BUTTER RECORDS OF JERSEY COWS.

In offering this list of butter records to the public, I have tried to have it correct, and believe it to be so. Any errors found in it, if reported to me, as also any tests not included in it, will in the first case be corrected, and in the last, find due place in a future edition. When a name is preceded by a star, the test is a *rated* one of less than 7 days. I will be thankful for criticisms and corrections, and for full reports of new tests, which will be a more certain way of their being in a future edition than trusting to my seeing them in print. The list of sires includes every one that appears, to the fourth degree, in the pedigree of every cow who has made 14 lbs., or better, in 7 days. The index includes every known 14 lb. cow. Those which do not refer back to some page in the book are imported cows whose pedigree is unknown, so that the index is a complete alphabetical list of every 14 lb. cow with her H. R. number and her record. In reading records, the left of the point is pounds, the right is ounces.

INDEX.

NOTE.—Having mislaid some papers on which I had notes of tests, with the authorities, I am obliged to leave some spaces blank, or delay the printer too long to hunt them out. In the next edition of this work, about October, I shall try and have as many of the tests backed by affidavits as possible, and request that new tests sent me for publication then, be in that form. In reading the index, first is the name, next H. R. number, next (*in brackets*) the record, then the pages where the name will be found in the body of the book.

Imp. by John T. Norton.

A worthy representative of a noted family, solid silver gray, shading to black on neck and legs, with full black points, good rudimentary teats, well placed; a curviline escutcheon and a grand constitution, which is a family trait, his dam having a record of 18 lbs. in 7 days, 5 months after calving, when 12 years old, and his sire was in service at ten years of age. His disposition is tractable, he is a quick performer and a sure getter.

His sire, St. Helier 45, has given 50 per cent. or more of his blood to 26 cows that have tests of 14 lbs. or over, the majority of which were made on ordinary feed, many of them being on grass alone.

The average butter tests of his dam and his two full sisters, 20 lbs. 3 oz. each.

Service fee \$50, to be paid before the cow is removed. No charge will be made for keep for cows in milk, others \$2 per week. All cows at owner's risk, and cows failing to hold to service may be returned free of charge except for keep as above.

Auction sales superintended—a service embracing the selection of a suitable auctioneer, the preparation of pedigrees, catalogues, advertisements, newspaper notices, etc., etc.

Designers and publishers of the most approved forms of pedigree blanks. Price lists furnished on application.

N. B.—We are always prepared, through the other departments of our business, to execute commission orders for every description of goods, implements and machinery.

THE PERFECT MILK PAIL.
A MILK PAIL, STRAINER AND STOOL IN ONE.
 CANNOT BE KICKED OVER BY THE COW; IS EASY TO KEEP CLEAN, AND
 HAS HAD FIRST PRIZES AWARDED WHEREVER EXHIBITED.

"Milk cannot be too pure. It is important for the health, especially of children, that Milk be as pure as possible."

Nothing absorbs odors quicker than Milk.

The "Animal Odors" and "Evil Flavors" in Butter, Cream and Milk are in great part due to the exposure of the milk, during the milking, to the atmosphere of the Stable.

Dirt and foul air cannot taint the Milk drawn in this Pail,

And filthy Milkers are prevented from dipping their fingers in the Milk.

This Pail is made of the best tin plate, will bear weight of 300 lbs. or over, holds 14 quarts; its cover makes a seat for the milker; the funnel which receives the milk is supported by a rubber tube which returns it to its position if moved by kicks from the Cow. A strainer is placed in the lower end of the tube. Any impurity falling into the funnel can at once be cleansed, if necessary, by a stripping of milk. The height of the funnel may be gauged to suit different Cows.

Col. MASON C. WELD, as good authority as the best in this country, writes: "Jan. 27, 1884. I have been using 'The Perfect Milk Pail' in my dairy for several years, and have no idea I shall ever use any other."

If you desire purer, more wholesome and fragrant Milk, Cream and Butter than you have ever had before, send at once for
