## PREFACE.

The task of making a portrait collection of representative men of Buffalo has not been without its difficulties. It could, at its best, be only measurably successful. Even if superhuman prescience made the work of selection reach the point of ideal perfection, there would still be the "subjects" to reckon with. The procurement of photographs and scores of points of detail involve considerations which make the inclusion of all who had been found worthy a practical impossibility.

Recognizing these facts, and giving them due weight, this faithfully limned collection of portraits of men of Buffalo is presented as one both unique and worthy. It is unique in its plan of collecting, in convenient form for permanent preservation, the "counterfeit presentments" of men who deserve to rank as typical representatives of the best citizenship, foremost activities, and highest aspirations of the city of Buffalo.

It is not claimed that this volume contains all those Buffalonians who are worthy of honor. It is frankly conceded that, to use a current colloquialism, "there are others." But the obstacles before mentioned have made it impractical to include all. Absolute perfection and inerrancy in a compilation of this kind never has been, and never will be, attained. So that neither aiming for, nor claiming, a directory-like inclusiveness, this collection modestly felicitates itself upon the representative character of its array.

Such a portrait gallery of well-known men of Buffalo cannot fail to be of interest to any person who knows anything of the city. To those who have lived in Buffalo for

## PREFACE

any considerable period, nearly every page epitomizes some historical fact or important event, some achievement, some valuable interest, "something attempted, something done." These men are filaments in the warp and woof of a grandly accomplished destiny; of the fair fabric of the city's goodly achievements. Their portraits are human documents of living interest, and the number of them here gathered gives to this volume an intrinsic value which should not be lightly estimated.

The collection will not depreciate in interest with time, but will have ever deepening historic value as these men of the present are succeeded by on-coming generations. What would a collection of as good portraits as these of—say the passengers of the *Mayflower*—be worth? So this book, which from its character is sure to be preserved, will always retain a worthy place among the treasury of unique and valued specimens of book-craft.

There is something very fascinating, to the intelligent mind, in a collection of photographs, and the usefulness and popularity of portraits were never before so widely or so universally acknowledged as now. The newspapers and periodicals recognize this by the largest possible use of photographs to illustrate their articles, and the reading public approve this use by their large patronage of those publications which present the best portrait illustrations. Such illustrations are full of suggestion, and very many people are interested by portraits who care little for printed descriptions. The latter may convey little meaning, but a good photograph always carries some interpretative hint. A large and representative collection of photographs, such as this volume contains, is valuable as a suggestive epitome of the human forces that are behind the progressive development of a prosperous twentieth century American city.

## PREFACE

The high current appreciation of portraits is the modern expression of the same exalted valuation of the human equation which made the Delphic oracle voice the injunction: "Man, know thyself," or caused the later poet to declare that "the proper study of mankind is man." These truths were never more pertinent than in our age and country, in which access to affairs and achievements is open to every man of ability and energy. Under this democratic alignment of social possibilities there is a community of interest, a civic *camaraderie* which gives each citizen a sympathetic feeling of personal touch as regards those who influence the destinies, the activities and the interests of his city.

There is, therefore, not only full justification, but laudable and useful purpose, in collating and arranging such a collection of portraits as is gathered and arranged into this present volume. This four hundred is not, like the other designated by the late Ward McAllister, an exclusive social set; it is not even claimed to be exclusive at all. It is simply an arrangement of the portraits of four hundred gentlemen deemed to be representative men of Buffalo, without in the least detracting from the just fitness of many others to be included in a like category.

This volume is, however, something more than a collection of pictures. Beneath each portrait is, besides the name, a line of identification and characterization. Brief and concise as these lines are, they serve a valuable purpose as showing how numerous and varied are the interests and activities epitomized and illustrated by the portraits. The book has a larger number of representative Buffalo men than was ever before gathered in a portrait collection of the city.

As to quality, a perusal will give convincing testimony

---

PREFACE

that the execution is in all respects worthy of the purpose. The portraits are, as a whole, excellent. The majority of them are very late, having been taken expressly for the purpose of reproduction in this volume. In these a high order of photographic work is exhibited, this being especially true of the productions of Mr. E. F. Hall, Buffalo's widely known and representative photographer, whose painstaking and skillful work has added much to the artistic merit of the volume. It has been the aim to give all the portraits in the book the benefit of the highest skill of the engraver's and printer's arts, and to produce a worthy specimen of bookmaking.

In the olden time it was usual to preface a book with an "apology." It is believed that this custom need not be revived for the benefit of the present volume, and it is hoped that nothing apologetic will be deemed necessary. These few introductory remarks are intended rather to imitate the still more ancient Chorus of the Greek plays, which was intended to put the audience in touch with the spectacle and the story, and to arouse a sympathetic interest in the performance.
