指 數 變 動 說 明

本月物價，承燈節漲勢躊躇益烈，詳情如下：

躉售國貨價格總指數相當基期327,614倍較二月上漲56%

躉售國貨及外國貨價格總指數相當基期 326,677倍較二月上漲
55%

零售國貨價格總指數相當基期384,785倍較二月上漲54%

機關辦公用品價格總指數，相當基期265,203倍較二月份上漲
51%

就分旬而言，上旬普昇，中旬猛漲，下旬緩晉。

蓋燈節前後東北局勢危急，游資大量入關經平津南行，數以萬億計，上海物價步高，南粉北運，成本吃重，青黃不接之季復將屆臨，糧食率先趨高。而中紡配售布價，屢有提升，外匯率亦數度調整，對市場人心頗有刺激。中旬以後金管局採取緊急措施，停止一切貸放，漲風稍平，下旬平緩綏戰局緊張，其他食品提高較多，至主要糧食，則因配售已入行動階段，投機者相率觀望，糧價乃維持小康局面，其他物價未釀巨波。

若就分類而言，本月零售物價總指數仍較躉售總指數為高，但其上漲率則略遜。機關辦公用品，無論就總指數及上漲率均遠不及以上各種指數。又躉售物價指數中，金屬類晉居第一位，食物類位次退為第二。零售物價中衣著類亦趕上食物類居首位，機關辦公用品中印刷類仍遙遙領先，維持王座。

公務員生活費指數本月奉 國府主計處令修正查編辦法，三十七年指數，茲就修正辦法追查重編，總指數相當北平基期352,151倍，較上月上漲38%較零售物價為高然較躉售物價為低。至南京基期之換算，因修正辦法後之南京基期資料不齊，姑從略。依估計，南京戰前生活費用約高出北平二成，故如以南京基期換算，應較上項指數低一成半左右

Explanations of the Fluctuations of the Indices

The commodity prices, in continuing the upward tendency of last month, are going up furiously. Details are given as follows:

The general index number of the domestic wholesale prices on the Peiping basis is 327,614 times or is higher than that of February by 56%.

The general index number of the domestic retail prices on the same base is 326,677 times or is higher than that of February by 55%.

The general index number of the domestic and foreign wholesale prices on the same base is 354,783 times or is higher than that of February by 54%.

The general index number of the office requisites prices on the same base is 265,203 times or is higher than that of February by 51%.

Reckoned by ten-day period, price in the first period went up generally; in the second period they went up furiously; while in the last period, they became somewhat more stabilized.

During the Lantern Festival the war situation in the North-eastern provinces was critical; a tremendous amount of idle funds went Southward through Peiping and Tientsin. It sent up prices in the Shanghai market and the cost of the flour from South to North became higher. The fact that the harvest season is still several months ahead caused the prices of cereals to shoot up in the first period of this month. After the second period, the prices of cloth were sent up by the China Textile Co's marking up its sale prices and by the repeated readjustment of the official rates of foreign exchange. These two factors had great stimulating effects on the market. The Peiping Branch of Financial Control Bureau, in the meanwhile, began to intervene by drastic measures in exercising control and imposed restrictions on giving credits, with the result that the rising of prices became somewhat stabilized. During the last period serious war situation developed on the Peiping-Suiyuan Line the prices of other kinds of food became comparatively higher; but the prices of staple cereals were more stabilized owing to the check on the speculators by the introduction of general flour-rationing system. Therefore, there has not been much change in the market at the end of the month.

Reckoned according to classifications, the general index number of retail prices this month is still higher than that of whole sale prices although its increasing rate is somewhat moderate. The indices of official requisites, both in the general index and in the increasing rates, are far less than different other indices as mentioned above. Among the indices of the wholesale prices, the metals easily come first and the food second. Among the retail prices, the index of cloth is overtaken food and has come to be the first. In the official requisites, the index of the printings is still standing in the first and secured the premier place.

As to the general index number of the cost of living of official functionaries, the method of compiling is readjusted this month as ordered by the Directorate General of Budgets, Accounts and Statistics. The indices of 1948 have therefore been re-compiled. The general index is, 352,151 times on the Peiping basis or is higher than that of February by 38%. The general index number is higher than that of retail prices and is lower than that of wholesale prices.

The comparison with the Nanking basis has been omitted because details are unavailable after the new method of compiling is adopted.

However, it is estimated that the living cost of Nanking is higher than that of Peiping by 20% before the war, and therefore, if the Nanking base is taken for comparison it should be 15% lower than the indices as explained above.
