Culture of the Dahlia

The Dahlia is one of the easiest of all flowers to grow and will produce more flowers than any other plant grown, if the simple cultural directions are followed closely. They can be grown in any good garden soil, but, if possible plant in an open, sunny location. Prepare the soil thoroughly by digging 12 to 18 inches deep, in the fall, if possible, and again in the spring. Plant any time between April 1 and June 1, digging holes six inches deep and from three to four feet apart. Then lay in the tuber flat on its side, the size of which makes no difference as long as it has one strong eye, or sprout. Cover three inches deep, thus leaving the hole one-half full, to be filled after plant comes up to 6 or 8 inches above the ground. Just as soon as the plants are up, the most important thing to do is to keep the soil loose and mellow by hoeing or cultivating once or twice a week. As soon as the buds appear, stop all cultivation and around the base of each plant place a shovelful of well-rotted manure. Water the beds and plants thoroughly once or twice a week and especially during the dry weather. To have the greatest success is to keep them growing as strong and sturdy as possible. Never allow the faded flowers to remain on the plant, but cut them off with as much stem as you can. Dahlias will continue to bloom until a heavy frost kills the tops in the fall, after which the tops are cut off and the roots are dug up and stored in a frost-proof cellar or basement, covering with dry sand or anything that will keep them from shriveling. Divide them in the spring after the eyes begin to show.

HOW TO KEEP DAHLIA CUT FLOWERS

Cut the flowers late in the evening and early in the morning while the dew is still on them. Burn the ends of the stems in a gas flame, or, better still, dip ends of stems in not more than three inches of boiling water for about 20 seconds. Let stems get cold and then put them in deep cold water in a cool place. The deeper cut Dahlia stems are kept in water the longer they will keep fresh.
