talking Machine Co. is getting ready for a big fall business and is engaged in installing on the third floor a new retail department for Victor goods. The department will be finished and furnished in good taste, and some of the Eastern's competent staff will be on hand to look after the wants of customers.

To Move to More Central Section.

The Imperial Phonograph Co., now located in Doane street, reports that thus far business has proved excellent. The company feels that its location could be bettered, especially as larger quarters are needed, and in a few weeks it will move to a building more in the central part of the business section, probably in Devonshire street. The company says that it has been able to interest quite a number of dealers in its proposition and that its machines are in many homes in and around Boston.

With the Vacationists.

Billy Fitzgerald and Elton Taft, Jr., son of the manager of the Eastern Co., are on their vacation at "Camp Tisours," at Southport, Me. In a week's time Mark Reed and Ed Welch will go to the Maine camp, a place where the quartet has been for several years. John Maguire, of the same house, is in New Hampshire.

Manager White, of the Victor department of the C. C. Harvey Co., is taking a few weeks away from business. Chester J. Sylvester, who looks well after the interests of the talking machine department of C. E. Osgood & Co.'s large department store, is spending his vacation with his wife up in New Hampshire.

The traveling staff of the Pardee-Ellenberger Co. is thus distributed at this time: Robert C. Peck is in New Hampshire, after having spent his vacation pleasantly at Virginia Beach; L. H. Ripley is making a special trip to Vermont and will take his vacation in September, and Guy R. Coner has just returned from Southport, Me., and is again "on the job."

Distinguished Visitors.

George W. Lyle, the general manager of the Columbia Co., and Walter Eckhardt, the Philadelphia manager of the same company, were in Boston a short time ago, and spent considerable time looking over the changes which are being made under Manager Erisman's supervision. Mr. Eckhardt is making some changes in his Philadelphia store, and he was able to get some valuable "points" while here.

Fred Erisman, assistant manager of the Columbia Co., left to-day with his wife for a fortnight's vacation at Bethlehem, N. H.

Giving Series of Recitals.

Harland R. Skelton, of the Edison Co., is giving a series of recitals down along Cape Cod, and his fine demonstrations of the Edison disc machines have drawn crowds of people nightly to the hotels.

FELL IN LOVE WITH THE VICTOR DOG.

A Humorous Incident Which Occurred Recently at the Warerooms of the Kraft, Bates & Spencer Co. of Boston.

(Special to The Talking Machine World.)

BOSTON, MASS., August 6.—The salesmen on the wareroom floor of the Kraft, Bates & Spencer Co., of this city are still laughing over a humorous incident that occurred in the store last month. It seems that a lady, accompanied by a little girl, entered the company's store to select a player-piano. During the time that the prospective purchaser was discussing terms, prices, etc., with one

of the floor men, her diminutive daughter managed to lose herself thoroughly and adequately. Persistent search of every corner and nook in the ware-rooms failed to give up any sign of the lost "little lady" till finally the mother and the salesman, on the point of distraction, went outside the store to look up and down Boylston street. To his surprise

the salesman observed a number of spectators looking in the front window and smiling broadly, and further investigation revealed the fact that the little girl was perched on a pile of Victor records in the front window, while bestowing ardent affection upon one of the standard Victor trade-marks—a clean, white Victor papier-mache dog.

WILMOT BUYS EDISON DISC PHONOGRAPHS BY CARLOAD

How Citizens of Fall River, Mass., Realized That the Edison Disc Phonograph Had Arrived When W. D. Wilmot Held a Parade in Connection with a Big Shipment.

Everyone in Fall River, Mass., knows Wilmot, the phonograph man, so when it came to pass that his business increased so rapidly that he began buying the new Edison diamond disc phonographs in carload lots, naturally he took special pride in

the rear of the car being one of the Edison \$250 models.

Following this, he leased six big furniture vans and loaded each one to within a few pounds of the carrying weight guarantee given by the van

Carload of Edison Diamond Disc Phonographs with Fall River Boat as Background.

showing the citizens of that community how fast the sale of these goods is going. So when the first car arrived—Wilmot says more are coming—he backed it up against the Fall River boat to give it "atmosphere" and had a photograph taken of it. Brother Wilmot is seen driving the motor car, in

makers, put big signs on each one and paraded them all over the city. That they caused a hit is the least that can be said about them—the sales of Edison phonographs tells the story. Truly W. D. Wilmot is one of the live wires in the phonograph game.

Fairbanks & Son, who handle the Columbia line in Natick, Mass., have just reported the sale of four Leader Grafonolas to the schools of that city as follows: One each to the Nathan Rise School, the Wilson School, the Bacon School and the Nathan Goodnow School. This is good work

on the part of Messrs. Fairbanks & Son and indicates that they are alive to opportunities lying in the educational end of the Grafonola business.

There are three species of smiles: smiles, grins and leers. Don't get 'em mixed.

The Finish of Needles

is an important step and you will notice that all Bagshaw-made Needles have a glossy steel look—just as if each needle were like a Damascus sword. This comes from our special process of polishing, which although costing more, gives Bagshaw-made Needles the prominence in the talking machine world that is justified by the superiority of our needles.

NEW QUARTERS OF THE PARDEE-ELLENBERGER CO.

Every Modern Facility Adopted in New Home at 26 Oliver Street, Boston, for the Rapid Handling of Growing Business of This Company—Have Area Four Times as Large as Late Quarters in Batterymach Street—Are Jobbers of Edison Goods Exclusively.

(Special to The Talking Machine World.)

BOSTON, MASS., August 9.—Although the accompanying illustrations give a comprehensive idea of

Silliman was placed in charge. His only orders from the chiefs, W. O. Pardee and H. L. Ellenberger, was to "show New England dealers that

No. 1. Exterior of Pardee-Ellenberger Building.

No. 2. General Offices of the Pardee-Ellenberger Co.

the beautiful new quarters of the Pardee-Ellenberger Co., Inc., 26 Oliver street, still one should visit them to see for himself that every modern facility has been adopted in the new building of this company, so that its clients may be served in the best possible way.

When the company took over an old-established

good profits could be made by exploiting Edison goods," and it came to pass as the weeks rolled by that new dealers crept into the fold; that the business gradually extended and increased so that at the Batterymarch quarters everyone was rubbing elbows with his neighbor and the stock of goods grew so fast that the store couldn't accommodate them.

These photographs show to just what extensive scope the business of the Pardee-Ellenberger Co., Inc., has grown, and it was all accomplished by the highest quality of service. Service goes far beyond the bare exchange of merchandise for money, and is very vital for the development of "big business" to use the term.

In connection with this article it is fitting to show the executive staff of the Pardee-Ellenberger Co., Inc., Boston, Mass., and New Haven, Conn., comprising W. O. Pardee, president and treasurer; H. H. Ellenberger, secretary; F. H. Silliman, manager Boston offices, and Guy R. Coner, F. T. Keeney, R. C. Peck and F. H. Ripley—four high grade purveyors of P-E service.

INCORPORATED.

The Colonial Talking Machine Co., of Rochester, was incorporated with the Secretary of State at Albany, N. Y., recently with a capital stock of \$10,000. The parties interested are H. B. Howard, R. C. Cash and L. Weyranch.

A woman whose husband had quite unexpectedly made a lot of money returned from a trip to Europe and was besieged by friends who wanted to know about her experiences. "I've been all over the world," said the good lady; "I've seen all the al frescoes in them Dago chapels and pitchers of kings and pheasants in every city in Eurupp and the World's Fair; but to my mind there ain't anything in the art line that can touch that piece by Millet they call the Los Angeles."

A man is apt to think his latest good resolution is the best he ever broke.

SOME ECHOES OF THE RECENT JOBBERS' CONVENTION

Benj. Switky, the Prominent Victor Distributer, Sets Forth His Impressions of Important and Interesting Happenings in and Out of the Session—Lesson Set Forth by Motion Picture Exhibition—Some Remarks on Loyalty—Record Problems and Solutions.

The Talking Machine World for July reported fully and conscientiously the doings of the recent jobbers' convention, but withal there is more to be said about the jobbers' association and the work and benefits of convention attendance. Replete with business and social features, there was plenty of opportunity for educational observation as well as the stimulating and beneficial effect of interchange of thoughts and ideas outside of the business meetings. It is impossible to draw a line of demarcation, separating the business from the social intercourse.

The member who attends in order to learn and profit, who goes in a receptive mood, is sure to draw inspiration from the most unexpected source and at the least expected time.

Traveling with Eyes and Ears Open.

I have been asked by certain friends in the trade to tell them something of what I saw and heard at the convention; and, strange as it may sound, one of my questioners was himself present at the convention.

To begin with, I would point out the fact that no two travelers see the same sights nor hear the same sounds, even though they be seated side by side, making the same journey. This is because of the personal equation. One's mind, eyes, and ears must be attuned responsively in order to receive vibrations in harmony with surrounding sights and sounds.

If you go to a convention in a receptive mood it is like being seated forward in a train. You see things as they approach. You have the advantage of an advance view, a side view, and, if interested, you may turn around and look backward.

If you go to a convention in a negative or an indifferent spirit, it is like traveling seated backward. You don't see things until they are past and the mental grasp is weak and deficient.

The Moving Picture Exhibit.

To me the most interesting feature of the convention program was the exhibition prepared for the jobbers and guests by the Victor Company, in the form of an educational moving picture show. To say that they deserve unstinted praise for their enterprise and disregard of expense would be to lack appreciation of the value of the exhibit. Those pictures should be shown in every city of the United States. Every dealer, every employe, even a great percentage of the public, would be grateful for the opportunity of seeing them. As an educational force, their worth cannot be overestimated. Besides, think of their advertising value!

The exhibit reproduced in every detail the processes and problems of manufacture.

The silent pictures spoke eloquently!

They answered many questions and complaints which I and others have from time to time asked and written about.

All the explanations and excuses given by the factory as to the record shortage were not half so

convincing as the ocular demonstration and proofs offered by the pictures. After seeing the special machinery required to do the work of grinding and mixing the record material; after seeing the presses, the care and time required to press each record, as well as the buffing; after noticing the skill required of each operative to insure an acceptable product, one ceases to wonder why the factory has been unable to cope with the extraordinary demands made on it for records.

After seeing all this, one is not inclined to be so harsh in criticising them and demanding that they install more presses and take on more help forthwith to take care of the demand.

One realizes that the problems of manufacturing are colossal. It is not merely a matter of doubling the number of presses and hiring enough help to man them. It takes time to break in new help to do skilled work.

Furthermore, of what use are additional presses and operatives if the grinding and mixing equipment are unable to furnish the additional quantity of record material needed for pressing?

And of what use is the machinery if there is no space for its installation? This means that new buildings are needed. At this point we must stop and admit that the Victor Company has been erecting buildings as fast as possible.

Therefore we must be patient. It is good to be unsatisfied; but let us not be dissatisfied.

All of which points to the moral that most criticism and fault-finding are the direct result of ignorance of conditions.

Loyalty to the Manufacturer.

We would also point out to the manufacturer the fact that complaint or criticism, even though based on ignorance, is *not* unfair. In the absence of proper explanation as to causes, it is but natural that men who are devoting their lives and fortunes to the business should complain or question the wisdom of policies that affect them vitally.

To answer "We are doing the best we can," should be, but is not always, a good and sufficient reply. To accept it as satisfactory requires a loyalty of an unusually high (?) order.

I question the real value of such loyalty.

There are two kinds of loyalty: The first is to accept every visitation in a "Thy-will-be-done" spirit; to accept every order and every policy as emanating from an infallible source. The other kind of loyalty is the one that seeks by criticism, by suggestion and by well-founded complaint, to improve conditions; it obeys orders intelligently, not passively. Analytical loyalty is neither socialistic nor anarchistic so long as it keeps within the bounds of patriotism and works for the common welfare along constructive lines.

Prevention and Distribution of Surplus Records.
To return to the moving picture exhibit.

As I watched the work of pressing records and recalled the discomfort and loss suffered during

the past season because of the shortage, it made my heart ache as I thought of the tens of thousands of records (up-to-date selections) listed as surplus stock by the different jobbers—records that had been pressed during the period of acutest shortage.

It seemed to me that there was something wrong somewhere. There ought to be a way of regulating the output of the pressing plant so as to supply first those selections which are needed the most.

The Transfer Bureau does noble work in distributing the surplus stock—taking away what one does not want and shipping it to the jobber that needs it.

Great as is the work of distributing surplus, it would be an even greater accomplishment to *prevent* surplus.

While the accumulation of surplus stock is not altogether avoidable, most of it *is* avoidable. The process is so simple as to seem ridiculous. The only difficulty is in getting the co-operation of those who control the situation.

If we cannot increase the output of the pressing plant, we *can* regulate its work so as to give the greatest benefit.

During April, May and June, when the factory was confining itself mostly to shipping quantities of the newest selections, jobbers were piling up surplus record stock at an unprecedented pace.

Had the factory been in closer personal touch with their jobbers and dealers—the men behind the counters—they could have served them better.

It was a mistake of judgment to presume that it meant better service to press and ship 500 of one selection than to work on 100 each of five different selections.

Giving the preference to those selections ordered in the greatest quantity tended to delay indefinitely the shipping of small orders for minor selections; hence the demoralization of the jobber's stock of catalog numbers.

The uncertainty of obtaining duplicate shipments within a reasonable time encouraged jobbers to place excessive initial orders. A condition of frenzied plunging was created, with the result that thousands of records were pressed and shipped that were destined to remain unsold for a long time, to the detriment of other selections which could have been pressed and would have found a ready sale because they were sadly needed.

Should the same policy be pursued this fall, we may expect an even greater demoralization in the record service.

The factory should encourage conservative ordering. This can be brought about by assuring the jobbers that repeat orders will be filled promptly. Under no circumstances should the first shipment of an order be held up for four weeks—or longer. As surely as this is done orders will be piled in without regard to actual requirements. Surplus will accumulate; business will suffer, and it will waste the energies and resources of factory, jobber and dealer.

(Next month there will appear Part II. of Echoes of the Recent Jobbers' Association Convention, using as a text one or two casual remarks made by fellow jobbers on the Boardwalk.)

TALKING MACHINE DEALERS OF ST. LOUIS ORGANIZE.

How an Association Was Organized and Successfully Developed—Platform on Which It Is Conducted—A. C. Thiebes, of the Thiebes Piano Co. Is President—Punishment for Those Who Break the Rules—Those Who Registered as Members of the Association.

(Special to The Talking Machine World.)

ST. LOUIS, Mo., August 12.—The Associated Talking Machine Dealers of St. Louis, with practically every dealer in the city as a member, is already making its force felt in the trade and the members are enthusiastic over the work they have planned through this organization.

The association was organized at a meeting called by Manager Fred A. Niemoeller, of the Associated Retail Merchants of St. Louis, and he aided materially in the organization work. The first plan was that the talking machine dealers should become a part of the associated retailers, but certain changes must be made in the by-laws of the larger association to permit this, and such changes cannot be made at present because so many of the directors of the retailers are out of the city. In the meantime the talking machine dealers will carry on their work with the association, of which A. C. Thiebes, of the Thiebes Piano Co., is president; Val Reis, of the Val Reis Piano Co., secretary, and A. P. Lyon, of Stix, Baer & Fuller, treasurer.

The organization meetings were about the most educative sessions the St. Louis talking machine dealers ever have enjoyed. They were very frank in their statements to each other and one confessed that of more than \$500 worth of records he had sent to one customer for approval in six months he had sold less than 7 per cent. Others told how they had been fooled into eliminating interest charges through reports of terms offered by rival houses, and these rivals were frank enough to admit the charges in some cases, but they pleaded not guilty in enough instances to show that the customers had misled them in the matter of terms.

The main points in the platform of the new association will be: Ten per cent. down on all instruments, but no cash payment to be less than \$5; records sent on approval can be kept but forty-eight hours and at least 25 per cent. must be retained or customer loses approval privilege; on new sale at least 25 per cent. of record bill must be cash; interest shall be charged on all deferred payments. No action has been taken on the thirty-day free trial of machines, but that is becoming a smaller evil daily because the houses are being imposed upon by so many persons who want machines for only a limited time, such as

during the convalescence of an invalid, while they have company for a series of entertainments and then they return them.

The first public appearance of the Associated Talking Machine Dealers was in notices placed in all packages of records sent on approval. These notices were printed without reference to any house, but were signed by the association and stated the terms of approval service.

There was some complaint during the first two weeks that some members were violating the spirit of the agreement, although complying with the text. The complaints were against offers to probable purchasers of small machines. An initial payment of less than \$5 was offered, provided the customer paid for all records. The required initial payment is \$5 on the machine and 25 per cent. of the record bill. If case was required for all records, it was easy to make the initial payment the amount of the required first payment, but stating it the other way was a salesman's trick. It is for such cases as these that the affiliation with the retailers is sought, as it is believed that an official outside of the trade and as well trained in complaints as Manager Niemoeller, of the retailers, could better police the selling situation than a tradesman whose competitors would be suspicious of his motives.

The organization was effected with excellent spirit, and dealers in all three lines joined hands in their efforts to get together and all became leaders. The downtown men were much surprised at the attendance of outside district men, and considerable time was required to introduce the dealers, as this was the first general meeting and all were surprised at the number present. The East St. Louis dealers are joining in the work.

The following are members of the association, and other dealers have applications on file:

Firm. Representative and Address.
 Aeolian Company—Wm. H. Alfring, 1004 Olive St.
 Concordia Music Co.—John D. Barthel, 912 Pine St.

Ask your watch repairer whose
oil he uses on your watch.

NO MARRING OR SCRATCHING

Possible When Delivering or Moving Talking Machines When the Lansing Khaki Moving Cover Is Used—An Admirable Device.

After a talking machine is sold in a retail store the next problem is to get it from the store to the

home without danger of scratching or marring the highly polished surfaces, and to do so at the least possible expense.

This was the thought in the mind of E. H. Lansing, 611 Washington street, Boston, Mass., when he designed the Lansing Khaki moving cover, this being a cover that slips over

Shows Convenient Handling the machine, and by the use of straps two men can easily take the larger sized models and deliver them quickly. By the use of the Lansing cover the smaller sized machines can be delivered by messenger boy at a small cost.

The accompanying illustration shows Mr. Lansing and an assistant picking up one of the large types of Victor talking machines.

The outside of the Lansing moving cover is made of Government khaki, the inside being lined with cotton flannel. Four thicknesses of heavy felt are used for interlining, all being firmly quilted to a uniform thickness.

The straps passing underneath the machine terminate in handles half way up the side, which are held in by heavy horizontal stays. This distributes the weight entirely upon the straps, there being no weight upon either the machine or the cover.

Mr. Lansing reports a large demand for these covers from dealers all over the country who appreciate its value.

BUSY TIMES IN KANSAS CITY, MO.

Frazier-LoBello Music Co. Report Big Demand for Edison Phonographs in Its Territory.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., August 6.—The Frazier-LoBello Music Co., of this city, successful piano house, which recently arranged to handle the Edison disc line, reports the closing of a very pleasing business with its new line, which, it states, is working in perfect co-operation with their piano and player-piano business. The first week that the company had the Edison disc products in its warehouses it sold five phonographs, two of these being \$200 models and one a \$250 instrument. Sales Manager Ware is delighted with the favorable impression that the Edison disc products are making with his patrons.

Dome Record Case

It holds 20 records, which are readily accessible for instant use. A convenient index shows just where each record is. Notice how the case swings open so the repertoire is displayed. It is constructed along different lines, being reinforced at the bottom with a nickel-plated metal support to keep the records in position.

Keeps Valuable Records Under Lock and Key

Try a sample of each, 10" and 12". If not satisfactory you may return them. Include record numbers you need and perhaps you want a particular model Victrola, which you are unable to get elsewhere. We have every model in stock.

Our shipping facilities are the best; thirteen lines of Railroad and five Express companies; also boat lines on the Great Lakes.

By sending us your order you have two of the largest jobbing stocks at your service.

W. D. ANDREWS

Buffalo, N. Y.

LOOK FOR BIGGER BUSINESS THE COMING FALL

In Los Angeles and Southern California—C. S. Ruggles Delighted with Eastern Trip—Managers of Leading Houses Are Optimistic—Electric Tablet System for Barker Bros.—Talking Machine Men Are All Most Optimistic Over the General Outlook.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., August 5.—The so-called "wave of depression" seems to have dealt lightly with our beautiful City of the Angels, at least so think we of the talking machine business.

From reports of all jobbers and retail dealers business is still on the increase and the prospects for bigger business this fall are good. No place in the world do people seem to get as much enjoyment from their machines as here in Southern California, where the climatic conditions admit of impromptu concerts out of doors as well as in.

Charles S. Ruggles, local manager for Sherman, Clay & Co., has just returned from a delightful trip to the eastern coast. Mr. Ruggles took in the big convention, where he met many friends and made a great many more. He says he was treated royally by everyone and had the time of his life. He visited the Victor factory at Camden. During his absence the business was capably managed by William Campbell, his able assistant, who will not take his vacation until next September.

O. A. Lovejoy, head of the wholesale talking machine department of the Southern California Music Co., has just returned from a three weeks' sojourn in the mountains. He claims he will have to work nights to clean up the Edison business that has accumulated during his absence.

A. Graham Cook, of the Birkel Music Co., reports a fine business the last two months, especially in the large model Victrolas. They are redecorating their demonstrating rooms and when finished will have one of the really beautiful talking machine departments in Southern California.

Guy Pooler, of the Birkel Music Co., is enjoying a two weeks' vacation at the present time.

C. R. Wilson, president of the Wilson Music Co., 180 East Colorado street, Pasadena, is putting in three modern soundproof ventilated demonstrating rooms to take care of his large and growing business.

The Carlton Music Co., of Long Beach, Cal., has adopted a novel way of advertising its talking machine business. Mr. Carlton has secured the services of a small boy and a goat, and has built an attractive sandwich sign containing Victor, Edison and Columbia posters. This slips over the boy's head and rests on his wagon, and he and the goat do the rest by parading up and down the main streets of Long Beach.

V. B. Chatten, recently connected with the Musical Record Co., on South Broadway, has joined the forces of the Carlton Music Co., of Long Beach, for the summer.

J. W. Booth, manager of the talking machine department for Barker Bros., has just returned from an Eastern visit, and is quite enthusiastic over the Edison disc. While in the East he had the good fortune to meet Mr. Edison during his visit to the factory. In the near future Mr. Booth intends installing the electric tablet system in all record booths and demonstrating rooms. Any salesman wishing a record from the stock room has merely to write the number on the tablet, which in turn registers it on a duplicate tablet for the stock clerk, who immediately brings the record to him, thus making only one trip instead of two.

R. E. Daynes, of the Barker Bros. force, recently sold two Columbia Grafonola Regents the same day, thereby demonstrating the popularity of that Columbia model.

F. S. Allen, proprietor of the Musical Record Shop, has a very unique window display of dancing figures run by three talking machines. By an ingenious arrangement of mirrors the number of figures is multiplied many times. An advertisement of this kind never fails to attract and brings many prospects into the store.

T. T. Gardner, of Gardena, Cal., one of our new dealers, says he is doing a fine business in Victor, Columbia and Edison cylinder. His territory is located between Los Angeles and the beaches, and he is building up a fine trade.

Miss Alice Brown, manager of the talking machine department at Baxter & Northrup's, has just returned from San Francisco, where she spent her vacation. She is a very optimistic young lady and predicts a big increase from now on in both Columbia and Victor sales.

R. S. Odell, formerly with the F. G. Smith Music Co., of St. Louis, Mo., is now with Baxter Northrup, and is delighted with California.

The Southern California Music Co. is redecorating its extensive talking machine department. By the addition of two more rooms, formerly used by the piano department, it now has eighteen demonstrating rooms, occupying the entire third floor.

R. E. Wolfinger, in charge of the talking ma-

chine department at the Wiley B. Allen Co., reports a brisk trade in the Victor line, especially in the larger Victrolas.

The Andrews Talking Machine Co. has enjoyed its share of the summer trade, and is expecting to keep busy from now until the holidays.

W. F. Stidham, who is in charge of the Columbia Graphophone Co., wholesale, of Los Angeles, is very much pleased at the way Columbia goods are moving, especially the grands, a great many of which have been installed in the best homes in Southern California. He reports several new agencies in the near-by towns.

HEARD FROM IN LONDON.

Arthur D. Geissler, vice-president and managing director of the New York Talking Machine Co., Victor distributor, who sailed for Europe last month, has advised his office that, according to present plans, he will sail for home on the 19th of this month. During the wars abroad Mr. Geissler has been marooned in London, from which he expects to sail.

Motion Picture Dancing Lessons At Home! With the Pathéscope

THIS IS ONLY ONE OF THE MANY DELIGHTS THAT THIS SAFE, SIMPLE, AND PERFECT MOTION PICTURE MACHINE CAN BRING TO ANY HOME THAT OWNS ONE

The First Safe, Simple and Perfect Home Motion Picture Machine. Complete with 4-foot Screen and all Accessories - \$150

THE Pathéscope is an extremely simple and compact, yet essentially practical Motion Picture Machine for use in the Home, School, Club, etc. It is not a diminutive model of the large professional machine, but a startlingly original design of projector, which in its simplest form is entirely self-contained, and requires no wiring, no electric connections, no equipment of any kind, but an ordinary table on which to set the machine.

By a remarkably ingenious arrangement, the simple action of turning the handle actuates the film, generates its own (incandescent) electric light, and projects the pictures in living, fascinating motion upon the screen.

NEW YORK TRADE DISCUSSES EUROPEAN WAR.

The Effect on Business in the Metropolis and Throughout the Country Naturally Interests
—Business Up to Expectations According to Leading Members of the Trade—Optimistic Over the Outlook—New Edison Shop Near Completion—Other Timely News.

The most discussed topic in the local talking machine trade the past two weeks, as in all other lines of mercantile life, has been the frightful war now raging in Europe. Manufacturers, jobbers and dealers are carefully weighing all the pros and cons of the situation to the best of their ability, and the consensus of opinion seems to be that the war will not disturb the talking machine industry as a whole, but, on the contrary, may act as an additional tonic to increased business. Quite a number of the jobbers and dealers have members of their families or business staffs abroad at the present time, and the cables received have been reassuring in every case.

The European War and Business.

The most tangible effect of the European disturbances to date in connection with local business has been the marked increase in the demand for foreign records, particularly those selections recorded in the mother tongues of the warring nations. In certain sections of the city the dealers are unable to supply the orders they are receiving for patriotic selections in foreign languages, and should the war be protracted this demand is certain to increase by leaps and bounds.

New York is generally acknowledged to be the cosmopolitan city of the world, it being an oft-expressed axiom that in the boundaries of Greater New York there are residing more people of certain nationalities than are left in the home countries. This is, of course, an exaggeration, but well illustrates the magnitude of New York's foreign population. A large proportion of this population is available for solicitation as talking machine record prospects, and as the latest advices indicate that the reservists of several of the foreign countries will not be able to leave this country to go to the front, patriotism for the fatherland will undoubtedly be at high pitch during the course of the deplorable catastrophe abroad, and patriotic selections will be purchased for many homes throughout the land.

All of the manufacturers have European factories and branches, which will necessarily suffer materially from the effects of the war. Although no official announcements have yet been made, it is highly probable that some of these factories, if not all of them, will be obliged to shut down indefinitely. Aside from the fact that shipping is at a standstill throughout Europe, a considerable proportion of the workmen have departed for the front, with no likelihood of their places being filled before the close of the war. In times of peace the closing of the European factories by the manufacturers for any length of time would necessitate the plants in this country diverting a certain part of their output for shipment abroad, but as there is no demand for talking machines and records in Europe at the present time, and as foreign shipping has practically ceased, the European market will await the close of the war and the resumption of the factories on a normal basis.

Month's Business Up to Expectations.

In local circles business the past month has been fully up to expectations, and in the majority of instances showed a gain over last year. In the minds of many of the jobbers and dealers August is not expected to be quite as good as last year, this opinion probably being influenced by the unsettled conditions prevailing throughout the world. In any event, the first two weeks of the month have been generally satisfactory, slight losses being reported by some of the dealers and corresponding increases by others.

New Edison Shop Nearing Completion.

The new home of Thomas A. Edison, Inc., at 473 Fifth avenue, New York, is rapidly nearing completion, and all indications point to its being ready for occupancy early next month. The exterior of the building is attracting the attention of all passers-by on Fifth avenue, who pronounce the decorations as being unusually artistic and pleasing for a commercial structure. The color

scheme is gold and white, and when finished both the interior and exterior promise to be representative of modern perfection in building construction. The location of the new Edison Shop, as the building will be termed, is ideal, facing the New York Public Library and is in the heart of the best retail district of New York. The block between Fortieth and Forty-first streets, where the building is situated, is considered by many business men as the best business street along Fifth avenue, and the opening of the Edison Shop will be awaited with interest by the trade.

Collections Good with Columbia Co.

"Collections have been very good for this time of the year," said R. F. Bolton, manager of the wholesale headquarters of the Columbia Co., at 89 Chambers street, New York, "and to my great surprise are comparatively better than July of 1913, notwithstanding the business depression since the first of the year. Our dealers report a steady demand for our product, particularly in the larger machines, while the call for dance records continues to keep up at an amazing pace. The outlook as a whole for the next few months is decidedly encouraging, and I fail to see how the terrible wars in Europe can injure local business."

Optimistic Over Business Outlook.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, well-known Victor distributor, under present conditions, said as follows: "Our business for the past month shows a very nice increase over last year, and the first three months of our fiscal year—May, June and July—have been very satisfactory, showing gains over the corresponding months of 1913. I feel very optimistic regarding the immediate business outlook, and base this optimism on the fact that our country has been running on low gear so long that it is about ready for good business. The wars abroad should not injure business in this country to any appreciable extent, and eventually will work to our benefit. If exports are held up prices will be lowered, for this country will be obliged to absorb not only its natural consumption but an extra amount of vast proportions. On the other hand, if the foreign wars result in increased exports of food-stuffs, and prices are comparatively higher, busy factories and busy people will offset this. I believe that the legislation which we have had has put this country in a position to conserve its financial resources if it takes advantage of the opportunities presented."

"July Business Surprising," Says Purdy.

"July business was surprising in many respects," said H. N. Purdy, manager of the Edison disc department in the prominent piano house of Hardman, Peck & Co., 433 Fifth avenue, New York. "We had expected that trade would slow up considerably with the advent of very warm weather, and were therefore unprepared for the steady call for machines and records which we experienced the entire month of July. Record trade was especially strong, while our sales of the higher priced Edison disc phonographs maintained the high average we have had since this department first opened. In addition to selling several of the \$250 models to prominent yacht owners, we have just placed two of these machines in boat club houses in near-by cities, where they are being used for dancing purposes with great success."

Columbia Concentration on Summer Trade.

The many local representatives of the Columbia Graphophone Co. have been concentrating their activities the past months on the development of timely summer business, paying particular attention to the sale of smaller machines for bungalows, summer camps, etc., and leaving no stone unturned to build up their record sales. The results of this campaign have been gratifying to all the dealers, who state that the popular "Favorite" and the new "Jewel" machines have been sold

to vacationists in resorts throughout New York State for entertainment during vacation time. The new dance records recently issued by the Columbia Co. and placed on sale this month are creating a furore with the patrons of the local trade, according to the reports the dealers are sending headquarters.

Feeling Quite "At Home."

Back in their former quarters and feeling perfectly at home, the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, has resumed its creative work for the assistance of its dealers, and the officials are busy planning new helps for the coming fall. In the meantime business is going steadily forward, and notwithstanding the well-nigh insurmountable handicaps under which the company has worked since its disastrous fire on June 21, Sales Manager Moody reports a gain of 25 to 33½ per cent. for the month of July, as compared with last year. This is a truly remarkable record and one which looms up still more impressive when it is considered that last July was a record-breaker.

Completes New Co-operative Idea.

When a representative of The World visited the company's headquarters last week Mr. Moody was busily engaged in the completion of a new co-operative idea which will be used in connection with the company's stock system of racks, bags and stock envelopes. Mr. Moody has perfected a plan whereby the dealer may use colored labels which, when placed in various positions on the envelope, signify vital points concerning this record, such as over-stock, good selection, quick seller, etc. To further carry out the value of this plan, colors have been designed to denote various styles of records. For example, white signifies sacred, green is comic, black is bands, red is choruses, etc. Other divisions which have a separate color are male quartets, instrumental novelties, vaudeville sketches, orchestras, popular songs, etc. When the label is of a smaller size, a foreign record of a certain language is signified. It is planned to send these signal sets out with the company's regular stock outfit, besides furnishing them free of charge with all large orders for the New York Co.'s stock envelopes.

Landay Improvements.

Landay Bros., the well-known Victor distributors, are making numerous improvements to their warerooms at 563 Fifth avenue, New York, which will considerably increase their stock facilities. Additional demonstration rooms are being constructed on the main floor and new stock rooms on the sub-floor.

PAYS TRIBUTE TO THE "TALKER."

(Special to The Talking Machine World.)

NORWOOD, O., August 8.—D. S. Tarbell, a Victor enthusiast of this city, who is the owner of an exceptionally large library of Victor records, recently issued a new personal catalog, in which he pays a tribute to the Victor products in a "foreword" as follows:

"I have printed this book, just a very, very few copies, for my own particular, individual gratification, and yet, at one and the same time, have not been unmindful of the opportunity it may give me—through the acceptance of the invitation it carries to 'come and hear'—to add a bit to the enjoyment of those I especially like because of the fact that their ideas, or their lives, at least in part, run in my groove.

"The book comes into existence as a sort of observance of the thing which has so generously contributed to my life—in the morning, starting many a wrong day right; in the evening, furnishing a welcome diversion; and in the dead, lonesome hours of the night, when sleep refuses its good offices, bringing that peace and comfort and rest that neither gold nor silver can buy in any other way. Therefore, am I grateful.

"D. S. T."

Many a deckle-edged, rough-finished man has a better fibre than his evenly enameled rival.

SEE HOW THE JOBBERS IN THE WORLD CAN SUPPLY YOUR WANTS.

Do not let Your Record Stock run down

YOUR Success Depends on Two Things:

- Knowing What Your Trade Wants
- And Keeping it in Stock

Now toward the end of the busy season don't let your stock run out. Keep ahead of the demand. Send us your orders.

And special rush, "customers-waiting" orders — don't risk sending them to a jobber whose Victor stock is not complete. Any Victor article you order from us we can ship within a *few hours* of the receipt of the order.

THE CHOICE OF WORDS

An Important Consideration in the Preparation of Advertising Copy.

Printers' Ink, the well-known advertising magazine, has been carrying a discussion in its editorial pages of the value of one-part or one-syllable words as compared with longer words in the preparation of advertising copy. One of the recent communications in this discussion was sent the magazine by W. G. Armstrong, of the Worcester Pressed Steel Co., Worcester, Mass., and reads as follows: "Re article in July 9 Printers' Ink, 'Words the Public Wants,' by F. R. Feland.

"Mr. Feland's article interested me, and reminded me of a piece of copy by George P. Metzger for the Columbia Graphophone Co. Here it is:

"Here's the whole story—both ends of it.

"Your end of it: You get started the first minute you are ready—no waiting for anybody. You keep it up steadily or work at it off and on as the case may be. You can talk full speed or as slowly as you like. You can correct yourself and repeat as often as you care to. In the meantime your typist is typewriting all day long—no part of the day given to note taking. If you have much dictating to do, she will have a good lot of letters already written and ready to sign before you get through dictating.

"Your typist's end of it: She reads your words, not her notes of your words. She is sure to enjoy her work better because she doesn't have to stop and wait every time you stop and think. She gets what you said, just as you said it. She can make you repeat forty times if she needs to.

"In this article there are 168 words; 137 one part, twenty-five two part, and only six three part.

"In my letters I try to use simple English—just plain Anglo-Saxon—but it is surely hard not to get lazy sometimes and let the big words work for me."

Several members of the executive staff of the Columbia Co. are sporting expensive Panama hats—hats that are 'way beyond the five or ten dollar class—through the generosity of E. F. Sause, of the export department, who recently returned from South America with the hats as souvenirs.

Large Retail Chain Stores Require **Talking Machine Managers**

Aggressive Talking Machine dealer (Victor) with chain of stores in East and Middle West, will have openings for several high class Talking Machine Managers September 1. Only men of real initiative, thorough experience and good character will be considered. Exceptional opportunity.

Applications held in strict confidence.

PATHÉSCOPE SALON IN THE JOHN WANAMAKER STORE.

Amid Artistic Environment the Pathéscope Is Shown to Crowds of Interested People at the Great Wanamaker Emporium in New York.

The Pathéscope salon in the John Wanamaker store in New York is attracting crowds of interested spectators daily, and the store's success with the Pathéscope is very pleasing to all concerned. The Pathéscope is demonstrated in ideal surroundings, as shown by the accompanying illustration,

Wanamaker Auditorium a motion picture exhibition of five reels selected from the beautiful Pathéscope photo-dramatic reproduction of Victor Hugo's deathless masterpiece, "Les Miserables." This is the same production arranged for the Pathéscope which entertained thousands of people

The Pathéscope Salon in the John Wanamaker Store in New York.

and the splendid publicity that the Wanamaker store is using on behalf of the Pathéscope is in accord with the high standards of this institution.

In conjunction with the demonstration of the Pathéscope there is being given between the musical numbers of the regular afternoon concerts in the

the past winter at Carnegie Lyceum, New York. The unique character of this entertainment, which is under the direction of Alexander Russell, concert director at Wanamaker's, and the perfect satisfaction rendered by the Pathéscope have made these performances unusually successful.

AN INTERESTING LETTER.

The Columbia Co. received this week the following interesting letter from a prominent dancing instructor of New Rochelle, N. Y., in praise of Columbia dance product:

"I have the most successful school of modern dancing in New Rochelle, and I want to tell you that your records have been a big factor in building up that success. My patrons prefer them—in fact many of them are insisting on them. You know by the time a pupil has had a couple of lessons or so he begins to know what he wants in music, and it is naturally to my profit to let him have it. It is, I think, a significant fact that practically every one of the records in big demand is a Columbia double-disc record. Very truly yours,
(Signed) Hazel Townsend."

STILL THEY WANT TO VOTE.

"There is a lady in this city," says E. A. Sanger, of Sanger Bros., Dallas, Tex., "who has a Victrola, and she played the 'Lucia' sextet for a friend of hers one day when her friend called on her. After playing the above mentioned record, she said to her guest: 'There is one particular record which I certainly want to get some day, but it is more expensive than I can afford at the present time, namely, the "Rigoletto" quartet, which costs \$6.' Her guest, who also had a Victrola, answered her: 'I have the "Rigoletto" quartet at home, but it only cost \$1.25; perhaps the reason I secured it for \$1.25 instead of \$6 is because mine is sung by only two voices instead of four.'"

And such things happen every day.

NEW SOUND DISTRIBUTING DEVICE.

Tones of the World's Greatest Artists Distributed Over a Large Area by Means of a Boy's Unique Invention—Some Details Regarding the New Loud Telephone—Experts Enthuse Over Possibilities.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., August 5.—By the genius of two high school boys of this city the city will be enabled at a nominal cost to give to the public arias from the grand operas by the world's greatest artists. Their invention, a loud-speaking telephone, has just been perfected at the country home of Judge Charles Silent, near Glendora. The boys are Earl Hanson, aged twenty, of 2534 Fourth avenue, and Harold Silent, seventeen-year-old grandson of the Judge.

Their "central station" is the roomy country home of the Judge, from which the boys flood with melody the charming little groves and grottoes that surround the Rancho, Los Alisco.

The invention, credit for which belongs to Hanson, has been worked out by the boys together. For several years they have been studying electricity and applying it, and only recently have perfected the system whereby the voice of one person or the music from an instrument is carried in powerful volume to any part of the hundreds of acres surrounding the home.

Success was achieved by abandoning attempts to force one transmitter of a telephone to do more than has been demonstrated to be possible. They have devised a system of their own in collecting and distributing sound similar to the one employed by electric power companies. They generate a tremendous volume, which through their transformer is collected for transmission over a double wire the same as the ordinary telephone. Thus the sound is carried to be turned loose in as many places as desired. They made their first experiment with a phonograph. A large number of transmitters collect the tones and carry them to the transformer, which sends them wherever needed. The volume attainable is unlimited.

Also Dictograph Device.

The boys' loud telephone can also be used as a dictograph, so that while music in romantic corners of the woodlands might be inspiring to lovers it might also be dangerous for them to whisper endearments, as the slightest sound would be rushed back to the central station, to be distributed wherever the operator might desire.

Experts who have seen the wonderful invention of the lads are very enthusiastic concerning it, and predict a great future for it. The boys are experimenting with a wireless telephone, and expect to be able to get the same results as over the wire. Judge Silent is one of their greatest admirers and thoroughly enjoys the beautiful concerts the boys give him from the tree tops. The Judge is in hopes that it will be possible to hold municipal concerts in all the city parks through one central station.

ROSEN'S UNIQUE AND EFFECTIVE AD.

(Special to The Talking Machine World.)

BOSTON, MASS., August 8.—Local newspapers recently announced the opening of the new store of Harry Rosen, the live-wire dealer, at 246 Huntington avenue, in the following interesting manner:

"Perhaps there is nothing that pleases Harry Rosen, whose store at 3 School street has long been popular with the music-loving public, more than to announce the opening of his new talking machine parlors at 246 Huntington avenue. Mr. Rosen has built up an ever-increasing patronage by fair dealing and courteous treatment to all. From a small stock of machines and records, only a few years ago, he has made rapid strides, and it now takes a number of clerks and four times the room formerly required to handle his patrons. Among the many innovations to be found there will be a music library with its wealth of information concerning composers and their music."

PROGRESSIVE JOBBERS ADVERTISE IN THE TALKING MACHINE WORLD. CONSULT THEIR ANNOUNCEMENTS.

PITTSBURGH TRADE IN GOOD SHAPE.

Buehn Phonograph Co. Reports Substantial Business Increase During July—Good Record Made by Kaufmann Bros. Department—New Dealers Announced—Visitors of the Month.

(Special to The Talking Machine World.)

PITTSBURGH, PA., August 10.—J. A. Phelps, manager of the Boggs & Buhl Victrola department, has just returned from a two weeks' vacation spent at Dayton, O. The Ohio city is Mr. Phelps' "old home," and a restful visit spent among old friends and amid old memories constitute, in Mr. Phelps' opinion, the best sort of a vacation. Business with the Victrola department of the big store has been fair. Buying has not been as brisk as it might be, but in view of the time of the year little complaint can be made.

Business with the Buehn Phonograph Co., Inc., 713 Penn avenue, has been particularly brisk this season. July was an exceptionally good month, the business during that month being 50 per cent. greater than the same month in 1913, according to Mr. Buehn. In order to take care of this extra business and to keep up the average a news salesman, for the western Pennsylvania territory has been secured in the person of C. S. Gardner, who has already started out on his premier trip. Mr. Gardner was formerly connected with the Edison factory and is a well versed salesman of the Edison machines.

The Buehn Co. has also within the past month established connections with several more dealers

in western Pennsylvania. These include W. A. Kulp, of Braddock, Pa.; K. G. Koch, of Oil City, Pa., and Half Bros., of Homestead, Pa.

The good business of the past month is attributed by Mr. Buehn to the exceptionally good record service that has been put in force by the Edison people. The new weekly listing has been perhaps the greatest factor in boosting business, and much new trade can be traced directly to this service.

H. N. Rudderow, manager of the Victrola department of Kaufmann Bros., has brought the business up to an apex this month when a record of the best business for the past four months was established. The buying has centered chiefly on machines, and record buying has fallen off to a certain extent. Sales of the new records are good, but as machine buying has forged so far ahead, the record end has been somewhat eclipsed.

Visitors to the trade during the past month included T. B. Windsor, of Tarentum, and C. R. Kerr, of Sistrerville, W. Va.

COLUMBIA CO. WHOLESALE TRADE.

"Our business is keeping up very well for this time of the year," said H. A. Yerkes, wholesale manager of the Columbia Graphophone Co., who returned to his desk last week after a fortnight's rest. "As a matter of fact, we are enjoying quite a spurt at the present time, and the outlook for fall trade is distinctly encouraging. All types of machines are going well, with dance records in particularly heavy demand."

Our Oppor

To-day the United States is not only the most important nation at peace, but we peace, but a vast measure of prosperity is surely indicated by our exports from our great crop-produce.

The countries of Europe cannot produce.

But they cannot cease to demand. Their demands for food, and other necessities, do not abate. It is imperative that they be supplied; it is clear that this country must do a large share of the supply.

This means that the very large amount of money that this country now sends out in return for imports from Europe, must remain in this country. It is an appreciable proportion of the money of the day which the present European countries must come into this country to purchase commodities which we alone can supply.

It behooves the American people to stand solidly; to meet the present European demand with steady industry undisturbed by any reasonless perturbation.

The promptness and efficiency of our...

taken by the Government and the big business men of this country ensure the financial stability of the United States.

It is for the business men of America to avail themselves to the utmost of their temporary exaltation to the leadership of the world's production marts.

The slight, though generally declared, depression of the Summer must inevitably give way to a Fall and Winter season of tremendous activity and proportionate prosperity wherein all those engaged in legitimate commerce will participate directly or indirectly, and whence, therefore, we in the talking machine trade will reap our full share of the resultant profit.

Columbia dealers will continue to receive the full support of the Columbia producing, distributing and advertising organization.

You talking machine dealers know very well indeed that your business depends on your customer's pocket just as much as on the quality and variety of the goods you offer.

The dealer who carries Columbia product knows that he has the one grade of quality all the time; and he has the further comforting knowledge that he has something to match up in price with pretty well every pocket that is brought into his store.

MAKING A BAND RECORD FOR THE PHONOGRAPH.

In Its Publication for Bandsmen the R. S. Williams Sons Co., of Toronto, Sets Forth Some of the Difficulties Experienced in Securing a Satisfactory Record of Band Music—Some of the Factors That Enter Into the Art of Recording Interestingly Explained.

The R. S. Williams & Sons Co., Ltd., of Toronto, distributor in Canada for the Edison products, issues a bright little paper called The Canadian Bandsman. In a recent number it printed an illustrated article on the making of band records for the phonograph, which is of such general trade interest that it is here given:

"It requires much skill to make a good band record for the phonograph. An outsider usually has the impression that a satisfactory band record is easily obtained by a band playing a tune over once or twice. But the fact is that it requires ten or twelve or even more playings to get a record that will pass muster. These repetitions are necessary in order to get the record properly balanced, for while a good recording department knows

pretty nearly how the several bandsmen should be arranged before a recording horn, yet individual playing varies in force and clearness, in resonance and in good recording properties. To determine how to balance all these so as to produce a record that will give right value to all the instruments played is a high art, and one that is not acquired by an offhand playing.

"To begin with, the men selected to play in a band before a recording horn are all picked musicians—they are the very best the metropolis furnishes. This is very important, for it is a well-known fact that the slightest error made while playing in a concert, for instance, would pass off instantly with hardly any notice except by a very attentive bandmaster. But if the slightest error is made before a recording horn the band must start all over again. For this reason accurate playing must be secured regardless of expense. Each and every musician must be a soloist in his particular line. He must be expert in handling his instrument and as free as possible from mannerisms in playing.

The laboratory in which the records of the Edison Phonograph Co. does its recording is located on the eighteenth floor of a New York City skyscraper. Here quarters have been specially built for the band, where they can make all the noise they want to without disturbing other tenants of the building. Even so high up in the air, their playing is heard seven, eight or ten blocks away, and often it is a conundrum to pedestrians where the band is located.

"The record on which the sounds are recorded is known as a master record. Usually two masters are secured of any playing so as to insure against any defect in one or the other, as well as to provide for possible contingencies in the manufacturing process to follow.

"The horn used to record band music is considerably larger than the horn used for other kinds of recording. It is about forty-eight inches long and the large opening about eighteen inches in diameter. This horn is placed in a horizontal position about four feet from the floor, and the bass instruments, such as tubas, are placed at a distance of three to five feet from the horn; the altos about seven feet; the trombones about eight feet, and raised about two feet from the floor, so that they will focus the recording horn properly. Cornets are placed between trombones at a distance from eight to nine feet. The piccolos have a position between two and three feet from the horn, and the clarinets are raised two or three feet from the floor and lined up in two rows, one on each side of the horn, blowing across. The snare drums are placed two or three feet away, and are never allowed to play except when they have a solo part. Bass drums and cymbals should never be used, as they have a tendency to fog the record.

"After the artists are arranged in this position a number of recorders are selected and the band is made to play a small part of the record to each one. The results are then carefully inspected and the best records selected. A record is then made the full length and again carefully inspected and listened to in order to see that the band is properly balanced. It is very important that one instrument should not overbalance another. This is where the experience in band recording is very valuable. The diagram below will give the positions, and they will be of special interest to bandsmen.

"After two good master records are made they are carefully placed within a special tube lined with cotton felt, ends sealed up and sent to the factory to be duplicated. These master molds are handled and preserved with extreme care. They are used only to make sub-master molds and then put in a vault for safe keeping. All the records used for commercial purposes are made from the sub-masters, and in case any accident happens to a sub-master (as is sometimes the case)

Diagram Showing Position of Each Instrument in Making a Band Record.

resort is made to one of the original master records and another sub-master made from it.

"The process of making the records after a master record is obtained is another story too long to tell here.

"Many famous bands and orchestras have been recorded from the phonograph. Sousa's Band, Pryor's Band, the New York Military Band, Highlanders' Bagpipe Band, Bohumir Kryl's Band, National Military Band, Edison, Concert Band, United States Marine Band, National Promenade Band, and many others have all made several excellent records on the phonograph.

"It is possible for any band to make records of their playing before the recording horn of the phonograph and obtain excellent results. They need a good Edison phonograph, some blank wax records especially made for recording purposes, and a special recording horn. The same arrangement as outlined below for positions before the horn should be observed. If it is impossible to elevate the men as described, the different relations of the instruments can usually be made by having the tubas and altos sit down and the cornets, trombones and clarinets stand up. Considerable practice will be necessary, however, before a good

record can be obtained, and much care and patience will be needed to test results as the recording is being done. When the knack of proper positions, proper blending of instruments and careful, accurate playing is secured the results will be highly encouraging and satisfactory. Such a record ought to have a value in educating those who, as amateurs, wish to bring their band playing up to the best."

EXTENDING SPHERE OF ACTION.

Koerber-Brenner Co. Combining Complete Stock and Quick Transportation Arguments in Latest Business—Show St. Louis as a Business Center in Most Artistic Supplement.

The Koerber-Brenner Co., the prominent Victor distributor of St. Louis, Mo., is carrying on a strong campaign of business expansion and calling the attention of dealers and prospective dealers in Victor goods in the Middle West territory to the quick deliveries that can be made by freight, and at a consequently low price in that section.

The special supplement of the Koerber-Brenner Co., appearing in another section of The World this month, shows a map of the United States with the approximate distances "package car" freight can be transported from St. Louis in from one to five days, which means that even quicker deliveries may be made, when required, by express and parcel post.

The Koerber-Brenner Co. calls attention to its large stocks of both machines and records, but its campaign is also interesting in indicating to what extent the business of the country is facilitated by the modern transportation systems, and how a live concern is prepared to take advantage of such systems to extend its sphere of activity.

HERE'S A NEW "TEASER."

A clever "teaser" campaign was recently carried out by the S. Hamilton Co., Pittsburgh. On one page a two-inch letter "V" appeared, on another page the letter "E," on still another the letter "C." On the following page in the same space, and in the same position at the bottom of the page was this message: 'Coming V-E-C Triplets Next Week.'

When the teaser ads had been used for a week, a 400-line advertisement announced that the "V-E-C" Triplets had arrived." The "V" stood for "Master Victor Vec," the "E" for "Master Edison Vec," and the "C" for "Miss Columbia Vec." The message was that these little people had come to minister to the musical wants of the people.

The ad read: "They bring good cheer, happiness, laughter; they will speak for you, sing for you, play for you. They will help educate your children; they will bring more laughter and sunshine into your life than all other triplets put together."

The large copy was illustrated with a motor truck carrying the three little characters described in the advertisement. The advertiser said that he was very well satisfied with the results of this copy because it created widespread comment and accomplished the publicity results for which it was intended.—Printers' Ink.

STILL IN EUROPE.

Edward N. Burns, vice-president an manager of the export department of the Columbia Co., and G. C. Jell, chairman of the record committee, who sailed for Europe late in July are among the thousands of Americans marooned somewhere in the war zone.

Geo. C. Selzer, vice-president of Harger & Blish, Des Moines, Ia., was a recent visitor to Boston in the course of a Great Lakes tour and was entertained by F. H. Sillman, manager of the Boston office of the Pardee-Ellenberger Co.

Looking inward gives you mental strabismus, a peevish personality and an ingrowing disposition. Look out.

The "OGDEN"

Sectional Record Cabinet, Filing and Sales System—Proves a Wonder—The Best Yet!

Advantages of the "OGDEN" that you Can't Ignore . . .

- Saves time, space and money!
- Dust-proof — warp-proof — visible.
- Complete sales system keeps track of what you sell and what you need.
- Built of properly seasoned, heavy timber — guaranteed never to warp—will last a lifetime.
- Enables you to put your hand on any desired record in 4 seconds.
- Durable springs in each compartment hold records upright and positively prevent warping.
- Sectional feature provides for any size business—300 to 6,000 records.
- Accessory drawer in sanitary base equipped with perfect, automatic re-order system.
- Movable, numerical signals show every record instantly and permit stock to be rearranged in a few minutes without relabeling.
- Numerical signals locate every record—class signals show Songs, Quartettes, Bands, Dance Records, etc., without reference to title or number.
- Money promptly refunded if not satisfactory in every way.

Exhibited at the Atlantic City Convention and pronounced the best and most satisfactory filing system ever offered. Superior in every particular to all other filing systems. Aside from the filing system, the accessory drawer in sanitary base is equipped with automatic re-ordering system.

Explanation of Cut

"A" is a partition showing the double springs that hold the records upright and prevent warping. "B" is a numerical divider and signal that tells you where any record desired is located. This signal is movable, and once your cabinet is arranged it stays arranged, regardless of increase or decrease in stock—no change of labels required. "C" is a sales system envelope that keeps a complete record of sales and automatic inventory, showing the profitable sellers and when to cut out "slow sellers." The magnifying glass shows the method of using the signal system.

CO-OPERATING WITH THE DEALER.

The Little One-Der Co. Supply Striking Colored Signs and Lantern Slides to Aid Dealer in Interesting Public in This Specialty.

The Little One-Der Co., Nashville, Tenn., reports an increasing interest in its device for clarifying the tone of records, and reports that, in response to its advertisement in *The World*, it has received orders from Canada, Hawaii, Bermuda, Buenos Aires and Mexico. While this shows the wide field covered by *The World*, it also empha-

PROGRESS IS THE KEYNOTE

Of the Business and Policy of I. Davega Who Has Built Up a Great Business in Har'lem—His Assistants Have Greatly Aided Him.

No. 125 West 125th street, New York City, isn't a hard number to remember. It's the site of a great big talking machine and sporting goods store; it also is the uptown agency for Ford automobiles, the latter being sold with the same exertion that is consumed in the sale of a fishing reel. But this isn't an automobile story, so we'll shift to Victor and Edison goods and tell about the house of I. Davega, Jr., Inc., which has handled talking machines for many years, not only having the jobbing rights for Victor and Edison cylinder products, but maintaining a retail department that for size and efficiency is an object lesson for dealers who like to see modern merchandising of these goods.

I Davega, the president, started in the hardware business in 1880. A man who works hard is bound to succeed, and Mr. Davega worked. He added kodaks, bicycles, sporting goods, and when talking machines came into vogue he helped introduce these

to the public. As the business grew he had to get more space and to-day the present big store is a worthy testimonial to his efforts. It's big enough to be termed a "large" store, few stores on that busy thoroughfare equaling it in size.

The talking machine, department, wholesale and retail, is under the direction of Manager Schwartz, and, possessing direct experience in the retailing of these goods, this organization is able to show a dealer just how to sell the goods efficiently, and as a rule a dealer trained by Davega is a successful one.

Although Mr. Davega keeps an active line on his many affairs, still the business is too large to be a "one man" affair, and the general executive work falls upon the shoulders of J. Florian, who is the business manager. Mr. Florian plans business moves like a man playing checkers, with a view to driving his work rather than to let the work drive him, and this systematic planning enables him to accomplish a wonderful amount of work. Every detail is closely watched by him, which explains why the business runs so smoothly.

Abram Davega, son of I. Davega, who is vice-president of the corporation, is being trained under the guidance of his father, and on account of his marked ability he is making a record for himself.

WHAT IS ADVERTISING?

A Definition That Won the Prize Offered by the Pompeian Co.

As the result of a prize contest announced by the Pompeian Co., for the best definition of advertising, Walter I. Hamburger, of Hochschild, Kohn & Co., Baltimore, was awarded the prize of \$25 for the following definition:

"Advertising—the force which enables the modern business man to disregard the distance between himself and his prospective customers.

"The force which gives him a million eloquent tongues with which to tell his business story to the world.

"The force which enables him to create new desires and to point out new ways of supplying old needs.

"The force which, properly directed, will make a worthy business prosper, but which no matter how cleverly applied, cannot give prominence to an enterprise founded on falsehood.

"The force by which, a business may be built or wrecked, and which, in the last analysis, brings to him who uses it just that measure of success that his efforts deserve.

"Advertising—the force which has transformed the parlor melodeon into a pianola, the cracker barrel into an Inner Seal package, the crane over the hearth into a fireless cooker, and everything else in the world in like degree."

NEW COLUMBIA DISPLAY SIGN.

The advertising department of the Columbia Co. now has ready for the trade a new muslin display sign measuring 10 feet in length by 3 feet in width. The sign embodies numerous improvements over the first sign of this nature introduced by the company some time ago. The well-known Columbia trade-mark is prominently displayed and a cut of the new "Favorite" lends additional strength to the sign. The color scheme is blue and gold on a white background. It is quite attractive.

A MELBA ANECDOTE.

Madame Melba is fond of telling a curious story of her school days at the High School at Mazawattee, which foreshadowed her success on the lyric stage. On her arrival at the school with several other newcomers, the head mistress asked, "Which of you is Nellie Mitchell?" and the future prima donna replied with ungrammatical emphasis, "Me, me." As a result she was at once nicknamed "Mimi," in accurate anticipation of her ultimate identification with the heroine of Puccini's opera.

"By recent report, two new Metropolitan boxholders are paying \$200,000 each to enter the Golden Horseshoe this year," says the *New York Sun*. Only two other transfers of parterre boxes are recalled since the owning company was formed a generation ago. In those cases \$100,000 was the price. The original investment was \$30,000 for each of the thirty-five shares. Broadway's biggest theater has thus appreciated in value from \$1,000,000 in 1883 to \$7,000,000 now."

Slide for Featuring the One-Der Sound Reproducer.

sizes the interest in the products of this company.

One of the effective means of bringing the Little One-Der device to the attention of the general public is the illustration (in black and white) which is reproduced herewith. Of course it must be understood that the full effect of this illustration can only be obtained in the colored signs and lantern slides provided by the Little One-Der Co., and which, with the dealer's name inserted, forms an excellent means of publicity for the local dealer handling this specialty when featured through the local moving picture house.

A good liar doesn't weaken in the midst of a tale simply because his listener looks incredulous. He opens the muffler and goes ahead.

"TALKERS" IN CHAUTAUQUA CIRCUIT.

Educational Value of the Talking Machine Recognized in the Broadest Kind of Way.

The educational department of the Victor Talking Machine Co. recently called the attention of its trade to the marked progress that the Victor products have achieved in the activities of the Chautauqua circuit. It was pointed out that numerous directors of the Chautauqua had recognized the value of the folk-dance records issued by the Victor Co. and had recommended them for use in over 500 cities under the auspices of both the regular and junior Chautauquas.

Referring to the individual activities of the members of its educational department, this Chautauqua article remarked in part as follows:

"Then there are the Chautauquas themselves. In Minneapolis the State University has given an extension tour of Chautauquas in twenty-four towns, employing some of their best talent. One of the features of the tour has been a daily lecture on 'The Message of Music Illustrated by the Victrola,' given by our William H. Nolan and Leroy C. Case. In Pennsylvania and New Jersey our Harold D. Smith and Branson M. DeCou will give a similar course of lectures on the Junior's Eastern circuit.

"Our lecturers have engagements in some fifty of the large summer schools in normals and universities. A part of the force will hold a Victor demonstration at the National Education Association in St. Paul, while Mrs. Clark will be speaking before the National Catholic Educational Association at Atlantic City.

"Our Miss Ada G. Jordan has just appeared on the program of the Northwestern Music Teachers' Association at Portland, Ore.; Mr. DeCou is managing demonstrations at the New York State Music Teachers' Association at Saratoga Springs, and William H. Nolan is showing the Y. M. C. A. secretaries how to use the Victor in their summer camp at Lake Geneva, Wis."

PROVES VALUE OF RECITALS.

Haddorff Music House of Des Moines Adopts Plan Long Advocated by The World.

(Special to The Talking Machine World.)

DES MOINES, IA., August 7.—The Haddorff Music House, of this city, is instituting a novel idea to introduce new Victor records which is meeting with marked success. On the 28th of each month, when the new records for the following month are ready for announcement, the company sends out a postal to all its clients and prospective patrons inviting them to be present at a recital of advanced Victor records. The postal states that the recital will be held at Haddorff Hall, Ninth and Walnut streets, and the recipients are invited to bring along their friends. It is suggested that there are plenty of fans in the recital hall with which to keep cool, and refreshments are served. To date the plan has resulted in the closing of many record sales which might otherwise have been lost to the house.

LATEST PORTRAIT OF SLEZAK.

Famous Tenor Shown in Unconventional Pose at His Home in Europe.

One often hears of temperamental artists getting "up in the air," but it is rare to see a prominent artist in exactly the reverse position. The accompanying unconventional snapshot of Slezak, the famous tenor, whose records on the Columbia have proven so popular, was taken at his home in Europe, and shows how the singer spends his period of rest. Not being a dancer, the picture is interesting only as showing Slezak upside down.

NEW EDISON ARTISTS

To Be Represented in the October List Are Dan Beddoe, the Famous Tenor, and Redferne Hollinshead—Both Artists Are Represented by Some Admirable Records.

Two new artists, both singers of national fame, will make their debut in the list of concert records to be issued by Thomas A. Edison, Inc., in Oc-

Dan Beddoe.

R. Hollinshead.

tober. The first artist is Dan Beddoe, widely known in the concert and oratorio field as a tenor of distinction. He has a voice of unusual charm, range and quality, which he uses like a true artist. His number for the cylinder list for October consists of that ever popular duet, "Home to Our Mountains," from "Il Trovatore," which he sings with Margaret Keyes, a contralto, who is also widely known and appreciated for her charming personality and beautiful quality of voice. The two voices combine beautifully.

The second artist in evidence is Redferne Hollinshead, a newcomer among Edison artists, who has a voice of excellent range and sweet timbre. He is represented by two numbers, the Buzzi Paccia "Lolita," a typical Spanish serenade, and Tosti's "Parted," a love song which is sung with sincerity and pathos.

GIVES CONCERT IN CHURCH HALL.

(Special to The Talking Machine World.)

NEW CASTLE, DEL., August 7.—E. E. Bridgewater, successful Victor dealer in this city, is utilizing various progressive modes of publicity to develop and increase his already profitable clientele. One of his most recent ideas was the giving of a successful Victrola concert in the lecture room of the Presbyterian church before an appreciative audience.

LIVELY BUSINESS IN TWIN CITIES.

Difficult to Get Enough Stock in Certain Lines Is the Claim of Dealers—Big Edison Parade Attracts Attention—July Good Month for Columbia—General News of Interest.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., August 8.—"We are selling Victor talking machines and records so rapidly that the factory cannot supply us with goods fast enough to satisfy the hungry demand," pathetically complains David M. Dyer, of the old house of W. J. Dyer & Bro. "We had an excellent trade all through July, but regret to say that we were unable to fill all the orders. It feels something like losing real money to be without goods that have been ordered, but I guess we will have to grin and bear it. Other Victrola stores like Foster & Waldo, the Talking Machine Co., relate identical tales of their woes, but the story is not a new one and hence not particularly interesting.

An Edison parade was one of the features of the Minneapolis week in musical circles. The Minnesota Phonograph Co. received seven carloads of Edison goods Tuesday (August 4) and because it was the biggest shipment of its kind into the Northwest, Laurence H. Lucker, president of the company, hired a band, also twenty-seven motor trucks and vans and had a parade. It was a most effective bit of advertising, for many spectators remarked that they did not suppose that there were so many talking machines in the world, and the appearance of twenty-seven trucks and vans loaded to the limit with phonographs made them stop and think. The Edison shop in St. Paul is a certainty and will be located at one of the most commanding retail corners in the entire city, but of this more later.

July was a much better month than June for the Columbia stores in Minneapolis and St. Paul, and the month likewise showed a substantial increase over the business of June, 1913. Except that everybody is happy and the Columbia rapidly is growing in popularity, the local managers, not even C. P. Herdman, of the St. Paul store, have much to say this week.

While bankers are showing some anxiety over the war situation, the merchants generally are not worrying. They are quite sure that there will be no serious interruptions to the business prosperity that has been heading this way for several months.

Lots of failures can be traced to the belief that other people are not quite as smart as we are.

VICTOR

A complete line of Victor products, from the smallest repair part to the biggest model of machine. Every shipment made promptly.

EDISON

Cylinder goods, machines and records; full stocks and immediate deliveries. A good popular-priced line for most any territory.

HERZ VICTROLA DEPARTMENT

Just Opened in Terre Haute, Under the Management of Chester I. Abelowitz, Is Admirably Fitted Up to Handle Large Trade.

(Special to The Talking Machine World.)

TERRE HAUTE, IND., August 11.—The new Victrola department of the A. Herz department store in this city was opened to-day under the management of Chester I. Abelowitz. Mr. Abelowitz has had about fifteen years' experience in the talking machine business, starting at the time the Victor was first introduced to the public, when he was

New Victrola Department in Store of A. Herz, Terre Haute, Ind.

connected with this line in the East. About two years ago Mr. Abelowitz was sent to Buffalo, where he was placed in charge of the Victor department of the J. N. Adams Co., and remained there four months. At the end of this time he was sent to take charge of the Root Dry Goods Store Co. at Terre Haute, where he remained until his recent change to manager of the Victor department for the Herz store.

It is said that Mr. Abelowitz has a most remarkable memory for both the names and num-

bers of Victor records, and that if you give him the name he will give you the number, or mention the number, and he will tell you the name of almost any record in the Victor catalog. This is a wonderful accomplishment when the fact that the Victor catalog contains several thousand records is taken into consideration.

The Victrola department is on the fourth floor of the Herz store and is equipped with soundproof booths corresponding with the other fixtures in the store.

The Terre Haute Sunday Star advertised the opening of the new department in part as follows:

"Terre Haute first saw a 'talking machine' in the old Dowling Hall many years ago. An admission fee of 10 cents was charged for the privilege of inspecting the wonderful invention, a crude machine, turned by hand, and producing more or less unsatisfactory tone and voice effects by means of foil records. Tomorrow Terre Haute is to have the chance of seeing a new and complete stock of Victrolas, the remarkable sound-recording, sound-producing instruments that had their inspiration in the poor little 'talking machine' of thirty years ago.

"The Victrola of to-day brings direct to you—into your own home—the music of the world; the wonderful voices of Caruso and Melba and Tetzlaff and other stars of grand opera; the instrumental music of Kubelik and Mischa Elman and Paderewski, and others that are holding audiences spell-bound wherever they appear; the comic, sentimental and popular songs of the day sung by men and women of pleasing voice and wide reputation; the music of the master bands of the world, concerts by famous orchestras, dance music that will set your foot busy at beating an accompaniment—songs and music from every quarter of the globe, German, Greek, Yiddish, Chinese, and records in various other tongues. All yours in the secluded comfort of your own home, for the mere shifting of a rubber disc, the changing of a little steel needle and the turn of a lever. And you will not tire of the music, for every month brings a fresh supply of excellent records—a long list for you to choose from at small expense. It is this opportunity to renew your selection of records every month that keeps the Victrola ever new and ever pleasing.

With so little to be proud of, it is hard to see what makes the weather vane.

SEE HOW THE JOBBERS IN THE WORLD CAN SUPPLY YOUR WANTS.

LOVING CUP FOR MISS McGRATH.

Popular Young Lady in Executive Office of Columbia Co. Displays Her Terpsichorean Ability and Secures Handsome Prize.

Miss C. McGrath, one of the most popular young ladies in the executive offices of the Columbia Graphophone Co., in the Woolworth building, who transcribes most of the excellent copy turned out by the company's advertising department, is evidently as proficient with her toes as with her fingers, which is paying the former quite a compliment.

Miss McGrath returned from her annual vacation last week, wearing under her arm an imposing looking quart mug of solid silver. On closer investigation it was revealed that this utensil was in reality a very handsome loving-cup suitably engraved with an inscription proclaiming the fact that Miss McGrath had won the cup for her perfect tango dancing at Lake Hopatcong, N. J., after she and her partner had outdistanced all competitors. Miss McGrath is bearing her honors modestly and attributing her terpsichorean proficiency to the perfect rhythm of Columbia dance records, which she utilizes for practice purposes.

Some men are like roosters—they crow pretty well, but when it comes to work, they let others do it.

We live and learn, but those who live fastest don't always learn most.

AGENTS WANTED

We have still some choice territory open for exclusive selling rights on Little One-Der attachments (patented). Splendid side line for energetic young man. No money required. We supply 12 attachments and you pay when you get your money and send for new supply. Demonstration at customer's home means a sure sale every time. Will play any record using steel needle. Big profits, quick returns. A. C. B. Little, Nashville, Tenn.

PARTNER WANTED

Increasing demand for a new patent requires most of my time, and I want a live active managing partner, capable of handling wealthy Red Seal trade; business paying fine all summer; wealthy city of 35,000 and I have three-quarters of all the talking machine trade—Victor and Edison. Address "Partner," care the Talking Machine World, 373 Fourth Ave., New York.

Write today for our new catalogue giving you rock bottom prices of our specialties.

NOTABLE TRADE IMPROVEMENT REPORTED IN ST. LOUIS

Business Slump Appears to Have Passed By—Higher-Priced Machines Have Many Admirers—Columbia Manager in the East—Eighteen Columbia Machines for Children's Playgrounds—Home from the Convention—Recent Trade Visitors of Record.

(Special to The Talking Machine World.)

St. Louis, Mo., August 11.—The talking machine trade, which has been of fair volume during the summer, has been greatly improved since the beginning of the last week in July, according to dealers here. The relief from the extremely hot weather that was so depressing during the early summer apparently revived the spirits of the talking machine users and a spirited demand for records began at once and an improved machine trade within a few days later.

A local dealer ran over his machine contracts, calling amounts, for The World correspondent. Despite the fact that his advertising recently has been pushing machines at \$50 and less, he has as many \$200 contracts in his list as \$15 ones and a large percentage more at \$50 and above than below \$50. This, despite the fact that several of the machines were especially for summer home use. This ratio probably is true of all the dealers, as they say that the very cheap machines now are purchased only for special occasions.

Jobbers say the outlook for fall trade is excellent and that advance orders being received are for excellent totals.

Harry Levy, of the Aeolian Co., has not been able to take his vacation as yet, and he declares that the fall trade has begun in such form that he is doubtful of getting away.

Manager Irby W. Reid, of the Columbia warehouses, is in the East at this writing, combining pleasure and vacation on an extended trip. He is expected to return to his desk about the middle of the month. Charles R. Salmon, manager of the local wholesale department, is occupying Mr. Reid's office during his absence and directing the affairs of the local trade. The last reports from Mr. Reid were that he had spent several days at the factory and had been the guest of President Easton, at Arcola, N. J., for a week and that he was going to tour the Eastern stores and see how Columbias are handled there and pick up any suggestions he could to push the trade in St. Louis.

Mr. Salmon said that the trade had been excellent since the newly decorated and furnished store had been placed in shipshape and that especially that improvement had been noted in the retail record sales in the last two weeks. The wholesale trade, he said, had been very good and the fall outlook is excellent indeed.

Retail Manager Durry is taking a good deal of satisfaction in an order for eighteen machines delivered to the children's playgrounds. The fact that this sale was made to Miss Charlotte Rumbold, a municipal officer who governs the playgrounds, was especially pleasing to him. Only 48 records were sent out with the machines, but that was because Miss Rumbold did not have the time to go farther through the list. She expects to buy many more records as soon as she has the opportunity. The machines will be handled by the playground instructors, all of whom are city

school teachers who accept this work as summer employment and the records used are all of an educational nature. The folk dance records are especially popular with the children. Mr. Duffy regards this sale as an especially helpful one toward promoting the use of the talking machines in the schools, for the parents visit the playgrounds frequently and become more familiar with the work there than during the school season.

In making her purchases Miss Rumbold was confronted with the necessity of making a small appropriation go as far as possible. After careful consideration she decided to economize by buying single, low priced machines and she explained that the trouble of winding up the machine would be the least of the instructor's troubles, as there were plenty of willing workers on the playgrounds.

Returning from the convention Edwin C. Rauth, secretary of the Koerber-Brenner Co., St. Louis; W. H. Reynolds, of the Reynolds Music House, Mobile, Ala., and Lester Burchfield, of Sanger Bros., Dallas, Tex., took a sea trip. They went from New York to New Orleans on Southern Pacific steamer "Protius" and claim that for landlubbers their sea legs worked very well. Secretary Rauth says that nearly all the men on board were initiated into the order of the "Yellow Dog" and that during the trip a very successful badger fight was pulled off, a gentleman from Canada, whose name will not be mentioned, taking the principal part—risking his life in dragging the "vicious badger" from his lair.

Mr. Rauth says that since his return business has been very good indeed—many orders for fall deliveries being on file—and that conditions seem to be improving daily.

Mr. Rauth was elected secretary of the Jobbers' National Association for the coming year and is busily engaged in getting his work lined up. Many matters of considerable importance not only to the jobbers but to the trade will call for active work on Mr. Rauth's part. His complete familiarity with the talking machine business and with selling problems in general will make him a very valuable man in the position which the association has so wisely tendered to him.

At the Silverstone Music Co. store everybody is busy preparing for the changes that are to be made during August, which already have been mentioned in The World and include a concert hall that will seat forty or more persons and will be on the ground floor and easy of access and open for auditors at all times in addition to the stated concerts for the promotion of machine and record sales. They are quite anxious to get the work done by early fall so that the exploitation of the weekly record list can be begun and the fact impressed upon the public that there are new Edison disc records each week.

A. C. Ireton, sales manager for Thos. A. Edison, Inc., was a recent visitor. He came to get acquainted and to talk over fall business,

and, of course, to write the fall order, and Mr. Silverstone talked in three and five carload shipment lots of his needs. Mr. Ireton brought the news that Story & Clark had signed for the sales of Edison disc machines in their thirteen retail piano stores and he left the \$5,000 order for the the St. Louis store with Mr. Silverstone while he was here. It so happens that there is an Edison jobber in each of the Story & Clark towns, so thirteen jobbers get a nice order each from the deal.

F. S. Hemenway, of Alexandria, La., president of the Alexandria Furniture Co., and one of the long distance customers of the Silverstone Co. for Edison discs, was a recent visitor at the store and he remained over a few days to see how retail trade is handled here. Another notable visitor was Eugene Zimmerman, president of the Peoria, Ill., Phonograph Co., Edison cylinder jobbers but Edison disc customers of the Silverstone Co. Mr. Zimmerman reports an excellent trade for the high priced machines in this thriving city.

J. E. Bennett, of Sullivan, Mo., who is selling Edison cylinder and Columbia machines in the Ozark mountain foothills, like sewing machines used to be exploited, was a recent visitor to this city. Mr. Bennett started his crews out in wagons and automobiles to test the efficiency of each vehicle. Now he has stopped the autos, as he says experience proves that the rapid travel over the country roads is too much for the talking machines and he will stick to the wagons. His business is proving very successful, he says.

J. A. Carter, of Mexico, Mo., has been installed as manager of the wholesale department of the Silverstone Music Co.

A recent Silverstone feat in the advertising line that caused considerable talk followed the use of a half page ad by a cigarette company headed: "Mr. Edison Made a Mistake." The ad was an attractive one, and, of course, referred to the inventor's recent condemnation of cigarettes. Mr. Silverstone, the next Sunday, used a half page wide space with the same sort of display line and announced "Mr. Edison Makes no Mistakes." Then his ad plunged into the fact that Mr. Edison had announced that he had put certain qualities into talking machines that previously had been overlooked and that experience had shown that he was right in his statements beyond dispute. Not a word was said about cigarettes in the ad.

THE SOUND REPRODUCTION CO.

The Sound Reproduction Co. was incorporated last week by the Secretary of State, Albany, N. Y., to engage in the manufacture of reproducing machines. The incorporators are A. Joseph Geist, H. C. Burinstein and H. W. Hess, and the capital is placed at \$5,000.

Thomas A. Edison, Inc., recently filed injunction proceedings against the Trafford Music Co., of Mason City, Ia. The Edison Co. claims that the Trafford people have removed the Edison identifications and then offered its machines for sale, in spite of the fact that the Chalmers Music Co. has sole selling rights in that city.

THE TALKING MACHINE COMPANY
12 North Michigan Avenue : : : Chicago, Illinois

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., August 8.—The local talking machine trade is much interested in the fate of several of its members who were so unfortunate as to be caught in the chaos caused by the European wars.

Paul Healy, president of Lyon & Healy, is lost somewhere in Europe, but whether in France, Germany or England the officials of the company have been unable to find out. A. D. Geissler, head of the Talking Machine Co., is in Europe somewhere and his exact whereabouts also are unknown. Henry Babson, of Babson Bros., and his wife are believed to be in London, but no word has been heard from him. C. E. Goodwin, head of the Phonograph Co., arrived in this country from France just in time. Had he attempted to leave two or three days later he would have found it impossible.

Miss Caldwell, of the Talking Machine Shops, is one of a party which is reported by the dailies to have arrived safely in London after suffering considerable inconveniences in getting out of France. Several dealers of Chicago and contiguous territory are also known to be in various parts of the Old World, and in almost every case it has been impossible to get in touch with them.

But little effect is expected to be shown in the coming season because of the war and any slight depression that may be resultant will, in the opinion of the local jobbers, be more than offset by the tremendous crops and general conditions that are assured us.

Talking machine men, in company with other members of the general music trade, are planning an aggressive campaign in South America during the coming year. It is generally agreed that the United States never had a better opportunity to compete with Germany and introduce our products into the great southern continent than at the present time, and if we can convince South Americans of the quality of our goods and the advantages of doing business with us, it is thought that the business can be held permanently.

One of the dailies has suggested that many of the artists who do considerable recording work may be obliged to devote their services to their various countries. Titta Ruffo, whose income as a singer is said to be almost a quarter of a million a year, may be compelled to fight for six dollars a month in the Italian army. Enrico Caruso, it

is also suggested, may be called upon to shoulder a gun. In addition to these there are a number of singers of other countries who may, because of the strict military requirements of their various countries, be compelled to join in the work of war. A local dealer deprecated the idea, saying that Italy, France and Germany appreciate these men too much to risk their loss by placing them on the firing line, although they may be called upon to serve their countries in different ways.

Talking Machine Man to Marry.

L. E. Noble, assistant manager of the wholesale talking machine department of the Wurlitzer Co., will be married September 1 to Miss Helen Jackson. The young couple will enjoy an extended honeymoon and will take up their residence on the South Side. Congratulations!

Big Wade Business in the East.

S. O. Wade, head of Wade & Wade, manufacturers of fibre needle cutters, arrived home from the convention held at Atlantic City and the trip which followed it, much pleased with the convention and the treatment received from Eastern jobbers afterward.

"The convention itself was a most interesting one," said Mr. Wade, "and in my ease the business done was more than satisfactory. I also received numerous big orders for our cutters afterward when I called upon the jobbers in various Eastern cities. We are anticipating a fine fall and do not believe that the war scare will seriously affect the talking machine trade of this country."

Demand for Filing Cabinets.

Manager Mortenson, of the Salter Manufacturing Co., reports that present indications would show one of the most prosperous fall seasons the company has ever enjoyed.

"A particularly noticeable aspect of the trade during the past month has been in the unusual demand for filing cabinets," said Mr. Mortenson. "Owners of talking machines are beginning to take a serious interest in their libraries and, with the additional fact that the average library is rapidly increasing, it is no wonder that dealers are receiving a call for record filing facilities."

Some Visiting Dealers.

Ray Bannon, of Morris, Ill.; J. Lowenstein, of Valparaiso, Ind., and Mr. Wilkinson, of the Wilkinson Piano Co., of Joliet, Ill., were visiting dealers of the week.

Stimulating Musical Interest.

A perusal of a number of newspapers from all over the country show that a very live interest is being taken in community music. There are more band concerts than ever before in the parks, and there are many concerts, free for the public, in the social centers and small park auditoriums even in the winter in the large cities. This is all of immense import to the talking machine trade, and anything that has the effect of stimulating interest in music and especially in the better class of music serves to increase the sales of pianos, player-pianos, small goods and talking machines. The interest in things musical is growing with special rapidity in the Middle West. In view of all this it is rather surprising to find that musical instrument dealers are comparatively seldom discovered doing their very best to further such plans. They should be supporters of the artistically musical in their vicinity. They should organize musical associations of various kinds and secure appearances of noted vocal and music instrumental artists. Of course there are some dealers of whom nothing can be complained in this regard, but as a matter of fact there are not near so many who realize the close connection between the arousing of musical interest and the enhancement of their business as you would expect to find. This is almost incredible, but it is absolutely true. Furthermore, it is just as true of the large centers as it is of the small cities and towns.

Move to Enlarged Store.

Tresch, Fearn & Co. are removing their business five doors south of their present location at 130 North Fifth avenue. The removal brings with it many advantages, principally in the way of space in the new quarters, which offers three times as much room as the old. Five large booths of sound-proof construction have been erected under the direction of Mr. Fearn, who has at last had an opportunity to work out his own ideas of what sound-proof construction should be. Mr. Fearn's plan embodies an air space of about two inches surrounded on either side by two thicknesses of heavily pressed felt. The felt is in turn reinforced by wood, and over the wood there is laid an attractively finished beaver board laid out in panels and trimmed in mahogany. Each booth is tastefully furnished and is large enough to accommodate three or four different styles of machines. The booths are illuminated in brilliant fashion, while the store itself is lit with large clusters of

(Continued on page 39.)

THE WADE—THE PRACTICAL—THE WADE Fibre Needle Cutter

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone. The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade
Fibre
Needle
Cutter No. 2

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made. No. 1 is a very popular cutter which has given excellent service.

TWO NECESSARY TALKING MACHINE ACCESSORIES

The Lyon & Healy Fibre Needle Cutter and The Dustless Record Cleaner

Over 50,000 Satisfied Users of the Lyon & Healy Fibre Needle Cutters!
Is not that enough to convince you that you ought not wait another minute before writing for our liberal terms of discount and a supply of the Lyon & Healy Fibre Needle Cutters?

The wonderful success of the Lyon & Healy Fibre Needle Cutter is due to the following facts:

The blades are made of the finest grade of tool steel, properly tempered; the upper blade is pivoted above and back of the cutting edge of the lower blade. It is held in place by a very high tensioned spring to insure correct leverage and a perfect point at every cutting.

The cutter is fitted with a guide that prevents the cutting away of too much of the needle and also has a receptacle that receives all the waste. It is very simple and easy to operate and, with ordinary usage, should last indefinitely without sharpening.

This cutter is invaluable to all users of the Fibre Needle, as a needle may be used twelve to fifteen times where one of the cutters is in use.

We give our absolute guarantee with every cutter sold.

RETAIL PRICE \$1.50

The everlasting Dustless Record Cleaner is an article that every Victrola owner should have.

It is made from carefully selected Wool Skin with the Wool cut short.

It polishes, cleans, prolongs the life of records and makes them look like new. Will positively not scratch the records.

SPENDS HONEYMOON TRIP ON STREET CAR.**Columbia Grafonola Furnishes Music for a Novel Stunt in the Matter of Up-to-Date After Marriage Celebration Which Has Won Much Notice for All Concerned.**

(Special to The Talking Machine World.)

CHICAGO, ILL., August 11.—When George E. Stoddard, author and playwright, wrote the book of "The Elopers" he did not realize that in a short time he, too, would be eloping. Certainly he did not realize that his honeymoon trip would be made in a street car, with his friends dancing the tango and hesitation to the music of a talking machine. But so it was.

Shortly after the first performance, Mr. Stoddard met a very pretty member of the chorus, who appealed to him as no other woman ever had.

phone Co., had been invited to be present and furnish the music. They did so with the aid of a Columbia "Favorite" Grafonola and a few Columbia records, such as "Puppchen" and "Dreaming." A half dozen of the company could dance quite comfortably at a time, and in the accompanying picture we see two of the leading women, Miss Sylvia De Frankie (on the left) and Miss Olga De Baugh (on the right) dancing with the two comedians, Mr. Dunlay and Mr. Kelso, respectively. Miss Kennedy is seated at the left of the picture.

The "Herald Movies" man discovered the party

powerful electric lights. These lights, because of the construction of the bulb and the fact that it is filled with a gas, furnishes a soft, very brilliant flood of light. A large basement is a part of the new establishment, and in it there will be located a commodious salesroom and a large space for the storage of records. Mr. Fearn promises that the system of record storage and filing will be the last word in that direction. Tresch, Fearn & Co. are one of the few dealers in Chicago who handle the Victor, Edison and Columbia lines.

Brings Out New Record Cabinet.

James I. Lyons, Chicago's pioneer talking machine dealer, has designed and is putting on the market a cabinet that is especially fitted to the storage of Edison Amberol records. The cabinet is finished in various woods and contains five drawers, each capable of holding thirty-six cylinder records in their boxes. Provision is made for setting an Edison machine upon the top of the cabinet, and as the cylinders are placed in the drawer with the titles on the boxes facing upward, it is but the work of a second to select the record desired. Mr. Lyons is receiving numerous inquiries regarding this much needed cabinet.

Personals and Visitors.

Miss Mary M. Cockrell, of the Talking Machine Shops, is on a two weeks trip to Niagara Falls.

Manager Cullom, of the talking machine department of the W. W. Kimball Co., has returned from a vacation at Roscommon, Mich.

John Greene, buyer of the Victrola department of the Young & Chaffee Co., of Grand Rapids, Mich., was a visitor to the office of the Talking Machine Co.

Mr. Brodt, of Stewart Bros., Columbus, O., was also a visitor to the local trade. He reported a satisfactory business and said that considerable trade was attracted to the store following a novel demonstration of the new dances that were presented in the show windows of the establishment. Some of the juvenile pupils of a local academy were secured who were glad to furnish their services at a reasonable cost.

Among a number of other prominent dealers who visited the Great Central Market recently were George H. Mee, of Faribault, Minn.; Mr. Siegler, of Foster's Picture Shop, Lafayette, Ind., and R. M. Rhodes, president of the Rhodes Furniture Co., of Memphis, Tenn.

R. A. Seager, manager of the Victrola department of Scruggs, Vandervoort & Barney, St. Louis, Mo., was a visitor to the local trade.

E. A. Moore, in charge of the piano and Victrola department of the Pelletier Co., Sioux City, Ia., was a visitor to Chicago recently.

A. G. Kunde, Milwaukee Columbia representative, was in Chicago for a short stay a few days ago.

R. L. Du Bois, assistant manager of The Phonograph Co., left shortly after the return of C. E. Goodwin on a two weeks trip to Green Bay, Wis.

F. A. Copeland, Edison dealer of Elgin, Ill., was a visitor to the offices of the Phonograph Co., as was also Charles Dahlen, of St. Charles, Ill.

A visiting Edison dealer of Chesterton, Ind., was J. B. Lundberg.

W. F. Standke, New Orleans manager of the Columbia Graphophone Co., visited the city recently. Mr. Standke reported that business in the Southern States was very good, with every prospect for a record-breaking fall.

Honeymooners Visit Us.

B. M. Buck and his bride, of Lansing, Mich., were visitors to Chicago recently. The Newlyweds were entertained by G. P. Ellis, of the Talking Machine Co., who informed us confidentially that while here the groom displayed much interest in the lady ice skaters at the College Inn, which almost caused a family row.

Open New Department.

C. I. Abelowitz has been appointed manager of the new Victrola department of A. Herg, Terre Haute, Ind., which concern operates the largest department store in that city. Mr. Abelowitz was in Chicago recently for the purpose of placing his initial order with the Talking Machine Co., and announced that he was opening a first class de-

**Dancing the Tango to Columbia Music on Street Car.**

He proposed and was accepted, but his endeavors to keep the news from the other members of the company did not meet with success, and Miss Frances Kennedy, singing comedienne and star of the show, invited the newly weds to a mysterious party to be given at Thirty-ninth street and Cottage Grove avenue, where the blushing bride and groom found Miss Kennedy and the other members of the company awaiting them at the car barns. The completed assemblage was hustled into a private Cottage Grove avenue car and the honeymoon was begun.

W. W. Parsons, local manager of the Dictaphone Co., and Mr. Winter, of the Columbia Grapho-

partment, equipped with new booths and furnished in the latest fashion. The opening of the department was set for the early part of this month.

Prophecies Big Fall Business.

W. C. Fuhri, district manager of the Columbia Graphophone Co., returned a short time ago from an enjoyable vacation spent at Pine Lake, Mich. Mr. Fuhri returned to find reports coming from all sections of the Middle West, indicating that this fall is to be a most favorable one to the talking machine trade.

C. F. Baer, local Columbia manager, also was most optimistic about prospects for the coming season, and upon returning from a trip through Iowa, said to The World: "Crops are in excellent shape in every part that I visited. Factories are starting up and business will be in full blast by early fall. Railroad companies are loosening up in their expenditures, and some of them are pushing construction and development work hard. From the present outlook I think that the coming fall will be a big one for us."

Mr. Baer added that while the war in Europe would injure this country greatly in some respects, it would also be the means of opening up old factories and perhaps permanently reviving some of

shortly after it started and took pictures of this remarkable elopement, which were later shown through the medium of the movie shows to over half a million people of Chicago. We are indebted to the "Herald Movies" for this clipping from their film.

Mr. Parsons and Mr. Winters are to be congratulated upon getting in on this, for they secured for their company some very desirable publicity and enjoyed a very pleasant time themselves.

"We experienced no trouble in operating the machine," said Mr. Parsons, "for the roadbed was good and, though the car swayed considerably at times, the 'Favorite' worked to perfection."

the industries that suffered from the reduced tariff.

Satisfactory L. & H. Business.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, tells The World that while business was quiet, as is the custom at this time of year, the month of July showed a very satisfactory business both in the wholesale and retail departments over the corresponding months of last year. Mr. Wiswell was greatly pleased with the convention held at Atlantic City, and spoke very highly of the entertainment given by the Victor Co. to the visiting jobbers.

Mr. Wiswell leaves shortly on a cruise through the Great Lakes, and will go as far as Buffalo. He will be accompanied by his wife and four children.

Almost all of the Lyon & Healy travelers are returning from their various vacations. E. P. Bliss, the Michigan traveler, returning from a trip to Jamaica; H. R. Smith, the Illinois traveler, returning from two weeks in the Catskills, where he said he discovered the man who paid the rent for Mrs. Rip Van Winkle, and J. B. Ryde, returning from Michigan. W. P. Roach, who handles

(Continued on page 40.)

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 39).

the Chicago business, enjoyed a vacation in Iowa. **Victor Lecturer Here.**

L. C. Case, lecturer of the educational department of the Victor Talking Machine Co., spent the past two weeks in Chicago. Mr. Case was busily engaged while here in demonstrating the educational value and instructive possibilities in all phases of musical work to a large number of summer school classes.

Roy J. Keith Had Great Vacation.

Bronzed with the sun and wind and looking the picture of good health, Roy J. Keith, sales manager of the Talking Machine Co., returned this week from what he characterized as the "best vacation I have ever had." And judging from the photographs that he brought back with him, it must have been a most enjoyable outing.

"We were away up on the northern—the Cana-

Keith with Prizes of Vacation.

dian—shore of Lake Superior, up where almost the only people that we saw were a few Indians and traders. Arriving at Michipicoten, four of us chartered a fishing tug which carried us to Michipicoten Island. Here we unpacked our outfits, and after enjoying the island for a while paddled to the shore of Superior, some twenty miles in. From this point we slowly worked our way back to Michipicoten, 125 miles away, fishing at the mouths of six rivers. We were in two canoes and did most of our paddling at night, when the breeze had died down. We hugged the shore pretty closely, for at times we ran into rough weather and on a few occasions we were unable to put out at all. We had some excellent luck fishing and caught some brook trout, such as those shown in the picture, that fairly melted in our mouths. This particular string averaged two pounds."

Western Pathéscope Business Increasing.

Francis Reno, Chicago representative of the Pathéscope Sales Co., 1306 Marquette building, reports to The World that the Continental wars will not interfere in the slightest with the conduct of their business and the supplying of dealers with stock. "We have very large stocks of both machines and films in this country," said Mr. Reno, "more than sufficient, I believe, to last us through the war. Films are manufactured by women in the big factory near Paris, and they have not been obliged to leave their work. Present indications are that steamships will be running again soon between France and this country, and this of

course brings matters back to normal. We are doing a very good business with talking machine dealers in this section, and already a large number of those who have taken on the line are coming back with reorders. The talking machine dealer is peculiarly adapted to handle our line and is rapidly finding it out."

Mr. Reno showed the Pathéscope and its uses to an admiring attendance at the recent Downers Grove (Ill.) Chautauqua. M. M. Blackman, of the talking machine department of Lyon & Healy, made the arrangements with Mr. Reno.

Talking Machine Travelers Return.

Traveling salesmen of the Talking Machine Co., of Chicago, are now, with one or two exceptions, back from their various outings. George Cheatle, traveling sales manager, and his wife, spent some time on a ranch at Folsom, Cal. Mr. Cheatle has once more resumed his travels on the sunny coast. D. C. Preston, Wisconsin traveler, and his bride have returned from a month's vacation spent at Clear Lake, Ia. E. L. Barker enjoyed his summer's rest at a Michigan summer resort. Mr. Barker travels in Illinois and Indiana. H. L. Flentye, city salesman, is at present at the sanitarium at Battle Creek, Mich., recovering from an illness that unfortunately attacked him just as he started on his vacation.

L. C. Parker, manager of the piano department of Gimbel Bros., is reported here to have left for Sturgeon Bay, Wis., where his father is ill.

Up in the Air.

The accompanying photograph shows the members of the Victrola department of the Stewart Dry Goods Co., of Louisville, Ky., as they were snapped while on the roof of the company's establishment one day not very long ago. The photograph shows only nine people, but in the busy months the force is increased to about fifteen. The department is under the management of L. M. Knickerbocker, who has at his disposal an excellent salesroom and a large record room. The salesroom is fitted with five sound-proof booths constructed of reinforced plate glass. The depart-

Members of Victrola Department Stewart Dry Goods Co.

ment was opened in June, 1913, and with the force of five people, was G. P. Ellis, who is now connected with the Talking Machine Co., Victor jobbers of Chicago. The department was successful from the first, Mr. Ellis instituting ideas which were the cause of an increased business from their

inception. Under the management of Mr. Knickerbocker the department has continued to expand, and at the present rate the coming fall season will necessitate a force much larger than the company has been obliged to use before.

"Summer Sales Ideas."

That is the title of a most efficient little symposium of ideas for the creation of summer sales that has been issued by the Talking Machine Co. under the direction of Sales Manager Roy J. Keith.

The booklet is made up of nine sheets, each sheet bringing out in detail some method of approaching prospective customers that can be well handled during the summer season. Typical letters are suggested, as well as supplementary and follow-up matter. The possibilities of hotels and summer resorts are particularly dwelt upon and methods for presenting demonstration dancing exhibitions are explained.

Big Chicago Industries Rumored.

There are numerous rumors in the trade that refuse to be downed anent the establishment in Chicago of two large factories for the production of talking machines. Both are said to be backed financially by large Western corporations who see big opportunities for handsome returns on some idle capital in this business. It is also stated on good authority that a plant for the manufacture of records is soon to be established here and that the machinery to be used in a new process of record making is already contracted for.

CONDITIONS IN CUBA

Are Generally Satisfactory, Says E. E. Robinson of the Export Department of the Columbia Co.—Robins & Co.'s Good Business.

E. E. Robinson, the well-known globe-trotting representative of the export department of the Columbia Graphophone Co., returned to New York this week after a month's trip to Cuba. Mr. Robinson was accompanied on this trip by Clyde Emerson, of the Columbia record laboratories, and a veteran of the talking machine industry:

"Business conditions in Cuba are generally satisfactory in view of the unsettled state of affairs throughout the world," said Mr. Robinson in a chat with The Review. "The sugar crop was unusually good, but the decline of the tobacco crop proved a disappointment to business men in Cuba. The outlook is encouraging, however, in practically all lines of business.

"Our representatives in Cuba, Frank G. Robins & Co., are closing an excellent business, both in machines and records. Their progressive and energetic sales methods and extensive advertising campaign are well calculated to produce far-reaching results. While in Cuba on this trip we secured quite a number of records by well-known artists and prominent orchestras."

The Columbia automatic stop. The most accurate automatic stop made and the easiest to operate.

Gun Metal, \$2.00 list. Nickel Plated, \$2.50 list. Gold Plated, \$3.00 list.

TERRITORIAL LINES FOR JOBBER AND DEALER.

An Interesting Presentation of an Important Subject by H. H. Blish, Secretary and Treasurer of Harger & Blish of Des Moines, Ia., and President of the Edison Disc Jobbers' Association—His Viewpoint of This Situation Is Both Helpful and Timely.

One of the greatest handicaps that the jobber has been working under in the past, in the mind of the writer, has been the difficulty in engaging the attention of firms of recognized standing as to the permanency of the proposition and the stability of the line. They point out, and with justice too, that anybody who can scrape up enough to buy three machines and 100 records can get into the game, only to find later on that

to spend whatever sum in reason, was necessary to get results. They want to feel that their investment is stable and that the risks now being run by reason of the kind of competition with which they have to contend, is done away with.

The jobbers territory should be prescribed in the same way, by placing a jobber in complete control of all the business within a prescribed field. He being on the ground, is in a far better posi-

local jobber or get out of the business, will see to it that his standing on the books is all that the credit man desires. The jobber, when he lines up the right sort of representation in his field, can afford to extend every bit of help financially within the range of his ability, as well as with the help that his salesmen can render, without feeling that just as soon as he has developed a customer worth while, he loses him to some other jobber through the personality, possibly, of some first-class salesman, and all of his days and nights spent in developing that dealer is lost.

If a jobber in automobiles wants to buy Ford cars, there is only one place to go. Same way for the jobber in buying Edison machines. Why not the same condition for the dealer. You may argue

that it doesn't seem fair or good business to ask a dealer to buy of a jobber if the service rendered is inadequate or if possibly the jobber may, at the time, be temporarily out of the goods desired. In this regard, I would put it up to the next nearest jobber to fill the order immediately, charging the jobber from whose territory the order came, the dealer's discount. He thereby secures the profit that he is entitled to by reason of his having the goods, and the jobber who first secured the order is penalized the profit by reason of his failure to supply the order promptly, and in addition carries the account. This, he should prefer doing, for it prevents a good customer from getting on another jobber's books, and keeps the credit standing of the dealer wholly within his hands.

To sum up, I would say that there are altogether too many small stocks

in the field and we can never interest capital to the extent that we should, until they can be given a definite and defined territory to work in, and be made to feel that in due time all the results of their efforts will revert to them and to them alone.

PARLOR PROVES ATTRACTION.

J. E. Crayton & Co., of Charlotte, N. C., who recently added to their line the new Edison diamond disc phonograph, have found it necessary to install a handsome parlor or hall for the entertainment of the music lovers of that city. It is proving a very popular attraction.

B. M. Harger, President.

Geo. C. Silzer, Vice-President.

Officers of the House of Harger & Blish, Des Moines, and Sioux City, Iowa, the enterprising Edison jobbers, whose business was founded in 1887, and incorporated in 1904.

H. H. Blish, Secretary and Treasurer.

the same degree of salesmanship must be used to dispose of them as is required of any other line of merchandise. The dealer by reason of his incompetency, loses interest and wants his money, which, more times than otherwise leads to price cutting on the side, and in doing so, completely discourages the good dealer who has spent freely of his time and money in placing the proposition on a safe and sane basis. In arguing the question recently with a large dealer who was spending in advertising, a large percentage of his earnings from that department, said "what inducement is there in it for me to carry the amount of money that I have in these goods and to continue doing so, working by day in demonstration at the store, and by night in the lodge, school room or home, only to find that by my activity, later on, I have excited the envy and cupidity of some competitor, who finds the field that I have been engaged in tilling, looking so good that when I should be harvesting the results of my labor, he steps in with an inconsequential purchase of three machines and shares with me the results of my effort." There is no question but that there is little incentive to first-class dealers carrying complete stocks unless this protection is afforded them.

I have, for a long time, advocated definite and positive territorial lines for both jobber and dealer as the best solution of this question. While this need not involve necessarily an exclusive sale proposition in the literal sense, he can be given to understand that no solicitation for business will be tolerated in his prescribed field. I would go even further than this and require that any dealer receiving an order from outside the territory allotted to him, should be required to split with the dealer from whose territory the order came. The Vose Piano Co., of Boston, has been working this plan for years, to the entire satisfaction of all concerned. The automobile industry absolutely prohibits a sale in outside territory under penalty of forfeiture of contract. While right in the family we have a precedent in the dictating machine department requiring all work done strictly within territorial lines. The carrying out of such a proposition would tend greatly to lessen the number of dealers and jobbers but would get men into the business who would feel justified in carrying large stocks and would stand ready and willing

tion than anyone else to decide as to the desirability of an applicant. By holding the jobber to a strict account of his territory for development, it is up to that jobber to either improve it or relinquish that field. Most important of all is the question of credits which would be entirely solved were territorial lines placed around the jobber, and, in this, the factory is as much a beneficiary as is the jobber.

We all know of the kind of trade that gets in to the limit with one jobber, then tries jobber number two and three, until each have credit tied up exceeding many times the dealer's ability to pay—then a settlement of 30 or 40 cents on the dollar. A dealer knowing that he must pay his

Woolworth Building, New York**

NEW QUARTERS IN DALLAS, TEX.

Southwestern Talking Machine Co. Occupying Handsome Home in Heart of Retail District.

Upon the occasion of his recent visit to the New York headquarters of the Columbia Graphophone Co. last month, Rafael Cabanas, president of the Mexican Phonograph Co., Genl. Mexico City, Mex., and the Southwestern Talking Ma-

chine Co., Dallas and El Paso, Texas, both exclusive Columbia distributors, gave an interesting account of the new home that the latter is now occupying in Dallas, its headquarters. Situated at 1011 Elm street, this new building is in the heart of the retail piano and talking machine district, and easily accessible to the best class of retail trade. The building runs clear back to Pacific street, where a railroad siding at the door

New Warerooms of the Southwestern Talking Machine Co., Dallas, Tex.

gives maximum shipping and freight efficiency. Before taking possession, the company constructed an entirely new exterior and interior, and as it now stands, the building is one of the show places of the Dallas retail district. There are three handsomely furnished demonstration booths on the main floor of the warerooms, and the walls are finished in green and gold with the ceiling in ivory and bur-lap wainscoting. The indirect system of lighting adds to the dignified appearance of the warerooms.

The new warerooms of the Southwestern Talking Machine Co. have been visited by many of the city's prominent artists, while the auditorium has already been the scene of several excellent concerts given by successful local clubs and societies. R. R. Souders is the capable manager of this company, while A. B. Giles, who directs the publicity and advertising has been an important factor in the company's pronounced success.

DEMONSTRATED EDISON DISC RECORD

(Special to The Talking Machine World.)

TOPEKA, KAN., August 4.—The Santa Fe Watch Co., Edison disc representative in this city, recently gave an unusual and successful demonstration of the Edison disc product before the Topeka Cooking School. A formal program of representative disc selections was arranged for the occasion, and at its close additional records were played for the edification of the audience, which was delighted with the tonal beauties of the Edison disc machine and records.

VICTROLA WITH THE ORGAN.

Charles H. Demorest gave a novel program on the organ in Tally's Broadway Theater in Los Angeles, recently in which the Victrola was used with organ accompaniment in Leoncavallo's arioso from "I Pagliacci," sung by Caruso, and in John McCormack's singing of Marshall's "I Hear You Calling Me."

PHILADELPHIANS ON THE SEA.

Talking Machine Men from Snellenberg & Co. the Guests of E. G. Evans, of C. Bruno & Son, Inc., on a Fishing Trip Outside Sandy Hook—Some Happenings of Interest.

R. B. Cope, E. W. Eisenhart, W. C. Stiver, Jr., and Wm. S. Irwin, of the talking machine department of N. Snellenberg & Co., Philadelphia, motored to New York recently, where they were the guests of E. G. Evans, of C. Bruno & Son, Inc., 353 Fourth avenue, New York, the musical merchandise jobbers.

With his usual hospitality, Mr. Evans invited the party to a fishing trip on his motor yacht, and with a "properly loaded" boat the party struck the sea just outside of Sandy Hook. A fair sea was running, so the story goes, and the semi-circular rail stunts of Bro. Cope would do justice to any acrobat of Barnum's circus, reliability and speed being the chief points of merit. But the other members were pulling in sea bass and fluke by the (thousands, hundreds)—take your choice as you read—in any event, totaling a very good score. Evans, it seems, has a special map of the fishing grounds.

The party got back to the landing successfully, and about 12 o'clock at night started to motor back to Philadelphia. In an hour they were caught by the big thunder and lightning storm, but this time they toured through the water without the use of "Mothersills."

INCORPORATED.

The Hutz Automatic Phonograph Co., of Brooklyn, N. Y., was incorporated this week with a capital stock of \$25,000 for the purpose of manufacturing and retailing musical instruments. Those interested are M. and H. Hutz, and H. T. Reeb.

AN ESSENTIAL HOME REQUISITE

Is the Dome Record Case Made by W. D. Andrews of Buffalo—Popular with Users.

One of the strong selling specialties in the talking machine trade is the Dome Record Case made by W. D. Andrews, Buffalo, N. Y. This case holds 20 records, accessible for instant use, and by following the index the owner can find just where each record is. Built strongly, with a nickel-plated metal support to keep records in position, its durability is unquestioned. Another feature is its lock, which enables the owner of a machine to keep valuable records from promiscuous use. Furnished in ten and twelve-inch record sizes.

As the trade knows, W. H. Andrews is a Victor jobber who prides himself upon his good service, not only from the stock standpoint but for facilities. He has thirteen lines of railroads and five express companies assisting him, as well as boat lines on the Great Lakes. One of his specialties is furnishing records in Dome Record Cases.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

Slack Season in the Gramophone Trade—War on the Continent Causes Concern—Unprofitable Trading in the Wholesale Field Brings About Chaotic Conditions—Co-operation Among Manufacturers Necessary—Performing Rights Society Has Its Troubles—German Manufacturers Revise Agreement—New Gramophone Introduced—Interesting Lists of Records Issued—His Master's Voice Co. Publicity—Larger Quarters for Reynolds—New Models for Blum Models—The Trade Situation in Germany—News of the Month.

(Special to The Talking Machine World.)

LONDON, E. C., August 6.—General business returns published recently go to show that the slack period is upon us, and it is not therefore surprising to receive adverse reports concerning gramophone trade conditions from even the chief centers of industry. Home affairs are quite satisfactory if one excepts the tendency of the Irish Home Rule impasse to disorganize trade, but the foreign outlook at the moment of writing is naturally causing some little concern to all seriously minded men. What the position will be when these lines appear in print one would be foolish to predict. The European situation is, nevertheless, by no means reassuring, though it is generally felt that things will so far adjust themselves as to dispel the war clouds which now darken the horizon.

In the retail field trade is not over healthy. Reports indicate that fair sales are resulting from the featuring of portable hornless instruments, but little trade is being done in other models. Manufacturers and wholesale houses are, however, quite busy in booking orders from dealers for the coming season's new models and quite a number of firms have already established stock rooms in the large towns. The activity is as yet mainly confined to travellers and the result of their efforts will be early apparent in increase of staffs and general speeding-up at the various factories.

A brief survey of the gramophone trade situation is, however, of unsatisfactory prospect from the viewpoint of its present internal chaotic state. Those who follow the trend of events foretell something in the nature of an upheaval within the near future. On the existing basis of unprofitable trading, in which not a few firms are unhappily engaged, matters cannot continue indefinitely. Since last September when the cheap record war commenced, the situation has developed perceptively in the only direction one could reasonably anticipate. The commercially unsound nature of this class of trade, quite apart from its destructive effect on the sales of higher-priced products, has, unfortunately, compelled three or four firms already to seek sanctuary in Carey street, the destination of all involved within the meshes of financial difficulty, or otherwise to seek oblivion by choice rather than jeopardize their credit. Party from necessity and other reasons arising from the effects of lowered record rates, the probability is that two or three more firms will close down before the season commences. Competition has its limits, although such an outcome is perhaps more the result of the price-war than competitive conditions, keen as they, undoubtedly, are. Again, the grouping of several continental manufacturers will exert a big influence on British record trade this season. Certain forces are at work across the channel, and it is known that preparations for a stronger onslaught on this market must soon crystallize into activity. In this regard some interesting announcements may shortly be expected.

Meantime, the worst attributes of sordid commerce continue to exercise sway, and handicapped by these elements of retardation the gramophone trade has to work out its salvation. Progress may be, in fact is, slow, for it is the lack of understanding, the setting up of false pride and the encouragement of isolated action that obscures the

light of common sense, and temporarily, at least, holds up that which must eventually develop from the present chaotic state—co-operation among manufacturers for the mutual protection of general interests, among which the most important is the regulation of prices. The trade must, ultimately, emerge triumphant, but far better an immediate reorganization of existing forces than a continuance of this financially exhausting and commercially detrimental policy.

Comments on Judicial Decision.

The subjoined comments on the judicial decision in the recent copyright case between Chappell & Co., Ltd., music publishers, etc., and the Columbia Graphophone Co., are from the Author newspaper, and will be perused with much interest:

"We do not claim to know the motives of Chappell & Co. in taking this action, but the effect of the judgment delivered will not, so far as we can see, be to help composers who are anxious that their works should be reproduced mechanically.

"In effect it amounts to this, that a composer may assign his mechanical instrument rights to the publisher, who may, if he chooses, make it almost impossible for the mechanical instrument trade to take up the work.

"The publisher—if the composer foolishly allows him to hold the copyright—has only to refuse to allow the reproducer to make the manuscript orchestral accompaniment which is necessary for the manufacture of the record.

"We believe that Chappell & Co. are now engaged in the manufacture and sale of contrivances for the mechanical reproduction of music, and if they have succeeded by this action in abolishing the competition of their rival, we hope that composers will be wise enough to see that they get for the transfer of their rights to Messrs. Chappell something much more substantial than the fees laid down in the act. These fees were fixed by the legislature as representing what—rightly or wrongly, we think wrongly—was regarded as a fair return from the mechanical instrument trade for the use of the composer's work. It must be remembered, however, that they were not fixed as a fair return for the exclusive use by any one firm."

The New Disc Recorder.

The new disc recorder which has been marketed here under the title of the Plantor Home Recorder is meeting with a phenomenal success, due as much to its simplicity as to the provision of flexible cardboard discs having a fine wax surface whereon to record, thereby eliminating the need of expensive blanks and shaving apparatus. The discs will take up to about one thousand words, and their cost is but 2s. 6d. per dozen. Leading wholesale houses now stock the Plantor device, and great interest is evinced in it by the trade generally.

Another Copyright Suit.

Another summons under the copyright act was heard at a London police court recently when Ray Duskwick, a gramophone dealer of Wardour street, London, had to answer to having unlawfully sold an infringing copy of "Across the Meadows," a work in which copyright exists. Evidence having been given by the composer, Percy S. Robinson, and Boosey & Co. that neither had given authority for a gramophone record to be taken of the work in question, defendant disclaimed knowledge that she was breaking the law, as she bought the records from a wholesale dealer in the ordinary way of business. The London agent of the Turmaline Record Co., Berlin, the makers of the record, said about last March he engaged Mr. Robinson to play this particular dance, and paid him for so doing. He understood that permission to make a record was then given. Royalty stamps had been purchased from Messrs. Boosey, but there was no stamp on the record in question. The magistrate imposed a penalty of 40s. with 10 guineas costs.

German Decision Upset.

After practically declaring the Eufon patent on hornless machines void, the German patent officials have had their decision upset by the German High Court. According to a contemporary the patent is of great importance.

Performing Rights Society Meets Opposition.

The recently established Performing Rights Society, of which I wrote last month, is meeting with considerable opposition from a number of influential publishers and composers, who take the view that as the popularity of their works is often dependent to a large extent upon their frequent performance all over the country, they should not attempt to place restrictions upon artists desirous of singing or playing the work.

It is further argued that as a form of advertisement the composer receives full value by means of royalties payable on sales, and to place a premium on this freely given publicity is obviously contrary to business ethics. The situation would seem to call for co-operation among artists with a view to the protection of their interests. I have received intimation from several large publishers condemning the incidence of this society and its objects, with the further advice that no charge will be made for the performance of any works they control. Some very interesting views upon this much debated society are given by eminent publishers and composers in a leading London newspaper which has devoted several columns to this purpose. The gist of the correspondence would seem to indicate that great divergence of opinion prevails in musical circles regarding the wisdom of charging artists for the public performance of copyright works. Comparison, too, is drawn between conditions in this country and particularly the continent, where sheet music sales are but a fraction of those in the United Kingdom. It is argued that the Performing Rights Society's legal right to make a charge for performance is quite outweighed by the publisher's (or composer's) dependence upon prominent artists to popularize works which in the majority of cases would otherwise not attain commercial value. It is surely against sound business principals, but opinion prevails in responsible quarters that the society will eventually win the battle now in operation.

Revision of German Convention Agreement.

As from July 1st when the convention came into force officially, dealers who have not or do not sign the agreement will be refused supplies of records made by convention manufacturers or sold wholesale by those factors who are signatory to the convention terms. A considerable body of retailers dissent from the principle of the scheme altogether, but for protective reasons have been persuaded to sign the agreement. Others of more independent spirit carry their opposition so far as an absolute refusal to participate in what they term a trust. Whether or not there is reasonable ground for this attitude time alone can determine, but the fact remains, rightly or wrongly, that many look upon the convention with great misgiving. Owing to the distrust and opposition which the manufacturers' proposals met with in retail circles, it became necessary to embody some important changes in the first agreement ratified by the convention. For instance the various German dealer's associations demanded the right and freedom to continue the sale of Pathé discs notwithstanding that Pathé Freres remain out of the convention. Permission to sell these records was therefore given to convention factors and dealers until July 1, 1915, providing that they maintain list prices. The time for disposal of stocks of non-convention records is extended from October to December 31, but no modification of the original arrangement regarding exchanges of worn-out records can be made. On the question of sell-

(Continued on page 44.)

FROM OUR LONDON HEADQUARTERS—(Continued from page 43).

ing records to the staff of convention firms, it is expressly laid down that manufacturers must not extend this usual privilege except in the month of December. The limit is twenty-five records, and this only on the understanding that such records bearing a "not for sale" label are for the purchasers' own use or for Xmas presents. It is further agreed that all fines for breaches of the convention agreement shall be disposed of by the German Talking Machine Dealers' Association, and after making other provision for arbitration in disputes, etc., the document embodying the foregoing modifications of the original proposals closes with a plea for co-operation on the part of the dealers' own society.

Various opinions obtained and published by the Phonographische Zeitschrift lead to the belief that among manufacturers at any rate the convention scheme finds favor.

On the retail sign the modified agreement it is said has met with the practical support and approval of about three-fifths of the trade. The final success of this German convention scheme has, naturally, awakened great interest among British gramophone traders, but so far the example has not materially encouraged our manufacturers to do likewise. There has been some talk about it, and in theory the convention plan is approved—for Germany!—but the time is considered inexpedient for any like attempt to be made in London.

New Gramophone Submitted.

A first model of an entirely new gramophone of the interior horn, or so-called hornless type, was recently submitted to my inspection, and a brief description of it will, I think, appeal to all those having the interests and progress of the gramophone industry at heart. It is the invention of W. D. Sternberg, of 19 City Road, London, and is well-named the "Sterno-phone." In outward appearance it very closely resembles that of an ordinary hornless instrument. One realizes the comparative difference upon examination. There is no open front or horn, the sound-amplifying chamber being situated at the back. Delivered

direct from the tone-arm into this chamber the sound passes upward and is deflected from the lid which acts as a sound-board. The tone is thus evenly distributed at the right angle in all directions. But perhaps the most ingenious feature of interest is an interior device by means of which the trouble of starting and stopping the instrument is embodied in one action. Pending acceptance of patents I am unable to describe this equipment in detail, saving what it accomplishes. To play a record one has only to insert the needle, the rest is done automatically by simply closing the lid. This operation brings the sound-box into the correct position and starts the motor revolving at full speed almost before the lid is quite closed down. When played through, the sound arm is lifted and the motor stopped by just opening the lid. That, in brief, conveys some idea—I admit, an inadequate one—of this undoubtedly novel, yet withal practical invention. A future occasion may furnish me with an opportunity of fully describing the Sterno-phone, which, I believe, it is Mr. Sternberg's intention to place on the market at an early date. Few have as yet seen this new gramophone, but those who speak of it as representing a decided advance both in construction and tonal qualities over that of its confrere.

Zonophone Records of Merit.

A goodly program of music just suitable for prevailing tastes is this month (August) offered by the British Zonophone Co., with whom Colonial dealers should get into touch. The list under mention embraces a wealth of good selections contributed by London's most popular instrumental and vocal artists—the Black Diamond Band, Sydney Coltham, Peter Dawson, Florrie Forde, and Harry Fay among others. Altogether, a list of undisputed merit!

Discusses Edison Disc Records.

At a recent meeting of the North London Talking Machine Society, the president, Henry Seymour, demonstrated some Edison disc records and ventured upon a description of their cut, material, and the process of manufacture. He

said the material, if not actually celluloid, was of a celluloid nature resembling that used in the Amberol record. The cut was 150 to the inch. He had tested the records under fair conditions and found they gave the best results under a reproducer of 2½ inches in diameter (using a diamond point) fitted to the arm of an ordinary gramophone at an angle of 45 degrees or thereabouts. Mr. Seymour spoke very highly of the quality of these records, which he said represented the dawn of a new era, and set a standard to which all manufacturers would be compelled to work. The records were afterward played through, and for three hours the members of the society, all enthusiasts, sat entranced. It was generally conceded that Mr. Edison had solved the problem of mechanical music, and absolutely eliminated all objections, which any one could hold against the gramophone. Altogether, it was a delighted audience (there were many prominent gramophone men present) which, finally, but very reluctantly, turned toward home.

Jack Johnson at the Recording Horn.

The boxing champion has created many records, and by means of a record, of another kind, tells the story of how he has been able to do it. Johnson is apparently fond of music, at least, if the many hours spent at the Edison Bell West End Depot listening to records is any criterion. It was on one of these occasions that he received an invitation from J. E. Hough to make what will perhaps prove a more permanent record than those of pugilistic renown. Taking advantage of an early opportunity, Johnson, in company with his wife, made a direct journey from Paris to the Edison Bell recording laboratory and duly accomplished the object of his visit. The record is, doubtless, by this time on sale.

Osborne Believes in Advertising.

Notwithstanding that this is the generally chosen period when dealers regard expenditure upon advertising as useless, Thos. Edens Osborne, of Belfast, continues to make attractive use of

FROM OUR LONDON HEADQUARTERS—(Continued from page 44).

local organs for the purpose of stimulating a wider appreciation of the gramophone as “a delightful relief from the monotony and quietude of life in the country.” This from Ulster is almost too good! Even rural life in Ireland one would have thought to be exciting, these days of political strife. Still, there is doubtless value in music that tends to soothe the savage breasts, only Mr. Osborne is too shy to admit it.

Joking apart, our Belfast friend is more than faithful in his belief in the value of publicity, especially under the circumstances which exist in Ireland to-day.

A Great August List.

An advance copy of the August “H. M. V.” list at hand, reveals a master mind at work in the choice selection of records itemized thereon. It is an aggregation of charming musical items, all of first-class merit, and sufficiently comprehensive to suit a variety of taste, be it gay or otherwise. This fine program commences with two 12-inch discs bearing Beethoven’s “Fifth Symphony”—Finale, Part III. and IV., which completes the set covering the whole of this magnificent and truly noble work. Mention should be made that the Berlin Philharmonic Orchestra under the baton of Herr Arthur Nikisch, is again responsible for a fine performance on both records. Among violinists of the fair sex, the pre-eminence of Miss Marie Hall is, if anything, enhanced by a piece of splendid bowing in her rendition of “Canzonetta, op. 6” (d’Ambrosio), which, as a solo, ranks among the best yet issued on record. A humorous number in the vocal section is “Souvenirs,” composed and rendered by Tom Clare, and those who favor concert parties will enjoy the “Great-Grandmamma” record by the Crampton Party. There is also the Minster Singers in a medley of “Sea Songs,” and the Light Opera Company who present some gems from “The Night Bird.” The ballad section is throughout good, and the full list coupled with that of the double-sided selections (omitting titles mentioned above) is as follows:

Twelve-inch, double-sided—“Sizihetta,” serenade (Von Blon), and “Turkish Idyll” (S. V. Hays), Band of H. M. Coldstream Guards; “Peg o’ My Heart,” one-step or turkey trot (Fischer), and “Horse Trot,” one-step or turkey trot (Davies), Metropolitan Band; “Two Little Dances, a la Minuctte, a la Gavotti” (Finck), and “Valse Joyeuse” (Finck), Mayfair Orchestra; “A Tango Dream” (Maxwell), and “Smiles, Then Kisses,” valse (Ancliffe), Jacobs and his Trocadero Orchestra.

Ten-inch, double-sided.—“Colonel Bogey,” march (Alford), and “Youth and Vigor,” march (Lantenschlager), Band of H. M. Coldstream Guards.

Twelve-inch, single-sided.—“Speak” (Tosti), Hubert Eisdell, tenor; “Spring’s Awakening” (Sanderson), Miss Evelyn Harding, soprano; “Somber Woods” (Lully, Arr. by A. L.), Robert Radford, bass; “Joe, the Gipsy” (Batten), Harry Dearth, bass.

Ten-inch, single-sided.—“Genevieve” (Tucker), John McCormack, tenor; “Das Wandern” (Schubert), Sir George Henschel, bass; “Just,” (Bradford), Miss Alice Lakin, contralto; “Our Land of Dreams” (Thompson), Miss Gertie Dickeson, soprano.

Some Striking Publicity.

In accordance with a prearranged plan of campaign for the summer months, His Master’s Voice Co. lead the way in regards to newspaper publicity, some striking full page and half double-column spaces having been taken recently in the chief organs of the press. I have it on good authority that the result is highly satisfactory, sales this last month or so when, be it noted, even general business eases up, proving that this expenditure is well justified. The company’s agents have enjoyed the full benefit of the scheme, for inquiries are, as usual, tabulated and passed on to the dealer or dealers from whose locality they emanate.

New Companies Incorporated.

Diamond Disc Record Co., Ltd. Capital, £200. Office: 81 City Road, London, E. C.

National Gramophone Co. (1914) Ltd., trust deed to secure £6,000 third debenture stock, charged on certain inventions and patents and the company’s undertaking and property, present and future, including uncalled capital, subject to first mortgage debentures and such second debenture stock outstanding. Trustees: J. V. E. Taylor, 41 King William street, Strand, W. C., and F. Adler, Throgmorton street, London, E. C.

The Man of Many Parts.

W. H. Reynolds, of above fame, announces that expansion of business compels larger premises. He has, therefore, removed from Great Eastern street, and Hinton road, to a centralized warehouse at 45 City road, London, until lately in occupation by The Favorite Record Co. In conversation with the writer, Mr. Reynolds made the claim that he now stocks over one thousand parts and accessories for different makes of instruments.

An interesting reference to the time, not far ahead, when wireless telephony for commercial purposes will be possible, is made in the report presented by the directors of the Marconi Co. at the annual meeting. Rapid progress, says the board, has been made in the development of wireless telephone apparatus, and the company has recently introduced a practical and commercial set for moderate distances. Further important developments are proceeding, and it is contemplated that apparatus will shortly be available for the transmission of speech over considerable distances. Signor Marconi himself states that he expects to be able to telephone by wireless to New York before the end of the year.

A Remarkable Age.

To be sure this is a marvellous age. Commercial enterprise and science have contributed to the establishment of a complete wireless installation on a traveler’s motor van, enabling him to communicate immediately at any time of the day with his firm—the Ardath Tobacco Co., of London. The equipment has a radius of twenty miles. The method adopted for completing the

FROM OUR LONDON HEADQUARTERS—(Continued from page 46).

circuit and making "an earth" is by dropping a metal chain on to metallic manholes, on drains, or by trailing the chain in water. Wonderful!

Trade Conditions in Germany.

Some indication of trade conditions in Germany is found in the fact that one of the principal record companies, i. e., the Kalliope Aktiengesellschaft made a loss of over one million marks on last year's trading. The actual amount is given as 1,051,852 marks. This is very obviously a most serious matter, especially having in mind that the company's capital is but 1,470,000 marks. An affiliated concern, the Anker Phonogram Co., has paid its way and will continue trading, although it is a heavy creditor of the Kalliope firm. At the moment of writing it has been decided that both concerns shall continue trading subject to the voting result of the creditors who will meet to discuss the pros and cons fully.

The Linguaphone System.

The gramophone as an aid to the study of foreign tongues is being brought into prominence by Blum & Co., Ltd., 220 Old street, London, E. C., who have issued a series of French and German records on what is known as the Linguaphone System. This is a simplified method whereby with the aid of specially prepared text-books the student is able to follow the words and sentences on the record and repeat them frequently until perfect pronunciation is assured.

Announce New Models.

Blum & Co.'s new gramophone models for the coming season have now been submitted to the leading factors and we understand they have been much approved and are considered to be a distinct advance in construction. The cases and tone arms are of new design and said to be practically frictionless. The motors have been brought right up-to-date and brass to brass small gears have been entirely eliminated. Messrs. Blum state they are using their unbreakable springs which gave such unqualified satisfaction last season. These springs are made of French steel and tempered by a new process. They cost twice as much as ordinary springs, but that is counterbalanced by the confidence which their use inspires in the dealer and customer.

Messrs. Blum's hornless machines are all of new design, and although some of them sell to the factor at less than \$3, they give a loud, clear and resonant reproduction. They are turning out over 70,000 of these small hornless machines for one house abroad. Messrs. Blum say, "Give us quantities and we will figure with any house in the trade."

Over a Hundred Melodies in Medley Form.

Two of the most interesting records of the season give the presentation by Columbia of a new copyright arrangement of over a hundred melodies, under the name of "Tangled Tunes." The tunes so tangled, include classical, operatic and popular excerpts, strung together in irresistibly fascinating, and in many cases, amusing sequence. Thus, we have the first part opening with "Rule, Britannia," dropped straight into "Three Blind

Mice," which again breaks into "The Mistletoe Bough," and so on, every melody being distinct and easily recognizable—a clever collection arranged by Albert W. Ketelbey.

To make these records of additional interest, the list of melodies so introduced has been rearranged in alphabetical order instead of in the sequence in which they occur in the records. This has been done for two reasons—one to provide the purchasers with the novel and interesting task of testing their knowledge of music by arranging them in their proper order, the other to afford an opportunity for a novel prize competition.

For this latter purpose, too, twelve of the most familiar airs in the records have been omitted from the printed list—three from each of the four parts—so that the hearer of the records has the additional task of supplying the omissions. This, however, is easy, for the airs so omitted are, we are informed, as well known as "God Save the King."

The Columbia Co. announces the first recordings this month of Miss Rosini Buckmann, soprano of the grand opera season at Covent Garden. Her representation includes the "Black Bird" and the "Fairy Pipers." Other records of interest are the Barcarolle from "The Tales of Hoffmann" as a duet, sung by Andrea de Segurolla, basso, and Mme. de Pasquali, soprano; the waltz song from the musical play, "Adele," which is issued as a 10-inch Columbia Rena record, and the musical hits from the play to be had in a 12-inch record in the same list.

"Queen of the Movies," one-step and the two vocal numbers, "In the Night" and "Oh, Cecilia," are also proving big sellers. Will Oakland, the well-known counter-tenor is back on the Columbia list this month and his singing of "The Lass From County Mayo" and "You Can't Make Me Stop Loving You" made a Columbia Rena record of great merit.

A great Wagnerian soprano in one of the greatest of all Wagnerian roles—that is a fitting description of the new record by O'ive Fremstad issued in the Columbia grand opera series this month. A continuous demand for more excerpts from her heroic Wagnerian roles has induced Mme. Fremstad to record the beautiful "Liebestod" from "Tristan and Isolde" an opera which this artist has made peculiarly her own. With this superb number has been combined Verdi's famous old aria, the one surviving air from "Don Carlos."

JAKE GRAHAM "AT THE OLD STAND"

In Business Harness After a Remarkable Trip Around the World—Tells of the Extent of His Travels Which Have Been the Subject of Much Comment in the Liverpool Papers.

(Special to The Talking Machine World.)

LIVERPOOL, ENG., August 3.—Jake Graham, the prominent gramophone man, of 74-76 Renshaw street, who has just returned home after a trip around the world, has been interviewed and

"written up" by the newspaper men in the local papers at considerable length, who have found in him a veritable mine of information. In the course of a chat with The World representative he said:

"I arrived home after my wanderings and wonderings in strange countries, which commenced at Southampton just over twelve months ago; New York, my first stop, where I got in touch with the heads of our trade, also visiting the Victor, Columbia and Edison factories, and getting information first hand, which will be of great benefit to me. Now I've returned to manage my business here. I've got my back to the wall and the old flag will fly higher than ever, though, I must say, I'd love to return to America (somewhere warm) and handle the talker, because I see enormous possibilities your way that don't and cannot exist here.

"After spending about two months in New York and district I went right through the States to the New York of the West, 'Seattle,' stopping and visiting on my way, Niagara, Buffalo, Chicago, St. Paul, Yellowstone Park, etc. After doing Seattle, a place where the natives seem to have heaps of energy and everything was very prosperous, I went on to Victoria, which was typically English; then on to Vancouver, where I made great chums and friends, especially with Mr. Switzer, of Fletcher Bros., who treated me like a brother. Then on to my goal, Honolulu, where I stayed for nearly seven months, and where I had many interesting experiences, one in which I nearly lost my life, being lost up the mountains (having to make my bed up a tree), but which ended (much of my experience as an athlete) eventually in my getting out of the terrible fix I was in. Then I went on to the Fiji Islands, Suva being most interesting to me, and on to New Zealand (Auckland), then on to Sydney, Melbourne, Adelaide, Fremantle. I then journeyed to Ceylon (Colombo), Aden (Oh, what a gray, dry spot it is); Suez, on through the canal to Port Said, to Messina, Marseilles, Gibraltar, Tangiers, and on to Plymouth for London, to visit my friends in the trade; and on to Liverpool to tackle my business again, where I'm sure my customers are jolly pleased to see me. Things have improved since my return, and I'm looking forward to the biggest season (so called, no need to be a season trade) in the history of my affairs, and for the trade generally."

During his visit to New Zealand Mr. Graham met his brother, who is connected with a large piano house in that city. Needless to say, the meeting was a joyful one.

Many queer expressions of praise for the talking machine reach the dealer. "Since we got our Victrola I find the children awake when I get home and dinner is usually late," is a testimonial received from a New York manufacturer.

Perhaps more men would go to church if they had to sneak in through a side door.

"RENO, THE MAN OF MANY PARTS"

"The *only* man in the world who can supply you with *one* part—or *any number* of parts for *any* Talking machine *ever* made from Adam to Edison."—Roosevelt.

WHO SAID TEXAS WAS NOT RIGHT UP TO DATE?

Proof Adduced That It Is in the Enterprise Manifested by the Gunst Piano Co.'s Exploitation of the Victrola and Public Display of Dancing Which Interested Thousands.

(Special to The Talking Machine World.)

CORPUS CHRISTI, TEX., August 3.—New Yorkers must not get away with the idea that Texas is not up to date. Thanks to the Victrola, this State is keeping quite in line with terpsichorean developments, and this was forcefully and pleasingly

parade the float was stopped at the street crossings, the latest dances on the Victrola started and an exhibit given of the latest dances for the edification and education of the crowds looking on, thus demonstrating the fitness of the Victrola for dance purposes. Needless to say, the float attracted

Public Exhibit of Dancing to Music of the Victor.

demonstrated in the display made by the Gunst Piano Co. during the Fourth of July celebration in this city.

As may be seen from the illustration, the Victrola was used on the float, and two professional dancers engaged for the occasion. During the

NEW PLAN FOR DISC DISTRIBUTION.

Thos. A. Edison, Inc., Announces New Plan for Distributing Disc Records Which Has Many Merits That Will Appeal to the Trade.

Thomas A. Edison, Inc., announced to its trade this week a new plan for the distribution of Edison disc records which should prove considerably superior to the present plan of distribution. This plan was submitted some time ago to Thomas A. Edison, Inc., by the executive committee of the Edison Disc Jobbers' Association, who gave the company every assurance of the jobbers' and deal-

ers' co-operation if the plan is accepted by the company.

As formally announced by the company, the new plan presents the following important points: "We discontinue at once the present method of infrequently listing records in supplements. Instead, we shall begin to manufacture and ship weekly supplements of six records. The records will be numbered in the usual way.

"Under the new plan there will be no constant and universal date on which the records are to go on sale. Instead, an entirely new arrangement has been adopted by which the supplements are to be

released for sale by States. This is the way of it; when each jobber receives his shipment he immediately wires to the factory a notice of the fact. When all jobbers doing substantial business in any one State have been heard from, the date for mailing supplements and placing the records on sale in that State will be wired by factory to each of such jobbers. In this way the factory, as far as possible, will endeavor to prevent encroachments upon territory and unfair advantage being taken by one jobber of another. When the jobber fills the dealer's weekly supplement order for new disc records he will invariably accompany the same with a communication containing the following: 'The date on which Thomas A. Edison, Inc., authorized these records to go on sale in the State of _____ is _____ (here date will be inserted). They must not be displayed, demonstrated, offered for sale or sold before 8 a. m. of that day.'

"Dealers will be required to observe this strictly.

"It is understood that the factory is not to be held to a hard and fast obligation to continue to supply six new records each week. It may sometimes be necessary to run over, say, ten days or more in getting out a particular supplement of six records, but the weekly schedule will be resumed in such instances as soon as possible."

The company states further that there are many advantages incidental to the new plan of distribution, most important of which are the following:

"It insures an immediate and continuous flow of absolutely new records and in satisfactory quantities with which to attract the interest of the prospective customer and retain the good will and invaluable 'boost' of the old. The listing of a new record practically every day is a strong talking point. The weekly lists of new records give the dealers a great opening for newspaper advertising and show window placarding.

"It contributes to the rapid building of a representative catalog.

"It enables the factory to list timely, popular selections and place them in the hands of the trade when the wave of their popularity is on the rise. Fully two months' time will be gained in this way, and no jobber will receive an advantage over another, as is the case under the present scheme, where a selection may have lost its popularity in some sections of the country by the time it is listed—although still popular in other sections.

"It does not confine the factory to an announced, cataloged supplement, in manufacturing which unforeseen delays may present themselves to the common disadvantage of all concerned.

"It makes it possible for the factory to incorporate in a weekly supplement selections that have taken on a new spurt of popularity or on which the demand has greatly exceeded the original orders; as also may selections that we have been unable to supply and that are now temporarily withdrawn."

TAXING COMMERCIAL TRAVELERS.
Taxes Imposed by South American Countries on Traveling Men Are Far from Being Prohibitive to the Average Exporter.

Taxes imposed by South American countries on commercial travelers are far from being prohibitive to the average exporter. While various license fees are prescribed by law in those countries, their purpose, as explained in a report just issued by the Bureau of Foreign and Domestic Commerce of the Department of Commerce, is chiefly to prevent unfair competition with local concerns, which are themselves subject to similar taxes. By associating himself with some local house, the traveler may obtain exemption from all but a few of the more moderate taxes. The rates of license fees and the conditions under which samples may be temporarily admitted free of duty in practically all the countries of South America are shown in the report, entitled "Commercial Travelers and Samples in South America" (Tariff Series No. 19A), copies of which may be purchased for five cents each from the Superintendent of Documents, Government Printing Office.

PLAYING THAT FIRST RECORD.

Find the One Piece of Music That Means More to Your Prospect Than Any Other and the Deal Will Be Made Then and There.

When you have a Victor or Victrola prospect up to the point when he wants to hear the instrument, let him choose the first record you play; in fact, make him choose it. To come "pretty close" is not coming close enough.

Music is a curious thing. It makes a more direct appeal to the emotions than any other thing in the world. The tremendous descending chords of the Chopin funeral march bring home the poignancy of death more vividly than any other element in the most impressive funeral service. The vivacity of a well-written, well-played piece of rag-time will tickle the feet and good humor of the most inveterate grouch. Not literature, not art, not even the breezy clatter of a sympathetic friend, can so subtly and so swiftly lift us from one condition of mind to another. If you doubt it play "Dixie," and then for contrast sake play the "Unfinished Symphony," and you will realize that the music itself can make a much more powerful appeal than the most skilfully chosen phrases at your command.

There is always some one favorite piece—some musical composition which is laden with association either grave or gay for every single individual except the few, the very few persons who are tone deaf, says "The Voice of the Victor."

That is a point which no good salesman should overlook. Take a little time or a lot of time, but keep at it as diplomatically as you know how, and don't play anything for that customer until you are sure the thing you are to play means something to him.

A very frequent mistake and a very natural one is to play the things which appeal to you. Don't do it. Carry a list in your mind which has little or nothing to do with your own musical taste, but which contains the best known things from hymn tunes to symphonies, and make your customer choose for himself.

He is likely enough to say, "Yes, play that!" by the time you have suggested half a dozen, but if you watch him closely you will find that he says it in a perfunctory sort of way. Keep on suggesting. Before you get very far you will see his eyes brighten at the name of some record. Eagerness will take the place of casual interest. It will show in his eyes, in the tone of his voice and his quickened gestures. Then you have it. Play that record and see that there is no interruption. If you are in a demonstrating booth, use a half-tone needle. It will be easy enough to show him later, how much volume can be developed, but for that first playing sacrifice everything to smoothness and melody. Usually it is a mistake to use a big needle in the restricted space of a demonstrating booth.

The selection may be a hymn tune, a band piece, a violin solo, a dance, an opera number, a symphony, or what not. That is unimportant, if, for a few moments you give that man a glimpse of half-forgotten joys or sorrows, for, as a writer in *The Voice of The Victor* says, in those few moments the Victrola will have been changed by the swift alchemy of imagination from a merely beautiful piece of cabinet work to the essence of things hoped for in the past or dreamed of in the future.

EDISON FIELD DAY ENJOYED

By the Employes and Officials of Thos. A. Edison, Inc.—More Than 2,500 Present—Thos. A. Edison Honorary Referee.

Thomas A. Edison and a group of the officials of his several manufacturing interests directed the sports and games attendant to Edison Field Day, which was held recently at Olympic Park, Irvington, N. J., a suburb of Newark, N. J. This day is a banner one for the employes of the Edison plants, and the attendance this year was a record-breaker, more than 2,500 persons being present. The invited guests embraced employes from the Edison factories at Orange, N. J.; Silver Lake, N. J.; those of the Edison Bronx Studio, and of the Edison Portland Cement Co., Stewartsville, N. J.

Mr. Edison acted as honorary referee at the many hotly contested games and pitched the first ball in the Edison league baseball game, which was won by the Edison Bronx Studio from the office employes of the Orange factory by a score of 10 to 7.

One of the added attractions to the meet was a trotting race between horses driven by C. H. Wilson, vice-president and general manager of the Edison interests, and William Maxwell, second vice-president. Mr. Wilson won the last two heats after a close finish.

DOUBLE-DISC RECORD CATALOG.

The Semi-Annual Catalog Issued by the Columbia Graphophone Co. Is Imposing in Size and in the Character of Its Contents—Admirably Produced Typographically.

The Columbia Graphophone Co. has just issued its regular semi-annual double disc record catalog, which is considerably bulkier than the preceding edition and contains 464 pages. There are 1,720 double disc records listed, which, together with a few single discs, give a total of about 3,500 musical selections in the new Columbia book.

A number of new artists are presented in this catalog, a few of the most important ones being Maggie Teyte, Miss Margaret Woodrow Wilson, Oscar Seagle, Charles Clark and Louis Kreidler. These artists had not recorded any selections prior to their engagements with the Columbia Co.

The indexing and cross-indexing is simpler and more complete than ever before. A number of minor improvements are embodied in the indexing arrangements, conducing to the maximum convenience of the dealers and their patrons. Apart from the actual list of titles there is considerable information concerning artists and composers that is well worth the attention of users of the book. It is well printed on good paper and strongly bound together.

Never be so well satisfied with your work that you can't see how it might be improved.

An Added Line That Will Make You Money

The H. P. Nelson Small Grand

The talking machine dealer can carry a small stock of pianos to the greatest advantage because he is the possessor of certain natural facilities that, of themselves, bring him sales.

The profits on a piano sale are large. The expense of carrying a few instruments is almost negligible and their sales come oftener than you, perhaps, think.

Our line of uprights, players and grands is especially adaptable to the wants of the talking machine dealer who to a certain extent relies upon the instrument to sell itself. We have built up a tremendous business upon our policy of giving the greatest return for the least money and the value of our products is so apparent that even those least acquainted with pianos are instantly aware of their worth.

TRADE CONDITIONS IN BALTIMORE.

Satisfactory Reports Made by Talking Machine Dealers—Showing for Past Month Above Average—Vacations Much in Evidence at Principal Houses—News of Month.

(Special to The Talking Machine World.)

BALTIMORE, Md., August 8.—While the warm weather and other matters that have held the center of the public attention during July have naturally had the effect of cutting down the volume of business done in that month as compared with previous months, the showings made by the various dealers as a whole were very satisfactory to all concerned. The month as a whole showed up better than July of 1913, and the dealers are very confident that the war or no other cause is going to have any bad effect on the trade during the coming fall and winter. They are still mapping out plans to break all previous records.

Manager S. A. Dennison, of the local branch store of the Columbia Graphophone Co., has returned from Rehobeth Beach, Del., where he spent a most delightful vacation. Mr. Dennison reports a number of good sales of machines and records during July, including higher priced machines.

Manager W. C. Roberts, of the E. F. Droop & Sons Co., has gone to Atlantic City for two weeks after closing out a very satisfactory July with the Victor and Edison machines and records. A number of Victrolas were disposed of during the month, while demands for high priced records came in very strong.

Joseph Fink, proprietor of the Fink Phonograph Co., reports a very substantial month with the Victor and Columbia lines. Mr. Fink is preparing to spend his vacation at Atlantic City for a rest in order to tune up for the coming fall and winter campaign.

The Victor line also went off well at the store of H. R. Eisenbrandt, which handles this line. The sales were rather substantial for July and high priced records were very much sought after.

At the store of the Sanders & Stayman Co., Inc., it was reported that the Columbia and Victor lines came in for their shares of the profits during July and indications are for a fine fall and winter trade. Manager Holmes, who has charge of the piano and talking machine departments for Gom-

precht & Benesch, reports a good business for July with the Victor line, which the firm handles. Prospects also point to a good demand all during the fall and winter.

Some ad writers put so much "punch" in their copy that the Reader is knocked out.

Make your show windows work.

A PROFITABLE SIDE-LINE.

One of the side lines with which many talking machine dealers are making money are Icy-Hot bottles, made by the Icy-Hot Bottle Co., 122 West Second street, Cincinnati, O. A new catalog of these bottles has just been issued, which illustrates and describes the complete line of bottles, pitchers, carafes and other styles made by the company, giving a comprehensive idea as to the scope of these products. Icy-Hot bottles are guaranteed to keep water steaming hot for twenty-four hours or icy cold three days, regardless of outside temperature, and talking machine men give them a leading position under the heading of "valuable side lines," for they are sellers.

PROF. DE CHAUVENET PRAISES DISC.

Having recently heard the "Overture from Mignon" on the new Edison disc phonograph, I became so enthusiastic over the perfection of the music that I cannot refrain from writing the actual fact that the record was clearer and more vividly realistic to me than an actual rendition which I chanced to hear at the Opera Comique at Paris last September. I wish the Edison disc continued appreciation for its grand work.—Paul De Chauvenet, dean of the De Chauvenet Conservatory of Music, Los Angeles, Cal.

THE BUSINESS BUILDING POSSIBILITIES OF A RAINY DAY.

Some Pertinent Comments Which Demonstrate the Fact That Even Stormy Weather May Be Turned to Good Account by the Progressive Talking Machine Dealer—Some Hints in This Connection That May Prove Valuable and Stimulating.

I know a talker man who has added greatly to his list of customers by specializing along the lines of rainy day concerts. He tells me that the more tempestuous the weather, the better the results, and that he has actually reached the stage where he prays for a storm. What do you know about that? His methods of straining dollars from rain drops are somewhat unique, and I'm going to tell you about them: He gathers together a catalog of hotels, cottages and private homes at some resort not too far distant from his city embodying the names of owners and regular guests. When a stormy day comes along during the vacation season he sends out his salesmen laden with talking machines and a very carefully selected repertoire of records. These salesmen are particularly well trained in their profession—they are artists, diplomats and gentlemen.

Now, Mr. Dealer, accompany me for a few moments, if you will be so kind, to a stuffy hotel exchange, or, if you'd rather, out upon a crowded cottage veranda, with nothing on earth to do but listen to the monotonous patter of the rain and say unkind things concerning the beastly elements. A very rotten environment, is it not? However, upon this particular occasion, just as we have reached the superlative degree of gloom, and are about to get in touch with the clerk regarding the next train to town, we descry a mackintosh figure swaggering up the drive in company with two carrying cases and a sunny smile. We scent a change for the better and, temporarily at least, withhold our requests for timetables.

He enters into our midst with a buoyant stride and bearing the best of news, to wit: He has been sent to us to stamp out the prevailing epidemic of blues with good music. There follows a perfectly delightful talking machine concert which proves so entertaining that all thoughts of the deluge without are cast aside, and for two enchanting hours we bask in the sunshine of the world's best humor and melody. At the end of the concert everyone is in a most receptive mood, of course, and the gentleman, who has been so very kind to us, takes advantage of this fact to pass around his literature, at the same time giving us a concise and interesting lecture upon the advantages to be derived from owning a good talker outfit. He then proceeds to book orders and, believe me, he books them, too. My friend, the dealer, assures me that as a business building proposition the rainy day concert at the summer hotel is eminently successful.

I will not dwell upon the tango craze, except to remark that if at the end of an entertainment the audience expresses a wish to indulge in the hesitation, trot or one-step, the operator should be in a position, not only to play the correct music for the various steps, but to fill the role of dancing master as well. If your salesman can introduce a new clutch or dip while among the dance-mad folk

at the summer resort, he will at once become the most popular man about the place, and that means orders, does it not? If you do not believe that this is true, just ask a sweet young debutante, summering at Hainesport-on-the-Rancocas, if she has danced the camel amble, and if she hasn't behold her face ablaze with the flame of desire, and listen attentively while she pleads with you to teach her. You can take it from me that the dispenser of talking machines who is also a good tango instructor will prove himself a "bear" at any place where people with leisure on their hands congregate in the good old summertime.

This dealer friend of mine carries his rainy day campaign into the homes of his would-be cus-

Shopping on a Rainy Day.

tomers also. He achieves success somewhat as follows: When a regular customer—we will call him Smith—drops in to purchase new records, or to ask advice upon some subject relating to talking machines, the dealer asks for the names of Smith's friends who have talkers, and also of those who have not, but who have expressed themselves as pleased with concerts they have heard at Smith's home. This accomplished, when a nice wet day comes along, Smith's acquaintances are called upon by a courteous salesman who makes himself very agreeable, playing records, making notes of the selections that are liked best, for future reference, and probably giving a few dancing lessons.

This salesman makes it plainly understood at the outset that there will be no obligation to purchase connected with his visit, explaining that the house he represents has inaugurated a series of sunshine concerts for rainy days. He explains further that it is the idea of his firm to banish gloom and to advertise its wares simultaneously. This little preaching gives the impression that there is a good opportunity, absolutely devoid of strings, to get something for nothing, and they snap at it like a famished trout at a fly.

Having gained the undivided attention of his hearers, he carries through the same sort of program as described previously in this article, making a pronounced hit and obtaining many prospects and some orders.

In his store, too, this dealer pushes the rainy day concert idea to the limit. He tells the public through the medium of an appropriate and carefully thought out window display how cozy his store is while the storm beats down outside, and that for everyone who calls will be played records positively guaranteed to bring sunshine into the heart despite the inclement weather.

There are hundreds of records, Mr. Dealer, particularly well adapted to rainy day rendition. Such artists as Harry Lauder, Cal. Stewart, Steve Porter, Collins & Harlan, Golden & Hughes and a horde of others have the ability to make one forget everything, but how to laugh uproariously. Hence these are the fellows to introduce to the folks who come to see you when the spray flies against the windows, when the pavements are aglitter with moisture, and the gutters are running brooks.

When the public gets to hear of the place that makes a specialty of rainy day concerts it will take advantage of the opportunity to spend a pleasant hour. Bad weather has a tendency to breed pessimism, and if a chap feels blue as well as wet, he is in pretty bad shape. When he finds that by a visit to your cheer factory he can receive a free injection of optimism for the asking, he'll come all right, and eventually he will take a talking machine outfit away with him, too; you see if he don't. He'll want to be optimistic at home as well as abroad, and a talker with a few really funny records is the greatest antidote for gloom that ever happened. Would you believe it? I have been in talking machine shops on rainy days when everyone from the boss down to the errand boy was grouchy to a terrible extent. If you asked them about it they would answer in surly fashion: "This d— weather's killing business." As a matter of fact, I had an experience similar to the above just the other day in the good old Quaker town of Philadelphia. I told them to cheer up and read the August World, hinting that they might find a cure for their malady within its covers. Here's hoping that this article may help some.

Candidly, now, Mr. Dealer, do you not think there is something in the idea of rainy day concerts? Have you not found that business is practically at a standstill when the weather is bad? Of course, you have, and the remedy is before you. Make your store attractive and home-like, speak about it to the people through your advertising and your window, inviting them to come and listen to some sunshine records 'til the clouds roll by. You will find that they will be only too glad to avail themselves of your courteous invitation. If they come once and enjoy themselves sufficiently, it is a cinch they'll come again; yes, and bring others with them, which means for you a steadily increasing business—but why continue; I've said enough. Let it rain!

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., August 8.—TALKING MACHINE.—Thomas H. Macdonald, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 1,099,928.

The object of this invention is to produce a so-called "hornless" talking machine, or machine with inclosed horn. More particularly, the invention consists of the compact and efficient arrangement

of the various parts without sacrificing the efficiency of the machine or the quality of its reproduction of sounds.

In the drawings Fig. 1 is a vertical section taken longitudinally through the middle of the sound conveyor or "horn." Fig. 2 is a plan view of the machine, with the motor and the cover or lid of the cabinet removed, and Fig. 3 is a front elevation partly broken away.

DICTIONATION GRAPHOPHONE.—Thomas H. Macdonald, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 1,100,024.

This invention relates to talking machines employed for dictation purposes, where both a recorder and a reproducer are required, and where it is also desirable at times to throw the parts out of gear while the motor is still running. It has been proposed to locate the recording stylus and the reproducing stylus upon a diaphragm common to both, and then, by shifting the position of the diaphragm, bring either of the two styluses into play. But entirely satisfactory results are not obtained in such constructions for two reasons: In the first place, other things being equal, and within reasonable limits, the lighter the recording device the more sensitive it is, and the better it will record; whereas a reproducing device acts better the heavier it is. In the second place, a recorder should have the vertical play necessary to adjust itself to any unintentional eccentricity of the blank cylinder, but should not have any lateral play; whereas the reproducer should have not only the vertical play, but also sufficient lateral play to enable it to track the helical record groove of the sound record. It has also been proposed to have two "speakers" interchangeable upon the machine, one a recorder and the other a reproducer, in order to provide the two differing qualities just mentioned.

It is the object of the present invention to provide in a single construction a "speaker" that is

capable of ready adjustment into each one of three positions (1) where it becomes a comparatively light recorder having vertical play but no lateral play; (2) where it becomes a comparatively heavy reproducer having both lateral and also vertical play, and (3) where it is neutral.

The invention consists, then, of the speaker carrying the recording stylus and the reproducing

stylus upon a common diaphragm, in combination with the ordinary "start-and-stop" mechanism and suitable attachments and connecting devices by which the adjustments above referred to may be accomplished.

Fig. 1 is a vertical section through the parts upon an ordinary graphophone or other talking machine, showing the "speaker" in its inoperative or "neutral" position; Fig. 2 is a similar view, showing the device adjusted to become a "recorder;" Fig. 3 is a similar view, showing the device adjusted to become a "reproducer," and Fig. 4 is a substantially horizontal section taken through the speaker and its connecting parts.

CABINETED GRAPHOPHONE.—William C. Fuhri, Chicago, Ill., assignor to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,099,353.

This invention relates to an improved "cabineted graphophone," that is, the combination of a graphophone and an ornamental and useful casing or cabinet which contains and completely incloses the former,

The object of the invention is to provide an article which is in itself serviceable as an attractive piece of furniture, yet at the same time constitutes a self-contained talking machine of superior quality.

Although cabineted talking machines have been known and used, yet the present invention is a marked improvement over all such prior machines known to the inventor, in utility and attractiveness of appearance as an article of furniture and without any sacrifice of acoustical properties as a talking machine, besides providing ready access for oiling or cleaning the mechanical parts, repairing them, etc.

Broadly stated, the invention comprises the combining of a graphophone in operative relation with a so-called library table, which latter may be defined as of inverted U-shape with flat top.

The invention comprises further the utilization of the two cubical portions of the library table, one beneath each end thereof, to support and give rigidity to the upper horizontally elongated casing

which contains the talking machine, and also to provide between themselves the knee space which adapts the article for use as a library table.

The invention comprises further the utilization to the fullest extent of the available spaces in said library table, for suitably locating the sound reproducing and sound conveying parts and the motor mechanism of the graphophone, and for storing a supply of sound records, etc.

The invention further comprises a movable support for the graphophone, for giving ready access to the sound reproducing parts and to the mechanism, for oiling, repairs or the like, while normally incasing and protecting said parts. And, finally, the invention comprises the combinations of the foregoing features and also the various details of construction, location and arrangement of the several parts, as hereinafter more particularly set forth and claimed.

In these drawings Fig. 1 is a vertical section, taken longitudinally through the cabineted graphophone; Fig. 2 is a plan view, the lid being open to expose the turntable of the graphophone; Fig. 3

is an elevation, viewed from one end of the table, the motor being represented as raised for inspection (from the other side); Fig. 4 is a perspective, viewed from the opposite end of the table.

GRAPHOPHONE AND TALKING MACHINE.—Karl A. Mauser, Leipzig, Germany, assignor to Polyphon-Musikwerke Aktiengesellschaft, of Wahren, near Leipzig, Germany. Patent No. 1,099,458.

This invention has reference to talking machines, phonographs, graphophones and the like, which are provided with a horn for the purpose of amplifying the sound. These sound amplifying horns occupy more space than the talking machine itself. If, however, the sound amplifying horn is located within the casing of the machine then the amplification of the sound is greatly reduced because the opening of the horn likewise must be greatly reduced to find room within the casing. These contrivances further have the disadvantage that the sound is strongly conveyed solely in the direction in which the horn is placed.

It is the purpose of the present invention to avoid the above described deficiencies and to produce a talking machine with a sound amplifier within the casing that conveys sound in all directions. This has been primarily attained by arranging the amplifying device within the casing so that its opening is at the top and by placing the motor or part of same within or before the opening of said amplifier.

Fig. 1 illustrates in side elevation partly in section a sound recording and reproducing device

which embodies in desirable form the present improvements. Fig. 2 is a plan view of the same. Fig. 3 is an elevation partly in section of an apparatus in which the record support is shown to be arranged before the opening of an amplifier. Fig. 4 is a side elevation and Fig. 5 a top plan view showing a modified form of sound amplifying device.

PHONOGRAPH REPRODUCER.—Thomas A. Edison, Llewellyn Park, West Orange, N. J., assignor to New Jersey Patent Co., same place. Patent No. 1,099,346.

This invention relates to phonograph reproducers, and has for its object the provision of an improved mounting for the stylus lever in order that the same may have great freedom of movement in tracking the grooves of the sound record.

More particularly, the object of the invention is to provide a mounting for the stylus lever whereby the latter may rock in its own vertical plane about a pivot, as the stylus tracks the record groove while at the same time the lever may rock in a transverse direction to enable the stylus to follow the contour of the record groove with greater facility.

The requirement of great facility of movement of the stylus lever both in a direction parallel to and transverse to the record groove is particularly important in the case of a record having 200 threads or a greater number of threads per inch, owing to the thin walls between the record grooves which might be broken down or jumped across by a stylus, the parts moving with which have considerable inertia, and owing to the character of the record grooves generally. Accordingly, a member is provided which bears upon the

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 52).

upper surface of the stylus lever to constitute a fulcrum for the latter, the co-operating surfaces of the pivot member and the lever being so formed as to permit a limited rolling movement between the same in a plane transverse to the stylus lever. Preferably, the stylus lever is formed on its upper side with a convexed surface co-operating with the surface of the pivot member, which latter is preferably mounted for rotation to reduce friction.

Fig. 1 is a central vertical section through a reproducer equipped with the invention. Fig. 2 is a bottom view thereof, and Figs. 3 and 4 represent in perspective the rotatable pivot member and stylus lever adapted to coact therewith.

PHONOGRAPH REPRODUCER.—Thomas A. Edison, Llewellyn Park, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,099,347.

This invention relates to phonograph reproducers, and has for its object the provision of a mounting for the stylus lever and connections between the same and the diaphragm, whereby the stylus may have great freedom of movement in tracking the grooves of the record.

More particularly, the object of this invention is to provide a connection between the stylus lever and the diaphragm or other sound reproducing vibratory means, whereby the free movement of the stylus lever in a lateral direction while the stylus is tracking the record will not be impeded.

In the type of reproducer well known in the art, the tail of the stylus lever is connected to the center of the diaphragm by a link which is ordinarily a piece of wire which must have a certain amount of stiffness. When the stylus, in tracking the record groove, is caused to move laterally by the undulations thereof, the stylus lever can only swing in a lateral direction by bending or twisting the connecting link. This imposes resistance to the movement of the stylus lever, and likewise, the link is apt to be twisted or the diaphragm put under undesirable stress. This improvement is designed to obviate this by providing a connection between the tail of the stylus lever and the link, whereby the link will be allowed to maintain its vertical position during lateral movement of the stylus lever, while at the same time the up and down movement of the lever resulting from the tracking of the stylus over the bottom of the sound groove is transmitted unimpaired to the diaphragm. This is accomplished by means of a member interposed between the stylus lever and the link, which member is pivoted to swing in a lateral plane during lateral movement of the stylus lever. Preferably, this member is pivoted at one end upon a pin which occupies a vertical plane through the tail of the stylus lever, the member being connected at its other end to the lower end of the link.

The stylus lever is pivotally mounted in a manner to allow considerable freedom of movement

in a plane transverse to the record groove, whereby that facility of movement of the stylus lever which is particularly important in the case of the tracking of a record having 200 threads or a greater number of threads per inch is attained.

Fig. 1 is a central vertical section through a reproducer equipped with this invention, certain parts being shown in side elevation, and Fig. 2 is a bottom plan view thereof.

PHONOGRAPH REPRODUCER.—Thomas A. Edison, Llewellyn Park, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,099,348.

This invention relates to phonograph reproducers, and has for its objects the provision of

means whereby an improved volume and quality of reproduction may be obtained with the use of a floating weight of the same or less weight than that used at present, the weight being so mounted and constructed that the fulcrum of the stylus lever may be placed nearer to the stylus than would otherwise be possible without greatly increasing the weight imposed upon the stylus to hold it down to its work and consequently wearing the record to a degree which would be prohibitive in the case of records made of the usual compositions. By thus rendering possible an increased leverage for the stylus a greater amplification is obtained.

In the experiments, using a phonograph reproducer having the stylus lever pivoted in the usual manner from a floating weight pivoted in the manner well known in the art, the inventor attempted to increase the loudness of the reproduction by moving the pivoted point of the stylus lever nearer to the stylus, whereby the amount of amplification of the sound vibration should be increased, and consequently the loudness of the reproduction. On increasing the ratio of the leverage of the stylus lever beyond a certain point, however, it was found that the reproduction did not increase in volume because of the increased work imposed upon the stylus and the consequent tendency to lift the floating weight. To overcome this difficulty, a construction embodying the subject matter of this application was designed, in which the reaction of the pivot of the stylus lever due to the lifting of the stylus by the undulations of the record groove is exerted chiefly in a plane occupied by both the stylus lever pivot and the floating weight pivot, so that this thrust or reaction, being exerted against the immovable floating weight pivot, has but little tendency to lift the weight. The construction is such, however, that eccentricities in the record will lift the floating weight in order that the diaphragm shall not be affected by these irregularities.

In order that this invention may be more clearly understood, attention is hereby directed to the accompanying drawings, illustrating a preferred

form thereof, in which Fig. 1 is a central vertical section through a reproducer equipped with the invention, certain parts being shown in side elevation. Fig. 2 is a bottom plan view thereof, and Fig. 3 is a partial sectional and elevational view similar to Fig. 1, illustrating a modification of the invention.

DICTAPHONE.—Thomas H. Macdonald (deceased), late of Bridgeport, Conn., by Sophie B. Macdonald, executrix, same place, assignor to the American Graphophone Co., same place. Patent No. 1,100,755.

This invention relates to graphophones or talking machines, primarily the type intended for both recording and reproducing and commonly known as "dictaphones" or "commercial machines," which type employs a single diaphragm with two styli (one for recording and the other for reproducing).

Heretofore it has been supposed that a reproducer should bear upon the record tablet with a pressure greater than that necessary or desirable in a recorder; therefore, with this end in view, various means have been provided whereby additional weight may be applied when the reproducing stylus is in operative engagement with the record groove, and removed when the recording stylus is in operative relation with the record tablet.

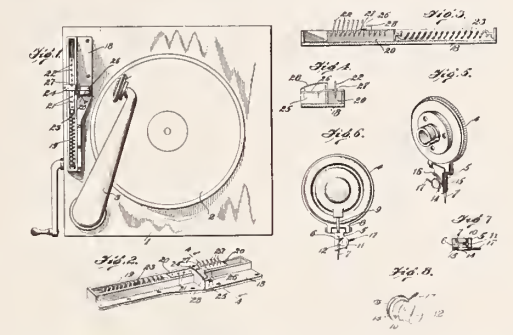

One feature of the present invention is the elimination of this additional weight or pressure. Another feature is the provision of improved means for preventing lateral play during the recording operation, while permitting lateral play during the reproducing operation.

In the drawing, 1 indicates the cylindrical sound record, or the blank cylinder, carried on the usual rotating mandrel.

NEEDLE CHANGING DEVICE.—Thomas H. Price and Harry R. Wheeldon, Lake Charles, La. Patent No. 1,100,910.

This invention relates to needle changing devices for graphophones and has for its object the production of an efficient automatic means whereby the needle may be automatically removed from the reproducer and another needle automatically replaced therefor.

Another object of this invention is the production of a needle magazine which may be attached

to any desired machine for the purpose of supplying needles to the reproducer.

Fig. 1 is a top plan view of the graphophone, showing the device applied thereto. Fig. 2 is a perspective view of the magazine applied to the graphophone. Fig. 3 is a longitudinal section of the magazine. Fig. 4 is a transverse section taken on line 4-4 of Fig. 2. Fig. 5 is a detail perspective of the needle carrying portion of the reproducer. Fig. 6 is a side view of the opposite side of the needle carrying portion of the reproducer. Fig. 7 is a transverse section taken through the needle engaging portion. Fig. 8 is a detail perspective of the needle retaining or engaging cam.

WRITES INTERESTING LETTER.

The Columbia Co. received this week another interesting epistle in praise of its dance product, this latest testimonial being sent by Prof. L. Lindenberg, a prominent dance instructor of Milwaukee, Wis., and foremost in many organizations devoted to the extension of dancing appreciations. Prof. Lindenberg writes as follows:

"Knowing that you are always pleased to learn of the success your machines give, I take great pleasure in expressing my entire satisfaction in your dance records. I use them on an average of fourteen hours per day and would not be without one for treble the price. The Columbia machine is a blessing to the dancing instructor, and I cannot see how anyone in this line can endeavor to get along without one. Cordially, (Signed) L. Lindenberg."

READ your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly, just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

“Tell him what he
wants to hear”

“Sell him what he
wants to buy”

These two basic selling rules
were old when the world
was young. You use them
with the utmost freedom in
selling the full Edison Line
because of its tremendous
variety of talking points.

No matter what your cus-
tomer's tastes, you can
always find some Edison
superiority he's been wanting
to hear about and so you
can *always* sell him what
he wants to buy.

DEATH TO STEEL NEEDLES

THE SONORA JEWEL MULTI-PLAYING NEEDLE
A RELIABLE and IMPROVED SUBSTITUTE

MARKS

The Beginning of the End of the Steel Needle

BECAUSE IT

**Eliminates the necessity of changing after each playing,
Plays on all makes of disc phonographs,
Improves on the tone-quality of the record,
Reduces to a minimum the scratch and any imperfections which may exist,
Increases the life of the record,
Gives new life to used records,
Permits different tone volumes without the aid of other attachments, and
Is guaranteed for three months.**

PATENTS PENDING.

PRICE, \$1.00

Five years ago the Sonora Phonograph Co. introduced the first perpetual Jewel Disc Record made in the United States. Since that time, by continual efforts, wonderful improvements have been made. Encouraged by the success of this record and the needle used thereon, and realizing the trouble, annoyance and damage which the use of steel needles causes to disc records, we have now perfected this Jewel Needle, which eliminates the necessity of changing after every record and still does not injure the delicate grooves of the record, as the use of the steel needle does, and at the same time greatly improves on the tone.

All owners of talking machines dislike the requirement of changing the needle after each playing and the SONORA JEWEL MULTI-PLAYING NEEDLE will be welcomed by them all.

Every owner of a talking machine will want one or more of these needles, and with the SONORA JEWEL MULTI-PLAYING NEEDLE it will be "Once a User, Always a User."

We want dealers in every city to handle this needle. Be first in introducing it in your city and have the advantage over your competitors. Exclusive representation granted.

Write for descriptive circular, also new catalogue of phonographs and prices to

NEW USE FOR TALKING MACHINE.

Humanitarian of St. Louis Uses Victrola for Entertainment of Homeless Cats and Dogs and Demonstrates Plan for Reporter.

(Special to The Talking Machine World.)

St. Louis, Mo., September 8.—Miss Lillie Nagel, a practical humanitarian of this city, has found a new use for a talking machine. The newspaper printing her interview called it a Victrola, and so it must have been that machine.

Miss Nagel is locally famous as conducting a home for stray dogs and cats in the best residence district of the city. All of the neighbors know that if a stray bothers them the place to send it is to Miss Nagel's home, where it is fed and doctored until in fine condition, when she finds a home for it. Recently she was named in a trust deed to superintend the construction of a dog and cat charity hospital. A newspaper reporter went out to learn of her plans, and he found Miss Nagel enthusiastic over the discovery that cats and dogs appreciated music.

"Isn't it fine that I have made this discovery just as we are going to build the hospital?" she exclaimed, "for we will have a music room in the new building and to it will come the cats and dogs for enjoyment as their favorite numbers are played, for they all do not like the same sort of music."

Then Miss Nagel took the reporter into the house and put on a Caruso record to show that some of the forty or more stray dogs on the premises would dance to it and otherwise show their appreciation. Next she put on some soft and low music and called attention to other cats and dogs. A third trial was for ragtime, and some other animals showed their appreciation sufficient to convince Miss Nagel, if not the reporter, that they liked the tune. Then she explained the plans for the music room in the hospital. Now all live talking machine dealers can advertise their wares for cats' and dogs' entertainment and refer to Miss Nagel.

THAT BAD CHECK GAME AGAIN.

Ray Bros., Louisville, Ky., Nearly Lose \$300 Victor Outfit on Bad Check Transaction.

(Special to The Talking Machine World.)

LOUISVILLE, Ky., September 8.—Ray Bros., who handle a large Victor business here, had a narrow escape from being swindled on a bad check last week. A man visited the company's store and selected a \$250 Victrola and about \$50 worth of records, for which he tendered a check that he had made out in the presence of the clerk. He advised that the bank be communicated with in order to establish the value of the check, and that fact drew the salesman off his guard. The bank was called up, however, before the goods were shipped and the check was declared no good. It was learned that the man with the check was somewhat irrational and had made a practice of distributing worthless checks among tradesmen apparently without a desire to profit by the scheme.

BEN L. BROWN NOW MANAGER.

Ben L. Brown, formerly assistant manager of the Cincinnati store of the Columbia Graphophone Co., has been promoted to the management of the Louisville, Ky., store of that company, succeeding D. S. Ramsdell, and took up his new duties on September 1.

ENLARGES VICTOR DEPARTMENT.

The West Music House, one of the oldest music houses in Joliet, Ill., has recently remodeled its quarters to make room for new demonstrating booths in the Victor talking machine department.

TWENTY-FIVE YEARS OF SERVICE.

Mr. and Mrs. Frank Dorian Guests of Honor at Dinner Given by Mr. and Mrs. Easton to Celebrate Mr. Dorian's 25th Year of Service with the Columbia Graphophone Co.

Mr. and Mrs. Frank Dorian were the guests of honor at a dinner given on September 3 at the Arcola Country Club, Arcola, N. J., by Mr. and Mrs. Edward D. Easton to celebrate the completion of Mr. Dorian's twenty-fifth year in the service of the Columbia Graphophone Co. Others present at the dinner were George W. Lyle, general manager of the Columbia Co.; Mr. and Mrs. C. W. Woddrop and Mr. and Mrs. Mortimer D. Easton.

Frank Dorian.

Mr. Dorian entered the service of the company as a lad of nineteen in Washington, D. C. He was at that time a typewriter operator of extraordinary ability. He served for some years in minor capacities, afterwards became private secretary to Mr. Easton, then Baltimore manager, Washington manager and later general manager of the company, from which position he was in 1897 transferred to Europe as the general manager of the company's business there. He had his headquarters for three years in Paris and for nine years in London and then returned to the United States and took charge of the Dictaphone, of which he is now manager. He has been signally successful in all his undertakings and has a host of friends throughout the world who admire his personality, business acumen and sterling character.

In view of Mr. Dorian's youthful appearance it is hard for his friends to realize that, with the exception of President Easton, he is the oldest living employe in continuous service with the Columbia Graphophone Co.

NEW DEPARTMENT FOR MILWAUKEE.

Victrola Section to Be Feature of New Building Now Being Erected by Edward Schuster & Co.'s Great Department House in That City.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., September 8.—Edward Schuster & Co., operating large and successful department stores at Third and Garfield and Twelfth and Vliet streets, will install a Victor talking machine department in the new department store which it is erecting on the south side, and which will be opened some time in October. The Schuster concern has met with such success in handling the Victor line at its two present stores that it made arrangements several months ago to carry the line at its new store. The company recently installed piano departments in its stores, which are in charge of Mr. Marks, formerly well known in St. Louis.

W. E. DEWELL MAKES A CHANGE.

W. E. Dewell, who established and for some time was manager of the successful Edison phonograph department of Martin & Co., Sioux City, Iowa, recently severed that connection to take charge of the phonograph sales department of the Huse Publishing Co., Norfolk, Neb.

PROMOTED TO MANAGER.

Walter G. Young, a salesman in the Victrola department of the Stewart Dry Goods Co. store, Louisville, Ky., has been appointed manager of the department, to succeed L. M. Knickerbocker.

The man who is on the winning side is most apt to preach the triumph of right.

ACQUIRES MUSICAL KNOWLEDGE.

How the Talking Machine Has Brought Opera and the Best Class of Music Into the Homes of the Every Day People in the Country as Well as City—"Ain't No More Country."

It has well been said that there is no longer any "country." In other words, country folks have become so civilized, so up-to-date with their automobiles, their telephones and talking machines and latest styles of dress, that the old time distinctions between the people of the city and country are gradually diminishing.

Through the medium of the talking machine all the latest music now finds its way into the homes of the farmers, and they discuss the latest operas with as much interest as if they had seen and heard them. All of this makes for culture and progress, and it shows what an uplifting factor is the talking machine. This apropos the following clipping, which we take from the "Office Window" department of the Evening Mail:

"A little girl of five or six years, out at Tuckahoe, astonished a company of people the other day by singing several operatic selections as she played about the floor. Perfectly unconscious, she warbled the most complicated airs with her almost baby voice, accompanying them with a queer jumble of words, which were a sort of childish reflection of the words that really belong to them. "Why, the child is singing grand opera!" someone exclaimed. But why should she not sing grand opera? She had heard it on the phonograph ever since she was born. Possessing a musical ear and a voice as a gift of nature, the oft-repeated songs of the phonograph had easily effected a lodgment in her memory, and she sang them as a matter of course.

"Probably there are many children like her. The Office Window man has heard a farm boy, away up in Vermont, whistling operatic airs with great fluency. They had come to his ears, too, through the little machine that nightly filled the home sitting room with its thin, metallic notes. Now and then a child is born with a talent for music. Such a child will pick up opera from a phonograph as readily as it picks up the ordinary phrases of speech from its companions.

"What will be the effect of the phonograph on the musical cultivation of the American people? Undoubtedly it will spread the knowledge of the mechanism of music. It will take time to tell whether it will increase the musical taste of the people, upon which, and upon which only, a real national music must be founded."

CO-OPERATING WITH MANUFACTURER

A clean shaven, quiet looking fellow standing on the outskirts of the gathering when the discussion started, worked his way in and said every month his store sent out at least 3,000 distinctive circulars; these were in addition to statements and invoices. There is not a week that goes by that he does not get some returns from circulars sent out in the manner described. The circulars cost one cent each. The talking machine dealer who does not take advantage of the manufacturer's advertising matter sent out is certainly slow. They advertise the things that customers want to know about. If the circulars are short and pithy, and get into the hands of the ladies, they will bring results.

MILWAUKEE HOUSE CHANGES NAME.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., September 8.—The Hoeffler Manufacturing Co., 306 West Water street, which has maintained a large and flourishing Victor department for several years and has carried on a large business in a general line of automatic musical instruments, has filed an amendment to its articles of incorporation, changing its name to the Hoeffler Piano Co. The Hoeffler house took up the agency for a well-known line of pianos about the first of the year.

FALL TRADE OPENING UP WELL IN MILWAUKEE.

War Disturbance Has Little Effect on Business in That City, Is Report—Dealers Ordering Very Freely as Result of Good Crop Outlook—Anti-Tuberculosis Association Wants Records—Badger Talking Machine Co. Succeeds—General Trade News of Interest.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., September 8.—The disquieting effect of the European war does not seem to be having any adverse influence on the talking machine business in Milwaukee or about Wisconsin. Jobbers and dealers say that the fall trade is opening up very satisfactorily and that there is every indication of a good business being received from now until after the holiday season.

The fact of the matter is that the war is doing much to improve general business in Milwaukee, and this is reacting with favor upon the talking machine trade. Milwaukee and Wisconsin manufacturers recently held a big meeting in Milwaukee to discuss the possibilities of an increased export trade, especially in South America, now that Germany is forced to withdraw some of her attentions from that country. A committee was appointed and general plans made to further the export trade in South America. The result has been that there has been increased activity in many lines.

Jobbers say that dealers about the State have been ordering rather freely in both machines and records. Stocks in dealers' hands have not been large during the summer, and now it is necessary to order for the fall trade. Conditions about the State are especially favorable at this time. A bumper grain crop has been threshed and is being sold at record-breaking prices, resulting from the European war, and the outlook for the corn crop was never better. Farmers and dealers in the smaller cities and towns about the State seem to be prosperous, and this ought to result in a good business.

Appeal for Used Records.

The Wisconsin Anti-Tuberculosis Association, with headquarters in Milwaukee, has appealed to the citizens of Milwaukee to donate any old talking machine records which they may have to the patients of the Milwaukee County Tuberculosis Sanatorium. A. G. Kunde, well-known Columbia jobber and dealer, 615 Grand avenue, won public approval some months ago by presenting the tuberculosis patients with a Columbia machine after a portion of the sanatorium had been destroyed by fire and the only available talking machine had been lost. Only a few records are owned by the institution, however, and the board of trustees of the sanatorium cannot well afford to spend money at this time for new records, so the Anti-Tuberculosis Association suggests that a gift of records would do much to brighten the existence of the inmates.

Mrs. J. H. Becker on Road to Recovery.

Mrs. J. H. Becker, wife of the enterprising manager of the Victor department of the Hoeffler Piano Co., 306-308 West Water street, is slowly recovering from the effects of a serious operation recently performed at one of the Milwaukee hospitals. Mrs. Becker has been ill for more than a month and her life was despaired of at one time.

Record Sales Unusually Good.

Record sales at the Hoeffler Piano Co.'s store have been unusually good of late, largely as a result of an interesting advertising and publicity campaign conducted by J. H. Becker, Jr., manager of the Victor department at the store. Mr. Becker arranged a large number of attractive show cards for his windows, made up of the title pages from the sheet music of various record selections, on which was printed the number of the particular record carrying the piece in question. This scheme did much to increase record sales, aided by the plan of printing some of the leading record titles on the outside of the regular mailing list envelopes. Mr. Becker reports that since the European war began the sale of the Victor record, "Die Wacht Am Rhine," No. 16,423, has attained a new high mark. This is not to be wondered at, in view of our large German population.

Visitors from Chicago.

Roy J. Keith and D. C. Prescott, both of the Talking Machine Co., of Chicago, recently called upon the Milwaukee trade. Both were optimistic regarding the fall outlook.

H. R. Fitzpatrick to Travel for Victor Co.

Wisconsin talking machine dealers are well pleased over the fact that Harry R. Fitzpatrick, who served for several years as manager of the Wisconsin Talking Machine Co., the predecessor of the Badger Talking Machine Co., Victor jobber in Milwaukee and Wisconsin, has been appointed traveling representative of the Victor Talking Machine Co. in Wisconsin, Illinois and northern Michigan, succeeding S. W. Goldsmith, vice-president of the Badger Talking Machine Co., who traveled over this territory for eight years. Mr. Fitzpatrick made a host of friends among Wisconsin dealers while engaged in the jobbing business who are wishing him success in his new position. Mr. Fitzpatrick formerly traveled for the Victor Co. before coming to Milwaukee several years ago. He will make his headquarters in Milwaukee.

Large Types of Machines in Demand.

Paul A. Seeger, manager of the Victor depart-

ment of the Edmund Gram Piano House, reports that the demand for the large type of Victrolas is unusually good at this time. Mr. Seeger and his family recently returned from a three weeks' vacation spent at Sister Bay, Wis.

H. H. Schwenker, traveling repair man of the Victor Talking Machine Co., spent a few days in Milwaukee recently, making his headquarters at the office and warerooms of the Badger Talking Machine Co., jobbers in Wisconsin and upper Michigan for the Victor line.

New Concern Starts Off Well.

The new Badger Talking Machine Co., successor to the Wisconsin Talking Machine Co. as jobber in Wisconsin and northern Michigan for the Victor line, experienced an unusually good business during the first month of its existence. Both S. W. Goldsmith, vice-president, and Harry A. Goldsmith, secretary-treasurer, report that the outlook is bright for a big fall trade.

"Wisconsin dealers are buying exceptionally well," said S. W. Goldsmith, "and I am confident that the Victor will meet with a big business in this State this fall. We have located several new Victor dealers in our territory during the past month. I have just returned from a business trip to Minneapolis and St. Paul, and conditions in the Northwest are favorable."

George F. Ruez, president of the Badger Talking Machine Co., has moved to Milwaukee from Ishpeming, Mich., and will now devote his entire time to the jobbing business.

F. H. Hochmuth in New Quarters.

F. H. Hochmuth, one of Milwaukee's well-known music dealers, who has been engaged in business at 311 Chestnut street for many years, moved into a handsome new building at 347 Third street soon after September 1, where he has broadened his business in several lines. Mr. Hochmuth has secured the retail agency for the Victor line of goods and is displaying them in specially arranged quarters in his new building. A new piano department has also been installed.

New Edison Disc Dealers.

Several Edison disc dealers have been placed in Wisconsin and northern Michigan during the past month, according to William A. Schmidt, general manager of the Phonograph Co., of Milwaukee, jobber in this territory for the Edison line. Good retail sales are being made at the Edison Shop, 213-215 Second street.

To Move Into New Quarters.

A. G. Kunde, Columbia jobber and retailer, 615 Grand avenue, hopes to be able to move into his new quarters at the new Miller building at the corner of Grand avenue and Fifth street by September 15. The new structure has been erected on the site of the building formerly occupied by Mr. Kunde, who will have his former address, 516 Grand avenue.

The Success of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.
This admitted makes it important that you secure the best service obtainable.

AND THAT IS EASTERN SERVICE

To use it is to swear *By* it not *At* it.

May we not have the opportunity to convince you that our service is exceptional?

FALL TRADE STARTS IN CINCINNATI.

Dealers Generally in Optimistic Mood—Victrola Department of Cable Company Opened to the Public—Steubenville Dealer in Trouble—Liberal Advertising the Rule—What the Managers Report Anent Conditions.

(Special to The Talking Machine World.)

CINCINNATI, O., September 9.—From all appearances Cincinnati is no worse off than the other important communities of the United States. There is a most optimistic feeling among the managers of the various talking machine departments about the city. In a general way they feel that the business for this month will off-set the losses of July and August. There was just a fair amount of business during these two months. More than the average number of Cincinnatians appeared to have been away during the past sixty days. Now one again hears the music of the talking machines.

After much delay the Victrola department of the Cable Company, on West Fourth street, will be thrown open to the public on Monday. Wholesale Manager Summey has engaged Kenneth Bartlett, a former Cincinnati boy and lately of Tampa, Fla., to take charge of the new business. Mr. Bartlett is already on the job and is patiently waiting for the disappearance of the workmen so that he can get busy. The demonstrating booths are located on the ground floor and help give an artistic appearance to this big music shop.

News comes from Steubenville of the financial difficulties of Lambert Friedl, owner of the National Talking Machine Co. On Thursday he posted a notice, announcing the closing of the business due to a "depreciation of stock." He announced that his liabilities are close to \$38,000, and that his assets will pay him out clear in time.

Manager Whelen, of the local Columbia graphophone store is still optimistic about the fall business. He said "During the month of August we simply held our own, but September opened up good, as the opening of the schools is bringing

many families home from their vacations, which naturally acts as a stimulus to business. The re-opening of the schools is usually the signal for renewed activities in all lines of business and no time will be lost from now on in getting ready to handle the fall and winter business."

The Otto Grau Piano Co. is most consistent in advertising its Victrola department. President Grau states that this has brought the company business which it would not have received by an occasional advertisement.

The Aeolian Co. is doing considerable advertising and is getting ready for a big fall trade. Manager Stotler, of the Milner Musical Co., leaves Monday for Wisconsin, where he expects to put in two weeks, seeking some gamey fish.

Manager Dittrich, of the talking machine department of the Rudolph Wurlitzer Co., says: "August was a month of exceptionally heavy record orders at a time when shipments of records were heaviest from the manufacturers. Machine orders were also very good, and this would indicate that dealers not only are enjoying an exceptionally good summer trade, but are stocking up for the fall business in spite of pessimistic reports from other channels of trade. Retail business was exceptionally good during the month of August. We are not losing any sales on account of the war conditions, and we do not expect to be effected by conditions later on in the fall. There is a plentiful stock on hand and we look for big results during the coming season."

THE MAN OF GRIT WINS.

The fellow who says "I never had a chance" is almost invariably a man who never had any grit. Grit wins. To have grit means to have determination enough to keep going, to plug away until the accomplishment of your purpose. This requires planning, studying, working with all the concentrated force that is in you. Winning means working in the superlative degree, not shirking in any degree.

GRAFONOLA RECITAL IN CHURCH.

Large Crowd of Church Members and Friends Turn Out to Enjoy Most Delightful Concert Arranged in Laurel, Md., by R. H. Sadler, Jr., a Local Grafonola Enthusiast.

(Special to The Talking Machine World.)

LAUREL, MD., September 5.—R. H. Sadler, Jr., of this town, had heard on various occasions of the use of talking machines in churches and determined to make the experiment for his own satis-

Showing Grafonola Used in Church Work.

faction. He was the possessor of a Columbia Princess Grafonola, and after arranging a comprehensive program of various kinds of music secured the use of the Laurel Presbyterian Church for the concert. The concert, or recital, was in the nature of a free social for the church people and their friends, who attended the affair in large numbers. So successful was the first recital that Mr. Sadler was compelled to follow it with others to meet the demands of the local music lovers. The accompanying illustration shows the Grafonola in position beside the pulpit.

TRADE IMPROVES IN PITTSBURGH.

Attractive New Stores and Departments Opened—**Recital Hall in Kaufmann Bros. Store—Schoen Music Co.'s Department a Success—Reports from Other Members of the Trade.**

(Special to The Talking Machine World.)

PITTSBURGH, PA., September 10.—The consensus of the opinions of the Pittsburgh talking machine dealers indicates a marked improvement in trade during the first part of September, in fact several report a slight advance in sales over the same period of last year. The record business is on the increase and many of the houses have materially increased their lines.

New Dealers in Line.

During the past ten days two newcomers have made their appearance in the circle of local dealers. The Peloubet Co. has opened an up-to-date establishment on Forbes street, near Oakland, and is handling the Victor exclusively. The opening trade has been very encouraging and a splendid fall business is looked forward to, as the Peloubet store is located in a section of the city that is a comparatively new field for the talking machine.

A talking machine department has been installed by the Story & Clark Piano Co., 539 Wood street, who will specialize exclusively in the Edison. Several practically sound-proof booths have been constructed and are fitted up in a complete and convenient manner. The department opened for business during the week of September 7.

Pleased with Business Conditions.

The Boggs & Buhl Victrola department has been enjoying an exceptionally good business, and Manager J. A. Phelps reports a steady increase since the first of September. The location of the de-

partment on the fourth floor with the piano department is proving to be equally as convenient and attractive to customers as the old situation on the second floor.

To Open Concert Hall.

Manager H. N. Rudderow, of the Kaufmann Bros. Victrola department, expresses much satisfaction over the trade of the past few weeks, which, although not brisk, has been of a substantial character. Mr. Rudderow has just returned from a week's vacation spent at Niagara Falls and other points of interest.

The Kaufmann Bros. store opened its concert hall to the public on September 7, and in the near future Victrola concerts will be given at regular intervals.

The Schoen Music Co., 119 Federal street, North Side, reports its new Columbia talking machine department as making good strides in both the instrument and record sales. Callers have been particularly numerous recently and many fine prospects for the higher priced machines are in evidence. The new display window is being used exclusively for the display of the Columbia and is always kept freshly and attractively arranged, which is doing much to draw prospective customers.

The S. Hamilton talking machine department reports a very fair summer business in its three lines, the V. E. C. triplets. The store's show window, which is one of the largest and handsomest in the city, has been given over almost entirely during the past week to the Victor, Edison and Columbia higher-priced instruments. An Edison diamond disc, special case, instrument selling at \$400, and a new Victor No. XI, are shown to excellent advantage.

ORIGINAL PUBLICITY STUNT

Inaugurated by the Landis Music Store, Waynesboro, Pa., Brings Deserved Results.

The proper use of the original and unique in up-to-date publicity matters is the goal of every advertising man, and the unusual advertisements, car cards and publicity stunts that are turned out regularly bear eloquent testimony to this search for the distinctive.

In line with this embodiment of the original in advertising, the idea recently presented by the Landis Music Store of Waynesboro, Pa., live wire Victor dealer, is well worth attention. This company sent out to its mailing list a letter advertising the Victor, and enclosed a check for two cents "to pay for a minute of your time." The novelty of this plan was the subject of general comment, and was a material factor in the sales success of the letter.

SILAS E. PEARSALL CO. EXPANSION.

New life has been added to the Silas E. Pearsall Co., Victor jobber, 16 West Forty-sixth street, New York, by the appointment of John A. Snyder as general manager, and of Thos. F. Green as manager of sales. Mr. Snyder comes from Philadelphia, where he has had considerable experience in banking lines in connection with his talking machine experience, while Thos. F. Green, formerly the Victor man of New York, needs no introduction. Plans are rapidly being shaped by these two generals for a campaign for both wholesale and retail business that should increase the scope and prestige of this company.

The DITSON Pledge

is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

OLIVER DITSON CO., Boston, Mass.

PACIFIC COAST DEALERS CONFIDENT OF THE FUTURE.

Effects of European War on Fruit Shipments Being Overcome with Good Results—Phonograph Co. Occupies Handsome New Quarters—George W. Lyle Inspecting Columbia Branches—News of Travelers—Higher Priced Outfits Most in Demand Is the Report.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., September 4.—Notwithstanding the diverting influences of the European disturbances the past month, business in the talking machine stores here held its own fairly well, and with the first excitement of war conditions wearing off now to a considerable extent, greater activity is anticipated for September. The prospects for fall and winter business in this section, except in special cases, have not changed materially in consequence of the recent developments in foreign affairs. The first effect here was a stoppage of shipping, which seriously interrupted the export movement of crops and manufactured goods, thus tending to retard current business generally, but quite a lot of ships have left for foreign ports the last few days and the difficulty of financing the export movement is not so pronounced as it was. Other operations temporarily curtailed on account of the unsettled general condition are being resumed and the trade expresses renewed confidence of gradual improvement, an indication of which is the appearance in the daily paper this week of a little more advertising space devoted to musical instruments. Dealers did but little advertising the past month on the ground that it would be money thrown away, as the public was too absorbed in other matters to read ads, the primary election tending to distract attention from business in addition to the reading, thinking and discussing of war topics.

Phonograph Co. in New Quarters.

The principal event in the local trade the past month was the removal of the Phonograph Co. of San Francisco from its old Post street location to the new Edison Shop on Geary street, facing Union Square. Final touches in decoration and minor details of furnishings were still to be made when the place was opened for business, and for that reason the formal opening will not take place for two or three weeks yet. The management of the business takes just pride in the new establishment.

One of the highest compliments that can be paid any establishment is probably that everything is in good taste, and that can truly be said of this new Edison Shop. The woodwork is red gum finish, which harmonizes with the sand-tinted walls and matches the furniture. The arrangement of the store was given much thought in order to combine attractiveness with convenience. In front is a large display and salesroom, followed by a lobby for the accommodation of visitors; then the offices, back of which are record rooms for stock and eight sound-proof demonstration rooms. The store is 140 feet deep, the display room is 22 feet wide, and the remainder is 25 feet wide. A mezzanine floor has been installed, extending from the rear to the display room. It has been fitted up for a concert hall, and its approach is one of the most elaborate features of the establishment. A stairway leads up from either side of the display room, forming an archway. In the basement are provided storage and shipping facilities. As the name signifies, Edison products are handled exclusively, and one of the chief prides of the place is a signed photograph just received from Mr. Edison, extending his best wishes for the success of the new Edison Shop of San Francisco.

George W. Lyle on Inspection Tour.

W. S. Gray, district manager of the Columbia Graphophone Co., expects to leave shortly for Spokane, Wash., where he will meet George W. Lyle. From that point he will accompany him on his tour of inspection of the company's Pacific Coast interests. Word has also been received here that Marion Dorian, of the Columbia Co., will visit the local headquarters some time in September. While here he will go over plans and specifications for the Columbia booth at the exposition next year, and look after other matters pertaining to the company's exhibit.

M. J. Sittenfeld to Travel for Columbia.

A new traveler has been added to the local force of the Columbia Graphophone Co. in the person of M. J. Sittenfeld, who was formerly manager for the company in Sacramento, Cal. He has been assigned the central part of the State as his territory and is giving good account of himself on his initial trip, according to Wholesale Manager F. R. Anglemeier. The other travelers are out also. C. P. Le Roy is in the southern part of the State, and C. J. Moore is back on duty in the San Francisco Bay district, after a two weeks' vacation at Skaggs Springs, in Sonoma County. Mr. Anglemeier says business has kept up nicely the past month in both machines and records, and he looks for improvement from now on until the holidays.

A. R. Pommer at Golfers' Meet.

A. R. Pommer, proprietor of the Pacific Phonograph Co., and Mrs. Pommer, both of whom are golf enthusiasts, are spending the early part of September at Del Monte, where golfers from all parts of California have assembled to compete for State supremacy.

New Traveler for Edison Disc Line.

The Pacific Phonograph Co. has enlisted the services of E. C. Howard. His official title is special representative and his sole mission is to solicit new business for Edison disc products. He will cover the entire Pacific Coast, and as his efforts will be confined to opening new accounts, he will work principally in localities heretofore not explored to any extent by the company.

Does Lively Business at Summer Resorts.

Special Representative Francis Raymond, of the phonograph sales department of Thomas A. Edison, Inc., in this district, spent most of the past month at the summer resorts south of this city in the interests of higher priced Edison disc phonographs. He conducted a series of recitals at the leading hotels offering special inducements to summer visitors, and no doubt Edison dealers will reap benefits from his campaign.

Get Good Stock of Victor Records.

L. S. Sherman, of Sherman, Clay & Co., Coast distributors of Victor goods, says they have been unusually busy in the record department the last week or two filling back orders following the arrival of a large shipment from the factory, containing certain records which have been anxiously awaited for some time. Here machine business is reported quite active also, and preparations are under way for a large holiday trade.

Says August Shows Substantial Gain.

H. P. Rothermel, manager of Eilers talking machine department, which was installed the first of July, says August showed a more substantial gain over July than he anticipated. Stocks have been increased in all three lines—Victor, Columbia and Edison—and all grades of machines have been selling. Edison disc products have been featured, and Mr. Rothermel says they are in particularly good demand.

Many Large Cash Sales.

P. H. Beck has enjoyed a satisfactory month's business in the Kohler & Chase talking machine department, a feature of which he says was the increased number of cash sales for machines under \$100. He considers this an indication of improved conditions, as in his experience cash sales have been largely restricted to higher priced machines.

R. E. Wolfinger, of the talking machine department of the Wiley B. Allen Co. in Los Angeles, Cal., spent a few days in San Francisco recently while on his vacation.

To the man who is always waiting for something to turn up, success is always just around the corner of the next street.

A man is known by the company he keeps, which may explain why some of use hate to be alone.

Lansing Khaki Moving Cover

is the only safe protection that you can use for wrapping machines for shipment, for it insures perfect delivery condition.

It is the same as packing each talking machine or record cabinet in four thicknesses of heavy felt, with cotton flannel on the inside to keep the varnished surfaces right, and Government khaki on the outside to insure wearing durability of the cover.

**Gives Protection Against
Dust
Finger Prints
Bruises
Scratches and
Heat or Cold**

You save all bother of re-finishing each machine, so each cover saves its cost within a week after you buy it.

Place for your name and address on the outside, so you also get advertising value.

Ask us to send you a Lansing Cover and test it yourself. Also get our Booklet No. 6 giving you full details.

Better send for these to-day.

LOOK FOR GOOD FALL TRADE.

Indianapolis Dealers Optimistic Over Outlook—Columbia Co.'s Unique Display in Water Carnival—Kipp-Link Co. Activity—E. L. Lennox Wins Golf Honors—What the Others Report Regarding Current Conditions.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., September 9.—Talking machine dealers here are looking forward to a prosperous fall trade. The European war has not affected the local talking machine trade and the dealers can assign no reason why it should.

The Columbia Graphophone Co., 27 North Pennsylvania street, won honors recently in the water carnival held under the auspices of the Riverside Canoe Club on White river, near Riverside Park. While the Columbia's entry in the carnival did not take the grand prize—simply because it was not entered as a contestant—it received more applause than the triumphant entry. H. M. Wright designed the Columbia display. Taking two large canoes as his foundation, Mr. Wright built a living room scene which won appreciation on every hand. On the two canoes a platform ten feet square was placed. A six by nine rug was laid on the platform. A table, three comfortable rockers and a Grafonola De Luxe made up the furnishings. The pictures of Mary Garden, David Bispham, Emmy Destinn and Lina Cavalieri were placed along the front of the platform. Storage batteries supplied the electric current for the lights.

The "movie" men were on hand at the carnival and the moving pictures of the "parade" are being shown at the local theaters. The Columbia display shows up especially well in the pictures. A free exhibition of the pictures was given in Monument place the week of the Indiana State Fair, September 7-11. This week was also "Made in Indianapolis Week."

A. W. Roos, manager of the Columbia store, said business was good the latter part of August, and that the indications are that there will be a big fall business. Dance records continue to be

the best sellers, it being almost impossible to get as many as needed.

Thomas Devine, manager of the Dictaphone department of the Columbia store, is in Ottawa, Canada. Friends of Devine are worried lest the Canadian Government should pick him up and compel him to go to war for England.

W. C. Fuhri, of Chicago, district manager, visited Mr. Roos recently. Mr. Fuhri and Mr. Roos went to Terre Haute in Mr. Roos's automobile. They had a very pleasant trip and in addition attended to business there.

The Kipp-Link Phonograph Co., jobber for the Edison line of phonographs, find that it does not

Co. had a very good August trade and a large fall trade is expected.

Edwin L. Lennox, of the E. L. Lennox Piano Co., which handles the Edison line of disc phonographs, won second honors in the State golf tournament held recently at Marion, Ind. Mr. Lennox is a veteran both in the music game and in the game of golf.

PREPARING FOR NEXT CONVENTION.

Press Committee of National Association of Talking Machine Jobbers Reports Start of Work for Reunion in San Francisco.

J. C. Roush, chairman of the press committee of the National Association of Talking Machine Jobbers, in a recent communication says:

"Tentative plans are already being prepared for a banner convention at San Francisco July, 1915. Pamphlets showing special trips with privilege of returning different routes are being prepared, profusely illustrated, and will be mailed to every member of the association shortly.

"Plans for entertainment of the jobbers and their friends are being arranged, and there is no question but what the next convention will be one that every member can well be proud of. Many members have signified their intention of being present, and the attendance will no doubt be quite large, as many members will use this as an excuse to visit the beautiful Coast, Yellowstone Park and the Yosemite Valley instead of putting it off from year to year.

"Special Pullmans will be arranged for, making the trip practically a family party and members will return home with a better knowledge of their own country than they could obtain from constant reading and studying. Every member is urged to make his plans take in this beautiful trip with his family and friends."

The live-wire Victor dealer is "always on the job," as witness the aggressiveness of John J. Carroll, Victor dealer at Newark, O., who on a recent trip around the world stopped at Rome for a few days and picked up a fat order for a Victrola XVI. and a good-sized record library.

Columbia Display in Indianapolis Water Carnival.

have to do very much pushing to sell the Edison line. It's more of a pulling game to get the machines and records to supply the demand.

W. S. Barringer, of the Stewart Talking Machine Co., jobbers in Indiana for the Victor Talking Machine Co., expects to have this fall the best trade his house has experienced. Preparation has been made by the Stewart Co. to take care of heavy demands for records and machines from the dealers throughout the State.

The talking machine department of the Aeolian

from the hundreds of delighted owners of talking machines. A \$10,000 man writes that he is able to play perfectly with the Little One-Der attachment records 10 years old.

Here is a "Little Hint" for the dealer: In addition to trying out a sample on your own perfect demonstrating machine, using perfect new records, and getting demonstrations of the fine color-value, ask your customers to bring in their old records.

You will thus make a sale of an attachment and yourself get enthusiastic over our patent.

You will bring old customers into your store to investigate, and it is a simple matter then to get them to try out some of the new records. Result,

sale of a Little One-Der and of several new records.

Another way to sell attachments, if you cannot induce all your customers to come in for a demonstration, offer to send one out to the home for trial. We guarantee you will make a sale every time.

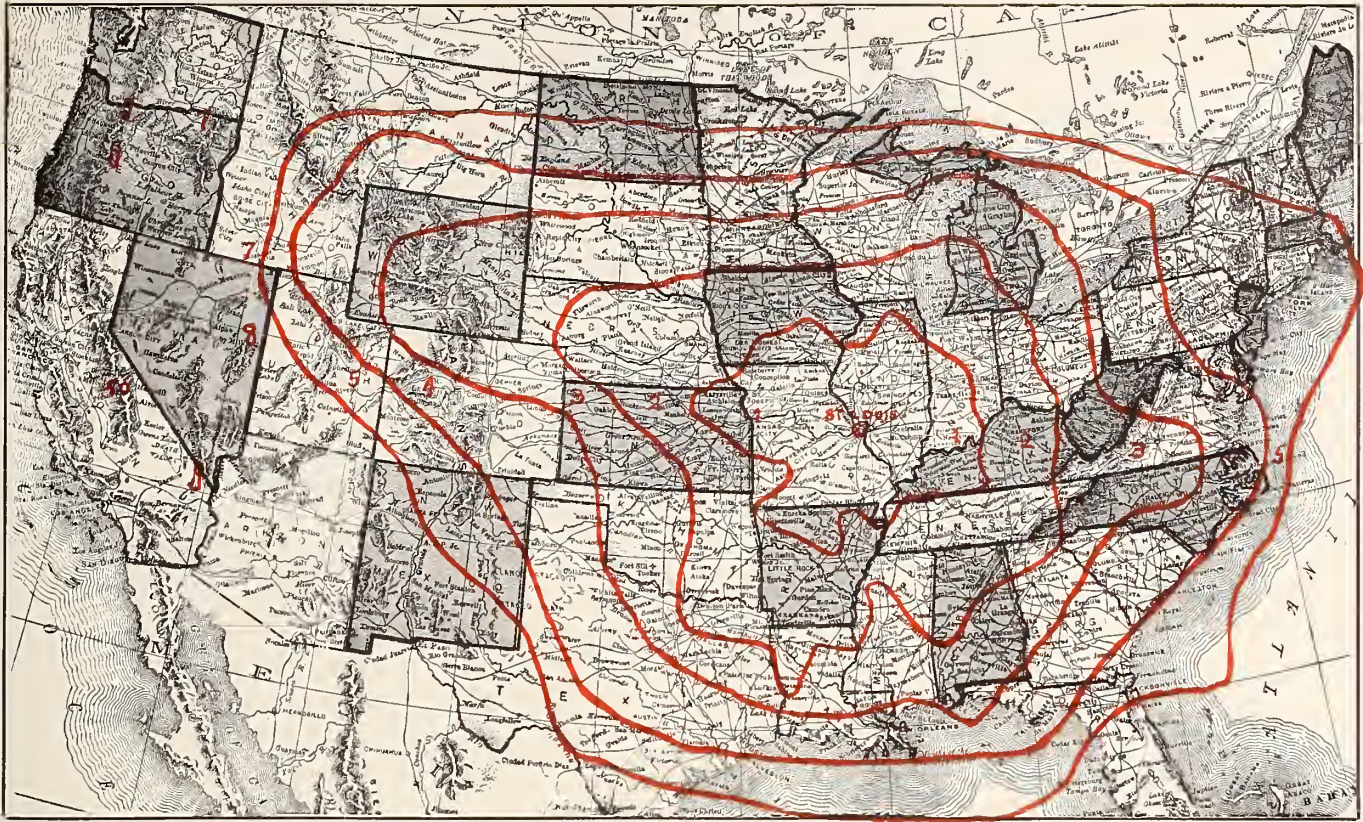

Write for 2 or 3 dozen attachments, which we will send on approval. At the end of 30 days return those you have not sold, and we will not charge you for them. Our introductory price on this trial offer is 60c. each, and you retail for \$1. Special price on quantities.

Sole Maker

**A. S. B. LITTLE
Nashville, Tennessee**

Elbert Hubbard, writing in the July issue of "The Fra," says of the Little One-Der attachment for talking machines: "It restores lost chords and takes the wreck out of records." This is only one of the many very strong endorsements we have received for our patent needle holder (shock absorber)

The Wonderful Freight Service of Saint Louis

LOOK at the map!
 Each circle about Saint Louis represents the limit of a day's travel of the fast freight service from here! Twelve hundred cars and more leave Saint Louis daily, carrying package freight to break bulk at car destination, and all of these cars move on SCHEDULE!

See how far freight moves from Saint Louis in One Day—in Two Days—in Three Days!

Think what a wonderful accomplishment this is—how NEAR Saint Louis is to YOU by freight!

And think how much faster our Express and Parcel Post service brings goods to you!

We are AT YOUR DOOR—and here in Saint Louis we have the BIG Victor Stock—able to fill the orders for shorts that other jobbers can't fill. If anybody in America has the Victor Records, Machines or Accessories you need—WE have!

Send us your shorts—even if you get the bulk of your Victor goods from somewhere else. Send US the hard part to fill!

Koerber-Brenner Company

Victor Distributors

The Goods, and NOT "Regrets"

THAT'S our policy.

It compels us to carry a larger stock of Records, Machines, and Accessories than most Jobbers—but we FILL orders instead of sending our regrets, which is what you are after.

You send in orders for Victor goods because you NEED 'em. A jobber who is always "short" doesn't help you much.

So, if you're short anything now, instead of waiting for your regular jobber to get it, send us the order. If anybody in the country is stocked on the item, WE are.

We just "dote" on these "Short" items others send regrets about.

We will appreciate your short business, even if you place your regular orders elsewhere.

PHILADELPHIA TRADE SHOWS PLEASING INCREASE

Over Business for Same Season of Last Year Despite General Conditions—Dealers Make Elaborate Preparations for Capturing Trade During Coming Months—Recitals and Liberal Advertising Planned—Louis Buehn Reports Steady Business Growth.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., September 9.—The talking machine business in Philadelphia during the month of August was most satisfactory, and while there was not a very large increase over 1913, and especially not as large as several previous months, yet it was sufficiently so to be encouraging and to give bright prospects for the remainder of the year. Thus far nine-tenths of the talking machine dealers in Philadelphia have experienced an increased business for the first eight months of this year, every month over the corresponding months of 1913.

There is not going to be any material change in the aspect of the talking machine business in Philadelphia this year despite the harmful influence of the European war. It has reached such a staple basis that little change is necessary.

The Edison disc dealers are prepared for an active fall campaign and have thousands of circulars already addressed and ready to be mailed just as soon as they feel the proper time has arrived. They will also inaugurate an elaborate series of concerts in which they hope to reach a large number of talking machine purchasers who would understand and appreciate the Edison qualities.

The talking machine department of John Wanamaker's has enjoyed an unusually good August business. The new record racks are in place which facilitate work very materially. The sales force has been divided in such a way that at present there is an exclusive sales force to sell Victors and an exclusive sales force selling records. Concerts are being given every day in the large concert hall, in which a piano, an organ and a violin are used with a Victrola. These concerts are very largely attended. Among the Wanamaker visitors the past

week were L. C. Wiswell, the general manager of the talking machine department of the Lyon & Healy store, Chicago, and Miss Golden, a young lady who conducts a talking machine store in Indianapolis. Mr. Kingsmore, of the Wanamaker selling force, will be married the coming week.

Louis Buehn, who handles the Victor machines and the Edison Amberol, has increased his business very materially during August. Mr. Buehn spent the latter part of July and most of August at Ocean City, and last week made a tour of the Eastern shore of Maryland in his automobile. Mr. Buehn says his business has run steadily ahead of last year, every month showing a gain over the corresponding month, and he looks for an increased business in the fall and winter. Edison dictating machine business also shows an improvement over last year, and among the leading houses who have taken on this instrument are: The Keystone Type Foundry, the Ford Motor Car Co., Diston & Sons, the saw manufacturers of Tacony; Berger Brothers, and the Gurber Engineering Co. of Bethlehem.

Burkhart & Blake, at Eleventh & Walnut streets, have a most artistic and attractive window display of the Edison, and are about to erect a large display sign on their building, 13 feet wide, on the Eleventh street side. They have also built an additional booth. They report that their business on the Edison thus far has gone considerably ahead of their expectations, and they are most optimistic.

Ramsdell & Son, also Edison agents, are making arrangements to have a series of fine booths placed in their warerooms and are going to give the talking machine end of their business equal attention with the pianos. Both the Cunningham and Stetson companies are going to place experienced men in charge of their Edison departments.

The Talking Machine Co. expects to have all alterations finished by the middle of this month, and it is going to have as fine a store as is in this city on Broad street.

Walter T. Eckhart has been spending several weeks at Atlantic City. He came up to the city last Friday and returned on Saturday after he found that everything was working along in a satisfactory way. As the Philadelphia-Chicago Opera Co. will not give performances this winter on account of the war, it will give the Pennsylvania Talking Machine Co. additional room for its business. The Opera office took up quite a little space at the front of the store, but it was a good advertising medium.

Lit Bros. are continuing to enlarge their department, and it now covers close to three times the space it occupied a year ago.

Gimbel Bros. have not yet found time to make the enlargement to their department so long contemplated, but their business is growing so rapidly that they cannot delay much longer.

Strawbridge & Clothier are more than holding their own, they report, and with their new rack facilities they are finding it much easier to handle their rapidly growing business on records. Manager J. E. Priestly believes that the business is going to be very good this fall.

SUSTAIN THE PRICE.

You will notice that those business men who have really made good are in a position to make a price and sustain it, because their reputation is such that that course is justified; they are men who have been very careful to make good all business transactions by having always sincerely tried to deliver quality in proportion to price.

RETURN FROM VACATIONS.

L. A. McChesney, advertising manager of Thos. A. Edison, Inc., Orange, N. J., has returned from his vacation, which he passed in the Adirondacks.

Credit Manager Philips, who has been sojourning at Asbury Park, N. J., has also returned.

FOR SALE

My high-class retail Victor business; Established 11 years; Centrally located; Store thoroughly equipped, with well-trained sales force. Genuine opportunity for investment of \$10,000 to \$15,000 capital. Am retiring from retail business. Further details on application.

As Easy As Selling High Hats to Aldermen:—

That's how easy it is to sell an Edison Phonograph to a man who knows real music when he hears it.

As soon as a few records are played, your music-lover knows that here is a true musical instrument that reproduces all the beauties of the original music. He knows that he is hearing the overtones that elude reproduction on other phonographs.

To him the advantage of having a permanent point that does away with the bother of changing needles, is instantly obvious. He

NEW YORK, SEPTEMBER 15, 1914.

WAR talk has been dominant throughout this land during the past month, and even a trade publication has to devote a certain amount of its space to the discussion of war and its effect upon trade.

So closely is the world bound together by ties of business and friendly intercourse that what affects one nation is bound to affect the others. We cannot have half the world engaged in the most destructive conflict of all the ages without having an immediate effect upon the interests of other countries.

There is inconvenience and loss and suffering for the peoples of all continents because the European nations have drawn the sword.

The organized interests of man everywhere are so interdependent that commerce, finance and industry suffers loss, and must suffer more and more as the conflict deepens.

We talk about a neighborhood of nations, and yet it is a neighborhood without brotherhood; and by the awful scourge of hatred all nations are learning that neighborhood without brotherhood is hatred and death.

The sciences and arts of peace are made to belie themselves in the ruthless service of carnage and slaughter.

Something must be wrong with our civilization when, in 1914, millions of men confront each other on the battle field trying to decide the quickest way of wiping each other out.

All our talk of close brotherhood—all our talk of arbitration, of treaties backed by the preparation for war.

Armed peace is forever disproved and doomed as an instrument of international safety. There can be no such thing as armed peace. It contradicts itself, for peace that must arm is no peace. In spirit, in motive and all of the moral qualities of conduct it is war. All it lacks is opportunity. Give it occasion and the brute-force war features are made manifest.

If "war is hell," then it is plain that armed peace is hell's wide-open gate.

THE industrial conditions throughout Europe are sadly disrupted. Business organizations are broken, and the question is how soon will they be reorganized. Some never, because the brilliant minds which once directed them are no more, and the losses of the warring countries of Europe, in fine citizenship, cannot be reckoned in money standards—it is beyond pricing.

But the responsibilities of America in this great conflict are great, for in this crisis it is to the United States, with her vast resources, her fields of grain, her great stores of riches and gold,

manufactures and human energy, that all the world is forced to turn for leadership.

The countries at war must have American wheat and American meat. They will want, and try to obtain, munitions of war from American factories. With their own shops closed, the workmen at the front, rifle in hand, will need American cloth, iron, steel, shoes, saddlery and products of every kind, and bound as we are by ties of blood and business to every nation of Europe, when the day comes when the great armies of Europe shall have made their last final payment in human life to the god of war, and peace once more smiles upon the people in the war-torn lands, then it will be through the good offices of America—the melting pot of all nations—that the way will be paved for conferences and new treaties.

The prostration of the manufacturing interests of Europe will make it impossible, by reason of the results of the war, for any great revival in export trade from those countries for some time to come. And America, by reason of these unfortunate conditions, has an unlooked and unsought for opportunity opening up. The war will throw us upon our own resources, and compel us to develop raw and unfinished materials for the supply of which we have been relying upon European countries.

OUR vast resources in every line will be developed, and the United States will make itself almost immediately independent of the rest of the world in its manufactures.

Opportunity, through Europe's misfortune, is knocking at America's door louder than she ever knocked before at the door of any great nation.

From present appearances it would seem as if within the immediate future there would be an unprecedented boom in almost every line of trade.

Prominent industrial leaders have been interviewed, and they declare that they are preparing for a new era of business, and that this activity will include a varied line, so that American industries will leap ahead and employ all available labor, and within a brief time it is possible that every smokestack in the country will be pouring out its thickest clouds and every loom will be turning, and every artisan and day laborer will be at work.

America, being the only great nation not embroiled in war, must supply to the other nations of the earth enough of its products and manufactures to cause the greatest of activity among us.

AMERICAN inventive ability will come to the front as it has never come before. Thousands of Europeans will invent no more, and the loss to those involved countries will be vastly more than the loss of either property or wealth; and notwithstanding that thousands of the brightest and brainiest men must go down before the rain of hail and death, civilization will not halt, and the virile minds of Americans—the people of this new land—will quickly repair the loss.

Meanwhile we must feed the war-torn lands—we must carry the commerce of the destroyed and imprisoned ships, and to do that we must work—all of us.

There is no time to sit back and fill the air with gloomy predictions.

It should be plain to everyone that this country will boom as it has never boomed before, that the money equilibrium will be steadily adjusted, and that men in every line of trade will feel the necessity of work as never before.

IN New York we are too close to the cable connections, too close to Wall Street, too close to the great shipping interests, too close to the great dailies which issue extras every half hour, not to be more keenly susceptible to the war conditions than any other part of the country. Therefore, it is assumed that New York's general trade would be quiet; and yet we can point to instances in the music trade where some piano houses have scored the best August trade that they have had for many years.

They have done it through organization—through work, and that is exactly where the talking machine men can take advantage of the present conditions and reap good results.

In the great agricultural sections of this country the people

are not influenced by the war conditions. They are getting more for their crops than ever before, and the prices will still go higher. They will have more money to spend for home accessories, such as pianos and talking machines. They will buy more automobiles, and their good fortune will be reflected in the demand upon factories in all lines of trade.

And so it goes!

The absorptive power of the hundreds of millions of people, plus the additional call which must come from Europe, is pretty sure to make this country a hive of industry and activity for months and years to come.

It is not the time for pessimistic talk.

The man with a grouch has no place.

We have so many things in our favor that we should think of them and discuss them rather than the sad misfortunes which have befallen others.

We are free from war. We have good crops—the greatest ever.

We have a hundred million of people who make the best market in the world.

We have good resources at our command, and all we need is just a little plain, ordinary, every-day common sense and to keep steadily at our task.

Just pull strong and steady.

THE talking machine business, while undergoing changes, is broadening out all the while. In fact, its development has been phenomenal, for when we compare the conditions which existed in this industry half a dozen years ago with those of to-day we must not only admit its wonderful development, and the advanced position which the talking machine occupies to-day in public esteem, but also the constant business changes which the industry has undergone.

All new industries have sooner or later to succumb to certain fixed business conditions, and the talking machine trade, like many others, is gradually reaching up to a position of mercantile greatness.

The relations of the jobbers and dealers are clearly defined, and it seems but reasonable to believe that the jobber cannot have two points to his business needle, so to speak. In other words, that it is not well for him to job different lines of talking machines. Concentration pays him best and pays the manufacturer best, because where he has concentrated upon particular lines he can offer no substitutes to inquiries which may come to him from dealers developed by the manufacturer's national advertising. He cannot say, "I can supply you with so-and-so," but simply one product, and that product he talks, believes in, knows its value, and all his salesmen become imbued with the spirit of loyalty towards the particular product. That loyalty always makes for business advance.

That clearly defined conditions seem to have worked out in a satisfactory manner, and in our estimation there will be no radical changes in the relations of jobbers to manufacturers within the near future.

With the retail trade it is different, and there is an unmistakable trend in the talking machine world to sell such products as are demanded by the public. In other words, to follow the lines adopted by the great department stores to sell that which the people call for in the line of manufactured products. That would seem to be good, sound retailing, and it is following out the public service plan in an efficient manner, which mercantile emporiums must do in order to satisfy the public needs.

That is a fixed mercantile principle in all lines of trade.

It does not matter whether one has a special talking machine store, music store, shoe store or a general department store.

The same principle applies to all, and a number see no good reason why they should lose sales when a customer comes in and demands a special talking machine any more than a special brand of shoes or hats.

The party who enters a store and asks for a particular product had that product in mind when he entered the establishment, and, of course, the salesman may try to force a substitute upon him, but in the meanwhile he weakens his position as well as his energies by attempting to convince a customer against his will. It is getting to be more and more a question of merit backed by values. A product which is generally advertised, and which possesses unusual merits, has the decided call in the public mind, and the dealers will do well to sell that product; but if another product is sought, it would simply be good merchandising to follow along the lines of least resistance and supply those products which the public asks for and desires.

In the talking machine line, while there is no restricted territory, it varies very materially from the piano business where there is restricted territory, and the piano men are exclusive representatives within certain prescribed lines.

The talking machine retailer sells to all who may visit his emporium, and it therefore seems good logic to conduct a store along lines of satisfaction to the public in supplying the particular products which are called for. The dealer will unquestionably seek to follow lines which afford them increased revenues by making all sales possible. Therefore, the position of the jobber and the retailer, to our mind, is entirely distinct and separate.

WE have before us an advertisement put forth by one of the large dry goods companies in a Western city in which a \$100 talking machine is offered for twelve and a half cents a day, the daily payment being brought out in very heavy type to attract readers by reason of the low cost.

Such advertising does not tend to increase the value or prestige of the talking machine in the public estimation. In fact, in our opinion, it lowers its standing very materially.

To advertise an artistic product for twelve and a half cents a day is belittling it, and is lowering it to a point which is seemingly unnecessary and not warranted by present conditions.

The payments would amount to less than four dollars a month, and that means more than two years before the machine is paid for. The same offer also includes six double records. Now, is it good business to put forth this kind of publicity in behalf of the talking machine? We do not think so. Nor do we think that it harmonizes with the marvelous advertising put out by the great producing houses.

— DOME RECORD CASE —

Is constructed along different lines, being reinforced at the bottom with a nickel-plated metal support to keep the records in position. Holds 20 records accessible for instant use. Index shows just where each record is. Furnished with lock and key. Notice how the case

Swings Open, Displaying All the Records.

Furnished in 10" and 12", with a positive guarantee of satisfaction.

Ask us for more particulars to-day.

— W. D. ANDREWS, Buffalo, N. Y. —

We are also Victor Jobbers, carrying every model of Victrola in stock and an immense number of records. Our shipping service guarantees the quick delivery of goods—thirteen lines of railroads, five express companies, and also the Great Lakes boat lines. Include some records with your Record Case orders!

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., September 9.—Gradually the Columbia Graphophone Co.'s establishment is getting into a completed condition after several months of more or less upheaval due to the cutting through of Avery street to Tremont, next door. While this thoroughfare is not yet finished, the entire side of the Columbia Building is completed, and long signs extending down the length call conspicuous attention to the Columbia house. These signs can be seen practically through a long length of three streets. Both floors and the basement of the building have undergone a change, and all that the growing business under Arthur Erisman's management may be the further advanced. The basement is used for storage purposes and new racks and electric installations all add to efficiency. The long line of demonstration booths on the ground floor are done in French gray, which is the finish of the whole floor, and they are so constructed that the entire line can be thrown into one if required through the opening of windows between one booth and the next. There are two doors on the opposite sides of each booth, and ventilation is afforded through the opening of a window in the top, for the booths do not run up to the ceiling, there being a large open space at the top. New demonstration booths have been installed on the second floor and the long windows on the new Avery street side will give splendid opportunity to display goods. One advantage of the new arrangement will be that there is a room solely devoted to the housing and demonstration of foreign records, these in twenty-eight different languages being kept constantly. Manager Erisman reports that despite general business conditions and the changes going on inside which somewhat inconvenienced the office routine, the August business in Columbia outfits was exceedingly gratifying.

Arrange for Victor Demonstration Room.

The changes that have been going on for the past several weeks on the third floor of the Eastern Talking Machine Co., have been completed. This floor will be used exclusively for a Victor demonstration room, and as customers will have the benefit of adequate elevator service from near the entrance, the Eastern's many customers can now procure their goods under improved conditions. All the rugs throughout the store have been cleaned and refreshed, and the whole establishment has undergone quite an improvement from top to bottom.

Preparing for the Fall Campaign.

At this writing the staff of salesmen under Manager Silliman, of the Boston offices of the Pardee-Ellenberger Co., are at home and mapping out their routes for an early fall trip. Already there are large orders for the Edison disc outfits coming in to the Pardee-Ellenberger Co. from all over New England, and the prospect looks exceedingly bright for a good fall trade, according to Manager Silliman. Mr. Pardee was over here a few days ago, and was well pleased at the amount of business being done from the Boston headquarters. Mr. Silliman was able to take a fortnight off the latter part of the month, and with Mrs. Silliman went down to Narragansett Bay, R. I., for a vacation.

New Columbia Dealers.

Manager Erisman, of the Columbia, reports a large list of new Columbia dealers for the past month, and among those with whom he has signed up are J. G. Heichner & Sons of Holyoke, the Bon Marche Co. of Lowell, Charles Wing of New Bedford, and the Atherton Furniture Co. of Worcester. All of these have been sending in orders of so large a nature that they can be filled only in instalments. Another new Columbia dealer nearer home is C. Skelton & Sons, 312 Washington street, Newton, who conduct a chain of three stores in the Newtons. This concern has stocked up well in anticipation of good fall business.

Chickering's Department Enlarged.

As mentioned last month the talking machine department of Chickering & Sons was being considerably enlarged and improved. This work is now finished and a good part of the second floor of the artistic retail house of this large piano concern on Tremont street is now occupied for this branch of the business. The house originally started with the Victor outfits, but lately it has taken on the Edison disc line and with the necessarily added demand for goods more space was requisite. There are five sound-proof demonstration booths and a good-sized salesroom. The suite is finished in white and all the appointments are most attractive. When the work was completed, W. W. Longfellow, the manager, was able to take a short vacation, which he enjoyed down on Cape Cod. He is now back and ready for the fall business, which he expects will be gratifyingly good.

Returns to Business Harness.

Henry A. Winkelman, manager of the Victor department of the Oliver Ditson Co., is back home from his vacation, which was spent at Swan's

Island, Me., a place to which he and his family have gone for a number of summers. Business at this establishment is reported to have made an excellent showing during August, and the prospects are bright for a good fall trade.

Music for the Prisoners.

Florentio Constantino, the noted tenor, has made a gift of a Columbia Grafonola to Sheriff John Quinn, of the Charles street jail, and the sheriff will use it to entertain his prisoners. One of his bondsmen having surrendered him a short time ago in the suit against him by Oscar Hammerstein, Constantino was obliged to languish in jail for a time, and it was while there that he realized how much music might play in the lives of the prisoners. So he decided to furnish music for them through the means of a Columbia outfit.

New Quarters for Walter Bates.

Walter Bates, who has been located farther down Summer street for some time, has now moved up into the retail section of the city, and within the past few days he has got firmly settled in his new quarters at 63 Summer street. Mr. Bates has large floor space on the second floor, and with many conspicuous signs displayed on the outside there is little danger that one will not be able to find the place. The interior is comfortably fitted and there is a large stock of the Edison disc machines, Columbia and Victor outfits on hand, so that a prospective purchaser has a wide variety to select from. The location of Mr. Bates's warerooms should prove of advantage in building up a good trade.

E. F. Taft's Vacation.

Manager E. F. Taft, of the Eastern Talking Machine Co., is planning to go away on a brief vacation shortly. His trip will necessarily be short as his immediate attention is being devoted closely to business.

Arborway Pharmacy to Sell Talkers.

The Arborway Pharmacy, which is conducted by L. J. Murray, is one of the latest places to handle Columbia outfits in the outlying sections of the city. Mr. Murray has a fine selection of the leading types, and as an inducement to business he has opened a voting contest, and a handsome Columbia Grafonola is one of the prizes that is offered.

Winston Churchill and the Dictaphone.

At the office of the Columbia Graphophone Co., it is learned through Manager Erisman that one of the latest distinguished personages to appreciate the value of the Dictaphone is Winston Churchill, the well-known novelist. Some time ago Mr.

EDISON DIAMOND DISC PHONOGRAPHS

Are conceded to be the greatest sound reproducing machines ever made and the country is going wild about them. You ought to have this line in your store and if you will write to

THE PARDEE-ELLENBERGER CO., Inc.

Boston, Mass.

New Haven, Conn.

you will secure the complete information regarding the qualities of this line and our plan for laying out your department for the general promotion of business that will eventually mean a whole lot of profits for you.

Send for this data today.

Real Music
At Last

Real Music
At Last

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

Churchill had his attention directed to the value of this device, and it did not take him long to become convinced that a Dictaphone would immeasurably serve him in his writing. So he came in touch with the Columbia people and a fine machine lately was expressed to his summer home at Winsor, Vt. Now Mr. Churchill sits back and lets the Dictaphone do his work for him as he carries on conversations between his characters of fiction.

Has Scored a Great Success.

"Billy" Fitzgerald, as all his friends know him, has been one of the faithful employes of the East-

W. J. Fitzgerald.

ern Talking Machine Co. for the past fifteen years. He began with the company as an office boy and has passed through successive stages of the talking machine business until to-day he is the manager of the wholesale department. A couple of years ago when the field for the Victor goods in public and private schools was first developed, Mr. Fitzgerald was one of those early on the scene, and he has been the medium of having Victor outfits installed in a great many schools in Boston and neighboring cities and towns. He has a wide circle of friends, and he has sold outfits to a number of prominent persons, many of them in official public life.

Exhibition of Cups Won for Dancing.

In the windows of the Eastern Talking Machine Co. there is on exhibition some of the cups which have been won by Mr. and Mrs. Otto F. C. Heineman, prominent instructors of the modern dances in this city. The cups were won by them at a recent carnival of dancing over in New York. In teaching dancing, the Heinemans use five Victrolas.

Showing New Machine.

Manager Erisman is showing to the trade a new Columbia machine, the Meteor, as it is called, which sells for \$17.50. It comes in between the low-priced machine and a higher one, and it is believed that there is a demand for it. Many dealers already have placed large orders for the Meteor.

Steinert Quarters Done Over.

The Arch street Victor quarters of M. Steinert & Sons are now entirely done over. Mention already has been made of certain improvements which Manager Royer contemplated. With the additional demonstration booths on the ground floor, certain other changes and a rearrangement of the second floor where Mr. Royer's private office is, these Victor warerooms are among the finest here.

Manager Royer has just returned from a second trip into Canada with two of his Arch street office staff, and on the auto trip this time, taken as before in his speedy Paige-Detroit car he was accompanied by Charles M. Urllass, one of his ambitious, hustling young men, and Charles Morrill, who was one of his guests on the other trip. And friend Royer knows the art of hospitality.

CO-OPERATING WITH TEACHERS.

Dealers Who Take Advantage of the Possibilities in the School Win Proper Reward.

The progress that the school product of the Columbia Graphophone Co. is achieving throughout the country is well exemplified in the accompanying illustrations taken at the Walton Street Playground of the Fitchburg, Mass., school district. The machine being used is a Columbia "Favorite" on a "Mobile," and the evident pleasure of the children speaks volumes for the popularity of the Grafonola in school work.

The machine being used by this class of pupils was sold to the school by Kidder & Davis, of Fitchburg, Mass., Columbia representatives, who are taking full advantage of the opportunities presented in the school field, and are giving every possible co-operation to the school authorities in the use of the machine and records. For the fall of 1914 Kidder & Davis have laid far-reaching plans in the direction of school sales, which will undoubtedly tend to further increase the popularity of Columbia school product in Fitchburg. In the picture herewith the pupils are performing a folk-dance to the music of the Grafonola under the guidance of Miss Isabel Dennett, a teacher in the Fitchburg schools, who is an enthusiastic admirer of Grafonola music in school work.

Columbia Favorite on Mobile for School Use.

Dancing to Music of the Grafonola in a Fitchburg School.

The largest manufacturer of
Talking Machine Needles
is located in the United States

To be exact, the plant is at Lowell, Mass., one of the biggest manufacturing cities of the country. It was in 1870 that the needle business of W. H. Bagshaw was established, and the first talking machine needles were made by him. The business has steadily grown, until our shipping record reached the tremendous number of over 63,000,000 needles in 10 days, and even then our capacity was not taxed to its extreme. Every needle a Bagshaw-made quality needle—which means the best in the world at any price.

W. H. Bagshaw, Lowell, Mass.

Pioneer Maker and Largest Manufacturer of Talking Machine Needles

Columbia instruments: A line to fit the pocket-book of every possible buyer of a talking-machine. Columbia records: A line from which every dealer can meet the musical preferences of anyone who owns a talking instrument.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

MORE ECHOES OF THE RECENT JOBBERS' CONVENTION.

Further Impressions of the Meeting at Atlantic City Set Forth by Benj. Switky, the Prominent Victor Distributer—The Jobbers' House in Order and Some Views of Efficiency—Real and Imaginary Competition and Its Effect on the Business of the Dealer.

Part 2.

In last month's contribution I mentioned as one of the benefits of convention attendance the social and intellectual intercourse with other men in the same line of business.

As we strolled along Atlantic City's wonderful boardwalk we discussed the sacrifice of time required to attend the convention, also the possible loss sustained by one's business during the absence of the executive.

In this connection one of my fellow-jobbers delivered himself of the following forceful epigrammatic opinion:

"Any jobber whose business is in such shape that he cannot be spared for a few days would do well to call in the service of an efficiency expert!"

The truest words ever uttered! They cannot but interest the jobber and dealer alike; in fact, they are applicable to any business. Wherever the force numbers more than one employe it is the duty of the executive to surround himself with help so trained that at least one of them will fill the role of lieutenant well enough to substitute for the boss at least for a few days. But before one can enjoy the luxury of an acceptable substitute it is necessary to have the work of the business so systematized that others besides yourself will know how to handle it. This in itself is a great advantage. It means the elimination of haphazard guesswork. It means subdividing the work into several logical departments and training each employe to do the work of one or more of those departments effectively and conscientiously. It also means relieving yourself of the burden of a thousand and one details, and the placing of responsibility onto several shoulders so that routine work and even occasional extraordinary work and decisions will be handled through these channels without constant supervision by the proprietor.

One of the most successful means of raising the efficiency of an employe is by making him responsible for a certain branch or department of the work. Then follow that up by impressing on his mind that his salary will increase exactly in proportion as the need of supervision decreases.

Supervision costs money. The foreman of a gang of ten men receives his pay from the wages of those ten men. It means that eleven men must be paid for the work of ten.

And when the executive confesses that he cannot leave his business for a few days it means that he has failed to train his employes properly. It means that he is devoting his time to petty details, whereas he should be free to do the big things. It means that he is not getting out of himself all the efficiency and work which his business should receive.

There come times in the life of every man when, either through sickness or some other unfortunate cause, he is compelled to relinquish the

helm temporarily. Woe unto the business that cannot produce another hand trained sufficiently to take the helm and guide the ship!

It is a sad commentary on the ability and sagacity of the business man who had neglected the precaution of providing an understudy to assume his role in case of emergency.

It is likewise no compliment to his progressiveness if he keeps his business in such a state of chaos that it is momentarily threatened with loss or destruction because of his absence.

It is an injustice to his family and to all dependent on him. It is as bad as leaving no will after death. The man who has a profitable business should seek to perpetuate it for the benefit of his heirs. This can only be done by systematizing the business and properly training your help as to efficiency and loyalty.

Competition—Real and Imaginary.

"If the dealer would only stop worrying about the bad business which his neighbor is trying to take away from him!" This was the naive way in which one jobber expressed himself on the subject of instalment competition.

His remark was but one of the many clever utterances which it was my privilege to hear at the business session of the convention. His words struck me as being so forceful, so full of material for thought and reflection, that I cherished it and promised myself that in the near future I would make it the text of a sermonette.

"Stop worrying about the bad business which your neighbor is trying to take away from you!"

Some men will say, "Competition is competition. It is real. It means that you must meet it, fight it, overcome it, or yourself be vanquished."

I grant that competition is competition and cannot be ignored. But is it not a fact that many forms of competition against your neighbor prove more harmful to yourself than to him? Is it not a fact that the dealer who tries to put one over on the other fellow by means of still easier instalment terms proves to be his own worst enemy?

Every dealer should decide for himself the terms which he considers he can properly offer as a bid for business. He should take into consideration his own financial capacity as well as the length of time which he thinks can safely be extended to a prospective instalment purchaser. Having his schedule of minimum terms, he should steadfastly turn his face away from the lower terms which his neighbor may offer.

For example, because your neighbor offers \$200 Victrolas on thirty days' free trial is no reason why you should do the same. On the contrary, if you will watch and wait a while you will notice that he sooner or later withdraws his offer. There you have the answer why you should not imitate him. If it were a good scheme he would not discontinue it.

You may never know why he dropped the

scheme as if it were live coals; but he knows. You might guess if you think hard enough.

Because your neighbor offers the public \$15 Victrolas on such terms as nothing down and fifty cents a week is no reason why you should do the same. Those who have played at the game will tell you, if they wish to be truthful, that such inducements attract a host of incompetent and irresponsible buyers. The fifty-cent accounts—most of them—are the rottenest in the ledger. It costs too much to keep after them and the percentage of losses is considerable. If the customer cannot pay one dollar a week you should have nothing to do with him.

Sometimes competition is *not real*. There are times when the customer is bluffing you. No doubt you can recall an instance when you quoted a prospective customer \$10 down and \$10 a month on a certain type of machine, and he would say in surprise, "Why, So-and-so offered me the same machine for \$5 down and \$5 a month!" After you had told him that you could not lower your terms, have you not had him say to you, "Well, now, if you'll let me have it on the same terms as So-and-so offered it, I'll buy it from you"?

Did it never occur to you that the customer was not telling the truth? That he was playing one dealer against the other? If he considers So-and-so's terms satisfactory, why does he offer to give you the preference?

Competition is a fight, but we do not always use the right weapon for the battle. Many a victory can be won by good arguments, by salesmanship, by offers of superior quality in service. To lower your terms so as to beat the already unreasonable offer of your competitor means fighting with a double-edged sword. The harder you press the more you suffer.

It is better to do a modest, conservative, profitable business than to follow your competitor who blindly and vaingloriously scatters his goods to the four winds of heaven, reaping the whirlwind as his harvest, piling up assets that will never be convertible, dissipating his own capital, and dragging his creditors into the maelstrom.

Get together! Become intimately acquainted with your neighbors. Be friendly. Talk over these conditions. Agree on a sensible course of action, and pay no attention to the fellow who refuses to come into the fold.

"If the dealer would only stop worrying about the bad business which his neighbor is trying to take away from him!"

ALWAYS ON LOOKOUT FOR IDEAS.

A New Englander was talking to a fellow dealer from another part of the country, and said that he had visited many towns and cities. "I always make it a point in practically every city I visit to see the talking machine stores. I never yet have failed to pick up some new ideas pertaining to store arrangement, window displays, methods of handling business, or some other item of information that makes the visit well worth while. In return I endeavor to impart as much information as possible, when requested, to the dealer whose store I am visiting."

For
VICTOR DEALERS

Salter's Trade Maker, No. 19

This Cabinet will put "pep" and "ginger" into your sales instantly. It gives the appearance, effect and service of an expensive Victor-Victrola, and cuts the price in half.

You don't have to be a Sherlock Holmes to figure out its sales possibilities. Cabinet No. 19 and Victrola No. 9, as illustrated, make a wonderful combination.

Show Them Together and A Sale Invariably Follows

The cabinet is built to match, and it harmonizes in every detail with the machine itself. A counter-sunk top holds the machine firmly in place. The felt-lined compartments insure the owner of valuable records against their damage by scratching, warping, etc.

This and other practical, low-priced Salter Cabinets will draw a lot of *new trade* to your store. Write to-day for catalogues, folders, prices and full information, and rush your fall and holiday orders.

With Victrola IX

BELIEVE IN PROGRESSIVE POLICY.

J. W. Knox & Son, of Springfield, Mo., Have Built Up a Splendid and Growing Talking Machine Business in Their Territory.

(Special to The Talking Machine World.)

SPRINGFIELD, Mo., September 8.—An concern that has won flattering success in the talking machine field is J. W. Knox & Son of this city, who, starting only four years ago with a small stock of Victor goods have advanced to a point where they are at present recognized as among the most progressive talking machine dealers in the State.

J. W. Knox, founder and head of the company, has been in the sewing machine business since 1878. The present firm was started in 1903 and handled sewing machines exclusively until 1910, when the Victor line was added. A year later the

Columbia line was also taken on and the business grew to such proportions that the sewing machine end is now looked upon as a side line.

Knox & Son carry a complete line of both machines and records and are strong believers in original and persistent advertising, both through the medium of the newspapers and by cards and circulars. The accompanying illustration of the showrooms of the concern convey some idea of extent of the business handled.

WORKING ON THE "MILLIPHONE."

New York Inventor Plans Form of Telephone Exchange for Talking Machine Enthusiasts—Details Kept Secret for Time Being.

In a store in the Harlem district of New York City a shrewd inventor is quietly testing out his latest invention, which he calls the "Milliphone". It is really an automatic phonograph exchange, where you can drop a nickel in a slot and hear any piece of music, vocal or instrumental, you may desire..

The inventor is J. D. Millman. He got his idea from the switchboard of a telephone exchange, but he had to devise mechanism which in no way resembles that.

In the store where the "Milliphone" is being "tried upon the dog," are twenty-eight machines resembling phonographs. You sit down before any one of these. Before you is a book containing a list of about 3,000 selections, classified and numbered.

Above is a dial with four faces, each bearing numbers from 0 to 9. You select from the book the piece of music you desire to hear and set the numbers on the dials to correspond with its number, there being one dial for thousands, one for hundreds, one for tens and one for units. You drop a nickel in the slot and the machine begins to grind out the music.

Just how it works Mr. Millman will not tell; the mechanism is concealed, but he admits that, just as a telephone central has women operators to make the proper connections, so there are operators to connect the discs with the machines.

The inventor believes that this system of his will solve the problem of connecting a central phonograph exchange with every home in the city by means of electric wires, so that no one need buy phonograph records, but merely call up central and tell "her" to put on any music he may desire.

DANSANTS AS TRADE PROMOTERS.

(Special to The Talking Machine World.)

DES MOINES, IA., September 7.—Realizing the popularity of the modern dances and the part that the Victrola can play in the proper teaching of these dances, Chase & West, Victor distributors in this city, recently arranged for the holding of informal Victrola dansants on their wareroom floor, the success of which may be gleaned from the following notice which appeared in the leading newspaper of this city:

"Miss Ethel Veatch and Conrad Nagel gave four exhibition dances of the popular steps of the tango and hesitation on the main floor of the Chase & West store last evening. The music was furnished by a Victor-Victrola. The entire main floor and balcony were crowded with persons interested in the dances which have become so popular during the last two years."

Look good, be good and do good and perhaps you may make good.

*Great Opportunity Now For Dealers With New
Edison Diamond Disc Phonographs*

THE phenomenal success of the new Edison Diamond Disc Phonograph spells "money" for the dealer who does not need a telescope to see tremendous opportunity at his very door.

Its advent has astonished and delighted the music loving world and given the industry new life and renewed enthusiasm.

Here—at last—is an instrument that reproduces music with all the unblemished art of the original—with almost unbelievable tonal qualities—perfect, beautiful, incomparable.

Its selling qualities and arguments are without answer.

Just let it play itself into the hearts of your customers. Its music is simply irresistible.

Get in touch with us at once. Don't delay another day.

New Weekly Record Issues

INSTANT SERVICE TO ALL DEALERS

The New Weekly record service inaugurated by the Thomas A. Edison Co. is a great boon for the Edison dealer.

It brings your customer into your store every week—it brings him closer to you—makes him a real asset for you.

We can get the records ten hours after they are shipped from the factory at Orange. We get them first. We are prepared to give you **instant service**.

You can't give good service unless you get it. We are prepared to give it. Write or telephone to-day for information. Don't delay another day.

Everybody gets the "buy fever" when they see this handsome combination set up on your sales floor or in your window. It looks to be so much more expensive than it really is that people are easily sold when they find out the low price.

This Machine and Cabinet Match Perfectly

in design and finish. Felt lined compartments afford protection, records are easily accessible, there is a convenient filing index and many other features that simply argue their way in your prospective customer's pocketbook.

This is already a very popular combination, and the holidays will see them going like "hot cakes." Protect yourself against forgetfulness by getting out your catalogue and ordering *Now*. If you haven't a catalogue your postcard will bring one.

A HANDSOME DEPARTMENT

In the Progressive Store of House & Herrman, Wheeling, W. Va.—Possesses the Real Inviting Atmosphere Essential to Success.

(Special to The Talking Machine World.)

WHEELING, W. VA., September 10.—One of the most attractive Columbia graphophone departments in the State is that in the department store

Columbia Department of House & Herrman, Wheeling, W. Va.

of House & Herrman, Twelfth and Market streets, this city.

The department is located on the first floor and from the outside you see a dainty little shingled cottage done in brown and white with thatched roof and brick chimneys (just to top off the effect); tiny, diamond-glazed sashes complete the idea; vines are seen growing up the corner trellises and branch out over the shingles, adding color; boxes of geraniums, etc., adorn the window

ledges and growing flowers abound. Doors are in keeping with the entire construction. Stepping inside we view furnished rooms, complete and luxurious enough for any home. The walls are decorated in pleasing fashion with prettily designed wall covering; the draperies are equipped with blinds and window openings of exquisite color and design; your feet tread upon expensive rugs laid on hardwood floors. Then you can sink into the recline of a "comfy chair," and while dreaming into the eyes of some charming opera star (whose portrait adorns the wall) you may at once hear the voice of the living artiste until you are completely enraptured.

The clever arrangement is the idea of the department manager, Walker Allen, a dapper little Englishman with a host of friends both in this country and Great Britain, and who, in addition to a keen business sense has a most engaging personality. The Grafonola department is under the direct management of Allen D.

Browne, who has been most successful in developing the business.

In addition to a complete stock of machines at all times the department also carries about 12,000 records in its extensive record rooms.

VICTROLA FOR HIGH SCHOOL.

The high school at Warsaw, Ind., recently decided that a talking machine was decidedly essential to

its musical equipment, and it was accordingly arranged for the High School Glee Club to give a concert, the funds from this recital to be used for the purchase of a talking machine. The concert proved an emphatic success and a vote of the students resulted in the selection of a Victrola XI, to be purchased with the fund for the school's entertainment.

THE VICTROLA IN SONG.

"They Start the Victrola," the Title of a New Popular Song That Is Now Going the Rounds.

The recognized pinnacle of popularity for any article is to have a cigar named after it or to have a popular song written about it. In this connection it is interesting to note that there is a "Victor" cigar, and what is more important, a new popular song entitled "They Start the Victrola" (and go dancing around the floor) is now being whistled around town. The song, which is tuneful in a sort of way, is written entirely around the pleasure given by the music of the Victrola, the words being by Grant Clark and music by Maurice Abrahams. The song is being used extensively on the vaudeville and burlesque stages and is an original, interesting although unsolicited advertisement for the Victrola.

VALUABLE ADJUNCT FOR DANCERS.

(Special to The Talking Machine World.)

DAYTON, O., September 5.—The Soward Music Co., of this city, Victor representative, recently loaned a Victrola and some Victor records to the International Association of Dancing Masters for use at their convention, which was held in Dayton. In thanking the company for the use of the machine and records, Benjamin B. Lovell, president of the association, wrote in part as follows: "We find the Victrola a very necessary adjunct in teaching the latest dances, as the time is absolutely correct and their (the Victor Co.'s) collection of new dance records is wonderful."

**For quality, variety, interest and activity,

Woolworth Building, New York

OPTIMISTICALLY INCLINED IN ST. LOUIS TRADE.

Steady Improvement Over Corresponding Months of Previous Years Reported by Leading Houses—Jobbing Orders Show Increase—Expansive Trend in Remodeled Warehouses—Recital Hall for Silverstone Co.—Vacations at End and Activity on All Sides.

(Special to The Talking Machine World.)

St. Louis, Mo., September 9.—Local talking machine men have not shared in the pessimistic views of the business situation that have been so general. Neither war nor drouth has affected them seriously, although they have at times had doubtful views of the future, but as quickly as the period looked forward to has arrived these views have changed. Steady improvement over corresponding months of previous years has been shown by totals. The records of several stores are exhibited to show not only more sales but a higher average of sales than a year ago. Jobbing orders from the more distant trade territory have been excellent during the early fall season, and since the rains of the last three weeks the near-by trade has improved. The country within 22 miles of St. Louis has been the driest in the entire country all summer, and as it is largely a dairy country and garden produce district, it has improved rapidly even under late rains.

The record situation is rather peculiar just at present, in that there is practically no feature to the trade, although the volume is rather high. Popular songs, of course, are leading, but the variety of these is wide and they can hardly be called a feature. The dance craze did not survive the extremely hot weather, but is expected to begin again with the fall months. The European war has not created any demand for patriotic songs or music of those countries, as was expected.

There could hardly be better evidence of the expectations of the local talking machine trade than the material changes in stores that are under way or have been completed for the fall season. The Columbia store remodeling has been told about. The complete remodeling of the demonstration rooms of the Silverstone Music Co., with the addition of a concert hall, is under way.

Now comes Aeolian Hall with two large demonstration rooms on the handsome first floor of the

warehouses, heretofore held sacred to grand pianos and pipe organs. The Victrola department has been in the basement, but it has outgrown its quarters and the spacious room on the first floor is the result.

Next door is the Thiebes Piano Co., where four main floor demonstration rooms are being made into six, all of ample size for record demonstrations. The first rooms were planned before it was thought possible to get machine customers to the upper floors. Since the sale of a talking machine has assumed the dignity of the sale of a piano, all machine customers are taken to the fourth floor, where there are excellent demonstration rooms and an ample stock of three makes of machines, assorted as to price. The six rooms are designed for demonstration of records for a single customer, and during the busy season their need has been apparent time and again, when overflow record customers have seized upon every bit of available space on both the main and fourth floors.

The Story & Clark Piano Co. has been conducting a special sale of pianos to make room for the stock of Edison talking machines that have been ordered and which will be installed early in the fall.

Albert Engleman, of the repair department of the Silverstone Music Co., was married the first of the month to Miss Gussie Rumping.

E. S. Davis, of New Madrid, Mo., and Mr. Lutes, of Lutes & Feeney, Poplar Bluff, Mo., Edison dealers, were recent visitors here.

F. G. Seager, who has been manager of the Victor department of the Vandervoort Music Salon since it was established, has gone to New York, where he is employed by Silas Pearsall. A definite appointment of a manager has not been announced, but in the meantime Robert Shiverick is in charge.

Harry Levy, manager of the talking machine department at Aeolian Hall, spent his vacation in

the Ozark country, at Schlicht, Mo. Mrs. Levy accompanied him, and they enjoyed their time in surroundings that were truly rural.

Mark Silverstone, president of the Silverstone Music Co., has been suffering with a belated but violent attack of hay fever, which the fumes of the paint used in the remodeling of the interior of his main warehouse has not helped at all. Mr. Silverstone, to get this work done during the dull season, gave up his idea of a vacation and took relaxation by personally conducting his small son on frequent visits to the moving picture shows and imagining that they were visiting the countries shown. But the workmen got behind and the work will run well into this month, upsetting very generally the plans made for the opening of the early fall trade.

The chief feature of the new arrangement is a recital hall where there will be a continuous concert to demonstrate the Edison machine and the new records on the weekly list, or older numbers by request. The recital hall takes the place of two large demonstration rooms on the main floor and is built on the principle of a passenger car in outline, with the curved roof and ends. It will be furnished with large wicker chairs, which in informal arrangement will accommodate 30 persons, but there will be a reserve of small folding chairs which will permit almost as many more persons to be seated. On special occasions other seating arrangements can be made, as the warehouses are liberally supplied with folding chairs and mission settees. The decorations of the hall at the stage end will be of art glass in musical designs. This has not been placed at this writing; neither have the additional demonstration booths that are to be built for private demonstrations been constructed, so it will be some time before the warehouses are entirely ready for the fall campaign.

I. W. Reid, manager of the Columbia warehouses, returned the first of the month from a trip in southeastern Missouri much encouraged for the fall prospect. He had heard much of the damage of the drought in this section and the discouragement of the country folk and merchants, but he found the condition very different. Heavy rains that effectually broke the drought just before his trip had put everyone in good humor and had greatly improved the prospect for fall by insuring pastures and much fall produce. While the rains were too late, he learned, to be of much benefit to the corn, he was informed that if the fall was reasonably late the heavy pastures would greatly relieve the feed situation.

He also was much encouraged on his return from the East to learn of the reception by the trade of the remodeled Columbia store and of the boom it had given to the retail business, especially the record business, which had held up well during the remodeling period.

Sales Manager Duffy, of the Columbia warehouses, has drawn up an attractive announcement for his customers to call attention to the new store and to present the advantages of the Columbia line.

Because a man believes in the \$ sign is no sign he is superstitious.

It is quite possible to eliminate the sting from a joke and still retain its point.

EXCLUSIVE VICTOR DISTRIBUTER.

Koerber-Brenner Music Co. Gives Up Extensive Musical Merchandise Department to Give Undivided Attention to Its Rapidly Increasing Talking Machine Business.

(Special to The Talking Machine World.)

St. Louis, Mo., September 8.—The Koerber-Brenner Music Co. announces that its firm is now an exclusive Victor talking machine distributor. It is probably the largest house in the West confining its dealings to the jobbing of this line of goods. The Koerber-Brenner Music Co. was known for years as one of the leading small musical goods jobbing houses in this section, and its trade territory includes many Western States. During the cylinder talking machine days it added both Victor and Edison lines as a part of its small goods stock.

The first move toward its present position as exclusive jobber was the dropping of the Edison line about two years ago. Its stock of these machines was sold to the Silverstone Music Co., and Mr. Silverstone, a Victor customer of the Koerber-Brenner Co., gave up the Victors and became an exclusive Edison house. Recently the Koerber-Brenner books have shown that the business was running more and more to talking machines, and instead of a side line to musical merchandise they were making the small goods the side line. The business in this department has not a small one, either, as any person who has had the good fortune to see one of the handsome catalogs of the company must know. It carried an extensive line of all stringed instruments and novelties and commanded a high position in the Western trade. But this prestige did not blind them to the fact that the money and the growing business was in the talking machines, and so the small goods were sacrificed. Now the line is exclusive Victor goods, and because of the heavy stock it carries for its growing trade it requires as much ingenuity on the part of the stockkeeper to handle it as it did when there were 1001 items

of small goods. Both Mr. Koerber, president and treasurer of the company, and E. C. Rauth, vice-president and secretary, have mastered all details of the talking machine trade and have gone to see the instruments made in the factory, and are enthusiastic believers in their line. Mr. Rauth has for several years been prominent in talking machine jobbers' association work.

NEW COLUMBIA "METEOR."

Latest Addition to the Line of Columbia Machines to Sell at Low Price—Some of Its Interesting and Distinctive Features.

The Columbia Graphophone Co. announced last week an addition to its comprehensive machine line in the nature of a machine designated as the "Meteor," which will retail at \$17.50. As will be

The Columbia "Meteor."

seen by the accompanying illustration, this machine, which was built to meet the demand for a Columbia machine to retail at less than the "Eclipse" at \$25, is entirely in keeping with the attractive appearance of the many other machines in the Columbia line.

In a circular sent out this week the following constructional specifications are noted as applying to the "Meteor":

Cabinet: quartered golden oak; measurements, 13 inches wide by 14 inches deep; metal finish: all exposed metal parts heavily nickel-plated, with exception of tone-arm bracket, which is japanned; motor: one-spring drive, non-varying, non-vibrant;

motor-control: speed regulator operated on graduated dial combined with start and stop device; needle equipment: 200 full-tone needles; tone-control: Columbia tone-control leaves, operated by a button in the front pilaster, also by variety of needles; tone-arm: new bayonet-joint tone-arm of one-piece, seamless, drawn-tapered tubing; reproducer: with smooth aluminum diaphragm.

NEW INCORPORATION.

The Religious Picture Corporation, New York City, has just been incorporated for \$30,000 by F. D. Stoba, W. P. Powell and A. W. Britton, for the purpose of carrying on a moving picture and talking machine business.

ARTHUR D. GEISSLER RETURNS.

Arthur D. Geissler, vice-president and managing director of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, arrived in New York last week on the steamer "Campania," after having been marooned abroad for a few weeks owing to the war. Mr. Geissler, who was accompanied by Mrs. Geissler, passed through a number of annoying experiences, which made the Statue of Liberty in New York harbor a most welcome sight.

OPENING FOR TALKING MACHINES.

In an informative article in last week's *Printers' Ink*, under the title of "European Trade in United States That Is Subject to Capture," a writer points out that Europe sent us last year only \$35,000 worth of talking machines and phonographs, and continues as follows:

"On the other hand, the music loving Latins of the Pan-American countries have been wont to distribute their purchases of talking machines and records among American, English, French and German houses, whereas henceforth American interests should have almost a monopoly of this business."

NEW YORK TRADE IN SATISFACTORY SHAPE.

Local Jobbers and Dealers Report that Business Is Keeping Up Well Despite Setback Caused by War Situation—Everyone Optimistic Regarding the Outlook—What the Various Concerns Are Doing to Capture Sales—New Dealers Enter the "Talker" Field.

The talking machine trade in local circles the past month has been generally satisfactory, though here and there some of the dealers report a falling off of business as compared with last August, due no doubt to the direct influence of the European war on their clientele. As a matter of fact, practically all lines of trade in New York have fallen off the past month, some materially and others in a lesser degree. In view of the existing conditions as a whole, the "talker" trade is considerably ahead of the average mercantile line, and as one distributor aptly put it, "bears a charmed existence."

The European war is undoubtedly exercising a more apparent influence upon New York business than any other city in the country because of the intimate relationship existing between so many firms in this city and the countries engaged in conflict, in addition to the fact that New York is by far the greatest import and export center in the country and therefore the first to suffer from any cessation or lessening of this trade. Dealers in the adjoining suburbs who cater to a clientele consisting largely of factory workers in several instances report a direct loss of business and collections as a result of the war abroad, this influence being caused by the closing of factories in near-by towns whose shipments to European markets formed an important factor in their business. On the other hand, talking machine dealers in residential cities have had no occasion to feel the effects of the war and report a very gratifying August business, in most cases ahead of that of August, 1913.

The Outlook Is Encouraging.

The outlook as a whole is decidedly encouraging, as jobbers and dealers unite in the prediction that this fall will be one of the most prosperous seasons in the history of the industry. September business has already started in strong, and there is every indication of the record business in particular breaking all high-water marks. Aggressive advertising campaigns are being planned by the active members of the trade, and judging from the care and consideration being given this publicity, the advertising of the local trade the next few months will be worthy of particular attention.

It is the consensus of opinion among the leading jobbers that the small dealer will show the largest increase in business this fall, rather than the department store or the very large retailer. The small dealer has been conserving his energy and efforts for the fall and winter seasons, and as a result has started his campaign with vim and vigor. He has not overstocked during the spring and summer months, and is therefore in a position to place substantial orders for machines and records and, what is more important, is ready to dispose of these shipments promptly.

Why Bolton Is Enthusiastic.

R. F. Bolton, manager of the Chambers street headquarters of the Columbia Graphophone Co., 89 Chambers street, is enthusiastic over the fall outlook, basing his optimism on the orders now on hand and the results accomplished the past few months. Commenting on business conditions, Mr. Bolton said: "We have every reason to feel gratified with the prospects for fall and winter trade, as our summer business was excellent and the first week of September has been up to all expectations. Our August trade held its own with August, 1913, which, in view of the conditions resulting from the war, is a better report than the statement may indicate. Our business last month was of a somewhat higher grade than that closed the corresponding period last year. The new 'Meteor' machine introduced a few weeks ago is meeting with a splendid reception, and our dealers predict a banner sale for this machine during the next few months."

Blackman's Good August Month.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street,

Victor and Edison cylinder distributor, is confined to his home with a serious attack of typhoid fever. Although Mr. Blackman is on the road to recovery, it will probably be more than six weeks before he has convalesced sufficiently to resume active duties. In Mr. Blackman's absence Vice-President Caldwell has been directing the destinies of the Blackman Co., and the activities of the company's dealers is well evidenced by the fact that August business showed a nice increase over that of last August in both machines and records. The No. 10 Victrola is proving a special favorite with Blackman dealers, who are presenting the merits of this machine in an impressive and result productive fashion. The Blackman Co. has on its books many comparatively small dealers, and it is encouraging to note that these dealers are placing advance orders that average up considerably higher than those placed at this time last year.

New Edison Shop Near Completion.

The new Edison Shop at Fifth avenue and Fortieth street is rapidly nearing completion and all indications point to its being ready for formal opening by the first of next month. As the new home of the Edison products, this building will be one of the centers of the local retail trade, and the high standards being maintained in its interior and exterior decoration will be readily appreciated by the shoppers on Fifth avenue, who are keenly alive to the value of dignity and refinement in preference to the gaudy and the glaring. The location of the new Edison Shop is most advantageous, and the opening next month will be in time to reap the opportunities of the usual Fifth avenue fall trade.

Cowperthwait's Expanding Trade.

One of the many Columbia representatives in this city which is closing a very fine business is Cowperthwait's, the prominent furniture house, which is carrying the Columbia line in both of its stores. Under the able management of Edward Wooley, who is in charge of the departments at both stores, Columbia sales have steadily increased from the first week the departments opened and, backed by a forceful advertising campaign, Mr. Wooley is planning to make the fall a winner in every sense of the word.

New Victrolas Favorably Received.

"The new Victrolas X and XI are being most favorably received by all our dealers and are praised by their patrons generally," remarked G. T. Williams, manager of the New York Talking Machine Co., 81 Chambers street, Victor distributor. "There has also been a good, live demand for dance records the past month, and with the return of the vacationists the call for this class of music will naturally be transferred to the dealers in the large cities, who have had a temporary lull in dance record music while the dealers in the country resort towns were securing the orders. The business outlook is most encouraging and all of our dealers are optimistic to a marked degree. Our August business showed a substantial increase over last August, and in that respect we continued our sales record since the first of the year, in that we have exceeded 1913 business month for month. When it is realized that 1913 was our record-breaking year, the true extent of the 1914 sales may be appreciated."

New Columbia Representatives.

Quite a number of new representatives in nearby and local territory have been added to the Columbia Co.'s books the past few weeks, including among others the following concerns: Ludwig Baumann & Co., 49 Market street, Newark, N. J.; F. C. Kraemer, 8 Lincoln street, Jersey City, N. J.; L. W. Caldwell, Troy, N. Y.; J. Solow, 1116 Avenue J, Brooklyn, N. Y.; Daniel Cantor, 917 Freeman street, New York, N. Y.

Ormes Succeeds Sol Bloom, Inc.

The Victrola store located at 366 Fifth avenue, which has heretofore been operated under the firm

name of Sol Bloom, Inc., last week changed its name to Ormes, and will be known by this name in the future. There is no change in the personnel or policies of the store, O. K. Liveright being the manager. The company formerly co-operated with another store at Fortieth street and Broadway, but this was closed recently, Mr. Liveright desiring to concentrate the business in the Fifth avenue store.

WILL SEND TRADE AGENTS.

Department of Commerce Announces Its South American Plans.

(Special to The Talking Machine World.)

WASHINGTON, D. C., September 8.—The Department of Commerce last week issued an announcement of the plans for the development of the South American trade. The announcement read in part:

"The department will promptly undertake the establishment of both a permanent and traveling force in South America. This force will consist of men familiar with the language, customs and business methods of Latin America, who have had practical experience in various lines of business carried on with Latin-American countries.

"Four of the department officers will be commercial attaches, for which provision was made by recent legislation. They will be assigned to Rio de Janeiro, Buenos Aires, Santiago and Lima. It is hoped to have these officers at their posts by or before October 1.

"In addition to these, six traveling commercial agents will be promptly dispatched to South America and will, in their travels, cover all the commercial areas of that continent. These will include specialists in hardware, textiles, lumber and other industries, and arrangements will be made also for a general study of any commercial and industrial opportunities that may open in favor of American interests."

CARD INDEX A GREAT AID.

C. S. Donaldson, chief of the consular division of the bureau of foreign and domestic commerce, has uttered a word of advice, based on long experience in public work in Washington. "Probably everyone," he declares, "can recall what a loss certain business concerns have sustained through the death or resignation of an important official. His fund of knowledge was wonderful, his recollection of detail was invaluable, which made his mental storehouse a tangible asset to the company. Recourse has even been made to insuring his life.

"A business house will do much better if it will insure the possession and preservation of the major part of that accumulated knowledge. The best storehouse for it is the card reference system, which places it automatically at hand for every emergency, and every forward step.

"In a large concern where it has not been developed I would suggest that the card index system be made most extensive, a running diary in fact of all the phases of transactions within and without. A new man comes into a concern as business manager and lack of knowledge of these things handicaps him and also causes him to lose valuable customers."

GAVE RECITAL FOR TEACHERS.

Manager J. D. Bunce, of Grinnell Bros. Branch in Hillsdale, Mich., Takes Excellent Advantage of Excellent Opportunity.

(Special to The Talking Machine World.)

HILLSDALE, MICH., September 5.—At the recent examination of the county school teachers, held in this city, J. Dwight Bunce, manager of the local branch of Grinnell Bros., took advantage of the opportunity to place a Victrola in the auditorium and give a recital that was much appreciated by the 148 teachers present. The tones of the Victrola filled the large auditorium and held the attention of the audience until the "Star-Spangled Banner" was played at the end. Following the recital a twenty minute talk on the value of the Victor in the schools was delivered by Mr. Bunce and aroused much interest.

New York Talking Machine Co.

81 Chambers Street, New York City

“THE COUNTRY’S GREATEST VICTOR DISTRIBUTOR.”

"The Player-Piano Up to Date"

That name sounds good, does it not?

Well, it fittingly applies to the latest work upon the player-piano. Every salesman can increase his earning capacity by a perusal of this book, and it should be within easy reach at all times. It is a sales booster.

A salesman can talk the player more intelligently and he can explain its parts convincingly.

Within the covers of this book is a fund of information which is valuable to everyone interested in the player trade, whether manufacturer, dealer, salesman or regulator.

The practical part relating to adjustment and use of pneumatic mechanisms is decidedly interesting.

The book is divided into five parts. Here is a summary of what each part contains:

- Part 1. The Fundamental Principles of Pneumatic Mechanism (an explanation of the physical laws involved, with their application to the matter at issue, illustrated with sketches, tables, etc.).
- Part 2. Practical Player-Action Building.
- The pressure-reducing apparatus or bellows.
 - The striking action (pneumatics, valves).
 - The motor.
 - The mechanism of control.
- Part 3. The Music Roll. Principles, manufacture, various types. Illustrated.
- Part 4. Adjustment and Care of Player Mechanism. Hints to makers, repairers, tuners and owners.
- Part 5. How to Play with Expression Any Mechanism.
- Part 6. A Description of the Leading Mechanisms Now in Use.

Increase your earning capacity by adding to your knowledge of player mechanism.

It will cost you \$1.50 if you live anywhere in the United States to secure this book, and if you are not pleased with it after examination it is a money back proposition with us. You will get your little \$1.50 returned to you as quickly as the book will be forwarded to you upon receipt of that sum at this office, but you would not part with it for \$1.50 after you have once seen it.

Take our word for it!

PUBLISHER

373 Fourth Avenue, NEW YORK

IDEAL UNION IN INDUSTRY.

Co-operation Between Employers and Employees the Modern Spirit in Business, Typified in Industrial Safety Movement.

The new spirit of American business is typified in the recently formed National Council for Industrial Safety, which is urging the mutual interest of employers and employees as the basis of the ideal union in industry. Robert W. Campbell, of Chicago, its president, has summed up its aims as follows:

"The last few decades have witnessed three distinct periods or epochs in the political, social, economic and industrial life of the American people which may be described briefly as feudal or paternal, individualistic and co-operative, the second being a swinging of the pendulum from one extreme to the other. As civilization has advanced each step has placed our life on a higher plane, until to-day we who are on the threshold of the co-operative epoch find more of humanitarianism, more of kindness, more of mutual helpfulness, and more of the spirit of brotherly love evidenced in every phase of life.

"Co-operation is, fundamentally, a right doctrine. Religiously, it may be found in the teachings of practically every sect, and socially, economically and industrially it is daily establishing itself more firmly as a basic principle in the activities of the people. It is no longer a theory, but a condition which must be recognized.

"Co-operation may, of course, be used for evil as well as good, but the forces of evil can never proceed very far under its banner, for selfishness, personal interest, greed and graft found in evil causes, in which those interested are after everything and willing to give nothing, are not compatible or consistent with true co-operation. It would also seem that the worthier the cause and the higher the purpose, the more readily does co-operation lend itself to its fulfillment. This has been clearly demonstrated in many ways, but in none more positively than in the present accident-prevention movement.

"The spirit of 'Safety First' is typically a co-operative one, and two years ago those most interested in accident-prevention work believed that some agency should be provided which might make possible the highest degree of co-operation between those engaged in the common cause of fighting preventable accidents, and which also might co-ordinate the work being done, as well as stimulate further activity.

"The National Council is purely a co-operative organization in every sense of the word, co-operatively formed, co-operatively supported by the dues of its members; co-operatively managed by its executive committee of fifteen and its larger board of directors comprising the men most prominent and most efficient in the safety work of to-day, and co-operative in its activities in that each member is extended an ample opportunity not only to obtain aid, but also to provide it, as employers who are interested in the welfare and safety of their men find it a privilege to give other members the benefit of their experience and knowledge secured through safety work already done.

"The aim or purpose of the National Council as stated in its constitution and by-laws is 'To promote the conservation of human life and its incidents in the industries of the nation,' or more broadly, 'Safety First—Individual—Industrial—Public.' In brief, the aim of the National Council is to provide an agency which may make possible a full measure of co-operation among its members and will stimulate greater activity along accident-prevention lines and will co-ordinate the safety work being done, thus as far as possible avoiding duplication of effort.

"Only a beginning has been made. The initiative in a movement of this character naturally rests upon the employer. The spirit of the times, legislative action and private conscience all are making early action more and more imperative. It is far better that such action should be taken voluntarily rather than under compulsion by legislation or of public sentiment to greater activity and to a larger effort in this humanitarian cause."

SECTIONAL RECORD CABINETS.

Ogden System of Record Filing Proves Most Convenient for Dealers—Cabinets That Grow as Needed—Signal System That Makes It Easy to Find Records—Other Advantages.

A talking machine accessory that is continually making new friends among talking machine dealers is the "Ogden" sectional record cabinet, made and marketed by J. B. Ogden, Lynchburg, Va. One of the chief advantages of the Ogden filing system is the fact that, being built on the order of the sectional bookcases that have long been familiar to the public, it has all the advantages of those pieces of furniture combined with a number of original features for this particular trade. The sectional idea attracts owing to the fact that, as the record library grows, it is possible to add section after section without having waste cabinet space in evidence or several record cabinets placed about the room. The cabinets are supplied with special top and bottom parts, and from one to four or more sections may be added at will, with the whole having the effect of being a single and complete piece of furniture.

A special feature of the Ogden cabinets that appeals particularly to the dealer is the signal system, distinctly original in character, and which makes it a simple matter to find any desired record in a few seconds. A drawer in the base of the cabinet is also equipped with an automatic reordering system that serves to aid the dealer materially in keeping his stock up to date. There are many other features of the Ogden sectional record filing cabinet worth knowing about.

ADVERTISING THAT INTERESTS.

The very striking and cleverly arranged publicity which is being carried in The Talking Machine World by the Koerber-Brenner Co., Victor distributor of St. Louis, is attracting considerable attention. It demonstrates that this house is getting after business in a thoroughly progressive manner, that it is "alive" to the needs of the territory which it covers, and this publicity imbues dealers with convincing proofs that an alliance with this house is one that will be most beneficial and profitable. An idea of the central position occupied by St. Louis as a shipping center is pleasingly illustrated in the map which appears in the Koerber-Brenner advertisement elsewhere in this issue.

DE ANGELIS IN CHARGE.

John De Angelis, a cousin of Jeff De Angelis, the comedian, has been secured this week to take charge of the talking machine department of the Cunningham Piano Co., Philadelphia, Pa., where the Edison is handled exclusively. Mr. De Angelis comes from Winnipeg and has represented the Edison Co. on the road.

Loose Leaf Photo Albums OF REAL MERIT

Loose-Leaf Album, Genuine Leather Seal Grained Covered, 50 leaves in each book. Black seal grain leather cover, flexible, silk cloth lined, gold stamped, open back, carbon black leaves, black silk cord. Telescopic tube expansion to almost double.

Our Complete Line of Photograph Albums enables the dealer to offer his customers albums of unsurpassed quality at the most reasonable prices. Our albums, both the loose-leaf and the permanent-bound styles, are constructed with great care and the best of materials are used. A loose-leaf album, our specialty, has so many good features that it is bound to grow. A book can be started with a small capacity and added to as the collection grows. Damaged leaves can be removed, leaves can be shifted.

We are making the most complete line of albums for **Victor, Columbia and Edison disc records on the market**, including the regular 16 or 17 pocket styles, and a new 12-pocket album, which adapts itself for use in the new cabinets with flat shelves. *Write for Full Particulars and Trade Prices.*

NEW YORK ALBUM & CARD CO., Inc., 23-25 Lispenard Street, NEW YORK

(Formerly New York Post Card Album Mfg. Co.)

A NEW FORM OF RECORD ORDER.

New York Salesman Is Handed a Few Bars of Music on a Scrap of Paper Instead of the Name or Number of the Record, But Runs the Clue to Earth in Short Time.

The live talking machine salesman must know the actual music on the various records in the catalog and be able to remember the airs, as well as know thoroughly the names and numbers of the new records and the artists who make them, as indicated by the experience of a New York salesman recently.

The salesman in question was approached by a young miss who tendered him an envelope which contained a \$2 bill and a small slip of paper on which was scored several bars of music, and which also bore the request that the record containing the music be delivered to the girl. The salesman studied the paper for a while and then took it to the pianist in the sheet music department adjoining, who played over the notes several times without affording a clue, for both pianist and salesman had ideas as to what record was referred to. The solution of the puzzle came when several of the most possible records were played over and it was discovered that the music, as scored, was found in the middle of the popular hit, "My Croony Melody." The solution appeared to be correct, for the record was given to the messenger and was not returned. Now the salesman is taking a course in sight reading as a further aid to his work.

RAVIS ELECTED VICE-PRESIDENT.

Philip Ravis, Well Known in Musical Merchandise Trade, Becomes Officer in New York Album & Card Co.—Plans Wide Distribution Throughout the Country.

Philip Ravis, well-known to musical merchandise dealers throughout the country, has been elected vice-president of the New York Album & Card Co., 23 Lispenard street, New York, manufacturers of talking machine record and photo albums. Mr. Ravis, who was connected with Buegeleisen & Jacobson, the prominent musical merchandise house, for eleven years, assumed his new duties this month, and is enthusiastic regarding the possibilities of the "talker" and photo album field.

Mr. Ravis returned this week from an extended trip, on which he closed arrangements with several travelers to act as representatives for the New York Album & Card Co., with headquarters in different cities that are the centers of their respective territories.

FRANK STORCK HEARD FROM.

R. B. Caldwell, vice-president of the Blackman Talking Machine Co., New York, Victor and Edison cylinder distributor, received a postal communication this week from Frank Storck, the well-known Victor dealer at Red Bank, N. J., stating that he was marooned at Munchen, Bavaria, with no hope of reaching a sailing port until transportation conditions improve.

C. J. IANNELL WITH LOESER & CO.

Now in Charge of Talking Machine Department of Prominent Brooklyn Store—Fall Prospects Excellent—Good Stock on Hand.

C. J. Iannell, formerly manager of the talking machine department of the Simpson-Crawford Co., is now in charge of the talking machine department of Frederick Loeser & Co., under E. Paul Hamilton. Mr. Iannell stated that the prospects for fall business in the Loeser department are decidedly bright with the higher-priced machines selling well. Careful ordering has also placed the record stock on a basis where it is possible to fill all record orders on close to a hundred per cent. basis.

NEW VICTOR MODEL XXV.

Latest Addition to the Victor Co. Line to Be Known as Type "A"—Some of the Features.

The Victor Talking Machine Co. announced this week a new addition to its machine line in the nature of an Improved Victor XXV, which will be designated as Type "A." This machine, which is used solely for installation in schools and educational institutions, is designed to retail at \$67.50, and embodies the following improvements over the Style XXV now on the market:

The turntable has been raised the same as in the Victrola types, making it accessible and easy to put on and take off the record.

The lid has a patent hinge, allowing it to be removed quickly and hung on the back of the instrument when being played, permitting the horn to be swung in any direction.

The shelf is hinged, so that it can be raised and the horn placed under the instrument safe and secure from damage when not in use.

The dimensions of the new Type "A" are slightly larger than the Style XXV now on the market.

Never let your mental reservation fall below the limit.

SILVERMAN WITH LANDAY BROS.

Well-Known Talking Machine Salesman to Act as Wholesale Representative for Prominent Distributors—Elaborate Wholesale Campaign Planned—To Be Vigorously Developed.

Louis Silverman, formerly connected with Thomas A. Edison, Inc., has joined the sales forces of Landay Bros., 563 Fifth avenue, New York, Victor jobber, as wholesale representative. Mr. Silverman, who is well known to dealers throughout Greater New York, is thoroughly familiar with the wholesale end of the "talker" business, and is well equipped to score a signal success in his new connection.

Referring to Mr. Silverman's appointment, Max Landay, of Landay Bros., stated that his company which had in the past handled a few select dealers' accounts in addition to the business of their own establishments, had greatly increased its facilities the past few months, and intended to make a bid for more wholesale business in proportion to its added facilities for handling these new accounts.

Mr. Landay stated further that the wholesale division of the Landay business would be taken care of by a separate and distinct organization that would take care of the dealers' accounts adequately and efficiently, with no desire to secure any more business than it could properly handle. Additional stock rooms of large dimensions have been erected at the Forty-sixth street headquarters of Landay Bros., for the use of the wholesale organization, and the Landay motor truck service will be used extensively in Greater New York.

The Victor Talking Machine Co. inaugurated its 1914 fall national advertising campaign through the medium of a striking center two-page spread in the September 5th issue of the Saturday Evening Post. Illustrated in colors, this advertisement was easily the most impressive in this magazine and served to attract the attention of readers from Coast to Coast.

UTILIZING THE WAR AS AN ADVERTISING MEDIUM.

How an Enterprising Talking Machine Merchant Can Attract Attention and Build Business from the Delivery of War News a la Phonograph—Appealing to the Greatest Interest of the Public in an Original and Effective Manner—Some Live Suggestions.

Now that the European conflict is nearing a crisis war news is more popular even than the tango, and not only between our citizens of the masculine gender do we hear heated discussions as to the ultimate result, but among the gentler sex as well. As a matter of fact, Uncle Sammy's whole durned family has given up the three step to talk war. Therefore, Mr. Dealer, it is distinctly up to you to bring forward some scheme whereby you may meet this condition and at the same time get some more money and new customers, both of which, believe me, are most desirable.

Did you ever mingle with the throng in front of a newspaper bulletin board and absorb the news as it came sizzling over the wire? If you have done this thing you already know how tense becomes the situation when a particularly overwhelming item is displayed, and how the crowd cheers and stamps in its wild enthusiasm.

If you would have the crowd perform similar stunts in front of your show window, Mr. Dealer, you will serve them with war news a la phonograph. It is not so much the fact that you are turning your shop into an information bureau that will attract attention, but rather the method employed. Anything savoring of novelty will always

draw a crowd, and because your war bulletins are spoken by a talking machine instead of being displayed in printed form, as is the usual custom, will act as a magnet toward a curious multitude, a great many of whom will eventually become your patrons.

This method of utilizing the current European disturbance as an advertising medium is not nearly so difficult as it would appear at first sight. My friend, John Jones, expert at the art of dispensing "talkers," goes about it something like this:

He has three large horns arranged with their bells protruding outside his window, as shown in the silhouette illustration accompanying this story. They are all connected to the sapphire pointed reproducer of an Edison Triumph phonograph. This reproducer is equipped with a very loud diaphragm and the records are made by a robust voice. As a result the volume of sound that issues from this triumvirate of brass trumpets can be heard from afar. He does not go to the expense of having a special wire installed from which to glean his information. He simply keeps the office boy hustling between the nearest newspaper office and his "talker" emporium, and the clerk with the robust voice stationed at the recording horn.

When a lull occurs in the stream of advices from abroad he runs off a few records engraved with martial music rendered by bands and orchestras representing the countries now at war. For instance, first will come a military march by the Coldstream Guards Band of London, England. This will be followed by a selection from the Garde Republicaine Band of France. The Strauss Orchestra of Germany will then play a national hymn, etc. This musical congress of nations will last until a new war bulletin is ready.

To illustrate how a phonographic reproduction of any happening involving the playing of military bands will make an instantaneous hit with the public

The Phonograph Bulletin in Action.

I will refer you to the Peace Jubilee in Philadelphia immediately following the Spanish War. An enterprising dealer of that city sent an operator out upon the street with an Edison phonograph and some blank cylinders to can the parades. While he was only successful to a minor degree—the records being very weak in volume—the fact that they represented a genuine procession in celebration of a national event, and not a laboratory imitation, made them sell like hot cakes, and hundreds more than he was able to procure could have been disposed of at a most satisfactory price. This being true, Jones says that if a dealer will give the public a few news items relating to the war, interspersed with good ringing tunes by European bands, he will draw crowds and make money, and I am inclined to believe him. What do you think about it, Mr. Dealer?

Now, to be perfectly frank, do you know exactly what the war is about? Are you in a position to give in a clear and concise manner a description of the causes leading up to the present conflict between the Teuton and the Slav? Can you tell your patrons in about four minutes' time all there is to know upon the subject, and do it in a manner so simple and yet so convincing that they will not only thoroughly understand, but remember? It would be fine, indeed, if you could do this, for then we would not be called upon to ask the aid of the manufacturers, as we are about to do. Unfortunately, however, the average talking machine dealer cannot talk war as successfully as he can sell records; therefore, we must appeal to the recording laboratories to do it for us.

In the interests of all concerned, I suggest that a talking record be listed at once setting forth in clear diction the causes of the present war. Have you paid particular attention to the way Harry E. Humphrey's voice sounds on a record? Have you listened to his speeches on the blue amberol, and his descriptions of operas on the reverse sides of Edison operatic discs? If so you will agree with me that Mr. Humphrey is the man to make this record.

Mr. Manufacturer, you cannot fail, I am sure, to realize, now that the matter is brought to your attention, how badly a record of this kind is needed. It will prove of the greatest possible assistance to the dealer in the sale of records for this reason, viz.: Every talking machine man is pushing foreign records, or at least he should be doing it, and when he puts a record of the March Lorraine, named for a French town which has been in the thick of the fighting between the French and Germans, upon the mandrel, the patron recognizes the title as that of a city within the war zone and

The first step to become a "BLACKMAN DEALER" is to send a few trial orders. "BLACKMAN SERVICE" will hold you.

BLACKMAN TALKING MACHINE CO.

J. NEWCOMB BLACKMAN, Pres.

97 CHAMBERS ST., NEW YORK

starts to ask questions. A general discussion of the European situation follows and finally comes the inquiry, "What is it all about, anyway?"

How decidedly satisfying to have that talking record to tell the story for him; not in the haphazard fashion he himself would render it, but in the sparkling and perfectly enunciated style of Mr. Humphrey.

"Oh, that's fine!" cries the patron enthusiastically after hearing it played. "I must have that by all means. Why, would you believe it, I never knew before I heard that record a thing about the fine points of the war. Yes, wrap it with the others, please."

That is the way it works out, Mr. Manufacturer, and do you not agree with me, now that I have endeavored in my poor way to make it clear to you that there is a crying need for such a record today?

It should be forcibly impressed upon the mind of every talking machine dealer at this time that the exploitation of selections rendered by bands representing the warring armies will bring increased business. There are many instrumental selections in the catalogs of the different record makers that are seldom given the attention they deserve because they are not played by the musical organizations of our native land. I know by experience, after an extensive investigation, that even now at this propitious moment foreign band records are not being pushed. Now that a great European war is in progress this neglect of foreign records is not only a grave error, but a detriment to big business.

Mr. Dealer, look over your foreign catalogs this very day; pick out the records of martial airs rendered by the bands now at the front with the various armies, embody them in an artistic booklet with a scrappy cover on it, together with a brief description of the history of each band, and send it out among your customers. Your business will take a mighty stride forward the minute this suggestion is acted upon. Take a chance and be convinced.

This booklet idea applies not only to Europe, but to Mexico as well. Owing to the fact that Carranza insists upon making ugly faces at our Uncle Sammy, that the American fleet is to remain at Vera Cruz for an indefinite period and that General Funston has asked for more troops the Mexican situation is still a subject of vital interest, and the demand for records by the Banda de Policia should be sent soaring upward by a little judicious advertising via the scrappy brochure route. I would certainly suggest, Mr. Dealer, that you reserve at least one page of that booklet we have been talking about for our neighbors on the other side of the Rio Grande.

All of us realize only too well that war is all Sherman said it was, and then some. However, if it is possible to utilize it as an advertising medium for the betterment of one's business it would be the worst sort of judgment to let the opportunity pass by unquestioned. Here's hoping that the old saying, "'Tis an ill wind that blows no one good," may prove true as related to the war and the "talker" trade.

HOWARD TAYLOR MIDDLETON.

NEW STYLE LONG CABINET

Just Placed on the Market—Designed to Match Victrolas VIII and IX.

The Long Cabinet Co., Hanover, Pa., has just announced a new style of cabinet for 1914-15 which is designed to harmonize with the Victrolas VIII and IX. The lines of the new cabinet are most graceful and it is highly finished, in keeping with the finish of the machine cabinets. The new cabinet, known as D70, may be had in mahogany, fumed oak, golden oak and weathered oak as desired.

In order that its dealers may take full advantage of the numerous endorsements it has received on behalf of its dance product, the Columbia Co. sent to the trade this week an imposing window poster featuring the text of these endorsements from prominent dancing enthusiasts in all parts of the country. Among the letters presented were those from Pavlowa, G. Hepburn Wilson, Vernon Castle, Joan Sawyer and others prominent in the terpsichorean art.

VICTOR EDUCATIONAL MATTER.

Interesting Literature on the Subject of Victors for the Schools Just Sent to Dealers—Some Convincing Figures by Mrs. Clark.

The Victor Talking Machine Co. sent out to its trade on Saturday a very interesting batch of literature devoted to educational matters that should not fail to prove of value at this time of the year, when the school season is going to commence. Accompanying this literature was an informative letter signed by Mrs. Frances E. Clark, the popular director of the Victor educational department, who pointed out the salient points of the literature sent to the dealers.

Probably the most significant phase of this publicity was the listing of 1,783 separate cities throughout the country that have placed from one to nearly 200 Victors in their schools. Every State in the Union, with the exception of Nevada, is included in this imposing list, and towns and hamlets that never found their way to the most detailed United States map own as part of their school equipment a Victor and a goodly library of records.

Mrs. Clark in her letter points out that more than 600 colleges, normal schools and universities are making the Victor a part of their work, many including it in their regular courses of study. It is also stated that Victors and Victor records have been used in over 100 large summer schools this season, and during the school year 1,300 demonstrations have been given in schools and Victor exhibits held at fifty State and national conventions by representatives from the Victor Co.'s educational department. Victor folk dance records have been used in 500 junior Chautauquas the past summer. This letter concludes with the suggestion that the dealers feature an educational window display during the next few weeks, and an illustration of a suitable one is presented, together with a list of the material necessary for its construction.

GETTING UP A SWAP.

"I can't afford to buy the lot."

"But you can have it for a song."

"If you really mean that we might dicker, I'll swap you a collection of phonograph records for it."—Courier Journal.

Pathésscopes

For The Schools

The illustration shows the first *Motion Picture Machine* designed and built particularly for School use. It consists of the "Popular" model *Pathéscope* for use with either direct or alternating current, or dry cells or storage battery, mounted upon a special *Institutional Stand* provided with rubber tired wheels and fitted with handles for the easy carriage up and down stairs in school buildings where no elevators are provided.

A hinged elevating baseboard is provided, with screw adjustment for centering the picture upon a screen at any height. The outfit, with 6' screen, lists at \$200 complete. Our new school circular "*Education by Visualization*" describes the instrument in detail, its uses in the school, and contains a list of suitable Educational Films for use with the *Pathéscope*.

Dealers will find this Instrument a quick seller to Schools, Churches and other Institutions.

A new Columbia

The Meteor

The announcement of this type has been delayed until we were prepared to furnish a low priced instrument of quality—one with all the ear-marks of Columbia value, and provided with exclusive Columbia equipment. The METEOR fulfills these requirements; it is a perfect musical instrument; reproduces the clear, full, natural Columbia tone.

It is equipped with

The exclusive Columbia tone-control leaves.

A powerful spring motor that may be wound while running, playing two records with one winding.

The Columbia bayonet joint tone-arm.

A Columbia full tone reproducer.

Ten-inch turn table.

A gradually tapering tone resonator running from reproducer to tone-control leaves.

The METEOR will attract to the Columbia line and to your store. It will in itself serve as a business getter, and create the record market you are looking for. And further—it will make for you satisfied customers and new friends.

A WORD TO THE WISE:—

Delay in ordering may result in delivery disappointments. Our supply will be limited up to January 1st.

No Glue in the Binding of the UFFNER Patented Talking Machine Record Album

Patented March 3d, 1914.

EACH envelope is bound into a metal slot, the slot being stamped out of a piece of metal, nickel-plated, the entire metal part being riveted into a wooden back. The method of binding insures the greatest of strength, it being impossible to break the leaves from the back. The album opens flat without cracking.

The only improvement in album making since the TALKING MACHINE industry started.

Pockets are of high-grade green material linen bound, while the outside covers are of ART CLOTH. Leather covered pull to prevent scratching of polished surfaces. Made in three styles for VICTOR and COLUMBIA 10 and 12-inch records, including the new EDISON disc 10-inch records.

Also made for the new Victor Cabinets Nos. 10 and 11, holding 12 records.

Samples furnished on request.

UFFNER ALBUM CO.
75-77 Grand Street,
New York.

TO OPEN TWO PHONOGRAPH STORES.

Concrete Evidence of Activity Prevails in the Twin Cities—Fall Outlook Is Excellent and the Spirit of Optimism Prevails Throughout Talking Machine Trade.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., September 10.—Two new talking machine stores will be opened in the Twin Cities about October 1 on a scale never before attempted in the Northwest, according to the promoters, the Minnesota Phonograph Co. The St. Paul store will be located in the old Raudenbush building at St. Peter and Sixth streets, which will be the retail center of the capitol city within a year or two, in the opinion of the real estate experts. This store will be under the management of William A. Lucker, whose present place of business is at 58 East Seventh street. This concern will be retained for a time and, for that matter, may never be abandoned. Victor and Edison goods will be handled.

The Minneapolis store will occupy the old quarters of the New York Central lines at 612 Nicollet avenue. It will be designed throughout by Purcell & Elmsley, famous architects, as an exclusively Edison shop. Lawrence H. Lucker will be the presiding genius. It has been suspected that there is a close business connection between both concerns, but if such is the case neither of the Mr. Luckers will admit it.

Victor goods are in great demand in spite of the war and all other depressing influences. W. J. Dyer & Bro., jobbers for the Northwest, are unable to meet their orders as promptly as they like,

and the Twin City retail houses, of which there are ten or twelve, find the volume of business growing upon them every month.

"Our Victrola department is a winner in every way," said R. O. Foster, of Foster & Waldo. "We are more than ever pleased with our experiment in establishing a talking machine department, as it never has failed to bring in a goodly revenue and to grow with each succeeding month."

Archie Matheis, head of the Talking Machine Co., has designed a Victrola window which is attracting attention. The theme of his design is "The New Features of the 1915 Victors." All the improved parts are shown separately, and from each is a colored silk ribbon leading to a card on the window bearing the name of the part. That the company is doing a nice business may be known by the fact that the total sales by August 13 had equaled the entire month of August, 1913.

Trade is working out Nicollet avenue, and while the Talking Machine Store three years ago was considered then to be a little far out, it is now in the best stretch of the Nicollet avenue retail section.

Columbia goods are selling well in the Minneapolis and St. Paul stores, and likewise in the country orders are going in for the Christmas stocks, which will be larger than ever. The August business, in spite of various drawbacks that have affected the general retail world, may have been reduced in volume of sales in the Columbia stores by these causes, but the books show a large increase over the totals for August, 1913, and it causes the local managers to wonder what they might have done had it not been for the war.

REMOVE TO ITS NEW QUARTERS.

(Special to The Talking Machine World.)

BOSTON, MASS., September 9.—The Arion Manufacturing Co., manufacturers of the Arionola, a popular-priced phonograph, has removed from 9 Doane street to its new quarters at 250 Devonshire street, this city. Some little confusion has oc-

curred, due to the association of the Imperial Phonograph Co. with the Arion Manufacturing Co., whereas both are entirely separate and distinct.

Chas. F. Sims is the general sales manager of the Arion Manufacturing Co. The accompanying illustration shows the trade-mark of the Arionola, which is placed upon all machines.

"Lives of 'lame ducks' all remind us,
That there surely comes a time
When the man who's slow, and slower,
Can't 'cough up' a single dime."

J. S. Cooper, Jr., has opened the first music store in Independence, Ore., where he will handle pianos, player-pianos, sheet music and Columbia graphophones.

LEXTON SPECIALTY CO., 216 West 99th St., N. Y.

BIG COLUMBIA-AEOLIAN DEAL JUST CONCLUDED.

Aeolian to Take Columbia Line—Long Term Contract Signed—Complete Line of Columbia Grafonolas and Records to Be Carried at Aeolian Hall and in All Aeolian Branches.

The Aeolian Co. has contracted to take on a complete stock of Columbia Grafonolas and Columbia records—straight through the line. The importance of this announcement becomes apparent in view of the well known fact that the Aeolian Co. has heretofore operated under an exclusive Victor jobbing contract.

Several months ago the Aeolian Co. decided to investigate the demand for Columbia products that was reported by its several branches and also to make a thorough examination into the quality and value of such goods, subjecting both machines and records to severe tests. The result is the contract which has just been completed between the Aeolian Co. and the Columbia Graphophone Co.

George W. Lyle, general manager of the Columbia Graphophone Co., when seen at his offices in the Woolworth building confirmed the trade report that the Aeolian Co. has decided to install a complete line of Columbia products in its New

York store and all of its branches. Mr. Lyle stated to The World: "The order for Columbia products placed with this Aeolian contract is one of the largest initial orders ever placed and it is pleasing enough to the Columbia Co. as an order for merchandise, but it is even more pleasing as carrying a very distinct and unmistakable significance of the change in the talking machine industry, which has been so noticeable during the past two or three years, namely, a desire on the part of the dealer to handle any line of merchandise that is in demand and has quality behind it. A change for the better in every way—for the customer whose convenience is best served, for every dealer in the business and for the industry as a whole."

He said he would have other important announcements to make in the near future concerning this movement whereby the talking machine business is rapidly reaching a merchandising basis.

THE CUSTOMER AS AN ASSET.

He Is a Valuable One to the Talking Machine Dealer When He Is Satisfied, When He Feels That He Is Being Treated Right—It Pays to Cater to Fussy, Particular People—It Is a Good Investment and Pays Good Dividends.

In the hurry to attend to many customers it is sometimes a little annoying to a dealer to meet one who is exceedingly particular about details. He is apt to style such a one "fussy" or "cranky." Yet that very customer, fully satisfied, may, and probably will, prove a more valuable asset than one who is not disposed to be particular. The shrewd business man is he who can handle each customer, whatever his or her peculiarities, with the utmost ease, deliberation and respect. A little study of human nature will show that the "fussy" individual is usually the most talkative one when fully satisfied, and that talk is more than likely to be in praise of the house that gave her most careful consideration.

One very prosperous business man in New York instructed all his clerks to call him whenever they got a hold of a "fussy" individual. No matter how busy he was, he kept himself open to wait on the "particular" customer, and so skilfully did he handle them and eventually turn them, one by one, over to "Mr. Smith" or some other patient salesman (who realized the difficult yet responsible task of being very considerate), that his house grew to large proportions because of the entire satisfaction everyone received who dealt with it.

One of the great steamship lines plying between New York and Liverpool has issued a series of printed instructions to all its employes aboard ship, and the dominant note is summed up in these significant words:

"The patrons of this line pay your salary and mine; there could be no ——— steamship line without patrons; therefore, it behooves every employe from the lowest to the highest, to treat every patron with the utmost respect and attention and never enter into any dispute; if a difference arises immediately seek a superior officer and introduce the patron to him and let no word or look show anything but courtesy and respect."

In the phonograph line it is equally true that a satisfied patron is a valuable asset, says the Edison Phonograph Monthly. It pays to satisfy every customer; if you have sold an Edison machine follow it up and see that it is giving satisfaction; if you get a hurry-up request by telephone or otherwise, be sure to follow it up yourself later in the day and see that it has been filled. If the party has a telephone, call her (or him) on 'phone and see that satisfactory service has been given. If certain records are wanted on a particular day or hour follow them up and see that there is no slip-up in the service. Particular requests should never be lost sight of till satisfaction is guaranteed and carried out to the letter.

Sometimes it seems as if these little matters were not worth the care and attention of those who

occupy responsible positions in a house, particularly when the busy season is on. But that's a mistake; they are highly important, a personal touch, a personal message from someone responsible in the house makes a customer satisfied. It creates a confidence in the house that nothing else can do.

Another feature that a satisfied customer appreciates is to have some forethought given his or her needs. If you know of some reason why a certain record will be acceptable on a specified occasion, let your forethought be brought to the patron's attention and ask if it may not be included in the order or sent by special order.

There are a hundred and one ways of studying how to make satisfied customers, and it is just as profitable as to study how to keep a good balance in the bank.

ENJOY LABOR DAY PICNIC.

Employees of Stewart Talking Machine Co., Indianapolis, Spend Lively Day at Outing.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., September 12.—Fifty-three employes of the Stewart Talking Machine Co., distributors in Indiana for the Victor Talking Machine Co., attended the annual Labor Day picnic given by the Stewart Company in a grove along one of the Hoosier capital's wooded streams. The party started out from the Stewart headquarters, 221 North Pennsylvania street, early Monday morning in automobiles. George E. Stewart acted as master of ceremonies, and arranged the entertainment for the employes. Chickens were cooked over open fires. One of the features of the day was the ball game between the married men and the single men. W. M. English, traveling representative of the Stewart Company, scored the first run. The single men whipped the benedicts to the tune of 24 to 16. Flowers and candy for the women and girls were supplied at the store. W. S. Barringer, manager, reports that everybody "had the time of his or her life."

TALKING MACHINES IN FAVOR.

In an article on the trade and industries of Syria, published in the September 7 issue of Daily Consular and Trade Reports, Consul-General W. Stanley Hollis, stationed at Beirut, Asiatic Turkey, gives a series of interesting figures relative to the imports and exports at this port during 1911 and 1912. These figures show that during 1911 talking machines to the value of \$2,650 were imported at Beirut, while in 1912 this total was practically doubled, the value of these imports reaching the sum of \$5,140.

Time may be money, but it hangs much more heavily on our hands.

SAVES
time, space and money.

VISIBLE
Dustproof, Warp-proof.

FILING
Finding and Reordering in one-fourth usual time.

Woolworth Building, New York**

HOW JOBBER CAN AID DEALERS.

Advertising Suggestions and Sales Helps Assist Greatly in Arousing the Enthusiasm of the Retailer, Says Daryl H. Kent, Secretary of Kent Piano Co., Well-Known Edison Jobber of Vancouver.

We have been asked to express our views on the above phase of the business.

At the outset we would have it understood what we say will apply mostly to the small dealers in sparsely settled parts of the country, where communication is not of the best, and where distances are somewhat of a drawback.

In British Columbia, for instance, owing to its vast area, the population is very much scattered, the great majority of the entire population of the Province living in the few large cities.

The small dealer, therefore, is somewhat handicapped by reason of distance from the larger centers, poor means of transportation, and in many cases by reason of lack of enthusiasm in the goods that he may be unsystematically handling.

To work up such enthusiasm one of the best means is to send a representative to visit the people at stated times, but this is not always, in a country such as British Columbia, a paying investment for the jobber, as the time and money expended do not reap anything like a reasonable return.

In certain sections we think it a good plan to ascertain what the dealer is doing to advertise the Edison goods, and to offer suggestions to him the jobber will write a series of ads based on his knowledge and experience in such matter, with the request that he have them inserted in the local or close locality papers, writes Daryl H. Kent, secretary of the Kent Piano Co., Ltd., Vancouver, B. C., in the Edison Phonograph Monthly. A dealer, who in a great majority of cases in this Province handles all sorts of commodities, very often does very little advertising, and if he does it is in a general way, so he has to be enlightened on the good results to be obtained by specific ads. This is where

the jobber can be of use and mutually helpful, providing, of course, he has the co-operation of the dealer.

Another dealer's help is to circularize him from time to time with other than the regular notices and literature sent him from the Edison Co., as we are of the opinion that a great deal of this "from Edison to dealer" printed matter goes to waste, and we are wondering whether if this same matter, mailed by the jobbers in their own envelopes, and in some cases on their own stationery, would not accomplish more good. However, the jobber can circularize the dealer, often recommending certain machines or records just to hand, and touching on other points that from time to time turn up, with good results, mutually beneficial.

The jobber can, where possible, secure mailing lists from the small dealers, and scatter literature among them, by mail direct, at the same time mentioning the dealer in the locality where the goods can be had, and thus be the means of securing added business for both himself and the local dealer.

The jobber might also take it upon himself to educate the smaller dealers into the value of canvassing, but this means up-hill work for some time, as in most of the small towns one man and a boy run a general store, and to make this one man realize the advantages of extra help, while he or his extra help could get out and sell phonographs, is somewhat of a large undertaking.

MULTI-PLAYING NEEDLE

Introduced by the Sonora Phonograph Co. of New York—Some of Its Salient Points.

The Sonora Phonograph Corporation, 57 Reade street, New York, announces the Sonora Multi-playing needle, which is a jewel needle playing lateral-cut records without changing the needle. Furthermore, it is guaranteed for three months. Geo. E. Brighton, president, in commenting on the Sonora multi-playing needles, said: "It has

The Multi-Playing Needle.

been five years since the Sonora Company introduced the first perpetual jewel disc record needle and during which time we have been working to perfect it. We recently succeeded in doing this and the Sonora multi-playing needle is the result. The only trouble we have had so far is filling orders for the demand is so large. A number of our retail customers at our retail store, for instance, buy five at a time, so the possibilities of big sales with the retail merchants of the country, rest only with the dealers themselves."

HAS CAPITAL STOCK OF \$1,000,000.

The Pure-O-Phone Co. has been incorporated under the laws of Delaware with a capital of \$1,000,000 for the purpose of manufacturing and dealing in talking machines and records. The incorporators are: W. G. Taylor, Clarence J. Jacobs and Chas. B. Bishop.

GOT A NEW "HUNCH."

Old-Time Inventor of Motorless Talker, Now in Insane Asylum, Tells of His Latest Invention.

A gentleman was visiting an insane asylum. He met a man in the hall.

"Who are you?" asked the visitor.

"Me?" said the man. "Why, I'm an old-time talking machine man who invented a motorless talker." It was a big thing but the powers that be were jealous of my success—but I ain't crazy. Not on your life. All the rest of them are crazy, but not me. I've got a new invention that outdoes the talker, one that will make me so rich that John D. Rockefeller will look a poor man beside me."

"What is it?"

"A patent fly-catcher. Greatest thing in the world. Here, I'll show you how it works."

The man took a sheet of paper and drew a bird-cage. "That," he said, "is a parrot's cage—just a common cage—but you observe that on this side there is a door with a heavy iron knob, and that there is another door on the other side, also with a heavy iron knob.

"Now you see, you take this parrot's cage and put it on a pedestal fourteen feet high, the pedestal standing on a marble slab. Then I place a ladder on this side, reaching up to one door, and a ladder on the other side, leading to the other door.

"This is how it works. The unsuspecting fly comes along and climbs up the ladder on this side. It opens the door by means of the iron knob, walks through the cage and opens the door on the other side. Then it starts down the other ladder.

"That's where we catch him!" the inventor continued, excitedly. "That's where the invention is. That's where I shall get my money. You see, the fourth rung is missing in this second ladder, but the fly doesn't know it, and falls on the slab and breaks his neck."

The gentleman goat gets there. Yet he often is guilty of overdoing the butting act.

The fellow who depends entirely on luck isn't to be depended upon.

Victor Manager Wishes to Change

Several years' experience in New York City and vicinity, but now managing large retail department in Middle West. Is familiar with department store detail, and has proven ability. Address Box No. 1,000, The Talking Machine World, 373 Fourth Ave., New York.

PARTNER WANTED

With one to five thousand dollars, to develop profitable and growing talking machine business. Present stock \$5,000 all clean. Fine store and location. Victor and Columbia agencies. Address H. C. Williams, 6312 Ashland Ave., Chicago, Ill.

"DUSTOFF"

RECORD CLEANERS

In selling your customer a "DUST-OFF" you render a distinct service your customer will remember you by. "DUSTOFFS" represent the best the market affords in high grade selected material which ensures their remarkable merit—getting into the minute sound grooves and removing the dust and dirt without scratching.

FOR ALL MAKES OF RECORDS
Adds life to records—and adds more profits to your business. Two models:

THAT THE DEALERS ARE INTERESTED

In the Pathéscope Is Evident from the Letter Reproduced Below—Is Proving a Valuable Side Line for Talking Machine Houses.

The general attention being bestowed on the Pathéscope, the recently introduced home moving picture machine, is well illustrated in a rather

7/21/1914.

The Pathéscope Exchange,

Philadelphia,

Pa.

Kind Gentleman:

Having Noticed A Great Deal Of Writing And Excitement Concerning The Pathéscope Machine As Advertised In The Talking Machine World. Until I am Somewhat Interested In It. I Would Greatly Appreciate You Making Me A Clear Explanation Of This Machine And Its Films What Length Films Do They Use In This Machine And What Makes The Picture? As I Believe The Manufacturer States That There Is No Electric Current Used In Its Operation .. Also Give Me The Correct Address Of The Manufacturer Whom I Put This Machine Up. And Where Should I Apply For Application As To Become A Dealer In My Territory? Please Send Me One Of The Catalogs Of This Machine Explaining

It Thoroughly From Beginning To Its End Also Showing Photographs Etc. What Do These Machines Retail At? How Do The Manufacturer Protect Its Dealers? Do They Also Allow Them To Sell On The Monthly Payment Plan? As From All Ideas I Can Secure From It As Explained In The Talking Machine World I Believe This Is A Wonder Come Here To Stay With No End To Sales Through The Dealers.

Hoping You Will Please Give My Letter Your Careful Attention. Also Looking Forward For Your Catalogs And Literature Etc.,
Yours Respt.

unique letter of inquiry which the Philadelphia headquarters of the Pathéscope recently received from an interested talking machine dealer. Incidentally, this letter, reproduced above, is conclusive evidence of the result-producing powers of talking machine World advertising.

TO HANDLE EDISON DISC LINE.

The Pianostyle Music Co., 238 Livingston street, Brooklyn, N. Y., which recently started in business in the retail selling of music rolls, has added Edison disc phonographs to its line. Frederick Harlan is vice-president, while A. R. Leary is treasurer. Both men have had considerable experience in the various lines which they are now specializing in, and this bids well for the success of the house.

INCORPORATED IN IOWA.

The Chase & West Talking Machine Co., of Des Moines, Ia., with capital stock of \$125,000, has just been incorporated by Charles R. Chase and Lewis J. Syle.

Many a man lives by his wits who never wrote a joke in his life.

Back Copies of the World for 1906 and 1907 Desired.

If any subscribers have copies of The Talking Machine World for 1906 and 1907 kindly communicate, stating price for same. "Historical," care of The Talking Machine World, 373 Fourth Ave., New York.

TRADE NEWS FROM LOS ANGELES.

Talking Machine Takes Place of Speaker at Political Meeting—Happenings of Month.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., September 7.—A novel demonstration of the possibilities of the talking machine was given in this city recently when, prior to the primary election of State and county officers, a candidates' day was given at the beautiful Hooker Gardens on West Adams street.

Candidates from all over the State attended and each was expected to make a brief talk from the platform. When the turn of the Hon. Joseph Knowland, candidate for United States Senator, came he was not present, but as the rules of the "day" called for a speech by him his place was taken by an Edison Home phonograph loaned by the Southern California Music Co. Two records made in Oakland by Mr. Knowland were sent here and thus the people were enabled to hear him even if they could not see him. The records were very clear and received a "big hand."

Francis Raymond, a special representative of the Thos. A. Edison Co. for the Pacific Coast, is in the city at the present time. He reports a brisk business in the Edison disc phonographs and records.

Chas. S. Ruggles, of Sherman & Clay, wholesale, reports several heavy shipments of records and machines from the Victor factory. He says he is catching up on his back orders and expects to be able to take care of all future ones.

Irving Andrews, of the Andrews Music Co., says his sales for August were more than three times as much as the corresponding month in 1912.

Frank Morino, formerly with the Southern California Music Co., is now with Barker Bros. J. W. Booth, in charge for Barker Bros., is very much pleased with their last month's business. He says every month this year is better than the preceding one. George S. Barnes is back from vacation.

L. E. Newton, formerly with the Southern California Music Co., of this city, has left for San Diego to take charge of the talking machine department of its branch store in that city. E. S. Dible, who has had charge of the San Diego store (talking machine department) for the last four years, is now on the sales force with the same company.

A. Graham Cook, manager of the talking machine department at the Geo. J. Biskel Music Co., is now on vacation.

The Columbia Graphophone Co., wholesale, says it has been unable to supply the demand for "Cohen at the Telephone" (A1516).

INTRODUCE NEW SPECIALTY.

The Standard Gramophone Appliance Introduce a New Record Cleaner—Manager Kirkman Is Optimistic.

The Standard Gramophone Appliance Co., 173 Lafayette street, New York, manufacturer of a number of very successful talking machine accessories, has just placed on the market a new record cleaner, to be known as the "Simplex" record cleaner, and which will retail at 15 cents. This new cleaner is made of highly polished wood and is very attractive. It is of a smaller cleaning area than the popular "Standard" record cleaner manufactured by this company, but those dealers who have seen it predict that it will meet with a ready sale throughout the country.

In a chat with The World, Thomas W. Kirkman, manager of the company, stated that the fall outlook was decidedly encouraging. "We are convinced that the coming season will be a prosperous one from every standpoint," remarked Mr. Kirkman. "Our fall advance orders are of a substantial nature, and the fact that the dealers have not overstocked the past year will mean a steady consistent placing of orders.

"Our 'Standard' record cleaner is continuing to increase its sale day by day, while our needle cutter and automatic stop have firmly entrenched themselves in the minds of the dealers as articles in which they may place complete confidence. The satisfaction that our products is rendering is well illustrated by the numerous repeat orders we are receiving from well-pleased members of the trade."

PROMINENT IN RICHMOND, VA.

John G. Corley, Head of the Corley Co., Among the Leaders in Business and Musical Affairs of Virginia's Progressive Capital.

(Special to The Talking Machine World.)

RICHMOND, VA., September 7.—The importance of John G. Corley, head of the Corley Co., the prominent talking machine and piano house, of

JOHN G. CORLEY

Richmond musical. A great many people agree with him, and add that he has done even more for the welfare and prosperity of Richmond.

In private life Mr. Corley is president of the Corley Co., one of the greatest music houses in the South. He is an active member of the board of directors of the Chamber of Commerce and heads the important committee on conventions. For years he has labored on the city school board, retiring recently in order to enjoy a surcease of work. He was once president of the Richmond Rotary Club and played no small part in making that organization something besides a social medium.

Perhaps the greatest work which Mr. Corley has done for Richmond, however, has been accomplished since he undertook the guidance of the Wednesday Club. In the years that he has been president of this ancient musical society, Mr. Corley has led the organization out of the narrow field of a singing society and made it the vehicle for the

musical education of Richmond. If the board upholds his aims he will some day give Richmond grand opera. The National Piano Dealers' Association at its recent convention in New York elected Mr. Corley vice-president, placing him in line to become head of this influential organization. In fact, organizations have a great way of placing him in line to direct, presumably for the reason that John G. Corley has proven himself to be one of the most earnest, serious and efficient directors you will meet in a day's journey.

The article reads: John G. Corley admits that he is the man that made

musical education of Richmond. If the board upholds his aims he will some day give Richmond grand opera.

The National Piano Dealers' Association at its recent convention in New York elected Mr. Corley vice-president, placing him in line to become head of this influential organization. In fact, organizations have a great way of placing him in line to direct, presumably for the reason that John G. Corley has proven himself to be one of the most earnest, serious and efficient directors you will meet in a day's journey.

NOW THE TRANSOPHONE.

Latest Attachment for Edison Dictating Machines to Simplify Means for Causing Record to Repeat When Desired—How It Operates.

The dictating machine department of Thomas A. Edison, Inc., has announced as ready for the market the new Transophone, which is designed as a decided aid to the typist by simplifying the means for "back-spacing" the record and causing it to repeat the dictation it contains. The new device consists of a typewriter key of the usual form attached to the typewriting machine and connected electrically with the contrivance on the dictating machine for shifting the reproducing arm backward. The button is of the "quick-make-and-break" type and operates as readily as the usual typewriter key.

In order to disconnect the electric button on the typewriter from the dictating machine, a detachable connection in the cord may be broken at will. This enables the operator to close a folding typewriter desk without difficulty or loss of time.

The arm of the Transophone is back-spaced with a magnet, energized by the button on the typewriter. This had to be developed carefully for noiseless operation, and for easy attachment on every old model Edison dictating machine, which is a fixed Edison engineering policy.

The Transophone will, by allowing the attention of the typist to be centered in the typewriter at all times, make for both speed and accuracy.

Lots of people are sure they are right who never go ahead.

NEW UDELL CATALOG READY.

Will Show Complete Assortment of Cabinets for Player Rolls, Sheet Music and Talking Machine Records—Prepared for Dealers.

In a week the Udell Works, of Indianapolis, Ind., manufacturers of Udell cabinets, are planning to mail their new catalog of cabinets. It will represent the most comprehensive showing of cabinets for piano player rolls, sheet music and disc records that they have ever brought out. It

A Popular Udell Cabinet Style.

will also include a line of piano and player benches.

Commenting on the importance of this volume, H. T. Griffith, sales manager, said: "This catalog will be 9 x 12 inches, and is arranged absolutely for the benefit of the dealers. One new feature of the line that is worthy of comment is that every cabinet from the cheapest up is being made of sufficient depth to care for music rolls."

Business here is reported to be in good shape and the inflow of orders is sufficient to indicate that the fall will be of good volume.

BEST TO START RIGHT.

The official head of a large business concern noticed one of his youngest employes sticking postage stamps on letters—slapping them on in any way, straight, sideways, or upside down. "My boy," he said, pleasantly, "why not put them on straight, with the right side up."

"I don't see as it makes any difference," the youth responded. "They'll go just the same."

"Perhaps they will," responded the employer. "But I was not thinking so much about the letters as of you. The habits you form now will stick to you through life—learn to do things in the right way, and you will avoid many a temptation to do them in some other way. Hereafter put each stamp on in the right way, and keep that idea in your mind in all you do. That's the only sure way of getting ahead in this concern."

LATEST REPRODUCING DEVICE.

New Attachment, Marketed by the Lexton Specialty Co., New York, Provides for Playing of Vertical or Lateral Cut Records on One Machine Without Change of Sound-Box—Includes Special Sapphire Needle.

One of the latest devices for permitting of the playing of records with a vertical cut on machines, designed for the use of records with a lateral cut, is the invention of M. V. Roof and A. G. Ostermoor, and is being marketed by the Lexton Specialty Co., 216 West Ninety-ninth street, New York. The device, which is illustrated in the advertisement of the Lexton Co. on another page of The World this month, consists of a special joint to be attached to the tone-arm of the Victor machine, where it joins the gooseneck, and provided with screw threads by which the ordinary tone-arm may be attached in a position at right angles to the record groove. A cap covers the end of the gooseneck while the Edison type of record is being played and the cap may be, in turn, attached to the special connection while the Victor type of record is being used.

The device also provides for the use of a special sapphire needle that may be used on both Edison and Victor types of records, and another sapphire needle of special design is also supplied for the playing of Pathé records. The attachment, complete, is listed at \$2 retail and jobbers and dealers, writing on their letter-heads, may obtain samples at \$1 each.

J. W. SWANSON NOT WORRIED.

Well-Known Talking Machine Man of Texas Sees Only Big Business for United States as Results of War Between European Nations.

(Special to The Talking Machine World.)

HOUSTON, TEX., September 7.—J. W. Swanson, head of the Houston Phonograph Co., of this city, who has just returned from a tour of inspection of the store controlled by his company in San Antonio, Fort Worth and Dallas, does not worry over the permanent effects of the European war on the business of this country. Mr. Swanson said, in an interview: "There is absolutely no cause for alarm on the part of the people of the United States over the war in Europe, and the thing to do is to take advantage of the opportunity and extend commerce into countries not affected." He reports excellent business in both the Edison and Victor lines.

A dealer's reputation is no better than his goods.

LATEST COLUMBIA AGENTS.

New Accounts Added During Week—Issue List of War Music—Pierce Co.'s Campaign.

The past week has been a busy one for the Columbia Graphophone Co. in near-by territory, a number of important new accounts being added to the company's extensive list of local representatives. These new agencies include Ludwig Baumann & Co., 49-51 Market street, Newark, N. J.; F. C. Kraemer, 8 Lincoln street, Jersey City, N. J.; L. W. Caldwell, Troy, N. Y.; J. Solow, 1116 Avenue J, Brooklyn, N. Y.; Daniel Cantor, 917 Freeman street, New York, N. Y. Several of these new accounts are active piano dealers who thoroughly understand the most successful methods of introducing the Columbia product to their patrons.

The advertising department of the Columbia Co. issued this week a very timely and appropriate window-poster in the nature of a list of patriotic music of the nations now at war in Europe. The flag of each nation with its national anthem and the number of the record are featured prominently on a strip which may be detached from the entire list if the dealer does not handle that particular language in his foreign record department.

The Pierce Music House, of Eureka, Cal., is carrying on a successful newspaper campaign on behalf of Columbia products which is achieving fine results.

ISSUE ATTRACTIVE BOOKLET.

New York Album & Card Co. Prepares Handy Catalog of Its Line of Disc Record and Photo Albums—Numerous Styles Featured.

The New York Album & Card Co., 23 Lispenard street, New York, manufacturers of disc record and photo albums, has just issued an attractive booklet featuring its extensive line in handy form for use by the company's dealers. This catalog lists the numerous styles of albums it manufactures, together with adequate information as to their distinctive merits and their prices.

This company, which has achieved a gratifying success in the talking machine field with its record albums, has for many years been catering to the dealers throughout the country with a comprehensive line of photo albums which have been giving perfect satisfaction. These albums are furnished in several styles, permanently bound, flexible and loose leaf, and are constructed in a high-grade manner that makes for their durability and popularity with the dealers and their patrons.

**Some Good News to All Talking Machine Jobbers**

We have succeeded in inventing a Record Album which has leaves bound in nicked metal. Which absolutely insures durability.

It is the greatest album invention ever made, and it will give you many talking points over the ordinary album.

Lack of space prevents a full description, so send for the whole story to-day and for sample and prices.

1915 MODEL COLUMBIA "LEADER."

The Columbia Graphophone Co. has just placed on the market a new addition to its machine line, designated as the 1915 "Leader, Equipped with the Columbia Individual Ejector," which will retail at \$85. This 1915 model is the same as the popular

New Columbia Style.

"Leader" machine which has scored a pronounced success the past year, except that it presents a more attractive appearance by reason of a more artistic cabinet and is equipped with the Columbia individual ejector, which is a record filing interior. This provides for a separate compartment for each record, keeping the record clean at all times and thereby prolonging its usefulness. Each compartment has an automatic cleaning device or brush which cleans the record when it is taken out and again when it goes back to the compartment.

The Columbia Co. is equipping all its upright cabinet machines with this individual record ejector as rapidly as possible, and the next machine to be placed on the market containing it will be the "Mignonette," the \$100 model, which will retail at \$110 with this new filing device.

THE ELECTRO-PHONOGRAPH CO.

The Electro-Phonograph Co. filed a certificate of incorporation this week with the Secretary of State at Albany, N. Y., to engage in the manufacture of an attachment for cranking or winding graphophones. The capital is given as \$200,000 and the incorporators are B. B. and C. R. Johnson and F. Meyers, New York.

Among the latest addition to the ranks of the talking machines manufactured in this country is the Premier, a low priced machine made in Harrisburg.

Make a Double Profit on Talking Machines

Udell cabinets are made to fit the following disc talking machines:

Edison.
Victor.
Columbia.

The manner of filing discs is by upright partitions.

Back of each Udell cabinet is the Udell guarantee. It means satisfied customers. Write for "New Book," No. 47, now.

AFTER you've sold a customer a talking machine and records, he's almost sure to want a cabinet, especially if he sees the Udell cabinet.

Show it to him. Have Udell cabinets on your floor and make this extra sale.

From a "long" line of cabinets we have selected eight that dealers have found to be "best sellers." We have concentrated on these eight, and are now making them to fit any talking machine in style or finish. Wherever possible we even follow the "lines" of the machine, insuring a perfect match.

People will soon begin buying talking machines for Christmas. Prepare to sell a Udell cabinet with each machine, and make a double profit.

Our "New Book" No. 47 will help you. Write for it to-day.

H. E. PARKER LEAVES FOR THE WAR.

Advertising Man for Columbia Co. Off to Join British Army—Did Some Excellent Work.

Henry E. Parker, a member of the advertising department of the Columbia Graphophone Co., and one of the most popular men in the executive offices of the company in the Woolworth building, sailed Wednesday on the "Olympic," in order to place himself at the disposal of his home country—Great Britain—and join his county regiment.

H. E. Parker.

Although the English military authorities have not yet issued a call for the reservists in America to join their colors in England, Mr. Parker felt that it was a duty he owed to his country to serve it in time of war without waiting for an official call from home, and accordingly decided to sail this week.

Realizing the appalling magnitude of the war in Europe, Mr. Parker requested

a leave of absence from the Columbia Co. as soon as war was declared, with the understanding that he would leave for the front as soon as duty called him. A large number of his associates bid him Godspeed as the boat sailed September 2, hoping with all their hearts that he would return to America safely in a short time.

Henry E. Parker was responsible for a considerable amount of the excellent advertising copy turned out by the Columbia advertising department, and in addition edited the "Columbia Record," the company's official house organ, and was also in sole charge of the "Dictaphone Mouthpiece," a remarkably successful publication. Having traveled the world over, and gained a knowledge of places and things that was truly remarkable, Mr. Parker's personality was most pleasing and admirable. His signal ability had won for him continued success during his several years' connection with the Columbia Co., and The World joins with his many friends and acquaintances in wish-

ing him all good luck in the performance of his duty to his motherland.

Before sailing Mr. Parker was presented with a beautiful gold fountain pen from his associates in the Columbia Co.

IMPORTANT REPORT PRESENTED.

House of Representatives Gets Bill Ending Long Delay on Patents—Measure Reveals Section That Prohibits Dealer Fixing His Own Prices—Some Radical Features.

(Special to The Talking Machine World.)

WASHINGTON, D. C., August 11.—The report of the Committee on Patents on the Oldfield bill proposing a general revision of the patent laws was filed with the House to-day. The main purpose of the bill is to expedite the granting of patents to prevent the protection some applicants enjoy by the delay possible under the existing law.

The charge is made that patents have been delayed as long as fifteen years, "and that by delaying answers to simple letters for months at a time applicants for important patents have obtained the protection of 'patent pending' law," thereby blocking competitors. The bill provides that applicants for patents may have only two years in which to present their cases and there is a provision that patents shall be acted on without delay.

The bill repeals that section which makes it unlawful for a dealer to sell a patented article at a price less than that prescribed by the maker. In such cases suit will have to be brought in State courts for breach of contract.

A patent that has not been in use for a period of three years may be obtained from a manufacturer under license. This provision is intended to prevent "shelving" a patent, a practice which, the report says, is followed by many corporations.

The charge is made that the United Shoe Machinery Co. controls the shoe business through patents to the detriment of smaller companies.

It is pointed out in the report that there has been no revision of the patent laws since 1870. During that time, it is argued, fundamental changes have occurred in industrial conditions.

"Chief among these," says the report, "is the rapid growth of the trusts and combinations whose business rests entirely in patents and whose financial and industrial power exercises a dominating influence over many branches of trade."

RETURNS FROM EUROPEAN TRIP.

Edward N. Burns, vice-president of the Columbia Graphophone Co. and manager of the export department, returned to New York recently on the steamer "Franconia" after being marooned abroad since the start of the war and passing through many exciting and well-nigh perilous adventures.

PATHESCOPE PUBLICITY

At Wanamaker's Has Resulted in Tremendous Increase of Interest in the Device—Wanamaker's Auditorium Crowded at Pathéscope Recitals—Put to Practical Use.

During the past month the Pathéscope has been used almost daily to give motion picture exhibitions in the big auditorium of Wanamaker's New York store, and has made a remarkable hit with thousands of spectators who have seen it. Although this instrument is intended primarily for use in homes, schools, clubs, etc., it has sufficient power under favorable circumstances to show pictures to even larger audiences.

In the Wanamaker auditorium a special 6x8-foot day and night screen has been provided, and the photo-drama of "Les Miserables" has been projected thereon every day, one episode at 11.30 in the morning and the other at 2.30 in the afternoon. Beautiful incidental music on the great organ was arranged especially for this Pathéscope production by Alexander Russell, musical director of the Wanamaker auditorium. Slides thrown on the screen between the reels tell the spectators that the Pathéscope is being used in the production of the pictures they are enjoying, and that this instrument is being demonstrated and sold on deferred payments, if desired, in their talking machine department.

The industrial department of the Pathéscope took a motion picture film on August 31 of the beautiful Worth and other Paris gowns and wraps, which the Wanamaker stores were able to get through the blockade from Paris after the war actually broke out. These gowns were first exhibited in the auditorium, and after they were taken to the Philadelphia store the Pathéscope was used to show in motion pictures just how these latest triumphs of the Paris costumers looked.

In one respect the motion picture surpasses the reality, and this is the facility for showing over and over again the same subject for purposes of critical study and analysis. Louis J. Gerson, the manager of the talking machine and Pathéscope departments of Wanamaker's, has been on a vacation in Southern California, where, with a Pathéscope camera, he has been taking motion pictures which will doubtless be shown later in the Pathéscope salon.

ADDITION TO VICTOR PLANT.

Bids have been called for on a new six-story addition to the factory of the Victor Talking Machine Co., in Camden. The building will measure 274x141, will be built of brick and concrete and will cost about \$300,000.

THE TALKING MACHINE COMPANY

12 NORTH MICHIGAN AVENUE, CHICAGO

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., September 9.—The local situation in the talking machine trade, viewed in face of the customary dullness of late summer, is quite satisfactory. One or two dealers report business as poor, but the greater number seem to believe that the past thirty days have been at least equal to the corresponding thirty days of last year. The demand for machines seems to run in all classes, but it can be quite safely said that the larger styles are enjoying their share of the calls.

Considerable gloom was cast over the trade recently when the announcement was made by officers of the Chicago Grand Opera Co. that no attempt would be made to offer a season this year. The reason, of course, being the terrible wars in Europe and the fact that many of the song birds are either in the various armies of the old world, held in reserve, or doing nursing work in the overflowing hospitals.

The opera has always furnished a decided stimulus to the sale of operatic records inasmuch as it is the main concern of society during the mid-winter months and such music is tremendously advertised. The dealers will probably call the attention of their patrons to the fact that the only way that they can hear grand opera and the greatest artists of the world is by means of the talking machine, and certainly it is undeniably true that all the opera that Chicago and the West and probably the East will enjoy this year will be from such a source.

Appreciation.

J. B. Williams, of the Wurzburg Department Store of Grand Rapids, Mich., recently wrote the following lines to Charles F. Bauer, local manager of the Columbia Graphophone Co., when placing a preliminary order for fall goods. Mr. Williams said: "Your goods are getting so darned popular here that we cannot keep them on the floor. We presume that the big Columbia advertising campaign has much to do with it. At any rate, the business is seeking us out. Please send as soon as possible the following," etc.

The Victor Multiplex.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy, has issued thousands of circulars calling the attention of dealers to the Victor Multiplex, a device whereby the monthly lists of Victor records may be displayed and referred to in a most facile way. It consists of a

handsome frame which can be attached to a post or the wall by two screws. Six double faced hinges that swing with the slightest touch are arranged in the frame so that they carry the twelve most recent monthly sheets like a large catalog. It is said that whenever a customer comes into a dealer's store the display instantly attracts his attention and, without realizing it, he begins to read the titles of each bulletin. The result is said to be that many sales are made following this announcement of records that the customer was not aware had been issued. The Multiplex is finished in excellent fashion, is well enameled and an ornament to any display room. The price complete is \$8.50.

Mr. Wiswell returned a few days ago from a trip through the East, where he spent a few days at the Victor factory at Camden. Mr. Wiswell noticed an optimistic tone throughout all the trade that he encountered while away. Mr. Wiswell believes that this fall will show the entire trade a most satisfying business.

It is said in the Lyon & Healy retail record department that three of the best sellers recently issued are "When It Is Night Time Down in Burgundy," "You're Here and I'm Here" and "Little Gray Home in the West."

C. E. Goodwin on Quality Machines.

C. E. Goodwin, head of the Phonograph Co., local Edison jobbers, returned from Europe recently, and in a little talk with a representative of The World outlined a few of the noticeable characteristics of the talking machine trade of Europe.

Mr. Goodwin said: "I left the old country just one or two days before the declaration of hostilities, and the ship on which I sailed, the 'Vaterland,' was in mid-ocean before we received a wireless apprising us of the awful calamity that had been precipitated.

"I had very little opportunity while in Europe to study the phonograph business as I should like, but I did notice one thing which struck me most forcibly. That was the prevalence of the cheap machines and the awful results that follow an attempt to give the public what are apparently bargains, but which in the end cause the most unfortunate conditions. Over there the result of the introduction of the inferior machine has cheapened the whole talking machine proposition, and the result has been that there is a distinct

lack of the pride of ownership which exists in this country and which only follows the marketing of the better grade of instruments and encouraging the purchase of instruments that are really worth while. The popularizing of the phonograph in this country from the standpoint of good furniture resulted in its being taken up by the wealthier classes and being installed in a really permanent way. In reply to these arguments I was told that 'you don't know our people,' but I deny that my theory is any more at fault in their case than in our own, and I certainly maintain that the American success in the talking machine business has been the result of placing high-grade instruments in high-grade homes and in the fact that it has been made fashionable with the cultured classes to own a machine of the more expensive type. With the instalment plan so prevalent in this country, everyone can afford to place one of the better instruments in his home, and once it is there the pride of ownership will insure its staying there."

Mr. Goodwin was in France primarily to visit his mother and sister, who have been at the Calot Institute at Birk Plage, France, which is fifty miles south of Boulogne. Mr. Goodwin's people are still at this point despite the fact that the greatest war in history is raging only a few miles to the east. Mr. Goodwin says, however, that he fears little danger of either of the armies making trouble in that neighborhood. "I motored considerably in England and France," said Mr. Goodwin, "and it seems hardly possible that the peaceful agricultural countries and the beautiful farm lands that I traveled through are now the scene of mobilization and strife.

"The month of August has been surprisingly good, with a decided demand running for the most expensive instruments. The sales of the \$250 Edisons are by far in the preponderance. The weekly issue of Edison records has had a pronounced success as well as the system of releasing records State by State."

The Edison headquarters have been greatly improved by removing the offices that were on the second floor to the floor above, giving increased space for the reception of retail record customers. Tables have been placed around in the space formerly occupied by the offices and decorated in excellent fashion, so altogether the change is most commendable.

Cheney Machine Promised Soon.

Prof. Forest Cheney announces to The Talking
(Continued on page 43.)

THE WADE—THE PRACTICAL—THE WADE Fibre Needle Cutter

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone. The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade
Fibre
Needle
Cutter No. 2

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made. No. 1 is a very popular cutter which has given excellent service.

CHICAGO

EVERYTHING
KNOWN IN
MUSIC

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 41).

Machine World that rapid progress has been made in the past thirty days on the development of his machine and that in all probability an announcement will be made in the October issue of The World that will be most interesting.

To Handle the Victor.

The Story & Clark Piano Co. has completed arrangements whereby it will not only handle the Edison line in Chicago, but that in fourteen or fifteen of its other branch stores an Edison department will be instituted. Work on the department in the Chicago store is already well under way. A large sound-proof room is now under construction and will soon be completed. In addition to this there will probably be some additional sound-proof booths. E. M. Love, manager of the Chicago store, has not yet decided who will be in direct charge of the new department.

Columbia Business Prospers.

Charles F. Bauer, local manager of the Columbia interests, reports that beginning with the last week in August there has been an extraordinary rapid increase in the volume of business being done. Mr. Bauer reports that fall orders are coming in in plenty and business undeniably will be of the best the next few months. Mr. Bauer expressed it as his opinion that the approaching season has all the appearance of being a more substantial one than any that the trade has yet enjoyed.

At the Columbia offices the seven most popular records at the present time from the standpoint of sales are: "Cohen at the Telephone," "Puppchen," "Y Come la Va," "Symphony and Moon Winks," "Draming" and "Isle D'Amour" and the "Dorothy Waltzes."

The new Columbia "Meteor" has been received at the local headquarters and has evoked much admiration.

Kimball Department Adds Space.

T. J. Cullen, manager of the talking machine department of the W. W. Kimball Co., announces that his department is to be favored with a large space on the main floor of the company's big building on Jackson boulevard and Wabash avenue in preparation for the holiday trade. There are a number of large sound-proof booths on the main floor that have been used in the past as piano salesrooms. One or two machines will be placed in each of these rooms for demonstrating purposes. The record department will be continued at its present location on the second floor.

Personals and Visitors.

F. A. Copeland, Edison dealer of Elgin, Ill., was a visitor recently.

E. H. Gallup, of Niles, Mich., and J. B. Lundberg, of Chesterton, Ind., were also visiting Edison dealers.

Mr. Gensch, of the Gensch-Smith Music Co., of Milwaukee, Wis., was a visiting talking machine dealer last week.

G. Kempfer, of the Gus Blass Department Store of Little Rock, Ark., was a visiting Columbia dealer a few days ago.

Mr. Leavitt, of the Howard Farwell Co., of Minneapolis, was a visiting Victor dealer.

C. H. Hale, representing George H. Wheelock, Victor dealer of South Bend, Ind., was also in Chicago.

Miss Ida Caldwell, of the Talking Machine Shops, has landed in New York following harrowing experiences in the European war zone, and will proceed to Burlington, Ia., where she will enjoy a long rest.

W. C. Fuhri, district manager of the Columbia Gramophone Co., enjoyed a most invigorating motor trip over Labor Day.

George Cheattle, traveling sales manager for the Talking Machine Co., has returned from a successful trip to the Coast.

Don Preston spent several days in Chicago after an extended trip through Minnesota and Wisconsin.

Archie Mathias, proprietor of the Talking Machine Co., of Minneapolis, sends greetings to his Chicago friends after an automobile trip to the East.

on a trip to the North Woods with his wife and a party of friends. They went in three automobiles.

A. D. Geissler's Trip Abroad.

Arthur D. Geissler, vice-president and managing director of the Talking Machine Co., of Chicago, and the New York Talking Machine Co., of New York City, arrived in the city this week. As a result of the hard work incident to the reorganization of the business of the New York company after the disastrous fire a few months ago, Mr. Geissler went to Europe with his wife intending to spend a week in London and then return to the States. He was almost a nervous wreck and wanted the trip on the water more than anything else. He got caught in the war whirl, went over to Paris, but got out hastily the next day, went back to London and was couped up there two days before he could get passage to America, which he finally did on the "Campania." It wasn't much of a rest after all, inasmuch as he had Mrs. Geissler with him and they had all sorts of disagreeable and almost perilous experiences, losing their baggage among other things. Mr. Geissler says that there was nothing like the feeling of the Germans toward the French as the hatred of the French toward the Germans, at least before the war broke out. The general feeling in England and France, of course, is that Germany was the means of starting things. He was enthusiastic regarding the sane but patriotic spirit animating England in this crisis, and also spoke of the magnificent manner in which the English sought to alleviate the discomfort of Americans temporarily sojourning there, and said that everybody extended every courtesy possible to the visitors from across the sea and aided them in every way they could. Naturally he was not in the mood to get around in the talking machine trade much, but said that it was a surprising thing that although the Gramophone Co. of London was suffering enormously from the war because four-fifths of its business is outside the British Isles, still the local business in England continues remarkably good in spite of the war.

Mr. Geissler was very much pleased at finding the excellent reports of business made by both the New York and Chicago companies on his return. August and September so far are better than last year, and advance orders are coming in in a most gratifying way.

Wade Cutters in Demand.

According to the belief of S. O. Wade, manager of Wade & Wade, manufacturers of fibre needle cutters, the war in Europe will have no effect upon the talking machine business in this country, and that without a doubt the American talking machine dealer is to see a tremendous fall.

"I have just returned from a trip through Illinois," said Mr. Wade to The World, "and I must say that despite the war and rumors of war, I never found conditions more favorable or the dealers more optimistic. They have placed orders for the Wade cutter that have broken all records and which certainly were most encouraging to me. The great contributing reason for the demand for our cutter is to be found in the guarantee that is issued on each one. We will positively repair free of charge any Wade cutter that should get out of order. This we have done for a long time, and it must be said for our product that the time we have spent on repairing cutters has been almost nil, as there have been but three or four to repair. When the dealer has a talking point such as this it is very easy for him to dispose of a superior cutter. Our factory is going to be taxed to the utmost this fall, and we are advising dealers and our jobbers to place their orders early so that none may be disappointed or delayed in receiving their stock."

Describes Model Record System.

The Talking Machine Co., exclusively wholesale Victor distributor of this city, has become famous not only because of the big volume of its business and for prompt service, but because of the pains it has always taken to instruct its dealers in the best and most approved methods of merchandising, giving them the advantage of carefully worked out systems and even furnishing them at actual cost

TIME TO PLACE HOLIDAY ORDERS.

Salter Manufacturing Co. Advises Dealers to Order Cabinets Early Owing to Extensive Advance Orders on Hand—Handling Extensive Line—One of the Popular Styles.

(Special to The Talking Machine World.)

CHICAGO, ILL., September 8.—The Salter Manufacturing Co. reports that its fall business has already shown a nice increase in spite of the war conditions and the sales on cabinets to hold Edi-

Salter Cabinet, Style 790.

son, Victor and Columbia machines promise to be gratifyingly large between now and the holidays.

The accompanying illustration of the Salter cabinet No. 790 shows a record cabinet that is receiving an unusual call lately. The cabinet holds 112 records either Victor or Columbia, and is most suitably used with some of the smaller machines. The cabinet sells very reasonably and is attractively finished for its price. The top is fifteen inches square and an efficient indexing system and accommodations for needles are other features.

On other pages of this publication will be found three advertisements by this concern. Each one has a story to tell to the dealer, and each one shows one of the leading cabinets now being sold to each particular class of trade. Owing to the extensive advance orders that the Salter Manufacturing Co. has received it advises dealers to get in their holiday orders well in advance with privilege of early shipment so that dealers will be sure to have cabinets on their floors when they want them. Catalog and full information on Victor, Columbia and Edison cabinets can be had by addressing the Salter Manufacturing Co., 339 North Oakley boulevard, Chicago.

many things in the way of stock shelving, stock books and other devices calculated to enable them to transact their business at the least expenditure of time and labor.

The Talking Machine Co. has gone further than this. It has even collected from many sources tried and true selling campaign ideas which it has placed at the service of its dealers. It has, indeed, had in operation for a couple of years a regular correspondence course (it amounts to that) on selling, store keeping, etc., and its occasional bulletins on such topics are always awaited with the keenest interest by Victor dealers who obtain their goods from the Talking Machine Co.

"A Practical Record System for Victor Dealers" is the title of the latest issue of the T. M. Co.

(Continued on page 44.)

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 43).

press. In it the Talking Machine Co. tells things borne of long and actual experience, which, one may easily imagine, if followed out by the recipients, would be very likely to convert an indifferent record business into a big, fine paying one. We can't go into details here, nor would it be advisable, but it not only tells how to properly care for stock with a description, incidentally, of the accessories to that end which the company is able to furnish at cost and merely as a matter of accommodation to its customers, but also gives a plan by which the selling value to the dealer of various records can be determined and thus avoiding stocking up with records which experience may prove are not good sellers in their particular locali-

ties. The tabulation and permanent recording of experience is the foundation on which the especial record system provided for its dealers by the Talking Machine Co. rests. Of course, if by any reason any of the company's customers have not received this invaluable bulletin they have only to write to the company."

Exhibiting at County Fairs.

All through the country dealers have been making good exhibits at the county fairs. B. H. Henderson, of Fond du Lac, Wis., had an unusual booth at the fair there, at which he exhibited Victor goods. Tiffau & Kemp Mercantile Co., of Marshfield, Wis., also had a good exhibit at the fair in that county.

INTERESTING EXHIBITS AT CHICAGO BUSINESS SHOW.

Columbia Co. Make Fine Display of Dictaphones, While E. C. Barnes & Bros. Display the Edison Dictating Machine, Including the Telescribe, the Latest Edison Accomplishment.

(Special to The Talking Machine World.)

CHICAGO, ILL., September 11.—The annual Business Show, in which are displayed office labor saving devices, business systems of all kinds, etc., was in progress this week at the Coliseum. There are splendid exhibits of Columbia and Edison dictation machines, as usual.

The Columbia exhibit is in charge, as usual, of W. W. Parsons, district manager for the Dictaphone department of the Columbia Graphophone Co., and he is efficiently aided in the work of giving the Dictaphone adequate exploitation to the thousands who visit the show by the following people: E. A. Parsons, A. B. Walker, Frank J. Clark, George Ingalls, P. A. Miller, Grace Carpenter, E. F. Baumann, F. Casseday, E. C. Allen, May L. Stuetzer, Miss M. Norgate and R. G. Winter. An essential trade-mark feature of the exhibit was a magnificent American eagle suitably decorated with American flags and "Columbia" insignia. A full and complete line of the latest models of Dictaphones were shown, the most important novel features being the new hand control, the new light weight hearing tube and the modifier for regulating the volume of sound on the Type E machine.

At the Edison disc dictating machine exhibit, in charge of E. C. Barnes & Bros., the Chicago representatives, interest largely centered in the Transophone, the new device which enables the operator to repeat the dictation by a light touch on an electric button beside the typewriter keyboard in place

he was assisted by J. S. Pahlman, O. C. Dentzer, A. H. Fulton, K. H. Kammerer, E. Humphrey and George Field. Nelson C. Durand, third vice-president of Thomas A. Edison, Inc., and Mr. Holland, the Edison Co.'s laboratory staff engineer, were

that perfection in telephonic communication would be reached only when means were discovered for combining the telephone and phonograph in order that telephone messages might be properly recorded. The fact that at the present time the telephonic system transmits 60 per cent. of all forms of communication in the United States, totaling fifteen billion conversations a year—a grand total in excess of the number of telegrams, letters, railroad passengers in the same period—makes the fulfillment of Mr. Edison's prophecy at this time particularly valuable and important. In general correspondence we make copies of important letters and keep them on file. It is also possible to keep accurate records of telegraph messages, and it has only been in the telephone that an absolutely perfect record was not possible to procure. The Edison Telescribe has solved this problem.

The Edison Telescribe comprises an Edison dictating machine, which is especially equipped with telephone recording appliances, and a glance at the accompanying illustration gives an excellent idea of its general appearance.

In describing the Telescribe and its uses, Nel-

Dictaphone Exhibit by the Columbia Graphophone Co.

visitors here the first part of the week. While in Chicago they demonstrated at the offices of E. C. Barnes & Bros. the new Telescribe for reproducing telephone conversations,

The Telescribe, the latest accomplishment of

son C. Durand, third vice-president of Thomas A. Edison, Inc., said:

"The dictating machine is equipped with a micro-recorder, which swivels into place over the wax cylinder, and is wired up with the Telescribe on the user's desk. In short, the Telescribe is a complete telephone extension run with its own small batteries, concealed in the casing.

"A telephone message is telescribed in the following manner: The receiver of the regular desk telephone is removed from the hook and placed in the socket of the telescribe. In this way the acoustic connection to the dictating machine is made without danger of criticism from the telephone company, as the instrument is neither mechanically nor electrically connected to their lines. The user then takes up a small receiver, which is part of the Telescribe, and gives his call to the exchange, while starting and stopping the dictating machine by means of two small buttons on the Telescribe in order to record the conversation between pauses or delays, and avoiding any waste of running the wax cylinder meanwhile.

"In this way both sides of the telephone conversation are recorded, including all the evidence of the central operator's voice in making the connection. The dictating machine becomes in reality an 'eavesdropper' on the telephone line.

"There are many telephone subscribers in every locality who have monthly toll bills of hundreds of dollars, evidencing the practice of conducting an important part of their business by 'conversations.' Brokers, in many instances, do buying and selling by telephone from both local and outlying territory; advertising agents secure the approval of their clients at distant points by reading late copy on the 'phone; purchasing agents place orders and secure promises and prices of importance as a daily occurrence through the telephone. But the special applications of the

Thomas A. Edison Testing the Telescribe—Exhibited at Business Show.

of the old operation of interrupting the work to reach out and move a repeating lever. Besides this, the new speaking tube start and stop and the new covered gearing excited great interest. E. C. Barnes spent much time at the booth himself and

Thos. A. Edison, and which has been demonstrated very successfully in various cities of the country, is rather a development of the property made by Mr. Edison in 1876 and an entirely new invention. At that time Mr. Edison predicted

Telescribe will not be as important as the ordinary uses which every large organization finds for recording wire conversations in the course of their ordinary day's work.

"The Telescribe will place the use of the telephone in a more serious light in business. After a conversation the dictator will turn to his dictating machine and confirm his message in the usual manner covering the general understanding, while he will mark his letter: 'Telescribed on the Edison dictating machine.' To the person receiving this confirmation, the question of its correctness will be unquestioned, and give that feeling of business security to both sides, which is now missing, and in some cases may be even depended upon if denial of telephone understanding is expedient.

"The wax record, containing the telescript and the dictated reference, may be acknowledged indefinitely for reference, but future acknowledgments and circumstances reduce the time for holding the records to only a few days in most instances."

MAY MAKE TALKING MACHINES?

Rumor that the American Can Co. Will Go Into the Talking Machine Business Denied by the President of the Corporation—Admits, However, Construction of Sample Talking Machines at Maywood Plant.

(Special to The Talking Machine World.)

CHICAGO, ILL., September 9.—Rumors have been afloat for some time that the American Can Co., of this city, which is said to be capitalized at \$90,000,000, would enter into the manufacture of talking machines upon a large scale. Officials of the company have denied any definite decision, but have admitted that such a step had been contemplated.

It is interesting to note in this connection the report recently issued in an industrial periodical, which stated that the company had embarked upon the project upon a large scale and that both machines and cabinets were in the course of manufacture at the company's plant at Maywood, Ill. The machines, according to this report, were to be all metal, according to this report, were to be imitations of mahogany, oak and other woods, after the fashion of fire-proof office furniture. It was also said to be definitely known that a contract had been placed with the American Can Co. by a large merchandise house for the delivery of 400,000 small machines of light construction and that the contract price for the lot was \$1,000,000 or \$2.50 each.

The statement was also made in the article that a complete line of machines would be turned out at ridiculously low price.

Mr. Harbeck, president of the company, denied the story emphatically, making the single admission to the representative of The World that the company had under construction one or two sample instruments at the Maywood plant and would, if they prove successful, place the proposed side line in a favorable light before the board of directors.

The manufacture of records has not been considered by the company.

A LIVE SELLING SYSTEM.

Capable Saleswoman Places Victrolas in Homes of Prospects and Finds That the System Leads to Many Sales—Uses Automobile to Advantage in Covering Territory.

As indicative of the progressiveness and up-to-date methods that characterize the sales methods of many live-wire Victor dealers, the plan utilized by Miss Hanley, a capable saleslady connected with the Kelly Music Co., of Jersey City, N. J., is well worth attention.

Realizing that the placing of a Victrola in the home of a prospect is one of the best available means of closing a sale, Miss Hanley called into play an automobile which she owns and decided to employ it in the pursuit of Victrola business. She invariably carries machines with her for demonstrating purposes and the novelty of the plan has enabled Miss Hanley to achieve a marked success since she inaugurated the idea in May.

Miss Hanley has found that wherever she can

get a machine into the home of a prospective buyer the sale is about 75 per cent. made, and it is hardly necessary to state that Miss Hanley experiences no difficulty whatever in supplying the 25 per cent. salesmanship necessary to give the proposition a 100 per cent. average. The use of an automobile in soliciting machine sales has long been advanced by the majority of Victor jobbers and the most successful dealers, and Miss Hanley's successful experience well evidences the practicability of such aggressive methods.

NEW RECORD DISPLAY CARDS

To Enable Dealers to Feature Every New Victor Record Supplied at Nominal Cost by the New York Talking Machine Co.—A Permanent Device to Increase Record Sales.

The New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, has just announced to the trade an attractive and per-

In addition to displaying new records by means of these title strips, Sales Manager Moody intends to furnish the dealers with title strips of standard selections from the Victor catalog which they may feature in addition to the new records under a sub-head title strip apropos of the character of the records. Mr. Moody also points out that the dealer will be furnished with sixty strips each month, although there are but an average of forty new records listed in the monthly supplements. These extra slips will permit the dealer to feature two popular selections on one record, if there is a sufficient demand for these selections in his vicinity.

In furnishing title strips for all the new records, Mr. Moody takes cognizance of the fact that the popularity of certain classes of records varies in different sections of the country, and that with a full complement of title strips, the dealer may feature those selections which are in demand in his individual territory.

EASTON-MUMPER.

The marriage of Miss Helen Easton, youngest daughter of Edward D. Easton, president of the Columbia Graphophone Co., to Norris McAllister Mumper, was solemnized Saturday evening at the home of Mr. and Mrs. Edward D. Easton, at Arcola, N. J. The wedding was an informal one, the relatives of the bride and groom being the only invited guests besides several of the executives of the Columbia Graphophone Co. and their wives.

Hewlings Mumper, a brother of the groom, acted as best man, while the ushers were Donald Hoise, Paul Renn, Ogden Hewitt and Mortimer D. Easton, manager of Dictaphone advertising. Mrs. Mortimer D. Easton was the matron of honor, and Miss Barbara Bispham, Miss Alice Mumper, Miss Barbara Trego and Miss Elizabeth Terhune officiated as bridesmaids.

The house was beautifully decorated with wreaths and flowers, and Prince's Orchestra furnished the music. After their honeymoon, Mr. and Mrs. Mumper will reside at Arcola, N. J. Mr. Mumper is a member of the Dictaphone staff.

Effective Victor Record Display Card. A perpetual display-card featuring the new Victor monthly records, as shown in the accompanying illustration. Title strips for every new record listed in the monthly Victor record supplement will be sent to the dealer at a cost of 75 cents per month on a yearly basis, while the easels will be supplied free.

Effective Victor Record Display Card. A perpetual display-card featuring the new Victor monthly records, as shown in the accompanying illustration. Title strips for every new record listed in the monthly Victor record supplement will be sent to the dealer at a cost of 75 cents per month on a yearly basis, while the easels will be supplied free.

HAS MOST ATTRACTIVE QUARTERS.

Transformation of Columbia Co. Warerooms in St. Louis Into Most Artistic Emporium Brings Many Compliments to Manager Reid.

(Special to The Talking Machine World.)

St. Louis, Mo., September 10.—Manager Irby W. Reid, of the Columbia Co. here, has won the reputation of a wonder worker because of his transformation of the dark and rather dilapidated warerooms of the Columbia Co. into one of the neatest and cleanest stores in the city and second to none in this section as a talking machine store.

Irby W. Reid.

The transformation was accomplished with only partial interruption of business and at no time was any department put completely out of the running, although for some time the retail department was seriously handicapped, but under the leadership of R. W. Duffy made a good showing for the period.

The new store was planned by Mr. Reid to the smallest details. It bears small resemblance to the old, as from the former two show windowed front, with a door between them, it has been changed to one large window, through which not

Remodeled Warerooms of Columbia Co. in St. Louis.

only the display can be seen but the entire store room, with a recessed door at the east corner of the front.

The picture that greets you as you step inside the door is a restful one. The handsomely enameled woodwork, finished in a glossy soft gray blends well with the gray and green wall finish and rugs, and the thirty varied style machines exhibited in the main display space, with the heavy mission furniture, supplies plenty of decoration.

There is but one desk in sight, and you must look a second time to see where Sales Manager Duffy is watching operations, and the planning of the six demonstration rooms artfully overshadows the office suite, which, however, can easily be found by the customer wishing to make a payment.

The lighting is entirely by the overhead system, and while it shows off the machines to excellent advantage, does not obtrude upon the visitor, who is unconscious that artificial light is in use.

The new arrangement has removed the dictaphone department, which formerly had the best space in the warerooms, to the second floor, where that office force can work without interruption. The wholesale office is in the rear of the demonstration rooms, safe from interruption. Manager Reid's executive office has a peculiar arrangement of doors whereby he can completely isolate himself behind his reception room, or he can open

HOW AGGRESSIVENESS WON OUT.

Interesting Story Related by V. W. Moody Tells How a Well-Known Dealer Has Won Great Success from a Modest Beginning.

As indicative of the success that an aggressive Victor dealer can achieve in a comparatively short while, V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, relates the following incident:

About a year ago a man visited the company's headquarters, who had decided to embark in the Victor business, and desired to place an initial order and ascertain the necessary details. Upon inquiry he stated that he resided in a city of about 30,000 population, and that he had no definite ideas regarding the Victor business other than that an initial order of \$300 seemed to him to be a proper start.

Mr. Moody thereupon pointed out that there were something like 3,000 records and 17 machines listed in the Victor catalog, making an initial order of \$300 decidedly inadequate and well-nigh insuring failure in a city of 30,000, rather than success. The prospective dealer realized the logic of these figures and placed an initial order of \$600. He also secured an intimate knowledge of the sales and stock policies of approved merit, and, fired with an ambition to succeed, opened his store.

His road at first was naturally somewhat difficult, but his success is represented in the fact that during the past sixty days he placed orders for \$2,000 worth of stock, and his latest inventory showed a stock of over \$3,000. Notwithstanding that this is only his second season in the business, he has just placed advance orders for machines alone to be shipped during September, October, November and December, totaling more than \$6,000. This dealer pays a salesman \$30 to run his department and his manager has two assistants. All this was accomplished in a year as a result of aggressive methods and an appreciation of the

them and see every part of the floor at a glance.

The record arrangements in connection with the demonstration rooms have attracted considerable attention. The rack is of easy access to all of the booths, holds a remarkable number of records, and also is a means of ventilation for the booths.

The new store room has materially aided in the business promotion plans and customers who had, from their own admission, recently been buying at the more attractive department store booths, are coming back to the main wareroom. "I do not see how you do it!" is the often repeated exclamation of these old friends.

scope and magnitude of sales possibilities in the Victor field.

IMPROVEMENTS OF INTEREST.

Among the new inventions of the past month is the Uffner patented record album, designed to hold talking machine records in either the 10 or 12-inch sizes. The new feature that is of special interest is the method of binding the leaves, which are held in place with steel instead of glue. Holes are cut in a sheet of steel, lengthwise, so that two leaves just fit in, the sheet being fastened to the back of the album, the back always being the same size whether the album contains records or not.

The patent on this album was secured by the head of the Uffner Album Co., 77 Grand street, New York, and from the orders already received from those to whom he has shown the sample, it would indicate that there is a remarkable volume of business to be had from dealers who want albums of durability as well as attractiveness.

The weaker a man is the stronger his habits grow on him.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

General Effect of the War on the British Talking Machine Trade—Noticeable Inclination to Make the Best of Conditions—Probable Scarcity of Supplies—Regarded as an Opportunity for British Manufacturers to Extend Trade—Sidelights of War Situation—Demand for Patriotic Records—Otto Heine-mann Praises American Business System—W. H. Reynolds' List of Supplies—Specialties for the Colonial and Foreign Trade—Recent Additions to Columbia List of Artists—New Products Recently Put on Market.

(Special to The Talking Machine World.)

LONDON, E. C., ENG., September 5.—Hard upon the dispatch of my last report came the dreaded announcement of war between the first nations of Europe, and, as may be imagined, considerable nervousness immediately reigned in London gramophone trade circles. At such a time one is perhaps inclined to take anything but a dispassionate view of things. It is the more difficult to remain calm under circumstances that so closely affect the foundations of commerce, even the very existence of nations, and self-restraint is one of the first of many things to which the Britishers have now schooled themselves. This is no time or place for politics; the sword is the arbiter of our fate and our trade prosperity, and at that we must leave it, in the sure confidence of ultimate victory.

First Panic Over War Short.

Received at first with expressions of dismay, the news that war had been declared by England at the very opening of our trading season, which promised so well, naturally took gramophone men some time to recover from. The market became slightly panicky, but quickly recovered, thanks largely to our inherent adaptability to make the best of things. It was generally felt that the gramophone industry would be one of the first to suffer, and efforts were made to meet the situation in a manner best calculated to neutralize undue depression. It is satisfactory to know that these efforts have met with a fair measure of response from retailers, who, however, are handicapped in many ways. All said and done, sales are nevertheless abnormally slack. True, one does not expect great things on the retail side at this period even under normal conditions, and I should not be presenting a fair view of the situation were I to gloss over the uncertain position in which all find themselves despite every endeavor to steady things. This war of the nations seems likely to last for a considerable period. The longer it goes on the greater is the dislocation of business and consequent unemployment. Thousands are out of work already, more are on reduced wages, while the people generally—not unnaturally perhaps—are prone to conserve their financial resources.

With the spending power of the masses thus restricted, especially in regard to luxuries, gramophone trade is suffering more than most industries. The outlook for this season is therefore not very encouraging. Record factories are still running, in some instances, on a reduced basis of production, which latter is mainly confined to the pressing of patriotic records, the demand for which is excellent. The national anthems of the Entente powers, British national airs and martial songs, etc., are selling very freely, not to mention that last season's pantomime favorite, "It's a Long, Long Way to Tipperary," which seems to have been adopted by our troops as a war song. But this business will not keep things going, and the position is such that almost every firm has either reduced its staff or, by mutual agreement, the wage bill, in a praiseworthy desire to cause as little distress as possible.

The Question of Supplies.

Another feature of trade importance is the question of supplies. The German market, from whence came a large proportion of complete machines, parts and accessories and records, is of course entirely closed. Some firms have goodly stocks on hand, while others find their warehouses more or less depleted. Serious as this aspect is, there is a confident belief that we shall get along all right by the aid of Swiss firms who specialize on the making of motors and gramophone accessories. Owing to the Swiss mobilization there is, however, bound to be a shortage of supplies for some time. Here in England we have certain resources for the manufacture of motors, and this trade will doubtless receive a great impetus. We can, of course, take care of the manufacturing of cases, cabinets and other necessary parts, but for sound arms, boxes and many accessories we shall perhaps find ourselves in a quandary. These latter items have not been cultivated to any great extent by British makers, but with the Germans their manufacture has become a fine art.

The newspapers are waging a strong campaign against everything German, and already one learns the response is great in many departments of trade.

This has not to any great extent touched the talking machine trade, but, speaking dispassionately, there is bound to be a certain amount of prejudice against buying German goods, and we see in this a good opportunity for all-British manufactures. We may be sure that every possible advantage will be taken of the situation, but it would give our manufacturers encouragement to invest large sums in productive machinery could they only rely upon excluding German goods from this market by a tariff imposition on manufactured articles—complete or in parts. Space forbids the further development of

this line of thought. We have to grapple with existing conditions, and it behooves all to do each their share toward allaying the disadvantages under which gramophone trade now suffers. We must keep the trade flag flying at all costs, and though heavy troubles may beset us in the future the best service is to maintain a cheerful mien against the time when trade stagnancy shall have given way to the inevitable resumption of its normal trend. Elsewhere we deal with oversea conditions and the possibility of capturing a considerable proportion of the trade which has previously gone to Germany.

Some Sidelights of War Situation.

The British Government has under consideration a patriotic offer from "His Master's Voice" Co. to loan the use of its City road premises, which have a floor area of some 30,240 feet, until the end of the war, or until the Seventh and other battalions have been completed. Business would be conducted from the Hayes factory.

In appointing a receiver for a piano company with a German name, Justice Shearman said he thought the business, being beneficially owned by foreign enemies (sic), could not be carried on at all without an official license. The Government would give that authority if it were satisfied that no moneys would be remitted to the alien enemy which owned it. To keep a profitable business going he would appoint a receiver, who must undertake that all moneys be kept in this country.

The commercial activity of a number of gramophone firms here is neutralized through lack of supplies from Russia, Germany, France and Switzerland. An early resumption of exports from the latter country is possible.

S. W. Dixon, a director of the Gramophone Co., Ltd., has volunteered for active service. As a captain with the 13th Manchester Regiment, Mr. Dixon served with distinction throughout the South African war.

Many German and Austrian members of the trade have gone to rejoin "the colors" of their respective countries. One can only regret the necessity for their display of patriotism. It is quite possible that some were detained in England as prisoners of war.

Several German gramophone men have sought British nationality; others are out under police "license" and must not travel more than five miles per diem.

Chappell & Co. and other music firms intimate they will not close up factories or dismiss employes during the war. This, however, would not prevent, where necessary, some reduction of wages in order to keep things going and avoid unnecessary distress.

64 Page Catalogue Yours for Asking

W. H. REYNOLDS, Ltd.
"KNOTASLEPE"
London, England

FROM OUR LONDON HEADQUARTERS—(Continued from page 47).

It is reported that the French factory controlled by Carl Lindstrom (Berlin) has been completely destroyed.

Harth & Dubb, of City road, agents for the Russian "Syrena" record, will close up for the time being.

The Continental factories of the sister companies of the "His Master's Voice" corporation are, as may be imagined, somewhat disorganized. At Hayes, London, many men are reported suspended from work for the moment.

During the first week of the war public opinion was so bitter against everything German that an all-German program arranged for performance at the Queen's Hall promenade concerts was abandoned. That musical art may reasonably be exempt from the atmosphere of national strife is assured by the telling protests immediately lodged against such an absurd ruling. Commerce, however, is a different thing, and Chappell & Co. announce they will never again allow German pianos on the Queen's Hall platform.

A royalty on every "Regal" war record sold goes to the Prince of Wales' Fund. The Columbia Co. advises me it has already sent sixty guineas on this account.

Among well-known composers, singers and musicians at the front are Rachmaninoff, Chaliapin, Siegfried, Wagner, Kreisler, Ysaye and brother, two sons of Dr. Hans Richter, Paul Franz, Dohnanyi and practically all of the male contingent of the Russian opera and ballet.

"Business as Usual" is our motto. In the form of adhesive stamps it is being used by many firms on memo. forms, invoices and publicity matter.

Official Ruling Anent Trading with the Enemy.

The explanation of the proclamation against trading with the enemy is officially explained as follows: "The important thing is where the foreign trader lives, and not his nationality. There is no objection to trade with German or Austrian firms in neutral or British territory. Trade with the branch of a hostile firm in neutral or British territory is permissible so long as its head office

is not involved. Contracts with firms in hostile countries cannot be performed, and payments ought not to be made during the war. There is no objection to paying for goods delivered or services rendered before the war."

Issues List of Patriotic Records.

The British Zonophone Co. has issued a very strong list of patriotic records, including all the latest war songs of interest. Having always paid great attention to this class of music, the Zonophone people did not have so much new recording to do as other firms when war was declared. During all the years of its existence this company has been steadily bringing out records of patriotic flavor, and thus prompt and complete deliveries are assured. Further new issues will be made known shortly.

"H. M. V." War Records.

A strikingly patriotic list, emblazoned on its front cover with the flags of Great Britain, France, Russia and Belgium, has been issued by "His Master's Voice" Co. As a piece of publicity literature it is altogether attractive and makes a most effective showing. Its contents are even more attractive, for in quality and numbers the records itemized represent, perhaps, the finest and most complete aggregation of martial music ever embodied in one supplement. There is to be noted the national anthems of Britain, Russia, France, the now famous "God Save the King" record by Clara Butt; among a host of other songs calculated to inspire the patriotic ardor of gramophonists none will receive greater welcome than the series of six records on national service by Field Marshal Lord Roberts, V.C., K.G., etc. These discs have reached tremendous sales figures and can scarcely be pressed quickly enough to satisfy all wants.

Interest to Oversea Buyers.

Elsewhere in this section will be found an announcement by O. Ruhl, Ltd., which makes a special appeal of interest to oversea buyers who find themselves short of supplies through the closing of the Continental markets. An up-to-date

factory, equipped with modern plant, at Hertford, England, gives employment to a large number of Britishers, and the company informs us it is in an advantageous position to handle the colonial and foreign trade for records and machines promptly and efficiently. Notwithstanding the general trade depression in this country, its factory is working on full time, and it is hoped to so continue throughout the crisis.

Beka records are, of course, favorably known the world over, and buyers will learn with pleasure of the company's recent issue of innumerable patriotic numbers, the various national anthems and latest war ditties.

An interesting announcement is also made regarding disc instrument trade in the oversea markets. Full particulars are obtainable from O. Ruhl, Ltd., 77 City road, London, E. C.

New Company Incorporated.

W. J. Elliott, Ltd., musical instrument manufacturer; capital, £10,000. Office, 16 Chequer street, St. Albans.

Martial List of Favorite Records.

The demand for patriotic titles has moved our manufacturers to unusual exertions in the quick production of suitable records, and well on time comes an "extra special" supplement from the Favorite concern embodying all the very latest martial airs and some of the good old, yet ever-green, selections which, perhaps, the public loves the best. On record 733, for instance, we find such popular numbers as "Bravo Territorials" and "An Englishman's Home," both fervently rendered by Harry Thornton. No. 730 bears the national anthems (in part) of the Triple Entente powers, by the Favorite Military Band, with vocal effects, accompanied by "Tommy Atkins," sung by Jack Smithson. A very special disc, No. 712, gives "God Save the King," "Rule Britannia," Russian National Anthem and "La Marseillaise"—all beautifully rendered by the Favorite Elite Orchestra. Other records carry "The Bulldog's Bark," "Sons of the Sea," "Voyage on a Troopship," parts 1 and 2; "Three Cheers for the Red, White and Blue,"

This trade-mark in center of each record is a certificate of Highest Quality, Smoothness and Durability. Manufactured for us by I. E. Hough, Limited, Edison Bell Works, London. We have a large and exhaustive catalogue. A new, up-to-date list of patriotic songs, bands and descriptive selections called for by the great British people and the English-speaking world in consequence of the iniquitous war waged against us.

One thing—we shall be "Top Dog" yet, sooner or later.

We will willingly send full catalogues and examples of our "patriotics" to any of our U. S. or Colonial friends on receipt of 40 cents each, carriage and duty paid.

We are devoting all profits on these to the relief of distress caused by the war.

Address **WINNER RECORD CO., CAMBERWELL, ENGLAND**

"A Soldier's Song," "So You Want to be a Soldier, Little Man." On No. 735 the famous Billy Williams offers two rollicking songs, "I Shall Have to Ask My Mother" and "They Can All Do as They Like with Me." A sure seller! Finally, we must accord special praise to the brilliant work of the Favorite recording expert, markedly noticeable throughout the whole list. It should be mentioned that Favorite records are of entirely British manufacture.

"His Master's Voice" Records for September.

Notwithstanding the dislocation of general business conditions, "His Master's Voice" Co. intends to offer its dealers a continuance of good record issues, and in this regard has announced a pleasing list of new titles for September. The list is not so large as would have been produced under normal conditions, but its attenuation is more than counterbalanced by its high standard of quality throughout.

Under the baton of Landon Ronald the New Symphony Orchestra gives an excellent performance of the Pizzicato from "Sylvia" (Délibes); John McCormack, the eminent Irish tenor, in company with Mr. Kreisler, the violin exponent of world fame, who by the way is now at the front, contribute the "Angels' Serenade" (Braga), with piano accompaniment. It is a record of exceptional beauty and will undoubtedly enjoy a wide sale.

There are to be noted some choice vocal records, and in the double-sided section many instrumental numbers of interest. Subjoined is the complete list:

Twelve-inch single-sided: "My Lady's Bower" (Hope Temple), Stewart Gardner; (a) "The Sandwichman—Bow Bells," (b) "The Fortune Hunter—Bow Bells" (Withby), Harry Dearth; "The Promise of Life" (Cowen), Mme. Alice Larkin (with orchestra and organ accompaniment); "The Day Is Done" (Löhr), Baker and Wheeler; "Good-Bye, Summer, So Long, Fall" (Wenrich), Miss Ethel Levey; "I've Seen It on the Pecheres" (Clare), Tom Clare, with piano ac-

Merely A Statement of Fact

The British Colonies and dependencies import annually many thousands of pounds' worth of gramophone products, a large percentage of which emanated from Germany.

Now that this source of supply is cut off, who is going to fill the breach?

This question must give British houses food for profitable thought.

But the opportunity for action is not tomorrow or the day after, it is Now!

The trade routes are open and we venture to think will so remain.

You can get into touch with oversea buyers through the medium of this trade newspaper, which enjoys a wide sale throughout the world.

Particulars and advertising rates will be gladly supplied to all interested by our European representative.

W. LIONEL STURDY

Basinghall St., London, E. C.

companiment by himself; "The Witness" (Wick), George Robey.

Ten-inch single-sided: "My Memories" (Tosti), Hubert Eisdell, with Celeste and violin accompaniment; "The Fairy Pipers" (Brewer), Miss Evelyn Harding.

Twelve-inch double-sided: "Yankiana—American Suite—The Song of the Bells—Mighty America" and "Yankiana—American Suite—Arrival of the Coontown Cadets" (Thurban), band of H. M. Coldstream Guards; "Military Symphony"—"Allegro" and "Allegretto" (Haydn).

Ten-inch double-sided: "When Mr. Moon Is Shining," "Mam'selle Tralala" (Gilbert), and "My Little Persian Rose" (Friedland), Jacobs and his Trocadero Orchestra; "La Riterata"—Italian March (Drescher), and "March Namur," (Richards), Metropolitan Orchestra; "All Aboard for Dixieland"—Turkey Trot (Cobb), and "Ninetta"—One or Two-Step (Christiné), Metropolitan Orchestra; "Sympathy Waltz" (Friml), and "Who Paid the Rent for Mrs. Rip Van Winkle?" (Medley), Metropolitan Band.

American Business System Admired.

A splendid tribute was paid to the American trading system by Otto Heinemann, a director of Carl Lindstrom, Ltd., with whom your correspondent recently conversed in London. During his six weeks' visit to Canada and the United States Mr. Heinemann visited many talking machine trading centers with the object of studying at first hand the situation in connection with patents and trading prospects. With regard to the former he has formed certain conclusions which, I was informed, might be divulged at some future date. What interested him as much as anything was the amazing demand on your side for dancing records, the sale on which, while good, is by no means comparable in Europe. Passing to the great Victor and Columbia corporations, Mr. Heinemann paid tribute to the extensive ramifications of their wonderful business organizations, the successful handling of an enormous output distributed by picked agents in every center of your continent, effective selling and advertising plans, and withal,

FROM OUR LONDON HEADQUARTERS—(Continued from page 49).

the maintenance of quality and prices, which latter, especially, half convinced him that there would be no great market for cheap Continental machines, the importation of which he found to be of negligible quantity. Speaking of Canadian conditions, my informant said the assembling of machines from parts bought abroad was very much on the increase. Mr. Heinemann is rather doubtful of German trade prospects after the war, and thinks that traders in British possessions will in future buy only British goods.

Famous Girl Tenor for Columbia.

The record that stands at the head of the Columbia Supplement for September will excite special interest, as it introduces to Columbia patrons the phenomenal girl tenor, Ruby Helder, who has recently added to the luster of her English reputation by a highly successful concert tour of Canada and the United States. Her unique voice is a genuine tenor of such quality, power and virility as would dignify any great star of opera. Two of the most characteristic and popular of tenor songs are combined on her first double record, namely, Tosti's "My Dreams" and Charles Marshall's delightful ballad, "Dear Love, Remember Me."

Old Songs in Demand.

The popularity of songs of the light operas of fifteen or twenty years ago is beyond question, and that there is apparently still a pronounced demand for vocal numbers from them is well shown by the special issue of a Columbia record this month of "Star of My Soul," from "The Geisha," and "The Shade of the Palm," from "Florodora," sung by Edgar Coyle.

Choice of "Aida" a Wise One.

The fact that "Aida" stands at the head of Covent Garden productions during the past season, with the largest number of performances, reflects strongly upon the wisdom of the Columbia in choosing that opera for the first of its complete series. We learn, too, that the Columbia Co. has sold a very large edition of its "Aida" set.

Receives Award of Merit for Columbia Exhibit.

The latest advices from New Zealand state that A. H. Nathan, Ltd., of Auckland, has received the official first-class award of merit for its exhibit of Columbia graphophones and Columbia records at the Auckland exhibition.

Two Popular Records.

"Harmony Bay," declared to be the successor to that great hit, "Moonlight Bay," is sung by the Peerless Quartet on Columbia Rena this month, in company with "I Want to Go Home," which is the latest song from the pen of the composer of "Robert E. Lee."

The Man of Many Parts.

To the uninitiated the above caption to this short article might be suggestive of matters theatrical, but let me at once assure my readers of the contrary. This descriptive title has been adopted by W. H. Reynolds, of 45 City road, London, as a trade slogan and is in every way appropriate to his business, which is to supply any and every part of various makes of gramophones. Mr. Reynolds may be pardoned a little haziness upon the subject, but he calculates roughly on having in stock over 1,000 different parts and accessories. All of which is preliminary to the fact that this firm has just issued its 1915 catalog, comprising no less than sixty-four pages, and plentifully illustrated throughout into the bargain.

COLONIAL and FOREIGN BUYERS

of gramophones and records may obtain valuable information from English firms who are desirous of opening up trading relations with oversea markets upon application, stating requirements, etc., to our European representative,

W. LIONEL STURDY

2 Gresham Buildings,

Basinghall St.,

London, E. C.

To review adequately this fine trade encyclopedic price list would require two or more pages of The World. It must suffice, therefore, to give brief mention of a selected number of the innumerable lines marketed by Mr. Reynolds.

Firstly, in regard to complete machines, there is itemized a wide range of exterior-horn, cabinet and hornless at prices from 12s. 6d. upward. An example of the exterior-horn type suitable for colonial and other buyers is the "Reno" model superbe, carrying the following specification: Large solid oak or mahogany French-polished cabinet, silent running double-spring Swiss fibre worm-governed motor, well-finished tone-arm, 12-inch turntable, 22-inch bell solid oak or mahogany horn, "Reno" Stentor sound-box, etc. This fine instrument represents really remarkable value and good all-round quality at the price, 42s.

One of the most amazingly cheap lines in cabinet manufactures ever offered to the trade here is the "Reno" Concert de Luxe at £3 19s. 6d. This is a well-finished instrument in either oak or mahogany, bow-fronted, size 44x18x19 inches over-all. It stands on cabriolle legs and is provided with a cupboard for records. The equipment includes best double-spring Swiss motor and other fittings of strength and durability. If a trader desires to make up his own special line of machines, there is obtainable from Mr. Reynolds all the separate parts, including exclusive designs for cases or cabinets.

Among the hundred and one items listed I observe various kinds of sound-boxes, tone-arms, motors, turntables, non-slip record mats, connectors for every make of machine, arm-rests, elbows, metal and wood trumpets, needles, needle-boxes, the different parts of sound-boxes, motors, etc., gaskets, diaphragms, springs, screws, albums, record-carrying cases, record envelopes and dozens of other parts and accessories too numerous to mention. Any bona fide trader may obtain a copy of this wonderful catalog upon application to W. H. Reynolds, Ltd., 45 City road, London, E. C.

FROM OUR LONDON HEADQUARTERS—(Continued from page 50).

Takes Over Whole Stock.

The whole stock of instruments and parts held by Harth & Dubb, this city, has been acquired by the Utility Trading Co., the recently appointed sole selling agent for the British-made Favorite records.

Attractive Record Carrying Cases.

Among the several lines of record-carrying cases on sale here we must commend to the attention of foreign and colonial buyers that marketed by the Utility Trading Co., of 21 Paper street, London, E. C. It is put up in both the 10-inch and 12-inch size, each capable of holding up to about twenty-five records. They are made of fibre with doubly protected corners, hard-wearing and strongly constructed, leather handles, three fastenings, lined with felt, the finish throughout being in every way good. These cases are also to be recommended as of British manufacture, and priced as they are at a competitive figure, will

certainly meet with a ready demand from the trade.

The "Winner" Record to the Fore.

An offer of special interest to colonial and foreign traders is made in the "Winner" announcement this month, and we feel sure it will meet with a ready response. England is at last "waking up" in more ways than one. She is determined to enjoy to the full the benefit of her own markets. In our own sphere of trade activity some evidence of this is found in the stronger representations of British houses in our ad columns this month. Not the least important of these is the all-British firm which trades as the Winner Record Co. It offers at competitive prices first-class records of home manufacture throughout by British labor and capital. The "Winner" 10-inch double record enjoys a very high reputation the world over for smooth surface, excellence of recording and general artistic talent, and we can confidently recommend it to all discriminating

buyers overseas. In the "Winner" batch of patriotic issues nothing will be found wanting, there being an abundant choice of the war songs so much in demand just now by all English-speaking peoples. All profits from the sale of these special records will be devoted to the Prince of Wales' National Fund—a splendid policy which will commend itself to all.

Securing Colonial and Foreign Trade.

Preliminary to this short article I think it only fair to say that my intention is not to revile either German goods or the peoples with which Great Britain is at war, but frankly to point out the trading possibilities for British firms now that our colonies and certain foreign countries find their chief source of gramophone supplies cut off. It is not so much a question of politics or causes as the effect thereof. There is approximately over

DISC MACHINES

The German market being closed, oversea buyers of disc instruments should communicate with us for particulars and prices of some good selling lines we have to offer for competitive trade. Of British-Swiss manufacture, these machines are obtainable in a variety of styles and designs, at all prices, and being of reliable construction and good tonal quality will command a ready sale in the Colonies and foreign countries.

FROM OUR LONDON HEADQUARTERS—(Continued from page 51).

£100,000 worth of trade to be done with Australia alone, of which in 1912 Germany enjoyed 25 per cent. This business is not going abegging. Those making special efforts to interest Australian buyers will secure it.

It would be fair to assume that Germany's total exports of complete machines, parts and accessories reach in value many hundreds of thousands of pounds per annum. Of this amount a large proportion is absorbed by England, but there remains for capture the whole of her business with oversea markets. The chief manufacturing countries able to fill the breach are Great Britain and America, and traders in both lands will enter the field in competition. We are assured of a keen fight, but on grounds of sentiment and, I think, ability to supply on a more favorable basis of price and terms, British firms should enjoy an advantage over our American friends. Be that as it may, there certainly exists a preference for dealing with the mother country, and colonial buyers would therefore welcome the fulfilment of their trade requirements from London. British houses,

however, must meet the situation with evidence of willingness to accommodate themselves to the special needs of colonial trade by the production of instruments which in design and construction are suitable for hot climates. If this important matter receives consideration it will produce confidence and mutual satisfaction. The classified imports of talking machine goods by Australasia are not yet available for 1913, but I have gone to some trouble in ascertaining the total imports by the Commonwealth of Australia during 1912, feeling assured the details given below will prove both useful and interesting to all gramophone firms proposing to grasp the commercial hands of colonial traders. The figures given cover imports of gramophones, phonographs, cases and records, but not horns. In value we find the imports total the round sum of £141,622, in the following proportions: New South Wales, £117,601; Victoria, £12,565; Queensland, £3,317; South Australia, £2,705; Western Australia, £4,604; Tasmania, £812, and Northern Territory, £18.

Dissecting still further the subjoined discloses

the individual contributions of each exporting country:

Country of dispatch.	Country of origin.
United Kingdom	£68,152
Canada	270
New Zealand	1,480
Straits Settlements	242
Other British countries	127
Belgium	151
France	307
Germany	21,760
Italy	1,111
Spain	400
Switzerland	1,263
United States	47,949
Other foreign countries	73

From the foregoing it will be seen that a substantial amount of trade is available for capture.

Thanks to the British navy, all trade routes are open, at least the risk of capture at sea by the one or two enemy warships prowling around is exceedingly remote. Freightage rates are a little above normal, not sufficient, though, to seriously affect shipment.

Colonial trade conditions remain good, being unaffected to any appreciable extent by the war. To British houses I can say no more than a final exhortation to go in and win!

'TIS A SAD, SAD STORY.

Told by the Gentle Stranger to a Talking Machine Man, Who Soon Realized That He Was Not the Only Expert in the Selling Game—The Story Is Something Like This.

"Sir," remarked the pale and unnerved stranger to the patient but condescending talking machine man, "I was once a proud autoist, even as you! To-day I am but a physical shadow of myself—a past that ever haunts me."

The other man began to hunt a half dollar.

"No, no," the stranger hastened on, "I want nothing but your sympathy—and the promise that you'll take warning. I began autoing with an ordinary, well-trained, city-broke, soft-toned horn. But this soon became too tame; I had a calliope attachment added. I made the welkin ring for awhile; then the people got so used to it they didn't get out of my way. Next I installed a rattler that sounded like an explosion in a boiler factory. But even that lasted but a few short weeks, as an efficient warning to the sleep-walkers who crossed my path. I—"

"Pardon me," protested the man he had tackled, "but I don't need an auto horn. You see—"

"—had to hook on a regular freight train screecher next," the stranger persisted. "It sounded as if the whole of No. 3, through freight, had streaked through town with its whistle cord tied down. Even the policemen stayed awake when I came by. But the gentle pedestrian got used to it, just the same, and at last—at last I was forced to equip my machine with a pair of ice tongs to lift 'em out of the way. I'd made everyone in my burg stone deaf with my auto warnings. And that brings me to the point. I have here a small appliance which will make any deaf man—"

But the other, with one jump, had cleared the fence and was gone.

TALKER BRINGS PEOPLE TO CHURCH.

(Special to The Talking Machine World.)

GREENCASTLE, IND., September 7.—The Claypool Music Co., of this city, successful and progressive Victor dealer, recently loaned a Victrola and records to the First Baptist Church to be used at a special concert that the church was presenting. The success of this division of the entertainment is well set forth in the following letter sent to the company by E. G. Shouse, the pastor, reading in part as follows: "The introduction of the Victrola into the Sunday evening services of my church proved to be a happy innovation and resulted in doubling the Sunday night attendance." Needless to say, the Claypool Music Co. has not hesitated to use this testimonial whenever it could accomplish beneficial results.

The fellow who is always on the fence must be pretty well balanced to stay there.

Where one man throws his whole soul into his work another man is satisfied to put his foot in it.

TRADE IS ACTIVE IN TEXAS.

(Special to The Talking Machine World.)

CORPUS CHRISTI, TEX., September 3.—Notwithstanding the European war has cut business in some lines, the talking machine business in this part of Texas is particularly good.

The Gunst Piano Co. reports a splendid Victor business notwithstanding the fact that farmers here are unable to get money for their cotton, as this county produces more cotton than any other in the State.

However, the dance fever is on here and the city has been full of dancing teachers for the last six months and exhibitions have been given in the stores which have brought the talking machine people in close connection with the members of the dancing set.

The talking machine department of Eilers House at Tacoma, Wash., has been taken over by the Tacoma Eilers Talking Machine Co. H. E. French is president, A. W. Erhart vice-president and C. O. Girard is secretary and treasurer, the directors being the officers, Hy. Eilers and M. C. Koster.

TRADE IMPROVING IN BALTIMORE.

Sales in All Lines Show Substantial Increase—
Stocks in Excellent Shape—Fink Talking
Machine Co. Opens Branch—News of Month.

(Special to The Talking Machine World.)

BALTIMORE, Md., September 8.—While there has been some falling off in sales conditions during the last month or so in the talking machine lines, dealers announce that they have every reason to look for a big fall and winter business. It was at first thought that buyers would be somewhat backward, but prospects are coming in rapidly and they are of the most encouraging nature.

Manager S. A. Dennison, of the local branch of the Columbia Graphophone Co., announces that business has picked up so recently and shown such encouragement that those sections covered by the local office will be opened up again in the next week or so, despite the war and thoroughly canvassed. It was at first thought that this would be useless until after Thanksgiving at least, but conditions demand that things start, at once with the result that the traveling sales force will be augmented and a big rush for trade started. Business locally with the Columbia line has been very good during the month.

Manager H. C. Roberts, of E. F. Droop & Sons Co., Victor and Edison dispensers, announces that he has one of the best and largest stocks his store has ever carried and declares that this has been made necessary by the fine lot of prospects on hand. He advises all Victor dealers to do as he has done and stock up before holiday trade sets in and catches them without the proper line of goods to satisfy buyers.

The Fink Talking Machine Co. finds it necessary to branch out with the Victor and Columbia lines and has opened a northern branch on Greenmount avenue near Thirty-first street. Joseph Fink, proprietor, will conduct this new store in connection with the present one at Charles and Fayette streets in the heart of the business section of the city.

The H. R. Eisenbrandt Sons report a nice August trade with the Victor line at their store on Howard street near Saratoga street. Both the instrument and record demands were very brisk, and indications are that these will prevail all through the fall.

The Sanders & Stayman Co., Inc., was also among the dealers who came out during August with a good lot of sales of machines and records of the Victor and Columbia lines. This firm, too, predicts good things for the fall business.

VICTOR RECORDS BY JOHN INCE.

According to the news columns of a prominent theatrical paper, the Victor Talking Machine Co. has arranged to produce records made by John Ince, the well-known actor and motion picture director allied with the interests of the Lubin Co. in Philadelphia. Mr. Ince, who has had a long career as an actor on the legitimate and motion picture stages, possesses a voice of exceptional eloquence and volume, and particularly adaptable for recording purposes. It is stated that his first records will include Mercutio's Queen Mab speech from "Romeo and Juliet," Marc Antony's immortal declamation and the curse from "Richelieu."

VICTOR

A complete line of Victor products, from the smallest repair part to the biggest model of machine. Every shipment made promptly.

EDISON

Cylinder goods, machines and records; full stocks and immediate deliveries. A good popular-priced line for most any territory.

Louis Buehn

Philadelphia

THE VICTOR ON THE WATER.

J. H. Becker, Jr., and E. F. Spankus, of the Hoeffler Piano Co., Milwaukee, Give Practical Demonstration of Victor's Entertaining Qualities When Placed on a Boat.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., September 9.—Something entirely new in the way of outdoor Victor concerts was afforded Milwaukee citizens recently by J. H. Becker, Jr., manager of the Victor department of the Hoeffler Piano Co., and Harry Spankus, of the same department. Mr. Becker and E. F. Spankus, with the purpose of showing how appropriate the Baby Victrola is to furnish music on the water, carried one of these handy little Victrolas to Washington Park, where they rented a boat and gave an interesting concert on the park lagoon. All the August Victor records and some of the July numbers were featured, and a big audience soon crowded the banks of the lagoon to listen to the music. One man nearly fell in the water when Mr. Becker played Harry Lauder's "Laughing" record, No. 52,004. The concert was a big success and demonstrated in the best possible manner that Victor music on the water is delightful.

TO MOVE TO LARGER QUARTERS.

The Lucker Music House, St. Paul, Minn., handling talking machines and records, will move from its quarters on Seventh street to a much larger home in the new Raudenbush building at Sixth and St. Peter streets.

MOVIES FOR VICTOR EMPLOYES.

Six Thousand Employes of Victor Talking Machine Co. and Their Families See Films Showing Work in Every Department of Mammoth Plant at Private Exhibition.

(Special to The Talking Machine World.)

CAMDEN, N. J., August 30.—Thousands of employes of the Victor Talking Machine Co. filled the Plaza Theater here at two performances last week and immensely enjoyed a complete review of the process of making Victor talking machines and records. The company has 6,000 employes, and in order to enable each of them and an additional member of their family to see the Victor pictures it rented for this entire week the Plaza Theater, and by giving two shows nightly, one at 7 and the other at 9, it was possible for each of the many Victor employes to have two tickets. This meant that 12,000 in all saw the pictures in the twelve performances that followed.

The moving pictures, which were first shown at the convention of the National Association of Talking Machine Jobbers at Atlantic City last month, showed every department of the Victor plant in action, even to the interesting detail of taking impressions of the music and the singers' voices. The making of the records, the cabinets and every detail that enters into the completed Victrola were most interestingly illustrated in the moving pictures. There were seven reels of pictures, or about 6,500 feet of film, and the show was interesting throughout the nearly two hours of continuous movement of the film. The last reel showed the 6,000 Victor employes assembled outside the mammoth plant.

GENERAL BRACING UP OF THE TRADE IN DETROIT.

Effects of War Scare Wears Off Quickly and Optimism Rules—New Columbia Dealers Announced—Claim Banks Have Overreached Themselves—Better Grades of Machines and Records Have the Call—Few Talking Machine Exhibitors at Michigan State Fair.

(Special to The Talking Machine World.)

DETROIT, MICH., September 10.—A month ago the talking machine dealers were having a little scare over the effects of the European war on business, but that has all passed now. S. E. Lind, city sales manager of the Columbia branch in Detroit, expressed the general sentiment pretty well when he said to The Talking Machine World representative:

"There has been a general bracing up in trade in the last three weeks, and in my opinion we are going to have one of the liveliest fall and winter seasons in the history of our business. I form this opinion from what I hear from our dealers in all parts of the city and from what we get from out in the State. These dealers form their opinions from what people say to them, from the requests for machines, from statements of people that they are in the market for machines, etc. Never were the prospects brighter.

"People have gotten over their little fright. The only adverse effect the war can have, if it has any, will be to throw some men out of work in lines of industry which depend a good deal upon exporting for their market. This, of course, would hurt some. But indications are that trade will be fully

resumed soon with all countries except Germany and Austria, and, in addition, that new markets will be developed in South America. So probably in a short time we will have larger export markets than we ever did.

"Out in the country the people are eager for next year. The farmers believe the war will make them rich, and they are preparing to raise bigger crops of wheat and other things that can be sold in Europe than they ever did in their lives. They already are selling their large crops of this summer, and with so much optimism for next year they are not at all backward about spending their money.

"That is the situation which, in my opinion, will make the fall and winter of 1914-1915 the greatest in the history of the phonograph trade. It is no more than I expected all through the summer. The war scare did not last a week, and the big business that was in sight is bound to come along."

The Columbia Co. has several new wholesale accounts lined up in the city and will make the first deliveries in September. "We could have opened them before this, but we do not care to sell to new dealers during the summer season, when it is apt to be a little dull," said Mr. Lind. "It might

discourage a man before he fairly gets started."

Later in the fall several new accounts will be opened in cities out in the State.

An unusual reason why people are willing to spend their money and are showing a marked confidence in the soundness of the business situation is being given by the talking machine dealers. They say that the banks have overreached themselves. Generally, when banks tighten up their credits, it causes a scare. That was what caused the temporary scare early in August. The banks are demanding ninety days' notice of withdrawal of savings deposits. It makes people angry. So when they obtain funds they decline to put them in savings banks. They keep their surplus money at home, so they can use it when they need it. And when they find they have quite a bit on hand, and happen to recollect that they have been intending to buy a talking machine or something else, they make up their minds they might as well buy it while they have the money handy. This, of course, stimulates business of all kinds, causes larger demand for merchandise and increases employment.

The trend of prices in the talking machine business continues upward. In the principal stores it is a rare thing for a customer to ask for a machine costing less than fifty dollars. The smaller ones are becoming unknown. One reason is that if a party knows his neighbor has a machine that cost fifty dollars he wants to own one that cost a little more and buys a seventy-five dollar one. Or if his neighbor has a hundred and fifty dollar style, he will get a two hundred dollar one for himself. As the largest of these accounts are safe ones, with good payments down, the dealers are much pleased at the rivalry.

September is State Fair month in Detroit, but the talking machine houses expect to get their share of the visiting trade without going to the fair. "If there were as many different kinds of talking machines manufactured as there are pianos it would be necessary for us to exhibit," said one dealer. "But with only three or four, and those well known, we had better stick to our stores. We will get just as much business without going to bother and expense of an exhibit at the fair."

Grinnell Bros. will have a few Victors in their general exhibit, however. As they have the space anyway for their pianos and other musical merchandise, there is no additional expense in the showing of talking machines. And it adds to the variety and attractiveness of the exhibit.

J. Henry Ling, of this city, has been investigating the merits of the Crescent talking machine.

NEW COLUMBIA AGENCY.

One of the latest additions to the fast-growing lists of Columbia representatives up-State is Marson Bros., Utica, N. Y., who has just closed arrangements to handle Columbia products with the intention of concentrating their activities on the development of foreign record and machine business. The present wars abroad have created an increased field for the sale of foreign records of various languages.

DEATH OF HORACE PETTIT.

Noted Attorney on Patent Law and Counsel for the Victor Co. Passes Away in His Fifty-fourth Year—Participated in Many Notable Cases in the Federal Courts.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., September 5.—The death of Horace Pettit, the widely known corporation lawyer of this city, which occurred just after The World went to press last month, at his summer home in Ventnor, near Atlantic City, N. J., has caused sincere regret among those who were privileged to know this very distinguished authority on patent law.

Mr. Pettit had been for many years counsel for the Victor Talking Machine Co. and was engaged in many notable cases based upon patent rights and price maintenance, and always made a great impression on the Federal judges by his complete understanding of the law and the thoroughness with which he had prepared his cases. He also appeared at various times in Washington in opposition to bills presented in Congress inimical to the interests of the talking machine trade, and he was always listened to with the respect due an authority. In fact, there were few men who had such a thorough grasp on the basic patents underlying the talking machine industry as the deceased.

Mr. Pettit, who was fifty-four years old, had been ill for some time, but few considered his indisposition would result fatally. He was a member of the Union League, Racquet, University, Art, Huntington Valley, Country and Bachelors' Boat clubs. He is survived by a widow and one son.

REMODELING WORK COMPLETED.

In the Warerooms of the New York Talking Machine Co. Following Recent Damage by Fire—New Demonstrating Booths.

The various improvements incidental to the renovating of the warerooms of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, have been entirely completed, and the store now presents a decidedly more attractive appearance than it did before the warerooms were practically destroyed by fire on June 21. One of the improvements consists of the construction of two all-glass demonstration rooms for the display of machines, and the company's dealers are now enabled to have demonstrated all the machines on display with maximum convenience.

PLANS FOR NEW DINING ROOM.

Architects are now preparing plans for a large two-story dining room building as an addition to the plant of the Victor Talking Machine Co., Camden, N. J.

PRINCIPLES UNDERLYING "COPY."

Interesting Discussion by Felix Orman on Different Appeals Made by Advertising—Points Out the Far-Reaching Results of National Campaign of Victor Talking Machine Co.

Under the heading "What Are the Principles Underlying Your Copy Appeal?" Felix Orman, writing in Printers' Ink, recently called attention to a number of national advertising campaigns which have for their purpose far more than a mere attempt to secure business and boom individual trade.

Referring to the immense and far-reaching campaign of the Victor Talking Machine Co. in magazines and newspapers, Mr. Orman remarks as follows:

"A volume might be written alone on the subject of what the advertising of the talking machine has done in developing the love of music in America. The message of the talking machine has reached the remotest sections of the country and this machine has been shipped to people with little knowledge of the charm of sound who became music enthusiasts. Talking machine advertising indeed has made this a musical nation. John Burroughs, the naturalist, lived for years among his trees and shrubs without knowing anything of music. Then he bought a Victrola. He would sit for hours listening to the strains of Sousa's orchestra, or the voice of Tetrassini or the shouting of a ragtime singer. His life was made fuller and happier by this instrument. A caller criticized him for what the visitor called an 'unfortunate musical taste,' but the distinguished naturalist was quick to rebuke his critic with a statement of what the talking machine had done in teaching the masses to love music, which, he said, as we all know, meant the softening of the nature of the people and the development of their tenderer sensibilities.

"There is no denying," said Harry Brown, advertising manager for the Victor Talking Machine Co., 'that the talking machine has had a tremendous value in advancing our national life. Thousands of people—and many thousands of them—now love music who never had any patience with it before the talking machine carried it to them in a way that held their interest. Now those same people are developing a fine musical taste. More people hear Caruso's voice from Victor records every day than heard Patti in her entire operatic career. We have striven for this effect in our advertising, and we are gratified at the splendid educational and refining influence that our advertising has exerted."

SEE HOW THE JOBBERS IN THE WORLD CAN SUPPLY YOUR WANTS.

TALKING MACHINE EXPORTS.

The Figures for June Presented—Exports Show Falling Off for the Month.

(Special to The Talking Machine World.)

WASHINGTON, D. C., August 31.—In the summary of the exports and imports of the commerce of the United States for the month of June (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines, records and supplies for June, 1914, amounted to \$162,303, as compared with \$216,478 for the same month of 1913.

POPULAR LINE OF RECORD ALBUMS

That Manufactured by the National Publishing Co., Philadelphia—Have a Number of Interesting and Valuable Features—Special Circular Service for the Retailer.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., September 8.—The National Publishing Co., the well-known maker of disc record albums in this city, report that the demand for their products from the trade throughout the country is increasing steadily as the jobbers and dealers realize the excellent and salable features of the albums.

The National Co.'s albums are designed for both ten-inch and twelve-inch records, and with ten or seventeen pockets, according to size desired. Each of the albums is supplied with envelopes of heavy manila paper of extra quality and bound with heavy bookbinders' boards covered with brown silk finish cloth. Two index pages, especially designed to list double sided records are also included with each album, and this index, taken in connection with the fact that the record labels may be read through special openings in the sides of the pockets, make the finding of desired records particularly easy.

The albums are also designed to fit perfectly the new types of machine cabinets and the leading styles of separate cabinets, which fact adds materially to their salable qualities.

The National Publishing Co. has also created an excellent system for co-operating with the jobber and dealer in advertising and pushing the albums made by the company by offering to supply, without charge, special circulars for the retail trade in quantities of 500 or more. The circulars contain illustrations, descriptions and prices of the albums, and also bear the name of the dealer or jobber to whom they are supplied. An excellent idea.

An Added Line That Will Make You Money

The H. P. Nelson Small Grand

The talking machine dealer can carry a small stock of pianos to the greatest advantage because he is the possessor of certain natural facilities that, of themselves, bring him sales.

The profits on a piano sale are large. The expense of carrying a few instruments is almost negligible, and their sales come oftener than you, perhaps, think.

Our line of uprights, players and grands is especially adaptable to the wants of the talking machine dealer who to a certain extent relies upon the instrument to sell itself. We have built up a tremendous business upon our policy of giving the greatest return for the least money, and the value of our products is so apparent that even those least acquainted with pianos are instantly aware of their worth.

Get our special proposition to you

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., September 10.—SOUND BOX. George Lansing Funnell, London, Eng., assignor to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,104,182.

This invention has for its object to produce a sound box, in which the diaphragm casing proper shall be yieldingly connected to its support, such as the hub or neck of the sound box, the union being effected through the medium of a resilient joint which leaves the diaphragm casing free to have a limited movement with relation to the hub or neck.

In reproducing from certain sound records of the zig-zag type, and particularly those records of sounds having great amplitude of vibration, it is a recognized fact in the art that the strain upon the diaphragm is decreased, and the pleasing character, quality and definition of the reproduced sounds is much enhanced by providing a yielding connection between the sound box casing and its support, the yielding connection being preferably situated at the joint between the casing and the neck or hub of the sound box.

The object of the present invention is to provide an improved form of yielding resilient joint between the sound box and its support, thereby obviating the production of a harsh metallic sound by the instrument and improving the reproduction as to volume, tone, quality and definition.

The objects of the invention are accomplished, in the present instance, by forming the diaphragm

casing preferably metal, with the diaphragm mounted therein in any suitable manner, and preferably the back of the casing is closed by a metal plate having a central opening therethrough, and the hollow hub or neck is secured to this metal back by any suitable means, such as screws located on a line passing diametrically through the hub. To effect this the hub is provided with a flange and the screws are passed through the flange and into the metal back of the diaphragm casing, and there is interposed between the hub and the back of the casing a narrow ring of any suitable resilient material, such as rubber, the thickness of the ring being such as to prevent the flange of the hub from contacting with the back of the casing, the ring serving to form a yielding, resilient connection between the casing and the hub. As thus constructed the diaphragm casing is free to rock on the resilient ring without imparting corresponding motion to the hub vibrations imparted to the casing are not transmitted to the hub, and vice versa, and at the same time a complete closure is formed at the joint between the hub and the casing.

In the drawings Fig. 1 is a central sectional view illustrating one form of this invention; Fig. 2 is a side elevation thereof; and Fig. 3 is a detail.

PHONOGRAPH SOUNDING-BOARD. Donald M. Bliss, Orange, N. J., assignor to the Bliss Talking Machine Co., Delaware, Md. Patent No. 1,104,340.

The objects of this invention are: 1. To provide vibratory members and sounding board members for all acoustical devices, having the maximum of resilience, lightness and stiffness, and also to incorporate these members in phonographs. 2. To combine a vibratory resonator attached to a stylus mounting with a turntable provided with a resonating chamber of resonant material. 3. To provide improved construction for other associated acoustical and mechanical devices, as will appear more fully from the following detailed description

and claims, and to provide a window in a sounding board or resonator.

The advantages of the invention are that these acoustical devices will give improved results, and when incorporated in phonographs together with the associated devices, the phonographs will play either lateral or vertical cut records; have a low cost of manufacture; require no moving parts intermediate the stylus and sounding board; be compact, and also be convenient to operate.

Referring to the accompanying drawings, Fig. 1 is a plan view of the phonograph, containing sound-

ing board or sounding board diaphragm. Fig. 2 is a partial sectional side elevation of the device of Fig. 1, taken on the line 2-2, looking in the direction of the arrows. Fig. 3 is a partial cross section of the device of Fig. 2, taken on the line 3-3, looking in the direction of the arrows.

STYLUS FOR SOUND-REPRODUCING MACHINES. Gustave Lehr, New York. Patent No. 1,103,592.

The object of this invention is to furnish for sound-reproducing machines a stylus which is durable in use, not prohibitive in cost, and which yields a superior tone. These objects are attained by making the record-engaging portion of the styli of ruby, and forming the same in generally pyramidal form with a curved face.

In the accompanying drawing Fig. 1 is a side view of a portion of a gramophone disc, and a front view of the reproducer of the instrument, showing in position of use a stylus embodying the invention. Fig. 2 is an enlarged side elevation of the stylus removed from the machine. Fig. 3 is a view on a similar enlarged scale, taken from the

rear of the stylus. Fig. 4 is a front elevation on the same enlarged scale. Fig. 5 is a horizontal section on line 5-5 of Fig. 3 through the jewel forming the working point of the stylus.

GRAMOPHONE NEEDLE OR STYLUS. Minard A. Possons, Cleveland, O. Patent No. 1,103,829.

This invention relates to improvements in gramophone needle or stylus, and the object is to provide a needle or stylus for a gramophone which

can be made of a very thin sheet of metal and yet have the stability to support the reproducer.

Another object is to provide a needle of this character in which the thickening of the supporting point not only strengthens the needle for support-

ing the reproducer, but also forms a round surface adapted to fill the sound grooves of the records which does away with the grinding sound usually caused by the ordinary pointed needle or stylus and also prevents any injury to the record.

A still further object of this invention is to provide a needle of cheaper construction in that there is a great saving of material and at the same time having the necessary strength and flexibility.

In the accompanying drawing Fig. 1 is a perspective view of a star needle embodying the invention. Fig. 2 is an enlarged perspective view of a portion of the star showing more fully the rounded elliptical members carried by the ends of the points of the star. Fig. 3 is a vertical enlarged sectional view of a record showing the needle in perspective in its position in the sound grooves.

COMPOSITE DISC SOUND-RECORD. Victor H. Emerson, New York; Geo. A. Manwaring, Bayonne, N. J., and James K. Reynard, New York, assignors to the American Graphophone Co., Bridgeport, Conn. Patent No. 1,102,253.

This invention relates to sound-records impressed in discs or tablets, and more particularly to the composite tablet and the manner of building up the same and the method of making the record.

The invention will best be understood by describing in detail the successive steps employed in producing the article.

Fig. 1 shows a pair of rollers through which is

passing a matrix and the unfinished record tablet; Fig. 2 represents a press operating upon the same, and Fig. 3 is the finished article.

REPRODUCER FOR PHONOGRAPHS. Simon D. Paddock, New York. Patent No. 1,102,290.

This invention pertains to reproducers for phonographs, and relates, more particularly, to improvements whereby the diaphragm is maintained in such operative state as to insure at all times its most efficient action in quickly and perfectly responding to the movements of the stylus as it traverses the record.

Speaking generally, the improvement consists in so balancing the stylus or tone bar that the diaphragm is free to quickly and accurately respond to the most minute movements of the stylus. This result is accomplished by associating with the stylus

bar and its supporting spindle two complementary springs, one of which exerts tension on the stylus bar and thus applies pressure to the diaphragm in one direction, while the other exerts an opposed tension on the stylus bar and a consequent pressure on the diaphragm in an opposite direction to that produced by the first spring. In the preferred construction suitable means is provided for varying the tension on the said springs, and it will thus be obvious that they can be so adjusted that the diaphragm is placed under such tension as to produce sounds of the purest and best quality, and yet be so sensitive as to reproduce the most delicate and softest tones.

Fig. 1 is a plan view of a phonograph reproducer embodying the present invention, and Fig. 2 is a side elevation thereof.

SOUND PRODUCING DEVICE. Harry Alfred Gaydon, Croydon, England. Patent No. 1,102,260.

This invention relates to sound producers of the kind in which a valve, consisting of a comb or grating, the teeth or bars of which are adapted to close the spaces between the teeth or bars of a like comb or grating forming the valve seat, controls passages of elastic fluid thus producing the sound. In sound producers of this kind the valve has been

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 56).

carried by a torsional spring support mounted at each end in bearings arranged upon the valve seat so as to be adjustable, whereby the distance of the valve from its seat may be varied. Thus the torsional spring constitutes the fulcrum of the lever consisting of the valve and the piece that holds the stylus.

By this invention a lighter torsional spring is used by providing a separate fulcrum for the lever system comprising the valve. For this purpose the piece that holds the stylus is provided with a shoulder to which the torsional spring is fixed and takes under the block in which the valve seat is mounted; between this block and the shoulder are one or more balls or projections which serve as the said fulcrum. This construction allows of the ends

of the torsional spring being mounted in pieces adjustable on the under surface of the block carrying the valve seat, thus affording a more readily accessible adjustment than that afforded when the bearings of the spring are carried on the face of the valve seat. It also provides greater flexibility in the desired direction. This construction of the piece that holds the stylus also allows of a very simple adjustment of the spring pressure on the valve which balances the elastic fluid pressure. For this purpose one end of a blade spring may be fixed to the aforesaid shoulder, and the other end may be engaged by a screw spindle extending through the sound box. Another improvement is connected with the distribution of the elastic fluid entering the sound box. For improving this distribution the box is partitioned with wire gauze or the like, so that there is an inner compartment on the end wall of which the valve seat is situated, and an outer compartment surrounding or substantially co-axial with the inner compartment, and packed with cotton-wool or other suitable filtering material.

The accompanying drawings illustrate the invention as applied to the sound producer of a gramophone, Fig. 1 being a front elevation partly in section. Fig. 1a is a detail end view of one of the rotatable elements h. Fig. 2 a side elevation, and Figs. 3 and 4 sections on line 3-3 and 4-4, respectively, of Fig. 1.

SOUND-REPRODUCING DIAPHRAGM. Simon D. Paddock, New York. Patent No. 1,102,291.

This invention pertains to sound producing diaphragms, particularly adapted for use in phonographs, and embodies the diaphragm as a new article of manufacture.

The object of the invention is the production of a diaphragm which emits clear, pure and resonant tones, in contradistinction to the diaphragms now in use which produce tones of a more or less raspy or metallic character.

With the foregoing object in view, the invention embodies a suitable base member, preferably blot-

ting paper, which has been rendered hard and given vibratory qualities by means of a certain chemical treatment. The inventor says:

"The following detailed description of the manner of making the diaphragm is what I now consider the best method, but it will be understood that this is not the exclusive one, for, in all probability, other agents, more or less equivalent to those specified, may be employed to secure some or all of the advantages of my invention.

"I preferably start with a piece of blotting paper of the desired size, and dip it in a suitable volatil-

agent or menstruum, preferably ordinary ether, although I may use, though not with the same advantage, alcohol and benzol. The blotting paper having been treated as described, I immerse it, while saturated with the solvent, in a molten mixture consisting, preferably, of Japan wax, resin and fish glue. The proportions of the ingredients entering into this mixture may be varied within considerable limits, but the proportions, by weight, which I have found to give the best results, are substantially as follows: Japan wax, 20 per cent., resin 60 per cent., fish glue 20 per cent. The ingredients are mixed together and simply heated, preferably over a water bath, to a sufficient degree to melt them and produce a homogeneous mixture. The blotting paper, or other base material for the diaphragm, having been immersed in the mixture, is withdrawn and allowed to cool, whereupon there results a hard, waterproof, sonorous disc, particularly adapted for the purposes specified."

Fig. 1 is a face view of the diaphragm embodying the invention, and Fig. 2 is a cross section through the center thereof.

SOUND REPRODUCING AND RECORDING INSTRUMENT. Henry George Wieder, London, England. Patent No. 1,102,839.

This invention relates to improvements in sound

reproducing and recording instruments such as gramophones, phonographs and the like. One object of the invention is an improved means of attachment for the arm carrying the sound box or reproducer by which the arm is adjustable more or less vertically while it is carried in such a way that it can swing with a minimum of friction to the movement of the needle or sapphire upon the record.

The accompanying drawings are illustrative of an improved means of attaching the tone arm to its bracket, Fig. 1 being a longitudinal section and Fig. 2 a plan view showing the improved method of attachment as applied to a tone arm which is disposed beneath the trumpet.

PROCESS OF MAKING DUPLICATE PHONOGRAPH RECORDS. Jonas W. Aylsworth, East Orange, N. J., assignor to New Jersey Patent Co., West Orange, N. J. Patent No. 1,101,827.

This invention relates to a process for making phonograph records in which the wearing surface is entirely of metal. This material may constitute the entire record or may be a shell provided with a backing of other material.

The process is particularly adapted to the manufacture of cylindrical phonograph records, although it may be used for making records of the disc type, if desired.

Cylindrical sound records at the present time are generally made of a waxlike material molded or cast within a hollow matrix, and disc records are formed of somewhat harder material, employing considerable quantities of shellac, the impression being secured from a flat matrix. With both types of record the material is subjected to considerable wear when used in a phonograph or talking machine, and such wear becomes objectionably great when the width of the record groove is decreased beyond a certain point or when the pressure of the stylus upon the record is increased beyond a certain point. It has also been proposed to use for cylindrical records a material harder than the waxlike material just referred to, for instance, celluloid. Such records, however, are generally found to be of poorer quality as regards sound reproduction than those of waxlike material, and they appear to deteriorate with time. Moreover, a cel-

luloid record is also subjected to objectionable wear when the width of the record groove is diminished or the pressure of the stylus increased beyond a certain limit. It has also been proposed to make duplicate phonograph records in metal, but such processes have been objectionable in that it has been necessary to destroy the matrix in order to liberate the metallic duplicate.

By the present invention it is possible to readily free the metallic duplicate from the matrix without

injury to the latter whereby the same may be used for the production of an indefinite number of copies.

Fig. 1 is a central vertical section of apparatus for producing the matrix within which the metallic records are to be deposited; Fig. 2 is a similar view of the matrix after being removed from the mold of Fig. 1, and after the master has been removed therefrom; Fig. 3 is a similar view showing apparatus for producing a metal deposit within the matrix to form the record or record wearing surface, and Fig. 4 is a similar view of the completed record in its preferred form.

GRAPHOPHONE RECORD-CLEANER. Walter Guy Pearson, Newburyport, Mass. Patent No. 1,102,073.

This invention comprises a new and improved cleaner for graphophone records, the construction and arrangement being such that records may be cleaned thoroughly and in a short time, the device being inexpensive in its make-up whereby it may be offered at a low price.

The provision of a device which may be easily manipulated is of some importance in setting forth the invention herein described, such ease of manipulation not being obtained at the expense of efficiency or thoroughness.

Fig. 1 is a plan view of one form of the device; Fig. 2 is a sectional view thereof along the line

2-2 of Fig. 1, the record being shown in position for cleaning; Fig. 3 is a plan view of a modified form.

Fig. 4 is a top plan view of a graphophone turn table fitted with this device, on the line 4-4 of Fig. 5; Fig. 5 is a sectional view of the record and cleaning device on the line 5-5 of Fig. 4.

NEW COLUMBIA DEPARTMENT

Opened in the Warerooms of the Tel-Electric Co., 299 Fifth Avenue, This Week.

The new Columbia department in the Tel-Electric Co.'s warerooms at 299 Fifth avenue, New York, opened last month, and judging from the interest already being manifested in the Columbia products by the store's patrons, this department will be a marked success under the able management of Charles F. Thayer. Five soundproof demonstration rooms are perfectly appointed for the convenience of customers, and the entire department is furnished in accord with the standards befitting the location of the Tel-Electric Co. in the heart of the city's high-grade shopping district.

J. C. ROUSH VISITS NEW YORK.

Pittsburgh Talking Machine Man an Ardent Tennis Fan and Attends Cup Tournament.

Joseph C. Roush, of the Standard Talking Machine Co., Pittsburgh, Pa., and ex-president of the National Association of Talking Machine Jobbers, was in New York several days recently attending the International Tennis Tournament for the Davis Cup, held on Long Island. Mr. Roush is a tennis enthusiast and thoroughly enjoys the exciting game. Before leaving for home he stated that conditions in the Pittsburgh district were encouraging and that the talking machine trade particularly was in excellent shape.

The best-known trade mark in the world

“The Victor talking machine’s design, ‘His Master’s Voice,’ has become a household word, and the quaint little fox terrier at attention before the horn is familiar to more Americans than any of the world’s great masterpieces”—*Collier’s Weekly*.

INSTALLATION FOR THE AEOLIAN CO.

INSTALLATION FOR NEAL, CLARK & NEAL CO.

Unico Demonstrating Booths

Will Sell MORE Player-Pianos

These booths are built on the Unit system; can be taken down and put up again in a few hours; made in multiples of three feet, so you can enlarge or reduce your booths as desired, and without labor charges. Every Unit is interchangeable.

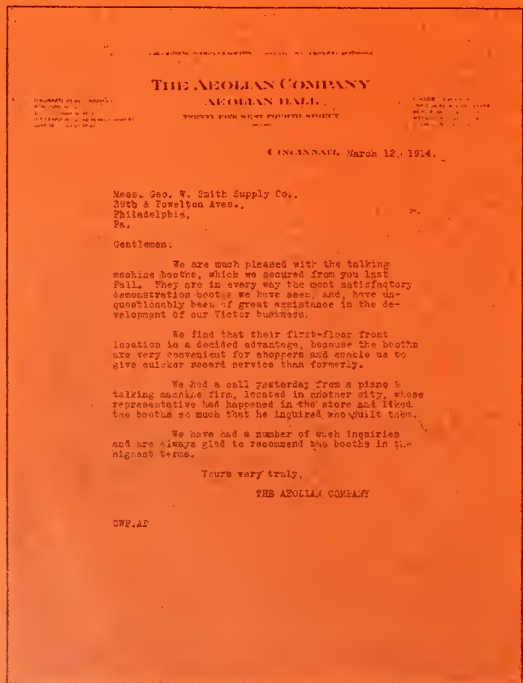

Made in eight regular designs, and are both SOUNDPROOF and DUSTPROOF.

Woods furnished: Oak, Birch, Quartered Oak and Mahogany. Special finishes on order.

Unico Booths increase the sales of Talking Machines, Player-Pianos, Music Rolls and records, for customers always buy better goods—and more goods—with artistic surroundings.

The cost of Unico Booths is less than you would pay in your own City, irrespective of our Patent Construction and Superior Quality.

Just look at this partial list of high-grade houses where Unico Demonstrating Booths are selling more Player-Pianos.

Price Ten Cents

METROPOLITAN PHONO CO. FORMED.

New Concern Takes Over the Retail Business of Benj. Switky—Headed by Wm. S. Finberg, President, and David Kahn, Secretary and Treasurer—Business to Be Developed.

The Metropolitan Phono Co., Inc., recently organized and incorporated under the laws of New York, formally took over the retail business of Benjamin Switky, the Victor distributor at 9 West Twenty-third street, New York, on October 5, following Mr. Switky's announced intention of confining himself to the wholesale business exclusively in the future.

The officers of the new company are William S. Finberg, president, and David Kahn, secretary and treasurer. Mr. Kahn is already well known to the trade, having joined the retail staff of Mr. Switky about ten years ago as errand boy and working up steadily to a position that represented what was practically the management of the retail business. His knowledge of the talking machine business in general and the retail end in particular should ensure his success in the new venture. Mr. Finberg is a prominent real estate man and is amply supplied with capital.

Mr. Kahn, who will look after the actual management of the business, will retain the present staff of the store and also make several additions necessary to the development of the business.

THE OPERA IN THE HOME.

In Lieu of Its Presentation in the Opera House Emphasized by the New York Talking Machine Co.—Clever Window Display, Based on Cartoon, Attracts Wide Notice.

The New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, intro-

Grand Opera Window of New York Talking Machine Co.

duced recently a special window display which is attracting the attention of all passers-by on Chambers street. This display, which was conceived by J. T. Owens, of the company's staff, embodies a number of timely attributes which give it unusual distinctiveness.

The display is based on a cartoon which appeared in a local newspaper entitled, "If the opera stars can't come back in time—why not this at the Metropolitan?" and showing the wooden figures of Caruso, Scotti and Farrar standing in front of talking machines with notes issuing from their mouths, which in this drawing are the big ends of the phonograph horns.

Mr. Owens decided that the opera "Mme. Butterfly" would well carry out the idea of the cartoon, and a cut-out display of an opera house was designed with the evening's performance scheduled as "Mmc. Butterfly" and the appearing artists as Caruso, Scotti, Farrar and Homer. To carry out the plan bulletin boards listing all the Victor records from this popular opera were placed on either side of the opera house and actual scenes from the opera clipped from the Victor Book of Operas

were also displayed in bulletin form. The completed display was perfect in every detail and well deserving of the praise it received.

POMMER BUSINESS TRANSFERRED.

Ellas Marx Co. Takes Over Talking Machine Business of A. J. Pommer Co., Sacramento.

(Special to The Talking Machine World.)

SACRAMENTO, CAL., October 9.—The A. J. Pommer Co., one of the largest talking machine houses in the interior of California, has just closed a deal whereby its business is transferred to the Ellas Marx Co., a leading piano house of this city. The name of A. J. Pommer has for many years been prominently identified with the piano and talking machine business of California, the piano department having been discontinued a few years ago; while the Ellas Marx Co., whose standing is materially increased by this deal, is known as one of the pioneers of the trade of central California.

FORESEES END OF DEPRESSION.

Optimism, John Wanamaker Says, Is Great Need in the United States Now.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., October 8.—John Wanamaker expressed his firm belief that the present business depression is only temporary in an address at a luncheon at the St. James recently, attended by members of the Walnut Street Business Association, Rotary Club and Merchants and Manufacturers' Association.

"Business is in a condition of unpleasantness, unhealthfulness and fear," he said. "Our present need is to discover the best way to get business on to the double track of safety, out of the darkness into light, to find a way for courageous feet and to see a vision of returning good times.

"My great hope, indeed I may say my firm belief to-day, is that this condition is only temporary. We can shorten it, and it is our duty not to talk down but to talk up. We must first get ourselves in an optimistic frame of mind, for the man who is discouraged can discourage the man who is next to him. If a man has health and strength he has no right going about with a long face, as he only makes things harder for himself and for those about him.

"We have gone through a hard time, but conditions that exist are here, and are not simply the result of politics or of war in Europe. The tariff has had a great deal to do with the unrest, the mills closing because capital cannot be had as usual.

"As for the income tax, it is good, sound sense to make the rich men bring out their money, but it touches all such as ourselves, for there is just that much money less in circulation. I have no fault to find. We elected splendid people who notified us in advance what they would do. We are talking now not of cause, but of effect.

"In all cities business men have been affected by the present condition of banking capital. The Federal reserve act will work out great good. Money, however, is like merchandise—the highest bidder gets it."

The West Music House, one of the oldest music houses in Joliet, Ill., has recently remodeled its quarters to make room for new demonstrating booths in the Victor talking machine department. This branch of the business is steadily expanding.

MOVED TO NEW QUARTERS.

Humes Music Company of Columbus, Ga., Now Has One of the Finest Talking Machine Departments in South—Install Unico Booths.

(Special to The Talking Machine World.)

COLUMBUS, GA., October 6.—In moving from their old location to their new store at 1032 Broad street, the Victor talking machine department of Humes Music Co. has undergone quite a change. In place of the improvised display room in the back of the store it is now in the front of the store and is equipped with two sound-proof demonstration rooms of Unico construction. C. C. Gibson formerly of Phillips & Crew Co., Atlanta, is in charge of this department and is anticipating quite a large increase in business this season.

COLUMBIA MANAGERIAL CHANGES.

Recent Changes and Transfers of Managers in the Various Branches of the Columbia Co. Throughout the Country.

The Columbia Graphophone Co. announced last week a number of important changes concerning the personnel of the managers of its various branches throughout the country. It is interesting to note in this connection that the company in making the changes and transfers has followed its successful policy of promoting the men who have been in its employ for any length of time in preference to securing the services of outsiders.

Frederick Dennison, manager of the Baltimore headquarters of the Columbia Co. for several years, has been placed in charge of the Detroit branch, where he will be given a broader field for development and expansion.

George A. Baker, assistant manager of the Columbia Co.'s wholesale establishment at 89 Chambers street, New York, has been promoted to the management of the Baltimore store, an advance that he well deserves.

Kenneth Johns, formerly manager of the Detroit store, will join the Columbia Co.'s offices in New York, occupying an important post.

J. D. Westervelt, formerly agency supervisor of the Dictaphone division of the Columbia Co., has assumed charge of the Dictaphone business of the Pennsylvania Talking Machine Co., Philadelphia, Pa.

T. L. McManus, a special salesman from the executive offices of the Dictaphone department, has been placed in charge of the Springfield, Mass., branch of the Columbia Co.

VICTOR CO. TO BUY 2,000 BALES.

Orders Bale of Cotton Through Every Victor Dealer in Cotton Belt—A Big Total.

(Special to The Talking Machine World.)

ATLANTA, GA., October 9.—The "Buy-a-Bale-of Cotton" movement Monday morning is given another big boost by a purchase of 2,000 or more bales at 10 cents a pound by the Victor Talking Machine Co., of Camden.

The company will buy one bale through each of its dealers in the cotton belt, and it has at least 2,000 dealers and probably more in this section. The cotton is to be bought by the dealers direct from farmers and is to be shipped to the company's warehouse in Philadelphia.

The Elyea-Austell Co., of this city, which is a Victor distributor here, and the wholesale representative, made the announcement of the company's big purchase, which amounts to \$100,000 or more. The purchase, in fact, is the direct result of solicitation on the part of the Elyea-Austell Co. It took the "Buy-a-Bale" matter up with the Victor Co. when the movement started several weeks ago. It suggested that the Victor Co. buy 250 bales, and the company responded by buying 2,000 bales.

PACIFIC COAST DEALERS PLACING LIBERAL ORDERS.

Jump in Wholesale Business Indicates Faith in Coming Holiday Season—Elaborate Columbia Exhibit for Panama-Pacific Exposition—New Edison Shop Opens in San Francisco—Encouraging News from the Interior—New Stores Recently Opened—News of Month.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., October 3.—There has been a notable wholesale movement of talking machines during the last few weeks. Dealers throughout the country have been in the market for both talking machines and records; and the general expectation seems to be for a good lively fall and winter trade. The orders have not as a rule been particularly large; but they have been numerous and have been restricted to no particular section of the Coast territory. With the close of the harvest season and the advent of money received from the sale of these, country retail business has also begun to pick up, though the heavy selling in the country will not come till a little later. City retail trade is also showing signs of the regular fall activity, and the general talk around the talking machine departments is of the optimistic sort. The fact that in practically all cases where there is any remodeling being done at the music houses there is also an enlargement of the space allotted to talking machines shows what the dealers are expecting of the fall and holidays.

Planning for Elaborate Columbia Exhibit.

W. S. Gray, manager of the Pacific Coast territory for the Columbia Graphophone Co., reports a good start made on the fall trade, the volume of the business done to this date being somewhat larger than for the same date last year. The opening of new talking machine departments by music dealers and others in the smaller cities and towns of the Coast being more noticeable than usual. Mr. Gray is now beginning to give some little thought to the exhibit which the Columbia people will put in at the Panama-Pacific Exposition. The exposition buildings and grounds are now all complete and ready for the installation of exhibits, and exhibitors are beginning to work out their plans in detail. A fine showing of Columbia machines and records was made by the Wasserman-Gattmann Co., of Sacramento, Cal., at the California State Fair in that city last week.

Formal Opening of New Edison Shop.

The new Edison shop on Geary street has been the big thing in the San Francisco talking machine trade for the past two weeks. This store held its formal opening on September 24, and on that day and on each succeeding day has been offering special concerts for the entertainment of visitors. The new store and the daily concerts have been given a liberal advertising, running from half to whole pages in the daily papers, and Manager

James S. Baley reports that results have been of the most cheerful sort. On the opening day concerts succeeded each other almost without intermission from 8.30 in the morning until 5 at night. A total of more than ninety numbers were given.

Take Advantage of Los Angeles Fashion Show.

The Fall Fashion Show at Los Angeles during the week of September 21-26 was utilized by the Los Angeles music houses as a sort of fall opening for the retail talking machine departments. Special window displays were made by nearly all the larger stores. A number of the stores, including the Geo. J. Birkel Co., the Wiley B. Allen Co., and the Southern California Music Co., were given special mention by the press in the write-ups of the Fashion Show.

Remodeling Store in Santa Barbara.

The talking machine store of Ralph M. Paulin, at Santa Barbara, Cal., is now in the midst of a general remodeling and refitting. An artistic entrance has been put in connecting Mr. Paulin's store with the piano store of the Brown Music Co. New demonstration rooms have been added, and the reception room has been refitted.

More Space for Eilers Department.

Manager Rothermel, of the talking machine department at the Eilers Music Co., San Francisco store, has prevailed on the company to grant him some valuable additional ground floor space in the big Market street store. The growth of business in his department and the prospects for a very busy fall left the department a little short of demonstration rooms. A special demonstration room for Edison disc machines has now been completed.

Adds Talker Department in Modesto, Cal.

H. Hinz, a well-known music man of Modesto, Cal., who has been in business in that county for many years, has now added a talking machine department to his store. In this, he has associated himself with J. J. Morgan, of San Francisco, who was formerly manager of the talking machine department of the Emporium department store.

Preparing for Big Season in San Diego.

The San Diego store of the Southern California Music Co., is preparing for a big season in the talking machine department, partly as a result of the near-by opening of the Panama-California Exposition in that city, and partly as a result of natural growth. Arrangements are being made to handle additional business. The management of the San Diego store has now been placed in charge of Leonard Newton, for several years manager of

the talking machine end of the Los Angeles store. Mr. Newton took up his new work about the middle of September.

New Department in Visalia, Cal.

A complete talking machine department will be installed in the new music store of the Wiley B. Allen Co., at Visalia, Cal. A good location has been secured on North Court street. T. F. Sibley, of Visalia, will be in charge of the store, the special talking machine man having not yet been selected.

Clark Wise & Co. Expand.

Clark Wise, of Clark Wise & Co., Geary street dealers, say that they have again found it necessary to take additional space for their talking machine department. Some additional demonstration rooms have been added in preparation for the normal fall increase in business.

Increases Stock of Edison Products.

The Curtis & Henkle Drug Co., of San Jose, Cal., has expanded its talking machine department and is now carrying a larger stock of Edison machines and records than ever before. Arrangements have been made to get in shipments of new Edison records each week.

New Stores and Changes.

L. C. Ackley, of San Fernando, Cal., has secured a new location, which is now being put in shape. He expects to get moved within a couple of weeks.

W. D. Evans, of Antioch, Cal., will shortly organize the Contra Costa Music Co., to take over his business with the idea of doing a little expanding.

R. Hosmer has opened at Berkeley, Cal., with a line of talking machines and other musical goods.

The Burditt Piano Co., which opened a music store at Pomona, Cal., a few weeks ago, has put in a complete line of Columbia machines, and is preparing to give this line a good representation during the fall and winter.

A. L. Gardner, of Bakersfield, Cal., was a trade visitor in San Francisco a couple of weeks ago.

DEALERS' ASSOCIATION TO MEET.

J. G. Bremner, president of the Eastern Talking Machine Dealers' Association, states that, with the opening of fall, the regular meetings of that body will be resumed for the discussion of various trade questions. The date of the first fall meeting has not yet been announced, but will be decided upon soon.

An American Consul in England reports a company in his locality desirous of securing names of American manufacturers of talking machine motors and fittings. Manufacturers wishing to communicate with this company should address the Bureau of Foreign and Domestic Commerce, Department of Commerce, Washington, D. C., referring to Foreign Trade Opportunity No. 13739.

The Success of Your Talking Machine Department

Is to a *large* extent dependent upon the service your distributor gives you.

This admitted makes it important that you secure the best service obtainable.

AND THAT IS EASTERN SERVICE

To use it is to swear *By* it not *At* it.

May we not have the opportunity to convince you that our service is exceptional?

“Will there be a Victrola in your home this Christmas?”

This important question will confront the people of the whole country right on until Christmas.

It is the key-note of our nation-wide holiday advertising campaign, and its force will send thousands of customers into the stores of Victor dealers everywhere.

It will help to make this the biggest holiday season you ever had—even ahead of the phenomenal business of last Christmas.

Victor Talking Machine Co., Camden, N. J., U. S. A.

Berliner Gramophone Co., Montreal, Canadian Distributors.

Always use Victor Machines with Victor Records and Victor Needles—the combination. There is no other way to get the unequalled Victor tone.

ACTIVITY IN TWIN CITY TRADE.

Minnesota Phonograph Co. Opens Store in St. Paul—Jobbers Report Heavy Demand for Machines and Records—Talking Machine Co. Giving Recitals—General News.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., October 5.—A new store opened last week in St. Paul under the name of the Minnesota Phonograph Co. in the triangle building at Sixth and St. Peter streets. With fronts on three streets and in the heart of a section that many students believe will be the coming shopping district of St. Paul, the store is well located for good business. William Lucker, the manager, states that more than \$5,000 has been expended in the demonstration booths and other phonograph equipment, and the appearance fully bears out the statement. While the store already is occupied, it is not wholly completed and the formal opening has been deferred. Edison phonographs and Victor talking machines will be handled on a large scale in this new place.

Victrola business is booming not only in Minneapolis and St. Paul, but throughout the entire country, for which the Twin Cities are the jobbing center. These houses know nothing about war except that it brings them additional demand for patriotic music records. There are ten Victor stores in the two cities and all without exception report their September business as the best ever.

The Talking Machine Co., Archie Matheis, manager, inaugurated Thursday night a series of weekly recitals. The plan which was tried last season proved so attractive that it was resumed again for the present season. The store was filled to its utmost and the recitals will now be a regular event until next summer. Mr. Matheis has published a prospectus of his line which is an attractive little volume in every way. There was good business since September opened, and things look inviting for a good fall trade. A new crosstown

car line on Eleventh street is likely to bring a great deal of additional trade to upper Nicollet avenue, and the Talking Machine Shop will be in line for its share.

Work is being rushed on the new Minneapolis store of the Minnesota Phonograph Co. at 612 Nicollet avenue. The opening is set for October 20. Manager Laurence H. Lucker is now in the East, meaning Orange, N. J., to get additional stock for the new shop. The old store at 515 Marquette avenue will be retained for general office and storage purposes, but it is proposed to make the new place the chief retail store, although it virtually will be a branch of the business. In casting up its records the other day it was found that thirty-two pianos and three players had been taken in exchange for Edison phonographs during the present year. The cylinder machines still sell readily, but the people of means want the disc.

George W. Lyle, general manager of the Columbia Graphophone Co., visited the Minneapolis and St. Paul stores Saturday, October 3, and is believed to have found business moving briskly.

DANCING EXHIBITION ATTRACTS

In Los Angeles, Where the Southern California Music Co. Has Been Utilizing the Victrola to Furnish Music for Two Prominent Artists.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., October 5.—The Southern California Music Co., of this city, live-wire Victor dealer, has been utilizing the Victrola to furnish music for two prominent dancers who have been giving exhibitions in its store. These dancers, Miss Norma Gould, assisted by Erwin Volze, have been rendering interpretations of the latest dances to the music of a Victrola with signal success. The exhibitions have attracted crowds to the company's store, and the large attendance was so gratifying that the company has decided to give instructions and demonstrations twice a week to which the public are invited to participate.

CONDITIONS IN THE SOUTH

Are Not as Favorable in a Business Way as They Ought to Be Owing to the Farmers Being Unable to Realize on Their Cotton, Says E. N. Upshaw of the Elyea-Austell Co.—Approves of World Editorial.

E. N. Upshaw, of the Victor department of the Elyea-Austell Co., of Atlanta, Ga., writes the editor of The Talking Machine World under date of September 20 as follows:

"Dear Sir:—We wish to express our approval of your editorial in the current issue of The World regarding the fallacy of the idea of armed peace. It strikes the writer as quite a coincidence that only last Sunday he heard one of the leading ministers of the city in his sermon use almost identically the same words in regard to this proposition as your editorial uses.

"We consider that the demands of business men and commerce in general will do more to promote world peace than any other one thing. Even now there is talk of the bankers and moneyed men of Germany bringing pressure to bear upon the Emperor to force him into discussing terms of peace with the other nations.

"General conditions throughout the South are pretty much at a standstill owing to the fact that so far we have been unable to market our cotton. The 'buy-a-bale-of-cotton' movement proposition has done much to restore confidence, and very likely by the time you go to press again the South will be running along at least under normal conditions. Business is holding up to just about what it was last September, and if the South can only realize on its cotton we will finish the fall with a very decided increase over last fall. The South is hit harder on account of the war than any other section, owing to the closing down of the numerous cotton mills in Europe, the Stock Exchange and the tightening up of money which prevents the disposing of its cotton at any price whatever."

“Will there be a Victrola in your home this Christmas?”

That is the question being put before the entire country in the extensive Victor advertising.

That is the question which is going to be settled in thousands of homes—and settled to your satisfaction.

That is the question which will help to make a new high record for Victor Christmas business.

So don't lose sight of the value to you of the Victor holiday advertising and “Will there be a Victrola in your home this Christmas?”

WINDOW TRIMMING FOR TALKING MACHINE DEALERS.

Ellis Hansen, the Well-Known Expert and Display Manager of the Wurlitzer Co., Chicago, Says That Window Display Is the Best and Cheapest Kind of Advertising—Getting "News Value" in Window Trims—Taking Advantage of Fads and Seasons for Display.

It was left to the youngest and, perhaps, the most progressive branch of the music trade, the talking machine dealer, to fully understand the great advertising value of the show window. It is now generally realized that a well-dressed window display is the best and cheapest advertising medium at a retail dealer's command. It has grown steadily and artistically until to-day it overshadows in importance almost any other kind of advertising. A successful display must not only attract attention, but be pleasing and efficient. Anything unusual will stop people, but unless it makes friends and sells goods, it is not a successful display.

The talking machine dealers are fortunate in having an article that is particularly well suited for a successful window display. Talking machines and records are very suggestive. There is always "something doing." Its close connection with people in the public eye makes it not only possible, but easy, to get that quality that newspaper men call "news value" into a "talker" trim.

Taking Advantage of Concert Tours.

To illustrate my point: Take the concert tours of famous musical artists. Weeks before the artist arrives in your city the local paper contains not only advertisements, but pictures and articles about the concert. This is your chance to make

grateful hearts the joy and happiness contributed by the famous composers of our sister nations throughout the world. To all European countries we extend our sincerest good fellowship along

Fig. 1—A Striking Window Embracing a General Line of Musical Instruments.

with our expressions of neutrality, fairness, friendship and, in the undying words of our immortal Lincoln, 'With charity for all and malice towards none.'

Two American flags should be draped on either

concentrate your mind on the subject and have a definite idea of the message you expect to convey. It is not always beauty alone that counts, but the idea that is behind the display. To illustrate this, study picture Fig. 1. In this display I wished to bring out strongly the wonderful versatility of the Victrola. In the show window was placed a collection of practically every modern musical instrument from a grand piano to a piccolo—harp, violins, cellos, trombones, cornets, clarinets, saxophone, flute, bells, chimes, banjo, mandolin,

zither, accordeon, and many other instruments. With each instrument was a Victor record made by some celebrated artist on that particular instrument. Fifteen vocal records headed by Caruso and Melba and with pictures of each singer were also used in the display. Connected with each record that extended to a Victrola in the background. The only show card read: "— and the Victrola contains them all." The display demonstrated the point so clearly that it attracted a great deal of attention.

Foreign Record Display (Fig. 2).

This display was put in recently to advertise the new Swedish, Danish, Norwegian and Finnish records used by the Victor Co. Hence the Viking ships were used. These were cut from heavy cardboard and painted so that they stood out in strong relief. A row of overlapping records was placed along the side of each ship in imitation of the warriors' shields that are always shown in pictures placed this way.

On the sails of the first ship was written, "New Victor Records from the land of the Vikings." On the second ship, "Victor Records in Twenty-six Languages." Notice the sea gulls flying in the direction of the ships. These were painted on cardboard, cut out and extended by threads. The display was considered very picturesque.

(Continued on page 9.)

Fig. 2—Window Especially Devoted to Swedish, Danish, Norwegian and Finnish Records.

an effective display with the records of the artist. A large picture and a show card in connection with the records, plus the publicity in your city papers will add a great deal of additional interest in your display, and, no doubt, result in increased sales of that artist's records. The only expense a display of this sort will entail is the cost of the picture and sign work.

side of the American sign and the small flags should be arranged with each foreign record. A display of this sort at the proper time will not only make people acquainted with the fact that you sell foreign records but also create a lot of talk about your store.

How to Make an Interesting Display.

To make an interesting display you must first

News and Patriotism.

Another example of "news value": Some weeks ago President Wilson sent an appeal to the American people to be strictly neutral and careful in expressing opinions of the war in Europe on account of the many foreigners that have made this country their home. This gave me the idea for an unusual display. Make two or three steps or shelves in your window and arrange as many foreign records as there are nations in Europe on the steps. Get small European flags corresponding to the records (these can be purchased in department stores at 5 or 10 cents each). Have a sign made in the shape of an American shield and fasten to this the record of "The Star Spangled Banner." Have the following copy under the American record:

"All true Americans celebrated the one hundredth anniversary of

"The Star Spangled Banner,"

"written by Francis Scott Key, September 14, 1814. 1914

"The land of the free' also remembers with

Fig. 3—Utilizing Effective Publicity for Effective Window Display.

All the way from the announcement on the front cover to the new Columbia Grafonola "Leader" on the back, the Columbia Record Supplement for November is as sure a money-maker as the mint.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

An Effective Dance Display.

In the dance display (Fig. 3) I have made use of the Victor Co.'s advertisements. For some time the Victor Co. has featured Mr. and Mrs. Castle in the daily papers, illustrating the different dance steps introduced by these clever dancers. These dance pictures gave me the idea for this display. The background consisted of a large gate well adapted for window display purpose, from a classic Italian design, and made of heavy cardboard, reinforced at the back with wooden strips so as to be self-supporting. It was colored by airbrush and stood out in strong relief. This gate, which I have named "The Prunella," may now be obtained in Chicago by dealers for window trims. The life-sized figures of the Castles were made from photographs enlarged to the proper size by the "solar print" process and tinted in natural colors. On the bottom of the figures were signs with the names of the dances: Tango, Hesitation and Maxixe. The lanterns in American colors were obtained in a 10-cent store. The copy of the sign in the center read as follows: "After your vacation. Go on with the dance. The great exponents of modern dancing, Mr. and Mrs. Vernon Castle, now supervise the making of Victor dance records. Come in and get illustrated instruction book, 'How to Dance the One-Step, Hesitation and Tango,' with our compliments—Wurlitzer."

Ten dance records and two fine Victrolas completed the display—one of the most effective I have ever designed. It certainly seems easy for Victor dealers to get ideas for displays. The splendid and high-class pictorial advertising done by the Victor Co. offers new and timely sugges-

tions to the wide-awake dealer. The Voice of the Victor, their house paper, has contained for the last few months a number of well-written illustrated articles on how to get up inexpensive window displays. Full information about Victor artists' concert tours and many other useful hints for Victor display purposes are printed, so there seems no excuse for Victor dealers not to have what, in my opinion, is the greatest aid to a dealer, well-dressed and interesting show windows.

Displays for National Holidays.

Decorate your windows on all national holidays. A few American flags and appropriate records on such occasions are always in good taste. No other flag lends itself better for decorative treatment than the Stars and Stripes.

It is a good plan to have a list of special display occasions and then get busy two weeks before the date of the display. It is rather unpleasant to be reminded of a display date in your competitor's window. I would suggest the following list:

Opening day of new records, Washington's Birthday display, Valentine display, St. Patrick's Day display, Easter, Decoration Day, Fourth of July, Vacation display, School record display, Opening of grand opera, Thanksgiving display, and Christmas display.

There is, however, one rule that should never be lost sight of and that is that whenever you use window effects such as flags, flowers, ribbons, and all those things which the holiday season gives an excuse for, always remember that after all these are to be used only as a means of attracting attention to the goods. They must not be permitted in any possible way to over-

shadow or obscure the goods you have for sale.

Price Tickets and Show Cards.

Some dealers refuse to put price tickets on their instruments. There really seems to be no sound reason for not using a neat, well-written price card. Men, especially, like to see prices on goods before entering a store. I consider price tickets as one of the things that make a display interesting. Nearly all newspaper ads contain prices. Why not the show window?

Use good sign work. It does not pay to spoil an otherwise well-dressed window to save a few cents and get a cheap looking display. If you use a number of show cards have the general appearance of them alike no matter if the sizes differ. In wording show cards use the simplest and most direct language at your command. Be brief and to the point, and don't get your facts complicated with big words. Avoid slang and poetry. The science of window trimming consists not alone in attracting the attention of those with whom a dealer wishes to do business, but in attracting pleasantly and in making a favorable impression.

"BUY-A-BALE-OF-COTTON."

The "Buy-a-Bale-of-Cotton" plan has met with generous response all over the country, and without doubt this move will have a beneficial effect upon trade conditions in the South.

To our several friends in the South who have written urging our support of the movement we would say that the editor of The World purchased his bale of cotton by wire from J. N. Swanson, of the Houston Talking Machine Co., Houston, Tex.

The DITSON Pledge

is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

Spell Binding and Sales Binding

You do not have to be an orator to sell the Edison Phonograph. It contains in itself all the eloquence needed to convince the customer that here is the musical instrument which he must have for his own.

Dealers who handle the full Edison line

will tell you that the Edison Phonograph is easy to sell because it is so easy to listen to. The minute you begin to play an Edison Phonograph for a customer the Edison inventions and all that the name Edison means in the phonograph world, are at work to bind your sale.

Thomas A. Edison, Inc.,

 hogany, \$400.00

SHERATON
 Model A275, Ma-
 hogany, Inlaid
 Plain, \$275.00

There's the fact that the Edison repro-
 duces those elusive overtones that the
 others miss. There's the tremendous ad-
 vantage of the permanent point that ends
 at once all needle troubles. There's the
 steady pitch that comes from the smooth-
 running motor, the indestructibility of
 the records, the beauty of the cabinets,
 all working on the customer's buying
 instinct for your profit.

So much the Edison does for itself. But
 when it has won conviction then comes
 your part of the sale. You must be ready
 to supply the convinced customer with
 the type of Edison that best suits his
 needs. And to do this you must carry
 the full Edison line, otherwise you will
 be forced to watch his conviction of
 Edison superiorities find its proof in
 some other store.

NEW YORK, OCTOBER 15, 1914.

EVERY business man should see to it that he is contributing to the best of his ability to the maintenance of trade stability. Business expansion can be accomplished when there is strength and concentrated power behind the move.

Most of our troubles are largely mental, and if men permit themselves to get into a frame of mind so that they indulge in pessimistic thoughts over business, there are ninety-nine chances out of every hundred that they will succeed in undermining their trade opportunity. A pessimistic condition of the mind foredooms men to defeat. They start in handicapped, and they stand no show of winning the race against an optimistic competitor.

We should have faith in the business future, and faith in this country's ability to meet all demands made upon it from every part of the world—faith in its ability to produce prosperity for a hundred million Americans.

The attention of our people is perhaps too much diverted to the European war, when it should be directed to the development of our own business affairs.

Through the concerted action of American business men the benumbing conditions which followed the first declaration of war is gradually being overcome and the alert Americans, manufacturers and merchants are forming a line which cannot be easily turned backward by any outside competitive forces. They are awakening to the unparalleled business opportunities that are now knocking—yes, pounding—at their doors.

It is but natural that our people should have been somewhat dazed by the sudden outbreak of events which were considered impossible in Europe and that their business affairs should have seemed for the moment commonplace and unimportant.

The quick and rapid events of the war have held them transfixed, as it were, but it is high time that business men should break away from war influences.

Most men realize the great part that Americans play in this greatest of all world battles—the role of readjusters, builders, creators of the conditions that are to rule in the days to come.

When the end of this last great war comes, and the roll-call is again read at the workshops, a million—yes, perhaps many more—will be missing, and for these the call of the unfinished tasks will be sounded no more through the long courses of the sun! The world needs workers to take up their tasks—workers to carry forward the banners of service. Therefore, Americans should see to it that they heed the imperative call to duty in the industrial campaigns which must again build up the fabric of civilization.

With our magnificent resources, the opportunities which are

opening before us become incalculably vast, and the live American manufacturer will seek to make the best use of the commercial opportunities offered by the present European situation, by wedging his way into the various markets of the world.

IN the meantime we should attend to those duties which lie nearest to us and keep away as much as possible from war influences and discussions.

The other day the story was told us of a talking machine salesman who had a number of excellent prospects in the morning, and he lost everyone of them by commencing to discuss the war situation with his callers. It is needless to say that he was retired, and his example should be a warning to other salesmen. When a customer comes into a talking machine wareroom it is not for the purpose of discussing the various phases of the European war, and the minute a discussion is entered upon interest is lost in the product which the party came in to see. Then, as the argument continues, it may be that the tactless salesman will develop a feeling far from pleasant in the mind of the caller.

It is so easy to ruin sales and so difficult to make them that it would not be a bad plan if managers put in force a rigid rule in which the salesmen were forbidden absolutely to discuss war within the warerooms. We know of one establishment that has adopted this plan, and to our personal knowledge it has been carried out rigidly. The invariable reply of every salesman to an invitation of a caller to discuss war conditions was: "We are neutral here. We cannot discuss war conditions." It is a very excellent plan and one which is liable not only to make friends, but make business, and just now every trade organization is interested in adding to its business profits.

THIS is harvest time and the business harvest should be good, and it can be if the talking machine men work with the object in view of creating a hopeful and confident feeling in regard to business.

The cultivation of economy is not at all times good. It means restriction all along the line. We mean by that, rigid economy. Conservatism, of course, is always wise, but to cultivate in the broadest possible manner the saving idea, by giving advice to people to use extraordinary care in their expenditures, means nothing less than the curtailment of business. If we could cultivate the well-balanced side—to have people work along the same lines which they have, provided they have been reasonably successful, it would to a great extent cut out the uncertainty and it would get the depression idea out of the minds of the American public.

There is no reason why publicity methods should be abandoned in the slightest. Keen advertisers realize that advertising is a powerful force to stimulate business confidence.

Men who are on the fighting lines of business realize that it is just at such a time when the weak and inefficient retreat and abandon the field to the stronger and more aggressive business forces.

If the talking machine men fail to do their share in the publicity end of the business—fail to mold public opinion—fail to interest possible buyers, then they are not contributing as they should, by effort and example, to the maintenance of business prosperity!

ADVERTISERS in The Talking Machine World receive good returns from their investment, and the paper as a business builder is conceded to be a success.

We are in constant receipt of communications from advertisers who have tested the columns of the paper and who most enthusiastically endorse it as a creative force.

Talking machine men, as a whole, do not appreciate the advantages which The World offers them as a business-building power. It is the only paper which reaches talking machine men in every part of the country—and every part of the world, for that matter.

It is read closely and men are influenced by what they see in its columns. —

One of the leading talking machine men paid The World a high compliment in a communication when he said: "Your position has been a most difficult one on account of certain conditions which have existed in this industry; and, while all may not agree with you in your policy at all times, yet it is a fact that no one at any time could deny your absolute fairness and impartiality in dealing with the affairs of this industry."

Certainly that kind of a communication is appreciated, because we all like the approval of the men whom we respect.

Here is another communication which tells of the business-building powers of The World. It is from J. B. Ogden, of Lynchburg, Va., who says: "I am greatly gratified that I have been compelled to double the manufacturing capacity each month since I began to use space in your paper. I feel that you have very valuable advertising space. Certainly it has produced wonderful results for me."

Be a business builder—one of the live ones.

IF one can forget for a moment the awful solemnity of the present European conflict, one can run down many a grim caprice it has played with lives whose general tenor is as far removed from any practical connection with war as pole is from pole. Artists in all ages have instinctively been held as more or less exempt. So even have great political orators, leaders of their fellow citizens by word of mouth, through the proved incompetence of some of their number upon exchanging as a weapon the tongue for the sword. Witness Demosthenes.

At the outbreak of this war the whole elaborate fabric of theatrical life, for instance, crumbled like a house of cards. On Saturday, August 1, the Paris Opéra was announcing "Les Huguenots" for Sunday night, with "Faust" and "Lohengrin" to follow later in the week. Saturday at midnight mobilization began. By Sunday noon "Les Huguenots" was called off and the Opéra, which is supposed to remain open all the year round, closed its doors till further notice. Too many of the personnel had been summoned to arms to make even the Sunday night performance practicable. The next day the Comédie Française followed suit. In other capitals the experience was similar.

Eugène Ysaye, the king of violinists, has been reported anxious, in spite of the exemption his fifty-six years give him, to follow his three sons into battle. What tragic irony if he should encounter on the field Fritz Kreisler at the head of his Austrian company! Could Kreisler avow himself vanquished in arms as frankly as he has in are by the greater Belgian? Georges Barrère, the admirable first flute of the New York Symphony Society, was called to the defense

of France, but was excused, and is now in New York. That charming pianist, Camille Decreus, is now on the firing line. Many an American orchestra will lose men, and perhaps here and there a leader, and many a musician may have made this last record for a talking machine.

NO one trait has contributed more to the success of America in the domain of invention and manufactures than the use of initiative and the complete abandonment of incense offering to that bugaboo, "Precedent." The development of ideas in European countries has been greatly retarded by this stumbling block, this rock in the road of progress—precedent. Those who live by precedent still live in the atmosphere of the dark ages. Because our fathers did so and so is no reason for our doing it. Modern business conditions demand initiative qualifications on the part of business men who would compete successfully, or at least willingness to initiate modern, progressive methods.

Egotism and self-sufficiency are good qualities to brace us up in the competitive struggle, but they must not chain us to the post of precedent or blind our eyes to the necessity of keeping abreast of the times. As L. M. Hattenbach says we must cast precedent aside and move with the procession, float with the tide, and sail with the wind. Otherwise we will soon find ourselves alone, stranded on the desert island of precedent while our progressive competitors are basking in the sunlight of success on the shore of progress.

THIS is the day of broad methods in merchandising. The most successful men in the talking machine or any other line are those who realize that all the factors that go to make a business establishment, whether large or small, are dependent one upon the other. They recognize that no one can be successful alone, that the proprietor must depend upon his department heads and the department heads on the salesmen—that the entire force, in fact, must work together in the mutual interests of the entire establishment. And where co-operation between all the various factors is cordial and complete, and where each factor is made to feel that he in his way is responsible for the success of the whole, then victory is bound to be achieved.

Make Two Profits on Every Talking Machine Sale

Udell cabinets are made to fit the following disc talking machines

EDISON VICTOR COLUMBIA

Udell cabinets fit each machine in style and finish. Wherever possible we follow the "lines" of the instrument—thus insuring a perfect match.

Back of each Udell cabinet is the Udell guarantee. It means satisfied customers. Write for new booklet No. 45 to-day.

OUR New Booklet No. 45 which is now ready to come to you shows you how to make a *double profit* on every talking machine you sell—*one profit* on the instrument itself—*another* on a handsome Udell cabinet to *match* the instrument.

Write for this booklet.

Every customer who buys a talking machine wants a handy cabinet for filing the fragile records and holding his machine.

Show him UDELL cabinets, which *exactly* match standard instruments in style and finish, and make an *extra* sale.

Udell cabinets are made in eight styles which dealers have found from long experience to sell best with their customers. Six of these styles, like No. 1417, shown at the left, come with either perpendicular or horizontal shelves for filing records. Two have only perpendicular filing shelves.

Christmas will soon be here, and with it the best "talking machine season" of the year. Prepare to make the most of it by having Udell disc record cabinets on your floor. Get this *double profit*. Write for New Booklet No. 45, which pictures and describes the Udell line, *now*.

THE UDELL WORKS, 1205 W. 28th St., INDIANAPOLIS

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., October 10.—The local trade is looking up considerably, and that dealers have been anticipating a big fall business is evident from the changes, enlargements and general improvements in warerooms all about the city. Most of the houses have large orders in for Edison, Victor or Columbia goods, and in some cases for all of them collectively. In most cases only a proportion of the orders can be filled, as the factories are overrun with a universally large demand from all over the country, a very good sign, truly. The most important piece of local news is the installation of an immense Edison exhibit at the big Domestic Science and Pure Food Exposition at Mechanics building, which is treated separately in this issue.

Business Ahead of a Year Ago.

The Pardee-Ellenberger Co. is reported by Manager Silliman to be way ahead of this time a year ago, and the trade throughout New England is pretty evenly distributed. All the company's traveling men are out, and Mr. Silliman says he looks for a big season from now on. Mr. Silliman's son, Horace H. Silliman, who has done excellent work during the summer demonstrating the Edison disc machines at the leading summer resorts along Narragansett Bay, has begun his studies at Harvard University.

Bold Burglars Get Away with Victrola.

Three music-loving burglars made a haul in North Cambridge a while ago when they broke into the music store of W. E. Moore on Massachusetts avenue and stole a handsome Victrola and a bunch of choice records. They boarded a Boston-bound open trolley car at 2 a. m. and set up their Victrola between the seats with some difficulty, yet their actions never aroused the least suspicion until an officer, who had learned of the break, saw the men going off in the car. As the officer was unable to get the car to stop the men got away with their musical plunder, and the last seen of them was when they left the car at Central Square.

Swamped with Orders.

Manager Arthur Erisman of the Columbia Co. has been over in New York conferring with the home office with regard to new business, for he has been so swamped with orders that he has not been able to get the requisite amount of goods, and it was to make strenuous overtures for a large consignment before the middle of October that took

him over. Mr. Erisman reports that the prospects look well for a banner year, far beyond that of 1913.

Henry Tosti Russell with Columbia Co.

One of the latest acquisitions to the Columbia forces is Henry Tosti Russell, a capable and versatile young man and son of Henry Russell, manager of the Boston Opera Co. Mr. Russell, who can speak several languages and has a familiarity with others, has been placed in charge of the foreign language department of the Columbia, and already he has made some valuable associations with leading schools about the city.

New Quarters for Conclave Co.

On Oct. 1 the Conclave Phonograph Co., which has been located at 9 Portland street, near the North station, has moved to a more uptown location at 46 Cornhill, where it will keep as usual a full line of talking machine records and will be open evenings.

Pictures of President and Cardinal.

The show windows of the Eastern Talking Machine Co. are adorned now with two large oil paintings which are attracting considerable attention. One is that of a full-length portrait of President Wilson, and in front is an indorsement of the Victor line of goods. In the other window the gorgeous vestments of Cardinal O'Connell call attention to the artistic full-length portrait of this Roman Catholic prelate, also with his opinion of Victor goods, of which he is a generous purchaser. His palatial Granby street residence contains a high-priced Victrola with many records.

Since the Eastern Talking Machine Co. opened up its newly equipped third floor it has found it necessary to take on extra help, and not only have extra clerks been added there, but the company has had to add to the shipping force of the establishment. Manager Taft is among the many in the trade who sees a good business ahead for the talking machine trade.

Proving Valuable Adjuncts.

Two additions to the Columbia forces in the retail department are Miss Grace Dennis and Miss Elvira Craigen, and they are proving valuable adjuncts to the department. Miss Mabelle Jones, who had to withdraw from the house in the spring because of illness, is expected back shortly after a long summer spent at her home in Maine. Miss Jones will be welcomed back, as she has proved herself most intelligent both in the demonstrating and selling of Columbia goods.

Negotiating for the Victor Line.

The Furbush-Davis Piano Co. has made arrangements with Thos. A. Edison, Inc., for handling its goods, and it is expected that the contract will be closed shortly. The Furbush-Davis Piano Co. has just opened new warerooms in Boylston street, near Arlington street, up one flight. It is the newest piano house in the city.

School Proposition Now Under Way.

The school proposition has started in well with the Eastern Talking Machine Co., and with Ed Welch in charge of this department the business promises to be very good. Mr. Welch took hold of this work when Billy Fitzgerald was advanced to the wholesale department, and he has thus far made a good record.

Good Start for the Fall Trade.

Manager Batchelder of the Victor department of the Henry F. Miller Co. reports a good beginning to the fall trade. A decided change set in immediately the surface of Boylston street was completed and the cars again began running. It is hoped this thoroughfare is now completely finished following the two years' interruption to business incident to the subway construction.

Visits Boston on Way to Pacific Coast.

George W. Lyle, the general manager of the Columbia Graphophone Co. at New York, was a visitor to Boston yesterday and the day before. Mr. Lyle was anxious to get over to Boston before going on his eight weeks' trip to the Pacific Coast, on which he will start soon. Mr. Lyle was much gratified at the business of the company on this end.

Automobiling to the White Mountains.

Edward D. Easton, the president of the Columbia Graphophone Co., is expected in Boston shortly, following his custom for the past two years of taking in this city on his way in his automobile to the White Mountains. Mr. Easton's route is along the Long Island Sound route through Connecticut, Rhode Island and to Boston, then on through Portland, Me., and into the mountains. His trip home will be by way of Vermont and down the Connecticut Valley.

Victrolas for Argentine Battleship.

From George Lincoln Parker's warerooms in the Colonial building there lately has been shipped seven expensive Victrolas which were sent over to the Charlestown navy yard to be installed on the "Rivadavia," the huge battleship of the Argentine Republic, which has been at the yard for

New England has nearly 10,000 square miles more than England and Wales combined, so you can see that there is sufficient territory here for an unlimited amount of Edison Diamond Disc sales. Consider, too, that the fastest selling model is the \$250 style, to say nothing of the excellent record list, and you have a wonderful money-making industry.

Real Music
At Last

We are exclusive Edison jobbers, our entire efforts being confined to the promotion of Edison goods. There is no diversion of interests and you are sure to get the closest co-operation and assistance in your business.

Ask us to-day for the entire story.

THE PARDEE-ELLENBERGER CO., Inc.

BOSTON, MASS.

NEW HAVEN, CONN.

THE TRADE IN BOSTON AND NEW ENGLAND—(Continued from page 16).

several weeks prior to starting for New York for its final equipment. These outfits were purchased by seven of the "Rivadavia's" officers, and the style of music selected indicates these officers to be men of high-class taste in music.

Pleased with Business Development.

H. A. Yerkes, the wholesale manager of the Columbia Graphophone Co., was in Boston a few days ago, making his periodic visit here. He and Manager Erisman went over the books of the local branch, and Mr. Yerkes was more than pleased with the way the Boston business has been forging ahead.

Sending in Good Reports.

Good reports continue to be heard from George Krumschied, the Columbia traveling man for New Hampshire and Vermont, and he is sending in large and frequent orders to Manager Erisman.

EUROPE IN WAR TIMES.

Joseph K. Nye, of Nyoil Fame, Returned Recently from Europe After Undergoing Some Remarkable Experiences.

Joseph K. Nye, of William F. Nye, the famous oil manufacturer, of New Bedford, Mass., was one of the thousands of American refugees who arrived in New York during the past month from Europe. Mr. Nye had some remarkable experiences while abroad, and said that he wouldn't take \$10,000 for the experience now that he had it.

There was a long interview in the New York Sun with Mr. Nye, telling of his impressions when the war started in Europe and how he at once filed a message to his business manager to buy all the European oil on the market at any price, and the fact that they would not send the cable because it had the word Russian in it. He engaged passage on the "Caledonia," but after all the passengers had gone on board, and just two hours before sailing, the Government took the ship and the passengers were all dumped on shore. Later the passengers were taken by the "Baltic," 2,990 passengers being on board a boat which ordinarily carries half that number.

There was a manufacturing concern that paid a couple of hundred dollars in wages each year to keep the brass door plates and rails about the office polished bright and clean. One day all these shining surfaces were covered with a coat of transparent lacquer such as was used in the plating room. No more tarnish; no more wages to brass polishers.

ATTRACTIVE EDISON EXHIBIT

At the Domestic Science and Pure Food Show at the Mechanics Building, Boston—Much Interest Shown in Lectures and Demonstrations of Edison Disc—Other Exhibitors.

(Special to The Talking Machine World.)

BOSTON, MASS., October 5.—The notable feature of the Domestic Science and Pure Food Exhibit at Mechanics building, which opened to-day, is the Thomas A. Edison exhibit, which occupies the interior of a big Swiss chalet erected on the large stage of Grand Hall. The exhibit is in personal charge of Harland R. Skelton, who is one of the efficient attaches of the Edison Co., and who often is singled out for special work for the company at distant points. The Swiss chalet, because of its elevated position, is most conspicuous, and the interior, which resembles a good sized hall, is filled with seats. Periodically Mr. Skelton gives talks or lectures, both on the Edison disc machines and on the moving-talking pictures which are thrown on a large screen beside his raised platform. On two sides of the room are raised platforms on which the Edison disc machines are exhibited. Outside of the Swiss chalet two other of the Edison exhibits are those of the Telescribe, which is a connection of the dictating machine, and the Transophone, each of which has a place on the floor of the hall close to the Swiss chalet.

At the rear of the improvised hall, on the stage, are several rooms, each of which is devoted to an exhibit of Edison dealers here in Boston. Those who have these individual exhibits are George Lincoln Parker, of the Colonial building; Chickering & Sons, of 169 Tremont street; the Shepard Norwell Co., on Winter street; the Shepard stores of Providence and F. H. Thomas Co., of 691 Boylston street. It is said that the Edison exhibit, which is one of the most-talked-of displays of the show, cost in the neighborhood of \$10,000.

In the parcel post exhibit the Eastern Talking Machine Co. makes an interesting showing by way of illustrating the difference between the old way of sending goods and the new one through the medium of the parcel post. A card board box shows the damages sustained in sending records improperly shipped and another box shows the modern method of packing for shipment. In the one case the records are scratched and otherwise damaged, but under the more up-to-date method there is not the slightest damage whatever, and the goods are received by the purchaser in perfect condition.

Lansing Khaki Moving Cover

is the only safe protection that you can use for wrapping machines for shipment, for it insures perfect delivery condition.

It is the same as packing each talking machine or record cabinet in four thicknesses of heavy felt, with cotton flannel on the inside to keep the varnished surfaces right, and Government khaki on the outside to insure wearing durability of the cover.

**Gives Protection Against
Dust
Finger Prints
Bruises
Scratches and
Heat or Cold**

You save all bother of refinishing each machine, so each cover saves its cost within a week after you buy it.

Place for your name and address on the outside, so you also get advertising value.

Ask us to send you a Lansing Cover and test it yourself. Also get our Booklet No. 6 giving you full details.

Better send for these to-day.

BOSTON, MASS.

The largest manufacturer of Talking Machine Needles is located in the United States

To be exact, the plant is at Lowell, Mass., one of the biggest manufacturing cities of the country. It was in 1870 that the needle business of W. H. Bagshaw was established, and the first talking machine needles were made by him. The business has steadily grown, until our shipping record reached the tremendous number of over 63,000,000 needles in 10 days, and even then our capacity was not taxed to its extreme. Every needle a Bagshaw-made quality needle—which means the best in the world at any price.

W. H. Bagshaw, Lowell, Mass.

Pioneer Maker and Largest Manufacturer of Talking Machine Needles

The Columbia Educational Department is better prepared than ever before to help you secure school business in your locality. Now is the time to go after it.

Right now is a remarkably appropriate time for you to write us for particulars.

DETROIT DEALERS WELL STOCKED UP FOR HOLIDAYS.

Have No Misgivings Regarding Future Business Conditions—Increasing Facilities for Storing Records—Grinnell Bros. Developing New Salesmen—Columbia Line for Cable Piano Co., Stores—What the Various Local Houses Have to Report—Personals.

(Special to The Talking Machine World.)

DETROIT, MICH., October 9.—The Detroit talking machine stores are all pretty well stocked up for the holiday trade, having begun to attend to this important matter shortly before the Fourth of July, and there is nothing in sight but big business and optimism. Evidence grows everywhere that the talking machine is a commodity of just about the right price and attractiveness to sell whether any other kind of merchandise is selling or not. Even the best of them do not create a big liability if purchased on time, so there is nothing to frighten people who want them.

In addition to big stocks of machines nearly all the dealers are enlarging their record racks, a circumstance which, not important in itself, tells an important story, for all the stores have astonishingly large record racks now and wouldn't increase them unless there was a very good reason.

Several of the stores have increased their sales forces also. Grinnell Bros. have put on half a dozen additional outside salesmen bringing their sales force in the talking machine department up to thirty-one, exclusive of manager and office force. That gives an idea of how really active the Victor talking machine business is in Detroit.

When Grinnell Bros. add new salesmen to their talking machine staff they select men from other lines of business, desiring to train them in the talking machine field according to their own system. It is a pretty big job to develop an expert salesman, but it pays better than obtaining an experienced one from elsewhere, who may be very good, but may have ideas not in harmony with the Grinnell organization. The new men are kept in the store several weeks, learning the ropes thoroughly before being sent outside.

With Grinnell Bros. the last week in September

was the biggest week since last Christmas, and September was comfortably ahead of the same month of last year. In Detroit the demand still runs to the higher priced machines. This trend has been so persistent for the last two years that it has become accepted as permanent, and few if any machines of a lower price than seventy-five dollars are kept on the floors. The story is the same in all the downtown stores, though in the suburban stores, especially in the vicinity of the various foreign sections, there still is a call for the cheap machines.

The talking machine department of the J. L. Hudson Co. has added to its staff of salesmen Joseph J. Rogers and Harold Ballagh, both of whom formerly were salesmen with the American Phonograph Co., Edison jobbers in Detroit. They resigned their positions last spring to go abroad, and were in Europe when the big war broke out. Fate chased them from one country to another, keeping them out of the way of the armies, until finally they turned up at an Italian seaport and obtained passage for home. They arrived in Detroit only a short time ago.

The Columbia branch store is busy with both wholesale and retail trade. Sales Manager S. E. Lind recently sold complete lines to the Jackson and Battle Creek branches of the Cable Piano Company of Detroit. The Jackson business is still on the books of the Detroit Columbia store, but the Battle Creek store is in Chicago territory, and had to be turned over to the jurisdiction of that city. However, Mr. Lind does not care, as long as the store keeps on handling Columbias.

September was ahead of last year's September, according to the stock-taking account, though the exact figures had not been completed when the Talking Machine World man called. In the Co-

lumbia store there is a taking of stock on the first of every month, so that a constant tab is kept on the condition of affairs. This policy is especially valuable in keeping the stock of records up to the minute. The Columbia store, being a wholesale institution, keeps an unusually large stock of records. In spite of this, racks now are being built which will care for an increase of one-third.

A feature of the record trade with the Columbia is the call for patriotic records, such as the national airs of Germany, France, England and Russia.

Frank J. Bayley, who handles the Edison, reports that the \$200 and \$250 styles of the Edison sell the best. He confines his stock almost exclusively to these machines.

Max Strasburg, of the Max Strasburg Co., was in Grand Rapids this week as a member of the Detroit Rotary Club. The Detroit club has been invited by the Grand Rapids Rotary Club, along with the Rotary clubs of Saginaw and Bay City, to attend an important function of the organizations in Grand Rapids, and so many members accepted that a special train of parlor cars was necessary to transport them.

J. Henry Ling, head of the oldest piano house in Detroit, has decided definitely to establish a talking machine department, but his plans have changed since he first took up the idea a month ago. He will not be prepared to announce them until next month.

COMER TALKING MOTION PICTURES.

(Special to The Talking Machine World.)

CHICAGO, ILL., October 10.—The Comer Talking Motion Picture Co. has been incorporated with the Secretary of State of Illinois with a capital of \$10,000 by John J. Comer, Frank Mayer and Guy Van Schoick for the purpose of leasing, operating and dealing in sound reproducing apparatus, motion picture projectors and films.

Optimism and opportunity make a fine alliterative combination.

We “Dote” on “Shorts”

YES sir! We like to get orders for Victor goods other jobbers are “short” on. If you’re having trouble getting your orders filled, TRY US—for if anybody in the country has a complete stock, WE have!

Take Records, for instance. Everybody tells us we fill Record orders more completely than any other house in America. Lots of big dealers send us their “short” orders only—and we’re glad to get the business.

If your regular Victor jobber can’t fill certain items in your list, ask us to do it.

Send us the orders others can’t fill.
We just “dote” on “shorts.”

Saint Louis— Shipping Center

IT'S mighty important to you—the fact proven by the map above.

Saint Louis, shipping center of the United States, sends out daily over twelve hundred package freight cars—routed by fast freight and arranged to break bulk at destination. The circles about Saint Louis on the map show when these cars arrive—each circle representing one day from Saint Louis.

If we can send freight this fast—think how much faster we ship by express and parcel post!

Saint Louis is at **YOUR** door.

And in Saint Louis is the **BIG** Victor Stock—so big a stock that if anybody in the country can fill your “shorts” we can.

From the shipping center of the country, we are able to deliver with utmost speed.

A Great Combination!

For

VICTOR DEALERS

Salter's Trade Maker, No. 19

This Cabinet will put "pep" and "ginger" into your sales instantly. It gives the appearance, effect and service of an expensive Victor-Victrola, and cuts the price in half.

You don't have to be a Sherlock Holmes to figure out its sales possibilities. Cabinet No. 19 and Victrola No. 9, as illustrated, make a wonderful combination.

Show Them Together and A Sale Invariably Follows

The cabinet is built to match, and it harmonizes in every detail with the machine itself. A counter-sunk top holds the machine firmly in place. The felt-lined compartments insure the owner of valuable records against their damage by scratching, warping, etc.

This and other practical, low-priced Salter Cabinets will draw a lot of *new trade* to your store. *Write to-day* for catalogues, folders, prices and full information, and rush your fall and holiday orders.

RE-ENTERS THE WHOLESALE FIELD.

Al Edelstein to Cover Metropolitan District for Benj. Switky—Well Known in Trade.

Al Edelstein, wholesale salesman for Benjamin Switky for several years and more recently connected with the Switky retail store, has again entered the wholesale field with Mr. Switky, follow-

Al Edelstein.

ing the sale of his retail business by the latter. Mr. Edelstein has a large acquaintance among the Victor dealers in the metropolitan district and is very popular as a salesman. His experience in the wholesale field has impressed him with the opportunities in that department of the business, especially under the new conditions, and he takes up wholesale work again with renewed energy and optimism.

Associated with Mr. Edelstein in the Switky wholesale department will be Henry Kogan, who has been with Mr. Switky for some time and has met with much success.

More dangerous than a little knowledge is much knowledge of things that aren't so.

PARKER AS A LIVE WIRE.

How the Ft. Meyers, Fla., Dealer Concentrates the Attention of the Purchasing Public of His Locality to the Fact That He Was Appointed a Columbia Representative.

(Special to The Talking Machine World.)

ATLANTA, GA., October 6.—Among the many recent new accounts signed up by the local wholesale headquarters of the Columbia Graphophone Co. was that of J. B. Parker, of Ft. Myers, Fla., who conducts a rapidly growing business in that city. To announce his acquisition of the Columbia line Mr. Parker used a rather unusual advertisement that attracted considerable attention, and what is more important, produced gratifying results.

This advertisement took the form of a letter addressed by the Columbia Graphophone Co., of New York, to the music loving people of Lee County, Fla., wherein Ft. Myers is located, advising them

that J. B. Parker, its representative in that territory was carrying a full line of Columbia products, and extended them a cordial invitation to visit his establishment to hear any Columbia machine or Columbia records which they may care for. The personal element in this advertisement created a feeling of confidence which has aided Mr. Parker in the development of an extensive Columbia clientele.

REX SALES CO. ORGANIZED.

The Rex Sales Co., Philadelphia Pa., has been incorporated, with capital stock of \$100,000, for the purpose of selling or disposing of talking machines and records. The incorporators are A. G. Trout, J. R. Friedman and A. G. Walsh.

The Ario Sales Co. has opened sales rooms at 228 Tremont street, Boston, under the management of James Ashton Reid. This concern will handle phonographs of popular price.

NOW READY FOR AMERICAN MARKET.

Pathé Frères Phonograph Co. Makes Long Expected Announcement to the Trade—Has Been Busy Perfecting Manufacturing and Sales Organization—Details Regarding the Line Offered and How It Will Be Distributed.

The Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, is advising the trade throughout the country that it is now ready for the American market. For the past two years this company has been perfecting every detail of its

Leo Slezak Recording for Pathé Frères Phonograph Co.

manufacturing and sales organization, and in making its first announcement the company does so with the knowledge that it has carefully considered every phase of the industry and arranged plans whereby dealers throughout the country may handle its products on a profitable and satisfactory basis.

Pathé Frères hardly need any introduction to the American dealer, as this concern is the largest manufacturer of motion pictures in the world and the acknowledged leader in this field. The Pathé Frères Phonograph Co. has been doing business throughout the world, with the exception of this country, for many years, and the success it has achieved abroad well qualifies it to handle American trade with the same degree of perfection.

According to present plans the Pathé Frères Phonograph Co. will market a complete line of cabinet, hornless machines, ranging in price from \$15 to \$175, together with an adequate library of records. Shipments of both of these products have already been made to all parts of this country, and during the past few weeks arrangements have been consummated for representation in various territories.

The machines are known as the Pathéphones and the records as Pathé Discs. All the records are double-faced and reproduced by means of a smooth, genuine sapphire, which need never be changed. The Pathé Discs are now being furnished in two sizes 11½ and 14 inches, and are cut on what is known as the "hill and dale" principle. Later it is planned to issue 20-inch double-faced records.

It is announced that the method of distribution is in accord with that used by the other talking machine manufacturers, namely, through jobbers and dealers. Territory will be assigned the job-

bers appointed, who in turn will close contracts with the dealers in their territories.

A complete library of records is now being offered to the trade, including grand opera, semi-classic, popular and dance selections, together with any other class of records desired. A feature of the record library is the presentation of complete grand opera scores sung by artists of international prominence, including Slezak, Titta Ruffo, Giorgini and others.

It is stated that the war abroad has caused absolutely no delay to the company's shipments, and shipments are being received daily. The Pathé Discs include both European and American recordings, all of the dance selections being supervised by Maurice and Miss Florence Walton, two of the best known interpreters and teachers of the modern dances in this country.

The Pathéphones embody a number of distinctive features, including a tone modifier which enables the listener to have absolute control over the tone. This and other features are being fully presented to the trade in this country in the company's most recent literature.

In an interview with *The World*, an officer of the company remarked as follows: "Our jobbers and dealers need have absolutely no fear of litigation of any nature, as their and our interests are fully protected. We are planning to give our trade every possible co-operation in selling and publicity, and are now completing plans for an extensive advertising campaign on behalf of our products."

A social event of importance in the trade was the marriage, on September 24, of Miss Anna Kahn, sister-in-law to Benjamin Switky, who for some years looked after the retail sales in the Switky store at 9 West Twenty-third street, to Benjamin Rabinovitz, who is well known in the woolen trade. The wedding took place at the home of Mr. Switky and was largely attended. Miss Kahn was well known and popular in the trade, many members of which extended congratulations and best wishes.

REPORT BUSINESS IMPROVEMENT IN CLEVELAND.

Popularity of the Various Lines of Machines and Records—Many New Dealers for the Edison Disc Line—Grafonola Co. Takes on Line of Pianos and Player-Pianos—General Enthusiasm Regarding the Outlook for the Holidays—Interesting Personal Items.

(Special to The Talking Machine World.)

CLEVELAND, O., October 8.—Deterent influences, aside from the war, have affected general business, but apparently not so seriously the talking machine trade. Dealers report business during the past month as having been very satisfactory, considering the situation, and many schedule an increase in trade. Notably the Eclipse Musical Co., the manager stating there was a considerable increase over former months and over the same period last year, both in the wholesale and retail departments. The company is enthused with the prospects of the ensuing season, and is looking forward to the best year in the history of its business with much enthusiasm. F. E. Lane, manager of the retail department, has resigned, and his place has been filled by C. H. Denslow, who has been connected with the company for several years, as outside salesman. He is well known, popular and a first-class talking machine man.

The popularity of the Edison phonographs is increasing as is manifest at the store of The Phonograph Co., Edison distributors. L. N. Bloom, secretary, says business for September was exceptionally good. "Trade throughout the State," he said, "has largely increased. A number of high-class concerns have recently taken on the Edison disc line and are well pleased with the results already shown. We have averaged over 200 people at our four last recitals, and in the interest shown by the public in the work it is reasonable to expect a big holiday business."

Business of the most satisfactory character continues with the Grafonola Co. The company has recently added the Packard pianos and players and the Bond pianos to its line. Mr. Routh said:

"We are very much pleased with the September business, especially with the fact that payments are coming in ahead of time. Medium-priced goods are selling well, which indicates money conditions in Cleveland are easy, otherwise the working people would not be ahead with their payments, nor would we be selling to the working men. We are expecting the largest winter's business ever experienced in this store."

The H. E. McMillin & Son Co. also report business in the Victrola department as having been exceptionally good. Mr. Kellogg, manager, is well pleased with the outlook for the fall trade, and is making extensive preparations to take care of the holiday trade. The company recently received a large shipment of machines, and owing to alterations in the Victor department, was compelled to occupy the fourth floor of the building for their storage. Mr. Kellogg is much elated over the splendid results which were accomplished through the exhibition at the recent county fair, resulting in the sale of several Victrolas of the more expensive types, proving that these machines are becoming more popular with the farming community.

G. R. Madson, manager of the Columbia store, is quite enthusiastic regarding the fall outlook as foreshadowed by the inflow of present orders and accomplished results of the past two or three months. "Business is good," he stated. "We find that throughout this territory during the past few weeks business has picked up very materially and is practically normal at this time. All indications point to an exceptionally heavy holiday trade."

Recent new Columbia dealers are: C. T. Hoose, 105th street, Cleveland; W. A. Bammerlin, Mason, O.

The indication of dull times is not very noticeable at the store of the Brainard Piano Co., which claims the best equipped Columbia department in Ohio. "Our business," said Mr. Morton, manager of the department, "has suffered somewhat during the summer months, along with other talking machine people, but the past month showed a very nice increase, while, so far, this month has been quite satisfactory. We are preparing for a good business during the coming winter, and I am satisfied we will get it. Our school business is opening up in good shape, and Mr. McClelland, who has charge of this end of the business, is reaping the benefit of the hard work he did last spring and at the play grounds this summer. He also has been quite successful with many out-of-town schools, among the more important of those was a sale to the State Normal at Kent, O.

Trade is reported fairly good, and improving at the W. F. Frederick Piano Co. The outlook was said to be very encouraging. N. H. Cook, who for some time has been manager of the Victrola department, has resigned and is now with Boggs & Buhl, of Pittsburgh. Mr. Stafford, manager of the piano department, has assumed entire management of the store, and W. J. Breyer is assistant in the talking machine department.

In the talking machine department of the Collier & Sayle Co. improved trade is manifest, concurrent with the approach of the holidays. This is especially manifest in the wholesale department. Good sales of records are reported.

The B. Dreher's Sons Co. is busy in the talking machine department, as well as the piano. Mr. Bowie, manager of the Victrola department, says business is good, growing better and foreshadows continued prosperity. There is a special call for high-priced styles.

T. A. Davies, manager of the talking machine department of William Taylor, Son & Co., W. H. Buescher & Sons Co., the May Co., The Bailey Co., and other dealers are all optimistic as to the fall trade.

It may be well to remind you again that the Columbia policy is the "open shop" policy—free competition, a fair field and no favors.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Woolworth Building, New York

RECORD OF NAVAJO INDIAN SONGS.

Latest Novelty in the Edison Catalog Made Possible Through the Efforts of Geoffrey O'Hara, Who Occupies a High Place in America as an Exponent of Indian Music.

One of the great novelties in the list of Blue Amberol records issued by Thos. A. Edison, Inc., for November, is No. 2451, devoted to Navajo Indian songs, each prefaced by an explanatory talk by Geoffrey O'Hara, that adds greatly to its interest. It is a novel and interesting record that constitutes a valuable addition to the library of every one interested in American music. The Navajo Indians have thousands of songs that have been handed down for centuries from father to son, from teacher to pupil. They have a number of ceremonies, each one lasting nine days and nights, each containing more than six hundred songs.

Geoffrey O'Hara.

Several of the best of these Indian songs were selected from a large number taken on the Edison recording phonograph. The accompanying picture shows several Indian boys making such a record. All these songs have been made a matter of special study by Mr. O'Hara, who was appointed Instructor of Native Indian Music by Franklyn K. Lane, Secretary of the Interior. He himself has learned several, and having harmonized them, is enabled to reproduce them with novel and interesting effect.

Col. Theodore Roosevelt, speaking of Mr. O'Hara's work, says: "Among the visitors at the snake dance was Geoffrey O'Hara, whom Secretary of the Interior Lane has so wisely appointed Instructor of Native Indian Music. Mr. O'Hara's purpose is to perpetuate and develop the wealth of

Indian music and poetry—and ultimately the rhythmic dancing that goes with the music and poetry. Many well-informed and well-meaning people are apt to protest against the effort to keep and develop

preserve the Indian's only as national bric-a-brac. This is not so. We believe in fitting him for citizenship as rapidly as possible. But where he cannot be pushed ahead rapidly we believe in making

Navajo Indian Schoolboys, Fort Defiance, Arizona, belonging to the Government Indian School, singing their native Indian songs into the Edison Recording Phonograph, for Geoffrey O'Hara, Instructor of Indian Music.

what is best in the Indian's own historic life as is incompatible with making him an American citizen, and speak of those of opposite views as wishing to

progress slowly, and in all cases where it is possible we hope to keep for him and for us what was best in his old culture."

WHOLESALE TRADE EXPANDS

With Landay Bros. Since They Announced the Extension of This Division of Their Business—Expect Big Fall and Winter Trade.

Referring to their recent increase of facilities for the handling of their wholesale business, Max Landay, of Landay Bros., 563 Fifth avenue, New York, prominent Victor distributors, remarked:

"I am very pleased to state that our wholesale business the past few weeks has increased in proportion to the extension of our facilities for handling this division of our business. Our wholesale trade has taken quite a spurt recently, and I

am looking forward to a very satisfactory fall and winter trade in our wholesale department.

"Although we are signing new dealer accounts daily, and are still in a position to take care of the wants of additional dealers this coming season, we are carrying out our policy of handling only that amount of wholesale trade which we can cooperate with in every way. We wish to feel that our dealers can depend upon us to fill their orders at all times, and in addition we are placing at the disposal of our trade the results of our many years' experience as retailers of Victor products."

PARKER "AT THE FRONT."

According to advices received by his former associates in the advertising department of the Columbia Graphophone Co., New York, Henry E. Parker, who left for England last month, is now at the front fighting for his native land. Mr. Parker was sworn in as a gunner in the Royal Horse Artillery, which mobilized at Wimbledon, England, the latter part of September and which embarked for foreign service the first of the month. To quote from Mr. Parker's letter: "God and Kitchener only know where we are going."

AWAY ON SHORT TRIP.

V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, left Friday night for a ten days' rest, which he will spend at various points in the South and West.

Make hay while the sun shines and you won't be so apt to make trouble when it rains.

CHASE & WEST'S STRIKING DISPLAY "STYLE SHOW" WEEK.

(Special to The Talking Machine World.)

DES MOINES, IA., October 5.—In the parade of floats, an important feature of the very successful

by characters in costume. The Japanese summer garden setting was carefully carried out by the use of abundant natural foliage in pink and green en-

E. R. PERKINS WRITES COLUMBIA CO.

Vice-President of the Aeolian Co. Writes Complimentary Letter Anent Recent Contract to Handle the Columbia Line at Retail in Aeolian Hall and Various Branches.

Chase & West Float Which Made a Big Hit at "Style Show."

"Style Show" held in this city during the week of September 15, the Chase & West Talking Machine Co. very effectively advertised the Victrola by depicting one of the principal scenes from the opera "Madame Butterfly." Pinkerton, Homer, Farrar, Troubles and the American Lady were represented

twined over a rustic pergola and by lighted Japanese lanterns.

The float was the subject of much favorable comment, and without doubt it served to give the Victrola added publicity of value in Iowa's capital city.

The importance of the recent deal closed by the Columbia Graphophone Co. whereby the Aeolian Co., largest manufacturers of musical instruments in the world, will handle the Columbia line in New York and all its branch stores is further enhanced by the receipt by General Manager Lyle of the following letter from E. R. Perkins, vice-president of the Aeolian Co., and one of the most prominent men in the piano industry:

"Referring to contract signed by our house covering the handling of your line of merchandise and orders for product which accompanied the same, I take pleasure in advising that this action on our part was taken only after a most careful investigation as to the quality of your product and the demand which you have created for same.

"The class of merchandise which we handle made it essential that we should make no mistake regarding this matter, and a rigid test of the quality of your goods was made by our most qualified experts. The result of such investigation was the contract referred to above and we look forward with pleasure to a very substantial business with your line. Appreciating the facilities you placed at our disposal for such investigation, and assuring you of our co-operation in every way, we remain, very truly yours, The Aeolian Co.

(Signed) "E. R. Perkins, Vice-President."

George W. Lyle, general manager of the Columbia Co., left this week for his annual trip to the Pacific Coast.

A. H. Bates is now wholesale representative for the Victor Talking Machine Co. in local territory, succeeding Thomas F. Green, who resigned a fortnight since to become general manager of Silas E. Pearsall Co., New York Victor distributor.

NEW SONORA CATALOG ISSUED.

Latest Volume Illustrates and Describes Entire Line of Sonora Phonographs—Record Cabinets Also Featured—Attractively Illustrated and Printed—Most Artistic Effort.

The new catalog of the Sonora Phonograph Corp., 57 Reade street, New York, has been issued and is a volume of excellent character. It illustrates the entire line of Sonora phonographs, including the following various models: "Jewel," "Excelsior," "Peerless," "Imperial," "Baby Grand," "Rosary," "Elite," and the "Grand," with prices ranging from \$35 to \$200 at retail.

The volume is printed with brown ink on white paper and from a typographical standpoint is emblematical of great care and attention to printing detail.

An innovation in illustrating the use of the Sonora is found on opening the catalog at the center there being a number of half pages bound in, showing the extent of the repertoire which may be heard on this phonograph. In conjunction with these pictures is seen the picture of a man and his family listening to the playing of the Sonora. In the foregoing group of inserts are illustrations playing up the grand opera, foreign language, male quartet, organ, ballad, musical novelty, recitation, minstrels, patriotic song, monologue, popular song of to-day, military band, children's music, dance music, vaudeville, orchestra selections, etc.

Several record cabinets, sold exclusively by the Sonora Phonograph Corp., are also shown and described as well as the three new permanent needles which are meeting with such success. This house is distributing three of the latter, one being the multi-playing needle for lateral cut records, the second being a sapphire for vertical cut records, and the third is a diamond point needle.

A number of testimonials as to the efficacy of the Sonora as well as a small list covering a few of the owners of Sonora machines are included at the back of the book.

AMERICAN TALKING MACHINE CO.
 368 LIVINGSTON ST., BROOKLYN NEW YORK CITY

TRADE IN NEW YORK SHOWS MUCH IMPROVEMENT.

Enjoys What Appears to Be a Country-Wide Condition—Dealers Now Getting Stocks Into Shape for Holidays—Dancing Craze Still Helps Trade—J. N. Blackman Recovering—Many New Columbia Dealers in Metropolitan District—Heavy Demand for Victors.

Local trade in talking machine circles the past month has been more encouraging and satisfying than the most pronounced optimist had hoped for, as many of the jobbers and dealers had expressed the belief last month that the continuance of the war abroad would cause a feeling of unrest that would materially affect all lines of merchandise. This belief, however, has been proven a mistake, as conditions the past month have shown a decided improvement that seems to be country-wide and not local. Returning traveling men report the most emphatic optimism in all sections of the Middle West, and with the Eastern States fast realizing that the coming fall should be a banner one, industrial activity in this section of the country is in the midst of a pronounced boom.

Dealers Replenishing Stocks.

In line with the improved status of affairs it is but natural that the jobbers and dealers should be turning their thoughts and attention to the replenishing of their stocks for the heavy selling seasons. The dealers as a whole have sadly neglected the rounding out of their machine and record stocks during the spring and summer months, and as a result good-sized orders are now being placed by practically the entire trade. The approach of the Christmas buying season is, as usual, witnessing the revival of speculation regarding the ability of the factories to handle all their trade during the busy months. Several jobbers and dealers have predicted that the winter of 1914-1915 will be the same as that of the last four or five years in that there will be a marked shortage of all classes of machines and records, principally the latter. Other members of the trade, on the contrary, assert that the increased manufacturing facilities installed by the manufacturers since the first of the year will enable them to turn out far more goods than formerly and keep pace with the demands of their trade.

Situation Is Rapidly Clearing.

Local general trade has suffered more from the psychological effects of the European war than any other section of the country, but this was to be expected, as the importance of this city as an export and import center, coupled with the stagnation in financial circles, have contributed to make the war a paramount consideration with thousands of New York merchants, both wholesale and import. The situation is clearing rapidly, however, and the reports submitted by dealers in Greater New York and the adjoining suburbs would indicate that machines and records are being sold the same as heretofore, and that the New York business world is adjusting itself to the new requirements of business life. That the war may prove an actual benefit rather than a handicap may be gathered from the steady increase in the exports of this port as compared with the figures of last year.

Indoor Dancing to Help Trade.

The indoor dancing season is now in full swing, and the advertising being used by many of the local talking machine establishments is particularly directed toward this class of trade. Contrary to general expectations, the so-called dance craze has outlived its experimental stages, and, although some of the older of the modern dances have fallen by the wayside, new ones are being popularized daily. These new dances are receiving the careful attention of the talking machine manufacturers, and as a result some of the new fox trot records, for example, are reported as being the best sellers of any records in the catalog for the month of September.

J. Newcomb Blackman Convalescent.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, Victor and Edison distributor, whose serious illness from typhoid fever was noted in this column last month, is now well on the road to speedy recovery and will in all probability be back at his desk by the 1st of November. R. B. Caldwell,

vice-president of the company, has been directing the destinies of the company the past two months with result-productive efforts, and the business for September was very pleasing. In a chat with The World Mr. Caldwell stated that the trade for the first part of the fall season was leaning decidedly toward the higher priced Victrolas and Red Seal records, the cheaper machines being left far behind in the advance orders of the company's dealers.

Recent Columbia Dealers.

The past month has been a very busy one at the wholesale headquarters of the Columbia Graphophone Co., 89 Chambers street, New York. A feature of the business the past few weeks has been the signing of many new accounts in the metropolitan district. A few of the recent ones closed last week are: C. R. Wheeler, Greene, N. Y.; Samuel R. Fruhtman, Milburn, N. J.; Stark

Bros., 3122 Fulton street, Brooklyn, N. Y.; C. K. Brown, Deposit, N. Y. "Our sales totals for September exceeded September of last year by a nice margin," said R. F. Bolton, manager of the company. "Our new 'Meteor' is meeting with a ready sale, but the 'Leader,' 'Mignonette' and 'De Luxe' are gaining in popularity rapidly. Collections have been very satisfactory, considering the general unrest throughout the country.

Reports of Progress.

G. T. Williams, manager of the New York Talking Machine Co., 81 Chambers street, Victor distributor, anent conditions remarked as follows: "September kept step with the business we closed the first eight months of the year in that we showed a substantial increase over September of last year. This month-by-month gain is more convincing when it is understood that 1913 was the banner year of our history. Personally, I am looking for a shortage in both machines and records this fall, as conditions are parallel to those of the past four or five years. The demand for Victor records of all classes is so tremendous that, notwithstanding the enormous output of the factory,

the demand will be in excess of the supply. This will particularly apply to all of the new dance records which the Victor Co. has been issuing regularly the past few months.

C. F. Bruno Expects a Busy Fall.

Charles F. Bruno, secretary and treasurer of C. Bruno & Son, 353 Fourth avenue, and manager of the company's Victor business, is characteristically optimistic regarding fall and winter business. Mr. Bruno is in a position, however, to base this optimism on concrete facts, as the figures for September showed a fine increase over last year. As this company sells exclusively at wholesale, its concentration on dealer business makes for splendid service from all standpoints.

A. W. Toennies Is Optimistic.

A. W. Toennies, of the Eclipse Phonograph Co., 293 Washington street, Hoboken, N. J., exclusive Edison disc and cylinder distributor, is enthusiastic regarding the fall and winter outlook. "The Edison disc line is gaining far beyond my expectations," said Mr. Toennies. "We are signing up new dealers day by day, and those dealers who arranged to handle the complete disc line a year ago are now reaping the benefits of their early efforts. The new records are giving entire satisfaction, and the high quality of both the Edison disc phonographs and records is being recognized by many prominent musicians in this State who are patrons of our dealers. We are looking forward to a banner fall business, especially in the \$200 and \$250 models."

Acolian Co.'s Columbia Announcement.

The Acolian Co., 29 West Forty-second street, the prominent piano house, announced in last week's newspapers its acquisition of the complete Columbia line. The company called attention in its advertisement to the rapid strides achieved by the Columbia Graphophone Co. in developing its products, especially its records.

New Edison Shop Will Open Next Week.

The beautiful new Edison shop on Fifth avenue and Fortieth street is fast nearing completion, and

from all indications will be ready for formal opening the early part of the week. This new home of the Edison phonograph is one of the show places of the local retail trade, as the decorations and furnishings are both attractive and dignified. Every detail of the building, both exterior and interior, is in complete accord with the standing of the name of Edison and the high quality of the new Edison disc products.

Landay Leases New Quarters on 42d St.

Landay Bros., the well-known Victor distributors, with four stores in the high-grade shopping districts of the city, last week signed a ten-year lease to occupy the ground floor, basement and front section of the second floor of the building now occupied by the Estey Piano Co., 23 West Forty-second street. These premises are being completely remodeled and renovated for Landay Bros., and will be ready for occupancy the first of the month. This new store, marking another step in the remarkable progress and achievements of Landay Bros., will be furnished and decorated to harmonize with the company's other stores, which signifies that it will be another tribute to the merits of Victor products.

Closing of O'Neill-Adams Department.

The O'Neill-Adams store, at Twenty-second street and Sixth avenue, was formally closed the first of the month in accordance with an order of the United States District Court. This closing marks the passing of one of the largest and best equipped Victor departments in the city, the manager of which, William F. Lynch, has been appointed manager of the Simpson-Crawford Victor department.

RETURNS FROM SUCCESSFUL TRIP.

Lewis A. Lipman, road ambassador for the Uffner Album Co., 75 Grand street, New York, and well-known in the talking machine trade, returned last week from a very successful Southern trip on which he presented the many merits of the Uffner Patented Album in result productive fashion. Mr. Lipman, who left this week

for a New England trip, states that the new Uffner album is meeting with success wherever it is introduced, and giving perfect satisfaction.

EFFECTIVE COLLECTING METHOD.

"What methods do you find most effective in persuading careless customers to reply to correspondence regarding past due accounts?" This is a question recently found in the question box of the Sioux City Association, and when it was put to a meeting one member replied that he had on various occasions, with good results, used a letter containing only these words: "Shall we hear from you (date)?" or the words: "Shall we hear from you (date)? It is very necessary that we do." Another member stated that he had used the same words in a telegram.

NO HARM DONE.

Her friends had asked their young hostess to play for them, and she was performing a difficult selection from Wagner. In the midst of it she suddenly stopped in confusion.

"What's the matter?" asked one of the visitors. "I—I struck a false note," faltered the performer.

"Well, what of it?" cried another guest. "Go ahead. Nobody but Wagner would ever know it, and he's dead."

A WORD THAT SHOULD BE CANNED.

"Can't!" "Can't!" "Can't!" The world is weary of the word
Sounds exactly like the croak of some ill-omened bird—
Better far to say "I can!" "I can!" But, better still,
Let a fellow face the worst and say: "I will!" "I will!"

"Can't!" "Can't!" "Can't!" I wish we'd never hear again
That distressing syllable that spoils the plans of men,
Steals the courage from their hearts before the fight's
begun,
Makes them shirk the struggle that, once in, they might have
won.

"Can't!" "Can't!" "Can't!" Oh, let us drop it from our
speech!
'Tis a word that puts the goal, success, beyond our reach;
Let no thought of failure enter in, our faith to kill,
Let us can this "can't" and use the words "I will!" "I
will!"
—Dennis A. McCarthy, in "The New York Sun."

PHONOGRAPH CO. OF KANSAS CITY

Has Most Attractive Quarters Under Management of W. P. Hope—Handsome Concert Hall Much Admired—Rooms Admirably Furnished for Display of Edison Phonographs.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., October 6.—The home of the Phonograph Co. of Kansas City, exclusive Edison disc and cylinder distributor, at 1012 Grand avenue, is proving one of the centers of attraction for this city's music lovers. The comfort and home-

like atmosphere which pervades the warerooms is well calculated to place visitors completely at ease, and the detailed perfection of the warerooms' furnishings and decorations has been praised by all callers at the store. A feature of the establishment is the handsome concert hall which is shown in the accompanying illustration. W. P. Hope, manager of the company, is a firm believer in the sales and publicity value of holding informal concerts daily, and his efforts in this direction have been an important item in the rapid success the company is achieving. The store has only been

open a few months, but in this short while has gained for itself an enviable position locally.

E. R. CORNELL WITH NEW COMPANY.

(Special to The Talking Machine World.)

BOSTON, MASS., October 10.—E. P. Cornell, formerly manager of the wholesale Victor department of the Musical Instrument Sales Co., New York, and well known in the talking machine trade in the East, is one of the incorporators of the Patheoscope Co., of New England, chartered here with \$50,000 capital, for the purpose of dealing in motion picture devices. The other incorporator named is G. R. Armstrong, of Brookline.

VICTOR CO. BIG COTTON BUYER.

(Special to The Talking Machine World.)

NEW ORLEANS, LA., October 10.—Philip Werlein, Ltd., local distributor for the Victor Talking Machine Co., has been advised by the Victor Co. that it would purchase a bale of cotton for every agency it has in the South. This will be the largest purchase of cotton yet recorded and will amount to several thousand bales. The only stipulation is that the price must be ten cents per pound and the seller must be the producer.

NEW COLUMBIA AGENTS.

The past fortnight has been an unusually busy one for the Columbia Graphophone Co., a large number of new accounts having been signed up in the last few weeks. In Brooklyn, N. Y., particularly the Columbia products are gaining in popularity week after week, and at the present time Brooklyn territory from one end of the borough to the other is well dotted with the establishments of aggressive Columbia representatives. Among the newly created Columbia accounts are the following: George W. Millard, 1803 Myrtle avenue, Brooklyn, N. Y.; Hart Pharmacy, Westport, Conn.; Morris Finkelstein, Bridgeport, Conn.; Stark Bros., 3122 Fulton street, Brooklyn, N. Y.; J. Josephburg, 1671 Bath avenue, Brooklyn, N. Y.

The Concert Hall of the Attractive Quarters of the Phonograph Co. of Kansas City.

SIMPSON-CRAWFORD CO.'S ARTISTIC VICTOR DEPARTMENT.

One of the most attractive Victor departments in the local trade is that of the Simpson-Crawford

Although the Victor line is not literally a new addition to the Simpson-Crawford store, the pres-

prominently located on the fourth floor of the building, immediately adjoining the piano department, and are well calculated to win admiration by reason of their attractive appearance. This radical change was brought about by the policy of the new executive staff of the Simpson-Crawford store, which realized the unlimited possibilities of the up-to-date Victor department.

William F. Lynch, formerly manager of the O'Neill-Adams Victor warerooms department, and well known in the local trade, is manager of this new department, assisted by a group of efficient sales people. There are six record booths and two machine demonstration rooms in this department, and plenty of space is available for the construction of additional booths when needed.

The success of the moving picture slides issued at frequent intervals by the Columbia Co.'s advertising department has resulted in the recent production of a new set of

five slides, featuring primarily the dance product of the company. One of the slides has a clock device, making it of unusual adaptability for motion picture theater display.

"A piano always sounds loud in a flat."
"That is one of its advantages. It drowns the discordant criticisms of the neighbors."

Enlarged Department in Well-Known New York Store Devoted to Victor Talking Machine.

store, Nineteenth street and Sixth avenue, a portion of which is shown in the accompanying illustration. This department was formally opened a few weeks since, and the signal ability of the sales staff and the detailed conveniences offered visitors and prospective purchasers have been important factors in the success the department is already achieving.

ent showrooms may be actually termed a "new" department, as they represent an entire renovation and remodeling of the Victor warerooms the store formerly used. Whereas the Victor department last year occupied a very insignificant portion of the third floor, without any of the up-to-date equipment that characterizes the average modern Victor department, the new warerooms are

BUY-A-BALE-OF-COTTON MOVEMENT.

Supported in Virginia—Ogden First to Purchase a Bale in Lynchburg.

(Special to The Talking Machine World.)

LYNCHBURG, VA., October 7.—The first bale of cotton which arrived in Lynchburg on the "Buy-a-Bale-of-Cotton" movement is in front of the store of J. B. Ogden, the enterprising talking machine dealer and cabinet manufacturer of 206-208 Eighth street.

Upward of thirty business men representing every industry of importance in this city held a

Cotton Bale in Front of J. B. Ogden's Store. general meeting in the Chamber of Commerce, and it was decided that the business interests support the "Buy-a-Bale-of-Cotton" movement to the utmost. Nearly 200 bales were subscribed for at the meeting, and upwards of 800 bales have been purchased in this section. Mr. Ogden's bale was purchased from J. N. Swanson, of Houston, Tex., to whom he sent a patriotic communication.

WHY THE CHEERY MAN WINS.

There is no place in the talking machine trade for the long-faced person—the man who lacks geniality and who fails to warm up to a prospect. It will pay to shelve the blues at all times, for optimism is a mighty good business lubricant, and the merchant who is always cheerful is likely to be more successful in attracting trade than the pessimist who is continually croaking about business being bad, almost invariably presenting a woebegone countenance. The optimist will turn even his mistakes to good account and cheerfully hunt up evidence of errors so that the antidote may be administered. That is just as effective a method of business-building as increased sales, and it means building on a good foundation.

Examples are not lacking of retail concerns that have doubled their sales only to find their actual financial standing inferior to what it was when only half the volume of business was being done. It behooves the merchant to be ever on the watch for shoals and pitfalls, and the correction of little mistakes will tend to fortify his position against the possibility of the bigger and more disastrous one. Thus the lessons learned by reason of little errors of judgment will be turned to advantage in building up a stronger business, equipping the merchant for expanding it on sound lines.

About the only thing in this life that a man can win in a walk is a game of golf.

No man is thoroughly accomplished unless he has an ability to mind his own business.

COLUMBIA LINE IN PROVIDENCE.

The Tilden-Thurber Co. and the J. A. Foster Co., Two Prominent Establishments in That City, to Feature Columbia Line.

"Business conditions in New England are vastly improved as compared with those existing a few months ago," said H. A. Yerkes, manager of the wholesale department of the Columbia Graphophone Co., who returned this week from a trip through this territory. "There is renewed industrial activity throughout the New England States, and there is every indication of the coming fall being equal to last year's business and even exceed it in many lines. Our own business in this territory is increasing rapidly."

While in New England Mr. Yerkes closed a number of important deals for the representation of Columbia products, including the Tilden-Thurber Co. and J. A. Foster & Co., of Providence, R. I. The first named house is one of the best known high-grade jewelry houses in New England and caters to a clientele that includes the most prominent people in its territory. The company has maintained a piano department for over a year with pleasing success, and is in an excellent position to forcefully present the Columbia line. J. A. Foster & Co. are one of the oldest talking machine establishments in New England, and Mr. Yerkes is enthusiastic regarding the company's recognition of the sales possibilities of the Columbia line.

NEW CONCERN HANDLES TALKERS.

The Geo. B. Peck Dry Goods Co. Has Opened a Very Attractive Department and Buys Large Stock from the Schmeizer Arms Co.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., October 7.—The Schmelzer Arms Co., Victor distributor, has just closed a deal with the George B. Peck Dry Goods Co., of this city, whereby they will put in a Victor department. They will devote an entire half floor of their new building to this line. The company just delivered to them the largest individual order delivered to any dealer in this part of the country.

John Ditzell, formerly with the Columbia Graphophone Co., will be manager of the new department. They have installed six demonstration rooms and a concert hall and will go after the business vigorously.

IMPROVES THE CABINET INTERIOR.

"Felteen" is the latest production of the Herzog Art Furniture Co. in connection with the well-known Herzog record cabinets. The trade has been demanding just such an interior felt lining as "Felteen" for some time, and this latest product of the well-known Saginaw establishment nicely supplies the demand. It is found that "Felteen" acts as a protection on the records and greatly improves the interior of the cabinets. It would be well in ordering record cabinets to specify "Herzog Felteen Lining."

UNICO DEMONSTRATING BOOTH.

Built on the Unit System Sound-Proof and Dust-Proof Are Utilized by Local Talking Machine Dealers Throughout the Country for Successfully Displaying and Demonstrating Their Stock of Talking Machines.

Too much emphasis cannot be made upon the value of quietude in the sale of talking machines, for no prospect will listen to talking machine demonstrations in the same room that other instruments are being played. But until recently it was impossible to secure a talking machine booth, except at an almost prohibitive cost, that would help to increase these sales. Knowing this situation, George W. Smith & Co., Inc., Sloane street and Powelton avenue, Philadelphia, who make nearly \$1,000,000 worth annually of store fixtures, believed that by making a booth in units of three feet which could be installed easily in the talking machine wareroom there would be enough dealers who would want to have their warerooms modernized.

In putting up the proposition of Unico booths to some of the houses in the trade it did not require a great deal of time to convince them of the value of such booths, among them being such houses as these: Lyon & Healy, Chicago; Rudolph Wurlitzer Co., Cincinnati; Frederick Piano Co., Pittsburgh; Gimbel Bros., New York City; John Wanamaker, Philadelphia; Krell Piano Co., Cincinnati; E. F. Droop & Sons Co., Baltimore; Aeolian Co., New York City; Fulton Music Co., Waterbury, Conn.; Humes Music Co., Columbus, Ga.; Clayton Piano Co., Salt Lake City; R. H. Macy & Co., New York City, and a great many others.

Briefly speaking, Unico booths are built on the unit system, in multiples of 3 feet long by 8 feet high, making it possible to enlarge or reduce the booth sizes as desired. Absolutely soundproof and dustproof, which are features of Unico booths that are alone worthy of consideration. Made in eight regular designs, in oak, birch, quartered oak and mahogany, with special finishes to order. The booth design No. 3, which is one of the leading sellers has won a large degree of favor, as the design is handsome and beautifies any store. Furnished complete with double construction, hollow corner posts for electric wiring, crystal sheet glass, double glazed for walls, with either Florentine or double-strength American ceiling, and sand-blast statuary bronze-finish hardware.

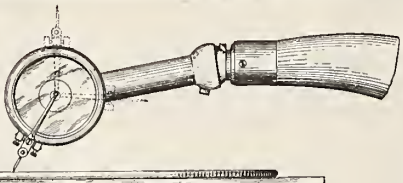

The cost of Unico booths is less than what would be paid for the ordinary nailed together "hen-coop" style of booths, which are altogether too costly for the character of work, and if a wareroom is to be changed in layout it requires a large outlay for workmen, whereas with the Unico booth they can be taken down and erected, even changing the size, as remarked before, in a few hours.

An illustrated catalog in two colors, showing the various styles of Unico booths, has been issued by George W. Smith & Co., Inc. It is most interestingly written, and its perusal will give some original ideas as to booth making and wareroom improvements. It is mailed gratis upon request.

CENTURY OPERA PUBLICITY.

The opening of the Century Opera House in New York has again placed Columbia records prominently before the attention of local music lovers, as several of the most popular members of the Century Opera Co.'s galaxy of stars are Columbia artists. These include the prominent tenors Walter Wheatley, Orville Harrold and Morgan Kingston, in addition to Louis Kreidler, who scored a signal success last week in the presentation of "William Tell." In accordance with its plan last year, the Columbia Co. has reserved the back cover of the Century Opera Co.'s official program, where it will display timely and appropriate copy during the operatic season.

The Eclipse Talking Machine Co. has leased the store and basement at 214 Main street, Paterson, N. J.

EDISON DISC MUSIC AT FUNERAL.

Machine and Suitable Records Takes Place of Quartet in Church Services and Brings Forth High and Earnest Praise.

The following incident, which occurred in Fall River, Mass., shows how acceptable Edison disc music is at funerals.

W. D. Wilmot, the Edison dealer there, writes as follows to the Edison Phonograph Monthly regarding the incident: "On Wednesday, September 16, a gentleman telephoned to ask if I rented phonographs for funerals. I asked for particulars. He told me that he had been unable to secure a quartet for his wife's funeral to be held at the Brownell Street Baptist Church on that afternoon, and would like to hire an Edison disc phonograph.

"I told him that I would be glad to do him this kindness without charge, and that I myself would come to the church and operate the instrument during the service.

"We placed the Edison disc phonograph in the gallery at the rear of the church, where no one could see either it or myself. I played No. 80,064, 'Beautiful Isle of Somewhere,' and both sides of No. 80,127, 'Lead, Kindly Light,' and 'One Sweetly Solemn Thought.'

"The officiating clergyman has since called twice at my store to emphasize his approval of the innovation, while the husband, Mr. Brown, has also called twice to thank me, and to say how many expressions of appreciation of the music he has heard.

"To-day he published 'Card of Thanks' in the Fall River Daily News. Two leading local clergymen spoke to me most approvingly concerning the use of the Edison."

Only a little practice has knocked many an attractive theory into a cocked hat.

THEY GAVE A PICNIC.

The West Music Co., Joliet, Ill., of which A. D. Hopkins and G. A. Wiswell are the proprietors, recently gave a picnic on the Du Page River.

Several hundreds of Joliet citizens attended. There was plenty of air and plenty to eat, and plenty of music. The cut shown in this connection shows Charles Stall and A. G. Gurney, who helped the company in the arrangements of the picnic, at the Victrola. The piano for which the company is the agents was also used to good effect.

Anton Heindl, manager of the foreign record department of the Columbia Co., returned to America last week after being marooned abroad since the start of the war and narrowly escaping being impressed into service in the Austrian army.

KOERBER-BRENNER CO. BROUGHT INTO PROMINENCE

As Exclusive Victor Jobber in St. Louis, Mo., Through Retirement of Aeolian Co. from Jobbing Field—Well Equipped to Supply Demands—Review of Business Situation—Silverstone's New Concert Hall—Activity with the Columbia Co.—Other News.

(Special to The Talking Machine World.)

St. Louis, Mo., October 10.—Talking machine dealers are very well pleased with the condition of trade here, considering the general state of business. From jobbers it is learned that the business for September for the city was nearer than within 20 per cent. of anticipations of what it should reach before the war interfered, and that the record business has held up very well indeed. The fact that people still are buying machines has been more or less of a surprise to dealers when they hear the complaints from other lines of business. The bulk of the machine business is on high-priced instruments.

The country business has held up very well, indeed, and taking it as a whole, the trade has been surprisingly good.

As to collections, the trade is a unit in saying there has been little or no faltering among those pledged to weekly or monthly payments.

All of the talking machine men appear to be unanimous in believing that the war distress will be short-lived, and as soon as the industrial world can right itself under its forced new bearings, which will be very soon, there will be rapid recovering and that business will go on with a boom that will enable them to outstrip previous records for sales. It is rather curious that the talking machine men are extremely optimistic, while in so many lines there is pessimism. This may be due to the influence of the music that they hear constantly, who can tell? If it is, perhaps it would be well to distribute some talking machines among the bankers and financiers who continue to take the gloomy view of everything.

The feature of the talking machine situation here this month was the withdrawal of the Aeolian Co. from the jobbing trade and the addition of the Columbia line to the retail department at Aeolian Hall. The notices to the trade announcing the withdrawal of the company from the jobbing business was made on October 1.

Mark Silverstone, president of the Silverstone Music Co., recovered from his severe attack of hay fever sufficiently late in September to make a business trip to some of the larger cities in the South, and says that he was not at all impressed with the stories spread through the North of distress in that section. He found Memphis and other cities that he visited busy and alert and the merchants preparing for a good winter trade, and that his orders were better than he had reason to expect when he left home. At least he found confidence much greater than he anticipated.

The first of the month saw the finishing touches put onto the new concert hall and main floor demonstration booths in the Silverstone warehouses and the general appearance of the store is greatly improved thereby, having lost the one-sided appearance that was so prominent while booths were ranged on only one side of the room.

But the visitor must get into the concert hall to appreciate it. It seats more than 30 persons in roomy, comfortable wicker chairs, has concealed lighting system and perfect ventilation supplied by ceiling ventilators and an electric fan driving the air outside through a flue. The most artistic touch, however, is given by an art glass background to the stage, where a handsome Edison disc machine stands. This art glass background extends from the floor to the ceiling curve and is composed of two sections, the upper of which contains the name "Edison" in letters about twelve inches high and extending across the stage. The lower panel is composed of musical decorations.

PRICE TALKING MACHINE CO.
VICTOR DISTRIBUTOR
(Exclusively)
We can supply ALL your wants on time.
NEWARK**

all done in soft, restful colors that are sufficiently contrasted to be decorative, but not enough to distract the attention of the auditor.

It is the plan to use the concert hall at all hours of the day to demonstrate the weekly lists of records and such other numbers as are requested by those present. The concert will be continual during business hours if the attendance warrants. More than 30,000 invitations are being sent to the best homes in the city.

One of the notable sales at the Silverstone store last week was that of a \$150 machine to a customer who a few months ago bought a \$400 instrument. The higher priced machine occupies a place of honor in the music room of the customer's handsome home and the \$150 one will go in the ballroom on the third floor.

The withdrawal of the Aeolian Co. from the Victor jobbing trade here has brought the Koerber-Brenner Music Co. into prominence, as to them falls the jobbing business of this field, an unexpected development to them and to the retail trade generally. This happens also at an opportune time, as the Koerber-Brenner Co. only a few months ago decided to give up its small music goods trade and devote its entire attention to the Victor line, so it has available exceptional facilities in the way of office force and warerooms to meet with this demand. Also the Koerber-Brenner Co. recently undertook an aggressive selling campaign and stocked up accordingly, hence it has an exceptional stock to meet any additional demands. In speaking of the situation, E. C. Rauth said:

"Naturally we regard our present situation as something of an obligation upon us to meet all of the demands of the trade in this section and we will strain every resource to care for additional trade that may fall our way. We will have the stock and will add to our organization in any way that may be necessary to fulfil any implied organization that may see fit to come to us as selling representatives of the Victor Co., as we regard ourselves as a part of the organization and as the connecting link between the factory and the retailer. We would be unworthy of the Victor organization if we did not provide at once for the meeting of all unusual and perhaps unexpected demands.

"While, of course, we welcome the opportunity to extend our trade and gladly welcome new customers, our connections with the Victor Co. are such that we place the meeting of the demands the company's retailers may make upon us above the mere commercial extension, for the present at least. We want any part of the trade in this section to feel that we are obligated to meet their demands just as much as though they had been our customers, for we regard a Victor obligation as our obligation."

At the Columbia warerooms Manager Reid says that the wholesale end has held up surprisingly well and that collections are better than general business talk would indicate. He has concluded, after hearing the tales of men in other business, that talking machine men are to be congratulated.

Mr. Salmon, of the wholesale sales department, returned early in the month from North Missouri and reported a very good trip and the farmers in that grain section well pleased with their present condition and the financial prospects. Mr. Bennett, also of the sales force, remained in that section to close up a number of deals. For the present the Columbia is not seeking new business in the cotton and lumber country to the south.

"Of course business just now is hard to get, but my experience has been that there is a way to get it," said Mr. Reid. "Just now we are putting in our best licks where we believe that business exists and that it is possible to close it up. We are sending our jobbing salesmen into sections where they have money to buy talking machines and we are making gains there.

Woolworth Building, New York

TRADE ACTIVE IN SOUTHERN CALIFORNIA.

Despite Disturbance Caused by European War, Demand for Talking Machines Is Greater Than Ever, with the Higher Priced Goods in Favor—Leading Houses Active in Way of Attractive Window and Wareroom Displays to Interest Public—News of Month.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., October 6.—Notwithstanding the war and the general business depression, the talking machine trade in southern California is opening up this fall in a manner which bids fair to surprise all previous records. The demand for the larger models in all makes of talking machines is greater than ever before at this time of the year. The only drawback seems to be our inability to get machines and records. This may be due, in a measure, to our great distance from the source of supply. However, all the jobbing houses predict a full supply for the holiday trade.

Tuesday, September 8, marked the 123d anniversary of the founding of Los Angeles. A municipal carnival commemorating that event was given on the old Normal School site. A wide and varied program was given. The Southern California Music Co. supplied three Model A250 Edison disc machines, which elicited many favorable comments from thousands.

A very unique window display was given by the Wiley B. Allen Music Co. last week, consisting of three couples of dancing dolls, while four couples were seated around them as interested spectators. The dancers were made to revolve, reverse, dip,

etc., just like they were alive. The dance was performed around a talking machine. This window attracted hundreds of people and was a great advertisement for the new dance records.

R. E. Wolfinger, of the Wiley B. Allen Music Co., has a novel scheme whereby the English records of our greatest singers may be more thoroughly enjoyed by his prospective customers. Mr. Wolfinger makes typewritten copies of the songs, which are given to the customers to follow while the records are being played, thereby enabling them to get a much better impression of the clearness of the enunciation of the machine than would otherwise be obtained. Cornelius Muers, formerly with the J. B. Brown Music Co., is now connected with the Allen house.

H. E. Lindsey, who was with the Wiley B. Allen Music Co., of Portland, Ore., is now with their branch in this city.

The Andrews Talking Machine Co. has added greatly to the efficiency of its department by the addition of another large demonstrating room. M. B. Sharp, formerly with Sherman, Clay & Co., San Francisco, is now with this company.

The Birkel Music Co. reports greatly increased sales of all models of Victrolas.

Charles Ruggles, local manager for Sherman, Clay & Co., reports two new Victor agencies, the Becker Pharmacy, of Calexico, Cal., and W. H. Saladin, of Lompoc, Cal., both of whom have placed substantial orders.

Ralph H. Paulin, manager for fifteen years of the talking machine department for the Guernsey S. Brown Music Co., of Santa Barbara, has recently purchased that department and greatly increased the stock. Mr. Burson will be connected with him.

T. T. Gardner, of the Gardner Music Co., Gardena, has lately added the Edison disc agency to his line. He reports a flourishing business, having sold a Model A150 and a Model A250 the first week.

O. A. Lovejoy, of the Southern California Music Co., reports a brisk trade in both the Edison disc and cylinder lines.

The new Edison idea of putting six disc records on sale every week is meeting with great favor in this community.

George B. Austin, of Oxnard, was in the city recently. He placed a substantial order for both Edison disc and Edison cylinder machines and records.

The Columbia Graphophone Co., wholesale, reports a big demand for four new model machines.

E. Holland, of the Holland Music Co., located at Vernon and Central avenues, reports a fine business in Edison cylinder machines and records. Mr. Holland makes a specialty of this line and is increasing his business daily.

A NEW LOW-PRICED RECORD.

The "Little Wonder" Record, Backed by Henry Waterson, the Well-Known Music Publisher, Is Only Five and One-Half Inches in Diameter and Retail at Fifteen Cents.

If the latest venture of Henry Waterson, head of the Waterson, Berlin & Snyder Co., the prominent music publishers of New York, develop as the promoters expect, owners of talking machines will be able to buy records as they buy sheet music at the present time, and at about the same price.

Mr. Waterson, in short, is sponsor for the new Little Wonder record, which has just made its appearance on the market and sells for fifteen cents retail. The new records are of the lateral cut type, may be played on the various machines using that type of record, are five and one-half inches in diameter and play for about one minute and forty-five seconds. The records are large enough to hold one verse and two choruses of a song and the reproductive qualities are very good.

Mr. Waterson stated to The World that the present catalog of "Little Wonder" records contains about fifty selections and that it will be added to at the rate of fifteen selections monthly. The distribution will not be confined to any one class of store, but the records will be sold in music stores, stationery stores and through other similar agencies. A new machine to use the record has been designed.

Alice Nielsen, the popular operatic soprano and a Columbia artist, will appear next Tuesday at Hackensack, N. J. to sing at a concert given on behalf of the Children's Relief and General Welfare Society of that city. Miss Nielsen will appear in conjunction with Rudolph Ganz, the internationally prominent pianist. Mrs. George W. Lyle, wife of General Manager Lyle of the Columbia company, is an active patroness of the Children's Relief Society of Hackensack.

POPULAR FOR DANCING.

Columbia Records Make Ideal Substitute for Orchestra, Writes Dancer.

With the start of the indoor dancing season, the Columbia Graphophone Co. is steadily adding to its long list of testimonial letters from successful dancing instructors. One of the recent communications was that sent by Miss Edythe Parker, a prominent exponent of the modern dances, who writes:

"I did not believe it possible that the Grafonola could satisfactorily take the place of an orchestra for dance purposes, but I am very glad now that you insisted on my giving it a trial. It is simply a revelation to me. The Columbia double-disc records of the new dances are simply marvelous for the life, swing, snap and perfect tempo. They are faultlessly played and are of the greatest assistance to me in my work. I most sincerely recommend their use by every dance teacher in the country. They are wonderful."

"BETTER THAN AN EXTRA CLERK"

THE "OGDEN"

Sectional Filing Cabinet and Sales System

If You Knew a Young Man Who Could Increase Your Business, You'd Employ Him—Then Why Not Install a Filing System that Will Do the Same Thing for Less Money?

PAST THE EXPERIMENTAL STAGE

The "OGDEN" has stood the test and made good—is making good today in hundreds of stores—is ready to make good for you. Has a simple, adjustable signal system for quick filing and ready reference—gives you any record in stock in four seconds. Complete in the minutest detail and fully guaranteed to be just as represented. Do away with the old style, out-of-date cabinets—install the new "OGDEN" and watch your sales and profits grow, while your "dead stock" decreases. It's a matter of dollars and cents with you and worthy of immediate investigation.

Announcement

WE HAVE opened offices at 29-33 West 38th Street (just West of Fifth Avenue), New York City, where we have our goods on display and ready for examination and comparison.

Our goods are sold under our own patents, applied patents and copyrights, or under arrangement of patents held by others, so that any dealer can handle our goods without fear of intimidation or law suit.

We claim and will demonstrate that the Pathé Discs (all double) are superior to anything on this market. They are made by the up-and-down cut system of recording, and play with a permanent round sapphire or a round diamond in place of a needle.

The Pathephone; as to mechanism, acoustics and style, is the best on the market. We make this statement unqualifiedly.

Our largest model machine will be equipped by us to play every make of Disc Record on the market, and play it perfectly.

Our plan is to sell goods in the usual way, through distributors and dealers. We shall limit the number of jobbers, and shall be very judicious in the selection and location of dealers.

We are now ready to receive the applications of jobbers and dealers and solicit your visit and correspondence.

MARKET FOR CHEAP "TALKERS."

Vice Consul-General Harry A. McBride, stationed at Boma, Belgian Congo, under the heading "Commercial Study of Portuguese West Africa," gives an interesting account of conditions in this far-away land in the October 1 issue of the "Daily Consular and Trade Reports."

Referring to the talking machine trade, Mr. McBride states as follows: "There is a good market for cheap talking machines, these being in use even by the poorer Portuguese families and the better-class natives. A few of the higher-priced American machines have been sold, but the trade demands an instrument retailing at \$10 to \$20. Records

WILL BUY DISC TALKING MACHINES

Wanted to buy a good job of disc talking machines and disc records, any make. We will buy supplies and horns. We pay spot cash. Address "O. C., 124," care The Talking Machine World, 220 So. State St., Chicago, Ill.

FOR SALE

5,000 brand new Columbia disc (single) records, must be sold at once. Price, 4c. each. Berliner Phonograph Co., Inc., Dept. 8, 140 East 4th St., New York.

AN OPPORTUNITY

Capitalist and business man wanted (or for sale) to handle patented invention (not an attachment), but consisting of an entirely new PHONOGRAPH TELEPHONE, etc., etc., instrument which eliminates all distortion of form or quality, superior to any known method on the market. The correct recording, reproducing and transmission of music at last made possible. Your business and financial responsibility a first requirement. For further particulars address Palys L. Chevrier, 1910 Hillcrest Road, Hollywood, Cal.

TALKING MACHINES WANTED

Wanted to buy, stock of talking machines. Must be up to date. Will pay cash. Address J. Venable, 975 Market St., San Francisco, Cal.

BUSINESS FOR SALE

FOR SALE.—Music business in a rapid growing resort city of South Florida. Good opportunity for one who can handle installments. Nearest dealer 66 miles. Country being settled rapidly. Address "Florida," care The Talking Machine World, 373 Fourth Ave., New York.

FOR SALE

One \$125.00 Victrola Grand Opera mechanical display now on exhibition in our show window. Big bargain for quick purchaser. Call, write or telephone E. G. Brown, Bayonne, N. J.

such as are supplied for Brazil and Portugal would find also a market if prices were right. At present all the records used are imported from France through the medium of Lisbon firms."

THE AGGRESSIVE MAN WINS

In the Battle for Trade This Fall and Winter, Says Thos. F. Green, General Manager of the Silas E. Pearsall Co., New York.

General Manager Thomas F. Green, of the Silas E. Pearsall Co., Victor distributors, 16 West Forty-sixth street, New York, who is widely known in the talking machine trade, is one of the most optimistic men when it comes to a discussion of the condition of business during the next few months. He believes that with the present adjustment in the banking system, the increased manufacturing orders and the wonderful crops there will be a prosperity which will result in a tremendous amount of Victor business.

"For those dealers going after business in an aggressive way," added Mr. Green, "the next few

Thomas F. Green.

months should show a lot of machine sales, to say nothing of the increased volume of record trade that usually comes in on the prosperity wave. The dealers using the Pearsall Victor service will be helped by securing a sufficient allotment of goods that will put them in a position of being able to fill most any demand made upon them. A well-stocked store not only gives the customer the impression that the store is a live one, but it permits the quick closing of sales by reason of giving the customer anything he wants on the minute. Frequently a prospect takes a year to make up his mind to own a Victrola, and when buying it in the morning wants the machine delivered in the afternoon, and it is necessary to have a good stock to be able to give the customer the right service."

In the organized mind there is an unfolding of the spiritual life, a constant search for better things, a wider vision of human needs, and a sympathetic effort to ameliorate the conditions of life. Serving the master mind of patriot, impelled Patrick Henry to utter the immortal words, "Give me liberty or give me death." The master mind of a general led Washington to his Yorktown and gave America its freedom.

A woman in Providence, addicted to the use of big words, was calling on a friend one afternoon, who complained of incessant pain in her back, whereupon the user of big words said: "I would consult Dr. Purzner for pains in the back. He's the finest bacteriologist that I ever knew of."

THOUSANDS ARE ENTERTAINED

By the Edison Disc Phonograph at the Entertainments Given on Tuesday and Thursday of Each Week at the Headquarters of the Prudential Insurance Co. in Newark.

A very notable feature of the various plans arranged by the Prudential Insurance Co. of America

day of each week, wherein the thousands of employees are able to enjoy some delightful programs which are contributed by the employees themselves.

Among the important attractions at these reunions is the use of a \$250 Edison disc phonograph, which with a large number of choice records were purchased by the company and turned over to the noontime committee for these entertainments. The illustration herewith shows the enormous

for the entertainment of its employees at the head office in Newark, N. J., are the free entertainments arranged at the noon hour on Tuesday and Thurs-

day of each week, wherein the thousands of employees are able to enjoy some delightful programs which are contributed by the employees themselves. The illustration herewith shows the enormous crowd who have been aroused to enthusiasm by the Edison disc phonograph at these noontime entertainments.

A LIVE-WIRE READING STORE

Is That Conducted by Kline, Eppihimer & Co. —Has Attractive Columbia Quarters in Pennsylvania City—Long Established.

(Special to The Talking Machine World.)

READING, PA., October 7.—One of the live-wire merchandising establishments of this city is Kline, Eppihimer & Co. This concern has been in business for fifty-two years, and has been in its pres-

Kline, Eppihimer & Co.'s Attractive Display Rooms.

ent location on Penn Square during all these years. It also has the unique distinction of being one of the few old established department stores in this country wherein the originators of the firm are still living and actively interested in the business.

The Columbia department in this successful establishment is a very attractive one and as will

M. F. Elliot.

be seen by the accompanying illustration is well adapted to the holding of informal concerts. M. F. Elliot, manager of this department, is a keen student of all matters musical, and his hearty enthusiasm in Columbia quality and merit is well evidenced by

the rapid growth of his department. Mr. Elliot is most optimistic in his predictions for fall business, as he believes the next few months will be banner ones for Columbia machines and records in his territory.

INCREASE CAPITAL STOCK.

The Masterphone Corporation, manufacturer of the popular clarifying device known as the "Masterphone," has just moved its executive and sales offices to 286 Fifth avenue, New York.

The capital stock of the Masterphone Corporation was increased this week to \$100,000. Several changes have been made in the executive staff, C. M. Walsh having been elected secretary and treasurer and A. J. Wells appointed sales manager. M. B. Claussen continues as president.

REPORTS GOOD BUSINESS MONTH.

(Special to The Talking Machine World.)

BALTIMORE, MD., October 7.—J. L. Gibbons, new manager of the talking machine department of Stewart & Co., reports good business at the end of his first month. Mr. Gibbons succeeded J. A. Lappelle.

THE HERZOG MAGAZINE.

An interesting periodical known as the Herzog Magazine has now reached its fifth consecutive monthly issue. This publication contains considerable matter of musical interest, and is put forth by the Herzog Art Furniture Co., Saginaw, Mich.

AUCKLAND NOT UNPROGRESSIVE.

Harry W. Butler's Reply to Jake Graham's Criticism Sets Forth the Facts—Compliments for The World from New Zealand—Harry Lauder Spreads Himself—Hoot Mon!

(Special to The Talking Machine World.)

AUCKLAND, NEW ZEALAND, September 14.—The remarks of Jake Graham, the Liverpool dealer, about local dealers lacking progressiveness, which recently appeared in the course of his talk in The World, has been the subject of much comment here.

Harry W. Butler, of the gramophone department of the English & Foreign Piano Agency, Ltd., remarked in this connection: "Mr. Graham must remember that we are not living next door to the factories, the same as he is. If we want any records it takes us a fortnight to get them from the wholesale headquarters, which is in Sydney, 1,286 miles away. It must be also

remembered that there are as many people in Liverpool as we have in the whole of New Zealand, and he must not forget that the population tells a big tale. I think that with the stock we carry, over 10,000 H. M. V. and Twin disc records and every type of the same make of machines that there are very few signs of unprogressiveness. However, we are pleased to hear about our faults, and we shall try to improve to the satisfaction of Mr. Graham.

"By the way, I must compliment The Talking Machine World on its enterprise in keeping in touch with every part of the world. I consider it the best trade paper I have seen and look forward to its arrival with interest each month."

Some people may think that the Scotch are close-fisted in a money way, and that Harry Lauder is the patron saint of this clan, but Americans must be disabused of this idea, for at the Theater Royal the other night a large silk Union Jack was sold at auction, with Harry Lauder as assistant auctioneer, for the Mayor's Patriotic Fund. Mr. Lauder made a speech and aroused a great deal of enthusiasm. The first offer was ten guineas, but Mr. Lauder raised the price to fifty guineas, and later seventy guineas was offered, when he (Lauder) said he intended to take the flag back to Scotland if he got it, and he raised the bid to 100 guineas, at which figure the emblem was knocked down amidst cheers. Some local clubs are trying to repurchase the flag, but Mr. Lauder, with Scotch financial keenness, says the price is now £200.

CLAYTON BILL BECOMES A LAW.

The Clayton Anti-Trust bill, which, among other features, prohibits the fixing of prices to the retailer, was passed by the House of Representatives on October 7 and immediately went to the President for his signature, which made the measure a law. The purpose of the new law, the passage of which was strongly contested by the advocates of price maintenance, is designed as a supplement to the Sherman Anti-Trust law.

ENLARGES VICTROLA DEPARTMENT.

(Special to The Talking Machine World.)

NEW ORLEANS, LA., October 10.—The J. V. Dugan Piano Co., of this city, is featuring Victrolas so successfully that it has had to increase the capacity of its demonstrating and record rooms. The rooms are glass paneled and are soundproof.

THE UFFNER Sectional Record Cabinet

(Patented August 25, 1914.)

A new filing device for Talking Machine Records that fills a long felt want where objection is made against handling the great weight that is contained in Record Albums.

This system of filing and handling Records permits of great quickness and accuracy. The improved style of index furnished with each Cabinet is a strong feature.

The Cabinets are made strong and durable, containing four compartments: two for 12-in. Records and two for 10-in. Records. Capacity 60 Records. Each Cabinet contains a drawer 5 1/2 in. wide by 12 in. long for holding needles, cleaners, etc., as well as the index.

Finished handsomely in Mahogany Viennese leather, each compartment has gold-plated pulls, gold stamping and is initialed.

You take no chance in placing a sample order for these goods

SONORA PHONO

**“The Highest Class Talking
IS NOW READY**

The policy of this company has been to first create a demand for its instrument among the public and then appoint dealers throughout the country to enable us to fill that demand. The demand is now there, and the goods are ready.

Considered from a selling standpoint, the Sonora leads them all by far. It has more individual features than any other phonograph in existence. Where you might lose the sale of another machine you would surely sell a Sonora. Furthermore, when you sell a Sonora, you will be the only dealer to reap the benefit of future sales resulting from that one, as every Sonora dealer is given an exclusive territory, the size of which depends upon the amount of his initial purchase.

THE TRADE IN PHILADELPHIA AND LOCALITY

(Special to The Talking Machine World.)

PHILADELPHIA, PA., October 8.—There is a diversity of opinion as to the talking machine business in Philadelphia during September. Several of the firms have had a better business than they enjoyed during September of 1913, while others say they have not done quite as well, and attribute their lack of success to the two spells of exceedingly hot weather that were encountered during that month. When the weather was cool business was good, but the life went right out with it when the heat attacked the city.

Dealers Generally Optimistic.

The dealers are quite optimistic as to the fall and winter trade, and already they believe they see signs of active business. They are all buying heavily, not only in machines, but in records, dance records still having the call, as evidence is shown that there will be no lessening in this popular

amusement because the dancing schools are filling up earlier than usual.

Edison Latest, the "Telescribe," Shown.

Thomas A. Edison's latest invention, an instrument for the recording of telephone conversations, was demonstrated in Philadelphia last week by Nelson C. Durand, of the Edison laboratory, of East Orange. The demonstration was made at the warerooms of Louis Buehn, 825 Arch street. Mr. Edison calls this instrument the "telescribe." It is connected with an ordinary desk phone and transcribes conversations to a dictating machine, where they are recorded on a wax cylinder after the manner phonograph records are made. The telescribe was described in The World last month.

Mr. Buehn had sent out a number of invitations to prominent firms in this city to see the demonstration of this new invention, and there was a good representation present.

Louis Buehn Reports Improved Business.

Louis Buehn reports that his business has been very satisfactory, and it was infinitely better in September than it was last year. He enjoyed an increase of at least 50 per cent., a great deal of which was machine stocks anticipating a big holiday business. Mr. Buehn's personal opinion is, however, that while the dealers generally are making extensive preparations for a big trade, he is of the opinion that we are not going to have such a big retail business as some may expect.

Machines, Mr. Buehn says, are coming in very fine and, in fact, the companies are sort of swamping the jobbers. Records are also coming in very much better. He says the dance music still has a strong hold, but aside from that he believes there will be little sold but the Red Seal records.

Dance and Classic Records at Heppe's.

The past September was as good as last year at C. J. Heppe & Son, says Manager Elwell. He says the machines from the Victor are coming through all right, but the record stocks are a little slow. He says it looks as if the dance records were going to keep up, but that there is also a great amount of classic stuff selling.

Harry Cake Safe Home from Europe.

Harry Cake, of Pottsville, who handles talking machines in that city, was in Philadelphia on his way home from Europe. He has some interesting experiences to relate, having been caught in Ger-

many at the outstart. He was very seriously handicapped in getting accommodations and getting away, for the reason that his "talking machine" money was no good and that they even gave him no opportunity to spend any of it. He was helped out, however, through the Cook's Tourist Agency.

Big Stock on Hand at Gimbel's.

Gimbel Bros. report that they have about run even with last year in September. They have at present a larger stock than they have ever before carried in the history of their department, which indicates that they take an optimistic view of conditions. Their biggest business in records at present is for the dance numbers.

Some Original Advertising Matter.

Messrs. Blake and Burkhart, who conduct the Edison Shop at Eleventh and Walnut streets, are getting out some innovations in advertising matter in the way of circulars, of envelopes and of wrappers. Everything that goes out from the store is labeled "The Edison Shop." Both members of the firm were in East Orange last week and spent some time going over the factory. They have taken on a new salesman, Horace G. Bentley, who will be an outside man. In every delivery they make they place considerable advertising matter.

Have Handsome Warerooms.

The Talking Machine Co. on South Broad street has its warerooms completed, and the large marble stairway leading from the first to the second floor is very attractive and lends an imposing appearance to its otherwise very handsome warerooms.

Lively Demand for Columbia Line.

Manager Eckhardt, of the Pennsylvania Talking Machine Co.—the Columbia jobber of this city—says that his house had a very remarkable increase in business in September, and that it has "a lot of good meat stirred up for this month." Thus far it has gone ahead every month this year, notwithstanding that its business last year was most gratifying. "Fortunately," says Mr. Eckhardt, "we have not discovered that there is a war going on. If you will allow it to interfere with your business it is going to do so, but I made up my mind I would do all my war talk at home, and when I left home I would shake it off, and I have asked all my people to do the same."

Mr. Eckhardt says that he has been having a

THE TRADE IN BALTIMORE AND VICINITY

(Special to The Talking Machine World.)

BALTIMORE, Md., October 6.—The talking machine business is hitting up its usual fast stride with the result that all the dealers report excellent prospects for the fall and winter, and especially for the holiday trade. Most, if not all of them, are stocking up ahead of time to be in position to handle each and every customer during the holidays and to disappoint none.

The additional space added by E. F. Droop & Sons Co. was not put into service any too soon, for the firm has a big stock of Victors and Edisons on hand for the heavy demands that continue to pour in. Manager W. C. Roberts reports a very good September and has every reason to believe that this will be his banner year.

Joseph Fink, proprietor of the Fink Talking Machine Co., reports good sales with the Victor and Columbia lines at both his main store and his new branch store. Business is picking up nicely.

F. A. Dennison, manager of the branch store of the Columbia Graphophone Co., shows by reports and statistics that the various styles of Columbia instruments are just as popular as ever, and are bringing in good sales both in the city and on the road.

The Sanders & Stayman Co., Inc., reports sales for September with the Columbia and Victor lines to have been right up to the standard, and they look for a continuance of the good results.

H. R. Eisenbrandt & Sons are also in the band wagon with a line of good sales of Victors, which they handle exclusively.

The department stores, such as Stewart & Co., Gomprecht & Beresch and Hochschild, Kohn & Co., have good reports to make with regard to their talking machine departments.

ADJUST EFFORTS TO OBSTACLES.

Salesmen Must Know More About Their Goods Than the Customer, and Be Able to Prove It—Making Adjustments.

"Back of everything you sell there is something bigger than the article itself," writes George H. Eberhard, the prominent service expert. "It's the proposition—it's all that goes to make the sale possible in the mind of the customer. Salesmen

must know more about the proposition back of the goods they have to sell than the customer, if they want to enjoy the customer's confidence, and they must get his confidence and retain it if they're building up permanent trade.

"Salesmen must be prepared at any and all times to answer in several different ways every question about their goods and the proposition that makes each item a sales factor; so salesmen should be continually on the alert forestalling possible questions with the answers they would give if they were called on at a moment's notice to answer them. A salesman should treat his mind as he would a valuable race horse. Keep it in good

condition and warm it up occasionally with trial practice.

"Salesmen all have mental or physical defects or weaknesses. They know of these defects, and knowing, they should give thanks. Known defects are signals crying out to us to correct and control the weak spots in our selling armor. If you are loud in your general conversation, and you know it, the answer is, 'Tone it down.' If you lack poise, the answer is, 'Practice control.' If you're slow to collect your thoughts under fire of questions—prepare, practice, study, be ready. Don't let any man be a better salesman than you are.

THE TRADE IN PHILADELPHIA.

(Continued from page 42.)

splendid business with the dictagraph. J. Westervelt has full charge of that end of the business, not only as inside man, but also as manager of salesmen. The firm has closed a most substantial order for these machines with the Du Pont Powder people and with the Lanston Monotype Co.

De Angelis Heads Cunningham Department.

John De Angelis, a cousin of Jefferson De Angelis, the comedian, has been made the manager of the Edison phonograph department at Cunningshams. He sold the Edison records originally direct for Edison people in Orange. Mr. De Angelis

came to this city from Winnipeg. He says he thinks things look very bright for the Edison here this winter. A. C. Ireton, manager of sales, and C. P. Chew, both Edison men, were in Philadelphia the past week. They announce that they will send a corps of demonstrators over here shortly and give recitals, "after which," he says, "the enterprising dealers here are supposed to show the Philadelphia people the advantages and the way to secure one of the fine Edison talkers."

Many New Columbia Dealers.

"The new \$85, 1915 Columbia 'Leader' machine, has been received at the Philadelphia store," says Mr. Eckhardt, "and it has created quite a furore. It has been received very enthusiastically by the

trade and we are able to sell them faster than we can get them at the present time. I believe the new De Luxe, which is just out, is also going to be a winner." The Metropolitan Phonograph Co., of Reading, has begun extensive handling of the Columbia product, and will handle the Columbia exclusively. The Pennsylvania Co. has put on a great number of smaller accounts and has averaged a new contract a day during the summer months, and its territory is pretty well covered and it has had to turn down a number of applicants. It is negotiating for an important contract in Camden, which it expects to close in a few days. It has just closed a contract to handle the Columbia with Painter & Ewing, the piano dealers of this city.

THE TALKING MACHINE COMPANY

12 NORTH MICHIGAN AVENUE - - - - CHICAGO

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg., 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., October 9.—The local talking machine trade is enjoying the first fruits of the fall season. A very decided increase in sales is reported all along the Avenue, and in every talking machine store the opinion is given that the fall of 1914 will be a most profitable one despite the general adverse conditions which prevail and which have so seriously impaired so many other industries.

The heaviest machines being sold are, of course, the ever-popular styles that retail around \$100, but numerous disposals of the largest styles of machines are reported on all sides.

The record situation, while it does not show as much improvement, perhaps, as the improvement in the sale of machines, is nevertheless good. The dancing fad continues to contribute its beneficence, but records now called for are for the "fox trot," which dance is the successor to the tango. The fox trot is said to be very much the same as the tango, but the time is doubled.

O'Neill-James Gets Pathé Agency.

L. L. Leeds, of the New York office of Pathé Frères, while on a recent visit to Chicago, announced that his company had placed the agency for its goods in Chicago and Western territory with the O'Neill-James Co., of Chicago.

A. J. O'Neill said to The World: "We are very much pleased at securing the Pathé line. We think it is a winner, and I look for every success with it here in the West. I start on my first trip in connection with our new business in a few days and will visit St. Louis, Omaha and cities in the Northwest.

Hold Formal Opening.

Rolf Hammer, famous Norwegian singer and maker of many of the popular Edison records, was a visitor last week to the shop of James I. Lyons. Mr. Lyons was also visited by Otto Clausen, another Norwegian singer of the same company, who has contributed many of the popular issues in the Norwegian division of the Edison library.

Mr. Lyons was one of the exhibitors at the recent Household Show at the Cotiseum, where he showed in addition to an elaborate display of the Edison Amberol machines, the Victor and Columbia machines and records.

Singers Visit Dealer.

The enlarged and improved record department

of the Phonograph Co., local Edison representative, was opened September 26 to a large crowd of interested patrons. The latter availed themselves of the many new facilities and privileges of the Edison shops and incidentally invested heavily in records and machines. The affair was quite social in tone. Tea and light refreshments were served.

L. A. Sutfin is the new general traveler for the Phonograph Co. Mr. Sutfin is at the present time making a trip through Southern Illinois, calling on Edison dealers and prospective Edison dealers.

Inaugurate Instalment Business.

Two of Chicago's largest department stores, namely, Siegel Cooper & Co. and the Fair, have decided to institute the instalment system in their respective departments. This is an entirely new departure for the Fair, although Siegel Cooper & Co. did it at one time and then decided to discontinue it.

General Manager George W. Montgomery, of the Fair, made his decision during the past week following a visit by Clifford R. Ely, special representative of the Columbia Graphophone Co. Mr. Ely disposed of a large stock of Columbia goods to Mr. Montgomery, and it was following this that the decision to operate the instalment business was made. The talking machine department of the Fair will be greatly enlarged by a number of large booths and the business will be actively pushed.

The talking machine department of Siegel Cooper & Co. will be removed from the fourth to the third floor, and Manager Sandeberg is planning an active campaign for the fall months. As a first step he placed a large order for Columbia goods with Mr. Ely also. Mr. Ely deserves much credit for the business-like way in which he handled these deals. There are now six of the eight large department stores on State street who are Columbia dealers. They are Siegel Cooper & Co., Rothschilds, the Fair, Hillman's, the Boston Store and Marshall Field & Co. The details of the adoption by Marshall Field & Co. of the Columbia line will be found in another part of this paper.

Business in Northwest Good.

R. J. Keith, manager of the Talking Machine Co., spent a few days this week on a trip through the Northwest. While at Minneapolis Mr. Keith

was entertained by Archie Mattheis, dealer in that city, who showed him about the city and took him for a motor trip through the beautiful lake country that surrounds it.

"I found things in the Northwest especially good," said Mr. Keith. "A big business is undoubtedly assured for that section of the country this year, and all seem to realize it, as they are stocking up heavily. Grain crops were tremendous and they are enjoying one of the biggest businesses in their history.

"We closed our business for September with a substantial gain over September of last year, and so far this month are continuing to go at a good pace. There seems to be a considerable feeling of confidence, and despite the big war we are finding dealers to be in an optimistic frame of mind."

Wade Business Double.

S. O. Wade, of Wade & Wade, announces that his company's business for September, 1914, was just double that of September, 1913. "This is very encouraging to us," said Mr. Wade, "and in our opinion shows that dealers are realizing the advantages of handling a first-class needle cutter such as we believe ours to be. A cutter that pleases customers and a cutter that users recommend to their friends is naturally much in demand."

Rothschild in Dance Program.

Rothschild's Department Store is offering a novelty to its customers that is more than successful. B. F. Dvorak, in charge of the department, arranged and is now giving concerts which include not only talking machines, but which also includes the violin and player-piano, and the three in concert. Mr. Dvorak secured Miss Dunn and Mr. King, society dancers, to illustrate the latest steps to the music of the talker and the player-piano, and the concerts which are given twice a week are being attended by increasing numbers all the time. The first program was made up of eight numbers, and those present remained from start to finish.

New Victor Store.

S. K. Tureck, 3223 West Twenty-second street, has just placed a large order of Victor goods with the Talking Machine Co., and will open a fine store.

Whitman to Indianapolis.

H. Whitman, formerly floor salesman for the Talking Machine Co., was selected some time ago to take charge of the new Victrola department

THE WADE—THE PRACTICAL—THE WADE Fibre Needle Cutter

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone. The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade
Fibre
Needle
Cutter No. 2

The WADE is the most economical cutter. It has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points. No. 2 has a double action, making it especially easy to operate and affording the most powerful cut of any tool made. No. 1 is a very popular cutter which has given excellent service.

WADE & WADE,

3807 Lake Park Ave.
CHICAGO, ILL.

Marching 50 Years

THIS house opened its doors to the public in October, 1864. It started with three great ideas—First, to sell everything known in music; Secondly, to give the public better service and, Thirdly, to tell the people about it. These are cardinal principles with us today.

When the Talking Machine business was in its infancy, many years ago, we gave the whole proposition the most careful study with the result that we delivered our opinion to the effect that the Talking Machine, in time, would prove a wonderful musical instrument and that its manufacture and sale should be along artistic musical lines. Today, we are firmer than ever in our belief that every effort should be put forth to keep the Talking Machine in its well-earned place as the ideal ever-ready home entertainer and orchestra. To this end we strive to make our Victor Service the kind that gives real satisfaction to all concerned—satisfaction in a pressed-down and flowing-over measure.

Lyons & Healy

CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 45).

of the Pearson Piano Co. of Indianapolis, Ind., and latest reports are that he is advancing rapidly in his new work. A. G. Griffiths, Indianapolis, Ind., is the floor salesman in his stead.

Takes on Talking Machine Line.

The Central Piano Co., Jackson boulevard and Wabash avenue, which is headed by Raymond J. Healy, is taking on a complete line of talking machines in the large basement of the building, and will install a nice outfit of record racks and sound-proof booths.

Premier Progress.

Local officials of the recently organized Premier Cabinet Co., Montoursville, Pa., report an excellent business following the first month's work. The Premier Cabinet Co., which is headed by George M. Willson, has placed upon the market a line of talking machines which are distinctively novel and apparently very meritorious. Two styles have already been placed on the market, one being a cabinet machine, while the other instrument is of a portable model, designed for use on a table or separate cabinet. Located in one-half of the machine is the twelve-inch turntable and motor, both of a new and excellent pattern. The tone arm proceeds to the rear of and to the side of the mechanism, the sound chamber widening out into the other half of the machine. Cane panels cover the front of the sound chamber.

The Premier is an all 'round machine, as it is regularly fitted to play any lateral cut record, and by the addition of an ingenious attachment, provided with a sapphire or diamond needle, it will play equally well any type of vertical cut record.

It is announced by officials of the company that work is already proceeding on other styles, and that the company will issue a new style every six weeks until the line contains seven instruments, affording a wide range in price. It is planned that different styles of furniture architecture such as Sheraton, Mission, etc., be followed. They will be finished in mahogany, golden oak, fumed oak and other woods. The larger cabinet machines are equipped with a filing space capable of storing 200 records.

Messrs. Allmann and Chamberlain represent the Premier Co. in Chicago and the West. C. E. Keen, traveling representative, is now on a trip through the Southwest, introducing the Premier to the dealers of that territory.

Personals and Visitors.

George P. Ellis, of the Talking Machine Co., returned recently from a two weeks' vacation which he spent at Bass Lake, Ind. Previous to this Mr. Ellis made a trip to Indianapolis, where he aided in the presentation of dancing demonstrations given in the New York Store in that city. Mr. Ellis also went to Grand Rapids, Mich., where he assisted in putting on a dancing exhibition at Wuerzberg's.

Will A. Young and wife, of Fort Wayne, Ind., were recent visitors to the local trade, as was A. E. Shea, manager of the Victrola department of the L. S. Ayers Co., Indianapolis.

Other recent visitors to the local trade were H. S. Kesler, of La Porte, Ind.; A. F. De Forest, Decatur, Ill., and L. M. Knickerbocker, of the Lion Dry Goods Co., Toledo, O.

E. F. (Doc) O'Neil, one of the chief assistants to George Ornstein, manager of the traveling department of the Victor Co., was a recent visitor.

Some Edison dealers recently visiting Chicago were A. H. Steinberg, Peotone, Ill.; F. A. Cope land, of Elgin, Ill.; and James Taylor, of Chadwig, Ill.

H. H. Blish, of Harger & Blish, of Des Moines, Ia., was one of the prominent Edison jobbers passing through Chicago last week on his way to the Edison jobbers' convention in New York.

Paul Seegar, of the Edmund Gram Co., of Milwaukee, was a recent visitor.

V. B. Taylor, formerly traveler for the Victor Talking Machine Co., has made new connections with the Koerber-Brenner Co., Victor distributors

of St. Louis. Mr. Taylor is widely known in this part of the country.

Some New Dealers.

A number of new Victor dealers are reported from various points in the Middle West, among them being the Emerson Piano Co., Decatur, Ill.; the Mohr Hardware & Furniture Co., Bay City, Mich., and the Wayne Music Co., of Indianapolis, Ind. The Wilkinson Piano Co., of Joliet, Ill., is also increasing its stock very largely and improving its department in many ways.

Musically Inclined Puppykins.

The accompanying illustration is a reproduction from a photograph of Puppykins, the highly intelligent dog belonging to Archie Mattheis, proprietor of the Talking Machine Co. of Minneapolis, Minn. Puppykins is listening to a whistling record on the

**Introducing "Puppykins."**

Victrola. He is a very discriminating dog in his musical tastes, but when he hears anything that interests him he gets as close to it as possible. Several articles on Pupkins and his musical proclivities have appeared in the Minneapolis and St. Paul papers.

Invents New Needle.

A. H. Rintelman, piano dealer of 209 South State street, has applied for a patent on a one-piece needle that he claims has many superior features. It is triangular in form, with the three surfaces concave. This construction affords three points to the end of the needle, thus making it practically a permanent needle, as it is of a composition that is extremely hard.

"It affords a perfect transmission," said Mr. Rintelman, "because of certain composite metal and mineral that is contained within it, and will withstand the various changes of temperature without expansion or contraction."

Columbia Display at Home Exposition.

The accompanying illustration is of the Columbia booth which was one of the features of the Home Exposition given at the Coliseum in this city the latter part of September. The exhibit

**The Columbia Booth at Home Exposition.**

showed the complete Columbia line, and those in attendance had plenty of opportunities to demonstrate the Columbia tone, inasmuch as the exhibit was well surrounded the greater part of the time.

A. T. Boland, manager of the retail department of the local Columbia Co., designed the booth and was in charge of it. Assisting him were H. H. Goul and E. E. Cohan. Mr. Boland said that the exhibit was a big success, as there were not only numerous sales made, but a large number of excellent prospects were secured.

Prominent Victor Visitors.

George Ornstein, manager of traveling salesman of the Victor Talking Machine Co., Camden, N. J., was a visitor to the local trade a few days ago. Mr. Ornstein reported that he was finding business good in every direction that he traveled.

V. W. Moody in Chicago.

V. W. Moody, sales manager of the New York Talking Machine Co., stopped in Chicago for a day or two between the course of a vacation that he is spending in the West. Mr. Moody was welcomed here by a large number of friends who were acquainted with him when he was connected with the Talking Machine Co., of Chicago.

Cabinets in Demand.

The Salter Mfg. Co. is continuing to receive a brisk demand for almost all sizes of its varied line of record cabinets. The display of these cabinets has informed the public that such things exist, and as a result many owners of smaller machines are taking advantage of it.

Cheney Talking Machine Co. Developments.

The incorporation last month of the Cheney Talking Machine Co., under the laws of Illinois, with capital stock of \$100,000, all paid in, marked the final step in the organization of the project for the manufacture and marketing of the talking ma-

**Forest Cheney.**

chines invented by Forest Cheney, the first announcement of which was published in The Talking Machine World nearly a year ago.

The laboratory work connected with the development and perfecting of the Cheney machine has all been completed and the new company is prepared to enter the manufacturing field on a large scale. The controlling interest in the new company is held by the officers of Marshall Field & Co., which company will have the retail selling agency for the Cheney talking machines in Chicago. The details regarding the new department in the Marshall Field & Co. store appear in a special story

(Continued on page 48.)

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 47).

published elsewhere in The World this month.

In the West the general jobbing rights for the Cheney product will be held by the wholesale department of Marshall Field & Co., and jobbing rights in the music trade by the George P. Bent Co., the prominent piano house. Other jobbers will be appointed to cover remaining sections of

the country as soon as arrangements can be made to that end.

George H. Bent, for fifteen years manager of the retail department of the George P. Bent Co., in this city, has resigned to become manager of the Pacific Coast jobbing rights for the new Cheney talking machine.

NEW HOME FOR LYON & HEALY AN IMPOSING STRUCTURE.

Nine-Story Building at Corner of Wabash Avenue and Jackson Boulevard to Include Numerous Original and Convenient Features—the Architect's Description.

(Special to The Talking Machine World.)

CHICAGO, ILL., October 9.—According to the architect's drawing and the announced plans for the new Lyon & Healy building, to be erected at the northeast corner of Wabash avenue and Jackson boulevard, this city, it will be a most imposing and conveniently arranged structure. The building will occupy a site 96 feet on Wabash avenue and 171 feet on Jackson boulevard, and the actual work on the structure will begin early next spring. The accompanying illustration affords an excellent idea of the general exterior appearance of the new Lyon & Healy building when completed.

The architects, Marshall & Fox, have incorporated many original and valuable features in the design for the building, and in their description of the structure state that it will be nine stories

feeling in its columns, pilasters and vaulted ceiling, all being finished in the natural caen stone.

There will be a mezzanine floor between the first and second floors with balcony railings looking over the main portion of the store.

The basement and upper floors of the Lyon & Healy space will be served by three large elevators for the use of the public and by two freight elevators running the full height. There will be two elevators from the backing-in space on the alley running to the basement, thus giving very ample elevator service.

In addition, there will be a spiral parcel chute, dumb waiters, etc., all the details being worked out carefully to provide quick service.

The upper floors have been divided into large sales rooms, etc., for the pianos, musical instruments, etc. The general finish of the interior will be equal to that of the best office building, that is, mahogany trim, marble floors and wainscot, ample toilet facilities, etc.

The entire Lyon & Healy space will be provided with a ventilating system to supply fresh air for all departments.

In this connection it is interesting to remember that it is just fifty years since Lyon & Healy opened a music store on Washington street opposite the Court House, where the old Chicago Opera House was situated.

The big business was founded by the late P. J. Healy and its management to-day is in the hands of his sons and associates.

Lyon & Healy, to commemorate the semi-centennial of the establish-

ment of the house, sent out attractively engraved cards, announcing the fact to its friends in the trade. The card was accompanied by a photographic reproduction of the first Lyon & Healy advertisement in the Chicago "Tribune" of November 4, 1864, published at a time when the talking machine had not been thought of.

OPENS ENLARGED STORE.

(Special to The Talking Machine World.)

CHICAGO, ILL., October 9.—The Wilson Avenue Talking Machine Co. of this city, of which Mr. Cullen is owner and R. O. Fenton is manager, has

BOOK ON "PRICE STANDARDIZATION."

Interesting and Instructive Volume by Charles T. Terry Being Distributed Among Its Dealers by the Victor Co., Accompanied by Letter Emphasizing Importance.

Victor dealers throughout the country received last week from the Victor Talking Machine Co. a copy of an interesting and informative booklet entitled "Price Standardization," written by Charles T. Terry, of New York. This little volume, which is issued by the American Fair Trade League, was compiled to present in compact form "arguments and authorities establishing that a law should be enacted by Congress which would permit a manufacturer to fix by contract the retail selling price of his product, where such product is either a patented or trade-marked article, or is otherwise identified as a standard article of merchandise distinctly branded either under the copyright act or the common law."

With this purpose in view, "Price Standardization" discusses the tremendous value of price maintenance from every conceivable standpoint, and the recommendation by the Victor Co. that its dealers give the booklet their closest attention was well worth carrying out.

The letter to the dealers accompanying this publication read in part as follows:

"The justice of price standardization is becoming more evident every day. Every day it is gaining adherents and every day evidence of its desirability accumulates.

"The fixed price stayed fixed, when, as a result of the war, prices generally were advanced in this country. In Paris, when siege seemed imminent, people began to buy provisions. They went to the fixed price stores to do it—and French thrift is proverbial.

"Last week's issue of the Saturday Evening Post contained a full page argument in favor of price standardization, and much campaigning of the same sort is being done by other publications.

"Victor dealers should be in the future, as they have been in the past, at the forefront of the movement. A thorough understanding of the case is most important. Indeed, there is only one thing of greater importance, and that is that you should lose no opportunity to express your wishes and your beliefs to your Congressmen and Senators. That is the only channel through which legislative assistance can be received, and the sole purpose of electing members of Congress is that they should represent and provide for the wishes of their constituents, whenever such wishes are in conformity with the public good."

Experience is the best teacher, but don't rub it in on the man who commits bigamy.

Much of the speech that is heard in this time is not even silver, but only sounding brass.

just opened its enlarged store, 1010 Wilson avenue. It added another storeroom and fixed the whole up in excellent shape. The accompanying photograph shows the enlarged quarters on the opening day with the show windows attractively decorated for the occasion.

View of Lyon & Healy's New Home.

and basement, entirely of fireproof construction. The building is designed primarily for the needs of Lyon & Healy, but also will accommodate a certain number of offices on the upper floors. The present division of space being six floors for Lyon & Healy use and the three upper floors being subdivided into offices.

The office building entrance will be located on the east end of the Jackson boulevard frontage and leads into a spacious elevator lobby with ample elevator service for the office building section. The entrance to the Lyon & Healy store will be through this entrance; also a large entrance on Jackson boulevard and an entrance in the center on Wabash avenue.

The two lower floors of the elevations will be in pink Medford granite, the belt courses above in terra cotta granite to match. The upper floors will be of light gray brick with terra cotta cornices, belt courses, trim, etc., of a shade to match the granite. Large window spaces have been provided for all floors and the building will be very well lighted from natural sources. The general treatment of the exterior is of the Italian Renaissance period as to its main divisions and architectural details. The plain shaft of the facade is relieved by ornamental Italian balconies. The entire ground space, with the exception of the office building entrance, is occupied by Lyon & Healy, and will be of imposing aspect as one enters the store, due to the height of ceiling and the architectural treatment which will also carry out the Italian Renaissance

Display Window of the Wilson Avenue Talking Machine Co.

ARRANGING MOST ARTISTIC TALKING MACHINE PARLORS

Following Decision of Marshall Field & Co. to Handle the Cheney and Columbia Talking Machines, Plans Have Been Completed for Complete Transformation of Entire Northeast Corner of Third Floor of New Building in Chicago—Handsome Equipment.

(Special to The Talking Machine World.)

CHICAGO, ILL., October 10.—What will easily be one of the most magnificently equipped talking machine parlors and demonstration rooms will be opened in the new Wabash avenue building of

“Marshall Field & Co. in entering the talking machine field will, of course, concentrate their energies upon the Cheney machine, in which they are heavily interested,” said Mr. Howe. “We have contracted to take on the Columbia products, think-

Another Talking Machine Parlor.

Aeolian Co., which recently completed arrangements for retailing the entire Columbia line—emphasizes the success of the Columbia Co.

NATIONS THAT BUY FROM US.

Canada Heads the List—Britain, Germany, and France Well Up.

(Special to The Talking Machine World.)

WASHINGTON, D. C., October 10.—What and how much the nations of the world are buying from the United States, as told by American Consular officers, are discussed in “Commercial Relations of the United States,” a volume of 272 pages, just issued by the Bureau for Foreign and Domestic Commerce. Four countries other than the United States offer each a market for over \$1,000,000,000 worth of foreign products annually—the United Kingdom, Germany, France, and the Netherlands. Great Britain buys \$3,000,000,000 worth, about 20 per cent. of which is from this country; Germany, \$2,500,000,000, with 15 per cent. from the United States; France, \$1,500,000,000, of which 11 per cent. is from the United, and the Netherlands, an important center for the transshipment of foreign goods, nearly \$1,500,000,000, in which American goods figure to the extent of about 10 per cent.

Marshall Field & Co.'s Talking Machine Display Room and Concert Hall.

(Drawn by Vernon Howe Bailey.)

Marshall Field & Co., this city, within six or seven weeks. Plans have now been completed by the architects for the complete transformation of the entire northeast corner of the third floor in the new building. Announcement to this effect was made to-day by E. L. Howe, of Marshall Field & Co., who has been greatly interested in this proposition of launching the new Cheney Talking Machine Co. and preparing for its retail home in Chicago's great store.

The plans of the architects called for a marvelously well equipped section. There will be a large concert room which will dominate the architectural arrangement. Prospective patrons and the public generally will here be given every facility for hearing the new machine.

In addition a large number of private demonstration rooms, built with every possible precaution to observe the principles of correct acoustics, will afford the means for personal and more private hearings of the Cheney machine.

The location of this great section is very well adapted to the convenience of the public, as it is next to the public rest room on the third floor, where it is estimated more than 100,000 people sometimes daily avail themselves of the courtesies and privileges extended by Marshall Field & Co.

Records will be sold in the new department, as well as the Cheney talking machine. Every effort will be made so that the assortment of records will be complete in every respect.

ing very highly especially of the Columbia records, and will carry a line of Grafonolas as well. This decision of Marshall Field & Co. to handle the Columbia line comes after a great many days of investigation, and we believe that the best results of the new Cheney machine are obtained with Columbia records.”

W. C. Fuhri, district manager of the Columbia

Another of the Marshall Field & Co.'s Parlors and Display Rooms.

(Drawn by Vernon Howe Bailey.)

Graphophone Co., discussing this important expansion of the Columbia interests, said: “Marshall Field & Co. have contracted with the Columbia Graphophone Co. to handle its line of Columbia Grafonolas and Columbia disc records. This highly important deal was consummated by Marshall Field & Co., after a most careful investigation of the Columbia line.

“The Columbia Co. is to be congratulated on the closing of the contract, as the house of Marshall Field & Co. is known throughout the world as standing for all that is best in department store equipment, management and quality. This announcement, coming so closely upon that announcing similar action by that other great house—the

Belgium's annual purchases fall just short of \$1,000,000,000 in value, United States products supplying about 8 per cent., while Austria-Hungary, Italy, Canada, Russia, India, Australia, Argentina, and Japan are next in order, with imports ranging from \$722,000,000 to about \$300,000,000. These countries vary greatly in the proportion of their purchases from the United States, Canada taking 65 per cent. and India 3 per cent. Brazil's imports exceed \$308,000,000 only 15 per cent. of which are from the United States, which takes 40 per cent. of the Brazilian exports.

The man who is on the winning side is most apt to preach the triumph of right.

Plan of Counter and Music Rack.

(Drawn by Vernon Howe Bailey.)

Whether looked at from the viewpoint of art, reproduction, volume or tone, the new Columbia Grafonola "De Luxe"—\$200—is a winning article of merchandise.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

POPULAR WITH UNIVERSITY BOYS.

T. E. Davis, of Ithaca, N. Y., Has Built Up a Large Business in That City—Features the Columbia and Edison Talking Machines.

(Special to The Talking Machine World.)

ITHACA, N. Y., October 6.—That the college trade in this city affords excellent opportunities for the live-wire talking machine dealer is well evidenced by the accompanying photograph showing the successful and attractively arranged estab-

T. E. Davis's Well Stocked Store in Ithaca, N. Y.

lishment of T. E. Davis, who handles both the Columbia and Edison cylinder lines.

Mr. Davis carries a comprehensive line of machines and records, and through his energetic and progressive sales methods has succeeded in building up a profitable and ever increasing clientele. His record sales in particular are growing day by day and this record demand includes not only the latest dance and popular music, but a good proportion of classic and operatic selections.

TALKERS FOR UTAH SCHOOLS.

Six More Machines Purchased by Ogden Board of Education to Assist in Kindergarten Work—Take Place of Teachers.

(Special to The Talking Machine World.)

OGDEN, UTAH, October 6.—Six more talking machines are to be purchased by the Ogden city board of education to be used in the kindergarten grades. The talking machine was first introduced in the local schools about a year ago, and has already demonstrated its value. The machines are used in teaching the children rhythm, both in singing and in dancing, and are said to greatly facilitate the work of the kindergarten grades. Superintendent J. M. Mills, in asking the board of education to purchase the new machines, stated that they would take the place of six assistant teachers.

The only people who can afford to sneer at luck are those who never expect to have any.

PEARSON OPENS NEW DEPARTMENT.

Prominent Indianapolis Piano House Provides Attractive Quarters for the Victor Line—Optimism Rules—Planning for Concert Season—Kipp-Link Co., Redecorating.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., October 8.—Optimism is the word which expresses the situation in the talking machine business here. And there is cause for optimism. Business is good. It is better than it was last fall. Therefore the talking machine dealers here are justly optimistic.

The opening of the Victor talking machine department of the Pearson Piano Co., 128-130 North Pennsylvania street, attracted not only the attention of the buying public, but also of the other talking machine dealers. Pearson's has a talking machine department which is not surpassed by any in the city. Displayed along with high-grade pianos, the Victor machines make an artistic addition to the company's windows.

The Aeolian Co., 237 North Pennsylvania street, has not yet obtained a complete stock of Columbia graphophones, but it is prepared to make sales of the new line of machines to be handled by this house. The company continues to handle the Victor line of talking machines.

The Stewart Talking Machine Co., 221 North Pennsylvania street, jobbers in Indiana for the Victor Co., is experiencing one of the best seasons in the history of the house. It has been necessary for the Stewart Co. to put another salesman on the road in Indiana. The traveling representatives of the house in Indiana are W. M. English and H. L. Prescott.

The Victor houses here are paving the way for the Ona B. Talbot-John McCormack concert to be given here October 29. McCormack records are very popular in Indianapolis, and the announcement that he will appear here soon in concert has increased the demands for his records.

The Kipp-Link Phonograph Co., 345 Massachusetts avenue, jobbers in the Central West for the Edison line of talking machines, is redecorating its display rooms in preparation for what the company expects will be the biggest year in its history. Demand for the Edison line among the Edison dealers of Indiana and neighboring States is enormous, according to Walter Kipp, president of the company. Mr. Kipp says the indications are that his house "will have to go some" to fill the orders. The Edison disc machine has made quite

a hit in Indiana. Comment on the superior tone of the new disc machine is often heard.

Surprise was caused here by the leaving of Thomas Devine for Kansas City, Mo., where he will be connected with the Columbia Graphophone Co.'s branch in that city. Mr. Devine was well known as local manager of the Columbia Co. He was in Indianapolis for approximately eight years. In his new position Mr. Devine will spend most of his time on the road covering the State of Oklahoma for the Columbia Co.

A. W. Roos, manager of the local Columbia branch, says the records show that business in September of this year was much better than it was in the same month of last year.

CLOSE TO THE BUSINESS HUB.

American Talking Machine Co., Brooklyn, Well Located for Convenient and Quick Service—General Business Outlook Excellent.

Quite in the center of things as to transportation are the headquarters of the American Talking Machine Co., the prominent Victor distributors, at 368 Livingston street, Brooklyn.

The name Brooklyn has a very off-sound to many dealers and others in the metropolitan district, but there are few concerns in the trade so well located with reference to the business centers of northern New Jersey, New York proper and Long Island as the American Co.

A minute from the door brings one to the Interborough Subway running direct to the heart of Manhattan and the Bronx. A quick change at Fulton street and one can take the Hudson tube to Jersey City, Hoboken or Newark, the whole trip taking less than one-half hour. One block from the store—Flatbush avenue and Fulton street—is one of the centers of an extensive elevated system of Brooklyn Borough, with many trains running directly over the bridges to Manhattan. Two minutes' walk in the opposite direction takes one to the Flatbush avenue terminal of the Long Island Railroad, with trains running direct to all points on Long Island and direct freight service, in connection with the Pennsylvania Railroad, to all parts of the country.

The wholesaling of talking machines, quick delivery on rush orders, is the most important feature, and at its present location the American Talking Machine Co. is in a position to render that service.

Under the direction of R. H. Morris, head of the company, the store has been remodeled recently to permit of increased stock and shipping facilities. The three demonstration booths have been moved to the front of the store, leaving the entire rear section free for use in handling orders. The new arrangement takes advantage of considerable space that was formerly wasted. Mr. Morris states that the outlook for fall and holiday trade is excellent. The stocks of Victor machines and records are in excellent shape, which means that an unusual percentage of orders may be filled. Dealers have shown an inclination to file their orders considerably in advance to insure sufficient stock when the expected rush comes, and at the present time there is apparently not a cloud on the business horizon.

FROM OUR EUROPEAN HEADQUARTERS

2 GRESHAM BUILDING, BASINGHALL STREET E. C., LONDON, W. LIONEL STURDY, MANAGER.

European War Affecting Trade Throughout World—Confidence Being Re-established in England—Volume of Trade Is Satisfactory Everything Considered—British Firms Reaping Rich Harvests of Sales in Colonies—Some "War" News—Supplies Rather Short—Patriotic Records the Vogue Just Now—Warships Discarding Pianos in Favor of Talking Machines—The News of the Month.

(Special to The Talking Machine World.)

LONDON, E. C., Eng., October 6.—With the efflux of time, it is perhaps not very surprising to find that the adverse influence of the great European struggle is affecting general trade the wide world over to a very appreciable extent. The sword has spiked the wheel of international commerce, and naturally has produced a certain amount of dislocation between even those countries not involved in this upheaval.

There are not wanting good signs, however, which tend to re-establish confidence, in that the overseas trade is now increasing and settling down to something like satisfactory proportions, all things considered. At least that is the view which prevails among business men on this side. Not that trade is really satisfactory compared with normal times, but the general relief at being able to do some business despite the war, is productive of great optimism which, perhaps, lends itself to slight exaggeration. Given the quick suppression of elements detrimental to shipping, i.e., the capture of the few enemy cruisers which are prowling around, the springs of commerce will immediately expand into new life. As it is, we are not doing so badly under the many adverse circumstances. (The foregoing remarks which concern trade generally do not exclude the gramophone industry.)

The export door of the whole Continental markets being "bolted and barred," British firms are reaping quite a rich harvest of sales in many of our daughter States. Our manufacturers are out for business, and they mean to take every advantage of the grand opportunity now presented to offset for all time the German claim to pre-dominance in the gramophone field of industry.

British Made Gramophone Goods.

As an instance of the awakening (ours admittedly has been a long sleep) of gramophone men to the possibilities of manufacturing gramophones in England, I would mention W. H. Reynolds, "the man of many parts," and known telegraphically under the pertinent synonym of "Knotaslepe," who has now made arrangements for the manufacture of motors, and other parts. This will be the first time that a commercial all-British motor has been built with any chance of competing with the Continental makes. There is no need to en-

large upon the evident difficulties which beset the path of development in this particular sphere of trade activity, but rather to pay tribute to the enterprise and enthusiasm with which the matter is being handled in so highly satisfactory a manner. It is no mean thing to establish at such short notice what may be regarded from our standpoint as a new industry, whose manufacturing interests have at least not been cultivated hitherto on this side of the channel. We can but assure Mr. Reynolds that his progress will be keenly watched by the whole trade, who we feel will not be slow to accord his efforts every legitimate support.

Gramophone Co., Ltd., Remove to Factory.

Having placed the whole of its City Road premises at the disposal of the military authorities, the Gramophone Co., Ltd., has now removed to the great factory at Hayes, Middlesex, where in future all communications must be addressed. The London sales department is located at 94 Regent street, W.

J. E. Hough's Generosity.

From the old Edison Bell firm I learn that J. E. Hough is offering all bachelor-members of the staff who join the army a bonus of two guineas, with re-employment after the war. Some fifteen "velvet faces" are now under arms.

Gramophones Replace Pianos.

Pianos, I learn, have been thrown overboard from many of our warships in the North Sea, but most have retained their gramophones; truly, the king of instruments! In this connection a recent appeal for old records brings to light another thoughtful action on the part of J. E. Hough. "Old" records for our sailors—No! And straightway this bluff trade veteran submits a plan for the supply of "new" records in 200 parcels of twenty-four each, and is willing to send 500 parcels if required. Further, when the records are worn out, thanks to Mr. Hough's practical and generous offer, the sailors may change them for new ones free of any charge. The British Admiralty accepted this offer out of a round dozen placed for its consideration.

That Famous Marching Song.

"It's a Long Way to Tipperary," the marching, if not the battle song of our troops, was first issued some two years ago. Messrs. Feldman, the publishers, inform me that the song was refused by practically every publisher in London. The sheet music sales are now said to be about 8,000 daily! Special editions are now ready for the Canadian and Australian markets.

Some War Items.

Capt. S. W. Dixon, an "H. M. V." director, who saw service in the South African war, has again been commissioned for the front, where doubtless he is now taking an active part in the fighting line.

Seventy per cent. of the Russian "H. M. V." staff are on active service, and the manager and staff of the Paris branch are with the French forces. Quite a number of the Hayes employes are with the British colors.

A splendid war program is announced by the Winner Record Co., the all-British gramophone house, who intimate that the whole profits on the sale of these special records will be handed to the Prince of Wales' National Fund. This generous plan insures a continuity of work for the Winner staff, while at the same time providing a substantial margin of monetary assistance for those in distress. Most excellent!

"Regal" patriotic records are in great demand. A small royalty on the sale of each one is allotted to the Prince of Wales' fund, which in consequence has benefited to the extent of 150 guineas already.

In a brief account concerning the naval fight in the Heligoland Bight, an A. B. describes the flight of German shells as "whistling just like a needle on a broken record." A good yarn, surely!

The mere fact of war does not destroy copyright conferred upon the works of an alien enemy in accordance with the provisions of the Berlin copyright convention of 1908, and the Austro-Hungarian copyright convention of 1893.—Mr. Runciman, in the House of Commons.

In a recent statement the Sound Recording Co., Ltd., makers of the Gramavox records, give publicity to the fact that these products are British made, financed, and controlled by Englishmen.

Statements have been made to me that certain people have stamped "Made in England" on goods of distinctly German origin. Is there any confirmation?

In furtherance of the war upon German and Austrian trade, the Commercial Intelligence Branch of the Board of Trade, Basinghall street, London, E. C., has issued a number of trade leaflets giving the export figures of these two countries. Leaflet No. 42 deals with musical instruments and parts thereof. It makes interesting reading matter and copies may be obtained upon application.

Supplies Are Getting Short.

Supplies are getting short on motors, tone-arms, sound boxes and trumpets. The Continental service is of no account, unless we place some reliance on the Swiss manufacturers, who, it is true, promise deliveries shortly. But—hurry up British manufacturers!

Annual Report of Gramophone Co.

According to a financial contemporary, the profits of the Gramophone Co., Ltd., for the fiscal year ended June 30 last are £138,186, an increase over the previous year of £37,332. Considering the

FROM OUR LONDON HEADQUARTERS—(Continued from page 51).

general meeting Trebor Williams stated that immediately prior to the outbreak of the war their business was in a very satisfactory state. It had been felt advisable to make special provision to the amount of £42,380 against foreign debtors, that figure having been arrived at on a basis of percentages, varying according to the different countries concerned. The amount might turn out to be either largely under-estimated or largely over-estimated. When the war broke out the bulk of the company's business on the Continent came to an abrupt and complete standstill, and where their business did not cease altogether, it very much decreased. With regard to what was happening to their interests in Germany and Austria, they had but little information of value. As to other countries, arrangements were being made for carrying on the business, protecting the assets, and for ultimately resuming operations on normal lines. In some countries and in the colonies, for the time

being, business was fairly good. In great Britain there was a strong, and, we understood, an increasing demand for records, more particularly for those of the patriotic song description. As long as the existing state of affairs continued it would be impossible for the company to earn profits for dividend purposes, and the discontinuance of quarterly interim dividends followed as a matter of common prudence, if not of actual necessity.

J. Hoffay in New York.

Just prior to posting my monthly packet of news, I learn that J. Hoffay is planning a trip to New York, and expects to arrive about the middle of October. The chief object of his visit is to make arrangements for the manufacture and distribution of "The World's Musical Instrument," which by the way, I have at last been privileged to examine. Only the exigencies of time prevent me from expressing my views at the moment, but on a near future occasion I shall hope to furnish read-

ers with a full description of this new and pre-eminently fine musical instrument. For the present let it suffice to say that for really natural tone-pictures, commend me to Mr. Hoffay's gramophone in conjunction with records of all makes.

Call for Patriotic Records.

Very optimistic in regard to trade prospects, O. Ruhl, of the Beka Record Co., this city, imparts the pleasing information that notwithstanding the war, record sales, of the patriotic type especially, continue to maintain a good showing, and he thinks there is every prospect of their Hertford factory being kept working practically on full time during the next few months, at least.

Columbia News Items.

The Columbia Co. draws particular attention to the new model of its No. 14 hornless graphophone announced for this season. As there is certain to be a rush for a reliable low priced

model in view of war conditions, this 52s. 6d. line should be in heavy demand. It embodies many improvements over previous machines at this price.

Two members of the staff of the London headquarters of the Columbia Graphophone Co. have rejoined their old regiments for active service. A third Columbia man, Harry E. Parker, an Englishman in the New York office of the company, was so keen upon serving his country that he obtained leave of absence and is now at the front.

The Columbia Co. has just issued its 1914-1915 catalog of Columbia graphophones and gramophones. We notice that, in addition to several new models, many improvements have been effected in existing styles, all the horn types from No. 2 (£4 4s.) upward now being equipped with twelve-inch turntables as against ten-inch turntables of last season—a raising of value that will win general approval.

Wholesale Gramophone Depot.

A somewhat serious fire, which originated in the premises of an artificial flower maker at the rear, involved a large gramophone warehouse at 150 Old street, this city, in the possession of Dayton & Co. Considerable damage was caused by fire, smoke and water to the huge stocks of talking machine goods stored on the premises. Over 18,000 Clarion and 100,000 or more Edison cylinder records were rendered unsalable. Fortunately, the damage is fully covered by insurance.

To Start in Business for Himself.

After two years' service with Blum & Co., J. Lewis Young, B.Sc., etc., informs us of his intention to start business on his own account. As one of the talking machine trade pioneers in Europe, his unique experience, covering every phase of the business, should prove of great value in his new sphere of activity, for the success of which we beg to offer our hearty good wishes. Mr. Young tells us he is open to consider any proposition for either manufacturing or selling, or as consulting expert.

The Latest Patriotic Favorite Records.

The Utility Trading Co. is to be commended for

Merely A Statement of Fact

The British Colonies and dependencies import annually many thousands of pounds' worth of gramophone products, a large percentage of which emanated from Germany.

Now that this source of supply is cut off, who is going to fill the breach?

This question must give British houses food for profitable thought.

But the opportunity for action is not tomorrow or the day after, it is Now!

The trade routes are open and we venture to think will so remain.

You can get into touch with overseas buyers through the medium of this trade newspaper, which enjoys a wide sale throughout the world.

Particulars and advertising rates will be gladly supplied to all interested by our European representative.

W. LIONEL STURDY

2 Gresham Buildings

Basinghall St., London, E. C.

the prompt issue of another list of patriotic numbers, which class of record the great talking machine public still continue to absorb in ever-increasing quantities. According to the standard demand, these new "favorites" will exactly fill the bill, and doubtless prove as popular from a sales standpoint as those issued last month. A few typical examples worthy of mention are (736), "La Brabanconne," and "March of the Victors," pleasingly rendered by the Favorite Bijou Orchestra; (738), "Your King and Country Need You," the latest recruiting song, with which is coupled a fitting companion bearing the title, "I'd Like to Be a Hero, Too," both songs being delivered in fine style by Thomas Howell. "It's a Long Way to Tipperary," is told by that favorite vocalist, Harry Core, on record No. 740, the reverse bearing a spirited xylophone solo, "The Islander March," by our old friend, Billy Whitlock. On record 741 the Favorite Elite Orchestra presents an excellent descriptive tone-picture of "Our Expeditionary Force Landing in France," and this, coupled with the "Punjaub March" by the same

instrumental organization, goes to the making of what is an especially attractive record.

Suspension of British Patents Held by Enemy.

Apropos of the above, the following rules are now in force:

(a) A notice will be sent to the patentee's address for service and to any licensee before action for suspension of license be heard.

(b) Notice of application for suspension of license will be advertised in the Official Patents Journal.

(c) There will be a short opposition period, and a date for hearing will be advertised in the journal, and at such a hearing a representative of the patentee or licensee will be entitled to be heard against the grant of such suspension of license.

(d) Applications made by individuals in respect of the same patent will be heard, as far as possible, together, and it will depend upon circumstances whether the license will be exclusive or not.

Loyal Edison Bell Velvet Faces.

Of the many so-called war lists, that announced by J. E. Hough, Ltd., makers of the renowned Edison Bell "Velvet Face" records, occupies a very prominent position in the estimation of all good Britishers, and with good reason, too. "V. F.s" are of home manufacture throughout, financed and controlled by Englishmen, at the head of whom we have J. E. Hough, as typical a specimen of the John Bull type as one could desire. But that in passing. Of unusual interest is the company's stirring patriotic repertoire of vocal and instrumental music, covering every shade and type of selection, both old and new. The British, French, Russian and Belgian national anthems bulk largely in the most recent list, on which, too, is itemized such popular airs as "Tommy Atkins," "The Lads in Navy Blue," "Sons of the Sea," "Soldiers of the King," "Jack's the Boy," "The Anchor's Weighed," "Here's to the Day," etc. "Boys in Khaki, Boys in Blue," in companionship with the specially composed recruiting song, "Your King and Country Need You," on No. 1414, should be heavily ordered, since if the demand in England is any criterion, and we believe it is, this record is sure to be popular in all British dependencies. Among descriptive records No. 1409 offers a striking presentation of the "Landing of the British Army in France," in two parts, and we should advise our Colonial readers to cable for

TO DRUM UP TRADE FOR U. S.

Commercial Attaches Named by Secretary of Commerce Redfield.

(Special to The Talking Machine World.)

WASHINGTON, D. C., October 7.—The Department of Commerce has announced the personnel of the corps of commercial attaches provided for by Congress to help drum up business for the United States and to keep our commercial interests in touch with all parts of the world.

These are the attaches selected by Secretary Redfield: A. J. Harrington, of Ohio, for Lima, Peru; A. H. Baldwin, ex-chief of the Bureau of Foreign and Domestic Commerce, for London; Dr. Albert Hale, of the Pan-American Union, for Argentina; Edwin W. Thompson, of North Carolina, for Berlin; J. H. Arnold, at present consul-general at Hankow, for China; Prof. Lincoln Hutchinson, of the University of California, for Rio de Janeiro; C. W. Veditz, of Pennsylvania, for Paris.

SOMEWHAT SARCASTIC.

Some of us are so accustomed to looking out for number one that we get positively nearsighted.

The accompanying picture showing Mr. and Mrs. Cromelin in their motor car was snapped at Folkestone, England, by Mortimer D. Easton, manager of Dictaphone advertising, on the occasion of his recent honeymoon trip abroad. Mrs. Easton is seen standing by the side of the automobile, while Mr. Easton is, of course, invisible. Mr. and Mrs. Easton enjoyed a delightful trip by automobile while the guests of Mr. and Mrs. Cromelin.

WANTS MOTOR AND DIAPHRAGMS.

A merchant in Spain has notified an American consular officer that he is desirous of establishing relations with an American house manufacturing small motors, diaphragms and other accessories of talking machines. Catalogs and price lists of the goods in question are earnestly solicited. Correspondence should be in Spanish, and firms interested in this inquiry should address the Bureau of Foreign Trade Opportunities, Department of Commerce, Washington, D. C., referring to No. 13,801.

Edward A. Borgum is now the southern California representative of the Pacific Phonograph Co., of San Francisco, his headquarters being in Los Angeles.

FALL IN WISCONSIN OPENS WITH A RUSH.

The Smaller Cities and Towns Show Great Activity—Milwaukee Not Quite as Satisfactory—Victrola Display at Pure Food Show—Becker's Plan of Pushing Sales—Talking Machines for Downer College—Kunde's New Quarters Ready—News of Month.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., October 10.—The fall talking machine trade in Milwaukee and about Wisconsin has opened with a rush, considerably earlier than in former years. Conditions about the State have been showing considerable improvement and dealers seem to have been imbued with more confidence. Stocks in the hands of the average dealer have been light during the past few months and most retailers have come to the realization that now is the time to place their orders if they want to insure their prompt fulfilment. Jobbers say that dealers are placing good orders for both machines and records and that the outlook is bright for a continuance of this activity.

Conditions in Milwaukee, especially in the retail field, are hardly as satisfactory as in the smaller cities and towns about Wisconsin. This seems to be due to the fact that business with the heavy producing machinery concerns is still a little quiet, with many of these plants operating only part time. The result is that people in Milwaukee are not buying as freely as they might. This condition is regarded as only temporary, however, and better things are anticipated. As it is, the demand for high-priced machines seems to be holding up well, although the more moderate priced machines, such as the average working man might purchase, are moving slowly. In the country, however, the situation is different. Unusually fine crops have been harvested and are now being sold at high prices, with the result that there is more prosperity evident.

Milwaukee dealers say that collections have been a little quiet of late, but this is not to be wondered at in view of the depression which has existed in some lines of business. Jobbers say that they are finding little trouble with collections, showing that money is easier outside of Milwaukee.

The Victrola was well advertised at the annual Pure Food Show, held in the Milwaukee Auditorium, September 27 to October 3, as the result of an interesting exhibit maintained by the J. B. Bradford Piano Co., Milwaukee's oldest piano

house. The Bradford concern had two large adjoining booths at the show, filled with representative instruments carried, including an Auxetophone and a large type Victrola. Hugh W. Randall, manager of the Bradford player department, reports that the house secured a large number of live prospects. Between 10,000 and 15,000 people attended the show each day, and none of them failed to see the Bradford exhibit.

A sale of considerable interest was made recently by Paul A. Seeger, manager of the Victrola department at the Edmund Gram Piano House, when he disposed of a Style XI Victrola to Milwaukee Downer College, a well-known educational institution, for installation in the college seminary. The college uses a Victor for class demonstration purposes, and this machine has given such satisfaction that only the Victrola was considered for the seminary. Business at the Gram house has been showing considerable improvement of late.

John H. Becker, manager of the Victrola department of the Hoefler Piano Manufacturing Co., 306-308 West Water street, has evolved a plan for pushing the sale of records that every talking machine man might do well to follow. Mr. Becker's scheme consists of a one-page circular, printed in red ink, giving the number and title of some of the best Victor records issued this year, classified according to months. Naturally, more space was devoted to the October list. Mr. Becker says that this circular more than paid for itself the first day that it got into the hands of Victor owners. Mr. Becker intends to follow this plan each month from now on. Mr. Becker's wife, who has been very ill during the past two months, is again showing some improvement, and it is expected that she will soon be able to return from the hospital to her home. Mrs. Becker submitted to a second operation about three weeks ago.

Harry Fitzpatrick, traveling representative of the Victor Talking Machine Co. in this territory; D. C. Preston and Roy J. Keith, of the Talking Machine Co. of Chicago; H. P. Gibbs, of the Rudolph Wurlitzer Co., and Mr. Mahler, of Lyon & Healy, of Chicago, recently called upon the Milwaukee trade. All these representatives report that the fall business has opened up unusually well.

A steadily increasing demand for the Edison disc machines is reported by William A. Schmidt, general manager of the Phonograph Co., of Milwaukee, jobber in Wisconsin and upper Michigan for the Edison line. Several new dealers to handle the Edison disc goods have been secured during the past month. William Idle, traveler for the Thomas A. Edison, Inc., has been finding conditions about Wisconsin very favorable.

The new Badger Talking Machine Co., of Milwaukee, jobber in this territory for the Victor line,

has extended its field of operations and has appointed Morely Somers, an experienced talking machine man, as Northwestern representative. Mr. Somers will make his headquarters in Minneapolis and St. Paul, and will pay particular attention to the trade in those cities. Harry A. Goldsmith, secretary of the Badger Co., reports that the Victor business is opening up exceptionally well and that his house has secured several new dealers during the past month.

A. G. Kunde, Columbia jobber and dealer, expects to be ready to open in his new and attractive store in the new building now being erected at Grand avenue and Fifth street by October 15. Some little delay has been experienced in completing the interior work in the building. Mr. Kunde will have eight demonstration parlors on the first floor and four in the basement, and expects to have one of the finest retail talking machine establishments in Milwaukee. Mr. Kunde will have his former address, 516 Grand avenue.

Victor sales at Gimbel Bros.' store have been climbing to a high mark for the month of October. L. C. Parker, manager of the Victor and piano departments, looks for business to be good for the remainder of the year.

The Gensch-Smith Co., 730 Grand avenue, has been finding the Victor business so good of late that it has been thinking seriously of securing additional quarters.

EDWARD D. EASTON'S VIEWS.

In connection with a series of interesting business articles appearing in recent issues of *Printers' Ink*, Edward D. Easton, president of the Columbia Graphophone Co., wrote that publication as follows:

"I am very much interested in the article in your issue of September 10 under the heading 'How Advertisers Are Meeting the Present Situation.'

"This is an easy time to lose sales. All you have to do is to float down the stream with the calamity shouters, agree that it is impossible to get business, and let things drift.

"It is the policy of our company at such a time to increase our advertising appropriation substantially and put on more pressure in every department of the selling organization.

"We are working out a program which we are sure will give us, instead of a falling off, greater sales and greater interest in graphophones and records than ever before.

EDWARD D. EASTON."

ENTERPRISING VICTOR DEALERS.

Epstein & Berdy, with Stores in New York and Brooklyn, Install New Equipment to Take Care of Growing Demands.

Epstein & Berdy, who conduct talking machine stores at 2977 Third avenue, New York City, and 1198 Fulton street, Brooklyn, are to be included among the progressive and promising retail repre-

Epstein & Berdy's Attractive Quarters.

sentatives of the Victor line in Greater New York.

By hard work, perseverance and mastery of the many details of store management, these gentlemen have built up a profitable business for both stores, and as proof of the manner in which they have won the confidence of their customers in Brooklyn, especially, it was necessary recently for them to install two additional demonstrating booths in their Fulton street store. There are now five booths in the store and they are all needed to take care of the demands.

Since taking over the business about a year ago, the firm has spent a tidy sum in rearranging the show windows, installing new booths and interior decorative work, but according to Mr. Epstein, the expense was more than covered by the profits from last winter's business.

THE PHONOGRAPH AS AN EDUCATOR.

The influence of the talking machine as a musical educator was demonstrated recently in Mari-

nette, Wis., when an Edison disc phonograph which was presented to the Public Library of that town by a wealthy citizen was utilized for the purpose of entertaining pupils in the public schools. Daily recitals were given. The librarian, Miss McCarthy, recently entertained the pupils of the fifth grade of the local schools, and asked them to express their appreciation in writing, with the result that there were some very novel and interesting essays on the merits of the Edison disc phonograph, and effusive admiration

expressed for Thomas A. Edison, its inventor. Everyone seemed to be impressed not merely with the delightful music they heard, but the history of each record was explained to them by the librarian so fully that it made a lasting impression on their minds.

INCORPORATED.

The Tri-State Talking Machine Co., El Paso, Tex., has been incorporated by J. M. Spain, W. C. Walz and H. T. Walz.

RECEIVE THE GRAND PRIZE.

Tenshodo, Who Handles the Columbia Line in Tokyo, Awarded High Honors at the Tokyo Taisho Exposition—His Courteous Announcement of the Receipt of the Award.

The Columbia Graphophone Co. received last week a communication from Tenshodo, its dealer in Tokyo, Japan, wherein this successful merchant calls attention to several important honors he received at the Tokyo Taisho Exhibition, an annual event which is looked forward to with keen interest by merchants in Japan. It is indicative of the popularity of the Columbia products in the land of Nippon that Tenshodo was awarded the Grand Prix, an unheard of honor heretofore.

Written in the courteous phraseology of the Orient, this letter reads:

"We take this opportunity to announce you of honors we received at the Tokyo Taisho Exposition, which has just been closed. When T. I. M. the Emperor and Empress visited the exhibition, their Majesties were pleased to purchase some of our exhibits. We deem this the unique honor conferred on us. It is our greatest pleasure to inform you in this connection that we have been awarded the Grand Prix at the exhibition—such honor as never given to any of our fellow exhibitors. These have undoubtedly promoted our credit and reputation, which we attribute to your favors in the past. Begging you will continue to honor us with your patronage, We remain, Ever truly yours,
(Signed) "TENSHODO."

ELECTED VICE-PRESIDENT.

E. E. Robinson, formerly connected with the export department of the Columbia Graphophone Co. as a traveler, has been elected vice-president and general manager of the Grafonola Co., Rochester, N. Y., a prominent dealer in Columbia products with a large and growing business. Mr. Robinson, who has made extensive travels through South America, the Orient and to Cuba in the interests of the Columbia Co., is certainly well qualified to achieve success in his new position.

BENJ. SWITKY NOW WHOLESALING EXCLUSIVELY.

Well-known Victor Distributer, in Interview, Explains the Reasons for His New Business Departure—Reviews Some Trade Conditions—Occupies Commodious New Quarters in Carlisle Building, 19-25 East 24th Street, New York—Enjoys Modern Equipment.

Some months ago Benj. Switky, the well-known Victor distributor, announced at a meeting of the talking machine dealers that he planned to give up his retail business and devote himself to jobbing exclusively, so that he would not compete with the dealers in their own field. Last month Mr. Switky advertised for sale, and disposed of, his retail business, and secured new wholesale quarters in the Carlisle Building, 19-25 East Twenty-fourth street, New York. In this issue of The Talking Machine World, Mr. Switky makes the formal announcement of his new move.

In commenting upon his new and radical movement, in an interview with a representative of The World, Mr. Switky offered some interesting views bearing on the talking machine business, both past and present, and said, in reference to his retirement from the retail field:

"In my opinion, the time is coming when the dealer will discriminate against the jobber who does a retail business and, I believe, rightly so.

"The jobber who caters to retail trade comes into direct competition with many of his own dealers. He finds himself in an embarrassing and illogical position. He is constantly being accused of bad faith by the dealer, no matter how conscientious the jobber may be, and no matter how strong his profession of loyalty.

"Years ago, when the first types of talking machines were manufactured, it was a serious problem how to market the output. One manufacturer sold his wares through canvassers sent out from a central office. Another manufacturer gave certain territorial rights to individuals or firms, based on the size of the initial order or an agreement to purchase a certain number of machines within a given time. Still another manufacturer would market his product through department stores and individuals—dividing them into two classes, known as jobbers and dealers. Dealers in turn were subdivided into two classes, with different discounts, based on the size of their initial order.

"In the early days it was not necessary for a jobber to job. It was his privilege to refuse to sell to the trade. The jobbing discount was given in consideration of the size of his initial order.

"Later it became necessary for the jobber to purchase a minimum amount annually in order to retain the jobbers' discount. It was then that certain so-called jobbers began to look around for wholesale business. Thus it will be seen that originally the retail end of a jobber's business appealed to him most.

"When a progressive dealer found his purchases running quite high, it was natural for him to try to get jobbers' prices so as to increase the profit on his retail business. This accounts for the existence of many big retailers who, while enjoying jobbers' discounts, make no pretence to pose as

distributers in the proper sense of the word.

"But with the wonderful growth of the talking machine business, together with the determination of the manufacturers to limit the number of distributers, many of us found the wholesale business growing faster than the retail.

"In my opinion, the jobber must now choose between the wholesale and the retail. He cannot have both. The dealer is no longer satisfied to take the jobber's overflow stock, nor is he satisfied to share with the jobber; in fact, he feels that the jobber should place all his stock at the dealer's disposal. During the past two or three years, when machines and records have been short at times, the dealer has felt that the jobber had no right to make a retail sale until after he had supplied all the needs of his dealers.

"The dealer often looks with suspicion and disapproval upon the distributer who increases the number of his sound-proof rooms so as to cater to increased retail trade. It is hard to make him believe that the jobber's beautiful and expensive retail department will be sacrificed during the holiday shortage. The jobber may make the sacrifice, but the dealer will not believe him.

"The dealer has a right to insist on clean goods that have not been handled by the retail department of the jobber.

"The dealer has a right to insist that the jobber shall not use his extra discount nor his standing as a wholesaler unfairly to compete with him in advertising for retail business.

"The dealer has a right to insist that the jobber shall not compete with him in the instalment business, because the difference in discount makes the competition unequal.

"I am happy to be able to-day to fulfil the promise made to the Eastern Dealers' Association some time ago—that I would give up the retail just as soon as I could rearrange my affairs.

"I have given up a profitable retail business, one that represents eleven years of untiring effort. I have sacrificed retail profit for wholesale principle, confident that my course will meet with the approval and support of every dealer."

Mr. Switky's new quarters in the Carlisle Building are commodious, convenient and attractive and take up the entire fourth floor of the building with 7,500 square feet of floor space. The arrangement and equipment is most modern in every respect, with an abundance of light on all sides, three passenger and two freight elevators, and even shower baths on the roof and running ice-water on all floors for the convenience of the tenants. With such facilities on a hot summer day, Coney, the seashore, loses its charm. Strictly fireproof construction and an elaborate sprinkler system protects against loss by fire and the consequent delays that follow and also provides

NYOIL

For polishing
varnished woodwork it is
extremely satisfactory. No oil is so clean.

Ask your watch repairer whose
oil he uses on your watch.

for about the lowest insurance rate in the city.

The floor is divided into two sections. The front half is given over to a completely equipped repair shop, under the competent management of A. H. Dodin, and to the stock of machines, while the rear section is divided into a record storage room, with the alleys enjoying natural light, packing and the shipping department, Mr. Switky's private office and the general offices and a large and handsomely furnished display room, where the dealers can come to select stock and also bring their customers. The display room is shut off so that the dealer and his customer may enjoy strict privacy while testing and selecting the desired machines or records. It is Mr. Switky's plan, also, to hold occasional classes in machine repairing for the dealers and their salesmen, where the retailers may learn how to make minor repairs and adjustments at times when it is not convenient to send the machines to a repair shop. In other words, in the new quarters service will be a fact rather than a promise.

The work of moving the stock took place during the week ended October 3 and on the morning of October 5 the new Switky quarters were settled and ready for business.

JOHN A. ALSEN ILL.

Members of the talking machine trade will be sorry to learn of the serious illness of John A. Alsen, head of the talking machine department at George Lincoln Parker's piano warerooms in the Colonial building, Boston. Mr. Alsen is threatened with typhoid fever.

No two things in the world seem further apart than the artistic temperament and a bank account.

Columbia Graphophone Company
Woolworth Building, New York

OPTIMISM HOLDS SWAY IN CINCINNATI TRADE.

New and Larger Quarters for the Phonograph Co.—Aeolian Co. Adds Columbia Line—J. Shillito to Handle Talkers—The Wurlitzer Co. and the Aeolian Co. Make Encouraging Trade Reports—Cable Company's New Victor Department Opened—Late News.

(Special to The Talking Machine World.)

CINCINNATI, O., October 8.—The local branch of the Phonograph Co., of Cleveland, which looks after much of the territory in this section of the country, is going to take quarters in the sixth floor of the Globe-Wernicke building, on East Fourth street. This is directly opposite the Rudolph Wurlitzer Co. The move, which has not yet been publicly announced, will be made between now and November 1. It is no secret that the change will be hailed with delight by the dealers of Edison machines in Cincinnati for the distributor has been making cash sales and expects to continue to do so, but the new location will not be as prominent as of old. The branch was opened last fall and under the direction of A. C. Peterson numerous agencies have been established in the Ohio valley.

One of the big surprises of the past month and the season for that matter, was the announcement that the Aeolian Co. would handle the complete Columbia line as well as the Victor. The first impression was that the local house would dispose of the Victor line, but such is not the case. The Cincinnati branch, not being a distributor, can handle both lines. The Columbia Graphophone Co.'s September report to headquarters received a most handsome boost through the Aeolian order.

Considerable interest prevails as to which line will be handled by the new music department of the John Shillito Co. The first impression was that the Columbia had the inside track. The status somewhat remains unchanged. The booths have been ordered. Edwin Holt, of the Aeolian Co. resigned this week to become the assistant manager of the new Shillito department.

The Grafonola Co., of Cleveland, last week was authorized by the Secretary of State to increase its capitalization from \$15,000 to \$25,000.

Manager Stotler, of the Milner Musical Co., has returned from a fishing trip in Wisconsin. The journey was noted for the number of rainy days.

Manager Dittich, of the talking machine department of the Rudolph Wurlitzer Co., gives the following summary of local conditions:

"The month of September continued the good record of August, and in consideration of conditions prevailing, the result showed very good indeed. While the wholesale conditions do not seem to be uniformly good, still there are enough dealers who are doing an exceptionally large business to bring up the volume of trade to the required amount, to make a most satisfactory volume. The Victrola is constantly increasing in popularity and the establishment of new agencies has

apparently aided very materially, in increasing both the volume of the sales and the prestige of the article. Our files show a constantly increasing number of record buyers, and that part of the business alone without taking into consideration the machine end of the business, had very flattering prospects.

Manager Whelen, of the local Columbia store, when asked about conditions of the present day, said: "Well, we did not have as good a retail month as we would like to have had, but we more than held our own. Wholesale business, however, was on the boom, and we closed up with one of the largest months we have had this year. This goes to show that the dealers are preparing for a large fall and winter business, and they are getting ready to meet the demand. In this line of progress the Aeolian Co., one of the oldest piano houses in the country will carry a complete line of Columbia machines and records in all its stores, including Cincinnati and Dayton. We are optimistic about the talking machine business, despite the war, and when the year is closed up we expect to far exceed last year."

W. S. Givler, traveling man for the local Columbia store, has just come in from a successful trip through the territory, and reports conditions good. He turned in a large number of orders for immediate shipment and a "big bunch" for future delivery.

The Cable Company's new Victor department, which was opened on Saturday, has met with considerable success. Wholesale Manager Sumney is well pleased with this new avenue of business.

TALKING MACHINE EXPORTS.

The Figures for July and August Presented—Exports Show Increase for the Months.

(Special to The Talking Machine World.)

WASHINGTON, D. C., October 10.—In the summary of the exports and imports of the commerce of the United States for the months of July and August (the latest period for which it has been compiled), which has just been issued by the Bureau of Statistics of the Department of Commerce and Labor, the following interesting figures relating to talking machines and supplies are set forth:

The total exports of talking machines for July and August, 1914, amounted in value to \$180,878, while records and supplies for July and August, 1914, amounted in value to \$150,973.

SALE OF POOLEY CO. PROPERTY.

(Special to The Talking Machine World.)

PHILADELPHIA, PA., October 10.—The receiver for the Pooley Furniture Co., M. Weinman, announced that he will offer all the property of the company at public sale on the premises at Seventeenth street and Indiana avenue on October 14. The sale has been ordered by the court and the amount realized will be distributed among the creditors.

Many a man is so exclusive that he isn't even on speaking terms with his conscience.

COLUMBIA CO. TO RECORD SAN FRANCISCO PRIZE SONG.

"1915—San Francisco" to Be Strongly Featured in Columbia Records and by Other Means—W. S. Gray Takes a Lively Interest in the Work of the Contest Judges—Asks Public to Indicate Favorite Artists for Recording—2,000 Manuscripts Considered.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., October 6.—"1915—San Francisco," is the title of the song that won the prize in the big contest conducted by the Bulletin, of this city, and in which over 2,000 manuscripts were entered. The writers of the song, which is a snappy march, are Philip Irving Jacoby

from the talking machine public as to which of our artists would be the favorite of the public for singing this song when we make the record.

"All our artists are well known. Remember that the song is a lively march. I would like suggestions as to the artist to be sent to our offices at 334 Sutter street at the earliest moment."

"1915—San Francisco" will be sung in vaudeville throughout the West and be featured wherever possible on the Pacific Coast. With the unusual amount of publicity the song will receive, it is certain that the writers will realize an amount in royalties from publishing and mechanical rights that will prove a prize of most substantial proportions.

The judges held several meetings in the music room of the Orpheum Theater before being able to decide upon the winning song, and the accompanying illustrations show Mr. Gray standing at the piano listening to the prize song as played by E. M. Rosner, the talented musical director of the Orpheum Theater in this city.

Judges of San Francisco Prize Song Contest.

Left to right: Charles K. Field, George H. Perry, W. S. Gray, W. R. McArthur, Miss Bessie Beatty and P. H. Beck. At the piano, Charles and his brother Samuel, of 3747 Clay street, the former writing the music and the latter the words.

The judges of the contest were: George Hough Perry, publicity director of the Panama-Pacific Exposition; Edmund M. Rosner, musical director of the Orpheum Theater; Charles K. Field, editor of Sunset Magazine; W. R. McArthur, sales manager of the Eilers Music Co.; P. H. Beck, manager of the talking machine department of the Kohler & Chase Music Co.; Mrs. D. E. F. Easton, prominent club woman and experienced leader in amateur theatricals; Miss Bessie Beatty, of the Bulletin.

Walter S. Gray, Pacific Coast manager for the Columbia Graphophone Co., took particular interest in the contest, and before the prize song was selected made plans whereby it is to be recorded on Columbia records, and thus be featured throughout the country.

In order to add as much as possible to the popu-

E. M. Rosner at Piano, W. S. Gray, Standing. larity of the song, Mr. Gray made the following public request, which met with steady response:

"The Columbia Graphophone Co. realizes that this is the people's song, chosen in a popular contest. Accordingly we would welcome suggestions

from the talking machine public as to which of our artists would be the favorite of the public for singing this song when we make the record.

COMPANIES TO DISSOLVE.

(Special to The Talking Machine World.)

TRENTON, N. J., September 28.—The Edison Business Phonograph Co., capitalized at \$300,000, and the Mexican National Phonograph Co., capitalized at \$25,000, both New Jersey corporations, filed articles of dissolution with the Secretary of State to-day. Thomas A. Edison was the principal stockholder in both companies.

Harry F. Miller, a director in Thomas A. Edison, Inc., in answer to an inquiry said that the two companies had practically been owned by Mr. Edison, and that for purposes of business economy they had been dissolved so that they might be absorbed by Thomas A. Edison, Inc. All of their business, he said, would be carried on by this company.

DECLINE IN PHILIPPINE TRADE.

In an interesting article listing the imports and exports of the Philippine Islands, published in a recent issue of the Daily Consular and Trade Reports, it is pointed out that the imports of talking machines from the United States to that country for the year 1913 decreased more than 50 per cent., as compared with the figures for 1912. In 1913 the value of the phonographs imported from this country totaled only \$20,591, while in 1912 the figures reached \$43,169, indicating that this market was neglected by the American manufacturers last year.

VICTORS IN "ENGLISH BROWN."

The Victor Talking Machine Co. sent out to its dealers recently the following announcement:

"The new shade of mahogany finish known as 'English Brown' is gaining much favor generally. We have therefore decided to add this to our special finishes in styles IX, X, XI, XIV and XVI. The delivery of this finish will be subject to the usual special finish delay, but we will now accept orders through our distributors for this finish and will make a special effort to fill the first orders a little more promptly than we have been able to fill regular special finish orders in the past."

With a lot of chaps Opportunity's knock proves a knockout.

**STOP!
READ!
ACT!**

Are you interested in an attractive business proposition?

We say attractive—yes, exceptionally attractive.

We rank among the largest producers of pianos and player-pianos in the world.

There are a good many piano prospects which enter your store, Mr. Talking Machine Dealer—a good many. Why let them get by you into a regular music store?

We can tell you how to stop them and at the same time stop the dollars which get away from you when the trade leaves your store.

We have an ideal proposition for the talking machine dealer.

Take it up with us, will you? It will only require a small part of your store and practically little or no trouble.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., October 10.—PHONOGRAPH HORN. Adolph G. Soistmann, Camden, N. J. Patent No. 1,100,849.

The object of this invention is to provide a horn of wood or other fibrous material having a flaring or bell-shaped mouth. The object is to produce a horn which shall be extremely light in weight and which shall be so constructed as to maintain its shape and so that its component parts shall be held firmly together without being affected undesirably either by changes in temperature or other atmospheric conditions and also to produce a horn which shall have satisfactory acoustic properties. It seems to be well recognized in the art that the wooden horn is the most satisfactory horn for phonograph purposes both from acoustic considerations and also for considerations of appearance where different kinds of wood may be used to match other parts of the machine. It has also been found that the flaring or bell-mouthed formation is the shape of the horn which is now universally demanded, and consequently which must be supplied by successful manufacturers and dealers.

The flaring horn, made of tapered strips, requires that each tapered strip be bent in one direction to secure the circular cross-section of the

horn, while a large part of its longitudinal extension must be bent in the transverse direction to secure the flare of the horn. This double or transverse bending of a normally flat piece of wood sets up internal stress in each strip of wood, tending to cause said strips to return to their normal flat condition. This tendency, if not counteracted, would result in separation of the strips forming a horn of the bell or flaring shape.

The wooden horn which has had the most extended success up to the present time is made of a plurality of horn shaped layers, each layer composed of separate composite strips of cross-grained veneer, and the flare is made by separating the strips at the flaring end of the horn and inserting filling pieces. It has been found, however, that a much less expensive horn can be made in which the component parts will afford sufficient reinforcement to each other to overcome the internal stress above referred to, to maintain the structure in good condition and without employing separate composite strips of cross-grained veneer, and without employing filling pieces between the separated strips at the flaring end of the horn.

Referring to these drawings, Fig. 1 is a side elevation of the horn. Fig. 2 is a cross-section on line 2-2 of Fig. 1 with the rim 19 omitted. Fig. 3 is a longitudinal section on line 3-3 of Fig. 1. Fig. 4 is an elevation of the two co-operating horn shaped shells, one adapted to superimpose the other, the view showing one shell partly inserted within the other. Fig. 5 is an elevation of a tapered strip.

PHONOGRAPH. Walter H. Miller, Orange, N. J. Patent No. 1,108,208.

This invention is preferably embodied in an attachment to a phonograph of well known form which is in common use and which is normally equipped with a reproducer adapted for reproducing from a sound record the record groove of which is of constant depth and laterally undulating. The reproducer point for playing such records is

ordinarily known in the art as a "needle" and such needle and the reproducer or sound-box of which it forms a part are not adapted for playing records of other types, as for instance, the type of record in which the sound groove is vertically undulating. Records of the character last referred to, however, could be reproduced upon the phonograph without any change therein other than the substitution of a reproducer adapted for such records in place of that with which the machine is normally equipped and which carries a reproducing stylus of the needle type. In accordance with this invention a second reproducer is provided for this purpose. It is desirable that the attachment of such second or additional reproducer for the purpose of adapting the phonograph to play a different type of record shall be made as simply as possible and in particular that there be no necessity of doing machine work upon the phonograph to adapt it for the attachment of the additional reproducer, as there are large numbers of such machines of the type in the hands of users, who are not equipped to make such changes themselves and who would not go to the expense and trouble of having alterations made in their machines. The inventor has devised a means whereby an additional reproducer may be applied to such phonographs in an extremely simple manner and without the necessity of making any changes whatever in the machines now in existence beyond the simple removal of a nut and its replacement by other parts which may be furnished with the additional reproducer.

Among the objects of this invention are the provision of novel means whereby a phonograph may be adapted for the reproduction of records of different types, the making of an attachment for the purpose named in such form that it can be readily attached to the phonograph without derangement of the parts thereof and without the necessity of doing machine or similar work upon the phonograph, the provision of means whereby the sound may be conveyed either from the reproducer with which the machine was originally equipped or from the reproducer of the attachment without loss or interference, and the provision of means for supporting the additional reproducer of the attachment in inoperative position where it will be out of the way when not in use.

In the drawings forming a part of this specification, and wherein the same reference numerals are uniformly applied to designate the same parts

throughout, Fig. 1 is a fragmentary side elevational view of a phonograph of the type with which the attachment is adapted to be used, equipped with a second reproducer and embodying the invention; Fig. 2 is a view, partly in horizontal cross section, of the parts illustrated in Fig. 1, the sectional portion being taken on the broken line 2-2, Fig. 1; and Fig. 3 is a fragmentary side view similar to Fig. 1, but showing the two reproducers arranged in reverse relation from that shown in Fig. 1.

TALKING MACHINE. Clinton E. Woods, Bridgeport, Conn., assignor to American Graphophone Co., same place. Patent No. 1,108,301.

This invention relates to the sound-conveyor employed in talking machines for connecting the sound-box with the amplifying horn. This conveyor is frequently referred to in the art as a "tone-arm."

One object of the invention is to produce a tone-arm that is correctly designed, from an acoustical point of view, and with a continuous and unobstructed passageway for the sound waves from the vibrating diaphragm to the horn.

Another object is the production of a tone-arm which shall be free from vibration and free from

rattling of the parts, yet capable of universal movement.

A further object is the production of a standardized tone-arm; that is, one which can be used to equal advantage on a "visible horn" machine or a "concealed horn" machine, at the same time being simple and efficient in construction and attractive in appearance.

Fig. 1 is a side view of a portion of the so-called "tone-arm" or sound conveyer, mounted for use

with "concealed horn" talking machine so-called, showing the mounting therefor in vertical section; Fig. 2 is an end view of the same, looking from the right of Fig. 1, and partly in section; Fig. 3 is a plan view of Fig. 1, partly in horizontal section; Fig. 4 is a side view showing the tone-arm in connection with a "visible horn" machine, and Fig. 5 is a sectional view showing details.

TONE ARM FOR TALKING MACHINES. Clinton E. Woods, Bridgeport, Conn., assignor to the American Graphophone Co., same place. Patent No. 1,108,302.

The present invention relates to tone-arms for talking machines, the object of the invention being to provide a device of the character described which will permit the sound-box to have an universal movement, which will be as nearly as possible perfect acoustically and mechanically, and in which the possibility of sympathetic vibration will be reduced to a minimum. Briefly stated, these objects are attained by providing in the tone-arm a continuous, constantly expanding uninterrupted passage, to the end that the sound waves are delivered with an increased volume; and in reducing to a minimum the number of parts and uniting the

several members of the tone-arm by smooth, tight, practically frictionless joints which obviate the possibility of rattling and the introduction of any extraneous sound.

The improved tone-arm is provided with a horizontal section and a vertical section, and the horizontal section is preferably secured to the vertical section by a bayonet joint connection which is entirely concealed and thoroughly effective and durable.

The present invention is such that, while the volume of sound is increased, the size of the tone-arm is largely decreased over those heretofore employed.

Fig. 1 is a perspective view of the tone-arm; Fig. 2 is a vertical section, partly in elevation; Fig. 3 is a detail showing various coating parts separated, and Fig. 4 is a section on line 4-4 of Fig. 2.

PHONOGRAPH. Charles P. Trundy, Boston, Mass. Patent No. 1,110,165.

The present invention relates to an improvement in phonographs. In machines adapted for reproducing sounds from hill-and-dale cut records, the sound box is rigidly supported on the end of the tone tube which is fed laterally across the record as the needle point travels along the record groove. The spacing of the grooves is not always uniform with the feed of the tone tube, and provision is made for inequalities between the feed demanded by the record groove and the feed of the tone tube by mounting the needle upon the sound box in such a way as to permit slight movements of the needle support with respect to the tone tube in order that the needle may correctly adapt itself to the sound groove. Machines of the hill-and-dale type impart vertical vibrations to the reproducing needle and

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 60).

they are not, therefore, adapted to reproduce sounds from lateral cut records in which the sound vibrations are represented by lateral undulations of the sound groove. These records impart lateral vibrations to the needle point and the needle arm transmits these vibrations to the diaphragm which is mounted in position to receive the lateral vibrations imparted to it by the record through the medium of the needle and needle arm. In order to adapt the hill-and-dale machine to reproduce sounds from lateral cut records it is necessary that it be provided with a lateral cut record sound box and a flexible connection between such sound box and the tone tube.

The object of the present invention is to produce a connection tube for hill-and-dale phonographs for connecting the sound box to the tone tube so as to adapt it to use lateral cut records.

In the accompanying drawings Fig. 1 is a side elevation of a portion of a hill-and-dale machine

provided with the connection tube of the present invention; Fig. 2 is a plan of such machine, and Fig. 3 is a longitudinal section of the connecting tube between the tone tube and the sound box taken on the line 3-3 Fig. 2.

SOUND REPRODUCING MACHINE. Hyman E. Markle, Nashville, Tenn. Patent No. 1,111,716.

This invention relates to sound reproducing machines generally, but more particularly to the multiplex cylinder machine wherein are employed a series of cylinders with means to bring the cylinders successively into operative relation with the reproducer, and it is the object of the invention to improve and simplify this type of machine.

In the drawings Fig. 1 is a side elevation of a phonograph embodying the invention. Fig. 2 is a front elevation of the same. Figs. 3 and 4 are side

elevations of the castings constituting the gear housing. Figs. 5, 6, 7 and 8 are detail views. Fig. 9 is a top plan view of the carriage. Fig. 10 is a top and side view of the arch bar which supports the front of the carriage, the pawl being shown in position for assembling with said bar. Fig. 11 is a detail elevation of the trip mechanism. Fig. 12 is a detail sectional view through one of the arms of the star wheel and cylinder. Fig. 13 is a similar view of opposite star wheel and one of its hinged sections.

SOUND MODIFIER. Thomas A. Edison, Llewellyn Park, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,110,382.

This invention relates to devices for modifying or varying the volume or loudness of sound produced by a phonograph or talking machine. Such devices as commonly used comprise a metallic part, such as a butterfly valve, located at some point in the sound conveyer, which valve is opened to a greater or less extent to vary the area of cross section of the conveyer through which the sound reproducer passes. Such a device is objectionable because of the sharp angular deflection of the sound from the metallic surface. A sound modifier should be of such nature as to permit the sound vibrations to pass through the same without deflection even when the modifier is in closed position, the intensity or amplitude of the vibrations being, however, lessened by their passage through the modifier.

One of the objects of the invention accordingly is to produce an efficient and serviceable device of this character.

Fig. 1 represents a vertical central section through a talking machine provided with a modifier embodying this invention, certain parts being shown in side elevation; Fig. 2 represents on an enlarged scale partly broken away of a cross section on line 2-2 of Fig. 1; Fig. 3 is a fragmentary view showing in side elevation and section a portion of a sound conveyer provided with a modification of the sound modifier; Fig. 4 is a detail sec-

tional view showing the sound modifier of Fig. 3 on an enlarged scale; Fig. 5 represents in section another modification of the device adapted to be used in place of the modifier shown in Figs. 3 and 4, and Fig. 6 represents a partial section through a sound conveyer similar to that shown in Fig. 1, provided with a sound modifier similar to that illustrated in Figs. 3 and 4.

SIGNAL. Albert L. Maillard and Louis H. Crook, Washington, D. C. Patent No. 1,109,684.

The invention relates to signals and more particularly to that class of signals known as alarms and has for an object to provide a signal for producing the sounds of instruments and the like or for reproducing the voice.

The invention embodies more particularly a signal adapted for use on vehicles such as automobiles and the like or on motor boats and ships and wherein it is desired to provide a means whereby the voice or voices of a human being or beings can be reproduced to act as a signal, the device being also adapted for use in producing musical or other sounds.

The invention further embodies a device in which use is made of a record adapted to contain a wave line and similar in many respects to the usual phonograph record, the device being preferably electrically operated whereby, when the record is rotated, a stylus carried by a reproducer operates over the wave line to produce the desired sound.

Fig. 1 is a fragmentary side elevation of a vehicle having our device attached thereto; Fig. 2 is a vertical sectional view of the casing in which the signal is arranged, showing the various parts of the signal in side elevation; Fig. 3 is a horizontal sectional view of the casing, taken on the line 3-3 in Fig. 2, showing the various parts of the signal in plan; Fig. 4 is a vertical transverse sectional view of the casing, taken substantially on the line 4-4 in Fig. 2; Fig. 5 is a fragmentary vertical sectional view taken on the line 5-5 in Fig. 4; Fig. 6 is a fragmentary enlarged vertical sectional view of the

drum, showing the record supported thereon; Fig. 7 is a fragmentary enlarged vertical sectional view, showing the manner of supporting the reproducer in position to convey sounds through the horn; Fig. 8 is a vertical transverse sectional view, taken on the line 8-8 in Fig. 7; Fig. 9 is a diagrammatic view, showing the electrical connection for the device, and Fig. 10 is a perspective view of a modified form of circuit closing member.

BURGLAR ALARM. Alex Stahl, Chicago, Ill. Patent No. 1,111,190.

This invention relates to burglar alarms characterized by a talking machine which is started to give an alarm in the event of a window or door being opened by an intruder.

The invention has for its object to provide novel

and improved means for controlling the talking machine.

Fig. 1 is a perspective view of the apparatus, and

Fig. 2 is a cross section showing a portion of the controlling mechanism.

SOUND REPRODUCING MACHINE. Archibald S. B. Little, Nashville, Tenn. Patent No. 1,108,451.

This invention has relation to improvements in sound reproducing machines and it consists in the novel details of construction more fully set forth in the specification and pointed out in the claims.

In the drawings Fig. 1 is a side elevation of a disc sound reproducer showing the application thereto of one form of this invention; Fig. 2 is an enlarged face elevation of the invention proper; Fig. 3 is a horizontal cross section on the line 3-3 of Fig. 2; Fig. 4 is an edge view of a conventional sound-box showing a modified form of the invention; Fig. 5 is a face elevation of the lower portion of the modification shown in Fig. 4, and Fig. 6 is a sectional detail of a still

further modification.

"MADE IN AMERICA."

Corporation Formed to Promote Sale of Domestic Goods in Foreign Countries.

A nation-wide movement toward giving permanent vitality and efficient direction to the present popular agitation in favor of the home consumption of American-made goods has been launched in this city by a number of men prominent in the commercial, manufacturing and financial world. It is proposed to make "Made in America" mean for the United States what "Made in Germany" has meant for that nation.

The movement took concrete form when articles of incorporation were granted at Albany last week to the Made in America Products Association, Inc., with a nominal capital of \$10,000. The stock is to be issued in shares of \$100 each, and no person, concern, or interest will be allowed to acquire more than one share, which will be requisite for membership in the association.

The first board of directors will include C. A. Whelan, of the United Cigar Stores Co.; Carl J. Schumann, of Moller & Schumann, varnish manufacturers; Harry Tipper, president of the Advertising Men's League; R. A. Holmes, of Crofut & Knapp Co., and Henry Thompson. Temporary headquarters have been opened at 115 Broadway.

Anyone sending a sketch and description may quickly ascertain our opinion free whether an invention is probably patentable. Communications strictly confidential. HANDBOOK on Patents sent free. Oldest agency for securing patents. Patents taken through Munn & Co. receive special notice, without charge, in the Scientific American. A handsomely illustrated weekly. Largest circulation of any scientific journal. Terms, \$3 a year; four months, \$1. Sold by all newsdealers. MUNN & Co. 361 Broadway, New York. Branch Office, 625 F St., Washington, D. C.

NOW MAKING CARBOLIC ACID.

Word was received recently from the Edison plant at West Orange, N. J., that Thomas A. Edison has overcome the shortage of importations of German and English made carbolic acid, used extensively in his plant, by making successfully in the Silver Lake Chemical Works his own carbolic acid for the first time, an acid said to be superior to the imported article and produced more cheaply.

RECEIVER FOR V. J. DOYLE.

R. B. Caldwell, vice-president of the Blackman Talking Machine Co., Victor distributor, was appointed receiver recently by George R. Beach, referee in bankruptcy, in the case of Vincent J. Doyle, 60 Newark avenue, Jersey City, N. J., Victor dealer, who was adjudged bankrupt. Among the larger creditors are the New York Talking Machine Co. and Blackman Talking Machine Co.

Kranich & Bach have taken on the Victor talking machine line in their store on 125th street.

It's hard to teach a man anything when he doesn't even know when he is licked.

Do you belong with—"the quick or the dead"

Every talking machine jobber in America should be represented in The World of November 15th.

If you are keenly alive to your business interests you will be with the live ones and occupy space in the issue of The World of that date.

The time to secure space is now, and get your copy in at once. Don't be a "dead one."

All the eloquence needed to sell an Edison Phonograph is bound up in the instrument itself. Its playing carries conviction, inevitably.

To make that conviction work for your profit it is only necessary to be sure that you carry the full Edison line.

Unico Demonstrating Booths

Will Sell MORE Talking Machines

These booths are built on the Unit system; can be taken down and put up again in a few hours; made in multiples of three feet, so you can enlarge or reduce your booths as desired, and without labor charges. Every Unit is interchangeable.

Made in eight regular designs, and are both **SOUNDPROOF** and **DUSTPROOF**.

Woods furnished: Oak, Birch, Quartered Oak and Mahogany. Special finishes on order.

Unico Booths increase the sales of Talking Machines, Player-Pianos, Music Rolls and records, for customers always buy better goods—and more goods—with artistic surroundings.

The cost of Unico Booths is less than you would pay in your own City, irrespective of our Patent Construction and Superior Quality.

Just look at this partial list of high-grade houses where Unico Demonstrating Booths are selling more Talking Machines.

PHILADELPHIA, PA.

CINCINNATI, March 12, 1914.

Messrs. Geo. W. Smith Supply Co.,
30th & Powelton Aves.,
Philadelphia,
Pa.

Gentlemen:

We are much pleased with the talking machine booths, which we secured from you last Fall. They are in every way the most satisfactory demonstration booths we have seen, and have unquestionably been of great assistance in the development of our Victor business.

We find that their first-floor front location is a decided advantage, because the booths are very convenient for shoppers and enable us to give outdoor record service, than formerly.

We had a call yesterday from a piano & talking machine firm, located in another city, whose representative had happened in the store and liked the booths so much that he inquired who built them.

We have had a number of such inquiries and are always glad to recommend the booths in the highest terms.

Yours very truly,
THE AEOLIAN COMPANY

GW:LP

PRICE MAINTENANCE CONTRACT

Of the Columbia Graphophone Co. Again Upheld Against "Violation of the Law" Defense—An Important Legal Proceeding.

The price maintenance contract of the Columbia Graphophone Co. was directly attacked in a case recently decided by Justice Weil of one of the local courts. The Columbia Graphophone Co. brought an action against Wallace F. Bogart, of 1224 Ogden avenue, Bronx, for goods sold and delivered. The defendant made the price maintenance contract a part of his answer and interposed as a defense that "the terms of said agreement were against public policy and in violation of the law." It was stipulated on the record in open court that, if the court found that the contract was a perfectly good and legal one and not against public policy and in violation of the law, judgment should be awarded the plaintiff, the Columbia Graphophone Co. The court, after taking the matter under advisement and reading the briefs submitted by both sides, handed down judgment in favor of the plaintiff and against the defendant for the full amount claimed, with the costs of the action. Mirabeau L. Towns appeared for the defendant.

Columbia dealers will be glad to know that they are operating under a contract which has received the judicial approval of the courts.

It may be well to point out, in this connection, that in the case of Columbia Graphophone Co. against Pickard, 201 Fed. Rep. 546, the court (Hazel, district judge) referred in express terms to the Columbia Graphophone Co.'s price maintenance contract, and to the fact that the selling price was fixed by its terms, holding that the assignee for the benefit of creditors had no greater right than his assignor with respect to the sale of Columbia graphophones and records which were purchased by the assignor under the Columbia Graphophone Co.'s price maintenance contract, and enjoined the assignee from selling said patented articles below the prices authorized by said contract, notwithstanding the fact that the assignee had previously been authorized to do so by a State court. This case, it will also be interesting to note, is the leading case on this subject, and was won on rehearing after a hard fight, in which the assignee, himself one of the leading lawyers of western New York, took a prominent part. His counsel were Wilson C. Price, James L. Weeks and Weeks & Ross, all distinguished lawyers of Jamestown and Buffalo. E. K. Camp appeared for the Columbia Graphophone Co. in both cases.

BELIEVED IN REALISM.

The Globe Talking Machine Co., 9 West Twenty-third street, New York, of which David Kahn is manager, had an interesting window display recently to attract attention to the new Victor record of "It's a Long, Long Way to Tipperary." The view showed little leaden soldiers on both sides of and crossing a tiny river, with equipment, etc., faithfully portrayed, and even went so far as to show the hanging of a spy.

The tiny soldiers were shown issuing from between the doors of a Victrola IX placed at one side of the window, and the entire effect, the work of Charles A. Marusak, was most attractive. What is most important, it influenced the sale of many records of "Tipperary."

SMILING.

You might as well keep smilin',
For there aint a bit o' sense
Of fidgetin' an' rilin',
An' a-longin' too intense.
For most things worth the gettin',
Are sure to find the place,
When you're peaceful an' a-settin'
With a smile upon your face.

NEW CONCERNS IN BUFFALO.

Latest Concerns to Enter Talking Machine Field—Business Is Excellent—Neal, Clark & Neal's New Sign—Gould Bros. Quarters.

(Special to The Talking Machine World.)

BUFFALO, N. Y., November 10.—Business in the talking machine field in Buffalo is active, everything considered, and the outlook for the fall and winter trade is good. A number of new talking machine representatives have recently been appointed, namely, John Rae, of Niagara Falls, has taken the agency for the Victrola; Seiber & Hofheins, 705 Main street, this city, motorcycle dealers, have taken the Columbia agency, while W. F. Gould, a prominent hardware dealer of Elk street, has taken the Victrola agency.

Neal, Clark & Neal, local agents for the Victor, have just erected a 9x14-foot electric sign in front of their store, advertising the Victrola. The sign can be read more than two blocks away.

Gould Bros., piano dealers, who recently moved into their new quarters at Main and Utica streets, are handling a complete line of Victor talking machines and records.

TO HANDLE THE COLUMBIA LINE.

New England Furniture and Carpet Co. of Minneapolis, to Give Columbia Products Strong Representation in Northwest.

(Special to The Talking Machine World.)

MINNEAPOLIS, MINN., November 7.—The local distributing branch of the Columbia Graphophone Co. announced this week the consummation of an important deal whereby the New England Furniture and Carpet Co., of this city, will handle the complete line. This company is by far the largest concern of its kind in the Northwest, and controls an enormous trade.

This deal is naturally very gratifying to the Columbia Co., as it completes a trinity of three of the largest houses in the fields where talking machines are the most popular. A few weeks ago was announced a Columbia contract with that great

A THANKSGIVING POEM IN PROSE.

Thanksgiving was approaching and Dorothy was sad, for of all her pets the turkey was the dearest one she had. Old Dinah had informed her that to make the day complete it was always quite essential to have turkey roast to eat. So she went in tears to Daddy, who relieved her sorrow quite. "Don't worry, little girl," he said, "I'll fix it up, all right." On that evening from the office, he brought home his dictaphone, and canned the turkey's song for her. So now while she's alone, she does not miss her pet, you see. O my! his meat was choice, and though she helped to eat him up, she still can hear his voice.

HOWARD TAYLOR MIDDLETON,

department store, Marshall Field & Co., of Chicago. Subsequent to that a deal of tremendous importance was closed with the Aeolian Co., the largest manufacturers of musical instruments in the country.

The New England Furniture and Carpet Co. has for some time recognized the selling possibilities of the Columbia line, and their signing of a contract completed their investigations and trials. An aggressive publicity and sales campaign will be instituted by the company to introduce its Columbia department.

WANAMAKER EULOGIZES EDISON.

The Birthday of the Famous American Inventor Brings a Very Beautiful Tribute from John Wanamaker, the Merchant Prince, Who Sets Forth the Achievements of Edison and What He Has Done for the World.

The advertising editorials of John Wanamaker which adorn the front pages of the New York Herald daily are filled with much interest. They are unique and telling and show the wide range of thought on varied subjects possessed by the great merchant.

The following from the pen of Mr. Wanamaker, heading his trade announcement on October 21, is of peculiar interest to World readers:

THIS IS THE ANNIVERSARY OF
THOMAS A. EDISON'S GREAT DISCOVERY

The conquerors of the world are not all warriors.

The inventors of the world are oftentimes conquerors.

Thirty-five years ago a young mechanic, thirty-two years old, bearing the name of Thomas A. Edison, discovered the incandescent light.

Willing McKean, the old editor of the Public Ledger, at that time with the writer of this anniversary greeting to his old friend, went down to Menlo Park, in October, 1879, to see the wonderful lamp exhibited to them by the modest young Edison.

What Mr. Thomas A. Edison has achieved to date places his name upon the roll with Galileo, Columbus, Franklin.

To-day all America inscribes upon that honor roll in letters of brightest light,

THOMAS ALVA EDISON.

It is something for all of us to say that we live in the same generation with Edison.

It is an honor to take the hand of this man of master mind and transcendent genius.

No man on kingly throne will be longer remembered than he.

And how has he done so much in his peaceful way to bless the world?

Only by working and working and working all the time, days and nights, and at some periods that he made into a day of four days long, scarcely eating and sleeping for ninety-six hours on a stretch.

How he ever did it is the wonder of the age, since it was all done so quickly, confidently and surely.

How could we ever have gotten on without him?

Our best salutations to you, Thomas A. Edison, the world's helper. Long may you live to enjoy the never setting sun of your well earned fame.

We may say that the birthday of Mr. Edison was marked by a general flag raising in West Orange. The Mayor issued a proclamation asking the citizens of the town and of Essex County to display flags in observance of the day.

Mr. and Mrs. Edison, with their two sons, were away at the time, as they went by automobile to Detroit, Mich., where they were the guests of Henry Ford, the automobile manufacturer.

ARTISTIC WINDOW HANGERS.

The Victor Talking Machine Co. sent out several unusually artistic window hangers to its trade the past fortnight, devoted to the special Vernon Castle supplement featuring the fox trot and Castle Polka. One of these new dances, termed the "Castle Gavotte," was introduced in 1,400 newspapers throughout the country on October 20, 21, 23, by the Ladies' Home Journal, and this unusual publicity naturally created a remarkable demand for the records suitable for this dance. The "Castle Gavotte" is proving remarkably popular with society from coast to coast, and the handsome hangers sent out by the Victor Co. to its trade will act as a stimulant for the creation of dance record business.

LOOK FOR BIG HOLIDAY BUSINESS ON PACIFIC COAST.

Talking Machine Dealers and Jobbers Optimistic—Little Shortage of Stock Reported Outside of Edison Discs—Victor Goods Via Panama Canal—Sonora Phonograph Co. Incorporated—Clark Wise Expansion—Geo. W. Lyle a Visitor—The New Edison Shop.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., October 30.—Preparations for the approaching holiday season have demanded the attention of the local trade the past month, and from all indications dealers all along the Pacific Coast anticipate as good business for the rest of this year as they enjoyed during the corresponding period of last year, which in many instances was the best they had ever cared for. There is but little talk of shortage of stocks here this fall, except in the case of the Edison disc. Some new distributors of that product say they will be unable to fill their orders, but most of the other handlers do not anticipate difficulty in that respect this year, which is a great satisfaction in view of former experiences. Retail business in both machines and records is fully up to normal at present, and the higher priced products are in better demand than for some time.

Geo. W. Lyle Visits Columbia Co. Branches.

The local trade received a visit during October from Geo. W. Lyle, general manager of the Columbia Phonograph Co., who was making his annual tour of inspection of the company's Western interests. He was met in Spokane, Wash., by Walter S. Gray, Pacific Coast manager, who makes his headquarters at the San Francisco distributing depot, and they came down the coast together. After spending a few days in this city they left for the southern part of the State by automobile. They parted at Los Angeles on the 22d, Mr. Lyle proceeding homeward, via Salt Lake, Denver and Kansas City, and Mr. Gray coming back here a few days later. When here Mr. Lyle expressed great satisfaction over the condition of business as he found it at his company's branches in the Northwest and in this city. While in Portland, Ore., he closed a deal with the Carman Manufacturing Co., of that city, to make some cabinets for the Columbia concern, with a view of having all cabinets for the trade in the Northwest made at that point if the work compares favorably with the products of Eastern manufacture.

Victor Goods Arrive Via Panama Canal.

Andrew G. McCarthy, of Sherman, Clay & Co., who devotes particular attention to the Victor part of the business, is much encouraged over the way business has picked up in the last two or three weeks. He is now fairly sure of establishing a new record in his department again this year. If he succeeds in showing an increase over last year, it will mean that each year the company has handled

Victor goods, a gain has been made over the preceding year. A large shipment of talking machines arrived recently through the Panama Canal, and the company announces that this means of transportation will be used quite extensively by them from now on.

Sonora Phonograph Co. Incorporated.

The Sonora Phonograph Co. has been incorporated in California, with a capital stock of \$75,000. The directors are Frank M. Steers, E. B. Folsom, F. Moulin, C. H. and J. B. Coffey. The place of business is at San Francisco, where quarters have been fitted up on the second floor of the Phelan building, under the management of F. B. Travers. As the name of the new concern implies, the company will handle the products of the Sonora Phonograph Corp., of New York. The different styles of Sonora machines are on display at the local warerooms, and both a retail and wholesale business will be done from this point. The line is practically new here.

Dealers Stocking Up for the Holidays.

Wholesale Manager F. R. Anglemeier, of the local Columbia branch, says his department experienced quite a rush in the last two or three weeks in filling orders from dealers in the country districts, who are now stocking up for the holidays. Dance records are again in big demand, as social functions are being resumed for the winter.

Increasing Demand for Edison Products.

Business in Edison products has been fine the past month, according to A. R. Pommer, proprietor of the Pacific Phonograph Co., which handles this line exclusively. He says there will be more trouble getting goods than selling them the rest of the year. He has been receiving very good reports from the travelers. J. E. McCracken covered the southern part of the State early in the month, and is now in the northwest. E. C. Howard, who gives full attention to the establishment of new agencies for the Edison disc product, is calling on the trade in the vicinity of Portland.

More Space for Clark Wise & Co. Department.

Alterations are in progress at the store of Clark Wise & Co. whereby the talking machine department will gain considerable more space and better facilities. The mezzanine floor is being extended several feet toward the front of the store and the offices will be moved upstairs, leaving practically the entire ground floor for the demonstration and sale of talking machines. The front of the room will be used for general display purposes, with a

stairway leading up to the offices and piano department. The space under the new offices is being fitted up for a reception room and behind it will be installed seven sound-proof demonstration rooms. The Victor, Columbia and Edison lines are handled by this company, and all will benefit by the store improvements.

Higher Class Records in Demand.

P. H. Beck, who operates the talking machine department on the mezzanine floor of the Kohler & Chase building, anticipates an excellent holiday trade. He says business this fall has been running way ahead of the corresponding period of last year. The demand for Red Seal records is a prominent factor of the business since the opening of the concert season, during which a number of Victor artists will appear here.

To Feature Talking Machines More Extensively.

J. T. Bowers & Son have arranged to feature their talking machine department more extensively. To this end they have engaged J. H. Burnett, formerly with the Graves Music Co., in Portland, to take charge of that part of the business. The Bowers company is one of the pioneers in the piano business here, but it was only recently that it added phonographs to its stock, taking on the Edison disc line exclusively.

Clarence Anrys to Be Married.

Clarence Anrys, son of Frank Anrys, general manager of the Wiley B. Allen Co., will be married on November 7 to Miss Evelyn Godeau, of this city. The groom-elect has been connected with the talking machine department since he became identified with the Allen Co. last year.

Placing Victors in the Schools.

C. E. Edwards and F. P. Corcoran, of the Wiley B. Allen talking machine department, have been conducting an active campaign for Victor talking machines in schools, and the former has just closed a nice contract with the schools of Richmond, Cal., and the latter has been successful in placing several Victrolas in the schools of Goldfield, Nev.

New Edison Shop Attracts Much Attention.

The new Edison Shop on Geary street is proving one of the centers of attraction for this city's music lovers. The store has only been open a few weeks, but in this short while has gained for itself an enviable position. A feature of the establishment is its perfectly harmonious appointments, which have been gained through the detailed perfection of its furnishings and decorations. A handsome concert hall has been fitted up on the mezzanine floor and the daily concerts have attracted many visitors to the store.

H. P. Rothermel, manager of the talking machine department of Eilers Music House, says the principal feature of that business the past month has been the increased demand for higher-priced machines. He is stocking up for a big holiday trade.

Service Is the Paramount Asset of a Victor Distributor

The factory controls the Prices and Terms.

The distributor controls his Service.

This is the reason we have endeavored to make

EASTERN SERVICE THE BEST EVER

And we believe we have succeeded, and will convince you if you will give us the opportunity. A trial order will do.

Will you do it?

“Will there be a Victrola in your home this Christmas?”

This important question will confront the people of the whole country right on until Christmas.

It is the key-note of our nation-wide holiday advertising campaign, and its force will send thousands of customers into the stores of Victor dealers everywhere.

It will help to make this the biggest holiday season you ever had—even ahead of the phenomenal business of last Christmas.

TRADE CONDITIONS IN CINCINNATI.

Dealers Look for a Large Holiday Business—Phonograph Co. in Its New Quarters—Columbia Activity Reported by Manager Whelen—Wurlitzer Ready to Double Christmas Business—Dealers Are Stocking Up.

(Special to The Talking Machine World.)

CINCINNATI, O., November 8.—Local conditions are fairly satisfactory. Most of the business just now is confined to record buyers, but the merchants believe the holiday shopper will soon be in the field and are making arrangements accordingly. More attention is being given to window display work, and any kind of an event which would help sales is tackled by the merchants in decorating his display space.

The Phonograph Co. is now domiciled in its new quarters in the Globe Wernicke building on Fourth street, the change being made last week. The company has decidedly better quarters from a jobbing standpoint, the new space being more concentrated and better suited for wholesale selling purposes as compared with the Main street store.

The Aeolian Co. is now concentrating its advertising campaign on the Columbia line. The change took place during the past month. The company, however, continues to make a specialty of Victor records.

The John Shillito Co.'s music department has not yet made any selection relative to a line of phonographic goods. The matter has been pending some weeks, and it is probable that the approach of the holiday season will hasten a decision.

One of the interesting visitors of last week was Harry Meeks, of the Cheney Talking Machine Co., Chicago, who is a former Cincinnati, having at one time been connected with the local stores of the Rudolph Wurlitzer Co. and the Columbia Phonograph Co.

Manager Whelen, of the local Columbia store, seems to be very optimistic about the general con-

dition. In talking to The World representative he said: "There is no doubt but that the war is affecting business, but we have gotten our share of whatever business there is, and we closed the month with an increase over last October. This shows that the Columbia is getting on top and makes me wonder what we would have done if there had been no war. The first part of this month has shown a substantial increase in business and, despite conditions, I look for a large holiday business.

"This condition seems to be prevalent among the dealers, as they are ordering heavy and even at this stage of the game we are having a hard time to get sufficient stock to supply the demand. The new 'Leader' and 'Mignonette,' with the exclusive push button interior, is creating quite a 'stir' in the talking machine circles and bids fair to be a great 'seller.'"

The Rudolph Wurlitzer Co. is getting ready to tackle the Christmas business with better facilities than last year, when the supply was exhausted, causing the department to turn many buyers away. The company is doing some interesting local advertising in favor of the Victor machines.

The Otto Grau Piano Co.'s department is past the infancy stage and is now one of the features of the business of this house.

JOINS THE SHEPARD CO.

John H. Massey, a well-known talking machine man of Providence, R. I., and who for a number of years was manager of the phonograph department of the J. A. Foster Co., has resigned and become associated as special representative of the talking machine store of the Shepard Co., dealers in Edison diamond disc phonographs, Victor-Victrolas and Columbia Grafonolas.

Good ideas often occur simultaneously to several people, but only one of them is first to "put it across."

FEATURES OF "BROTHER FANS."

Columbia Grafonola with Special Record and a Pathoscope Used with Excellent Effect in Tom Lewis' New Vaudeville Act.

In his new vaudeville act, "Brother Fans," now being presented, at the prominent vaudeville theaters in the East, Tom Lewis makes use of both a Columbia Grafonola and a Pathoscope outfit to excellent advantage. The occasion is when the Giants and White Sox were on their tour of the world and has reached London. Tom Lewis, in the role of a rabid baseball fan marooned in England, sees the game played there, meets two other strong "fans" and invites them to his rooms for dinner. In order to give proper atmosphere to the dinner party there is started on the Grafonola a record which reproduces perfectly the jumble of sounds at the opening of a ball game, with the announcements of the batteries, the cries of the peanut and pop vendors and the cheering at the first hit. While the record is playing the Pathoscope throws on a section of the wall several animated scenes at a ball game supposed to be registered simply in the minds of the three fans who are thinking of home. The idea is excellent and arouses considerable enthusiasm on the part of the audience.

W. G. Britton, formerly credit manager of the wholesale headquarters of the Columbia Graphophone Co., 89 Chambers street, New York, has been promoted to the assistant managership of the establishment, succeeding George A. Baker, who has become manager of the company's Baltimore, Md., branch. Kenneth M. Johns, formerly manager of the Detroit branch of the Columbia Co., has joined the staff at 89 Chambers street, New York, as credit manager. R. F. Bolton is manager of this wholesale branch.

It's the man who hasn't learned how to swim for himself who gets drowned in the swamping seas of business disaster.

DISCUSSES EUROPEAN CONDITIONS.

John A. B. Cromelin, Manager of European Interests of Columbia Graphophone Co., Visiting Headquarters — Declares Business in England Is Active Despite War—Great Demand for Patriotic Records.

"Notwithstanding the present European war, our sales have kept up wonderfully," said John A. B. Cromelin, manager of the European interests of the Columbia Graphophone Co., with headquarters in London, who arrived here a fortnight ago for a short visit. "Surprising as it may seem, our September turnover in Great Britain equaled that of September of last year, and our general European business for September actually showed a larger profit than that of the corresponding month of 1913. These excellent sales totals have surprised the members of our own organization, and indicate the strides that our products are making on the other side of the Atlantic.

"When I left London our factory was running a night shift, and even then was unable to keep up with the orders on hand. We are planning an increase of manufacturing facilities in the near future in order to give our dealers perfect service and co-operation. Columbia business in Italy is gaining steadily, thanks to an efficient sales organization and the merits of Columbia machines and records.

"The recent supplements of patriotic records which we issued abroad are proving a tremendous success, and it is indeed a problem to keep up with the demand for this class of music. We have experienced absolutely no difficulty in securing the necessary raw material to manufacture our products, as we contracted for the most important

material in large quantities many months ago.

"With the close of this war I believe that the Columbia Graphophone Co. will occupy a still stronger position in European and British talking machine circles than it now does. The general outlook for the future of the industry furnishes the basis for this prediction, and I may say that we are strengthening and perfecting our sales organization with this object in view. We have but recently erected a building for the assembling of special machinery and a large storage department, and are now making plans for the handling of a much larger machine business than in the past."

NO LULL IN BALTIMORE TRADE.

Indications of a Heavy Holiday Trade—New Addition to E. F. Droop & Sons' Store Proves Convenience—What Local Houses Report.

(Special to The Talking Machine World.)

BALTIMORE, MD., November 3.—The talking machine industry shows no slackening up at this time, and the indications are that between now and the holidays some nice records in the way of sales will be made. All of the dealers report progress, and judging from the activities in the various stores it would seem that such claims of the dealers are well founded.

Joseph Fink, of the Fink Talking Machine Co., announces that he is kept on the run by the extensive business done at the main store and the branch store, which has only been in operation about two months. This firm handles both the Victor and Columbia lines.

H. R. Eisenbrandt Sons continue to have very satisfactory demands for the Victor line of instruments and calls for the latest records.

E. F. Droop & Sons Co. find that the new addition to their store has proved a most desirable as well as necessary adjunct in order to handle the increasing business. This company is having a remarkable call for the Victor and Edison machines, while the sale of records has taken a large jump. Manager W. C. Roberts and his force are kept on the go steadily, and are anticipating the breaking of previous records.

Manager S. A. Dennison, of the local branch of the Columbia Graphophone Co., finds it easy to put up encouraging reports on his slate each week. He reports very good results with the Columbia line for the month, and is still looking forward to making the best mark next month that he has made at any time since being located in the Monumental City.

Gomprecht & Benesch, through Manager Holmes, announce a very satisfactory month with the Victor line.

BAGSHAW'S EXPANDING BUSINESS.

W. H. Bagshaw, Lowell, Mass., to whom is credited being the first manufacturer of talking machine needles, reports a good, strong demand for its various styles of talking machine needles, coming not from any one section of the country, but from all over the Western Hemisphere and various foreign countries. Quality is the lever upon which these sales have been made, and it is this policy, under the direction of C. H. Bagshaw, general manager of the firm, that is responsible for the constant patronage which the house enjoys. The outlook for the next few months, particularly, is reported to be excellent from the business standpoint.

The DITSON Pledge

is to see that our clientele has a better service than ever—setting a new standard in Victor jobbing deliveries. The demands of alert Victor dealers—the kind that grow—are many and varied, and we furnish the "first-aid" in every instance.

We believe this year's Victor business will be of tremendous proportions, and it will pay you to have

The Fastest Victor Service

which is a requisite in this hustling age. We possess the largest stocks, the best organization and most up-to-date equipment in the Eastern half of the country.

This covers Victor machines, records and supplies of every kind.

Will you let us tell you more about Ditson co-operation? A postal gets this information!

OLIVER DITSON CO., Boston, Mass.

THE NEW EDISON SHOP A VERITABLE TEMPLE OF MUSIC

Beautiful New Building Opened by the Phonograph Corporation of Manhattan, Opposite the Public Library, Devoted to the Sale and Exploitation of the Edison Diamond Disc Phonograph—Most Artistically Arranged—New Structure Wins Praise of Public.

One of the events of the local talking machine trade the past month was the formal opening by the Phonograph Corporation of Manhattan of its new and beautiful Edison Shop, at 473 Fifth avenue, New York, directly facing the New York Public Library, between Fortieth and Forty-first streets. This new temple of music is devoted to the demonstration of the new and recently perfected Edison disc diamond phonograph, and every detail of its construction and decoration is in accord with the prestige that these products have already attained with the trade and music lovers.

The new Edison Shop is four floors in height, of imposing architectural design, and fully equipped throughout with every convenience and comfort for the proper display of the instruments and records. The exterior presents a front both impressive and attractive, an arch of granite terra cotta with an insert of panel of cream and gold, finished in strong color in relief.

Entering the first floor one comes to a large general reception room, shown in one of the illustrations herewith, which is worthy of note because

Entrance to Edison Shop.

of its artistic furnishing and equipment. Here on display are many of the new styles of the perfect Edison diamond disc phonograph. A feature of this room is the fact that it is finished in American walnut, and supplied with furniture specially designed for it. In the rear of the first floor is the concert chamber, or music room, in which daily recitals are given from 10 a. m. till 5.30 p. m., with

special programs. The walls of the music room are of Travertine stone, embellished with four sculp-

General Reception Room on the Street Floor of the Edison Shop—Leads Into Concert Hall.

tered panels representing classical musical groups surmounted by a domed Byzantine ceiling. In this room, as throughout the building, special attention has been paid to acoustics, sound proof walls, special lighting and ventilating features and every contrivance for the production of perfect harmony in furnishings as well as in arch tecture.

On the second floor is the record room, where arrangements have been provided for the filing and keeping of records in large number. Opening from the record room are the sound-proof booths for the hearing and testing of records. Here one may have tested with absolute fidelity any record of solo, opera, concert, and listed to a perfect reproduction in every detail. All makes of records can be made to play on the new Edison. On the third floor are the executive offices, with spacious foyer, rest rooms and three machine demonstration rooms—one in mahogany, one in Colonial and one in American walnut.

Throughout the building rare taste and judgment have been exercised to the end that music lovers may find ease and comfort. All draperies and hangings are specially woven by masters of their craft, and all panels and decorations are of a character to blend and harmonize. It might be men-

tioned that rugs of special design had been ordered from Austria, and will be shipped as soon as the war ceases.

The new Edison Shop has been the subject of splendid advertising the past fortnight, and as a result, the warerooms have been thronged with interested visitors from many far distant points. One and all have been enthusiastic in their praises of the Edison diamond disc phonograph and disc

records, and the sales closed to date in the new establishment have exceeded all expectations.

The sales organization at the Edison Shop is a most efficient one, with G. L. Babson, of the Phonograph Corporation of Manhattan as general manager. L. S. McCormick is manager of the ware-rooms, assisted by a competent staff of sales people.

EDISON ATTENDS OPENING OF DETROIT EDISON SHOP.

Distinguished Inventor Compliments Max Strasburg on the Opening of the New Edison Shop on October 27—New Quarters for Metzger Co.—Victrola for Goodrich Rubber Co.—Ling's New Talking Machine Department—October Trade Ahead of Last Year.

(Special to The Talking Machine World.)

DETROIT, MICH., November 9.—Detroit has a new and elegant talking machine store, "The Edison Shop," opened Tuesday, October 27. Thomas A. Edison himself was present on opening day, and presented the new store with a large fern, which now graces the show window, with Mr. Edison's personal card conspicuously attached.

Mr. Edison had been in the city for a week, visiting Henry Ford, the automobile king, and on the day before his departure, accompanied by Mr. Ford, he called at the establishment bearing his name, to pay his compliments to his managers, Wallace and Harry Brown.

The Edison Shop is located at 31 Grand River avenue east, separated by only one store from the Victrola Shop, of which Max Strasburg is manager. Mr. Strasburg says he welcomes the neighboring competition,

for it will bring more people in that direction seeking talking machines, and while he doesn't expect to land all the sales, he undoubtedly will benefit by the increased travel in that direction. Incidentally, by the time this is in print, J. Henry Ling will have opened his new talking machine department at the southeast corner of Grand River and Library avenues, thereby giving the Edison, Victor and Columbia fine stores within a hundred feet of each other. That corner surely is the talking machine colony of Detroit.

The Messrs. Brown are new to the talking machine trade, but not new to the business world. They are cousins, who had attained responsible positions in large commercial establishments, and desiring to go into business for themselves, organized a corporation and selected the talking machine business as about as likely looking a venture as they could find.

"It surely is handling the Edison," remarked Wallace Brown, to The Talking Machine World representative. "All we have to do to sell these

machines is just to play a few records on them."

The Edison Shop has demonstrated that it is a live wire by opening its bid for public favor with liberal advertising. And it is getting results, for half a dozen prospects were there at the time The World correspondent dropped in. The Brown Sales Co. is the corporate name of the establishment, but The Edison Shop is the name by which it is known.

The store is somewhat different from the other

Interior of New Edison Shop, Detroit.

talking machine stores of Detroit, in furnishings and fittings. The demonstrating rooms, instead of being of white enamel, are of mahogany, the upper half of the partitions being of plate glass. The floors are covered with rich carpets and rugs. The offices are at the rear, but in front are a desk and phone, maintained solely for the convenience of patrons. Ink, note paper and pens are at hand. The stock, of course, includes a full line of elegantly finished instruments. At present three clerks are employed, besides the Browns.

Upper Woodward avenue will have a new talking machine store early in the coming year, or rather, an old established store will remove to new and specially prepared quarters. The W. E. Metzger Co. began handling the Victor line eight years ago, at 252 Woodward avenue. Five years ago the company removed to more spacious quarters at 351 Woodward, above Grand Circus Park. Business expansion now demands still more commodious accommodations, and the company is having constructed for its special needs a terra cotta build-

ing at 501-503 Woodward, where demonstrating rooms, record racks and stock of the most up-to-date nature will be installed. The company expects to take possession about February 1. As the lease on the present quarters does not expire until May 1 both store will be operated until that time.

Joseph Adcock, the manager, this week sold a \$200 Victrola outfit to Bert Morehead, manager of the Detroit branch of the Goodrich Rubber Co. The Metzger trade ranges in the high-priced goods, most of the sales being of machines costing from \$100 to \$200. The new store will be so arranged that additional space can be given to the talking machines as increase of business demands it.

J. Henry Ling, in fitting up his talking machine department, will venture a unique innovation. Two of the demonstrating rooms are to be interior ones, where not much daylight will be available, and electric illumination will be necessary. These rooms are to be made "moonlight rooms," draped on the sides and top with dark blue cloth, spangled with golden stars, and in an appropriate place in the "zenith," a rising moon, lighted with an electric glow. Though there will be two rooms, the one moon will illuminate both, for the only partition will be plate glass. The new department will be opened some time between November 15 and Thanksgiving Day. As a piano establishment the House of Ling is the oldest in Detroit. Mr. Ling has had such a strong inquiry for talking machines in the last year or two that he decided it was time to begin handling them himself, instead of directing his patrons to other stores. The Columbia is his leader.

A significant indication of the volume of talking machine business in Detroit is the fact that the Max Strasburg Co. has just purchased a Ford auto delivery car to be used solely for the delivery of records. This step was found necessary because the business grew to be too heavy for the large auto delivery car to handle. The Strasburg Co. is putting up new and elegant signs, arranged so that they can be read from five streets.

October talking machine business in Detroit was about 30 per cent. ahead of October, 1913, and the outlook is for the greatest holiday trade ever. In fact, holiday trade already has commenced, the advertising now being of the Christmas tenor. All the stores are well stocked up and expect to be able to handle the rush better than ever before. Neither the war nor the alleged business depression seem to have any effect in depressing the "talkers."

Among the new accounts opened by the Columbia Co.'s local wholesale headquarters the past month were J. Henry Williams, Cohoes, N. Y., and H. E. Hemenway, Granville, N. Y. Both of these new dealers have placed substantial initial orders to inaugurate their campaign.

Seven Customers Whom You Can Sell Right Away

These seven will buy Edison Phonographs from you right off the reel—and each one will buy for a different reason. These seven buyers are:

1. The one who wants no bothering with needles.
2. The one who wants *all* the original music, overtones as well as fundamental tones.
3. The one who wants long playing records.
4. The one who wants records that the children won't break.
5. The one who wants steady speed and steady pitch.
6. The one who wants the only phonograph whose tone is suited to outdoors.
7. The one who wants his cabinet to match his indoor furnishings.

If you want each of these seven customers to bring in seven more, and each of those to bring in still another seven, then you want the *full* Edison Line. Get in touch with the nearest jobber. Write us for his name now—to-day.

NEW YORK, NOVEMBER 15, 1914.

THERE has been considerable misunderstanding existing in various quarters as well as much speculation as to just the effect of the Clayton law upon various lines of manufactured products sold under certain restrictions.

The press reports which were sent broadcast throughout the land at the time the bill became a law, stated that it prohibited the fixing of prices to the retailer.

Not so as we interpret it.

A careful examination of the bill shows that it attempts only to rule against fixed prices in conjunction with the understanding that dealers shall not handle competitive goods where such action tends to create a monopoly.

Talking machine manufacturers and others engaged in lines of trade who believe in maintaining fixed prices have found nothing in their present contractual relations with their dealers which conflicts with the provisions of the law.

This new law aims at lessening a monopoly and talking machine interests are not affected by the new measure.

It was believed that something extremely radical would be incorporated in the recently enacted law which was going to revolutionize conditions in the retail trade. An analysis of the law shows that it is not as radical as was predicted by many. In fact, the measure has been softened so that some of the drastic features which were urged by politicians have not been put through.

The new law, of course, would influence operations in some trades. If we dig into the heart of this new legislation we will find that where it hits the hardest is that there will be an interference with the systems of exclusive agencies and exclusive selling rights, and a ban is placed on the form of agreements and allowances of preferential prices.

Section 2 of the new law is, in full, as follows:

"That it shall be unlawful for any person engaged in commerce, either directly or indirectly, to discriminate in price between different purchasers of commodities, which commodities are sold for use, consumption or resale within the United States or any territory thereof, or the District of Columbia or any insular possession or other place under the jurisdiction of the United States, where the effect of such discrimination may be to substantially lessen competition or tend to create a monopoly in any line of commerce. Provided, that nothing herein contained shall prevent discrimination in price between purchasers of commodities on account of differences in the grade, quality or quantity of the commodity sold, or that makes only due allowance for difference in the cost of selling or transportation, or discrimination in price in the same or different communities made in good faith to meet competition. And

provided further, That nothing herein contained shall prevent persons engaged in selling goods, wares or merchandise in commerce from selecting their own customers in bona fide transactions and not in restraint of trade."

IF we look at this section closely, it might appear that if the measure allowed special prices to the exclusive agent or selling representative in a locality, a strict interpretation of this law may be construed that any exclusive agency would "tend to create a monopoly." But, on the other hand, if products are sold at retail at a standardized price, fixed by the manufacturer, it is a question whether the handling of the line by an exclusive agent would really "substantially lessen competition," as compared with the taking of the line by a number of retail establishments.

We cannot see that the enactment of this new law will affect the sale of talking machines at retail, for, while the jobbers are exclusive in their lines, retail establishments may sell any kind of machines which they care to offer. So our interpretation of the measure is that it will not disturb conditions or contractual relations between manufacturers and dealers in the slightest. It aims obviously at the exclusive agency agreement, and in Section 3 it distinctly states that it shall be unlawful for any person to enter into a contract for the sale of goods of a certain character, with the understanding, or agreement, that the lessee or purchaser shall not deal in merchandise or offer commodities of a competing make. Hence, our version of the effect of the Clayton law on trade is that retail merchants in all lines will not bind themselves to handle any special lines of goods. In other words, the retail stores of the country must be open to all lines of merchandise for which customers ask. In brief, a dealer cannot, under the new law, be prohibited from selling competitive products.

ONE effect, supposedly, of the act is that it will render it impracticable for merchants to sell talking machines, piano players, etc., with any restrictions to the effect that there may not be used in conjunction therewith the records, needles, perforated rolls, or accessories put out by rival firms.

That clears up the situation so that manufacturers of specialties have an open market for their products which can be used in connection with talking machines.

Anyone who has observed the changing conditions in the retail trade throughout America must be convinced that there is a desire on the part of the public to purchase from stores which carry varied lines, and it is up to the merchants to meet that public demand.

We can see no good reason that can be advanced why a man who desires a particular brand of shoes should travel over the whole town to find a store which is the exclusive representative of this particular shoe, and the same rule would apply to all of the manufactured products which enter into our every-day life.

If a man desires a talking machine of a particular brand why should he not be able to purchase it from a regular talking machine store, always, provided, of course, that the dealer deems it good business on his part to carry the line.

The talking machine dealer, like the retailer in any other line, will be guided by his individual views as to what particular goods he should carry. If it is advisable to carry one line of talking machines and records, why then presumably he will so arrange with the jobbers who represent these special lines. He gets back to the best advertised and the best quality products and the men who have built great enterprises will not permit them to die through lack of fertilization.

So, as we view the Clayton law, it does not constitute a menace to the talking machine interests. It would, however, be a very serious one if it struck a blow at price maintenance. We have claimed for many years that price maintenance is the rock on which this trade is founded, and once destroy that foundation and the papers will be filled with standard talking machines advertised at cut rates just the same as they are of pianos and other lines of home accessories.

As a matter of fact, the piano merchants have valued pianos too cheaply. They have not appreciated the product and they have valued their own position too lightly. They have slaughtered competing instruments, and what has been the result? In hundreds of cases they have lost public esteem and public confidence when they could have maintained both.

NO trade ever followed the cut-rate road to permanent success. Price slaughtering may be only indulged in as business expediency, but as a permanent part to business life it should be avoided.

It leads merchants into all kinds of pitfalls, and instead of building a permanent trade, steadily lessens it and destroys the confidence of the public in values.

Talking machine dealers should appreciate the principles which the manufacturers in this trade have maintained in price standardization. It has been the solid and substantial foundation which has saved the industry during the days of storm and stress. It has saved the dealers from themselves, because many a man, in order to raise funds to meet maturing obligations, would be tempted at times to enter into a price slaughtering campaign just for temporary needs, not realizing that by so doing he would commit an act which would injure his future success.

Dealers in this trade have much to be thankful for that they have been saved from disaster—saved from the temptation of destroying their own enterprises by price annihilation.

We have seen some men in the course of our various travels who have expressed the wish to enter into a price cutting campaign. Their reasons were based somewhat on spite and somewhat on the advertising which the house would get. We have reasoned with them. We have shown them clearly the folly of such a course and we desire to impress upon every talking machine dealer in the country that it would be an act of business suicide even if it were possible under the existing conditions to make such a move.

The Clayton law, as we interpret it, does not give to any dealer that right. It simply makes him free to handle what he may desire in the way of products. In other words, he cannot be forced by any agreement into handling non-competing wares, and if any manufacturer insisted upon such an agreement, he would be violating the spirit of the Clayton law.

Do not value your trade too cheaply.

Do not figure that you are in a cutthroat and cut rate business.

Put aside such temptations and conduct your business along progressive, straightforward lines.

Rely upon the merit of your products, the tact of your sales-

men, the power of argument to make your sales and build your enterprise.

We hope never to see the time when the advertising columns of the daily papers may contain notices of slaughter prices of standard talking machines.

If a department store by underground methods secures a stock of machines in order to slaughter prices then the act should be condemned by the entire trade.

Fixity of price should be maintained, and so long as that is staunchly adhered to, there will be no fear of trade disintegration.

Stand by your guns and incidentally hustle!

Then your trade will stand by you.

ONE of the most important changes in the retail trade during the past few years has been the evolution of the show window. From being an unimportant feature of the store it has grown to be a factor of great importance along the lines of publicity, supplementing the efforts of the advertising man most effectively.

The attention that is now being given to show windows by the retail merchant is almost as great in the small towns as in the large cities, and this is especially noticeable in talking machine stores, where window and ware room display are factors which have been assiduously cultivated.

The recent improvements in store fronts and windows as designed by specialists in this work have assisted materially in creating better results in the matter of showing and selling musical instruments of all kinds. The show windows are higher and deeper, admirably lighted, and care is taken to keep them free from unsightly interfering columns or posts.

The improved window fronts in the talker trade, particularly in the smaller cities, can be attributed in a measure to the great possibilities for display afforded by the talking machine. Piano dealers who handle these remarkable promoters of musical knowledge have been educated by such concerns as the Victor Co. and other manufacturers to install special window displays which have been arranged for them, and which attract the public to the window and store where they are displayed in a manner that has awakened the dealer to a new conception of the value of window display.

Hoboken, N. J.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., November 8.—All things considered, business in Boston and suburbs is doing remarkably well, though with a frank understanding of the situation there isn't a dealer who will not qualify his statement of fairly good business with the remark, "but it could be better." In a nutshell that describes the present condition. One thing is certain, however, and that is that the extensive exhibit of Edison disc machines at the food fair which closed on the night of October 31 has been a tremendous stimulus to business, and there isn't one of the dealers—George Lincoln Parker, Shepard-Norwell Co., F. H. Thomas Co., Chickering & Sons, and the Shepard stores of Providence—who were combined in this exhibit that is not able to report business directly attributable to the fair, or hundreds of prospects that look promising. The Swiss chalet, which occupied the whole of the stage wherein 500 people were seated, during many periods of the day, was a triumph of Edison enterprise; and Harland R. Skelton, attired in evening clothes, made a splendid presentation of the claims of the Edison proposition before the exhibition of moving pictures and moving-talking pictures was started. One clever scheme was the throwing on the screen as a preliminary the names and addresses of the houses directly concerned in the distribution of Edison outfits whose booths were nearby.

Loss Not as Great as Reported.

Manager Royer, of the Arch street Victor quarters of the M. Steinert & Sons Co., reports that the loss sustained at the fire in Worcester a fortnight or so ago was not as severe as first feared. The fire occurred in the Day building, occupied in part by the Steinert Co., early one evening, and early the next morning Mr. Royer was upon the scene. The fire was in another portion of the building so that flames actually did not come into the Steinert warerooms, so what loss was sustained was through smoke and water, much of which found its way into all the stores and offices of the large structure.

Handsome Talking Machine Warerooms.

Manager Royer is quite elated over the good business that the Boston headquarters of M. Steinert & Sons is doing, and to all those who evince an interest in the Victor proposition he is asking "Have you seen our new Boylston street warerooms?"

Now these Boylston street warerooms must take their place as among the handsomest and most conveniently arranged of any in the city. The quarters

are really the same as formerly used for the Victor business, and are on the fourth floor of the Steinert building and overlooking Boston Common, but they have been entirely made over. The center of the space, which extends the width of the building, is given over to a sort of parlor with large table in the center, on which is a collection of Victor literature. On each side are two commodious sound proof booths, into which there is a flood of sunshine all of the afternoon. On the polished floors are handsome rugs, and a feature is the record cabinet, which occupies a corner of the room, the shelves projecting out a short distance, leaving recesses between, the arrangement being similar to what one sees in a public library. In a further corner is the table for handling and doing up records. The department is in charge of Herbert Evans, and he is now able under improved conditions, to push the Victor business as never before.

Eastern Talking Machine Co.'s Campaign.

Good progress is being made at the Eastern Talking Machine Co.'s warerooms in Tremont street, where one constantly notes many customers bent on interesting themselves in the Victor line. Manager Fitzgerald, of the wholesale department, says he is going after business as never before, and that where a distributor in a town is not pushing ahead as fast as he ought, a change is immediately made. Friend Welch, who is in charge of the school work, is making a careful and thorough canvass of the outlying sections and he is approaching both public and private schools with good results.

Victrola for One of the Champions.

Manager Warren Batchelder, of the Victor department of the Henry F. Miller Co., reports that during the championship games between the Braves and the Athletics his warerooms were visited by Hugh Bedient, the famous pitcher of the Red Sox, who made a purchase of a Victrola XVI in Circassian walnut, and a bunch of choice records. He left instructions for the outfit to be shipped to his home at Falconer, N. Y. Business at the Miller warerooms has considerably picked up since Boylston street has been permanently put in order following the aggravating work on the subway.

Wallace Currier in Charge at Chickering's.

A change has been made at the talking machine department of Chickering & Sons in Tremont street. W. W. Longfellow, who has been in charge for some time, has been transferred into the retail department of the piano warerooms, and succeeding

him is Wallace Currier, son of Mason P. Currier, manager of the Chickering retail department. Young Mr. Currier formerly was with the Victor department of M. Steinert & Sons, and left to accept a position with the Standard Oil Co. The talking machine trade will be glad to welcome him back into their midst. It will be recalled that in the Chickering warerooms there now are both the Victor and the Edison disc outfits, and the exhibit of the latter machines at the food fair by the Chickering house, as mentioned in The World of last month, has been productive of a large number of sales and promising prospects. Ralph Longfellow, brother of W. W. Longfellow, has been in charge of the exhibit, and each afternoon and evening the room at the rear of the stage of Mechanics Hall has been filled during the periods of demonstration. Mr. Longfellow proved himself especially adept at explaining the Edison machines in a highly intelligent manner.

Harvey Takes on the Edison Line.

The C. C. Harvey Co. is the latest Boston house to take on the Edison goods, and although this house has been exploiting this line less than a fortnight, Manager White says there has been quite an inquiry. The large show window offers a splendid opportunity for displaying both the Victor and Edison lines, and in the showroom on the second floor the machines are being displayed to good advantage. In addition to the Boston establishment, the Harvey Co. conducts stores at Brockton and Lynn, in both of which the Victor and Edison lines are winning immediate favor.

Columbia at the Boston Opera House.

With the opening of the Boston Opera House three weeks ago for a varied nightly program of motion pictures and vocal and instrumental music, the Columbia Graphophone Co. played a conspicuous part. It happened that the Opera House was opened six years ago with Mme. Nordica, now deceased, whom Boston claimed as one of her daughters, as she received her training here. It was the idea of Manager Erisman that on the opening night of these entertainment selections of "La Gioconda," which was the first opera sung at the Opera House, should be given through the medium of Mme. Nordica's records, as that opera star sung exclusively for this company. In spite of the fact that it was asked that no applause be given as a silent tribute to the dead artist, the audience could not contain itself and broke out in one thunder of clapping. The music was played on a Columbia grand and

Getting the Goods Gets the Profits

This is particularly true about the new Edison Diamond Disc machines and records, for with a good stock on your floor, it offers a wide selection to your customer and generally lands a good sale. The tremendous demands for the new Edison line, coming from all over the country, show the superiority of not only the goods, but of the Edison dealers' lead when it comes to actual competition. We start you right and see that you "make good" from the beginning.

Better talk this over with us now.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

was highly enjoyed. The entertainments, it may be stated in passing, have proved a most successful venture. The downtown box office is in the Columbia warerooms.

C. E. Osgood's Attractive Display.

Chester J. Sylvester continues to exploit to advantage the various makes of machines, the Columbia, Edison and Victor, in his well-appointed warerooms at the rear of the C. E. Osgood Co.'s furnishing house establishment. This house has always been one of those that have built up a big business on the instalment system, and in disposing of its talking machines it has found favor with a large class of people.

Keeps in Touch with Branch Houses.

Manager Royer, of the Arch street Victor quarters of the M. Steinert & Sons Co., is making frequent trips just now to the various out-of-town houses of the Steinert concern, such as Providence, Fall River, Portland, Worcester and other cities. Mr. Royer always finds much to commend in the management of the branches, and those under his jurisdiction are not slow to profit by his business talks which he occasionally gives. Lately Mr. Royer added to his staff Frank Roby, who is acting as the educational agent for the house.

Joins the Columbia Forces.

R. C. Sylvester, brother of Chester J. Sylvester, manager of the talking machine department of the C. E. Osgood Co., is back with his first love, the Columbia Graphophone Co. Mr. Sylvester left here about a year ago to go to Worcester, where he was with the talking machine department of the Atherton Furniture Co., but he was not altogether satisfied, and was glad to come back to Boston. He resumed his duties under Manager Erisman on the first of the month.

Oliver Ditson Co. Prepares for All Demands.

The Victor department of the Oliver Ditson Co. is forging ahead in good shape, and the indications are good for a busy holiday season. Manager Winkelman reports that October made a showing considerably above that of last year. The house is carrying a large stock of machines and records, and is splendidly prepared to cater to the needs of its customers this fall and winter—particularly during the Christmas holidays. Its attention to orders and its valuable "service" to dealers is keenly appreciated.

Use Talking Machines for Dancing.

Ashley Kendrick, who was one of the first to introduce the modern dances into Saratoga Springs, N. Y., his home city, was a visitor to Boston recently. Mr. Kendrick is an enthusiast over the use of talking machines in dancing studios, and he has used the Victor and Columbia outfits with great success. He has just opened his studio for the second season, and the winter promises to be an unusually successful one.

No Dull Times with Columbia Co.

"It just about makes me tired when I hear dealers prate about poor business," declared Arthur Erisman, manager of the Boston quarters of the Columbia Graphophone Co. "We have seen very little indication of poor business in Columbia goods, and when I say that we closed October with the largest single month's business in our history, I think that tells a story of hustle and enthusiasm on the part of Columbia distributors. I may add that while December of last year was considered the banner month in our experience, this October's business was considerably in excess of that." Mr. Erisman reports that many large business houses throughout New England have been taking on the Columbia lines, and special mention is made among those nearer home of D. B. H. Powers, of Lynn, a large furniture house, which has taken on a complete stock of Columbia machines and records. Mr. Powers intends to immediately inaugurate a big advertising campaign. Another large Lynn concern to stock up with Columbia outfits is H. M. Curtis, who runs a store at 60 Andrew street.

Pardee-Ellenberger Co. Expansion.

Manager Silliman, of the Pardee-Ellenberger Co., states that business in the Edison lines is making surprising headway throughout New England, and everywhere there is a big call for goods. Mr. Pardee continues to make his periodic trips over from New Haven, and he always returns home well satisfied with the business progress. The present handsome and large quarters have insistently proved the need of expansion, and when one compares the handsome suite of warerooms and offices with the small second-story quarters of a few months ago it is evident that business with the Pardee-Ellenberger Co. has made enormous strides.

Some Recent Visitors.

C. E. Goodwin, general manager of the Phonograph Co. of Chicago, was a recent visitor at the Eastern Talking Machine Co.'s quarters. Another visitor who paid his respects to Manager Taft in the past few weeks has been George D. Ornstein, chief of the Victor salesmen, who passed through Boston in his automobile while making a tour of the New England jobbers.

Charles Garb Seriously Ill.

Charles Garb, one of the proprietors of the Conclave Phonograph Co., which recently moved from Portland street to Cornhill, as mentioned last month, is seriously ill. It happened that his son-in-law was here from the Northwest at the time, and though himself engaged in a different line of business, he has stepped in to help out in the conduct of the business. It is not thought that Mr. Garb is dangerously ill, though it may be several weeks before he will be able to get back to business.

Will Soon Return to Business.

The many friends of John A. Alsen, head of the talking machine department of George Lincoln Parker, will be glad to learn that he has left the hospital, where he has been for a fortnight, and will now convalesce at home. It doubtless will be several weeks yet before he is able to return to business.

Trade Interferences Disappearing.

When this issue of The World is read Avery street, which is to so immeasurably benefit the Columbia Graphophone Co.'s Boston headquarters, will finally be finished after months of incessant work. The sidewalk along the side of the Colum-

bia store has been completed some time, but the roadway, because of numerous delays, has not been made passable until now. For more than a month the Columbia store has had the side facing Avery street adorned with conspicuous gold and black signs, and there is no question that since the opening of this new thoroughfare business has taken on a new lease of life, for the store and the business meet the eye from so many different angles.

A. W. Chamberlain Appointed Manager.

Arthur W. Chamberlain, well and pleasantly remembered as manager of the wholesale department of the Eastern Talking Machine Co., has been appointed manager of the talking machine department of the Iver Johnson Sporting Goods Co., which occupies an entire building at the corner of Washington street and Cornhill. In the talking machine department, which is located on the fourth floor, both the Edison and Victor outfits are featured. The department has been without head for several months, and Mr. Chamberlain was selected as just the man fitted by long experience in the trade to put it on its feet.

In Charge of Suburban Business.

W. C. Frohock, who has been with the talking machine business for some time, and is considered a valuable man, has become associated with the Columbia Co., and is in charge of the suburban wholesale end of the business.

Opens a New Addition.

The C. C. Harvey Co., Boylston street, has opened up an addition to its talking machine parlors, and the new rooms which are at the rear of the old quarters have been rebuilt, redecorated and beautifully fitted out so as to make them handsome and restful. The walls are tinted in cream and white, and the windows and doorways are fitted with silk rep hangings in old rose with gold trimmings. Except for daylight the rooms are otherwise lighted by brass electroliers, and large rugs cover the polished floors. Dainty tables and chairs help immensely in the furnishings. The Edison and Victor machines are arranged about the rooms, and the fact that the suite is some distance back from the street insures perfect quiet in listening to records. Manager White has an efficient staff to assist him in displaying and demonstrating the goods.

THE BAGSHAW test for talking machine needles begins where others leave off, and every needle must come up to our high standard of quality.

It is this strict attention to small details that spells "perfection" in the manufacture of quality needles and being the pioneer manufacturer in this field, we know just how to care for the demands of the trade.

Bagshaw needles are tone producers. The largest sale of any needle on the globe.

W. H. Bagshaw, Lowell, Mass.

Nothing at \$100 can compete with the new Columbia Grafonola "Mignonette" and at \$110 the "Mignonette" equipped with the exclusively Columbia Individual Record Ejector is sure to appeal to a wide market *all its own.*

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

CHARGE SIX PER CENT. INTEREST ON INSTALMENT SALES.

The Talking Machine Association of Buffalo at Its Recent Meeting Unanimously Adopts That Selling Plan—Department to Put This Policy Into Force—Action Also Taken in Regard to the Purchase of Records Sent for Trial to the Home.

(Special to The Talking Machine World.)

BUFFALO, N. Y., November 5.—On October 21 the members of the Talking Machine Association of Buffalo held its regular meeting at the store of W. D. Andrews, where it was called to order by W. H. Poling, president. Practically all of the members attended, and during the evening a photo-

ference between the cash payment and the amount on lease, and to do so would require a borrowing line at the bank, and the proper course would be to simply charge the customer the amount additional to offset the cost of borrowing the money from a bank.

Another measure put through was that of re-

Among those present were: W. H. Poling, president; A. F. Schwegler, secretary; Chas. H. Heinike, Chas. B. Utley, Wm. L. Sprague, Henry Schunke, I. Melzer, Albert W. J. Schuler, H. G. Town, Albert S. Winegar, Robt. L. Loud, W. F. Gould, W. J. Bruehl, Chas. Bieda, Glad. Henderson, of The Talking Machine World; George Goid, Geo. Todd, C. N. Andrews, A. V. Biesinger, treasurer; Martin Kaepfel, R. G. Richardson, E. C. Emens, Wm. Laufer, Alvin Kaepfel and W. R. Gardner.

"PULLED OFF A CLEVER STUNT."

Under the above head the Gazette and Bulletin, of Williamsport, Pa., published the following: "Walter Lamade, of the Lycoming Opera House, and Charles Brownell, of D. S. Andrus & Co., worked a very good trick yesterday while Mr. and Mrs. Vernon Castle were doing their fancy dancing in the moving picture show. Mr. Brownell had Roy Bell, of the Victrola department, behind the scenes with a Victor-Victrola, and the very dance records which the Castles had superintended the making of for the Victor Co., these records being taken out of the regular D. S. Andrus & Co. stock. The dancing of Mr. and Mrs. Castle was truly beautiful and artistic and the music furnished by the Victrola absolutely perfect. The dancers were always in perfect step with the music."

399 OUT OF 400 VOTES FOR EDISON.

"The Edison disc is elected by an overwhelming majority." Such was the word passed along by members of the Knights of Pythias Lodge, Coshocton, O., recently. There had arisen a discussion of what kind of talking machine the lodge should acquire. Stevenson Bros., Edison dealers there, appeared on the scene and offered to play the Edison disc at the next lodge meeting, and leave the decision to a vote. Out of 400 members of the lodge the Edison received 399 actual votes. An Edison disc was purchased and is now a much admired acquisition, says the Edison Phonograph Monthly, being in constant use by some member of the lodge every evening.

Seated on Floor: Geo. Todd, C. N. Andrews. First Row, Seated: I. Melzer, A. F. Schwegler, Sec'y; W. H. Poling, Pres.

graph of the group was taken by The Talking Machine World and is for the first time published herewith.

The usual form of business was conducted, the main feature being the signing of the agreement by the dealers to charge interest at 6 per cent. on instalment sales, which was unanimously adopted. One member, in explaining this plan, stated that inasmuch as the cash price is fixed, to sell on instalments would be to practically advance the dif-

ference between the cash payment and the amount on lease, and to do so would require a borrowing line at the bank, and the proper course would be to simply charge the customer the amount additional to offset the cost of borrowing the money from a bank.

The next regular meeting will be held at the offices of Robt. L. Loud.

PROGRESSIVE ARGENTINE HOUSE

Is That Conducted by Jose Tagini, of Buenos Aires, Whose Publicity Is Up to Date.

The Columbia Graphophone Co. has received from its representative in Buenos Aires, Argentine Republic, South America, Jose Tagini, a series of handsome window hangers which well illustrates the progressiveness of this prominent house and the co-operation it is ready to extend to its dealers. These hangers are devoted to special supplements of Columbia records, and, as Mr. Tagini terms them, they are "messengers of peace and prosperity."

In a letter to his dealers Mr. Tagini urges them to make a special effort to increase their Columbia record trade this season, and points out that if proper attention is bestowed on the development of their business, they will forget all about the war in Europe, and increase their profits steadily. Jose Tagini conducts one of the largest talking machine establishments in the world, and the manager of his business, Ernesto S. Tosi, is fully conversant with all the most important selling helps which contribute to the success of a wholesale and retail talking machine business.

OPTIMISM MORE APPARENT

In Various Parts of the Country, Says Philip Ravis, of the New York Album and Card Co.

"Business conditions throughout the West are steadily improving," said Philip Ravis, vice-president of the New York Album and Card Co., 23 Lispenard street, New York, who returned recently from an extended trip through this territory. "Optimism is becoming more and more apparent, and judging from the reports of the dealers, this season will be a banner one. Our record albums are giving perfect satisfaction in every respect, and our recently announced features have been very successful. With the advent of the holiday season and the issuance of the semi-annual record catalogs, there is considerable interest being manifested in our flexible cover for holding these catalogs, and many dealers have arranged to use large amounts of these covers to present to their customers as holiday souvenirs and to sell at a nominal price."

BUSY TAKING CARE OF DEMANDS.

The Past Month Has Shown a Rapid Growth Throughout the Country of the Business of the Pathé Frères Phonograph Co., New York—Many New Dealers Established—Dance Records Win High Praise from Purchasers.

During the past month the Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, has been kept busy taking care of the demands of its already established trade, and arranging for representation in large and small cities throughout the country. The announcement that the company is now fully prepared to handle its American business, created wide-spread interest in the trade, and the fact that it had completed a perfect selling plan and was equipped to make immediate shipments of Pathephones and Pathé discs enabled it to secure prompt distribution.

Referring to the present status of its business, an officer of the Pathé Frères Phonograph Co. remarked as follows: "We are receiving from all parts of the country unsolicited letters of praise from our dealers relative to the musical quality of

these records are from all the usual defects. They certainly are an artistic innovation and will be highly valued by all lovers of music. Believe me,

"Faithfully yours,

"LIONEL S. MAPLESON."

THOMPSONS CELEBRATE.

Phonograph Plays Part in Wedding Anniversary Held Recently.

Mr. and Mrs. William H. Thompson (Isabel Irving), celebrated the fifteenth anniversary of their marriage recently. Mr. Thompson is playing the Patriarch in George M. Cohan's "The Miracle Man" at the Astor Theater, and Miss Irving is appearing in "Under Cover" at George M. Cohan's Grand Opera House in Chicago. The two organizations gave a dinner to the happily married pair after the performance on the anniversary date. A feature of the event was a speech by Mr. Thompson to the guests at his wife's dinner in Chicago, and one by Miss Irving to the guests at her husband's dinner here, the same being delivered in phonographic form, the records for which were made a few days in advance.

NEW ATTACHMENT PLEASES.

Lexton Specialty Co.'s Device for Playing Edison Records on Victor Machines Meets with Approval of the Dealers, Who Are Reordering Liberally After Trying Device.

The Lexton Specialty Co., 214 West Ninety-ninth street, New York, manufacturers of the Lexton attachment, which permits of the playing of the Edison type of records on Victor talking machines, reported that the trade has displayed an unusually live interest in the new device, and that orders, both for samples and quantities, have been numerous. The fact that a large number of jobbers and dealers have, after trying out the sample, been quick to place repeat orders, speaks well for the claims of the inventor, A. G. Ostermoor, regarding the reproducing qualities of the device.

The Lexton device is readily attached to the gooseneck of the machine by unscrewing the cap and screwing in the attachment which throws the sound box around at right angles to the record

our products, and the agencies which we have established are placing repeat orders with pleasing regularity. All indications point to our closing a business this year far in advance of our highest expectations, and our dance records are scoring a remarkable success. The fact that these records were produced under the supervision of Maurice and Florence Walton, assured their being recorded in perfect dance tempo. The higher priced Pathephones are giving excellent satisfaction to all purchasers, and the dealers handling our products have commended us on our prompt and efficient service. We are receiving shipments regularly from abroad, and are co-operating with our dealers in every way that will enhance the sales possibilities of our line.

"We have received an interesting letter of praise from Lionel S. Mapleson, London representative of the Metropolitan Opera Co., New York, one of the foremost musical authorities in the world. Mr. Mapleson, who is at present in New York, has written us as follows:

"Allow me to congratulate you on the issue of the records that I heard at your Thirty-eighth street studio to-day. It is really remarkable how free

Specialists in mechanism and accessories for Talking Machines. Twenty different models of mechanism.

groove and presents it at the most effective angle to the record face. The new Lexton permanent needle for use with both vertical and lateral cut records is also a feature of the device, and several dealers, in placing reorders for the Lexton device, have written of their satisfaction with its performance and the manner in which the needle brings out the tonal quality of the records.

The Lexton Co. now has a liberal supply of attachments and needles with which to fill orders without delay. At the present time the device is made only for Victor machines, but a new model, designed for Columbia machines, will be announced at an early date.

VIEW OUTLOOK OPTIMISTICALLY IN CLEVELAND.

All Branches of Talking Machine Trade Report Healthy Undercurrent in Business World Despite the Adverse Conditions Which Have Affected Seriously Many Lines of Business—Every Evidence That Dealers Mean to Close a Satisfactory Year.

(Special to The Talking Machine World.)

CLEVELAND, O., November 9.—Early fall traffic all along the line in the talking machine trade is exceptionally good, notwithstanding the general adverse conditions which have seriously affected many lines of business.

Sales practically cover the entire list of machines from the cheapest to the highest priced, and largely cash transactions prevail. A preponderance of transactions are in the fifty to one hundred dollar instruments.

The various dealers are pleased with present conditions and optimistic regarding the future, particularly the approaching holiday business, which is already manifest in some of the stores.

The Union Specialty Co. report business as improving very materially. The demand for talking machine Union specialties, it was stated, continues good and constantly increasing.

L. C. McChesney, advertising manager of Thos. A. Edison, Inc., spent a day recently visiting the Phonograph Co. and the various dealers in the city.

Geo. W. Savage, an experienced talking machine man, has accepted a position with the Eclipse Musical Co., and will prove a valuable acquisition.

Hedwig Hart has also joined the forces of the Eclipse Co. and is fast garnering new friends for himself and the company.

Grant Smith is manager of the Euclid Music Co., Victor dealers. His management during the past year has demonstrated his efficiency as a talking machine dealer.

One of the signs of prosperity is a look in at the Euclid Music Co.'s store. The attaches are busily engaged, though under difficulties, as extensive improvements are under way. Three additional large parlors are being fitted up for the benefit of customers to insure their prompt attention. The company

started a year ago, and it was rather experimental. The store is located in a fine residential section, and the business has been constantly increasing. It is open every evening and has the advantage of downtown stores in the fact that business men do not have to rush in at lunch hour, hear a record and ask to have a bunch of records sent on approval. This store being conveniently located, the customer brings his wife along and they leisurely select the records, which are sold, not to be returned in a few days for a fresh lot. And it is the same way in selecting a machine. The man, accompanied by his wife or daughter, goes to the store in the evening, and they take their time and select an instrument to their entire satisfaction.

The large and attractive piano house of the B. Dreher's Sons Co. is a magnet that draws large crowds. The talking machine department is especially attractive and is doing excellent business. "Trade this fall," said W. G. Bowie, manager of the department, "has been considerably better than in 1913. This, of course, is very encouraging, and we hope and expect to have the largest Victor business during the holidays that we have had in all previous years."

The Phonograph Co. of Cleveland, distributors of the Edison products, is reaping the success which the Edison instruments entitle it to. L. N. Bloom, secretary, reports business for the month of October was exceptionally good in both the wholesale and retail departments. The company has just installed one of the largest electric signs in the city, the entire length being 105 feet. It gives on one end an exact reproduction of the new Edison diamond point reproducer in action, the record underneath continually revolving. On the other end of the sign is a large disc record with a lifelike picture of Mr. Edison in the center. This

also is revolving continually. It is, without doubt, one of the most novel and handsomest signs in the country. The recitals given by the company afternoons and evenings are well attended and are proving a valuable means of publicity.

When a man is on the jump from early until late, as is Mr. Denslow, manager of the Eclipse Musical Co., it is evident there is something doing. "Machine sales are being daily recorded," he said, "and the tendency is toward more cash sales, larger down payments and shorter terms on contracts."

O. E. Kellogg, secretary of the H. E. McMillin & Son Co., announced to the trade last week that the company would discontinue its Edison department. He stated that the reason for discontinuing the department was due largely to its increased Victor business.

"The business in the graphophone department of the Grafonola Co. during the month of October," said Mr. Roth, president, "has held to the same amount of increase that prevailed during the preceding months. I think a good many people who would have bought pianos the past summer have purchased Grafonolas because they wanted music in their homes and were timid about entering into a piano contract on account of their lack of confidence in the business situation. Our business is very good, and I am pleased to state that our collections have been and continue to be excellent. Part of this is due to the fact that we do not let the accounts lapse into arrears without good cause. Again, a part is due to the fact that the workingman is not banking his money, but laying it by in the old historic teapot; consequently when the collector calls he has some cash on hand to meet the bill. We are satisfied with conditions."

During the past summer the remodeling of the store of Wm. Taylor, Son & Co. has been under way, four stories being added, doubling its capacity. This enlargement has afforded the talking machine department greatly increased space. Ten new, large graphophone demonstration rooms have been beautifully fitted up and opened on the fourth floor. T. A. Davies, manager of the section, claims it is the finest in this part of the country.

The magnificent Victor window display by the Caldwell Piano Co. is one among the many attractive ones in the city. All the various types of machines are shown. R. W. Schirry, manager of the department, stated business was holding up remarkably well, and especially good for the November dance records.

The George D. Koch & Son Co., large furniture dealers at 10300-12 Euclid avenue, have taken on the Edison line.

Trade conditions at the store of the W. F. Fredrick Piano Co. are satisfactory, especially in the Victrola department. The company has a large, fine stock of machines and records, and reports the outlook for holiday trade most encouraging.

The Story & Clark Piano Co. has opened an exclusive Edison phonograph department, with a large, fine stock of instruments, and report good business. H. L. Tinker, formerly with the May Co., has returned to the city, after an absence of four years, and is engaged with the company.

The Hart Piano Co., The Arcade, is having a fine run of trade in talking machines.

The recent enlargement of the May Co. store has afforded the talking machine department large additional space. Eight beautiful demonstration parlors have been artistically arranged for the convenience and comfort of customers and the transaction of business on the fourth floor. A large Victor trade is reported and conditions improving.

Phil Dorn, manager of the Collister & Sayle Co., says business in the talking machine department might be better, but that it is very satisfactory.

Business is fine at the Columbia store and Mr. Madson is elated over the prospects, Columbia dealers in this territory are all doing fine and have made extensive arrangements for the holiday trade.

The W. H. Buescher & Sons' Co. is busy and, with a fine stock of Victor goods to select from, Mr. Buescher anticipates a large holiday trade.

Mr. Friedlander, of the Bailey Co., says business as a whole is way ahead of last year, and that, judging from prospective buyers, the outlook in the talking machine line is most encouraging.

ADD TO YOUR RECORD PROFITS

BY PLACING THIS HANDSOME FLEXIBLE COVER IN THE HANDS OF YOUR PATRONS

This attractive flexible cover is designed to hold the Victor or Columbia semi-annual record catalog, and is bound in mahogany colored imitation leather, and lined with black silk cloth. The price of this flexible cover is so low that it permits you to give same free to your customers with the record catalog enclosed, thereby making a useful souvenir and a permanent advertisement; or you may charge a nominal sum for it if you desire. In lots of 100 or more, your name will be stamped on face of cover in gilt lettering free of charge.

No More Scratching of Cabinets and Tables by Record Albums

Our Albums are now equipped with LEATHER COVERED RING PULLS

This ring pull, which matches the album in color, makes the handling of the book easier than with the plain leather pull, and has all the practical advantages of the metal ring. This ring pull, being leather covered, cannot mar or scratch the highest polished cabinet or table.

HOW TO MAKE INSTALMENT BUSINESS PROFITABLE.

A Subject of Exceeding Interest and Value to the Talking Machine Dealer Discussed by Marion Dorian, Treasurer of the Columbia Graphophone Co.—Sets Forth Rules to Be Observed by Dealers If Success Is Desired—Terms of Sale Must Be Enforced.

We hear about the difficulties incident to instalment business. If dealers have had losses with this class of business it is largely because they have not gone about it in the right way.

There are five cardinal rules for the successful handling of instalment accounts. These have been thoroughly tested, and a fair try-out will prove them powerful aids in making instalment business what it ought to be.

There are exceptions to all rules, and circumstances will arise when it is wise to suspend the rule temporarily. In such cases the sensible dealer will act accordingly.

The five rules follow:

1. Investigate the customer in advance of delivery of goods.
2. Sell him no more than he can pay for comfortably.
3. Let terms be simple and clear-cut. Make sure the customer understands and accepts them.
4. Enforce those terms.
5. Do not allow arrears to accumulate.

Three-fourths of the trouble dealers have with instalment accounts is due to anxiety to secure a good sale. Insufficient or no investigation is made as to the responsibility, reputation, or antecedents of the customer. The sale is hurriedly consummated, the goods delivered and shortly thereafter the dealer learns to his sorrow that the customer is not what he represented himself to be. In many instances both customer and goods disappear.

It is easy to ascertain all it is necessary to know about the customer. His resources and income; his reputation for prompt payment and his general standing in the community. This should be done before the goods are delivered and will insure you against surprises.

Rule 2 is equally important. The advance in-

vestigation informs you as to the prospect's income; how permanent it is and what demands are made upon it by his family. With this information in your possession you can determine what it is safe to sell him. Suppose a prospect receives a salary of \$20 per week and has a family of four. If he has been receiving this salary for some time and his reputation is good you are justified in assuming he can safely pay \$2 or \$3 per week. More than that is dangerous, because allowance must be made for possible sickness of some of his family, which will make greater than ordinary demands upon his income. Eight to twelve months is the period within which an outfit should be entirely paid for. Allowing for a \$2 a week payment spread over eight months a customer could in that time pay for an outfit costing \$64. That would be the limit which the wise dealer would sell him. Many dealers make the mistake of selling a customer double the amount he can pay for comfortably, with the result that the payments become harder as they multiply and each payment day the customer feels he is carrying a burden. Consequently his attitude becomes one of antagonism and he pays grudgingly, whereas if sold a bill he can pay for comfortably, he does it cheerfully.

Many customers who buy goods on the instalment plan are of limited business experience. A complicated instalment lease is to them an incomprehensible thing. Your lease should be as simple and clear-cut as is consistent with adequate protection. The terms of the contract should be made clear, and customer should accept them in all particulars. Salesmen should be prohibited from making verbal agreements with customer. If special terms are made these should be written into the contract itself. If this is not done disputes are apt to arise which are destructive of the

mutual confidence which must exist to insure a continuance of patronage. The customer should be furnished a copy of the contract, so that he can refer to it at any time. In this way you gain the customer's confidence and he will not only give you his own future business, but induce his friends to do likewise.

Terms should be as reasonable as you can afford, but once these have been agreed upon and accepted they should be enforced rigidly. There is no casier way to spoil good customers than by giving the impression that terms are mere formalities. There is no surer way of getting a list of accounts in bad condition than by ignoring the regular date when an instalment is to be paid. If the customer has agreed to pay on Monday train him to make the payment on that day and not on some other day. If his payment is not made on Monday notify him immediately to bring in the payment or make it to your collector without further delay. The moment the first lapse occurs, get right after him and remind him that the goods were sold on definite and accepted terms, and that you expect him to perform his promise. If his payment has not been made by the close of business on Monday have the collector at his place of business or residence on Tuesday morning and you will save money. Even the most obdurate customer will respond to this kind of treatment, especially if the call is made promptly.

If you enforce the terms and train the customer to make payments regularly no arrears will accumulate. If you allow two or three payments to lapse it is like drawing eye teeth to get a customer to make up the arrears. You may secure subsequent payments regularly, but lapsed payments hang fire until the end. Instead of getting your account settled within the contract period it runs over some months, and persistent dunning, which often results in the loss of a good customer, is necessary, to say nothing of the added expense to which the dealer is put.

These rules may not be new nor be presented in a novel way, but if followed they will result in better and more profitable instalment accounts. They may be summarized as selecting a customer wisely; selling him judiciously; starting him correctly; keeping him in the straight and narrow path, and, finally, making him an asset because you have sold him an article which has afforded himself and family unlimited pleasure, and made it possible for him to pay for it without discomfort. You have made a lasting friend.

EFFECTIVE DEALERS' PUBLICITY.

The New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, is sending out to its dealers this week something novel in the nature of a slip featuring the words of that old-time favorite selection, "Mighty Lak' a Rose." This song was presented in the November list of new Victor records placed on sale the 28th of last month, and this slip is being used to excellent advantage. In preparing this dealer help, cognizance was taken of the fact that a large percentage of the dancing public likes to hum the song to which they are dancing, and in furnishing this slip these desires will be considerably facilitated.

KEEPING UP WITH THE DEMAND FOR VICTOR PRODUCTS.

The Victor Co. Compelled to Continually Enlarge to Supply Tremendous Demand for Machines and Records—New Grinding Plant, New Building for Shipping Department and New Power Plant Latest Evidences of Desire to Supply Needs of Trade.

The additions to the plant of the Victor Talking Machine Co. in Camden, N. J., made for the purpose of keeping at least in sight of the demand

affords an excellent idea of the progress being made on the new grinding plant, which will go far to reduce the possibility of record shortage in the future. Work on the new building is being rushed at full speed, and the plant will be put in operation as soon as completed.

Further increase in the facilities of the Victor Co. is marked in the erection of a building to house the shipping department, which will occupy an entire city block at Front and Cooper streets, Camden, N. J. When the new building is completed the present shipping department will be used for storage purposes. Other recent Victor improvements include the construction of two bulkheads built into the Delaware River at a cost of \$25,000, which will provide the plant with additional one and a half acres of ground. The bulkheads will also provide for extensive wharves capable of accommodating vessels of twelve foot draft.

A new power plant is also being constructed in connection with a new pumping station. The power plant will include a 5,000-horsepower boiler, and the pumping station will be equipped with direct connecting turbine engines. It will have a

New Shipping Department Under Construction.

for the Victor products, have become so frequent that it takes new buildings of more than usual size and importance to arouse particular interest. A new addition, the significance of which will be

New Grinding Plant of Victor Talking Machine Co.

much appreciated by the trade, is the grinding plant being erected to provide for a great increase in record output. The accompanying illustration

10,000,000 gallon capacity for manufacturing purposes, and the main fire pump will have a capacity of 1,500 gallons per minute. Secondary pump will

also be provided with a capacity of 750 gallons per minute. Two of the furnaces in the fire plant will be equipped to burn sawdust and wood shavings from the cabinet factory.

TALKING MACHINE MEN MEET.

Executive Committee of the Eastern Talking Machine Dealers' Association Discuss Plans for Changing Name and Widening Scope of That Organization—General Meeting Soon.

The executive committee of the Eastern Talking Machine Dealers' Association held a special meeting late last month at the office of J. G. Bremner, the president, at 187 Broadway, New York, for the purpose of mapping out an active fall campaign for the association. Another meeting of the executive committee will be held shortly, at which time a date will be set for a general meeting of the association.

As a result of numerous discussions it is probable that the name of the association will be changed and the scope of its activities broadened within the very near future. It is the consensus of opinion that the association should accept as members men connected with every department of the talking machine business in New York and vicinity, whether jobbers, dealers or salesmen, with various classes of membership to take care of the different branches of the trade, if desired. It is believed that, by taking in representatives of different branches of the trade, the scope of usefulness of the association may be materially extended and a great number of important matters handled.

The change in the organization of the association was discussed at length at the meeting of the executive committee, but no definite action will be taken in the matter until the general meeting of that body about the middle of November. Of the new names suggested for the association that of "The Talking Machine Men of New York" is most favored as indicating the scope of the body.

The employment bureau of the association is now in full working order, and dealers desiring salesmen or other assistants, and salesmen and others desiring positions are requested to communicate with President Bremner, communications being held confidential.

Dealers not now members of the association are urged to file their applications before the call for the general meeting in order to be able to attend that session.

Percy A. R. Dow, of San Francisco, the noted vocal teacher, is a great admirer of the talking machine, which he uses in conjunction with his teaching.

ELMIRA ARMS CO.
117 MAIN ST., ELMIRA, N. Y.

THE TRADE IN NEW YORK CITY AND VICINITY

The past month in local talking machine circles has been characterized by a shortage in machines and records, which bids fair to become more marked during the next three weeks. Although the factories are working to full capacities in all departments, they have been unable to supply the demands of their trade, and present indications point to this shortage extending to practically all classes of records, and the majority of machines.

At the present time, the machine shortage is being confined principally to the medium priced machines, retailing at \$75 and \$100, but this was to be expected, in view of the fact that these machines have been the best sellers since the first of the year in all parts of the country. The record shortage is more general, including popular and semi-classic selections in addition to an ever increasing shortage of dance records. The dance craze, which was thought to be at its height this

summer, is still growing, and with the advent of cold weather, there is a demand for dance music for home gatherings which is producing a most profitable trade for the live-wire dealer.

Judging from the reports submitted by local jobbers and dealers, there has been an unusually heavy trade the past month in foreign records. Those dealers who carry representative stocks of these records state that they are adding new names to their customers' lists with surprising regularity, and that it is a class of trade which is certain to assume still greater proportions. When the present European war started this summer, the foreign record trade showed a marked depression, due probably to the unsettled conditions existing in foreign quarters throughout the country. The second month of the war, however, witnessed a revival of interest in foreign record production which has steadily increased, culminating last

month in the closing of a local foreign record business that in many instances exceeded that of last December.

Utilizing Publicity.

Local advertising of talking machines and records has been unusually active the past month, and it is significant that the bulk of this publicity has been devoted to the medium and high-priced machines with very little reference to the cheaper models. That this advertising has produced satisfactory results is evidenced by the fact that a number of the advertisers have increased their space each week, and added to the lists of newspapers they have been using. Several lists of records were also featured prominently in this advertising, and these lists acted as valuable suggestions for prospective record purchasers.

The talking machine trade as a whole has been excellent the past month, and far better than kindred retail lines. Business conditions in New York have not yet recovered from the recent stagnation in financial circles, and it is rare indeed that any trade can boast locally of a gain over the fall months of 1913. That the talking machine industry is enjoying a season of prosperity and banner sales may be attributed to a considerable measure to the optimism of the manufacturers and their willingness to spend huge sums of money for publicity in the face of retrenchment in all other lines. The stability and strength of this industry is well illustrated by this year's business, which will undoubtedly break all previous records, despite the handicaps surrounding commercial activity in certain parts of the country.

J. Newcomb Blackman at the Helm.

J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, Victor and Edison cylinder distributor, and one of the most popular men in the local trade, returned to his desk the first of the month after an enforced absence of ten weeks, occasioned by a serious attack of typhoid fever. Mr. Blackman spent a week convalescing at Atlantic City, and returned to his office imbued with energy and vigor for the fall campaign. In a chat with *The World*, he stated that October business showed a nice increase over that of October, 1913. Blackman dealers report a heavy demand for the Victrolas retailing at \$75 and \$100 and have placed large orders for these machines. During the past few weeks, this company has prepared a series of signs for window display, embodying distinctive features which should make them of considerable value to Victor dealers. These signs feature various types of records, including the popular fox-trot selections, the Victor records for the Castle Gavotte and similar timely topics.

Thirty Per Cent. Increase for October.

"Our sales totals for last month showed a 30 per cent. increase over those of last October," said R. F. Bolton, manager of the wholesale headquarters of the Columbia Graphophone Co., 89 Chambers street, New York, "and our business this month has started with a larger number of advance orders than ever before. Last year was a record breaker, but every month this year has run ahead of the corresponding month of 1913, so that we have no cause for complaint. There is every indication of a decided shortage next month, and we have suggested to our dealers that they anticipate their record requirements as much as possible, in order that they may not lose any sales during the holiday season. All of our machines have been ready sellers the past month, but our new 'Leader' and 'Mignonette' with the individual record ejector are specially worthy of mention. Collections have been remarkably good since October 1, and taken as a whole, this important division of our business is very satisfactory."

Tells of Business Growth.

Referring to Edison disc progress in their territory, A. W. Toennies, of the Eclipse Phonograph Co., 203 Washington street, Hoboken, N. J., ex-

THE TRADE IN NEW YORK CITY—(Continued from page 24).

clusive Edison distributors, remarked as follows: "The appreciation of the Edison disc product in the minds of the trade and music-lovers through this state is growing rapidly, and the new Edison disc records are being praised by all who hear them. Our dealers are well pleased with the record distribution plan inaugurated recently by the Edison factory, whereby new records are received weekly. This constant issuance of new selections enables the dealers to offer their trade the very latest of all classes of music, and permits of the development of a most profitable record business. Edison disc phonographs of the \$200 and \$250 types are by far the best sellers in our line, and the Edison disc dealers that we signed up during the past few months report the closing of an excellent fall business."

How the Dealer Is Helped.

V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, New York Victor distributor, announced to the trade last week the completion of a new code to record-stock flag system that contains numerous practical features which aim to improve the dealer's record business. This company has in the past issued various co-operative plans for the development of their dealers' business, and the success of these plans is well evidenced in the voluminous file of unsolicited letters of praise which Mr. Moody has received from appreciative Victor dealers. The latest plan has been in course of preparation for some time, but was held up because of the inability to secure the necessary labels. The system involves the use of nine colored labels, each representing a certain class of music, in small size and a foreign language in the large size, as for example, black signifies bands and German or Ruthenian. It is almost impossible to be mistaken with the foreign language labels, as the dealer catering to German trade will hardly carry Ruthenian records and vice versa. Mr. Moody has advised the trade that the New York Talking Machine Co. has arranged for the manufacture of the colored labels,

which will be practically furnished the dealer at cost. The advantages of this system, used in conjunction with the company's stock system, are many, and at once apparent to the dealer who appreciates the value of being able to know at first hand the deadwood in his record stock, the best sellers, etc. The proper use of this system will save the dealer and customer valuable time, and by enabling him to balance his record sales properly will increase the efficiency of the dealer's record department.

Establish Many Dealers in New York.

Although the Pathé Frères Phonograph Co. only made its announcement to the trade a few weeks ago, it has already established quite a number of dealers in New York and the adjacent territory, and has applications on hand for many more dealer licenses. The quality of the products manufactured by the company are generally recognized, and the many models of the Pathephone are scoring a signal success. Pathé discs, which include every class of music now on the market, are winning approval from all of the company's dealers, and the records for dance purposes in particular, which were recorded under the supervision of Maurice and Florence Walton, have achieved noteworthy success.

Made Tremendous Hit.

When the Columbia Graphophone Co. issued last month "It's a Long, Long Way to Tipperary," it felt that this record would serve as a timely reminder to many patriotic sons of Great Britain in this country, but it was not quite ready for the tremendous ovation that was accorded this record when it made its appearance on the market. Hayward Cleveland, manager of the Columbia department at the F. G. Smith store, 335 Fifth avenue, and one of the pioneers of the retail trade, states that he has never seen a record which achieved the instantaneous fame of the "Tipperary" selection. All of the Columbia representatives in New York affirm that this record is the best seller in the catalog at the present time, and is in demand

because of its patriotic significance and true musical value.

Open Fifth Landay Store.

Landay Bros., the prominent Victor distributors, will open this week their fifth exclusive Victor store, which will be located at 23 West Forty-second street, in the heart of the high-grade shopping district, and directly facing the New York public library. The illuminating system for this store will be especially beautiful, and the artistic character of the decorations may be summed by pointing out that this store will surpass in this direction all of the other Landay stores, which are recognized throughout the trade as being models of modern perfection in the display of Victor products.

Many Visitors to Edison Shop.

The Edison Shop at 473 Fifth avenue, the opening of which is noted in detail in another part of this issue, is proving to be the Mecca of music lovers from far and near, and the daily gatherings in the recital hall average about a thousand people, which is a remarkable attendance for informal recitals of this character. The sales staff at this store, comprising P. C. Sweeny, Raymond Duncan and Edward Levin, are being kept busy from early morning until closing time, and the favorable impression left by the concerts is indicated by the substantial sales which are being closed regularly day by day.

Increasing Its Wholesale Business.

Under the capable management of Thomas F. Green, the Silas F. Pearsall Co., 18 West Forty-sixth street, Victor distributor, is rapidly increasing its wholesale business. New accounts are being signed up regularly, and these additions to the Pearsall clientele are not only located in Greater New York, but in the surrounding territory as well. Thoroughly conversant with every detail of Victor merchandising, Mr. Green is extending valuable and practical co-operation to the many Pearsall dealers.

The advice "follow the natural bent" doesn't mean for you to be "crooked."

HOLIDAY TRADE DEVELOPING IN MILWAUKEE.

Heavy Demand Reported for Both Machines and Records—A. G. Kunde Opens New Store—Other New Concerns Enter the Field—Live Advertising Campaigns the Rule—Placing Talking Machines in Schools—Gensch-Smith Co. Expands—News of Month.

(Special to The Talking Machine World.)

MILWAUKEE, WIS., November 10.—Indications are that the holiday trade is beginning to open up, especially about the State, even at this early date. Jobbers for all the leading lines of talking machines say that they are being rushed with business as a result of the action of dealers in preparing for the holiday rush. Conditions about Wisconsin are somewhat more favorable than in the city of Milwaukee, and it is probably only natural that the talking machine business is more active than here in the city. The situation locally is showing steady improvement, however, and jobbers and retailers anticipate that total business will average up satisfactorily.

"The demand from Victor dealers all over the State for both machines and records is unusually good and it is requiring every possible effort to fill orders," said S. W. Goldsmith, vice-president of the Badger Talking Machine Co., jobber for the Victor line. "We have established several new Victor dealers during the past month. Business at the Badger Victrola shop, the retail branch of our concern, is showing steady improvement."

Probably one of the main reasons for the better trade about State is the fact that crops have been exceptionally good this season. There is really plenty of money in this section of the Northwest, the only problem being to prevent people from hoarding all of it. The Wisconsin crop report for October, recently issued by James C. MacKenzie, secretary of the State Board of Agriculture, shows that crops were satisfactory in all lines. The yield of corn, most lines of grain and in tobacco was the largest in recent years.

Kunde Opens New Store.

The handsome new store of A. G. Kunde, Columbia jobber and retailer at 516 Grand avenue, located in the new Miller building at Grand avenue and Fifth street, was opened to the Milwaukee trade during the latter part of October. The establishment is without doubt one of the finest of its kind in Milwaukee and offers an appropriate setting for the Columbia goods. There are twelve sound-proof booths in the store, eight being located on the first floor and four in the basement, where the foreign records are demonstrated. A feature of all the booths is the fact that they are ventilated thoroughly, each booth being equipped with a modern ventilating system, so arranged that the air is changed constantly. The general color scheme followed in the store is brown, even the furnishings conforming to this color. The window display facilities are ample, and Mr. Kunde is making good use of the opportunities in this line. It is possible that a formal opening of the new establishment will be held within the near future. Business has been so good since the opening of the store that Columbia sales have been climbing to a new high point.

Charles F. Baer, manager of the Columbia business in Chicago, accompanied by Mrs. Baer and W. W. Pearsons, manager of the Dictaphone department in Chicago, motored to Milwaukee recently and were the guests of Mr. and Mrs. A. G. Kunde at the new Columbia store.

Help "Buy-a-Bale" Movement.

One of the few bales of cotton to appear in Milwaukee as a result of the "Buy-a-Bale" movement to help the South, was purchased by S. W. Goldsmith, vice-president of the Badger Talking Machine Co., Victor jobber. The bale has been placed in the windows of the Badger Victrola Shop, where it is attracting much attention.

Large Victrola Sales.

Victrola sales at the Edmund Gram Piano House have been climbing to a new high mark of late, due to the fact that Paul A. Seeger, manager of the Victor department, has been given exclusive use of one of the Gram automobiles, with which he is calling on the trade.

Open New Department.

Another new Victrola department was opened

in Milwaukee on October 26, when Edward Schuster & Co. threw open its third new department store. The new establishment is located on the south side at Mitchell street and Sixth avenue, and has been meeting with a big business since the opening. The Schuster concern carries the Victor line at its other two department stores and naturally installed the same line at its new store. M. Marks, who is in general charge of the piano and Victor departments at the other two Schuster establishments, has the management of similar departments at the south side store.

New Edison Dealers Appointed.

The Edison business in Milwaukee has been showing decided increase of late, according to the record attained at all the local stores. The Edison Shop, the retail branch of the Phonograph Co., of Milwaukee, C. Niss & Sons, the George Eichholz Co., the Flanner-Hafsoos Music House and Charles H. Scheff & Sons have all been meeting with an increase in trade, especially in the higher priced machines. William A. Schmidt, general manager of the Phonograph Co., of Milwaukee, reports the locating of several new Edison dealers in Wisconsin and Upper Michigan, among them the Hook Bros. Piano Co., of Madison, the capitol city of Wisconsin. Hook Bros. have arranged new and special quarters for the Edison line.

In Charge of Retail Sales.

Gustave A. Schultz, formerly connected with some of the leading piano houses in Milwaukee, has been placed in charge of retail sales at the Edison Shop, 213-215 Second street, the retail branch of the Phonograph Co., of Milwaukee. Mr. Schultz was at one time manager of the talking machine department of the old Rohlfing Music House and is well prepared to fill his new position. William Idle, traveling representative of Thomas A. Edison, Inc., in Wisconsin and Upper Michigan, has been spending some time in his Michigan territory of late.

Reports Growth of State Business.

Harry R. Fitzpatrick, traveling representative of the Victor Talking Machine Co. in Wisconsin, northern Michigan and northern Illinois, reports that general business conditions are showing decided improvement and that dealers are buying more freely. Mr. Fitzpatrick makes his headquarters in Milwaukee.

Takes Over Agency.

News has been received from Waukesha, Wis., that the Victor agency and stock of A. S. Putney, Jr., located at 506 Grand avenue, has been taken over by the Waukesha Victrola Shop.

Advertising Brings Results.

Milwaukee's two leading downtown department stores which carry the Victor line, Gimbel Bros. and the Boston Store, have been meeting with a big business of late, partly as a result of the consistent advertising carried on by both. L. C. Parker, enterprising manager of the Gimbel Victor department, reports that Victor sales made substantial gains during October. Carl W. Abbott, in charge of the Boston department, has increased his force and is making some fine sales.

Display for Benefit of Teachers.

It is safe to say that the teachers of the State are now thoroughly familiar with the Columbia line as a result of A. G. Kunde, Columbia jobber and dealer of Milwaukee, featuring three types of Columbia machines at the annual convention of the Wisconsin State Teachers' Association, held at the Milwaukee Auditorium, November 5, 6 and 7. Mr. Kunde had one large machine on the platform, which was made good use of during the sessions, and two other machines located in the lounging rooms. R. G. Winters, Chicago, manager of the educational department of the Columbia Phonograph Co., was here in Milwaukee to assist Mr. Kunde in the demonstration work.

Enlarges Quarters.

The Gensch-Smith Co. has been finding business so good that it has been forced to enlarge its quarters and has secured a space 16 x 20 feet in dimensions adjoining its present store. The company sold Style XI Victrolas to the Carlton Hotel and the Layton school of Milwaukee last month.

Talking Machine in the Schools.

That the teacher of a rural school should by all means secure a Victrola for her pupils, even if she has to go out and borrow one from some family in her district, was the contention of Miss Delia E. Kibbe, Chippewa Falls, Wis., who spoke on "Music in the Rural Schools" before the recent annual convention of the Northwestern Wisconsin Teachers' Association, held at Eau Claire. Miss Kibbe recommended the use of mechanical instruments in every grade in the rural schools as a means of teaching appreciation of music, and urged the teacher to secure a Victrola at any cost. She suggested the greatest care in the selection of records, and laid particular emphasis on the necessity of the country school teacher realizing the importance of musical work, because of the influence it would have upon the pupils.

NEW YORK

AN EFFECTIVE WINDOW DISPLAY OF VICTOR MACHINES.

(Special to The Talking Machine World.)

LANSING, MICH., November 9.—The accompan-

ing illustration shows the work of Max Wenzel, manager of the talking machine department in the large furniture store of M. J. & B. M. Buck of this city. Mr. Wenzel has shown a decided

aptitude not only for display window work of the better sort but also for the arrangement and conduct of the department itself. Mr. Wenzel has vastly increased the business of his section and supervised and recently made a large number of improvements and alterations designed to care for an ever-increasing patronage.

Mr. Wenzel is very friendly with George P. Cheate, traveling sales manager of the Talking Machine Co., of Chicago, and while the latter was in Lansing recently the two discussed plans for additional betterment of the department work. Mr. Cheate reports an excellent business all through this section of Michigan.

of dance records, which has been stimulated also by the large advertisement, almost a two-page spread in a local newspaper, in which the local Columbia houses have joined in advertising such records. If anything, the dance records are eclipsing the last year's record, which was considered phenomenal.

Mr. Salmon, of the wholesale department, reports a steady betterment of jobbing conditions, and he says that local dealers are buying freely in anticipation of a good winter's business on the strength of the improvement they have seen in local conditions. The orders from the country, too, are reported on the up-grade.

The Silverstone Music Co. is quite proud of two recent additions to the list of local Edison disc dealers, which has a total of fifteen in this city and environs. One of these two is the Kunkel Bros. Music Co., of which Prof. Charles Kunkel is the leading spirit.

The other addition to the list is the Royal Music House, of 5906 Delmar avenue, opened by Roy L. Wilson, recently an executive of the Banner Buggy Co., a flourishing institution of this city.

Some recent visitors to the Silverstone Music Co. include: J. W. Milligan, Carbondale, Ill.; W. H. Day, manager C. W. Best & Sons, Fredericktown, Mo., and J. H. Bennett, of Sullivan, Mo., who is selling machines in the Ozark Mountains on the old sewing machine wagon plan and who is making a success of it.

A. H. Reynolds, of the Silverstone Music Co., is making a Southern tour.

ACTIVITY REPORTED IN ST. LOUIS.

Jobbers and Dealers Make Excellent Reports—Koerber-Brenner's Expanding Trade—Higher Priced Outfits Have the Call—New Edison Dealers—No Pessimism at Columbia Co.—Recent Visitors to the Sainly City.

(Special to The Talking Machine World.)

St. Louis, Mo., November 9.—All of the local jobbers assert increases over last year and stand ready to show monthly totals. With the retailers the situation is slightly different. All are doing more business, apparently, than dealers in other lines, and those who cater chiefly to the high-priced trade, from \$75 a machine and up, are beating last year's sales records. Those who sell chiefly lower-priced machines are finding the sledging a bit hard, but, as outstanding monthly collections are improving rapidly, they expect the sales business to pick up as soon as the wage earners are again returning to hours that leave a margin for some luxuries.

B. B. Taylor, for five years with the Victor factory sales force and recently located in Illinois for that company, has joined the sales staff of the Koerber-Brenner Music Co., of this city, and will travel in Missouri, Illinois and Indiana in the interests of the Victor line, which now is handled to the exclusion of all other music goods by the Koerber-Brenner Co.

E. C. Rauth, secretary of the Koerber-Brenner Co., says that their trade is excellent and totals are showing a marked increase over last year's sales. This company has experienced a little show of dull trade in most of their rural territory, although some parts of the South have been slow in placing orders. In the grain country the talking machine dealers are ordering freely, feeling sure that the people will buy when they sell their grain, which is slow going to market this year because of a natural desire on the part of the farmer to share in the war prices, which all believe are bound to come.

Manager Robinson of the Thiebes Piano Co. talking machine department reports an improving trade, and he continues to dwell on the opportunity to compare the three leading makes of machines at the demonstration rooms of that company. Mr. Robinson has added to his sales staff L. B. Prince, formerly with the Thiebes Co., but recently working in the East, and R. G. Shelp, recently with the talking machine department of the Vandervoort Music Salon.

Aeolian Hall is now selling Columbias and is meeting with good success. The additional space recently gained for the retail department through the first floor demonstration rooms has been appreciated of late.

Manager Irby Reid, of the Columbia warerooms, is very proud of the feat of his eight-year-old daughter Dorothy, who has sold a Columbia machine to her school in Webster Groves, a suburb.

At the Columbia warerooms there is a positive

rule against pessimism. Everybody there must be optimistic, and visitors who would be treated courteously must express similar views. As a consequence business is going ahead nicely.

Business with the dancing teachers and dance halls has resulted in an extraordinary sale

THE CENTURY

A Distinct Innovation in Talking Machines

CENTURY

CENTURY

Examine the illustration shown above, and see if such a talking machine will not fit perfectly into your business.

These instruments are produced by a corporation which, for years, has had a well established and successful business, and it will be seen that the Century Cabinets will harmonize perfectly with library or drawing room furniture.

They are being made in four styles, including the Chippendale, Sheraton, Colonial and Artcraft, each style true to the period which it represents. They retail at \$150 and \$200.

A feature of these instruments is that **they will play any record on the market.** To do this requires but an instant adjustment, changing the position of the sound box and the insertion of a needle or jewel point. No separate attachment is necessary for the different types of record.

Dealers will see at once what trade possibilities are open to them with this new line.

In the illustration is shown a Cabinet in the Sheraton style. Units for storing music rolls are interchangeable with units for disc records. The method of filing and indexing records is the most flexible and efficient yet offered.

All who have listened to the Century have been enthusiastic in their predictions for it. The musical qualities are remarkably clear and pure, and the overtones of the different instruments are brought out with surprising effect.

As a musical instrument, the Century is destined to immediately win high rank.

Recollect, the Century is not an experiment. It has been perfected by the manufacturers, who feel that in inviting attention to the Century phonograph they are offering a product which will be approved by the talking machine trade.

Behind the Century stands a complete organization which is in a position to cater to the increasing demands of the talking machine trade.

1182 BROADWAY

NEW YORK CITY

GEO. W. LYLE REVIEWS CONDITIONS.

Vice-President of Columbia Graphophone Co.
Very Optimistic Regarding the Business Situation Upon Return from Transcontinental Trip—Some Recent Important Columbia Connections Throughout the Country.

"Although general business conditions throughout the country are not of the best," says George W. Lyle, vice-president of the Columbia Graphophone Co., New York, who returned last week from an extended trip to the Coast, "there seems to be a much more optimistic feeling prevailing, and now that business is adapting itself to the European war conditions, trade in all lines seems to be improving steadily.

"Columbia business, notwithstanding these unsettled conditions, was never in better shape than

POSITION WANTED

By a highly educated young married man who has had eight years' experience as a talking machine store manager. Am thoroughly familiar with Victor and Columbia product and know how to build up your business. Would not object to going to a small, good city. Address "W. A.," care The Talking Machine World, 373 Fourth Ave., New York City.

PARTNER OR MANAGER WANTED

Wanted for my branch store, 246 Huntington Ave., Boston. This establishment is located in the very heart of the musical center. I want a man who understands the Talking Machine business thoroughly and can produce results. This is a splendid opportunity for the right man. Rosen's Talking Machine Shops, 3 School St., Boston, Mass.

AN UNUSUAL OPPORTUNITY

In order to take care of its rapid growth of business a Talking Machine Company (operating under Victor contract), with excellent references, show room and equipment, doing a very successful business, with a most favorable lease, finds it necessary to increase its capital stock by \$20,000. It would be pleased to correspond with one who can take an active part and furnish additional capital. If you mean business, can qualify and take active part, give a few particulars and an interview will be arranged for. Address "Finance," care The Talking Machine World, 373 Fourth Ave., New York City.

WANTED

Business partner in an established Talking Machine Company selling Victor and Edison machines. Best of references required and given. Address Smith, care The Talking Machine World, 373 Fourth Ave., New York City.

WANTED FOR CASH

Wanted to buy job lot of disc Talking Machines and records. Will pay cash. Address "Cash," care The Talking Machine World, 373 Fourth Ave., New York City.

AN OPPORTUNITY

Capitalist and business man wanted (or for sale) to handle patented invention (not an attachment), but consisting of an entirely new PHONOGRAPH TELEPHONE, etc., etc., instrument which eliminates all distortion of form or quality, superior to any known method on the market. The correct recording, reproducing and transmission of music at last made possible. Your business and financial responsibility a first requirement. For further particulars address Palys L. Chevrier, 1910 Hillcrest Road, Hollywood, California.

FOR SALE

1,500 brand new double-faced 10-inch records, mostly band selections. Must be sold at once at 20 cents each. Address The German Phonograph Co., 275 South Fifth street, Brooklyn, N. Y.

WANTED

An experienced Talking Machine saleswoman. Apply by letter only. Globe Talking Machine Co., 9 West 23d St., New York City.

at present, and this is evidenced in the fact that our sales totals this year show a substantial margin over those of 1913, our previous banner year. Internationally prominent concerns are arranging to handle Columbia product, and the high standing of many of the new accounts we have closed the past few months indicates a movement towards Columbia goods more pronounced than at any time in the history of the company. Marshall Field & Co., the Aeolian Co., the New England Furniture & Carpet Co., and the Denver Music Co. are all concerns whose prestige is country-wide, and recognized in all trade circles."

While on the Pacific Coast, Mr. Lyle made arrangements with a manufacturer of talking machine cabinets, it being the intention of the Columbia Co. to have manufactured on the Coast a large portion of their cabinets for the far Western trade, providing suitable quality of product can be assured.

Mr. Lyle states that the new Columbia Grafonola "Leader" with the individual record ejector, an exclusive Columbia feature, has met with a most pronounced success, and while this has been announced and advertised but once or twice, orders have been placed for over five carloads of the special record interiors and orders for this type of machine are over 1,500 in arrears.

While on this trip, Mr. Lyle attempted to make clear to the trade that the demand for Columbia product in this country was such that he feared there would be a greater shortage of machines than ever and that dealers must anticipate their requirements, placing their orders now so that they may protect themselves for the holiday business which is so close at hand.

OHIO ASSOCIATION ACTIVE.

The Northern Ohio Victor Association Considers Important Questions at Meetings, Including That of Sending Records Out on Approval and Price Cutting.

(Special to The Talking Machine World.)

CLEVELAND, O., November 7.—The Northern Ohio Victor Association, which was organized last January, has held several well-attended and very interesting meetings in this city during the last few months and discussed various questions of importance to the trade.

A question that has aroused much interest on the part of the association members is that of sending records on approval to the homes of machine owners. It is the consensus of opinion that records should be sent on approval only when the customer agrees to retain and pay for at least 50 per cent. of such records. It is probable that a rule to this effect will be put in force by the association at its next meeting. And it will also be provided that no records will be sent upon approval after they have been demonstrated in the warerooms.

The question of price cutting has also been a live topic of discussion in association circles, for in Cleveland, as in many other cities, there are always numerous reports of certain concerns indulging in price cutting. It is the intention of the association to investigate all such reports thoroughly and to take united action when the reports are found to be true.

NEW CRESCENT MACHINE MODELS.

Two Low Priced Machines Among Those Announced by the Crescent Talking Machine Co.—Play Both Styles of Records.

The Crescent Talking Machine Co., 99 Chambers street, New York, announces several new models of Crescent talking machines, among them being a model which retails at \$12.50 and one for \$15. The company also is advising the trade of its line of "Crescent" records, which will be vigorously exploited as the weeks go on. In connection with the models of Crescent machines, the company features the fact that a mere turn of the soundbox enables one to play both styles of records.

It's far easier to take things as they come than to chase after them when they've gone.

"It Pays to Advertise"

A Columbia

Every Columbia dealer can complete

Make this "Christmas" season the most *profitable* you've ever known by helping your patrons make this the most *enjoyable* Christmas they've ever known. You can if you really go after the people who are being told this month, in every class of standard publication, about the Columbia Grafonola as the ideal Christmas gift, and who are being urged to come to you to see it and hear it. Your own good salesmanship can easily complete these sales already half made—you have the "proofs" right in your store—turn the buying interest we are creating into cash for yourself.

Show the new "Leader," with its distinctive and exclusive Columbia feature, the individual "record ejector." At its price, \$85 with the record ejector, \$75 with ordinary record racks, it is just such a musical instrument as will appeal to those who desire the appearance and solidity of the highest priced at a considerably lower cost. And not forgetting, of course, to emphasize its wonderful tone quality.

If your customer prefers to make his cost limit \$25, you can certainly show him wonderful value for his money in the "Eclipse." And when he understands that the difference between the "Eclipse" and the more expensive Columbias is one of degree—of tone volume, of such items as size, record compartments, covering lid, finish and motive power—he is pretty sure to realize that his \$25 is buying him a great deal of quality.

You will find many who want an instrument that most nearly approximates the "De Luxe" in size—but want to invest about half of its cost. These persons will find their ideal in the "Mignonette" at \$100. And when demonstrating the "Mignonette" you have an excellent opportunity to emphasize once more the superlative Columbia tone, so strikingly embodied in this model.

No matter what price limit may be set, every customer should surely see and hear the "De Luxe" at \$200. It is such a perfect demonstration of the finest achievement in cabinet instruments that it will convince him beyond argument of the superiority of the Columbia. And if price is secondary with him, it is the "De Luxe" he will buy.

And to those who have fixed \$50 as about what they want to spend, and expect to get in return almost every feature that any "talking machine" at any price can offer, show the "Favorite." You need hardly be told of the importance of the "Favorite" as a representative Columbia, or reminded how great the market has always been for this model.

You will likewise have many callers who are convinced they want a Columbia, one that will play any and all music well, but who are not prepared to spend even as much as \$25. The "Meteor" enables you to give them just what they want—a real Columbia; and at the price, \$17.50, a wonderful demonstration of the continual fun and pleasure afforded by these ideal musical instruments. It makes a gift that is a real gift.

Whatever model of a Columbia Grafonola your customer finally decides to buy, you know he is buying a musical instrument that in tone, tone-control and in every refinement and feature making for perfection he is buying the best. And putting this enthusiasm into the selling means easy sales and many sales.

Make Up Record Suggestion Lists: Don't overlook the big profit possibilities that the Record sales hold. Make up lists of records, from a few at 65 cents each to complete assortments of every class of music. The Columbia Catalog makes this easy to do, and it means *money* for you. Remember, the purchase of a Columbia Grafonola for a gift will be all the more complete for an outfit of records. And your suggestion will carry weight with the person buying a machine, when it comes to buying the records to go with it.

ENTERS TALKING MACHINE FIELD.

Century Cabinet Co. Ready to Introduce to the Trade the Century Phonograph and Record Filing Cabinet—Several Handsome Styles Prepared—Some Details Regarding the New Products and Their Distribution.

The Century Cabinet Co., 1182 Broadway, New York, one of this country's largest and most successful manufacturers of book cases and filing cabinets of all descriptions, has entered the talking machine field, after many months of preparation. The company has just placed on the market, and is now ready to deliver the Century phonograph and record filing cabinet which is composed of three units—a phonograph in one unit, and two record filing cabinets, or one record and one player roll cabinet, if desired.

According to present plans four styles of cabinets will be issued, the Chippendale and Sheraton styles to retail at \$200 each and the Colonial and Art Craft to retail at \$150. These styles are faithful reproductions of the periods they represent, and are finished in the same high-grade manner that has characterized the manufacture of the Century Cabinet Co.'s products in the book case and filing cabinet fields.

The phonograph which is contained in the top unit embodies certain new and perfected reproductive principles which were carefully tested and tried out at the company's factory in Utica, N. Y., and their musical value established before they were included in the completed phonograph. The Century phonograph is equipped to play any record on the market, without the use of any attachment whatsoever. By slightly changing the position of the sound-box and the insertion of a needle or jewel as may be desired, the phonograph is ready to play records cut laterally or on the hill and dale principle.

The Century phonograph and record filing cabinets are designed to harmonize completely with the furnishings of any room wherein they may be placed. The three units combine to make a most artistic piece of furniture, and additional units harmonizing in every detail with the original phonograph and cabinets will be furnished as needed.

The filing cabinets contained in the Century units embody a perfected method for the filing of records which makes for accessibility, safety and convenience. Each unit will contain 150 records of average thickness, or 75 thicker records. A patented principle termed a "rocker" permits of the instantaneous selection of a desired record without the necessity of holding aside the records not wanted.

The Century Cabinet Co. will market its products through the usual methods of talking machine distribution. The sale organization is rapidly nearing completion, and the excellent reproductive powers of the Century phonograph, the fact that it plays any make of record on the market without any extra attachment and the artistic appearance of the cabinet are some of the important sales arguments which will be presented.

The Century Cabinet Co. controls two large

factories at Utica, N. Y., and Fort Plain, N. Y., the former one now being given over in part to the manufacture of the Century phonograph and record filing cabinets. The company has furnished filing cabinets to the United States Government for many years, and is well known from coast to coast by reason of the success of its book cases, filing cabinets, etc.

NEW QUARTERS IN HOBOKEN.

Herman Jaffee Planning to Occupy Handsomely Equipped New Store in That City Later This Month—Handles the Victor Line.

Herman Jaffee, who for several years past has sold Victor talking machines and records at 122 Washington street, Hoboken, N. J., in connection with a stock of sporting goods and photographic supplies, has made arrangements to move to new and larger quarters at 118 Washington street shortly after November and as soon as the premises are remodeled to meet his requirements.

The new store will be equipped with four hand-

some sound proof booths having plate glass panels and being decorated with dainty carvings on the frames. The booths, as well as most of the woodwork in the store will be finished in ivory effect. On the opposite side of the store from the booths will be the record department and general machine showroom, also in ivory finish. The photographic and sporting goods departments will occupy considerable space in the front of the store.

Modern show windows with Mr. Jaffee's name, and the words Kodaks and Victrolas set above in leaded glass will insure the attractiveness of the new store from the front. A working sign using 500 electric light bulbs will also be a feature that will prevent anyone passing along Washington street from overlooking the new store.

The war in Europe has had a direct and bad effect on Hoboken's business owing to the fact that several large German steamship lines docking at that city have been forced to suspend service and lay off hundreds of sailors, longshoremen and other employes, but there is still business to be had by those who go after it.

The "OGDEN"

A Sectional Filing Cabinet and Sales System that—

- Saves time
- Saves money
- Saves space
- Cuts out dead stock
- Increases sales
- Fits your needs

and we are now prepared to make delivery on short notice. Fifty cabinets now on the floor and orders will be filled in order received—be the first to get yours in!

WORTH TEN TIMES ITS COST

J. B. OGDEN
LYNCHBURG, VA.

NOW ASSISTANT SALES MANAGER.

Thomas J. Leonard Appointed to This Post by Thomas A. Edison, Inc.—Familiar with the Policies and Plans of This Big Organization.

The accompanying photograph presents Thomas J. Leonard, who a few months ago was appointed assistant sales manager of the phonograph department of Thomas A. Edison, Inc. Mr. Leonard has been connected with the Edison interests since 1895 and is thoroughly familiar with the policies and plans of this big organization. He was associated as assistant sales manager of the dictating machine department, as well as being connected with the auditing staff, and was in immediate charge of the house publications.

Previous to his coming with the Edison Co. Mr. Leonard was connected with the General Elec-

Thos. J. Leonard.

tric Co. and the American Locomotive Co. at Schenectady. He has also served his time as a newspaper reporter. So, with this training, there is no question but that the future holds excellent opportunities for the utilization of his ability.

OPTIMISTIC OVER OUTLOOK.

Discussing business conditions recently with Wm. K. Kaplan & Co., 316 Fulton street, Jamaica, N. Y., they stated that business for June, July and August showed an encouraging increase over the corresponding months of 1913, and that there was a falling off in trade for the month of September, due, no doubt, to local and general disturbing business conditions about this time. The outlook has improved materially, and Wm. Kaplan & Co. look forward to a very active holiday trade.

Two interesting interior views of the Kaplan warerooms have recently been sent out by this house, one showing the interior resources of the warerooms and the other showing a member of the firm at his desk in his office.

STANDARD GRAMAPHONE APPLIANCE CO.

173 LAFAYETTE STREET

NEW YORK

RECEIVES SOME STRONG PUBLICITY.

Pathescope Featured in Interesting and Effective Manner as One of the Prizes in the School Contest of the New York Tribune.

The Pathescope is being prominently featured in the New York Tribune, one of the leading local newspapers, in a special voting contest which is being introduced by that paper for the most popular schools in Greater New York. The schools are divided into classes and a total of twenty Pathescopes will be awarded to the leading schools.

In order that the many merits of the Pathescope may be adequately impressed on the minds of its readers the New York Tribune has been running half and full page advertisements in its paper calling attention to the educational and entertaining values of the Pathescope, and laying particular stress on the desirability of a school owning a Pathescope. These advertisements are forcefully presented and well illustrated, the accompanying cut of a Pathescope giving a fair idea of the careful consideration given the constructional features of the Pathescope in this publicity.

The Pathescope hardly needed any introduction to the New York public, as the splendid success it has achieved in exhibitions at the John Wanamaker auditorium has already won for it the approval and admiration of thousands of motion picture lovers. The recent introduction of the Pathescope as a perfected instrument for the display of motion pictures in the home was well cal-

culated to meet with emphatic success, and the satisfactory results secured by the company to date are evidenced in the fact that the Pathescope is now being handled by prominent houses, including talking machine dealers, from coast to coast.

Pearsall Victor Service

New York

WHAT the Victor dealer wants to-day is more of a "friendly service"—a service which not only involves the quick and complete furnishing of Victor machines and records, but includes co-operative consulting with regard to business management in general. This is the character of Pearsall service, and this is why a large number of new dealers have been enrolled as Pearsall boosters.

Test our service for the holidays! It will prove profitable to you.

Silas E. Pearsall Co.

Victor Distributors

18 W. 46th St. (near Fifth Ave.), NEW YORK

CARRYING AN IMMENSE STOCK.

C. Bruno & Son, Inc., Are Well Prepared for Big Victor Demand During the Holidays.

The accompanying illustration taken recently at the uptown storeroom of C. Bruno & Son, Inc.,

Part of the Great Stock of Victor Machines Carried by C. Bruno & Son, Inc.

353 Fourth avenue, New York, gives an adequate idea as to the extent of the Victor machines constantly carried in stock by this Victor distributor. This branch of the Bruno business is under the personal direction of Chas. F. Bruno, secretary and treasurer, who believes thoroughly in the "wholesale only" policy of the concern, this being

reinforced by a service that is complete and prompt. "Particularly at this season of the year," said Mr. Bruno, "the average dealer needs goods promptly, and also requires that his order be completed in full. This, of course, puts it up to the jobber for close co-operation, and as we specialize in working with the dealer, he re-

deep affection. It will, therefore, be a source of pleasure and gratification to them to know that his new and broader field offers an opportunity for even greater usefulness, and even greater achievements.

"John A. B. Cromelin, who has been appointed general manager, entered the service at the bottom of the ladder when he was a boy, eighteen years ago, served as private secretary of the president and later as assistant executive officer in Bridgeport. Thirteen years ago he was transferred to Europe, where he was employed in Paris and Berlin. He was St. Petersburg manager and for the last four years has been European general manager. His successful record in the latter capacity, where his duties have been in many respects like those of his new position, is a natural prelude to his advancement.

"Louis Sterling, the new European general manager, has been the sales manager in Europe for a number of years and justly bears the reputation of being one of the most popular men in the trade."

IMPORTANT NEW PATHE AGENTS.

The Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, announced the closing of several important deals this week whereby the machines and records manufactured by this company will receive adequate representation at the hands of prominent concerns.

The most important of these new agencies is Marshall Field & Co., Chicago, Ill., internationally prominent as one of the leading merchandising institutions in the world, who are in a most advantageous position to introduce the many merits of the Pathé Frères line.

Other new agencies include the N. Snellenburg Co., Philadelphia, Pa., one of the best-known department stores in the East, which now maintains a large and successful talking machine department, the Atlantic Talking Machine Co., Boston, Mass., a recently formed concern which will handle the complete line as jobbers in an aggressive manner, and Ludwig Baumann & Co., New York, one of the prominent local furniture houses.

GEORGE W. LYLE RESIGNS

As General Manager of Columbia Co. to Give More Time to Broader Interests of Company—J. A. B. Cromelin Succeeds Him—President Easton's Fine Tribute Deserved—Promotion for Louis Sterling in London.

George W. Lyle, first vice-president of the Columbia Graphophone Co., who, in addition to his duties as director and member of the executive committee, has held for many years the position of general manager, resigned the last name position on November 12, in order to be relieved from the details incident to the great growth of the business and be freer for consultation with the president and directors, and to give more deliberate attention to the larger matters of the company, in which his long and intimate experience has made him so valuable.

John A. B. Cromelin, European general manager, has been transferred and appointed to the vacancy and Louis Sterling, at present European sales-manager, has been appointed European general manager.

President Easton in commenting on the changes said to the Talking Machine World:

"Mr. Lyle was appointed general manager in 1904 and has, therefore, held the position for nearly eleven years; so long a time that more than ordinary notice should be taken of his change of duty. He has performed his work with rare ability and conscientiousness, regardless of his own comfort, convenience and health, with an eye single to the interest of the company, and with the energy characteristic of a human dynamo. During my disability and absence after the panic of 1907 he was for several months sole executive of the company, and by his able administration of the many intricate problems presented during that perilous time, earned the admiration and gratitude of all of the officers, employes and stockholders of the company. He so directed the affairs of the company as to change the showing on the balance sheet from the low point of 1908 to the very substantial profits of recent years and the present time, building up sales by leaps and bounds. Everyone concerned, from the highest to the lowest in the

receives a service that is of exceptional strength. Nothing is more exasperating than to order goods and not get them, especially when the dealer has a customer for the goods that he orders. This is why we work hand in hand with the merchants, and explains why this branch of our business is constantly growing."

service of the company owes him a substantial debt of gratitude, and those who know him personally, as so many do, combine with gratitude a sense of

Woolworth Building, New York

NEW STORES IN THE TWIN CITIES.

Three New Columbia Dealers Enter the Field After Visit of Vice-President Lyle—New Edison Stores Also Opened—Edison Shop Is Most Attractive—Heavy Victor Business.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., November 9.—Three Columbia stores have been opened in the Twin Cities since the October issue of The Talking Machine World went out on its mission—two in Minneapolis and one in St. Paul. Following the visit here a month ago of President Lyle, of the Columbia Co., came Clifford Ely, traveling agent of the wholesale department, and he remained ten or twelve days, and at the end of his stay saw three new branches in successful operation, in a measure due to his efforts, or at least dependent upon his judgment. The Northwestern Music Co., and the New England Furniture Co., which for a long time has had a Victrola department, installed large stocks of Columbia Gramophones, records and supplies. In St. Paul the Lehnert's Piano Co. on upper Wabasha street, adds a Columbia section to its activities.

The new Edison Shop in St. Paul, under the control of the Minnesota Phonograph Co., is an architectural dream. It commands attention by the beauty of the interior arrangements, and with three street fronts has the most advantageous possibilities for display. Manager William Lucker reports that the store is a real magnet and it started to draw trade immediately it opened. A Hawaiian tenor holding forth at regular intervals has given the Kanaka records a great vogue.

The new Edison store at 612 Nicollet avenue, Minneapolis, opened Saturday, November 7, for business, but the formal opening is set for a later date. This also is the last word in phonograph display and demonstration establishments, and with its sister in St. Paul, is calculated to bring the Edison instruments to general public notice. Manager Laurence Lucker states that his company has distributed more than five carloads of Edison

goods since August 1. In every way the outlook is excellent for the old favorite.

The popularity of the Victor instruments continues unabated, according to W. J. Dyer, of W. J. Dyer & Bro., jobbers of these goods. The country demands are hard to satisfy, while the half-score retail stores in St. Paul and Minneapolis are doing excellent business. Their recital programs, always well arranged, are attracting crowds to this establishment.

Archie Mathies, of the Talking Machine Co., finds that trade is better than ever. The regular Thursday evening recitals have been varied by the appearance of C. A. Pomeroy, a clever son of Terpsichore, who has all the latest dancing steps down to finest edge and is willing to show them off to the public. The store is more than filled on the nights that Mr. Pomeroy appears.

The weather in Minnesota this fall has been too fine, declares C. P. Herdman, manager of the St. Paul Columbia store. It is so nice that the people are out motoring or promenading when they should be at home around a grate fire listening to Columbia music. It surely is true that not only talking machine business, but all other business, would be better if the weather was not so seductively pleasant.

OFFERING THE PATHÉGRAPH AS PRIZE

The Pathégraph, manufactured by the Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, was offered last Sunday by the New York Tribune, one of the leading local newspapers as a special prize for the public schools of New York in a voting contest now being featured by that paper. An illustration of the Pathégraph was prominently displayed, and the contest editors called attention to the fact that the instrument is a unique one, in that it is a combined phonograph and music and language instructor. In addition to playing Pathé discs in the usual manner, the Pathégraph embodies a special attachment for teaching music and languages, which makes it particularly adaptable for school use.

NO MORE DELIVERY DELAYS.

J. B. Ogden Makes New Arrangements for Manufacturing the Ogden Sectional Record Filing Cabinets and Will Be Able to Make All Shipments Promptly and Without Delay.

(Special to The Talking Machine World.)

LYNCHBURG, VA., November 10.—J. B. Ogden, manufacturer of the Ogden Sectional Filing and Sales System for talking machine dealers, which has measured up fully to expectations wherever installed, announces that he has made arrangements with a large and responsible Western factory to make up a large number of cabinets for him under a guarantee that the cabinets will be delivered on the dates specified in the contract and that he will, therefore, be in a position to meet every demand of the trade promptly, without annoying delays.

Through the delay of the Southern factory which formerly made the cabinets, Mr. Ogden was forced to disappoint numerous customers who sought quick deliveries, but the new arrangements will put an end to those annoyances. Mr. Ogden now has a substantial supply of cabinets ready for shipment, so that dealers may secure them and enjoy their advantages during the holiday trade.

TO DEAL IN PHONOGRAPHS.

The Ideal Phonograph Co., Plainfield, N. J., has been incorporated with capital stock of \$10,000 to deal in phonographs. The incorporators are Albert R. Palmer, Harry Lawson and William Hollinger.

The L. S. Donaldson Co., Minneapolis, Minn., has just opened a new Victrola department in its store, of which L. M. Knickerbocker, formerly manager of the Stewart Dry Goods Co. in Louisville, Ky., is in charge.

One of the most recent accounts closed by the Columbia Graphophone Co. is that of Goldburg Furnishing & Carpet Co., 143d street and Third avenue, New York, which will handle the complete Columbia line.

TO VICTOR AND COLUMBIA DEALERS

The PERFECTION
Attachment plays lateral cut records on the Edison Disc Machine.

Do you want to sell records to owners of Edison Diamond Disc Machines? If you do, carry our "PERFECTION" attachment in stock.

Edison Disc machine owners will be coming to you every day, asking you if the records you sell can be played on their machines. If you carry our attachment in stock, you not only have a chance to sell it, but also to make record sales and add a new name to your mailing list. We can also furnish you with a reproducer which is fitted to our attachment. Price of sample attachment \$2.50, gold-nickel or bronze finish. With reproducer, any finish, \$4.75.

Cash or check must accompany each order for sample. We will quote you quantity price on request.

THE QUESTION OF SENDING RECORDS ON APPROVAL.

Discussed in an Illuminating Manner by Benj. Switky, the Well-Known Victor Distributer of New York, Whose Retail Experience in the Past Serves to Give Weight to His Opinions—Difficult to Make Hard and Rigid Rules—Common Sense Must Govern.

A much mooted question in the talking machine trade is that of the advisability of sending records out on approval, and the opinions pro and con have been numerous and varied. Some interesting views on that important subject were recently contributed to *The Voice of the Victor* by Benj. Switky, the well-known distributor of New York, who wrote:

The value of the practise of sending records out on approval has often caused dealers to question their own wisdom and judgment. Intended primarily to stimulate and increase the total volume of business and the consequent profits, it has been found by many dealers to have the opposite effect. While sounding good in theory, it seems to work out badly in practice. Selecting records on approval seems to be handled by the public in such a way as to make it a sister scheme to the music roll exchange or the circulating library. Instead of buying music rolls outright, the public prefer to pay a modest sum for the *use* of the rolls, thereby enabling them to enjoy a greater variety at lesser cost. Therefore a little discussion on the subject will do more good than harm.

To quote the sentiment recently expressed by Ernest John, editor of *The Voice of the Victor*, every dealer should have his convictions and should sell and work and fight accordingly. Hence I shall begin by saying positively that the practice of sending sets of records out on approval is in most cases unprofitable, harmful and greatly to be deplored.

There are just a few conditions under which a dealer is justified in sending records on approval:

1. If the customer is an invalid and cannot come to the store.
2. If the customer lives at a great distance and rarely, if ever, comes to your town.
3. If your store is uninviting, either because of location or lack of interior comfort, and your customer—particularly a lady—feels it incompatible with dignity to condescend to trade at the store.
4. If your customer is a busy business man, who doesn't mind spending money liberally, but who simply cannot devote the time necessary to spend the money.
5. If your customer is a millionaire—either near- or multi-
6. When delivering a machine bought by one person and intended for another you might offer to send some choice records for try-out; but be careful to impress on your customer that you do not make a regular practice of doing this.

There may be one or two other instances in which the extenuating circumstances are sufficient to warrant "on approval" delivery.

But look the practice square in the face. Ask yourself one or two pertinent questions. Recall a few instances in which good customers have been

spoiled. After that you may vote pro or con.

If you will turn over a few leaves of your ledger (presuming that you have a number of charge accounts) and compare the purchases of Mr. Jones or Mr. Brown during last month and several months previous, you will find that of late they have not bought liberally. Oh, yes! There have been quite a few charges, but somehow the merchandise credits are nearly equal to the charges. You will recall that Mr. Jones was a dandy buyer when he first started dealing with you. The love of new records gripped him like an intermittent fever. He needed a few records for Sunday, and a few more newer ones when expecting company. If the next holiday happened to be Christmas, or Easter, or the Fourth of July, you could count on selling him \$10 or \$15 worth of selections appropriate to the occasion. Somehow or other it is a fact that now you get from Mr. Jones only \$5 or \$6 worth of business a month—even less in some months.

Now, if Mr. Jones were to cease coming to the store we would presume that he had either lost interest in the Victrola or that he found the pace of buying new records too strong to keep up with, or perhaps he had gravitated to another dealer's shop. Nothing of the kind! He still drops in to see you as usual. His enthusiasm has not waned an iota. He is enjoying more new records than ever before. There is just this little difference: Instead of paying for his concerts, *you* furnish the music free of charge. You charge a batch of records to his account, deliver them, then you send for the returns and issue a credit memorandum. He is careful to keep a record or two, just for decency sake, so as to repay you for your trouble, and just so that you don't get wise to his scheme.

If you will watch closely you will find that he usually wants a new set of records sent to his house on Saturday, so that he can play them over on Sunday, or on the eve of a holiday, or just in time to be played over at a gathering of friends.

Of course, the dealer is wise; or his bookkeeper or clerks soon tip him off that there's nothing to it—that Mr. Jones is using him for a good thing. One little error in crediting the returns wipes out the profit. In fact, the value of the salesman's time in making up the selection, the delivering, the bookkeeping, etc., have in advance dissipated the profit on Mr. Jones' business. The return of one record scratched may nullify the whole transaction.

Here is where the dealer finds himself in a dilemma. While realizing that he can never more expect to see Mr. Jones' money in denominations of fives, tens or twenties, he finds it embarrassing to have to point out to Mr. Jones that he no longer buys enough to make it worth while catering to him. The situation becomes delicately complicated. To continue the approval deliveries is irri-

tating. On the other hand, to suggest to the customer that the privilege must be withdrawn is tantamount to inviting him to transfer his patronage elsewhere. For that is just what happens usually.

The "approval" game (I here speak from knowledge local to New York City and vicinity) is being played overtime. After being turned down by one dealer they drift to another, and then to still another, in each case asking for records charged on approval without even thinking it necessary to first establish their credit responsibility.

As a test of the value of such prospective customers let the dealer submit to them two propositions: First, unless the credit is beyond question, cash should be paid for the records. Second, the customer must agree to keep positively a certain proportion of the records submitted—say one-half, or not less than one-third.

Usually there are too many critics at home passing on each record. If you are not there to influence the choice of a selection you lose the opportunity of making a sale. Although I believe firmly in having harmony in the home, a salesman will find it easier and more profitable to suit with different records the individual taste of each member of the household. If you leave it to them the vote will never be unanimous, and so long as they save money by rejecting, the noes will always win.

If you feel that you *must* go after the record business by serving the customer at his home, then let your salesman preside at the demonstration.

Leaving with a number of customers sets of the new monthly records is detrimental to the best interests of your record stock. First of all, you are obliged to order too many of certain selections that prove to be poor sellers—records that eventually drift back to the store and help to pile up an unnecessarily heavy stock of surplus.

Sending out a package of certain selections on approval for a few days means to some dealers that these numbers will be out of stock until the dealer finds out which are sold and should be replaced; or they are re-ordered at once and the stock doubled when the others come back.

The dealer who indiscriminately sends records out on approval eventually gets the reputation of selling worn records. He is not present at the customer's home to see whether his records have been played over once, twice or three times before being rejected. We all know that records do not improve with use.

We have known unscrupulous buyers to order a record of a selection which they already had on hand and then return the worn-out record, keeping the new one.

However, all the foregoing objections would be swept away automatically if the approval practice were profitable. But such is not the case. The harvest reaped may be reviewed as follows: 1. Diminished business. 2. Good buyers perverted or lost. 3. Cupidity encouraged. 4. Energy wasted. 5. Abused records returned to stock. 6. Capital wasted in excess stock.

Six lots of records submitted on approval will not sell as much goods as a good salesman can sell the same customer in one sitting at the store.

Get an *Extra Profit* on Your Talking Machine Sales

CHRISTMAS will soon be here and with it the best talking machine season of the year. Prepare to make an *extra profit* on the instruments you sell by *also selling Udell disc record cabinets, which exactly match standard instruments in style and finish.*

Every customer who buys a talking machine is sure to want a cabinet for holding it and filing the records. Show him Udell cabinets—and make *another sale.*

Udell cabinets come in eight popular styles. Six of these have either perpendicular or horizontal shelves for filing. Two have only perpendicular shelves.

New Booklet No. 45 completely describes the Udell line. Christmas is only a few weeks off, so write for this new booklet *today.*

The Udell Works, 1205 W. 28th Street, Indianapolis

"EDISON DAY" IN ST. LOUIS.

Celebrated by Opening of New Concert Hall of the Silverstone Music Co.—Prominent Edison Disc Dealers Present.

(Special to The Talking Machine World.)

St. Louis, Mo., November 7.—Edison Day, October 21, the anniversary of the invention of the incandescent electric light, was celebrated at the Edison Shop, as the Silverstone Music Co. warehouses are beginning to be called and as they probably will be known when the piano business finally is disposed of, by the formal opening of the new concert hall, a special concert program, which was attended during the afternoon by several hundred ladies and by a gathering of dealers at night, for a technical and business discussion of the Edison disc machines and which closed with a banquet and a program of toasts.

The night gathering, from a professional standpoint, was much more significant. More than thirty men interested in the sale of the Edison disc machines were present and listened without tiring to a technical talk on the make-up of the machine from Mr. Silverstone, and then plied him with questions as to how to meet the little everyday difficulties that confront them, also the best answer to certain frequently made arguments and oft repeated questions. This talk was demonstrated with equipment and parts of machines from the workshop and with reproductions of special demonstrations of different kinds of music.

Those present, all dealers or dealers' representatives, were: Melon Harry, Charles Dusenberg, H. Dusenberg and J. D. Barthel, of the Concordia Music House; F. Coleman, George Lamothe, H. A. Tunehorst and L. R. Tunehorst, W. P. Davis and Leon Davis, of the Davis Music Co.; W. H. Thweatt, of the Thiebes Music Co.; R. E. De Money, E. B. Cheatham, Prof. Charles Kunkel, Charles Kunkel, Jr., and Charles Jacob Kunkel, of Kunkel Bros.' Piano & Music Co., and representing the Silverstone Co. were Mark Sil-

HOLIDAY PROSPECTS EXCELLENT.

American Talking Machine Co. Keeping Ahead of Last Year's Business Record—Rearrangement of Store Completed.

R. H. Morris of the American Talking Machine Co., 368 Livingston street, Brooklyn, N. Y., expresses himself as being well pleased with the manner in which business is holding up this fall. He states that up to date every month during the year has shown an increase over the corresponding month of 1913 and the prospects are that the holiday trade will uphold the record for the balance of the year. The orders received from various dealers indicate that they have faith in the holiday prospects and are willing to place orders on that basis.

The American Talking Machine Co. are doing an excellent business, particularly in Brooklyn and Western Long Island, and pays particular attention to quick service on rush orders, getting the goods to the dealer without delay, thereby saving sales for him. The rearrangement of the company's store, including the moving of the demonstration booths nearer the front and the installation of additional shelving for records, is now

LANSING ADDS NEW LINE.

Khaki Moving Cover Now to Be Had in Grades to Suit All Demands in Matter of Price—Mr. Lansing Books Big Orders for the Expensive Styles of Covers.

E. H. Lansing, 611 Washington street, Boston, Mass., manufacturer of Lansing's khaki moving cover for talking machines, announces that he has added a new quality line to his covers at a lower price. This new cover is interlined with cotton batting instead of felt and in the large size sells to dealers for \$5 each. The small size, which is made for handling the small models of the various machines, wholesales for \$3.25.

Mr. Lansing also announces a new strap, made of wide webbing, with handles and patented buckle, which is sold for \$1. Thus if a dealer wanted a cotton lined cover he would specify "B" grade, the designation given to this new line to classify it from the covers with felt lining.

Mr. Lansing has just completed a two weeks' tour which carried him to the talking machine centers about New York, Philadelphia, Baltimore and Washington, and he reports a very strong demand for Lansing covers, particularly in the more expensive styles.

Crescent Talking Machine Co., Inc.
99 CHAMBERS STREET NEW YORK CITY

ST. LOUIS ASSOCIATION ACTIVE.

Five Members Join Associate Retail Merchants and Plan Energetic Campaign of Business Betterment in the Saintly City.

(Special to The Talking Machine World.)

St. Louis, Mo., November 9.—The Talking Machine Dealers' Association, of this city, has apparently bridged its first difficulty, and has itself established on a firmer foundation. At a called meeting, November 4, it was announced that five of the members of the association have joined the Associated Retail Merchants, and had been named as the Talking Machine Dealers' Committee, which will give to them the benefits of the Associated Retailers' facilities and business rooms, and they are welcome to call other dealers into conference whenever occasion arises, which will be whenever the officers of the association conclude there are matters requiring special attention. The dues of the Retailers' Association had proven a bar to the affiliation of all of the talking machine dealers with that association. The five joining the Retailers are the Columbia Co., the Thiebes Piano Co., the Silverstone Music Co., the Val Reis Piano Co. and Koerber-Brenner Music Co.

The first stumbling block of the association was an advertisement by one of the retail dealers advertising terms that did not seem to agree with the association agreement. It was discovered that this firm had multiplied the monthly terms agreed upon by twelve, to get a yearly payment, and then divided that by 52, and had advertised weekly payments on that basis. It was announced that this difficulty would be adjusted, and perhaps some steps taken to relieve some other advertising that has been objected to and which appeared to be due to a lack of understanding, rather than to deliberate intent to disobey the agreement of the association, which has done much for the trade.

RECITALS ATTRACT PURCHASERS.

C. I. Abelowitz Doing Good Work in Expansion of Business of the Talking Machine Department in Herz Department Store, Terre Haute.

(Special to The Talking Machine World.)

TERRE HAUTE, IND., November 2.—Chester I. Abelowitz, manager of the talking machine department of A. Herz's department store, of this city, announces his intention to repeat the recital which he so successfully gave last month and will, in fact, give a series of these performances extending through the winter.

Mr. Abelowitz gave the first performance October 13 in the restaurant room of the big department store, and although the seating capacity of the hall is but 350, it was crowded to almost 500, and many were turned away an account of the limited space. The program engaged the services of Seigfried Philip, baritone; Mrs. David Silverstein, soprano, and a Caruso number and the Lucia Sextette on the Victrola. There was also a demonstration of modern dances by Chester Laverty and Mrs. Schomer.

Similar recitals have been given from time to time in various sections of the country, but none has been better managed than this one. An announcement was made in the local dailies two or

three days previous and additional comment was made in the news columns of the papers because of the novelty of the occasion. Tickets of admission were given out, on the reverse side of which was a space for the name, address and city of the one presenting it. These tickets were all taken up at the door, and through the information thus secured numerous prospects were obtained.

NEW STYLES OF UDELL CABINETS.

Some Specially Emphasized Designs That Will Appeal to the General Public—How the Udell Works Help in the Way of Service.

The Udell Works, Indianapolis, Ind., have issued a folder specializing in some of their snappy styles of disc record cabinets. This folder illustrates Cabinet Styles 425, 428, 429, 402, 1417, 418, 427, 422, 417 and 412.

These designs are selected from among those of the best sellers and are absolutely guaranteed as to construction and finish. Among the special styles shown is Style 429, which is designed particularly for the new Edison disc machines, Styles

B-60 and A-80. Cabinets are fitted with both horizontal and vertical shelving, the upright wooden partitions being used unless otherwise specified.

The special service that is being rendered by The Udell Co. is the offer of three retail advertisements for featuring Udell products to the consumer. These are furnished in electros and are all ready to be published in newspapers.

NEW AUTOMATIC STOP.

A new automatic stop has been perfected by the Sonora Phonograph Corp., 57 Reade street, New York, which will be ready for the trade in about one month. It is a simple device and requires no adjustment to the size of the record, nor does it require "placing in position" when the record starts playing. It is rather unique in its action, for whether the entire record is played or only half or a quarter of it, the action of stopping is the same.

C. P. Chew, formerly with the Edison Co., is now covering New York State in the interests of the Sonora phonograph.

SYRACUSE NEW YORK

THE TRADE IN PHILADELPHIA AND LOCALITY

(Special to The Talking Machine World.)

PHILADELPHIA, PA., November 9.—There has been a continuation of the excellent business that Philadelphia has experienced during the year, according to the reports of all the talking machine dealers for last month. October has been one of the most satisfactory months of the year, and the increase over last year during the month has been as large as any other. If November and December continue to show such remarkable gains, this will not only be a banner year but a bonanza year.

In spite of dullness in many other lines there seems to be no lagging in the talking machine business, and this is not shown in any one line, but in the general business from beginning to end.

There has been little change in the talking machine business in Philadelphia during the month. There has been a new Edison dealer established in

the piano firm of Story & Clark, who have opened up a very large department and have placed in charge Thomas C. Henderson, recently manager of the Philadelphia Estey house, and previous to that connected with the Columbia Graphophone interests in Philadelphia. Mr. Henderson is a man of wide experience in this line of business, and he has already inaugurated an active campaign.

Ramsdell & Son now have their Edison department in full running order. They have located it in the basement of their piano store, which is nearly level with the street and with windows in which they can make, and are making, a satisfactory display.

Louis Buehn reports that business in October was very good, and that it shows a substantial increase over last year. He says that the outlook for November is that business is going to continue right through to the holidays, and that his firm will certainly close the largest year's business that his house has ever enjoyed. The machine sales have been especially good, but there is a slight scarcity of machines of a certain type. He says: "The record situation has not improved to any great extent, and the ideas of the purchasers have been running very largely to the dance music and other popular selections. The selling of Victor opera records are a little slow at present, for the reason, presumably, that the opera season, which creates the demand, is still a few weeks off."

Blake & Burkhart, the Edison dealers at Eleventh and Walnut streets, report that their business in October was first rate, and that this month started off in good shape. A. C. Ireton was over to Philadelphia last week and brought some encouraging news to the Philadelphia Edison dealers to the effect that the company were about to send to Philadelphia a force of six men to start an Edison advertising and publicity campaign.

Frank Gittelson, the young Philadelphia violinist, who has just returned from Europe and made his debut here with the Philadelphia Orchestra, recently, has been a frequent visitor to the Blake & Burkhart warerooms to hear the Edison "Ave Maria" record made by his teacher, Carl Flesch. This is one of the most wonderful violin records ever placed before the public in this manner, and practically all of the Philadelphia violinists have

been to hear it and many have purchased the record.

Blake & Burkhart began on Monday of this week their weekly Monday evening concerts, which have drawn in the past a most select audience. Emil Bauer, formerly connected with the manufacture of musical instruments and with the Keen-O-Phone, has entered the employ of this firm as a salesman.

The Pennsylvania Talking Machine Co. has met with a wonderful success in Philadelphia in October. Manager Eckhart, who started in Baltimore years ago, and ever since has been deeply interested in that city, has again connected himself in a way with the talking machine business in that city, and is spending one or two days a week there. Many of his early friends in the business will no doubt be interested to know that the Columbia Graphophone business in that city, at 305-7 North Howard street, will have his personal direction and supervision.

In Philadelphia, Mr. Eckhart says, last month every branch of his business showed a substantial gain over the same month of last year, and that with the business now in hand they will close out the year with a handsome gain over last year. The new products, the Leader, Mignonette and the De Luxe at \$200, are meeting with an enthusiastic reception. They have sold them as fast as they could be received. Where they would like to have a big supply in the warehouse, they have only a few days' supply and are dependent upon receiving frequent shipments from the factory, but the factory has promised to keep them amply supplied.

John A. B. Cromelin, European manager of the Columbia Co., paid Mr. Eckhart a "society" visit the past week. The Pennsylvania Company has had an excellent dictaphone business in October, supplying, among other firms, the Victor J. Evans Co., the Elliott Lewis Electric Co., Gellander & Co., Tacony; Dr. Cadwallader, the Maryland Casualty Co., and H. O. Wilbur & Co., the chocolate manufacturers. Julian D. Westervelt, formerly supervisor of sales agents with the dictaphone, has been placed in charge of the Pennsylvania company's dictating machine business.

Gimbel Brothers report that they have made a big gain in October over last year, and November has started in very good, due in a great measure to an enticing offer they are making for Victor

**Columbia Graphophone Company
Woolworth Building, New York**

machines, records, albums, etc., at an attractive price for the combination. They are arranging a novel Christmas present for their customers, and will give them a new and one of the best record cleaners yet gotten out with every purchase. Each cleaner will have the firm's name on it.

H. A. Weymann & Sons report that October was the biggest October they have ever had, and that it was ahead of the other months of the year in percentage, and that thus far every month has run substantially ahead of last year, and they are anticipating a business this year of at least a third more than they have previously enjoyed. Mr. Weymann attributes his success to the foresight in which they secured a big stock of instruments and records, and by urging his dealers to lay in their supply early, they are able to get all goods promptly, and by doing so already they have been receiving duplicate holiday orders.

INTRODUCE NEW FLEXIBLE NEEDLE.

John M. Dean, the Prominent Manufacturer, Announces the "Flexible Four-pointed Steel Needle" for Talking Machines.

John M. Dean, Inc., Putnam, Conn., manufacturer of talking machine needles, announces the perfection of a new needle which has been patented in this country, with foreign patents pending. It is called the "Flexible four-pointed" steel needle, for the reason that it plays four tunes with one needle. These are put up in attractive packages of 200 needles.

Commenting upon the "Flexible" needle, John M. Dean, Jr., of this corporation, said: "In the first place, Flexible needles bring out the music from any record and make old records sound like new. They eliminate scratching and save the records from wear. They play the longest records perfectly and, being made of the best steel obtainable, will give a service that is of unusual quality."

Full particulars and samples may be secured upon application to John M. Dean, Inc., Putnam, Conn., or to Samuel Levin, Highland Park, Ill.

SOME NOTABLE RECORDS

Made by Richard Czerwonky, Albert Farrington and H. E. Humphrey for Edison Co.

The Edison Blue Amberol record list for December contains records by three important personalities, which are bound to win a large measure of popularity with the general public. Richard Czerwonky, a violinist of international fame, who

Richard Czerwonky. Albert Farrington.

has played with the great orchestras of Europe and who was concert master with the Boston Symphony under Dr. Muck and now is concert master with the Minneapolis Symphony Orchestra, is represented by "Adoration," Felix Borowski's lovely composition, accompanied on the piano by Robert Gayler. This record is notable for the purity of its tone, the brilliancy of execution, the perfection of effects; in brief, a most artistic effort worthy of the reputation of this famous violinist and a credit to the Edison laboratory.

Albert Farrington, the well-known baritone, who is widely known in concert circles and at present soloist at St. Ignatius Church, New York, has made an excellent record of "It's a Long, Long Way to Tipperary," the Irish song which has so caught the fancy of the English soldiers that it is now being sung by the French and Russians as

well. It is accompanied by male chorus and orchestra, making a record full of vigor. Mr. Farrington has also made a record of "Rule Britannia," accompanied by a chorus band. He gives this famous anthem a most inspiring presentation.

While not a newcomer in the Edison Blue Amberol list, Harry E. Humphrey furnishes a timely contribution in "The Night Before Christmas," a recitation which has so idealized the true spirit of Christmas and Santa Claus that it has become a classic not only in this country, but throughout the world. Mr. Humphrey imparts true reality to his clever reading, and his perfect diction enables one to follow him with ease.

H. E. Humphrey.

NOVEL MERCHANDISING PLAN.

A rather novel method of merchandising phonographs and records is that utilized by Charles W. Bawden, Lake City, Ia., who sells Edison phonographs. Mr. Bawden's outfit consists of an arrangement whereby a cylinder phonograph can be drawn out beyond the tailboard of his two-horse wagon and played while his team stands. From house to house he goes, stopping only long enough to give a good recital and close a sale. His horses are covered with a light blanket to protect them from the flies, and thus keep them in condition to stand still as long as needed. His method is to leave an Edison machine with a number of records and call for them in a day or two.

The Crippen Co. has been incorporated at Albany, N. Y., with a capital of \$50,000, for the purpose of conducting a business in talking machines and musical instruments. Those interested are W. S. Furman, W. G. Chittick and J. A. Harway.

(Special to The Talking Machine World.)

CHICAGO, ILL., November 11.—Optimism in large quantities is found prevalent in the talking machine trade of the Middle West at the present time. Jobber, dealer and supply men are united in the belief that the winter months of 1914-15 will make a record that has never been approached—war or no war.

A rather unusual but decidedly commendable feature of present trade conditions is the disposition exhibited by both jobber and dealer to carefully estimate the requirements of the holiday season unusually early and to order them delivered in plenty of time to handle.

Prophecies Big Business.

"The biggest month of the year," that is the way R. J. Keith, sales manager of the Talking Machine Co., characterized the month of October. "The business in both machines and records was tremendous," said Mr. Keith. "Almost every dealer seems to be desirous of stocking up early and heavily, and a number of them are paying particular attention to their record wants. We are anticipating the biggest holiday season in the history of the concern.

"There is a particularly heavy demand for the Victor X's and XI's and, of course, heavy calls for the new 'English brown.' This finish is proving to be exceptionally popular, and golden and fumed oaks are also receiving much attention.

"We are distributing and receiving a large number of calls for our new list of 'biggest selling Victor records.' These are made up of the records that sell best the year around, and does not include the popular numbers as used in the common sense, but contains selections which accurate statistics have shown to have most merits. These numbers are of the kind that the customer never wears of, and incidentally these records will improve the musical tastes of the person using them. There are 376 numbers in the list arranged in numerical order."

This new list of the Talking Machine Co. represents the customary monthly aid to the dealer. The Talking Machine Co. has made it a policy to turn out an actual aid of some description every month, and this latest supplement to the dealer's sales ammunition is a most effective one.

Adds Another Display Room.

The talking machine department of the W. W. Kimball Co. has, by reason of increased business

it is doing, been obliged to take more space upon the first floor. A large sound-proof room, that had been used in piano demonstrations, has been turned over to the talking machine department, and Manager T. J. Cullen is making good use of it.

"The Six Best Sellers."

Victor dealers are reporting that the six best sellers at the present time are: "It's a Long Way to Tipperary" (the marching song of the Allies); "Mary, You're a Little Bit Old Fashioned"; "Millicent"; "Along Came Ruth"; "The Castle Gavotte," and Jocelyn's "Lullaby," sung by McCormack.

The six best Columbia sellers are "Ballin' the Jack" and "Meadowbrook" (A5595); "The Old Homestead," "Dream of the Rose" (A5600); "High Cost of Loving" and "Back to the Farm"; "In Michigan" (A1592); "Land of My Best Girl" and "Where the Red, Red Roses Grow" (A1613); "It's a Long Way to Tipperary" and "Old Comrades March" (A1608); "In the Shadow of the Sycamore" and "California and You" (A1601).

Columbia Business Good.

W. C. Fuhri, district manager of the Columbia Graphophone Co., reports that business is exceptionally good, with prospects for the best November and December in the firm's history. Mr. Fuhri says that dealers are placing their orders exceptionally early this year, evidently in preparation of big sales, and that the orders are also heavier than last year at this time.

"The dance fad is holding on tenaciously," said Mr. Fuhri, "with especially big calls for 'Fox Trot' records. There is also a very heavy demand for foreign patriotic records, and in this direction the Columbia Co. is doing a tremendous business because of its comprehensive catalog of foreign selections. The style Mignonette machines which we fitted with the patented record compartment, offering easy selection of the record desired, is selling in wonderful shape and will be the popular machine, in my estimation, of the holiday business.

"I met General Manager George W. Lyle while in Kansas City recently. He was on his way back from his customary trip to the coast, and told me that he found conditions in that section of the country and in the Western States exceptionally good."

Charles F. Baer, local Columbia manager, expresses his opinion that business in this section will show a decided excess over the business last

year. Mr. Baer reports large sale of dance records and also considerable call for operatic selections. Religious records are also selling well, according to Mr. Baer, with good calls for numbers by the Chicago Preachers' Quartette and the records of Cantor Joseph Rosenblatt.

Mr. Baer reports that Albert Lurie & Co., 1810 Blue Island avenue, have taken on the Columbia line exclusively. I. Sherry & Sons, 3448 North avenue, have also taken on the Columbia line.

Installs Victor Department.

R. J. Keith, sales manager of the Talking Machine Co., recently aided in the installation of the Victor department in the large store of L. S. Donaldson & Co., of Minneapolis. L. S. Knickerbocker, formerly with the Stewart Dry Goods Co., of Louisville, is in charge of the department and has already done much constructive work upon it. At the present time he is busily engaged in work attendant upon the formal opening of the department, and plans in a short time to run a series of recitals and dancing exhibitions.

Remodel Bent Department.

The talking machine department of the George P. Bent Co. has been removed from the fourth floor to the first floor, where it is located in excellent surroundings. The new space includes, in addition to a large reception room, four sound-proof booths and a large record stock room. It is planned to remodel three of the large rooms in the back of the store into a small recital hall or theater, which will be used for the demonstration of the Cheney and Victor talking machines, and also for the George P. Bent line of pianos. The department will be under the general supervision of Retail Manager Otto Schnering, with Edwin V. Zeddes in direct charge, and C. H. Sawyer superintending the work of the record department.

Placing Orders Early.

Reports from various divisions of the talking machine industry show that great preparation is being made by the jobbers to handle what is expected to be one of the greatest holiday seasons in the history of the trade.

One indication of this is found in the large number of orders received by the Salter Manufacturing Co., 337 South Oakley boulevard, makers of the Salter felt lined cabinets.

"Our business for the last month shows that business in the talking machine trade is expected to be good judging by the large amount of orders that we are receiving," said Manager Mortenson, to the World. "Another interesting feature lies in

A SERVICE THAT DIFFERS

OUR Victor Talking Machine Department has always been a pioneer.

In many of the better methods of the present day, we led the way.

The world has not stopped spinning, progress has not ceased and now we offer a number of ideas of recent origin that work out to the great advantage of all concerned.

Send your orders for machines and records to us and let us show you how our Service differs. Let us show you how it attracts dealers wishing exceptional completeness and promptness in order filling, combined with intelligence in the execution of all commands.

Lyon & Healy

CHICAGO

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 45).

the fact that they are ordering their stocks early. Last year, previous to December, we worked night and day shifts, and in spite of every effort we could bring to bear we were obliged to disappoint our customers who ordered late. Evidently they have taken the lesson to heart, for they are ordering ahead to be sure of getting their goods."

S. O. Wade, head of Wade & Wade, manufacturers of fibre needle cutters, at 3807 Lake Park avenue, makes a report that is very similar.

Mr. Wade said to the World: "In spite of what we hear about depressed business conditions, I must say that in my opinion we are looking forward to one of the most auspicious periods that the talking machine industry has ever enjoyed. We are receiving unusually large orders for holiday shipments and have been receiving these, in fact, for a considerable time past. A large number of the orders received show that dealers and jobbers are making unusually early preparation. This, of course, is as pleasing to us as it is good for them, as we were unable last year to ship their goods as promptly as we would have liked on account of the rush that came all at one time."

Will Handle Little Wonder Record.

The local sheet music store of the Waterson, Berlin & Snyder Co., corner of Monroe and State streets, will, in all probability, institute a department within the next few days devoted to the sale of the "Little Wonder" record. This record is only five and one-half inches in diameter and plays for almost two minutes. Already three or four "variety" stores in Chicago are marketing the record for ten cents.

M. M. Blackman Resigns.

The Chicago talking machine trade lost this month one of the most popular of its members in the person of M. M. Blackman. Mr. Blackman has resigned from his position as manager of the retail record department of Lyon & Healy, and has pro-

M. M. Blackman.

ceeded to Kansas City, where he will have complete charge of the Phonograph Co., Edison jobbers, in that territory.

Mr. Blackman will have excellent quarters located on Grand avenue, in that city, and will have entire control of both the wholesale and retail departments and the distribution of the Edison phonographs in Missouri, Kansas, Oklahoma, and probably a part of Iowa and a part of Nebraska.

Mr. Blackman began his acquaintance with the talking machine trade about nine years ago, and two years later secured the management of the retail record department at Lyon & Healy, in which capacity he has served up to the present time. He was very successful in the conduct of the record department due, in a great part, to his comprehensive knowledge of music, for he had studied music for a number of years, and previous to his coming to Lyon & Healy was a professor of singing.

In speaking of his new change, Mr. Blackman said to the World: "I regret very much to leave Chicago and all the friends I have here. I have

MARSHALL FIELD & CO., DEPARTMENT TO OPEN DECEMBER 1.

Harry C. Meek to Be Manager of Talking Machine Department of Big Chicago Store, Where the New Cheney Product Will Be Handled—Quarters Being Handsomely Fitted Up.

(Special to The Talking Machine World.)

CHICAGO, ILL., November 9.—E. L. Howe, merchandise manager of Marshall Field & Co., made the interesting announcement this week that the

Harry C. Meek.

new retail talking machine department of "the greatest mercantile house in America" would be opened about December 1 with Harry C. Meek as manager.

A large force of workmen is rapidly completing

been treated with the utmost kindness by all the members of the trade in Chicago, and to part from them is not easy. However, opportunity beckons and I must go. I am a great admirer of the Edison phonograph and believe that it offers great possibilities in the territory in which I am to represent it."

New Assistant at Boston Store.

B. Cook has succeeded L. F. Nelson as assistant manager of the talking machine department of the Boston store. W. S. Paton continues as buyer.

Record Business Increasing.

C. E. Goodwin, manager of the Phonograph Co., local jobbers of the Edison phonograph, is another of the optimistic-minded ones along the "Row." Mr. Goodwin says that everyone seems to prophesy a big fall, and says that as the holiday season approaches the prospect for the Phonograph Co. appears especially roseate. The retail department of the company is especially busy, and in the record department the greatly increased library is said to be responsible for this as well as some exceptionally beautiful new records.

One that is especially popular is the violin obligato with piano accompaniment, "Ave Maria" (Schubert) as played by Carl Flesch. On the reverse side of the record is to be found a short sketch of the artist making the same and a short history of the composition itself. This is played first, as a rule, and lends much enjoyment to the rendition of the piece as well as an increased appreciation of it.

Improves Store.

A. H. Dannemark, talking machine dealer of Wilmette, has built some new booths and otherwise improved his establishment in preparation for the fall trade.

Visitors and Personals.

Mr. Pierce, formerly connected with the talking machine department of Hillman's, is now in charge of a similar department for Louis Fish & Co., Sixty-third and Halsted streets.

D. A. Creed, credit manager of the Talking Machine Co., Chicago, returned recently from a sojourn at French Lick, Ind., appearing to be much improved in health. Mr. Creed has been in decided need of such a rest following a long period of strenuous work, and he now feels in shape to face the coming season.

E. K. Andrew, in charge of the talking machine department of the J. L. Hudson Co., of Detroit, was a recent visitor to Chicago, and while here arranged for the improvement of his department.

L. C. Parker, manager of the talking machine

the new section and the holiday season will find patrons of Marshall Field & Co. inspecting one of the finest departments of its kind in the country.

Although a young man, Mr. Meek is the possessor of considerable experience in the talker field, beginning his knowledge of the business in the retail department of the Rudolph Wurlitzer Co. some eight years ago. Later he became a member of the traveling sales force, doing considerable traveling in the West and Middle West. Mr. Meek then became manager of the piano and talking machine departments of Eberhardt, Hayes & Co., of Wichita, Kansas, and after gaining a valuable experience with that company returned to "road" work. Mr. Meek came to Chicago three years ago and after working for the P. A. Starck Piano Co. for about a year as manager of the talking machine department became associated with the Geo. P. Bent Co., with which concern he has been up to the present time.

Mr. Meek expresses great admiration for the new Cheney machine which, together with the Columbia, will constitute the lines handled, and is already hard at work upon plans for their proper presentation to the Chicago public. He is now engaging members of the sales force and hopes to have, by the time the section is opened, an organization of ability and reputation.

department of Gimbel Bros., Milwaukee, was in Chicago this week and took visible pleasure in reporting that his sales of the past year have shown an increase of 50 per cent. over the previous year's business. Mr. Parker says he is another one of the many optimistic dealers who say that the holiday season of 1914 will break all records.

Members of the local trade have been interested in discovering that W. C. Griffiths, floor salesman of the Talking Machine Co., is a brother to H. T. Griffiths, the very able sales manager of the Udell Works, of Indianapolis.

F. R. Cassidy is a new salesman in the dictaphone department of the Columbia Graphophone Co., and is doing good work under the direction of W. W. Parsons.

New Needle Concern.

Emil Ad Wenglein has opened an office in the Royal Insurance building at 160 West Jackson Boulevard, from which location he will distribute a comprehensive line of talking machine needles of the H. J. Wenglein German products. Mr. Wenglein reports sales of tremendous quantity of these needles and expresses his regret to the trade that additional shipments are being received but slowly on account of the war.

Give Movie Dancing Demonstration.

The Talking Machine Shops was the first local concern to give dancing demonstrations in Chicago. The firm now sets another pace by reducing the cost, but retaining the advertising value by substituting a moving picture show which illustrates the latest dances. Every afternoon between 2 and 3 one can find about fifty patrons of the firm watching these films and getting pointers on the proper steps, at the same time listening to the seductive strains of a Victrola and the solicitation of several polite and capable saleswomen.

STRIKING WINDOW DISPLAY.

That Made by Chase & West, of Des Moines, Ia., During Newspaper National Display Week Has Come in for a Large Degree of Praise from Critics.

Chase & West, the Victor talking machine distributors of Des Moines, Ia., prepared a very striking window display of Victor merchandise which was made for the Newspaper National Display Week. The window was the subject of much favorable comment by the local newspapers, and emphasized afresh the enterprise of this prominent house in keeping their name and their goods before the public so effectively.

FROM OUR CHICAGO HEADQUARTERS—(Continued from page 47).

SYSTEMATIC METHODS RULE LYON & HEALY SERVICE.

Recent Improvements Made in Arrangements for Filling and Handling Orders—How Shipments Are Facilitated—Some Interesting Views of the Lyon & Healy Department.

(Special to The Talking Machine World.)

CHICAGO, ILL., November 10.—Lyon & Healy Victor service, always noted for its efficiency, has been further strengthened this fall in various ways. One feature in particular which enables them to fill record orders promptly, accurately and completely is shown in the accompanying view of a section of the wholesale record department, showing the order fillers at work. It will be noticed that the workers are disposed at four different

express orders received up to 5 p. m. will leave the city that evening.

Never in their history have the Victor advertisements published in the Chicago dailies been of such a thoroughly artistic and effective character as at present and the mats of these advertisements in different sizes to meet the requirements of the dealers are at the disposal of the latter for their own holiday advertising.

These advertisements are prepared by the Lyon

board advertising can obtain the poster in eight-sheet form at the actual cost of production. The window posters and poster stamps are furnished free to Lyon & Healy customers.

Another feature of the Lyon & Healy service which works particularly to the advantage of the dealers in the pre-holiday season is the fact that the inquiries received by the house from out of town are referred to the nearest Lyon & Healy dealer.

Manager L. C. Wiswell of the talking machine department of Lyon & Healy says that their wholesale business for October and so far in November shows a material increase over the corresponding period of last year. He has just returned from a trip to the Victor factory where he found everybody highly satisfied with the business being received from all over the country.

GRAND RAPIDS DEALERS ORGANIZE.

Form Association for Business Betterment with Julius A. J. Friedrich as President.

(Special to The Talking Machine World.)

GRAND RAPIDS, MICH., November 9.—Talking machine dealers of Grand Rapids held a meeting recently at the Livingston Hotel at which they formed an association designed for the betterment of the talking machine situation in this city, Julius A. J. Friedrich was elected president; M. M. Merrin, vice-president, and H. B. Williams, of the Wuerzberg Dry Goods Co., secretary and treasurer. George P. Cheatle, traveling sales manager of the Talking Machine Co., of Chicago, was present and assisted the dealers materially in the work of forming the new body. The association will work for the improvement of conditions surrounding the question of charging interest on deferred payments, and it is believed that conditions will be vastly improved.

Regular meetings will be held once a month.

A HANDSOME WINDOW DISPLAY.

Victor Machines and Records Featured Attractively in Its Spacious Show Windows by the Schmidt Music Co., Davenport, Ia.

(Special to The Talking Machine World.)

DAVENPORT, IA., November 9.—The Schmidt Music Co., which features the Victor machines and records, had a most interesting window display in the windows of its store which, according to the officers of the company, produced more real results than any previous display featured by the company.

The window was divided into three sections, with the large middle section taken up by a miniature reproduction of the stage of the New Amsterdam Theater, New York, accompanied by the statement that the music of the many light opera successes presented at that playhouse were to be found in Victor records.

In the left hand section of the window were shown several photos, in colors, of Mrs. Vernon Castle, the celebrated society dancer, with the Victor dance records suitably presented. At the right was shown a Victrola XI.

It is estimated by the company that over 10,000 people stopped and inspected the exhibit while it was in the window and a good proportion of them came into the store for the purpose of making inquiries or purchases.

TALKING MACHINE IN THE SCHOOL.

(Special to The Talking Machine World.)

LAUREL, MD., November 9.—A most delightful entertainment was recently gotten up by Prof. H. P. Mitchell, principal of the local high school, in which the Columbia Princess Grafonola played an important part, R. H. Sadler, Jr., presenting a number of selections on this instrument which were interspersed throughout an interesting program of instrumental and vocal music in which the pupils participated. The friends and parents of the pupils were present, as well as Prof. Mitchell, who were quite enthusiastic in their praise of the Grafonola as an aid to school entertainment.

Lyon & Healy Force Filling Record Orders.

counters. At one of the counters the freight shipments are cared for, at another the express shipments, at a third, orders are going by parcel post and at a fourth the city wholesale orders are handled.

This division of the work is proving wonderfully effective, expediting the business wonderfully, avoiding confusion and loss of time and eliminating errors.

The view of a corner of the machine stock room gives just a suggestion of the immense stock car-

& Healy advertising department and distinctive exploitations of Victor goods.

The Lyon & Healy Victor posters have become famous in the trade. A new one has just made its appearance. The size for the dealer's store and window displays is seventeen and a half by twenty-three inches. It is artistically printed in red, yellow and green and their combinations. It is a young woman gazing with admiration at a \$200 Victrola which occupies the foremost place among the family holiday gifts with a very expansive and

Lyon & Healy Machine Stock Room.

ried. Much of the freight shipments of machines are now made from the big surplus stock carried at the new factory at Healy Station, where the goods are loaded direct on the cars, avoiding hauling entirely.

Lyon & Healy have reduced the shipping problem to such a science that they can ship all orders received up to 1 p. m. the same day and all

richly ornamented Christmas tree in the background. The legend reads, "The great gift is surely a Victrola. Come in and hear it."

This poster has been reduced to the size of a "poster" stamp for affixing to letters and packages. Lyon & Healy are sending out two tablets of 320 stamps each to their dealers for affixing to packages and letters. Finally, those dealers who do bill-

Business Outlook Steadily Improving—Public Has Recovered Its Optimistic View of Things—Gramophone Trade Shows a Falling Off of About 33 Per Cent.—Situation Reviewed—Shortage of Supplies Has Delayed Manufacturing—Better Shipments of Motors from Switzerland Relieving the Local Trade—Enormous Demand for Patriotic Records—Many Members of the Talking Machine Trade Have Joined the Military Forces—General Trade News of the Month.

(Special to The Talking Machine World.)

LONDON, E. C., ENGLAND, November 5.—Special inquiry around the trade this month elicits pleasing information apropos general sales conditions. Under present circumstances we cannot hope to enjoy normality in any sphere of industrial activity outside, of course, the supply of what may be termed war products. But, largely as the result of official advice and example, the business outlook is steadily improving; the public has recovered its optimistic view of things and is gradually opening its purse to the extent of expenditure even upon luxuries. What this means to the gramophone dealer can be fully appreciated when I say that sales were so slack in August that quite a number contemplated the possibility of closing their doors. Fortunately this has become unnecessary. With the issue of big patriotic record lists by all the London houses, and a partial renewal of advertising, trade leaped forward at an astonishing rate, progressive sales being announced from all centers. Leading gramophone men are agreed that, all things considered, record sales are really very satisfactory. To present World readers with a clear idea of the position, I personally interviewed a number of record manufacturers and find that opinion generally agrees with the foregoing statements. Gramophone trade last year was exceptionally good. In comparison I estimate we are down about 33.3 per cent. so far this year, which is not bad. Reports, of course, vary from 25 to 50 per cent., but the average trade loss is not more than a third on the record side. Instrument trade is seriously affected by lack of supplies, and in this section I have no doubt the loss is much heavier. Even if supplies were obtainable machine sales would not be much better than at present, because new buyers are not so easily found these days. There is, however, an evident want of cheap instruments, particularly by the large mail order firms, whose business in this department is almost entirely held up. Large quantities of motors recently received in this country from Switzerland will doubtless relieve the situation just as soon as arrangements can be made for adequate supplies of tone-arms, sound boxes and trumpets. Of these we are await-

ing the pleasure of British manufacturers, who, if somewhat slow to act, are nevertheless gradually moving in the matter of their production. The chief difficulty seems to be on the question of price, which has, so far, not been brought low enough to offer the possibility of making the capture of Continental trade permanent. All things come to those who wait, and I have good grounds for reporting that the trade may soon be able to congratulate itself upon being able to list every description of gramophone products as made in England.

An Important Copyright Action.

Chappell & Co., Ltd., vs. Columbia Graphophone Co., Ltd.—The plaintiffs owned the copyright in the music of the song "Where My Caravan Has Rested," the author, Herman Löhr, having assigned his rights to them before the passing of the copyright act, 1911. They published the song with pianoforte accompaniment. After giving them due notice of their intention to reproduce the song on gramophone records, the defendants obtained a copy, set it to orchestral arrangement and made records. They paid the author the royalties he was entitled to under the act of 1911. Plaintiffs brought an action to restrain the defendants from making copies of the music without their consent, and for delivering up of copies and damages. Defendants submitted that they had only done what they were entitled to do under the act. The parties admitted that before the act of 1911 it would have been a breach of the plaintiffs' copyright to make a copy of the music for the purpose of producing an orchestral accompaniment. At the trial Justice Neville decided that the act gave a limited right to the author or owner of a musical work in respect of reproduction on records. In the case of an assignee before the act this right was given to the author and not to the assignee, and the act did not affect or diminish the copyright of the assignee. Notwithstanding the right of protection given to the author in respect of records, what the defendants had done was an infringement. The plaintiffs therefore succeeded. From this decision the defendants now appealed, and the court held that the appeal failed.

New Companies Incorporated.

Bulldog Record Co., Ltd.; capital, £1,000; registered office, Milton House, 35 Surrey street, Strand, London, W. C.

Wallace Harris, Ltd., musical instrument dealer; capital, £10,000; office, Harris Building, 42 East-gate street, Gloucester.

The Scala Co. Opens a Provincial Branch.

The northern counties of England have been well described as the mainstay of the record trade. It is not surprising, therefore, to observe a tendency on the part of London houses to establish

separate depots "up North" in order to centralize stock for quick delivery. The latest to spread its wings is the Scala Record Co., Ltd., who announce the opening of a new branch at 56 Miller street, Manchester, where will be carried a complete stock of British-made Scala records and a full line of gramophones and accessories.

Gramophones in the Trenches.

According to a press report, Sundays are usually pretty active days for the troops, but October 4 was an exception. A graphic description from the front says, in part: "Opposite one portion of the line the enemy's bands played patriotic airs, and the audiences which gathered gave a chance to our waiting howitzers. Not only do their regimental bands perform occasionally, but, with their proverbial fondness for music, the Germans have in some cases got gramophones in their trenches."

Talking Machine Addresses Conventions.

Two important conventions have recently been addressed by the talking machine. The first was the Bread and Cake Manufacturers' Association of Canada at its convention in Winnipeg on September 9; the second was the National Association of Master Bakers, its convention being held in Richmond, Va., on October 20. In both cases the novelty of the proceeding and its immense possibilities were most enthusiastically commented upon, and many were the complimentary remarks made as to the excellence of the reproduction, this latter being a tribute to the National Gramophone Co. (1913), Ltd., who made the records. One of the world's leading experts in flour and bread making, an Englishman, Mr. Jago, had been invited to address both conventions. Being, unfortunately, prevented from crossing the "herring pond," he decided upon this attractive method of speaking to the delegates. The address to the Winnipeg convention, which occupied ten minutes to deliver, was placed upon one double-sided 10-inch record; the address to the Richmond convention, occupying fifteen minutes, was given on one double-sided 12-inch record. We need not, perhaps, remark that only by means of the Manadon patent process could such an extraordinary length of playing time be secured in the compass of one disc.

Columbia Co.'s £750 Royalties.

Probably no trade announcement has ever caused greater satisfaction than the Columbia Co.'s intimation on the issue of its first war records that it would pay a royalty on each record sold to the Prince of Wales' National Relief Fund. If it needed courage to issue new records at a time when this country had possibly its gloomiest outlook before it, as seemed to be the case commercially during the first two or three weeks of the war, then how much greater courage was needed

(Continued on page 50.)

"RENO, THE MAN OF MANY PARTS"

The *only* man in the world who can supply you with *one* part—or *any number* of parts for *any* Talking machine ever made from Adam to Edison-Roosevelt.

64 Page Catalogue Yours for Asking

FROM OUR LONDON HEADQUARTERS—(Continued from page 49).

to say that in connection with those records—a daring experiment in themselves—a royalty would be paid to the Prince of Wales' Fund?

As it happens, these war records came at a psychological moment, when the trade was having the impression thrust upon it that the public had set aside their gramophones for what looked like being a long rest. But with the issue of these war records by the Columbia Co., and the accompanying announcement regarding the special royalties to the Prince of Wales' Fund, public interest was awakened, and dealers throughout the country enthusiastically leaped at the idea of helping this deserving fund in this ingenious but decidedly practical fashion.

So whole-heartedly did the trade and public seize upon the suggestion that in purchasing these war records they were contributing to the Prince's fund that by October 26 the Columbia Co. had been enabled to send checks to the organizers of the fund amounting to £750.

Dutch Inquiry for Gramophones.

Inquiries for British-made goods continue to reach this country through various channels from all parts of the (neutral) world. The latest to hand is from the British consulate at Amsterdam, Holland, reporting that good scope exists for the development of British trade in that country, and citing an application from a firm in Amsterdam which desires direct communication with British houses manufacturing all kinds of musical instruments, gramophones and records being especially mentioned. The Commercial Intelligence Branch of the Board of Trade, 73 Basinghall street, London, E. C., will be pleased to furnish the necessary details to any genuine British manufacturing house upon application.

Export Trade Prospects.

Increased shipments of gramophone goods are being made from London to all parts of the world, the campaign on behalf of all-things-British having borne good fruit. Our manufacturers fully appreciate the opportunity now available for the development of trade overseas, and it is pleasing to observe that their efforts have secured unstinted

co-operation from colonial traders. It has been impressed upon me that the local requirements of different markets is receiving special attention, with a view to the permanent retention of oversea patrons.

Records for Wounded Soldiers.

That the gramophone is taking a high place among the comforts of our wounded soldiers in hospital is evident from the reception of gifts of records to those institutions. A few weeks back the manufacturers of Regal records received a letter of thanks from the matron of the London Hospital, which so aptly illustrates the point that we can hardly do better than quote it: "The matron desires to convey her sincere thanks for the very generous supply of records which we have just received. The patients are thoroughly enjoying the tunes already and we are most grateful to you for being the means of giving the wounded soldiers some happy hours."

A Big Selling Record.

The Daily Mail recruiting song, "Your King and Country Want You," has been paired with the Daily Chronicle song, "Fall In," on Regal record No. G6815. As these are probably the two most heavily boomed war songs of the moment, each having behind it the influence and strength of the most important newspapers of the day, this record should be one of the biggest sellers of the time.

Proving a Big Seller.

"Tipperary" figures as march with vocal choruses by Harrison Latimer on Regal war record No. G6802. On the reverse of the disc is "Red, White and Blue," similarly treated.

Belgian and British Soldiers Make Record.

A descriptive record of more than ordinary interest is that announced on the new Regal war list under the title "Arrival of the British Troops in France." The record occupies both sides of a ten-inch disc, the first half depicting the approach of the troopship to land, with soldiers singing and bands playing, the exchange of chaff, the welcoming shouts of "Vive les Anglais," the answering British cheers, an inspiring speech to the men and the "Fall in" as the boat draws alongside. The

second part illustrates the disembarkation, the lowering of the gangway, a rousing chorus which our soldiers have made their own for keeping in step, followed by the marching off of battalions of the Grenadiers, the Gordons and the Irish in succession, good-hearted banter and the entraining "for the front," the record coming to a brilliant conclusion with the departure of the train amid hissing of steam, singing of "The King" and volleys of cheering.

It is interesting to learn that among those who took part in the making of this record were a number of British territorials and four Belgian refugees, who entered thoroughly into the spirit of the occasion.

The Toll of War.

Accompanied by his wife, an American lady whom he had only recently married, Arthur Nier, of Nier & Ehmer, the German firm of horn manufacturers, left New York on July 25 and got through to Berlin just in time to join his regiment. An authentic report received in London now speaks of his death on the field of battle somewhere in France. I also hear that Clemens Humann, the Leipzig tone-arm maker, has been wounded. Another casualty is that of the eminent violinist, Fritz Kreisler, who lies in a Galicia hospital suffering from a serious wound in his leg and a slight one in his left arm, which latter, the doctors say, will fortunately not incapacitate him from continuing to exercise his art.

"H. M. V." People in the Fighting Line.

Some 200 members of the Gramophone Co.'s staff have joined the army to fight for old England, and some at the front find time occasionally to send through a line or two and their experiences. Lieut. Jack Gibbons, A. S. C., writes: "I have been up to the firing line twice in charge of a convoy of twenty-five motor lorries filled with ammunition. . . . leaving to-day for the firing line for good. That means I shall be attached to an 'ammunition park' . . . right in the thick of it."

Sergeant Cowen says: "I tried to catch a shrapnel." (Continued on page 51.)

nel shell, with the result that my hands were knocked about a bit." Such is war, or rather a sidelight thereof.

T. Edens Osborne a Live Wire.

From recent Belfast papers to hand we observe that Thomas E. Osborne, the local dealer in "H. M. V." and other goods, continues to pin strong faith in the value of publicity as a sales stimulant, and in this connection we would respectfully commend his example to those manufacturers who seem suddenly to have lost faith in printers' ink. How can "business as usual" apply if one doesn't "carry on" as usual?

News of Henry E. Parker.

Since interest in Parker, P. C., seems to have been very properly overshadowed by Parker, R. H. A., I deemed it expedient to make some inquiry into the matter of the latter's confrere this side. As a gunner in the Essex battery of the Royal Horse Artillery, Henry E. Parker expects to be included among the next complement for the fighting line, although such is the necessity for secrecy in these matters that the troops are often quite in the dark as to future movements. In an amusingly written epistle to the Columbia Co. Mr. Parker emphasizes his proficiency in the vocal exercise of telling what a long, long way it is to Tipperary, and was immediately invited to make a record of this now famous song. Apropos Tipperary, I understand the record as recorded in London will be issued by the Columbia people in America. It will doubtless be very much in demand, but your dealers will find it a "long, long way" to catch up to the sales figure for the United Kingdom—over 100,000.

New Catalogue of Edison-Bell Gramophones.

A batch of well-printed and attractive publicity literature is to hand from J. E. Hough, Ltd., of Edison-Bell fame. Dealing with the new instrument catalogue we find listed over twenty different models of every variety in style and price. For instance, be there a demand in your locality for cheap exterior-horn instruments, you would find of interest Model No. 1, at 35 shillings, put up in solid oak case with graceful molded base, size 13

Merely A Statement of Fact

The British Colonies and dependencies import annually many thousands of pounds' worth of gramophone products, a large percentage of which emanated from Germany.

Now that this source of supply is cut off, who is going to fill the breach?

This question must give British houses food for profitable thought.

But the opportunity for action is not tomorrow or the day after, it is Now!

The trade routes are open and we venture to think will so remain.

You can get into touch with oversea buyers through the medium of this trade newspaper, which enjoys a wide sale throughout the world.

Particulars and advertising rates will be gladly supplied to all interested by our European representative.

W. LIONEL STURDY

2 Gresham Buildings

Basinghall St., London, E. C.

x13x7½ inches, 10-inch turntable, speed indicator, a good motor to run a 12-inch record, nicked taper tone arm (taking either needle or sapphire sound box), new Corona "Prince" sound box, 20-inch bell flower-horn in colors. That sounds good value, and it is. Passing Model 2 at £2 12s. 6d., and Model 2B at 3 guineas, we come to No. 3 at £3 12s. 6d. This instrument weighs twenty-two pounds, is equipped with solid oak or mahogany French polished cabinet with hinged cover, a three-record motor with speed and regulating device, a heavier but same style tone arm as above described for Model No. 1, Corona "Prince" sound box and steel spun 23x24½-inch flower-horn. Another good line is Model 4C at 6 guineas, carrying the following specifications: Heavily molded solid mahogany cabinet, size 16½x16½x8½ inches; double-spring, nickel plated worm-gear motor, 10-inch turntable, speed indicator, heavy nickel tapered tone arm, Corona "King" sound box, 22½x24½ inches; highly polished laminated mahogany jointless horn, giving a particularly bright and mellow tonal delivery.

Of the hornless or portable type gramophone there is illustrated a good variety from 32s. 6d. upward to £10. The general finish and workmanship put into even the cheapest model is surprisingly good, and, price considered, each instrument represents a maximum of value.

In cabinet gramophones the Edison-Bell people have produced a set of models artistic in appearance and design without sacrificing tonal quality at the expense thereof. They range in price from £9 to £21. The subjoined specifications applying to Model No. 26 will convey some idea of the remarkable value offered for 10 guineas: Beautifully designed oak cabinet, inlaid satinwood and piano polished, measuring 43 inches high by 18¼ inches wide by 20½ inches deep; concealed horn, roomy cupboard for records, powerful nickel-plated five-record motor, tapered tone arm, with the "King" duplex sound box to play needle and phono-cut records.

Another E. B. catalogue gives illustrations and particulars of some newly designed record cabi-

Hoffay's Gramophone is Bound to be a Success WHY?

Your record stock will move more rapidly if you sell your records by means of this MUSICAL Instrument.

You can fill every flat of a house—every home—with one of these UNIVERSAL Instruments, thus establishing a UNIVERSAL buyer of ALL makes of records in every flat; all Instruments can be played at the same time, the soft, clear, natural reproduction does not go through the walls and floors, no matter how "loud" it is inside the flat.

The reproduction is free from any metallic tinge.

SELL RECORDS OF ALL MAKES

Increase your profits and those of all record manufacturers.

DESCRIPTION OF OPPOSITE PAGE

Fig. 1. Shows in section the Hoffay Sound-Box. Notice therein that the diaphragm is vibrated by a strong THREAD, which is kept stretched by the forks of the lever, the latter being in this way strengthened, thus making a fully braced structure. This accounts for the wonderful faithfulness of the reproduction. The same degree of braced structure is obtained in every Hoffay Sound-Box by means of a special tool (for which a patent has been applied), thus ensuring a standard of tonal efficiency. Also notice in Fig. 1 that the lever is rigidly supported by a ring carrier, which is free from metallic contact with the casing of the Sound-Box, insulated by a rubber ring, which is under lateral compression; in this manner the ring carrier is solidly supported without affecting in the least the vibratory action of the lever. The combined action of this rubber mounting at one end of the lever and the THREAD vibrating the diaphragm at the other end is so *sensitive* and balancing to one another that the sounds are reproduced as if in "relief" and "separated" from each other; the reproduction is *full, round, natural* and loud enough to be heard in a Theater if desired; at the same time it is of such a quality as to make it a pleasure to listen to it in the smallest of rooms.

Fig. 5. Shows the same Sound-Box with the difference that the diaphragm is connected to the forks of the lever by a screw, the result being to obtain a reproduction of great quality and as "loud" as you may wish.

Fig. 2. Shows the Hoffay Sound-Box Mounting in a

"closed" condition proper for playing records of the zig-zag type (Victor, Columbia, Odeon, etc.). Light in weight, small in size, and efficient in every respect.

Fig. 3. Shows the Hoffay Sound-Box Mounting in the "transition" condition, before swinging the block which holds the Sound-Box to position shown in Fig. 4 without having to detach the Sound-Box.

Fig. 4. Shows the Hoffay Sound-Box Mounting in an "open" condition, proper for playing records of the "hill and dale" type (Edison, Marathon, Pathe, etc.). In every case (Figs. 2 and 4) the structure is very rigid, so that no "rattling or vibration" takes place.

Fig. 6. Shows the Hoffay Sound-Box Mounting does. Either whilst playing "zig-zag" records or "hill and dale" the stylus (26) touches the *same point* on the record without any further alteration. Also notice that the angle of the stylus, in comparison with the record, remains the same in both cases; this means that AT LAST the successful use of a DIAMOND for playing the zig-zag (Victor [His Master's Voice], Columbia) is TO HAND, thus utilizing one point for playing *every* record ever made.

Fig. 7. Shows the Hoffay Tone-Arm Mounting and Weight Counterbalancing Tone-Arm. The tone-arm moves "horizontally" round the "upper" carrier and "vertically" round the "lower" carrier, shown in dotted lines, in alignment with the counter-weight. The tone-arm is straight, the weight is just "right," and the scratching of the needle is practically done away with.

"A Favorite" Postcard.

Among the recent publicity literature issued by the Utility Trading Co. is an attractive postcard which illustrates (in colors) on a small scale the firm's well-known poster showing a Greek athlete pointing to the Favorite record, all of which is suggestive of strength and presumably of meritorious quality. Dealers may have supplies upon application.

The Silver Sheath Needle.

From Messrs. Clarke I have received for personal test and review samples of his patent aluminum composite "Silver Sheath" needle, which is described as possessing unique and manifold advantages over the ordinary steel variety. One of these needles is good for an average of fifteen records without resharpening, and, this latter operation considered, it may be depended upon for the satisfactory reproduction of hundreds of records. Absence of scratch is a special feature, and with regard to tone the Silver Sheath will bring all the best out of a record at just the right volume and quality of reproduction. Its tone, in fact, is silvery to the minutest detail, and I am altogether impressed with it as a pleasing substitute for the more often than not scratchy steel needle. An outfit of six needles with a sharpener costs retail \$1.65, from which a good trade discount is offered to approved agents. Mr. Clarke will gladly send particulars upon request.

More Patriotic "Favorite" Issues.

The Favorite list of records for November contains a further batch of excellent items, mainly of a patriotic nature. Bulk record sales are of the martial flavor, few of the ordinary kind being in

COLONIAL and FOREIGN BUYERS

of gramophones and records may obtain valuable information from English firms who are desirous of opening up trading relations with oversea markets upon application, stating requirements, etc., to our European representative,

W. LIONEL STURDY

2 Gresham Buildings,
Basinghall St., London, E. C.

demand, and the Utility Trading Co. has, therefore, wisely concentrated its efforts to meeting this call by the production of new war records each month. Buyers the world over will welcome the latest numbers, for certainly they may be relied upon to make a wide appeal to all patriots. To quote a few examples of the value offered I would draw special attention to No. 747, bearing the popular war ballad, "Fall In," sung by Jack Smithson, and "A Soldier and a Man," by Henry Doyle; (749) "Our Fleet" and "Gentlemen, the King," by Stanley Wentworth; (746) "Your King and Country Want You," the famous recruiting song, and "Here's to the Day," both finely rendered by Jack Smithson; and (742) "With the British Colors" and "Bulgarian Patrol," both stirring played by the well-known instrumental organization, the Favorite Elite Orchestra. On No. 744 the popular banjoists, Olly Oakley and Joe Morley, present two pleasing duets, "Palladium March" and "Drum Major March," and among other discs of interest is No. 745, which carries "Eternal Father, Strong to Save," and "Onward, Christian Soldiers," two renowned hymns delivered sympathetically by Walter Barrett, with organ accompaniment. The Utility Trading Co., 21 Paper street, London, will be pleased to hear from all dealers open to entertain a good proposition.

Will Use the Name of Williams.

The subjoined appeared in a recent issue of the Daily Telegraph, London: "I, Victor William Opperman, a British-born subject, of No. 9 Daysbrook road, Streatham Hill, in the County of London, musical conductor, heretofore known as Victor Opperman, hereby give public notice that I have formally adopted, and determined upon all occasions whatsoever and in all deeds and writings to forthwith use the name of Williams as my last and only surname. (Signed.) Victor Williams. Witnessed by J. E. Gowing, 80, Brixton Hill, Solicitor."

Confidence in the Future.

It wants some faith in the business to go to the by no means light expense of a front half-page of the Daily Mail these troublous times. That is, perhaps needless to say, Columbia confidence, or, rather, only a commencement, since it is to be followed, we learn, by other advertising. An excellent example.

Great List of Patriotic Numbers.

Notwithstanding the extra pressure of work in connection with the supply of patriotic numbers, the British Zonophone Co. continues to issue, "as usual," new supplements each month. The latest to hand lists many excellent selections, and this important feature, considered in conjunction with a quality standard of recording unsurpassed in the record world, makes easy of understanding the great reputation and popularity of Zonophones among all nations. One could wish for no finer examples of artistic merit than is engraven upon 12-inch record A150, "Lolita," and "Nirvana," sung by Sydney Coltham, whose exquisitely sweet tenor voice is also heard to perfect advantage in "Sleep and the Roses" and "Tired Hands" on 10-inch No. 1356. A fine 12-inch, too, is that bearing "Gavotte" (Bach-Kriesler) and "Gondoliera" (Ries), played in superb style by Miss Mary Law, the well-known violinist. Other records by the famous Black Diamond Band, Alfred Cammeyer and Olly Oakley, the banjo duetists; the popular comedian, George Formby, etc., all go to suggest that the particular program under mention merits special commendation.

An "H. M. V." Patriotic Week.

"Business as usual," and quite a lot of it, is the order of the day—every day—at the Gramophone Co.'s factory at Hayes. Record making is proceeding at high pressure, and so great is the call for patriotic numbers that a special publicity scheme has been devised as a kind of celebration by which "H. M. V." agents will reap a rich harvest of extra sales. Hence the inauguration of a patriotic week, ending November 2. Now, this patriotic

FROM OUR LONDON HEADQUARTERS—(Continued from page 54).

week is not merely on paper; it is a real live thing planned to interest the public direct by extensive newspaper advertising in the leading organs throughout the country, and on this head alone the company has apportioned quite a liberal expenditure. Faced with such a practical symbol of confidence in the gramophone trade, the most pessimistic dealer would throw aside the shackles of doubt and get busy. He has. My last report from the "H. M. V." people is that the scheme is an amazingly fine success all along the line. Quite a large number of agents adopted the company's outline for a special window display, and altogether they seem to have entered very wholeheartedly into the spirit and letter of the plan. Congratulations.

An Important Law Action.

Freight with an unwelcome significance in its bearing upon the interests of British record manufacturers, the subjoined important law action will arouse more than ordinary attention:

Francis, Day & Hunter vs. B. Feldman & Co.—In this case the defendants appealed from a decision of Mr. Justice Neville granting an injunction restraining them from infringing the plaintiffs' copyright in the song "You Made Me Love You, I Didn't Want to Do It," in a song they had published entitled "You Didn't Want to Do It, but You Did It."

The defendants contended that there was no copyright in the plaintiffs' song, because it was published in the United States of America before being published in any part of His Majesty's dominions, to which the Copyright Act, 1911, applied. To this the plaintiffs replied that the publication took place simultaneously here and in America. Mr. Justice Neville held that there had been publication in this country within the meaning of the act and that the defendants' song was a colorable imitation of the plaintiffs' song. He therefore granted an injunction, with costs, and an inquiry as to damages. The court allowed the appeal. Lord Justice Swinfen Eady said the plaintiffs' song was a literary work within the meaning of the act, and the plaintiffs held the copyright, which gave them the sole right to produce or reproduce any essential or substantial part of the song. The same ideas ran through the defendants' song; both were on the same lines. One song recalled the other, and the defendants' song was a sequel to the plaintiffs'. But he was unable to say that unfair use had been made of the expression of ideas in the plaintiffs' song or that any substantial part of it had been taken or incorporated in the defendants' song.

Important to Business Men.

The Postmaster-General announces that the Army Council has now agreed to the use of registered addresses in extra European telegrams to and from England under the following conditions:

1. The address must have been registered before July 1 last.
2. It can only be used as the address of a telegram; its use as the signature is still prohibited.
3. Telegrams having such addresses can only

be sent to and received from British or allied territory in the extra European telegraph system (and Egypt) or the United States of America.

4. In the case of telegrams to allied territory or the United States the full name and address of the addressee must be given on the back of the telegram form.

THE WORLD'S MUSICAL INSTRUMENT

Definite Information at Last—Mr. Hoffay in New York—Manufacturing and Selling Plans Exclusive Territory for Jobbers.

Those who have closely followed my notes month by month must have read with ever-growing interest, not to say curiosity, of the gradual development of an inventor's "ideal" in connection with the science of sound reproduction. I refer in the first place to J. Hoffay and in the second to what has come to be known, especially to World readers, as "The World's Musical Instrument." American, colonial and foreign talking machine houses have evinced tremendous interest in the Hoffay patent, some evidence of which Mr. Hoffay has accumulated in the shape of hundreds of inquiries from all parts of the world. Such universal homage to a comparatively unexplained invention offers a strong confirmation of the almost general belief in the ultimate perfection of mechanical music along lines perhaps altogether different from present methods. At least, that is how one may reasonably interpret this great interest in a new invention. To crystallize sound with fidelity is recognized as presenting less difficulties in proportion to the equality of after expression or reproduction. Faithful expression of the human element—the very essence of mechanical music science, both in recording and reproduction—must carry with its attainment an influence of world-wide importance for the whole gramophone industry.

After a thorough investigation of all claims with regard to "The World's Musical Instrument" I have arrived at the conclusion that the foregoing must to some extent express my personal view of the scientific musical value of Mr. Hoffay's invention, which marks an unquestionable advance in the evolution of sound reproduction. I have been accorded the privilege of being the first press man to closely inspect a very wonderful machine—a machine in name only, since the most expert musician with the most sensitive ear would, I venture to assert, find it well nigh impossible to detect anything mechanical about it.

"The World's Musical Instrument" plays, without the necessity of detaching sound boxes or manoeuvres of that kind, all makes of discs—Edison, Victor, Columbia, Marathon, Pathe, etc.—with equal facility and perfection. The clarity and general lifelike attributes of its reproduction are really remarkable. In some circumstances the volume seems to fall a little short in comparison with the ordinary instrument, but in other instances it seems even louder, but what, in fact, happens is

that the sound being truer in pitch is really more lifelike. All of which is an advantage which makes a special appeal to those who favor a sweet tone modulated on natural sound.

The double-page announcement elsewhere in this issue gives full illustrations and particulars of Mr. Hoffay's ingeniously devised apparatus, which makes it unnecessary for me to enter upon any description of it.

Mr. Hoffay plans to be in New York some time this month, when he will make efficient arrangements for the prompt manufacture of his patents.

Finally, I would remark that "The World's Musical Instrument" offers a sure opportunity for the development of new trade fields, for even the most prejudiced—and there are a few persons who come under that category—cannot fail to succumb to its manifold charms. And that, apart from present customers, must result in an ever-increasing record trade, the very foundation and commercial life of the gramophone industry.

My sincere advice to all interested is to avoid procrastination in negotiating with Mr. Hoffay, who may be reached at New York. I understand his address is P. O. Box 1249.

FOREIGN RECORD BUSINESS

With the Columbia Graphophone Co., of New York, Shows Steady Expansion, According to Harold W. Lyle, of the Advertising and Sales Department of This Division.

The steady and consistent growth of the foreign record business is conclusively set forth in the figures submitted by Harold W. Lyle, of the advertising and sales department of the Columbia Graphophone Co.'s foreign record division. Mr. Lyle, who is a son of George W. Lyle, vice-president of the Columbia Co., is achieving a signal success in this field, due to his detailed knowledge of the requirements of this special phase of the business.

"Our sales totals for September," said Mr. Lyle, in a chat with *The World*, "show that our foreign record business for that month exceeded that of December of last year, which was the banner month of history. We tripled the foreign record business closed in September, 1913, and although I have not yet received the exact figures for October, I can safely say that we have exceeded September of this year by a substantial margin."

"The splendid growth in this division of our business must be attributed in a considerable measure to the fact that we are endeavoring to issue only those foreign records which we believe will meet with a ready sale among people who appreciate this class of music. Our monthly lists aim to cover the ground thoroughly in every foreign language that is in demand in any section of this country, and the fact that we are interesting new dealers in foreign record business day by day indicates the success of our efforts in this direction. The war abroad has acted as a stimulus to foreign record trade, according to the reports we are receiving from Columbia dealers."

FITTING THE RECORD TO THE CUSTOMER.

Determine the Musical Tastes of Your Patron, Mr. Dealer, Before You Attempt to Sell Him Goods—By So Doing You Will Save Both His Time and Your Own and Gain a Reputation as a Skillful Salesman—A Story That Illustrates the Point.

How many talking machine dealers, I wonder, take time, when a prospective patron walks into their establishment to purchase records, to give him the once over, as they say at police headquarters, before interrogating him as to his desires? It is safe to say that the number of talker men who avail themselves of this method of facilitating sales is most insignificant, and it is the object of this little talk of mine to show that by focusing your powers of observation upon the dress, manner and conversation of your customer, you can deal with him far more intelligently than if you neglected to enact the role of detective as well as merchant.

I can think of no business man who caters to a more cosmopolitan horde than does the chap who sells talking machines. From Professor Strauss, of the university on the hill, to Cyrus Simkins, from Hickory Corners, N. J., they come to him for records and, would you believe it, I have witnessed a young man who considered himself the very latest thing in clerkship place upon the turntable, "Down Home Rag" for the professor, while Cyrus was treated to a rendition of "Andante from deBeriot's Seventh Concerto."

"Ach himmel! I vant moosic, not noise," wailed the outraged professor.

"Say, young feller, when is that there fiddler goin' to stop tunin' up? I'd like mighty well to hear him play somethin'," drawled Cy, disgustedly, etc., etc. Do you get me?

It is most necessary in order that a talking machine dealer may get in close touch with the phonographic desires of his patrons that he use every means in his power to scrutinize them scientifically. My friend, John Jones, talking machine merchant de luxe, keeps track of the musical tastes of every customer who calls upon him by a simple method of bookkeeping. These books, which bear the title, "My Customers," are of the greatest possible assistance in selling goods because they show the kind of record that will appeal to a certain type of individual. For instance, when Cyrus Simkins calls upon John Jones, the clerk recognizes at a glance the rural land owner. Glancing through "My Customers" he eventually

reaches the page devoted to primitive agriculturists and discovers that selections like "Silver Threads Among the Gold," "The Old Oaken Bucket," "Annie Laurie," with an occasional coon song, and perhaps a rag or two, will strike Cyrus about right. He, forthwith, proceeds to do a nice little business with the gentleman from Hickory Corners without the loss of time that would naturally accrue through not knowing just what record to play. If every talking machine dealer would follow in the footsteps of Jones regarding this matter they would find that there would be more sales made and fewer dissatisfied customers.

It is a difficult proposition to demonstrate a

The Process of Demonstration.

talker outfit to a person who is not at all familiar with it. Especially is this true of a musician who is prejudiced against canned melody in any form. However, if you are able to judge from the personality of your caller, the kind of selection that will most appeal to his artistic sense, half the battle is won at the outset.

Fortunately for the dealer, the talking machine has reached such a state of perfection that even a musical critic cannot conscientiously condemn it. Therefore the time has come when it is not a case of one record being superior to another in so far as mechanical imperfections are concerned, as it was in the early days of the talker, but when one selection will lead another only through the ability of the artist and the composer. In other words, the talking machine has arrived. It has joined the ranks of the makers of true melody, and is fast pressing onward to its rightful place at the head of them all. The day is not far distant, believe me, when every instrument, even the imperfect piano, will be mastered phonographically, and when that time comes the talking machine will stand supreme, its competitors in precipitous retreat. So you see, Mr. Dealer, you are not selling mechanical toys any more. Neither are your records noisy and gritty reproductions of real music.

This means a very great deal, for it does away entirely with the need of playing records in private prior to their public rendition. I can remember when my friend, John Jones, used to test every record before placing it on sale, and that was not so very many years ago either. He was forced to adopt this method for his own protection against the harsh criticisms of his customers. When the blasts and knocks developed in cylinders or discs that had not received an elimination test, Jones wished most devoutly that some other business than that of dispensing talkers had claimed him for her own. However, that is past and gone now, and Jones is happy. He has every reason to be contented to-day, for he has specialized his profession to the extent of placing his talker shop in an advanced state of prosperity through many clever and unusual methods of business building, some of which have already been outlined in The World. I am sure, Mr. Dealer, if you adopt the trade boosting stunt suggested above you will find it a most worthy one.

From now on each time Mr. A. Prospective Customer enters your store greet him effusively; be the hospitable host to the degree of making him loquacious. You know, do you not, that there is no better way to bring to the surface a fellow's habits, ambitions, and, above all, his likes and dislikes, than by urging him to talk. Well, inasmuch as we have steered this particular conversation into phonographic channels, and you have established yourself as an interested listener, it will not be a great while before the subject of records will be broached. Then it naturally follows that the selections he likes best will come forward. Result: A concert made up exclusively of the very cream of your stock, so far as Mr. A. P. C.'s tastes are concerned, which, of course, means a quick sale and a satisfied patron. What more, pray, can a dealer ask?

Jones lives in a town which has some fame as a resort, and is visited throughout the season by a great many people from not only other states, but other countries as well. He makes a point of appealing to the patriotism of these folks by first ascertaining from whence they come, and then entertaining them with a concert made up of records containing a certain amount of local color. To illustrate: To the chap who hails from the state with its golden gate ajar, he renders "I Love You, California." The fellow from Baltimore is made happy by the strains of "Maryland, My Maryland." The retired rancher from San Antonio reaches for his silken bandanna when Edgar L. Davenport, in his pathetic recitation, "Lasca," explains that "scratches don't count in Texas, down by the Rio Grande." The Yankee is touched with the pathos of "My Old New Hampshire Home," while even the man from the state of mosquitoes and Presidents appreciates "Over on the Jersey Side."

When Jones explained this treatment of transients to me, I asked him a question. "John," said I, "will you tell me, please, why this sort of thing pays? I can understand, all right, why a record suggesting one's own state or town would play upon the heart-strings and force a fellow to loosen up to the extent of purchasing that particular

(My commission expires March 30, 1916.)

selection. So far, so good, but does it pay to go to all that trouble of identification, etc., for one record?"

"My boy," remarked Jones pityingly, "you should know better than to ask a question so foolish. You have actually mingled among the talker fraternity for ten long years and have yet to learn that to sell a big bill of goods to a man, particularly when he's homesick, you must play something for him right at the start that will set him going—'play upon the heart-strings,' as you express it. Bah! I'm ashamed of you."

I have been giving the manufacturers a few hints lately, as you may have noticed if you have been kind enough to read my stories. Taking it for granted that there is always room for one more, I submit the following: You have seen, of course, the tide of patriotism that is sweeping over our country because of the war in Europe. You know what a stir has been caused by the "Made in America" advertisements of our great department stores. Everywhere you gaze upon the shield and the flag. As I write the Philadelphia Evening Bulletin lies open upon my desk. On page five there is a full page spread containing the following patriotic adornments: One coat of arms of Philadelphia, twenty sketches of Old Glory and the celebrated poem, "America," accompanied by an artistic drawing in pen and ink showing the liberty bell and draped flags.

LANDAY WHOLESALE GROWTH.

Most Marked During the Past Month—Compliments for the Talking Machine World as an Effective Advertising Medium.

"The growth of our wholesale business is a matter of considerable pleasure," said Max Landay, of Landay Bros., 563 Fifth avenue, New York, Victor distributors. "Orders are being received regularly from our patrons, and we are extending co-operation to our trade by giving them prompt service in every meaning of the word. I may say in this connection that the use of the advertising columns of The Talking Machine World has been an im-

portant factor in the extension of our wholesale business. Our announcements have evidently been read by Victor dealers in all parts of the country, and the results from this advertising have pleased us greatly."

TO MAKE TALKING MACHINES.

Eaco Films is the title of a new concern which has been incorporated with a capital stock of \$5,000 under the laws of New York for the purpose of engaging in the manufacture of motion pictures, talking machines, etc. The incorporators are Edwin August, E. E. Anderson and M. C. Goldman, all of New York City.

COUNTRIES BUYING OUR GOODS.

Some Interesting Particulars Regarding the Exports of Talking Machines and Records as Set Forth by a Writer in Printers' Ink.

In an interesting article headed "What Countries Have Bought Our Goods?" Printers' Ink of recent date gives an informative discussion of the progress that American manufacturers in various lines have achieved in blazing the trail of commercial activity throughout the world.

Referring to the talking machine industry in this connection, this article reads as follows:

"American manufacturers of talking machines and phonographs and records for such instruments have attained within a few years a most excellent distribution—that is, widespread and evenly balanced distribution for their goods—in the foreign field. What these firms have done should, moreover, be something of an inspiration to others because they found it necessary to, in a sense, do double work to win the foreign market. The average manufacturer may cater successfully to oversea trade by merely making slight changes in his product, say by altering his standard models to conform to national preferences.

"In the case of the 'talker' trade, however, it was not a simple selling proposition. Before it reached that stage the companies had to send out expensive expeditions to various quarters of the globe in order to secure vocal and instrumental records by the best musical celebrities. In consequence of this thorough-going policy and in the face of keen British, French and German competition, the American graphophone and phonograph companies sold in Canada, during the twelve months ending on the first day of last July, goods to the value of nearly \$900,000—a gain in sales of nearly 100 per cent. in two years. In Australia the sales jumped in this one year from \$82,000 to \$182,000. In South America the sales for the period footed \$350,000, and would have been easily twice as much but for the money stringency which has hit Latin America during the past year."

Are you interested in an attractive business proposition?

We say attractive—yes, exceptionally attractive.

We rank among the largest producers of pianos and player-pianos in the world.

There are a good many piano prospects which enter your store, Mr. Talking Machine Dealer—a good many. Why let them get by you into a regular music store?

We can tell you how to stop them and at the same time stop the dollars which get away from you when the trade leaves your store.

We have an ideal proposition for the talking machine dealer.

Take it up with us, will you? It will only require a small part of your store and practically little or no trouble.

H. P. NELSON COMPANY
816 No. Kedzie Avenue, Chicago, Ill.

TRADE NEWS FROM INDIANAPOLIS.

Prominent Piano Houses Take on the Edison Disc Phonograph Line—Stewart Co.'s Big Victor Trade—Columbia Co.'s Artistic Window—Month's News of Interest.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., November 11.—Announcement is made by the Kipp-Link Phonograph Co., 345 Massachusetts avenue, Edison distributors, of the handling of the Edison diamond disc talking machines by the Pearson Piano House, 128-130 North Pennsylvania street; the Carlin Music Co., 33 North Pennsylvania street, and the E. L. Lennox Piano Co., 311 North Pennsylvania street.

The E. L. Lennox Piano Co. has had the Edison line for several months, and is enlarging its talking machine department. Pearson's and Carlin's have just put in the Edison talking machines. Pearson's, Carlin's and Lennox's are conducting extensive Edison advertising campaigns in the daily papers.

Walter E. Kipp, president and manager of the Kipp-Link Phonograph Co., is very optimistic in regard to the business prospects for the early winter. Notwithstanding the general depression in business, Mr. Kipp says his company is busy every minute in meeting the demands of the trade. The display rooms of the company have been redecorated.

W. S. Barringer, manager of the Stewart Talking Machine Co., distributors for the Victor line of talking machines and records, says the company enjoyed the best September and October business in the history of the house. Larger shipments throughout the State to victrola dealers were made in October than ever before, Mr. Barringer said. The Stewart Co. has employed additional men to take care of the increased business in the wholesale stock rooms. The Stewart Co., since it was started several years ago, has experienced a phenomenal growth. It has been necessary for the company to enlarge its quarters to accommodate the increased business of the house.

A. W. Roos, manager of the Columbia Graphophone Co.'s store at 27 North Pennsylvania street, is very much pleased with the results of October in his territory. Business is good, the month showing a marked increase over last month as well as against October of 1913, Mr. Roos says. Mr. Roos sees no depression in his field because of the European war or anything else.

The store of the Columbia Graphophone Co., at Terre Haute, Ind., has been placed under the supervision of Mr. Roos. Sales there the first month of the new arrangement were very gratifying. Mr. Roos looks forward to a big season for both stores, and there is every indication that his hopes will be realized. Collections on outstanding accounts, he announces, are above normal.

H. M. Wright, floor manager at the Indianapolis branch of the Columbia Co., once more has gone into the forest and field to make an attractive window in keeping with the season of the year. As a result the Columbia window is an exact reproduction of a cornfield, showing standing corn, shocked corn, and the stubbles of the stalks. A prolific pumpkin vine is shown winding in and out among the corn stalks, with seven or eight inviting pumpkins "growing" right in the window. Needless to add, the window contains enough Columbia products and descriptive literature to make the display a real Columbia advertisement.

H. J. Weir, formerly with the Kipp-Link Phonograph Co., is now with the E. L. Lennox Piano Co., as head of the phonograph department.

The Fuller-Wagner Music Co., which took over the assets of the Wagner Music Co., has put in the Victor line of talking machines. The Pearson Piano Co. has been featuring in its advertising the offer to join one of its Christmas Victrola clubs, the plan being to make payments now and obtain a Victor machine at Christmas time.

Some men stand all their lives vainly rattling the doors to success and wondering where those inside got their keys.

NYOIL

For polishing varnished woodwork it is extremely satisfactory. No oil is so clean.

Ask your watch repairer whose oil he uses on your watch.

HOLDS DANCING EXHIBITION.

Loomis Temple of Music Features Victor Dance Records in Elaborate and Effective Manner in New Haven, Conn.

(Special to The Talking Machine World.)

NEW HAVEN, CONN., November 7.—The Loomis Temple of Music attracted much attention to its store and business last week by holding an elaborate free exhibition of modern dances on Wednesday evening, at which a pair of professional dancers appeared and where the Victrola supplied all the dance music.

Several hundred people, a capacity audience, gathered at the Loomis Temple of Music in response to special invitations sent out by the house and witnessed demonstrations of a half dozen of the latest society dances, including the fox trot and the Lulu fado. On the program supplied there appeared in connection with the name of the dance the number of the Victor record used and the title of the selection, while between dances November Victor records were demonstrated. The exhibition was carried out in a first class manner and the audience was a representative one, most of the members of which were known to own talking machines or were excellent prospects. Much interest was displayed in the records used and a large number of them were sold immediately after the closing of the exhibition.

PATTEN WITH NEWBRO DRUG CO.

Takes Charge of Columbia Department—W. S. Storms Chats of Business in Des Moines.

(Special to The Talking Machine World.)

SPokane, WASH., November 5.—J. R. Patten, who has been traveling representative for the Columbia Graphophone Co., of this city, covering Washington, Idaho and Montana, has just accepted the management of the talking machine department of the Newbro Drug Co., of Butte, Mont. Mr. Patten states that he is very optimistic over the outlook and expects to do a humming talking machine business during this fall and through the holidays.

The Newbro Drug Co. is the largest drug company in Montana, and has one floor entirely devoted to Columbia Grafonolas. It handles a complete line of Columbia goods, and does a great deal of advertising throughout the State of Montana of its product.

In discussing the business situation, Willis S. Storms, local manager, said: "The war seems to have had no effect on our business here; on the contrary, we have made a healthy increase over last year and anticipate that our holiday business will be the biggest in our history. We are having a very large demand for the new Columbia Leader Grafonola with the individual record ejector. The dance business is going big here."

Looking back one year at the Columbia progress ought to make it easy for you to look ahead one year and make a pretty shrewd guess.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

**Columbia Graphophone Company
Woolworth Building, New York**

EDISON DEALERS IN EVIDENCE

At Harvest Homes and Country Fairs Held in Various Parts of the Country Recently.

Edison disc and cylinder products have been prominent factors in the various harvest homes and county fairs held in different parts of the country the past few months. In many instances floats and exhibits devoted to the Edison phonographs have received first prize, and, needless to say, Edison dealers exhibiting the line have taken full advantage of the publicity offered them through this medium.

In Aurora, Neb., C. E. Nair, a live-wire Edison dealer, designed a float for the Harvest Festival in that city, which was awarded the first prize. This float featured Edison diamond disc products exclusively, and a \$200 machine was operated invisibly. The selections chosen were such as to arouse much favorable comment, and the phonograph was kept playing throughout the entire parade.

John R. Bolz, Edison dealer at Kiel, Wis., constructed an attractive Edison float for the "Home-Coming Harvest Week" in that city, which was among the best floats shown, and enjoyed appreciation from thousands of visitors.

One of the most attractive events that the bustling city of Hanover, Pa., has ever introduced was the recent county fair, which drew great crowds from all sections of the surrounding territory. Ivan White, enterprising and live-wire Edison representative in that city proved himself equal to the occasion, and designed an Edison float which was distinctive and artistic to a degree.

The Monmouth County Fair is always one of the most important events staged in Southern New Jersey, and this year's fair was a banner one. The Tusting Piano Co.'s booth was voted one of the finest at the fair, and the Edison \$250 disc phonograph featured at the booth was awarded the blue ribbon for the highest type of musical instrument exhibited. F. A. Richie, of the Phonograph Corporation of Manhattan, Edison jobber, was in charge of the exhibit.

Another splendid Edison display was that of the Coocy-Bentz Co., at the West Virginia fair field, at Wheeling, W. Va., held recently. The Coocy-Bentz Co. used for this occasion two Edison \$250 disc models, one to attract the crowds by continual playing, and the other for demonstration. One result of their exhibit at the fair was the securing of an excellent list of prospects who evinced keen interest in the Edison disc products.

H. C. BROWN'S NIMRODIAN EXPLOITS.

H. C. Brown, advertising manager of the Victor Talking Machine Co., Camden, N. J., was a visitor to New York recently in regard to the erection of a new building in which the Sphinx Club is interested, and of which he is president. Mr. Brown, by the way, has just returned from a hunting trip to New Brunswick, Canada. He "brought down" a few moose and other game during his Nimrodian peregrinations.

Habits are like appendices. When they begin to hurt it's time they were "cut out."

A YEAR OF EXPANDING BUSINESS.

The Dallas Phonograph Co. Was a Year Old on November 1—Enjoys Large Edison Trade.

(Special to The Talking Machine World.)

DALLAS, TEX., November 1.—To-day the Dallas Phonograph Co., of this city, celebrates the conclusion of its first business year, having opened up on November 1, 1913, handling the Edison diamond disc and Columbia Grafonola. The initial force consisted of three employes, which during the year has increased to ten or more, thus demonstrating the development of this business under the able management of S. T. Brannan, vice-president and manager.

The warerooms at 909 Elm street are attractively arranged, with a number of handsome sound-proof parlors for the convenience of buyers. The manager reports an increasing business in the Edison disc line. An excellent trade is also being done with the Edison dictating machine, this company being the distributor for northern Texas.

TRADE NEWS FROM PITTSBURGH.

Lechner & Schoenberger Co. Handle "Talkers" —Schoen Co.'s New Quarters—Kaufmann's Victrola Concerts.

(Special to The Talking Machine World.)

PITTSBURGH, PA., November 10.—The Lechner & Schoenberger Piano Co., 631 Liberty avenue, has completed the installation of its talking machine department, which is one of the most attractive and up-to-date in the city. The four booths are constructed along lines that make for the greatest convenience and also complete comfort for patrons, as their features embrace a very unique and effective ventilating system. D. S. Hartley, formerly of the S. Hamilton Piano Co.'s talking machine department and a man of long experience in this line, on November 1 assumed the management of the new department. Mr. Hartley is very optimistic concerning the outlook for holiday trade and, with his two splendid lines, the Edison and the Columbia, he expects to get his share of the business transacted during this and next month.

H. N. Rudderow, manager of the Kaufmann Bros. Victrola department, reports that October's business was nearly 50 per cent. above the previous month and also October of 1913. He is planning a series of Victrola concerts to be held soon in the Big Store's auditorium.

The Schoen Music Co., which has moved its establishment from 119 Federal street, Northside, to 620 Penn avenue, is preparing to push more strongly its talking machine department, which was installed about five months ago. The Columbia instruments are being handled.

HOLIDAY ADVERTISING IN ORDER.

Some Very Effective Publicity Issued by the Victor Co. as an Aid to Dealers to Stimulate Holiday Trade in Machines and Records.

The Victor Talking Machine Co.'s newspaper advertisements for the month of November will be based principally on the desirability of selecting a Victrola for Christmas and the success of the Victrola as an instrument for furnishing dance music. The Victrola XVI, at \$200, is featured in three of these advertisements, and Mr. and Mrs. Vernon Castle dancing the fox trot in the other two advertisements. Particular attention will be called to the fact that Mr. and Mrs. Castle use the Victor exclusively and superintend the making of Victor dance records.

Accompanying its advance copy of new Victor records for December, which go on sale November 28, the Victor Co. has sent its dealers a proof of a new and unusually attractive Christmas car-card lithographed in brilliant Christmas colors—red, green and gold—which will be furnished the dealers free of charge, imprinted with their name and address, provided they have a contract with the street car company for twenty-five or more cards.

INCORPORATED.

His Master's Voice, Ltd., Toronto, Ont., has been incorporated with capital stock of \$100,000 to manufacture talking machines, etc. The incorporators are J. S. Lovell, William Bain, Robert Gowans and others.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., November 10.—CABINET FOR SOUND REPRODUCING MACHINES.—Helge A. Bortsen, Marquette, Mich. Patent No. 1,109,386.

This invention has relation to improvements in cabinets for sound reproducing machines, and has for its special objects, first, the provision of such a cabinet in such form that it may be embodied in a desk, cabinet table or other like piece of furniture; second, the provision in such a cabinet of an arrangement which will permit the amplifying or delivery horn to extend directly without turn or bend at right angles from the sound head and vibrating membrane; third, the provision in such a cabinet of simple means for assisting the feeding

of the stylus over the record, and fourth, the provision of simple means for operating my cabinet

To effectuate the above objects there is provided the mechanism illustrated in the accompanying drawings, in which Fig. 1 is a plan, partially in section, of a cabinet table embodying the invention, taken on the line X—X of Fig. 2; Fig. 2 is a cen-

tral, longitudinal elevation of the invention partially in section; Fig. 3 is a longitudinal sectional elevation taken on line Y—Y of Fig. 1; Fig. 4 is a detail of the adjustable inclined horn-suspending feeding rail; Fig. 5 is a detail of the sound head guide rail, and Fig. 6 is an end elevation of the cabinet table showing the doors to the phonograph compartment open.

SOUND-BOX FOR TALKING MACHINES.—Horace Sheble, Philadelphia, Pa. Patent No. 1,102,090.

The object of this invention is to so construct a sound box for talking machines as to provide for the use of the same either in connection with a record having a "lateral wave" groove or with a record having a "hill-and-valley" groove, such dif-

ferent records being employed without the necessity of changing the angular relation thereto of the sound box diaphragm.

Fig. 1 is a view, partly in side elevation and partly in section, of an ordinary talking machine sound box illustrating the same as designed for use with a record of the lateral wave type; Fig. 2 is a similar view illustrating the sound box as adapted for use in connection with a record of the hill-and-valley type, and Fig. 3 is an enlarged view of the converting attachment shown in Fig. 2.

SOUND-BOX.—Jonas W. Aylsworth, East Orange, N. J., assignor by mesne assignments to New Jersey Patent Co., West Orange, N. J. Patent No. 1,115,374.

This invention relates to sound boxes particularly of the type adapted for use in connection with disc records having vertically undulating grooves, although its use is not limited to that type.

With reproducers commonly in use, the tracking of the record groove by the stylus causes the emission of minute scratch vibrations which greatly impair the quality of the reproduction. It has also been found that when the stylus is rigidly connected with the diaphragm excessive loudness is given to some of the vibrations.

It is the principal object of the invention to provide a sound box free from these objections; and in conformity with this object, there is provided a composite stylus arm having interposed between the sections thereof an elastic yielding substance which will absorb the minute scratch vibrations and which will at the same time retard or dampen the excessively loud vibrations.

Another object of the invention is to provide adjusting means whereby the loudness of the

record may be modified and variations in the set of the diaphragm compensated for.

Fig. 1 represents a side elevation of a sound box embodying the invention; Fig. 2 represents a front elevation thereof, the connection between the two sections of the stylus arm being shown in central longitudinal section; Fig. 3 represents a fragmentary sectional view taken on the line 3—3 of Fig. 2; Fig. 4 represents a fragmentary side elevation partly in section of a modification; Fig. 5 represents a front elevation partly in section of the stylus arm shown in Fig. 4, and Fig. 6 represents a similar view of still another form of stylus arm.

DISC SOUND RECORD.—Victor H. Emerson, New York, assignor to American Graphophone Co., Bridgeport, Conn. Patent No. 1,113,973.

This invention relates to the building up of a suitable tablet or disc that is to constitute the

commercial sound record. Broadly speaking this tablet consists of a main portion or body, a facing that contains the irregularities corresponding to the sound waves, and an intermediate layer or stratum that serves the two-fold purpose of securing the facing of the main portion and of otherwise contributing (in a manner to be explained) to the production of the commercial sound record.

In the drawing annexed hereto to illustrate an embodiment of the invention, the parts are shown greatly exaggerated in thickness.

METAL SOUND RECORD.—Thomas H. Macdonald, Bridgeport, Conn. (deceased), assignor to the American Graphophone Co., same place. Patent No. 1,114,010.

The object of this invention is to produce a sound record of greatly improved durability without any sacrifice of quality.

It is well known that with the sound records now on the market each reproduction causes deterioration, and that after several hundred reproductions or sometimes even less, the record becomes so poor as to be practically worthless. It has long been desired to obtain for permanent preservation records of celebrated personages, great

singers, etc. Such records can be preserved for a long time, perhaps indefinitely; but each use thereof, for audible reproduction, to that extent tends to destroy them. By this invention is produced a permanent sound record which can be used thousands of times without any appreciable deterioration, and which can be preserved for indefinite ages, yet without any sacrifice of quality.

This invention will be best understood by reference to the annexed drawings that illustrate preferred methods of procedure, the discs shown in the drawings being somewhat exaggerated in thickness for sake of clearness and the drawings themselves not being made to scale, but merely as illustrations.

In the drawings Fig. 1 is an elevation intended to represent conventionally the production of an "original" disc sound record of the vertically undulating type, and Fig. 1a is a similar view repre-

sending the production of an "original" disc sound record of the laterally-undulating type; Fig. 2 is an elevation indicating the operation of rendering the surface of such "original" electro-conductive; Fig. 3 is a transverse vertical section through a conventional representation of an electroplating bath for producing the electroplate masters or "negatives" of the "originals," and Fig. 4 is a similar view representing the production from such negatives of electroplate "positives;" Fig. 5 is a sectional view of a pair of rotating chucks, indicating the turning back of the circular edge or rim of such metal "positives;" Fig. 6 is a vertical section through a press, representing the pressing-up of the double-faced sound record; Fig. 7 is an edge view, and Fig. 8 a face view, representing the completed record.

PHONOGRAPH ATTACHMENT.—Albert H. Leissing, New York. Patent No. 1,114,492.

The general object of the invention is to effect the removal of particles of dust, dirt or the like, from the grooves or indentations of the surface of a sound record. And to this end the invention resides in providing a cleaner in the form of a brush and in adapting the brush to connect with any desirable portion of the phonograph, such as the diaphragm casing, and in adapting the connecting part of the brush to hold the brush in contact with the surface of the sound record when the said connecting part is attached to the phonograph.

Fig. 1 is a perspective view of a portion of a phonograph showing the improved device connected

to the diaphragm casing. Fig. 2 is an enlarged detail side elevational view of the diaphragm casing and showing the improved device connected thereto. Fig. 3 is a rear elevational view of the improved device. Fig. 4 is a detail perspective view of the device showing the parts separated. Fig. 5 is a detailed sectional view of the connection between the brush handle and the pocket.

STYLUS.—Samuel Levin, Highland Park, Ill. Patent No. 1,114,493.

The present invention relates to an improved stylus, especially adapted to be used in connection with disc sound reproducing machines, one object of the invention being the provision of a stylus, which being made of resilient material, which is rectangular in cross section, will not unduly scratch the sound grooves of the record and which will be provided with a plurality of groove engaging points, so that the life of the stylus will be greatly in-

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 60).

creased, as will also the endurance of the record.

A further object of the invention is the provision of a flat resilient stylus, which may be composed of any material, either metal, fiber, wood, celluloid or in fact any material that will answer the purpose, the opposite ends of the same being provided either with a plurality of groove-engaging points or a single groove-engaging point, so that the same may be readily attached to the usual form of reproducer used in connection with disc sound reproducing machines, the same being disposed at an angle to the sound groove, and the rotation thereof, so as to resiliently support the sound reproducer and thus reduce the wear upon the record, such stylus when having more than one point upon each end, being disposed at such angle, that only one point is in engagement with the sound record groove, while the other point is elevated thereabove.

In the drawings Fig. 1 is a plan view of one form of stylus made according to and embodying the present invention. Figs. 2, 3 and 4 are plan views of modified forms of stylus embodying the present invention. Fig. 5 is a diagrammatic view

of a reproducer, and a portion of a disc record with the stylus as shown in Fig. 1 in operable relation thereto. Fig. 6 is a bottom plan view of the stylus receiving member of the reproducer showing the position the stylus is held in when clamped thereto.

PHONOGRAPHIC SOUND BOX.—John H. Van Mater, Atlantic Highlands, N. J. Patent No. 1,111,779.

This invention relates to means employed for transmitting articulate and musical sound vibrations from the contact needle of a phonograph to a resonant diaphragm, and from which they are transmitted in the form of sound waves by a suitable amplifier.

The object of this invention is to produce and preserve the vibrations peculiar to articulate speech and musical sounds, to the exclusion of those produced by the scratching or frictional effects peculiar to phonographs.

In phonographs, heretofore part of their sound vibrations have been transmitted from the stylus point to the interior of the amplifying horn through mechanical connections or sound conductors leading from the stylus needle to the material forming the sound box, thence through such material to the interior of the horn; and such sounds so transmitted irrespective of a diaphragm or sounding board are generally of an objectionable nature.

In carrying out this invention and to avoid such objectionable sounds, all parts of the mechanism employed for recording and reproducing musical and articulate sound vibrations, including the stylus and its holder, are insulated from the sound box and horn, by means of a keeper composed of material which offers an effective resistance to the passage

of all sound vibrations through it; so that the only way that such vibrations can be transmitted from the stylus to the interior of the horn must be through a single transmitting member leading from the needle to a diaphragm and thence to the interior of the horn.

This invention further embraces certain forms of a sound transmitting member leading from a

stylus to a resonant diaphragm and adapted for carrying with an increasing volume and clearness certain vibrations common to musical sounds and articulate speech which accord with certain vibratory characteristics of said member, and in transmitting with a decreasing force and clearness other sound vibrations which do not accord with the same.

Fig. 1 is a plan of the under face of a phonograph sound box embodying the invention; Fig. 2 is a sectional elevation of the device shown by Fig. 1; Fig. 3 shows a part of the device of Fig. 2, in section; Fig. 4 is a plan of the under face of a part of the device of Fig. 1; Fig. 5 is a modified form of the device of Fig. 2, shown in section; Figs. 6 and 7 are modified forms of part of the device of Fig. 1; Figs. 8 and 9 show a working form of the invention, and Figs. 10 and 11 show a practical form of mechanism.

PHONOGRAPH RECORD.—Thomas A. Edison, West Orange, N. J., assignor to the New Jersey Patent Co., same place. Patent No. 1,111,999.

This invention relates to phonograph records having a surface of wear-resisting material, such as celluloid.

The object of the invention is to provide a record of this type permitting the reproduction of the sound record formed thereon with distinctness, loudness and purity. It has been common to provide records with surface films or veneers of hard materials such as celluloid; but the reproduction from these records has usually been accompanied by harsh, unpleasant scratchy sounds which have been discovered to be due to the fact that the record surface is hard and unyielding so that the reproducer strikes the bottom of the record groove with a more or less sharp blow. In order to overcome this and other objections and at the same time provide a wear-resisting surface for the record, the inventor has constructed an improved record of a flexible or yielding surface film or veneer of hard material, such as a thin sheet of celluloid, and provide a resilient or yielding backing therefore, this backing being in the preferred construction formed of a base of hard material, such as plaster of Paris, and a thin film or layer of resilient material such as rubber, intermediate said surface veneer and base. The resilient material should be a substance such, for example, as rubber, which yields but is not liable to permanent deformation under the pressure of the reproducer stylus. The resiliency of the intermediate film or layer permits a slight flexing or yielding of the surface film or veneer under the reproducer so that the sharp blows of the reproducer are cushioned and the harsh noises above referred to eliminated; while the rigidity of the base prevents a diminution of the amplitude of the sound waves as reproduced, so that the sound waves on the record surface are transmitted with full amplitude to the reproducer diaphragm. It is understood that the intermediate film above referred to yields only sufficiently to permit the cushioning of the stylus so as to eliminate the harsh sounds referred to above.

Fig. 1 represents a central vertical sectional view of a cylindrical sound record embodying this invention; and Fig. 2 represents a similar view of a disc sound record embodying the invention.

STYLUS GUIDING ATTACHMENT FOR SOUND RECORDS.—Chas. W. Ebeling, Wheeling, W. Va., assignor of one-half to Harrison W. Rogers, same place. Patent No. 1,112,407.

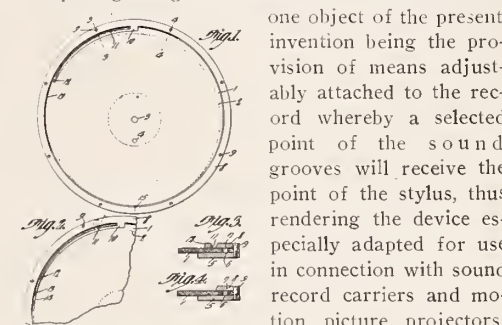

The present invention relates to improvements in stylus guiding attachments for sound records, the present application being a divisional application of co-pending application filed May 20, 1913, Serial No. 7,668,845, one object of this invention being the

provision of co-operable means, carried by the reproducer and the sound record, whereby the stylus is held above the record during a portion of the revolution thereof and finally delivered into the phonic groove thereof at the proper point.

In the drawings Fig. 1 is a plan view of a disc record with the present attachment applied thereto. Fig. 2 is a side view of a record and reproducer with the present attachment in use in guiding and retaining the stylus from contact with the record. Fig. 3 is a view taken from the right as illustrated in Fig. 2.

STYLUS GUIDING ATTACHMENT FOR SOUND RECORDS.—Chas. W. Ebeling, Wheeling, W. Va., assignor of one-half to Harrison W. Rogers, same place. Patent No. 1,112,406.

The present invention relates to improvements in stylus guiding attachments for sound records,

one object of the present invention being the provision of means adjustably attached to the record whereby a selected point of the sound grooves will receive the point of the stylus, thus rendering the device especially adapted for use in connection with sound record carriers and motion picture projectors, and particularly with the structure as set forth in co-pending applications of Harrison W. Rogers filed February 7, 1913, Serial Nos. 746,890 and 746,891.

A further object of the present invention is the provision of means which may be properly attached to the periphery of a disc sound record, and which is particularly designed for use upon any of such records, and in which the stylus guiding and starting portion thereof may be properly adjusted longitudinally and transversely of the record, so that the stylus after once positioned will be directed to the desired selected point of the sound groove thus rendering it unnecessary to manually rotate the record for a number of rotations before the introduction of the stylus to the groove or guide the stylus in the phonic groove up to the point of sound rendition.

A still further object of the present invention is the provision of a stylus guiding attachment that reinforces the periphery of the record and also by reason of the fact that the stylus guide is formed as a continuation of the phonic groove of the record, whereby the needle is properly guided thereto. It is also found that by forming the stylus receptacle as in the present instance, a projection, the operator, even though operating in a dim or no light, where the device is operated in connection with a projector of a motion picture machine may "feel" the position of the stylus upon the record without any liability of damaging the record.

In the drawings—Fig. 1 is a plan view of a disc record with the present attachment applied thereto. Fig. 2 is an enlarged fragmentary plan view of a portion of the record and the attachment adjacent the stylus receiving portion of the attachment. Fig. 3 is a section taken on line 3-3 of Fig. 1. Fig. 4 is a section taken on line 4-4 of Fig. 1.

NEW MERCHANDISING HELP.

New York Talking Machine Co. Issues Gummed Strips of All Numbers in Monthly Victor Record Supplements for Use of Dealers.

The New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, has just completed a new plan which should prove of considerable practical value to its many dealers. This company has from time to time perfected various innovations or ideas in Victor merchandising which has added to the dealer's profits directly and indirectly, and the latest idea is in accord with the originality of the previous plans announced by the company.

This most recent innovation is the issuance of gummed strips of all the numbers in the monthly Victor record supplements as these supplements are issued. The strips are perforated so that each number will tear off easily, and be conveniently attached to the dealer's stock envelopes. The company's dealers will be supplied with these strips monthly in the future. The advantages of these numbered strips are many, as they enable the dealer to keep his stock envelopes clean and fresh at all times and show plainly the number of the new record without any possibility of confusion or doubt. Those of the New York Talking Machine Co.'s dealers who have been informed of the new plan have commended it from every standpoint.

SCHEDULES IN SPIEGEL FAILURE.

Schedules in bankruptcy have been filed by Benjamin Spiegel, dealer in talking machines at 28 Delancey street, New York, which show liabilities of \$4,801 and assets of \$5,095, consisting of stock, \$1,300; accounts, \$3,490, and fixtures, \$300; cash in bank, \$5.

The Talking Machine World

Vol. 10. No. 12.

New York, December 15, 1914.

Price Ten Cents

ST. LOUIS ASSN. ON FIRM BASIS.

Trade Organization Now Affiliated with Missouri Retail Merchants' Association and Enjoys All the Facilities of That Body.

(Special to The Talking Machine World.)

St. Louis, Mo., December 7.—The St. Louis Talking Machine Dealers' Association has succeeded in getting on a firmer foundation than was anticipated in last month's report. After the plan was completed five of the talking machine dealers had arranged to join the Missouri Retail Merchants' Association and to be appointed on a talking machine committee which would enable them to use the association equipment and to call the other dealers into conference with them, the larger association decided that it would be better to carry out the original plan and establish a special membership for the talking machine dealers on a basis of employees, and so all of the dealers have become identified with the larger association and now there is no question about the use of the office staff and equipment. The workings of this office staff have been a constant surprise to the members.

When the need of a resolution or other agreement is felt the members thresh it out in a meeting, the professional and expert secretary of the larger association disappears for a moment while an assistant takes up his work and returns with a resolution properly dictated, typewritten, and if it is such a resolution that each member would have a copy, the required number of copies are ready before the meeting adjourns. Each employe of the larger association is an expert in some line, and when work along that line is required that employe is at hand and they are quick to point out faults of proposed movements. For the present the association will devote its efforts to strengthening price and return terms, which are being well received by the trade and which, dealers say, are not causing any loss of trade and promoting a better understanding between all dealers. The Missouri association, which is the parent body, includes practically all of the large department stores, and it is through this association that the railroad fares for out-of-town customers are refunded under certain conditions.

SEMI-ANNUAL COLUMBIA CATALOG

As Ever, More Complete and Interesting Than Previous Issues of Similar Volume—Emphasizes Growth of Record Library.

The Columbia Graphophone Co. issued last week its regular semi-annual catalog of Columbia records, listing all the records issued up to date. This publication, which is the most important book issued by the company, is similar to the previous edition of the Columbia record catalog, as the company found, by making inquiry of its dealers throughout the country, as that the form and design of the last semi-annual catalog was perfect in every detail and did not permit of any practical improvement.

The catalog is divided into three parts: First, a partial list of grand opera and concert selections; second, a general catalog of double-disc records, alphabetically arranged; third, a list of special school series records. The method of indexing followed in this catalog includes numerous cross indexing and listing, enabling the record purchaser to locate a record with maximum convenience and ease. The system of indexing is so complete that each record is listed under six to eight different headings.

The growth of the Columbia record library is concretely set forth in this new publication, as a number of prominent and renowned artists have their first Columbia recordings listed in this edition. More than eight pages of the catalog are devoted exclusively to Columbia dance records,

these records including selections for all the modern dances, and well illustrating the progress being achieved by the Columbia Co. in this particular field.

HERE'S THE ORIGINAL TURKEY TROT.

National Dinner Birds Dance to Music of Phonograph and Gobble for More.

(Special to The Talking Machine World.)

BOISE, IDAHO, December 9.—Pleasure seekers on the mesa recently witnessed a genuine turkey trot. One of a group of equestrians was Probation Officer Lowe, of the Juvenile Court.

One of Mr. Lowe's special duties is to see that turkey trotting is not permitted in the city, it being against the ordinance, but despite the fact that this turkey trotting was outside the city limits, Mr. Lowe concluded that he had better inspect it. He is now glad he did so, for he has come to the conclusion that the turkey is the most maligned bird on earth, that genuine turkey trotting is not vulgar in the least, but is quite a dignified pastime.

This particular turkey trot was held at one of the country homes in the mesa close to town. The house has a large loggia, which is screened in and extends across the entire side of the house. On this loggia was stationed a large phonograph, to the music of which a group of friends were dancing.

Crowded close to the side of the loggia was a flock of forty or more turkeys, glossy and sleek, in prime readiness for the table.

"The turkeys apparently were fascinated by the catchy ragtime music," said Mr. Lowe, "and they moved about in the funniest way imaginable. They would one-step to the right, then turn their heads, craning their long necks to see what the other fowls thought of their behavior. Then they would one-step to the left, again craning their necks, sometimes giving a little hitchy jump in between and an occasional 'cluck'."

"You can imagine," said Mr. Lowe, "the effect of some forty or fifty turkeys all going through these peculiar motions to the music of 'Too Much Mustard' and 'Your'e Here and I'm Here.' The minute the music would stop those turkeys would get up the greatest gobbling you ever heard and keep it up until the phonograph started again. I could imagine something of what they were saying expressing their delight at the new style of music, I suppose."

MAY BE MEMORY CHAMPION.

Friends of Hyman Landau, Talking Machine Man of Wilkes-Barre, Pa., Declare He Has Best Memory in the City—Proof Submitted.

(Special to The Talking Machine World.)

WILKES-BARRE, PA., December 8.—In a proposed contest to decide what man has the best memory in the city of Wilkes-Barre, Hyman Landau, of the Landau Music & Jewelry Store, is supported by many of his fellow citizens, who declare that he will carry off the honors in that line very easily.

Mr. Landau is credited with being able to give without hesitation the number of any record in the catalog of the Victor Talking Machine Co. once he is acquainted with the name of the selection desired. It is stated that a customer entered the Landau store recently and gave a list of records desired. Mr. Landau did not have to look up a single number, but when he came to a certain selection informed the customer that he had already purchased that record before. The customer denied the fact, but was persuaded to call up his home and found that the talking machine man was right.

Mr. Landau's chief competitor for the memory prize is John T. Lenahan, one of the most noted criminal attorneys in the State and also a former Congressman, who is credited with a remarkable memory regarding legal matters.

GOOD PROSPECTS IN COLORADO.

Denver Houses Giving Over Additional Space to Talking Machine Departments and Big Shipment of Records Is Received in Grand Junction—Knight-Campbell Co.'s New Rooms.

(Special to The Talking Machine World.)

DENVER, COL., December 7.—The present talking machine business and the outlook in that line in this city is of a most satisfactory character and there is little doubt at present that with the holiday business already in sight the total for the month of December will, with the majority of concerns, prove considerably in excess of the sales volume for the same period of last year.

Several of the local dealers have made special preparation to feature the talking machine trade for the holidays, among them being the Knight-Campbell Music Co., which only a week or so ago completed and threw open to the public sixteen commodious and handsome demonstrating rooms for Victrolas. The extra rooms have been badly needed to handle the increasing Victor business of the company.

Another house which has made recent improvements in its talking machine department is the Denver Music Co. Several new demonstration booths have been added to the company's department on the second floor of its building, which now embraces over 12,500 square feet of floor space.

The H. W. Vorbeck Music Co., of Grand Junction, Col., has installed a big stock of Victor goods to take care of holiday demands, and only recently received the largest shipment of Victor records which ever went to that city.

NEW QUARTERS IN LAKEWOOD, N. J.

George Hurlburt, Victor Dealer, Now Located in Larger and More Convenient Store.

(Special to The Talking Machine World.)

LAKEWOOD, N. J., December 7.—George Hurlburt, the successful talking machine and piano dealer of this city, is now located in a handsome new building on Second street. The new structure, built of stucco, occupies the site of Mr. Hurlburt's former store, and, in addition to affording additional floor space for display of the line, has been designed to meet the particular requirements of the talking machine and music business.

The equipment of the new store includes modern indirect lighting system, three attractive demonstration booths for the talking-machine department, a new set of record racks with an up-to-date filing system, and other features that make for convenience and efficiency. In addition to Victrolas and records, Mr. Hurlburt also handles the Hallet & Davis Co. line of pianos, and a large assortment of toys.

MUSIC TO SOOTHE JURORS.

Washington Judge Sends Graphophone to Men Locked Up.

(Special to The Talking Machine World.)

WASHINGTON, D. C., December 5.—A jury sitting in a murder trial in Criminal Court No. 1 here, and which was locked up last night until Monday morning, got a fit of the glooms to-day and sent word to Chief Justice Covington that they wanted to do something to occupy their minds. Chief Justice Covington expressed sympathy with the jury and sent word that he would do something.

This evening the Chief Justice sent the jury a graphophone and a set of records and to-night from the court house window there is floating out all kinds of tunes, and the members of the jury are doing all kinds of two steps and can-cans in the corridors of the City Hall.

The easier it is to get a man to make a promise the harder it is to get him to make good.

MANY NEW TALKING MACHINE DEALERS IN DETROIT.

Leading Lines of Machines Well Represented in That City and Vicinity—Steadily Increasing Number of Piano Houses Handling Talkers—December Business Exceeding Expectations—Some Elaborate Window Displays—Revival of Interest in Small Styles.

(Special to The Talking Machine World.)

DETROIT, MICH., December 7.—F. A. Denison, for the past three years manager of the Columbia store in Baltimore, has succeeded K. M. Johns as manager of the Detroit store, Mr. Johns going to the Chambers street store in New York. Mr. Denison's first month here was a record breaker, and an augury for a prosperous future. November business exceeded the November business of last year by \$8,000, and exceeded the December business of last year by several thousands, thus making it the biggest month in the history of the Detroit branch of the company.

The new styles of the machines, of which the improved sounding board is the feature, are going exceedingly well, and this is largely the cause of the increase, though a certain contest system, inaugurated by Manager Denison, has a good deal to do with it. Mr. Denison each month offers prizes for the members of the sales force who make the best records in certain respects, the conditions being altered each month. In November the man who showed the largest percentage of increase won a new hat. This month a certain figure has been set for each man to try for, the estimate being based on past performances, and if he reaches it, he will win a pair of shoes. S. E. Lind won the new hat in the last contest. Mr. Denison says he expects to pay for about ten pairs of shoes on the holiday month, if early indications are any criterion.

"December will be a wonder, if we can get the goods to fill the dealers' orders," he said. "We are having the orders of up-State dealers shipped direct. I think Detroit and Michigan constitute a great field for the Grafonola business. We handle only a part of Michigan, the Western part of the State being in control of the Chicago branch, yet we have done more here since I came than we did in Baltimore, where we controlled three States. Detroit people seem to have money and be willing to spend it."

Four new Detroit accounts were opened by Manager Denison in November, and twenty in the smaller cities of the State. Of the Detroit accounts, that of J. Henry Ling is the largest, he putting in a special department, with seven demonstrating rooms, and handling only the Grafonola line. Though Mr. Ling handled the Columbia for the greater part of November, the contractor, who did the remodeling of the fourth floor, did not get the work done until December 1, so the for-

mal opening of the new department had to be postponed. Formal invitations were sent out, and on December 5 the new Grafonola store was introduced to the public.

R. B. Barclay, a Columbia traveling man, was present, and will remain at the Ling store throughout December, to pilot the venture through its first holiday trade. Miss Sarah Moorhouse is office manager of the department and in charge of the records, of which a complete catalog has been installed.

Besides the seven demonstrating rooms, there is a large reception room, decorated in Japanese style, with bamboo chairs, ceiling and other effects. A sure-enough Japanese girl served tea there at the opening. In one corner is a Grafonola grand.

The other Detroit accounts opened by the Columbia Co. are the Noble Piano Co., which operates two stores; the Cable Piano Co., which also handles the Victrola line, and the Highland Park Furniture Co., which has a large and modern store in the suburb Henry Ford has made famous.

Wallace Brown, manager of the new Edison Shop, and Max Strasburg, manager of the Victrola Shop, who are old-time friends, exchanged pleasantries when the last issue of the Talking Machine World reached them. "The story was all right except the headline," said they both. The headline stated that it was the Max Strasburg Co. which has opened the new Edison shop. "The headline was in the biggest type, so a good many people got the idea that I had taken on the Edison line," remarked Mr. Strasburg. "Well, let them think it. No harm done. Edison is a great man, and I should have been much pleased to meet him, as the headline says I did.

"Mr. Strasburg is all right. We have no objection to honoring him. But we have the Edison, and we did a very flattering business with them for an initial month," said Mr. Brown. "It seems to be regular trade, too, not a holiday rush, for we have sent out all the machines as soon as we sold them, and have yet to store away our first one for a Christmas present. I think we will get plenty of such orders later, however."

December has opened up well for the Edison shop, both in machines and records.

Max Strasburg stated that his business for November was 25 per cent. better than in November of last year. This fact, taken in connection with the experience of the Grafonola store, indicates that Detroit is every bit as prosperous as

she has been pictured. While there are a good many men out of work, business does not seem to be affected by that condition. It is believed that most of the idle men have come here from other cities. It became known a few weeks ago that the city was to begin a number of large public jobs this month, in order to keep Detroiters employed throughout the winter. These contracts will aggregate \$5,000,000 in value, and unemployed men from other cities immediately headed for Detroit to try to get work. But those jobs are for men who engage in summer vocations and ordinarily would be out of work in winter.

General business is so good that the business and professional men feel no need of retrenching. It is the business and professional men, principally, who patronize the down town talking machine stores. They are buying more liberally than ever before, showing that they have confidence in the business situation.

"Last December will be hard to beat, for we had a remarkable month," said Mr. Strasburg. "But we hope to put the holiday record of last year into the shade."

Elaborate window displays are a feature of this year's holiday talking machine business. Grinnell Bros., Victor jobbers, have devoted an entire window to them. Summerfield & Hecht have a window of their big store fixed up with a Grafonola display. The W. E. Metzger Co. has a Victrola display in its show window, in which a miniature ebony minstrel is attached to one of the machines by a wire and dances to the music. This always has an appreciative audience. The Story & Clark Piano Co., which has taken on the Edison line, also gives the talkers liberal space in the windows. So does Frank J. Bayley.

An unexpected turn to the trade here is a revival of interest in the small styles, in quarters where the prevailing demand has been for the expensive ones. The secret is in the growing use of talking machines for dancing purposes. A family may have a \$200 machine in the library, but it is considerable of a task to move it upstairs to a ball room, or to any other room that might be used for dancing. A small machine, easy to tote around the house, therefore, is in demand.

More and more do the piano houses realize the necessity, or at least, the advisability of handling talking machines to round out their business. Two years ago only Grinnell Bros. and the Cable Piano Co. had talking machine lines. Since then the J. L. Hudson Co., Frank J. Bayley, J. Henry Ling, the Noble Piano Co., the Story & Clark have added talking machine lines, all but the last named being prominent members of the Detroit Music Trades' Association. A number of smaller piano stores also have taken on talkers.

Service Is the Paramount Asset of a Victor Distributor

The factory controls the Prices and Terms.

The distributor controls his Service.

“Will there be a Victrola in your home this Christmas?”

This important question is confronting the people of the whole country.

It is the key-note of our nation-wide holiday advertising campaign, and its force is sending thousands of customers into the stores of Victor dealers everywhere.

It is helping to make this the biggest holiday season you ever had—even ahead of the phenomenal business of last Christmas.

ATTRACTIVE WINDOW DISPLAY IN LOS ANGELES.

Exhibition of Complete Line of Edison Disc Phonographs in Big Show Window of Barker Bros., That City, Serves to Halt Passing Throng and Results in Many Sales.

(Special to The Talking Machine World.)

LOS ANGELES, CAL., December 4.—A recent window display by Barker Bros., this city, featuring their talking machine department, has attracted much attention. This display occupied the entire

company recently made of fifteen large motor trucks loaded with Edison Disc phonographs, featuring the arrival of an entire carload of Edison goods.

The business of this company has shown a

E. P. H. ALLEN WITH EDISON STAFF.

E. P. Huyler Allen has recently been added to the sales force of the Thomas A. Edison, Inc. Mr. Allen's association in the musical business has been of such an extensive nature that he is well qualified to fill the position he now holds. He is the former general sales manager of the Keen-O-Phone Co., of Philadelphia. Mr. Allen has been connected with

Display of Edison Disc Phonographs in Show Window of Barker Bros.' Store, Los Angeles, Cal.

space of two of the largest show windows with a main frontage of 28 feet, and an additional frontage of 24 feet facing the main entrance to the store on one side, and the entrance to the talking machine department on the other. It was a splendid follow-up to the impressive parade which this

phenomenal growth under the management of J. W. Boothe, who has shown marked ability in its handling. From present indications a heavy Christmas trade is anticipated.

Barker Bros. handle the Victor, Edison and Columbia lines including both machines and records.

piano concerns for a number of years—namely, the Aeolian Co., Lauter Piano Co. and Schubert Piano Co. Mr. Allen's success with the new Edison diamond disc has already been very marked, and he is greatly encouraged with the reception that the Edison disc is being given by the trade.

NO LULL IN PITTSBURGH TRADE.

Talking Machine Dealers of That City Have About All They Can Do to Meet Holiday Demands—Some Attractive Christmas Displays—What Various Houses Report.

(Special to The Talking Machine World.)

PITTSBURGH, PA., December 11.—The talking machine outlook is the source of much satisfaction to Pittsburgh dealers, many of whom are experiencing a period of the greatest activity in their history. While the piano trade has fluctuated greatly during the past few months, the talking machine business has shown a marked and uniform increase, reaching its climax in the present holiday season. This growth is explained as one result of existing industrial and financial conditions, which have caused a greater number of people to defer the purchase of a piano and seek instead a high-grade talking machine at a much lower investment.

All of the stores were early in taking on a Christmas season appearance, and some of the best effects yet secured in window displays are now in evidence. The S. Hamilton Co. has a striking "Made in America" exhibit. It contains the De Luxe Grafonola, labeled "Made in Bridgeport, Conn."; a Style XVI Victrola, labeled "Made in Camden, N. J."; and an Edison diamond disc, labeled "Made in Orange, N. J." Attractively arranged with American flags and the usual Christmas decorations, this exhibit is one of the most timely and appropriate in the city. The Schroeder Piano Co. shows to excellent advantage the new 1915 model Grafonola, while the Henry Co.'s window is attracting considerable attention with a disc record display, having as its theme, "It's a Long, Long Way to Tipperary."

Manager Norman H. Cook, of the Boggs & Buhl talking machine department, reports business as ex-

ceptionally lively, in both machines and records. Two salesladies have been added during the past week.

The Kaufmann Bros. Victrola department is doing a full capacity business and Manager H. N. Rudderow is exceedingly gratified over the quality and quantity of holiday trade up to the present date. The department's seven demonstration booths are occupied by customers almost continuously. During the past month the sales of records have ranged from 125 to 212 daily.

Although the Lechner & Schoenberger talking machine department has just completed its second month's business, Manager Hartley reports that a very substantial trade has already been established. The new department, which has been made one of

the most attractive in the city, has come in for a large share of the fine holiday trade. Manager Hartley expresses great faith in both of his lines, the Edison and the Columbia, and is very enthusiastic over the future of the newly established business.

The Schoen Music Co. reports that the outlook for its talking machine department is exceedingly bright since the recent removal of the establishment from the Northside to 620 Penn avenue, in the center of the most active business section. Beside the Columbia line, the company is now successfully featuring the Reginaphone. Some excellent sales of this instrument are expected during the next two weeks, in time for delivery before Christmas.

MAKING PERFECT RECORDS.

Some of the Essentials Necessary Discussed by Redferne Hollingshead Who Has Had Much Successful Experience in Making Talking Machine Records.

Redferne Hollingshead, who has made some exceptionally good records for Thomas A. Edison, Inc., contributes to the Canadian Journal of Music his experiences in having his voice recorded. He says:

"I have found that several essentials are imperative to the singing of perfect records. In the first place, the production of tone of the singer must be free and open, absolutely devoid of throatiness. The forward nasal resonance, diaphragmatic breathing, flawless diction—all these are absolutely necessary. A flaw that will pass unnoticed in concert becomes intolerable after its nth repetition in the same place in the machine. The successful singer of rec-

ords must also remember that personality, or stage presence, which is so often such a big factor in the success of concert singers, is here not at all in evidence. The singer must depend on artistry of the very highest type. He must be sure his tone is brilliant, resonant, and withal, sympathetic.

"To insure this his breathing must be well sustained and diaphragmatic. He must, in a word, use intelligence and expression far more faithful, if possible, than when he appears in public. With all these essentials, I see no reason why our concert singers should not find record making as pleasant and satisfying work as concert singing.

"In conclusion, I might say that if there is one vowel which should be avoided by the singer who would make a successful record it is the 'e' vowel, sung tightly on the teeth so as to produce a hard, piercing tone. If the singer will use the French 'e' or 'eh' instead, he will gain invariable success; provided, of course, he follows the dictates of 'Bel Canto.'"

DITSON *Victor* SERVICE

WE know every condition involving all Victor retail sales and we know that having the goods is an important factor towards getting the big profits. For your benefit, we maintain the largest stock in the East of Victor machines, records and supplies, and you can feel sure that your orders receive quick attention. The Ditson organization is trained to render the leading service and you can link up your store to our warehouse and feel safe.

Ask us to explain the value of Ditson co-operation. It means much to your business.

OLIVER DITSON CO., Boston, Mass.

TRADE CONDITIONS IN CINCINNATI.

Ten Cent and Post Card Records Appear to Worry the Regular Dealers—General Business Very Satisfactory—John Shillito Co. Opens New Department—Dealers Well Stocked with Goods—News of the Month.

(Special to The Talking Machine World.)

CINCINNATI, O., December 8.—Local retailers have another cause for complaint. Consumers during the past few weeks have been able to pick up records suitable for use on the Victrola and the Columbia instruments for 10 cents a throw. And it seemed that the news spread like leaves before a storm, for a tremendous sale of the cheap article has taken place.

"Little Wonders" is the name of the record which is being sold at a five and ten-cent store, and while not a well finished article, the cheapness and the novelty of the plates have resulted in an unusual sale.

Then, too, some owners of machines, having friends in Germany, are talking about a postal card record, some of which have reached this city. They cost 10 cents and this novelty, when once properly introduced, will also have quite a run here.

The Victrola line is now domiciled in the music department of the John Shillito Co. The first announcement was made just a week ago. The company, through the Krell Piano Co., was considering such a line for months, and it was a fight between the two prominent houses of the company. The matter of payment of stock is said to have won. The goods are coming into this market from a Chicago house. The entrance of the Shillito concern into this field has caused the H. & S. Pogue Co. to give more publicity to its department. The situation here to-day is that the talking machine is receiving more publicity than pianos.

"Business is not really what it should be, and yet we have left November so far behind that we have about cleaned out our stock," said Mr. Whelen when asked about present conditions. Mr. Whelen, manager of the local Columbia store, further stated that "December is starting in as a close second, and if we can get the goods which we badly need we will make last December results look like thirty cents. The demand is spreading out through the entire territory and while the smaller dealers are crowding in their orders, the larger dealers profited by experiences of former years, when the demand was heavier than the supply and stocked up beforehand. The factory, in order to save time, is shipping direct to the dealers, but even so our shipping facilities are taxed to the limit."

The local "Dictaphone" headquarters at the Columbia store are busy working on new prospective sales, but the dictaphone is holding its own in the busy holiday rush handling correspondence with speed and accuracy in a way that makes its use invaluable to dictaphone users.

S. H. Nichols, who was recently appointed district manager, spent a few very pleasant days in the Cincinnati Columbia store. Mr. Nichols was the former manager of the Cincinnati store preceding Mr. Whelen, the present manager, and it was like "old times" to have him back, if only for a few days.

SUITABLE NEWLY-WED RECORDS.

Hearts and flowers, Roses, roses everywhere,
The Bells, O promise me, For all eternity,
A perfect day, In the evening by the moonlight,
Dear Louise, You're just too sweet to live.
Silent night, Sweet spirits hear my prayer,
Ah so pure, You've got to get under, Get out
and get under, Love me and the world is mine.
Scenes that are brightest, A dream, Every little
movement, Below the Mason-Dixon line.
Draw me nearer, Close to thee, In happy moments.
Beautiful isle of somewhere, Happy days, Call me
your darling again, Where the Robins nest again,
We have much to be thankful for, Some day, There'll
come a day, Afterwards, And a little child shall
lead them, Baby Rose, When it's apple blossom time
in Normandy, Old Folks at home, Where the morning glories
twine around the door, Bake that chicken
pie, Good-bye sweet day, Home, sweet home.

PROSPERITY REIGNS IN CLEVELAND.

Both Wholesale and Retail Stores Very Busy—Many New Dealers for the Leading Lines May Break Last Year's Holiday Record.

(Special to The Talking Machine World.)

CLEVELAND, O., December 7.—The activity manifest in the wholesale and distributing talking machine stores is reflected in the very prosperous business in all the Cleveland retail establishments.

Increasing sales, of both Victrolas and records, is impelling the business to much larger than the normal volume of the Eclipse Musical Co. Demand for Victor goods from local dealers, and from all sections in this territory, are reported good, and indicates, Mr. Towell says, a large holiday trade.

G. R. Madson, manager of the Columbia store, reports the sales of Grafonolas and records as very satisfactory, largely of the higher grade instru-

ments. The Columbia dealers are all doing fine business.

The Edison distributors for this territory, the Phonograph Co., is daily increasing its sales and extending its business throughout this section. Mr. Bloom, of the company, is highly pleased with the present and prospective business.

The Collister & Sayle Co.'s sales indicate a large increase in the wholesale department. Mr. Dorn says the holiday trade will prove as satisfactory as usual.

At the exclusive wholesale and distributing Victor store of the W. H. Buescher & Sons Co., on Chestnut street (entirely separate and distinct from its retail store), a good and growing business is reported. The store is larger, suitably fitted up, and carries a larger stock of Victor goods.

In a line-up of the retail trade, indications are that this season's holiday business will exceed that of last year.

NEW YORK, DECEMBER 15, 1914.

ANOTHER Christmas is almost here with all its influences, which tend to soften and to expand mankind along gentler lines!

The Christmas spirit is a buying spirit—a softening spirit—a spirit which tends to cause happiness everywhere, and talking machine men have reason to feel reasonably happy for the measure of prosperity which they have enjoyed during the present year.

It naturally follows that the cruel war which is devastating Europe must affect the people in all lands, and many business enterprises in America have been frightfully curtailed in output by reason of existing conditions in Europe. But the talking machine trade has been singularly blessed. It has shown an increase in the manufacturing output, for the records of 1914 will show the most fruitful year which the talking machine industry has ever enjoyed. Talking machine dealers have also had their full share of prosperity, and when we compare the conditions existing in the manufacturing and retailing departments of this industry with those which exist in other lines, it must be conceded that we have much for which we should be thankful.

EVERY phase of the talking machine industry has shown a distinct advance over previous years. From the financial stability of the trade down to the development of the best selling ability of the retail salesman there is a better feeling existing to-day.

Men are perhaps in closer touch with their business than ever before. They understand it better—realize its possibilities, and it must be conceded that the most important problems of the trade, such as quality of product—perfection of advertising, and other similar phases of the industry—have received careful attention this year. And, judging from indications, the thought and consideration given these problems have produced results commensurate with the outlay.

There is certainly an element of progressiveness infused into the work of talking machine men which is distinctly noticeable, and while complaints regarding general business conditions have been frequent and widespread, and there has been a material shrinkage, the talking machine trade has stood up under storm and stress, and has come out victorious. That fact in itself should prove inspiring, and the men who accomplish real success are those who have confidence in the business, in which they are engaged and confidence in the business conditions of the country. Without doubt the few remaining days of the year will be used by talking machine men to excellent advantage, and there will be a good many holiday sales yet closed which will help out materially the business of the year.

THE musical standing of the talking machine has received a greater impetus during the past year than ever before. It has become a greater force in the musical life of the nation, and as an educational factor and as an aid in the school room it is steadily acquiring greater power.

Record music is making America more and more musical every day. In fact, it is contributing more to the musical entertainment of our people than any other single element. In the schools in every city throughout the land pupils to-day in folk dancing and calisthenics step to the measures of record music. Classes march from the building or to the assembly hall to the tune of stirring marches. Music lessons are conducted with the children listening to records, and studying the printed pages of music at the same time from their school books. The regular grade teacher is being assisted in her literature work. Analyses of songs, with vocal illustrations, teach enunciation, phrasing and expression. Analysis of the modern symphony orchestra, with the children learning the individual tone qualities of each instrument, serious study of opera, librettos and scores, all testify to the truth of the statement that records are a necessity.

The result of this is far-reaching. It is compelling dealers and salesmen to become acquainted with musical literature, with the operas, and to become acquainted with the record stock, and it is all working out to higher and better things.

FROM a commercial viewpoint the talking machine is moving steadily ahead, and the advertising end of the business has more than kept pace with the rapid strides in publicity made by the talking machine product of the past year.

The advertising of the talking machine manufacturers is generally commended by advertising experts as symbolic of the very highest type of modern publicity, and in view of the constant, forceful and impressive national and newspaper advertising carried on by the manufacturers, it is not to be wondered at that the sales of talking machine records during 1914 have reached the high water mark, notwithstanding the serious shock which general business has received through the European war.

Business methods—plans—systems—have improved. The small dealers are beginning to learn that selling talking machines is a business, and they have been aided by the manufacturers and jobbers, who have given them valuable personal co-operation. In fact, the talking machine industry is composed to-day of an energetic body of men who represent modern business progressiveness, and their advance is certain and sure.

NOW and then clouds appear upon the trade horizon, but these are quickly dispelled. The business has stood up splendidly under the attacks which have been made upon it. Dealers of standing appreciate more and more that price maintenance means business stability, and that the manufacturer, who has spent time and money to create a demand for his products, does not seek a special privilege when he makes contracts to prevent retailers from slashing prices which are known to be fair.

Price maintenance is a trade principle in which every talking machine dealer should be interested, for price maintenance means that uncertainty and haggling are eliminated, likewise unjust discrimination among customers.

It likewise guarantees to the purchaser a standard of quality, and when you come to analyze it, what other way is there in which a full standard of value can be secured everywhere in the retail world than through a uniform selling price?

As it stands to-day in many trades, the transaction of buying and selling is a contest of wits. The seller gives in many instances as little value and gets as much money as he can. Within ample limits the seller might legally lie with impunity, and, almost without limits, he might legally destroy, by silence, a really good bargain. But that condition is wrong, because it creates a widespread system of cut-throat prices which in the end does not deceive anyone. When one price is established by the manufacturer, the unscrupulous merchant is forced to abandon his plan of the substitution of cheap and inferior products for the standard articles.

THE practice of price-cutting on standardized articles would mean ultimately depreciating a name to an alarming extent which had become fixed in the public mind as a standard.

What is price-cutting for? It is simply a baiting to attract persons to the store by giving the idea that it is enabled to give lower prices than others, and to prove it, puts forth a standardized article at a cut rate. That is the department store plan, and the business of many department stores has been built up by price baiting, and it seems but a logical sequence that department stores should be anxious to offer, provided, the law would not prevent them, standard talking machines at cut rates, because that would cultivate the idea that readers of the advertisement would be impressed with the ability of the department store to supply cut rates on other lines of merchandise than those advertised.

The talking machine trade should oppose strongly any attempt at price-cutting by men who have not the welfare of the trade at heart.

Furthermore, if it were possible to engage in price-cutting on standardized machines generally, it would depreciate the business and the profits of every man selling talking machines. It would in a little while demoralize the business to such an extent that the regularity of the business would be destroyed. Its profits would become lessened and its stability weakened. There is no other end ultimately to the price-cutting of a standardized article.

We believe that price maintenance is the foundation upon which the security of this industry rests. Shatter the foundation and the edifice crumbles.

This thought should be impressed upon the minds of every reader of The World, because we are all vitally interested in seeing the direction along consistent lines, so that the trade and the public are amply protected in every way.

SO far as we know never in the history of commercial advertising has there been such supplementary work as has been put forth by the Victor Talking Machine Co. in its recent holiday campaign for dealers in the cities of New York and Chicago. Full page advertisements have appeared in all of the dailies of these cities, not merely once, but in some instances a number of times, containing the names and addresses of Victor dealers within the metropolitan zones indicated.

These pages and others which immediately followed were

gotten up in a most attractive manner with portraits of the world's leading artists who sing for the Victor, thus combining the artistic side and suggesting the talking machine as a holiday gift.

This is really the finale of the national campaign of the Victor Co., the crux of which has been, "Will There Be a Victrola in Your Home This Christmas?"

WHEN the great Edison plant, covering almost a square mile of ground at Orange, N. J., was a mass of flames on the fateful night of December 9, Thomas A. Edison stood nearby and saw the work of years wiped out by the devastating flames.

The famous inventor has been termed the greatest living American, and his greatness was never evidenced in a more striking manner than at this critical time. When the leading men of his town were crowding about him, expressing their sympathy, he said with cheerful voice: "I'll start all over to-morrow. There will be some rapid mobilizing here when this débris cools off and is cleared away. I'll go right to work to build the plant over again. It is just a temporary setback; don't forget that."

There is revealed a will power—a spirit which never downs—and Thomas A. Edison and his business associates have lost no time in perfecting plans for a newer and greater Edison plant. Fire and destruction can only temporarily halt the onward march of such an indomitable will.

The entire sympathy of the trade will be enlisted in behalf of the company which has suffered so greatly, and that sympathy can be expressed in no better way than in putting up with unavoidable delays and inconveniences until the time arrives when the Edison Co. can complete its plans for regular output of stock.

It seems particularly unfortunate, just at this time, when the plant was rushed with holiday orders, that such a terrible calamity should occur, but the Edison enterprise is composed of men who will speedily work out of the present distressing conditions and will, ere long, be able to supply the needs of the Edison representatives.

Depend upon it all that can be, will be done.

DEALERS, ATTENTION!

We are showing an attachment that we manufacture to go on the Edison Talking Machine which enables one, with the aid of a Pathé Soundbox, to play the wonderful Pathé Discs and puts the unlimited Pathé repertoire at everybody's disposal.

SEND US \$1.75 FOR A SAMPLE ATTACHMENT,
or else mail your order for a dozen at \$18.

BETTER REPRODUCTION!

In our opinion, by means of our attachment, you can get as perfect a reproduction on the Edison machines of Pathé Discs as you can on the Pathé machine itself.

This gives you the widest choice among the Pathé records, with their incomparable fine Band and their low-price Operatic discs.

F. C. KENT CO., 81 Columbia Avenue, Newark, N. J.

A NEW IDEA

Attachments for Edison Machines

We now place before you the opportunity to please the taste and supply every whim of your customers by means of our attachments to be used on the Edison disc machines with the Pathé Sound Box. This gives you an entrée into the vast repertoire of the Pathé disc records.

YOU CAN PLAY PATHÉ DISCS ON THE EDISON MACHINES

in this way better than Pathé can play them on their own instruments. You can now have the finest operatic or the most popular selections in your place.

THE LAST WORD IN ATTACHMENTS—We have perfected an attachment to be used on the Victor and Columbia machines to play both the Edison and Pathé records perfectly.

—PRICE—

TO TALKING MACHINE DEALERS

Gentlemen:

Pathé Frères goods have been on the market several months, have been well received, and have had unbiased complimentary judgment passed on them. A number of dealers have been established, but we are ready for more. We will give exclusive agencies and liberal territories to the right parties and make it worth their while to handle our goods.

Whether a man sells competing phonographs or not is of no interest to us. Pathé Frères goods sell on their own merits and will sell in competition with the best.

Our records can be played on other machines. The attachments that are now being made are cheap and simple.

Pathé Frères Operatic records range from \$2.00 to \$2.50 and are double faced. We would recommend that you send for record #X2058, "Celeste Aida" on one side and "Song of Triumph" from "The Prophet" on the other, sung by Leo Slezak, the world's most famous German tenor, or #X2016, "La Boheme" on one side and "The Girl of the Golden West" on the other side, sung by Giorgini, of the Metropolitan Opera House, New York; Covent Garden, London; and La Scala, Italy, who toured the United States last year with Tetrzzini and Titta Ruffo.

For Band records try our #2151, "American Parade" on one side and "Le Cimbre" on the other side, or ask for our catalog and select anything from it. We will send you any record with our compliments, upon request.

Be successful by being up-to-the-minute.

Yours very truly,

PATHE FRERES PHONOGRAPH CO.

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

(Special to The Talking Machine World.)

BOSTON, MASS., December 9.—Despite the fact that many lines of business are more or less hard hit by the present conditions, it is a fact that almost every talking machine dealer in the city and environs, as well as many of them through New England, are going to show a surprisingly good business. Some localities are to do better than others. For instance, outside of Boston such cities as Lowell, Lawrence, Fall River and New Bedford, cotton industrial centers, where business is booming owing to war orders, dealers are making most encouraging reports. On the other hand, there are other cities whose industries are not profiting by the war where it is very hard to get business, and where, too, collections are slow for those concerns which sell on time payments.

The war tax stamps are playing their part in the sending of talking machine goods, and the rush for stamps by all the Boston houses was so great on the first days of the month that the Federal authorities found it difficult to satisfy the demand. Where possible the local stores have laid in a large supply, but this is true in only a few cases. Inasmuch as the parcels post system is exempt from the stamp tax the new arrangement is going to largely increase the business by these carriers, and even in these few days the parcels post system has been taken advantage of by some houses to an extent hitherto unknown.

Increases Sales Space.

Harry Rosen, whose store in School street is one of the most conveniently located ones downtown, has seen his business grow so that he has been forced to add to his suite of rooms, and carpenters are now at work tearing out partitions and making a general rearrangement by which Mr. Rosen will have quarters more than twice as large as those he now has. Also on the floor above he has several other rooms and into these he has moved his Edison department. The repair room, stock room and other departments will be installed there. Three new men which Mr. Rosen has taken on are A. W. Butterman, Harry A. Brigham and Mr. Haskell, formerly with the Columbia people.

Distinguished Visitors.

Edward D. Easton, president of the Columbia Graphophone Co., and George W. Lyle, the vice-president of the same concern were in town for a couple of days lately and they went over the local situation carefully with Manager Erisman. As it was their first visit here since the new Co-

lumbia store was made over they were deeply interested in all the details, and they expressed themselves as more than satisfied at the enlarged facilities for handling the large business. Since their visit the local business has grown even larger and within the past few days it has exceeded all bounds. Naturally, Manager Erisman is highly pleased over the outlook for the month of December.

Cleverly Arranged Victor Window.

Passers-by on Arch street in the downtown section of the city have been interested in the clever arrangement of the window of the M. Steinert & Sons establishment in that street. It was Manager Royer's idea that a fox would prove a drawing card by way of advertising the fox trots, several of which are among the Victor numbers. So he got a fine specimen of the stuffed variety and placed it in the window. On one side is a Victor machine and on the other a large card showing a couple dancing a fox trot, and to both of these the fox is attached by means of ribbons. Hanging to the fox's neck is the placard, "O, You Fox!" Manager Royer has heard lots of commendatory remarks for the enterprising scheme as a medium of advertising.

Pardee-Ellenberger Co. Activity.

Manager Silliman, of the Pardee-Ellenberger Co., Inc., reports business booming all along the line, which is to say that the Edison diamond disc business throughout his territory has reached very large dimensions. Mr. Silliman says that the only difficulty now being experienced is in getting the machines fast enough to supply the demand. Mr. Silliman and his son, Horace, were among those who went down to New Haven for the great game between Harvard and Yale.

More Artistic Window Arrangement.

The Boylston street windows of the M. Steinert & Sons Co. have been done over so as to admit of a more artistic arrangement. A high paneling of French gray and white now separates the windows from the rest of the store, and built high the paneling serves as a capital background of the Victor outfits. Just at this time the windows are hung with Christmas greens and the large wreaths of laurel tied with red ribbons lend quite a festive appearance to the Victor display.

Callers on the Eastern Talking Machine Co.

Arthur Fields, who wrote "Aba Daba Honey-moon" and who has just been appearing at Keith's Theater, has been a caller at the Eastern Talking

Machine Co.'s Boston headquarters. Another caller was Joseph Santley, who also has just been a Keith attraction. None of the star performers who appear at this handsome vaudeville house, which is only a block away, if they make records for the Victor ever miss an opportunity of calling on Manager Taft and the Eastern boys.

Visited New York Headquarters.

Manager Arthur Erisman, of the Columbia Co., was over in New York a short time ago conferring with some of the company's officers. Mr. Erisman has lately had a post card prepared by way of booming the foreign record department of his business and on one side is a list of the twenty languages records of which can be found in the department devoted to this line.

Reports an Excellent Business.

All the staff of George Lincoln Parker's Victor and Edison departments in the Colonial building are glad to again welcome John Alsen, who has been away seriously ill for several weeks. Mr. Alsen has many friends in the Boston trade who, too, are glad he is able to get back to work. Mr. Parker states that his November business in the Edison and Victor lines has been most satisfactory, and the prospects are good for a large December business judging by the way it has begun.

Developing the School Proposition.

Mrs. Henrietta Heaton, of the educational department of the Eastern Talking Machine Co., has been in the city for two weeks, making a survey of the school proposition. She gave a number of talks while here and visited any number of the more prominent educational institutions.

Noted Record Artists Visit Boston.

Harry Lauder, the great Scotch comedian, who has just finished a big engagement at the Shubert Theater, and John McCormack, the Irish tenor, who gave a recital at Symphony Hall, were visitors at the Eastern Talking Machine Co.'s local warehouses. In honor of their presence in this city, the Tremont street windows of the Eastern made an appropriate display of their records, one being confined to Lauder and the other to McCormack.

Scoring Splendid Success.

Thanks to business ability and a good personality, Mrs. Anna Jones has been making a splendid success of the talking machine department of the Shepard Norwell Co. in Winter street. Mrs. Jones has been with the department ever since it was opened about three years ago on the third floor of the Temple place side of the building.

PARDEE-ELLENBERGER CO., Inc.

BOSTON, MASS. NEW HAVEN, CONN.

The demand for Edison Diamond Disc Phonographs continues to grow by leaps and bounds. Our New England Dealers are becoming more enthusiastic over this wonderful line from day to day. One of our Dealers, in a small city, has just made the statement that he would not take five thousand dollars for his agency. If you will investigate the proposition, you will readily see why there is such a demand for this musical instrument.

We would be glad to interest you in an agency proposition in places not already thoroughly covered. We will co-operate with you towards making your department a success, and you will soon build a business that will be very profitable. The highest grade line of musical instruments and a weekly service on new records.

Don't neglect this opportunity.

Real Music
At Last

THE TRADE IN BOSTON AND NEW ENGLAND

JOHN H. WILSON, MANAGER, 324 WASHINGTON STREET, BOSTON, MASS.

and in that time the department has been enlarged several times. Mrs. Jones possesses a thorough knowledge of the talking machine business and in these three years she has been instrumental in selling a great many Victor and Columbia outfits.

Talking Men Get Together.

Several inquiries have been made lately as to when the boys of the talking machine business are again going to get together. The beefsteak dinner of three years ago is pleasantly recalled by many, and there are lots of good fellows who'd be glad to enter into the spirit of another such time. Who'll volunteer to engineer it?

H. A. Yerkes a Visitor.

H. A. Yerkes, the wholesale manager of the Columbia Co., was a Boston visitor within the past week. He was entertained by Manager Erisman.

ENTERTAINS IMMIGRANTS.

Eastern Talking Machine Co. Sends Victrola to Immigration Station in Boston to Furnish Music for Thanksgiving Day—Thoughtfulness Much Appreciated.

(Special to The Talking Machine World.)

BOSTON, MASS., December 9.—The Eastern Talking Machine Co. at 177 Tremont street, through the instrumentality of William J. Fitzgerald, the manager of the wholesale department, sent down a Victor outfit to the immigration station the day before Thanksgiving for the benefit of the immigrants who were detained there. The instrument gave the greatest satisfaction and immediately Commissioner H. J. Skeffington sent a letter to Mr. Fitzgerald, which read as follows:

"The undersigned wishes to express our appreciation of your courtesy in loaning for the benefit of the detained immigrants at this station one of your Victor machines, together with a choice selection of records. It was a happy combination of circumstances that brought the machine in time for use on Thanksgiving Day. For while the celebration of this festival in the usual spirit was hardly to be expected in the case of persons involuntarily detained, it should be said that the entertainment provided by your Victor served in some measure to impress upon the immigrants the significance of the day, and greatly added to the enjoyment of the occasion. When the facts were explained to the immigrants assembled they expressed their feelings in a rising vote of thanks, which it is a pleasure at this time to convey to you. Your kindness was not only appreciated by the immigrants, but will be felt by others during the coming months."

WM. H. GREEN APPOINTED MANAGER.

(Special to The Talking Machine World.)

WORCESTER, MASS., December 8.—William H. Green, who has been employed by the Atherton Furniture Co., of this city, has been appointed manager of the talking machine department of this house. This concern handles the Columbia graphophones and the Edison diamond disc outfits, and with both of these the house has been very successful. Mr. Green is starting on a campaign which promises well. The department is well equipped for the display of machines, and two small booths play an important part in demonstrating goods.

BIG PURCHASE OF RECORD ALBUMS.

(Special to The Talking Machine World.)

BOSTON, MASS., December 7.—H. Rosen, of the School street talking machine headquarters, has just made a large purchase of record albums from a Boston stationery house. Mr. Rosen says this is the largest purchase of albums ever made by a Boston dealer. It is his intention to interest the trade in these albums, which are of the standard improved loose-leaf kind, some for the 10-inch and others for the 12-inch records. In a leaflet which Mr. Rosen has put out six reasons are given why this particular holder should be used.

STIMULATING SALES ACTIVITY.

Special Rewards for Sales Force Who Made Largest Records of Sales.

(Special to The Talking Machine World.)

WORCESTER, MASS., December 4.—At the Denholm & McKay Co.'s large store a prize selling contest lately was undertaken which has resulted most encouragingly for all concerned. It was continued from the 10th of one month until the 13th of the next, and the prizes offered were of generous cash amounts and were offered to the clerks of the store in the departments making the greatest gains in percentage over the business of last year for the corresponding period. Out of the fifty-two departments of this big store the talking machine department led with an increase of 170 per cent. This is certainly "going some" for alleged hard times. As one of the men said: "We hustled some to do it, believe me." The manager of the talking machine department at this establishment is William F. Howes, who formerly was manager of a similar department at Houghton & Dutton's, Boston. He assumed his present position last April, and in that time he has made some splendid strides in his department.

NUTTING TO HANDLE "TALKERS."

(Special to The Talking Machine World.)

MANCHESTER, N. H., December 4.—W. L. Nutting, of this city, who has a well-equipped piano store at 4 Temple street, has decided to get into the talking machine game and he has taken on the Edison diamond disc line. Although having it but a short time, he has been able to interest a great many people in the proposition.

BUILDING UP A GOOD BUSINESS.

(Special to The Talking Machine World.)

PORTSMOUTH, N. H., December 6.—Joseph M. Hassett is finding a good business in Victor and Edison goods. The conveniently located establishment at 115 Congress street has had many callers, including some of the best people of the city, within the past few weeks, most of them intent on purchasing for Christmas. Mr. Hassett's business in records alone has been extremely large.

NEW MANAGER IN WORCESTER.

C. H. Schaeffer Takes Charge of Barnard, Sumner & Putnam Co. Department—Other News.

(Special to The Talking Machine World.)

WORCESTER, MASS., December 4.—C. H. Schaeffer has been appointed manager of the talking machine department of the Barnard, Sumner & Putnam Co. Although a comparatively new man to the talking machine business, he has been well coached by W. C. Clifford, who is well-known to the trade. This house carries the Edison diamond disc and Columbia outfits and the holiday business has thus far been excellent.

The Worcester Phonograph Co., of 11 Trumbull square, is meeting with great success with the Edison line, and it has been conducting some well-attended recitals among some of the leading clubs of the city.

The Marcellus Roper Co., of 284 Main street, which is considered the largest Victor dealer in this vicinity, is meeting with marked success, due in no small degree to the work of Daniel J. O'Neil, brother to the well known ambassador, "Doc" O'Neil.

H. R. Skelton, the hustling traveler for Thomas A. Edison, has been in town endeavoring to make the diamond disc outfits a household word throughout the city and environs. He spent two weeks in town and he says that the holiday business in Worcester promises to be large, and that there is likely to be a shortage in high-priced outfits.

KEPT OPEN HOUSE DURING GAME.

(Special to The Talking Machine World.)

NEW HAVEN, CONN., December 8.—The Pardee, Ellenberger Co., Inc., whose large establishment here is known throughout the State, kept open house the day of the big football game between Harvard and Yale. Practically all of the Edison dealers who happened into the city for the day paid their respects to the house and those who had not been there before were delighted to be shown about the establishment. Among those who were entertained by Mr. Pardee and his partner was F. K. Dolbeer and members of his family, and Manager Silliman, of the Boston store, and his son, Horace. After the game several of Mr. Pardee's more intimate friends were entertained at his hospitable home.

HIGHER PRICED MACHINES HAVE CALL IN MILWAUKEE.

One of the Features of a Lively Holiday Trade—Prospects of Big Business Gains Over Last Year—Billings & Sons Piano Co. to Handle Talking Machines—War on Transient Merchants—Shortage of Some Types of Machines Now Reported—New Dealers.

(Special to The Talking Machine World.)

MILWAUKEE, Wis., December 8.—Milwaukee dealers are finding themselves in the midst of an exceptionally busy holiday trade. There was some doubt expressed earlier in the season as to whether or not this year's holiday business in the talking machine field would be quite up to normal, considering the depression experienced in some lines, particularly the iron, steel and heavy machinery business, Milwaukee's most important industry. The developments, however, have been so favorable that there is now every assurance that trade will show a substantial gain over a year ago. Practically all the leading houses experienced a good gain during November and conditions thus far in December have been entirely satisfactory.

There has been one interesting development in the trade thus far this season, and that is the increased demand for high priced machines. This seems to have been due to the fact that so many of the people who usually buy the cheaper machines have been out of work this fall and are finding themselves able to buy only the bare necessities. One would naturally think that the total business would show a falling off, because of the fewer sales of cheaper machines. Dealers and jobbers declare, however, that the sale of high priced goods has more than offset the decline in the demand for the more moderate priced equipment.

Dealers about Wisconsin and other territory tributary to Milwaukee jobbing houses have been buying freely this fall, according to the leading jobbers. Conditions in the smaller cities and towns and about the State in general are very satisfactory. Crops have been good and these are being disposed of at top-notch prices, with the result that there is plenty of money about the State, if people can be induced to part with some of it.

To Open New Department.

The Billings & Sons Piano Co., Milwaukee's latest piano house, which recently opened in its handsome new store in the new Miller building at 504 Grand avenue, is planning on taking up the agency for a well-known line of talking machines. The deal has not been closed at this writing, but it is practically certain that a talking machine agency will be established at the store.

Milwaukee talking machine dealers have been congratulating the piano houses on their success in having an ordinance introduced in the Milwaukee Common Council which aims to curb the operations of transient merchants in all lines of business. Many of the piano houses carry a talking machine line, so the interest has been general. The ordinance, which has been recommended for passage by the judiciary committee of the Council, provides that the transient merchant will have to submit to the city treasurer each morning a statement of his sales of the previous day and pay a fee amounting to 10 per cent. of the sales, the total fee to be paid not to be less than \$5 nor more than \$25.

Shortage of Machines Reported.

The shortage experienced in Victor machines in Milwaukee this fall is becoming a serious matter in some quarters, especially during the holiday season. Jobbers are being besieged by dealers for certain lines of machines, but they in turn are unable to have their orders filled by the Victor factory.

"We could do 400 per cent. more business if we could only secure enough machines from the Victor factory," said H. A. Goldsmith, secretary of the Badger Talking Machine Co., jobber in Wisconsin and Upper Michigan territory for the Victor goods. "The demand from dealers became

stronger this season than anyone anticipated, and we are finding it impossible to satisfy the trade. The shortage is especially felt in styles X, XI, XIV and XVI. The new type XIV Victrola is proving to be a popular seller, but we are not getting enough machines to meet the demands of the trade. The feeling in the trade about the State is much improved and dealers bought exceptionally well this fall. The outlook is certainly bright for a big business next year."

Harry R. Fitzpatrick, traveling representative of the Victor Talking Machine Co. in Wisconsin, northern Illinois and northern Michigan, is covering the trade in western Wisconsin at this writing. Mr. Fitzpatrick is finding himself handicapped by the shortage in Victor goods.

John McCormack, the popular Irish tenor, is scheduled to appear at the Pabst Theater on December 10, and Victor dealers have been swamped with orders for the McCormack records. The new McCormack record, "It's a Long, Long Way to Tipperary," has been proving especially popular.

Operating Large Victor Department.

The Hoeffler Piano Manufacturing Co., 306 West Water street, operating an especially large Victor department under the management of J. H. Becker, Jr., seems to have been one of the few Milwaukee houses which was fortunate enough to lay in a large stock of machines earlier in the season.

"The holiday business is even better than we had anticipated," said Mr. Becker, "but we are supplied with a fine stock of machines. We even stored a large number of the various styles, in order that we might be in readiness for the holiday rush. There is a brisk demand for styles IX and XI. The record business is also exceptionally good. We have nearly 100 Victrolas on our floor and in our demonstrating booths. Our new mailing envelopes, suggesting Victor records for Christmas, together with the colored Christmas list, which I prepared, are bringing excellent results. I believe that this sort of advertising is always satisfactory."

"Ragtime Rastus," a new dancing doll in the Hoeffler window, is attracting considerable atten-

MIGHTY SCARCE, BUT VICTRO In mahogany and a

Stocks of Victrolas XVI at present in the hands of distributors are extremely low and a very acute shortage in this type is expected for the next sixty days. You will find it to your interest to consult us *now* regarding your holiday requirements.

tion. The mechanical toy fits any talking machine and dances automatically when the machine plays.

The wife of J. H. Becker, manager of the Hoeffler Victor department, is recovering from her five months' illness.

Now in New and Larger Quarters.

The Roethe-Buelow Co., an enterprising talking machine house located on the Milwaukee south side, formerly at 395 Grove street, has opened in new and larger quarters at 396 Eleventh avenue. The company has been meeting with a steady increase of business and the larger quarters became necessary. The Roethe-Buelow establishment has been termed "the south side's handsomest talking machine store." The company handles the Columbia line and has been meeting with a fine business of late.

The Gensch-Smith Co., 730 Grand avenue, handling the Victor line, is now nicely settled in its additional quarters, which it recently secured, adjoining its store. The company's business during the month of November showed a decided increase over the corresponding month a year ago.

Milwaukee talking machine houses have advertised in the local papers more freely than ever this fall, and it is believed that the big increase in business which has been experienced is one of the direct results. The J. B. Bradford Piano Co., the Edmund Gram Piano House, the Badger Victrola Shop, the George H. Eichholz Co. and Gimbel Bros. and the Boston store, handling the Victor line, A. G. Kunde, carrying the Columbia goods, and the Edison Shop and the Flanner-Hafsoos Music House, selling the Edison line, have been carrying on an especially aggressive newspaper campaign with the best of results.

Paul A. Seeger, manager of the Victor department at the Edmund Gram Piano House, is finding that his total business this season is showing a decided increase over the same period a year ago. The demand for the high priced Victrolas has been especially strong at the Gram house.

The Roethe-Buelow Co., 396 Eleventh avenue, made a sale of considerable interest recently, when it disposed of one of the \$500 Columbia machines

to Fred Oesterreich, a well-known manufacturer on the Milwaukee south side.

A. G. Kunde, 516 Grand avenue, Columbia jobber and dealer, has been receiving many inquiries from teachers and schools all over the State of late regarding the Columbia line, as a result of the successful demonstration of the Columbia machines before the annual convention of the Wisconsin State Teachers' Association, held in Milwaukee last month. General business at the Kunde store has been exceptionally good since the concern opened in its handsome new quarters.

The Edison people are also having their troubles regarding a shortage in some lines of machines, according to William A. Schmidt, manager of the

Phonograph Co., of Milwaukee, jobber in this territory for the Edison goods. The scarcity in the Edison field seems to be especially noticeable in the various oak styles of disc machines. Mr. Schmidt says that dealers in this territory have been buying much more freely than had been anticipated. The disc line has been placed with several reputable Wisconsin houses of late. Business at the Edison Shop, the leading downtown retail Edison store in Milwaukee, is very good at the present time.

Miss Henrietta Kane, formerly with the Koerner Bros. Piano Co., of Milwaukee, has joined the sales force at the Edison Shop, where she is meeting with much success.

HOW THE DEALER IS HELPED.

The Co-operation of the Victor Co. in Helping the Dealer Again Illustrated in Some Remarkable Advertisements in the New York Papers—Names of All the Dealers Given.

The Victor Talking Machine Co., on December 4 and 5, used a full-page advertisement in the local newspapers which marked an era in newspaper advertising in the talking-machine industry. This advertisement appeared in every New York evening newspaper on the 4th of the month, and was repeated in every local morning paper the day after. The size of the advertisement and its simultaneous appearance in all the local papers was sufficient in itself to attract the attention of the public, aside from the forceful copy used and the decidedly unique character of the text.

This full page was headed "Victor Supremacy," and the heading was followed by two short and pithy paragraphs calling attention to the fact that the world's greatest artists make records for the Victor Co., and emphasizing that the scope of the Victrola is unlimited. To support this text, a border was used portraying twenty-eight of the world-famous artists who record for the Victor library. This border was completed by an unusually sharp and clear cut of a Victrola XVI, with the internationally popular Victor trade-mark.

The unique and remarkable phase of this advertisement, however, consisted of the listing of all the Victor dealers in New York and vicinity, this list being the first one of its kind ever published. The publication of these names represented more than a mere list of representatives of the Victor Talking Machine Co., as it served to permanently impress the reader with the prestige of the Victor products and the remarkable popularity that they have achieved in the past few years. The sales value of the page is unquestioned, and the Victor Co. has been in receipt of congratulations from its dealers throughout the country, who regard the advertisement as a publicity and sales masterpiece.

The numerical strength of Victor representation in local territory may be gathered from the fact that 241 names were listed in the advertisement. Exactly 100 Victor dealers are located in the Borough of Manhattan, fourteen in the Bronx, and seventy-five in Brooklyn. The remainder of the list included Victor dealers in Staten Island, Queens, Westchester County, Newark, Jersey City and Hoboken, N. J.

The dealer who understands the power of advertising will not be a price cutter. He will be a conservationist, not a pirate. He will push his business on service lines. Service brings him the good will and fixed habits of satisfied customers.

OPENS HANDSOME DISPLAY ROOMS.

New Victor Rooms of Chas. E. Roat Music Co. Most Attractive — Flashlight of Photographer Brings Fire Department and Some Unexpected Publicity in Its Wake.

When the Charles E. Roat Music Co., of Battle Creek, Mich., completed its beautiful Victor display rooms it was so well pleased that it decided to let the trade see, through The Talking Machine World, what it had accomplished. Whereupon two members of the sales force, accompanied by E. T. Merchant, local commercial photographer, withdrew on an evening to the scene and proceeded to take

the economy of space, a worthless basement being transformed into a valuable sales department. The rooms are so arranged that a customer may be shown all models of machines at one time and from one position without being inconvenienced or annoyed by outside influences. Rustic decorations and portraits of various artists form a decorative scheme pleasing to the eye, while a semi-indirect lighting system gives the rooms a soft, mellow glow in perfect harmony with the rest of the setting.

SING A SONG OF BUSINESS.

Suppose we hadn't ever heard about this blooming war; suppose the cables had been cut that run from shore to shore; suppose that England, Germany and Russia and Japan and France had cut the cables off before the war began; suppose we never heard a word of shot and shell and flame—we guess the great United States would go on just the same.

We're big enough and strong enough and have enough of crops, says the American Lumberman. We need

the stuff the farmers raise; the farmers need the shops. If Europe wants to scrap around and spend its cash in hand; if Europe wants to make itself look like cut over land, then we should worry quite a lot about the fighting game—we guess the great United States can go on just the same.

So let's forget about the war, the battles and the bombs, and keep on doing business here until the tempest calms. Instead of shipping stuff to France, to Germany or Rome, we'll make the stuff our people need and sell it here at home.

MAKE ALLEGANY COUNTY MUSICAL.

Twenty-five Victrolas in the Schools of That County Serve to Cultivate the Musical Tastes of That Section of Maryland.

While there have always been many lovers of music in Allegany County, this county as a whole has been far in the rear of other sections of the East in music. Great strides have, however, been made in this direction since the invention and marketing of the different talking machines on which music—vocal and instrumental, by the greater and lesser artists of the day—has been reproduced. This is especially true since the Victrola has become so popular in this vicinity, and musical events which formerly were unable to muster an audience of any size are now crowded long before starting time.

And now comes the introduction of the Victrola—especially constructed for the purpose—into the graded public schools of the country. Twenty-five of these Victrolas have been placed in as many public schools of Allegany County, and under the splendid work of Miss C. B. Morse, supervisor of music for the county, backed and aided by the work of County School Superintendent John E. Edwards, and the principals and teachers of the graded schools, the musical education of the children of the county will be started in the public schools, and they will have a chance to hear the best music of the old and latter-day masters sung and played by artists of world renown and given to them under the direction of one ably fitted to instruct in music.

The twenty-five Victrolas have been placed in the schools by the Morrison Music Co. and will be paid for by the several schools without taking a cent from the public school fund for the purpose. It is understood that the money to pay for the machines and the necessary records will be raised by other easy means, and some of the Victrolas have already been paid for. This move by Miss Morse is bound to become a popular one with the pupils, and will undoubtedly make them lovers of the best in music in the years to come.—Cumberland (Md.) Daily News.

Handsome Victrola Room of Chas. E. Roat Music Co., Battle Creek, Mich.

the above flashlight photograph. After taking the picture they were congratulating themselves on their success when—crash! a breaking of glass called them to the next room, where a fireman came wriggling through the transom window. Upon the main floor the situation proved still more humorous when it was learned that a passer-by, seeing the smoke from the flashlight, had turned in an alarm calling out four fire companies. The total damage was less than \$1.

The company's new display rooms, one of which is shown in the photo, are an excellent example of

Owing to the war, shipments of Lexton Needles from Europe, now on the way, have been delayed. Pending orders will be filled in regular order.

THE TALKING MACHINE TRADE A BRIGHT SPOT

In the Music Trade Field of Kansas City—Present Conditions and General Prospects Most Satisfying and a Large Holiday Trade in Talking Machines Expected—Jenkins Publicity Attracts Thanks to Col. Hunter—Blackman Heads Phonograph Co.—The News.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., December 8.—The talking-machine business in Kansas City has been the only bright spot in music business in Kansas city this fall. As one man expressed it: "The talking machine has been an oasis in the desert of bad business." Now that the Christmas rush is well under way most of the dealers are doing considerable advertising in the newspapers as well as other mediums of advertising. It is the consensus of opinion among the trade that regardless of how trade in general music lines will be during the holidays, the business in talking machines will be above normal.

Harry Wunderlich, manager of the F. G. Smith Piano Co., says that he is very much gratified with the amount of business done this fall as well as for the prospects for the winter. Mr. Wunderlich recently returned from New York, where he spent several days. In speaking of business conditions there, compared to Kansas City, Mr. Wunderlich intimated that he believed them to be better here than there.

An Excellent Record of Sales.

There is hardly a piano dealer in Kansas City but says that the talking machine sales during the past three months have far outstripped the piano sales. This demand has not been for cheap machines, as might be supposed, but for the higher-priced machines. A. A. Trostler, of Schmelzer Arms Co., who has charge of the wholesale lines for the Victrola in this territory, says that it has been difficult to keep up with the demand for high-priced Victrolas, and the prospects are that the holidays will find the supply a trifle short.

Opens Special Holiday Quarters.

The Hall Music Co., E. S. Hall, manager, the only exclusive Victrola dealer in Kansas City, and

which has developed a nice line of customers in its seven years, has opened holiday quarters near Ninth, on Walnut streets, in the Scarritt building. This is a busy location, where thousands pass daily; there is a large display window, and the entrance is through a special door adjoining the ornate entrance to the building; there is another entrance from the lobby of the building. The company has built up its trade largely through personal relations, the use of circulars, etc.

Elmer A. McMurtry, manager of the Columbia Graphophone Co., reports high price machines in good demand, and a fine Christmas trade under way. He also is in the situation of having more calls for records than can conveniently be handled, the demand being general.

Joseph A. Mullen, manager of the talking-machine department of the Carl Hoffman Music Co., spent Thursday, December 2, in a state of ecstasy, which was not due solely to the fact that November business had exceeded the trade of November, 1913, by forty per cent. There was another very good reason for his rejoicing, namely, the receipt, after a long wait, of a supply of records of "It's a Long, Long Way to Tipperary." There has been a great demand for the record. Mr. Mullen reports that the \$100 machines have been the best sellers this season.

Clyde C. Thomas, manager of the Field-Lippman piano store in Kansas City, reports his Victrola sales to be a redeeming feature of the fall and winter trade, and the prospects for late winter and spring are certainly fine, he adds.

M. M. Blackman, formerly in charge of the retail record department of the Lyon & Healy Music Co. at Chicago, has succeeded W. P. Hope as manager of the Phonograph Co. of Kansas City. The business of this distributing office has grown

markedly; and indications being such that two salesmen have been added to the retail force, George Maxey and H. I. Hancock. Mr. Blackman is confident that the present favorable business conditions will hold out all winter.

Bird A. Ward, formerly with the Texas-Oklahoma Phonograph Co., is now traveling for the Phonograph Co. of Kansas City, and is sending in most gratifying returns from his territory.

Some Clever Christmas Advertising.

You have to hand it to Col. W. C. Hunter, advertising manager for J. W. Jenkins' Sons Music Co.—whenever there is a chance, his department seizes upon it, and lets no phase of the opportunity slip away. The talking machine department of the establishment was certainly a good bet this holiday season, and while other departments have been given very careful and extensive attention in the advertising displays, a special stunt was pulled off with reference to Victrolas that is causing a lot of conversation. Just when the seasonal campaign began, several corner storerooms at prominent transfer point suddenly blossomed out with the Jenkins advertising of Victrolas, the windows being chock full of displays of instruments and pictorial advertising. At first glance it seemed to the passers-by that Jenkins' had opened many branch houses—one couldn't see within whether there was a store or not. But investigation by those who got to the sidewalk disclosed the fact that the rooms had merely been rented for the holiday presentation of the Victrolas. Such prominent locations as Fifteenth street and Troost avenue and Thirty-first and Holmes streets were chosen.

There is usually a small crowd around the big plate-glass window of the Phonograph Co. of Kansas City, the Edison distributing place, where the bronze frame containing a plush cushion, on which an Edison reproducing needle rests, is displayed. A large reading glass in position above the needle magnifies the diamond point several times, and the passers-by stop to examine it closely, being impressed with the "point" made.

CHRISTMAS BOXES FOR RECORDS.

In accordance with its custom of former years, the New York Talking Machine Co., 81 Chambers street, New York, Victor distributor, has ready for its trade handsome Christmas boxes for Victor records, which it will furnish its dealers at cost. These boxes, which are made in two sizes for the 10 and 12-inch Victor records, are decorated appropriately for the Christmas season and contain an expensive and beautifully embossed Christmas card, which tends to enhance the gift.

NEW ATTACHMENT ANNOUNCED.

A new attachment permitting of the playing of Pathé disc records on the Edison diamond disc machine was announced last week by the F. C. Kent Co., Newark, N. J., which is working to capacity to turn out a sufficient quantity to handle the orders it has already received. This attachment has been perfected after extensive experimentation and is furnished complete with a sapphire.

THE NEW GENERAL MANAGER OF THE COLUMBIA CO.

A Man of Rare Executive Ability, a Calm, Clear, Logical Thinker Who Quickly Grasps the Kernel of an Intricate Proposition—Some of His Important Appointments.

John A. B. Cromelin, whose appointment as general manager of the Columbia Graphophone Co. was announced in last month's World, has been appointed to this important position with all the fulness of authority and freedom of operation which have always been vested in the general managership.

Few men in any business have had as broad a business training as General Manager Cromelin. In many positions of responsibility, in many lands, he has filled those positions capably and with uniform business-building success.

Mr. Cromelin entered the Columbia service at the bottom of the ladder, eighteen years ago,

turns out and for the type of men who are the brains back of the product.

When you meet Mr. Cromelin you are first of all impressed with his pleasing personality, and further with the fact that he is a calm, clear, logical thinker—an analytical thinker—quick to grasp the kernel of an intricate proposition and quick to realize its possibilities in a broad way. Two principles which he has consistently followed and which have played a prominent part in his successful European administration are interesting to note, as they serve as a prophetic sidelight on his probable operations here. One is that in choosing business associates the rule should be "90 per cent. Selec-

John A. B. Cromelin Snapped by the World Photographer at His Desk.

served as private secretary to the president, and later as assistant executive officer in the factory at Bridgeport. Thirteen years ago he was transferred to Europe where he was employed in Paris and Berlin. He was St. Petersburg manager, and for the last four years European general manager, with headquarters in London.

It is in this last-named position that Mr. Cromelin's rare executive ability, backed by soundness of thinking and policy planning, has found such profitable expression. He took the European helm after the panic of 1907, when business in Europe was being operated at a loss, developed it, and in a short time put it on a profitable and sound business basis. His problems were not alone sales getting, but manufacturing; and the London factory to-day stands as a model of factory efficiency, both on account of the high quality of product it

tion—10 per cent. Supervision." The other, "The dealer, first and foremost."

Since his promotion to the general managership, Mr. Cromelin has made the following appointments: Edward N. Burns, vice-president and manager of the Columbia export department, has been placed in charge of the foreign record department.

H. A. Yerkes, wholesale manager, is now district manager of New England, also including in his territory, Washington, D. C.; Atlanta and Birmingham.

R. F. Bolton, manager of local wholesale store, has been appointed district manager of New York territory, including Buffalo and Rochester.

Seth H. Nichols, manager of the Pittsburgh wholesale headquarters, is now district manager of that territory, with the additions of Cincinnati, Cleveland and Toledo.

honor upon Thomas A. Edison, the inventor. The bill carries an appropriation of \$5,000 for use in preparing the medal, which would be selected by a committee consisting of the President, the Vice-President and the Speaker of the House.

TRADE OUTLOOK IN NORTHWEST.

New England Furniture Co. Increases Its Line of Talking Machines—New Edison Branches—Great Increase in Victor Business—Attractive Columbia Window.

(Special to The Talking Machine World.)

MINNEAPOLIS and ST. PAUL, MINN., December 10.—H. G. Derrick, manager of the Victor department of the New England Furniture Co., recently added the Edison disc and the Columbia Grafonolas, and is showing the three lines in adjoining compartments.

"It's the only way to run an independent talking machine store in my opinion," explained Mr. Derrick, to The World correspondent. "When a buyer's fancy or judgment has been caught by a certain kind of machine, it is much easier to sell him that particular kind than to convince him that he ought to buy something else. Our sales have been largely increased by the addition of the two new lines, and that without diminishing but rather stimulating the sales of the first line."

Three new Edison branches have been opened in the Twin Cities since the November issue of The World went out, namely, by Foster & Waldo, and the New England Furniture Co., Minneapolis, and the Golden Rule department store, St. Paul. The deals were made by Laurence H. Lucker, of the Minnesota Phonograph Co. The Edison discs, he reports, are growing rapidly in popular favor, largely through the two new elegant stores in St. Paul and Minneapolis, which command attention by the beauty of their design and arrangement.

W. J. Dyer & Co., general jobbers for the Victor Co. in the Northwest, report a great increase in business. "Our sales of late have averaged \$3,500 daily," said Mr. Dyer, "and we easily could increase that 25 per cent. if we could get the goods. We know that the Victor Co. is bending every effort to supply the demand, and we probably are as well supplied as any other house, but naturally we must feel some regret when compelled to decline some good business. We are making many sales of high-class machines for Christmas gifts, and have set aside a large room for machines to be delivered Christmas morning. The demand for this class of musical instruments shows no sign whatever of abatement, but rather there is a constant growth."

Manager C. P. Herman, of the Columbia store in St. Paul is working out an attractive window display for the holidays. The scheme will be in white with frosty wintry effects, but poinsettias and holly too will be used liberally to add color to the setting. A full line of the Columbia machines will be shown, from the smallest to the largest.

Miss Ellis, late of the Biltmore, New York, is showing all the modern dances in the new Edison shop on Nicollet avenue, Minneapolis.

AN INVENTION THAT INTERESTS.

(Special to The Talking Machine World.)

BOSTON, MASS., December 10.—An invention that is taking by storm owners of talking machines is the dancing Rastus, which was first introduced by the Columbia Graphophone Co., though it was not long before most all of the talking machine houses had the contrivance. It is a clever arrangement—a nimble doll-like figure, with loose legs and arms, dances untiringly on a board over the machine while the instrument plays a lively dance. It is really a most clever invention, and it is being eagerly sought at all the stores now.

WINNING SUCCESS ON COAST.

Frank M. Steers, president Sonora Phonograph Co., Phelan building, San Francisco, Cal., was in town last week consulting with Geo. E. Brightson, president of the Sonora Phonograph Corporation, 57 Reade street, New York. Mr. Steers reports that since the establishment of the new company with its warerooms, business is being booked all the time and the future looks bright not only in San Francisco, but all along the Coast.

"The entire Pacific Coast is wonderful talking machine territory," added Mr. Steers, "and I might say that the people of this area have a sufficient income to represent an excellent volume of business."

WANTS MEDAL FOR THOS. A. EDISON.

Representative Robert H. Gittins, of New York, recently introduced a bill in the House in which he proposes that Congress shall confer a medal of

THE TRADE IN NEW YORK CITY AND VICINITY

The local talking machine industry the past month has stood out conspicuously as one of the very few industries which maintained sales totals that compared favorably with the figures of last year. As a matter of fact the local business in talking machine circles during November exceeded all expectations, in that the majority of dealers reported a substantial gain over last November's business, and hardly a member of the trade reported a falling off in machine or record sales as compared with November, 1913. This prosperity is remarkable in view of the unsettled conditions which exist in practically every other retail mercantile field in New York at the present time. The stability and strength of the talking machine industry has long been acknowledged in financial and commercial circles, but the wonderful sales records which have been established this year in the face of unparalleled conditions place this industry far in

advance of many industries established years before for the talking machine was placed on the market.

The prosperity which is now prevailing in the talking machine industry may be attributed in a considerable measure to the valuable co-operation which the manufacturers have extended their distributors and dealers by stimulating the demand for machines and records in every conceivable way. When it is considered that the money market has been unsettled since the first of the year, and financial circles throughout the country have been generally disturbed, the fact that all the manufacturers are closing the best year in their history would give a fair idea of the machine and record demand which they have developed.

The most important feature of local trade the past month has been the volume and character of the newspaper publicity used by the industry as a whole. The leading manufacturers have been using

printers' ink to a greater extent than during any previous holiday season, and this advertising has been well calculated to enhance the musical prestige and sales possibilities of both machines and records. In addition to this general publicity individual dealer advertisements have been published daily, and there has been hardly a local newspaper which has not carried large announcements of talking machine dealers and manufacturers.

Shortage in Some Types of Machines.

As predicted in these columns the past two months, there now exists a marked shortage in machines of certain types and many classes of records. The demand for machines this fall has inclined perceptibly to the models retailing at \$75 upwards, and it is in the \$75 and \$100 types that the most serious shortage exists. Those dealers who decided to order machines and records as they were needed in preference to placing their customary advance orders for the holiday season have been seriously handicapped by their lack of confidence in the business outlook, and have doubtless lost a number of sales through their inability to supply both machines and records when they were actually required.

Activity in Upper New York.

In that thriving and popular section of upper New York, 125th street, which is quite a talking machine center, the various stores have arranged some very attractive windows for the holiday season. Worthy of special mention is I. Davega, Jr., who devotes a window to a "Tipperary" display, soldiers moving out of the sound chamber of a \$25 Victrola over a bridge into the sound chamber of a similar machine on the other side. The movements of the troops are most picturesque, and the attention the display attracts emphasizes the interest in the famous marching song of the Allies. Another attractive window preceding the foregoing was devoted to the making of the Victor records. An artistic window is that of the Columbia Graphophone Co., which is admirably arranged with a true Christmas atmosphere, the various styles being on exhibition. Kranich & Bach have a very attractive window in which the Victor and Columbia machines are displayed—in fact, the talking machine stores throughout the district are all up-to-date and evidently doing a good business.

Good News from New York Talking Machine Co.

"November business was simply wonderful," said V. W. Moody, sales manager of the New York Talking Machine Co., 81 Chambers street, Victor distributor. "December of last year was of course the best month of that year, and in fact the best month in the history of our company, and as our figures for this November just about equal our totals of last December, the magnitude of our current business may be realized. The improved Victrola XIV and the XVI, with electric motor, are proving very popular with the trade, and because of the Victor Co.'s inability to make large shipments of these new types, the more thoughtful dealers are literally screwing their machines to the floor, and hanging on to them like grim death. The percentage of increased record business as compared with 1913, is running slightly ahead of the gains in machine trade, not because the machine business has fallen off, but owing to the tremendous growth of the record business."

Closed Great November Trade.

Anent Columbia prosperity, R. F. Bolton, district manager of local wholesale territory, with headquarters at the branch at 89 Chambers street, said: "We have just closed the best November in the history of our company. As a rule, our November trade falls somewhat below October business, but this year it has been different, and last month was 20 per cent. better than October. There has been an enormous demand for the Leader and Mignonette machines with both the record racks and the new record ejector, and we have been taxed to the utmost to secure a sufficient stock of these

(Continued on page 24.)

New York Talking Machine Co.

81 Chambers Street

New York

A line of foreign records, representative of every country in Europe, is to-day strengthening every Columbia dealer in handling the present phenomenal demand for European national music.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

THE TRADE IN NEW YORK CITY.

(Continued from page 22.)

models. Foreign record trade is increasing steadily, and the war abroad has created a surprisingly large demand for records of a patriotic strain. Collections are generally good, and the outlook as a whole is very promising."

Edison Diamond Disc Popular.

"The prestige of the new Edison diamond disc product is becoming more firmly established week after week," said A. W. Toennies, of the Eclipse Phonograph Co., 203 Washington street, Hoboken, N. J., exclusive Edison jobbers. "The wonderful musical effects which may be obtained from the combined use of the Edison disc phonograph and the Edison disc records have made these products popular among musicians who formerly ridiculed the musical standing of the phonograph or talking-machine. Last month was one of the best in our history, and the quality of the Edison disc product and the up-to-dateness of their new records have enabled our dealers to consummate an excellent holiday business, which was better than they had ever hoped for."

Pathé Frères Phonograph Co. Progress.

The Pathé Frères Phonograph Co. has been making steady progress in introducing its products to the local trade, and during the past fortnight has signed a large number of dealers' contracts in this territory. The unlimited Pathé record repertoire and the many distinctive qualities of the Pathephone have won the favorable attention of dealers throughout the country. Among the most recent new accounts are Ludwig Baumann & Co., 125th street, the prominent furniture house; the Harlem Sewing Machine and Talking Machine Co., 1529 Madison avenue; B. G. Warner, Brooklyn, N. Y., and Hardman, Peck & Co., 433 Fifth avenue, one of the best-known high-grade piano houses in the country.

J. N. Blackman Is Optimistic.

"The demand for machines is greatest in the models retailing at \$50 and upwards," remarked J. Newcomb Blackman, president of the Blackman Talking Machine Co., 97 Chambers street, Victor and Edison cylinder distributor. "Our machine trade has been excellent, and our sales totals for November showed a substantial gain over last November. This industry is a conspicuous exception to general business affairs, in that it has been steady and prosperous in the face of unexpected commercial disturbances. The only thing that we must watch carefully is collections, and the dealer should try to merchandise his product at fair and equitable terms which will net him a profit without any fear as to the responsibility of his customers. He should not sell goods on terms which might embarrass him later on."

Aeolian Co.'s Active Campaign.

The Aeolian Co. has been conducting an extensive campaign on behalf of the products of the Columbia Graphophone Co., which has been producing splendid results. Cowperthwait & Co. has also used considerable newspaper space to advertise its Columbia department, and Manager Woolley states that the response to this publicity has been most gratifying. Other new Columbia agencies

have realized the advantages of acquainting their trade with the merits of Columbia goods, and as a result, Columbia local trade has exceeded by far last year's sales totals.

Landay Bros. Increasing Wholesale Trade.

Landay Bros. Victor distributors are doing a very satisfactory business, as summed up by Max Landay, president of the company, who says: "Up to the first of December our general trade was very good indeed. The reports of the dealers whom we are serving would indicate that their individual stores were prosperous and busy, in spite of the conditions brought about by the war abroad. Our advertising in The Talking Machine World has brought us a large number of inquiries from dealers, the majority of which we have been obliged to refuse, because we are serving a limited number of dealers only, but after the first of the year we expect to increase our facilities for handling wholesale trade considerably. We believe in concentrating our efforts rather than scattering them, and it has been this policy which has built up our retail trade. This same system of concentrating on a comparatively few dealers and serving them well has been a prime factor in the growth of the wholesale trade."

HELPS TO INCREASE ORDERS.

How E. G. Evans Uses His Automobile to Get Victor Orders for C. Bruno & Son, Inc.

In this age of efficiency it is interesting to note the method adopted by E. G. Evans, special Victor representative of C. Bruno & Son, Inc., 353 Fourth avenue, New York, who recently purchased an American underslung automobile, primarily for use in calling upon the trade. Mr. Evans makes this significant statement, that with a car he is enabled to make 50 per cent. more calls daily, with a corresponding increase in the amount of Victor sales, there being in this particular remark a big hint for many talking machine men as to how to increase business.

Inasmuch as the foregoing move was at his own volition, Mr. Evans is to be congratulated upon his endeavor to get the greatest amount of business from his daily time.

VISITING THE UNITED STATES.

Louis Sterling, who was recently appointed general European manager of the Columbia Graphophone Co., arrived in New York late last month on the steamer "Franconia." Mr. Sterling, whose headquarters are in London, England, is visiting this country to confer with the executives of the Columbia Co. regarding future policies and important matters relative to his new post. He was accompanied by Mrs. John A. B. Cromelin, wife of the recently appointed general manager of the Columbia Co., and their family.

The Audubon Grafonola Co., a newly organized retail concern at 3750 Broadway, New York, has arranged to handle the Columbia Co.'s complete line exclusively in its establishment, and has placed a substantial order for stock for the holiday trade.

VOCA PHONE LATEST WRINKLE.

New Device Turns Whispers Into Loud Talk at Long Range—Must Watch Your Speech.

You might as well be warned at once that anything you say will be used against you. And you don't have to say it loudly. You can whisper it and not escape. For now comes the voca phone, "the box that hears and talks." Gaillard Smith, president of the Detecta Phone Co. of America, and responsible for the instrument beloved of detectives and fiction writers, from which the company takes its name, fathers this new instrument.

It is the natural offspring of the telephone and resembles its parent. But when you swing over the arm carrying the receiver you hook up a mechanism that magnifies sound many times, so that instead of whispering privately into the ear of the person at the other end of the line, the voca phone talks to him distinctly, even though he be many feet away from the instrument. And he can talk back without bothering to get out of his chair.

Mr. Smith's voca phone isn't ready for the market yet, but it is already in the drama, for last week he invited his friends to witness a private view of "The Riddle of the Green Umbrella," in which Alice Joyce as a girl detective startles the villain quite out of his villainous self-control by dropping a voca phone down the chimney and announcing through it that the spirit of the villain's victim "will be revenged."

It is not, however, as an instrument for making folks uneasy that Mr. Smith presents the voca phone. It is intended primarily as an ideal means of intercommunication between rooms, offices, factories or the various widely separated units of any industry. It is meant for short distance work, but Mr. Smith said that it had worked satisfactorily at twenty miles.

"As an illustration," said Mr. Smith, "suppose a lawyer sitting in his office wishes to consult a book in his library. His voca phone is switched on and he does not move from his desk. 'Look up volume so and so, page 241, and read me the second paragraph,' he says. And the clerk, climbing a ladder and finding the volume on the top shelf, can stand there and read the desired reference, his words being transmitted as clearly as though he stood at the lawyer's elbow."

RECIPE FOR GOOD HUMOR.

Take twenty-four hours; mix thoroughly with the milk of human kindness, and spice of life to suit the taste; a little discretion, some common sense; knead with the hand of friendship and bake in the open hearth of love; do not allow it to cool too quickly by trouble, or become sour by affliction; serve with generous sauce and a bright smile.—Washington Star.

F. W. Swan, who for forty-four years has conducted a jewelry store at Muscatine, Ia., has become an Edison disc dealer and has recently placed a good sized order for Edison instruments.

STEADY RECOVERY OF GENERAL BUSINESS NOW EVIDENT.

National Civic Federation Finds Optimism in Most Quarters—Encouraging Reports from Over Six Hundred Sources—Some Interesting Conditions Revealed by Some of the Letters Received—Railroads Declared to be Pessimistic.

Business improvement, with increase of prosperity for the immediate future and steady betterment thereafter, is the summary of the findings of John Hays Hammond, chairman of the industrial economics department of the National Civic Federation, as the result of a widespread canvass of conditions throughout the country. Mr. Hammond has had reports during October and November from about 600 correspondents, including governors, mayors, officials of national banks, savings banks, railroads, associations of manufacturers, boards of trade, life insurance companies, State federations of labor, trade unions, provident loan societies, State labor bureaus and charity organizations.

Mr. Hammond presented a report on this correspondence to the annual meeting of the National Civic Federation, held at the Hotel Astor recently, when the problem of unemployment and the other financial and industrial questions arising out of the war was considered.

"Business throughout the United States is improving and the conviction that a further advance toward prosperity will be made in the next few months is widespread," says the summary of the report. "Improvement in financial conditions and the resumption of exports have been followed by signs of improvement in many quarters.

Improvement Is Gradual.

"The resumption of normal business activities must be gradual and the unusually large number who are now unemployed will find work slowly. We must expect a great deal of unemployment in the coming winter months. By far the most gloomy view is that taken by nearly all the charity organizations. New York city reports applications for relief 45 per cent. more numerous than a year ago, while in smaller places such organizations find their work increased from 20 per cent. to 100 per cent. over last year.

"But it is highly significant that in the many gloomy letters from charity officials and trade union authorities there is no note of actual despair and no advocacy of untried experiments to relieve poverty.

Railroads Are Pessimistic.

"Next to the charity organizations, railroads are the most pessimistic. Several of the great manufacturing associations insist that an increase in freight rates would do more for the permanent prosperity of the country than even the ending of the foreign war.

"Largely owing to the railroad situation many of the great fundamental industries have been for a long period exceedingly quiet. But reports now come in of new building projects in the Middle West. The concrete trade is picking up and to a slight extent this is true of the electrical trade, although machinery lines still appear very quiet. The president of one of the greater steel companies says that in his opinion the bottom has been reached in the steel trade.

"A markedly large number of letters emphasize the service which the opening of the Federal Reserve Banks is expected to afford. Not only do bankers make this point; manufacturers and merchants are even more impressed with benefits to be expected from these new institutions.

"Numerous letters refer to the lowering of money rates that has taken place in the last month, especially in the Middle West, and the consequently freer movement of trade. Another significant feature is the improvement in the savings bank situation. The great savings institutions of New York city report that business is now altogether normal.

"The last few weeks have brought about a little convalescence even in those industries which seemed wholly crippled. From mayors of cities in North and South Carolina, Alabama and Georgia come more cheerful views of the situation there.

"Many letters tell of purchases of supplies by belligerent nations.

"In the great farming region west of the Mississippi and east of the Rocky Mountains, and to a somewhat less extent in the agricultural sections of more Eastern States and the Pacific Coast, local conditions of prosperity, because of the unusually good crops have prevented any serious effects from the war."

CLOSED MANY IMPORTANT DEALS.

Clifford R. Ely, traveling representative of the Columbia Co.'s wholesale department, returned to New York last week after spending 123 consecutive days in traveling through the South, middle South and Northwest. Mr. Ely reports conditions as being remarkably auspicious for Columbia prosperity, and secured orders from Columbia dealers which far exceeded the orders they placed in November of last year. Mr. Ely states that conditions in the South are, of course, considerably below normal, but notwithstanding these handicaps, Columbia dealers are selling plenty of machines and records, in the majority of instances running ahead of last year's sales totals. Mr. Ely, while on this extensive trip closed a number of important deals for new Columbia agencies, including the Lenhart Piano Co. St. Paul Minn., and others.

PLAYER AND PHONOGRAPH.

Combined in Patent Granted to S. S. Waters and Assigned to the Aeolian Co.

(Special to The Talking Machine World.)

WASHINGTON, D. C., December 9.—The Aeolian Co., New York, are the owners through assignment by Samuel S. Waters, Washington, D. C., of Patent No. 1,119,333 for a Combined Player-Piano and Phonograph, and relates to a combination of musical instruments especially adapted for the

playing of two musical instruments together and in the same musical time, and is particularly adapted for the playing together and in the same musical time two different or dissimilar instruments. In the specific embodiment of this invention a piano and a phonograph reproducer mechanism are combined. While of the particular relation and adaptation stated, however, this invention is capable of use in connection with instruments of other types than those specified.

PLANNING FOR NEXT CONVENTION.

Entertainment Committee of Jobbers' Association is Whetting Appetites of Members with Booklets Descriptive of Exposition.

The arrangement committee of the National Association of Talking Machine Jobbers has already begun an active campaign for the purpose of insuring a large attendance at the 1915 convention of that body, to be held in San Francisco some time in July. Last week the committee sent out to association members several interesting illustrated booklets regarding the Panama-Pacific International Exposition, which will be under way in San Francisco at the time of the convention, in order to stir up early interest in the coming trip.

PROTEST ON DUTIES OVERRULED.

The Victor Talking Machine Co. protested the New York Customs Collector's assessment on mica washers, cut to size and finished for gramophones. Duty was taken at the rate of 45 per cent. ad

valorem under the provision for "parts of gramophones." The claim was for a tax of 1 cent per pound and 20 per cent. ad valorem as manufactures of mica.

The protest was overruled by the Board of General Appraisers.

BOOKED SOME BIG ORDERS.

T. F. Walsh, Secretary of Union Specialty & Plating Co. Tells of Good Times in the Trade—Many Specialties in Demand.

Among the visitors to the talking machine trade in this city during the past week was T. F. Walsh, secretary of the Union Specialty & Plating Co., Cleveland, O., who closed some very large orders for the various specialties relating to talking machines manufactured by this prominent establishment. He also made a general visit to the principal cities of the East, booking a satisfactory business. When seen by The World representative Mr. Walsh was very optimistic regarding business gen-

erally, and particularly buoyant over the outlook in the talking machine trade, which he declared was the least affected of any owing to the disturbed conditions created by the European war.

The Union Specialty & Plating Co. is constantly adding to its supplies for talking machine manufacturers and jobbers, and will have some important announcements to make in the near future.

LIVELY TRADE IN NEWARK, N. J.

Talking Machine Stores and Departments Enjoying a Most Satisfactory Holiday Business—Improvements in Hahne Department.

NEWARK, N. J., December 11.—One of the bright features of the holiday music trade in this city has been the satisfactory character of the talking machine business, practically every concern having a talking machine department is enjoying about all the business it can handle. The stocks of the dealers are in excellent shape and there is little prospect of a serious machine or record shortage before the holiday buying is over.

The talking machine department of Hahne & Co., under the direction of the Musical Instrument Sales Co., has been entirely rearranged and remodeled and four new sound-proof booths have been built for the accommodation of record purchasers. It is planned to make the department a strong factor in the trade in the very near future.

The Griffith Piano Co., which has the agency for the Edison disc phonographs, reports the sale of five high-priced machines of that type this week, with a number of excellent phonograph prospects in sight for Christmas purchases.

The Armstrong Piano Co., which handles the Victor line, is doing a lively business in that line and reports that the volume of sales during the present holiday season is greatly in excess of the record for the same season last year.

The Columbia Grafonola department of the F. G. Smith Piano Co. is very busy at present and it has been found that the use of the Grafonola and Columbia as the accompaniment to dancing on the floor above the store has proven of material assistance in influencing sales of both machines and dance records.

The talking machine departments of the Lauter Co., Steger & Sons and the Standard Piano Co. have proven very successful this fall and quite in contrast to some other lines of business. The higher priced machines, those of the cabinet type, have the preference in the majority of cases.

RECORD ALBUMS THAT PLEASE.

Holiday Season Brings Heavy Demand for Products of National Publishing Co.—Liberal Reorders and Testimonial Letters from Dealers Prove Satisfaction Giving Qualities.

The approach of the holidays and the stimulation of record sales has had an excellent effect on the demand for the line of record albums manufactured and marketed by the National Publishing Co., Philadelphia, Pa. The many dealers throughout the country who have already been handling the National albums are enthusiastic regarding their satisfaction giving qualities, including their durable construction and attractive appearance, combined with convenience. The National albums contain twelve or seventeen pockets and are made in two sizes to accommodate ten or twelve inch records. The pockets are so designed that the numbers and titles of both single and double-sided records are plainly visible, which makes the finding of any record desired a simple matter.

A feature of the policy of the National Publishing Co. that makes a strong appeal to retailers is the manner in which the company assists its dealers in making sales through the supplying of special circulars regarding the albums and other sales helps. The circulars are attractively printed, convincingly worded, show illustrations of the albums and are supplied in quantities to the dealers upon application. Selling hints are also supplied.

The fact that many dealers have not only written enthusiastic letters in praise of the National albums, but have also placed large reorders for those goods is the best proof of their satisfaction giving qualities.

Big Fire Will Cause Only Short Delay in Operation of Edison Plant.

Work of Rebuilding Factories in Orange Started on Morning Following Conflagration—
Thomas A. Edison Meets Disaster Courageously—An Optimistic Letter to the Trade—
Record Molds and Much Machinery Saved—Final Estimates of Actual Monetary Loss.

Orange, N. J., December 10, 1914.

Mr. Edward Lyman Bill,
Talking Machine World, New York City.

Dear Sir:—We thank you very much for your telegram expressing sympathy. Workmen and engineers are already busy clearing away the debris and planning repair work. It is the consensus of opinion that we shall be manufacturing phonographs and records in a surprisingly short space of time. Yours very truly,

C. H. Wilson,
Vice-President and Gen. Manager.

The destruction of a large portion of the great Edison plant at West Orange, N. J., by fire, on the night of December 9, was a distinct shock to the entire country, for not only talking machine representatives, but the entire world were interested in the great inventor and his creations, and will sympathize with him and his associates in the destruction of the great Edison plant.

While it is not definitely known just how the fire started, it is supposed that an explosion in the

the fire. There was also a small outside insurance.

The great inventor, with his wife and several friends, stood near a window on the fourth floor of the building across the street and saw the work of years wiped out by the flames. His first concern was for his laboratory, where scientific machinery of great value was installed and which contained all the Edison patents and records of all his works. Firemen kept more than a dozen streams of water playing on this building, while

West Orange citizens gathered to the extent of 12,000 near the scene of the fire, all desirous of helping the firemen. Sympathy for the famous inventor was universal in the great crowd which gathered. Hundreds of telegrams and letters from friends and business acquaintances reached Mr. Edison after the fire. They came from all over the country, and contained expressions of regret at his loss.

Naturally Edison representatives in every section of the country are deeply interested in the future plans of the Edison corporation; but, they can rest assured that no time will be lost in creating a newer and greater enterprise, and that every possible means will be used to facilitate the rehabilitation of the manufacturing enterprise.

Encouraging Letter to Dealers.

On Thursday morning, the day after the fire, the following optimistic and encouraging letter, signed by C. H. Wilson, vice-president and general manager of Thos. A. Edison, Inc., was sent to the trade

View of the Ruins of the Edison Plant Taken the Morning After the Fire.

film room, a one-story frame building, was the direct cause. At least an explosion was heard in that building before the flames were first seen.

The celluloid films burned with a rapidity and fierceness that sent tongues of flame through the windows of the cabinet works, a five-story, concrete building adjoining. In a short time that building was wrecked and the flames had spread to half a dozen other buildings.

The moving picture building in which all of the Edison photo plays were constructed and which contained films, cameras and motion picture apparatus of great value, was destroyed, not a single thing being saved of all its contents.

The storage building of the chemical works practically blew to pieces when the fire came in contact with the hundreds of pounds of chemicals stored there.

The other buildings destroyed included the plants of the Bates Numbering Machine Co., the Edison Diamond Disc Phonograph Works, the Edison Phonograph Cylinder Works, the Edison Primary Battery Works and the Blue Amberol Phonograph Works and the Administration building.

The monetary loss is very large. It is said that Mr. Edison will have to stand a loss of between \$3,000,000 and \$4,000,000. He carried his own insurance, a so-called blanket policy, whereby out of the yearly profits of the plant he has been putting away a certain percentage for fire risk. He explained that he has through that policy about \$2,000,000 to offset in part the damage caused by

others carried out all of its contents and stored them in the storage battery building across Lakeside avenue. Both these buildings were saved in their entirety.

The great inventor bore his loss bravely, his voice was cheerful and he smiled when reporters questioned him on the night of the fire.

"I'm pretty well burned out just now, boys," he said, "but I'll start all over to-morrow. There'll be some rapid mobilizing here when this debris cools off and is cleared away. I'll go right to work to build the plant over again. It is just a temporary setback; don't forget that.

"If anyone had told me yesterday that this block could be destroyed by fire," he exclaimed, "I would have considered that man crazy. But I'll wager that the new plant I'll build will be proof against everything but an earthquake."

Of the 3,700 employees who worked in the buildings that were destroyed, as many as possible will get work in the reconstruction.

"While the film-producing plant was wiped out entirely," said C. H. Maxwell, second vice-president of the Edison Corporation, "we still have a wooden auxiliary film building a short distance from the site of the fire.

"The phonograph works were destroyed entirely, and there will be a temporary stop to this branch of the Edison business. This business should be resumed in a very short time. Casts of records on which the voices of famous singers are recorded were saved, however."

and should serve to set at rest any fears entertained by jobbers and dealers regarding the ability to secure future supplies of machines and records. The letter reads:

"TO EDISON DISC DEALERS—We find that the fire is not as bad as first supposed. Most all our machinery is intact and will only have to be cleaned up. We are moving it into the storage battery buildings, which are nearly as large as those burned and just completed; also we are starting outside shops manufacturing the disc phonograph motors.

"As to records, we are not badly crippled and believe we shall be able to ship a monthly list January 1, and be in good shape thereafter.

"All orders on file are hereby cancelled. Do not ship to Orange any records, repair work or any material until you are advised we are ready to receive it.

"Shipments of advance supplemental lists of disc records, either on hand or en route, may be placed on sale immediately.

"Assuring you that we shall work day and night to put things into shape again, we are.

"Yours very truly,
"THOS. A. EDISON, INC."

Some men climb the ladder of success. Others hold it. It's largely a matter of initiative—or the lack of it.

No harvest of success was ever reaped from a sowing of wild oats.

TIMELY BUSINESS POINTERS.

**Employers Taking Counsel with Employes—
The Knocker—Value of Tact to Salesmen—
Importance of the Correspondence Department—
Some Practical Suggestions.**

Invariably in a large concern we will find salesmen bright enough to sell goods and smart enough to meet objections; wise enough when dealing with a hard customer to know when a psychological moment is at hand.

This being the case, don't you think that people bright enough to work for your interest are bright enough to help you make plans? Don't you think you would gain valuable ideas in talking matters over with them?

This does not necessarily mean that you must pass from one employe to another in business hours. That hardly is what one would call a conference, but there should be a stated time, either weekly, monthly or semi-annually, just so that you got the selling force or clerical force, or whatever it may be, together.

Where the proprietor or manager does the "bossing" it is physically impossible for him to come in contact with all customers. Even in shops where the man at the head waits on trade there are only just so many customers that he is able to see personally, when, no doubt, he perhaps gets a few ideas from these customers as to what line of stock his trade would like.

Taking it for granted that he does, it is easily figured what the concentration of effort in this direction would mean. Talks with the selling force would not necessarily be held with the idea of just increasing the trade, but, on the other hand, to discuss general conditions and the merchandise to be handled.

A successful proprietor or manager of to-day is a man who has a keen knowledge of human nature and knows the shortcomings of his men.

Nearly every store has a "knocker." Some employes do not go to the manager with the grievance, but spread discontent by talking of their fancied wrongs to some fellow employe. Consul-

tation meetings or conferences at stated periods will eliminate this "knocking."

Tact should be primarily the essential qualification of all salesmen. It is unwise to depend upon having your merchandise sold by people lacking this virtue.

The salesman who is always polite and personally telling you what you want is one of the worst offenders against tact. He is the one who evidently does not believe you are able to do your own thinking, or the one who insists on selling you the entire stock when your intentions are to make some small purchase.

Salespeople should be tactful, indulgent, active, alert and polite, thoroughly posted on the merchandise they are handling and absolutely loyal to the house. They are the agents who, from the nature of their positions, help the success or the failure of the business in their keeping, as they are in immediate touch with the customer.

If any department is not a paying proposition it is not necessary to wait for inventory day to correct any existing evils. It can be done at once, thus putting the department on a profitable basis and taking no chance of an unprofitable department hindering the growth of the entire business.

Any man's success is due to his ability to organize. If he cannot bring system to bear he is to be likened to a man in a rowboat, not many feet from shore, without any means of propelling it.

The correspondence department is important, as prompt responses must be the keynote of this department. A dilatory answer is the worst form of advertising a house could have. This department requires a thorough knowledge of business principles, as well as high diplomacy and good judgment in their application. Nothing should ever be put in a letter which in any way will reflect on the house. While the letter is intended for one person, we cannot tell how many might chance to see it.

The man who can make the recipient of his letter feel that he is actually taking an interest in the matter in question is a valuable asset to the house.

MAKING PROGRESS IN THE TRADE.

Sonora Phonograph Corporation Adding New Dealers to Its Lists Steadily—The Country Well Covered—Demand Creating Policy Pays—Some Attractive Types of Machines.

The Sonora Phonograph Corporation, 57 Reade street, New York, of which George E. Brightson is president, has met with flattering success under its business policy, closely adhered to, wherein the demand for the products of the company is created before dealers are appointed to meet that demand. The result is that the new dealers have something tangible to work on from the start and are thoroughly appreciative of the company's methods. Several new traveling representatives have been added to the Sonora staff and new dealers are being signed up at frequent intervals and in all sections of the country. Only recently the Sonora Co., of San Francisco, was incorporated in order that the trade on the Pacific Coast might be looked after properly.

The Sonora line ranges in price from \$35 for the "Jewel" model to \$200 for the "Grand." There is also a Sonora at \$40, called the "Jewel Combination"; one at \$50, termed the "Excelsior"; the "Peerless," at \$75; the "Imperial," at \$100; the "Baby Grand," at \$125, while for \$150 two models are offered, the "Elite" and the "Rosary." In addition, the company also markets three special needles, the "Jewel" multi-playing, at \$1; the Sapphire for French records, at \$1, and the diamond-point needle for Edison, at \$5.

Considering the specifications of the Sonora, take the style "Grand," for example. It has a 12-inch turntable, extra heavy double-spring motor, playing half an hour, or ten 10-inch records in one winding. Has a tone modifier, sapphire needle, diamond needle and multi-playing needle, this equipment being all that is required to play all makes of disc records. Has automatic starter and stopper. Trimmings gold-plated. Envelope filing system has capacity for holding 160 records.

In the company's advertisement on the back cover of the World this month are illustrated four of the popular models, with their specifications.

Going back to the selling policy of the company, it is interesting to note that exclusive territory goes with each accepted agency, the purpose of this being to permit the dealer to reap all the profits that he can. This is a feature of sales distribution that is being widely discussed to-day, and this phase of Sonora exploitative work secures ready indorsement.

NEW INCORPORATIONS.

Among the incorporations relating to talking machines filed at Albany the past week were the following:

Union Talking Machine Co., Manhattan, manufacture phonographs, accessories, musical instruments, etc.; \$5,000; Nathan Smith, Marie Zaconick, Ida G. Jakowsky; attorney, H. H. Servis, Rochester.

Artrecord Corporation, publishing reproduction of sound, capital no par value; J. T. Norris, Jr., H. Harold Gumm, H. Von Tilzer, 125 West Forty-third street.

The Master Talking Machine Co. was incorporated in Delaware for the manufacture and sale of talking machines; capital, \$500,000. Incorporators: S. S. Adams, Jr., J. G. Gray, M. B. F. Hawkins, Wilmington.

TRY THIS ON YOUR PHONOGRAPH.

(There is entirely too much "He said" and "She said" in modern fiction, some critic has remarked. We will correct that right away. For example:)

"I'm here," he burred.

"I see," she gloomed.

"I've come for my answer. What is it?" he boomed.

"It's the same," she sniggled.

"Take it back," he replied.

"I want no old answers." "Do without, then." she sighed.

"That WON'T do," he blasted.

"Do you love me?" hissed he.

"I dunno," she sighed, "I've done forgot. See?"

A Merry Christmas and A Happy New Year TO ALL OUR DEALERS

WE SINCERELY TRUST THAT YOUR BUSINESS FOR
DECEMBER WILL BREAK ALL RECORDS AND THAT
IT WILL FOLLOW YOU INTO 1915.

WE HAVE ENDEAVORED TO KEEP YOUR WANTS
SUPPLIED DURING THE RUSH, AND APPRECIATE
YOUR CO-OPERATION IN MAKING THIS THE BIGGEST
YEAR IN OUR HISTORY.

BROOKLYN, N. Y.

CONVINCING ARGUMENT FOR HIGH CLASS RECORDS.

A "Telephone Conversation" from the "Voice of the Victor" That Served to Give a Doubtful Dealer New Ideas to Think About Regarding the Featuring of the Better Class of Records and Their Profit-Making Possibilities—Value of Quality Goods.

The demand for high-class talking machine records is growing apace throughout the country despite the immense demand for the more popular song and dance numbers of the day. Dealers should make it a point in the development of their record business to emphasize the importance of every purchaser having a number of standard songs and instrumental numbers in their record libraries. It serves the good purpose of widening musical appreciation—a field in which the talking machine has played and is playing a most important part in this country.

A rather suggestive "telephone talk" was that which appeared recently in "The Voice of the Victor," in which the editor tells of a three-minute chat with a dealer who became a better one as the result of this rapid-fire interview. The talk follows:

(Voice over the 'phone) Hello—hello! This THE VOICE OF THE VICTOR?

Yes. Who is it?

A. Victor Dealer.

Oh, yes, Mr. Dealer. What can I do for you?

Say, give me the dope on this high-brow stuff, will you?

Gladly, if you will tell me what your difficulty is.

Well, it's this way. I can't see this classical music when there's twice as much demand for the popular.

Now look here, old man, you can't see the back of your head, for that matter, but it's there, and it serves a very good purpose.

Quit your kidding, now—I'm asking for information!

FOR SALE

5,000 brand new 10-inch discs, English songs and musical selections. Must be sold at once, 10c. each. Berliner Phonograph Co., 140 East Fourth street, New York.

VICTOR BUSINESS FOR SALE

Retail Victor store with sporting goods in connection in Greater New York. Exclusive large wealthy territory. Annual sales about \$25,000 and steadily increasing. About \$9,000 required. Good reason for selling. Address Box 44, Talking Machine World, 373 Fourth avenue, New York.

WANTED—POSITION

Position wanted as manager of wholesale talking machine department; 15 years' experience. Would take charge from buying to shipping. All around worker. Am also expert repairer of machines. Correspondence invited first instance. Address, Box 300, Talking Machine World, 373 Fourth avenue, New York.

WILL BUY

Job lot of talking machine records. Also second-hand and shop-worn records purchased. Address Talking Machine Exchange, 66 Halsey street, Newark, N. J.

FOR SALE

5,000 single-face, 10-inch Columbia disc records, guaranteed brand new; price, 9c. each. A bargain for a wise buyer. Deninger Cycle Co., Rochester, N. Y.

WANTED

To exchange \$2,000 clean jewelry stock for phonograph stock, Edison, Victor or Columbia. Address W. M. Lefavor, Avalon, Cal.

Well, I'll give it to you, but I admit I'm a little touchy on this subject.

That's all right, old sport, but here's the idea: "Too Much Mustard" is a fifty-to-one shot with me as compared with the Prologue from Pagliacci.

Now, you're exaggerating, and you know it!

Well, a little, maybe; but you know what I mean.

I hope to thunder you don't mean what you say, because it's sheer craziness.

Well, all right, but WHY is it?

My dear man, if you were in the dry goods business would you refuse to stock silk because most of the trade ran to calico?

No, of course not; but that's different!

It isn't—it's the very same thing. Better-class goods seldom have as big a demand, bulk for bulk, as the cheaper ones, but they have to be carried in stock. A department store, or any other store for that matter, that was unable to supply quality goods would be recognized at once as a "cheap" house. Do you want that reputation?

Don't get fresh, now. I can see all that plainly enough, but you haven't answered my question yet. I'm in business to make money!

You are? Then you are going the wrong way about it!

Can't see it. Can't see it with a spyglass. You admit that better-class goods don't have as big a demand in any line, don't you?

Yes, I've just said so.

Then you say that the better-class goods have to be carried in stock. Now what I want to know is, WHY?

The answer is: Because you'll never build up a big, a profitable and a solid business except on quality goods.

How do you figure that out?

The man who simply uses a Victrola for a moment's pleasure is essentially a "transient" customer. For such people any band, any singer, indeed, any machine will do.

So you think—

I don't think, I KNOW. The man who likes music—if he's given a chance—soon gets to liking good music. The man who likes good music soon gets over the "liking" stage. He gets "nutty" over it. He wants music, and more music. He wants it by the best singers available. He is no longer content just to listen, but he begins to observe just how this, that and the other artist gets his or her effects. Now which type of man is going to help you build up a steady business?

Well, I guess there's something in that, all right.

Of course there is. There are lots of people who like to sit and listen to music, just as they like to sit in a hot bath, but if you don't help them to get beyond that point you won't be able to consider them steady customers for very long.

Say, hold on; hold on! Enough's enough! I quit. Call me a boob if you want to.

Get out, old man. I know you too well. Come out and play a game of golf with me on Saturday. Your "batting eye" is off color, that's all that's the matter with you.

Well, I guess you're right, all right. Got anything particular to suggest?

Of course, but you'll have to tell me just where you get stuck—only tell me some other time.

Busy, I suppose?

Yes, very.

Well, don't blame me. I haven't said a word and you've nearly talked the arm off me; however, I don't hold a grudge long, so here goes.

JOINS EDISON SALES FORCE.

George Chittenden Turner has recently joined the Edison sales force to represent the Edison phonograph products. For the present Mr. Turner will devote himself to Edison interests in New York and Brooklyn.

AEOLIAN-VOCALION ANNOUNCED.

Latest Product, a New Type of Talking Machine, Put on the Market by the Aeolian Co., the Prominent Piano Manufacturers and Retailers—Some Interesting Features of the New Line of Instruments.

The following interesting announcement was mailed recently by the Aeolian Co. the piano manufacturers of New York, to its stockholders:

ANNOUNCEMENT TO STOCKHOLDERS.

"Monday, November 23, will mark the opening of the Vocalion department at Aeolian Hall. This should be an event of the greatest interest to every stockholder, for the Aeolian-Vocalion is a new departure, and its introduction to the public opens a new epoch in Aeolian development.

"The executive officers of the company sincerely hope that the stockholders will make themselves familiar with this remarkable new musical instrument which they have had a share in giving to the world, and that they may employ their every influence to aid the management in making the Aeolian-Vocalion the greatest success in the history of the company.

"It is suggested that the opening day affords an opportune occasion for a visit to the Vocalion department, and to become acquainted with the newest and most wonderful phonograph.

"THE AEOLIAN CO."

This brief announcement was the first official intimation on the part of the Aeolian organization that the company was preparing to enter in a large way upon the manufacture of phonographs, or Aeolian-Vocalions, as the new type of instrument will be called.

Those responding to the invitation found awaiting them a line of phonographs in mahogany cases ranging in price from \$90 to \$375. There were various features about the new instruments that attracted attention, but probably the one that drew the greatest interest was the Graduola. This is a device built into the fundamental mechanism of each Aeolian-Vocalion, by means of which the volume of tone may be kept entirely under the control of the listener, if he so desires. To operate the Graduola there is a flexible control tipped with a valve. This permits the listener to sit some distance away from the instrument while he decreases or amplifies the volume of tone to suit his own interpretation of the selection being played.

The Aeolian Co. owns the Graduola patents, having purchased them nearly two years ago from the Australian inventor—F. J. Empson.

Although the Graduola is perhaps the most striking innovation in the new line, there is bound to be much interest in the tonal qualities of the Aeolian-Vocalion. The company states that experimentation looking to a perfect type of phonograph has been under way in its laboratories and factories for over two years. Elaborate investigations have been made in connection with sound box, tone-arm and horn, and several important discoveries have been incorporated in the new instruments. In the opinion of the Aeolian Co. a

distinctive type of phonograph has been produced in the Aeolian-Vocalion.

There will be a public announcement made later in reference to these new features, the company contenting itself at present with a general announcement as outlined in its invitation to the stockholders.

The various types of instruments now being exhibited are only a small part of the full line in process of development. No attempt will be made until later to supply the company's agencies over the country, although instruments are being sold to stockholders and some of the New York City customers.

COLUMBIA MANAGERIAL CHANGES.

R. F. Bolton Becomes District Manager for New York City and Upper Part of State—S. H. Nichols' Important Territory—I. F. Bradt Joins Executive Staff.

The Columbia Graphophone Co. announced last week a number of promotions and appointments in its executive and managerial staff, which supplement the appointment of John A. B. Cromelin to the office of general manager of the company.

R. F. Bolton, manager of the Columbia Co.'s wholesale headquarters at 89 Chambers street, New York, and connected with the company for many years, has been appointed district manager of New York territory, including the Buffalo and Rochester district. Seth H. Nichols, manager of the Pittsburgh wholesale headquarters of the Columbia Co., has also been appointed district manager, his territory to include Cincinnati, Cleveland and Toledo in addition to his present territory. James P. Bradt, who at one time held important managerial posts with the Columbia Co., having been manager of the Canadian business and London and Berlin manager, has joined the executive offices of the company, to perform special duties.

THE CRESCENT TALKING MACHINE

One of the Latest Additions to the Lines of Machines Now on the Market, Makes Excellent Impression—One of the Popular Styles.

One of the latest talking machines to be presented to the trade of this country is the "Crescent" talking machine, manufactured by the Crescent Talking Machine Co., Inc., 99 Chambers St., New York. The style illustrated herewith is known as model No. 10, the retail price of which is \$40, exclusive of the albums. Dimensions are: height, 36 inches; width, 16 inches, and depth, 16 inches. Furnished with or without diamond point.

Since its introduction, the officers of the company report that a number of agencies have been placed about the country, the latter being continually increasing as a result of the distributive work that is going on.

Among the selling arguments advanced are the following special features, which are taken direct from the literature issued by the Crescent Co. "Crescent machines are equipped with an improved tone-arm, with friction reduced to a minimum, and

contain other novel features, among them being the 'universal tube,' which makes it possible to change from steel needle to diamond point record by a mere turn of the sound box. The Crescent will play any type of record, including those for diamond or sapphire point. A portion of the front of the cabinet, hinging outward, forms a prolongation for the horn, throws the sound upward—to hearing height—and leaves an unimpeded passage for the sound. When closed, it protects the interior from dust and leaves an ornamental, useful table, when not in operation as a phonograph."

Materials for the manufacture of the cabinets are

Model No. 10.

carefully selected and the finish of the cabinet is considered to be of high quality. The motor is produced under specifications from the Crescent Co., and is made specifically for this model. Other types quite as attractive at their respective price list at \$12.50, \$15, \$150 and \$200.

The Columbia Co. has closed arrangements with the May Furniture Co., Columbus, O., whereby this house will handle the complete Columbia line and give it forceful representation in this important territory.

The Riggins Piano Co., well-known throughout southern New Jersey as a representative piano house, with headquarters at Bridgeton, has recently taken on the Edison disc line.

TO VICTOR AND COLUMBIA DEALERS

THE PERFECTION "BALL BEARING" ATTACHMENT
Plays lateral cut records on the EDISON DISC MACHINE

Do you want to sell records to owners of EDISON DIAMOND DISC MACHINES? If you do, carry our "PERFECTION" attachment in stock.

EDISON DISC MACHINE owners will be coming to you every day asking you if the records you sell can be played on their machines. If you carry our attachments in stock you not only have a chance to sell them, but you also have a chance to make record sales and add a new name to your record mailing list.

We can also furnish you with a reproducer which is fitted to our attachment. Price of sample attachment, \$2.50 in gold, nickel, or bronze finish. With reproducer any finish \$4.75. Cash or check must accompany each order for sample. We will quote you quantity price on cash or credit basis on request.

EVERY PHONOGRAPH DEALER IN THE UNITED STATES AND CANADA SHOULD STOCK THIS ATTACHMENT.

If you are interested write to us and we shall be pleased to give you our view of its present and future value.

NEW ENGLAND TALKING MACHINE CO.
132 Boylston Street
BOSTON, MASS.

If you will make careful comparison you will find that the length of Columbia prices will bring you closer to more varieties of profit than any other line on the market.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

CO-OPERATION WITH THE DEALER.

The Jobber Who Desires to Win Success Must Adopt This Policy, Says Wm. W. Gibson, Manager of the McKee Surgical Instrument Co., in Discussing the Entrance of His House Into the Talking Machine Field.

William Wilson Gibson, manager of the Baltimore, Md., headquarters of the McKee Surgical Instrument Co., Washington, D. C., and Baltimore, Edison disc and cylinder jobbers, in a recent issue of the Edison Phonograph Monthly, tells of the entrance of his house in the phonograph business, and gives some fundamental rules for the success of a jobber. He said in part:

"If a jobber is to be successful, he must learn to co-operate with every dealer who buys from him. After all is said and done, if the spirit of helpfulness does not exist between jobber and dealer, there is no hope of real success on either side.

"First of all a jobber must be thoroughly familiar with his line. He must be able to answer any question that a dealer may ask. If the jobber can truly be an 'information bureau,' he will not only help his dealers, but also himself, as the dealers will want to patronize the one who can render them the best service.

"Again, a jobber must be up to the minute in every particular as regards new records, new equipment, advertising, literature, etc.; must keep his dealers supplied with all available helps that he can. In order that this may work satisfactorily, dealers must make their wants known from time to time.

"In the third place, a jobber must carry a complete stock of everything pertaining to his line. There must not be any delays in filling orders, if the jobber would hold his customers' trade. If a dealer wants a certain record or part, he wants it bad, and if his jobber cannot send it out the day he receives his dealer's order, that jobber cannot hope to retain the dealer's good will.

"Again, a jobber must be full of original ideas for increasing the trade of his dealers. He must give suggestions for increased retail sales if he wants his own wholesale business to grow.

"The jobber is the connecting link between the manufacturer and the dealer. He is a very necessary adjunct to the success of the business, as no manufacturers could begin to keep in touch with every dealer located in all corners of this vast country. As long as our line of business lasts there must be jobbers, and as long as these jobbers act honorably with their dealers, so long will they remain in business.

"There is one way in which a dealer must help his jobber, and that is by paying all of his debts promptly. It costs a great deal for a jobber to carry a large and complete stock, and if the dealers won't pay, either one or the other will have to suffer."

INCREASES CAPITAL STOCK.

The Scott Automatic Phonograph Co., Los Angeles, Cal., has increased its capital stock from \$100,000 to \$1,000,000.

ARTIST PRAISES ARTIST.

Maud Powell Praises Kreisler's Recital of Wieniawski's Famous "Légende."

Maud Powell had a most important article in the October Etude, analyzing Wieniawski's famous "Légende." In her preliminary remarks she touches on the subject of tempo rubato, saying, among other things of exceeding interest to teachers and students:

"Let every violin student listen to Kreisler's sound reproducing machine record of the Bach E major Gavotte if he wants to learn what playing in time is. As for rhythm there is no better example extant. I may say right here that Kreisler is our greatest violinist for refined delicate artistry, exquisite and precious, and yet Kreisler in some of his best interpretations scarcely deviates from the tempo except in the subtlest manner possible. The elasticity of Ysaye's tempo and the master's sentimentalizing of the melodic line (rhythmically), while justifiable in Ysaye, the mighty, are not the best models for the student. Elman also is an un-

safe model for the inexperienced to follow, inasmuch as too much emotionalism will inevitably swamp the technically inadequate student. We are young in this country, very young, artistically, so that in our artistic beginnings we must copy those models which have the seal of severe test. There is a chastity combined with exuberant health that one must seek in art as well as in life."

VICTOR NUMERICAL CATALOG.

The Victor Talking Machine Co. sent out to its dealers last week the annual numerical catalog of Victor records. This catalog is similar to previous editions of this important publication, containing extra pages for pasting in the new records issued every month, together with a page of valuable suggestions on how to keep track of record stock.

Many a man's ship never "came in" because it was submarined by an overlooked opportunity.

It's the man with the single-track mind who has collisions with mistaken trains of thought.

READ = WHAT THE TALKING MACHINE WORLD SAYS ABOUT THE "OGDEN" SECTIONAL RECORD AND FILING SYSTEM

SECTIONAL RECORD CABINETS.
Ogden System of Record Filing Proves Most Convenient for Dealers—Cabinets That Grow as Needed—Signal System That Makes It Easy to Find Records—Other Advantages.

A talking machine accessory that is continually making new friends among talking machine dealers is the "Ogden" sectional record cabinet, made and marketed by J. B. Ogden, Lynchburg, Va. One of the chief advantages of the Ogden filing system is the fact that, being built on the order of the sectional bookcases that have long been familiar to the public, it has all the advantages of those pieces of furniture combined with a number of original features for this particular trade. The original idea attracts owing to the fact that, as the record library grows, it is possible to add sections after section without having waste cabinet space in evidence or several records placed about the room. The cabinets are supplied with special top and bottom parts, and from one to four or more sections may be added at will, without having the effect of being a single and complete piece of furniture.

A special feature of the Ogden cabinets that appeals particularly original in character, and which makes it a simple matter to find any desired record in a few seconds. A drawer in the base of the cabinet is also equipped with an automatic reordering system that serves to aid the dealer materially in keeping his stock up to date. There are many other features of the Ogden sectional record filing cabinet worth knowing about.

THE TALKING MACHINE COMPANY
12 North Michigan Avenue Chicago, Illinois

FROM OUR CHICAGO HEADQUARTERS

E. P. VAN HARLINGEN, Manager
HENRY S. KINGWILL, Associate

World Office
Consumers' Bldg. 220 South State St., Chicago
Telephone: Wabash 5774

(Special to The Talking Machine World.)

CHICAGO, ILL., December 11.—The talking machine trade of Chicago and the Middle West is doing what can safely be said to be the very best Christmas season in history, and this despite the general depression that exists in so many other lines of business.

This optimism exists in a greater degree in the smaller communities, where the industrial depression is more psychological than in the big cities. Speaking generally, the main difficulty seems to lie in the difficulty of securing machines, all jobbers reporting a big deficiency and an especial shortage in instruments priced around \$100. The public seems to have been impressed with the work of the manufacturers on machines at this price and almost every dealer has calls for these machines, and is, unfortunately, unable to supply them.

Some excellent advertising has been done by the large manufacturers, both Edison and Columbia being prominently exploited early in the season and a big Victor campaign being carried on at the present time.

Dance at the Edison Shop.

One of the most novel dancing exhibitions that has yet been given was presented this week at the warerooms of the Phonograph Co., the local Edison dealers and distributors. The dancers were Miss Edna Neill and Mr. Farnsworth Frick, who demonstrated the new and very popular step known as the "Rouli-Rouli." The crowd in attendance was a very large one, according to General Manager C. E. Goodwin, and the receipts on the day's sales were likewise very big.

In this connection Mr. Goodwin made the statement that present indications pointed to a Christmas season at least twice as good as that of last year. Mr. Goodwin adds further that despite the disastrous fire at the factory the stock is sufficient to last, as a very generous supply was received some time ago in Chicago.

Some of the Good Sellers.

The five most popular selling records of the Edison library this month appear to be a violin number, "Ave Maria," as played by Carl Flesch; "Toreador Song" from "Carmen," sung by Thomas Chalmers; "I'll Take You Home Again, Kathleen," tenor solo by Van Brunst; "Dixie Medley," a banjo number, and "It's a Long, Long Way to Tipperary."

Five Columbia records that are selling well are "Cohen on the 'Phone," "It's a Long, Long Way to Tipperary," "Dreamy Chinatown," "Ballin' the Jack" and "When It's Night Time Down in Burgundy."

Of the Victor records five of those that are in demand, together with selections on the reverse side, are "Whispering Hope," "Stille Nacht, Heilige Nacht," "Little Gray Home in the West," "Tipperary" and "Cecile."

Enlarge Lyon & Healy Office.

The wholesale rooms of the talking machine department of Lyon & Healy's have been considerably enlarged and a new private office has been built for Manager L. C. Wiswell in a location adjacent to the retail record department. Mr. Wiswell reports an exceptionally heavy volume of business. There has also been a large volume of Christmas business already transacted in the retail machine department. This has necessitated the additional help of several new salespeople, including H. B. Barnes.

D. C. Preston at New Post.

D. C. Preston, formerly representative of the Talking Machine Co. in Wisconsin and Iowa, has been selected as manager of the Victor department of the L. S. Donaldson Co., of Minneapolis. The opening of this new section of the big Minneapolis institution was featured by a dancing exhibition by Miss Helen Maxwell and Kenneth McKenzie, who came from Chicago for the occasion. The dances were given in the Tea Room adjoining the Victor department and were very well received by a large crowd of people. Mr. Preston was assisted in the opening by G. P. Ellis, of the Talking Machine Co., of Chicago.

Mr. Preston will be succeeded in the Talking Machine Co. by A. M. Lockridge, an experienced salesman, who has been spending considerable time in going through the instruction course, which consists of a period of time spent in the repair department, stock rooms, sales department and the sales floor.

Some Excellent Sales Supplements.

The Talking Machine Co. this year followed its regular custom of supplying its patrons with a number of supplementary sales ideas in anticipation of the Christmas season. Among them were a "\$10 gift list," a "\$25 gift list" and a complete "Christmas record list." The Christmas boxes are

covered with holly and poinsettia decorated paper and other articles designed to stimulate Christmas sales.

Sales Manager Roy J. Keith has received a generous response to this outlay of sales literature and says that the dealers have shown every sign of appreciating them.

Visited the Victor Plant.

Fred Siemon, manager of the talking machine department of the Chicago house of Wurlitzer, was one of the visitors to the Victor plant at Camden recently. Mr. Siemon reports that while he was there the factory was working both day and night shifts.

Attractive Wurlitzer Window.

Ellis B. Hansen, of the Wurlitzer Co., has been showing an especially attractive talking machine window recently. The window contained a miniature opera house with a stage reproduced in detail. The curtain rose and fell automatically upon well-known scenes from several different operas. The staging and lighting effects were especially good and a large crowd was in constant attendance before the unique display.

Geo. P. Bent Co. Opening.

The opening of the remodeled retail department of the George P. Bent Co. was held Saturday, December 12. The reconstructed warerooms have been very beautifully designed and finished and form one of the most attractive institutions of its kind in Chicago. The Cheney and Victor lines were prominently displayed and received much exploitation. The following is an extract from the newspaper announcement:

"We are proud of the new setting of this department, because its facilities, its appointments and its scope are such as to make 'shopping' a genuine pleasure to our many patrons and to the great Chicago public. * * * Not only have we provided every convenience for the quiet and refined demonstration of machines and records—not only do we carry one of the largest and most complete stocks in the city, but we have also a courteous and efficient sales organization. Here the counsel of salespeople, who are well versed in the mechanical construction of talking machines as well as in the repertoire of the Victrola, is at your free and unlimited command. We will celebrate the opening of these new ground floor quarters tomorrow with a genuine "house-warming," to which you are cordially invited. There will be tea and flowers, as well as an enjoyable series of select

(Continued on page 37.)

THE WADE—THE PRACTICAL—THE WADE Fibre Needle Cutter

The WADE embodies the right principle, worked out through long experience. It is simple, durable and accurate. It trims the needle at an angle resulting in the best tone. The WADE cutters are made of the best steel and are absolutely guaranteed.

The Wade
Fibre
Needle
Cutter No. 2

The WADE has a self-acting stop, which prevents waste and enables one to get from 12 to 15 perfect playing points. No. 2 has a double action, from one fibre needle, making it especially easy to operate. No. 1 is a very popular cutter which has given excellent service. You save more than double the price of the Wade in the re-pointing of the first 50c. worth of needles.

concerts, for our to-morrow's guests. A. W. Kaney and Miss Claudia Dana, direct from Castle House, have been secured especially for this occasion and will demonstrate the latest dances in the concert room from 1 to 4 in the afternoon. Come!

Retail Manager Otto Schnering has provided a generous stock of machines and records and expects to do a big business. Edwin V. Zeddies managed the dancing exhibition.

Rintelman Needle Introduced.

A. S. Rintelman, head of the Rintelman Piano Co., of Chicago, has formally introduced and is pushing vigorously the new "3-point A. R." needle. The needle is similar in shape to a fiber needle, its sides being concave and affording three points at each of its ends. The material is said to be a mineral product having almost the same degree of hardness as the diamond. Its toughness and elasticity, due to the composite material within it, affords what is said to be perfect transmission. It will withstand the various changes of temperature without expanding or warping, therefore transmission is the same at all times. It is claimed that the needle is practically permanent and that its retail price of \$2.50 is easily secured from those to whom it is demonstrated. Mr. Rintelman says that there is a very generous discount to dealers on this product.

Storage Cabinets in Demand.

An interesting phase of the accessory side of the talking machine business is shown in a recent statement of John F. Mortenson, manager of the Salter Manufacturing Co.

Mr. Mortenson said: "We have received an unusually large number of orders for our storage cabinets, showing that dealers are making early preparations to go after 'after Christmas business,' as January is always a good month for records, and lack of storage room on the part of machine owners generally makes itself manifest at this time. Business generally appears to be very excellent, as we are receiving immense orders and having great difficulty in keeping pace with them. Our Edison cabinets for the smaller Edison machines are proving especially popular and we are getting a big call for them. Cabinets for the Victor No. 9 machines and Columbia 'Favorites' also continue to be good."

Fibre Needle Cutter Sales.

S. O. Wade, head of the Wade & Wade Co., manufacturer of fiber needle cutters, says that the immensity of this year's Christmas trade is shown in the unprecedented business which the Wade cutter is enjoying. "Despite the fact that our dealers heeded our warning and ordered their stock early, we nevertheless are swamped with orders and are working at our best pace to keep up with the demand."

Personals and Visitors.

Mr. and Mrs. Miles, of the Miles Piano Co., Streator, Ill.; J. F. Korn, of the Korn Piano Co., Michigan City, Ind.; Mr. Randolph, of Egerman & Randolph; E. D. Allington, Freeport, Ill.; E. Burkhart, St. Joe, Mich.; E. L. Burr, of Burr Bros., Rockford, Ill.; E. T. Anderson, of Rock Island, Ill., were all recent visitors to the local trade.

L. V. B. Ridgway, Lyon & Healy's Pacific Coast traveler, is spending a few days in Chicago.

A. D. Geissler and wife were recent prominent visitors to the local trade.

L. C. Wiswell, manager of the talking machine department of Lyon & Healy's, announces that he has not yet selected a successor to the position of manager of the retail record department, which was recently vacated by M. M. Blackman.

Roy J. Keith, sales manager of the Talking Machine Co., spent some days in recent trips to Cincinnati and Minneapolis.

Griffith P. Ellis, of the Talking Machine Co., is the daddy of a new baby girl, born November 30. Her real name is Martha Virginia, but because of her loud, clear tones she is commonly known as Victoria, Jr.

Mr. Jackson, of the Talking Machine Shop of Rockford, Ill., and Arch. Olds, of the Clay Pool Music Co., of Crawfordsville, Ind., were recent visitors to the local trade.

Other recent visitors to the local trade included Mr. Milliken, of the Milliken-White Studios, Bay City, Mich.; H. J. Power, of the Taylor Carpet Co., Indianapolis; Albert J. Rice, Lafayette, Ind.; Nick Wirth, Escanaba, Mich.; R. R. Smallfield, Davenport, Ia.; Mr. Weller, of the Red Cross Drug Co., Centerville, Ia.; Edward Druckner, Dyersville, Ill.; Mr. Sutton, of Sutton & Briggs, Clinton, Ind.; Mr. Goodwin, of Goodwin & Co., Monticello, Ind.; W. A. Bryan, of W. A. Bryan & Co., Monticello, Ind.; C. A. Richardson, of Richardson, Ill., and A. G. Kunde, Milwaukee, Wis.

Lyon & Healy's Mammoth Electric Sign.

An electric sign that is one of the largest in the city has been in operation to advertise the goods of Lyon & Healy, manufacturers and dealers in musical instruments. Measuring 68 feet wide and 40 feet deep and carrying approximately 4,000 5-watt and 10-watt tungsten lamps, this sign stands at the corner of Park Row and Michigan avenue, within full view of persons on the latter street for about 1.5 miles. The steel work supporting the

Graphophone Co., tells The Talking Machine World that the last thirty days have broken all business records in history.

"The main difficulty lies in supplying machines," said Mr. Baer. "We are always able to supply records, but we have been completely swamped in the matter of supplying the instruments themselves. The demand of the Mignonette and the Leader models which are fitted with record ejectors, has been particularly heavy.

W. C. Fuhri, district manager of the Columbia Graphophone Co., returned recently from the East and says that while at Bridgeport he saw the factory working at its full capacity, with day and night shifts working every minute of the twenty-four hours.

A few of the new Columbia dealers in this territory are: Charles T. Hess, Elmhurst, Ill.; L. L. Hutton, Gibson City, Ind.; Vincent Quarten, Lake Forest, Ill.; Block & Cool, Peoria, Ill.; F. L. Dixon, Rock Valley, Ia.; Emerson & Hiltbrunner, Cedar Rapids, Ia.; W. J. Massey, Des Moines, Ia.; C. A.

Lyon & Healy's Immense Electric Sign in Chicago.

sign on the buildings at this corner weighs 23 tons.

The border of the sign simulates a lyre within which a Confederate and a Northern soldier are marching at each side, one with a drum and one with a horn. Out of the horn the words, "Marching Fifty Years" are blown by the soldier, this expression being appropriate since the firm has been in business for fifty years. In addition to these flashing words, there is a changeable-letter feature within the sign to allow different departments or the company's business to be exploited.

Pathé Jobber Faring Well.

A. J. O'Neill, of the O'Neill-James Co., announces that his firm, which has secured the local jobbing of the Pathé talking machine, is doing a most satisfactory business and that several substantial dealers have recently taken on the Pathé line. In each case these agents are old established talking machine men who have been much impressed with Pathé possibilities.

The offices of the O'Neill-James Co., in the Hunter building, are to be remodeled and provision made for a demonstration room as well as a display room, in which the entire line of Pathé machines and records will be shown.

Mr. O'Neill's company is distributing considerable advertising matter in the form of catalogs and special folders exploitive of dance records and of favorite operatic selections.

First Dividend Distributed.

The first dividend of 5 per cent. has been declared in the case of the Indiana Music Co., of Terre Haute, Ind., which encountered financial difficulties about the middle of last year. Lane Robertson was head of the concern.

Good Columbia Business.

C. F. Baer, local manager of the Columbia

Electric Sign in Chicago.

Ibblings, Waterloo, Ia.; Sutton & Briggs, Clinton, Ind.; Frederickson Piano Co., Oshkosh, Wis., and Fisher Bros., Appleton, Wis.

It was also announced at the Columbia office that another hit had been scored when the entire Columbia line had been taken on by the retail stores of the Cable Piano Co., in Detroit, Grand Rapids, Battle Creek, Lansing and Jackson, Mich.

Harry Bent Leaves for the Coast.

C. H. ("Harry") Bent leaves for the Pacific Coast Saturday night. Mr. Bent will go first to Coronado Beach, where he will enjoy a complete rest and will later proceed to Los Angeles, where he will make preliminary arrangements for the Cheney talking machine. Mr. Bent is very enthusiastic over the product which is to represent and over the territory in which his work will be. A host of friends in the trade wish Mr. Bent all success in his new undertaking.

Talking Picture Company Incorporated.

The Comer Talking Motion Picture Co. of Chicago has been incorporated for \$10,000 to manufacture, lease, operate and deal in sound-reproducing apparatus, motion picture projectors and films. John J. Comer, Frank Mayer and Guy Van Schoick are the incorporators.

Buys the "Healy Strad."

John McCormack, the celebrated Irish tenor, whose records are so popular in the talking machine trade, has just purchased from Lyon & Healy the famous "Healy Strad" for \$10,500, and Paganini's favorite bow, declared by experts to be the finest in America, for \$500. McCormack, in addition to being one of the world's opera stars, is said to be an accomplished violinist. The "Healy Strad" was made by Stradivarius in 1711, and is considered one of his prize instruments.

MUST BEAR REVENUE STAMP.

War Tax Law Affects Lading Bills and Manifests—Must Be Supplied by Shippers.

On and after Tuesday, December 1, every manifest, bill of lading or evidence of receipt for shipment on a railroad, whether in bulk or in package, must bear an internal revenue stamp, one cent in value, furnished by the shipper.

This is in accordance with the provisions of the War Tax law. The Pennsylvania railroad, in addition to sending instructions to its agents regarding the law's requirements, will endeavor to keep them supplied with stamps, though shippers are requested, where possible, to buy their supplies at the post-offices.

Some idea of the task it will be for the road to supply stamps may be gained from the fact that the road issues 50,000 bills of lading a day.

FLOAT USED IN STREET CARNIVAL.

The advertising department of the Columbia Graphophone Co. received recently from its enterprising dealer in Shelburne Falls, Mass., I. W.

Booker's Columbia Display.

Booker, the photograph shown herewith, depicting a float used by Mr. Booker in a street carnival held in that city.

On the back of the wagon is featured a Columbia "Jewel" machine, and proper band records were played during the demonstration. The Columbia muslin sign covered the whole back of the wagon and both sides of the display. The children shown on the float are Mr. Booker's wide-awake youngsters, who, to all appearances, enjoy immensely the musical qualities of the Columbia "Jewel."

CAUSES FAVORABLE COMMENT.

A Buffalo paper recently contained the following notice: "The return engagement of Reid and Ross, the clever dancers who made such a hit at the Fall Fashion Festival, caused a great deal of favorable comment, and a goodly crowd was on hand to welcome them at the J. N. Adams store. This week Reid and Ross are dancing in the Victrola department, fifth floor, on a specially constructed floor. More than one thousand people saw the dancing yesterday. In addition to dancing, Miss Ross will demonstrate the new dansant frocks that made such an impression at the Fashion Festival. It was news to a great many people that the Victrola could be so effectively used for dancing.

BOOKED SOME GOOD ORDERS.

Philip Ravis, vice-president of the New York Album & Card Co., 25 Lispenard street, New York, manufacturer of record and photographic albums returned this week from an extensive trip through various sections of the country. Mr. Ravis states that general business conditions are steadily growing better, and that dealers are closing an excellent trade with record albums. The most important phase of Mr. Ravis' trip was the large orders he received for the company's photographic albums, which many talking machine dealers are featuring for their holiday trade with gratifying success.

NO LONGER CONNECTED.

The Union Specialty & Plating Co., of Cleveland, O., announces that H. B. McNulty is no longer connected with that company in any capacity.

If you can't be optimistic don't be pessimistic.

HOLD EDUCATION RECEPTION.

Early Music House, Fort Dodge, Iowa, Hold Third Annual Reception for School Teachers for the Purpose of Creating New Interest in Talking Machines for Schools—Rewarded by Large Attendance—Good Musical Program.

(Special to The Talking Machine World.)

FORT DODGE, IOWA, December 3.—The Early Music House, this city, prominent and successful Victor and Edison dealers, recently held its third annual musical education reception for the school teachers of the city, and the interest aroused by the event was indicated by the large attendance. The reception was held in the evening to permit of the teachers attending without interfering with their regular work, and 135 in all took advantage of the opportunity to hear the latest in musical education helps.

During the reception discussions regarding music in the schools were encouraged, and a discussion on musical expression was particularly interesting, taking the form principally of a debate between the private music teacher and the public school teacher, the general thought being that in time instrumental music would be made a part of the school course, and given a major instead of a minor place.

Through the efforts of the Early Music House the schools in Fort Dodge and vicinity are well supplied with talking machines and records, which is a decided mark of progress in a city where, less than five years ago, there was no supervisor of music.

The formal program laid down by the Early Music House showed much thought and care in its arrangement and should serve as an example for other concerns that are going after the school trade. The program follows:

1. Educational records, Victrola, Edison disc, with explanation by Mr. George L. Bunt. 2. Folk dances, Miss Virginia Lewis and class from Y. W. C. A. 3. Discussion, "Music as an Expression of Mental Activity"; in the home—Mrs. Jeannie Ringland Smeltzer, Fort Dodge Piano School; in education—W. H. Blakely, Principal High School; in gymnastics—C. E. Daubert, Physical Director Y. M. C. A.; in society—Mrs. Elizabeth Carmichael, Supervisor of Music, Fort Dodge Schools. 4. Questions and Answers. 5. Refreshments. Hostesses, Mrs. R. W. Hale, Miss Celia Peters, Miss Mae Connel, Miss Frances Woods, Miss Ida Wiker.

Worst thing about killing time is that most everybody wants to go into some other fellow's game preserve to do it.

To every man who does things there are many who content themselves with telling about what should be done.

Even when they try to rest on their laurels some people are troubled with insomnia.

The man who loses his temper doesn't have to advertise a reward for it.

Much of the success in getting anywhere lies in knowing which road to take.

For Christmas

AND AFTER

Why not push Cabinets where machines have been sold?

The Geo. A. Long Cabinet Co.
Hanover, Pa.

Address Clement Beecroft, Sales Manager
309 W. Susquehanna Avenue, Philadelphia

The dealer who carries Columbia product knows that he has one grade of Quality all the time, and also he has the comforting knowledge that he has something to match up pretty well with every pocket that is brought into his store.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

CREATOR OF THE LANSING COVER.

Something of the Popular Bostonian and His Achievement, the Khaki Moving Cover for Talking Machines—Building Up Big Trade.

E. H. Lansing, 611 Washington street, Boston, Mass., is the inventor of the Lansing khaki moving cover for talking machines, which is a covering made of the proper size to fit the various machines, the cover being made of Government khaki and

E. H. Lansing.

interlined with four layers of heavy felt. Since its introduction to the trade, where it instantly filled a long felt want, there have been numerous repeat orders and he is rapidly building a business of large size.

When asked how he happened to create the Lansing moving cover, Mr. Lansing said: "I noticed that several talking machine dealers were paying out a considerable sum of money every month to repair scratches and damages to talking

machines that were delivered in the regular way. If a cover were used this expense would be eliminated, so I proceeded to create the cover. Goods are now delivered in perfect condition, and the cost of the covers was saved in a short time. A number of dealers all over the country are following the same plan, for it is a policy that is in line with today's efficiency."

Mr. Lansing is also a manufacturer of piano scarfs, as well as being a big jobber in piano stools and benches, and in music rolls, so he is thoroughly familiar with delivery problems in the musical instrument trade and knows how to overcome them.

NEW BILL TO PREVENT FRAUD.

National Association of Credit Men Prepares a Bill to Prevent Fraud in Transfer of Accounts Receivable Secretly.

The National Association of Credit Men has prepared a bill designed to prevent fraud in the transfer of accounts receivable, and will endeavor to have it adopted by the legislatures of the various States.

In explaining the purpose of the bill, J. H. Tregoe, secretary-treasurer of the association, said recently that in recent years there had developed the practice of secretly transferring accounts receivable. Accounts receivable are property in the eyes of the law, though not transferable from hand to hand as negotiable credit instruments. While such transfers are obviously in rare instances made only for legitimate reasons, yet the case with which secret transfers may be made actually encourages dishonesty and over-extension of credit.

HIGH PRAISE FROM VIOLINIST.

Mme. Maleta Bonconi, the noted violin virtuoso, while in Sioux City, Ia., recently heard the Edison diamond disc for the first time. She commented very highly on its marvelous reproducing power and the perfect blending of its colors and overtones. Her praise of the Edison violin selections was especially flattering.

AN ORIGINAL WINDOW DISPLAY.

Attractive Thanksgiving Window Arrangement of the Ross P. Curtice Co., Lincoln, Neb., Which Won Considerable Commendation—Originality Produces Results.

Despite the fact that the manufacturing companies supply frequent stock window displays for the use of retail dealers, there is a constantly increasing number of the latter who believe in originating their own displays, in keeping with some local condition or some certain season.

A most interesting example of a seasonable display of the original sort is the Thanksgiving win-

Ross P. Curtice Co.'s Clever Window.

dow in the store of the Ross P. Curtice Co., 1240 O street, Lincoln, Neb., and which is illustrated herewith. The window had a natural board fence for a background, the floor was covered with earth and the display of cornstalks, pumpkins, a turkey and other features generally associated with the Thanksgiving season made the display a most effective one. A Victor XIV acted as a centerpiece for the display.

BUSINESS IS GOOD—THERE'S A REASON

A TRIAL ORDER WILL SHOW YOU

WHY

THE GOODS AND THE SERVICE IS THE ANSWER

The DOME RECORD CASE

should be in your stock. Holds 20 records. Made in 10" and 12" sizes. Equipped with lock and key. Order samples to-day, with the list of records and that particular style or finish of Victrola you are unable to get elsewhere.

The completeness in filling and promptness in shipping your order will convince you we have both goods and service.

W. D. ANDREWS, Buffalo, N. Y.

THE OUTLOOK FOR THE COMING WINTER SEASON

Discussed in a Most Interesting Way by Ben Switky, the New York Talking Machine Jobber—Optimism and Enthusiasm the Keystones of Success—People Like to Do Business with the Man Who Smiles—Constructive, Helpful, Heart-to-Heart Talk.

Optimism—and plenty of it is the only attitude that we have justified in assuming at the present time under the present conditions. Pessimism is suicidal speaking figuratively, and has no place in the mind of the active business man.

Just as there are men who start out in the morning feeling in perfect health, hear a few friends comment upon the bad weather, and the fact that their complexions do not look just right, read a couple patented medicine advertisements plentiful in symptoms and warnings, and come home feeling sick unto death in the evening; so there are people in business, your competitors or customers for instance, who will keep on buying and selling goods in the usual way, unless some false friends full of pessimism, come to kill all confidence and hope.

People like to do business with the man who can smile—the man whose very confidence in his country, in himself and the line he handles serves to breathe confidence in others and make the future and not the present assume a rosy hue. As a matter of fact, the talking machine men have every reason to belong in the front ranks of the optimists. It is true that our business system has been for a few weeks past a little run down, a trifle nervous. Yes, a bit feverish in the head and chilly in the lower extremities, not that there was anything particularly wrong with the general health, but just slight symptoms of cold feet. Symptoms that for the most part have been treated before they had a chance to develop and have responded to that treatment. It is only natural, however, that as we get very close to the holiday season, the best business season of the whole year, there exists a certain anxiety to know beforehand just how business will compare with that of last winter.

Prophecy is equally the delight of the wise and the foolish. It has been said that "out of the mouths of babes and fools ye shall learn the truth." Therefore, hearken whilst I solemnly forecast a Merry Christmas and a Happy Business for the talking machine trade.

I would recommend that all my readers take the attitude of a friend of mine who, when asked for his opinion of the business outlook, replied: "I don't know whether others will find it good or bad, but I expect to do a bigger business this year than ever before!"

That man has success marching by his side in perfect step.

It might be interesting to analyze this audacious individual whose self-confidence is so great as to be almost convincing: He believes that man is the arbiter of his own destinies and the architect of his own fortune. He turns to good account even the misfortunes of others, believing that "'tis, indeed, an ill wind that blows nobody good."

With such thoughts firmly embedded in his mind, he sets out determined to eclipse all past records. He feels it in his bones, as it were.

Mark the mental attitude: He realizes that it is strictly up to himself. He is not looking for anyone or anything special to help him or to shoulder the blame in the event of failure; furthermore, he has faith that there is no circumstance or condition so unfortunate as to be without benefit to some one. And he means to be that some one.

When you hear people say that business is poor, draw in your belt a notch or two and girdle yourself prepared to double your efforts.

Don't allow the croaker—and he is always with us, in fair weather and in storm—to depress your spirits, the time you spend listening to him can be put to better use in hustling for and making sales.

If you hear talk about bad collections, don't believe it. Collections are always good. It's when you can't collect—that's bad. However, with greater care in the extension of credits and closer attention to collections you may find your business in a healthier state than when things are booming.

The present war has admittedly affected many industries, nevertheless, you will agree with me that the demand for "It's a Long, Long Way to Tipperary" has started the record-buying season off with a hurrah, and as a direct result of the war.

Can any dealer or jobber recall having ever sold so many patriotic selections to so many different nationalities? All of which again illustrates the truth of "'tis, indeed, an ill wind that blows nobody good."

The world just now is in a high state of excitement. Pent-up feelings in this country find vent in appreciation of martial song and music.

The advance sales of talking machines this fall guarantee a still heavier demand for them for the holidays. Christmas business will be as big as you make it. If there is to be any general falling off in holiday buying, we must see to it that the talking machine business shall be the exception. The conditions are right to make it the exception if the proper effort is put forth.

The foregoing statement is logical even if it sounds queer. The answer is simple enough: Suppose that Mr. Jones finds it necessary to curtail his Christmas giving, and instead of spending \$200 he must limit himself to \$100. Now, it is for you to convince him that a talking machine and some records are more attractive and more appropriate than some other things which he had intended purchasing and will in addition give pleasure to the entire family and their friends. Straight-forward salesmanship based upon a thousand first-class arguments and coupled with sincere and unusual efforts is going to make this holiday season a normal season or better for the talking machine dealer.

In other words, if the dealer sets his heart and mind upon making this year's holiday business the greatest ever, nothing can interfere with his success—not even if the whole country were to spend just half the money that it spent last year.

We may not sell so many \$200 machines, but we can, if we are determined, sell as many \$50 and \$75 machines as to make the total gratifying in dollars and cents.

I predict that the sale of the lower-priced instruments will be phenomenal. As for the record business, the demand will be so great that last year's shortage of stock will be repeated three-fold during the next few months.

There is no article more appropriate or more popular as a Christmas gift. With a marvelous range of prices to offer the public, it should be an easy matter to interest them in your wares. Everybody loves music. Almost everyone is dancing these days. The theatrical, operatic and concert seasons are in full swing. Music publishers are putting forth their best efforts. There never was such a plenitude of good material at hand. Great heavens! Can anyone stand and hesitate as to the sort of business we are going to have this winter?

To my mind it seems just a question of helping the public to decide whether they want oak or mahogany. I might grudgingly concede that with some people it may be a question of deciding whether it shall be a \$15 or a \$50 machine, a \$100 or a \$200 machine, but emphatically there is no question of "to be or not to be." So far as we are concerned, that question died with Hamlet.

Enthuse! Arouse yourself to a full realization of the wonderful opportunities at your command! Examine your sample line of machines from a new angle! You are offering the public a thing of joy. Your instruments embody tone, grace, beauty, economy.

Pay no attention to those who complain of bad times. Bad times hardly exist for the talking machine dealer. Instead, mingle with the theater crowds on upper Broadway any evening before 8.15. You would consider yourself, indeed, fortunate to be able to secure a ticket for any good show at the regular box-office rates. Think of the hundreds of crowded pleasure places and take comfort from the reflection that our business belongs in the luxury class, and bear in mind that certain indulgences are necessary to reconcile the people to the sacrifice of certain necessities of life.

ANNOUNCE NEW MACHINE.

Mermod & Co., 505 Fifth Avenue, New York, of which E. L. Cuendet is general manager, announce a new talking machine which will be retailed for \$10. This machine has a wooden cabinet and is tastefully designed. This house has a big business furnishing parts for manufacturing talking machines, including motors, turntables, sound boxes and other accessories, so its experience in the production of talking machines is of a practical nature.

NEW EDISON SALESMEN.

V. E. B. Fuller has recently been added to the sales force of Thomas A. Edison, Inc., to push the sales of the Edison phonographs. Mr. Fuller has had considerable experience in musical lines and is well qualified to present the Edison diamond disc to music discriminating people.

NEW QUARTERS FOR STEWART CO.

Prominent Victor Jobbers of Indianapolis to Move to Larger Quarters on January 1—Activity with Columbia Co.—Kipp-Link Co. Preparing for Holiday Trade—Latest News.

(Special to The Talking Machine World.)

INDIANAPOLIS, IND., December 8.—After January 1, 1915, the office and salesrooms of the Stewart Talking Machine Co., distributors of the Victor line of talking machines, will be situated at 110 North Pennsylvania street, which is practically in the heart of trade in Indianapolis. The company is now at 221 North Pennsylvania street.

The Stewart Talking Machine Co. in moving is in the position of going back to its first home. When the company was organized several years ago, the business was launched in quarters at 110 North Pennsylvania street. But the room occupied by the company was part of an old-fashioned building and it was not long until the Stewart Co. had to get out so that the building could be torn down.

In the place of this building there is now a modern sixteen-story office building. On the ground floor are commodious rooms and the Stewart Co. is to have ground floor rooms in the building. There will be more demonstrating room available in the new quarters and the company is planning to attractively decorate its new home.

Business with the Stewart Co. is very good, according to W. S. Barringer, manager of the company. The wholesale business of the firm is increasing to such an extent that larger warehouse quarters are needed now and additional salesmen have been employed.

A. W. Roos, manager of the Columbia branch store in Indianapolis, says the month of November proved by a good margin to be the biggest month for total net sales in the history of the firm in Indianapolis. The November business was almost three times as great as that of November of last year. Cash collections are better than the average, says Mr. Roos.

The new Grafonola styles have met with approval by the public and the only complaint Mr. Roos has to make is that it is difficult to keep a sufficient number of machines on hand to supply the demand.

T. Allan Laurie, traveling auditor of the Columbia Graphophone Co., spent ten days at this branch in November. Mr. Roos had the pleasure of taking a dose of his own medicine as he was formerly traveling auditor for the company.

The branch store in Terre Haute, Ind., was visited by Mr. Laurie and Mr. Roos. This store is in charge of L. A. Moeller. He reported a number of sales for the month.

H. M. Wright, floor manager at the Columbia store, says his greatest problem is to work fast enough in ordering and unpacking records for the shelves which continually need replenishing. The last lists issued by the Columbia Co., the regular, as well as the specials, have had an immense popularity. The new dance records and "Tipperary" are the best sellers of the month.

The Kipp-Link Phonograph Co., distributors of the Edison disc machines, is busy preparing for the holiday trade. Rush orders are being received every day, and the entire force of the Kipp-Link Co. is busy.

TO MAKE FLEXIBLE RECORDS.

The Ribbon Record Co., Chicago, Ill., has been incorporated with capital stock of \$100,000 for the purpose of manufacturing and dealing in flexible phonographic records. The incorporators are: John S. Huey, John T. O'Connell and Robert E. Berlet.

A great salesman said: "I sold the goods. I did not merely lay cornerstones and get things into shape; I did not secure a promise of an order the next time; I did not fix the man for a future trade, and then brag about it. Not I. I got the man's name on the bottom of the order sheet. That's what I did."

NEW DEPARTMENT WINS SUCCESS.

Victrola Department of Geo. B. Peck Dry Goods Co., Kansas City, Mo., Proves Excellent Venture—Large Recital Hall and Modern Demonstration Booths Among the Features.

(Special to The Talking Machine World.)

KANSAS CITY, Mo., December 8.—The Victrola department that has been added to George B. Peck Dry Goods Co., since the opening of the new store has exceeded all expectations in the way of

Part of Display Room.

business. "Our business" says John Ditzell, manager "has been twenty per cent. greater than we expected, and our figures were thought to be too high."

The Victrola department is on the seventh floor of the new eleven-story building occupied by the George B. Peck Dry Goods Co. It was constructed

The Recital Hall.

and planned when the building was erected. It is equipped with four demonstration parlors and a concert hall. However, the concert hall has been closed for some time because of the large crowds that used it as a rest room; during the holidays it will be used as a demonstration parlor, after which it will be enlarged so that it will hold a

larger crowd. The department will have practically the entire seventh floor as a display space when the work on the building is completed. The seventh floor is probably the most advantageous location that could be secured for this department, because the offices of the company are also located on the same floor, and all of the best customers of the company transact a large amount of their business here.

John Ditzell, manager of the "Victrola Store," as he prefers to call it, has for the past five years represented the Columbia Co. as a traveler in the southwestern territory.

TO HANDLE COLUMBIA PRODUCTS.

Ashley B. Cohn, vice-president of Hardman, Peck & Co., New York, announced last week that the company had arranged to handle the complete line of the Columbia Graphophone Co. in its talking-machine department. At the present time the company handles the Edison disc phonographs and records, and the addition of the Columbia line will necessitate the construction of additional demonstration booths. It is likely that a portion of the fourth or second floors will be set aside for talking-machine display, which, in addition to the space now occupied, will give Hardman, Peck a large and well-furnished department.

TO HANDLE COLUMBIA LINE.

H. Saletan, 2163 Broadway, New York, has arranged to handle the complete line of the Columbia Co. and feature it aggressively. The excellent location of Mr. Saletan's establishment in the city's west side residential district should assist him considerably in his Columbia campaign for the better-class trade.

THE ENRAPTURED REPORTER.

(From The Aledo (Ill.) Democrat.)

Will Shaw varied the entertainment with some delightful musical numbers both vocal and instrumental, by noted composers and artists who faithfully reproduced themselves in Edison's phonograph—one of the many wonders of our wonderful age, wherewith the "common people" no longer remain "common" because the most costly amusement of the millionaires in palace of art are brought to the humblest homes of those whom nature endowed with appreciative gifts, which money cannot buy, nor the lack of it suppress, and thus the rural town enterprising music store becomes a most prominent factor in the education and elevation of the public taste and interpretation of the classic in music.

THE TRADE IN PHILADELPHIA AND LOCALITY

(Special to The Talking Machine World.)

PHILADELPHIA, PA., December 8.—The talking-machine business in Philadelphia in November was most satisfactory. At every store it ran considerably ahead of the November of last year, and at several of them they have assured me that it was double what it was last year. The December business has started with a rush and it will only be limited to the number of machines and records that will be supplied the dealers. This is not alone true of the Victor business, but of the Columbia and Edison as well.

Dealers in the Victor do not hope to get, especially in several of the more popular styles, a sufficient number of machines, for already there are orders in hand by the jobbers showing that they will not be able to supply them. The jobbers, however, are using their best judgment and are

putting out these machines to the best advantage. I saw a number of orders, in my rounds of the trade, where retailers have sent checks with them, which the jobbers were compelled to return, as they were not regular purchasers, and they are turning down good money in order to take care of those dealers who have stuck to them and probably will have to wait several months for their money. In the end, however, they expect to profit by this piece of judiciousness on their part.

During the past month there have been no new dealers started here by the Victor, but the Columbia and Edison have placed their machines in a number of satisfactory stores, and especially the former have been most fortunate in this respect.

Series of Edison Concerts.

The Edison people have a corps of promoters here at present who are arranging series of concerts and exhibitions, and their campaign will, no doubt, have a telling effect on the dealers. They are only giving these concerts to organizations which will do them the most good, and each of the individual dealers are also giving concerts in their stores, and there is quite a boom for the Edison here at present.

Blake & Burkhart report that their business has been very good with the Edison, and a visit to the store shows every evidence of this. They have been giving a great many recitals recently, but have had to discontinue them on account of the holiday rush already started. They expect shortly to be open evenings until after Christmas. They have placed a new man on their selling force, Ray England.

Louis Buehn says he is surprised at the terrific demand for talking machines, but that the trade is having a difficulty to get the \$75 and \$100 styles. "Everybody is on the anxious bench about getting stuff," he says, "but records are coming in very fair." He says that the large talking-machine dealers in Philadelphia are quite well fixed with goods, which is in strong contrast with last year, when they went through the fall and the holiday season at a practically from hand-to-mouth rate.

Mr. Buehn has found an increased demand for the Edison dictating machine, and has recently placed these labor savers with the Lutheran Publication Society, the Keystone Type Foundry, the Presbyterian Ministers' Association and the Re-

formed Publication Co., as well as a number of smaller firms.

Manager Comerer, head of the piano and talking-machine department at Wanamakers, says that their business is going big. They have twenty-eight hearing rooms at present and they are filled every day. The new style Victor, sold for \$150, has come in, and he believes that it is going to be a winner, as the public takes well to the idea of having the case finished all around, with the new arrangement for the albums. They give recitals every day at Wanamaker's, and have placed a large force in the talking machine department for the holiday trade, mostly through their own resources in the store, for they have a system whereby they train men in the stock department to be salesmen and utilize them when necessary.

The Pennsylvania Talking Machine Co. reports that its business in November has been all that it could possibly expect, having surpassed last year with a very substantial gain. Manager Eckhart says: "December is only going to be limited by the amount of goods I am going to get from the factory. I have never, in the years that I have been in this business, seen it come as it is coming at present. Machines have been coming in and going out so rapidly that we have practically encroached upon the city of Philadelphia, in the way we have blocked the streets back of our store all the way from Heppes to Cunninghams, nearly the extent of piano row, in which we are sandwiched."

Mr. Eckhart says that the Columbia dictaphone has also been a most active part of his business in November, and that they have a number of important demonstrations now on which they expect to close the first of the year. A number of their November sales were to the Dupont Powder Works and the Hercules Powder Works, of Wilmington; the Bush Sons Transportation Co., J. G. McIlvain Lumber Co., Surface Lumber Co., Fenton Label Co., and the Hill School at Pottstown.

New Columbia Dealers.

During November they placed the Columbia machine in the following establishments: B. Miller, 604 South Second street, in which they put a full stock on a big contract; A. Wolson, of Chester; William R. Irvin, Mount Carmel, Pa.; F. A. Jenkins, Honesdale, Pa.; Ramsey, Donnelly Co., of

Salem, N. J.; E. E. Tuttle, Halstead, Pa.; W. C. Kantner, Reading, who has been restored as a Columbia dealer, and a number of others.

Mr. Eckhart, who is supervising the Columbia Grafonola business of Baltimore, is very well pleased with recent results there. The Pennsylvania Co. have recently taken over the Delaware Graphophone Co., of Wilmington, and Mr. Eckhart is personally interested in the business, while John W. Goldie remains the manager. They have increased their selling force by the addition of several new men. Among the recent visitors were James P. Bradt, of the Columbia Co., New York.

Gimbel Brothers report that they have done a tremendous business in November, and fully doubled their business of last year, and Manager Stewart says that he expects the department to have a very fine holiday trade, as they are well supplied with instruments to take care of it. The department has arranged a number of attractive Christmas suggestions which will help the purchaser materially. They have added to their selling force H. M. Hillebrand, a son of the manager of the Aeolian and Pianola departments at Heppes.

ENLARGES SALES STAFF.

Increase of Pathé Frères Phonograph Co. Business Necessitates Much Larger Force.

The Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, manufacturer of the Pathephone and Pathé discs, has added to its already large staff a number of experienced men for its sales, clerical and shipping departments. This additional force was found necessary because of the remarkably rapid increase in its business which the company has experienced since making its first announcement to the trade.

An officer of the company stated this week that jobber and dealer arrangements for the Pathé Frères were being closed daily and that valuable territory from coast to coast is being requested by representative members of the industry. The Pathé dance records, which were recorded under the supervision of Maurice and Florence Walton, dancers of international renown, are meeting with a ready sale throughout the country.

THE VANOPHONE CO. INCORPORATED.

A certificate of incorporation was filed last week with the Secretary of State, Albany, N. Y., by the Vanophone Co., which will manufacture phonographs, accessories and devices. The capital for this new concern is \$250,000, and the incorporators are M. W. Aron, W. L. and H. F. Wray, Brooklyn, N. Y.

WIN SUCCESS WITH EDISON DISC.

The McKee Surgical Instrument Co., dealers in doctors', nurses' and invalids' supplies, has for some time past handled the Edison diamond disc phonograph very successfully in its Washington store and has only recently secured jobbers' rights for the same line for its store in Baltimore.

TO MAKE PHONOGRAPHS.

The Operaphone Manufacturing Corporation filed a certificate of incorporation on Saturday with the Secretary of State, Albany, N. Y., to engage in the manufacture of phonographs and records. The capital is given as \$100,000, and the incorporators are E. F. Gerner, M. Naughton and John Fletcher, of Douglaston.

Edison once said he "could excuse an ignorant man groping in the dark," but he "had no time to waste on a man that knew he was in the dark and didn't find his way out." Know your business thoroughly—try and learn the methods by which some men conduct business profitably—apply them so far as you can to your business—learn why some men fail and try to avoid their mistakes.

A poor excuse is better than none—if it passes muster with the boss.

VICTOR CO. SUES R. H. MACY & CO.

Prominent New York Department Store Asked to Account for Advertising Victor Machines and Records at Cut Prices to Purchasers.

The Victor Talking Machine Co. filed a suit in the United States District Court at New York on November 19 against R. H. Macy & Co., New York, the prominent department store. This action is based on the advertising used by R. H. Macy & Co. in the local newspapers offering Victor machines and records at cut prices, in alleged violation of the provisions of the agreements, by which the goods are licensed under the Victor Co.'s patents. The Victor Co. asks for an injunction restraining R. H. Macy & Co. from selling the goods or offering them for sale, at less than the prices named in the license agreements and for an accounting and damages.

WANT TO TAX MAIL ORDER HOUSES.

National Merchants and Manufacturers' Association with Headquarters in Nashville Back of a Bill with That End in View.

The National Merchants' and Manufacturers' Association, with headquarters in Nashville, Tenn., is at present carrying on a strong campaign in support of a bill introduced into the House of Representatives last May by Congressman Hinebaugh, of Illinois, and which is designed to levy a tax of 1 per cent. on all business done by mail order houses, conducting an interstate business.

The bill provides that mail order houses shall file statements with the Secretary of the Treasury at the end of each year showing the cash value of all merchandise sold during the year. The bill also provides that the Secretary of the Treasury shall apportion all such taxes collected among the several States in the ratio of the actual amount of goods sold in each State.

The association, through its secretary, states that it has been informed that the collection of

such a tax for the benefit of the State would be constitutional.

The bill it appears, failed to pass the last session of Congress, but the association is now working to secure its passage during the coming session.

HEATH APPOINTED MANAGER

Of the Baltimore Store of the Columbia Graphophone Co.

Albert J. Heath, formerly a member of the firm of Gorham & Heath, Brooklyn, N. Y., successful Columbia dealers and well versed in all details of Columbia merchandising, has been appointed manager of the Baltimore store of the Columbia Graphophone Co. Mr. Heath succeeds George A. Baker, who was appointed to the Baltimore managership a few months since, but who returns to New York to resume his duties as assistant manager of the wholesale Columbia headquarters, at 89 Chambers street, New York, which position he occupied before leaving for Baltimore.

R. F. Bolton, district manager of New York and up-State wholesale territory, whose activities were recently increased considerably, will be obliged to devote so much time to his new fields that a thoroughly experienced man was needed in New York as assistant manager, and Mr. Baker's previous connection with the New York headquarters was invaluable for these important requirements.

DEATH OF MRS. WALTER P. PHILLIPS.

Walter P. Phillips, who has long been associated with the Columbia Co., at its headquarters in Bridgeport, Conn., is receiving the sympathy of his many friends on the death of his wife, which occurred on November 28 in that city, in her sixty-eighth year. Mrs. Phillips was born in Attleboro, Mass., and was married in 1866. She is survived by her husband, a son, Albert C. Phillips, two sisters and two brothers.

ORDER TO-DAY

THE

Lansing Khaki Moving Cover

FOR TALKING MACHINES HEAVILY PADDED AND QUILTED

This Government-Khaki Heavily-Padded Moving Cover is endorsed by all Manufacturers of Talking Machines and is recommended to every Dealer as an indispensable help in moving the Talking Machines from the Warehouse to the Home, and for all Outside Demonstrations.

It more than saves its cost in paper and string, besides the time of "Bundling Up" every time you take a machine off the floor. It pre-

vents marring and scratching, and the cabinets are delivered free from finger marks, landing the instruments without a blemish, thereby making a Contented Customer, which means added business in both records and supplies.

The new CARRYING STRAP, with its two loop handles, shown in the cut above, is simple, safe and convenient and absolutely necessary in safely handling these heavy machines.

COVERS MADE IN TWO GRADES:

"A," Felt Inter-lining, \$7.50, Without Strap

"B," Cotton Inter-lining, \$5.00, Without Strap

All large cabinet covers

The No. 3 Strap is \$1.00 extra

(Only one strap needed on each wagon or automobile)

E. H. LANSING, 611 Washington Street, Boston, Mass.

They are telling us that the three Columbia "Tipperary" records—song, march and dance—are to-day the biggest things in the industry.

(Write for "Music Money," a book "full of meat" for those dealers interested in quick and frequent turnover of capital.)

Columbia Graphophone Company
Woolworth Building, New York

GAIN OVER LAST YEAR'S BUSINESS IN ST. LOUIS.

With the Majority of Dealers the Low Priced Machines Have the Call—Improvement in General Business Helps Trade—Announcement of New Aeolian-Vocalion Arouses Interest—Good Reports from the Country Districts—Interesting News of the Month.

(Special to The Talking Machine World.)

St. Louis, Mo., December 7.—Local talking machine dealers—except those specializing in low priced machines—are looking forward to an excellent Christmas business. They say that they have many prospects for holiday sales on file and that new inquiries are coming daily and that these sales indicate, almost wholly, the sale of high priced machines, those from \$75 up, with records extra.

It also is a fact that practically all St. Louis houses that make talking machines a department in the selling will show gain this year over last if the Christmas business is fair. December 1 saw a neat gain recorded in sales totals for the year in most houses and a gain in practically all. There may be a few exceptions, but there are no notable stores in the list, if confidential information is to be relied on.

While the general depression of business, from which St. Louis is now beginning to emerge, has shattered plans made a year ago and totals January 1 will be far below the figure set as the mark, but the business, in spite of the practical sweeping away of all of the "wage earner" purchases, will be sufficient to maintain the record of "greater business every year" for the talking machine trade. There are two elements at work in the matter of fewer small machine sales, the new one being the fact that many wage earners have been out of employment and those who have had regular work have been apprehensive of further slowing down and have held tightly on to what money they got. The other is the fast spreading belief that only a higher priced talking machine is worth while. The class of customers who formerly saved \$25 and bought a machine for that sum as a cash sale is becoming less very rapidly, and the amount that formerly made the entire purchase now is being used for a first payment in the belief that they are getting better value. Except for special purpose and for use in addition to a large machine, the small priced talking machine is disappearing from the market, and in many local stores the number of machines sold this year will not be more than half that of two years ago, while the total business will be much greater.

There perhaps will be one change this year that will be welcome in the shipping rooms. This will be that business conditions will curtail the demand to somewhere near the ability of the factories to meet all orders, and there will not be the effort to ship something to every dealer who has an order on file. So far this year the distribution has been

ample and practically complete orders are leaving the local jobbing houses without delay. Heretofore it has been the worry of the merchandise superintendent and the shipping clerk to divide twenty machines among fifty-three orders, or some other impossible fraction. Record stocks are said to be in excellent shape, and any dealer who wants a late rush order will be safe in entrusting it to St. Louis jobbers, as they all avow with one accord that they are going to be able to meet all demands and will have their shipping rooms keyed up to make a perfect record, and in this way boost the yearly totals to the best figure possible.

The spirit displayed by all hands here is that when business is under a handicap that is the time to put on extra steam.

Much Interest in New Aeolian-Vocalion.

The trade here has been greatly interested in the news printed in The Music Trade Review late in November that the Aeolian-Vocalion had been displayed to the trade in New York City. All sorts of rumors had been current here as to the intention of this company for future merchandising of talking machines, and the limited statement given out from the New York Aeolian Hall appeared to answer the general question; that the Aeolian Co. was making its own talking machines and that it would be different in some respects from any machine on the market.

Harry Levy, of the talking machine department at Aeolian Hall here, declined to discuss the new machine, except to say that he expected to have some of the machines on display early in the New Year. "In the meantime," he said, "I am very busy keeping pace with the demands of our rapidly expanding retail department."

Aeolian Hall has been conducting an active advertising campaign on behalf of its talking machine department, but other dealers, who, naturally under the circumstances, have been watching the advertising closely, professed to see in it more talking machine and less of the boosting of a particular instrument.

Some Popular Columbia Styles.

At the Columbia warerooms Retail Manager Duffy says the demand has been centering largely on the Favorite and Mignonette styles with record ejector attachments. The sales of these machines, he says, is practically limited to the supply placed at the disposal of the retail department. The extraordinary demand for dance records continues with the Columbia Co., and the use of these records, coupled with the specialized advertising, has served to open a wide field for machine sales which, it is anticipated, will expand as the wage earners return to their usual occupations.

C. R. Salmon, of the wholesale department, reports excellent business in all parts of that trade territory except in the cotton country. "Our late orders are running heavy," he said, "and we may

yet experience trouble in supplying all holiday wants, although we still are shipping promptly. We now are caring for the last of the regular holiday orders and we will then be in shape to anticipate the late special or rush orders.

"I have sent our J. J. Bennett out on a flying trip through southern Illinois and other near-by territory. He is out to put a little 'pep' into the dealers who fail to grasp the holiday possibilities, and the reports he sends in are very encouraging."

Manager I. B. Reid, of the Columbia warerooms, made a short visit to Chicago the first of the month.

Manager Robinson, of the Thiebes Piano Co. talking machine department, was detained at home the first of the month by illness.

Mark Silverstone, president of the Silverstone Music Co., Edison jobber, was heels over head in work at the month end, planning an energetic advertising campaign for the holidays. Mr. Silverstone recently has made his advertising on a more general basis, boosting the Edison machine more than the Silverstone service, with frequent references to the number of dealers handling the machines.

The Silverstone Co. reports business in excellent condition and attributes the mounting totals of this store and the other retail salesrooms of the Edison machines to the fact that they have been seeking, since the disc machine was put on the market, to urge the sale largely on higher priced machines, and that this class of trade has suffered less this winter than the lower priced trade. A heavy shipment of machines received the first of the month taxed the capacity of the Silverstone ample warerooms, but an extra shipping force put on duty soon cleared the decks by getting them out to waiting dealers.

Better Conditions in Country Districts.

E. C. Rauth, of the Koerber-Brenner Music Co., has spent considerable time on the road recently and reports excellent conditions in the country districts. Conditions there have improved more rapidly in the city, because of the reawakened demand for grains, which was checked for a time, and the extraordinary sales of horses. Money is getting plentiful and country dealers are ordering with much more freedom than for early fall stocks. Those who anticipated that early fall orders would suffice for the holidays are repeating orders and only because of ample preparations and the refusal of Koerber-Brenner to become pessimistic as to the future of the talking machine business are they able to meet the demands made upon them. When this company became exclusive jobbers of the Victor line in this territory Messrs. Koerber and Rauth gave out assurance that they would at all times be prepared to meet the demands made upon them, and they had this pledge in mind when they made preparations for this season beyond what the advance orders appeared to justify.

More people might try to pose as angels if everybody didn't start right in and begin to look at them with suspicion.

Greatness is never thrust upon a man who leads an aimless life.

Review of Trade Conditions Shows That England Is Doing Well Considering the Circumstances—Some Active Advertising Being Conducted by Gramophone Men—Reynolds, War Supplement—Death of A. H. Littleton—O. Heinemann to Visit America—Columbia Co.'s Generosity Much Appreciated.

(Special to The Talking Machine World.)

LONDON, E. C., December 5.—As the war proceeds, and the days lengthen into weeks, the weeks into months, the months into —, commercial men have good cause to glorify the British fleet, which, by its vigilance alone, under the most trying conditions, insures for them an uninterrupted maintenance of business relations with oversea buyers. Dependent upon a continuity of general commerce is the very existence of the gramophone trade to-day. With supreme command of the seas, England's machinery of trade is comparatively unaffected, outside of course the severance of trade exchanges with enemy countries. Recent official returns provide an excellent index of internal conditions, in that unemployment generally compares to-day very favorably with even time last year. In no one field of industry can it be said that conditions are bad. If we take the gramophone trade as a pregnant example—it is one of the first to reflect the worst of such a position as we find ourselves in—what do we find? I will endeavor to answer in conformity with actual opinion as generally expressed in the course of interviews with prominent gramophone men. Let it be said at once that in some quarters trade is more or less at a standstill, partly on account of lack of supplies. British talking machine interests, however, present a condition of activity quite out of all proportion to the prospects when war was declared. In the main, record and machine sales are satisfactory, and more than one company has conclusively proved that even under present circumstances it is possible to maintain a substantial turnover. While employment is good, the spending power of the masses is somewhat restricted owing to the prevalence of salary reductions and consequent economy. Money being difficult to extract from the pockets of the public in the ordinary way, the larger record and musical instrument houses feel it necessary to invest in publicity with the object of breaking down this reluctance to part company with the "needful." The response has been good. Yet with it all there is a feeling of uncertainty abroad as to possible developments in the war area, and until some decisive conclusion may be drawn pertaining to the ultimate likely outcome of this gigantic struggle between the forces of right and might the gramophone industry cannot expect to recover stability. To sum up, the general view here is that things might be worse, but all influences of an ad-

verse nature considered, bulk trade is vastly better than anticipated. While every section of trade and the community at large continue to be animated with the patriotic and common-sense spirit of making the best of circumstances, maintenance of gramophone trade, even though on a reduced scale, is assured.

Some Active Advertising Campaigns.

A survey of the gramophone trade situation on this side would be quite incomplete without a reference to the splendid press advertising campaigns embarked upon by some of the leading record houses. All circumstances considered, it must be admitted that publicity expenditure, with the object of stimulating sales of an article of luxury rather than necessity, more closely approximates to a speculation than an investment. This aspect of the situation has only to be realized by dealers to insure a more active co-operation than at present obtains. I do not hesitate to say that the success of this advertising rests almost entirely with the retail distributors upon whom mainly rest the opportunity of transforming mere inquiries into profitable orders. To the question, Do dealers systematically follow up inquiries? the answer could not be an unqualified affirmative one. It comes to this, that sooner or later manufacturers will realize the necessity of themselves clinching the deal direct, and afterward credit their best dealers in each locality from whence the original inquiry emanated.

In passing, I must congratulate the Gramophone Co., Ltd., Zonophone and Columbia concerns upon their whole-hearted efforts to maintain talking machine sales "as usual," by consistent publicity, thus setting an encouraging example to the faint-hearted members of our industry.

Coincident with the commencement of an extensive press advertising campaign, the British Zonophone Co., Ltd., announce a new list of patriotic records, bearing the pick of recent war compositions. These records have been recorded by eminent Zonophone artists, and may be accepted as fitting examples of the very high standard of quality which characterize in general Zonophone recording. The December supplementary list is replete with first-class selling titles, and should be in the hands of all oversea dealers who have a market for London's best.

Reynolds' War Supplement.

"The man of many parts," W. H. Reynolds advises us that he is now in a position to supply complete machines of British manufacture. These are built throughout in conformity with the best traditions of British workmanship, and thorough reliability. For the complete instrument, or any part thereof, competitive prices rule, and will be found to compare favorably with Continental rates. A war supplement giving full details of new lines

is now ready. Traders abroad are asked to remember that "any part of any talking machine ever made" may still be obtained from this live firm.

The Latest Beka Records.

In the latest Beka supplement there is to be noted a further aggregation of good selling titles of a patriotic and Xmas flavor, although in the latter regard a separate program has been issued, containing many well-known hymns, carols, descriptive and other suitable titles.

A New "Meister" Record List.

A further list of "Meister" twelve-inch records is now ready. It comprises a number of good operatic and ballad items which make a special appeal to high-class traders, whose clientele is mainly of the musically-educated type. Very special care has been devoted in the recording of these twelve-inch Beka records. Full lists and terms can only be obtained from O. Ruhl, Ltd., 77 City road, London, E. C.

Trade Very Quiet in Russia.

A significant indication of the quiet state of the interior of Russia is afforded by a communication from the "His Master's Voice" Russian manager, A. T. Lack, in which he asks his wife to leave the safe shores of England and join him in Petrograd. Mr. Lack, by the way, was in London when the war broke out, yet despite the closing of the usual Continental routes, he determined, if possible, to reach Petrograd by way of Scandinavia. It was a risky undertaking, but he got through notwithstanding the existence in the North Sea and the Baltic of German mines sown broadcast, men o' war, submarines, etc.

A Remarkable Test of "Silver Sheath" Needles.

Various patent needles have at times been condemned on account of the extra wear to which they subject records, and in this connection the rebutting claims made on behalf of the "Silver Sheath" needle are of interest. Daws Clarke, of Manchester, bears witness to the results of a remarkable test. A record carrying two verses was selected. The first verse has now been played 442 times; the second verse only occasionally for purposes of comparison, and the result is no appreciable difference in tone. Excellent testimony surely to the non-wearing and smooth playing quality of this unique needle.

Death of Alfred Henry Littleton.

Widespread regret will be felt at the news of the death of Alfred Henry Littleton, chairman of Novello & Co., the well-known music publishers. He was born in London in 1845. He was a member of the Royal College of Music, the committee of the Royal Choral Society, and was master of the Musicians' Company in 1910-11. A personal friend of Verdi, Gounod (whom the firm of Novello paid

(Continued on page 46.)

64 Page Catalogue Yours for Asking

W. H. REYNOLDS, Ltd.
"KNOTASLEPE"
London, England

FROM OUR LONDON HEADQUARTERS—(Continued from page 45).

£4,000 for the copyright of "Redemption"), Liszt, and many more of the prominent European musicians. Mr. Littleton occupied for a long time a unique position in the music-social world.

According to a recent public announcement, the Albion Record Co., Ltd., this city, has decided to go into voluntary liquidation, and to that end a meeting of creditors was held last month. The liquidator is S. C. Brown, 22-24 Tabernacle street.

New Companies Incorporated.

Diaphone, Ltd., described as musical instrument manufacturers. Capital, £33,000. Registered office, 203 Regent street, London, W.

H. P. Hodges, Ltd., music dealers. Capital, £5,000. Office, 117 Above Bar, Southampton.

Records for the Fighting Men.

The recent call for supplies of records for the use of our sailors, who naturally want something to relieve the monotony of their dangerous vigil in the North Sea, has met everywhere with a very hearty response. A Belfast paper gives prominence to an appeal for more records, and underneath the editorial we notice a timely reminder from Thos. Edens Osborne, which may induce those so minded to purchase records for dispatch to the fleet, of which almost every ship is now equipped with one or more gramophones.

Miss Margaret Woodrow Wilson's Records.

Of exceptional interest is the Columbia list this month, for it announces records by no less a celebrity than the daughter of the President of the United States, Miss Margaret Woodrow Wilson, which are already well known in the States.

Miss Wilson is a singer of unusual attainment, as has long been known to her own circle of acquaintances, and her voice is "naturally" an organ of singularly beautiful tone. It has been developed under the direction of the world's leading teachers and this training has resulted in not only a singer, but an artist of notable interpretative attainment.

New European General Manager.

The Columbia Graphophone Co., London, has sent out a formal announcement to the trade to the effect that Louis Sterling has been appointed Eu-

ropean general manager of the company, succeeding J. A. B. Cromelin to that position. Mr. Cromelin's conspicuous abilities, displayed while in charge in Europe, recently won him promotion to the post of general manager of the Columbia Co., with headquarters in New York. Mr. Sterling is well and favorably known in the trade here, and is well qualified to assume the duties of his new office.

O. Heinemann on Visit to America.

O. Heinemann, a director of Carl Lindstrom (Berlin), is now on a visit to America. He pays generous tribute to the courteous treatment of our officials, but thinks he will be more useful on your side of the pond than in London, where his movements and commercial plans were naturally somewhat restricted.

Llewellyn Davies Makes a Change.

The trade will learn with interest that Llewellyn Davies has resigned his position at the Wholesale

Musical Supply Co., Ltd., this city, to take up an important service with the Perforated Music Co., Ltd., of City road, London. Mr. Davies' long experience in the gramophone and music trades is a sure foundation upon which to rest our belief that he will reap the highest success in his new sphere.

Columbia Co.'s Generous Donation.

Under date of November 23, the Columbia Graphophone Co. advise me of a further donation on account of royalties from the sale of Regal records to the Prince of Wales' National Relief Fund. This latest contribution of £250 brings the Columbia total to the handsome sum of £1,000, which speaks volumes for the truly regal support from trade and public alike of the company's active assistance in behalf of those who qualify for participation under this magnificent scheme. The latter, by the way, has now to its credit over £4,000,000 voluntarily subscribed by the public from all parts of the British Empire.

AN IMPORTANT NEW RECORD PROPOSITION.

W. D. Enville Simons, Late Sales Manager of the Thos. A. Edison Co., in Control of Big Undertaking, the Details of Which He Explains in an Interesting Way.

(Special to The Talking Machine World.)

LONDON, ENG., December 1.—A matter of world-wide interest is the recent formation of a new concern which has for its objects the marketing of an entirely new type of double disc and an attractive range of exclusively designed instruments. Located at the now historical address, 81 City road, London, in the very heart of "phonoland," by the way, the Diamond Disc Record Co., Ltd., is particularly fortunate in having as its general manager W. D. Enville Simons, late sales manager of the Thomas A. Edison Co., who is well known and popular throughout the whole trade.

The diamond disc is of the phono-cut type with a thread between that of the Edison and Pathé records, double-sided, played with a jewel point, ten and one-half inches in diameter, with playing time up to three and one-half minutes, and is priced at eighteen pence retail. It weight is said to be

close upon double that of the average needle record.

Since public opinion varies somewhat with regard to volume, the company will issue records in two strengths—"concert" records of extra loud volume and records of ordinary volume, at the same price. Interviewed on the subject of policy and trading prospects, Mr. Simons, speaking enthusiastically of the progressive demand for a competitive price record of the phono type, said: "The trend of public opinion is undoubtedly in favor of sapphire-played records, and I consider the diamond products make a timely appearance in conformity with trade expansion in this direction. The field has not been developed to anywhere near its enormous sales possibilities for an intermediate priced record, and I am convinced that our future prospects will materialize into a sound commercial undertaking of influence and standing in the gramophone world. Already quite a substantial number of orders are in

O. RUHL, Ltd., 77 CITY ROAD, LONDON, E. C., ENGLAND.

FROM OUR LONDON HEADQUARTERS—(Continued from page 46).

hand for early delivery in this country, and plans for the development of a big campaign overseas will shortly come into operation. We are out," continued Mr. Simons, "with a very tempting proposition based upon products mechanically and scientifically perfect in every respect. Our moderate prices are proportionate to the enormous sales which are bound to accrue, and on these grounds the diamond agency will be one of the most profitable ever placed before the trade." In justification of his confidence in the future of the phono disc, Mr. Simons cited the one time apathy of even America's grand old man, and whose efforts and ingenuity are to a great extent now devoted to this type of record.

In regard to trading policy, I learned the diamond products will be marketed through factors or jobbers only. Pathé trading being direct through dealers, Mr. Simons believes that factors will therefore greatly appreciate the exclusive opportunity thus presented to handle a competitive line of phono discs, price considered, free of competition. Notwithstanding this exclusively wholesale policy, the Diamond Co. will take care to arouse dealers to the wonderful trading prospects of its goods. Large expenditures upon trade, newspaper and other publicity will commence forthwith, and this advertising is to be so closely associated with the requirements of factors and dealers that they will directly benefit by special advertisements placed in its local mediums.

Although price maintenance conditions will be rigidly enforced, Diamond traders are not required to sign obnoxious agreements, it being only necessary to conform with certain simple sales conditions. Recognizing the enormous number of gramophones in use to-day, Mr. Simons estimates on 4,000,000—all available to be fitted with the new Diamond sound box, the latter is so constructed as to be ready for use on any make of instrument without troublesome adjustments, which one must admit is a most important thing.

COLONIAL and FOREIGN BUYERS

of gramophones and records may obtain valuable information from English firms who are desirous of opening up trading relations with oversea markets upon application, stating requirements, etc., to our European representative,

W. LIONEL STURDY

2 Gresham Buildings,
Basinghall St., London, E. C.

Diamond discs carry no labels, the necessary particulars being engraved on the record itself. All Diamond products will be marketed under a distinctive color—Union blue, and a unique registered trade-mark, which makes them instantly recognizable whenever displayed.

On the question of artists, I was told that practically all the well-known and popular vocal and instrumentalists, orchestral and band combinations have made some fine records, and in addition, many new stars will make their gramophone debut under the aegis of the Diamond. Typical titles form a special feature of the Diamond program, and a point of unusual interest is that in this regard factors and dealers will be encouraged to co-operate in catering for local requirements. In other words, the company invite suggestions for the production of titles particular to individual localities. "Tell your readers," said Mr. Simons, "that many new ideas will operate with a view to building up a really first-class catalog, and thus making Diamond discs the popular line of every year." December will witness the publication of a big initial musical program in good time for the Xmas trade. Here are some examples of the artistic value of Diamonds:

First Life Guards, Scots Guards, Irish Guards, King's Colonials, Midland Silver Prize Band, Metropolitan Band, Anglo-American Orchestra (from the White City), Royal Court Orchestra, the Harrison Trio (violin, flute and harp), Bernard Hall (violin), Elsie James (the original Gaiety Girl), Billy Williams, Mark Sheridan, Will Evans, Whit Cunliffe, Geo. Lashwood, Margaret Hayes, Mme. Clara Lewis, Alfred Heather, Humphrey Bishop, Westminster Choir, the Royal Operatic Singers, etc.

Having heard records by some of the foregoing artists I am able to say they are in every way splendid examples of the recording art. Good volume, musically pure in tone, absence of undue scratch, comprise features of the Diamond record which will undoubtedly carry it to great heights in public estimation. To the trade the Diamond agency should prove of exceptional value and I can but urge my readers to immediately investigate such a good business proposition. Fuller information may be obtained by writing direct to the Diamond Disc Record Co., Ltd., 81 City road, London, E. C.

SHORT-PAID POSTAGE HURTS TRADE

Notwithstanding the efforts of the different departments of the Government and those of many commercial organizations and trade papers, some American firms desiring to establish business relations with Chilean dealers and merchants have not yet learned that it is necessary to pay foreign postage on all mail sent. According to Consul D. J. Myers, Iquique, the regulations of the International Postal Union require the postal authorities of the United States to accept and forward all short-paid letters to foreign countries, but no rules of the foreign office compel the addressee to accept such mail and pay the penalty of double the deficiency. In mails arriving from the United States recently fifteen letters from American firms were received at the Iquique consulate. Six of these carried two-cent stamps, instead of five-cent ones, as required. The letters with full-paid postage were delivered in twenty-four hours, but notices of the arrival of the short-paid letters were not received until almost a week after these letters had reached Chile.

POINTS TO CONSIDER.

Because crating and packing may be considered non-productive work is a poor excuse for neglecting it. And besides, a little neglect here may cause a big expense in the way of claims for damaged goods, particularly those sent to foreign countries.

Just when a man's conviction that he is the whole thing becomes perfect he may find himself suddenly retired to obscurity.

STROH VIOLS

VIOLIN, VIOLA, ETC.

The mellow and matured tone of these instruments, which are constructed largely of aluminum, yet possess none of the characteristics of the gramophone or wind instrument, is only one of its many points which are fully set out in an illustrated booklet which will be mailed free on request to the sole makers.

COLUMBIA GRAPHOPHONE CO.'S HOME IN BOSTON.

Rearrangement of Store Consequent on Widening of Avery Street Gives Boston House Much Additional Window Display as Well as a Much More Attractive Establishment for Display of Their Varied Lines of Talking Machines and Records.

(Special to The Talking Machine World.)

BOSTON, MASS., December 10.—The Columbia Graphophone Co.'s establishment in this city, located at 174 Tremont street, now occupies one of the most central locations in Boston, as the various improvements which the near-by streets have been undergoing are entirely finished and a new street, known as Avery street, runs next to the store. The Columbia headquarters are located on a corner di-

practicable and an aid to the convenience of the store's patrons it is immediately put into daily use.

Arthur C. Erisman is manager of the Boston store of the Columbia Graphophone Co., and it has been under his able management that the Boston territory has become such a fertile and profitable one for Columbia products. Mr. Erisman is fully conversant with the unlimited sales possibilities afforded by Columbia machines and records, and he

staff, the progressive advertising policy it pursues, and the quality of Columbia machines and records. Every perfected idea in retail merchandising which applies to the "talker" industry is carefully tried and tested out by the store, and if it is found to be

library enabled the store to achieve truly wonderful results. In its general business, the local headquarters of the Columbia Co. are breaking all records, showing a substantial gain, month for month over 1913, its previous banner year.

SANG WITH OWN EDISON RECORD.

Natural Quality of Edison Diamond Disc Demonstrated in Interesting Manner in Des Moines by Operatic Artist.

(Special to The Talking Machine World.)

DES MOINES, IA., December 5.—Anna Case, an Edison artist, while in this city recent, in concert recital, pleased her audiences immensely, and they gave her a most enthusiastic reception. While here she visited the store of Harger & Blish, Edison jobbers, where she desired to hear her own voice on some recent Edison disc records. During the playing on the disc of her "Louise" she started to sing the aria while the Edison phonograph was playing it. The effect was beautiful. The pitch, quality and tone were perfect; not a shade was lost. She would alternately start and stop picking up the aria here and there, and it showed how accurately the Edison disc had reproduced her voice. When she approached the high passages the effect was like operating the grand swell on a great organ. It was a fine demonstration of the perfection of the recording of her voice on the Edison diamond disc.

VICTOR HOLIDAY PUBLICITY.

The Victor Co. sent out to its trade this week its usual set of special holiday advertising matter. Chief among this publicity is a handsome lithographed Christmas folder with a typical Christmas cover, and supporting the company extensive national magazine advertising with the query, "Will there be a Victrola in your home this Christmas?" Inside of this folder there is a beautiful picture of a home scene in colors that is typical of the Christmas spirit. Turning back this picture is displayed the entire line of Victrolas lithographed in colors. The last page contains a convincing Victrola argument, with space for the dealer's imprint.

Another special folder included in this publicity is devoted exclusively to the Victrola IV, and shows in its center pages a splendid cut of this machine, together with its most important constructional features. On the back of this folder is presented a short list of records representative of the wealth of diversified music that may be found in the Victor record catalog.

HANDSOME NEW QUARTERS.

Hook Bros. Piano Co., Madison, Wis., has just occupied its new building on Capital Square, and fitted up one of the most attractive talking machine departments in the State for the exclusive exploitation of the Edison diamond disc.

EDISON DISC PHONOGRAPH CATALOG.

The Edison people have recently issued a handsome new catalog of "Edison Diamond Disc Phonographs," in the introduction of which we find a statement giving a clear and concise explanation of the peculiarities of the new Edison disc and of the machine designed by Mr. Edison to play it.

Its many feet are what enable a gas bill to run up so rapidly.

O. K. HOUCK CO.'S SPECIAL WINDOW.

The Popular Music Trade Man of Memphis Arranges Special Window in Honor of the Tri-City Ceremonial of the Nobles of the Mystic Shrine—The Victrola Crosses the Hot Sands.

(Special to The Talking Machine World.)

MEMPHIS, TENN., December 7.—There are no Nobles of the Mystic Shrine in the State of Tennessee and apparently very few in any section of the United States who do not know personally, or have heard of, O. K. Houck, who is one of the most

O. K. Houck Co.'s Mystic Shrine Window.

active of Shriners. It was most fitting, therefore, that the O. K. Houck Piano Co., of which Mr. Houck is the head, should prepare a special window display in honor of the tri-State ceremonial of the Nobles of the Mystic Shrine held recently.

A perusal of the accompanying illustration indicates better than words the elaborate character of the display. There was a pyramid at the back, hanging against which was a portrait of Imperial Potentate Dr. Frederick R. Smith, and in the row underneath portraits of Potentates of the Wahavi

Temple, Jackson, Miss.; Sahara Temple, Pine Bluff, Ark., and Al Chymia Temple, Memphis. The bottom of the window was covered with sand and small cactus and "crossing the hot sands" was a camel with two humps wearing an Al Chymia fez, harnessed to a small Victrola, with Victor records for wheels. Following the Victrola was a lion and a wild cat, illustrating the old saying that "Music hath charms to soothe the savage breast." There was also displayed in the window a copy of the official program of the entertainment held on Tuesday, November 24, together with two signs referring to the crossing of the hot sands to the music of the Victrola. The whole window was lighted by a large emblem of Al Chymia Temple, outlined with electric lights, the emblem, together with the menagerie, having been borrowed from the Shrine.

Those who attended the convention of the National Association of Talking Machine Jobbers at Atlantic City last summer will recognize hanging along the sides of the pyramid the "Keys to Memphis," which were

so liberally distributed by Mr. Houck on that occasion. Throughout the period of the ceremonial the Houck display was one of the centers of interest for all Shriners, as well as thousands of others outside the fold, which, of course, pleased the genial O. K.

God bless the man with a scheme, an idea. It may be visionary, but in any case it certainly must be better than resting all the time.—Leslie M. Shaw.

IMPORTANT NEW CONNECTIONS.

Pathé Frères Phonograph Co. Arranges for Representation in Many Sections of the Country—Big Shipments from Europe.

During the past month the Pathé Frères Phonograph Co., 29 West Thirty-eighth street, New York, has closed a number of important deals for representation in various sections of the country, including both distributor and dealer agencies. The company has inaugurated an aggressive publicity campaign through different mediums, and its many machine and record catalogs which are high grade in every detail, are calculated to give the prospective purchaser an adequate understanding of the qualities of the Pathephone and Pathé discs.

Referring to the general business situation at the present time, an officer of the company said: "We are progressing very nicely in all departments of our business, and as a matter of fact, we have been working nights recently to keep pace with the demands of our trade. We have increased our sales and office staffs considerably the past few weeks, and one of our traveling representatives is now making a trip through Illinois and the surrounding territory with gratifying success.

"Our shipments from abroad have been causing us no concern whatsoever, but, on the contrary, our shipments have been as large as if there was no war or commercial disturbance on the other side of the Atlantic. The extent of our shipments may be gathered from the fact that the inspectors at the New York Customs House advised us this week that our latest shipment was the largest single shipment of any merchandise that had been received in this country since the war started.

"We are more than pleased with the reception accorded our machines and records throughout the country, and the dealers that we established a month or so ago are enthusiastic in approving the distinctive features of our product. The complete opera scores and unusually fine dance records are all giving perfect satisfaction to our dealers and their patrons."

A CHRISTMAS SERMON FROM SANTA CLAUS.

In Which the Merry Old Elf Discusses Among Other Things the Talking Machine as a Factor in Human Happiness and Enjoyment During the Holiday Period — Interesting Comments on Useless Christmas Presents and the Most Appropriate Ones.

I was dozing by the open fire in the library. The wind was rising among the maples outside the window, and I could even hear the sharp crackle of the thin ice along the shores of the Rancocas as the flooding tide split it asunder.

Ever and anon a snowflake came down the chimney only to sputter into steam as it encountered the blazing logs. My pipe had gone out but I was really so comfortable that even that did not matter. I gazed sleepily at my desk where pad and pencil, uncovered typewriter, and a goodly store of manuscript paper called me to work.

"Go hang! all of you!" I cried, and closed my eyes.

A low chuckle answered me from the fireplace, and I sat up with a start. Standing with his back to the flames, gazing at me from two very merry blue eyes, and bathed in a soft and mellow glow,

The Christmas Spirit.

stood Santa Claus. I had seen too many caricatures of His Majesty of the toys and reindeer not to know him at once. Strange to say, it did not seem unusual that he should be there. In fact, I remembered wishing only a short time before that I could procure some ideas from him regarding my prospective Christmas story already overdue. "If anybody is well posted concerning Yuletide gifts," I had ruminated, "Santa is the chap. Wish I could interview him."

"Well," chortled my fat little visitor, puffing away at his stubby pipe, "I got your *mentigram* and I'm here to be interviewed."

Aroused to my duties as host, I placed an easy chair near my own, brought forth a serving table with samovar, cigars and tobacco urn, and bade my guest be seated. He complied with a flourish, and I thought, or was it imagination? that his red paunch shook a little as he moved, just as it did on "the night before Christmas," long ago. He helped himself to my oolong, filled his short-stemmed clay from my store of Bull Durham, and signified his willingness to be interrogated.

"Mr. Claus," I began, do you know anything about talking machines?"

"Inasmuch as I handle thousands of 'em every year, I should say, 'Yes.'" Then reaching again for the samovar, he continued, "This refreshment of yours is very warming after a long ride in the snow; I'll take another if you don't mind," and he poured out another cup.

"Do you consider the talking machine an appropriate Christmas gift?" I asked him.

"Emphatically so," he replied, and crossing one fur-booted leg over the other, and shaking his finger at me by way of emphasis, he launched forth as follows: "If the people upon this earth stopped a moment to consider just how great an instrument of music the talking machine has grown to be, there would necessarily be a few million less worthless parcels go into my sleigh. However, they are waking up, these people, and the time is not far distant, I am sure, when the money now spent for articles of great price but of absolutely no value will go for records by Caruso and Melba. I've handled presents for hundreds of years, as you doubtless know. There is nothing from a penny doll to a brownstone mansion in the way of a Yuletide gift since the world began that is not written down upon my books. That being the case, I am unquestionably the greatest authority extant upon that particular subject."

He paused a moment to relight his pipe and settle himself more comfortably in his chair, then, quite at ease, he continued: "You gentlemen of the talking machine fraternity are in a position to do a wonderful amount of good this Christmas time. I say *this* Christmas time because, it seems to me, that never before were you so amply qualified to fulfill this mission of uplifting your fellowmen."

"I don't quite get you, friend Claus," I remarked doubtfully. "We are merchants, not clergymen."

"Exactly," quoth Santa between puffs, amused at my skepticism, "but nevertheless you have the greater opportunities to accomplish the end I have in view. Listen, and I'll make myself clear. The reverend gentleman can only talk to his flock of the folly of their ways and explain to them as forcefully as is consistent with the restrictions of his particular denomination what will ultimately befall them if they depart from the straight and narrow path. You go to church; therefore, you know the method employed there?"

"Oh, yes, of course—that is, I have been to church," I answered, endeavoring to be truthful.

"Very well, now I will show you how you can do infinitely more good with your bottled songbirds and canned musical organizations than the theologian with his sermons, no matter how carefully prepared they may be, because you are in a position to prescribe an antidote where he is not.

"Young folks won't stay off the streets at night just because they are told they should. The fact that it is supposed to be wrong, makes it far more alluring. This same idea, of course, applies to the cheap theater, the sensational movie parlor, and the dance hall.

"Now then, this is where you come in," and he grinned at me most encouragingly. "By the introduction of your talking machine with the right kind of records, and your moving picture machine for the home with its wealth of valuable and intensely interesting films, you can make home more alluring than the dance hall and the theater, and thereby solve the problem.

"There is no better way of rapidly advancing

NYOIL

For polishing varnished woodwork it is extremely satisfactory. No oil is so clean.

Ask your watch repairer whose oil he uses on your watch.

civilization than by making the home more attractive than the street, thus eliminating the desire to wander abroad in the nocturnal hours, and, also destroying the germ of immorality with which the night air is saturated. The fellow would be a poor fool who would prefer a dollar a night cabaret singer to Geraldine Farrar, or a squawky dance hall orchestra to Sousa or Liberati."

"I get your idea, Mr. Claus, and I beg to assure you that I deem it well worthy of deep consideration," I exclaimed enthusiastically. "I shall see that it is exploited with the elaboration it deserves."

"I am glad to know that," he replied seriously, "because it proves that my visit here to-night will not be in vain. What is most needed at this time, and what you can help me to bring about," he added even more seriously, "is the expenditure of money along the lines that will do the most good toward the advancement of civilization. I have watched the evolution of this terrestrial sphere with a great deal of interest throughout the centuries, and I am sometimes very much discouraged. Especially is this true when I see a fond mother presenting her offspring with a \$500 jewel-encrusted cigarette case instead of elevating his mind, eyes and ears with good music and interesting views, all of which could be done for less money than was expended by the doting parent for this bauble.

You spoke not long since, Mr. Claus," I reminded him, "of the fact that we are able to do more good toward the uplifting of our fellowmen than even the clergy can accomplish. Why not collaborate with these gentlemen?"

"By all means do so," cried my guest, as he adjusted his furs for departure, "for by making the church attractive as well as religious through the medium of the phonograph and the motion picture, you will accomplish great things."

"Please do not hurry," I entreated, as he drew on his mittens, and pulled his peaked cap, with its silken tassel, down over his ears. "Won't you have another cup before you go?"

He filled his cup once more and lifted it right jauntily, "I give you this toast," he said:

TO A MERRY CHRISTMAS

Out of the northland do I come,
A Saint of the sleigh and toys,
Making happy the Christmas time
Each year for girls and boys,
Right merry chap they say I am,
Rich in good deeds too,
Yearning to please the ones I serve.
Can't beat that, can you?
Here's to your health before I go;
Right well have you served me here.
In after years I'll think of you,
So free with your cup and cheer.
To-night we part, but who can say;
Maybe we'll meet again.
A last farewell, good luck to you;
So-long, knight of the pen.

I seemed to hear the distant tinkle of sleighbells, the faint thud of hoofs upon the roof, and an echo of the driver's commands to his reindeer steeds, then all was still.

"You've been dreaming, dear, and it's bedtime." A loving hand caressed my brow, and I awoke.

FRESH PROOFS OF ENTERPRISE IN SAN FRANCISCO.

Rearrangement of Talking Machine Stores, Attractive Displays, New Quarters All Tell the Story of Prosperity in the Talking Machine Field—Depression Has Affected These Establishments Less Than Any Other Line of Business—What Dealers Say.

(Special to The Talking Machine World.)

SAN FRANCISCO, CAL., December 5.—General improvements in the talking machine quarters of this city in the past year are one of the best bits of evidence that that branch of business suffered less from the general depression, which has been felt more or less all over the country, than most other lines of trade. There is hardly a talking machine department here, but what has undergone changes recently, and two new places have started in the last few months. The Hauschildt Music Co. is the latest concern to seek new quarters, which will give it much better facilities for all branches of its business, and particularly the talking machine department. The remodeling of the ground floor of Clark, Wise & Co. has just been completed. The new Edison Shop on Geary street is a notable addition of this fall; the department on the ground floor of Eilers' Music House isn't much older, and only last month the opening of headquarters here for the Sonora Phonograph Co. was reported. It hasn't been very long since Sherman, Clay & Co. had their entire third floor, which is devoted to talking machines, done over, and not many months have elapsed since the Pacific Phonograph Co. moved its jobbing business from Mission street to new quarters on Geary. In each instance the moves and changes were in the nature of improvements, and at the present time San Francisco can well be proud of her talking machine headquarters. Judging from reports from various interests, business has warranted the forward strides. While other merchants have been complaining very few complaints have emanated from talking machine sources, and holiday trade is starting in quite briskly. The distributors are being rushed, and retailers are already holding a good many outfits for Christmas delivery.

Hauschildt Music Co. in New Quarters.

The new location of the Hauschildt Music Co. is at 105 Kearny street, in the same block with Sherman, Clay & Co. and the Wiley B. Allen Co. The store was formerly occupied by the old firm of Benj. Curtaz & Sons. The company moved in last week, but the remodeling of the premises is still in progress. The talking machine department is located on the ground floor, where five demonstration rooms are being installed. These will be absolutely sound-proof, and they are so arranged that four others can easily be added at a future date, if business warrants. There is also ample room for general display purposes. The building is a four-story and basement structure, 30x130 feet, which provides nearly 20,000 square feet of floor space. Offices have been installed at the rear of the ground floor, and the small goods department will occupy part of the floor in conjunction with talking machines. The second and third floors are being fitted up for piano and player-piano salesrooms. The fourth floor will be

utilized for shop purposes, and the basement for storage. When the work in progress is completed, the store will present an attractive appearance, and will be conveniently arranged for both customers and employees. Henry Hauschildt, head of the company, who spends most of his time at the Oakland store, says they have been enjoying an excellent business in talking machines at both locations. He handles Victor, Columbia and Edison goods, and he reports the demand increasing rapidly for Edison disc products.

Demonstration Room for Sonora Co.

A demonstration room was installed at the Sonora Phonograph Co.'s quarters on the Arcade floor of the Phelan building the past month, and other improvements have been made in the furnishings and equipment. Manager F. B. Travers reports business starting off encouragingly, and he expects to work up a nice business on the Pacific Coast for Sonora products.

Clark, Wise & Co. Store Remodeled.

Since remodeling their store, Clark, Wise & Co. have very attractive talking machine parlors on the ground floor. The remodeling called for the installation of three more demonstration rooms and a reception room, which gives the place a home-like appearance and takes away the decided store atmosphere, making it comfortable for patrons to come in, rest awhile, and listen to the new records without feeling obligated to purchase. Mr. Wise thinks this feature will lead to an increased sale of records, however. This room is situated under the extension of the mezzanine floor, and is furnished with writing desk, settees and other conveniences.

Excellent Outlook in the North.

Andrew G. McCarthy, who looks after Sherman, Clay & Co.'s Victor business, returned a short time ago after a visit to the company's interests in the Northwest. He reported business slightly improved in the Northern cities, and is enthusiastic over the firm's new store in Spokane, Wash., which will be ready for occupancy either just before the holidays or just after. He says business is booming in the wholesale department here. Four carloads of Victor goods arrived a few days ago, and three of them were reshipped to their branch stores and other dealers, whom they supply, on the following day. Retail business is gaining impetus also as the holidays approach.

M. Dorian Arranging for Columbia Exhibit.

M. Dorian, treasurer of the Columbia Graphophone Co., has been in San Francisco since November 1. He has charge of arrangements for the company's exhibit at the exposition, and has devoted most of his attention while here to preparations for the display. From all indications, his firm plans to make an elaborate showing. He is optimistic regarding prospects for the remainder of this year and next. He called on the trade

in the Northwest en route here, and was well pleased with the reports submitted by Columbia connections in Portland, Seattle and Spokane. He says the San Francisco agency has made a splendid record this year, more business having been done in the first ten months than during the entire year of 1914. He expects to leave for home early in December.

New Manager for Emporium Department.

A change has taken place in the management of the Emporium music department, Harry Marcus succeeding A. A. Schell. Mr. Marcus comes from Pittsburgh, where he was manager for Jacob Doll & Sons, and prior to taking that position was connected with the trade in New York. This is his first experience on the Pacific Coast, and he arrives with the intention of bringing the talking machine and piano business of the Emporium up to the highest possible standard. Columbia goods are handled by this firm exclusively. Mr. Schell has not announced definite future plans.

IN CHARGE OF NEW LANDAY STORE.

Benj. Landay has been appointed manager of the new Victor store of Landay Bros., Victor distributors at 23 West Forty-second street, New York, which was formally opened on Monday of this week. Mr. Landay, although comparatively young in years, thoroughly understands the principles of high-grade Victor merchandising, having been connected with his brothers in the conduct of other Victor stores in the Landay Bros.' chain.

Don't loaf around waiting for good luck. Buckle down and compel good luck to come a-running.

Many a man who fails to score in this world says the tally sheet is wrong.

LATEST PATENTS RELATING TO TALKING MACHINES AND RECORDS

(Special to The Talking Machine World.)

WASHINGTON, D. C., December 10.—STYLUS GUIDING ATTACHMENT FOR SOUND RECORDS.—Harrison W. Rogers, Wheeling, W. Va., assignor of one-half to Charles W. Ebeling, same place. Patent No. 1,112,838.

The present invention relates to improvements in stylus guiding and starting attachments for sound records, one object of the invention being the provision of an attachment adapted to be connected to and carried by a sound record, and provided with means whereby the stylus will be properly guided to a selected point of the sound groove, thus producing a device which is especially adapted for use in connection with a record carrier operated from a projector mechanism, as particularly set forth in a copending application filed February 7, 1913, Serial No. 746,890, the present attachment rendering it an easy matter for the operator to position the stylus for entering a selected point of the sound groove when the record carrier is operated at the proper time through the projector mechanism.

A further object of the present invention is the provision of an attachment carrying a stylus receiving and guiding portion which is so constructed as to be readily adjusted relatively to the sound groove of the record, so that the stylus will be started at a selected point of the groove, and without the necessity of causing the record to be rotated a plurality of revolutions before the sound wave forming portion of the record is in operable engagement with the stylus.

A still further object of the present invention is the provision of a stylus guiding attachment, which will reinforce the sound record at the starting point of the phonic groove, in that a metal, or other hard substance is placed to receive the initial presenta-

Albert L. Roethe, Milwaukee, Wis. Patent No. 1,113,911.

This invention consists in what is herein particularly set forth with reference to the accompanying drawings, its objects being to eliminate hissing noise in sound reproductions from graphophone and gramophone records and to improve the tone

of such reproductions by means of improved sound boxes to which this invention relates.

Fig. 1 of the drawings represents a sectional view of one of the improved sound boxes and is indicated by line 1—1 in Fig. 2; Fig. 2 of said drawings represents a side elevation of the sound-box partly broken away; Fig. 3, a plan view of a detail of said sound box partly in horizontal section as indicated by line 3—3 in Fig. 1, and Fig. 4, a partly sectional view of another detail of the aforesaid sound box on the plane indicated by line 4—4 in Fig. 2.

DIAPHRAGM FOR SOUND REPRODUCERS.—Frederick W. Thomas, New York City, N. Y. Patent No. 1,116,165.

The object of this invention is to provide a new and improved diaphragm for sound reproducers such as are used in gramophones, graphophones, receivers and transmitters of telephones and other sound-reproducing instruments and machines, and which is exceedingly sensitive for the reproduction of sound vibrations.

In order to accomplish the desired result use is made of a diaphragm of metal made exceedingly dense or compact throughout by pounding, beating, pressing, hammering or similar processes.

Figure 1 is a face view of the diaphragm as applied to a graphophone sound box shown in dotted lines; Fig. 2 is an enlarged cross section of

the diaphragm on the line 2—2 of Fig. 1, and showing in dotted lines the ring for compacting the peripheral edge of the diaphragm, and Figs. 3 and 4 are cross sections of diaphragms of different shapes.

DIAPHRAGM FOR SOUND REPRODUCERS.—Frederick W. Thomas, New York, N. Y. Patent No. 1,116,166.

This invention relates to a diaphragm for sound recorders and reproducers and is especially adapted for use in phonographs, graphophones and the like.

At the present time mica diaphragms are in universal use for phonographic sound recorders and reproducers, although numerous other types of diaphragms have been proposed, and among these others are metallic diaphragms variously corrugated or indented for the purpose of obtaining a

reproduction or recording of sounds equivalent to that obtainable with mica, the aim being to obtain a cheap substitute, as mica is expensive in the present condition of the market. Corrugated metallic diaphragms are unsatisfactory for various reasons, but mainly on account of their weakness at the central part where buckling occurs, thus showing a lack of strength of material or required stiffness. According to another type of diaphragm, the diaphragm is flat throughout its area and the metal pounded to strengthen the diaphragm by compacting the material, and then the diaphragm is nickel-plated to prevent corrosion or affection by the elements. Such metal diaphragms being of the same thickness from center to edge are unsatisfactory because of the lack of stiffness at the center, and, furthermore, because of the coating of nickel-plate, which materially interferes with the tonal qualities.

It is the object of the present invention to overcome the objections above noted by producing a metallic diaphragm which in recording and reproducing qualities is superior to mica, far less expensive, smaller in size for the same capacity of sound reproducing and recording, and which is practically indestructible, whereas mica diaphragms are of very short life because of their laminated structure, which results in the separation of the laminae by the vibratory action.

In carrying out the invention any suitable metal may be employed that is practically unaffected by the weather and temperature changes, such metals being gold, silver, platinum, antimony, tin, aluminum and the like, and alloys of such metals. Blanks cut from sheets of metal and preferably in the form of discs are subjected to a pounding, hammering or other compressing or compacting operation, whereby the metal is compacted and the air in the pores excluded. The pounding or hammering

is so carried out that the resulting diaphragm will be of somewhat greater thickness at the middle than at the periphery, there being a gradual and uniform diminution of thickness from the center outwardly. During the shaping of the diaphragm the metal spreads radially, whereby the diaphragm acquires the required stiffness or rigidity and entirely overcomes any tendency to buckle. In other words, the diaphragm is of uniformly increasing strength from the supported periphery to the unsupported center.

When the diaphragms are made of certain kinds of metals it has been found beneficial to subject the diaphragm to a bath of cyanid of potassium, which tempers and strengthens the metal. It may also be necessary in some instances to increase the stiffness or rigidity of the diaphragm, after it has been acted on by the pounding or hammering dies which produce the uniform decrease in thickness from the center to the periphery, by stamping the entire peripheral portion of the diaphragm by means of an annular die which effects a radial expansion and hence radial stress because of the flow of metal outwardly in radial directions.

In the accompanying drawings, wherein similar reference characters designate corresponding parts throughout the several views, Fig. 1 is a side view of a blank of metal from which a diaphragm is made; Fig. 2 is a plan view thereof; Fig. 3 is a view showing the blank in the initial stage being hammered; Fig. 4 is a similar view showing the final stage of pounding or hammering the diaphragm; Fig. 5 is a view showing the manner of compressing the peripheral portion of the hammered diaphragm; Fig. 6 is a plan view of the diaphragm resulting from the operation shown in Fig. 5; Fig. 7 is a sectional view of the finished diaphragm having one side flat and the other side convex; Fig. 8 is a sectional view of a diaphragm convex on both sides; and Fig. 9 is a sectional view of a diaphragm which tapers from the center to the periphery on straight lines.

tion and guiding of the stylus. This substance is provided with means for insuring the direction of the stylus into the sound groove, at its beginning or at any "lead in" point of such groove. This feature cannot be too greatly emphasized, for where the record is used in a booth with a motion picture machine projector, a stylus positioning and guiding means must itself be durable and the record at the starting point must be reinforced to withstand the resulting hard usage. By making the guide a projection above the record surface, a means by which the operator may "feel" the position for inserting the stylus in the dim or no light of the booth is afforded, and thus at all times is provided means whereby the proper positioning of the stylus is assured.

In the drawings, Fig. 1 is a plan view of a disc record with one form of the present invention applied thereto. Fig. 2 is a fragmentary portion of the disc showing the structure as shown in Fig. 1 upon a larger scale. Fig. 3 is a view similar to Fig. 2 showing a modified construction of the present invention. Fig. 4 is a view similar to Fig. 1 showing another modified construction of stylus guiding and starting device or attachment. Fig. 5 is a side elevation of the device with a portion of the record in elevation. Fig. 6 is a detail view of the pivoted stylus starting and guiding member thereof. Fig. 7 is a section taken on line 7—7 of Fig. 5.

GRAPHOPHONE AND GRAMOPHONE SOUND BOX.—

LATEST PATENTS RELATING TO TALKING MACHINES—(Continued from page 52).

REPEATING DEVICE FOR TALKING MACHINES.—Lawrence Abraham, New York. Patent No. 1,117,143.

This invention relates more particularly to a device for use in connection with disc record machines, although a device of similar nature can be arranged in connection with the records of various makes of machines.

This device is shown as applied to the well-known Victor talking machine and has for its object to adapt the machine to repeat the playing of the record by automatic means requiring no attention

on the part of the operator other than keeping the motor going. This device when properly applied will also prevent the scraping of the needle after a record is played if the operator should neglect to lift the needle from the disc.

One form of this device as adapted to the Victor machine is illustrated in the accompanying drawings, of which Fig. 1 is a plan view and Fig. 2 a side view.

TALKING MACHINE.—Charles L. Hibbard, Philadelphia, Pa., assignor of one-half to Frederick W. Hager, same place. Patent No. 1,118,902.

This invention relates generally to talking machines and has particular reference to the construction and arrangement of the sound amplifier employed in connection therewith.

The object of the invention is to simplify and re-

duce the cost of the machine, and at the same time give the reproduced sound improved tone quality and greater volume and clearness.

In the drawings—Fig. 1 is a central longitudinal section, taken on the line S¹, S¹ of Fig. 2 and Fig. 2 is a horizontal section, taken on the line S², S² of Fig. 1.

DIAPHRAGM.—James W. Owen, Lansdowne, Pa., and Albertis Hewitt, Camden, N. J., assignors to the Victor Talking Machine Co., Camden, N. J. Patent No. 1,118,675.

This invention particularly relates to diaphragms for sound recording and reproducing devices, such as are preferably adapted to talking machine construction.

The principal objects of this invention are, to provide a diaphragm that will respond with perfect clearness to the most delicate vibrations, irrespective of any atmospheric changes, and that will accurately record and reproduce both the high and low-tones and the included range with equal effect; and to provide a diaphragm which not only has the characteristics essential to the best reproduction of clear, loud and distinct tones, but combines therewith durability and stability, together with cheapness of manufacture in any desired quantities.

In the accompanying drawing, Fig. 1 is a front elevational view of the simplest form of this in-

vention; Fig. 2 is a front elevational view of a diaphragm formed of fine woven fabric; Fig. 3 is a view similar to Fig. 2, showing the fabric treated with an electrically conductive material; Fig. 4 is a view similar to Figs. 2 and 3, showing the fabric diaphragm having an integument of metal; Fig.

5 is a fragmentary transverse section view of the diaphragm shown in Fig. 4; Fig. 6 is a front elevational view of a diaphragm similar to the diaphragm shown in Fig. 2, but of a relatively coarser fabric; Fig. 7 is a fragmentary transverse sectional view of the diaphragm shown in Fig. 6 showing its interstices provided with a filling, and Fig. 8 is a fragmentary transverse sectional view similar to Fig. 7, showing a dermatoid metallic integument formed therewith.

SOUND BOX FOR TALKING MACHINES.—Alva D. Jones, Philadelphia, Pa. Patent No. 1,118,653.

In sound boxes for talking machines, as generally constructed, the sound reproducing diaphragm is detachably held in position by one or more detachable annuli of rubber or similar material and the sound box is composed of a plurality of metallic and rubber parts united together by screws, the various parts having rubber insulation between them, whereby the cost of production is greatly increased.

It is further well-known that most sound boxes in use frequently emit a metallic or scratchy sound accompanying the reproduction of sound from the sound reproducing tablet. By the present invention, the entire sound box body is constructed of a single body of rubber or similar suitable material, the main body portion of the box having attached thereto by an annular, resilient, integral hinge, a front annular bead, having a diaphragm seat therein, said bead being softer or semi-cured with respect to the sound box body, which latter is harder or cured to a harder degree than said front annular bead containing the diaphragm seat.

It has been discovered as the result of an extensive series of experiments, that rubber when properly cured to the requisite degree, possesses many characteristics of the human throat when employed for a sound reproducing agent, and by constructing the entire sound box body of rubber and mounting the diaphragm in a seat within the front annular bead, which is softer than the sound box body, there is produced a device whereby the sound delivered from the diaphragm is greatly mellowed and improved, and a clear and distinct articulation obtained, provision thus being made for the diaphragm to be yielding supported so that it has capacity for vibration adjacent to its perimeter as

well as its center, the novel sound box and its adjuncts being inexpensive to construct, sensitive in action, easily and quickly repaired and readily accessible for the purpose of inspection or replacement of parts, means being thus provided for a general improvement of the tones, amelioration of the scratchy, metallic or grinding sounds common in instruments of this class, and provision being thus made for a faithful development and reproduction of the delicate sounds ordinarily difficult to reproduce, which are reproduced by this device with a maximum degree of fidelity and faithfulness to the original.

To the above ends, this invention consists of a novel construction of a one-piece sound box composed of rubber or similar material, wherein the body portion is thickened and cured to the requisite degree of hardness, said body portion having integral with or secured to the front portion thereof, an annular bead encircling and containing the diaphragm, the material of which said bead is composed being softer than the body of the sound box, whereby the requisite capacity for the vibration of the diaphragm at its outer and intermediate portions is provided.

It further consists of a novel construction of a sound box having a one-piece body of rubber or similar material of varying degrees of hardness, within the softer portion of which the mica or other diaphragm is cast or molded, without necessitating the employment of extraneous fastening devices.

Fig. 1 represents a side elevation of a sound box for talking machines, gramophones, graphophones and the like, embodying the invention. Fig. 2 represents a section on line x-x Fig. 1. Fig. 3 represents a view similar to a portion of Fig. 2, showing the sound box on an enlarged scale.

SOUND BOX FOR REPRODUCING AND RECORDING SOUND WAVES.—Robert L. Gibson, Philadelphia, Pa. Patent No. 1,118,647.

This invention has reference to sound boxes for reproducing and recording sound waves, and consists of certain improvements.

This application is a division of application Serial No. 372,432, filed May 7, 1907.

The object of the invention is to provide a suitable manner of supporting the vibrating diaphragm with which the stylus bar connects, whereby the extreme perimeter or circumferential edge of the diaphragm will alone be held in engagement with the ring or casing of the sound box, and by reason of which the vibrations of the diaphragm will be independent of the elasticity of any intermediate supporting means in the plane of the vibrations such as have been heretofore employed and which cover a material portion of the face of the diaphragm.

This invention consists in providing a metallic ring portion which may be secured to or form a part of the case of the sound box in which the interior diameter is accurately formed, so as to cooperate with the extreme outer edge or perimeter of the diaphragm so as to hold the same definitely in position by a slight clamping action upon substantially the entire perimeter of the diaphragm, whereby the entire diaphragm is free to vibrate, while at the same time the perimeter is practically held against movement.

More specifically, this invention consists in providing the interior surface of the ring of such a construction that different portions thereof have different diameters, and by means of which the diaphragm may be crowded into position so as to be held at its extreme perimeter at one definite place within the ring, and in interposing between the perimeter of the diaphragm and that portion of the ring which it is to engage, an exceedingly thin layer of yielding material, whether of textile or other material, which while not having any material elasticity will form a better binding union between the extreme outer circumference of the diaphragm and the metal ring which supports it.

Fig. 1 is a front elevation of a sound box, embodying these improvements; and Figs. 2, 3 and 4 are enlarged cross sections showing definite manners of uniting the ring and diaphragm, embodying the invention.

READ your trade paper! Get The Talking Machine World regularly—It is worth many times to you its annual cost.

There is but one talking machine paper covering this entire industry, and it is admitted by all that it is of great aid to the dealers in every part of this country.

New economic conditions make certain knowledge necessary on the part of merchants, and in every issue of The World there is contained educational matter, instructive service, business news and technical articles which are worth many times the cost of the paper.

Thousands have been benefited by the business articles which appear in The World, and every talking machine dealer should receive it regularly.

The only way to do that is to pay for it, and the cost is trifling—a little over eight cents a month, and for that small sum The World, with all its mine of information, is at your service.

If you do not receive the paper regularly just put your dollar in an envelope and address it to the office of the publication, and you will say that it is the best investment that you have ever made.

Do not delay but send on your dollar now.

Recollect that your competitor is getting The World—getting it regularly, and in it he is securing some valuable pointers—information which places you at a disadvantage if you do not read the paper.

Do not overlook such a valuable contributing factor to your business success.

Tone Quality Universal Playing Motors of Power Precision and Individuality

These are some of the individual selling points of the Sonora. There are many other features, such as a Tone Modifier that modulates without muffling, an automatic Start and Stop, a filing system that preserves and keeps records for easy handling.

Our Policy—Exclusive Representation

Our policy is one dealer to a territory. It is an inviting proposition to be the only Sonora dealer in your city. Every prospect must come to you. And every Sonora sale is the first of a series. Satisfied customers talk about their Sonoras. Be the first in your field. Someone is going to be our exclusive dealer in your district—why not **you**?

SONORA

PHONOGRAPHS

"The Highest Class Talking Machine in the World"
"Plays Perfectly All Makes of Disc Records"

The Sonora Phonograph Corporation has been the first to market a jewel disc record in this country—the first to offer a hornless machine under \$200—the first to perfect an automatic start and stop **that works**—the first to introduce an electric phonograph that does not require a mechanic to run it—the first to make a jewel needle to play all steel needle records without injuring the records.

Other great advantages in preparation for next season. We lead in many points where others follow—why not lead with us?

The Sonora line is a complete line, with styles from \$35 to \$200. Our policy is broad and liberal. Our dealers receive a good profit and co-operation. We have created a demand for Sonora instruments and solicit correspondence from reliable representatives.

Price, \$100.00
Style "Imperial."
