OFFICE 83 CHARTRES ST.

The New York Courier and Enquirer, once a wing journal, and now a thousagh-geing advecte of Black Republicharism, casts the position horseope of the gravital parties in the next presidential eligibles, and appears to derive infinite comfort, fings the seeming to derive wisdom from an adversary, sad we are bound to admit that the Courier and Engurer is a frank, fear-ion and asiste opponent. It is impired neither by the undying malignity of the Triess. It supports the lips publican party, in the sincere, though mustaken opinion, that the Missouri Comproneal. It is isspired neither by the unsyling making of the These, nor the contemptible hypocriety of the These. It supports the sepathican party, in the sincere, though missaken opinion, that the Missouri Compromise ought to be, and will be restored, and it proposes to go so farther than, the reinstatement of that doubting nearly. The Courier and Expurier will desire, the before the less of the present carrier. The Courier and Loquistry will desire, the before the effect of the restored the elements of fanalucium, as Canver Real to Aller the tides of the ocean. But that is its own affair. Our purpose is simply to point out to the Southern that other parties.

We are told by the Courier and Exquirer that within a few days the friends of Mr. Fillmork, at Washington, have given the most emphatic assurances to the Southern Know Nothings, that in the event of his election to the Presidency, he will not, under any contingency, countenance, or be a party to, any legislation which shall disturb that period of the Kansas-Nebrask act which re-

Know-Nothings, that in the event of his election to the Presidency, he will not under any contingency, countenance, or be a party to, any legislation which shall disturb that portion of the Kansaa-Nebraska act which repeals the Missouri Compromise. And that aleet adds that these assurances have been received in good faith by the Southern wing of the American party in Congress, and that on this platform, whe latter feel certain of carrying the Whig states of the South. We are very glad to hight that Mr. PILLINORE'S friends have been enabled to give such assurances to the South, though the authority of the New York Courier and Empairer was scarcely needed as a guarantee of the fact. The past history of Mr. Fillinors is worth from Gov. Shannon, by the U. S. Marshal, with the several others worth from \$400.

We learn, says the Bt. Louis Republices, by agentleman from Kansas, that the new Legistry as understood that write had been received on that order had been received at Leavenworth, from Gov. Shannon, by the U. S. Marshal, Mr. Jones, requiring his presence to execute the write. This was on Monday last, and it is probable that it has been done. A despatch from Boouville, received yesterday, says: "All is quiet in Kansas."

Long Fillow in Distance.

Long Fillow in Distance.

Long Fillow in the sum of the publishers' associated with quaritz—with several others worth from \$400. scarcely needed as a guarantee of the fact. The past history of Mr. Fillmonn is worth more than the promises of his friends. In realihis profound respect for the constitution, and the laws made in pursuance thereof. Admitting the entire truth of the Courier

That Mr. Fillmons will stand on a par with the nominee of the Democratic Convention, who is undoubtedly to be Struck A. Docu. Las; that the two will divide the South; that no friend of freedom can possibly vote for either, and that as an inevitable consequence the numinee of the Republican party—be two he may—will make a clean sweep, and be elected President. The Courier and Enquere holds that the only effect of Mr. Fillmong's candidature at the Korth, will be to diminish the strength of the Democrata, and thus augment the chances of the Republicans—all of which, though very agreeable to that iournal, seems to us the abserted and wildest conjecture. In drawing its deductions our catemporary's logic is by means faultless. It appears to imagine that the Republican party is either gaining strength, or at all events set losing it. The converse of both proportions is far nearer the truth. The Republicans have not achieved a single victory since the present session of Congress. They were beaten in Chicago the other day, where when the inchieved a single victory since the present session of Congress. They were beaten in Chicago the other day, where who were wont to number their majorities by thousands. They are in a decided minorative the constitution, secupt those of New England. Time bids fair still more seriously is diminish their immbers and power. Thousands who in the-first effervescence of indignation upon the repeal of the Missours Comprense, linked their fortune with the Froesolifaction, are now either coastituted that the sum of the Republicans are pregnant with danger to the safety and other who might sustain the Republicans are pregnant with danger to the safety and other who might sustain the Republicans are pregnant with danger to the safety and other who might sustain the Republicans are pregnant with danger to the safety and other who might sustain the Republicans are pregnant with danger to the safety and other who might sustain the Republican party in a State contest, involving merely leading the prop rectional animosity. Recent events, there-ere, equaly with the ceol inductions of rea-on, lead irresistibly to the belief, that the

fore, equally with the cool inductions of reason, lead irresistibly to the belief, that the Espublican party is weaker now than it has feen at any period since the passage of the Kamma bill; and that the success of that party in the next Presidential election is, if not absolutely and utterly out of the question, one of the most remote of all possible contingencies.

The equation put forth by our New York-cool temporary, that the nomination of Mr. Filtmona divides the l'emocratic party, is to a certain extent probable enough. In the South this will certainly take place, since were the American party without a nominee, we presume the Administration candidate would run without opposition, and would be supported unanimentally in the South, as, under all circumstances, preferable to a Black Republicane. In the Morth there will necessarily be three tickels, and as the Elack Republicane have never yet succeeded save by a condition, and have been beatten wherever they stood alone, either by the Democratic or the Americans—generally by the hatter, witness New York and Massachusetts—it may be subly day to predict which for the Democratic or the Americans—wear early to the Democratic or the Americans—secretally to the Democratic or the Americans—wear early to the Democratic or the Americans—secretally to the Democratic or the Americans—wear early the Democratic or the Americans—secretally to the Democratic or the Americans—secretally the American early day to predict which States are likely to go for Fillmorg, which for the Democracy, and which for the Black Republicans; but it is not difficult to perceive that in the triangular contest in preparation at the North, the Black Republicans are bound to faire the Rinck Republicans are bound to faire the Republicans are bound to faire the state of the Courier and suns.

To this is to be added 39 vessels of war, and where for the Black Republicans are bound to fare the first Republicans are for the first Republicans are first Republicans. The first Republicans are first Republicans are first Republicans are first Republicans are first Republicans. The first Republicans are first Republicans are first Republicans are first Republicans are first Republicans. The first Republicans are first Republicans and the first Republicans are first Republicans
