MASSACHUSETTS

ANNUAL REPORTS

1922

Somerville Press Print. 1923.

REPORT OF THE CITY AUDITOR.

Office of the City Auditor,

January 15, 1923.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville.

Gentlemen:—In accordance with the requirements of Section 3 of Ordinance Number 44, I herewith submit a report of the expenditures and receipts during the year 1922, showing in detail the appropriation and expenditures, and the receipts from each source of income. Also a statement of the funded debt and temporary loans, table relative to maturities and interest, a balance sheet showing the assets and liabilities at the close of the fiscal year and a statement of the treasurer's cash.

Respectfully submitted,

Howard E. Wemyss,

City Auditor.

REPORT OF THE TREASURER AND COLLECTOR OF TAXES

Somerville, Mass. January 19, 1923.

To the Honorable, the Mayor and the Board of Aldermen of the City of Somerville:

Gentlemen:

I herewith present the annual report of the City Treasurer and Collector of Taxes for the year 1922.

Respectfully submitted,

Joseph S. Pike,
City Treasurer and Collector of Taxes.

Report of the Trustees

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:

Gentlemen: The fiftieth annual report of the trustees of the public library is herewith respectfully submitted; being the report of the librarian and tables of statistics of operation.

Very respectfully,

The Board of Trustees, by

THOMAS M. DURELL,

President.

REPORT OF THE LIBRARIAN

Gentlemen of the Board of Trustees:

The fiftieth annual report of the Somerville Public Library, for the year 1922, is herewith submitted.

A semi-centennial year is deemed by common consent an appropriate time to pause in the pursuit of any enterprise and to review its progress. The following account of the founding of our library, and of the more important features of its development, are therefore incorporated in this report for the convenient information and use of the citizens of Somerville who are the library's patrons and supporters.

FOUNDING OF THE LIBRARY

The great movement that swept the country in the nine-teenth century, based upon an insistent demand for educational facilities to supplement the decidedly limited and formal program of the public schools, ultimately crystallized into the free public library of today. Its first manifestations appeared shortly after the American and French revolutions had spread broadcast the new ideas of freedom and enlightenment. Hundreds of association libraries were founded by pooling personal resources. They flourished for a time, some to disappear, others to grow strong and become permanent. The second phase of the movement, municipal recognition of the library as a necessary component of the public educational establishment, and its consequent support by taxation, first showed itself as early as 1833, but did not begin to make real headway until the middle of the century.

Great impetus was given to the movement by the founding of the Boston Public Library in 1854. During the decade of the sixties the project of instituting a public library in the town of Somerville was discussed by progressive citizens. Foremost and most persistent among its advocates was Edward E. Edgerly. Due largely to his efforts the growing sentiment was crystallized into action in 1869. The first definite step was taken by Henry M. Brown, acting as the representative of the Somerville High School Association, who in that year wrote to the Board of Selectmen and to the School Board inviting these bodies to co-operate with the High School Association in the establishment of a public library. The selectmen appointed a committee of three to confer with a similar committee from the association. The joint com-

mittee consisted of Austin Belknap, Horace Haskins, and Francis Houghton, selectmen, and Edward C. Booth, Henry M. Brown, and George S. Littlefield, of the association. The same committee was reappointed the following year and prepared a plan for founding and operating a public library. In accordance with this plan the executive committee of the High School Association and the Board of Selectmen held a joint meeting and elected the following Board of Trustees, three each from the Board of Selectmen, the High School Association, and the citizens of the town at large, namely: Austin Belknap, Henry M. Brown, Samuel A. Carlton, Horace P. Hemenway, Oren S. Knapp, John P. Marshall, Edwin Mills, Frank H. Raymond, and Columbus Tyler.

At a town meeting held April 29, 1871, the town "Voted, that a free library be established" and appointed a committee consisting of the above-named board, and Russell H. Conwell, Joshua H. Davis, Samuel C. Hunt, George S. Littlefield, Rev. Charles Lowe, Isaac Pitman, and Quincy A. Vinal, "to re-

port a plan for operating the same."

The committee was at first organized with Rev. Charles Lowe, chairman, and George S. Littlefield, secretary. The absence in Europe of Messrs. Lowe and Marshall led to the substitution in their places of Rev. G. W. Durell and John R. Poor. Austin Belknap was elected chairman in place of Mr. Lowe. The report of the committee embodying its plan for a library was adopted by the town meeting of November 7, 1871.

October 21, 1872, the town having in the meantime been granted a city charter, the City Council elected the following Board of Trustees of the Public Library: For three years, John P. Marshall, Austin Belknap, Charles A. Guild; for two years, Quincy A. Vinal, Michael J. Canavan, Edward C. Booth: for one year, George O. Brastow, William H. Furber, and Selwyn Z. Bowman. On November 14, following, the new board organized by the election of John P. Marshall, president, and Edward C. Booth, secretary. On November 19 Isaac Pitman was elected librarian, and on May 1, 1873, the library was opened in a room in the City Hall now occupied as the office of the Board of Assessors. There were upon the shelves at the time of opening 2,384 volumes.

TRUSTEES

For membership on the Board of Trustees Somerville has always demanded her best, and they have generously responded by devoting time and intelligent study to the production of the best possible service. The list is a long and honorable one. It is possible to give here only the names of the presidents of the board and their respective terms of service:

| John P. Marshall, | 1872 - 1875 |
|---------------------|-------------|
| Charles H. Guild, | 1875 - 1876 |
| W. G. Tousey, | 1876 - 1880 |
| Henry H. Barber, | 1881 - 1883 |
| Charles S. Lincoln, | 1884 - 1899 |
| Charles A. West, | 1900 - 1906 |
| Edward C. Booth, | 1906 - 1909 |
| Thomas M. Durell, | 1910 - |

LIBRARIANS

The first librarian, Mr. Pitman, served in that capacity until June 1, 1875. Before his appointment he had been a partner in a mercantile house in Boston, and his business experience doubtless stood him in good stead in laying well the foundations.

He was succeeded by his assistant, Miss Harriet A. Adams, who for eighteen years tirelessly carried on the work. On June 1, 1893, she was succeeded by John S. Hayes. Mr. Hayes had previously been a teacher. He was a man of culture, a book-lover, and happily possessed the additional qualities of energy and enthusiasm. The library throve under his direction. It was by his initiative that relations were established with the public schools, and that the Library Bulletin was started. His sudden death on March 7, 1898, was felt as a great loss. On May 16, following, Sam Walter Foss was elected librarian.

It detracts nothing from the record of faithful and efficient services of other holders of the office to say that Mr. Foss was by far the most notable of all Somerville's librarians. His name was already a household word among the American people, who knew and loved his homely verses. He was a shining exception to the proverb that "A prophet is not without honor, save in his own country," for he enjoyed the crowning distinction of being beloved in his own community. His administration was marked by a great expansion of library privileges and consequently of the popular use of the library. He died February 26, 1911.

May 5, 1911, Drew Bert Hall succeeded to the office of librarian. Mr. Hall came to Somerville from the Millicent Library, of Fairhaven, Mass. He was a graduate of Bowdoin

College, and of the New York State Library School. During his incumbency the present Central building and the East Somerville Branch building were built, the methods of administration were brought to the forefront of modern library practice, and the privileges further liberalized. May 1, 1917, Mr. Hall resigned, and was commissioned captain in the United State army, in which capacity he served through the war.

The present incumbent, George H. Evans, became librarian May 1, 1917. He is a graduate of Dartmouth College, and had previously been connected with the libraries of that institution, of Brooklyn, N. Y., and of Woburn, Mass.

LIBRARY BUILDINGS

The library outgrew its original quarters in the City Hall after an occupancy of twenty years, during which enlargements had used up all the available room. In the years 1883-84 the first Central Library building was erected on a lot next to the City Hall. Exclusive of land the cost was \$28,-338.45. The new building was dedicated by appropriate exercises, the principal feature of which was an address by Justin Winsor, librarian of Harvard College, and undoubtedly the leader of the American library profession. In 1895 the library was enlarged by the addition of a steel stack.

By 1911 the housing problem had again become so acute that the trustees took active steps to secure another building. As a result of their efforts the city agreed to take the old building for city offices, making for it an allowance of \$45,000, to which Mr. Carnegie added \$80,000. Edward L. Tilton, of New York City, was appointed architect. Mr. Tilton was already a successful designer of libraries, among others to his credit being the beautiful structure in Springfield. The new building is the result of careful study of administrative problems, and so successfully were they solved that the Central Library has earned a national reputation. It is frequently visited, and its plans studied by Boards of Trustees who are planning buildings. It was dedicated December 17, 1913, and opened for public use in January following.

On May 27, 1909, the building which houses the West Somerville Branch Library was opened for the accommodation of the people of the rapidly growing west end of the city. The cost of erection and furnishings, \$25,000, was met by a gift from Andrew Carnegie. The dedicatory address was made by Horace G. Wadlin, Librarian of the Boston Public Library. Its circulation rivals that of the Central Library.

The East Somerville Branch Library was first opened February 1, 1912, in a rented store at 153 Perkins Street. The patronage was immediate and large. After a few years the Carnegie Foundation came to the aid of the city and provided the sum of \$18,000 for a building, and on March 30, 1918, its present modern and attractive building was opened at the corner of Broadway and Illinois Avenue. The opening of the new building was immediately followed by a large increase in registered borrowers and circulation.

On March 4, 1912, the Union Square Branch was opened in one half of the first floor of the old Prospect Hill school-house at the corner of Bonner Avenue and Washington Street. It now occupies the entire floor, and in spite of having been doubled in capacity it can offer standing room only during afternoon and evening hours. In addition to a goodly number of adults it has a daily attendance in school term of from

400 to 800 children.

TRUST FUNDS

The Isaac Pitman Funds

The Isaac Pitman funds were established by Mr. Pitman's daughter, Harriet M. Loughlin, in memory of her father.. In 1897 she gave \$1,000, known as the Isaac Pitman Poetry Fund, the income to be expended for the purchase of poetry. In 1900 she also established the Isaac Pitman Art Fund by the gift of \$4,000, the income of which is to be expended by the "Trustees at their discretion in the purchase for the use of the library of works of art, illustrative, decorative, or otherwise." A condition of the deeds of gift of both these funds is that "The annual appropriation by the City Council for the use of the Library shall not be diminished in consequence of the donation."

The Wilder Children's Fund

In 1908 \$100 was given by Frances A. Wilder, a former teacher in Somerville schools, to establish a fund, the income of which is to be used for the purchase of children's books.

The Martha R. Hunt Funds

These funds were established in 1911 by the gift of \$15,000 from Martha R. Hunt. Of this amount it is directed that \$3,000 shall be expended by the Trustees for art purposes

for the Library, and shall be known as the Martha R. Hunt Fund, Art. The remaining \$12,000 shall be known as the Martha R. Hunt Fund, Books. From it the income only may be used for the purchase of books.

S. Newton Cutler Fund

This fund was established in 1912 by a legacy of \$1,000 from S. Newton Cutler. The income only is to be used for the purchase of books.

The Arthur A. Smith Fund

This fund of \$5,000 was established in 1920 by bequest of Arthur A. Smith, of Somerville. The income is to be at the disposal of the Trustees. This fund is not yet available.

LIBRARY SERVICE

The library is a constituent part of the educational establishment of the city. As such it aims to maintain a great reservoir of information, with trained and efficient experts to administer it, which shall provide material for students and workers in all walks of life. It affords a continuation school for those who are ambitious to supplement a limited or defective education. It is a laboratory for study and research. It is a community centre for the betterment of social conditions, and the making of intelligent American citizens. It offers a centre of sane recreation for leisure hours. not possible to estimate or to measure by finite units the results of such work. They are expressed only in higher standards of life. Nevertheless attention may be called to certain significant figures. It is estimated that not less than 30,000 citizens are either occasional or habitual users of the library. There are at their disposal 115,000 volumes in four conveniently located buildings. During its half-century of service the library has made home loans of books to the people of Somerville of more than 12,000,000 volumes. This is outside work, and does not take into account the vast amount of study and research done within its walls. Such a figure is beyond the power of the human mind to grasp. Who can doubt the beneficent results of the stimulation of the ambition, the intelligence, and the bettered ideals of life of the individual, so many times multiplied?

THE YEAR 1922

The record of the year 1922 does not differ materially from that of the years immediately preceding it, save that there is evident a slow recovery from the impairment of service occasioned by war conditions. The problem of staff recruitment is perhaps less difficult, due largely to the success of the Training Class, to which specific reference will be made in later paragraphs. Great credit is due those members of the staff who, in the face of substantial and even flattering offers from other sources, have stood by through the trying times and kept the framework of our organization intact with a steady purpose and a superb loyalty beyond praise. The thanks of our citizens who use the library, and of many others who, though they use it but little believe in it as an educational force, are due to the Mayor and City Council for the restoration of an appropriation for book purchase sufficient to arrest the decline of our collection.

THE STAFF

Changes in the personnel of the staff during the year are as follows: appointments to the Graded Service; Nelly Cumming, Cataloguer in charge of the department, Winnifred Smith Russell, Senior Assistant at Central, Jean P. Hennessy, Junior Assistant at Central, Ruth G. Markle, formerly in our service, 1st Assistant at East Branch; from the Training Class, Mildred A. Bowley and Alice W. Hamilton, Junior Assistants at Central, Irma Traphagen, Junior Assistant at West Branch, Eleanor Atherton, Senior Assistant at East Branch; in the Ungraded Service, Louise Joyce at Central and E. Leola Srout at Union Square Branch. Elsie K. Wells, Senior Assistant, and Arthur Hayes, Page, were temporarily employed at Central.

The library has received the resignations of Edna C. Woodbury, High School Librarian, Lucy W. Harris, School Librarian, Clara S. Hawes, Cataloguer, Dorothy S. Bamford, 1st Assistant at East Branch, Ruth L. Swett, Children's Librarian at West Branch, Eleanor A. Randall, Senior Assistant at Central, Eleanor Atherton, Senior Assistant at East Branch, and Bernice L. Watt, in the Ungraded Service at Central.

The following promotions have been made in regular course under the provisions of the Scheme of Service: Katherine I. Eaton to Children's Librarian at Union Square Branch, Lucy W. Harris to the First Grade in the School Department

and Orpha B. Matheson in the Reference Department, Marion J. Meserve, Eleanor A. Randall, Muriel Stowell, and Eleanor M. Dean to the Second Grade.

Two changes of organization deserve mention. All work with the graded and Junior High schools has been merged with the Children's Department. This department will now have five units, namely; the division of graded and Junior High schools, the Central children's room, and the children's room in each of the three branches. Miss Gladys Hastings has been promoted to the head of the department, with the title of Supervisor of Children's Work. In addition to the general supervision of the department, she retains the position of Children's Librarian at Central, and also conducts the instruction in children's work with the Training Class. Her promotion is a recognition well-earned by work of consistently high order both in spirit and performance.

The Somerville High School and the library have dissolved financial partnership in the employment of the High School Librarian, which has been taken over by the High School. The library will continue to place its resources freely at the disposal of High School students and teachers. Edna C. Woodbury, High School Librarian, formerly attached to our staff, therefore becomes a member of the city school department.

INSTRUCTION OF SCHOOL CHILDREN

A concerted attempt is being made by school and library to carry over from school life into the succeeding years the idea that the library is a source of information and help upon all problems common to our daily life, as well as an agency for culture and recreation. This idea is inculcated not merely by the home loans of books from the school rooms, but is definitely taught to the pupils. Instruction in the use of the library begins in the Junior High schools. Members of the upper class meet instructors from the library either at the library or at the school. They are told the simple ways of finding material by use of the catalogue and reference Supplementing this class instruction are illustrative test problems. When the same pupils reach the High School the following year they are given some review of this together with additional instruction in continuation. Visits to the library are also made by groups from the High School under guidance of the High School Librarian. The latter comes to the Central Library every afternoon after school where she

is ready to meet and assist pupils whose work sends them here. The result of these efforts is becoming evident in an increasing intelligence in the pupils' use of the library.

NOTABLE ADDITIONS

The Trust Funds were given by their donors to enable the library to make purchases of an unusual nature which it could not reasonably hope to make from the ordinary appropriations allowed by the city. Thereby they perform a valuable service. During the past year notable additions have been derived from this source. The impoverishment of many of the educated people of England due to the war has brought into the market some exceptional offerings. Our library has been able to secure from the sale of a private library in England a set of four quarto volumes containing reproductions of the portraits painted by the famous English artists, Thomas Gainsborough, Sir Joshua Reynolds, and Sir Henry Raeburn. In the same manner we also picked up in three portfolios the complete etchings of Rembrandt, over 1,600 in number. Another interesting addition is the purchase from the well-known house of Alinari, of Florence, Italy, of eighty-six copies of famous paintings mostly from Italian galleries and churches. These are not produced by any of the usual lithographic processes, nor are they colored after printing. They are actual color photographs. The colors are undoubtedly truer to the originals, inasmuch as they do not depend for accuracy upon the human eye, but upon a purely scientific process which registers the actual color values. None of these expensive books may be taken from the library, but they may be used freely by responsible people within the building.

The library is also indebted to the family of the late S. Newton Cutler, donor of one of our funds, for a gift from his library of 193 volumes; also to Dr. Charles L. Noyes, for many years until his recent retirement an active and valued member of the Board of Trustees, for the gift of 225 volumes.

FIRE RISK AND INSURANCE

After many years of good fortune the library suffered the loss of 265 volumes by fire and water damage while at the bindery. A reasonably satisfactory adjustment of the loss was effected by compromise but the episode served to call attention to the general subject of fire risks. After consider-

ation of the subject the Trustees directed the Librarian to place insurance upon library books while at the bindery, and also upon the collection housed in the Union Square building, a wooden structure. Two policies have accordingly been secured, one of \$5,000 upon the Union Square collection, and one of \$1,000 upon books while at the bindery.

THE TRAINING CLASS

The Training Class began its course of instruction on Monday, October 2, with the following members: E. Marion Akerley, Helen Farrar, Elsie L. Knox, Corinne Mead, and Alice D. Williams. This is an intensive study course of twenty-six weeks, with illustrative practice work. A brief summary of the courses of instruction may be of interest.

- American literature to 1870. 20 lectures by Prof. R. E. Rogers of Massachusetts Institute of Technology.
- Reference work and source books of knowledge. 24 class sessions with illustrative and test work.

Miss Eames.

Children's work. 24 class sessions with illustrative and test work. Reading and review of at leat 50% of a selected list of 44 standard children's books.

Miss Hastings.

Operations of the charging desk. 12 class sessions with illustrative and test work.

Miss Whipple.

Classification, cataloguing, accessioning and filing. 12 class sessions with illustrative and test work.

Miss Bunker.

Book review and selection. 12 class sessions with illustrative and test work. Credit given for attendance at John Claire Minot lectures.

Miss Mayhew.

Current events of the world. 12 class sessions.

Mr. Evans.

Penmanship and printing. 6 class sessions with additional practice work.

Mr. Evans.

Book mending. 4 class sessions with additional practice work.

Mr. Evans.

Book binding for libraries. 3 class sessions with practice work in preparation of books for binding.

Miss Nicholson.

Care of periodicals. 3 class sessions.

Miss Nicholson.

Parts of a book and their significance. 3 class sessions with illustrative material on book making.

Mr. Evans.

Shelving and library arrangement of books. 2 class sessions with daily practice work throughout the course. Miss Bunker.

Miscellaneous lectures on professional topics, such as; Librarianship as a profession. Ethics of the Librarian. Library history and development. Work of the State Commission. High School libraries. Welfare and citizenship work. Book ordering, and publishing houses. By various librarians.

Branch work,—Not less than one month. Visits of inspection to typical libraries, including the Boston Public, Harvard, Massachusetts State, Boston Athenaeum, and important suburban libraries.

Visits to book binderies, printing shops, publishing houses. Numerous professional readings as assigned. Keeping of complete note books is required.

Very careful attention is given to the conduct of these courses. Admittedly elementary, they have been laid out and developed upon the basis of the actual demands of our daily work, and are therefore intensely practical. They are only too brief for their purpose, and there is a constant tendency to over-crowd them in the attempt to accomplish the utmost. Pupils without exception find that a considerable amount of outside work is necessary to maintain a satisfactory rank.

For admission to the Training Class the applicant must

be not younger than eighteen nor older than thirty, at least a high school graduate of creditable rank, of normal health and strength and possessed of unimpaired faculties, and without marked peculiarities of temperament. She must pass an examination of High School graduate standard, including also general information relative to current affairs of the world and particularly of our own country. College graduates are exempt from educational tests. The final rating is based 40% upon examination and 60% upon reports of daily work during the course. Students who pass with a rating of 75% or more are eligible to appointment to the library staff as vacancies occur. High School graduates to the Third Grade of the service, and College graduates to the Second Grade. Preference is given to Somerville residents both for admission to

the class, and for appointment to the staff.

Every year since the institution of the Training Class applications for the privilege of taking a single course of instruction, such as Reference work or Children's work, have been received from members of our staff whose appointment antedates the class, or who have come to us from another library. It has been found to our mutual advantage to encourage these attempts at self-improvement by granting the time necessary. There is no doubt that the Training Class, in addition to its function as a recruiting agency, is a most valuable factor in the morale of our public service, making for harmony and a real conception of the spirit of service.

PROFESSIONAL RECOGNITION

Of interest to librarians and trustees is the May issue of the Annals of the American Academy of Political and Social Science. The entire number is devoted to the consideration of professional and business ethics. Under each calling the prevailing ethical standards are expounded, discussed, and an attempt is made to codify them. Some of the codes presented are those that have been formally accepted and endorsed by representative organizations of the particular professions. It is a tribute to the progress of the library profession that it has been included by the Annals, a publication representing the highest scholarship of America, in the same professional group with the clergy, law, medicine, architecture, teaching, engineering, and journalism.

STATISTICS

The usual tabulations of the statistics of operation for the year 1922, appended to this report, are submitted as a part of it.

Respectfully submitted,

George H. Evans, Librarian.

I have reported at station each day and have attended the sessions of the juvenile court, looking after minors who have been in court.

Respectfully submitted,

MRS. MINA T. WEEKS, Matron.

Conclusion.

To His Honor the Mayor, John M. Webster and members of the Board of Aldermen, Heads of Departments, Court officials, and members of the Police Department, all who have assisted me in the discharge of my duties I wish to express my sincere thanks.

Respectfully submitted,

CHARLES A. KENDALL,

Chief of Police.

REPORT OF THE STREET COMMISSIONER.

OFFICE OF THE STREET COMMISSIONER, CITY HALL, Somerville, January 1, 1923.

To His Honor, the Mayor, and the Board of Aldermen:-

Gentlemen: — I most respectfully submit the forty-seventh annual report, containing a brief summary of the principal work performed by the Highway Department, by day labor and contract, during the year 1922 with recommendations for necessary additions the coming year.

This department has charge of the construction, alteration, repair, maintenance and management of ways, streets, sidewalks and bridges; the setting out and care of shade trees; the suppression of gypsy and brown tail moths, elm leaf beetles and other pests which destroy trees; and the oiling and watering of streets.

Highway Department Appropriations.

The yearly maintenance of the Highway department is taken from the Highway Maintenance account. Credit is received for work performed for the other divisions of this department and other departments of the City.

No one will dispute the fact that the progress of any city is influenced by the building of good streets. The type of road to be constructed today is far different from that of a few years ago before the introduction of the automobiles. The type of roads has been changed from the old water bound

macadam to a bituminous material. Then came one of our greatest problems in road construction and maintenance; the introduction of the motor trucks, some carrying an enormous load. I am in favor of the remark which Governor Cox made at his inaugural wherein he advocated a large revenue could be received for the maintenance of highways, and as I understand the cities and towns would receive some of this amount, when he said that all automobile and truck owners should pay a tax of two cents a gallon on gasolene.

It is my intention, the coming year, to erect a shed near our storage tank for mixing cold patch material and use the tank for the storage and heating of the cold patch liquid when it is not being used for the tar used as a cold application on the streets.

1922. Highway Maintenance.

| Data i | | | | | | | | | | |

Snow and Ice.

Since the increased use of automobiles and trucks during the winter, and on account of the owners expecting the streets to be passable at all times, it has been necessary to change considerably the method of caring for the same. Years ago the snow was plowed from the gutters and sides of the streets into the middle, now it must be plowed from the center of the streets to the sides. Another reason the streets must be plowed is the motorizing of the fire departments in most cities and towns.

This year a Fordson tractor was purchased with a Starkweather plow attached. The use of this equipment has proven satisfactory.

I receive many complaints about water standing on the sidewalks when it rains and when there is a thaw. After investigating I find that in more than fifty per cent of the cases, the complainants were at fault in not shovelling the snow from the sidewalks to the outer edge of the edgestone. If this was done it would save the complaint and also the city a large amount of money.

This department removes the snow and ice from sidewalks, and sands when necessary, in front of all public build-

ings, grounds and schools.

97 requests and reports were attended to.

\$7,844.68 was expended for the care of snow and ice. 2503 cubic yards of snow and ice were removed. 59 cubic yards of sand and 293 cubic yards of ashes were used in caring for icy sidewalks, streets and crossings.

Bridges.

Both bridges on Lowell street over the Boston and Maine Railroad which the City has to maintain have been placed in first class condition at an expense of \$4,924.88. The Boston and Maine Railroad have repaired the Walnut street and the School street bridges and a great improvement was made on the approaches to the bridge on Washington street over the Fitchburg division. These approaches have been in need of repair for a number of years. The new construction is appreciated by the city and the general public.

The fences on the bridges and approaches where the grade crossings were eliminated on Somerville avenue, Medford street and Webster avenue must be scraped and painted the coming year. The other bridges are in good condition.

Street Railways.

The Boston Elevated Railway Co. constructed new double tracks on a concrete base on Somerville avenue from Beacon

street to Wilson square. Replaced new construction for old on Somerville avenue from Beacon street westerly to Cambridge line; on Cross street from Pearl street to Broadway; Broadway from Cross street to Hathorn street and Broadway from Magoun square to near Willow bridge.

Underground Wires.

Underground conduits were constructed by the New England Telephone and Telegraph Company on Walnut street from Highland avenue to Bow street and on Broadway from Hinckley street to City Road. By the Edison Electric Illuminating Company on Willow avenue from Lexington avenue to Highland avenue and on Cross street from Pearl street to Broadway. The Boston Elevated Railway Company constructed conduits for their feed wires on Cross street from Pearl street to Broadway.

Crushed Stone.

The William J. McCarthy Co. furnished 37 tons of local crushed rock at \$1.40 per ton at their crusher and 5,319 tons at \$1.80 per ton on the line of work. Coleman Brothers furnished 108 tons trap rock at \$2.00 per ton and 48 tons trap rock at \$2.48 per ton on the line of work. The General Crushed Stone Co. furnished 3 tons trap rock at \$1.35 per ton at their crusher and 1,370 tons trap rock at \$1.95 per ton on the line of work.

Steam Rollers.

No. 1 roller worked 109½ days. No. 4 roller worked 70 days.

The old No. 2 roller should be exchanged for a new fifteen ton maintenance roller.

Sidewalks Maintenance.

I hope the coming year, where there are old brick sidewalks in our squares, that the same will be removed and granolithic substituted, the city paying one half the cost of this construction. Most of our squares are paved with some kind of permanent paying for the roadways and the sidewalks should be constructed of granolithic to correspond with that of the squares.

1461 linear feet of edgestone were reset. 8310 square yards of brick sidewalks were relaid. 2030 square yards of paved gutters were repaved and 12.10 square yards of granolithic were relaid.

All police reports pertaining to this kind of work are charged to this appropriation.

\$8,704.23 was expended for Sidewalks Maintenance.

Street Sprinkling.

Where there are car tracks on our main thoroughfares the American Car Sprinkler flushes and sprinkles the streets for \$925.00 a month, 8 hours a day, 7 days a week. I hereby recommend to His Honor, Mayor Webster, that a contract be made with the American Car Sprinkler Co. so that the car sprinkler will work twelve hours a day so the squares will be flushed every morning before 7 A. M. Most of our side streets are constructed with some kind of bituminous material, these streets are covered with a cold tar application, applied by the city. We are constructing some of our main thoroughfares, where there are no car tracks, with permanent paving, these streets have to be sprinkled with a horse drawn apparatus. As this paving has increased during the last few years, I recommend that an automobile street sprinkler be purchased to care for the same.

By the use of tar on our streets two objects are accomplished, namely:—the laying of dust and the sealing or coating of our streets.

Dust layers used during the year:—

3,190 gallons of Tarvia "B" (Barrett's). 117,005 gallons of Tarco (Flemmings) 7,935 gallons of Non-Asphaltic. (Bay State)

635 gallons of Non-Asphaltic. (Cambridge Gas Light Co.) This division of the department is self supporting. \$34,620.15 was expended for Street Sprinkling.

Street Cleaning.

There is no branch of the department that shows so much for the money expended, as that which keeps the streets clean and in a neat condition. I find in many cases where tenants and store keepers complain about the dirty condition of the streets that they, themselves, are the cause of the complaints because they throw or sweep the rubbish into the streets. I quote the words of Commissioner Fetherston of New York who says: - "This division of my department has a contract with the people of the city to perform certain work within the limits of the force and appropriation granted for street cleaning purposes; the people of the city are parties to this contract, and it is their duty to carry out their portion of

the agreement, which means that they should understand and live up to the laws and ordinances which set forth their obligations. By comparison it is apparent that the people of the city are more negligent than the department of their respective duties."

6,072 cubic yards of street sweepings were removed. \$25,479.35 was expended for Street Cleaning.

Suppression of Moths.

Under this appropriation the city cares for all trees both public and private, in regard to moths with no special assessment. Street trees are sprayed in the spring and summer.

This division gives work to quite a number of men in the winter, because most of the moths are gathered at this time of the year while they are in the tent form.

- 6,990 street trees were inspected and cared for.
- 14,983 private trees were inspected and cared for. 24,499 bushes were found moth infested.
- 11,083 fences and buildings on which moths nested.
- 32,628 gypsy moth nests were painted with creosote.
 - 31 brown tail moth nests were gathered and destroyed.
 - 2,861 satin moth nests were painted with creosote.
 - 6,765 trees were sprayed by the gasoline spraying machine to exterminate the different kinds of caterpillars and beetles.
 - \$4,188.54 was expended for the Suppression of Moths.

Shade Trees.

Mayor Webster and the City Government gave a good appropriation for this division of the highways, and I have had a busy year caring for the trees that were hit by the storm of November, 1921. The trees in our city are handicapped to a great extent. Nourishment is curtailed and water withheld from their roots by the granolithic sidewalks, concrete gutters and streets constructed with permanent paving. Shade trees, where possible, should be planted on private property adjoining the back of the sidewalk.

- 36 trees were set out.
- 203 trees were removed.
- 989 trees were trimmed.
- 38 tree guards and supports installed.

\$5,312.01 was expended for Care of Trees.

Highway Construction - New Streets.

Five new streets were constructed during the year under the Betterment Act, by contract with William J. Sullivan, viz:

Setting edgestones 55c per linear foot. Gutter construction \$3.00 per square yard. Construction of Macadam roadway \$1.55 per square yard.

The city furnished the edgestone and tarvia binder. Straight edgestone \$1.00 per linear foot. Circles \$1.35 per linear foot from H. H. Fletcher Company, delivered on line of work.

Tarco X binder 13 1/2 c per gallon from Trimount Oil Com-

pany, delivered and sprayed on work.

Tarvia X from the Barrett Mfg. Company at their factory at 9½ c. City teaming and spraying on the work.

Nine new streets were accepted this year. \$15,726.51 was expended for New Streets.

NEW STREETS CONSTRUCTED IN 1922.

Sidewalks Construction.

The city employees constructed all the granolithic sidewalks this year at an average cost of \$3.00 per square yard. This price includes excavating and all materials furnished.

I recommend that the incomplete portions of the sidewalks on our main streets be constructed with granolithic.

Miles of edgestone, granolithic, brick and gravel sidewalks in the city:—

| Edgestones | | | 147.894 miles |
|-----------------------|--|--|---------------|
| Granolithic sidewalks | | | 55.330 miles |
| Brick sidewalks . | | | 70.911 miles |
| Gravel sidewalks . | | | 22.601 miles |

\$15,379.35 was expended for Sidewalks Construction.

Highways Construction — Permanent Pavement.

Contracts were awarded to Simpson Brothers Corporation at \$5.90 a square yard and to C. W. Dolloff and Company at \$6.30 a square yard for paving with granite paving blocks grouted with cement on a concrete base. They furnished all materials and did the excavating.

A big improvement was made on Cross street from Pearl street to Broadway. All wires were placed underground; Electric and sign posts were set on the back of the sidewalks; the edgestones on both sides of the street were set back eighteen inches, making the roadway three feet wider than the old street; new tracks were constructed, in place of the old ones, on a concrete base by the Boston Elevated Railway Company and granite paving blocks on a concrete base grouted were laid from the car tracks to the edgestones by the city. If the State does not take this street for a boulevard I hope the remaining portion of Cross street will be widened and constructed in the same manner.

\$69,100.81 was expended for Permanent Pavement.

Reconstruction and Resurfacing.

Twelve streets were reconstructed or resurfaced under this appropriation at an average cost of \$1.50 a square yard

by city employees.

By carrying on this kind of work each year the cost of maintenance is reduced and keeps our streets up to the standard of streets in other cities. I think this kind of construction for the money expended gives greater satisfaction and pleases more tax payers than any other division of this department.

\$30,156.12 was expended for Reconstruction and Resur-

facing.

Miscellaneous.

137 Granolithic driveways constructed

100 Brick driveways constructed.

42 Edgestones dropped for driveways.

2 Driveways extended.1 Driveway discontinued.

Driveways are constructed, discontinued, relocated or extended at the expense of the petitioners.

Length of public streets, 85.762 miles.

Seven horses were killed on account of disability and no horses purchased during the year.

The department maintains its own municipal repair shop

for the different lines of work.

741 horses were shod during the year. Our horses, during the slippery going in the winter, must be sharp shod (we use the iron grip shoe and drive calks) because we must have the sidewalks and hills sanded for others to travel on.

100 drive calk shoes were put on.

I have attended meetings of the Public Works and of the Board of Aldermen for consultation regarding work and petitions.

Labor.

Eight hours constitute a day.

The regular employees are given two weeks vacation and all employees twelve months Saturday half holiday without loss of pay.

Laborers receive \$4.00, drivers and chauffeurs \$4.10, me-

chanics \$4.50 and engineers \$4.75 per day.

The city does its own insuring for injured laborers. There are twenty-one former employees receiving pensions under the act providing for the pensioning of laborers.

There were during 1922:—

154 permits issued to the Cambridge and Charlestown Gas Companies.

170 permits issued to cross sidewalks.

378 permits issued to occupy streets and sidewalks.

30 permits issued to feed horses.

3 street sprinkling complaints and requests.

254 notifications to other departments and corporations.

95 accident reports.

1096 police reports.

624 brick and granolithic sidewalks repaired.

1103 miscellaneous reports and requests.

128 drain layers permits.

690 water department openings.

141 permits to open streets and sidewalks.

46 danger and traffic signs erected.

15 new signs erected.

95 signs repainted.

62 streets cleaned by request.

3886 cubic yards of sand and gravel used. 3571 cubic yards of dirt removed.

1354 cubic yards of ashes used.

1773 cubic yards of old macadam used.

4395 bags of Portland cement used.

Recommendations.

I most respectfully recommend that the granite paving blocks on a gravel base on Somerville avenue from near Union square westerly, and on the northerly side of Washington street from the Boston line to Tufts street be removed, recut and repayed on a concrete base and grouted with Portland cement. If this is done I think we could secure enough extra paving blocks to complete the northerly side of Beacon street, which is permanent paving on both ends. Within a short time permanent paving will be necessary on the northerly side of Broadway from Cross street to the Boston line, as this part of the street is in sad need of a more substantial paving than is there at the present time. On Prospect street from Somerville avenue to the approaches of the Fitchburg railroad bridge the bituminous top should be removed from the concrete base and granite paving blocks be laid on the old concrete base and grouted with Portland cement. I recommend the purchase of a one ton Ford truck to be used by the tree division, and a fire proof garage to be erected at the city stable yard.

I desire to express my appreciation for the co-operation of Mayor Webster, who has taken a great interest in the work of this department, also to the members of the Board of Aldermen and Heads of Departments. I feel that I would be remiss in my duty if I neglected this opportunity to say a merited word of praise to the employees of my department who perform the actual labor of service.

Respectfully submitted,

ASA B. PRICHARD,

Street Commissioner.

REPORT OF THE CITY ENGINEER.

Office of the City Engineer,
City Hall, Somerville, January, 20, 1923.

To His Honor, the Mayor, and the Board of Aldermen:-

Gentlemen,—In accordance with the city ordinances, the following report of the work done and expense incurred for the year ending December 31, 1922, by the Engineering Department and appropriations under my charge and supervision, including the accounts of city engineer, sewers construction, sewers maintenance, parks maintenance, playgrounds maintenance, and other public works, is herewith presented:—the 50th anniversary of the city—my twenty-seventh annual report as city engineer.

ENGINEERING DEPARTMENT

In previous reports the general work, charter requirements and city ordinances relating to the duties of the city engineer have been fully described—he shall be consulted in relation to public improvements of every kind when the advice of a civil engineer would be of service—and no pipes, conduits, railway tracks, poles or other structures shall be placed beneath or upon the city streets unless a plan showing proposed location thereof has first been approved by the city engineer. City Engineer is also Supt. of Sewers and Supt. of Parks and grounds.

New construction work has progressed more during the past year, in the various divisions, than any time since the World War.

| Divisions | Appropria | tions | and (| Credits | Expen | ditures | Balan | ces |

| phone, car fares, postage and incidentals | 5,181 | 52 |
| Total | \$13,602 | 06 |

Value of field instruments, tools and office instruments, \$1,500.00

The total cost of maintaining the Engineer's Division since it was established, 1872-1922 both years inclusive, has amounted to \$438,463.00.

Six assistants have been employed the greater part of

the year, on engineering work.

A number of plans were made during the year for street acceptance and five streets have been accepted as public highways, under the betterment act.

There are plans for acceptance of twelve private streets on file in this office, that for various reasons have not been

made public ways.

Surveys, calculations, estimates and plans have been made for taking land, buildings and private property for Schoolhouse purposes in certain sections of the city and borings and tests made by this department to determine the character of the soil for the foundation of proposed buildings to be erected on the areas taken.

The improvement of Cross street (between Broadway and Pearl street) has been accomplished by widening the roadway and narrowing the sidewalks eighteen inches on either side of the street, placing all overhead service wires in underground conduits and removing old poles from the street, except the trolley wire support poles which were relocated on the inside of the sidewalk or property line; this plan of improvement should be extended the entire length of the street to Central Square immediately.

Many streets and avenues in the city are of the same, or very similar name and could be changed at the present time (renamed in memory of deceased veterans of World War) eliminating the confusion now existing; and where traffic is congested, certain streets should be made "one way" streets

and traffic regulation and zone signs installed.

Some of the old main thoroughfares should be renumbered their entire length, so as to eliminate half numbers and letters now being used.

A LAST TRIBUTE OF RESPECT AND ESTEEM

TO THE MEMORY OF

JOHN JOSEPH MURRAY

BORN DECEMBER 24, 1877

DIED NOVEMBER 26, 1922.

AN ASSISTANT IN THE ENGINEERING DEPARTMENT

FOR MORE THAN 26 YEARS OF FAITHFUL SERVICE

"Johnny" Murray, as he was popularly known by his office associates, all city employees and his many friends, was a Somerville boy, educated in the city's public schools and employed in this department all his life;—at his work on Saturday, but for the last time, as shortly after leaving the office for the week-end, he became ill and died on the following day. (Sunday).

His sudden death deprived the department and city of servcie of a high character—his whole career displayed ability and he was conscientious, efficient and energetic in the performance of his duties.

A young man of a happy, genial and kindly disposition, of a courteous and affable bearing with his office companions, a general favorite, endearing him in the hearts of many friends, and he will be long and pleasantly remembered.

Summary. — Public streets 85.762 miles (includes 1.406 miles of City Boulevard and Park Roadways, 2.331 miles of State Boulevard (Metropolitan Park Commission), and 1.596 miles State Highway); private streets 15.104 miles.

Total length of streets in the city 100.866 miles.

In the 1910 report, tables were published showing old names of certain streets as formerly known, and names of public squares in the city; the names of some of these squares having been changed recently.

Street "Markers"—(Stone Bounds) (Brass rods set in cement sidewalks).

1922 — stone bound set southeast corner Otis Street and Wigglesworth Street.

Stone bound set southeast side Marshall Street at southwest corner old Fire Station Lot.

Stone bounds have been reset in Portland cement concrete at a number of street intersections and angles, to define and preserve the true lines of public streets, and this work should be continued as much as possible each year. These bounds are also of great convenience in establishing permanent "Bench Marks" throughout the city for giving grades.

In the 1907 report a table was compiled from old reports, maps, and office notes, showing the location of stone bounds; the year when set, and whether existing or removed from 1860 to 1907 inclusive, and additional lists in the reports of 1908, 1910, 1911, 1913, 1919, 1920, 1921 and 1922 will show location of all street bounds set to 1923.

There are at the present time a total of 660 bounds or brass rods set for defining street lines.

Four new streets have been constructed, under the betterment act, with a bituminous macadam wearing surface, concrete gutters and granite edgestone, a total of 1,689 feet (.32 mile); the work being done by contract.

The average cost of this type of construction complete, for these streets, was \$9.27 per linear foot, a high rate, on

account of the unusual cost of materials and labor. (Average cost of bituminous surface \$1.83 per square yard.)

Assessments have been levied on abutting property owners for approximately one-half of the cost of constructing these streets.

New granite block pavement has been laid on a concrete base with a cement grout in sections of Linwood street, Somerville avenue, Beacon street, Cross street and Murray street; 12,966 square yards (3,640 feet in length) of this type of pavement were constructed by contract at \$5.90-\$6.20-\$6.30 per yard complete. In conjunction with this paving the street railway company also laid approximately 2,770 square vards new granite paving between rails where tracks existed and new tracks added.

In constructing the granite pavement, new bituminous streets and granolithic sidewalks, 4,006 feet (0.76 mile) of new granite edgestone were set, at an average cost of \$1.55 per foot.

The total length of permanent paved streets in the city amounts to 18.54 miles.

Permanent street pavement should be extended as rapidly as possible, using old granite blocks, re-cut and laid on a concrete base — the best and most economical pavement for this city.

Grades were given and measurements taken for the reconstruction of twelve streets with a bituminous wearing surface, a length of 7,989 feet (1.513 miles);—this work was done by day labor, averaging \$1.20 per square yard (at the rate of \$3.10 a foot for 40 foot width street.)

TABLE OF STREET CONSTRUCTION

| | Sq. Yards | Miles |
|--|-----------|--------|
| *Streets paved with granite blocks | 153,850 | 6.83 |
| **Streets paved with concrete | 23,990 | 1.42 |
| †Streets paved with asphaltic top | 38,964 | 2.37 |
| Streets paved with vitrified brick | 20,958 | 1.29 |
| Streets paved with "Bi-co-mac" | 10,100 | 0.77 |
| Streets paved with bitulithic (patent) | 3,059 | 0.06 |
| Combination pavement (concrete base with | | |
| bituminous top) | 87,200 | 5.80 |
| ‡Streets macadamized (bituminous binder) | | 43.53 |
| Streets macadamized (water bound) | | 22.89 |
| Streets graveled or unimproved | | 15.91 |
| | | 100.05 |
| Total | | 100.87 |

Also 32.5 miles (single track) electric railway paved with granite, asphalt,

bitulithic, etc.

*Includes 0.42 mile state highway.

†Includes 1.16 miles of state highway.

‡Includes 1.406 miles of city boulevard and park roadways and 2.331 miles of state boulevard (Metropolitan Park Commission).

There are a number of very dangerous crossings in this city at intersecting public thoroughfares, where the corners should be cut back and the roadway widened for the safety of traffic and improvement in appearance.

Lines and grades were given and measurements taken for constructing thirty-three new granolithic sidewalks—5,215.3 square yards (1.35 miles), and assessments were computed, the abutting property owners paying one-half the cost. The greater part of this work was done by day-labor at an average cost of \$3.00 per square yard.

In laying out new work, under orders passed for construction of sidewalks, etc., occasionally portions of buildings and fences are found to be encroaching on the sidewalk and on some of the old rangeways these encroachments have existed for many years; as improvements are made, the full width of sidewalk should be maintained.

In sections of the city where brick sidewalks have been laid many years, and must necessarily be relaid on account of deterioration and unevenness, granolithic should be substuted in place of brick.

Miles of Edgestone, Granolithic, Gravel and Brick Sidewalks in Each Ward.

| | | | | Edgestone | Gravel Sidewalk | Brick Sidewalk | Granolithic Sidewalk |

| | | | | | | | |
| | | | | 147.894 | 22.601 | 70.911 | 55.330 |

(Details, etc., streets and sidewalks in report of Street Commissioner).

The Boston Elevated Railway Company has petitioned for a relocation of tracks in certain streets and has made extensive repairs in its roadbed in this city during the past year, replacing long sections of old tracks with new and heavier rails; and new double tracks have been constructed in Somerville avenue between Wilson Square and Beacon street bridge—completing a through double track line in this street, extending from the west Cambridge line to the east Cambridge line, connecting to Lechmere Square terminal. In Teele Square and Wilson Square double tracks

have been relocated and widened out on the curves so that

large cars can operate without delay.

There are, however, a number of miles of trackage, orders having been granted for widening in the city's main thoroughfares, where the old granite block pavement, within the railroad location should be relaid and grouted with cement and additional catch basins constructed between the rails to relieve the flooding of sections of certain streets in times of heavy storms. There are 32.5 miles of electric railroad (single track length) at the present time in the city's streets. A considerable length of high power cables have been placed in underground conduits.

Plans have been made by the various companies and filed in the city engineer's office, showing the locations of gas mains, poles, tracks and conduits in this city, which have been granted by the board of aldermen during the year; and the work of placing overhead wire in conduits, underground, and removing poles from the streets should be extended as rapidly as possible.

In the city's squares overhead wires should be placed underground, immediately, and practically all poles (except for lights) removed — on the main thoroughfares many of the existing poles should be eliminated, at the present time,

being unnecessary.

A special ordinance should be enacted concerning city inspection on all underground work done by private companies or corporations and regulation as to method of street openings.

At the present time there are underground in the city's streets 17.64 miles of telephone conduits, 12.72 miles of electric light conduits, 4.46 miles of electric railway conduits, and about 9.97 miles of underground conduits used for the city's wires.

The Cambridge and Charlestown gas companies have respectively 64.42 and 28.16 miles of gas mains in the city's streets.

Lines and grades have been given for laying new city water mains. New house services, many gates, hydrants, water posts and blow-offs have been located and recorded, sketches and plans made showing the same, and the water works maps corrected to date; also a large number of old water services where new meters were installed, have been located and recorded.

A number of the locations of old hydrants, gates, etc., have been found to be incorrect, a few having been removed entirely; a new survey of the entire distribution system should be made and the maps and office records compiled. (Length

of water mains, details, etc., in report of Water Commissioner).

Lines and grades have been given for the erection of city buildings and plans and sketches made for the laying out of surrounding grounds:—a special plan being made showing a proposed development of the West Somerville Ju-

nior High School grounds for athletic purposes.

Plans have been made where accidents have occurred on the city work, or where boundaries were in dispute and special plans and data prepared for the city solicitor's use in court cases, miscellaneous data compiled relating to the sewers, highways, bridges, etc., in this city for various state departments; and Federal, State and Municipal hearings attended where information was required.

All plans of estates in Somerville recorded at the Registry of Deeds, East Cambridge, including land court plans, have been copied, also titles examined, abstracts from deeds made for the purpose of assessments, and the proportional part of the cost of new work computed, and schedules of as-

sessments made out showing the property owners.

Probably the proposed plan of widening Bridge street (East Cambridge) being the extension of Somerville avenue will be accomplished the coming year; after numerous hearings, the construction and completion of the work and proportioning of assessments has been placed under the control and jurisdiction of the County Commissioners—a much needed public improvement for relieving the present congested traffic and business.

A skeleton map of the city is on file in this office showing steam and electric car lines, principal streets, public buildings and locations of principal industries:—also special maps showing buildings and areas built upon previous to 1872 (when a town) and at the present time (a city 50 years).

A set of block plans should be made covering the entire city area, from accurate surveys made during the past twenty-five years, and carefully compared section by section with the deed dimensions and areas recorded in the assessor's department, and in this manner the correct areas of land determined.

This set of plans would show the area and dimensions of each lot, all houses and other buildings, sewers, catch basins, house drains, water services, gas mains, underground conduits for wires, street lights, street railway tracks, etc., and be of great value to many city departments. Five of these sectional plans have already been made. A separate appropriation should be made for completing these plans.

Total number of plans on file in the office approximately

eight thousand four hundred.

Perambulation of the Somerville-Medford city boundary line:—December 13, 1922, a committee appointed from each city; including city engineers and street commissioners, examined the monuments and reference points defining the division line between these two cities and reported their findings in due form to the board of aldermen; these boundary lines are perambulated every five years as prescribed by the statues.

No action has been taken by representatives of the city governments of Somerville and Medford relative to the changing of the boundary line between the two cities. From the various studies presented, an exchange of territory can be

made that would be equally advantageous.

In addition to the regular work of the department, considerable information and assistance has been furnished to the various city departments and citizens of the city; and special data for the development of real estate etc., given

to private engineers, architects and builders.

For the immediate improvement of conditions in this city the highway bridges and approaches over the steam railroads should be rebuilt the full width of the street at Broadway, (North Somerville) Prospect street and Washington street, near Union square; and the steam railroad bridge over Washington street (East Somerville) reconstructed with increased head-room for street traffic,—the dangerous railroad grade crossing at Park street should be abolished, as decreed by the courts a number of years ago; and a foot-bridge should be constructed over the steam railroad tracks making a connection between Wilson square—Craigie street on the northerly side and Stanford Terrace-Beacon street on the southerly side of this railroad.

I respectfully refer to some of the more important recommendations and suggestions made in reports of the city engineer for a number of years past ,which are for the improvement of conditions in this city.

COMPILED TABLE OF AREAS, USEFUL FOR VARIOUS DEPART-MENTS. SHOWING A SUB-DIVISION OF CITY'S ACREAGE.

SEWER DIVISION

The designing and constructing of sewers, storm drains, catch basins, house drains, etc.,—maintenance of the drainage system and other items in this division are under the direction, supervision and control of the city engineer.

Sewers were petitioned for and constructed during the year in a number of newly laid out streets, where real estate owners commenced extensive building operations for the first time since the World War; approximately 140 new two-family houses were erected the past year on these streets.

Six sewers were completely constructed and one partially built during the year and also storm drains; a length of 7,012 feet (1 1-3 miles) of 10" and 8" pipe, the greater part of the work being done by contract, the remainder by department labor. (See attached tabular statement for 1922, showing itemized account of work.)

The total length of the city's drainage system is 114.926 miles, and the entire cost of construction including catch basins has amounted to about \$1,376,757.00, exclusive of the amount paid to the state for assessments for the construc-

tion of the North Metropolitan sewerage system.

The city's assessment for the Metropolitan sewerage system for the past year was \$52,388.51 on construction account and \$42,676.63 for maintenance and operation, and the total amount paid the Commonwealth of Massachusetts for this state sewer has been \$1,708,002.78 (1892-1922, both years inclusive). The total length of the Metropolitan sewerage system mains running through the city amounts to 3.475 miles.

There are within the city's limits thirteen connections with the North Metropolitan state sewerage system, also four outlets through the city of Cambridge and three outlets through the city of Medford. The locations of the connections of the city's mains with the state sewer are shown in the 1912 report, and details of construction in previous reports.

The 1918 report contains a compiled table of Storm Drains constructed to 1919 showing length, cost, date of con-

struction, district benefited, etc.

Fifteen catch basins have been constructed in the high-ways during the year, making a total of 2,055 basins in the city for street drainage purposes, constructed and maintained as follows:—

| By the city (sewer division):— Located in streets and subways Located in city boulevard Located in parks (17) and other city lots (12) | . 33 " |

The "separate system" sewers should be extended in the older sections of the city each year, as the appropriation will allow, and storm drains completed in certain localities as previously recommended:—especially in the North Somerville District, including Morrison Avenue-Highland Road area and the B. and M. railroad valley; and at the East Cambridge line extending from the Somerville avenue sewer and discharging into Miller's River.

Sidewalk sewers in Mossland street should be constructed immediately and a section of the old sewer in Poplar street reconstructed, relieving the continuous blocking of house drains under existing conditions.

The city's drainage system will be greatly improved when all the foregoing changes are made and construction work completed.

Value of tools and property on hand, maintenance of sewers, \$2,000.00.

John J. Foley, a faithful laborer for more than a quarter of a century in this division, who was retired on a pension the latter part of 1921, died August 30, 1922—the only person ever receiving a pension in the department.

A permanent force of men, varying in number from eight to thirteen per week, and teams are kept continually at work flushing, cleaning and repairing the city's drainage system, catch basins, etc., the expense necessarily increasing yearly as lengths of sewers, storm drains and catch basins are added to the system, and the distance increased to the dumping places, which are fast diminishing, only two being available at present.

This question of scarcity of dumping places has confronted the city for some time and various schemes have been considered for efficient and economical methods of disposal but no feasible plan has been provided.

Approximately 4,000 cubic yards of material have been removed from the catch basins and hauled to dumps during the year, at an average cost of about \$3.00 per cubic yard (\$1.47 removal—\$1.53 teaming) and the average cost per mile for cleaning and flushing the drainage system, including catch basins, has amounted to about \$174.00. There are about twenty catch basins (average) to a mile of roadway in this city and the approximate cost of cleaning, flushing, and general maintenance per basin has been \$7.78 the past year.

A demonstration of machine cleaned catch basins was conducted for a period of five consecutive days—an autotruck cleaning machine ("orange peel grab" lift equipment) removed material in less time than could be done by day labor, but the cost per cubic yard exceeded the hand work—the result being speedier cleaning.

A number of repairs have been made and sections rebuilt on some of the old sewers, alterations made in the outlets and overflows, and extra manholes built for the purpose of

improving the system.

Many catch basins and manholes have been repaired and

grade or line changed.

Three hundred and fifty-nine permits have been issued to licensed drain layers for connecting buildings with main sewers and storm drains; sixty-eight being for repairs, alterations or extensions, all of the work being done under the supervision of the city's inspector.

Many of these repairs and alterations were made necessary by the growth of tree roots in the private drain pipe. In several cases, these private drains were relaid with iron pipe and lead joints, which is the type of construction recommended by this department, where drain connections have become stopped on account of tree roots.

Certain persons are licensed as drain layers by the city and are under bonds, for the purpose of laying and repairing these private drains:—none others are permitted to do this

work.

Reference to data concerning each drain connection with the public sewer is on file in this office, and time and expense could be saved by the owner, by applying directly to this department for investigation and advice, where trouble exists.

Many car track catch basins and underground conduit manholes have been connected with the city's drainage sys-

tem.

There are to date about 16,892 private house drain con-

nections with the city's drainage system.

Extensive repairs have been made to the automatic machinery, tanks, copper floats, tide gates, etc., constructed and installed more than twenty-five years ago in brick masonry chambers, where the city's mains are discharging into the state sewer.

A better system of grease traps should be installed in the premises of some of the larger manufacturing plants and rendering companies to prevent large amounts of grease and waste products from escaping into the city sewer mains and at various times has partially blocked sections of sewers the past year a number of loads of heavy grease has been scraped and removed from the sewers at a considerable ex-

During the year the sewer division has done considerable miscellaneous work for other city departments and outside companies, furnishing material and labor, and being partially reimbursed for the same.

Some of the old trunk sewers which were constructed many years ago are in a dangerous condition; sections where the arch is badly cracked and liable to collapse any time. should be immediately rebuilt.

PARKS AND PLAYGROUNDS DIVISION

The care, superintendance and management of the city's parks and public grounds is under the direction of the city engineer, who is also, at the present time, a member of the Public Welfare and Recreation Commission.

About seventy-four acres are maintained as parks and playgrounds and approximately a mile of city boulevard; 64 acres are owned by the city and certain areas owned by private parties are turned over to the city for recreation purposes, also satisfactory arrangements have been made for a number of years whereby the city has the use of Tufts College playfields during the summer vacation months, and skating areas in the winter. Approximately two thousand trees of various varieties are located on these grounds.

These areas when completely developed will compare

favorably with other cities in the vicinity.

Some of the larger parks and playgrounds have been renamed in honor of Somerville young men who lost their lives in the World War.

The general maintenance of the grounds includes—mowing lawns, repairing and edging walks,—grading, rolling and keeping in condition baseball "diamonds," football fields, tennis courts, and children's playing areas,—planting bulbs, flowers, trees, shrubs, and weeding, watering and pruning same,—plowing, harrowing and fertilizing school garden areas,-repairing city boulevard and park roads and treating with road application,—repairing and painting fences, backstops, flagpoles, settees, playground apparatus, drinking fountains, etc.—during the winter, removing snow from drives, walks, sanding when necessary, flooding ponds, artificial areas, hockey rinks and keeping same in condition for skating and playing of games.

The number of men employed has varied from seven to

fifteen per week.

The city's assessment for Metropolitan parks and boule-vards for the year 1922 amounted to \$18,387.91 on construction account, and \$42,998.76 being the proportional cost for maintenance and operation; in addition to this the city's special assessment for the Charles River basin construction and maintenance amounted to \$8,923.72; for the improvement of Alewife Brook and maintenance of same \$1,083.37 and for the maintenance of Wellington Bridge across Mystic River, \$3,352.75. The total of these assessments amounts to \$74,746.51, being Somerville's proportional payment to the State on account of the Metropolitan park system for the year 1922.

The total assessment paid to the State for parks and boulevards amounts to \$990,273.74, January 1, 1923 and the length of State boulevard at present constructed in this city consists of seven-tenths of a mile of double roadway, located in the easterly part of the city and extending between Broadway and Mystic River, and one and two-tenths miles bordering Mystic River and Alewife Brook located in the westerly part of the city.

A special state commission has been appointed to report a route and estimated cost of constructing a cross-town boulevard and traffic road which will probably pass through the easterly part of this city. A number of young maple trees have been planted on the Powder House Boulevard where the old poplars were uprooted, broken and split during terrific wind, rain and ice storms, the abutting property owners paying for the trees, this department the planting—new hardy growth trees should replace the old poplar trees the entire length of the boulevard immediately. A section of this boulevard where the roadway has deteriorated, about 2,800 feet in length, should be reconstructed with an asphaltic macadam wearing surface (no reconstruction work having been done since the original construction in 1901.)

Paul Revere Park, occasionally termed the smallest park in the world, has been improved—inside granite curbing was set, on top of this a low iron fence was erected and granolithic sidewalk constructed; this area should be enlarged by acquiring additional land and constructing a passageway acrosss from Main street to Broadway, separating the city's park from the adjoining land, thereby preserving an historical spot on the top of Winter Hill for the future, also making a convenient connection for travel.

This division has had the supervision and work of plowing, harrowing, and preparing various parcels of private land and park areas for planting purposes, at a cost of \$411.50, and many school children have devoted their time and energies to the raising of vegetables.

Athletics in general have been very active since the war and the baseball "diamonds," football fields, tennis courts and athletic apparatus located on the various playfields have been in constant use.

During the Daylight Saving period "twilight" baseball has been exceedingly popular, practically all of the city's fields being used, and at Lincoln Park games were scheduled for every evening during the season with crowds in attendance. Approximately 500 games were scheduled on the city's playfields during the year.

Special supervision was provided by the Welfare and Recreation Commission during the months of July and August, especially for the children's activities, to make the playgrounds popular and successful.

Additional seats have been erected at Lincoln Park and Trum Playground and hockey rinks of regulation size were constructed in the winter season.

Shower baths have been maintained in the highway stable building at the Trum Playground and the baths located at Lincoln Park have been kept open certain evenings during each week; more of these baths should be established at the various fields. Wading pools for the children have been

maintained at these two places;—probably a new field house and public comfort station will be erected the coming year on Trum Playground, eliminating the use of the stable building.

Tennis courts have been in use at Mason Street playground, Dilboy Field, Broadway, Central Hill and Lincoln

parks.

The Metropolitan District Commission have furnished band concerts, certain evenings during summer months, at

Broadway Park.

At the enclosed athletic field bordering Alewife Brook, a permanent concrete field house should be constructed with all modern equipment (about \$10,000 is available at the present time) and the remaining area graded as soon as possible; when completed as originally designed the city will own one of the best recreation fields in the vicinity. (In the 1910

report, plan shows proposed complete laying out).

The Mason street tennis lot, corner of Broadway, is to be sold to private parties for building purposes and the money received for same used in grading the proposed new playground area situated between Broadway and Holland street; located on the south-westerly part of this area, the Western Junior High School building is just being completed. There seems to be a growing demand for recreation fields to be located at the school buildings for the use of school athletics.

The city has become so densely populated (averaging nearly 25,000 people a square mile) that some of the larger park areas should be more extensively utilized for public recreation and physical training purposes; on several of the playfields concrete buildings should be constructed in place of some of the old wooden structures, additional apparatus and shelters provided on some of the principal parks and playgrounds for the smaller children's pleasure, where a regular park employee can have the care of the same, and some of the smaller playground areas should be enclosed by wire fencing for the protection of children.

In certain localities of the city, well-lighted playgrounds, during the summer evenings, should be maintained for the

young men and women working in the factories daily.

A splendid opportunity exists at the present time to establish a good sized recreation field for the East Somerville and Winter Hill districts by developing the northeasterly end of Foss Park, (formerly Broadway Park) the city owns the land, so that any expenditure made would be wholly for construction purposes. The area of this park is approximately 16 acres, and the topography has not been changed in 50 years time, (the enclosed area of the athletic field, bordering

Alewife Brook, in the westerly part of the city is about 5 acres).

A plan has been made showing a re-designing and new layout of Foss Park area which would be, when completely constructed, an additional playfield and beneficial in a num-

ber of ways for the easterly part of the city.

In connection with the departmental work the Welfare and Recreation Commission, the Playgrounds Association and Women's Clubs have been of great assistance in advising, directing and promoting the city's welfare. (Details, etc., in Commission's and Association reports).

The total expenditure by the city departments and other Associations for recreation and play the past year has been

approximately \$20,000.00.

APPENDED TABLE.

Annexed to this report is a table giving names of all streets in the city, public and private, lengths, widths, and the total mileage; in the 1910 report, tables were published showing old names of certain streets as formerly known, and names of public squares in the city.

Respectfully submitted,

ERNEST W. BAILEY,

City Engineer.

REPORT OF CHIEF ENGINEER OF FIRE DEPARTMENT

Somerville, Mass., January 22, 1923.

To the Honorable, the Mayor, and the Board of Aldermen,

Gentlemen, — In compliance with the City Ordinance, I have the honor of submitting, for your information, the annual report of the fire department for the year ending December 31, 1922:

Alarms of Fire.

| Number of bell alarms | | | | 279 |
|-----------------------------|------|--|----|--------------|
| Number of still alarms | | | | 652 |
| Total alarms | | | | 931 |
| Number in excess of | 1921 | | | 82 |
| Value of buildings at risk. | | | | \$651,750 00 |
| Insurance on buildings . | | | | 794,000 00 |
| Damage to buildings | | | 0. | 120,652 84 |
| Value of contents | | | | 728,686 67 |
| Insurance on contents . | | | | 748,198 00 |
| Damage to contents | | | | 336,299 89 |
| Total value at risk | | | | 1,380,436 67 |
| Total insurance | | | | 1,542,198 00 |
| Total damage | | | | 456,852 73 |
| Approximate per capita loss | | | | 4 80 |
| | | | | |

List of Probable Causes.

In Memoriam

LEBARON EMERY

Permanent

Appointed December 22, 1897

Died March 28, 1922

ELMER C. SHIERE

Permanent

Appointed November 14, 1899

Died November 30, 1922

Manual Force.

The manual force consists of one hundred and twelve (112) permanent men, during the year two men have been retired and placed upon the pension list and two have died: three men have been added from the eligible list of the Civil Service. The roster of the department is as follows:

- 1 Chief Engineer.
- 1 Deputy Chief. 2 District Chiefs. 7 Captains.
- 1 Master Mechanic.
- 10 Lieutenants.
 - 3 Enginemen.
- 87 Permanent men.

Apparatus.

- 1 Second size, horse drawn, steam fire engine,
- 1 Horse drawn, combination chemical and hose wagon,
- 1 Tractor drawn, second size, steam fire engine,
- 1 Motor driven, 900 gallon pumping engine and hose wagon,
- 1 Motor driven, triple combination pumper and chemical engine,
- 5 Motor driven, combination chemical and hose wagons,
- 1 Motor driven, combination ladder truck and chemical, 2 Motor driven, ladder trucks,
- 1 Motor driven, supply and wrecking car,
- 1 Automobile, Chief's car,
- 1 Automobile, Deputy Chief's car,
- 1 Automobile, District Chief's car,
- 1 Automobile, Master Mechanic's car,
- 1 Horse drawn ladder truck, in reserve,
- 1 Horse drawn, combination chemical and hose wagon, in reserve.

Horses.

Six horses are continued in the department being necessary for the operation of the apparatus in Engine 4 station; they are in very good condition, having been selected from the nineteen that were in service the previous year.

Hose.

The amount of serviceable hose is but 8,500 feet of two and one half inch double jacket rubber lined water hose and 1,950 feet of three quarter inch chemical hose. There has been 3,000 feet of new two and one-half inch purchased and 2,800 feet condemned, 1,100 feet of which was destroyed by acid while working at a fire at the Prison Point yard of the Boston & Maine R. R. There must be at least 2,000 feet of new hose purchased the coming year to maintain, any where near, the necessary amount.

Brief Resume.

Two fires, one in the Medina Building in March and the other in the supply or stock building of the Boston Elevated Ry. in December, totalled \$375,000, leaving but \$75,000 to be distributed throughout the entire year classified, by months, as follows,—

| Tonnomy | | | | | | | | | \$20.24A | 27 |
|-----------|---|---|---|---|---|---|---|---|-----------|----|
| January | • | • | • | • | • | • | • | • | \$39,344 | |
| February | | • | • | | | | | | 4,844 | 30 |
| March . | | | | | | | | | 80,615 | 95 |
| April . | | | | | | | • | | 7,095 | 00 |
| May . | | | | | | | | | 1,949 | 54 |
| June . | | | | | | | | | 17,536 | 34 |
| July . | | | | | | | • | | 932 | |
| August . | · | | | Ĭ | | | | | | 00 |
| September | · | • | • | • | · | | | • | 652 | |
| October | • | • | • | • | | • | • | • | 3,430 | 00 |
| | • | • | • | • | • | • | • | • | | |
| November | • | • | • | | • | • | | | 1,966 | 75 |
| December | • | | • | • | • | • | • | | 297,536 | 09 |
| | | | | | | | | _ | | |
| | | | | | | | | | \$456.852 | 73 |

There have been twenty-six fires with an insurance loss in excess of \$1,000. as follows,—

January 6, 5:15 P. M. 128 Linwood Street, White truck owned by C. Bowen & Sons, damage \$1,300. Cause, filling gasoline tank.

January 8, 3:10 P. M. Box 119, 38 Pearl Street, dwelling owned and occupied by John H. Meaney, damage to building \$1,003, to contents \$100. Cause, going to clothes closet with lighted candle.

January 25, 10:57 A. M. Box 47, 2-2a West Street, dwelling owned by John Pierce, occupied by Patrick McCarthy et al., damage to building \$936.75; to contents \$188.05. Cause, oil stove in bathroom.

January 26, 6: 20 P. M. Box 341, 9-11 Stickney Avenue, factory owned and occupied by Edward F. Kemp, damage to building \$3,748, to contents \$9,385. Cause, woodwork too near chimney.

January 28, 9:54 P. M. Box 113, B & M. R. R. yard at Prison Point, 5 Passenger coaches, 1 baggage and 1 paymaster's car destroyed, damage \$13,750. Cause, overheated stove in pay car.

January 29, 12:29 A. M. Box 225, 6-8 Bow Street, Bacon Hall building owned by Herbert Jay, occupied by R. H. Missereau et als. damage to building \$752, to contents \$4,510.75. Cause, unknown, started in rubbish in fruit store cellar.

February 4, 2:07 P. M. Box 42, B. & M. R. R. freight yard off Kent Street, empty freight car belonging to N. & W.

R. R. damage \$1,100. Cause, set by boys.

March 5, 12-44 A. M. Box 443, a general alarm was sounded for this fire, Medina Building 6-12 Davis Square owned by John Medina Estate, occupied by stores and apartments; Miss Catherine Perkins was suffocated at this fire; damage to building \$34,371.30; to contents \$27,061.09. Probable cause, careless smoker in basement.

March 10, 7:37 P. M. Box 225, 332 Somerville Avenue, store and tenement owned by E. M. Gladstone; occupant Wm. Mendelson, Jeweler, damage to building \$50, to contents \$1,-

080. Spontaneous combustion.

March 17, 7:25 A. M. Box 19, 13 Joy Street, dwelling owned by F. G. Articary and occupied by same, damage to building \$1,249, to contents \$500. Cause, spark on shingle roof.

March 18, 8:17 A. M. Box 36, 140 Central Street, dwelling owned by Dr. Charles F. Maguire, occupants, Alex. F. Morgan and George Simpson, damage to building \$1,704, to contents \$1,194. Cause, children going to closet with match.

March 24, 3:33 P. M. Box 114, a second alarm was sounded for this fire, 50-56 Joy Street, hay and coal sheds owned and occupied by Colbert Bros., damage to buildings \$8,560, to contents \$7,650. Cause, spark from a locomotive.

April 6, 8:39 P. M. Box 24, 535 Winsor Street, wood

April 6, 8:39 P. M. Box 24, 535 Winsor Street, wood sheds owned by Waitzkin Bros. occupant Barron Bros. bundle wood, damage to building \$2,820, to contents \$3,335.

Cause, unknown.

June 14, 3:06 A. M. Box 428, a second alarm was sounded for this fire, 29-31 Newberne Street, factory building owned by F. B. Horseman, occupants Griffin-Weene Bag Co. et als. damage to building \$4,585, to contents \$12,324.34. Cause unknown, sprinkler valves were closed.

October 19, 2:52 A. M. Box 14, 50 Tufts Street, stable owned by D. Mulcahey, occupied by John Bergman, damage to building \$650, to contents \$1,000. Cause, liquor still caught fire.

October 31, 9:31 P. M. Box 212, Boynton Yard, three freight cars of B. & M. R. R. damage \$16,265. Cause, set by boys.

December 2, 8:36 P. M. Box 46, 681-685 Somerville Avenue owned by J. E. Locatelli, occupied by Morris Saval et als. damage to building \$2,300, to contents \$2,000. Cause, carelessness with matches.

December 6, 11:14 A. M. Box 43, 28 Forest Street, dwelling owned by Lenno Zammarchi, occupied by owner, damage

to building \$1,006, to contents \$198. Cause, overheated furnace.

December 6, 6:19 P. M. Box 443, 90 Dover Street, store owned by Parke Snow Corp. occupied by A. L. Gaudet, damage to building \$449, to contents \$1,786.65. Cause, carelessness with matches.

December 10, 4:42 A. M. Box 156, in rear George Street, Charlestown, stock building owned by Boston Elevated Ry. a total loss, damage to building \$11,900, to contents \$250,000. Cause, unknown.

December 11, 7:07 P. M. Box 27, 370 Somerville Avenue, Drug store owned and occupied by Charles S. Lombard, damage to building \$856, to contents \$1,642.74. Cause, gas plate too near woodwork.

December 12, 10:27 A. M. Box 117, 78-84 Broadway, block of stores owned by J. I. Miller et als. occupied by J. T. Connor Co. et als. damage to buildings \$2,435, to contents \$4,442.03. Cause, rubbish on top of furnace.

December 14, 6:27 A. M. Box 114, 39 Poplar Street, dwelling and shed owned and occupied by Abram Greenberg, damage to building \$1,086, to contents \$316. Cause, unknown.

December 15, 9:23 P. M. a general alarm was sounded from Box 42, 285 Beacon Street, coal and wood yard and buildings owned and occupied by J. P. O'Neil, damage to buildings \$5,100, to contents \$6,200. Cause, unknown.

December 20, 2:30 A. M. Box 21, 4b South Street, store and tenements owned by A. S. Scotti, occupants Nic Cremaldi et als, damage to building \$904, to contents \$300. Cause, cigarette thrown under counter.

December 31, 11:14 P. M. Box 427, a second alarm was sounded for this fire, stable and shed owned and occupied by Gilman Express Co., John E. Palmer Prop. damage to building \$2,000, to contents \$4,900. Nineteen horses were killed at this fire. Cause unknown.

Dump fires. This class of alarms amounts to practically one-sixth of the total alarms of the year and has required the services of one or more pieces of apparatus for hundreds of hours, thereby taking them from the stations and positions assigned them for the extinguishment of legitimate fires and uncovering their respective districts to an unnecessary and dangerous extent. An ordinance, of a restrictive character, should be made to reduce this hazard.

Defective heaters, chimneys and smoke pipes. Owing to the shortage of coal and the use of many makeshifts for fuel, the conditions of heaters and chimneys will rapidly become a source of grave danger, every owner and tenant of shop and home should give his personal attention to inspecting and keeping clear and clean boiler tubes, smoke pipes and chimneys thereby materially reducing this class of causes of fire, inasmuch as a chimney fire being centrally located in a building makes a disagreeable, dirty and dangerous fire and results in a considerable loss to building and especially to contents.

False alarms and bonfires. I should be delinquent in my duties if I failed to mention this class of alarms, each year I have called attention to their great number and the attendant danger and expense, during the past year there have been several cases, in the Police Court, of persons sounding false alarms and in some instances a punishment has been imposed; I strongly urge continued and greater efforts towards investigation and prosecution of this class of criminals, that this unnecessary abuse of apparatus and equipment be reduced.

Recommendations.

I again recommend the discontinuance of the present Engine No. 4 Station, at the corner of Grove Street and Highland Avenue, and the erection of an up-to-date station for the housing of the motor equipment necessary to make this station effective; the horse-drawn apparatus consisting of a steam fire engine and a horse-drawn combination chemical and hose wagon should be replaced with a motor pumping engine and a motor double tank combination chemical and hose car; the efficiency of such an equipment is unquestioned and the expense of operation will be 85% less than the horse-drawn, comparison being made with like equipment at Engine No. 2 Station, Engine 2 and Hose 8 requiring \$202.82 for gasoline and oil as against \$1,440.02 for feed, shoeing, harness repairs and veterinary service at Engine No. 4 Station.

A new car for the use of the District Chief should be provided to replace a ten year old roadster that was purchased second-hand seven years ago.

In Conclusion.

In concluding my report I wish to thank His Honor the Mayor and the Board of Aldermen for their confidence and consideration; to the officers and members of the department commendation is due for their zeal and success in the performance of their duties.

Respectfully submitted,

SEWALL M. RICH,

Chief Engineer.

REPORT OF SANITARY DEPARTMENT

March 3, 1923.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville.

Gentlemen:

I have the honor to submit to you the report of the Sanitary Department for the year 1922.

Collection of Ashes and Paper.

| | | | | | | Ashes | Paper |
|-----------|-----|---|---|---|---|---------------|---------------|
| | | | | | | (Cubic Yards) | (Cubic Yards) |
| January | | | | | | 12,760 | 3,760 |
| February | | | | | | 10,270 | 3,420 |
| March . | | | | | • | 13,755 | 3,520 |
| April . | | | | | | 9,780 | 3,310 |
| May . | | | | | | 9,150 | 3,850 |
| June . | | | | | | 8,000 | 5,100 |
| July . | | • | • | | | 7,350 | 4,800 |
| August . | • | | | • | • | 5,890 | 4,100 |

| November | • , | | • | • | | 8,510 | 3,6 80 |
| December | • | • | • | • | • | 11,790 | 3,980 |
| Totals | | | | | • | 109,913 | 47,230 |

Departmental Revenue.

| Sale | of | Garbage | | | • | | \$2,853 | 45 |
|------|----|---------|--|---------|---|--|----------------|----|
| | | Manure | | | | | 20 | |
| | | | | wagons, | | | 3,739 | 79 |
| | | | | | | | \$6,343 | 24 |

During the year the Sanitary Department paid to the Highway Department \$4,197.30 for the use of teams and \$828.00 for board of horses.

Commencing June 12, 1922 the garbage has been collected by a contractor, the contract price being \$33,000 per year for five years with a yearly increase of \$300.

The paper and combustible materials are being disposed of at the incinerator plant. Ashes are collected principally by automobile trucks, deemed necessary as there are no nearby dumps. There is no public dump within the city limits and those now used by this department are located in the city of Medford and are subject to the rules and regulations of the Medford Board of Health.

Respectfully submitted,

Edgar T. Mayhew,
Supt. of Sanitary Department.

REPORT OF COMMISSIONER OF PUBLIC BUILDINGS.

City Hall, Somerville, January 1, 1923.

To the Honorable, the Mayor, and the Board of Aldermen of the City of Somerville:—

Gentlemen —

In accordance with the provisions of the City Charter, I submit herewith the annual report of the public buildings department for the year ending December 31, 1922.

The total valuation of the property which is in the custody of the public buildings department is approximately \$3,591,206.

The total expenditures for the year 1922 for the care and maintenance of this property was \$232,089.59.

This amount was expended as follows:

| | Janitors | Fuel | Light | Care and Repairs | Totals |
|------------------------|---|------------------|-------------|---------------------|-----------------|
| School Buildings | \$58,242 59 | \$39,877 15 | \$10,077 77 | \$59,497 50 | \$167,695 01 |
| Municipal Buildings | 5,170 97 | 1,629 13 | 1,527 05 | 3,254 95 | 11,582 10 |
| Polling Places | ••••• | 1 40 | 28 56 | 679 12 | 709 08 |

Inspection of Buildings.

The Commissioner of Public Buildings is also the inspector of buildings according to the terms of the charter and as such during the past year has made 2688 formal inspections of buildings in the process of construction.

The following table shows the number of permits issued for building operations during the year 1922:—

| | | | | | WA | RDS | | | |
|----------------|---------|------|------|------|------|------|------|------|--------|

| Totals | 120 | 113 | 73 | 94 | 103 | 132 | 378 | 1013 |

| The number of plumbing permits issued during 1922, was. | 415 |
|---|-----|
| Number of permits for plumbing in new buildings | 223 |
| Number of permits for plumbing in old buildings | 192 |
| Number of buildings in which soil pipes were tested | 341 |

The total estimated cost of new buildings and alterations during the year 1922 was \$3,136,602, while the estimated cost in 1921 was \$1,838,455, showing an increase of \$1,298,147.

The total number of permits issued during the year 1922, viz. 1013, was 299 more than during the year 1921, when 714 permits for new buildings and alterations were issued, showing an increase of 41 per cent.

There has been considerable speculative building of dwellings going on this year, or to be exact there were permits

issued for 194 new buildings housing 401 families.

Single family houses have been altered into two family houses and some of the larger houses have been altered into small kitchenette suites. These types of alteration demand very careful inspection and supervision by this department and entail considerable more time than new construction.

On September 1, 1918, the Board of Aldermen of the City of Somerville passed an ordinance requiring a fee to be collected for every building permit issued by this department. In accordance with this, fees collected for building permits

during the year 1922 amounted to \$2618.

The Commissioner has under his charge and direction the work of maintenance and upkeep of the eighty-four public buildings of the city and the grounds in connection therewith, all janitors in the city's employ, a force of eleven mechanics who perform most of the work of keeping the buildings in repair, the inspection of installation and care of all elevators, the supervision of construction of all new municipal buildings, the maintenance of the public bathing beach, and public municipal baths in the Bennett, and Bingham Schools, and Lincoln Park.

The various activities in connection with the department work require a vast amount of time and attention in order to keep the property in proper condition for occupancy.

Coal.

As in the past years an invitation was sent out for bids for supplying the necessary tonnage of both Anthracite and Bituminous coal for the city buildings for the winter of 1922 and the spring of 1923.

Owing to mine troubles and railroad conditions, it was impossible to obtain bids for fuel this year. Lack of high

grade soft and Anthracite coal in Boston markets made the situation look quite uncertain. However, the Commissioner succeeded in obtaining through several local Boston concerns a very high grade of New River soft coal at an exceedingly low price.

There are, however, several plants where it is almost impossible to obtain any results from soft coal. It has been possible, however, to keep these plants supplied with Anthra-

cite coal.

Prices were higher for the same grade of coal than during 1921, owing to these troubles and lack of supply, but the mild weather during the year 1922 made the total cost of fuel \$15,623.25 less than in 1921.

Elevators.

According to an act of the Legislature, the Building Commissioner is required to have every elevator in the city inspected yearly, and a report of the conditions and necessary repairs made to the State District Police.

Plans and specifications of all new installations of elevators must be filed in this office and certificates of approval

granted by the Commissioner.

During the year 1922, there were 144 elevators inspected and 36 orders for repairs to be made to 64 elevators, sent to the owners.

Plans and specifications were filed and applications granted for the installation of 3 new elevators.

School Buildings.

The maintenance and care of the school buildings has, as formerly, demanded the most vigilant attention from this department and the appropriation made for that purpose has, I believe, been expended carefully and judiciously.

Every year before the summer vacation arrives this department sends out a blank to be filled in by both the principals and janitors of the school buildings for all requisitions

and repairs needed.

These repairs and requests are taken up with the Superintendent of Schools, and taken care of in the order which he

suggests so far as the appropriation will allow.

First are taken into consideration the requests and repairs absolutely needed for the opening of schools in the Fall. Then the others are taken up in the order of their importance.

This in itself is a huge task as the wants of every section must be taken into consideration.

Among the necessary repairs taken care of this past year are the following:

Five boilers were retubed. A number of grates were installed and repairs made on 16 other boilers.

Plaster repairs were made in 13 buildings.

Plumbing repairs and new installations were made in 14 buildings.

New water service with larger main installed in Brown School.

CARPENTER WORK:

It is with great pleasure that the Commissioner can report many much needed repairs in all the school buildings during the past summer vacation. Much of this work was accomplished with our own carpenters and a great deal by outside contractors. These repairs consist in general of the following:

Installing window sashes
Replacing window cords
Repairing and tightening furniture
Replacing worn stair treads
Erecting fences
Extensive alterations and changes in several buildings.

At the High School, room 301 has been fitted with raised platforms for seats, a new silver screen erected and electric attachments run for a new stereopticon lantern, new folding chairs installed, thus making a complete assembly room for stereoptican purposes.

At the Boys' Vocational School on Tufts Street, the walls of the Machine Shop have been fitted with plaster board and sheathed with hard pine, tinted and varnised, a new type of lighting fixtures installed and new curtains fitted to the windows. This work has added greatly to the warmth of the building and gives a more comfortable and lighter shop for the pupils.

PAINTING.

It was possible this year to have several buildings painted both on the interior and exterior, and the Commissioner hopes this coming summer to extend this work. Special attention has been given to the selection of tints for the interior work in order that the best lighting effects might be obtained in order to relieve any possible eye strain. Early in the summer invitations were issued to several master painters to submit estimates for interior painting at the Carr, Lowe, Lincoln, Burns, Durell, Forster, Glines, Edgerly, High and Baxter School buildings. There were eight bids received and the awards were made as follows:

William Stern......Lincoln John Lingard......Burns, Glines and Edgerly August Johnson & Co.....Forster, High and Baxter Walter J. Godfrey......Carr, Lowe and Durrell

The interior of the Cummings School was painted earlier in the year by F. M. Rogers & Co. at a cost of \$497.

In the same manner estimates were obtained for exterior painting at the Carr, Cummings, and Hodgkins School buildings, and awards were made as follows:

The cost of this painting was \$6955.

On all school buildings the outside doors were repainted, all basements were whitewashed, all toilet seats painted with white enamel, and in several buildings the entire toilets were repainted.

About 2500 desk tops and over 50 teachers' desks and tables were refinished and varnished. Over 2000 students' chairs were refinished and varnished.

WINDOW SHADES.

The shade problem is another big item in connection with the maintenance of buildings. During the past year in twentyfour of the buildings, over 300 new shades have been installed replacing torn or otherwise damaged ones.

LIGHTING.

At the request of the Superintendent of Schools and the Supervisor of Continuation Schools, a new system of indirect lighting has been installed in the rooms at the High School used for the continuation classes for sewing purposes, which has met with great approval.

At the Highland School additional lights have been in-

stalled in the halls, office and toilets.

The Lincoln School building has been wired throughout for electricity and new fixtures installed.

The Bell School building has been wired throughout and new fixtures installed.

At the Boys' Trade School, the lights have been lowered and new shades installed to give better lighting effects.

There have been several minor changes in the lighting system of other buildings which practically completes the electrical program for the year.

As there are several of the older buildings in the city that are very much in need of adequate means of lighting, it is the hope of the Commissioner to continue this work during the coming summer and be able to report several other buildings completed in the next annual report.

HEATING.

Many necessary repairs have been made to the heating plants of several buildings during the past summer and there are still more repairs and changes which we desire to make in order that the plants may be more effective.

At the Cummings School a new furnace was installed.

At the Lincoln School the boiler was repaired and enlarged so that this year it has not been necessary to close school on account of cold rooms. Five boilers have been retubed and a number of grates installed together with repairs on sixteen other boilers.

In fifteen buildings steam repairs have been made owing to leaky and defective pipes or fittings.

The fire boxes and practically all boiler settings have

been repaired or renewed.

Fuel savers have been tried in several of the buildings with no marked success.

BLACKBOARDS.

At the Cutler School, new slate blackboards and mouldings were installed at a cost of \$300.

In thirteen of the older buildings where paper black-boards are still used, which have to be resurfaced practically every year, repairs were made by the Baker School Specialty Company of West Somerville, at a cost of \$606.62.

ROOFS.

Eighteen roof leaks were taken care of, several gutters and conductors replaced and other roof repairs made on several buildings. The ventilating hoods on top of vent stacks above the roofs on five buildings were repaired or replaced.

There is a possibility during the coming year of the necessity for replacing the entire slate roof on at least two buildings and also one tar and gravel roof.

SCHOOL YARDS.

During the past summer extensive repairs have been

made to the school yards.

At the Bingham School, the grade of the yard has been raised by a fill thus preventing the water from overflowing on the adjoining property, resurfacing with an asphalt pavement and cutting away the sidewalk making a cement drive to the coal bin windows, doing away with the necessity of carrying in the coal, which improvement will pay for itself in a short time.

At the Brown School a new tar and macadam coal drive was made and the grade of the school yard was raised to prevent the surface water from flowing into the basement.

At the Burns School the old tar concrete drive was replaced with a tar and macadam to prevent the coal teams

from cutting into same.

At the Lowe School a retaining wall was erected and the pitch of the yard changed to prevent water from running over the neighbor's property and cutting away the banking.

At the Forster School a new tar and macadam driveway

was constructed.

At the Hanscom, Highland and Prescott Schools, the vards were recoated.

The contract for the above work was awarded to James H. Fannon at a cost of \$3072.

FURNITURE.

Owing to changes in some of the school buildings, it has been necessary to change several rooms of furniture during the past year.

A number of new teachers' desks and chairs have been purchased and a great many new pupils' desks and chairs have been installed to replace damaged or worn out furniture.

At the Boys' Trade School fifty new metal lockers have been installed filling a much needed want and doing away with the old wooden lockers which were a fire menace.

FIRE ALARM.

In four of the school buildings a new and distinct type of fire alarm has been installed, the current for same being taken direct from the Edison Electric current instead of from batteries. The buildings so equipped are the Highland, Eastern Junior High, Prescott and Lowe Schools.

It is the hope of the Commissioner to be able to equip other school buildings in a similar manner this year.

Fire Department Buildings.

There have been numerous repairs and improvements made in the fire buildings of the city.

The abolishing of Hose Eight Station on Marshall Street caused changes to be made in Hose Two Station at the corner of Cross Street and Broadway, and the purchase of additional furniture.

The exterior of Engine Two, Ladder Two and the Central Fire Station buildings have been painted by our department painters.

Interior painting has been done in Hose 5, Engine Two and the Central Fire Stations.

At Engine Six Station, the sleeping quarters have been thoroughly renovated. The old hay loft has been fitted up for sleeping quarters which fills a most pressing need and now gives windows on three sides while the old quarters had windows on one side only. A new room has been fitted up in the front of the building for the District Chief, and the old bath renovated and a new shower installed.

At Engine Two, new heating apparatus has been installed.

At the Central Fire Station, new piping for a cold water supply has been installed.

New landing pads for sliding poles have been replaced in several of the stations.

A new roof was put on the Central Fire Station, and all cornices repaired and replaced where necessary.

New steel lockers have been purchased for several buildings.

New chairs have been purchased for the recreation rooms at Union Square, Engine Two and Ladder Two Stations, and new desk chairs for the floor men at Union Square, Ladder Two, Engine 6 and the Central Stations.

The Commissioner recommends the following considerations for this coming year:

Removal of the gas heaters used for heating water, and the installation of tanks connected with a coal heater, of sufficient capacity for summer use, and connected with the heating plant for winter

This would mean a great saving of gas, which is at present quite an expense.

New cement floors in the apparatus rooms at Union Square, Engine Two, Ladder Two and Engine Six.

Several minor repairs and some painting at Engine Four, although I urgently recommend that this building be replaced by a new one as it is in such bad shape that it does not seem wise to spend much on repairs. As a fire station is needed in this vicinity, I recommend that this station be torn down and a new one built on less valuable land, and this lot sold for commercial purposes. Much of the material in the old building could be made use of in a new one.

Municipal Buildings.

At the present time plans are being made for an addition to the present City Hall, the departments of which have been crowded for space for some time. From the plans shown another wing will be added to the present building and the entrance changed to the side, carrying out the style of architecture of the original building. This will give sufficient room to house the departments some of which are at present in the Annex.

During the past year the exterior walls of the G. A. R.

section of City Hall Annex have been painted.

The heating plant has been connected to the central heating system, doing away with the use of the old boiler in the Annex, and thus effecting a considerable saving of fuel.

New electric lighting fixtures have been installed in the offices of the Superintendent of Schools and the Overseers of

Poor.

Additional radiation has been installed and a new flag case completed and set up in G. A. R. Hall.

Libraries.

Very few repairs have been made to the library buildings

this year.

The interior of the Central and West Somerville Branch Libraries are in such a condition that they will need painting throughout in the near future.

Some roof repairs will be necessary at the Central Li-

brary after this past winter.

Considerable furniture is needed this coming year.

Water, Highway, Sanitary and Sewer Buildings.

WATER BUILDINGS.

Considerable work has been accomplished at these buildings during the past year and there is need of still more. A concrete floor is needed in the shop and the windows need to be enlarged to give proper light.

HIGHWAY BUILDINGS.

A new tar and gravel roof has been laid on the garage and blacksmith shop, and an additional area of the shed enclosed for garage purposes. General repairs were made to the interior of the building.

SANITARY BUILDINGS.

The office at the Sanitary Stable has been painted on the interior and exterior and fitted with new furniture. A new tar and gravel roof must be put on this year, and extensive plumbing repairs made.

SEWER BUILDINGS.

The Sewer Building has been repaired generally, a new roof was laid, new floors in the shop and new sash. These repairs will eliminate spending money on this building for several years.

Hospital.

General repairs have been made to the hospital buildings. New stairs have been built extending to the hospital wards, and to both front and rear piazzas of the scarlet-fever ward.

The chimneys have been pointed and a portion of the roof reshingled. There is still considerable work to be done in these buildings and it is hoped that it will be possible this coming year to do some interior and exterior painting.

Police Buildings.

Many needed repairs were made during the past year. Extensive interior painting was done including the offices and cell rooms. New lighting fixtures were installed in the outer office, guard room, clerk of court's and the court room. In the Judge's office a new metal ceiling was installed and the room repainted.

A new counter was built in the room occupied by the Clerk of Court.

Several steel lockers were installed to replace the old wooden ones.

A new heating plant has been installed in the stable of adequate size to take care of the additional wooden garages.

Bathhouse.

The public bathhouse on the Mystic River at Wellington Bridge was opened and maintained as usual this year with a good attendance.

About 500 tons of sand were purchased for resanding the beach.

A change was made on the men's side of the bathhouse by installing separate showers and toilets for the boys' quarters, thus excluding the boys from the men's locker rooms which seems to be a much better arrangement.

It is hoped that the same change may be made on the women's side of the building this coming summer.

Park Buildings.

The total amount expended on our Park Buildings during the year 1922 was \$1520., and of this amount \$1337. was spent for attendant, fuel and light, laundry and supplies, leaving a balance of only \$183. as having been spent for actual repairs.

It will be necessary this year however, to spend considerable on the hot water heater for the shower baths at Lincoln Park, as we are only able at present to supply hot water for three of the twelve showers.

The wooden storage building in Broadway Park was removed during the year; this saved considerable expense for repairs.

Bids have been received and the contract awarded to Mulcare and Graves of Cambridge for the erection of a new Park building in Richard Trum Playground at a cost of \$5172. The plans for this building were made by the Commissioner of Buildings, and they provide comfort stations for men and women, storage space for the Park Department, all on the street level, while beneath on the playground level, there will be a large dressing room and shower baths for the athletes together with a heater room. It is expected that this building will be finished about the 15th of June.

The Park building for Dilboy Field has not been started as yet owing to insufficient funds, but plans made by the Commissioner are on file in his office and it is expected that this contract will be awarded this year.

In General.

The Building Commissioner has had the co-operation of all branches of the City Government, including His Honor, the Mayor, the honorable members of the Board of Aldermen and all the city officials, and desires to thank them for their kindly consideration.

Respectfully sumbitted,
George L. Dudley,
Commissioner of Public Buildings.

Office of the Board of Health, City Hall Annex, January 1, 1923.

To His Honor, the Mayor, and the Board of Aldermen:—Gentlemen:—

We respectfully submit the following as the forty-fifth annual report of the Board of Health in which is presented a statement, tabulated and otherwise, of the sanitary condition of the city and the business of the board for the year ending December 31, 1922.

Nuisances

A record of the nuisances abated during the year, in compliance with notices issued by the board, or under the board's direction, is presented in the following table:

| Complaints referred from 1921 | | | | • | 21 |
|---------------------------------|---|---|---|---|-----|
| Complaints received during 1922 | | • | • | • | 474 |
| | | | | | 495 |
| Complaints referred to 1923. | | • | | | 25 |
| Nuisances abated in 1922 . | | | | | 470 |
| Second and third notices sent | | | | | 25 |
| Received during 1922 | • | | | | 474 |
| Matal matters and | | | | | 400 |
| Total notices sent . | • | • | | • | 499 |

In addition to the above, 334 dead animals have been removed from the public streets and private premises. Many nuisances have been abated on verbal notice from the agent, without action by the board, of which no record has been made. Each spring the whole city is examined, and cellars, yards and alleyways where rubbish and filth have collected are required to be cleaned.

Record of Licenses and Permits Issued

COWS. One application was received for a permit to

keep one cow, which was granted.

GOATS. Eight applications were received for permits to keep twenty-one goats, all of which were granted. The fee is one dollar for each goat.

HENS. Seventy-six applications for permits to keep 1235 hens were received. Fifty-seven to keep nine hundred and ninety-seven hens were granted, and nineteen permits were refused. One license to keep six hens was revoked.

GREASE. Twenty-one applications were received for permits for twenty-four teams to collect grease, which were

granted. The fee is two dollars for each team.

MELTING AND RENDERING. Three parties have been licensed to carry on the business of melting and rendering, for which a fee of one dollar is charged. One license to render under Section 154 of Chapter 111 of the General Laws was granted.

MASSAGE AND MANICURE. Thirty-four persons have been licensed to practice massage and manicure. The

fee is one dollar for each license.

SALE OF ALCOHOL. The statutes provide that no person firm or corporation other than a registered druggist shall engage in the business of manufacturing, buying, selling or dealing in methyl alcohol, or wood alcohol, so called or denatured alcohol, or any preparation containing more than three per cent of any of the said alcohols, without being licensed so to do by the Board of Health.

Under the provisions of this act fifteen licenses have been issued. A fee of one dollar was received for each

license.

BOTTLING. CARBONATED BEVERAGES. Chapter 303, Acts of 1921 provides that no person shall engage in the manufacture or bottling of carbonated non-alcoholic beverages, soda waters and mineral and spring water without a permit from the board of health. Nine such permits were granted, a fee of ten dollars being charged in each case.

DAY NURSERY. One license was issued to establish and maintain a Day Nursery for which a fee of one dollar was charged. Application was made for the renewal of a license to maintain a nursery, which was not granted by the

board of health.

Stables

No person has the legal right to erect, occupy or use any building in this city, as a stable, without obtaining a license from the board for such occupancy. Each application is referred to the Agent of this board and no license is granted unless all regulations of the board are complied with. The following is a record of applications received and licenses granted:

| Applications pending | fron | n 19 | 921 | | | 7 |
|-----------------------|------|------|------|--|---|----|
| Applications received | dur | ing | 1922 | | | 11 |
| | • | | | | | |
| | | | | | | 18 |
| Licenses granted | | | | | 9 | |
| Licenses refused | | | | | 2 | |
| | | | | | | |
| | | | | | | 11 |
| Licenses pending | | | | | | 7 |
| 1 | | | | | | |

Board of Infants

Fourteen applications having been made to the State Department of Public Welfare for licenses to care for children in this city were referred to this Board under provisions of Chapter 119 of the General Laws. Thirteen of these applications were approved for the care of twenty-six children and one was returned without the approval of this board.

There were 1019 deaths and fifty-six stillbirths in the city during the year, as specified in the following table:

| Deaths at Somerville Hospital | • | • | 96 |
|--|-----|---|----|
| Deaths at hospital for contagious diseases | . ' | | 19 |

Disease Dangerous to the Public Health

This board has adjudged that the diseases known as actinomycosis, anterior poliomyelitis, anthrax, Asiatic cholera, cerebro-spinal meningitis, chicken pox, diphtheria, dogbite (requiring anti-rabic treatment), dysentery, German measles, glanders, hookworm disease, infectious disease of the eye, influenza, leprosy, malaria, measles, mumps, pellagra, plague, pneumonia (lobar only), rabies, scarlet fever, septic sore throat, small pox, tetanus, trichinosis, tuberculosis (all forms), typhoid fever, typhus fever, whooping cough, yellow fever, are infectious or contagious and dangerous to the public health and safety within the meaning of the statutes. Physicians are required to report immediately to the board every case of either of these diseases coming under their care and postal cards conveniently printed and addressed are supplied to them for the purpose. On receipt of a card from a physician, the principal of the school in the district in which the patient resides, the librarian of the public library and state board of health are notified.

Specimens and Supplies

Outfits for specimens to be examined for tuberculosis, diphtheria, and typhoid fever, and diphtheria anti-toxin, vaccine lymph and nitrate of silver solution may be obtained at the laboratory and at the following places:

Edward Edwards, 25 Union Square.
R. A. Peckham, 154 Perkins Street.
Richardson Pharmacy, 310 Broadway.
Ernest B. McClure, 529 Medford Street.
George E. Wardrobe, 693 Broadway
Willis S. Furbush & Co., 1153 Broadway.
Hall Drug Co., Hobbs building, Davis Square.
John Morrison, 288 Highland Avenue.

Hereafter the Agent of this Board will collect, daily, at five o'clock, p. m., all specimens left at culture stations for examination, prior to that hour.

Physicians desiring reports on the following day, of specimens taken after this collection has been made must deposit the same at the City Hall Annex, in the receptacle provided, before nine-thirty p. m.

Results of all examinations of specimens received at the City Hall Annex prior to nine-thirty p. m., will be reported to the physicians on the following morning.

Medical Inspection at Schools

The medical inspection of the schools of Somerville, which was instituted in December, 1907, has been continued during the year. The value of the system has been constantly demonstrated, and the work has been done in a very satisfactory manner. There has been harmony of action between the board of health and the school board, and the school principals and teachers have very generally co-operated with the inspectors in making the system as successful as possible.

The inpectors make daily visits to the schools under their charge, and to them are referred all children who show evidences of disease or abnormal conditions. Children who are found to be unfit to remain in school are sent home, accompanied by a slip properly filled out advising that the family physician be consulted. The inspectors also make an annual inspection of all the children in the schools, and any defects discovered are called to the attention of the parents. Monthly inspections of the school buildings and premises are made, and suggestions or criticisms are referred to the proper authorities. Every effort is made to protect the health of the children and to co-operate with the parents in keeping the children in as normal a condition as possible.

In accordance with the provisions of the statute, tests of sight and hearing are made by the principals or teachers.

District No. 1

Inspector Dr. Francis Shaw, 57 Cross Street.
Schools Eastern Junior High, Prescott, Hanscom,
Edgerly and Boys' Vocational schools

District No. 2

Inspector Dr. Edward J. Dailey, 46 Bow Street.
Schools Baxter, Knapp, Perry and Southern Junior
High Schools.

District No. 3

Inspector Dr. Walter Jellis, 1028 Broadway.
Schools Bennett, Pope, Cummings and Proctor Schools.

District No. 4

Inspector Dr. W. L. Bond, 322 Highland Avenue.
Schools Morse, Carr, Durell, Burns and Girls' Vocational Schools.

District No. 5

Inspector Dr. H. M. Stoodley, 283 Highland Avenue.

Schools Brown, Bingham, Forster and Northern Junior High Schools.

Bacteriological Work.

The report of the work of this department is made by Frank L. Morse, M. D., on a subsequent page and becomes a part of this report.

Undertakers.

Under the provisions of Section 49 of Chapter 114 of the General Laws, twenty-three persons have been duly licensed as undertakers.

Examination of Plumbers.

The public statutes provide for a board of examiners of plumbers, consisting of the chairman of the board of health, the inspector of buildings, and an expert at plumbing, to be appointed by the board of health. This board appointed Duncan C. Greene, the inspector of plumbing, to fill the place of expert. The number of licenses granted will be found in the report of the inspector of buildings.

Health Nurses.

There are at present five nurses employed by this board. Two of these are employed as school nurses and the work of the others consists of follow-up work regarding tuberculosis cases and post-natal baby hygiene work.

The reports of the school nurses are made a part of the report of the School Committee and those of the other nurses are made a part of this report being submitted in detail in subsequent pages.

Infant Hygiene Clinics.

During the past year under the supervision of this board, clinics have been held every Thursday afternoon at the Bennett Schoolhouse and every Friday afternoon at the Bingham Schoolhouse except when those days were holidays. 528 babies have been registered at these clinics. The average weekly attendance at the Bennett Schoolhouse was 40 and at the Bingham Schoolhouse 60.

This work is of inestimable value and the results are very far reaching.

C. A. C. RICHARDSON, Chairman, Wesley M. Goff, Warren C. Blair.

Laurence S. Howard, Clerk

REPORT OF HEALTH NURSES.

To the Board of Health,

Somerville, Mass.,

January 1, 1923.

Gentlemen:-

We submit the following report of work performed by us in infant hygiene, post natal and tuberculosis cases for the year ending December 31, 1922.

Infant Hygiene.

| Infants reported as born in Somerville during 1922. Infants born elsewhere resident in Somerville. | 1661 258 |
|---|-------------|
| Pairs of twins born in Somerville | 12 |
| Sets of triplets born in Somerville | 1 |
| Still-births in Somerville | 56 |
| Infants who moved away from Somerville | 213 |
| Infants reported with Ophthalmia Neonatorum. | 7 |
| Infants reported with Conjunctivitis | 9 |
| Infants reported with Infantile Paralysis | 5 |

There were one hundred and eleven deaths of infants under one year of age in Somerville during the past year as shown in the following table:

| Prematurity | . 29 |
|--|-------|
| Congenital diseases | |
| Intestinal diseases (Breast fed 2 — Artificially fed 13) | 15 |
| Accidental injury | . 1 |
| Pneumonia and other diseases | |
| Infants dying in Somerville residence elsewhere . | . 7 |
| Total | . 111 |
| Infants under supervision at Baby Welfare Clinics | |
| Jan. 1, 1922 | 718 |
| Registration during 1922 | 528 |
| | 1040 |
| Total under supervision during 1922 | 1246 |
| | |

Tuberculosis.

Tuberculosis.

During 1922 there were 32 deaths from Tuberculosis including all forms, 31 of which were of the pulmonary type. This record shows a continued decrease from the previous year when 64 deaths were reported, and the tuberculosis death rate per 10,000 of the population has been still further reduced from 5.8 in 1921 to 3.3 in 1922.

All patients ill with the disease coming to the attention of the board have either been supervised at their homes by the Public Health Nurses, or have been placed in sanatoria when such treatment was needed.

The tuberculosis ward at the Contagious Hospital which was closed on September 1, 1921, still remains closed, as there has been no apparent necessity of its being reopened.

Infant Hygiene Clinics

On January 1, 1922 the board with the approval of His Honor the Mayor, assumed the care of the Infant Hygiene Clinics previously maintained by Somerville Chapter of the American Red Cross. These clinics have been held on Thursday afternoon at the Bennett School and Friday afternoon at the Bingham School throughout the year. An average attendance of 40 at the Bingham School and 60 at the Bennett School has been attained. 528 new babies have been registered at the clinics where advice has been given to the mothers by the attending physician, and in many instances the infants have been visited at home by the Public Health Nurses in order that the advise may be properly followed out. This work is unquestionably of great value in conserving the health of new born infants.

With the approval of the Mayor an additional Public Health Nurse was elected on January 1st and the city redistricted alloting one nurse to each of the three districts.

Respectfully submitted,

FRANK L. MORSE,

Medical Inspector and Bacteriologist.

REPORT OF THE INSPECTOR OF ANIMALS AND PROVISIONS.

Somerville, Mass., January 1, 1923.

To the Board of Health, Somerville, Mass.

Gentlemen: -

I submit the following as my report for the year ending December 31, 1922.

Inspections.

The following table shows the number of inspections made during the past year. In order to safeguard the consumer, all establishments handling foodstuffs are under constant supervision. Lunch carts and restaurants have been inspected weekly.

Under the provisions of the General Laws of 1920 all bakeries are required to register with the Board of Health. The law provides that all doors and windows shall be properly screened and that all food exposed for sale shall be kept covered. Careful inspections of all bakeries have been made to see that this law has been complied with.

All the factories in the city have been inspected monthly. The Barber Shops are under very careful inspection and must be kept in a sanitary condition, and the barbers are required to keep themselves neat and clean and to properly sterilize their instruments.

Number of Inspections.

| Bakeries | 370 | Milk and Cream plants | 136 |

REPORT OF THE INSPECTOR OF MILK AND VINEGAR.

Chemical and Bacteriological Laboratory,
City Hall Annex,
Somerville, Mass.,
January 1, 1923.

To the Board of Health, Somerville, Mass. Gentlemen:—

I herewith present my annual report for the year ending December 31, 1922.

On the above date there were in this city licensed to sell milk, 689 stores and 74 dealers; and 100 stores were licensed to sell oleomargarine.

Of the 74 dealers, 22 are located in this city, 41 in neighboring cities, and 4 dealers have discontinued business, and 2 dealers were refused a license. Thirty-five dealers are pasteurizing milk according to statute, and 7 dealers sell only cream, the balance selling raw milk.

There are approximately 35,000 quarts of market milk and 2500 quarts of cream distributed in Somerville daily. Many "special milks" are sold by the various dealers, who claim superior quality for their goods. At the present time this department has no further control over these "special milks" than to see that they comply with the legal standards prescribed for any milk.

Each month during the year pint samples have been taken from every milk dealer and analyzed for food value (fats and solids) and cleanliness (bacterial count and sediment) and the yearly average is shown in the alphabetical list of dealers which follows:

The higher the fat and solids the greater the food value. The lower the bacterial count, the greater care in production, better handling or more efficient pasteurization is shown.

Regular Market Milks.

The General Laws define the terms used in this report as follows:

"Heated Milk".—Milk which has been subjected to artificial heat greater than one hundred and sixty-seven degrees Fahrenheit.

"Pasteurized Milk".—Natural cows milk not more than 72 hours old when pasteurized subjected for a period of not less than thirty minutes to a temperature of not less than one hundred and forty nor more than one hundred and forty-five degrees Fahrenheit and immediately thereafter cooled to a temperature of fifty degrees Fahrenheit or lower.

Recommendations.

- 1. It is important that a strict supervision be given processing plants both in the city and in the country. With the present personnel of the department it is impossible to do so, and an inspector who devotes his entire time to creamery, milk plant and dairy inspection is much to be desired.
- 2. This department does not recommend "special milks." Most of the regular "market milk" will compare very favorably with the "special milks" now sold.

Respectfully submitted,

HERBERT E. BOWMAN, Inspector of Milk and Vinegar.

REPORT OF THE CITY CLERK

Office of the City Clerk, January 1, 1923.

To the Honorable, the Mayor and the Board of Aldermen:-

Gentlemen:—The following is respectfully submitted as the fifty-first annual report of the City Clerk of the City of Somerville, and is for the year ending December 31, 1922.

The receipts and payments were as follows:-

| Females | | | | | | | | 906 |

A canvas of the city is at present being made under the direction of the city clerk as required by section 5, chapter 29, of the Revised Laws, to ascertain the facts required for record relative to children born during the year.

As the information derived from such canvas will not be available in time sufficient for its incorporation in this report, a statement in full of the births of 1922 will be given in the city clerk's report for the year 1923.

ORDINANCES.

Somerville, January 1, 1923.

The following ordinances have been adopted since the printing of the annual reports for the year 1921:—

ORDINANCE NO. 97.

An Ordinance Amending Ordinance No. 96 Relative to One Way Streets.

Be it ordained by the board of aldermen of the city of Somerville as follows:—

Section 1. Section 1 of Ordinance No. 96 enititled "An Ordinance Relative to One Way Streets" is hereby amended by striking out the words "or along any portion of Franklin street between Washington street and Broadway except in a north-easterly direction" and substituting therefore the words "or along any portion of Franklin street between Oliver street and Broadway except in a northeasterly direction, also along any portion of Franklin street between Washington street and Oliver street during a period from eight o'clock in the forenoon of each day until five o'clock in the forenoon of the following day except in a northeasterly direction."

Section 2. Whoever violates any provision of this ordinance shall be liable to a penalty of not exceeding twenty dollars for each offense.

Section 3. This ordinance shall take effect upon its passage.

ORDINANCE NO. 98.

An Ordinance to Amend Ordinance No. 91 entitled "An Ordinance Relative to the Fire Department."

Be it ordained by the Board of Aldermen of the City of Somerville as follows:—

Section 1. The first paragraph of Section 1 of Ordinance No. 91 entitled "An Ordinance Relative to the Fire Department" is hereby amended by striking out the last sentence of said paragraph, namely "The to district chiefs shall each perform the duties of a captain," so that said first paragraph shall read as follows:—

The fire department shall consist of a chief engineer, a deputy chief, two district chiefs, a master mechanic, and as many other officers and members as the Board of Aldermen shall from time to time determine.

Section 2. This ordinance shall take effect upon its passage.

Approved March 16, 1922.

ORDINANCE NO. 99.

An Ordinance Fixing License Fee for Purchase and Sale of Second Hand Motor Vehicles and Parts Thereof.

Be it ordained by the board of aldermen of the City of Somerville, as follows:—

Section 1, Ordinance 89 is hereby amended by striking out Section 1, and inserting in place thereof the following:

Section 1. The fee for each class of license provided for by section 57 to 69 inclusive of Chapter 140 of General Laws is hereby fixed at the sum of \$25.00.

Section 2. This Ordinance shall take effect June 5, 1922.

Approved July 28, 1922.

ORDINANCE NO. 100.

An Ordinance Relative to Examination of Structures For Use By Public.

Be it ordained by the board of aldermen of the City of Somerville, as follows:—

Section 1. The Commissioner of Public Buildings shall examine into the safety of all grandstands, merry-go-rounds, ferris wheels and other structures intended for use by the public in connection with any exhibition, show, game or other amusement, and no person shall cause or allow such a structure to be used by the public until a permit has been given in writing for such use by the commissioner.

Section 2. Whoever violates any provision of this ordinance shall be liable to a penalty of not exceeding twenty dollars for each offense.

Section 3. This ordinance shall take effect upon its passage.

Approved December 15, 1922.

ORDINANCE NO. 101.

An Ordinance Relative to Making Chester Avenue a One Way Street.

Be it ordained by the board of aldermen of the City of Somerville, as follows:—

Section 1. No person shall cause or allow a vehicle other than a vehicle propelled by hand to pass along any portion of Chester avenue except in a westerly direction.

Section 2. This ordinance shall not apply to street railway cars.

Section 3. Whoever violates any provision of this ordinance shall be liable to a penalty of not exceeding twenty dollars for each offense. Section 4. This ordinance shall take effect January 1, 1923.

ome of the samuary 1, 1926.

CITY GOVERNMENT AND OFFICERS FOR 1922

Mayor.

JOHN M. WEBSTER, 76 Boston Street

Board of Aldermen.

SOMERVILLE WATER WORKS.

SOMERVILLE, MIDDLESEX CO., MASSACHUSETTS.

Settled, when part of Charlestown, 1630.
(Home of Colonial Governor John Winthrop).
Incorporated a town, 1842.
Established a city, 1872.

Location: Somerville City Hall (near centre of the city) is 2¾ miles northerly from State House, in Boston.

Greatest extent of the City north and south about 4.2 miles.

Greatest extent of the City east and west about 2.1 miles.

Elevation Highland avenue at City Hall 105 feet above mean low water.

Lowest building elevation in the city 13 feet.
Highest building elevation in the city 145 feet.

Area of city, including land and water, about 4.22 square miles.
Land, 2,461.50 acres; water and marsh, 238.50 acres.
Population, 1920 census, 93,033.
Present population, estimated, 96,000.
Entire population on line of pipe and supplied with water.

Water works owned by City of Somerville.
Construction commenced in 1868.

Source of supply: Metropolitan system, taking water of the Nashua river at Clinton, Mass.

Range of pressure on street mains:
Low service 35 to 65 pounds.
High service 45 to 100 pounds.

Mayor.
Hon. John M. Webster

Water Commissioner. FRANK E. MERRILL

Office of the Water Department.

Room 10, City Hall.

Department Buildings and Yard. Cedar street, near Broadway.

\$2,405,997 58

There has been credited to the city by the commonwealth as its proportion of the amounts received from entrance fees, water supplied outside the district, and water furnished to water companies the sum of \$9,056.10.

The daily consumption of water in Somerville, as recorded by the Venturi meters, operated by the Metropolitan water works, is shown below by months for the year 1922:—

| Month | Gallons Ga per day per | | Month | | Gallons per capita |
|----------|---------------------------|----|-----------|-----------|-----------------------|
| January | 7,523,000 | 78 | July | 7,567,200 | 78 |
| February | | 74 | August | 7,229,000 | 74 |
| March | | 74 | September | 6,896,700 | 71 |
| April | 6,894,000 | 71 | October | 7,527,300 | 77 |
| May | 7,320,500 | 76 | November | 7,579,400 | 78 |
| June | 7,626,200 | 79 | December | 7,877,300 | 81 ' |

The consumption for the year was: -

| Low-service system | 594,938,000 | gallons |
|---|---------------|---------|
| Total consumption | 2,685,399,000 | gallons |
| Average daily consumption | 7,357,300 | gallons |
| Average daily consumption, per capita, for Som- | | |
| erville | 76 | gallons |
| Average daily consumption, per capita, for Met- | | |
| ropolitan district | 94 | gallons |

The following table shows the daily per capita consumption of water in the cities and towns in the Metropolitan Water District for the year 1922, as registered by the Metropolitan meters:

| City or Town | Jan | Feb | Mar | Apr | May | June | July | Aug | Sept | Oct | Nov | Dec | Year |
|--------------|------------|------------|-----|-----|-------|------|------|-----|-----------|-----|-----|------------|------|

Construction - Maintenance - Operation.

The construction work of the department is divided roughly into three classes, viz: installation of (1) water mains; (2) water services; (3) meters.

In the first two classes there has been a notable increase of activity during the year, while but comparatively few meters have been installed.

Details of construction work are given in the tables printed in this report; suffice it to say here that more feet of street mains to supply new buildings have been laid and more services have been installed during this year than in any other since 1914.

The following table is of interest as it gives the

Class of Premises Covered by Service Installation.

| Automobile Sales Buildi | ng | | | | • | 1 |

Maintenance and upkeep may also be divided into several classes, viz: (1) general operation: (2) street mains and attachments (hydrants, valves etc.): (3) services and fittings; (4) meters and boxes: (5) tools and equipment: (6) transportation.

The principal job on maintenance of street mains was the completion of replacing the old 6" pipe in Linwood street in anticipation of the street paving.

The hydrant and valve system has been as well looked after as labor and transportation conditions would permit; it is hoped soon to be able to institute a systematic method of inspection.

The increasing use of motor trucks is causing a noticeable addition to our work in the upkeep of the fire hydrant system, as many hydrants are broken by the operation of these vehicles in our streets. In most cases the department is able to obtain a settlement for the amount of the damages.

Other hydrants are put out of order by contractors and other inexperienced men using them without authority.

Our fire service system, covering about 1,200 hydrants, has been installed at large expense for protective purposes only and should not be used except by firemen in the discharge of their duties or by authorized waterworks employees. Our city ordinances prescribe penalties for unlawful use of fire hydrants and it may be necessary to bring offenders before the Courts for punishment. Some contractors argue that because the city gives them water without charge in doing work for the city that they are entitled to get it by operating the fire hydrants. In every such contract made by the city it should be clearly stated, so that there can be no misunderstanding, that the fire hydrants must not be opened by contractors.

The service branch of our department work, with its nearly 14,000 pipes, demands a large share of our labor and

equipment and we have found it very difficult to keep up with the calls for improved water supply.

As each succeeding year adds to the amount of corrosion and filling up of the older pipes and fittings the problem of keeping them clear and satisfying the legitimate requirements of our water-takers becomes more and more difficult.

It is certain that more men and equipment will have to be provided for this work.

In anticipation of the permanent paving of a portion of Beacon street all the service pipes appearing to need renewal between Buckingham and Park streets were replaced with new lead pipes.

With nearly 12,000 water meters in operation the maintenance of this branch of our work keeps several men with equipment busily employed.

Our meter system sprang into intensive existence twenty years ago and has steadily increased in volume and importance. Besides the periodical reading of the meters and the accounting necessary for billing and collecting the rates, which are handled in the general office, there is a large and constantly expanding shop expenditure for the upkeep of the meters installed and this will grow with increased installation and advancing age of the meters in service. Ample provision must therefore be made for carrying on this permanent branch of the department work.

It is the custom of the department to own the meters and to furnish them without charge to the property owners, but to require payment from them of the cost of installation of the meters.

In most cases the rate-payers find their payments for the period of a year on metered consumption considerably less than on the old "annual" rate basis, although to secure this benefit proper attention must be given to leakages and other waste of water.

Under the law requiring all new houses to be metered 181 meters were installed. The general installation, however, eased up on account of the unusual activities in other directions, and there were but 67 of this class installed, making the city at the close of the year 82.68% metered.

Repairs must soon be made to some of our machine-shop tools and additional equipment must be provided for carrying on our service cleaning work.

Additional transportation in the form of at least two new trucks must be provided very soon to take the place of old and worn-out motor vehicles. Certain of our transportation equipment is of ancient date and, costing the city but little in the first place, can well afford to be laid aside now

in favor of heavier trucks, better fitted for our requirements.

The general operation of the department is under the direction and control of the water commissioner. This includes the supervision of all branches of the work, extensions of the distribution system, purchase of supplies, employment of labor and settlement of the many problems arising in a water system supplying a population of nearly 100,000 people.

Pitometer Survey.

During the year a survey has been made by the Pitometer Company of New York of the entire high-service district of the city and of one section of the low-service district including the packing houses and railroad yards. The results were very satisfying as showing the generally tight condition of the water mains and services in the two portions of the city

surveyed.

The general scope of the survey covered the following points: (a) A subdivision of the section to be surveyed into districts and measurements of the consumption throughout the twenty-four hours; (b) Subdivision of the districts where excessive waste was indicated, and investigations of all blocks on which high rates of flow were indicated to determine the cause; (c) A test of the Metropolitan Venturi meters for accuracy; (d) A check on large consumers for a period of twenty-four hours; (e) A test of all meters 4" and over for accuracy; (f) A report of the work done and results accomplished.

Methods of the survey: The entire high-service system was divided into four districts, containing about 30½ miles of

street mains and a population estimated at 30,000.

District 1 of the low-service system, embracing in a broad expression that part of the city lying south of Somerville avenue and Washington street, was also divided into four districts covering about 18 miles of water mains and an estimated population of 17,000.

Each district was formed by closing a line of boundary gates around the area to be tested, supplying that area through but one pipe. A pitometer was then inserted into this supply main through a 1" corporation cock and a continuous measurement of the flow through it was made for a period of twenty-four hours.

As a general rule in districts where the minimum night rate is less than 50% of the average daily consumption the condition is considered satisfactory. However, in this survey all residential districts were investigated by sub-division at

night, by supplying the district through the same or a smaller feed and by closing interior and opening exterior valves; then, by noting the corresponding drops in the consumption indicated by the pitometer, the rate of flow for each block was determined.

In high rate blocks where the rate could not be accounted for by large consumers, the underground waste or leakage was located with various forms of listening devices.

In the tests of the Venturi meters, a pitometer was set up on the main leading from the meters and readings were taken from the Venturi charts and compared with the pitometer records for a period of twenty-four hours.

The large city meters were tested by placing a pitometer on the main or service pipe leading into the meter and measuring the flow for a period of twenty minutes.

The results of investigations on the total supply showed that during the period of the test the total consumption of the high-service system was 1,587,000 gallons a day and the minimum night rate was 1,047,000 a day. On a basis of the estimated population the per-capita consumption was approximately 53 gallons a day.

The total amount of leakage disclosed in the survey of the high-service was 228,000 gallons a day. Of this amount leaks of 106,000 gallons a day were discovered and were being repaired by the water department. The remaining 182,000 gallons a day represents the real saving due to the pitometer survey. All of the leaks were on house services and one of them was discharging out of holes in the pipe and running into a nearby sewer at the rate of 110,000 gallons a day. There was nothing on the surface of the ground to indicate any leakage but the earth filling around the leaking pipe gave every indication that the water had been escaping and running into the sewer for some time.

Respecting the valves in the high-service system the report states: "Most of the valves were found to be in very good condition. About 70% of the valves were operated. The majority of the valve boxes were covered by a tar paving making it difficult to locate them. The division gates and check valves were almost 100% tight. The water department is to be commended for this excellent condition of the division gates, because it is highly important in cities that have both high and low-service to keep the two entirely separate."

Of the hydrants the report reads: "Only a small percentage of the total number were operated during our survey; however those we did operate were in first class condition." Regarding the mains the report says: "The mains were found to be very clean and free from loose sediment. Very few complaints were recorded during the survey which, in most cases, reversed the flow entirely and would have dislodged mud and all loose sediment if present."

The report on the high-service system concludes as follows: "As a whole the high-service system was found to be in very good condition. During our survey we observed that leaks large and small were attended to without delay, and the desire of the water department seemed to be to keep the system in the best condition possible at all times."

The following recommendation was also made: "In order to have two large mains feeding West Somerville the 12" main in Dearborn road and College avenue should be extended west along Talbot avenue and connect with the

present main therein."

In that section of the low-service system which was investigated and which has been previously referred to, the average daily consumption was found to be 3,190,000 gallons and the minimum night rate was 2,200,000 gallons or 69% of the average daily rate. This is largely an industrial section of the city and considerable water is used nights in the several packing-house plants and in the extensive yards of the Boston & Maine Railroad, the figures showing an industrial and miscellaneous consumption daily of 1,975,000 gallons. The average daily rate of consumption per capita in the residential sections of this district is shown to be about 56 gallons.

The leakages discovered in this district by the pitometer survey were scattered and mostly small but amounted in total to 108,000 gallons a day, or 6,000 gallons per mile of street mains.

Of the meter tests in Section 1 of the low-service system the report of the Pitometer Company reads: "About twothirds of the consumption of Section 1 is taken up by Districts No. 3 and No. 4 and practically all of it is actually accounted for by meter registration. This condition is very commendable for the water department. All the tests on the meters were made during normal flow. Two of the four-inch meters had been recently repaired and overhauled by the water department and were found O. K. The 6" Worthington meter was found to be registering exactly. This meter registers the greatest flow of any of the large meters. An average daily flow through it is 250,000 gallons. It was impossible to test the remainder of the large meters at this time due to intricate piping adjacent to them." The report also shows a 4" Gem meter and a 4" Trident Compound meter to be registering accurately on a test covering a period of 16 minutes.

Concerning the valves the report states: "About 80% of the valves in the section were operated. They were found to be in very good condition." Of the mains the report reads: "The mains are also in first-class condition. The average pipe coefficient obtained from the tests was .82"

The report on this section of the low-service system concludes: "As has been stated before, the industrial consumption accounts for practically two-thirds of the total consumption of Section 1, and the same is mostly metered.

The water waste in and around these large plants is very low and we consider the existing conditions very good. No large leaks were discovered in the residential districts; however the average rate per block is higher than it need be and there is probably quite a little unmetered fixture leakage. A rigid inspection of all plumbing in unmetered buildings would undoubtedly bring results. A thorough investigation was made on all blocks having a large rate of flow and in almost every case small fixture leaks were discovered. In general the condition of Section 1 of the low-service is very good and the water department is to be commended for the excellent condition existing in and about the plants of the largest consumers."

The Company makes the following recommendations: (1) All valves and hydrants should be operated at least once a year. (2) Gate boxes should be maintained up to grade so that they can be easily located in case of emergency.

As the city is now about one-half covered by the survey of the Pitometer Company I recommend that the remaining

portion be tested out during the coming year.

Financial Statistics of Cities.

From a census report issued by the Department of Commerce as of December 31, 1920, showing the total and per capita water revenue receipts from earnings, and the total and per capita expenses and outlays, the following figures, interesting from their very favorable comparison with other cities of about the same population, are taken:

City: Somerville, Mass. Rank in population: 78

Water Revenue réceipts from earnings; per capita \$2.74 Water Payments for expenses and outlays; per capita \$1.12

Additional High-Service Supply.

The Metropolitan District Commission has nearly completed the construction of an additional supply main from

near the reservoirs at Spot Pond to a point near their present connection with our local high-service system in Broadway at Cedar street. It is hoped that this will materially strengthen the conditions at present existing in our high-service supply. I think it would be wise now to extend our own high-service main through Cedar street from the water-works yard to a connection with the existing main at Hudson street in order to boost the delivery of high pressure water at this central point of the city and equalize its distribution throughout that district.

I also recommend the early construction of a 12" water main in Talbot avenue, connecting the two existing dead ends in order to bring in a larger supply to the West Somerville high-service district.

Our low-service supply also is in need of building up in Joy and Poplar streets and I recommend that the old mains in these two streets be replaced with larger pipes during the coming season.

Water Income.

The water income for the year was the largest ever received, amounting to \$284.126.62. Notwithstanding the heavy outlays of the department, construction account showing more than double that of the previous year, a substantial surplus of over \$48,000 is recorded on our books.

As usual, all department bills contracted during the year were paid from the amounts appropriated and the year closed with no current liabilities and no funded indebtedness.

Respectfully submitted, Frank E. Merrill,

Water Commissioner.

SUMMARY OF STATISTICS.

FOR THE YEAR ENDING DECEMBER 31, 1922.

In form recommended by the New England Water Works Association.

SOMERVILLE WATER WORKS

SOMERVILLE, MIDDLESEX COUNTY, MASS.

General Statistics.

Population, census 1920, 93,033; present, estimated 96,000.

Date of construction: Commenced in 1868.

By whom owned: City of Somerville.
Source of supply: Metropolitan water system.
Mode of supply: Water is delivered into the city's mains, under both high and low pressure, by the Metropolitan Water Works.

Statistics of Consumption of Water.

Census population, 1920, 93,033.

Population on lines of pipe, Dec. 31, 1922, 96,000.

Population supplied, Dec. 31, 1922, 96,000.

Total consumption for the year, 2.685,399,000 gallons.

Average daily consumption, 7, 357,300 gallons.

Gallons per day to each inhabitant, 76.

Statistics Relating to Distribution System, 1922.

MAINS

Kind of pipe, cast iron.

Sizes, from 4-inch and under to 20-inch.

Laid 7.566 feet; discontinued 674 feet; net extension, 6892 feet.

Total now in use, 104.1 miles. Number of hydrants added during year (public, 12; private, 2),14.

Number of hydrants (public and private) now in use, 1,260.

Number of stop gates added during year, 69.

Number of stop gates now in use, 1,969.

Number of blow-offs, 190.

Range of pressure on mains, 35 pounds to 100 pounds.

SERVICES

Kind of pipe: Lead; lead-lined wrought iron; cement-lined wrought iron; cast iron.

Sizes, one-half to eight inches.

Extended 7,708 feet; discontinued 348 feet.

Total now in use 90.5 miles.

Number of service taps added, 221; discontinued, 8; increase, 213.

Number now in use, 13,844.

Number of meters added, 330; meters and motor registers discontinued, 73; net increase, 257.

Number now in use, 11,447.

Percentage of services metered, 82.68.

Percentage of water receipts from metered servics, 89.4.

Number of motors and elevator registers added, 0; removed, 0.

Number now in use, 3 (included in number of meters).

REPORT OF PUBLIC WELFARE AND RECREATION COMMISSION.

To the Public Welfare and Recreation Commission:

In pursuance with annual custom I am submitting to your Commission the report of the summer playgrounds for the season of 1922. In this report I shall endeavor to recount the accomplishments of the past season and to mention the things which in my opinion are essential to future success of the playground work.

Features.

In the opinion of the Director there were some few outstanding features of the season of 1922. I shall but name them under this caption and refer more fully to them under more appropriate headings.

A considerable gain was made in the amount of per-

manent equipment secured for the playgrounds.

Central Hill Park proved itself to be an attractive place

for playground purposes.

Much more satisfactory use was made of the wading facilities at the Richard Trum playground and the tennis courts on the public areas, due, in part, to the repairs and additional care taken of the same.

Grounds.

Playgrounds were conducted on eight areas during the past summer. These areas were the same as those used the previous year, and with the possible exception of the Hodgkins School yard in ward seven, all of the grounds justified their being used for the purpose. The one exception named has been of late years rather poorly attended by the children of the neighborhood, and despite efforts to improve the attendance, rarely attracts more than an average of thirty children at one time. While, of course, even this small number might justify its continuance, my observation leads me to believe that the early completion of the ground in the rear of the Western Junior High School is most desirable.

This latter area will afford more ample space for the playing of active games and in addition, has the added asset of being more suitably located for the persons of that section of the city. Informal plans have also been stated relative to improving the rear end of the Saxton C. Foss Park in the near future. Such changes as have been contemplated are in my opinion most desirable and will do much toward getting the maximum use out of this area for recreation purposes.

I again call to your attention the necessity for more space for playing in the districts served by the Kent Street and Bennett School playgrounds. Each of these grounds caters to a very populous section of our city and both are at present inadequate for the playing of active games.

The playground on Central Hill which was opened for the first time during the summer of 1921, was during the past summer, one of the best attended grounds in the city, despite the fact that it is void of any permanent equipment. I strongly urge that before the coming summer, provision be made for some permanent apparatus on Central Hill Park. I believe that such equipment can be located on the rear part of the hill without injuring in any way the sightliness of the location.

Finances.

There was expended during the summer of 1922 from the city treasury for playground purposes the sum of \$2225.29. Of this amount the expense for supervision was \$1763.00, for supplies and maintenance \$424.89, and for labor \$37.50. In addition approximately \$400.00 was spent from the treasury of the Somerville Playgrounds Association. amount was devoted almost entirely to the furnishing of permanent equipment. A new swing frame for the use of the smaller children was erected on the Bennett School ground, and a similar one was placed on the Kent Street ground. utilizing the pipe obtained from a portion of the old gymnasium structure on Lincoln Park, the swing apparatus of the Richard Trum playground was augmented by a new section capable of holding eight additional swings, and at the Saxton C. Foss Park eleven new swings were hung in place of the six which had heretofore been in use. Besides the above named improvements, the funds of the Somerville Playgrounds Association supplied twenty additional tilts for use throughout the city, and a large quantity of swing chains, seats, and

fittings.

Due to this financial assistance received from this Association, more new apparatus and equipment was provided during the summer of 1922 than during any previous year since the original construction work was done at the outset of the playground movement in Somerville. In this connection it may be appropriate to state that practically all of the permanent equipment now in use, of the playground system, particularly on those areas not under the control of the City Engineer's Department, has been obtained from the funds supplied by this civic organization.

Supervision.

For the first time in the history of playgrounds in this city the supervisors were put on a Civil Service basis, due to the requirements of the state authorities. Besides the Directors, sixteen persons were employed to supervise the play activities. Of this number, fourteen were assigned to local playgrounds and two acted as special supervisors of handwork and dancing. All but two of the supervisors were residents of Somerville. This statement is made to show that despite the Civil Service restrictions as to qualifications, it was possible to secure from among our own residents efficient supervision. From acquaintance with the conditions in other municipalities like ours, it can be stated that such was not the case in those places. The Director feels that this policy should be continued in Somerville, unless its continuance should in any way handicap the efficiency of the playground organization.

From the results obtained in the two seasons in which special attention has been given to handwork and dancing activities, it is recommended that these two phases of the playground program should be supervised by an individual selected for that purpose.

Attendance.

During the season just closed the total attendance approximated that of the previous year. The most noticeable increase in attendance was at the ground on Central Hill.

A noteworthy fact about the attendance throughout the city was that the larger children were very few in number. This situation necessitates some alteration in the conduct of the grounds, because the program of activities must be varied for children of different ages.

The figures for the attendance on the several grounds are as follows:

| Bennett School | | | | | | • | 7,753 |
|-------------------------|-------|---|---|-----|---|---|--------|
| Central Hill Park . | • | | • | • | | | 5,435 |
| Saxton C. Foss Park . | | | • | • | | | 9,976 |

| Average Weekly Attend | | | | | • | | 11,156 |
| Average Daily Attendar | ace | | | • * | • | | 2,231 |
| | | | | | | | |

Games.

The principal portion of a playground program is devoted to active games. Baseball, of course, occupies the leading position among boys during the summer months, and the leagues which were established for both the smaller and larger boys of the city again proved most attractive. The boys from the Kent Street playground succeeded in winning the larger number of games in the junior league and the boys from Lincoln Park were victorious for the senior cham-

pionship.

There are two outstanding facts in connection with the conduct of baseball on the summer playgrounds which, I think, deserve special mention. The first is that it has been possible during the past summer to organize boys' teams on two of the so-called girls' playgrounds; that is, in spite of the fact that there were no male instructors on Central Hill Park and the Hodgkins School ground, the boys of those playgrounds exhibited sufficient spirit to organize their own teams, enter into the league competition, and fulfill their games on the schedule. The other outstanding feature is that of the ninety games scheduled, all but four were played. When one considers the number of attractions which occur in a boy's life during the summer months, and when there is also taken into consideration the fact that none of the teams which journey from one ground in the city to another is accompanied by supervisors, this situation appears quite remarkable.

In addition, the boys were encouraged to participate in numerous other active contests and athletic events, care being taken to provide instruction and supervision in games suited to the age of the children who were to participate.

Inter-playground competition has also become quite pre-

valent among the girls. Although no schedule was made for such, during the past summer several contests in volley ball, dodge ball, and bat ball were arranged at the bi-weekly meet-

ings of supervisors.

During the final week of the season two teams from one of the playgrounds in the city of Newton visited the Saxton C. Foss Park in our city and demonstrated the game of fist ball which has become quite popular in Newton. If conditions warrant it, this game will undoubtedly be introduced on the Somerville playgrounds in the future.

Handwork.

It can be stated without hesitation that the handwork produced by the children of the Somerville playgrounds during the summer of 1922 far excelled that made during any previous season. Both in the number of articles made and in the quality of the work done, this feature of our undertaking was the recipient of much favorable comment.

During the final week of the playground season a display of the handwork was placed in conspicuous places for the inspection of the residents of the community. This exhibition was located for a period of three days each in the show windows of Jackson Caldwell & Co., in Union Square, Parke Snow, Inc., in Davis Square, and J. E. Lydstone at the corner of Broadway and Walnut Street. Many hundreds of people inspected these exhibitions and expressed considerable praise at the character and finish of the articles made. Included among the finished products were: serving trays, baskets, sewing boxes, desk sets, vases, hammocks, sweaters, dresses, embroidery work and other useful and ornamental articles.

The initial expenditure for the handwork was made from the funds of the Somerville Playgrounds Association and the money obtained from the sale of the materials to the children was in turn used for the purchase of additional supplies. This method of conducting this portion of the playground work seems most desirable because it eliminates the undesirable feature of free distribution to the children at public expense.

Dancing.

As in the case of the handwork the dancing was supervised during the past summer by a young lady employed for that purpose. Experience has shown that this method secures best results, for under the former policy it was impossible to secure uniformity throughout the city. This uniform in-

struction in an activity which occupies so important a place in playground work, shows its results on such occasions as the annual play demontration at the close of the season.

Notwithstanding the fact that the dancing is greatly handicapped by lack of musical accompaniment on many of the grounds, the results have been most commendable and have been the subject of much comment from the public at large.

Closing Demonstration.

On Tuesday, August 22, a closing demonstration of playground activities was presented on Saxton C. Foss Park. All the playgrounds of the city participated, the number of play-

ground children present being estimated at 1,500.

The exhibition was given at the twlilight period in order that a large number of adults might be able to witness the program. The exercises preceded the regularly scheduled band concert which was given at the same place under the auspices of the Metropolitan District Commission.

The program of eighteen events included competitive games for boys and girls, relay races, dances, marches and drills. A large number of citizens witnessed the exhibition and also viewed the handwork display which was placed in a show window near the scene of the demonstration. Among the group of spectators were many of the city officials and playground officials from other communities.

The demonstration each year serves as a fitting closing to the playground season, furnishes a means of exhibiting the results of supervised play to the members of the community, and best of all, provides the opportunity of encour-

aging the children in their play activities.

Cooperation.

As the Director has remarked previously, one of the most encouraging features of the playground undertaking is the assistance from agencies other than the department in direct charge of supervised recreation. This cooperation manifests itself in various ways. A few instances will be mentioned:

The Somerville Public Library again placed at the disposition of the summer playgrounds a large deposit of books suitable for the children. This furnished the playgrounds with another source of recreation, and at the same time served as a medium of promoting the interest of the children in a very profitable diversion—the reading of good books.

The Fire Department officials were ready and accommo-

dating to send the hose wagons to the playgrounds on extremely warm days to provide shower baths for the children.

The departments conducted by the City Engineer and the Building Commissioner, and others which are closely connected with the playground management rendered courteous and valuable assistance whenever called upon.

The merchants in the several sections of the city cheer-

fully donated prizes for the picnic contests whenever the individual playgrounds conducted outings during the season. Several of the business men of the city furnished trucks for transportation of the children to and from their picnic

grounds.

More than ever before, there was noticed this summer a sort of participation in the play activities by the adult members of the community. As a vivid illustration of this statement I cite many mothers who came for long periods during the afternoon to the Hodgkins, Central Hill, Saxton C. Foss and other grounds to mingle with the children and act almost as if they had been officially assigned as assistants to the supervisor of the ground.

This last and the above instances of cooperation furnish an optimistic outlook for the future. When the playground movement or any other municipal activity succeeds in securing the voluntary interest of the citizens it is sufficiently

rooted to insure its growth.

Recommendations.

As a result of close study, and from the experience of dealing with the summer playground situation in Somerville for a number of years, I make the following definite recommendations for the future:

1. The early completion of the playground in the rear of the Western Junior High School.

2. Hastening the erection of a field building on the

Richard Trum Playground.

3. The placing of some permanent equipment on the Medford Street side of Central Hill Park.

. 4. Securing more adequate play space in the districts served by Kent Street and Bennett Playgrounds.

5. Early attention to improving Saxton C. Foss Park with a view to utilizing the lower end of same for athletic

purposes.

6. The filling in of the unused sand pit on the Perry School Playground in order to increase the play area of that ground and so make use of the shade trees now fenced off from the rest of the playground.

7. Additional swings on Lincoln Park Playground.

8. The planting of shade trees on some of the play-

grounds to provide a natural shelter for the future.

9. The possible widening of the scope of the summer playground undertaking to include such fields as supervised play after school hours, and a closer relationship between school recreation activities and the field now covered by the Public Welfare and Recreation Commission.

Conclusion.

In concluding the report for the season of 1922, I desire to digress somewhat from the field of summer playgrounds and to add a brief comment on the general subject of recreation in Somerville.

From continuous experience in this type of work it is my opinion that in a city as populous as Somerville whose future growth is destined to be confined, the problem of recreation as a municipal activity must soon rise from its present somewhat undefined level to a more definite and comprehensive plane. This statement is made, not in any sense of dictation to your Commission but rather with the feeling that your Commission would expect from its Playground Director a statement of his attitude and his opinions in the field in which he is employed.

I desire to express appreciation to the Chairman and members of your body for the assistance rendered during the season. I feel that thanks is due especially to the Somerville Playgrounds Association for the cooperation and assistance it has rendered, as also to the other municipal departments.

mentioned elsewhere in this report.

The cooperative and friendly attitude of the playground supervisors is deserving of especial mention, because without

such assistance the Director would be handicapped.

While it is somewhat out of the ordinary to make such a statement, the Director would be remiss if at this juncture he failed to add a comment on the attitude of the children of Somerville toward the playgrounds. Appreciating as much as anybody the shortcomings and faults of children in the matter of respect for city property and undertakings, I nevertheless am more confident that Somerville experiences what might be called a mimimum of trouble in this regard. From comparison with other communities, from personal observation, and from authoritative reports, I feel that we experience less difficulty in the conduct of the children during the summer months than many other communities of our size. Such

misdemeanors and breaches of conduct as do occur are confined to a very small minority and there have been few demonstrations of the so-called "gang spirit."

There is encouragement in the knowledge that the returns from supervised recreation in our city are being made in the manifestations of orderliness and appreciation given by those upon whom our efforts are expended.

Respectfully submitted,

Stephen H. Mahoney,

Director of Playgrounds.

To the Honorable, the Mayor and the Board of Aldermen:

Herewith is submitted a report of the work of the Public Welfare and Recreation Commission for the year 1922. Inasmuch as most of the money under the control of the Commission was expended in two or three general undertakings, it seems advisable to devote most of this report to an account of what was done in these directions. Therefore, the Commission submits detailed reports of these enterprises which have been prepared by the persons having them in charge. These reports give in detail the things which have been done in each of these lines of effort. The Commission believes that all of this work has been well done and that it has served the public interest to a very considerable extent.

Of these three undertakings, the oldest is that of supervised summer playgrounds. For a number of years, the city has appropriated money to pay for the expenses of supervised summer playground work to be conducted during the months of July and August. The benefits of this work are so clearly manifest that the Commission has had no doubt at all about the continuance of this activity. It is convinced that this work should be carried on as a part of permanent public policy and that it affords a nucleus to which should be added expansions of a corresponding nature for the benefit of individuals and for the benefit of adults.

A second line of work which the Commission has carried on has been the garden work for school children. This work was begun during the war and has been conducted with great success during the succeeding years. Although originally a war measure there has been much in the character of this work to justify it as a policy for the general good of certain children of our city. The lack of areas particularly adapted to this purpose and the legitimate claim upon public park spaces for recreational purposes are reasons which combine to make the conduct of school gardens as a public policy one less obviously the duty of this Commission than are some other activities within the scope of the Commission's power.

The resignation in October, 1922, of William B. Moore, Supervisor of Gardens, caused a loss to this line of work which it would be difficult to over-estimate. Mr. Moore had had charge of the garden work since the early days of the war and through his original methods, his efficient knowledge of garden-making, and his extraordinary facility in dealing with children, had brought to this work a degree of success wholly out of proportion to the means at his disposal.

The Commission is glad to pay this tribute to Mr. Moore and to express in this public way its sense of the loss which must come to the juvenile garden-makers of Somerville

through his resignation from this position.

The third line of activity which has been conducted by the Commission during the past year is also one which had its beginning in previous years. This is the one dealing with social and educational opportunities for adults. The main feature of this work has been that taken up in the Neighborhood House on Poplar Street which is described in one of the reports submitted herewith. Another line has been that of social meetings in the Clark Bennett and Bingham Schools.

During the year the Commission has cooperated with organizations having for their purpose the promotion of civic betterment. Among these are the Somerville Playgrounds Association and the Ways and Means Committee, representing the various women's clubs of the city. The Commission wishes to acknowledge the high purpose and the devoted service rendered by both of these organizations. The former, in addition to its general activity in aid of the summer playgrounds, contributed a lump sum of \$475 to be expended by the Commission for the purchase of play material, and the latter has supported in large part the work of the Neighborhood House. The Commission has continued to work as a clearing house in securing cooperation among the various departments of the City Government having recreational or welfare interest. It has sought and has secured cooperation from all of these in promoting its own activities. In all the ways under its control, the Commission has tried to create a healthy public interest in recreation and to increase the

opportunities therefor. It has been conservative in adopting new policies or in making recommendations for the enlargement of its present activities. It has deemed it important to thoroughly study the situation in Somerville for the purpose of finding out in what direction improvements should be made in public-controlled recreation. The Commission firmly believes that public health, safety, and contentment, all require the development under public control of a scheme of recreation which will be adequate to the needs of the whole population. Because it was not ready to choose and start a new undertaking in the line of adult recreation, the Commission did not use all of its appropriation this year but turned over a part of it to be applied to the erection of the Richard Trum Field House.

During the next year the Commission hopes to formulate and announce a definite policy of such a reasonable character as to be adapted to not alone the needs but the financial ability of the city.

Respectfully submitted,

CHARLES S. CLARK,

Chairman.

REPORT OF THE SUPERVISOR OF SCHOOL GARDENS

Somerville, Mass., December 7th, 1922.

Members of the Public Welfare and Recreation Commission, Somerville, Mass.

Gentlemen:

In presenting my annual report of this branch of work under your control, I desire to summarize the accomplishments of the past season, pointing out some of the most prominent features and making some suggestions for the work in the future.

My work as garden supervisor is divided into four different lines of work, namely: (1) The teaching of simple and practical gardening in the public schools; (2) the absolute control and supervision of public and private areas devoted to school gardens; (3) the giving of advice and assistance to every person desiring it in the conduct of a home, vacant lot, or community garden; (4) and the organizing and supervising of canning operations.

1. Your Garden Supervisor has been regularly employed during the winter months by the School Department in teaching classes composed of children who have an opportunity to have a garden at home, who express a desire to have a school garden, or who have an opportunity to pursue agricultural activities during the summer season outside of the city.

This class-room instruction is along simple and practical lines of agricultural gardening. By means of this instruction the children are better prepared to take up this line of work when the time for actual garden activities is at hand in the spring. In the school-yards of four schools your Supervisor built cold-frames last fall and as soon as weather conditions permitted started tomato, radish and cabbage to be transplanted into the garden areas at the proper time. Through this instruction about nine hundred children received some permanent benefit.

2. The same general plan used the past four years in the conduct of school gardens was continued during the season of 1922. Each child cultivated a plot, the area of which was 300 sq. ft. The child paid for the seeds and plants actually used in his plot, and what was raised was the property of the child and could be taken home or disposed of as he saw fit.

One-half day each week was devoted by your Supervisor to each garden area, and the children showed their interest and enthusiasm in this work by their prompt and faithful attendance during the entire garden season. Two hundred and eighty-five children conducted school gardens the past season, the public areas totalling about seven acres. Each child planted twelve different kinds of vegetables in his garden, besides doing his part in the cultivation and care of a piece of land devoted to the raising of sweet corn and winter squash. These two crops were harvested by your Supervisor and distributed equally among the children having school gardens.

Weather conditions the first part of the season of 1922 were not ideal for the carrying on of garden work. Because of excessive rains, it was necessary to replant several of the school garden areas. This involved a large amount of extra work for the boys and girls as well as for the Supervisor, but in spite of adverse conditions the school gardens in the City of Somerville this year were most successful both from

the standpoint of general appearance and the value in dollars and cents of the crops raised and harvested.

The keeping of a garden record book by every school gardener was a part of his regular garden work. In keeping this book, the children are not only taught practical arithmetic and spelling but get some idea of the value of the things they raise and the manner in which they are sold or marketed. The books are all turned in to the Supervisor at the end of the garden season, and from a careful analysis of these books some very interesting facts and figures are obtainable. total value of the corn and squash alone more than offset the entire expense of this commission for carrying on the garden work for the season of 1922. The value of the vegetables raised in the individual plots was approximately \$7500.00. One-third of that amount represents the value of the vegetables sold by the children, while the other two-thirds were used in the home as fresh vegetables or were canned for use during the winter.

Your Supervisor endeavored this year to devote more time and space on the school garden areas to the cultivation of flowers, and on the different areas this undertaking was highly successful. The flowers grown at Broadway Park attracted a great deal of attention from passersby and brought forth many favorable comments from the general public. It also was an object lesson to the children, and in the cultivation and care of these areas devoted to flowers, I believe, lessons were taught to the children that will be productive of results around their homes in the years to come.

At the end of the garden season, exhibits were made in two different places, first at Boston at the Massachusetts Horticultural Society building where we exhibited products from the school gardens and the canning clubs and received many cash prizes. These prizes were won in competition with many other cities in this part of the State and show the kind of work done and that the results obtained by the children in the City of Somerville compared most favorably with the work in other localities. At the New England fair held at Worcester, your Supervisor made both canning and garden exhibits, and we were awarded prizes totaling \$46.00 in money at this fair which draws entrants from cities and towns from all over New England. One exhibit made up of twenty-four jars of fruit canned by one of our canning clubs not only won first prize of \$10.00 but was awarded a special prize of \$5.00 more because it had the highest score of any collection ever entered for competition in this class at the New England fair.

All of the areas of land devoted to school gardens were this year cleaned up by the children and the refuse carted away. Most of these areas have been fertilized, plowed, and seeded to winter rye with the idea of turning this green crop under in the spring and putting back humus in the ground

for use another year.

Giving of advice and assistance in the conduct of home gardens and community gardens is a line of work that has greatly increased during the last two or three years. While it may be true that less area is devoted to garden work since the close of the war than during the war, those conducting gardens seem to have met with more serious difficulties and have called upon your Supervisor for more assistance than they did during the war and when garden activities Weather conditions, the control of were at their height. disease, and insects are a constant source of trouble and have been the occasion for repeated calls for advice from your Supervisor as to the best method of control and procedure. Most of the adults conducting gardens in the City of Somerville have gone through the experimental stage and the results obtained are far more satisfactory and more remunerative than ever before. When one considers the small amount of space available for garden work and the poor quality of the soil throughout the entire city, the results obtained are a revelation to agricultural people.

4. This year your Supervisor devoted more time and energy to the forming and carrying on of canning clubs than ever before. One hundred and twenty-six children were enrolled who carried on canning clubs at two centers, one located in the cooking room of the Western Junior High School, the other at the Senior High School. Two instructors were regularly employed five days a week. The work of these clubs was carried on under the direction of the State and County agricultural organizations, the requirements of which are

very strict.

Some idea of the volume of work done by these clubs may be obtained by examining the reports submitted by your Supervisor to the State Department of Agriculture. In this report, I stated that each of the one hundred and twenty-six members canned an average of thirty-two jars apiece, or a total of four thousand and thirty-two jars; the average value of each is 40c per jar or a total value of \$1612.80.

Some idea of the quality of the work done by these children may be realized when I state that in every exhibition of canned products that was made this year we won a first prize in every class. These exhibits were made at Boston and

Worcester. In the exhibit at Worcester to which I have referred before, the prize won there was in competition with

twenty-six hundred jars of canned products.

Exhibitions of the products of the canning clubs were held in nine different schools this fall at which a judge provided by the State was present and scored five jars exhibited by each one of the one hundred and twenty-six club members. Out of a possible hundred per cent, the average score of all participants was 93.6, which is a very creditable score and one seldom equalled, so I am told by the Department of Agriculture. This useful form of summer work has gained very rapidly during the past few years. Many other cities and towns now carry on canning operations on a larger and more comprehensive scale, and I would recommend that more equipment and better facilities be provided another year for this most useful and productive branch of your work.

In closing, permit me to express my appreciation to all those who have shown an interest and been a help in this work. It is through the co-operation of the members of this Commission and the interest and work of the boys and girls

themselves that this work has been a success.

Yours very truly,

WILLIAM B. MOORE,

Garden Supervisor.

Mr. Charles S. Clark Chairman of the Public Welfare and Recreation Commission Somerville, Massachusetts.

Report of the Annie E. McCarthy Neighborhood House.

The work of the Annie E. McCarthy Neighborhood House is going on in a live, active way, and the vicinity of Poplar

Street is benefiting by it.

A Girls' Club having a membership of sixty makes the House its headquarters. The girls pay fifty cents a year dues, payable in two installments October first and February first. A few are allowed to become members without the fee when it is known that the money is hard for them to get. They meet

for social times and mutual helpfulness, and there is a fine

spirit of co-operation growing up among them.

On Monday afternoon a sewing class meets with Mrs. Holland as leader. In this class handkerchiefs are made from old muslin and when finished are sold for a penny apiece. Others made from new lawn or muslin bring two cents apiece.

The gymn classes meet on Tuesday. A class of twenty little girls from seven to ten years of age, and a class of twenty older girls from twelve to fourteen years meet in the afternoon, and two classes of boys meet in the evening. These classes are held in the Bennett School. Most of the boys were a hard, unruly set of individuals, but they now show an improvement in spirit and willingness to work together.

Through the kindness of Miss Alice Fox, four girls are receiving private music lessons from Miss Coleman, who also conducts two kindergarten music classes. These lessons were given free at first, but now a charge of ten cents a lesson is

made and the girls buy their own music.

Wednesday evening is spent with games and entertainments at the House. An enthusiastic cooking class of eight girls meets on Thursday with Miss Emily Hood. Also on the same day a class in chorus singing is held under the direction of Miss Margerite Henis and Miss Mary Boika, two Jackson College students.

On Fridays Miss Edith Fox conducts a class in sewing. The girls in this class have been making warm flannel night-gowns for their own use. Miss Hood also has another class in

cooking on Fridays.

One of the most important groups at the House is a club of twenty-eight women. They meet once in two weeks and at present their chief interest is a course in Home Nursing, with a Red Cross nurse acting as instructor. At Christmas time they made up seven baskets of food and clothing, which were taken to poor people.

In all, about two hundred people take an active part in the affairs of the House, but the number who receive the good influence which the House broadcasts in the neighborhood is

inestimable.

It is around Mrs. W. L. Holland that the machinery of the House revolves. She has reached the hearts of the people and brought them together. And by keeping her faith with them she is gradually teaching them a spirit of kindness, a spirit of truth, and a spirit of co-operation. In other words she is leading them into the ways of good American citizenship.

> Bertha E. Keyes, Secretary for the Ways and Means Committee.

REPORT OF THE SEALER OF WEIGHTS AND MEASURES

Office of Sealer of Weights and Measures, City Hall Annex, Somerville, January 1, 1923.

To His Honor, the Mayor, and the Board of Aldermen: -

The decrease in number of capacity measures sealed in 1922 as compared with number sealed in 1921 is due to the fact that ice cream containers are now sealed by the manufacturers under the provisions of Section 10, Chapter 98 of the Géneral Laws.

B. S. ABBOTT,

Sealer of Weights and Measures.

REPORT OF THE LAW DEPARTMENT

To the Honorable, the Mayor and the Board of Aldermen of the City of Somerville:

The annual report of the law department for the year ending December 31, 1922, is as follows:

A bill presented to the legislature by the town of Dover asking to be taken out of the Metropolitan Park District passed both branches of the legislature. At my request the governor gave a hearing on the bill and I secured the presence of representatives of many cities and towns who expressed their opposition to the proposed legislation. The governor vetoed the bill and the legislature failed to pass it over his veto. If it had become a law other municipalities situated like Dover in respect to the district would have asked to be taken out and the result would probably have been a large increase of the contribution by Somerville to the expenses of the district.

A bill was presented to the legislature providing for an extension of the Metropolitan Water District at an estimated cost of more than sixty millions of dollars. If this bill had been passed it would have added several millions of dollars to the obligations of Somerville. Every year of delay means a saving of many thousands of dollars in interest charges. I joined in the opposition and it failed to become a law at that session of the legislature.

An act was passed by the legislature for widening a portion of Bridge street in Cambridge authorizing the work to be done by the County Commissioners of Middlesex County. A hearing was held by the County Commissioners and the act was accepted by them. It does not provide for any special assessment upon Somerville.

An action for personal injuries mentioned in my report for the year 1921 in which there was a verdict of \$9,000 was settled for \$8,000. An action brought by a suspended member of the Fire Department was tried before a jury in the Middlesex Superior Court and a verdict was given in his favor. An action brought by a member of the Fire Department to test the validity of a regulation under the two-platoon law was argued before the full bench of the Supreme Court and a decision was rendered sustaining the reguation.

A large tract of land was taken for a Junior High School on Marshall street by right of eminent domain, having a frontage of 300 feet and comprising 13 lots. Settlement of claims for damages were made with all the owners and conveyances by them to the city were recorded.

A parcel of land on Marshall street formerly occupied by a fire station was offered for sale by the city and the title being questioned the land was registered in the Land Court and the sale was carried through.

Very respectfully,

FRANK W. KAAN,

City Solicitor.

REPORT OF SOMERVILLE PLANNING BOARD

December 31, 1922.

To His Honor, the Mayor, and Board of Aldermen. Gentlemen:

As required by the provisions of Chapter 494 of the Acts of 1913 the Planning Board herewith submits its annual report, containing also suggestions and recommendations for the improvement of the City.

During the year 1922 two new members were appointed by His Honor, Mayor Webster, namely, John Williamson and Benjamin J. Surett. The Board organized for the year by re-electing William F. Riley Chairman and David J. Kelley, Secretary, the other members of the Board being George J. Rauh, John Williamson and Benjamin J. Surett.

During the past year the Planning Board held several meetings and discussed the various matters of public interest for the welfare of the city, which is herein set forth. Some of these matters have been mentioned in previous reports of the planning Board, but no action has as yet been taken in regard to their adoption by the Board of Aldermen.

Fire Districts

Although the importance of the enactment of an ordinance establishing fire districts has been repeatedly called to the attention of the Mayor and Board of Aldermen, nothing has been attempted, and no action taken, nor has the subject been considered during the past year.

The Planning Board again earnestly recommends that some definite action be taken by the Board of Aldermen to provide proper fire protection for the city by establishing some fire districts without further delay. The Planning Board is ready to cooperate in every way with the Board of Aldermen in order to hasten action in this important matter.

Public Parks and Playgrounds

The Board again recommends that more small playgrounds be established in the different sections of the city for the exclusive use of small children. Particular attention is called to the necessity of providing a playground in Ward six, in the Morse School section.

Somerville's only bathing beach at the Wellington Bridge on the Mystic River, although under the direction and

control of the city has been so neglected that its usefulness as a bathing beach is doubtful. The beach needs to be sanded and cleared of mud, so that the children and older people who use the beach can do so in safety and comfort. The city should either improve the beach, or turn its management over to the Metropolitan Park Commission.

Mystic River Development

The subject of the development of the Mystic River for commercial purposes has been discussed frequently in recent years, and efforts have been made from time to time to obtain the assistance of the National Government.

In 1892 the United States government dredged a channel in the Mystic River from the B. & M. Railroad bridge to the head of navigation or Craddock Bridge in Medford. This channel is about one hundred feet in width for about one mile, and gradually narrows in width until it is about fifty feet wide at the Craddock Bridge in Medford. At the Wellington Bridge in Somerville the channel is about fifty feet in width and the natural channel is about eight feet is about eight feet deep at mean low water. From the Boston & Maine Railroad bridge up to Craddock Bridge in Medford the river is very crooked and unsuitable for the navigation of vessels over one hundred fifty feet in length, and is not of sufficient depth to accommodate vessels of a size suitable for commercial purposes.

Somerville has about thirty-six hundred feet of water front on the Mystic River. Part of this is owned by the Boston & Maine Railroad and private parties, and another part of it is controlled by the Metropolitan Park Commission. The only shipping interest on the Mystic River in Somerville at the present time is the Somerville Coal Company, which occupies Dennings Wharf, so called. The river is so winding and the draft so shallow that only barges of light draft can use the river for commercial purposes.

In order to make the Mystic River suitable for ships which would be of sufficient size to be useful for commercial purposes the channel of the river must be widened and dredged, as the existing channel is obviously inadequate.

The United States government has refused to expend any money for this purpose in that part of the Mysfic River running through Somerville and Medford for the following reasons:—

1. Difficulty in navigation on account of the many bends in the river.

2. The use of the largest part of the land on both sides of

the river for park purposes.

3. The small number of business concerns using the river in their business either in Somerville or Medford.

As a remedy for this condition the Board suggests that your Honorable body urge upon our representative in Congress the necessity of some action towards securing an adequate appropriation so that this water way with the adjoining terminal facilities furnished by the Boston & Maine Railroad may be fully utilized, and the commercial interest of the City improved thereby.

The Board strongly recommends that the city immediately purchase the land north of the Weilington Bridge as the first step in the development of the river front. If the city acquires this land on the river front a bulkhead or pier could be built out into deep water by using the ashes or other filling now being dumped outside the city limits and thereby provide additional dumping facilities which would at the same time be of great value in reclaiming the marsh land and building a suitable wharf for the use of the City and business interests.

Survey of City

The Planning Board has considered the advisability of the enactment of a zoning ordinance which would correct the evils existing today on account of the absence of building regulations or restrictions. The subject is, however, very important, and should only be acted upon after having a comprehensive survey made of the enitre city by a city planning engineer who would give an unbiased and disinterested report of conditions and suggest the establishment of zones based upon studies of the whole city.

The comprehensive survey should cover the following

subjects:

(A) Business districts(B) Residential districts

(C) Miscellaneous business and residential districts

(D) Industrial sites(E) Population centres

(F) Schools, public buildings and parks

(G) Plan showing valuation of real estate by districts

(H) Transportation facilities and streets

(I) Water front

(J) Building regulations

(K) Fire Districts

The survey should be illustrated by plans which would be of great assistance in working out a zoning ordinance, and planning for the future development of Somerville. The draft of a zoning ordinance based on the facts found by the survey should be undertaken only after public hearing, to give all citizens an opportunity to be heard and to make suggestions.

Zoning was discussed in our last year's report, and is fast becoming important to the life of every modern progressive city. Springfield last year spent \$20,000.; Worcester spent about \$28,000. and Newton spent about \$10,000. in making a comprehensive study, and in providing a zoning ordinance to protect the property values and regulate the use of property for the benefit of all the citizens.

Revision of Building Laws

In connection with zoning, and as supplementary thereto a complete revision of our building laws should be undertaken, as both are necessary to accomplish the desired result. The construction of all buildings should be carefully considered at the same time that the use to which the building may be put is determined by the zoning ordinance.

In the opinion of the Planning Board there should be a preliminary survey of the city by an expert city planner, so that both the building laws and zoning ordinance would be framed with facts in the possession of the Board to assist it in framing such ordinances as would be for the best interests of the city for consideration and acceptance by the Board of Aldermen.

Appropriation

Somerville must do its share to provide for the welfare of its citizens, and the Planning Board is anxious to accomplish some definite results by cooperating with the Board of Aldermen in recommending public improvements, but has been seriously handicapped by lack of cooperation on the part of the city government by its failure to provide sufficient appropriation to the Planning Board. If the work of the Planning Board is unnecessary and of no value to the citizens of Somerville, then the Board ought to be abolished, and no appropriation given to it, but if its work is of assistance. and is of value to the city the city government should not put Somerville in the same class as a town of a few thousand inhabitants by appropriating \$50, for the use of the Planning Board. The Planning Board can accomplish nothing with such a small appropriation, and returns it herewith to the Treasury of the City of Somerville.

The Planning Board recommends that the city government appropriate \$5000. for its use during the year 1923, so

that it may proceed along scientific lines, and with the aid of expert assistance submit to the Mayor and Board of Aldermen a comprehensive plan for the future development of Somerville, and also a suitable zoning ordinance, so that Somerville may keep pace with the neighboring City of Cambridge in providing adequate laws for the future growth of the city.

Necessarily the work of the Planning Board must be for the future. The results obtained the Planning Board believes will be for the best interests of Somerville, and will in the long run result in saving money for the city. The appropriation if given will be carefully used in accomplishing the desired results.

Respectfully submitted,

John Williamson, Chairman George J. Rauh Benjamin J. Surett David J. Kelley, Secretary.

REPORT OF THE SCHOOL COMMITTEE CITY OF SOMERVILLE

School Committee Rooms, December 18, 1922. Ordered, that the annual report of the Superintendent of Schools be adopted as the annual report of the Board of School Committee, it being understood that such adoption does not commit the Board to the opinions or recommendations made therein; that it be incorporated in the reports of the City Officers; and that 1,000 copies be printed separately.

CHARLES S. CLARK, Secretary of School Board.

^{*} Resigned September 25.

[†] Elected November 16.

Standing Committees, 1922.

- NOTE.—The member first named is chairman.
- District I. Fitzpatrick, Crowley, Bradley.

 PRESCOTT, HANSCOM, BENNETT.
- District II. Muldoon, Bradley, Fitzpatrick.

 KNAPP, PERRY, BAXTER.
- District III. Boyer, Codding, Muldoon.
 POPE, CUMMINGS.
- District IV. Rice, Coveney, Codding.

 EDGERLY, GLINES.
- District V. Miss Turner, Stoodley, Coveney.

 FORSTER, BINGHAM, PROCTOR.
- District VI. Chapman, Turner, Stoodley.

 CARR, MORSE, DURELL, BURNS, BROWN.
- District VII. Curtis, Cholerton, Chapman.

 HIGHLAND, CUTLER, LINCOLN, LOWE.
- High School Chairman Bradley, Stoodley, Crowley, Codding, Coveney, Chapman, Cholerton.
- Finance Chairman Stoodley, Fitzpatrick, Muldoon, Codding, Rice, Chapman, Cholerton, Webster, Robertson.
- Text Books and Courses of Study Chairman Chapman, Muldoon, Crowley, Boyer, Coveney, Miss Turner, Curtis.
- Industrial Education Chairman Boyer, Miss Turner, Crowley, Muldoon, Rice, Turner, Curtis.
- School Accommodations Chairman Codding, Rice, Fitzpatrick, Bradley, Stoodley, Turner, Cholerton, Webster, Robertson.
- Teachers Chairman Cholerton, Chapman, Fitzpatrick, Muldoon, Codding, Rice, Miss Turner.
- Health, Physical Training and Athletics Chairman Curtis, Bradley, Fitzpatrick, Boyer, Coveney, Stoodley, Turner.
- Rules Chairman Miss Turner, Boyer, Crowley, Bradley, Coveney, Turner, Curtis.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

TO THE SCHOOL COMMITTEE:

Hereby is submitted an annual report upon the condition of the public schools for the municipal year 1922. This is the fifty-first in the series of annual reports and is the fifteenth which I have written. As it is the custom of the School Committee to use this report as its own, I have prepared and present herewith the usual statistical tables, showing facts concerning pupils, teachers, and expenditures.

The first thing to consider is the membership. The number of pupils belonging to the day schools December 5 was 14,419, an increase of 196 pupils over the number belonging at a corresponding time last year. The average membership for the school year ended June, 1922, was 14,004, an increase of 608 over the average membership of the preceding year. These figures, taken with those of the preceding year, represent a steady growth in the membership of the schools. The following table shows distribution of the membership among the large divisions of the school system.

Membership

| | | | Junior | Elementary | Voca | | _ |
|------|------|------|--------|----------------|-------|---------|----------|
| | | High | High | including Kgn. | tiona | l Total | Increase |
| Dec. | 1922 | 1962 | 3493 | 8878 | 86 | 14,419 | 196 |
| Dec. | 1921 | 1966 | 3367 | 8766 | 124 | 14.223 | |

It will be noted that the membership of the High School is practically the same as that of last year at this time. This condition is especially significant when taken in connection with the fact that last year there was a double senior class numbering 631. The present senior class now numbers 437. The present junior class numbers 634, and the present first year class 858. Last year these classes numbered 524 and 794. The present senior class of the four Junior High Schools now numbers 1098, exceeding the membership of last year by 85. These conditions indicate that the Senior High School is still growing. They also show a disposition on the part of the pupils to remain longer in school.

The shrinkage in the Boys' Vocational School is due to the withdrawal of the students in training under the Rehabilitation Act. This withdrawal was due to a change in the policy of the Government in respect to training the veterans. They are now being taught in a government school and the Boys' Vocational School now has only boys to deal with.

Teachers

| | | High | Junior High | | ary Voca Kgn. tiona | | Increase |
|------|------|--------|----------------|-----|------------------------|-----|----------|
| Dec. | 1922 | 71 | 116 | 226 | 9 | 422 | 1 |
| Dec. | 1921 | 72 | 115 | 224 | 10 | 421 | |

Thirty-three teachers were elected during the last year, and were assigned as follows: High School 7, Junior High Schools 9, Elementary Schools 16, Boys' Vocational School 1. Twenty teachers resigned,—four to be married, twelve to accept better paying positions elsewhere, four from other causes. Two teachers were transferred from the Junior to the Senior High School. Two were transferred from Elementary to Junior High School. There were two deaths and three retirements.

The work of the schools during the past year has been successful to a high degree. With the exception of over-crowding in certain schools there have been no especially unfavorable conditions to meet. A brief review will be presented to show in part what has been attempted and accomplished in the several departments of the school system.

Elementary Schools

Under our present practice the elementary schools comprise the kindergarten and the first six grades. These grades correspond to the years of childhood, stretching from 5 to 12 years of age. During this time the children are characterized by great physical activity, robust health, and retentive memory. It is a period when the forming of habits of obedience to authority, the mastering of details through repetition and drill, and the cultivating of the memory will constitute in a large measure the work of teachers and pupils. During this period the child will be engaged in acquiring the essentials of an education. These are reading, writing, language and spelling, arithmetic, geography, history, civics, hygiene, music, and drawing. Along with these studies goes instruction in morals and conduct. These are the time-honored fundamentals of education. They constitute the foundation upon which the future structure must be built. There must be no skimping on these if the future work is to be solid and substantial.

On the other hand, with so much to be done by pupils and teachers with the wealth of material that is inviting consideration, it is necessary that methods be used which ensure

to the highest degree the efficient and economical use of time and effort. Herein the modern elementary school differs greatly from its predecessors. Much material has been eliminated from the subject matter of the various studies of this period, and improvement has been made in methods of teaching and study. Our teachers have been alive to both of these necessities. They are keeping abreast of the times in both respects.

Among the numerous interesting illustrations which could be given of the present methods of conducting elementary school work the following are cited:

History and Civics in Our Elementary Schools

At my request, Mr. Knight, Supervising Principal of the Cutler, Lincoln, and Highland Schools, has furnished a statement quoted below:

During the past year an effort has been made to improve our teaching of History and Civics. When we stop to think that the problem of democracy is a problem of education and that democracy rests upon education, then the teaching of these subjects becomes a matter of great importance. Since education must be for life and not merely for efficiency, our task is to develop each individual into an intelligent, self-controlled, and sanely-balanced member of society.

"If we want democracy to succeed, we must educate for democracy. It is nothing short of treason to democratic institutions to send forth from our schools young men and women who know nothing of the responsibilities, duties, and privileges of citizens in a democracy, and of social conditions and ideals which are necessary for the success of democratic society."

History skillfully and truthfully taught is its own preacher. Our object is to awaken interest, encourage reading, present worthy ideals, and thus arouse patriotism. The aim of our teaching of Civics is to make the child see that his future welfare depends upon his possession of certain social virtues which will enable him to function efficiently in his own community. However, care should be taken to give the child a vision beyond Somerville. He should realize that he is also a citizen of the state, and of the United States, and made to understand his responsibilities.

The following course of study was formulated with these ideals in mind. It has been tried out during the past year in some of our schools, and later will be extended to all.

Course of Study in History

FIRST GRADE

- 1. The Home—Members of the family; Their services to the home; Activities in the home; Manners applicable to the home; Dignity of home life.
 - 2. The Community—Activities which assist the home

 The grocer, baker, milkman, etc.,
 in their relation to the home.

3. Holidays

The celebration of holidays should bring out our particular qualities of personal character and national ideals as exemplified in the persons involved.

Thanksgiving, Christmas, St. Valentine's, Lincoln,

Washington, Arbor and Bird Day.

Others may be added to these at the discretion of the teacher.

4. Civic Duties

The training for citizenship will consist largely in training in morals and manners. The object of this work is the building of character. It aims to form habits and should be continuous and cumulative throughout the grades.

Use and abuse of school building and property; Participation in school life: playground, fire drill; Cooperation with classmates; Respect for school regulations.

SECOND GRADE

1. The Community

In relation to individual needs—Food, Shelter, Clothing

How these are supplied

In relation to community needs—Protection (policemen, firemen, postmen); Service (water, lighting); Pleasures (parks, playgrounds); Education; Transportation.

2. Indian and Eskimo life
Contrast with our mode of living

3. Holidays

See First Grade Add Flag Day

Study of our flag; Colors, Use, Care, Why we should love it, Salute.

4. Civic Duties

Respect for the rights of others in the community Daily walk to and from school; Use of sidewalk; Right and wrong places to play.

Care of school and city property

THIRD GRADE

1. Local History

First inhabitants—Indians

First settlers of our city—From Whence; Occupations; Homes; Neighbors; Transportation; Communication; Descendants in school of early settlers.

First buildings and streets Origin of name Contrast with present mode of living

- 2. Holidays—Review; Add Memorial Day; Emphasize the story of the Pilgrims.
 - 3. Civic Duties—Proper conduct in public places
 Stealing rides on vehicles
 Visiting library, parks, etc.
 How to avoid accidents at home and

on the street

Proper treatment of new pupils at school and newcomers in the neighborhood, especially those of foreign birth.

FOURTH GRADE

- 1. Local History—Review and strengthen work of third grade; Historic hills of Somerville, in their relation to its early history; Leading events of Somerville history; Historic landmarks: Powder House, Prospect Hill Tower, French Redoubt, Greene House, Lee House, Ten Hills Farm; Dates: 1842, 1872.
 - 2. National History—Story of Columbus in detail.
- 3. Holidays—Review work of previous grades; Add Columbus Day, and such holidays as are closely related to Somerville history.
- 4. Civic Duties—Important city officials and their duties; Special celebration of patriotic days; Relations and duties towards those less fortunate than ourselves: Junior Red Cross activities; Thrift: School Banking.

FIFTH GRADE

- 1. Early Explorers—Review Columbus; Americus Vespucius, naming continent; English: Cabots, Drake, Raleigh; Spanish: Balboa, Magellan, DeSoto; French: Champlain, Joliet and Marquette, La Salle.
- 2. Colonization—Oldest towns: St. Augustine, Santa Fe; Virginia; New York; Massachusetts.
- 3. Holidays—Continue and elaborate work of other grades.
- 4. Civics—Economy in use of water and light; Wise use of leisure time; Fire; Prevention, Conduct in case of fire; Police; Dignity of force, Best ways of assisting them.

SIXTH GRADE

- 1. National History—Spain in America: Results of explorations; England in America: Review colonies taught in fifth grade, take other colonies in story form; France in America: Results of explorations, reasons for conflict with England, leading up to French and Indian Wars; French and Indian Wars, very briefly, in story form; Revolutionary War by biography: emphasize causes and results.
- 2. Local History—Show Somerville's part in important events of national history; Study of Flag.
 - 3. Holidays—See fifth grade.
- 4. Civics—Necessity for paying taxes, rent, license fees; Wise use of telephone and telegraph; Significance of election day; Our relations with, and duties toward aliens; Written work in connection with Junior Red Cross; Participation in school government.

Project Method and Socialized Recitation

Another interesting way in which the work of the Elementary Schools has been modified for the purpose of improving the power of the pupils as well as increasing their knowledge, is shown in the use of the Project Method, the Socialized Recitation, Silent Reading, and Opportunity Classes. These methods have definite objectives. They are the means by which certain social values are attained and individual development promoted in connection with the study of regular subjects of the curriculum. How this work is carried on in

some of the Elementary Schools, is shown in the following statement which I have asked Mr. Ryan, Supervising Principal of District 2, to prepare:

Four phases of modern educational practice appear to be worthy of especial mention in the schools of Ward Two:

1. The application of the project method to the teaching of the regularly required subjects with a view to getting pupils into closer rapport with their environment by consider-

ing subjects in "wholes" rather than in parts.

For example, through the story of rubber—a project in Geography—worked out by the pupils, with each one making his small though important contribution to the "whole", experiencing thereby the joy of being a real worker in a group wherein his work counts, and finally having his work in English, History, Spelling, etc., motivated unconsciously by the wealth of associations in such an experience, one learns the geography of South America in no uncertain way, and for all time. The pupil works not because of the fiat of the teacher, but by the compelling power of his native curiosity or interest in a story, a "whole".

II. The use of the Socialized Recitation as a means of

developing a social consciousness.

Personal responsibility, mutual toleration, a knowledge of the proper meaning and use of freedom are necessary for the individual if he is to be a real democrat within a democracy. Through the Socialized Recitation the pupil has opportunity for the practice of these virtues in their broadest sense. The moment he neglects to practice them he finds himself shut out by his comrades from participation in his class activities. The social consciousness is developed; one must practice the social virtues in order to be recognized by the "Chair" in the Socialized Recitation.

III. The development of Silent Reading as a more effective means of *thought-getting*. This is always accompanied by a time-reaction. Clippings from newspapers and magazines are used here.

IV. Opportunity Classes. There are special classes usually held now from 3:30 to 4 o'clock on certain afternoons. They are composed of small groups of pupils who need drill along some particular line. A pupil is discharged from this educational clinic as soon as he is "cured", but may be readmitted at any time for further treatment.

I have found that these classes are not only helpful to the pupils as such, but are also helpful to the teachers because they are brought into close rapport with the pupils' actual needs.

Junior High Schools.

The Junior High School or the intermediate school is a transitional school, the function of which is to insure for the pupil a gradual passage from childhood school experience into that of the secondary school stage. In the past strong criticism has been directed at the condition which made this change so sudden and violent. The Junior High School provides gradual changes by means of which the child passes without shock from the elementary to the senior high school. But in addition to this, and more important than this, is the function of the Junior High School to provide differentiations adapted to the varying needs, interests, and aptitudes of children. This variation is given by devoting a portion of the time to studies from which a child may make selection of what is most beneficial to him.

About one fifth of the time is given to electives; the remaining four-fifths are given to the subjects which all the children have in common. The course of study is so arranged as to give force to both of these ideas. Elective subjects begun in the Junior High School are continued in the Senior High School. Required subjects of the Junior High School are presented in ways which go on naturally and progressively into High School.

In order to give unity in all subjects in the work of the Junior and Senior High Schools, the heads of departments of the Senior High School have been placed in supervisory direction over the work in both schools. Frequent conferences are held by heads of departments with the teachers of the Junior High Schools by means of which a common understanding is reached by all of the teachers of the several schools.

In providing electives in the several years of the Junior High School care is taken to offer opportunity to children to change from one choice to another when it has been proven that such change is desirable. Flexibility is maintained to give the children the largest opportunity possible for self-discovery. In this way individual differences are provided for without the sacrifice of thorough work in required subjects. Experience has shown that while most children have made a permanent choice of electives by the beginning of the second year, others do not do so until well on in the Senior High School. While it is desirable to allow the child to cross over from one course to another, even as late as the junior year of the Senior High School, it is unreasonable for him to expect to complete without loss of time a course chosen so late.

In view of the fact that the Junior High School is a recent development in school organization, it is interesting to note that it is being adopted rapidly in all parts of the coun-An article in the November number of the "School Review" gives the result of a questionnaire sent out to all cities of the United States of 100,000 or more population; 68 inquiries resulted in 60 replies. These replies showed that 26 cities have Junior High Schools. Of the 34 which replied "no" to this question 20 reported that Junior High Schools would soon be established in their cities. The article concludes with this generalization: "The unanimity about Junior High Schools in the cities which have such schools in actual operation is impressive. * * * * * Summarizing the status of Junior High Schools in cities of more than 100,000 it may be said that both the attitude and the action of the school men in these cities are distinctly in its favor. * * * * From this evidence it appears * * * * that the Junior High School is needed in the coming plan of organization for schooling pupils during the period of early adolescence."

Various phases of the work of the Junior High School are shown by the following statements made by Junior High

School masters:

"We have continued the efforts set forth in the statement of our intentions last year and we reaffirm them at this time.

Many things have interfered with our attempts at incorporating extra curricula activities and we have now practically decided to set apart for them an hour within the school day each week.

Overtime work necessary because of crowded conditions and afternoon employment of many pupils have made it impossible for many to attend the meetings that have been held thus far.

Another impediment is the scarcity of rooms at our disposal, which tends to make the number of clubs comparatively small and the clubs themselves too large. It is hoped that the new building on Marshall Street will obviate this difficulty.

We have been more successful in organizing classes for

self-regulation. Evidences of this are noticeable daily.

With the small appropriation made for encouragement of general sports, very little more than coaching the baseball team has been accomplished. To bring about the desired result, much more must be done on suitably equipped playgrounds."

Samuel A. Johnson,

Master of the Eastern Junior High School.

"The efficiency of the past year's work in the Southern Junior High School will be measured by the success of its graduates who are now pupils in the Senior High School, and by the industry and faithfulness of those who have taken up some other kind of work. We hope to be able to give even a better equipment to those who go from us this year.

'To give pupils a broad outlook upon the world's work, and to help them to ascertain their own aptitudes, interests, and abilities with reference thereto,' is one of the aims of the Junior High Course. To that end, incidentally 'to develop certain civic qualities, to meet health needs, and to prepare for the worthy use of leisure', perhaps the outstanding feature of this year's work at the Southern Junior High has been carried out along the lines of "extra curricula". Club life under the counselorship of the different teacher directors, develops the pupil along the line of his choice, the effort being made to give the pupil the largest possible freedom as to choice of club. The club-field covers a wide range of subjects, and furnishes territory, often virgin soil, where the pupil works out an interest which later develops into his life's work.

Among our various Junior High activities, one of the most important projects supported by us is our school paper, "The Southern Bell", which is now in the third year of a very active and prosperous existence. Those teachers whose work it is to guide the Staff of pupils who carry on the publication, have found a steady, marked improvement in the standard of manuscript submitted for print. We are able each year to publish, with less effort, an eight-page, cardboard-covered magazine of recognized worth.

Another aid to the growth of culture in our school is our Library, consisting of four hundred twenty non-fiction and two hundred seventy-six fiction, a total of six hundred ninety-six books placed on our shelves by the Public Library. Each class is assigned a Library Day when, accompanied by the Home Room teacher, books for home reading are discussed and taken out by the pupils.

Nothwithstanding the large variety of subjects to which the attention of the pupils is called, the Southern Junior High School intends to conserve fully the interest of the three R's.

In the department of Practical Arts, the question of time to be given to shop work has arisen. In the seventh and eighth grades, every pupil is required to take two hours of shop work. There is no doubt that this requirement should be made in the seventh grade, the trying-out year. But after a pupil has been tested and found to have no aptitude for a particu-

lar elective course, why should he be forced to spend two hours a week in it? A possible solution to this question may be found by making the Practical Arts course entirely elective in the eighth grade, as it is in the ninth."

GEO. M. WADSWORTH,

Master of the Southern Junior High School.

"Children entering this year from the sixth grades and private schools have come with minds tuned to the Junior High School ideals. The six-three-three system is so well established that the younger boys and girls are looking forward to differentiated courses and related activities. It is evident that this has led to a better and more regular attendance, for the child is interested and realizes absence will mean retardation in his elected subjects.

We would recommend a summer school conducted by the school department of the city to assist those pupils who, for various reasons, wish to strengthen the work of the year or who are seeking for more rapid advancement. This feature of our school system would in a measure take the place of the teacher-coach, whom so many cities are employing in the Junior High Schools."

FRANK W. SEABURY,

Master of the Northern Junior High School.

"I take pleasure in reporting that the past year has been a happy and prosperous one for the school. The attendance of the pupils for the year ending June 1922 was 95.5%; for the first quarter of this year it was 97%. This proves that the pupils are greatly interested in their work and school and that the parents, for the most part, realize the importance of regular attendance.

I wish here to express my appreciation of the support which the parents of the pupils in this school have given in all the efforts of the master and the teachers to make this a live junior high school.

One matter which has received attention recently from prominent educators is the time devoted to extra curricula activities. In order to provide for this modern development

the periods of one day in the week have been shortened, thereby allowing for these activities within school time. Twenty-one clubs were formed, namely:

Dramatic
Debating
Travel
Science
Fancy Work
Busy Bee
Basketry
French
Civics
Carpentry

Latin
Glee
Orchestra
Scout
Knitting
First Aid
Story 'Tellers
Bird and Flower
Radio
Spanish

School Paper

These are carried on by the pupils under the direction of one or more teachers. Each pupil was required to make a choice of the activity in which he was most interested. Though this plan is in the experimental stage, many pupils have already shown an increased interest in school work because of these activities.

A library hour is one of the most valuable periods in a junior high school and, therefore, an hour has been set apart for this purpose in so far as is possible with the limited number of teachers available. I recommend that an experienced teacher for this work be provided.

As an evidence that the junior high school has helped to bridge the chasm formerly existing between the elementary and the high school, I draw your attention to the following:

In June 1921 the Western Junior High School graduated 319 pupils; of this number 310 entered High School in September 1921. In June 1922 the Western Junior High School graduated 306 pupils; of this number 288 entered High School.

As a result of the action of the School Committee in providing a paid coach for the boys and another for the girls, a greater amount of work has been done in the way of physical development of the pupils. Better baseball, football and track teams have been trained, and more girls have taken part in tennis, basket ball, bat-ball, hikes and other interests.

In spite of the noise, confusion, and dirt which necessarily accompany the construction of our new building, pupils and teachers are delighted with the prospect that corridor recitations and other inconveniences will soon be at end. We are to have an auditorium which will enable us to hold assembly periods of all pupils and to extend our physical exercises, thereby giving the school opportunities which now are

impossible. By the fitting up of the space under the hall a lunch room of sufficient size to accommodate all pupils will be provided.

May I say in closing that the marked progress of the school has been due largely to the interest and united effort of the school committee, the superintendent, the parents and the efficient corps of teachers."

ARTHUR L. DOE,

. ...

Master of the Western Junior High School.

High School

The final division of the school system is the High School now known as the Senior High School. This organization consists of three years, and deals with youth of adolescent age.

The activities of this school are divided into four general groups: college preparatory, commercial, general, and the household arts. Each of these courses is a continuation of work begun in the Junior High School. Each is well organized and affords an opportunity for pupils to secure thorough training in the work best fitted for their needs and aptitudes. The work of the college preparatory department is planned to fit pupils for the varying kinds of higher institutions. Pupils enter colleges, universities, and normal schools, either by certificate or by examination. The record of the High School in these institutions is good. One hundred and thirty-four members of the last class entered the following higher institutions of learning:

Bates College, Boston College, Boston University, Dartmouth College, Emerson College, Harvard University, Jackson College, Lasell Seminary, Lowell Textile School, Massachusetts Agricutural College, Massachusetts Institute of Technology, Mt. Holyoke College, New Hampshire State College, Normal Schools, Northeastern College, Radcliffe College, Simmons College, Smith College, Tufts College, and Wheaton College.

The Somerville High School provides thorough drill for those who wish to prepare for admission to college but this work is done to meet the exactions placed upon the secondary school by the colleges themselves. The nature of these exactions is shown by the following statement furnished by Headmaster Avery: "The Situation Regarding Preparation for College in a Comprehensive High School such as the Somerville High School

"First, what is a comprehensive High School? This type of High School necessarily varies in different communities owing to the character of the community and the special industry which is found there, but in general a comprehensive High School aims to supply pupils with any and all forms of secondary training for which the young people of the community have use, with the reservation that such a school is not vocational and does not aim to train primarily for special industries and occupations. To explain still further, the comprehensive High School should train young people to continue their studies in higher institutions; to go into business with a fair basic knowledge of business demands and customs; to have for the girls, a knowledge of the various phases of home making; for the boys of manual tendencies, a general fundamental knowledge of manual arts, particularly with reference to the special industries of the community; or to provide a broad fundamental training along general lines. ferent types of efforts are in general characterized as courses. —the Preparatory, the Commercial, the Domestic Science, the Manual Arts, and the General. Of these, the Commercial Course comes the nearest to being vocational, since it does send out into business offices stenographers, typists, bookkeepers, and general office workers; yet the aim of the course as a whole is to give to pupils an understanding of stenography or business principles rather than to train for a particular type of business or office.

I shall discuss the first only of these courses, although much can be said about and many improvements suggested in all of them.

Few, outside of those making a special study of the requirements of higher institutions, understand the conditions imposed on secondary schools in training boys and girls to continue their studies in college, scientific schools, normal schools, etc., or the little leeway given the secondary school, once a pupil has selected the particular college for which he wishes to prepare.

If the pupil could always decide at an early age that he wanted to continue his education after high school, if he could definitely select his college and never change, if he and his parents could be made to know that a high school diploma does not insure entrance to college, and if only the brighter pupils desired to attend college, the task of the high school would be simple indeed.

In the eastern states especially, the requirements for entrance to college are very explicit and vary considerably for different colleges. Harvard, Radcliffe, and Wellesley represent one type and perhaps the most exacting; Dartmouth another, Boston University, Brown, and Tufts another; and the Institute of Technology still another. Any pupil of good ability should be able to enter any of these colleges if he makes his choice early enough and works hard. His decision to go to college should be made not later than the beginning of the last year of the Junior High School, as the preparation demands at least four years' work, and his choice of college should be made finally upon entrance to the Senior High School. Pupils who do not decide to go to college until they enter the Senior High School must expect to take an extra year after graduation in order to satisfy the requirements.

Parents often think that a high school diploma is all that is necessary to gain admission to college. This fallacy should be suppressed early in the Junior High School. Pupils in order to satisfy the college must do much better than passing work and must do much more than the amount of work just

necessary for securing a High School diploma.

The rigorous and exacting requirements imposed by the colleges make college preparation very difficult and fill the short school day to repletion. Little opportunity is, therefore, granted the college-bound pupil to indulge in the so-called extra-curriculum activities of the high school, such as music, debating, work on the school paper, dramatics, etc. In this respect pupils of the preparatory course are largely deprived from taking part in many of the broader activities of the school and from securing that all-round preparation which gives them the best foundation for valuable citizenship and efficient membership in society. In brief, college preparation is narrowing rather than broadening,—in general, uninspirational.

Even with these limitations, college statistics show that public high school trained young men and women do better work in college than those from private preparatory schools.

What is the solution of this problem? A longer school day would help somewhat and that seems all that one can suggest under present conditions. Even that would be attended with some risk as time would thereby be taken by some from needed physical exercise or home study.

A real solution must come from the colleges through a readjustment of the requirements, a letting up of the gruelling and deadening repetition in the languages, the substitution of interesting authors in both ancient and modern lan-

guages, the study of modern history, social sciences, and the problems of citizenship, and a recognition of the value of a real study of music, debating, or art.

May the day soon come when all the courses in a high school may fit for citizenship and a real appreciation of right

living."

The Commercial Department. This department provides vocational training in bookkeeping, typewriting, and stenography. A pupil who has taken the regular course in these subjects can easily find employment upon graduation, and can meet all the requirements which it is reasonable to expect a beginner of the age of a high school graduate to have in any of these subjects. Pupils of the commercial department of the graduating class are required to spend one week in office work during the senior year. These pupils by their work in the City offices, have clearly demonstrated their efnciency in stenography and typewriting, and in their ability to meet office requirements usually placed upon a beginner. Some graduates of the high school attend commercial schools. either to specialize in advanced work or to complete the course which they have begun too late to finish before graduation. Such instances in no way reflect upon the work of the school. They are variations of the rule which is that completion of the commercial course of the Somerville High School fits a pupil to begin work in some one of the three branches taught.

The General Course. The general course affords an opportunity for pupils who for any reason plan to defer specializing until after graduation. This course is rich in material and affords a fine opportunity for study and improvement

under good conditions.

The Household Arts Course. This department is of recent development in the high school. It is fully explained in the report made by the Director of Household Arts. In this course a girl divides her time equally between a group consisting of dressmaking. millinery, cooking, household economics and other related subjects, and a group of academic studies taken from the general curriculum. It is valuable not alone on account of the special training which it provides but also for the reason that it fits girls to enter a variety of vocations upon graduation, wherein they can be self-supporting until the time for home-making arrives.

Extra Curricula Activities

Personal development of the students of the High School in initiative, self-reliance, executive ability, and social co-

operation, is promoted by certain activities which the students themselves conduct. These are commonly classed as extra curricula activities. What is being done in the High School along this line is shown in the following statement which has been prepared, with the approval of the Headmaster of the High School, by Stephen H. Mahoney, a member of the High School Faculty:

The Extra Curricula Activities of the Somerville High School

Besides the regularly prescribed activities there are many undertakings connected with the High School course which are open to the pupils. These activities are conducted by the pupils themselves, but are under the guidance or supervision of members of the faculty. The administration of the High School fosters and encourages these miscellaneous undertakings as helpful to the pupils from a cultural, recrea-

tional, or scientific standpoint.

The Students' Council is the representative organization for the entire membership of the school. The four officers of each class, namely, the president, vice-president, secretary, and treasurer are ex-officies members of the council. In addition there are six members known as Floor Proctors, each proctor representing the rooms on one floor of each of the High School buildings. The Council in its representative capacity acts for the student body in offering suggestions to the Headmaster and Faculty relative to student cooperation in school affairs. Illustrations of the work of the Council are: planning methods of filing to and from recitations, procuring posters and mottoes for school activities, conducting school assemblies for the promotion of some particular undertaking, acting as ushers at assemblies and public gatherings. and acting as monitors in the fire drill. The projects of the Council are transmitted to the pupils of the school through the medium of Proctors, each home room in the school building being represented by a Proctor selected from the membership of the room.

In addition to the Students' Council, as has been intimated above, each of the three classes in the High School has its own organization for the administration of class affairs. The class officers, namely, a president, vice-president, secretary, treasurer, editor, and assistant editor are elected annually by ballot. Each election is conducted in accordance with the custom of municipal and state elections, the candidates being placed in nomination by the filing of the proper papers and, in the case of the senior class, the election is conducted at a city polling booth under the supervision of

student election officials. Each class conducts its own meetings during the school year as occasion demands, the routine work being attended to by the officers.

Chief among the literary activities of the school is the publication of a school paper, "The Radiator." This paper which is issued monthly is managed entirely by students. This publication serves as a journal for recording school activities, and as a medium for promoting interest and cooperation among the pupils.

The Boys' Debating Society, with an active membership of about fifty pupils, aims to foster practice in public speaking, to train the boys in logical reasoning, and to promote interest in public questions. Meetings are held weekly in the school building, and in addition the society usually competes in one or more contests with other schools.

The Girls' Debating Society serves the same purpose for the girls of the school. This organization is a member of a triangular league, the other members being representatives of the Newton and Brookline High Schools. These three

schools meet annually in a triangular contest.

The Somerville High School Players' Club is a recently organized undertaking in the school. With a membership of approximately 125 pupils, its purpose is to promote interest in dramatic activities. Included in its membership are pupils representing the Art Department, the Dressmaking Department, and the Manual Training Department, thus enabling the organization to procure within its own ranks the costumes, scenery, and stage property essential to the presentation of plays.

The Somerville High School Orchestra heads the list of musical activities. Its membership of sixty pieces is drawn from the pupils in the school capable of playing orchestral instruments. Most of the players have already been members of similar organizations in the Junior High School System and accordingly have profited by such experience. The orchestra is under the supervision of the director of music, and aims to teach concert playing for both school affairs and other functions which have the sanction of the School Committee.

The School Band with a membership of approximately thirty-five pupils rehearses weekly and furnishes music for many of the school activities, particularly those of an outdoor nature. The band is also occasionally called upon to render music for parades and other undertakings which have the approval of the school authorities.

The Fife and Drum Corps is a boys' organization which

renders music chiefly for the physical training activities of the school, particularly those of an outdoor character. It is composed of 40 pupils who meet weekly for instruction and rehearsal.

The Fife, Drum and Bugle Corps is a similar organization for girls, and alternates with the boys' organization in furnishing field music. There are at present about 40 members in the corps.

The Mandolin Club is composed of 24 pupils who play the stringed instruments. Its purpose is to provide pleasure for its members in concert playing and also to furnish an-

other type of entertainment at school functions.

The Boys' Glee Club has a membership of 30 and meets weekly for rehearsal. Its objective is socialized concert singing for the purpose of the pleasure it affords those participating, as well as for the purpose of rendering selections in public.

The Girls' Senior Glee Club numbers 80 members from two upper classes in the High School and serves the same purposes as the similar organization among the boys.

The Girls' Junior Glee Club secures its membership from among the first year pupils. Its present membership is ap-

proximately 45 girls.

The Somerville High School Athletic Association is the medium through which the pupils support the major athletic activities of the school. An executive committee, on which the students and alumni are represented, conducts the administrative business of the association. Under its supervision Baseball, Football, Hockey, Basket Ball, and Track activities are conducted for the boys of the school. This association conducts its work in cooperation with and under the direction of the School Committee.

The Girls' Athletic Association is a similar organization for the purpose of promoting athletic activities for girls. Its organized undertakings thus far include Tennis, Basket Ball, and Field Hockey, and in addition it has conducted informal hikes, swimming groups, toboggan parties, and similar activities.

The "S" Man's Club is a newly formed society in the school. All athletes who have been awarded letters by the Athletic Association are eligible to membership. The purpose of the club is to cooperate with the school faculty in the conduct of athletic undertakings, to promote a better feeling among those participating in school athletics, and to exert its influence in general school affairs.

The School Bank is the medium through which thrift is encouraged among the pupils. At a stated time in the

week's program a brief period is provided during which the pupils of the school are encouraged to make regular deposits in the bank or its sub-stations which are conveniently located throughout the school.

The French Club was organized to stimulate interest in the French Language, and give opportunity for speaking French in recitations, dialogues, plays, songs, etc., and to help pupils to gain confidence and to become better acquainted with teachers and fellow pupils.

The Chess Club has at present a membership of 25 boys and meets weekly to promote interest in this scientific game. Matches with other schools are occasionally arranged.

The Radio Club is now in the process of organization. Its objective is to instruct pupils who are interested in the subject of Radio to build or improve Receiving Sets and also to provide instructions in the reading of the Radio Code.

The Art Club is the most recent organization in the school and is not yet sufficiently established to report its accomplishments. Its function will be to promote interest in art as an asset to culture and also to assist other school activities by furnishing posters and like material.

Vocational School

Under the State Law any child fourteen years of age or over is entitled to attend a vocational school in his own town or elsewhere in the state, provided his own town does not maintain the type of school which he wishes to attend. the latter case, the home town must pay the tuition for every such pupil to the town maintaining the school which the pupil attends. Somerville has for a number of years maintained a day Vocational School for Boys. For a number of years it also maintained a day Vocational School for Girls, but in October, 1919, this school was closed and in its place a department of Household Arts was established in the High School as a vocational opportunity for girls. Under present conditions, then, the local youth may choose between attending the vocational school maintained by the City of Somerville or attending some other type of vocational school maintained in other communities. At present, attendance of Somerville youth at day vocational schools is as follows:

| In Somerville Day Vocational | School90 |
|------------------------------|----------|
| Household Arts, S. H. S | 34 |
| | |

Of the number of pupils attending the Boys' Vocational School 52 are residents of Somerville and 38 of other communities.

Five departments are maintained: academic, wood-working, machine-shop, automobile repairing and mechanical drawing. The school is well equipped, has competent instructors, and prepares boys to enter the trades as advanced apprentices. Its course of instruction is three years in length. Under the rules of the Department of Education, fifteen pupils is the maximum number to be taught by a trade instructor. While the present school plant is so occupied that there is no room for additional classes, there is room for additional pupils in a number of the departments.

The possibility of increasing the scope and influence of this school is great. Such development can only come, however, as a result of greater appreciation of this type of school on the part of parents whose boys would find their best careers in industry. In a community where construction is one of the greatest enterprises in which the people are engaged, welltrained tradesmen are essential to its welfare and progress. Honorable careers of usefulness and profit are open to such workers. The Vocational School for Boys gives a chance to learn the elements of a trade and at the same time to advance in academic study. It is possible, of course, to develop this school by the addition of a year to its course of study should the public demand therefor be sufficient. In the same degree, instruction in other trades could be added, thereby increasing the opportunities for boys to prepare to earn a living and to get academic instruction at the same time.

Continuation Schools

In a referendum vote in 1919, the people of Somerville decided to accept the provisions of the law in reference to continuation schools, and in September 1920 such schools were opened by the School Committee. Two kinds were provided, one for girls and one for boys, each having two teachers. The classes were located in the High School building, each using two rooms. The equipment of the two schools was furnished mainly by transfer from the High School. Today both schools are located in the High School building, and improvement has been made in the space provisions made for them. Under the law, all children fourteen to sixteen years of age, who are at work, must attend Continuation School four hours every week, in the town where they are employed. As many of our youth work in other places than Somerville, not all of them are in our Continuation Schools.

The present membership of our schools is as follows: Boys, 88; Girls, 48. Both schools are organized in two general departments, academic and practical arts. The work in both departments is well organized and holds the attendance and interest of the youth who attend the schools.

One element of difficulty in the management of these schools is the problem of the twenty-hour pupil. Under the law a child fourteen to sixteen years of age who is out of work must attend Continuation School twenty hours a week. As there is a good deal of variability among the individuals of this group, due to the fact that changes of employment and idleness are constantly occurring, it is difficult in schools as small as ours to arrange satisfactory programs for these pupils. The problem, however, has been handled as well as possible under the conditions now obtaining. Future developments may point to ways of improvement in this matter.

Americanization

Classes in English for adults of foreign birth have been conducted in accordance with the general plans which have been developed in the two preceding years. So far as the organization goes, an attempt has been made to provide the most convenient opportunity possible for those who wished to learn the English language. Classes have been conducted in school buildings in the evening, in factories wherever arrangements to that end could be made, and in schoolhouses and homes during the day. A special effort has been made to provide afternoon classes for mothers and interesting results have followed this attempt. A class in citizenship was conducted in the Morse School with an attendance of 22 men, of whom 21 passed the examination for final papers. supervisors have visited the homes of many non-English speaking families to spread information about these classes and to create a friendly attitude towards our language and customs. A very eager spirit has been shown by all of those who attend these classes and a strong desire to become acquainted with the English language and identified with our habits and community life. The classes average 67 sessions a year. Generally the attendants of these classes are sorry to have the session come to a close. In looking for a justification for conducting this work at public expense one would have to estimate the following values:

(a.) A considerable number of men have qualified for citizenship through the instruction received in these classes.

(b.) A much larger number have improved their knowledge of English and thereby have increased their value not alone to themselves but also to the other members of the community.

(c.) All of the attendants have gained in knowledge of

and sympathy for our institutions and have thereby become more identified with our interests.

The work in Somerville has been conducted in harmony with the general plans formed by the Department of Education for the carrying on of this work throughout the state. These state plans indicate that the problem of educating the foreign-born in the English language and customs is regarded as of large importance to the future welfare of the state. In connection with the meeting of the N. E. A. in Boston a conference of leaders in Americanization work lasting two days was held. The general state of this undertaking throughout the country was considered. The common opinion was that this work is necessary and should be pushed vigorously among all people of foreign speech residing in this country. This opinion was maintained on grounds of national interest as well as on grounds of the interest of the newcomers themselves. The local work is in harmony then with the purposes, plans of organization, and methods of procedure which are approved by the workers in this field both in the State and the Nation.

Night School

Night schools now include the Evening High School, elementary academic classes, vocational classes for men and women, and Americanization classes. This enumeration shows a change in the character of night school instruction from the type formerly given, which was mainly academic. The Evening High School has been conducted on the general lines followed in previous years. The membership has been somewhat larger than last year, and has been made up of earnest young men and women. Never has there been more interest in the subjects studied or better progress made by the students.

The classes in strictly elementary work were only two in number, one at the Bell School and one at the Western Junior High School. In this department of Evening School undertaking a considerable shrinkage is shown from the numbers of earlier years. It is probable that the local native-born youth advance so far in school before leaving that the kind of night school instruction they desire to obtain will be found in the high school rather than in elementary grade work. This condition is no reflection upon the organization or offering of the Evening Schools, but is an indication of the change of day school conditions.

The vocational evening classes have been conducted for men and women. Those for the men have been located in the Vocational School for Boys, and consisted of classes in machine shop practice and automobile mechanics. The Vocational School for Women consists of classes conducted in the High School building, and in the Western Junior High School. The subjects offered are dressmaking and millinery. These classes are well attended and are meeting a very positive demand. All vocational classes, whether held in the day or evening, are conducted in co-operation with the State Department of Education under the plan by which the State pays one-half of maintenance cost.

Atypical Classes

Section 46, Chapter 71, General Laws of Massachusetts is as follows:

"The school committee of every town shall annually ascertain, under regulations prescribed by the department and the commissioner of mental diseases, the number of children three years or more retarded in mental development in attendance upon its public schools, or of school age and resident therein. At the beginning of each school year, the committee of every town where there are ten or more such children shall establish special classes for their instruction according to their mental attainments, under regulations prescribed by the department."

Before the enactment of this law Somerville already had established three classes for such children. These have always been full but have taken care of only a fraction of the number of children for whom such classes are intended. During the summer of 1921 a psychological clinic began work in Somerville under the direction of the Department of Education and has continued in operation ever since. As the members of this clinic devote only part-time to this city, the progress of the work is necessarily slow.

It has, however, completed the examination of a number of children and has made definite report upon them. At the present time the situation is as follows:

Thirty-seven additional children have been declared to be eligible for this type of school. One hundred thirty-nine more children have been reported for and are waiting examination. Without doubt a large part of these children will be found to be three years or more retarded. It is apparent from this review of the matter that a considerable problem must be met and solved in the near future. With fifteen pupils to a class there are now enough of these children to make two additional classes. This number will be increased as the examination progresses. Consequently we shall be

called upon to provide additional classes, probably at least four or five in number. With an undertaking of this size to be handled, methods of organization will necessarily have to be considered. At present the three classes are placed separately in different parts of the city, each conducted as an independent unit. Each receives and teaches pupils of various ages and stages of physical and mental development. arrangement has, in the past, been necessary for various reasons. The classes have done the work for which they were established as well as possible under such conditions, but with the larger undertaking to be managed a different scheme of organization should be followed, and very much more should be done for these children. As soon as circumstances will permit, all of these classes should be gathered in one building, the work should be graded by age or capacity, and more adequate provision of handwork equipment should be pro-Such an arrangement would be more economical so far as the needed equipment is concerned and it would provide opportunities for older children of this type which they do not now have.

Sight Saving Class

In accordance with plans disclosed in the last annual report the sight saving class was established by the School Committee last June. This class is located in the Highland School and is properly equipped and has at present an attend-

ance of ten pupils.

As the children who ought to attend this class are scattered about the city, it becomes with some of them a problem how to get to the school. Parents of some who attend are asking for transportation because they are not able to meet the daily expense for carfare. It is the practice in other communities where such classes are conducted to provide carfares. In order that this school may fully meet the purposes for which it is established, it is desirable that carfares be provided for those pupils who live at a long distance from the school.

Attendance

For the first quarter of the present school year, the percentage of attendance for all the day schools of the city, without the Continuation Schools, was 95.9%. The percent of average attendance for the school year ended June 30, 1922, was 94.2%. This is the highest annual percent since 1915, when it was 94.5%. The percent of average attendance since

that year is as follows: 1916, 93.4; 1917, 93.7; 1918, 92.2; 1919, 91.2; 1920, 91.9; 1921, 93.6; 1922, 94.2.

The low rate of attendance during the war and shortly after may have been caused by the general unrest or by the fact that many children had part-time jobs after school taking their attention in a large part, away from the thoughts of school obligations. The present rate shows an improvement over former conditions. Apart from the change in the times, various other reasons contribute to better attendance. Teachers are making extra exertions to secure good attendance and they are having greater success than attended similar movements during the years just passed. One of the important lessons to be learned during childhood is the value of constant and sustained response to duty. School offenders of all sorts are usually found among those whose attendance is poor. Most juvenile court cases are those of children who are out of school either through truancy or irregular attendance. Most successful scholarship is found among children. whose attendance is constant. These facts indicate clearly the importance of regular attendance. The schools cannot train the child who is absent nor can the home make up to the child the loss which absence causes. There is, therefore, the strongest reason for the closest cooperation between home and school in the matter of insuring the regular attendance of all children.

Thrift

Instruction in thrift has been given in all the schools even more vigorously this year than at any other time. The results of this work are gratifying. The methods employed and the amounts deposited in the school savings bank are shown in the following statement prepared by George I. Bowden, Chairman of a Committee of Supervising Principals on *Thrift*:

I submit the following report for the Committee on School banks for the year of 1922. The present year has been, on the whole, a year of progress.

School banking is now carried on in all of our schools and its value to the children is better appreciated by the teachers than ever before. At first this undertaking was looked upon by many of us as a troublesome interruption in an already over-crowded day. It is now regarded as a very important and helpful aid in forming the valuable habit of thrift in our pupils.

The fact that so many of our people are spending their money as fast and in many cases faster than they are earning

it is looked upon by many of our most thoughtful men as a danger to the very foundations of our social and economic order.

The schools have a very important duty to the rising generation in this matter. It is not enough to give them the power to earn more money, for it is known beyond a doubt that the better the children are educated the greater will be their earning power. We must teach them the value of money, how to spend it wisely, how to save and safely invest a part of it.

That \$38,934.10 has been deposited in the Somerville Institution For Savings by 4400 children is a very convincing fact to show that thrift is being taught in our schools.

We are sure that a means of depositing the children's savings at frequent periods, such as is afforded by the school banks, is essential to this instruction, for the amount saved during the summer vacation is much less than that saved in the same length of time when the school banks are in operation.

The number of children in our schools who are depositors is not as large as it is in many communities that have school banks.

Is not the number of children who are learning to save of greater importance than the total amount saved? Canpot this number be increased during the coming year?

Health

The health of public school children is the joint concern of the School Committee and the Board of Health. remotely, it is a concern also of the Commissioner of Public Buildings, who has charge of the school buildings including sanitary conditions, heating, lighting, and furniture. Board of Health employs and directs the school physicians. It also employs two school nurses. The direction of the school nurses, however, is through the courtesy of the Board of Health exercised by the Superintendent of Schools. School Committee has charge of all the school activities designed to promote the health of pupils through instruction, physicial training, and general care. Health instructions are given in accordance with a course in hygiene extending through the elementary schools, and the first two years of the Junior High. Physical training exercises are conducted for the purpose of promoting physical development and These exercises are conducted under the direction of a Director, Assistant Physical Director, and two cadet The Assistant Physical Director has charge of the teachers.

extension work in games and athletics designed to promote participation by pupils in outdoor games after school. plan for this work which was adopted by the School Board at the January meeting has been carried on during the year. Many obstacles have prevented the rapid and successful development of this plan. None of them have been of a nature, however, permanently to retard the work. With the experience of this year to guide us it ought to be possible for those in control of this matter to make a larger showing next year. Health work in the schools has received emphasis by the entrance into this field, this year, of the State Department of Education. This department has appointed officers whose function it will be to promote the interests of this work throughout the state. Without going further into details of this matter, I wish to report that much interesting and successful effort is being put into this part of the school undertaking, and that the importance of the physical development and health needs of the pupils of the public schools is likely to grow in importance and the amount of attention demanded for it. There are some important questions now requiring consideration and answer. These will, doubtless, be considered by the School Committee during the coming year.

Credits for Music

In 1919 the School Committee authorized the giving of diploma credits in the High School for outside study of music. A method of procedure was carefully prepared and the plan was put into operation in the following September. As this work has been going on now for two years, some idea can be obtained of the interest which pupils have taken in this opportunity and of the extent and character of the work in music which has been fostered thereby. Therefore, I have asked Wesley A. Maynard, High School Instructor in Band Music, an enthusiastic believer in the value of the study of music, to write a statement about the present status of this work. His statement follows:

Credited Music in the Senior High School

Since the School Committee, in the summer of 1919, authorized the giving of credit for music in the High Schools, there has been a constant growth of interest, yearly increase in the number of pupils enrolling for credit, and steady improvement in results attained.

This year 75 pupils have been entered by their parents

or guardians for the two points of credit allowed for work under private teachers outside of school. The number of pupils, though not much in excess of last year, includes a greater diversity of musical activity, the voice and 8 instruments being comprehended. Instruction on piano is being taken by 47; violin by 18; voice by 5; drums and xylophone 2; clarinet, trumpet, cornet and alto horn, 1 each.

The music teachers of Somerville are not organized into an association, such as exists in many other communities and while such associations have advocated and endorsed and cooperated with the system of credit for applied music realizing that it furthers the cause of music, the talent of the pupils and the standards of the music teaching profession, some of the Somerville teachers unfortunately have not looked with favor upon the movement, and have not encouraged their pupils to enroll for credit. If some means could be found of securing the united interest of the local private teachers the opportunity offered by the school would be taken more advantage of.

There are 385 pupils enrolled for the one point of credit given for membership and satisfactory performance in the different musical organizations of the school which include orchestra, band, girls' fife, drum and bugle corps, boys' fife and drum corps, mandolin club, senior-junior girls' glee club, sophomore girls' glee club and boys' glee club. These organizations take a prominent part in the functions of the school and in such other public affairs as are authorized. They are an important factor in the strengthening of the school spirit and the upbuilding of loyalty to the school and the community. The band and drum corps especially have an important part in the physical training program and in the outdoor activities of the school. The other organizations, by their nature, are associated more particularly with the indoor functions.

The school orchestra numbers upwards of 60 players including, but not in the right proportion, all the instruments of the modern orchestra. Some thought has been given to the proposition of dividing the orchestral players into two groups. the first of which would be a balanced team of the most competent performers playing music suitable for any occasion where their presence might be desired, the second being a training group from which the most proficient players would be transferred to the first group as opportunity offered or need arose.

The school band, numbering some 30 members, and the two drum corps, numbering about as many players in each,

are composed of pupils able to play upon the necessary instruments. A knowledge of music and an ability to perform is required of members of the band, as also of the orchestra. The experience gained by pupils who are members of these organizations is chiefly in ensemble playing and an increased knowledge of musical literature. Instruction on fife or drum is given to such members of the drum corps as are in need of it, the pupils so instructed being added to those organizations as soon as their musical ability warrants.

There are at present 47 girls, either playing or learning to play fife, drum, or bugle and 67 boys who can either play fife or drum or are learning to play the fife. In addition there are 48 boys who have enrolled for instruction on the drum who have as yet received no attention owing to the fact that the instructor of field music is employed for only two days a week, and that amount of time is more than filled by the amount of work now being carried on.

The mandolin club, which has a membership of 24, is the newest of the musical activities, having been started for the first time in the Fall of 1921.

Interest in singing among the girls has increased to such an extent recently that this year, as last, it was found expedient to organize two glee clubs, one of senior and junior girls and another of members of the sophomore class. The boys who sing, though less numerous, are fully as much interested in that art as are the girls. Their organization numbers 157 voices.

The musical activities fostered by the school, besides promoting a greater general interest in music, have awakened in a considerable number of pupils a desire to give expression to their musical sense and have in some individual instances promoted a proficiency in music which has brought not only pleasure but profit to its possessors.

Interest in, and knowledge of, music, in one form or another, has never been as general as now, and while the musical opportunities afforded at the Senior High School are not as broad or extensive as in some more fortunate communities, they have developed to such an extent as to justify their furiner extension.

The further extension and development of musical opportunities that might well be considered, and which have been found to give satisfactory results where introduced, include the organization of instrumental units, such as bands and drum corps, in the junior high schools, and the establishing of classes in ear training, theory, perhaps harmony, and music appreciation, the giving of musical memory tests,

and the providing of instruction on piano, violin, and other instruments either gratuitously or at a nominal cost in either the junior or senior high schools.

Accommodations

In last year's report a detailed statement was made concerning school accommodations. No material change has occurred since then to modify the application of that statement to present conditions. A vacant room in the Proctor School has been occupied by an additional class but in other respects conditions are the same as last year at this time. While this statement is true now, very important action has been taken during the present municipal year which will soon change these conditions very materially. Upon recommendation of Mayor John M. Webster, the Board of Aldermen in April of this year passed an order making provisions for a very important addition to the school accommodations of the City These provisions as a whole constitute the of Somerville. largest, the most comprehensive, and the most far-reaching building program ever recommended by a mayor and authorred by a Board of Aldermen in a single year in the City of Somerville. It is responsive to the needs of the situation as they have been expressed by the School Committee in recommendations made to the Mayor and Board of Aldermen.

This building program consists of a new Junior High School building to be located on Marshall Street and of additions to the Western and Southern Junior High Schools. Work began on all of these projects in the early summer and has continued vigorously ever since. The corner stone of the new school on Marshall Street was laid with due ceremony on November 21, 1922. It is expected that this building will be finished in November, 1923. It is expected that the additions to the Southern and Western Junior High schools will be finished early in 1923 so that the over-crowding in both those places will then be relieved. When these two additions are completed the conditions at the Western and Southern Junior High Schools will be very greatly improved. At the Western, an assembly room capable of seating about 1,000 pupils and convertible into an exercise room, and lockers and showers for boys and girls have been provided. new building on Marshall Street when completed will be a model in design and adaptation to use, and will be a source of pride to the city. When these improvements are all completed, the junior high schools, which have so far been conducted under very adverse circumstances, will have an opportunity to demonstrate plainly the efficiency which they have already attained, and will be able to add others which will be made possible by these improved accommodations.

Teachers' Council

One of the important developments in the field of school management in recent years is the Teachers' Council. As the relation of the Somerville teachers with the School Board has always been cordial and cooperative, the forming of a Teachers' Council was the natural thing to do when once it became clear that such an organization was worth while. Accordingly, the School Board in June, 1921, authorized our teachers to establish and maintain a Teachers' Council. An account of this undertaking is given in the following statement which has been prepared at my request by George M. Hosmer, Chairman of the Teachers' Council.

Report of the Chairman of the Somerville Teachers' Council

Somerville, Massachusetts December 12, 1922.

Mr. Charles S. Clark Superintendent of Schools Somerville, Massachusetts

Dear Mr. Clark:

The Teachers' Council is an outgrowth of the need for greater co-operation of the teachers with the School Board. I'wo years ago a tentative constitution was presented by a committee chosen by the School Board. This constitution was not accepted, and further action was postponed.

In the fall of 1921 a committee was appointed of four representatives from each of the following groups: Kindergarten, Primary and Elementary grades, Special and Vocational school teachers, Junior High, Senior High, Americanization and Continuation Schools, masters and masters' assistants.

From this representative group, five were appointed to revise the tentative constitution. * * * * * As revised by this committee the constitution was presented for approval by the various representatives to their respective groups. After

their acceptance, the School Board approved the constitution at the meeting in April, 1922.

A ballot was made of twenty nominees, two chosen by each of ten groups. The election occurred May 10, 1922; and the Somerville Teachers' Council was organized into an active body.

The first meeting called to organize was held on June

6, 1922. The following officers were elected by ballot:

Chairman, George M. Hosmer Vice-Chairman, Frank W. Seabury Secretary, Mary L. Bryant Treasurer, Mary H. Joyce

It was voted to hold the meetings of the Council in the High School Library at 4 P. M., on the Monday preceding the last Monday of each month from September to June. The running expenses of the Council are met by an annual assessment of ten cents from each Somerville teacher.

At the first regular meeting held on September 18, as Superintendent, you accepted our invitation to be present, congratulating the Council on its organization, and asking its co-operation in dealing with the many educational problems demanding solution. The Council pledged its loyal support and readiness to help in all ways affecting the welfare of the schools.

At the October meeting Miss Hazelton gave a full account of the origin of the curfew ordinance, and explained the difficulties in the way of its present enforcement. It was voted to promote the observance of American Education Week, December 3 to 9. The Council, therefore, at its November meeting made definite plans for a constructive program to interest the public in the needs of our schools. The Somerville Post of the American Legion co-operated with the Council and invited the chairman to address them, December 7, on the need of Physical Education. A letter was sent to all the ministers of the city, urging them to preach upon the subject of Education, December 3. The local papers, at the request of the Council, gave good publicity to American Education Week. The different schools introduced special features, carrying out the purposes of the observance.

At the November meeting of the School Board the Council offered some recommendations from a report of First Grade Teachers, concerning the admission of children to the first grade: 1. To admit into Grade 1, on or before the Monday following the opening of school, all children who are six, or who will be

before December 31, and those only.

To limit the number of pupils to a class in Grade 1 to forty; and the seating capacity in each room to forty; all desks and chairs in excess of that number to be removed, in order to allow more room for schoolroom activities.

The Council desires to be of real service in the affairs of our schools, and hopes it may bring to bear upon the problems of the future the experience and judgment of the different groups which it represents. It also wishes to acknowledge your willing co-operation in every way, especially in circulating with official bulletins a record of the Council's proceedings.

Respectfully submitted,
(signed) George M. Hosmer,
Chairman.

Professional Improvement of Teachers

The professional improvement of teachers in service is one of the most important influences affecting the character of school instruction. It is the element which, added to professional training before entering the service, determines the character of a teacher's work. Last year an inquiry taken at this time showed that a large number of our teachers were engaged during the school year on some kind of professional study. This condition is repeated again this year as shown by recent reports. More than 190 are engaged in some form of educational study. Such continued interest by our teachers in efforts for self-improvement cannot fail to be beneficial to our schools. Inasmuch as this is all done without expectation of material reward greater credit is due them.

Cooperating Agencies

During the year the work of the schools has been helped by cooperation of a number of interested agencies. First of all among these should be mentioned the work which teachers have done outside of their classroom teaching. In committees and as individuals working with the Superintendent they have furnished substantial help in the selection of text-books, in the improvement of courses of study, and in the study of problems of educational procedure. This work is still going on in respect to some very important problems of school organization and procedure.

A substantial gift of money was one of the outstanding contributions from outside sources. In June 1922 a group known as the "Women of Somerville" gave the School Committee \$429.59 to be expended in improvements of the Dental Dispensary. From this gift it has been possible to provide a new chair and motor.

Impetus to the study of history has been given through offers of medals and money for prize essays on historical subjects. The organizations which offered such prizes were: Major John A. Cummings, Camp 3, Sons of Veterans; American Legion, Post No. 19; Anne Adams Tufts Chapter, D. A. R. The Women's Christian Temperance Union offered prizes for compositions upon the "evil effects of alcohol and tobacco."

Summary

This review has dealt briefly with many things which are being done in our schools but more have been passed over without comment lest this report exceed proper limits. The selection, however, has been made for the purpose of showing the larger parts of the undertaking and what each is doing. The dominant note of the whole story is the highest development of the individual, both for his own sake and for the sake of the social order of which he is a part. This note is dominant today more than at any other time in the history of public education in this country. The right of every child to have a chance for making the most of himself is conceded. It is a proud boast that the public schools are for "all the children of all the people." It is recognized that children differ from one another in interests, aptitudes, and abilities. It is no longer attempted to conduct schools as though pupils were all alike. The child is the center of interest in whose behalf books, studies, equipment, and all other agencies of education are used to the end that he may attain his highest possible destiny. As children differ from one another so must agencies used and opportunities offered As children are alike so must agencies used and opportunities offered be common to all. Account has been given in this report of the different opportunities which are now provided for our children. These are in the main different types of schools or courses of study. They are provided and

maintained to meet the most outstanding differences in the needs of children. Much more can and should be done in this direction when means permit. As the dominant note dictates these provisions for the development of the individual as such, so it compels the use of these provisions for the social welfare of the individual and of the society of which he is now a ward, but of which he will soon be an active participant to contribute his share in determining its nature and destiny. What the children in the public schools become, so will society be. Manifestly the schools must train the pupils in qualities which will make them capable of maintaining the institutions of a democracy. The schools must consciously visualize these qualities and consciously and constantly strive to develop them in all pupils. The means for doing this is instruction. Instruction is the function of teachers. In all types of schools or courses, in all grades of all schools, instruction is the means and teachers instruct. It is then through instruction from teachers that the pupil must be made fit for the duties which he must assume as a member of society, an equal of every other member under the law. As demand for this social training is more insistent now than ever before, so now, more than ever before, the school must find ways and means for performing this service. As this can only be done through instruction, the materials of instruction must be consciously and constantly used to this end. The statements which have been made by my associates and included in this report all bear testimony to the fact that the work of our schools is consciously motivated by these ideals and that the work is being vigorously and successfully carried on.

Conclusion

I want to acknowledge again the courtesy and consideration shown to me by all members of the School Committee and to express my appreciation of the loyalty and cooperative spirit of our teachers and principals. These have been the means of a year of success and progress. The end crowns the work.

Respectfully submitted,

Charles S. Clark,

Superintendent of Schools.

REPORT OF THE PRINCIPAL OF THE VOCATIONAL SCHOOL FOR BOYS

Mr. Charles S. Clark Superintendent of Schools Somerville, Mass.

Dear Sir:

I submit the following report for the Department of Manual Arts and for the Vocational Work for the year 1922.

The free-hand drawing of the six grades continues as in past years with instruction by the room teachers under the direct supervision of Miss Gale. This method is the most satisfactory one yet devised and is in vogue throughout the country.

The free-hand drawing in the Junior High Schools is now in charge of a special teacher in each school as in the Senior High School. There is great need of special and additional equipment for the free-hand drawing work in the Junior High Schools, as these schools now seem to be able to accomplish more intensive work than was formerly attained by pupils from the 7th, 8th and 9th grades.

The drawing of the boys of the Junior High Schools covers more ground than heretofore and is more closely related to the hand work. A special room would be of great advantage and would enable us to achieve better results in this work.

The shops of the Junior High Schools need to be more fully equipped in order to provide adequate facilities for the work. Educators are still debating the question as to the advisability of providing a varied number of activities for Junior High Schools. However, our present activities are of a basic nature and therefore are the most important ones for any school to have. In my opinion, if one or two activities are provided, these should be fully and adequately equipped in order to obtain good results.

The Rehabilitation of the Ex-Service men, which was maintained for three years, has been discontinued and the Boys' Vocational School is now devoting its whole effort to

the training of boys in Wood Work, Machine and Auto Mechanics.

The school has been unable to accept all applicants because of lack of room. If the school were enlarged to provide instruction in other trades such as Printing, Electrical Work, and possibly sheet metal and laboratory work in connection with the auto department, much more could be accomplished in trade lines.

REPORT OF THE DIRECTOR OF THE CONTINUATION SCHOOLS AND AMERICANIZATION WORK

January 1, 1923.

Mr. Charles S. Clark
Superintendent of Schools
Somerville, Massachusetts

Dear Mr. Clark:

I herewith submit a report of the Continuation Schools and Americanization classes for the year 1922.

Continuation Schools

The Continuation Schools, opened in September 1920, have completed their second full year and have begun the third with the same organization, equipment and accommodations with which they started. In small schools like ours, which are organized in two general departments, academic and practical, it is a considerable problem to offer a desirable variety of practical activities for the students. In September 1920 the schools offered Household Arts for the girls and Woodworking for the boys. During the past year an intensive course of twelve lessons in Home Nursing was given for all the girls. Arrangements were made with the Somerville Hospital for the use of the instruction room of that institution and the lessons were given by the instructor of Training Nurses.

Some new equipment has been purchased and soon the activities for the boys will include sheet metal work and electric wiring. No increase in the cost of instruction, however, will accrue for the woodworking instructor will carry on this proposed new work.

In woodworking new and more advanced projects have been added to the already large list, without in the least reducing the high standard of workmanship. By this and other means interest and attendance of the youth is held in the various departments.

Our productivity returns to the State Department of Education for the year to June 1922 show a market value of products made in the school of \$745.34. Material accom-

plishment, however, does not show the whole or real value of the school. That is shown by the inspiration and strength given most of the students to see and follow the path of duty as it comes to them in future years. Pupils are guided to positions of better remuneration and opportunity whenever possible, thirteen having been thus aided during the year. An attempt is made to teach them how and why to conduct themselves that they may become better citizens of our city, state and country. We realize that these youths will, some in five and some in seven years, be voters and directors of the policies and actions of this great country of Is it any wonder then, that we are vitally interested in these fourteen to sixteen year old minors, and do what we can to show them the path toward a better and more successful citizenship? Various cases might be cited to show that the teachers, who teach boys and girls rather than subjects, and guide the progress of the employed adolescent youth, are getting at least within sight of the road toward success.

It is important that the students realize that, although they have left the regular schools, their education is not complete, and that they must cultivate the habit of learning and earning at the same time. To accomplish our aims we must do more than simply teach a subject in a classroom, and we solicit and (with few exceptions) receive the hearty cooperation of parents and employers through the medium of follow-up visits to the homes and places of employment. The teacher, sympathetic and desirous of helping the student, becomes a friend and advisor with the result that attendance is improved, interest increased, and discipline made easier. The employer sees that the school can be an asset to him inasmuch as it provides that which will make the work-

er a more industrious and competent citizen.

The country-wide depression in business, which followed the apparent closing of the World War has made itself felt to a considerable degree in the matter of enrollment in these schools. Minors under sixteen must remain in the regular schools unless they are fourteen, have completed the sixth grade and have a written promise of employment. The scarcity of jobs makes it impossible for many of the under-sixteen group to leave the regular schools and fill the places in the Continuation Schools vacated by those who become sixteen and automatically leave our jurisdiction. The number of eligible students, therefore, steadily decreased, reaching its low limit about September 1922. Since that time, however, the employed groups have been very slowly increasing in size, but it has been found that employers are refusing

to employ minors under sixteen because they can now find minors over sixteen who are permitted by law to work nine hours a day, and who will work for the same wages as would be paid to those under sixteen. As business improves, the over-sixteen group will find better opportunities, thus leaving jobs open for those now in the regular schools, which will tend to normalize the enrolment in the Continuation Schools. The enrolment will undoubtedly be substantially increased in case legislation, now pending, concerning the compulsory school and Continuation School ages, and an amendment to the Continuation School tuition bill, is passed.

The following tabular statement of the educational accomplishment of the fourteen to sixteen year old residents in Somerville, employed here or elsewhere, will, without doubt, show the need for a longer compulsory school attendance period for the youth who will in from five to seven years be called on as intelligent citizens to consider the problems of this democracy.

Table Showing Distribution of 14-16 Year Old Holders of Employment Certificates by Grade Completed in Regular Schools

| Grade | Below | | | | | | | | | |
|-----------|-------|---|----|-----|-----|-----|----|----|----|-------|
| Completed | 4 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | Total |
| Girls | . 2 | 2 | 12 | 39 | 69 | 55 | 28 | 6 | 4 | 267 |

| Total | 0 | 6 | 38 | 217 | 159 | 137 | 74 | 16 | 6 | 661 |

Some Pertinent Facts Shown by the Table:

| 39.3% 41.7% 40.7% | of | | Complete Grade VI or less |
|-------------------------|----|--|------------------------------|
| 60.7% 58.3% 59.3% | of | | Complete Grade VII or better |
| | | all employed girls) all employed boys) | Complete Grade VI |
| | | all employed girls) all employed boys) | Complete Grade VII |

Americanization

Four years after the Legislature of Massachusetts discovered the need for teaching the English language to adult foreigners, the term "Americanization" is still rather elastic and has been stretched to cover all sorts of movements and

activities. It still means, however, making good American citizens of both native and foreign-born. It also means service, equal opportunity and the awakening of loyalty of the foreign-born.

Desirous of leading normal lives, they must overcome certain obstacles, the greatest of which are ignorance of our language and ignorance of our laws.

Many people still consider the work of Americanization a war activity, since such an enormous problem of illiteracy was brought to light by the operation of the draft legislation. Such is not the case, for our State for thirty years has compelled the attendance of illiterate minors in Evening Schools for the purpose of learning English, and voluntary classes for illiterate adults have been carried on for over twenty years.

Our city and state are jointly providing means to overcome the obstacles confronting the foreign-born, who readily grasp the opportunity and appreciate the value of the undertaking to themselves as well as to our country.

As evidence of this joint undertaking on the part of the city and state may be cited the twenty-three classes we are now conducting. The membership of 356 includes Italians, Greeks, Swedes, Danes, Portuguese, Germans, Hebrews, Poles, Armenians, Chinese, and others. The ages of the attendants on these classes range from sixteen to sixty years, and the periods of residence in this country vary at date of enrolment from two days to thirty years. Some are well educated in their native tongue while a large majority are illiterate in any language. The locations and numbers of the various racial groups have not changed to any material degree during the year.

The organization, as last year, consists of a Director, two full-time organizers (who also supervise and teach) and twelve teachers. The supervisors, who rank very high among the teachers of the State, have done excellent work in organization and instruction. In addition to the time spent in teaching and supervisory work in their respective districts, many hours during mornings and between classes are used in making visitations to the students in their homes, for the purpose of following up absentees and assisting in solving household and other problems. Confidential problems of all kinds, and entanglements of various sorts concerning Naturalization papers, insurance, money exchange, et cetera are solved by them. An exceptional personality is a necessary requisite in obtaining such excellent results and attaining

the respect, appreciation and affection of the non-English speaking people.

Each year, the Anne Adams Tufts Chapter, D. A. R. offers a \$50 scholarship to the International College at Springfield for a deserving, reliable, and ambitious student of our classes. The ladies of this organization have been greatly interested and have assisted materially in our work. Through their efforts, girls in the Social Service Course of Jackson College have given freely of their services in caring for the children who must accompany the mothers to the afternoon classes. Other cities find it necessary to hire persons for the care of such children.

The appended table shows the scope of Americanization work in operation when the schools were closed for the Christmas recess.

The results of the work in Americanization and the Continuation Schools during the year have been gratifying to me and I wish to express my appreciation to all who have shown interest and have aided in making the work successful.

Very truly yours,

EVERETT W. IRELAND,

Director.

REPORT OF THE PRINCIPAL OF THE EVENING HIGH SCHOOL

Mr. Charles S. Clark Superintendent of Schools Somerville, Massachusetts

Dear Mr. Clark:

The Evening High School has registered seven hundred and sixteen pupils during the fall term of 1922. They vary in age from fourteen to fifty-eight years, the average being twenty years. They range in previous school training from non-graduates of elementary schools to graduates of colleges. They may be grouped as follows:

| | elementary s | | | | | 212 |
|------|---------------|---------|---|--|---|-----|
| | junior high | | | | | 138 |
| | senior high s | schools | | | | 347 |
| From | colleges | | • | | | 19 |
| | | | | | - | |
| | | | | | | 716 |

Attendance in the school is voluntary. All subjects, including English, are elective. The following table gives the number of pupils electing each subject:

| Typewritin | g . | | | | | | | 259 |
|------------|---------|-----|-----|------|------|------|----|-----|
| Shorthand | • | | | | | | | 230 |
| Business | English | | | | | | | 115 |
| General C | ourse | | | | | | .~ | 110 |
| Salesmansh | | | | | | | | 84 |
| Bookkeepir | | | | | | | | 69 |
| Mechanical | Drawin | ıg | | | | | | 51 |
| Algebra . | | • | | | | | | 37 |
| Freehand 1 | Drawing | and | Art | s an | d Cr | afts | | 34 |
| Geometry | | | | | | | | 32 |
| Chemistry | | | | | | | | 28 |

A brief outline of the courses offered is given below. Shorthand and Typewriting. Pupils are graded into beginning, intermediate, advanced and speed classes. Necessary instruction is given in English grammar, spelling, and punctuation. The speed classes, composed largely of professional stenographers, aim for the highest degree of business efficiency.

Business English. This course provides opportunity for a study of spoken and written English as needed in business communications, in advertising and in salesmanship. It correlates closely with the stenography and the salesmanship courses.

General Course. English, arithmetic, and penmanship are

the principal subjects. In addition, each pupil has a choice of civics, United States history, or debating. Preparation is given in this course for civil service examinations. The classes include many persons of mature age who see the need for review or further study of the fundamentals of education. Salesmanship. A study of the general principles and ethics of selling goods. Class discussions and practice sales tend to develop self-confidence. Talks by practical salesmen and the free use of books and magazine articles on commercial subjects are features of the course.

Bookkeeping. Arithmetic and penmanship are studied with the bookkeeping. Pupils are fitted for office positions and clerical work and prepared for the further study of accoun-

tancy in other institutions.

Mechanical Drawing. The beginning class is taught the use of instruments, geometry, projection, inking and blue printing. In the advanced class instruction is given in machine and architectural drawing and in special work as desired by pupils.

Freehand Drawing. This subject includes work in fine and practical arts. Individual instruction is given in designing for fabrics, costumes, posters, and wall papers and in craft

work in metal, leather, and basketry.

Chemistry. This is a practical course for prospective druggists and nurses and for persons interested in industries such as the manufacture of soap, rubber goods, drugs and paper. It teaches the composition of substances, their combinations and reactions.

A questionnaire recently submitted to the pupils required an-

swers to the following two questions:

I. What benefit, financial or otherwise, do you expect to obtain from attending the Somerville Evening High School?

II. If your attendance here has already been of value to you, state in what way.

A summary of replies received may be of interest.

First question, benefits expected

Better positions. Factory and bundle girls wish to become clerks and typists. Sales and filing clerks want general office or shorthand positions. One boy writes, "I am an office boy and was offered a higher position if I learned bookkeeping."

Advancement in present positions. Pupils hope to increase their economic efficiency through a more confident use of English, through greater speed and accuracy in mathematics and through a better knowledge of the theory and underlying principles of their work.

Improvement in general education. One writes, "I know that any knowledge will help me wherever I may be." Another writes, "I expect broadening of mind."

Assistance in preparation for higher institutions, as Tiffs

College, Northeastern College, Lowell Institute.

Preparation for Civil Service Examinations, federal, state. and municipal.

Second question, benefits already obtained

Advancement and new positions. One young woman states that she secured her present position at the State House through her training at the Somerville Evening High School. Wage increases and more desirable employment are mentioned by others.

Increased working ability. Pupils write of making daily use of their evening school training in their occupations. claim a better understanding of their duties. One writes,

"I have been taught to take an interest in my work."

General Education extended. "I have proved to myself that I can get an education and training for business at the same time." "It (the school) has given me a higher standing among people." "I have learned to talk when I have an idea so that I can be easily understood." "I think my attendance here is time well spent; it brightens up my English and my pronunciation." A desire for knowledge has been developed. One class has studied the history and civil government of Somerville and shown great interest in these subjects.

Graduation and Diplomas

The commercial value of a diploma is recognized by the pupils. There is also a sentimental value which appeals particularly to those who were obliged to leave the day high school before graduation. Members of the evening school senior class find pleasure and social profit in their class activities. About sixty pupils will graduate in March, 1923.

Membership and Attendance

Many who register drop from membership after a few days or weeks. The reasons so far as they are known include late working hours, fatigue, ill health, and the pressure of social engagements. Doubtless, also there is the faint heart, the lack of determination to follow the undertaking through. On the other hand, it is encouraging to note that of seven hundred and sixteen registrants about four hundred and fifty earnest pupils are now enrolled and, if we may believe the evidence of the questionnaire, are making substantial progress in their work.

The Teachers

Many factors contribute to the making of the successful evening school teacher. There should be the professional training of the day school teacher. There should be also the personality, the tact, the interest in the individual pupil sufficient to insure his continued voluntary attendance. On the teachers rests in a large degree the responsibility for maintaining the membership and interest of their respective groups of pupils, and to them should be given the credit for success. The principal desires here to record his appreciation of the good results due to the ability, experience, and faithful service of the teachers in the Evening High School.

Respectfully submitted,

EVERETT W. TUTTLE,

Principal.

January, 1923.

REPORT OF THE DIRECTOR OF HOUSEHOLD ARTS

Mr. Charles S. Clark Superintendent of Schools Somerville, Mass.

Dear Sir:

Following is a summary of the development of Household Arts instruction, showing its growth since it was inaugurated ten years ago.

Household Arts in the High School

THE 50-50 PLAN OF ORGANIZATION AUTHORIZED by the STATE BOARD FOR VOCATIONAL EDUCATION

This course offers sufficient variety of subject matter to make a wide choice. The number electing this course has grown steadily since it was established three years ago; twice as many enrolled this year as last, and with definite ideas as to what training to select after graduation.

The course of study is so planned that half of the school day is given to the regular subjects required each year in the general high school course, and the other half to household arts and the related studies. The major subjects are cooking, household management, nursing, dressmaking, and millinery.

A part of this household arts education is the close correlation made between the school and the home in the form of projects. These projects are planned after visits to the homes, and conferences with the mothers as to what each girl needs to gain initiative and responsibility in caring for her home. Most of the problems are definitely related to the individual. In one case the mother works in town and the daughter does all the housework and cooking, so projects of planning meals, buying supplies, and the care of the house, were given this girl for a certain time until a satisfactory report should be made by the mother. In another case the mother is an invalid and much of the care falls upon the daughter, so projects in the care of a sick person are given as well as projects in the preparation of meals. When interest in mending needs to be encouraged projects are given in that for a limited time. In all cases reports are made by the mother to the director by means of report cards and home visits.

This project work covers approximately 200 hours a year, and as there are no home studies it is the equivalent of the time used by students in other courses for home study, and is credited to each girl, who must complete each year 1400 hours of school and project time. Until a visit is made to the home, there are certain projects that are general for all girls. They include the preparation of foods, the care of household linens, the repair of clothing, the care of house equipment, the making of dresses or hats for some member of the family, the making of underwear, personal expense accounts, and preserving.

Through the interest of a member of the School Committee arrangements were made last year with the trustees of the Somcrville Hospital to hold classes in home nursing at the hospital. These classes were held once a week for three months, the nurse in charge of the training class there giving the lessons to the different school groups. The lessons were of the most practical kind, dealing with the care of the patient in the home, and covering the twelve parts of the modified Red Cross course; the cause and prevention of disease, personal hygiene, equipment of a sick room, care of bed and bedding, bed-making with and without the patient,

baths of different kinds, utensils and methods used in a sick room, hot and cold appliances, child care, emergencies, and first aid. In three cases where there was illness the lessons were put to immediate use at home. Great enthusiasm was shown by all the girls for this course, and by some of their mothers as well, who were interested enough to send in questions, and one even volunteered to take her baby for the demonstration of bathing the baby.

New courses have been added this year for the senior class, one in the study of occupations open to the high school graduate. This is a short course covering half a year and deals with the types of employment, the preparation, skill, and knowledge needed by each, and the qualifications necessary for each type. The questions of unemployment, seasonal occupations, and "blind alley jobs" are also studied. We feel this to be an important study for pupils who are to earn their living and who take ignorantly anything that offers without knowing what the demands of a position are or whether they are fitted for it especially.

Another half-year course is the study and care of clothing. This covers the following points: the making of personal expense accounts, personal clothing budgets, study of textile fabrics from the standpoint of the individual ward-robe in renovating garments, how to purchase clothing, renovating and remodelling clothing, and care and repair of clothing. The making of a clothing budget is the basis for

this study.

Closely related to this is the course in household accounts which deals with the family budget and the planning and furnishing of a home, with emphasis on the costs and the appropriate selection of furniture and furnishings. The girls have little or no knowledge of the family finances, so a teaching base is made from data collected of the actual experiences of families in the seven problems that are studied.

These problems are:

The school girl's account book which is kept daily by each pupil.

A personal account kept by those girls who are earning money outside of school hours, and a simple budget planned on these experiences.

A budget of time for girls working at home after school hours.

A budget of household expenses for the girl in charge of the home.

The problem of the young couple who before marriage are working and who are keeping an individual expense

account in order to save a certain amount to begin house-keeping.

Problem of what can be bought with these savings. Problem of housekeeping budget after marriage.

Graduates from the Household Arts Course have various opportunities for employment and an idea of what higher institutions offer in the way of advanced training. The classes are small and one learns to know the girls intimately so that it is possible to advise and suggest what is the best course to follow after graduation. Catalogues of different training schools are studied. Some schools recognize the Household Arts Course in a high school and give credit for time spent on this vocational work.

There are innumerable positions for the graduates as dressmakers' assistants. There are opportunities for girls working into business for themselves; also by keeping the trade contact, and with professional improvement, taking positions as instructors of vocational subjects in evening schools, where there are more positions offered than applicants to

fill them.

Although millinery is seasonal, opportunities are many in first class shops if a girl is willing to begin at the bottom

and work to gain speed.

Tea rooms offer positions as waitresses, where hours are short, pay excellent, and the conditions good; but except for a few there is no advancement. They offer excellent training for girls who wish to open their own tea rooms, where there is little expense but much profit.

The study and preparation of foods helps in positions resulting from hospital training and public health nursing. Eramingham is also offering a special course for training

teachers for vocational subjects.

Household Arts as an Elective in the High School

The number selecting dressmaking this year is about the same as last year—170. One important change has been made by the elimination of cotton dresses from the Sophomore year, and the substitution of the making of woolen dresses, except in cases where pupils have not had two years of dressmaking in the junior high schools. This means that advanced work can be done, and the waste of repetition removed as far as possible.

Last year the approximate cost of all material used in the elective course was \$1805.12 and the estimated market value of the garments \$3895.00. Following is a list of the garments made: 96 voile and organdy dresses including 40 graduation dresses; 98 gingham dresses; 46 serge dresses; 32 silk dresses; 29 separate skirts, wool and satin; 3 polo coats, 24 separate blouses, including voile and satin; 10 coat suits including 3 linen and 1 velvet; 3 velvet dresses.

Sixty have elected cooking this year. The class work is planned as last year, the pupils preparing the food served

at lunch time to the teachers.

Household Arts in the Junior High Schools

Sewing is taught in the first year, continuing progressively from the graded schools, and in the second and third years cotton dresses are made. If dressmaking is elected the third year, woolen dresses are made when entering the High School, otherwise a cotton dress must be completed first.

Each junior high school had a most creditable fashion show last year when the pupils exhibited the dresses they had made by wearing them to a meeting of the Parents' Associa-

tion.

Preparing a lunch for the teachers supplies a practical outlet for lessons in cooking. The food is prepared and cooked by the different classes, served to teachers, and when conditions permit, to pupils. While it is felt that this meal preparation is the best way to teach cooking because it is of immediate benefit to girls who are obliged to prepare meals at home without any assistance, it has its disadvantages when first and third year pupils are in the same class, and where advanced pupils who ought to have the experience of preparing lunch, are sometimes obliged to have lessons after lunch when there is nothing but the cleaning to be done.

At the Western Junior High School a lunch room was opened two years ago for the pupils, in charge of a competent woman, where hot food at a low price could be purchased. The extra food prepared by the regular cooking classes is also served here, and it is hoped that when the new lunch room is properly equipped for cooking, a greater variety of foods can be served, and a greater number accom-

modated.

Household Arts in the Graded Schools

The teachers remain the same for the sewing classes, except for one part-time teacher who takes the place of a teacher regularly appointed to another position.

The course of study has not been changed, but again emphasis has been placed on the proper implements to use in sewing, and the correct position for sewing and for light, rather than the completion of a definite number of articles. The required articles made in the 5th grade are a sewing bag, needle book, and pincushion, with an optional list which the teachers may use at their discretion.

In the 6th grade a cooking apron, uniform in style for all schools, is made, the material and ornamentation varying to suit individual preferences. Other sewing is optional when this has been completed. The aprons are used through the junior high schools where caps are made in the special style adopted by that school. The course of sewing develops through grades, junior high school, and senior high school, and covers the best processes of sewing accepted by the best training schools.

Household Arts in Evening Schools

The registration for dressmaking and millinery classes this year exceeded the accommodations or the number of available teachers. Those registering at the High School numbered 130 when 100 could be accommodated; those at the Western Junior High School 71 with an accommodation for 60. Waiting lists were formed at both schools, and the classes were filled in from these as pupils dropped out.

The classes are organized on the "unit" system, each unit of twenty lessons being complete in itself, and yet so arranged that the complete instruction in either dressmaking or millinery covers two years. These short units have been arranged because evening school attendance through the whole winter has not always been possible with the homemaker who is often absent because of illness, church, and social engagements. This lack of attendance because of outside interests is the biggest problem of evening schools, for when a social engagement conflicts with school, the school suffers, and it is difficult to keep the attendance above 85%. Last year the attendance for the eight classes was \$1.3%.

Even with this irregularity of attendance there has always been the greatest interest shown by those in the evening classes, and appreciation of all that the teachers have given in the way of instruction. The standard of workmanship is as high as any in the State-aided evening schools. Last year 350 hats were finished at a cost of \$1508.08 and a market valuation of \$5789.50.

There were three dressmaking classes where 94 dresses were made at a cost of \$532.88 and a valuation of \$1751.75. Besides these there were a number of dresses and hats not brought in for examination, the pupils dropping out of the course as soon as they had completed one article.

For the most part the working conditions are good. The rooms are large and well lighted, and tables take the place of school desks.

This year the first unit offered was the making of a woolen dress instead of a cotton one, as cotton dresses are so simply made with a good pattern and instruction guide, and it was felt that the interest would be held better by offering instruction on woolen materials. The second unit offers instruction in sport clothes, and the third and fourth units remain the same as last year.

In the first unit of millinery, construction and processes of making were considered in making small model hats of buckram. We tried to have the essential thing the millinery principles that could be applied to all kinds of hats, rather than the making of many hats. In all classes a regular order of progressive steps has been carried on; the selection of hats to suit the individual, the construction of a frame, the stitches used for different parts, the making of ornaments and flowers, and the completion of two hats for application.

High School Lunch Room

In the management of the lunch room the aim has always been to have wholesome food prepared in our own kitchens and sold at a reasonable price. This year it was found possible to lower the selling price in spite of the fact that all overhead expenses except for gas and electricity are covered in the selling price of food. These include the salaries paid manager, helpers and pupils, new equipment necessary each year, and the maintenance cost of paper towels and napkins, lunch checks, and kitchen supplies.

The menu offers a variety each day. There are served three kinds of sandwiches, two to three hot dishes, two desserts, besides ice cream, individual bottles of milk, and choco-

late bars.

There is no way of estimating the number of pupils served a day; but an average would be between 700 and 800 with considerably more on stormy days. As we have an open recess it is encouraging to see how many use the lunch room.

In the teachers' lunch room sixty are served a day in two periods. The food is prepared in the morning preceding the lunch period by the pupils electing this course.

For the year closing last June the receipts were \$7725.70

for the two lunch rooms, and the expenses \$7723.11.

It is hoped that before another year the large lunch room

can be made more attractive by having the walls whitened, and the dangers resulting from a wet concrete floor eliminated.

In submitting my report I should like to add that the activities in all these departments are being carried out successfully, owing to the interest of the pupils and the ready cooperation of the teachers.

Very truly yours, MARY HENLEIGH BROWN,

Director.

December, 1922.

The meetings held under the auspices of this association in the year 1922 were as follows:

February 8, 1922—Dr. Teyhi Hsieh, representative from the Arms Conference. Subject: "The Spirit of New China and Her Aspirations at Washington." Musical program by Apollo Quartette.

April 20, 1922-Informal Social. Entertainment by the MacDowell Quartette, assisted by Mrs. Bailey Hicks, Reader.

November 21, 1922—Donald B. MacMillan, Lecturer. Unknown Baffin Land," illustrated by moving pictures.

SOMERVILLE TEACHERS' CLUB

Officers, 1922-1923

President, Miss Clara G. Hegan
Vice-Presidents, Mrs. Mary B. Soule
Miss Harriet E. Tuell
Recording Secretary, Miss Irene Vincent
Corresponding Secretary, Miss Bernice Newborg
Treasurer, Mrs. Bertha M. Morton
Auditor, Miss Mary H. Joyce

Object

The object shall be to secure a close union among the women teachers in Somerville; to promote the spirit of mutual helpfulness; to advance professional interests; to create a deeper sense of the dignity of the profession; to unite the interests of the home and school.

Program

January 9-Operalogue "Lohengrin." Mr. Havrah Hubbard.

January 18—Open Meeting. Lecture by David Vaughan, D. D. Music, Madame Florence Ferrell, Soprano.

January 23—Operalogue "Monna Vanna." Mr. Havrah Hubbard. February 15—Club Dramatics.

March 15—Open Meeting—Lecture "100% Man." Mr. 'Γ. Franklin Babb.

May 10-Annual Meeting. Speaker, Margaret Slattery.

October 11—Dramatics. Social Evening.

November 8—Illustrated Lecture "South America." Albert Leonard Squier.

December 8, 9-Christmas Market.

GEORGE E. PEARSON,

Treasurer.

CONSTITUTION AND BY-LAWS

of the

SOMERVILLE TEACHERS' COUNCIL

1922

Article I

Name

The Organization shall be called the Somerville Teachers' Council.

Article II

Purpose

To provide a means of recording the expression of opinion of teachers on problems affecting the schools, the children, and the teachers.

To furnish information and opinions of the teaching staff upon questions submitted by the School Board, the Superintendent of Schools, or initiated by the Council.

For the introduction of recommendations concerning any of the problems affecting the welfare of the schools.

To establish and expedite means of communication between the teaching body, the Superintendent of Schools, and the School Board.

To secure a more active participation of the teachers in the professional direction of the schools.

To foster a spirit of dignity and responsibility in the teaching staff by employing its experience and judgment in school affairs.

Article III

The Council shall be allowed absolute freedom in its debates and deliberations.

Article IV

The organization of the Council as set forth in this constitution shall be sanctioned by the Superintendent of Schools and the School Board.

Article V

The Superintendent of Schools may attend the meetings of the Council.

Article VI

All recommendations or communications from the Council to the School Board shall be presented to the Board through the Secretary of that Board.

Article VII

The membership of the Council shall consist of ten representatives:

- 1 from the Senior High School
 1 " " Junior High School
 1 " " Vocational Schools
 1 " " Kindergarten School
 (First Grade
 1 " " (Second Grade
 - (Third Grade (Fourth Grade
- 1 " (Fifth Grade (Sixth Grade
- 1 " Continuation School and Americanization
- 1 " Supervisors and Special Teachers
- 1 " " All Masters and Supervising Principals
- 1 " Masters' Assistants

Article VIII

Each group shall elect its own representative to the Council. No teacher shall be eligible for election as representative in more than one group.

Any group may recall its representative by a majority

vote of that group.

Article IX

Representatives shall keep in touch with their groups and when instructed must always voice the wishes of their groups.

Article X

The running expenses of the Teachers' Council shall be met by an annual assessment of ten cents (10c) per capita upon each Somerville teacher. The representative from each group shall be responsible for collecting the assessments and paying them to the Treasurer of the Council on or before October first of each record year.

Article XI

The official and financial year shall begin September first.

Article XII

Section I—Nominations

Yearly the Chairman of the Council shall call within the second week of May a meeting of each group according to Article VII for the purpose of nominating the members of the Council. Each group shall choose a Chairman and a Secretary, and shall nominate by ballot twice the number of nominees to be voted on. Candidates receiving the highest number of votes shall be the nominees.

Section II—Preparation of the Ballot

Immediately after the meeting noted in Section I or within two days thereafter, the different chairmen and secretaries noted in Section I shall meet and prepare a ballot of the nominees, stating on each ballot how many are to be elected and shall send a sufficient number of ballots to each Principal and Special Teacher. They shall send their own names to the Chairman of the Council, with a list of the nominees.

Section III--Election

The Chairman of the Council during the fourth week of May shall call meetings of the teachers for the purpose of electing Members of the Council.

Section IV

The chairmen and secretaries noted in Section I are by virtue of their office tellers, to collect and count all the ballots, and to send the ballots and results to the Chairman of the Council, certifying to him the names of those elected and the number of votes for each candidate.

Section V

The candidates receiving the largest number of votes shall be elected.

Article XIII Term of Office

The term of office of the Members of the Council shall be for two years. No member of the Council shall serve for more than two consecutive terms.

Article XIV Meetings

The regular meeting shall be held once every school month at such time and place as the Council shall direct. Special meetings may be called by the Chairman on a written request of six members or by the Superintendent of Schools.

An abstract of the minutes of each meeting of the Council shall be prepared under the direction of the Secretary of the Council and a copy shall be mailed to each member of the Council to be circulated among the teachers of each group.

$egin{array}{ll} ext{Article XV} \ ext{\it Quorum} \end{array}$

At any meeting of the Council six members shall constitute a quorum for the transaction of business.

Article XVI Vacancies

Vacancies in the Council occurring on account of death, recall, resignation, or by reason of promotion or transfer to another group, shall be filled by members of the groups in which the vacancies occur.

Article XVII Officers

The officers of the Council shall be a chairman, a vice-chairman, a secretary, and a treasurer, elected from its own members.

Article XVIII Standing Committees

The standing Committees of the Council shall be:

- 1. Committee on Educational Progress
- 2. Committee on Legislation

Article XIX

Executive Committee

The Executive Committee shall consist of the Officers of the Council and chairmen of the Standing Committees.

Article XX

This constitution may be amended after a written notice of ten days has been given, by a two-thirds vote of the entire teaching body.

LAYING OF THE CORNER STONE OF THE NEW JUNIOR HIGH SCHOOL ON MARSHALL STREET, NOVEMBER 21, 1922

Ceremonies in connection with the laying of the corner stone of the new junior high school building on Marshall street were conducted on the afternoon of Tuesday, November 21, 1922, His Honor, Mayor John M. Webster, presiding. Short addresses were made by John M. Webster, Mayor of Somerville, by Enoch B. Robertson, President of the Board of Aldermen, and by Dr. Herbert Cholerton, Chairman of the School Committee. Oscar W. Codding, Chairman of the Committee on School Accommodations, read a record of the School Committee taken from the meeting of January 31, 1921, recommending the construction of a large building to accommodate the junior high schools known as the Northern Junior High School and the Eastern Junior High School. Music was furnished by a chorus of singers from the Northern Junior High School under the leadership of Miss Anna R.

Walsh. The following-named school records were deposited in the box which was enclosed in the corner stone.

1921

Constitution of the Somerville Teachers' Council

Speech of the Chairman of the School Committee on the occasion of the laying of the corner stone.

In presenting these records of the School Committee, to be preserved in the corner stone, the Chairman, Dr. Cholerton, spoke as follows:
Mr. Mayor:

Under the Charter of the City of Somerville the Mayor and the Board of Aldermen are responsible for the erection and care of schoolhouses and for furnishing money for the support of public education. The School Committee is responsible for the conduct of public education and for the use of the means placed at its disposal by coordinate branches of the City Government. It is the duty of the School Committee to carry on its work with the utmost regard for the interests and the development of the children of the city. It must maintain efficiently its educational undertakings and it must see that those undertakings are adequate and in keeping with the spirit and needs of the times. the discharge of this duty the School Committee must give up any practice whose usefulness has been outlived and must adopt new procedures when such are demanded by the changes and advances of contemporaneous affairs.

The duties and responsibilities, then, of the branches of the City Government here represented are correlative and supplementary. Today's ceremony is significant of the harmonious action of the several branches of the City Government in the discharge of a public duty. The building whose corner stone we lay this afternoon is a monument to the devotion of this city to the cause of public education. It is expressive of a new vision, a new determination, to fit the youth of the city for the assumption of the powers and responsibilities which will devolve upon them when their time shall come to maintain the edifice of a democracy. It is ap-

propriate that this splendid provision for the education of the youth of the pre-adolescent age should be made in the neighborhood where this type of educational work was first begun.

In 1914 under the name of intermediate school this organization of instruction was established in the Forster School. Two years later it was definitely adopted by the School Committee as the policy to be followed throughout the city as soon as ways and means could be provided therefor. was at that time decided to provide four schools to be known as Junior High Schools, one for each of the major geographical divisions of the city. In September 1916 the Northern Junior High School was established in the Forster and Folsom buildings, a continuation of the For-Intermediate school, and the Eastern Junior High opened in the Prescott and Southworth houses. In September 1917 the Western Junior High School was opened in the new building on Holland Street, the first schoolhouse in Somerville planned and provided for this special purpose, and in September 1918 the Southern Junior High School was opened in the Bell Schoolhouse which had been enlarged by an addition provided for use as a Junior These provisions were recognized as begin-High School. nings only of an undertaking which would require subsequent additions of a nature and size to meet the needs of its proper development. Nearly three years later on January 31, 1921 the School Committee adopted the following resolution which was presented by Oscar W. Codding, Chairman of the Standing Committee on School Accommodations.

"That in its judgment suitable additions should be made to the Western and Southern Junior High School buildings, each to include an auditorium, gymnasium, and swimming pool; and, further, that a new junior high school building, to provide for the needs of the district now cared for by the Northern and Eastern junior high schools should be erected at a point accessible to both the districts, thus releasing for elementary purposes the present buildings in the Northern and Eastern districts used for junior high school purposes. In the opinion of the Committee, Broadway Park would make an admirable location for the proposed new building. The Committee further recommends that the Public Property Committee of the Board of Aldermen be invited to arrange a conference with the Committee on School Accommodations of this Board"

This recommendation was supported in substance by the Board of Aldermen in accepting on June 9, 1921 the report submitted by Aldermen Almon F. Heald, Chairman of the Committee on Public Property, and later adopting an order of the same tenor.

Now Mr. Mayor, through your initiative, supported and made effective by the Board of Aldermen, this schoolhouse, imposing in size and architecture, adapted to the use to which it is to be put, modern in all of its parts and conspicuous for the extent to which it shows consideration for practical utility and practical economy in connection therewith, has been provided. It will give a maximum of service. It will be an ornament and an honor to this city. For years to come it will be a great public instrumentality devoted to preparing youth for the struggles of life.

Mr. Mayor, on behalf of the School Committee, on behalf of the citizens of Somerville whose representatives we all are, and on behalf of the countless children whose education will be received in part in this spacious and beautiful building, and whose interests are to us all alike dear and sacred, I express profound satisfaction and gratitude in this ceremony which witnesses the will of the city acting through its responsible agents in the promotion of a public enterprise

of the greatest importance.

And now Mr. Mayor, as a further participation of the School Committee in these ceremonies I hand to you these documents, to be placed among the records which will be preserved in the corner stone of this building through the limitless years while it shall endure.

^{*} School year.

Cost of the Schools

The total amount spent for the maintenance of the schools of Somerville for the school year ending June 30, 1922, is \$889,876.76.

This includes the sums spent for care of school buildings, including janitors' services, fuel, light, and school telephones; the amount paid for salaries of officers, and the amount spent for school supplies; and the sum paid for salaries of teachers.

The expenditure for care for school buildings is wholly in charge of the City Government.

| (Tuition, etc.) | 4,748.04 | 2,354.58 | 2,207.91 | 136.10 | 8.00 | 41.45 | |
| Total | \$55,834.48 | \$20,109.94 | \$18,321.52 | \$800.85 | \$50.80 | \$425.15 | |

The third, and by far the largest, element of the cost of schools is the sum spent for the *salaries* of *teachers*. This expenditure is under the control of the School Committee.

The following statement shows the distribution of the sums paid for salaries:—

| | | DAY S | CHOOLS. | EVENING | CONTINUATION SCHOOLS AND | | |
|---------------------------------------|--|---------------------------------------|---------------------------------------|------------------------|-----------------------------|-----------------------------------|--|
| Expenditures. | Total. | High and Vocational | Elementary | High and Vocational | Elementary | AMERICANIZA- TION WORK | |
| Supervisors Principals Teachers | \$11,523.00 53,305.00 669,924.79 | \$2,003.46 13,325.00 208,997.57 | \$8,944.54 35,364.00 443,391.47 | \$892.00 6,058.75 | \$924.00 987.00 | \$575.00 2,800.00 10,490.00 | |
| Total | \$734,752.79 | \$224,326.03 | \$487,700.01 | \$6,950.75 | \$1,911.00 | \$ 13,865.00 | |

The total outlay for all school purposes includes all of the preceding and the sums spent for schoolhouse repairs and new buildings.

The total outlay for the school year ending June 30, 1922, is as follows:—

| Care | \$99,289 49 |
|-------------------------------|--------------|
| Contingent | ' ' |
| Salaries | · . |
| Total for school maintenance | \$889,876 76 |
| Paid for repairs | 36,628 82 |
| Paid for new buildings | |
| Total for all school purposes | \$934,081 44 |

Each dollar of the sum spent for the support of schools has been divided in the following proportion:—

| SALARIES | | Domestlo and Supp | Typewriter Supplies Gradua- | |

| | | | | | | |
| Total | \$1,000 | \$1,000 | \$1,000 | \$1,000 | \$1,000 | \$1,000 |

Per Capita Cost. The proper method of comparison of the cost of schools year by year is to consider the sum spent for each pupil in the average membership. In this computation we exclude the cost of evening schools, and the vocational schools. The following shows:—

2 1 200 1 2 11

| | ools. | Change | +1.16 -3.06 | \$59.97 - \$2.0 |
|--|----------------------|--------|---------------------------------------|-----------------|
| 922 | All Day Schools. | 1922. | \$50.62 2.73 6.62 | \$59.97 |
| AND 1 | All | 1921. | \$50.73 1.63 9.62 | \$61.98 |
| 1921 | nools. | Change | + + + 0.83 - - 2.73 | \$49.86 —\$1.76 |
| FOR | Elementary Schools. | 1922. | \$41.84 1.67 6.35 | \$49.86 |
| IOOLS | Elemen | 1921. | \$41.70 .84 9.08 | \$51.62 |
| Y SCF | nools. | Change | | -\$2.04 |
| OF DA | Junior High Schools. | 1922. | \$61.29 3.08 6.12 | \$70.49 |
| COST | Junior | 1921: | \$61.47 2.09 8.97 | \$72.53 |
| THE PER CAPITA COST OF DAY SCHOOLS FOR 1921 AND 1922 | 01. | Change | +2:11 -4:85 | \$88.95 -\$7.07 |
| ER CA | High School | 1922. | \$72.87 6.97 9.11 | \$88.95 |
| HE P | Hi | 1921. | \$77.20 4.86 13.96 | \$96.02 |
| _ | | | Instruction Supplies Care | Total |

Including the cost of maintenance of evening schools, the per capita cost is as follows:—

| | 1918 | 1919 | 1920 | 1921 | 1922 |
|---------------------|---------|---------|---------|---------|---------|
| Cost of Instruction | \$29 58 | \$31 82 | \$44 34 | \$50 07 | \$50 90 |
| Cost of Supplies | 2 40 | 2 45 | 2 80 | 1 60 | 2 77 |
| Cost of Care | 6 09 | 6 43 | 7 45 | 9 62 | 6 73 |
| | | | | | |
| Total | \$38 07 | \$40 70 | \$54 59 | \$61 29 | \$60 40 |

An examination of these tables shows that we have paid \$4.33 less for the instruction of each pupil in the High School than in 1921, and \$2.11 more per pupil for supplies.

The elementary schools have cost 14 cents more per pupil for instruction, and 83 cents more for supplies.

The amount spent for the school year 1922 was \$10.09, or 3 cents less than was spent in 1921. The amount yielded for each child in the average membership of the schools for 1922, not including the vocational schools, was \$60.40.

Teachers' Salaries

The salaries paid to teachers in January, 1923, are as follows:—

| | man | \$4,100 3,300 | 1 man, 3 women 25 women | \$1,700 1,650 |
|----|--------------|------------------|----------------------------|------------------|
| T | man | -, | | , |
| 4 | men | 3,100 | 2 men, 16 women | 1,600 |
| 7 | men, 1 woman | 3,000 | 1 woman | 1,575 |
| 1 | man | 2,900 | *1 man, 4 women | 1,550 |

REPORT OF THE COMMISSIONER OF ELECTRIC LINES AND LIGHTS.

Somerville, Mass., January 1, 1923.

To the Honorable, the Mayor and the Board of Aldermen of the City of Somerville.

Gentlemen: -

I most respectfully submit my fourteenth annual report as Commissioner of Electric Lines and Lights for the year ending December 31, 1922.

Inspection of Wiring in Buildings.

This year has been the busiest in the history of this department as the number of installations of electric work and inspections of the same have greatly increased over any previous year.

The large number of old houses and the increased number of new buildings which have been wired for light and power has made the past year one of unusual activity.

A thorough inspection of all new work has been made

and the work as a whole shows improvement.

The inspection of old installations which should be followed up more closely has been neglected to a certain extent owing to lack of time and assistance.

A number of old installations have been found defective and have been repaired or re-wired to conform to present day

requirements.

No doubt there are a great many old buildings where the wiring is not up to the standard and should be overhauled.

Considerable of this unapproved wiring has been found put in by unauthorized persons and notifications have been sent to the owners of the premises to have same removed, which has been done in most cases.

Appliances of all kinds both approved and unapproved appear on the market from time to time and are bought and attached to house wiring by the consumer without any thought as to the danger resulting from the use of such de-

vices. Not only is the building wiring overloaded but the protective fuses are often changed from the original ones to those of larger capacity, and which endangers the entire installation.

Flat irons, washing machines, stoves and heaters should be run on separate circuits and not attached to lighting fixtures.

| Number of notifications of new work | 2400 |
|---|------|
| Number of inspections of new work | 3458 |
| Number of re-inspections of new work | 227 |
| Number of inspections of old work | 50 |
| Number of defective installations of old work | 8 |
| Number of defective installations remedied | 7 |
| Number of re-inspections of old work | 10 |
| | |
| Total number of inspections | 3745 |
| Number of permits issued to the Edison Electric | |
| Illuminating Co. for installing meters, lamps, | |
| etc | 3742 |
| Number of permits issued to the Malden Electric | |
| Co | 1 |

Fire Alarm System.

The Fire Alarm System is in excellent condition. Owing to the absence of heavy ice storms like those of last year the overhead wires of the system have suffered very little damage.

Most of the old storage batteries have been replaced by new and the balance will be changed this year.

278 bell alarms have been received and transmitted during the year.

678 telephone calls for fire were received and fire department sent.

5 A. D. T. alarms were received and transmitted. The central office equipment consists of the following:

2 — 6 circuit operating boards.
1 — 5 circuit tapper board.
2 — 16 circuit storage battery charging boards.
1 — 32 circuit protector board.
1 — 12 circuit automatic repeater.
1 — dial, 4 number manual transmitter.
2 — 5 circuit punching registers.
13 punching registers and take up reels.
2 automatic time and date stamps.
1 master clock.
940 cells storage battery.
5 — 10 foot, 4-shelf battery racks.
4 metropolitan tappers and 2 gongs.

The apparatus outside the central office consists of the following:

131 signal boxes.

7 tower strikers.

45 gongs.

10 punching registers.

20 Tappers.

1 automatic steam whistle.

8 private telephones.

About 60 miles of overhead wires. About 78 miles of underground wires.

2800 feet of new overhead wire has been rum and 2386 feet of underground cable was installed in Cross Street.

Police Signal System.

The Police Signal System which was installed 10 years ago begins to show signs of wear and some of the apparatus will have to be replaced. Very little trouble has been found with signal boxes and service has not often been interrupted.

The system consists of the following:

1-4 circuit police desk.

59 street signal boxes.

4 special boxes.

About 191/2 miles of overhead wires.

About 13 miles of underground wires.

Supervision of Poles and Wires on the Streets.

The same attention has been given to the condition of poles and wires on the streets as in previous years. A number of defective poles have been replaced by companies owning same.

New poles have been placed in locations granted for the purpose of applying lighting and telephone service and abandoned poles have been removed.

| | New poles | Re- placed | Re- moved | Re- set |
|--------------------------------------|--------------|---------------|--------------|------------|
| New England Telephone & Telegraph | | | | |
| Company | 6 | 21 | 1 | 6 |
| Edison Electric Illuminating Company | 56 | 56 | 13 | |
| Boston Elevated Railway Company . | | 21 | | |
| Postal Telegraph Company | | 1 | | |
| Permits given to the New England | | | | |
| Tel. & Tel. Co., for attachments | | | | |
| to the Edison Company's poles | 310 | | | |
| Permits given to the Edison Electric | | | | |
| Ill. Co. for attachments to the New | | | | |
| England Tel. & Tel. Company's | | | | |
| poles | 89 | | | |

Street Lighting.

The matter of street lighting has had the same attention as in previous years and additional lights have been placed in various parts of the City.

More lights are required in the western part of the city as some new streets are inadequately lighted.

Additional spot lights have been installed at places where traffic officers are posted and are of great assistance to them.

The new "white way" system of lights has been installed in Union Square and vicinity.

The number of Street lights January 1, 1923 are as follows:

152 Magnetite lights. 380 — 600 C. P. lights. 128 — 125 C. P. lights. 946 — 60 C. P. lights.

Recommendation.

I respectfully recommend that an assistant inspector be employed to enable the department to more thoroughly cover all new and old installations of electrical wiring in the City. This is imperative as the work cannot be done by one man.

Conclusion.

I wish to thank His Honor, the Mayor, the members of the Board of Aldermen and the several departments for the many courtesies received.

Respectfully yours,

WALTER I. FULLER,

Commissioner of Electric Lines and Lights.

REPORT OF THE LICENSE COMMISSION.

To His Honor the Mayor

Dear Sir: -

The License Commission respectfully begs leave to submit the following report to you and the people of our city of its engagements and activities during the year 1922. Nearly three years of close contact with the licensees of our city have brought to the members of the Commission a personal knowledge of our applicants and their locations.

As a result of the vote at the last municipal election, all licenses, except Lord's Day and Licenses to sell Firearms reverted to the Board of Aldermen in June, 1922.

The Commission has carried out its policy this year as in the preceding two years of endeavoring to grant licenses that would be for the best interests of the community, and to prevent as far as possible an increase of licenses that might be questionable.

It is impossible for this commission to grant all the Lord's Day licenses applied for without throwing our city wide open on Sunday and thus producing a situation not desired by our citizens. It would be advisable for those considering the leasing of stores and spending a considerable amount of money in fitting them up, largely in expectation of getting a Lord's Day License to consult with the commission before doing so.

Applications for Common Victualers, Lord's Day, Lodging House, Inn Holders, Druggist and Automobile Dealers Licenses were received and acted upon by the Commission as herein set forth:

Common Victuallers.

62 Applications Received.

57 Licenses Granted.

5 Applications Transferred. Licenses Transferred.

2 Licenses Revoked.

Lord's Day.

236 Applications Received.

216 Licenses Granted.

20 Applications Rejected.

4 Licenses Transferred (Location)

Lodging House.

- 37 Applications Received.
- 35 Licenses Granted.
- 2 Applications Rejected.

inn Holders.

2 Licenses Granted.

Automobile Dealers' Licenses.

- 34 Applications Received.
- 34 Licenses Granted.
 Applications Rejected.
 Applications Transferred.
 Licenses Revoked.

Third Class Liquor Licenses.

15 Licenses Granted.

The following is the financial statement of the receipts and expenditures of the Commission for the year 1922.

Receipts.
