Abrasion of steels	553	Bicking, W. Martin I O' Learn Merle D Chain	l'uge
Absorption measurements. Dunne's method	517	und, Further study of paper-coating min-	
Absorption, sound, measurement of Accelerated tests of asphalt	957		1189
Acid, Suiphulic, adsorblion of by leather	247 1109	Binocular v. monocular vision for comparing incandescent lamps— Bismuth-lead alloys, properties of	1101
Acres, S. F., A Study of the method for titrat-		Bismuth-lead alloys, properties of	1161
ing aldose sugars with standard iodine		Bismuth-lead alloys, properties of Bitner, F. G., Ronald Bulkley and, A new consistence of a second strength of the second secon	2000
and alkali Addition agent, use of phenol in copper elec-	1063	sistometer and its application to greases and to oils at low temperatures	0.0
troty Ding Somitions	767	Surface tension of soan solutions	83
Addition reactions of hydrocarbons use in	101	and its relation to the thickness of ad-	
determining formulas of	867		951
Adhesives, further study of paper-coating minerals and	1189	Blum, W., R. O. Hull and, Addition agents in copper electrotyping solutions	767
Adsorbed films, thickness of	951	-, II. R. Moore and, Conductivity and	491
Adsorption of Sulphuric acid by leather	1109	density of chromic acid solutions	255
Aerodynamic data on cylinders Aircraft beacon, use of in blind landing	653	Boeckner, C., Resonance and quenching of the third principal series line of caesium.	13
Aircraft beacon, use of, in blind landing. Aircraft, guidance of, to airport by use of	897	F. L. Monter and, Effects of gases on	10
tuned-reed visual indicator	897	photo-ionizion of caesium by line absorp-	
high-frequency radio beam for blind land- ing of-		-10П	399
instruments, use of, in blind landing by	897	line absorption of caesium by	51
radio	897	-, and F. L. Mohler, Photo-ionization of	-
landing of, in fog, by radio	897	caesium vapor by absorption between the series lines.	071
navigation of, in fog, by radio	897	Bogue, R. H., L. T. Brownmiller and, The	831
thermometers, thermographs, and baro- graphs, lag of	695	X-ray method applied to a study of the	
2-course radio range for blind flying of	897	constitution of Fortland cement.	813
Airports, blind landing radio equipment for	00=	Bolts, nuts and, note on the electrical resistance of contacts between	575
use atlocation of blind landing radio apparatus at_	897 897	Brale, used in Rockwell machine. Bright, II. A., and G. E. F. Lundell, Determination of carbon in high sulphur by	19
means of finding and landing at, by radio	897	Bright, II. A., and G. E. F. Lundell, Deter-	
trame control at, during fog	897	direct combustion	943
tuned-reed indicators for guiding aircraft to,	207	Brinell machine, brale used in	19
in fogAlloys, bismuth-lead	897 1085	Brinell number, error of conversion into	
fusible	1085	Rockwell number	19 19
lead-tin	1085	relation to tensile strength relation to Rockwell number	19
Anhydride, anhydrofructose and difructose,	1085	Bronze bearing metals with zinc, phosphorus,	
note on the individualities of	733	nickel, and antimony	349
Anhydrofructose anhydride, note on the in-		Bronzes for bearings Bruun, Johannes II., and Mildred M. Hicks- Bruun, The isolation of the isomers of	349
dividualities of	733 775	Bruun, The isolation of the isomers of	
Arc spectrum of CrAsphalt, accelerated tests of	247	nexame from petroleum	933
Audio-frequency generator, use of, in radio		Brownmiller, L. T., and R. H. Bogue, The	
Audio-frequency generator, use of, in radio station work	647	X-ray method applied to a study of the constitution of Portland cement.	813
Audio-frequency measurement.	237	Bulkley, Ronald, and F. G. Bitner, A new consistometer and its application to	
В		greases and to oils at low temperatures	83
		-, Surface tension of soap solutions	00
Ballif, P. S., H. T. Dryden and, The characteristics of two-blade propeller fans	***	and its relation to the thickness of ad-	0
Barographs, thermometric lag of aircraft	185 695	sorbed films Bunting, E. N., Phase equilibria in the	951
Bases, subway column, compressive tests of		Cr ₂ O ₃ -SiO ₂	325
strength of	619	C	
Beacon, aircraft radio direction, for runway	897	Caesium, effects of gases on photo-ionization	
high-frequency radio-beam type, for blind	001	of, by line absorption.	3 3
landing of aircraft	897	ionization by light between series lines	8-1
location of runway localizer types of, at	207	photo-ionization of by line absorption	7.1
airportsBeacon marker	897 897	resonance and quenching of the third principal series line of	13
Beam, directive radio, use of, in blind landing		Calcium chloride, compound with d-glucose	741
of aircraft	897	influence of, on optical rotation of sugars	741 585
Bearing bronzes Bearing, bronze, wear of	349 349	Calked seams, copper roofing	411
Bearing bronzes with phosphorus, zinc, nickel		Calorie, mean Carolimeter, saturation	411
and antimony addition	349	Calorimeters for water and steam.	451
Bearing metal, sampling of	89 1 349	Carbon content, determination of in high-	943
Bearing metals Beat notes, use of, in frequency measurement	647	Carroll, Burt II., and Donald Hubburd, A com-
