Several weeks ago, when the Fashion Show was held at the Fifth Regiment Armory, Baltimore, the Baltimore and Ohio had the pleasure of having as its guests from New York to Baltimore, a large gathering of those who were to take part in the show. Among those who got off the train at Mt. Royal Station was Marguerita Sylva, famous for her glorious voice and superb acting in grand opera and especially for her interpretation of Carmen, both in America and in the Old World.

The first thing that we noticed about her was her smile, and for this reason, we picked her out from the rest of the party for her photograph, which you probably noticed with the others in a recent edition of the MAGAZINE. This smile was not alone for her personal friends, nor for those who had made her journey a pleasant one, but for everybody, from the Fashion Show director to the grinning "red cap" who carried her luggage.

She smiled when our photographer came for her picture, and she smiled me a goodbye when her taxi drew up to the curb. Naturally, I went back into the office that afternoon feeling rather elated. Sylva had smiled upon me.

Next morning the newspapers were full of her pictures. They told how she played the part of judge and helped to select the queen of the Fashion Show. All were loud in her praise.

In the afternoon someone came into the office and remarked, "Your friend Sylva is down in the waiting room; you'd better go down and talk to her."

Under ordinary circumstances I probably would have balked. Now I couldn't; I had to prove that she would smile at me again. Moreover, I scented a little story for our Department. I went, with several pairs of eyes watching over the balustrade to see what would happen.

I went toward her smiling. She smiled back and held out her hand. (Ah, Vengeance, thou art sweet! The eyes that had followed me were ready to pop from their sockets.)

"Well," remarked Madame Sylva after the preliminaries of introducing myself were finished, and the eyes up in the balcony were satisfied, "it's all over."

"The Fashion Show?"

"Yes. And oh, what a time we had choosing them. There were so many of

them to choose from. Of course, we had to consider both face and figure. I only regret that more of Baltimore's prettier girls did not enter the contest. Why, Baltimore has any number of lovely girls who did not enter. I rather think that they get the notion that it is not just the thing to enter a contest of that sort. Of course, it is a bit hard for some to understand that such a thing is oftentimes good for a girl. She finds out hidden talents that she never knew she possessed."

"And there were men among the judges too, were there not?"

"Oh, yes. But men really know so lit-

tle about beauty. Why, all you have to do is to wink an eye at a man and he thinks that you're perfectly wonderful. That's why some wise person suggested that at least some of the judges be women. But speaking of beauty, let me show you something."

She reached into her black bag and pulled out a photograph. Ah, what was it? A picture of some brilliant actress or world famed beauty? Or perhaps a photograph of Marguerita herself? Neither. The first picture was of little Jackie Coogan, a pretty little girl playmate, and a great big dog. It was a delightful little picture. But who.....what.....?

"That," said Sylva, throwing her head back with all of the pride of one who has given to the world a masterpiece of art, "that is my little girl baby. The picture was taken on my recent trip to California, when I sang at the Hollywood Bowl. Oh,

Marguerita Sylva

but she is the dearest thing! . . . . . Of course, I suppose all mothers think that their children are wonderful. Why, the other day I dressed my children and took them for a walk. I have two, you know. I usually dress them in little black frocks with colored wool embroideries. We walked down Fifth Avenue. When I got back home, I went straight to my husband. 'Bernard,' I said to him, 'do you know,

everybody on Fifth Avenue turned around to look at my children'

"'Oh, nonsense,' said he, 'that's your imagination.' But it wasn't, for I am positive that they did."

And gazing admiringly after her as she went to board her train, I felt quite sure that the "Fifth Avenooers" did not miss a sight of the mother herself when they looked back at her attractive children.

## Dame Fashion Says—

On separate skirts, self covered buttons, belts and buckles are the usual trimming. Decorative treatment in the way of embroidery or braiding on the backs of coats and wraps is very effective.

4125

### A Splendid Model in Wrap Style

4125. Stylish and very attractive in blue serge with black braid and buttons for trimming. Jersey and knitted fabrics are good also for this design.

The Pattern is cut in three Sizes, 16, 18 and 20 years. An 18 year size requires 4 yards of 54 inch material. The width of the dress at the foot is 2 $\frac{3}{8}$  yards.

Price, 12 cents in stamps.

### A Neat Frock for the Growing Girl

4114. Serge with braid trimming would be good for this model. It is nice also for combinations of material. The collar, vest and skirt panel could be of plain goods, with the other portions of striped, plaid or figured material.

The Pattern is cut in three Sizes: 12, 14 and 16 years. A 14 year size requires 4 $\frac{3}{4}$  yards of 36 inch material.

### A Comfortable Work or Porch Dress

4128. Here is a very pleasing house dress, that may also do duty as a "street dress" in coat style. The lines are simple. The sleeve may be in wrist length or finished with the cuff in elbow length.

The Pattern, which is nice for gabardine, serge, gingham, percale, prints and crepe, is cut in seven Sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38 inch size requires 5 $\frac{7}{8}$  yards of 32 inch material. To trim as illustrated requires 1 yard. The width of the skirt at the foot is 2 $\frac{3}{8}$  yards.

Price, 12 cents in stamps.

### NOTICE

Any pattern on this page only mailed to any address on receipt of 12 cents in stamps. Use the blank on page 30, or send in your name and address in full on another piece of paper, giving numbers and sizes of the patterns desired.

Send 12c in silver or stamps for our UP-TO-DATE FALL & WINTER 1922-1923 BOOK OF FASHIONS.

### Katye Tells Us How to Vote

By KATYE COPLAN

**W**ELL, Girls, are you all going to vote this year? Of course you are, and what's more, you're going to vote intelligently, and not for the best looking man, as our brothers and other male relatives would have us believe. Our inning is "in," and we're going to make the best of it.

Don't vote the Democratic ticket just because your father is a Democrat, nor the Republican ticket because your sweetheart is a Republican, but let your own intelligence decide your party affiliations. Study the various platforms—and the candidates. A party platform, as you know, is for the same purpose as is a street car platform; namely, to "get in on." Keep abreast of the times by reading not only the daily papers but the better magazines. From the latter you can secure vast stores of political information, written particularly for the new voters. Fortify yourself at least this much against ignorance and helplessness when the "fatal day" arrives.

If your neighbor is indifferent about voting, it is your duty to persuade her to take advantage of her privilege. If the intelligent woman stands by and lets the ignorant one vote, she has nothing to "kick" about if future legislation is not to her liking. Take time by the forelock and get busy now.

A woman who does not vote is not looking to the best interests of her country, and, in my opinion, is no patriot. Come on, girls, pick your candidates, and when Election Day comes, don't forget to vote—and know what you're doing when you do it.

# Bright Colored Figures and Stripes Make Woolen Materials Stunning

By Maude Hall

SOME stunning frocks are fashioned in woolen materials with bright-colored figures and stripes. A design that is suitable for daytime wear is in gray flannel with dark red satin polka dots. The closing is in surplice style, the collar and vestec being of plain knit silk. The sleeves are finished with cuffs that correspond with the collar. At either side of the gathered skirt are straight panels, gathered at the top. This dress is so simple in its development that it assures the wearer of comfort as well as style. It can be reproduced in any of the fabrics of the season and offers pleasing opportunities for combinations of materials.

Among the new models a larger number of long sleeves are shown than short ones, but the short sleeve is always safe for a frock to be worn in the house. The development of the fashionable sleeve is an art in itself and one is staggered at the variety of design in this detail of the toilette. The fate of the neckline is not so certain, especially as concerns collars. There is a certain youthfulness about the collarless neck that makes it beloved by all women. On the other hand, there are collars, especially among the Mandarin variations, that give one queenly charm and dignity.

## AUTUMN INTERPRETATION IN CAPES

Dark brown panvelaine makes this typically new and smart cape, which has side panels extending below the hemline. Cape and panels are gathered at the neck edge to a high collar, which may be worn high or low, but it must be rolled.

Medium size requires  $3\frac{5}{8}$  yards 48-inch material and  $3\frac{7}{8}$  yards of 40-inch lining.

PICTORIAL REVIEW CAPE No. 1164. Sizes, 16 years and 36 and 42 inches bust. Price, 35 cents.

## A FROCK OF ATTRACTIVE DETAIL

French designers have decided to combine material rather than colors this season. Tan and brown are the two colors featured in this straightline frock of figured silk and wool crepe. It is trimmed with Satin Canton and ribbon which has a gold stripe woven through either edge. The panel plaits may be omitted, if preferred. Medium

size requires  $3\frac{1}{2}$  yards 40-inch figured and  $1\frac{1}{2}$  yard 40-inch plain material.

PICTORIAL REVIEW DRESS No 1110. Sizes, 34 to 42 inches bust. Price, 35 cents.

## IN SATIN-FACED CANTON

A gown of unusual attractiveness may be reproduced from this model. Nothing could be smarter for the purpose than deep chocolate colored satin-faced Canton crepe. It is trimmed with small beads, arranged in outline effect about the slashed front and sleeves, oval neck and lower edge of the tunic. In medium size the design requires,  $4\frac{3}{4}$  yards 40-inch material, with  $\frac{1}{2}$  yard of lace insertion for the yoke.

PICTORIAL REVIEW BLOUSE No. 1052. Sizes, 34 to 46 inches bust. Price, 35 cents.

SKIRT No. 9827. Sizes, 24 to 36 inches waist. Price, 35 cents.

## Lesson in Home Dressmaking

*An Embroidered Collar and Sleeves Similarly Trimmed Make This Kimono Very Attractive*

THIS kimono would be very pretty as well as serviceable, developed in crepe de Chine, Jap silk, satin, voile or cot-

small "oo" perforations which indicate the center-front. Finish for closing.

Take the collar next and close the center-back seam, which is indicated by a small "o" perforation. Gather the neck edge at back between "T" perforations and gather again 3/8 of an inch inside. Gather near the lower front edge between "T" perforations. Sew collar to neck and front edge of kimono as notched. Close seam as notched and sew to lower edge of sleeve as notched, with seams open.

It adds to the effectiveness of the collar to line it, after the scallops have been buttonholed, especially if a soft material is used for the kimono.

PICTORIAL REVIEW KIMONO No. 1057. Sizes, 16 years and 36, 40 and 44 inches bust. Price, 35 cents.

ton crepe. A deep collar finished with embroidered scallops, and cuffs, similarly trimmed, does much to make the design beautiful. If preferred, the scallops could be bound with ribbon instead of being embroidered.

In medium size the kimono requires 4 1/8 yards of 36-inch material. It has a deep V-shaped neck and the collar is Shirred at the back. Ribbon or self-material may be used for a belt.

There is no seam at the shoulder and the material should be cut as if the pattern were in one piece. This is clearly illustrated on the cutting guide. The front and back have the triple "TTT" perforation laid along a lengthwise fold of the material. The collar and sleeve bands have the large "O" perforations resting along a lengthwise thread.

Mark the notches carefully, then close the underarm and sleeve seams as notched. Turn hems at front and lower edges on small "o" perforations, then lap the right front over the left, matching the double

Break stale bread into bits. Moisten with cream, melted butter, and a little of the broth from the turkey. Season with salt, pepper and parsley, sage, or onion.

## Hallowe'en and Some Superstitions

ALL SAINTS' Day, Hallowe'en, or Hallowe'en, is celebrated on the last day of October. This is the day when spirits are said to walk around on the earth; when witches become alive, and where everything must be done to keep away the "spells" that these creatures are bound to cast over the unwary mortal.

Many are the superstitions that have been handed down from generation to generation, and while you may not admit being superstitious, glance over the following list and see how many of the old sayings you have heard, and say to yourself how many you believe in.

When a spider spins a long web it is a sign of rain.

The song of the katydid foretells hot weather.

For success of any venture whatever, provide yourself with the left hind foot of a graveyard rabbit.

To have a black cat follow you brings fortune to your door.

To raise an umbrella in the house is a sure sign of disaster.

If you sing before breakfast you will cry before supper.

A falling star is a sign of death.

A bird seeking entrance at a window brings illness or death.

Who stumbles in climbing a stairway will not be married during that year.

Dreams, told before breakfast, come true.

When you see a red-haired girl, look out for a white horse.

When you see a load of hay, make a wish.

A falling star means that somebody is dying.

A four-leafed clover, a horseshoe, and a wishbone, all bring good luck.

Who has never said:

"Star light, star bright, first star I see tonight,

I wish I may, I wish I might have the wish I wish tonight?"

# Wooden Toys Made in St. Louis

By L. L. Beck

Traffic Manager, Columbia Box Company  
St. Louis, Mo.

**I**N the Fall of 1920, realizing the inability of American manufacturers to supply the enormous demand, and the inadequate importations of toys to this country, "MENGEL PLAYTHINGS" were created with the desire to contribute to the health and happiness of children. They are manufactured with sentiment, as employees themselves are the inventors of these patented articles. School children selected by vote the elephant trade-mark transfer cemented on each toy, and the toys are offered with the assurance of wholesome pleasure combined with durability and safety.

Keeping in mind that a healthy, thoughtless youngster can discover more methods of destroying property than the wisest adult—particularly true of toys and playthings—in most of these toys permanency is made more certain through the use of plywood in every part that may be subjected to unusual stress. Mengel plywood cannot be split. MENGEL PLAYTHINGS are equipped with these plywood wheels—the strong-

est wheels made. Plywood is constructed of a number of wood sheets or plies placed so that the direction of the grain alternates. These wood sheets are fastened together with a special cement, which an infinite number of tests have proved that when set, is impervious to heat and to other elements. One cannot split these wheels with an axe; thus it is inevitable that toys whose most important parts are made of this material will outlast others not so sturdily constructed.

Recently two straight carloads of MENGEL PLAYTHINGS were shipped to New York City and Boston. These cars contained Rock-A-Tots, Rock-A-Twos, Motor Boats, See-Saws, Rock-O-Mobiles, Man-o'-Wars, Trail-O-Wags, Hay Wagons, Sand Wagons, Pony Pals, Foot Racers, Bye-Bye-Bikes and Wheelbarrows. Both cars were routed via Baltimore and Ohio Railroad for their long haul. Indeed, there is hardly a day passes but that the Baltimore and Ohio Railroad enjoys

a large less-than-carload tonnage of MENGEL PLAYTHINGS.

The "Motor Boats," named "Miss America," are built along the lines of a real speed boat; they are non-sinkable and are driven by a powerful encased spring motor which propels with a single winding a distance equal to the length of an average city block. The hulls are manufactured from clear-grained, imported, genuine mahogany—a delight to every child as well as to grown-ups.

MENGEL PLAYTHINGS are four season toys, some of the line especially adapted for nursery use indoors and some for outdoors. The handsome finish on all toys permits of washing; consequently, they are highly sanitary and parents recognize the healthy exercise afforded the children by their use.

Since the inception of these useful toys there has been a steady movement to all states of the Union, also for export. Judging from present indications, numerous other carload shipments will be made in the near future. MENGEL PLAYTHINGS are shipped in solid fibreboard containers, and the sides and ends are fastened with steel rivets, insuring safe transportation and growth in first-class condition.

SOME OF THE MENGEL PLAYTHINGS

- 1—The Pony Pals. 2—The Rock-a-Two. 3—The Mengel Hay Wagon. 4—The Sand Wagon. 5—The Rock-a-Tot. 6—The Trail-o-Wag. 7—The Wheelbarrow. 8—The Man-o-War. 9—The Bye-Bye Byke

# Cleveland Terminal Employes, in Signed Resolution, Pledge Hearty Support to President Willard

IN concluding his address to those attending the annual convention of the Grand Lodge of Baltimore and Ohio Veterans on January 5 of this year, President Willard said; "No matter how hard we try, we cannot make the Baltimore and Ohio Railroad the greatest railroad in the world, or the straightest or the richest railroad, but we can, if we will only try hard enough, create for it the reputation of being the best railroad in the world in point of service. We can do that. I cannot do it alone. You cannot do it alone. But all of us working together can do it, and I earnestly desire your cooperation in this way."

This inspiring statement was reprinted on a full page over President Willard's facsimile signature in the May issue of our MAGAZINE, and was later used by the Publicity Department in their Bulletin No. 1, Volume 1, which was circulated generally throughout the Railroad ranks and placed upon a number of bulletin boards.

At Cleveland, Ohio, the special attention of the traffic force was called to the bulletin by J. C. Kimes, assistant general freight

agent, and they were so much impressed by it that they brought it to the attention of all our employes in the Cleveland Terminal.

The result was that the accompanying resolution was framed and signed by the one-hundred and twelve employes of the

## The Resolution

WHEREAS, The Baltimore & Ohio Railroad has published its Bulletin, Number One, Volume One, dated June 1, 1922, bearing a message from our president, Mr. Willard, entitled, "The Best Railroad," in which he states that we can create for the Baltimore & Ohio Railroad the reputation of being the best railroad in the world in point of service, and

WHEREAS, because we believe that by working harmoniously and earnestly together we can contribute our share towards establishing for the Baltimore & Ohio Railroad the reputation of being the best railroad in the world in point of service, therefore

BE IT RESOLVED, that we, the undersigned, employes of the Baltimore & Ohio Railroad at Cleveland, Ohio, lend our hearty support and conscientious effort towards securing for the Baltimore & Ohio Railroad the reputation which our President desires.

FREIGHT STATION AND YARD FORCES

CLEVELAND EMPLOYES WHO SIGNED

traffic, freight station and yard forces at Cleveland, whose pictures appear on this page.

This is only one of a number of similar spontaneous expressions of loyalty which have been sent to President Willard during the last four or five months. Others have appeared in the newspapers, and those of us who have seen them and who know the conditions under which they were written, recognize in them a most unusual and gratifying expression of the friendly feeling of our employes toward the Baltimore and Ohio.

It is generally known that our road has suffered severely during the recent strike of the shop crafts. It is unnecessary to go into details here because the unsatisfactory conditions have been only too apparent. Suffice it to say that each and every one of us has seen enough of them to make us want to give our very best to assist in getting our operations and business generally back into shape.

Hundreds of men worked to the limit through the taxing hot weather of the summer and early fall to uphold the reputation and service of the Baltimore and Ohio. They did their own work and the work of other men, too. Thousands of others proved their loyalty by remaining steadfast to duty. Even from many of those who left the service came repeated expressions of regard for the Railroad's interest

and of desire to promote its welfare. Now these men, in particular, back with the Railroad, can show the extent of their regard for it and for its Management by giving of their best in its service. There are already signs that this is being done in many places. Let us hope that these may soon be system wide to the end that the Baltimore and Ohio will be able to show the best record in its history.

**Pullman Porter Wilkins**

4402 Adeline St.  
Emeryville, Calif.  
April 14, 1922

Editor  
Baltimore and Ohio Magazine  
Dear Sir:

On March 26, 10.20 p. m., I left Washington, D. C., with my Mother, a feeble invalid, just out of a sanitarium, and wish to express my appreciation of the extreme kindness of the porter, who was A. M. Wilkins, of the Wash. & Chicago run Pullman ear.

I was just recovering from a compound fracture of the wrist and consequently somewhat crippled and only for his thoughtfulness might have been greatly embarrassed.

It was necessary to have our meals served in our section and a word of appreciation of the cheerfulness in which that service was performed should not be overlooked.

I believe Mr. J. T. Ransom is in charge of the Pullman Co.'s men and would be glad if this well deserved word of appreciation might be brought to his notice as he probably likes his men to reflect credit on him.

Very sincerely,  
(Signed) (Mrs.) Helen Stillwell

John P. Dugan, Esqr.  
Gen'l B. & M. Agent  
Baltimore and Ohio R. R. Co.  
Baltimore, Maryland.

Dear Sir:  
Permit me to acknowledge the wonderful system—attention and consideration as shown by the return of my bi-foveal gold bowed spectacles—lost while napping on train out of Pittsburgh 8.15 last Sunday morning—found and returned to me in perfect condition.

This shows very fine work on the part of you, and the Baltimore and Ohio employes; also great good luck on my part, in that the glasses were not trodden under foot. Thank you heartily.

I remain, very faithfully

Kincaid, trucker

# First Annual Picnic of Green Spring Tie Treating Plant Employes

ON Saturday, September 2, the employes of the Green Spring Tie Treating Plant held their first picnic. It was so successful that they decided to make such a picnic an annual affair. There were more than 600 people who attended and every one of them had a jolly time. Not only was it the largest gathering of Baltimore and Ohio employes at Green Spring, but it was the largest community gathering held in the county this year according to the *Hampshire Review*.

The picnic was held on the Plant grounds. Automobiles met many of the guests at the trains, and others came in almost every other kind of conveyance that can be imagined. There were signboards pointing out the way so that none might be lost. In spite of these, however, we heard strange yarns about E. E. Alexander, plant supervisor, and Operator G. W. Kaylor losing their way, or getting off the roads, or something like that.

Among the guests of the day was Miss Jennie Smith, railroad evangelist, now 80 years old and still going. Many of "her boys"—and girls, too—crowded around for a handshake and a chat with her whom we call a "real woman."

The Romney Concert Band, W. C. Levings, conductor, furnished the music. There were amusements of all kinds for the kiddies as well as for the grown-ups. The swimming pond led many a person to shake his jacket and go tumbling in. Of course, since this was the first picnic, everybody was requested to bring his or her own bathing suit. But poor Bud Hamilton! Please, somebody, lend him something to wear in swimming next time! And did anybody see George Taylor? In swimming, I mean? No, we didn't either. Wonder if he was 'fraid.

As to the dressing rooms, these were provided with all of the necessities—and luxuries—of a regular seaside resort: dressing tables, mirrors, and towels.

The day was a fine one, in spite of the rainy weather that abounded at places nearby. The sun came out and we got some good pictures, which we present herewith.

And the dinner! There are more things to tell about that dinner than can be imagined. In the first place nobody went away hungry; most of us carried something home in our baskets, for we had more than we could get away with. Some of the boys tried playing at being waiters. Well, you

should have seen Bill Grove hustling. But Ike Saville as a waiter is a positive failure. Bill Fields said that it was the "dryest" crowd that he ever saw: Bill, as you know, was water boy for the crowd, so he had his reasons.

Long tables provided the places where the baskets were unpacked and the hungry crowds fed to their heart's—and stomach's content. The Plant folk are trying hard to maintain a no-accident year. Success thus far has been good, with one exception. At the picnic, Friend Lenderking, (safety agent, too) fell down on the chicken eating. This indeed was a deplorable accident. His eyes were bigger than his—oh, well, you know. And did you think Loy Sibert liked chicken? You should have seen his pockets!

There were a number of attractions, but not the least were Tom Long and Friend Stottlemyer. Tom had on the highest collar, and Stottlemyer wore the smallest necktie. Oh, well, we must have some fun at a picnic.

Those who adorned our speakers' stand and who gave us many words of wisdom between the selections of the band were: Rev. H. A. Lindamond, of the Springfield Circuit; W. D. Lenderking, Baltimore and Ohio Safety Department; Miss Jennie Smith, whose subject was "Religion for Railroad Men and Their Families;" and Rev. J. A. Haugh, of Berkeley Springs, who

And What a Merry Time They All Had!

spoke on "The Community Spirit," a theme well illustrated by the employes of the Plant. Hon. John J. Cornwell, ex-governor of West Virginia, and now the Company's general counsel, and others from Baltimore who were scheduled to speak, were unable to be present.

After the eating and the speaking were over, the boys launched forth into a real baseball game. The fun lay between the North Branch and the Green Spring teams. The score was 10 to 2, in favor of Green Spring. Of course!

In one picture you may see the beautiful locust grove in which the picnic was held, showing the location of the band and speakers' stand, with flags and service flag, also one of the immense tables through the big grove. At the extreme right is the ladies' dressing tent, and through the trees (center) the big refreshment stand; on the left is one of the swings. Employes will recognize many in the picture. We only mention one—the gentleman immediately to the right of the ball player, with his hands behind him—Mike (Daddy) Skelley, oldest employe on Plant roll, who didn't miss anything.

Looking down one of the big tables we see several prominent gentlemen in the foreground at the left. These are Messrs. F. A. Sebold, H. W. Gross and G. C. Conley. Mrs. E. E. Alexander stands back of Mr. Gross. The man holding up the tree, left background, is Tieman J. D. Chaney. The ladies along the table include Mrs. Wm. Grove, Mrs. C. W. Hamilton (see September issue), Mrs. E. M. Stottlemeyer and others. E. M. S. stands directly under the flag. The two gentlemen in front of tree (right) are Messrs. John Siebert and Operator C. P. Houck.

Another view of the table shows Mrs. Grove, Mrs. Hamilton, Mrs. Alexander, Mrs. Stottlemeyer, Mrs. Adams, Mrs. Wilson and other hostesses. At the left, Mrs. Loy Sibert and Loy himself (felt hat). Tieman B. F. Reed, H. E. Duckworth, O. R. Landes, N. B. Hinkle and Rev. H. A. Lindamond are among those in the center of the background.

We also have a close-up of Miss Jennie Smith and Safety Agent Lenderking surrounded by a jolly bunch of picnickers. The gentleman with cap and glasses (right) is Operator G. W. Kaylor (see August MAGAZINE), holding Master Wilson Kaylor. Directly over Mr. Kaylor's shoulders are seen Engineer and Mrs. George Taylor, while standing under flags between Mrs. C. P. Houck and Mrs. Kaylor can be seen the smiling face of Night Foreman E. Allen. Directly back of him are Mr. and Mrs. J. D. Rockwell and on their immediate right, Mrs. T. E. Allen and Switchman W. F. Kesler. The two young ladies in front are Miss Odessa Allen and Mrs. R. G. Smith with her son, Gerald. Immediately left of the tree under flags stands Mrs. H. E. Gulick; Tieman S. P. Hose is braced against tree in center background. I. W.

Rees is at Mr. Lenderking's left with Mrs. Rees just back of Miss Jennie Smith. The gentleman holding up the chicken in the back-ground is Commissary Manager C. R. Passapae.

P. S. By the way, Ike is still looking for somebody who can whistle the "Mocking Bird."

Special credit for the success of our picnic is due the committees for their excellent work and those who so kindly donated the use of their automobiles for handling passengers between station and grounds. The committees are as follows: E. E. Alexander, general chairman; Publicity and Program, E. E. Alexander, F. A. Sebold; Grounds,

G. C. Conley, A. E. Irving; Signs, R. N. Angier, J. C. Alexander; Supplies, E. M. Stottlemeyer, A. E. Irving; Refreshment Stand, C. R. Passapae, Wm. Grove, R. H. Corbin, P. Allen, G. C. Conley; Gateman, W. H. Gross; Water, Wm. Fields; Special Tent Watchman, J. M. Bean; Hauling, J. C. Alexander, A. E. Irving; Passengers, D. H. Talley; Auto Truck, G. E. Edgell, Manager, Green Spring Orchard Co.; Automobiles, E. E. Alexander, George Taylor, William Seeders, John Twigg, R. D. Nixon, J. G. Myerly, Z. J. Morgan, W. G. Haines, C. E. Edgell, J. M. Bean, J. H. Flynn, Earl Stewart, Clarence Seeders.

## You Can't Play Baseball with a Bowling Pin

Each race has its national game, played by definite rules.

In America the national game is baseball, a sport which develops the fine qualities of speed, force, quick thought and fair play.

The game could not be played if a stranger, who is not completely familiar with all the rules of the game and the reasons for them, should bring into it rules from the favorite game of his own race or some other rules that he himself invented. As a result the entire game would be spoiled.

So it is with the American form of government.

Unless one understands fully and thoroughly the laws of this country and the spirit of the nation, it would be dangerous for one to advocate changes in the form of government by trying to bring into it untried theories.

It is like trying to play baseball with a bowling pin.

The only right way to proceed would be to familiarize yourself first with the laws and customs of this country and penetrate into its spirit, and if there are changes to be suggested, that should be done in the regular form approved by our Constitution.

## The Tail of the Little Black Bear

**T**HIS is a tale of the tail of a little black bear, who lived with his mamma 'way out in Yellowstone National Park.

This little bear's name was Sonny. Now, that's a funny name for a little bear, isn't it? But that's what his mamma called him, so that must have been his name.

Now Sonny and his mamma lived in the woods quite close to the beautiful canyon of the Yellowstone River. Every day they would walk over to the cliffs and see the people who came to the canyon. Sometimes there would be little girls and boys, and nearly every day there would be candy or popcorn, or something nice and sweet for Sonny Bear.

It was on a bright day in June, of this year, that Mamma Bear and Sonny came out of the woods and walked nearly up to a place called Artist's Point. This is where all of the artists like to come and to draw beautiful pictures of the canyon, for this is where it can be seen best. Little Sonny liked to look down into the canyon, too, but Mamma Bear always told him not to go too close to the edge of the cliffs, for fear that he would fall over into the deep, deep valley below. Then he would never be able to get out. Mamma Bear had been down in the canyon once or twice, but even she had had such a hard time to get back that she never went when she could help it.

Sonny kept close to his mamma when he heard the chug-chugging of the great, big cars that brought the people from the hotels and the camps. He could hardly keep still for thinking of the sweetmeat that he was 'most sure to get. He danced up and down and ran with all his might to where the long steps led up to the point.

Just then a big car came around the corner so fast that Sonny almost got run over. He was so frightened that he ran back to his mamma all out of breath. But his mamma was a wise old bear, who knew that Sonny had been punished for his carelessness, so she said nothing.

Soon a little girl got out of one of the cars. She was a pretty little girl, with long, black curls and big, brown eyes. She spied Sonny right away, and would have run up to him and put her arms around his neck, but the guide said no. He then told her that although bears mean to be very kind and

gentle, no one knows when a bear may hug some little girl or boy. And when a bear hugs, he squeezes so hard that it would be dangerous for us to get into his arms.

Sonny Bear came closer, and closer, while Mamma Bear stayed back in the woods and watched.

"What is he looking for?" asked the little girl.

"Candy, most likely," said the guide.

"Oh," said Betty, for that was her name, "then he shall have some."

So she ran to the car and got out her bag. In it were some—what do you think? Why, six nice, long, shiny, black licorice strings. She took them to the guide, who laughed when he saw them, for he knew what a time little Sonny would have eating them. You know how soft and stringy they get, don't you? Well, if you had seen little Sonny Bear eating them, you would have laughed until you couldn't stand up straight on your feet. Why, he took them between his paws, bit them, then shook them. He held on to

one end of a long one while he bit at the other. He licked them all over. Then the black stuff began to run all over his face, and he got so sticky all over that he didn't know just what to do.

How Betty laughed! But Sonny didn't laugh. He was wondering what to do with the licorice strings. They kept getting around his head everytime that he licked them, and the ends would tickle his ears, and stick to the long hair all over his chest. At last he thought of a plan. He took them in his little paws and rolled them all together into a ball. Then he stuffed them into his mouth and tried to chew them. But the ball was so hard that it stuck to his teeth, so that all that he could do was to push the ball over into one side of his mouth and wait for it to melt. How funny he looked! Betty told everybody that Sonny looked as though he had the toothache. And so he did.

After a time, the lump disappeared. Sonny had swallowed the licorice ball. Then he ran back to Mamma Bear, who licked him nice and clean.

Betty left them and went over to see the mamma eagle, who had a nest on the top of a big rock, just across the canyon. She watched Mrs. Eagle bring food to her two little ones. How eagerly they grasped it and put it into their ugly little mouths! They seemed to be hungry all of the time.

Soon Betty's mother called her and they got into the big car, said goodbye to Sonny, and drove away. In a little while all of the people had gone. Sonny was so lonesome that he did not know what to do. He sat down on his hind legs to think of something.

SONNY BEAR KEPT CLOSE TO HIS MAMMA

Illustration by M. Elsie Russell, file clerk, Transportation Department

Drawn by Harriet, 9 year old daughter of S. L. Post-eraro, accountant, Pittsburgh Terminal Station

Mamma Bear was over by the pit where the garbage man threw all the fruit skins and things to eat that the hotel people didn't want. So, Master Sonny thought that while she was not looking he would creep to the edge of the cliff where Mamma never allowed him to go. She wasn't there to say yes or no, so, he thought, it would not make a bit of difference.

Slowly he crept up, a little farther, just a little farther, and just a little farther, until he had reached almost to the tip end of a pointed rock which stuck out from the cliff. Oh, pshaw! He wasn't afraid. He would go, just one step more. He put his left paw before his right, and..... Crash! Boom!

Naughty little Sonny had fallen over the cliff!

Mother Bear heard the noise and came running as fast as her clumsy old legs would let her.

"Ba-a-r-r-r-r-rh!" yelled poor foolish little Sonny as his head struck a hard rock many feet below, and he went rolling down, down toward the swift river.

"Whee-ee-ee-ee-eeee!" screamed Mamma Eagle, as she flew from her nest and circled 'round and 'round, waiting for a chance to grab him, for she wished to take him home for her babies' dinner.

Mamma Bear was so frightened. She took the path to the left and went down as fast as she could, but as bears can go uphill so much faster than downhill, she did not get there until after Sonny had reached the bottom. No, he did not roll into the river, but something worse than that happened. Just as he struck the soft sand that kept him from rolling in headfirst, old Mamma Eagle swooped down and with her claws, seized poor little Sonny by the tail, and started pulling him after her up in the air. Mamma Bear came just in time to catch him before Mamma Eagle had gotten Sonny's feet off the ground, for he was so heavy. Mamma Eagle was frightened when she saw Sonny's mamma, but she kept hold of Sonny's tail and pulled so hard that she pulled it right off. Then she flew off to her nest in the crags, carrying Sonny's tail with

her, while Mamma Bear picked up poor little Sonny and carried him home and put him to bed in the soft pine needles.

It was a long, long time before Sonny came out again to look for candy from the travelers, and when he did, you may be sure that he kept close to Mamma Bear and did as she told him. One day they saw the old Mamma Eagle, over on their side of the cliff, looking for food. As soon as she

spied Sonny and his mamma she cried: "Whoo-oo-eeee-ee-e! I pulled Sonny Bear's tail off!"

"Shoo!" said Sonny, for he was a big bear now and wasn't afraid.

And Mamma Eagle "shoo-ed" back to her nest and she never came back again. But the funniest thing is that Sonny would never eat a licorice string after that day.

## Everybody Will Want to Read Uncle Oscar's Letter

*Dear Girls and Boys:*

By the time that some of you read this, the prize papers in the Safety Contest will have been decided on, and in December you shall know who the winners are.

Now for another surprise. I knew that you would like Mother Goose's letter from South Africa, so I hunted around for another nice person to write you a letter. And who do you suppose wrote to you this time?

Drawn by Harley H. Kight, Jr., Keyser, W. Va. Harley says, "Let's cut down this crooked old tree, clear to the bottom, and dig up the roots."

Why, none other than old Uncle Oscar, of the Kiddies' Page in the Union Pacific Magazine. I leave you now to read his letter to you. Don't forget to tell me how you like it.

Lovingly yours,

*Aunt Mary*

THE UNION PACIFIC MAGAZINE

Omaha, Nebraska  
August 21, 1922.

*Dear Baltimore and Ohio  
Girls and Boys:*

I never guessed there were so many nice towns to live in away back East until I read your contest letters, and each one I read made me wish to live in that town. Aunt Mary must have had a dreadful time deciding which were the best.

You will all have to keep your eyes wide open from now until the end of September to win that Safety Contest, too. It takes

sharp eyes to see the little things that cause accidents, and I wish you all a heap of success.

What do you think! Yesterday, when the caretaker at our big River View Park went to feed his animal friends, he found three new baby deer, the prettiest little things you ever saw, and maybe you think their Mamma Doe wasn't proud of them. Now all of the boys and girls want to go to see them.

Our Omaha boy scouts have been having great times down at Camp Gifford. They have been learning to build bridges without any nails, and to do all kinds of wood craft things. Where the big muddy Missouri goes swirling by the Forest Reserve, the scouts have been patrolling the banks, and wherever the rushing river tries to cut and wash away the land, the men and boys go to rip rapping, that is to strengthen the banks with logs, and brush, and sand bags.

You know, I get just heaps of letters and pictures from the boys and girls of the Union Pacific, just like the kind Aunt Mary gets from you. And these boys and girls who live in the West, in flat prairie towns surrounded by crops, in towns nestled among the Rockies, and in sea coast towns, all send bushels of love to the boys and girls who live in the East in the splendid Baltimore and Ohio towns that you have written about.

And here's my love too,

Uncle Oscar

This fashionable lady drawn by Anna Louise Hay, whose daddy works in the Baltimore and Ohio Building, Baltimore, is standing beside a flowery fence, drawn by Elizabeth Millore, of Pittsburgh

## My Bank

By Joe Feeney, 7 years old  
Granite, Maryland

ONE day my brother brought me a bank from the Seaboard Bank. The little bank was supposed to hold quarters, dimes, and pennies. Written on its side was: SAVE A DIME A DAY. When the year was up, if I deposited the money, I would have \$37.49.

I have been saving ever since, and now I have my bank filled and I am going to deposit the money and get a bank book. Then I am going to fill my bank again.

Note: That's just splendid, Joe! I wonder how many others of our little folks have done as well. Not many, I'll bet.

Aunt Mary.

## How to Play "Rabbit"

By Dorothy Cassidy, Marysville, Indiana

THE players all stand in a circle, except one in the center who is called the "Rabbit." One at a time each player tries to put his foot into the circle. The rabbit tries to tag him before he can jump out again. Some jump in and out of the circle, and all try in every way to make the rabbit active in the game. Any player whom the rabbit may touch becomes a prisoner and goes into the circle to help tag the others.

I would like to hear from some of our little folks.

## "I Say Stoop" and How to Play It

By James Sampsel, Washington, D. C.

MY favorite game is "I Say Stoop." This is played by all standing in a circle, with one in the center, who is "It."

The one in the center then says, "I say stoop," repeating this two or three times, fast. Finally, when the others are not expecting it, he says, "I say stand." When he says this, those whom he catches stooping are out of the game. It's great fun when there is a crowd. I'll be glad to hear of some real new games from some of the other fellows.

A teacher who believed in keeping her youngsters in touch with the march of events was beginning a lesson on the revolution in Russia.

"Now, who can tell me what the ruler of Russia used to be called?" she asked.

"The czar," bellowed the class.

"Right! And what was his wife called?"

"The czarina," two or three ventured.

"Good," said the teacher. "Now, I wonder if you know what the czar's children were called?"

There was a long pause, then one little voice piped up: "Czardines!"

—Mutual Magazine.

## We Should Be Proud of Baltimore

By William Kiefer  
Ten Year Old Son of Machinist  
Mt. Clare Shops

### THIRD PRIZE, CLASS C

IT gives me great pleasure to write to you about our great and beautiful city, Baltimore. Baltimore is situated on the Patapsco River, 13 miles from the Chesapeake Bay. It has many advantages, such as a good harbor, docks, and its nearness to the Atlantic Ocean. It has connection with the cotton plantations of the South, the grain and meat sections of the West, and the lumber, coal and iron of the North.

Baltimore is a monumental city. Its location is in the good living condition section of the country. Its supply rivers are the Susquehanna, for electric power; Gunpowder River, for water supply, and the Middle and Back Rivers for drainage.

Baltimore's commerce is in exports, principally of steel rails, ready made clothing, straw hats, tobacco, cotton duck, canned goods, vegetables, and canned

oysters. Baltimore is noted for its oysters—the most delicious in the world. Baltimore's imports are: farm products, poultry, live stock, grain, hay dairy products and flour.

The new Baltimore and Ohio Railroad Company's Building is an enormous building on Baltimore and Charles Streets. Our City Hall, too, is like a picturesque palace, with something like a great square or carnival ground in front. Baltimore also has a great post office and a new Court House.

Camden Station (Baltimore and Ohio) is on Howard and Camden Streets, Baltimore, Maryland. This station is the oldest railroad terminal in the world. On the Baltimore and Ohio was first started the first steam road in existence. This was also a storm center during the Civil War.

Baltimore has many beautiful suburbs, like Roland Park, Guilford, Walbrook, and many others. Druid Hill Park is also a beautiful place; it is a natural park. With all of these advantages, we should be proud of our great and good old city.

I wish you all, and the Baltimore and Ohio, and the city much success.

## Are You a Member of the Junior Red Cross?

HERE are four little people. Do you know what they are doing? Do you know what kind of tree it is that they have there? What is it that will make a tree grow straight and tall? I shall tell you.

These little folk have just planted a tree. This tree is called Good Will. It stands for

helpfulness to other people. The stake that will help the tree grow straight and tall, and that will keep the strong winds from bending it aside is called Service. Service means doing things to help other people. That is what the Junior Red Cross does. There are five millions of children in the United States who belong to the Junior

Red Cross. These children are sowing the seeds of service in their own hearts by helping others. These seeds will blossom into happiness and usefulness, and if the little trees of Good Will are cared for and staked properly, these little people will grow into good men and women.

Be sure to find out about the Junior Red Cross; your teacher will tell you about it if you do not already know.

### Well Prepared

In a recent contest on the subject, "How to Prevent Accidents," this letter was received:

DEAR EDITOR:—

I am 12 years old and would love to join your contest.

I trust in God, then I stop, look and listen.

Yours truly,  
Mary Brown.  
—Barrett Trail

 THE JUNIOR RED CROSS  
Fellowship Grows Through Service

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBECK

#### A Courageous Correspondent

John Newman is the MAGAZINE correspondent at Pier 22, North River, New York. I particularly enjoyed his effusion in the July number. I hope my friend, the editor, will not curtail his epistles for they are bright and newsy and worth reading. Turn to page 46 of that issue and you will find Mr. Newman's letter. He tells how he invited trouble by eulogizing and praising a young lady in his office, and then in another paragraph he extols the assistant to the Terminal timekeeper in a most entertaining way. I am sure she will not take offence.

Note: See page 15 of the September issue—Ed.

Four of the brightest and nicest girls in Baltimore are in the Law Department. I cannot enumerate them; I can only refer to them in the briefest possible manner, because the injunction, "Don't you put me in the MAGAZINE" is still ringing in my ears: so what is a fellow to do? While this admonition has the ring of sincerity, it is not a real command but only a friendly reproof. The girls do not mean it.

#### A Busy Summer

This has been the busiest summer I ever experienced in my 41 years in the Law Department. What with Labor injunctions and work incident thereto, the force has been more than fully occupied. The young ladies, however, have managed to enjoy respites in vacation jaunts, and have returned to duty well rested and ready for the Fall campaign. Miss Edith Henderson enjoyed her recess in the beautiful Mohawk Valley, New York, came back at the end of August and plunged into the accumulated work. Mr. Young, our chief clerk, enjoyed week end trips, too few in number. Mr. Frankton was content with one week, enjoying motor trips throughout lovely Maryland. Mr. Gosnell and his family battled with the breakers at Ocean City, Maryland. Next season he may possess a cottage there. You never can tell. John William Rich exhausted his full two weeks at his favorite resort, Wonderland.

I wish you could see the work turned out by our young gentlemen stenographers, Mr. Horsey, Mr. Franklin, Mr. Stuart, Mr. Duncan Boyd and Mr. Gosnell. I am afraid they will not sanction this studied

praise, because they, too, may be opposed to real downright publicity.

The critical observer might exclaim, "Why, Mr. Haulenbeck has omitted his own name," and so to allay all fears I will say that it was my innate modesty that caused its omission.

#### The Standard's Definition

Modesty, as defined by the Standard, is placing a moderate or low estimate on one's own capabilities or merits; not excessive or extreme; a modest request; modest joys; a modest income, and here in this latter definition is where I come in.

But seriously though . . . . .

"The wisest man could ask no more of Fate Than to be simple, modest, manly, true, Safe from the Many . . . . . honored by the Few;

To count as naught in World or Church or State;

But inwardly in secret to be great."

#### Office of the General Manager Eastern Lines

Correspondent, H. E. WEIFENBACH

I suppose you were all surprised to see from the picture we had in the August issue, what a fine looking bunch of people we have around this office. That picture was the cause of our receiving a great many telephone calls from pleasant prevaricators telling us how fine the picture was, etc.; in fact, more than we felt we really deserved. We knew the picture was bad, but to have it impressed upon us like that—well! Revenge is sweet. And do you think for one minute, we would ever have called Mr. Martin "Matter of fact Gil" or Mr. Herman "Al," at any rate in so public a place as the MAGAZINE? Well, I should say not, that is, unless the next day was pay day, and we had just inherited some money from an unexpected source. At any rate these were the titles which were given them in the MAGAZINE, by whom we do not know, although we might guess.

If our "Boss" doesn't soon come back, we will not know him, if we meet him in the corridor, and while we know Brother Riley enjoys these "tours" of the Baltimore and Ohio, we miss his Irish wit around here.

Mr. Herman is just back from his vacation, which he seems to have enjoyed very much, having spent it in fishing at Big Bass Lake, Michigan. We understand he is quite a fisherman, although we have seen no trophies, but what do you think he sprung on us this trip? We made a special request

before he left that he should bring back one of the big fishes that he caught so we could see it. But when he came back home, he said there was a law in Michigan which prevented him from taking fish out of the State. He must have been thinking of moonshine. We all knew prohibition was a National institution.

We hear a great deal about Radio these days. It is almost as bad as Hedding's French. And whom do you think is giving us all this dope? None other than our friend George Seeds. If you want to understand what he is talking, you should have an Encyclopedia with you, for the Radio language which he speaks includes such words as "static," "Potentiometer," "Aerials," "Audions," "Variometers," "Super-Regeneratives," and many others which I do not remember. I know what the "static" is, though, because I listened in on his radio outfit one night and I heard so much "static" that I couldn't hear the concert that was supposed to be going on. However, George told me that the next night the concert was all right, so I suppose the "statics" must have behaved better. G. S. says he talked with Mars yesterday and hopes to get Venus on the waves tomorrow.

Clarence's wife is away just now, and he is kept busy writing letters and checks.

Mrs. Craig is away on her vacation, which she is spending at Atlantic City.

Otherwise, there "ain't no news."

#### Freight Traffic Department

Correspondent, DOROTHY RUBENSTEIN

We once mentioned the fact that Cupid was asleep on the job in this Department. Evidently the little god overheard the remark, for he has gotten to work with a vengeance, and since that we have the following to report:

On June 17, G. M. Campbell, this office, was married to Miss Irene Ivers Smith, at Boston, Mass.

A pretty wedding took place June 22 at Gatch Memorial M. E. Church, when Miss Alma H. Erdman became the wife of Wm. E. Daughaday, General Freight Office.

On July 24, M. H. Llewellyn married Miss Anna Laura Ritchie, of Jerome, Idaho, at which point the wedding took place.

And last, but by no means least, comes the romantic marriage in Baltimore of Miss Winifred Holmes, stenographer in this office, to Mr. John J. Dean of Savannah, Ga., after a whirlwind courtship.

The lucky couple have the sincere and heartfelt good wishes of the entire Freight Traffic Department for long and happy wedded lives.

On August 23, the stork left a bouncing baby boy at the home of Mr. and Mrs. Walter W. Weller. Congratulations!

There have been several changes in the personnel of this office, because of marriage, promotions, resignations, etc. which have resulted in several new employes being added to our force, as follows:

Mr. Carl Lochboehler, secretary to assistant general freight agent. Miss M. R. Taylor and T. E. Kesterson, stenographers, F. D. Diehlman and James A. Kirk.

#### Office of General Freight Claim Agent

Correspondent, GEORGE DOBBIN

Hello fellers,—have you got your overcoats out of "heck?"

It would seem strange to any of us if we owned an arto and, seeking a chauffeur,

were confronted with a request from some enterprising young man whose only qualification would be that he had seen a large number of autos running! The same thing applies to ourselves.

Working in the midst of freight claim investigators and being busily occupied with perhaps minor, but, important co-relative duties, many of us do not think that we have the time for the study of more important work. After having industriously applied ourselves to almost everything but the learning of the "whys and wherefores" of the job ahead—we see it bullet-tined as vacant and then the applications begin to resemble a snow storm! Of course, there are many sad disappointments on the part of "seniority" folks. But the pay check is the barometer of the amount of surplus effort we are willing to expend for future advancement, and not of years of service.

However, there is always the tendency to follow the crowd, to listen to the fellow who remarks "what's the use," with the inevitable result. If we fit ourselves for better positions, the fact may not be discovered in a day, but—since a corporation department head must show results and can't do it without efficient help, there will come a time when study and the striving after promotion will be rewarded by increased responsibility and remuneration.

Since the vacancies that occur in our own department are filled by the promotion of employes in lesser positions, is it not about time, with the coming prospect of increased business, to fit ourselves for better things?

Efficiency is not a joke and what you are worth from the neck up, far exceeds your value from the neck down!

Our deepest sympathy is extended to the family of the late Mr. McShane, O. S. & D. Division, who died August 22 following an operation at St. Joseph's Hospital. We will miss his genial smile and cordial personality.

Congratulations to our friend "Cliff" Horn. He is now the proud and happy papa of a fine daughter. The thing that worries "Cliff" is whether or not she shall be permitted to "bob" her hair. A decisive conclusion has already been reached on the question of smoking violet "flavor" cigarettes!

"Pop" Neville is out to break all records, having recently added the seventh member to his growing family. Do you have to call the roll as yet, old timer, or can you keep track of 'em without that? First you raise and educate them—then they marry and you support them and their families. Go to it, old man!

"Bob" Townsend has the panacea for our present ills in the matter of saving money for the municipality. He says "don't vaccinate the police, they can't catch anything anyhow."

We have our eye on Friend Chaney of the O. S. & D. Division. He is now taking his vacation all dressed up in an Army O. D. shirt, a fifteen cent cigar, a shave and a motorcycle. What is the attraction on Howard Street between Pratt and Camden, old boy? Nothing like making a hit with the ladies!

Farewell to our friend Runkles of the O. S. & D. Division. He is seeking success in other fields and we wish him the best of luck.

"Skinny" Keene has decided on a novel way for reducing his surplus avoirdupois. The method is nothing less than the

practice for a given length of time on a trombone every day. We're with you, "Skinny," but we sure do feel our chin quiver in sympathy with your neighbors. There will doubtless be notes as is notes!

It's about time, we heard something of the doings of that "Champ" Bowling Team.

We stop at nothing, we don't! What with the talk of Baltimore and Ohio Country Club and all—Enzie Correll lays claim to glory by a recent eighteen holes in one hundred and ten on the golf links. Having dubbed along with considerably less success, many of us feel that we are seeing the development of a future artist of the driver, mashie and niblick. Congrats' old scout, that's a good score!

Seeing the close approach of the football season and no team in sight, Friend Carlyle comes to the front with something that will at least act as a reminder. He is the proud owner and possessor of a football mustache (eleven on each side).

"Brother" Beste has been making various trips to the Masonic Temple at Elkridge, which is a sure sign that he is traveling along the right road and in the right direction. Congratulations, old man, may you always follow the words of good counsel.

"Johnny" Kratz still wears that winsome expression which has been observed on his pleasant countenance since he returned from the State Convention of the American Legion at Ocean City. It is one thing to convene and stay dry, then again, it is another thing when one "convenes" so close to the "wet" ocean! We're only jealous because we weren't there, John.

The ladies are up against it again. First there was a rumor of "bobbed" locks being passe. Then came the reality of longer skirts and what, oh! what, is to become of all those clothes? Happy suggestion,—though you cannot stretch a skirt with a narrow hem, there is always a chance to stretch the waistline side-ways!

Do your Christmas shopping early and don't forget that a smile is always in season, costs nothing and is more appreciated than the fifth pair of bedroom slippers!

That noble bird, popularly known as His Royal Highness, the Stork, has been active around our diggins these past few

"Al" Redding and his family

months. "Al" Redding and his family are shown here in a true-to-life-pose. "Al" has our best wishes for the future of the "young 'un" and our sincere congratulations.

After a very considerable delay Miss Wingate finally reached Stuart, Va., spent her vacation (helped the boys to spend their time), and is back on the job. Hope you had a good time, "Del."

Misses Norris and Kramer are still recuperating from the effects of their trip to Yellowstone. We understand that the girls have gone into a very promising gold mine project, and no doubt, it won't be long now before they roll up to the building in their "Rolls-Rough" and dazzle us all. Some checker-board knickers, Miss Norris; we might say, "some more class."

#### Printing Department

Correspondents, H. R. FOGLE and HARRY TOFT

Our old friend Haigis, having learned the fine art of handling the elusive auto, decided to take a trip to the mountains, and try conclusions with the hills up around Pen Mar. But alas! Evidently "Slim" did not reckon with the steepness of the hills or he did not have the machine trained, for something happened. Then when "Slim" got out to get under and jack it up, his auto got scared at something or other, and at the last account "Slim" was chasing it down the Blue Ridge Mountains with a jack. "Slim" says he has a new and better trained auto now.

Since our last issue Mr. Ruse spent several days at Asbury Park, N. J., with his son. He also motored through that state and Coney Island, N. Y.

On Saturday before Labor Day the boys of the composing room received such a shock as to all but put the force out of commission for the morning, the cause being the non-appearance at their usual places of Braun, Reay and Lowe.

We like the determined spirit of Foreman Frey. He was so determined to get a coat of Atlantic City sunburn that it required two trips to the popular summer resort. His first trip it rained for three days he was there, but it took the Labor Day holiday to do the job. Our superintendent says he has his opinion of any one who will lie out in the back yard all day in order to get sunburnt. (Evidently he has had some experience along that line.)

The boys are wondering what is drawing Compositor Pursley out on Pennsylvania Avenue so much lately. It must be some great magnet of enormous drawing power to drag one so far away from home. We can hear the wedding bells ringing now. Ding dong!

W. B. Onimus and Harry Halt have been added to the force of "Key Ticklers" in our monotype department, while Samuel McGee takes up duties as compositor. Welcome to our midst!

The line of the sad sea waves and "one-piece" bathing suit proved too much for Compositor Myers; he heeded the call and spent a pleasant week end at Atlantic City.

On several occasions recently Compositor Johnston and Keyboard Operator Sherman were seen engaged in earnest and confidential conversation, but it is all out now. Sherman spent several days sight seeing in gay New York.

Not to be outdone by the others who were enjoying week-end vacations, Compositor Shackelford took a trip to Millplane, Conn.,

or was it to the moon? For up to this writing "Shack" has not returned to his case. "Oh where is our wandering boy?"

Have you noticed the increase in the population of our city? Composer Siegel's family, formerly of New York, and George B. Schuster, brother-in-law of Composer Fogel and family, formerly of Yonkers, N. Y., are now in our midst. Of course all transportation and handling was done by the "Best and Only."

The assistant correspondent is anxious to meet any of the men who might be interested in forming a bowling team. Let's get together and put the Printing Department on the map in this line of sport.

Our stenographer, Miss Ruth Jennings, spent her vacation down in the wilds of the Old Dominion State. Her smile and rosy cheeks tell us that she had a fine time.

C. J. Lehman appeared one day with "Lizzie," all dressed up spic and span and with new shoes, too. We all were wondering what was up. C. J. has returned—so has "Lizzie"—from the wild and muddy expanses of Virginia. "Lizzie" came back so completely disguised that the boys could not tell whether C. J. was driving an auto or a huge lump of mud. Indeed, it was so bad that our genial foreman, who is ever ready to help a friend in need, went to the Capitol City and acted as pilot home. "Liz" is now recuperating at the tailor's.

**Tariff Bureau**

**Correspondents**

F. W. RUPPERT and C. A. WAGNER

Ross B. Hager, secretary to chief of Tariff Bureau, and Miss Esther Mitchell were married on September 2. They spent their honeymoon in New York. Miss Mitchell formerly worked in the Traffic Department of the Western Maryland Railway. Well, Ross, you surely did surprise us this time. Luck be with you, Gumps!

We all earnestly hope that B. E. Miller, one of our fellow clerks, who has been sick and on a furlough for the past month, is greatly improving and that he will return to the office very soon.

As yet we have been unable to analyze the seriousness of ONE John and ONE Bill; there seem to be a lot of secrets about their case.

One of the accompanying photographs was taken in Washington, D. C. on a trip made by several girls in our office. There must have been an exciting time during that visit as we are unable to identify any of the boys, although Miss Marion Williamson can be seen on the left, and Miss Daisy Norton is directly in the center with Miss Clara Windroth to her right. Last but not least is Miss Ruth Piersol, who, by the way, is the chief figure in this particular party.

The rest of the pictures were taken at Mr. Snyder's shore at Marley Creek, at an outing held by the boys in our office on Sunday, September 30. Hot dogs and crab soup prevailed.

In the boat we find: Misses Lillian Dittmer, Elizabeth Bremker, Hazel Mewshaw, and Ethel Whitehead.

All by himself is Normand Orem, acting as cockswain; the happy-faced young man running up the path is "Schmitz" Snyder, with a bouquet for Miss Mewshaw. Note the new lines in bathing suits for this season.

The remaining pictures show views of the wonderful bathing beach at Mr. Snyder's summer home, and, incidently, photographs of Miss Lillian Dittmer with Desmond Daugherty, Marie Svec and Bertis (TONY) Tanner, and to the extreme right is the old boy himself (Lou Snyder), with Miss Hazel Mewshaw.

**Telegraph Department**

Correspondent, DELLA M. HAIN

The annual meeting of the Telegraph and Telephone Section of the American Railway Association, scheduled to be held at Colorado Springs, September 19-20-21, has been indefinitely postponed. Superintendent Telegraph Plumly is the chief representative of the Baltimore and Ohio; other representatives are E. W. Day, assistant super-

**SOME TARIFF BEAUTIES—THEY ALL WENT IN AND THE WATER WAS FINE**

Left to right, upper pictures: Lo, the poor oarsman with such a quartette astern! On the bow sits Cockswain Norman Orem; and quite important is this bouquet that is being carried along for Miss Mewshaw—and Schmitz Snyder's getting it to her by fast express. Lower left: A certain trip to Washington brought these results (see notes for particulars); lower right: Six of 'em and all in the swim

intendent telegraph, Baltimore, Md.; E. T. Ambach, assistant superintendent telegraph, Cincinnati, Ohio, and B. F. Thompson, telephone engineer, Baltimore, Md.

One of the employes of the immediate telegraph family recently exhibited a fine diamond ring on the proper finger of her left hand, which of course caused a considerable amount of comment and excitement. However, after wearing it there for a few days, she transferred it to a finger on her other hand. Margaret, how could you do it?

We are glad to mention that Thornton Norris, who recently underwent an operation at the Union Protestant Infirmary, is improving. Thornton's efficiency in his work, coupled with his sunny disposition and a desire to serve, has made many friends in the Department, all of whom wish him a speedy return to good health.

The service of the Telegraph Department has been up to standard during the recent abnormal conditions, which bespeaks efficiency for the organization. Mr. Plumly is the head of the telegraph organization. Enough said!

Railroad crossings have the warning "STOP! LOOK! LISTEN!" Railroad telegrams have the warning "SYMBOL! CODE! BREVITY!" Vice President Galloway has issued the notice that telegrams received in this office, in which no symbols are used, will be answered by mail. Bear this in mind, and use symbol; use code; be brief!

#### Transportation Department

Correspondent, LUKE K. BURNS

We don't know just whether to say this news belongs rightly to this department, or whether it belongs to Cincinnati. However, even though Cincinnati may claim the "better half" of the argument, we claim that Edward Francis Molz makes a pretty good hero for the story. It all happened like this, you know.

E. F. is one of our promising travelling car agents, or checkers. (Checkers is a better name, since they move about all over the System.) One day on a trip, way out in Cincinnati, he met with an attractive little lady in the person of Miss Amanda Mary Gaiser. Right away Eddie got to thinking about her. Her face would look at him

between the coal cars, and all that sort of thing. You know what I mean. The first we knew about the little lady was when we saw a picture of her in the MAGAZINE, for she then was secretary to G. D. Brooke, superintendent of Transportation, Western Lines. The rest of the story we kept to ourselves until we were nearly blown out of the window the other day when we got an invitation. Yes, it's true—a real wedding. It took place on September 12 in St. George Church, Cincinnati.

At this writing the two are on their happy honeymoon, but they will be at home after November 1 at 2003 East 30th Street, Baltimore. So you see, it's our story after all. Congratulations, Mr. and Mrs. Molz!

#### Valuation Department

Correspondent, J. A. RENEHAN

It is with regret that we announce the resignation of G. B. Saumenig, our former correspondent, to accept another position which we hope will prove profitable to him. Mr. Saumenig was well liked by every one and we will miss his smiling countenance and good humor.

J. V. Smythe, our popular athlete and one of our mainstays of the Duck Pin and Baseball Teams, who by his determination helped to uphold the morale of the teams which never gave up until the last ball was rolled and the last man out, has accepted a position with the Big Four at Cincinnati. Our best wishes go with you, Mr. Smythe.

On October 7 our esteemed pilot engineer, A. W. Taylor, formerly of Cincinnati but now of the Baltimore office, will take unto himself a wife, who will promise to love, honor, and obey, and will not interfere with his nights off. To quote his own words, "I have it down in black and white." We wonder ????

We were sorry to hear of the accident which befell Miss Ritter, who while running to catch a Brill, fell and scraped her arm and suffered other injuries not noticeable. Moral: More haste less speed. Baltimore is past the days of one-car car lines. Ray could hardly be waiting at the other end.

Silk skirts are what made "Lillian Russell." Wonder if silk—made "Vic" hustle?

There are wedding ties, neckties, shoe ties, crossties, switch ties and home ties,

but the kind of tie that Slocomb ties is the tie that Flannigan says does take the prize.

And speaking of wedding ties, we have established definitely that on September 18, 1922, John Frederick Rau will journey to Maine on his honeymoon and on his return will occupy his new cottage in Forest Park. Good luck!

Having mentioned two weddings which are to be consummated in the very near future, by no fault of the correspondent the fast approaching catastrophe into which Miss Schaefer is about to plunge almost became side tracked for the New Orleans Special (next article). She will be married before this goes to press.

All aboard for the New Orleans Special! Among those present will be Second "Loeey" S. T. W. Green, accompanied by Buck Privates C. R. Hannum and P. B. Milburn. During the early part of October this trio will attend the American Legion Convention at New Orleans.

Sein's how long skirts are coming into view, we wonder if Miss Waugh will be the first to introduce the fad in the Valuation office.

#### Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPURT

"Oh girls, they have the dandiest officers on the Merchants & Miners boats to Jacksonville, especially those second and third line boys."

Several of the young ladies of this office went canoeing on the afternoon and night of September 2. Beautiful moonlight night, but the most popular spot on the entire Jones Creek seemed to be in the shadows of the bridge. While we can vouch for the ladies in the party, there must have been a bunch of real live escorts on hand. Just imagine a nice, good looking young lady finding it necessary to resort to the old gag about being cold, and the young man in real earnest, offers the use of a blanket. Yeh, some uy! hundred yards, you can't see anything but boat. After scaring the other members of the party nearly stiff, two heads appear above gunwale. Still another bird is eating all the time. Yes sir; it's a great life.

On Friday night, September 15, the office bowling league got under way for the season 1922-1923. The Y. M. C. A. alleys have been secured for the coming year, and with four teams in the field, all of which have been grouped as equally as is possible, with all the boys ready and eager to step in and take a cut at the sticks, a hard campaign is in view. This is the third season for our league and interest is just as keen at this time as at any period since we started. Here's hoping for a most successful season.

**Auditor Disbursements Office**

Correspondent, JOHN SVEC

Surprises seem to be plenty here of late, but the biggest one we have had was when Miss Margaret Butler announced that she was leaving to be married. "Maggie," as she was called, never breathed a word about her engagement until she was leaving us on September 2.

The wedding took place on September 11, at St. Mary's Star of the Sea Church. Mr. and Mrs. H. P. Beaudette, after taking a trip to Elkhart, Ind., Mr. Beaudette's former home town, will reside on Calhoun Street, Baltimore, Md.

Miss Elizabeth Bevan and Miss Marie Brown have returned to work, after having been absent for several months.

**Auditor Merchandise Receipts**

Correspondent, P. H. STARKLAUF

Those inclined to be aquatic are seen here as in competition: Max Linder, alias "Sea Lion," and N. E. Burman, alias "Yellow Perch," deciding that each had the better of it on Saturday, July 29. They ran off from the Thompson Sea Girt House. Yellow Perch swam five miles in three hours

twenty-five minutes, while Sea Lion swam three miles in three hours fifteen minutes. This decides the championship of the Percentage Bureau.

The Tickletoe Twins are at it again this season picking up trophies in the canoe races.

Weddings: Charles L. Pailer, Interline Settlement, to Miss Lillian K. Altwater, March 29, at Westminster by the Rev. Seabrooke, Joseph O. Hannibal, Interline Settlement, to Miss Rena Strathmeyer, June 14, by the Rev. Dr. Eager at Fuller Memorial Church. Charles Hodges Benson, Interline Settlement, to Miss Marie S. Medinger, Interline Settlement Bureau, at Washington, D. C., July 29, by the Rev. George Wesley Moore, pastor Mt. Vernon M. E. Church South. Miss Johanna Camper, Interline Settlement Bureau, to Ernest Lowe, May 18, at York, Pa. Best wishes!

Here we also have some of our girls rusticating around the cataract of Niagara—Agnes, Helen and Mary.

We, too, envy some of our constituents who have done the trip across the continent: Chief Clerk R. E. Mitchell, M. M. Gardner and Miss M. M. Fleming.

Quite a sweet little note was received from Eddie Cronin by I. M. Hudgins, expressing his appreciation of what the organization is doing for him and his return to good health. Atta' Boy Eddie! Glad to learn you're beatin' it back splendidly. Then, too, you are getting to be some rooster. Keep it up and you may be a controlling factor in the Frederick County League.

Certain inquiries about the care free life on the farm and its many rewards and responsibilities. They say he comes from down around Solomon's Island where Maryland started to grow.

They say that one of our mature "Roses" is about to jump off the bridge. No girls, nothing short of a cyclone would surprise us here.

The boys of the Revision Department had a crab feast some Saturdays ago. It was a gala affair. Ask the Committee, they know.

**Auditor Passenger Receipts**

Correspondent, E. B. HOPPMAN

Don't fail to note the pictures of some of the handsome and promising young folks of our office. Yes, for the benefit of the boys who will be anxious and inquisitive about the picture of the ladies, Miss Benson and Miss Civish, I will say they are still single. We also want the girls to notice Marvin Clarke. We are withholding his address to avoid the rush.

Our young musical director, Nelson Whitcomb, and his orchestra entertained the Baltimore and Ohio veterans at their last meeting. Willie Thomas beat the drums to beat the band.

That our studious young gent, Robert Machin, does not waste one moment is shown by the fact that he spent his vacation taking a course at The Summer School of Religious Education, at the University of Syracuse. Among many other privileges Robert had there he boasts of sleeping with Chief White Face, a full blooded Indian who was also a student. Robert speaks very nicely of the campfire girls of Syracuse; I'll bet he was very popular with them; he surely is a heavy man with the ladies. Among other things he speaks of in regard to this trip is the dining car service on the Baltimore and Ohio, which he recommends highly and he ought to know for he is some eater. The picture of Robert which we present here shows him as he appeared when imitating Penrod on stunt night at the University.

To the boys of the office who like to crab, I would suggest that you see Joseph McGrain. From the size and number of crabs that he says he caught on his last crabbing expedition in the waters of the Patapscio River, he must be an expert at the game.

Leo Dunphy has been elected captain of our office bowling team again this season. We wish you and the boys success, Leo. Under the captaincy of such a leader they will make a great showing.

Myron Knouss left the service on August 29, to join his father in business near Gettysburg, Pa. Mr. Knouss was an excellent clerk and earnest worker, and we are sure he will be a great help to papa.

Our office bell-hop, Baldwin Krumholtz, certainly shows that he means well; he is now taking a well known medicine which is supposed to produce energy.

Well, the vacation season is about over and we are all back at our posts, pushing ahead just as earnestly as ever. In taking their vacations our clerks have taken the advantage of practically every facility for rest and enjoyment. They have visited seashores, mountains, farms, gone to sea and traveled north, east, south and west.

Atlantic City proved a favorite among our vacationists, and among some of our folks seen there were: Misses Anna T. Civish, Virginia Benson, Marion Gray, Helen Downey, Theresa Cook, Augusta E. Fenton, Mr. and Mrs. Harry E. Schmidt, Messrs. Arthur Tucker, James B. Zimmerman, Frank Lyons, W. T. Jenkins, and Zachariah T. Mewshaw.

We hear that the lively youngsters' Mewshaw and Jenkins, made a brilliant showing at Atlantic City. They were ardent admirers of seashore scenery; I am told that Mr. Jenkins even missed some of his meals rather than leave the beach. Mr. Mewshaw could not be induced to go in the ocean; when asked why, he stated that he bathed before he left home and it wasn't necessary.

Willie Thomas spent his vacation motoring to St. Michaels, and I am sure he was not a bit lonesome. Who is the young lady that seemed to enjoy Willie's company and machine so much?

We wish to announce that our chief clerk, G. William Jentner, who met with an accident on August 4, an account of which appeared in September issue, is getting along nicely and we are looking forward to his early return.

On Friday, August 25, our office Baseball Club journeyed to Grafton, W. Va., to play a picked Baltimore and Ohio Club of that city. Our boys made an excellent showing up to the 8th inning, when they broke under the strain of traveling and extensive training, losing the game to the Grafton boys. Manager Jenkins says he intends to return

next season and take the laurels from them. This trip was one that was well planned and will long be remembered. We were met at the station in Grafton by the manager of the baseball club, Mr. E. Pepper, and taken to the hotel where breakfast was awaiting us. From the time we arrived until we left on Saturday night, we were treated royally, and the boys are looking forward to another trip to Grafton next season.

## New York Lines Pier 22, N. R., New York

Correspondent, JOHN NEWMAN

TO THE MEMORY OF JOHN T. GORMAN, freight agent at Pier 21, E. R., veteran employe, gentleman, good natured, tolerant, obliging while alive, remembered when dead. Born in 1870, Mr. Gorman entered our service in August, 1899 and was made agent the same year. On the morning of August 21, last, while preparing to leave his home for his office, he was suddenly summoned to join the grand army of the faithful. His death from heart failure was entirely unexpected and a shock to all who knew him. Vale!—Mr. Gorman leaves a widow and a young son to mourn him. We sympathize.

" . . . Ay, for a little space

their place,  
But . . . having wept, press on again."

*H. C. Bunner*

Some of our vacationists this summer have visited Niagara Falls, ostensibly declaiming "See America First," but saying nothing about their purpose to see Canada next, on the same trip. Others, however, have openly declared their destination to be "Across the St. Lawrence." (Ubi mel ibi apes—Where the honey is there swarm the bees.) Frank Archibald visited Quebec, had his picture taken, wearing a monocle; the limp attitude and the necessity of the support of a column bears out his statement that the picture was "shot" in Canada. "Chuck" Connors has just returned from a sojourn in Montreal. The story he tells of a certain "German restaurant opposite the Notre Dame" of sauerkraut and pigs-nuckle and "etwas dazu" in "Seidels" (where did we hear that word before). Siedels, a foot tall, "und so weiter," makes

our eyes and mouth water—with emotion and desire—"A Seidel—a Seidel"—how easy to pronounce, just like a "Million—a million," and just as hard to procure this side of the St. Lawrence.

Terminal Agent Biggs has gone off on his vacation. Destination: Quebec. (This is a separate paragraph, Mr. Editor; please don't connect it with the foregoing.) The Canadian climate is fine in summer. In winter there is an equally fine climate in Havana or the Bermudas.

Promotions: Terminal Claim Agent C. E. Floom has been promoted to the Agency at Pier 21, East River, vice J. T. Gorman, whose untimely death we have announced; Chief Clerk A. H. Bayer, Pier 22, North River, was made terminal claim agent; Head Clerk Robert Riddell, in charge of the Eastbound Department, was promoted to chief clerk, vice Mr. Bayer. These promotions were by appointment. The vacancy left by Mr. Riddell was "bulletined" and allotted to the senior applicant, who, by chance, happened to be the right man for the place, "Al" Fox, who has had charge of the Eastbound "downstairs." His job and the succession of others in sequence were then posted as vacant and in turn filled by those having the necessary and lately much discussed "seniority."

The correspon lent has just received the picture postal card shown here, with the following "poem" on the other side:

Wonderful view—excellent brew—  
Nothing to do but get on a "stew"  
I wish that you  
Were here, too,  
Then we two  
Would both have a stew.  
A month of that  
Would make us fat,  
But make our "bk bks" thin and flat;  
For the prices they charge  
For stews, (not large)  
Have nothing to do  
With the cost of the brew.

The card is signed "Lou." Handwriting very irregular (reason obvious). We disclaim acquaintance with him. We don't stew.

Our "Chief of the Miscellaneous Bureau" (payroll title) is a follower of the apostles and Ikey Walton, being a fisherman whenever the duties of the bureau permit. And the definition "a worm at one end, a foot at the other" does NOT apply to him, for our Mr. Reilly, of whom we think most highly as a prevari—, (meaning joker) avers that J. J. D. never returns from his piscatorial pursuits without fish. If he catches none with the worm he tries with silver and brings home the bacon from the fish-market. Sometimes the fish has looked so suspicious that his mother has surreptitiously smelled at it before cooking. This is all according to C. H. R., our Mr. Reilly. Anything that C. H. R. says must be taken with salt, like John's fish, but if the story is true, it disposes of the above quoted definition as being not applicable to this fisherman.

In this connection (the connection will be seen later) we want to mention that at the time of this writing there is, and has been for a week, due to some sewer trouble, a great lake, with bays and peninsulas, extending for three blocks up and down, covering the "farm" in front of Pier 22 and neighboring piers. It is necessary to detour this body of water to get to the office, (which may be taken advantage of as an excuse for arriving late, as a variation from the regular excuses). While the city fathers are debating whether to bridge it over, tunnel under it, or install ferry service, the liquid is gradually accumulating a con-

Happy is the man who has a history in Quebec! See note above

# Hamilton Watch

"The Railroad Timekeeper of America"

## You Don't Doubt Your Time When Your Watch is a HAMILTON

IT'S dangerous to be in doubt about your time. A Railroad Man must be sure of his time, his signals, his train, and his schedule. The HAMILTON WATCH eliminates doubt about your time. Its fame as an accurate timekeeper is well established among railroad men throughout America, due to its accuracy, sturdiness, and dependability.

Conductor N. J. Lorang, here shown ready to board his train, the "Peoria Flyer" on the Rock Island, has been a conductor for over seventeen years and has owned his HAMILTON for over twenty-two years. In all that time his HAMILTON has rendered True Time service.

If you want accurate time, with doubt eliminated, ask your jeweler to show you the twenty-one jewel "Railroad Timekeeper of America,"

**The HAMILTON No. 992**  
**Now Priced at \$48.50**  
(Movement Only)

When you invest in a "992" you can rest assured that you will have true time—for this is the watch that times many of the fastest trains and is the proven choice of most Railroad Men.

HAMILTON WATCH COMPANY  
Lancaster, Penna., U. S. A.

Send for "The Timekeeper," a Book that describes and illustrates the various Hamiltons and gives much valuable watch information.

sistency and color resembling that of mock turtle soup and assuming the odor of a Kaffir camp. We feel that there are no fish in this lake, but it will answer admirably for fishing. (Fish-market only four blocks away.)

"Fra" Speckman has had his hair bobbed. As a haircut it is a mistake, but as an exhibition it is a success.

The following ad appeared in the N. Y. papers June 30th:

BOY—Red-headed, about 16 years of age, well recommended. Automobile Merchants' Association, 1845 Broadway, 3d floor.

Red-headed and 16! What other recommendations do they want? We would rather be red-headed and 16 than John D. Rockefeller or the czar of Russia, or what we are.

Miss May Caffrey, "Our Mary" that was, has left us. She was promoted into another department and we see her no more. No more will she assist us in preparing the payrolls; no more will we hear that soft nasal humming that enchanted us during our busy hours. She is gone. Of course, we are glad that she was promoted, and we wish her more promotions, though we grieve.....(We are told that she has lost her voice or become hoarse or something because of having had to repeat the word "No" so often since her picture and the write-up that we gave her appeared in the July issue. Moral:—Advertise.)

The other day we made a payment to a "furriner" by the name of Stanislaw Lodowiskey. We dont know what the Stanislaw stands for but we could sense the load-of-whiskey. And still they ask us: "What's in a name?"

No news of further engagements. Please get engaged and bring the secret to the correspondent; we will pass it along to the MAGAZINE readers. We are romantic and love to announce engagements, bridals and births. Do something. Hand us some photos of your little ones to be immortalized in the pages of the MAGAZINE. See how the other divisions brighten the pages

I feels dog-gone Happy

The cartoonist, of Pier 22, N. R., talks as if he had recently been to the original Frankfurt am Main

of the Among Ourselves section with pictures of their babies and youngsters. Go thou and do likewise; strive to equal or excel them, or they may think that you are all living on "Fifth Avenoo" and have nothing to report.

We have seen sunbursts and sunburns but never aught quite so brilliant as the *couleur de rose* on Miss Gleason's *petit nez* after one day's outing on the water. No Norwegian sunrise or California sunset ever was quite so red. Miss G. assures us that it was the sun, but adds, "never again."

A postal card recently received by one of the boys at Pier 22 from one who was enjoying his vacation in rural surroundings (at least we presume that he was enjoying it), contained, in addition to the usual "having a fine time," a post scriptum reading "Pass this around".....

"A penny saved is as good as a penny earned," is a proverb commendable to such thriftless spenders as send these cards to all their friends; yet as someone said, "economy can be carried too far in eating watermelon." We would say "not only in eating watermelon."

Larry Improte's motto:—"If at once, twice or thrice you don't succeed, try, try again." It is a good motto, Larry.

## Staten Island Lines

Correspondent, G. J. GOOLIC

An unusually attractive wedding was that of Miss Anna Mundy Bones, daughter of Mr. and Mrs. Louis Simmons Bones of No. 11 Slosson terrace, New Brighton, to Jacob Lewis Suesserott, division engineer, Staten Island Rapid Transit Railway. The ceremony took place at St. John's Church, Clifton, on Saturday afternoon at 4 o'clock. The Rev. William H. Pott officiated.

Because of alterations being made in the church, the service was held on the lawn. A white altar decorated with large bunches of goldenrod, surmounted by a gold cross, stood before a group of large green trees and oak branches. An aisle was formed from the vestry door by means of garlands of goldenrod.

As the bride came forward on the arm of her father the chimes of St. John's broke forth, accompanied by the organ, violin and a soloist, Carl Ash, singing "O Promise Me." The bridesmaids walked down the flowered pathway to meet her.

The bride's gown was of white lace with pearl garnature, with a train of chiffon outlined in pearls, and a circlet of orange blossoms held her tulle veil in place; she carried a shower bouquet of white asters and lilies of the valley.

Her two sisters, the Misses Priscilla Conard Bones and Marie Clawson Bones, wore gowns of painted yellow chiffon, brown velvet sashes, brown slippers and stockings and large brown velvet hats with shaded yellow and brown plumes, and carried armfuls of orchids and white asters tied with myrtle vines.

They were preceded down the aisle by little Miss Ellen Hubbard Bones, younger sister of the bride, as flower girl, and Master Jack Baylis, son of Captain and Mrs. John S. Baylis, as page. Both were attired in dainty white China silk and carried between them a large basket of yellow flowers.

A reception followed in the parish house for the relatives and intimate friends of the bridegroom. Refreshments were served by Fantozzi.

After a short wedding trip Mr. and Mrs. Suesserott will reside in their new home at No. 462 Tysen Street.

"Hot Dog." The latest style on the S. I. R. T. is to feed your dog with \$20 bills.

George Styles, supervisor of crossing watchmen, while eating supper, took his handkerchief from his pocket and in doing so, dropped something. A few minutes later, "Geo." heard his dog chewing on some paper, and on investigating, found a twenty dollar bill all torn to pieces. It had dropped out of his pocket. After the pieces had been pasted together and presented at the bank, George received a new one in its place. Tough luck, George!

No cartoon this month. Cartoonist P. Santoro was away on his vacation of two weeks and had no time to make cartoons. "Patty," as he is known, spent his vacation at Susquehanna, N. Y. He has promised to double up on the next issue. Keep your promise, "Patty."

We would like to know whose "Studebaker" runs up and down Richmond Avenue, Port Richmond, on Saturday nights. Probably L. C. in the Division Accountant's office can explain.

L. C. If you want a good car buy a "Stude."

H. M. Studebakers are alright for carrying ice. Elgin 6, that's my speed.

A. O. Cut out talking about oil cans and buy a real car, a "Hup" for instance.

We are pleased to announce the marriage of William Murray, C. T. time clerk, to Miss May Heron of 125th Street, New York, at 8.00 a. m. on Saturday, August 19. Mr. Murray was presented with fifty (\$50.00) dollars in gold from the Division Accountant's Office. The honeymoon was spent at Niagara Falls, after which they will make their home at St. George, Staten Island. We all wish them both a happy future.

The season for crabbing in and about New York Harbor has been very good this year. Henry Goolic, clerk, track supervisor's office, has sought a new way of getting them. Instead of scaffolding them with a scaffold he dives after them, clothes and all on. How about it "Henny," was it an accident?

Portland, Maine must be some town when "Joe" Bloom and "Bob" Wilson, clerks in the Tompkinsville freight station, pick it out to spend their hard earned vacation in! Judging from the cards received they hung their hats in quite a few places—like a freight car—never in one place.

## Eastern Lines

### Baltimore Division

Correspondent, W. H. TARR

We quote the following from a Seattle, Washington, paper concerning the demise of Mr. Edward L. Dudley, formerly a Baltimore and Ohio employe:

"Edward L. Dudley, formerly of Grafton, West Virginia, died at the home of his sisters, Daisy and Della Dudley, 4546 Northeast, on the morning of the Fourth of July, 1922. He was a graduate of the State University of West Virginia, with the degree of B. S. and M. E.

"Mr. Dudley had been in the employ of the Baltimore and Ohio Railroad for several years. Later on he decided to come to the Pacific Coast and he was in the employ of the Union Pacific System for ten years, the last six of which were spent at Pocatello, Idaho, in the machine shop, where he had a number of men under his supervision.

"Mr. Dudley was a member of the M. E. Church of Grafton, West Virginia. Last summer he had a very long siege of severe illness and came to Seattle with his family to spend the summer with his sisters. He fully recovered and returned to his home at Pocatello, feeling that he was practically a new man physically. He had a very successful and seemingly good winter at his home; but on approach of warm weather he was taken ill and it was decided to come again to Seattle. Upon his arrival he was immediately put to bed, thinking that a little rest would do him good and he would fully recover; but he seemed to grow worse and worse until the end came.

"He was comparatively a young man of considerable ability and intelligence. He was very domestic in his affairs and always enjoyed being with his family, consisting of his wife and two children."

Mr. Dudley served his apprenticeship in the shops at Grafton, W. Va., and at Mt. Clare, after which he went to the Test Bureau. Your correspondent happened to be a room-mate with Mr. Dudley while in Baltimore; and while Mr. Dudley was stationed at Pocatello, Idaho, he furnished the correspondent with copies of The Union Pacific Magazine issued by the Union Pacific Railroad and of the same standing as our Baltimore and Ohio MAGAZINE.

After 40 years of faithful service, Conductor W. E. Late, oldest conductor in the service of the east end of the Division, was placed on the Pensioners' Roll of Honor.

A. S. Poe, resident inspector, Pittsburgh' paid us a call while on a recent trip East. We are always glad to see our former acquaintances and especially so as Mr. Poe was a member of the organization composing the Cement Laboratory Force at Wheeling, W. Va., which later was moved to Baltimore. Others of this organization which were brought to Baltimore are: W. M. Stedman, now chief chemist, Test Department, Mt. Clare; A. B. Criswell, resident inspector, Cincinnati, Ohio; and C. M. Arnold, cement tester, now with the Test Department, Mt. Clare.

It seems that Dan Cupid is having a run in the Division Accountant's Office, Camden Station. R. H. Williams, Jr., of that office was married on August 10 to Miss Katherine Elizabeth Ehmling. His friends in the office extend congratulations.

Another member of that force, Miss Ida Rice, was married on September 4, to Mr. John Rider. We are told that Mr. Rider is a manufacturer of candy; but we do not know whether the amiable disposition of Miss Rice can be attributed to that or not. However, our best wishes are extended for her future happiness.

Your scribe paid a visit to Timonium Fair, Baltimore County, on Labor Day, September 5. The fair this year seems to have surpassed all other years. It was noted, however, that the service furnished by the Railroad to this point did not compare with service furnished by the Baltimore and Ohio during the Races at Laurel in October of each year.

Miss Elizabeth Carr, a member of our office force, was observed at the fair. She and her friend seemed to be greatly interested in the pigs, of which there were a large number on exhibit.

Miss Laura Hackett, clerk, M. of W. Department, when delivering a pass to an Italian, received a kiss on her hand. Her associates in the office wonder what would happen if she had given him a pay check.

W. B. Weise has received personal appointment position of clerk to passenger trainmaster.

Signal Supervisor B. H. Prinn has been suffering from a boil on his finger; notwithstanding this disability he has been keeping right after the interlocking work on the division.

As between Assistant Division Engineer Lynch and Military Observer Lieut. L. Pope, we are told the balance of the Division Engineer's Staff spend their evenings reading newspapers and magazines. (We do not know the joke.)

Ben Bell, our former office boy, has become a fullfledged stenographer and is now pounding the keys for Correspondent Clerk E. L. Mallery.

We regret to chronicle in these columns the death of Carpenter Foreman Thomas H. Holton, who dropped dead on August 21 while on a street car in Baltimore. Mr. Holton was born on June 1, 1861. He had been in the Company's service since June 1, 1882 as carpenter and foreman in the Maintenance of Way Department. His principal work was in looking after repairs to bridges and trestles.

Brakeman W. H. Stone, who resides at Gaithersburg, Md., and runs on the Metropolitan Branch, is again in the market with his dahlias, this being the season of the year for them. His dahlias are as beautiful as ever.

We trust e'er this appears in these columns that our old time activity will be with us; and with this in view, our furloughed firemen and brakemen have been checked, anticipating early recall of all furloughed men.

**East Side, Philadelphia**

Correspondent, CHARLES H. MINNICH

The accompanying photo is of "Si" Young, newly appointed janitor of the "Pullman Boarding House Cars" at East Side, Phila. "Si" is a remarkably versatile musician. In fact, he can play 21 instruments and is taking lessons on nine more. He entertains the men in their off hours in the Pullman Palace Cars parked here. It's a good thing Keith's Vaudeville Booking Agency doesn't know that "Si" Young is janitor here or they would want to take him away from us, gold teeth and all.

Joseph Hobson, Veteran tool room attendant in the Car Yard, died on Thursday, August 24, after a long illness. He had been in the Baltimore and Ohio service for at least 35 years, and was soon due to be pensioned.

All the girls in South Philadelphia have flocked to Wildwood, N. J., this week to meet Mr. "Jack" Ehrig, the Sport of Eastside. "Jack" has on all his Sunday-go-to-meeting togs and expects to make a big hit with the "chickens" and they are just wild about him.

Whenever they need a GOOD man at other points, they always pick out our beloved General Foreman C. B. Smith of East Side. My, how we miss "Smitty" with his cheerful countenance and witty remarks and his eternal chew of tobacco!

Among the new property owners at Wildwood-by-the-Sea is J. P. Dimond, roundhouse foreman, East Side. Our prosperous friend was welcomed as the newest owner of a cottage there. John has been working about 48 hours everyday and we are very glad that he will have a nice place.

**Washington, D. C. Freight Station**

Correspondent, W. L. WHITING

Some time ago Assistant Coal Clerk Paul K. Lee was very anxiously inquiring as to whether a certain pass for which he had applied had been received. His anxiety in the matter has since been explained. Paul was looking forward to a short vacation. When the time arrived he journeyed to the city of Buffalo, N. Y. and there took unto himself a bride! The news did not reach us until after he had left Washington, and we could not congratulate him in advance. However we now extend our hearty good wishes to the "newly-weds" for a long life of health and happiness. Mrs. Lee was formerly Mrs. Robbins, and is the mother of a charming young daughter. Mr. Lee has also had experience in the matrimonial line. They spent an enjoyable honeymoon at Buffalo and Niagara Falls.

A number of other members of our force have also enjoyed short vacations. Demurrage Clerk J. H. Huhn spent his rest period on his small farm at College, Md., doing the necessary work on the estate to insure a good crop for the winter's needs. O. S. & D. Clerk J. B. Everson visited Sandy Springs, Md., and came back with a tan on his face that showed that all his time was not spent indoors. Tallyman E. J. Quinn made an extended trip through the New England States, visiting New York City, Boston, Portland and Bangor, Maine.

"Si" Young, East Side, Pa.

Washington, D. C. Freight Station Employees

Eddie came back looking better. The pine boughs of Maine still furnish the fragrant, sleep inspiring couches that they have so long been famous for. Buffalo and Niagara Falls seem to be the most attractive spots this summer. Miss Mary McDonnell, cashier's stenographer, spent a pleasant week at those delightful places, enjoying most of all the swimming around Buffalo in Lake Erie.

Our sick list does not diminish very rapidly. Miss Gerhardt was very ill for about two weeks, but has returned to duty, and hopes to continue on the job for a long time.

Miss Gladys Beall is very ill at her home in Laurel, Md., but last reports indicate that she may be with us again before very long. We shall all be glad to see her return.

Rate Clerk C. A. Ridgely, and Delivery Clerk M. M. Phelps, suffering from eye trouble and a broken leg, respectively, are, according to last reports, progressing as favorably as can be expected. We are hoping that both will be in a condition to return to active service before long.

In the meantime business is certainly keeping up here; both in and outboard showing signs of the usual Fall trade.

We've been took! A man came around one day with a camera, pointed at this office, and demanded our pictures or our money, and before he got away he had obtained both.

The accompanying photograph shows the result of his endeavors. At last reports the camera had survived the ordeal; that was probably because some of our Force did not get into the picture. Anyway it is a good looking bunch, and we are proud to be able to introduce our readers to some with whom they have often spoken over the telephone, and whose names are perhaps familiar, but whom they have never seen in the flesh.

The lower row from left to right shows Vincent Clark, agent's stenographer; "Teddy" Selke, index clerk; Charlie Warfield, a veteran in the business of assistant cashier; "Jack" Mullikin, collection clerk; Ralph Montgomery, utility man; Mollie McDonnell, cashier's stenographer; Winnie Tyler, O. S. & D. clerk; M. T. Hill, assistant freight agent; Gladys Beall, waybill and abstract clerk; Katie Gerhardt, freight bill clerk; Irving Catterton, cash clerk; and J. T. Mathews, general foreman, another of our veterans who keeps things going on the platform. Wedged in between Winnie Tyler and Gladys Beall, and just back of the assistant agent, the faces of J. C. Reed, receiving clerk and "Bill" Coates, yard delivery clerk, are seen.

In the next row the familiar faces of H. G. Howard, correction clerk, and "Pete" Smith, revising clerk, appear, and also that of our good friend, J. P. Stephenson, "Stevie," who takes care of the interest of the Merchants' Transfer Company at this station.

The upper row consists of "Gene" Scaggs, the man who is going to see that the good folks of Washington, D. C. do not run short of coal this coming winter. (If there is one thing that "Gene" does understand it is the handling of the coal cars.) Next in line is E. W. Kidwiler, waybill clerk; and down lower in the line is J. H. Huhn, demurrage clerk, who adds to the revenue by making our patrons come up with the dough when they do not unload promptly. In the corner comes "Johnnie" Everson, O. S. & D. clerk, who keeps the public in good humor through his ability in making up "overs" and "shorts."

### Mount Clare Shops

Correspondent, MOLLIE S. ALBRECHT

#### Superintendent's Office

We don't know whether the constant buzzer ringing for our messengers reminds them of the fact that they *might* make good electricians or not, but we have had four messengers to "graduate" into electrician apprentices. The last one added to the list was Arthur Englehart. We surely hated to see Arthur go, but he makes his appearance at the window every few days, and we can still see his cheery smile through all the dirt and grime. He is now learning to repair the same blamed old buzzer that used to make him run his legs thin.

I have been receiving complaints again about not giving the shops enough "write-up" in my portion of the MAGAZINE. All I can say is that you get in back of your correspondent, (as there is one in every shop), and either use some T. N. T., or get your tongue to wagging on him for a bit, and maybe he'll loosen up, and give me a few

notes and pictures, and you won't feel slighted.

#### Shop Order Bureau

"Joe" says it's a shame the dresses are getting longer, for this will necessitate the men getting back to their old stunt of standing around on the corners, etc. etc. He also says the girls always have been a mystery to him, and have kept him guessing, but they'll be a regular riddle now! (Maybe they are, but we doubt it!) "Joe" isn't quite as innocent as he looks!

We are just a little bit afraid to write very much about a certain young man in this office, as he seems rather shy and bashful about having his name in print. We are sorry, too, for we *might* be able to write something interesting. However, don't lose hope! He might "release it for print" shortly.

#### Accounting Department

Nothing exciting has happened in this office recently. No marriages to report, but we expect to have some to report in the near future. Here's hoping, anyway.

Mt. Clare, as a whole, is running as smoothly as can be expected. Everybody has been "kicking" about the hot weather; the girls are tired of wearing their light clothes and want to wear their furs, and the men are beginning to leave off their mohair suits, and put on their light fall clothes. (This is a sure sign that the leaves will soon turn red, and some twirling and dancing under our feet, and the ball rooms, and frat houses will see us twirling and dancing on them again.)

Good old Winter! We salute you!

Nobody at Mt. Clare, or, in fact, on the System, needs any introduction to this man. Those who have had the opportunity of passing through or by the gates of Mt. Clare Shops for the past thirty-five or forty years, know the ample figure of our watchman and friend, "Bill" Garber.

"Bill" had to quit his post from June 24 to September 10, because of serious illness, which, we can assure you, is the only reason which could keep him away from the gate. He isn't looking just fit yet, but by the time this MAGAZINE reaches you, we hope to see him looking as well as usual, and able to get around without the aid of his cane.

Here's luck to you "Bill!" We hope you will be able to put at least two more stripes on your sleeve!

#### Here and There at Mt. Clare

Contributed by C. RAEUCLIE

Foreman Kelly of the Axle Shop seems to be having connubial difficulties. His better three-quarters (not half any more!) seems to think Kelly is a he-vamp. Better be "keerful" Kelly; them motorcycles are dangerous animules.

Popular "Bill" Garber, watchman at Mt. Clare

**Cumberland Division**  
Correspondent, J. J. SELL

The peach and apple crop in this territory is very small this year, the crop having been almost completely ruined by the late frost. However, the fruit that survived is of a very good quality and size.

Cupid is claiming another one of our charming young clerks, Miss Elizabeth McNeil having resigned her position as secretary to the master carpenter to become the bride of a promising young business man of this city. Their many friends are wishing them much happiness.

It is with regret we have to record the death of Mrs. Francis Perry, who suddenly died on August 21 at her home in Cumberland. Mrs. Perry was employed in a clerical capacity in the various offices at Cumberland, having worked in the Superintendent's Office just prior to her death, which was quite a shock to her many friends. She filled the positions she held efficiently, and with her genial disposition she will be missed by all. Mrs. Perry was the widow of the late William Perry, passenger engineer, running between Cumberland, Grafton and Parkersburg. The various office forces with whom Mrs. Perry worked, as well as the members of the Brotherhood of Railway Clerks, of which she was a member, visited the late home in a body to pay their respects. The remains were taken to Winchester, Va., for burial. The number of floral tributes attested to the high respect in which Mrs. Perry was held throughout the city. She is survived by her mother and sister, to whom we extend our deepest sympathy.

The cleaning of ballast on the West End of the division is progressing rapidly, and the track is being put into first class condition for winter, under the supervision of M. B. The engagement of one of the fair young ladies of the Division Accountant's Office has just been announced. Miss Ora Bauer will become the bride of Mr. Earl Robert-

son, who holds an important position with Cumberland Contracting Company. He was formerly an employe in the Division Accountant's Office at Cumberland. The wedding is scheduled to take place during the early fall. Their many friends are wishing them much happiness.

Motive Power Timekeeper Edward H. Ravenscraft, Division Accountant's Office, has been temporarily transferred to Keyser in similar position.

Miss Shirley Jane Romiser, tonnage clerk, Division Accountant's Office, is spending an extended vacation in Cheyenne, Wyoming.

Miss Laura Lingamelter, secretary to the division engineer, has resigned to accept an important position in a local bank in Martinsburg, W. Va.

G. Frank Messman, report clerk, Superintendent's Office, spent two weeks vacation accompanied by his wife and son, in Brandonville, W. Va. This point is much removed from any railroad, and permitted "Grandma" to get back to nature, and secure a much needed rest.

Agent J. L. Brown, Great Cacapon, reports a big crop of corn this year, if he can only find time to harvest it. This is some news; we thought "Brownie" was specializing in beans. Why the change, J. L. B.?

With the number of weddings his summer and fall, our list of eligibles is fast diminishing, but there are still a few old timers who are dodging Dan Cupid. We hope to get them lined up, and will keep our readers fully advised.

Some of the boys are asking why Luke Burns, Transportation Department, Baltimore, spends every Sunday and Holiday in Cumberland. There must be a reason. Won't you tell us what it is, Luke?

Raymond E., attractive little son of Car Foreman Cox at Locust Point. Raymond likes golf, and is very fond of the swimming pool at Clifton Park

"Shorty" McConnell, the Blacksmith Shop wonder-child, was seen with three different hats in two days. You tell 'em what happened to two of them, "Ike."

Foreman Raeuchle of the Flue Plant wishes to announce that there'll have to be just one more place set at his family table, and that now it will mean that pretty little dresses, and ribbons, and little Mary Jane pumps, and all the rest that goes to make up a dainty little girl's wardrobe will have to be purchased. Of course you can imagine just what we mean. On September 7, this tiny little lady made her appearance into the home and hearts of the Raeuchle family. Dad and the boys say they are doing nicely with the household duties. We extend our best wishes to Mrs. Raeuchle and little Miss Raeuchle.

"Gus" Henson, and Charlie Raeuchle were under the impression that they were the only candidates for the Bald-Head Association Presidency at Mt. Clare, but they find they will have to do a lot of electioneering! The following men also wish to sit in the chair: Charlie Weber, "Jack" Conen, Frank Paulis, "Ed" Moran, "Johnny" Wilhelm. Those who are nearly persuaded to enter the race are "Tighl" Isaac, "Ed" Johnson, "Gus" Tew, and "Buck" Burns. Out of this bunch of supervisors, we ought to be able to pick one good, shiny-pated president.

**Be What You Is**

Don't be what you ain't  
Jes' be what you is.  
If you is not what you am,  
Then you am not what you is.  
If you're just a little tadpole,  
Don't try to be a frog.  
If you're just a tail  
Don't try to wag the dog.  
You can always pass the plate,  
It you can't exhort and preach.  
If you're just a little pebble,  
Don't try to be the beach.  
Don't be what you ain't  
Jus' be what you is,  
For the man who plays it square,  
Is a-goin' to get "his."

—Northern Light

**PAY DAYS AT CAMDEN STATION**

Please mention our magazine when writing advertisers

If a man would only put as much "pep" in his work as he does in his cussin', there would be more rich folks.

With the winter months fast approaching, interest is increasing in the Checker Club. B. A. Noon and B. E. Tasker are sparring for an early start for the championship of the division, with Noon, three time champion, the favorite. He will no doubt be able to retain the honor for the division.

**Keyser**

Correspondent, H. B. KIGHT

Deer Park Hotel closed its 49th consecutive season on September 8. This was one of the most successful seasons this hotel has ever had. We have had many distinguished visitors, who were loud in their praise of the splendid resort. The Management is arranging to open earlier and close later next season than ever before, as the most beautiful weather is in the autumn. Col. Shipley was one of our pleasant visitors. All of the guests seemed pleased with the Baltimore and Ohio service; it has been a pleasure to us to be of service to them. I desire to thank the members of the Baltimore and Ohio family who so earnestly

cooperated with me in the securing of Pullman accommodations and in every other way. Among those who were of much assistance and whom I desire to thank particularly are: Agent Murphy, Deer Park Village, our agents at Cincinnati, Parkersburg, Grafton, Cumberland and Washington.

The station is now closed and your correspondent has returned to his duties at Keyser.

Mr. Haulenbeek's visits to Deer Park Hotel were missed this summer, but his articles in the Magazine were read and appreciated.

Having been located at the beautiful

summer resort, Hotel Station, Deer Park, since the last of June, I have been unable to keep closely in touch with what is going on over the Division; therefore I am unable to furnish the notes for this issue that I desire to. If the employes will get busy and cooperate we shall have lots of newsy notes in each issue, but without your cooperation there is much that would be interesting that never reaches the correspondent. Let's all get busy, pull together and put our division in the place it should be.

It's interesting to watch the numerous freight trains go by here. Lots of empties going west and loads going east. Better looking coal going through now, too. The hotel guests come down to the station to admire our big Mallets and to ask questions concerning OUR Railroad, and I like to tell them about it. Mr. Donnelly, a member of the Baltimore Bar Association, told me that he had traveled all over the United States and that the Baltimore and Ohio gave the best service. Such comments speak well for our employes who man the

**Our Aim**

To the end of the year without an accident.

"It is the duty of every man to protect himself and those associated with him from accidents, which may result in injury or death."—Abraham Lincoln.

Our picnic on September 2 was the beginning of a campaign to eliminate all accidents for the balance of the year. It's a rather big undertaking, but not an impossibility. First suggested by Safety Committeeman G. C. Conly, it has "taken hold" and our employes have shown an enthusiasm that promises success.

Safety Agent Lenderking opened our campaign with his splendid address, and while we take pride that our record for the first seven months of 1922, shows a decrease of 46 per cent. over the same period last year, we hope in January MAGAZINE to report "Perfect" for the last four months of 1922.

If successful we hope our officials will recognize our efforts sufficiently to help us provide some visible appreciation of good work well done, that will further promote safety. Our safety committee, always on the alert, is in charge and back of this work. Everybody help!

On the first of September,  
We began this campaign.  
Through the month of October,  
Let's our record maintain.  
Through storms of November,  
We will then still remember,  
And we'll all stick together,  
Through the snows of December.

How happy we'll be—  
To say that we went,  
To the end of the year,  
Without accident.

Miss Jennie Smith was the guest of Supervisor and Mrs. Alexander over the week end for the picnic. Miss Smith, who celebrated her 80th birthday on August 18, occupied the M. E. pulpit here on Sunday morning, September 3.

Mrs. Lloyd Valentine and grand daughter, Miss June Faren, of Cumberland, were guests of the former's sister, Mrs. G. C.

Conley, for the picnic. Both declared it to be the best they had ever attended.

Over \$1000.00 has been subscribed locally toward the construction of a bridge across the Potomac here. This is one of the best moves ever started here. It is something that we have needed for years, and we hope all will get back of it and stay "put" until we proudly march across.

A. E. Whitlock, lineman, is another new resident among us, having moved into house formerly occupied by W. C. Gurtler, who is now cosily situated in Daly Foley's new bungalow. Welcome, Whit! Glad to have you with us.

Mrs. Raymond Montgomery was called recently to South Bend, Ind., by the death of her father. Mr. Montgomery and son Ernest drove out recently and a card, just received, advises they arrived O. K.

Miss Virginia Wagoner, Mt. Airy, Md., spent two weeks of school vacation with her uncle and aunt, General Foreman and Mrs. Stottlenyer.

**Kenney-Snyder**

Retortman P. C. Kenney and Miss Mary Francis Snyder, of Levels, W. Va., were quietly married in Cumberland on August 30, Rev. H. L. Schlinke officiating. They have our best wishes. (Sorry there are no vacant houses, "Pat." There never are.)

**Comp-Carl**

Adam Andrew Comp and Miss Edythe J. Carl, both of Cumberland, Md., were married on September 6 in Philadelphia. Following a visit to Atlantic City, Mr. and Mrs. Comp will return to Cumberland to reside at the Ford-Deal Apartments. Mr. Comp is well known for former connections with the Baltimore and Ohio Railroad, having been at the head of the signal department in this territory. He retired several years ago. He is also a Union veteran. During the war Mr. Comp was engaged in signal work on the east end of the Cumberland Division and many is the cold night we rode the local home together when No. 31 made Green Spring at 8.25 p. m. Our heartiest congratulations are theirs.

Retortman B. F. Twigg enjoyed several days visit at home of Hon. W. W. Carder, formerly of Green Spring, now residing at

Findlay, Ohio. Ben has been telling the boys of the big fair and the good roads.

Tieman and Mrs. L. H. Cartwright announce the birth of twins, a boy and a girl, on Thursday, September 7, while Crane-man and Mrs. Guy Crites announce the birth of a son the same morning. Guy, Jr., we suggest. Tieman and Mrs. Carter also announce the birth of a daughter, Margaret Martha, on August 22. Congratulations all!

Several of our old employes have secure leaves of absence account slack conditions and have gone to work in the mines or in other places. We regret this, as we miss their faces in the daily grind and hope they'll soon be back.

Rev. H. A. Lindamood, M. E. South-Springfield Circuit, was most agreeably surprised when the plant boys presented him with two brand new tires for his automobile. A good bunch of men, eh, Reverend? We think so.

I wish to thank employes and all others who in any way assist in making our picnic a success.

Your cooperation is greatly appreciated.  
(Signed) E. E. ALEXANDER

Sabraton, W. Va.

Correspondent, L. M. GUMP

Storekeeper V. E. Farrell has been carrying his right arm in a sling for some time, the unhappy result of an encounter with an irritable Ford; consequently his lady friends and the squirrels have been sadly neglected.

Our picture this month is of Master Mechanic George T. Hice, and his grandson, Master George Willis Stein, of Cumberland. Little George is fifteen months old and extremely popular with his Granddad. All that need be said of Mr. Hice is the fact that very few employes willingly leave Sabraton, and of those who do, a great percentage return.

MONTOUR

L. E. & E. R. R.

General Foreman C. B. Keller, Terra Alta, has been with us for the past two months. Clyde's principal trouble is the weather, as there is quite a difference in the altitudes. It is this which causes him to remark, "It's no disgrace to get old, but mighty inconvenient."

As business is now rapidly increasing on the West Side of the Cumberland Division, we are losing the Transportation Department men, who have been working out of this terminal while not on duty at their home terminals.

Ex-Car Foreman C. B. Gosnell, contends that he is just as handsome as ever, but admits that he is a little more ancient than he once was.

Engineers D. F. Hahn and Thomas Morgan, who have been ill for some time, have returned to duty. Engineer Albert Smith recently sustained an attack of ptomaine poisoning.

Master Mechanic George T. Hice and his little grandson, George Willis Stein

After a lapse of considerable time the "Race" is again on. "Slim" Lantz (6 feet 2 inches), weight 100 pounds, has again entered the service, this time in the capacity of stockman under Storekeeper Farrell. "Slim" is working the "graveyard turn," 4 p. m. to midnight, but he says he doesn't mind; the ladies don't interest him—any more.

Attention—Correspondent Kight, Keyser: Concerning our friend "Whitey" Welshonce's activities on the M. & K., it is the Sabraton correspondent's understanding that "Whitey" is ably assisted in his work by not less than nine canine friends of various descriptions. We also learn that he has constructed a summer home near his post, which is occupied jointly by himself and his force while off duty. Bow, Wow!

Paw Paw, W. Va.

Correspondent, M. L. SHARON

Because of illness, your correspondent missed last month's notes. We're back on the job again, however, and feeling just fine. Many things have happened recently around Paw Paw. Here are some of them:

Bass fishing has been mighty good, but Joe Linthicum hasn't put in his appearance yet.

Lots of excitement in the village. There's a possibility that there is to be a great dam built on the Great Cacapon Creek, which will cause the formation of a large body of water some 18 or 20 miles long. The men behind the project have already taken an option on the land along the creek for that distance, and have bought out a farmer in this vicinity. A large power plant is to be built, the water of the creek to furnish the power.

The early apple crops in the big orchards here have been picked and put on the market. The late crop is now about ready for the harvesting. Because of the spring frosts, the crops were not very large.

Our efficient clerk, "Bill" McBee, and Towerman A. C. Handy, of Okonoko, are bringing in the squirrels. The gunning season in the state is now on. Be careful, boys. We don't allow you to bring in more than eight in one day.

C. E. Wentling is beautifying his residence and store with a generous application of the brush. John Souders, at one time one of our freight conductors, is doing the work.

The accompanying photograph is of the late "Ed." Doyle and his two great-grandchildren, Nellie Louise Hanrahan and her brother John Joseph. The mother of the children is the daughter of John Doyle, who preceded his father to the Great Beyond by a few months.

"Ed," as he was best known, had probably passed his one hundredth milestone. The eulogy on his life by W. L. Stephens in a recent issue of the MAGAZINE is a fine tribute to a well-spent life.

Pittsburgh Division

Correspondents, E. N. FAIRGRIEVE  
and MARY E. BREEN

Of all the insistent fellows on earth, that little man with the bow and arrow is the best. He has now proven his ability by aiming his little arrow at Miss Nora Park, operator, 33rd Street Tower. It seems that Nora had made up her mind she wasn't going to get married, but Dan made up his mind just the opposite. The announcement tells us who has won. Nora is now known as Mrs. Harry J. Erdel. Mr. and Mrs. Erdel will be at home in East Liberty late in September. The many friends of both extend sincere wishes for a long and happy married life.

Suggestions for cloudy weather—always carry an umbrella. One of the fellows in the General Superintendent's Office—it's hard to guess which one—was visiting the bestest girl one evening when it began to rain in torrents and kept up in this fashion till about 1.00 a. m. Then the young lady, who is extremely kind hearted, said—"Well, I guess you can't go home tonight so I shall go and fix up the guest room for you." She started to make things comfortable. Coming down stairs about 15 minutes later, she found that he had gone. Just then she heard a noise on the porch. In came our man drenched to the skin. "Why, where have you been?" asked the surprised young lady. "Oh, I just went home to get my nightie," he replied.

Like some of the other graduates from the General Superintendent's Office (for that's what they call it when one goes to the Oliver Building) we expect to see "Bud"

The late Edward Doyle and his great-grandchildren, Nellie Louise and John Joseph Hanrahan

Number 44 at Bluestone—Photo by Machinist Apprentice Lawrence King, Connellsville

Ryan sallying forth this winter in spats and all the paraphernalia that goes with it. "Bud" has been succeeded by John O'Connor and we hope both will be successful in their new positions.

Agent Mulvey is a sadder but wiser man. Since the day he stood with his teeth in his hand, What happened to the teeth is known to but few, But if you ask Tom he'll tell it to you. The loss of his molars is a well proven fact, And he'd give up a fortune to have them all back,

However, they're gone, ne'er to return and I'll bet every one who reads this will wonder where the dickens they went— Ask Tom, he will be glad to tell you.

The foregoing refers to a little incident which happened at West Newton some time ago, in which Mr. Mulvey, our congenial agent at that point, who holds the destinies of the Baltimore and Ohio in his hand in that neck of the woods, had occasion to remove his teeth from his mouth, presumably to alleviate some pain caused by the lodgement of food substance in some part of his mouth where it shouldn't have been— forgot he was holding these valuable accessories in his hand and let loose at a very inopportune time, hence his peculiar predicament. Gone, but not forgotten!

Mr. and Mrs. Vernon Smith, Terminal Offices, Pittsburgh, recently took a ride in a gasoline buggy to the little town on the P. & W. named after the war lord, Mars. When they got there they were having such a good time that they forgot they would have to make the return trip in a street car. Awakening to the realization of this fact, they rushed pell mell to the little station by the side of the road, only to find the last car had departed. With this sad information at hand, they proceeded vigorously, making it necessary to rout some poor unsuspecting ruralite out of a good sound slumber to haul them into Millvale, and to disturb the slumber of another innocent person to get gasoline for the buzz wagon. This was very exciting in the wee small hours of the morning, but the climax came when under the glaring rays of the friendly arc light in little old Millvale they were gently requested to pass over eight bucks to soothe the feelings of the two sleeping gents as a reward for their trouble. Yea, Vernon and friend wife had forgotten 'all about Daylight Savings time. Betcha the next time they venture out they will remember.

We extend our sympathy to Engineer P. F. Griffin and family in the death of Mrs. Griffin, who passed to the Great Beyond during the latter part of August, after having lingered in illness for several months.

We also extend our sympathy to the family of Engineer William White who came to an untimely end on August 30 at Glenwood. Engineer White had just put his engine away and was starting for home when struck by No. 167, resulting in a fractured skull which caused his death in the Mercy Hospital a few hours later.

Our sympathy is also extended to the family of Conductor M. J. Niland, who was severely injured at Glenwood on September 4 while on duty, and who died a few hours later in the Mercy Hospital.

Messrs. White and Niland were both loyal and faithful employes whose loss will be mourned by all.

We are pleased to announce the arrival of a bouncing baby boy in the family of Mr. and Mrs. Crow. Mrs. Crow, before she was fatidly wounded by Dan Cupid, was known to most of us as Miss Aileen Reed, Division Accountant's Office, Pittsburgh. We extend our congratulations and best wishes and hope the little Crow will not keep elder Crows awake at night by crowing.

The call of the bowlers is again in the air. On September 12, at the Monongahela House Alleys the 1922-23 schedule of the Bowling League will be under way. All the old familiar figures of bowlers and near bowlers will be in evidence, as well as the merry on-lookers and friends of the contestants. Here's good luck to you boys and may the best team win!

**Glenwood Back Shop**

Correspondent, FRANCES E. LEEPER

Miss Ethel Andrews has returned to work after a three month's leave of absence. We all missed you Ethel, and we're glad to see you back.

What do you think of Miss Friday, boys? She went on her vacation to Baltimore and came back with a big solitaire on the third finger of the left hand, and tries to tell us "It doesn't mean anything." Isn't that a good one?

Iva M. Harrington and Arthur E. Heizenberger surely put it over on all the office force on August 16. You know what I mean; they went and got married and didn't tell anyone about it. Nevertheless, Heinzie, you have the best wishes of all the force.

Joseph Raab, Storekeeper's Office, slipped off last week and married the girl of his dreams. This was a surprise to us but I guess we will get over it. Best wishes, Joe, from the gang.

It doesn't make any difference who wins the World's Series Game, "Nick" Stinger will be there to see it and to tell us all about it. Don't forget to come back, "Nick."

**Their Spring Stretch Never Dies**

That's Why

**Nu-Way STRETCH**

Rubberless  
Suspenders, Garters and Hose Supporters give easy comfort and long wear.

No rubber to rot; Phosphor Bronze Rustless Springs give lots of stretch. Suspenders have easy slip-loop back. Nickel trim, 50c; satin brass trim, 75c.

Men's Wide Web Garters—no metal can touch the leg—50c.

Ladies' and Misses' Hose Supporters and Corset Sew-Ons. Lasting stretch and no troublesome garter-runs—25c.

Children's Hose Supporter Harness. Easy on stockings and gives long wear. Only 50c.

**A YEAR'S WEAR GUARANTEED**

ASK YOUR DEALER. If he hasn't them, send direct, giving dealer's name. Insist on Nu-Way. Accept no substitute. Guarantee label on every pair. Ask for story of Nu-Way Stretch.

**Nu-Way Stretch Suspenders Co.**  
Dept. D, 2110 Adrian, Mich

**Connellsville Division**

Office of Trainmaster

Correspondent, C. E. REYNOLDS  
Chief Clerk

Miss Lillian B. Grubbs, of near Lemont, Pa., and brakeman Charles Russel Britt, of Connellsville, were recently married in the parsonage of the First Presbyterian Church of Uniontown, Rev. Dr. William Hamilton Spence officiating. The bridegroom is a veteran of the World War, having served some time in France. To this happy couple we extend our best wishes.

Engineer H. G. Younkin spent several days in St. Paul, Minn., attending the Eagles' Convention.

Yardmaster J. R. Porter, of Connellsville, is enjoying his two weeks' vacation at Hagerstown, Md. Night General Yardmaster C. L. Senheiser, Connellsville Yard, has returned from his vacation, which he spent at his home in New Castle, Pa.

H. W. Swen, clerk in Coal Billing Agent's Office, Connellsville, is celebrating the arrival of a son, the first in the family. Congratulations!

"Jimmy" McClure, messenger to general yardmaster, Connellsville, spent his vacation on the banks of the Potomac. Fishing?

Conductor and Mrs. H. N. Miller, of Connellsville, have returned to their home after spending several weeks in Atlantic City and New York.

Misses Bridget and Mary Gallagher, and Irene Hunt, of the Superintendent's Office, Connellsville, have returned after spending their two weeks' vacation at Atlantic City.

Miss Blanche Stafford, stenographer, Superintendent's Office, Connellsville, is now spending several months' vacation at Pasadena, Cal. The oranges she sent us looked very good on paper, although in reality they were not very juicy.

**That's the Life**

"Stop, look, listen!" The reflective man stopped to read the railroad warning?

"Those three words illustrate the whole scheme of life," he said.

"How?"  
"You see a pretty girl; you stop; you look; after you marry her you listen."

—Exchange

Assistant Chief Clerk Earl Shank and the "Missus"

It is reported that the Memorable Perry Trump, stenographer, Superintendent's Office, Connellsville, started for Los Angeles, Cal., on his vacation. When he reached Chicago, he noticed a great display of fruit. Upon inquiry he was informed that he was in Los Angeles. After covering Pikes "Pimple," Perry returned home. Later: this was only one of Perry's dreams.

Miss Vera Loeblich, of Johnstown, has been transferred to Connellsville as stenographer, Superintendent's Office.

On the morning of August 1, Philip A. McMahon, secretary to Superintendent Brown, reported at the office with a smile on his face from ear to ear—one that wouldn't come off. A baby girl had arrived. Her name is Mary Virginia. Congratulations to Mr. and Mrs. McMahon!

Mr. and Mrs. Joseph Trombley, of South Connellsville, Pa., announce the marriage of their daughter, Miss Daisy Gwendolyn Trombley to Harry Sivits, son of Mrs. Rose Sivits of Connellsville, Pa. The ceremony was performed on Wednesday evening, July 26 in the parsonage of the First Christian Church of this city, Rev. George Walker Buckner, pastor, officiating. The newlyweds are now touring the eastern cities. Mr. Sivits is yard brakeman, Connellsville Yard. To this happy couple we extend our best wishes.

We are sorry to report the recent death of Mrs. Jennie McCabe Smutz, wife of Engineer John W. Smutz, of Connellsville, Pa. We extend our deepest sympathy to this bereaved family.

Here is a picture of Mr. and Mrs. E. E. Shank, taken while they were spending their vacation in the mountains. Mr. Shank is assistant chief clerk, Superintendent's Office. From all appearances, they enjoyed their vacation.

Here's a cartoon of Captain T. W. Scott, signal supervisor, Connellsville Division.

Vice President Galloway visited Connellsville on Wednesday, September 6, as the guest of the Kiwanis Club and the Chamber of Commerce at a noonday lunch. In the evening Mr. Galloway spoke to a large body of men and women in the high school auditorium, explaining some phases of the position and policy of the Baltimore and Ohio. We hope that Mr. Galloway enjoyed the visit to our city.

**Monongah Division**

Correspondent, CECIL B. BAKER

Miss Lenora Baker, Superintendent's Office, and Miss Mary Schroder, Master Mechanic's Office, have been turloughed to attend the West Virginia State University, Morgantown. These were two of the most popular young ladies of the Division's family, and both will be missed by a host of friends.

Vacations being about over, the Division offices are showing great signs of activity. Moreover, the Central Drug Store reports a noticeable increase in the soda water business.

Considerable amounts are being wagered among the various offices as to which will be the first to get space in the new Willard addition.

H. H. Stephens has also resigned his position on our engineering corps to return to school at Morgantown, W. Va.

When the baseball team from the Auditor of Disbursements Office met ours they found that there was another kind of smoke in Grafton besides that generated by engines. Final score: 13 to 0.

**Grafton and Belington Branch**

Assistant Correspondent, A. MCKAY

**Helpfulness**

When things around your home get blue,  
and in your town go wrong,  
See how much it helps you to sing some  
good, old song.  
It need not be "All Blessings Flow," but  
just one that you love,  
Most anything to change your mind from  
what you're thinking of.  
For when you're down and almost out, and  
troubles swing along,  
You'd surely call it helpful then to hear  
some good old song.  
Let's each one do our best to help, some  
kindness to bestow  
Upon some fellow next to us whose spirit's  
getting low.  
Then at the end of life's long trail, we'll  
gather in a throng  
We'll join celestial choruses and sing that  
old, old song.

First Trick Operator A. McKay, Tygart Junction, says: "Home ain't like it used to be, but that Watson Arch, Jr. is some fine boy!"

C. A. Andrick is on our Honor Roll this month. Look for his name in the list.

**Monongahela River Sub-Division**

Assistant Correspondent, T. M. GILLUM

News is a bit scarce this month, because of our folk taking vacations. They have all of their good times away from home. Extra Agent Miss Ford enjoyed a nice vacation with friends in Detroit. Agent S. H. Hines, Haywood, is off duty and is being relieved by Extra Agent R. Long; Agent B. L. McIntyre, Gypsy, is off duty, and is being relieved by Extra Agent Miss Nina Ford.

**Western Lines**

**Cincinnati Terminals**

Correspondent, JOSEPH BEEL

We know a man who bought a hat,  
O my, O my, that hat was flat,  
And there upon his head it sat,  
From laughter making men grow fat.  
Now down the yards there came this man,  
Identify him if you can;  
Just look, boys, see that awful tam,  
Let's place it in the old ash can.

But then upon a second glance,  
This hat might have been brought from  
France,

Or some old country where men prance,  
In helmets which they don't enhance.

Now who might this brave party be,  
Who struts around and still goes free?  
Of him, well, quite a lot we see,  
Our Mister Fitz, could this be he?

**Our Car Distributor**

By H. H., Superintendent's Office

There he sits so early and bright,  
Opening his desk and setting things right,  
Starting to work with a slam-bang of cheer,  
Facing the day with never a fear.

Answering the 'phone 'til he's almost ill,  
And of complaints getting more than his fill,  
Checking down car numbers with all his  
might,  
Straightening out orders from morning till  
night.

The plying of this car, the speeding up that,  
The stepping on pests, (O most very flat!)  
And kidding the girlies and joshing the men,  
While all the time busily pushing the pen.

Now this is the life of our friend every day  
And tribute to him we surely should pay,  
As it takes Irish grit and vigor you know  
To keep this up always and never grow slow.

**My Office Companions**

By H. H., Superintendent's Office

First comes K. she's small and tiny,  
With her Irish eyes of blue,  
Curly hair so long and shiny,  
And a heart that's ever true.

Then there's C. who's tall and slender,  
With a way that's very rare,  
And a smile, so sweet and tender,  
That it makes the world more fair.

Next is B, quite short and happy,  
Laughing all the year,  
Never sad and never snappy,  
Here's a disposition dear.

Then comes S.—she's rather heavy—  
With a manner more than sweet,  
And a wit that's ever ready,  
And small and dainty feet.

"Mazie" of motor car fame  
We thought had passed away,  
We find a new one in the game  
Making speed marks every day.  
She calls her hack a "Kitty" car  
Named for herself, I s'pose,  
She drives it near and she drives it far,  
No matter where she goes.  
You who read the lines above,  
Know you this is true  
That these girlies I do love,  
More than pals, I do.

**CAPTAIN  
T.W. SCOTT  
SIGNAL SUPERVISOR  
CONNELLSVILLE DIV.**

TOM'S IDEA OF A TALKING SCARECROW

**Collects Clothes**

Dear Editor: Please tell me the name of some organization that collects clothes and toys. Mrs. C. M.

Dear Madam: Ginsberg & Isaacstein. Branches in every city.

*The Bughouse Bugle.*

**The Office Force at North Side**

There's a little old office at North Side  
With the best sort of men on the in-side  
And it's hard to compete with a force that's  
as neat

As the one in the office at North-Side.

There's Howard B. Kemper,  
He's the agent, you see,  
And he's been there so long  
That soon pensioned he'll be.

There's one with the voice of an angel,  
Who sings the whole day thro',  
And if perchance, you see a "Sale of Pants,"  
Just tip off our Nolte's Lou.

And then we come to "Larry"  
Who all the mail must carry,  
And when on the street  
"Miss Agnes" he meets  
How shocking for Mr. Larry.

And last but not least is our "Smittie,"  
Whom every one thinks quite witty  
But when it comes to work  
He's Howard's chief clerk  
And so we call him our "Smittie."

And oh! I most forgot,  
There's Walter at the "Freight De-Pot"  
He's a fine little chap and just a mishap  
That I, his name forgot.

*Mrs. Howard B. Kemper.*

Who put the man in Manchester? Ask  
Agnes Reeves and Bernice Aylor.

General Foreman P. Koth, is a champion  
of amateur baseball. You can see "Phil"  
on any Sunday rooting for some amateur  
team.

"Joe" Fisher always has a Campbell—  
cigarette.

G. H. Lammerding is a student of  
—ology. What kind? Ask him.

Frank Fessenden started his straw hat  
season on September 8.

G. J. Beckman is an expert and criterion  
in the handling of storage and the public  
demand his services daily and he enjoys the  
reputation.

James Donegan is going to Ireland next  
year to join the National Regular Irregu-  
lars.

William Dean, in the near future will  
probably be known as Doctor Dean. He  
is buying instruments now, having acquired  
a saw, a chisel, and a monkey wrench.

Some daily expressions heard in the  
Local Freight Office:

B. S. Jelleff: I knew it.

H. E. Martin: Hez a funny fellow.

W. A. Richter: That guy don't know any-  
thing.

William Moss: What do you say? How

E. Hein: Get me a sack of tobacco.

Jess Davis: I'll busy you in the eye.

**Freight Traffic Department  
Southwest Region  
Cincinnati, Ohio**

Correspondent, E. H. GARDNER

Assistants, C. C. TROY and C. A. BOYD

The Careful Crossing Campaign, under

primarily, seems to be progressing nicely,

and we are sure that every member of the  
Traffic Department, not only at Cincinnati,  
but at every other point on and off the line  
where an office is located, is doing his or her  
bit, taking advantage of every opportunity  
to further the success of this worthy under-  
taking. It might be well to mention in this  
connection that probably more good can be  
accomplished by personal efforts on the  
part of interested railroad employes than  
those in any other occupation.

**WE WANT PHOTOGRAPHS!** Don't  
be afraid to submit anything which you may  
consider worth while. Not all of them can  
appear in THE MAGAZINE, but the best ones  
will be selected and inserted.

Take another name off our eligible list—  
Harry Witte, lately appointed chief tariff  
compiler, Tariff Bureau, hath taken unto  
himself a wife, Miss Esther Louise Jauch  
being the one to have her name changed.  
The fatal plunge into the turbulent sea of  
matrimony was taken on August 15. Sincere  
congratulations and best wishes are  
extended to Mr. and Mrs. Witte.

Our Bureau of Vital Statistics reports that  
"Ash" Tullis, Charles Brenner and Hilton  
Rardin all were paid a visit by the stork  
within the last few weeks, each being the  
recipient of a bouncing baby boy. "Ash's"  
was the bouncingest—twelve pounds net.

WINTER approacheth, and Chief Clerk  
Bauer will soon be in his glory. "discour-  
singly eloquently" to diverse members of the  
General Office force exactly why fresh air  
was made.

"Johnny" Edwards, the Tariff Bureau,  
humorist, spent his vacation quietly wander-  
ing about the high-ways and by-ways of the  
city of his home, Newport, making friends  
wherever he went. John is going to run for  
Congressman some day—he already has the  
hair and feet of a statesman. His favorite  
song is "Rose, Fairest Rose."

Charles Iler was heard to remark softly  
the other day, "There is a pleasure in poetic  
pains which only poets know." If there is  
pleasure in poetic pains, we are sure  
Charlie's cup of joy must always be full.  
The "poems" he doth utter would make  
Shakespeare blush. The following, which  
is fresh from his pen, is printed as a sample  
of one of his "pains:"

**To Spring**

Oh! was it were!  
Oh! could it did!  
Sweet Spring have came—and flopped—  
and flid.

Oh gentle goose,  
AND nimble cow,  
Softly flit—from bough—to bough.

We wonder what the attraction for Les  
Barber is in Dayton? Reports have it  
that he invades that small country town  
weekly. We will not venture to guess—we  
cannot think of Les. (Poetry!)

Tillie Tinkle, the little joy-bell of the  
Tariff Bureau, otherwise known as Edith  
Hormann, spent her vacation at Cumber-  
land Falls, Ky. According to the dope we  
have received, she must have knocked the  
natives dizzy—knickers and everything.

Johnny Maxwell will soon be riding the  
elevator three stories higher; he has been  
promoted to the position of chief tariff  
compiler, Tariff Bureau, to that of chief  
rate clerk, General Freight Office. Tariff  
Bureau's loss—General Freight Office's  
gain.

The following would undoubtedly be a  
treat for sore eyes:

"Billy" Scholl wearing a toupee; Harry

Witte in a bathing suit; D. W. Wayman  
with his hair de-marcelled; "Lou" Menke  
with a date.

LOUISE—she's beautiful, and therefore  
to be wooed; she is a woman; and therefore  
to be won. Any takers? We repeat, ANY  
TAKERS?? (Answer, from Baltimore:  
There'll be undertakers need ed if you  
fellows don't stop kidding her.)

The annual ball game between the com-  
bined forces of the General Freight Office,  
the District Freight Office, and the Tariff  
Bureau, has not as yet taken place, but in  
next month's notes we hope to give as com-

plete an account of it as it will be possible to obtain.

It is planned to organize basket-ball and bowling teams for the coming season, and it is hoped that sufficient interest will be taken to insure the success of both teams.

This column is conducted by E. H. G., C. C. T., and C. A. B. HELP! AID! SUCCOR! RELIEF! ASSISTANCE! SUPPORT!

### Newark Division

Correspondent, B. A. OATMAN

The Baltimore and Ohio Veterans Association of Newark Division held their annual picnic at Buckeye Lake, Ohio on August 17. While the attendance was not what it would have been under normal conditions, the local veterans turned out splendidly and brought with them their families and well filled baskets.

The day was very hot and the refreshment committee had their hands full, passing out the ice cream and cooling drinks which they served gratis to all who attended the picnic. They also served hot coffee at the five o'clock dinner.

Contests of every nature were indulged in during the afternoon and were enjoyed by all who took part in them as well as the spectators. After the dinner, the picnickers assembled at the dancing pavillion where the evening was spent in a delightful manner.

The Committee on the picnic are to be congratulated on the excellent program which they provided for the party.

Earl and Mrs. Hollman are back from a trip to Salt Lake City, where they certainly did enjoy the salt water bathing. As you know Earl is quite heavy and it was not necessary for him to exert himself in the least, simply a case of float. He has now suggested that such a swimming pool be located nearer home for those who care to swim and yet who make no effort save the disrebing prior to the plunge.

While we were all set for the capturing of the silver trophy offered by the Industrial League of Newark, Ohio, the Baltimore and Ohio shop team must be content with second place. This, of course, is a

disappointment to the loyal rooters of Newark shop, but there is a great deal of consolation in knowing that the winner of the trophy had to fight every inch of the way and after the last game was played, agreed that it was no walk-away.

The season was, marked by especially clean ball playing all the way through, there being no controversies over decisions or the outcome of any of the games. It was a season of good clean sport, and was thoroughly enjoyed by thousands of fans in and around Newark.

We desire to convey to Manager Stanford and the members of the team, our thanks for their untiring efforts in keeping the team right up to the line at all times during the season.

Not content with conditions locally, Clerk S. G. Roberts, Neff, Ohio, secured transportation, put on his best suit of clothes, filled his pocketbook, put on all his fine jewelry, and went West to take in the sights. When Columbus, Ohio, was reached, he decided to stop off for a few hours. He saw the sights all right and put in a tiresome day of it, and finally rested on the seats at the Union Station. Here he made several new acquaintances, who for lack of something to do, suggested that the party match pennies for pastime. When Clerk Roberts got away from his new friends he had but his pass and clothing. Money and jewelry were missing. Well, it is safe to say that he is satisfied with his adventure, which, no doubt, will be the means of his staying nearer home for some time, unless he can secure a body-guard when making his extended trips exploring the unknown.

After spending a month in the wilds of Minnesota, we have with us again Messrs. W. B. Allen, H. L. Ball, R. C. Moorehead, W. A. Hinney and W. J. Dorsey, who report having one of the real vacations of their lives.

On July 30 the party left Newark, bound for Vermillion Lodge, Vermillion Dam, Minn. From there the party traveled to Harding, Minn. where they secured canoes and made the trip to Lake La Croix, camping along the water with the assistance of a cook whom they secured at the beginning of their canoe trip.

Such stories of fishing you never heard before, and as is the custom they have actual photos to back up their claims. However the party seems to be timid about broadcasting their wonderful art through which they were able to carry into camp the choicest of the finny tribe, but it has leaked out that fish such as we would consider good catches around here, were merely used for bait if retained at all. The camp rules show that no member of the party was allowed to have in his possession any kind of fish which weighed less than twenty-five pounds. This rule was adhered to throughout the trip, and while the party was fortunate in having plenty of brain food at all times, yet the extra exertion required to handle such heavy fish continually for twenty five days has had its effect on the various members of the party, who, when at home consider the handling of pencil or typewriter real work. We are glad to welcome the boys back and sincerely hope that their outing will be of benefit to them in their daily routine of duty.

Albert Gatewood, Claim Department, Wheeling Division, is now at Newark, Ohio, to relieve Claim Agent A. R. Claytor who is taking a much needed vacation. Mr. Gatewood at one time was stenographer in the Master Mechanic's Office, Newark, Ohio. We are glad to see him back with his friends at Newark.

### Accounting Department

Correspondent, R. T. GEORGE

"Mose" Floyd, Maintenance of Way timekeeper, after stalling for several months, has finally given up the secure life of freedom and taken a bride for life. "Mose" spent his honeymoon in the wilds of Northern Minnesota. "Tommy" Faulds, our Scotch veteran, made the statement that "there are only a few of us left." The entire force extend the glad hand to "Mose" and wish him many years of married bliss.

Speaking of "Tommy" Faulds, he just returned from Niagara Falls, but when asked whether or not it was a honeymoon, "Tommy" had nothing to say.

The cigars smoked by the office force on September 1, were the compliments of George Frederick Budd, one day son of Charles Budd, secretary to division account-

ant. The experience of being a father is new to Charley and consequently he is wearing that old broad smile.

Frank Cole is back on the job after spending two weeks at Glacier National Park. You should see his fine collection of snapshots.

J. H. Dickeson is back after making a thorough inspection of Yellowstone Park. "Dick" liked the scenery provided by the Government.

L. J. "Doc" Savey was not looking for excitement of travel so he spent his time at Cedar Point and other Lake Erie points.

### Columbus, Ohio, Station

Assistant Correspondent, R. KENNETT

We understand Dispatcher Sutherland has packed up his hay fever and headed for northern Michigan for about 30 days for a vacation.

Yard Operators Strope and Kennett are filling vacancies in T. M. Broughton's office during vacations.

Anyone seeking information as to the fine points on firing our road engines, ask Brakeman Steinmeyer.

Brakeman "Puss" Reytention has been awarded the "Pig Iron" undershirt for being the most contrary man in the yard.

Night Yardmaster Smith recently skinned his shins by running over a truck, causing him to be off duty a couple of nights. Be careful.

Brakeman Bull still argues that a Maxwell can climb any hill on high. Conductor Phelps doubts this; he owns an Overland.

The fight held some time ago between K. O. Griffin, our assistant yardmaster on 2nd track, and "Ole Buck Sheep," resulted in a knockout for "Buck Sheep" in the first round, "Knockout" Griffin being entirely off form.

The Railroad Bowling League was organized for the season at Gettrost Alleys on August 15. It consists of an eight-team league comprising teams from Baltimore and Ohio, Pennsylvania, Big Four, Hocking Valley and Norfolk & Western Railways. The season will start on Sept. 12. Our team will be headed by Operator Kennett and Time Keeper Coble.

Yard Clerk McCormick recently purchased property on the west side "Hill Top." Looks as though all the "nuts" are getting pretty close together.

Dispatcher H. S. Conley is back on the job after spending another honeymoon sight-seeing on Lake Erie.

Glad to see Dispatcher Fisher back on the job after a three weeks' illness.

T. M. Broughton spent a week of his vacation at Garrett. Because of no spring training I understand he stayed clear of the golf course.

Y. M. Decker recently purchased a new "Lizz-e" and now spends his leisure time in sight-seeing.

We regret to announce the death of Yard Operator Kennett's mother at her home in Wilmington. We extend our sympathy to the family.

Yard Engineer Corcoran is back on the job after four weeks' illness.

Sorry to hear of the accident which recently befell Yard Fireman Wiley, who fell from his engine and broke his arm. From all reports he is getting along nicely.

Any one seeking information relative to McCuneville ask our Night Roundhouse Foreman Jenkins. "He knows."

Brakeman Bagent is attending church quite often recently. There's a reason, though.

Brakeman Parker still argues that Pitcher Snyder is the best pitcher the Columbus club has. He may be, but still that's not saying very much.

Found: Two silver dollars. Any one losing these can have them by calling on Darby O'Hara and identifying them. Darby claims he found this money in a package of scrap tobacco. Who's next?

Operator Yeast, Pataskala, is back on the job after spending a couple of weeks on Lake Erie.

Operator R. C. Hines, Black Lick, recently had his jaw fractured by being hit by a pitched ball.

Our morning messenger boy, "Little Pinky Williams," is still on the job and can be found at Yard Office at 5.30 a. m. regularly.

Operator O'Leary, Big Walnut, is taking a leave of absence. The vacancy is being filled by Operator F. M. Hines.

James Avery, our shop track foreman, is still on the job with his line of "bull." From all appearances he is still entitled to the gold medal.

We regret to announce the misfortune which recently befell Mr. and Mrs. Strope, father and mother of Operator Charles Strope. Their home near Washington C. H. was struck by lightning, entirely destroying house and contents.

Section Foreman "Jess" Hines surely can recite poetry. Did you ever hear "Jess" recite "The Farmer"?

Operator Pierson, Norfolk & Western Crossing, was recently called to Portsmouth because of the serious illness of his daughter.

### Marietta, Ohio

Correspondent, G. R. STEEN

The produce season closed this last month with a total of 838 cars shipped from June 10 to August 12. This was the greatest season ever experienced in Marietta. If the market had held up there would have been at least 100 more cars shipped. We are looking forward to a greater season than ever next year.

The National Refining Co. has purchased 35 acres of ground across our tracks from where they are located, and already have two 15,000 barrel tanks erected. They expect to get up several more in the near future. This will move their gasoline storage from alongside our main track to several hundred feet away. There is to be a new office building, a large garage, and a complete laboratory in every detail for the purpose of making every known test of their products.

Cash Clerk Schantz, Rate Clerk Mellor and the writer spent a week end at Luke Clute, Ohio, on the Muskingum River, fishing. We are not quite sure as to whom or on what to lay the blame for our luck. Possibly it was the black cat that ran across the road on the way up or the fact that it was Sunday. Anyway we met with the usual fisherman's luck.

Last Friday, our efficient chief clerk, G. R. Steen, after having quite a time with a "darb," as he called the party from Cumberland, Md., who shared this good time

with him, came into the office Monday morning and said what a darb he had been with.

The rest of the office force, not being read up on the subject, are unable to make out just what he is referring to. For your information, he has advised us that this darb has bobbed hair, big car, and is some good looking. Will some one kindly enlighten us. We also hear that he is now inquiring about the price of furniture.

### Mansfield, Ohio

Correspondent, C. R. STONE

Car Record Clerk and Mrs. Wilbur Burr, Agent's Office, recently left for a brief vacation. Wilbur said that he expects to bring home the bacon, but neglected to say what kind of fishing bait he intended to use. Good Luck to you, Wilbur!

The writer recently returned from a brief vacation at Ironton, Ohio, where he was formerly located. The roads are in fine shape and only trouble found was below Chillicothe, Ohio, where small creeks had washed away temporary bridges and we had to wait until the water had receded in order to cross without stalling the motor. Garden truck seems to be more plentiful in that section of the country. There were stands selling all kinds of fruits and vegetables along the highway. Many tourists took advantage of it.

W. O. Stockwell, popular agent, Mansfield, is getting his fishing tackle ready to try it out on some of the large lakes.

A. R. Bird enjoyed a brief vacation and is on the job once more. Amsey says the old FORD rambled right along. We all agree that his Ford makes more noise on the road than any Packard that has been built.

The rest of the yardmen seem to be waiting until the snow flies before taking their annual vacation, in order to make things hot for the "cotton tails." We trust that we may enjoy a feed this year instead of the "How it was Done" story served last year.

The canning season is in its glory just now, judging by the numerous shipments arriving, viz.: fruit jars, jar caps, jar rubbers and sealing wax. Mansfield is one of the towns where a full cellar in the winter looks good and tastes better.

H. C. MacDougal, truckman, local freight house, enjoyed a vacation at Fairmont, W. Va. and surrounding country, "Mac" says he is the village cut-up and he can hardly get away when vacation time is up.

The Mansfield Tire and Rubber Co., this city, are enjoying a nice tire and tube business in the West, judging by the number of shipments the Baltimore and Ohio has received for points in Montana, California and Texas.

We are always glad to mention increasing business of any local firm; it helps the city as well as the roads receiving the outbound and inbound shipments.

Robert Kaufman, the efficient Over and Short clerk, says that all he wants now is a Ford coupe and he will be all set for winter. "Bob" is always asking the Auto Club about roads to Mt. Vernon, Ohio. Why?

Christmas is surely coming, as suggested by the holiday goods that are beginning to arrive. I suppose Santa Claus will be as prominent as usual. Where is the man that won't accept the job as Santa Claus? Certainly the spirit manifested at Christmas time is stronger than that at any other holiday.

**Akron Division**

Correspondent, J. A. JACKSON

Miss Martha Adams, clerk, Division Engineer's Office, is the latest addition to our Baltimore and Ohio Family.

A. P. Zeitler, time clerk, Division Accountant's Office, has returned from a week's visit in Mayport, Pa. "Zeit" spent most of his time in hunting ground hogs and coons, and while he reports making several nice catches, we are not in a position to verify his statement. He promised us a nice feed, if he had any luck, but we haven't seen any feed yet???

C. W. Lindrose, M. of W. timekeeper, enjoyed his vacation in Cleveland, Ohio. "Lindy" doesn't believe in wandering far from his own fireside.

L. W. Killums, formerly of Flora, Ill., has been transferred to the Division Accountant's Office, Akron, as M. P. stenographer.

Charlie Kuehney and Miss Katherine McDowell, Division Accountant's Office, are back on the job again after a week's illness. (No! Wrong Again.)

"Bob" McClain, chief dispatcher's clerk, Akron, accompanied Chief Clerk W. W. McGaughey to Toronto, Ontario, and other Canadian cities for a two weeks' vacation.

Yardmaster C. D. ("Red") Updegraff, Haselton, Ohio, nearly caused a panic in the fish business after his trip to Conneaut Lake. "Red" is considered the best bull head fisherman in the Mahoning Valley, and when he goes fishing he generally catches fish.

H. L. Evans, H. S. Sherman, J. H. Buckner, A. W. Colnot, J. B. Clarke, C. E. Jenkins and Harry Turner are New Castle Junction employes who enjoyed a successful fishing trip to French Creek, Pa. They report a pleasant time and plenty of fish.

Boiler Foreman D. E. Sturdevant, New Castle Junction, was sorely bereft in the death of his mother, which occurred on Tuesday, September 5, at her home in New Castle, Pa. Our sincere sympathy is extended to Mr. Sturdevant in his great loss.

Irene Jones and Pearl Thompson, Superintendent's Office, enjoyed their annual vacation with friends in their old home towns—Miss Thompson in New Castle, Pa. and Miss Jones at Scranton, Pa.

Chief Dispatcher Jay Phelps and Al Harris, Division Engineer's Office, sang a program of popular songs at the W. O. E. Broadcasting Station of the Buckeye Radio Co. on Friday evening, September 15. These boys' services are in great demand just now, and any time you hear of their being on the program be sure to "listen in." You'll hear something worth while.

"Tommy" Williams, Division Accountant's Office, and whose graceful figure adorned the pages of our August issue, nearly saw his first big league baseball game on Labor Day. After taking several lessons from Jack McCarthy on how to act at a big league game, he made arrangements to take in the Pittsburgh—St. Louis game at Pittsburgh. Of course he had to get up at 3 a. m. to catch No. 6, but when the appointed hour arrived, "Tommy" could not be moved with a team of mules. The result was he did his rooting on the sand lots of Akron. But he says he will see the big game some day, just to see how they act.

John Scrafford, formerly of Newark, Ohio, but who has been working in Akron for the past six weeks, just can't stay away from his old haunts, and makes a week end trip every Saturday. John admits this is his first experience in a big city, but thinks his homesickness will wear off after the first five years. (Stick to her, John.)

Mary Beggs vacationed in Freeport, Ohio, and Ed. Meriman hasn't been the same since she went away. It's awful, Ed, but when absence makes the heart grow fonder, it's the time, the place and then the girl.

Thomas Thornton, formerly tank foreman, New Castle Junction, has resigned to accept a similar position with the P. V. & W. at Pittsburgh. We know Tom will make good, and the best of wishes for success are extended from his many old associates on the Akron Division.

Miss Mercedes Rennie has accepted the position of stenographer, Master Mechanic's Office.

Miss Grace Griffith has been promoted to stenographer, Division Engineer's Office, succeeding Dora Carlson who resigned to accept employment in New Castle, Pa.

**Massillon, Ohio**

Correspondent, W. E. BRUGH

Bridge Inspector J. T. Sidaway, who was overcome with the heat on September 8, while building a new sand house at Massillon Roundhouse, returned to duty on September 13. I guess "Sid" knew it was pay-day, so he hurried up and got well. Good luck to you "Sid."

Fred Gump has entered our employ as a carpenter, working for Bridge Inspector J. T. Sidaway. This is a good Company to work for Fred. We wish you much success.

Baggagemen Floyd J. Weirich went squirrel hunting in the vicinity of Coshocot, Ohio. Unofficial reports say that very few squirrels were left for other hunters. Real "hogs," we call it.

Tom Koester has entered our employ as night roundhouse foreman, Massillon.

Operator "Dad" Landis, "CO" Tower, was in the market for some peaches, so Harry Malone, train rider, was the lowest bidder and filled the order. Nice peaches, weren't they, "Dad." Harry would make a good commission merchant.

**Cleveland Terminals**

Correspondent, G. R. LITTELL

Glad tidings to the effect that our friend General Agent H. B. Green is now on the road to recovery from his recent serious illness. The entire Cleveland Terminal offices are looking forward to his return to duty.

Team Track Foreman A. Braun, Columbus Road, and Miss Ethel Schaffer were married on August 23. After a short honeymoon at Niagara Falls, they are at home to their friends at 3906 Dennison Avenue, Cleveland, Ohio. Good luck to you, "Buster."

Miss Pearl Bland, abstract clerk, left our service on August 19 and was married to Mr. Paul Carnick on August 30, at her home in Huntington, W. Va. Mr. and Mrs. Carnick will make their home at 1273 Idlewood Avenue, Lakewood, Ohio, after September 15. They have our best wishes.

A. P. Krause, claim clerk, and Miss Blanche L. Hunting were married on September 2. They are making their home at 1485 E. 135th Street, Cleveland, Ohio.

Thomas O'Hara is spending his vacation at Mt. Clemens, Michigan. It is not known how Tom can survive for one week on spring water.

R. G. Davison is wearing a broad smile with very good reasons. It is a girl.

Fred McCormick, assistant agent, Brooklyn Station, is much discouraged because of not being able to take all business offered. Fred is a live wire for the Baltimore and Ohio.

**famous 21 Jewel  
Bunn

**J. M. LYON & CO.  
2-4 Maiden Lane New York**

E. L. Kimes, switching clerk, has resigned to accept a position elsewhere. Best wishes from entire force!

It is rumored that W. Cline, chief rate clerk, should be married. Don't be afraid to ask, Warren.

Sam Holcomb appeared with a new Jewett car. Watch your speed, Sam!

Leo K. Smith, clerk, Lake Warehouse, passed the cigars. Reason? A 7 pound girl.

It is a fact that Miss Hilla Hinger was secretly married last March to Mr. William Hosford. It is never too late to extend our best wishes.

### Chicago Division

Correspondent, F. N. SHULTZ  
South Chicago

Correspondent, ESTHER SPREENBERG

The noon hour is now the best hour of the day for our boys here. The game of horseshoe is being played and it is really hard to say who is the real champion. "Tommy" Kernan, our genial yardmaster, and "Joe" Stack, chief yard clerk, seem to take even honors, but our other boys are running mighty close, and it is not an easy matter to judge.

If there are any other champions on the Division who THINK they can beat our boys, let them arrange to communicate with Thomas E. Kernan, president, "Horseshoe Throwers' Association," for games.

We are very sorry to lose our Eastbound—Wolf Lake utility clerk, R. M. Shafer, who is leaving the service to handle his father's business at Milford Junction and thereabouts, because of the latter's illness.

Don't forget your friends at South Chicago and Wolf Lake, "Shafe," when you get back home.

"Jimmie" Crinion is riding merrily along in his Dodge. What could be sweeter? But, tell us, "Jimmie," who is the beautiful damsel that always occupies the front seat?

Speaking of rings, I understand that another ring has exchanged hands. No, I shan't tell a soul, but (don't feel disappointed) this doesn't happen to be an engagement ring. Oh, well, only time will tell, when another ring will be forthcoming, and then I'll have some good news for you.

We are anxious to see your new car, John. Don't forget to drive down here and let us pass judgment on it. Always remember that the girls at the office are the best judges of such things. Just enough room for all of us, John?

### Willard, Ohio

Correspondent, CARL C. CLUGGISH  
Mrs. Aletha Clark, formerly Miss Aletha

Brooke, has left the service of the Baltimore and Ohio to take up another line of work, that of managing a household. Mrs. Clark has been employed as report clerk for the last five years and her new work will be somewhat different. However, we believe her husband to be a very patient man and willing to put up with Mrs. Clark until she has passed the stage where all she needs to prepare a meal with is a can opener. Just the same, Aletha, you have our best wishes.

J. P. Coats, general foreman, Willard shops, was taken to the Garrett, Indiana Hospital on Tuesday, August 29, to be operated on for appendicitis. Mr. Coats seems to be getting along very nicely so far, and we wish him a speedy recovery.

Yard Brakeman C. H. Gossert suffered a severe cut on his left foot recently, the result of being thrown back on to a piece of sheet tin while releasing a brake. We hope that nothing more serious will develop from this injury.

Miss Gladys Stenger has entered the ser-

THE AGENT AT PORTSMOUTH RAN AWAY AND HID WHEN THESE PICTURES WERE TAKEN

1—Yard Engine No. 1583, Engineer Davison, on its way to theash pit. 2—First Trick yard crew: Engineer John Davison, Brakeman D. Ladd, Foreman J. Maynard, Brakeman H. Horner, and Fireman T. C. Farabee. 3—Yard crew placing engine 1475 on Train 52. 4—Portsmouth passenger station. 5—Fireman Maynard telling Brakeman Horner to behave or he'll "get the leather." 6—Engineer Spangenberg and Conductor Moore, Train 52

vice as secretary to Terminal Trainmaster J. B. Hersh, in place of C. C. Cluggish, transferred to Mr. Kopp's office.

Visitors to Willard and passengers traveling through on our trains notice the great improvement in the appearance of the property northeast of the Depot and immediately across from the target shanty. All of the old shacks have been torn down, the ground leveled and graded, new buildings and new fences have made a wonderful improvement.

Chief Yard Clerk W. G. Gullung, East-bound Hump, and Yard Brakeman G. G. Fackler have returned from their vacation trips. Mr. Gullung was up in Minnesota on a fishing trip. He tells of the large fish that he caught, but, of course, we have a perfect right to our own thoughts. Mr. Fackler took a trip to Los Angeles, California and had a fine time.

Anyone desiring to take a short but intense course in whittling will please make application in writing to E. Woolwine. Mr. Woolwine guarantees satisfaction or money refunded.

We wonder what J. M. Barnville intends to do with all the money he has won on baseball prizes during the past season.

**Ohio Division**

Correspondent, A. E. ERICH

Someone has said, "The bluebird brings happiness, but the stork brings a \$200.00 tax exemption." Such good fortune has come to Mr. and Mrs. G. H. Flagg, when they announced the birth of a nine pound girl. Mr. Flagg is chief clerk to the storekeeper at Chillicothe. The little lady has been given the name of Betsy Ross Flagg.

On August 31, "Phil" Hixon, clerk, Division Accountant's Office, was presented with a baby boy, weighing nine pounds. He has been all smiles ever since.

W. Kibbey, who has been agent at Fire Brick, Ohio, for a number of years, is now at Hamden, Ohio, filling the agency at that point. R. H. Howser, who has been handling the Hamden agency temporarily since Agent C. Brown has been promoted to Wilmington, Ohio, will be transferred to Melvin, Ohio.

Other changes in agencies, Miss Eleanor Goda, agent at Cuba, vice J. P. Clark, transferred. Miss Elizabeth Bien appointed agent at Little Hocking, Ohio.

Ralph and Gilbert Briggs have just recently come to this division, working as extra operators. We wish them success.

We are glad to announce that M. O'Donnell, conductor, who has been off duty since May, taking surgical treatment at Baltimore, is greatly improved.

Our sympathies are extended to Conductor C. P. Cleveland in the death of his mother.

Fireman E. L. Gross just recently signed a life contract. We wish him and his bride a happy married life.

A small boy standing in the middle of the track with a train approaching at a speed of about fifteen miles per hour, and observed by engineer when about five car lengths away! This was the experience of Engineer Roy Wilbur on September 1, when in charge of train 86, engine 2790, approaching Pleasant Plains. He sounded the warning whistle, started bell ringing, applied brakes in emergency and Fireman O. Cooper jumped from engine and ran ahead in an attempt to get the boy off the track, but before this could be accomplished, pilot had struck him and knocked him down, and he was hidden from sight by the engine. After stopping, and going to engine, with

the expectation of finding a mangled body, Engineer Wilbur found the boy crawling around under the engine and assisted him from underneath between the drivers. The lad's name was Ralph Lake, age four years, of Pleasant Plain. On examination, it was found that there was no apparent injury. Engineer Wilbur is undecided as to calling this an accident or a miracle.

Cornelia Gilsdorf, fair stenographer, Is wearing a brand new ring; It announces her engagement— 'Spect a wedding soon 'twill bring.

In further reference to the above, we tried to obtain a photograph of the happy bride-to-be, and almost had it, but were promptly and politely "thrown" out of the Division Accountant's Office, by the party of the first part. Maybe we will have better luck the next time. Anyway, we congratulate "Cornie."

The Safety Agent "SEZ:" "A daughter was born at my house." The little one, weighing eight and three-

quarter pounds, has been named Mary Baker Allison, for her maternal grandmother. Congratulations, "Bill!" Of course, the other three girls are very proud of their new sister.

The "current rumor" mentioned in the Ohio Division notes, August issue of the MAGAZINE, will, in all probability, become a reality before this appears. At the present writing Miss Mildred Curtis has been granted a leave of absence from her duties as tonnage clerk, and—well—we expect to be able to have a photograph of the happy pair in these columns.

Conductor "Tom" Brown celebrated his golden anniversary as a conductor on September 6. Mr. Brown started service as a laborer on November 1, 1868, and resigned from that position March 10, 1869. He was reemployed on the old M. & C. as freight brakeman in March, 1870; promoted to freight conductor September 6, 1872, and to passenger conductor July 1, 1887. At present he is holding turn on

# Do YOU Know the English Language of To-day?

Are you familiar with the wealth of new words with which our already wonderfully expressive tongue has been enriched since the Great War—even during the past few months? Have you amplified your vocabulary with all of them? Can you, on the instant, use them correctly in your conversation and writings? Do you fully comprehend their true meaning when you see them in the current newspapers, periodicals, and books, and in your daily mail—when you hear them on the

stage, and in the conversation of your friends? Can you define and pronounce them accurately for your children?

Packed in the pages of this wonderful volume—the greatest of abridged dictionaries—you have instantly available the definitions of over 83,000 terms, more than in any other dictionary of its size, including the very latest words that have come into our language! And in addition, a veritable treasure trove of valuable, authentic information is yours in the new Funk & Wagnalls

## Desk Standard Dictionary

A Marvel of Up-to-Date-ness, Comprehensiveness, Definitive Clearness, and Accuracy

Think of a dictionary containing all the newest words in our language! With over 83,000 words and phrases defined, explained, pronounced, and traced to their original sources for you! With answers to nearly 400,000 questions in all branches of human knowledge! With the most common meaning given first, and all definitions expressed with incomparable clearness! With 1,200 up-to-date, clear pictorial illustrations! With information concerning persons, places, countries, cities, states, battles, treaties, mountains, rivers, etc., such as Lloyd George, Bismarck, Foch, Chateau-Thierry, Bolsheviks, Venizelos, Senlis, Plave, Argonne! With all the authority and accuracy of the great Unabridged Standard Dictionary from which it is derived! Think of such a Dictionary containing this and more information of vital importance, all compressed into 900 pages in a volume less than one and one-half inches in thickness—think of such a source of facts which it behooves everyone to know, and you have pictured Funk & Wagnalls Desk Standard Dictionary!

Supplies Information on Practically Everything That Can Be Expressed in English

It is difficult to estimate the immense cultural value and the great every-day practical utility of the information given in the Desk Standard Dictionary on many thousands of terms in such subjects as politics, business, music, art, literature, law, medicine, agriculture, philosophy, history, science, religion, etc. It includes facts of broad interest upon practically every topic that can be discussed, or that can be expressed in the English language!

This remarkable volume also gives you a thorough, practical, and instructive treatment of synonyms, giving not mere lists of synonymous words but examples of use in actual sentences, clearly showing their varying shades of meaning. With these are many lists of antonyms—an exclusive and most helpful feature. It gives you the leading events of American and English history. In it you will find a number of lists, phrases, and tables—coins, astronomy, weights and measures, metric system, chemical elements, presidents, sovereigns of England, laws, prefixes and suffixes, locative words and phrases, etc.

**Spendidly Illustrated** In addition to its other features many of them exclusive, Funk & Wagnalls Desk Standard Dictionary contains numerous full-page illustrations, scientifically correct and most attractive, which contain for you the information sought for, such as the page plates of Agricultural Implements—Bark of Trees—Examples of Architecture—Types of Land and Water Birds—Types of Cities—Types of Fogs—Food and Game Fishes—Types of Flowers—Types of Horses—Types of Fowls—Common American Leaves, etc.

**Whether You Want to Know** how to pronounce, divide, spell, understand, or define thousands of words, phrases, terms, proper names, etc., such as

Nos. 1 and 4 between Cincinnati and Parkersburg. Although he was 71 years of age on April 25, this year, he is hale and hearty and rendering excellent service. He has but one entry on his record during this entire service, and that a COMMEND. His many friends rejoice with him in his long and meritorious service, and wish him many more years of health and happiness.

ALL FOR SAFETY FIRST

### St. Louis Division

Correspondent, H. F. SMITH

We are sorry to report the serious illness of Caller Frank Wright, at Flora, it being necessary for him to be removed to the hospital at Olney for treatment. Frank has been on the job so long and is such a steady worker that his absence is conspicuous. Rex Gill is juggling the crews during his layoff.

L. A. Smiley, genial chief clerk to master mechanic, can pilot a Ford successfully, but evidently finds it difficult to handle a Buick. Some few weeks ago he landed a five passenger Buick in the ditch on the State Road while attempting to pass a Ford driven by a woman. "LAS" says you never can tell which way they are going.

Arlo Malinsky, general clerk, Accounting Office, is the proud father of a baby boy which has been named David. His dad, Yard Engineer Malinsky, Flora, now a chesty grandfather, surely has been slamming the box cars around the last few days. In this same line, it has been reported that George Huffman tried to feed his baby ice cream the first day. Malinsky hasn't told us yet what he tried to do to his new heir.

In the spring a young man's fancy lightly turns to love. In the fall they become more serious; some get married (such as Arthur Mendenhall); others decide to wait a while longer; then, again, there are others who do things secretly.

J. H. Bourgholtzer has been transferred to M. of W. Bureau, Accounting Office; R. S. Isenogle to statistical clerk, Master Mechanic's Office; W. E. Davis to bill clerk, and Miss Olive Stantz is filling the vacancy made by Miss Hemmick who has been granted a leave of absence.

Every Day: "Zuke" tells a funny story, "Mac" quotes poetry, "Woody" makes his bow, Pearl writes to Charles, Stella vamps, Edna gets fatter, "Van" Fossen stays fat, Grace lectures Hubie, Hubie wrecks a home, Alto is Tony, Henry wants someone to love, Bernetta goes to an ice cream social, Hogan "is married."

Prohibition may be here to stay, but it is observed that there is one in the Accounting Office who is "Foxy" enuf to have "Beer" occasionally.

Winter is coming soon and darkness will set in rather early in the evening, but we don't worry since we have the two "Glowing Red Embers" (Harold and Olive Stantz) in front of the office.

And then he took up golf. Boy page Chick Evans for Bingo!

The last report from the judges of the Talking Contest which opened last Monday, is as follows: First place, Ruth Kauffman and Dorothy Fitts, tied; Second place, Sam

Newby; third place, Jesse Hoover. This contest is open to any one able to speak English and we would like to hear from a few others. No, Henry, you can't enter.

E. A. Dykins has returned to duty after a 90-day leave of absence. No serious changes noted.

The Breese switcher has again been restored upon the opening of the coal mines, and because of the heavy run after the long period of idleness two crews have been working.

On Tuesday, September 5, Trains 47 and 48 and 42 and 43 were temporarily annulled. This resulted in quite a shake up of train and engine crews and Brakeman Lewis and Baggage man Lyons, who have not worked out of Flora for some time, have been down to get re-acquainted.

Clerk Leonard Kellums recently returned from the Mayo sanitarium at Rochester where he had gone for treatment of an ear affliction. We are sorry to report that he was informed that nothing could be done to cure him.

This rhyme will tell of the personnel—M. of Way Office—you know them all well: John Hewes, Jr., division engineer, He greets everyone with a smile when he's here.

His able assistants, Charley S. and Newhouse,

Assistants on corps: Dawson, Morrison, Shouse.

They handle the work with a vim and a vigor,

If you want an estimate they will give you a "figger."

The master carpenter, George W. Young, He builds, paints, repairs, keeps everything plumb.

Whitmore, Sig. Super. (We all call him "Whit")

Keeps interlocking plants and signals all fit. Cliff Morton, chief clerk, though not very tall,

Handles work with dispatch and sure hits the ball.

The D. F.'s secretary, who's ever steady, Is Martha Jane Burgess, you know her already.

Pearl Kautman, stenog to our Chief Clerk Morton—

Each noon Pearly writes to "Chas.," who's at Cortland.

Edna Humes, M. of W., has poetic fever, She wrote all these lines and hopes you'll forgive her.

Let's all pull together, "TEAMWORK" be our Aim,

"For the good of the service" is our little game.

### Toledo Division

Correspondent, EDWARD M. MANNIX

#### East Dayton, Ohio

Despite the unsettled conditions on our railroads, it is pleasing to note that the earnings for the past year, as reported to Congress, have shown an increase over the previous year. Entering the year under depressed conditions and encountering the various obstacles, it speaks volumes for the railroad operations in the United States.

It would be impossible to pass the beautiful and suggestive cover of our August Issue of the Baltimore and Ohio Magazine. It recalls to our mind that beautiful pastime, "gathering in the sheaves," and the great teaching of "As ye sow, so shall ye reap."

One of our recent acquisitions to East Dayton roundhouse is Dr. H. R. Hughes, most pleasing personage—an expounder of the doctrine of Safety First, and a careful and watchful student of the sanitary conditions at East Dayton. Acting under instructions from Superintendent R. B. Mann, he is leaving nothing undone to keep East Dayton in its well earned position and a criterion for all. Welcome, Doctor!

I cannot refrain from using the names of Master Mechanic A. E. McMillan and General Foreman W. A. Gilmore, as much as they dislike notoriety. Being in close touch with them during the past 60 days impresses me with the real meaning of loyalty. No selfish thoughts or aspirations, only working to the extent of their strength to carry out orders in these trying hours. I could write volumes from my own observations.

AT PARKERSBURG, W. VA.  
General Foreman H. E. Whitener (left), and "General" G. A. Bowers (right). G. A. has been doing special work at Parkersburg

Announcement was made recently of the marriage of Miss Helen O'Neil, Master Mechanic's Office, to Mr. Arthur Kinninger, of our city. The wedding will occur in the early part of October. Congratulations, Mr. and Mrs. Kinninger! May Good Luck follow you.

A charming and pleasing addition to the Master Mechanic's Office is that of Miss Luella Balcom, formerly of the Agent's Office. She seems to like the place right well. Can't help it; East Dayton is the garden spot of the division.

Roy Kepner, night crew dispatcher, seems to be mighty popular with the fair sex (so I am told). When one hears such expressions as "Aint he just too cute?" "Isn't he a darling?", etc., it's about time to hand it to Roy on a gold platter—"Tuff."

The Careful Crossing Campaign has more than fulfilled its purpose; it has called to our minds the awful consequences of Carelessness; it has awakened a fear of the railroad crossing in the minds of the careless. Statistically, it goes down in history as the most educational campaign ever undertaken by the combined railroads of our country. Time will never erase the teachings and the lesson this Campaign has taught.

The sad news of the death of William W. Barnes, a veteran in the service of the Baltimore and Ohio, has just reached us. He died on July 21 at his home in Dayton, Ohio.

For thirty years Mr. Barnes was supervisor of bridges on the Wellston and Toledo Divisions, and only relinquished his position when ill health bade him stop. He possessed a noble character, easily made friends and retained them, and was loyal to the core.

The burial service was in the United Memorial Church, of which he was a life long member, and as the Rev. Gibson closed his eulogy, every eye was moist with tears for him they loved so well. He was buried in Woodland Cemetery and as the shadows were falling, the whispering of the breezes seemed to say "Rest in Peace."

He is survived by his wife, Mary C. Barnes, his sister, Amanda, and a brother, Jesse Barnes.

Dayton, Ohio

Division Accounting Office

Correspondent, G. M. McBRIDE

"As a man thinketh in his heart so is he."

Another has been adopted into the Baltimore and Ohio family. On Saturday evening, September 9, the stork visited the home of Mr. and Mrs. Don F. Harker and left in their keeping a darling little baby girl, weight 7½ pounds. They were delighted with the stork's visit and have given her the name of Mary Jane. Her daddy says he only weighed 5½ pounds, so she has a fair chance of becoming as big as he.

Although we do not have the particulars, we are glad to report the marriage of David E. Snyder and Mary E. Weaver sometime in August. Congratulations!

Beware of leaving your lunch lying around unguarded. One girl recently got a 10 cent sandwich for 5 cents. It happened this way. The lunches had been purchased and everybody was washing her hands. One girl took what she thought to be her lunch. When she opened it she was more than pleased to find a boiled ham sandwich, which she waded into heartily. How pleased she was could only be told in the expression in her face, which was wonderful. Along

came Mary Atkinson with her lunch. She opened it and to her surprise she found a 5 cent sandwich, when she had bought and paid for a 10 cent one. Thereupon Luella—detective that she is—pointed an accusing finger at Gertrude, telling her that she had, in her haste, taken the wrong lunch. The look of happiness changed and was replaced by one of disappointment, for how could she make up for her mistake? Luella, always quick to remedy things, took Gertrude's cake and gave it to Mary, which righted matters with everybody concerned. Motto: Be careful where you lay your lunch.

Louis Roehm was found walking down Third Street at an early hour one morning wheeling a baby carriage. When I got up close enough I discovered that inside of it was a huge market basket. Will some one please tell me whether he was walking in his sleep. (Perhaps the baby was crying and he got up and thought he was taking it for a walk), or was he merely out for a good time?

At 12 noon on August 16, Clarence C. Schmieding and Helen G. Young were united in marriage, in the presence of the immediate families and friends. After the ceremony they left for Detroit, Michigan, and points in Canada. Those in attendance at the wedding were: Oliver Goerner, car service clerk, Agent's Office, best man, and Robert Nietert, interchange clerk. The usual number of tin cans and placards were displayed immediately following the wedding. Mr. Schmieding is identified with the Agent's Office and his many friends extend their heartiest congratulations. Mrs.

Schmieding is an accomplished young lady and is known to a number of Baltimore and Ohio folks who extend their best wishes.

## Watch for the Riverside Y. M. C. A. Posters!

THE Baltimore and Ohio Young Men's Christian Association at Riverside is making ready for two big ventures. Watch the posters and you will know just what they are doing. They are to have a large share in the nation-wide drive for membership between October 24 and October 31 in which they will need the help of the Baltimore and Ohio folk.

Then comes the annual oyster supper, to be held on November 7, 8, and 9. Those who have attended these suppers know just what they mean. Come out, everybody, and sample some of the splendid cooking of these railroad men's wives, sisters, and sweethearts, and incidentally enjoy a pleasant evening.

### Cattle in Spain

This is a true story of an adventure of two lady artists in sunny Spain.

They were walking, and arrived at a little country inn—hot, dusty and thirsty. They couldn't talk Spanish, but wanted some milk badly, so one of them drew a most beautiful high-arted cow, while the other jingled some coins.

The Spaniards looked, and a boy was sent off post-haste.

In half an hour the boy returned, hot and triumphant—with two tickets for a bull-fight.—*The Beaver.*

## Safety Roll of Honor

The following named persons have contributed toward the safety of the Baltimore and Ohio by keeping their eyes and cars open for all irregularities, and have been commended by their officers for their watchfulness and prompt action. We are proud to record their names here.

### Baltimore Division and Baltimore Terminal Division

Patrolman G. W. Hisley. July 31. Observed brake rigging down on Baltimore and Ohio 147573. Notified operator to stop train. Train stopped, brake rigging adjusted.

Assistant Signal Maintainer J. E. Pierson. August 7. Noticed something dragging on Train No. 99. Notified operator, Singery Tower. Train stopped at Elk Mills for water. Crew notified. Investigators found brake rigging down and dragging under Southern 39508. Rigging removed.

### Monongah Division

Foreman C. A. Andrick, G. & B. District. August 18. Felt severe jolting of cab. Discovered a badly broken rail just west of Buck Mine. Jumped from cab, ran back to Century Junction, called operator. Operator got trackmen who were working nearby to repair condition at once. Eighteen inches were broken from rail.

### Akron Division

Yard Brakeman C. R. McConnell. August 30. New Castle Junction. Observed and reported broken flange on Baltimore and Ohio 221667.

Section Foreman A. Bonaui. August 27. Berea. Discovered brake beam dragging in train No. 91.

### Ohio Division

Operator G. G. Doherty. August 27. Columbus, Ohio. While P. R. R. engine was pulling over Baltimore and Ohio crossing, "GN" Tower, observed something wrong at middle of train of 25 cars. Called to flagman, train stopped. Investigation showed pair of trucks on C. & O. 29853 had derailed, caused by loose drop door under wheels.

### Toledo Division

Operator E. F. Stenger. June 18. Noticed C. & E. I. 186462, car of road, had bent axle. Notified conductor in charge. Car set off at Miamisburg. Found necessary to have new wheels before car could be moved.

# Accurate Weights Insure Correct Freight Charges

Gains in Revenue from Check-Weighing and Revising Classification of Inbound and Transfer L. C. L. Freight During July, 1922

Note:—Each month there will be published in the Magazine, statement of increases, shown by stations, made in the revenue of the Company by revising classification and check-weighing inbound L. C. L. shipments and L. C. L. freight in transfer.

Comfortable Spring Seats

**Important!**

Do not confuse this fine Hartman suite with furniture which may look like it in pictures, but is inferior in construction and finish. Every Hartman piece is made to give lasting service as well as to have an elegant appearance. Note also the handsome upholstery, spring seats, ornamented backs, rounded arms, and quarter-sawed oak in this special suite. See if any other house offers anything like this at near our price.

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 40,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

## On the Baltimore and Ohio

By *James Edward Hungerford*

Illustrated by *Robert L. Heiser*

Down the steel highway we go with a whiz!  
Knowing the zest of what real travel is!  
Over a roadbed—the best of the best;  
Smoother than velvet—and built for just rest;  
Hearing the heart of the engine athrob,  
Pulsing and singing with joy on the job;  
Everything tip-top, an' "comfy," an' fine—  
Travel's just home on the B. & O. Line!

Catching fleet glimpses of valleys and hills;  
Gulches and hollows, and ripplin' white rills;  
Pine-crested peaks, with their heads in the sky;  
Mountains uprearin' their shoulders on high;  
Whizzing past whirlpools, and big water-falls;  
Flitting through gorges, with gray granite walls;  
Smelling the perfume o' balsam an' pine—  
Travel's just home on the B. & O. Line!

Sweet is the song of the engine's exhaust—  
Music once heard, that can never be lost;  
Zipping along down the highway o' steel;  
Knowing the joys of railroading that's real!  
Headlight a-shining, agleam in the gloam;  
Everyone happy, and feeling at home;  
Everything t'p-top, an' "comfy," an' fine—  
Travel is home on the B. & O. Line!

## Railroad Experience Is Splendid Training for Any Business

System, Regularity, Punctuality, Courtesy, Economy, Tact, Safety, Toleration, Loyalty—These Cardinal, Railroad-Taught Principles Are Stepping Stones to Success

*By Joseph Z. Terrell*

Warden, West Virginia Penitentiary, and Former Agent at Keyser, W.Va.

IF the readers of the Baltimore and Ohio MAGAZINE will pardon necessarily frequent references to myself, I would like to submit a few observations in answer to the often asked question "DOES RAILROAD TRAINING PAY?" especially as viewed from the standpoint of telegraphers, clerks and station service employes. The evidence is offered, not because the writer is a shining example of what such training will do, but with the hope that it may convince some of those in the service who think they are wasting their time, that besides being employed in one of the most interesting occupations to be found, they are at the same time—if they take advantage of their opportunities—fitting themselves for a place in almost any other line of business.

### "They Always Come Back for More—"

It is certainly not the purpose of this article to encourage anyone to use a position with the railroad as a convenience or as merely a stepping stone to something else. My intention is just the contrary, for in addition to being the best training school for other fields of endeavor, railroad employment is the most fascinating, and at the same time about as remunerative as any other occupation to be found. Many of those who leave the service come back, and the few who leave for one reason or another and do not come back, usually make good in whatever line of work they take up.

### "—Or Make Good Elsewhere"

Being a telegrapher myself I am naturally interested whenever I run across a man of that trade who has

forsaken the brass ticker and taken up something else and I have known of but few who were not making good. You can find old time telegraphers engaged in other business everywhere and they are, as a rule, at the head of the enterprise. Their past experience as telegraphers, especially if they were railroad telegraphers, has given them a training in concentration of mind, attention to detail and systematic action, which has fitted them for almost any line of business.

Take a clerk, for instance—not the fellow who works on one book or who does one particular thing all the time, but one who has a variety of duties, such as station accounting work, cashier, ticket seller, rate clerk, handling car service or billing and receiving freight—that man or woman gets a training and experience that will fit him or her for anything, if the nerve is there to try it. On the other hand we can take one who is called a good bookkeeper, with a diploma from some business college and considerable experience in a commercial establishment, put him in a railroad office where he has a variety of duties, and in many cases he will be a lamentable failure until he has the work drilled into him as we have had.

### Great Opportunity for Agent

But the man who gets the greatest and best training of all is the agent in charge of a freight and passenger station in the ordinary town with a population of from five to ten thousand. Such a station is too large and the details too many for the man in charge personally to look after everything, while as a matter of economical operation the place is too

small and the business insufficient to justify organizing along the same lines as a large terminal. The smaller town station agent must, therefore, be (or should be) the Company's main representative in that particular locality. And on his personality, diplomacy, good judgment and honest business-like dealings with the public, depends largely the amount of business and good will the Railroad has in that community. While the force of employes immediately under the agent in charge of the station I have described may be small, yet to organize and place them where they can accomplish the most, gives him fine training in a supervising capacity. But best of all is the training he gets in transacting business with the public, and knowing and dealing with so many different kinds of people, for they all, from the leading citizen down to the station loafer at some time and in some way, have business transactions with the agent, and the latter has his patience and temper severely tested every day. All of this gives him a training he can find nowhere else.

The slogan of "Safety First" that has been taught and preached on practically every railroad during the past few years, is a principle that can well be put into practice in any line of business regardless of whether it means prevention of accident, conservation of health or financial safety.

### Railroad the Best School of Economy

Another feature of railroad training that is calculated to fit anyone well indeed for any other line of business, is the policy of economical administration and operation. Re-

ardless of what the public may think or say about the railroads' wasting money, I have never known or heard of any big business concern, the officers of which make greater efforts in the way of economical operation than are to be found on our railroads. While they may not succeed in every case, due to causes they cannot control, all officials are making the effort just the same, and the results obtained depend almost entirely upon the loyal support they receive from the rank and file. To be a part of such an organization, which has for its motto the best service it can render the public at the least cost possible, is to my mind the most valuable training a man can have.

#### Exit Politics and Pull

Last but not least—in railroad service you get practical freedom from politics. The same cannot be said about all other lines of business. No one knows or cares what the railroad official's politics are, if he has any, while the rank and file can have their political discussions and think and vote as they choose; no questions are asked and their jobs are safe, all of which is calculated to give one a better and broader view of things in general.

#### My Own Experience

When Governor Cornwell appointed me warden of the West Virginia Penitentiary I hesitated at first to accept the position. Practically all of my life had been spent in a railroad office, and having had no experience in any other line of business, I seriously questioned my ability to manage the institution, but with the nerve that had been mine since I first took charge of a telegraph office in a strange place at the age of 17, I decided to tackle the job and to my surprise I found that my twenty-eight years of railroad training was the best asset I could have had. In organizing the guard force so as to use as few as possible, making rules for the inmates, rearranging the office force and work in order to handle the business more efficiently, transacting business with the public and in trying to look at everything from a business rather than a political standpoint, I found my railroad experience a wonderful help.

I was urged by some politicians to fire every man on the guard force that did not happen to be of my political faith, regardless of how long they had worked for the state and how capable they were, but somewhere I heard a voice say "Safety First," and realizing that the responsibility of keeping some 800 prisoners inside the walls and seeing that they

were properly managed and cared for was mine, I stood pat and kept every employe who proved to be efficient and loyal. And they are here yet.

Again I was urged to throw all the business I could to certain people for political reasons, a thing that was distasteful and struck me as being both wrong and wasteful. I had never heard of anything of the kind in the railroad service or any other line of business, so I continued my plans to remove the entire management of the penitentiary as far from politics as possible. I am more than ever convinced that my policy was, and is still, the right one, and the sooner all public institutions, and in fact all public business, is removed from the realm of politics and handled the same as any ordinary business enterprise, like the railroads for instance, that is—have as few positions as possible, hire the best help to be found for the salaries paid, buy from whomever sells the cheapest (a policy that I am glad to say our State Board of Control puts into practice)—the sooner will the tax burdens be reduced.

I am willing for my friends and critics to decide whether or not my administration as warden of the West Virginia Penitentiary has been successful, but I want to say for myself that whatever success I have achieved is due largely to the experiences I had while in the service of the Baltimore and Ohio.

In conclusion I would like to give a few words of advice to my fellow employes (I say "fellow employes" because I am only on leave of absence and will in all probability be back in harness again in the not distant future): You are all a part of one of the best managed railroads in the country and its future success and prosperity depend upon the kind of service rendered by the employes. Be courteous and obliging to the public. Politeness costs nothing and often brings valuable returns. Let us do well whatever is assigned to us, and above all, be loyal. I would not give an ounce of loyalty for a pound of efficiency. And finally, remember that those who reach the higher positions in life are usually those who fill the smaller and lower ones best.

## The Folk Song of America

It has been said that America is a land without a Folk Song. Nothing could be more absurd, for America is the land of Folk Song.

For the American people are of many races, and they have inherited the music of the world. From the Scandinavian Forests of the North to the beautiful waters of the Mediterranean, from the fair fields of France to the Steppes of Russia, come the Folk Songs that were born in the hearts of the people.

The music of the Celt, the Latin, the Teuton and the Slav are woven into the texture of America and its fuller possibilities have not yet begun to be realized.

In music as in other things, America is the heir of all the ages.

The Folk Song of America is the Folk Song of all the world.

# A Machine to Reduce Rough Handling of Cars

*And Which Takes a Record of the Bumps and the "Bumpers"*

By M. F. Steinberger, Special Engineer  
Office of Vice President Operation and Maintenance

FOR more than a year one of our freight solicitors endeavored to secure the movement of a large portion of freight shipped by an important concern in his territory, which had been using other roads. Although certain of the crude material had been routed over the Baltimore and Ohio, practically none of the finished products moved over our lines. As a result of the persistence of the solicitor, a trial shipment was made. After the delivery was accomplished our solicitor was told that no further shipments would be given us. The reason given was "Car was so roughly handled that contents were badly damaged." The result was a heavy claim, loss of future business, and the offsetting of all the good work done by the solicitor in securing the trial.

While writing this, there was placed on my desk a letter from the general freight claim agent which called attention to the following fact:

A piano was loaded into a car at one of our stations, properly packed and braced. The value of this piano was \$2,380, and the freight charges \$12.76. Upon arrival at destination the piano was so badly damaged that the consignee refused to accept it, with result that it had to be returned to factory and we had to pay \$1035 for repairs.

Just think of it. Because the car was roughly handled we paid a claim of \$1035 when the freight received was only \$12.76 and in addition we had to bear the expense of returning the piano to the factory.

It is such occurrences as this which caused the railroad to pay \$460,521 in claims resulting from "Rough Handling of Cars" in 1921. This represents 12.2 per cent. of all claims paid. For the first four months of 1922 the payments for this cause represent 12.8 per cent. of all claims paid. These figures do not take into account the cost of repairs to equipment, necessitated by "Rough Handling."

For the purpose of bringing this matter forcibly to the attention of those engaged in the handling of cars, the railroad has put into service a number of Impact Registers. It is through the education and supervision of all employes concerned with the handling of cars that the rough handling problem can be solved, and

this solution is expected to be secured through the use of these registers.

The Impact Register is a machine which records the exact time and the force of the shock sustained in each case of rough handling. This machine is of simple construction. A ten day clock mechanism propels a chart from a feeder roller to a receiving roller, passing over a third roller, above which a pencil, held by a movable weight, is suspended, the point of the pencil resting on the chart. The weight is kept in position by two specially calibrated springs, one on each side. When the car receives a shock the pencil responds, moving to one side a distance dependent upon the intensity of the shock, and then

rebouncing to the center, the point of the pencil making a line on the chart.

As the chart is graduated into twenty-four hour periods and each hour period into fifteen minute subdivisions, the exact time the shock was received is thus obtained. Lines are also placed on the chart running lengthwise, dividing it so that the impacts are indicated at certain speeds in miles per hour. The accompanying illustration shows the nature of the machine and the character of the chart record obtained.

The machines are placed in cars with freight by agents and register all shocks received enroute to destination. The agent at final station removes machine, detaches portion of chart covering the run, sending it to the General Offices. There the Car Service Department furnishes the running record of the car, from which the location of the car, when shocks shown were received, is obtained. The receiving agent also

## Three Hundred Associate Members for the Glee Club!

After years of selling tickets for its annual concerts, to cover its expenses, the Baltimore and Ohio Glee Club last spring enrolled almost 100 associate members, each of whom subscribed \$5.00 for membership. In return each was given 5 tickets to the annual concert of the Club on May 21, 1922. The appeal for associate members was directed principally to the officer personnel of the Baltimore and Ohio in and around Baltimore, solely because the capacity of the concert hall enforced this limitation.

For the season of 1922-23 the Club hopes to give two concerts, one in January and one in May, each in a hall accommodating 1,200 persons, thus making a seating capacity of about 2,400 for both concerts. It can finance and carry through this plan if it can secure three hundred associate memberships at \$5.00 apiece. Each of the associate members will be given six tickets for the concerts, divided as the individual desires, three for each concert, or four for one and two for the other, etc. The Club, therefore, extends to its many friends a cordial invitation to become associate members under this plan.

Each year the concert of the Club has shown a marked advance in both the musical quality of the program given and the finish of the performance. An especially interesting musical treat is in store for the January concert, when the entire glee program will consist of numbers by one composer, Daniel Protheroe, who stands in the forefront of American musicians both as a writer and director of great male choruses. The range in character of the numbers can be judged from four of the titles: "The Sandman," an exquisite lyric of plantation flavor; "Shadow March," a charming fantasy of childhood; "The Vagabond," a stirring epic with the salt savor of the North Seas; and "Dronheim," a magnificent opera of the cantata type depicting the dramatic struggle between Paganism and Christianity in mediaeval England. It is a truly beautiful program, the first, so far as we know, to be given by a glee club wherein all the numbers are the work of one composer.

The Club is not a money-making organization, its objects being to provide healthful, instructive and enjoyable recreation for its members, associate and active. One of its greatest pleasures has been to give concerts without charge for the benefit of worthy charities.

It can and will reach a new standard of accomplishment this year if its friends support it as well as is confidently expected. All Baltimore and Ohio music lovers are invited to join and prompt responses will be appreciated.

Please use the coupon.  
Secretary, Baltimore and Ohio Glee Club  
Mount Royal Station, Baltimore, Maryland

Please enroll me as an associate member of our Glee Club for the season 1922-1923, the cost to me to be five (\$5.00) dollars.  
It is understood that I will be given six tickets, to be divided between the two concerts as I desire.

Check here  
.....I enclose remittance herewith to cover cost.  
.....I will send remittance later to cover cost.

(Signed).....(Department).....  
(Location).....

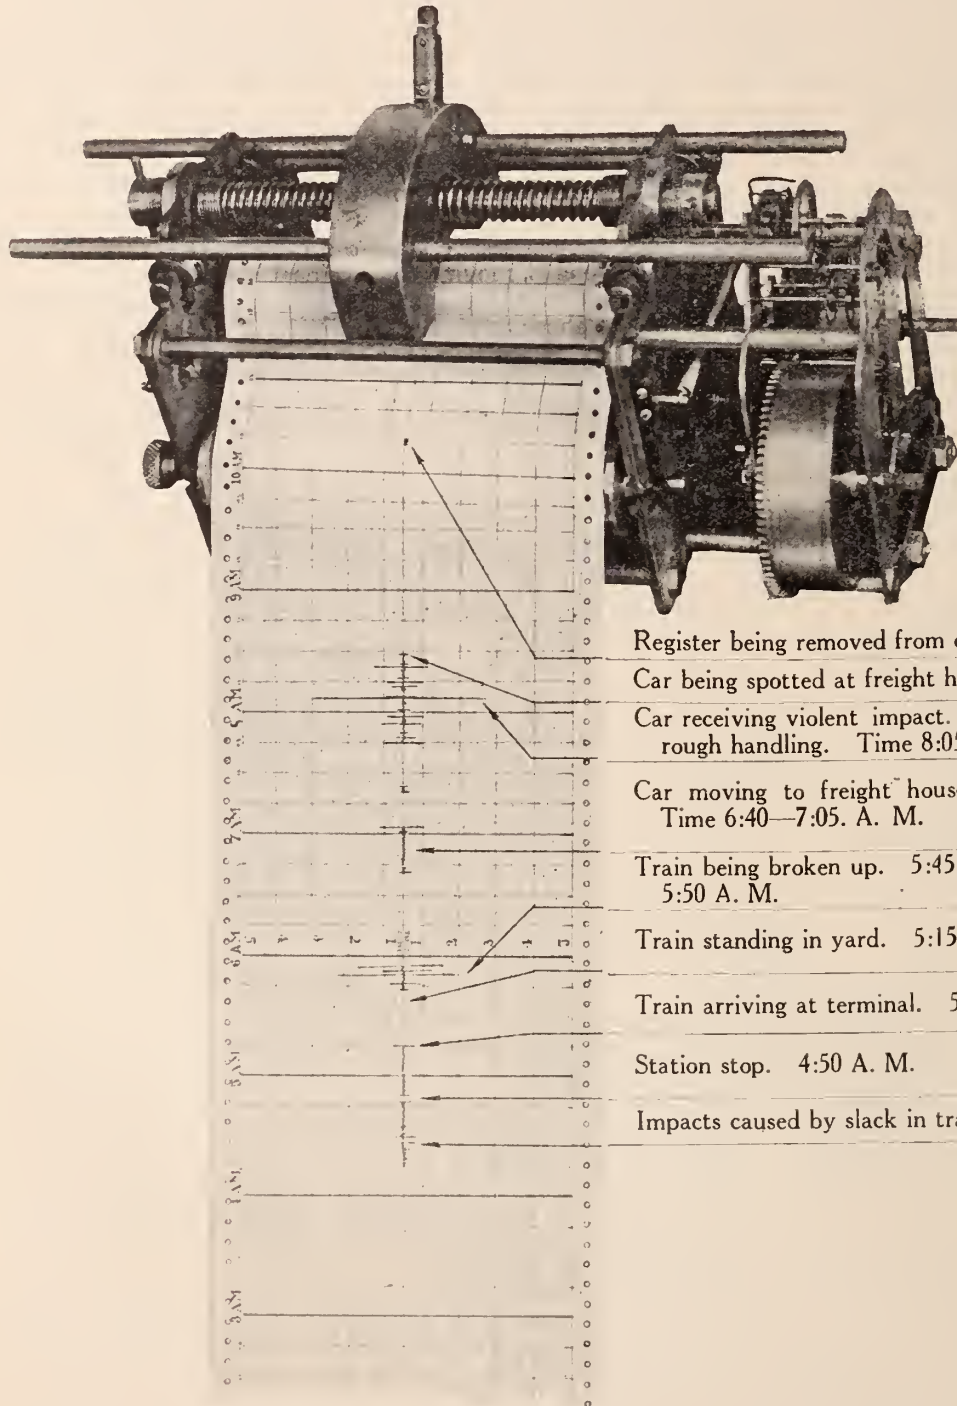

furnishes copies of Damage Reports so that the effect of the shocks is clearly indicated.

The information thus obtained is tabulated, the original chart, running slips, etc. then being sent to the superintendent of the division upon which Rough Handling is indicated. In this way the superintendent is able to bring the damage directly to the attention of the individuals causing

it. It is felt that when such a graphical representation is given those responsible, their desire to cooperate will bring about a large reduction in the cases of "Rough Handling" which numerous tests have indicated occurs when impacts of over from three and a half to four miles per hour are received.

The importance of this question is accentuated when it is realized that

every dollar saved in the prevention of such claims is equivalent to five dollars of new business. In other words, if we can save \$400,000 per year in this item, the effect on the net revenues of the railroad will be the same as though we had secured \$2,000,000 worth of new business. It is felt that the presentation of these facts will result in the greatest effort to bring about the results desired.

# Typical Record

## Find the Loser!

*A Service Rendered by Our Baggage Department that Wins Friends for Us*

ONE of the specialties of our Baggage Department is the finding of various articles that have been lost on our trains, at our stations, etc. As may be imagined, this work is most interesting, and it usually brings along with it a crop of appreciative letters from our patrons. Among the files of John P. Dugan, general baggage and milk agent, we picked the following letters, which are only samples of what Mr. Dugan is constantly getting. These serve not only as receipts, but show that in nearly every case where lost articles are recovered by our employees, the Baltimore and Ohio finds a friend.

### Thanks from New England

Ridgefield, Connecticut  
May 2, 1922

My dear Mr. Dugan:

Words fail me in expressing to you my sincere appreciation for your kindness to me in locating and sending to me my fur, which I lost on train No. 507, on April 17, 1922.

I assure you I am more than grateful.

Very sincerely yours,

(signed) Mrs. Charles T. McGlynn

### One with a Ring in It

WASHINGTON FILM EXCHANGE

Washington, D. C.  
July 3, 1922

Dear Mr. Dugan:

This will acknowledge with thanks receipt of my ring, which was left in the ladies' wash room, Camden Station, last week. I am attaching hereto postage covering the charges for mailing, which I trust is sufficient to cover all charges.

Again thanking you for your very prompt and careful attention to this lost article, I am,

Very truly yours,

(signed) Alice Reighly

### A Compliment from Dayton

Dayton, Ohio  
June 24, 1922

Dear Mr. Dugan:

I wish to inform you that the glasses left on the Baltimore and Ohio train at Toledo on June 14 have been found and were sent to Mrs. Richardson a few days ago. I thank you for the efforts you have exerted to locate them.

We are old patrons of the Baltimore and Ohio; in fact, for years we have made three regular trips to Michigan each way on the C. H. & D., and have not missed one since the Baltimore and Ohio took over the C. H. & D.

It is the popular road in this neck of the woods and we have found the enginemen,

brakemen, and especially the conductors, to be men of fine caliber and extremely courteous to travelers.

Thanking you, I am,

Yours

(signed) W. J. Richardson

### From an Employee of a Fellow Railroad

SEABOARD AIR LINE RAILWAY COMPANY

Freight Traffic Department

Baltimore, Md.

January 25, 1922

File 175

Dear Mr. Dugan:

Wish to express my sincere thanks for the effort put forth by you and your various representatives to locate coat lost on your train No. 15, January 11, by Miss Mary Elizabeth Prince, daughter of our freight traffic manager. The coat was delivered to me yesterday by my friend, Mr. J. F. O'Toole, freight representative.

It has been clearly demonstrated to me in this case, that the Baltimore and Ohio representatives are all on the job.

Again thanking you and trusting that I will have the opportunity to serve you, I beg to remain,

Yours very truly,  
(signed) C. E. Thomas

General Agent

### And Last—but not Least—from One of Our Own Employees

Childs, Md. September 20, 1922

Dear Mr. Dugan:

Referring to your letter of the 19th inst. file H.

The umbrella I left on Train 63 on September 2, and of which I wrote you on the 6th inst., was received here on Train 68 yesterday.

Please accept my thanks for the umbrella as well as for the very courteous letter referred to above. I am an employee of the Company and was riding on a pass, and you, no doubt, knew this from the wording of my letter of the 6th; yet, your letter to me was just as courteous as one could have been had it been addressed to a passenger paying fare.

I thank you very much.

Yours truly,  
(signed) H. H. Carver

Agent

## Pleasing of Passengers Strengthens Satisfaction of Big Shippers in Our Service

R. M. FRENCH, SPECIAL RECEIVER  
FRENCH COLLIERIES COMPANY,

Pancoast, W. Va.,

February 21, 1922.

Mr. W. Trapnell, Superintendent  
Charleston Division  
Baltimore and Ohio Railroad  
Weston, W. Va.

My Dear Mr. Trapnell:

Two of our stockholders, Mr. W. P. Tanner and Mr. Leopold Gross, of New York city, paid us a visit several weeks ago. They left New York on Saturday evening February 11, coming via Grafton, arriving on Sunday at 3.31 p. m.

It was their intention to return home by way of another railroad. The cordial reception and courteous treatment which they received while on your Division, however, caused them to change their plans and return home over the same route by which they came. They were both most enthusiastic over the spirit displayed by the parlor car steward and porter, as well as the balance of the train crew, and it gives me great pleasure to congratulate you on the splendid esprit de corps which apparently exists on your division.

It may possibly be of interest to you to know that these gentlemen are the largest Baltimore and Ohio shippers of flour into the Port of New York, being the guiding spirits of W. T. Tanner-Gross and Co., Inc., with warehouse and wharves on Staten Island. I feel confident that their trip here will add to the confidence and friendly feelings which they already had for the Baltimore and Ohio.

Yours very truly,

(Signed) R. M. French.

(The men involved are Conductor A. Kiddy, Brakeman E. E. Newlon, Steward J. A. Crouse and Porter Robert G. Anderson.—Ed.)

# Accurate Weights Insure Correct Freight Charges

Gains in Revenue from Check-Weighing and Revising Classification of Inbound and Transfer L. C. L. Freight, September, 1922

*Note:—Each month there will be published in the Magazine, statement of increases, shown by stations, made in the revenue of the Company by revising classification and check-weighing inbound L. C. L. shipments and L. C. L. freight in transfer.*

A. E. DAY, Chief of Weighing Bureau, Transportation Department

# Where the "Railroad Dollar" Has Gone in the Last Six Years

THE billions of dollars and cents which are taken in annually through ticket windows or in freight offices by the railroads all find their way out again into the hands of the public in payment for labor, fuel, taxes and material and supply bills of the railroads.

How this money has been distributed in the last six years is shown in a chart and survey just finished by the Bureau of Railway Economics in Washington. The most interesting items among the disbursements are

those of labor, fuel, depreciation, purchase of new supplies and taxes.

In the study of this analysis, which is based upon statistics of the Interstate Commerce Commission, the expenses of the railroads (the dollars paid out) are as shown in Table A below.

### The 1921 Dollar

Taking 100 per cent. as the total costs of the railroads in 1921, the survey of the Bureau of Railway Economics shows that in that year

Table A

Percentage of the total expenses of the railroads going to labor	
In 1916.....	\$1,365,776,046 or 38 per cent.
In 1917.....	1,617,718,932 or 40.3 per cent.
In 1918.....	2,430,846,416 or 49.8 per cent.
In 1919.....	2,644,109,442 or 51.4 per cent.
In 1920.....	3,424,075,109 or 55.4 per cent.
In 1921.....	2,585,329,497 or 46.9 per cent.
Percentage of the total expense going for fuel consumed in transportation	
In 1916.....	\$ 250,544,862 or 7 per cent.
In 1917.....	393,929,583 or 9.8 per cent.
In 1918.....	500,225,205 or 10.3 per cent.
In 1919.....	474,174,972 or 9.2 per cent.
In 1920.....	674,836,361 or 10.9 per cent.
In 1921.....	523,724,146 or 9.5 per cent.
Percentage of total expenses for making good the depreciation on properties and retirements	
In 1916.....	\$ 119,785,157 or 3.3 per cent.
In 1917.....	115,404,686 or 2.9 per cent.
In 1918.....	119,233,705 or 2.4 per cent.
In 1919.....	126,292,105 or 2.5 per cent.
In 1920.....	144,046,781 or 2.3 per cent.
In 1921.....	156,372,133 or 2.8 per cent.
Percentage of total expenses going for materials and supplies	
In 1916.....	\$550,913,977 or 5.3 per cent.
In 1917.....	611,575,889 or 15.2 per cent.
In 1918.....	821,687,786 or 16.8 per cent.
In 1919.....	1,001,647,973 or 19.5 per cent.
In 1920.....	1,366,538,753 or 22.1 per cent.
In 1921.....	1,138,224,388 or 20.6 per cent.
Percentage of the total costs paid out for taxes	
In 1916.....	\$157,113,372 or 4.4 per cent.
In 1917.....	213,920,095 or 5.3 per cent.
In 1918.....	223,175,379 or 4.6 per cent.
In 1919.....	232,601,396 or 4.5 per cent.
In 1920.....	272,061,453 or 4.4 per cent.
In 1921.....	275,883,596 or 5 per cent.

Table B

### Division of the Railroad Dollar in 1921

For labor (salaries and wages).....	46.9
For fuel (locomotive).....	9.5
For loss and damage, injuries to persons and insurance.....	2.9
For depreciation and retirements.....	2.8
For material, supplies and miscellaneous.....	20.6
For taxes.....	5.0
For hire of equipment and joint facility rents.....	1.4
Net operating income (available for interest on bonds or notes and dividends in stock).....	10.9

the various items of expenses were as shown in Table B.

From net railway operating income which in this table represents return on investment, must be subtracted the cost of capital in the investment. The balance, if any, represents the surplus from which dividends may be paid or surpluses built up.

The figures shown for the years 1918, 1919 and 1920 represent the combined results of the Federal and corporate operations of the Class I roads under Federal control, also data for Class I roads not under Federal control, but do not take into account the general administrative expenses of the United States Railroad Administration. Switching and terminal companies are excluded from statement throughout.—Railroad Data, Sept. 20.

### The First Thanksgiving

*It Was in Newfoundland after Fro-bisher Settled the English Colony*

THE first Thanksgiving of the Pilgrims was proclaimed by William Bradford, Pilgrim Governor of Plymouth Colony, in 1621, (December 13), little enough as they had to be thankful for.

However, the Pilgrims' Thanksgiving was not the first observed by English speaking people in North America, for the very first was observed with religious ceremonies conducted by an English minister in the year 1578 on the shores of Newfoundland. This clergyman accompanied the expedition under Fro-bisher, who settled the first English colony in America.

Another similar service was held August 9, 1607, by the Popham Colony, which settled at Sagadahoc on the Maine coast.

However, the regular observance of Thanksgiving was begun by Washington's proclamation in October, 1789, six months after he became President, and the annual nationwide observance of the day was started by Lincoln.

### Who Supplied the Turkeys?

The attractive examples of America's greatest table bird which appear on the cover are there because of the kindness of B. A. Oatman, Office of Master Mechanic, Newark, Ohio, who loaned us this unusual photograph. We could wish him no greater kindness in return than that a bird as fine as any one of those pictured may grace his Thanksgiving table this year, with all the traditional trimmings.

# The Travels of a Way-Bill

By F. L. Charles

Assistant to General Freight Claim Agent, Cincinnati, Ohio

IN THE introduction of a story, the hero of which is so familiar a figure as the all important Way-Bill, it would seem superfluous to set out with a Webster's unabridged definition and derivation of the term Way-Bill. What is a Way-Bill? Everybody knows. We handle them daily by the thousands, in the Accounting, Transportation and Traffic Departments, yes, and in the Stores, Maintenance of Way and Equipment and all other departments which in any manner have to do with freight moving.

But change the question to read "WHY is a Way-Bill" and a different situation presents itself. How many of us have given serious thought to the fundamental reasons for the existence of so troublesome a document?

True, the accountant realizes the full importance of a Way-Bill if one happens to have been expensed but mislaid or lost before being abstracted; the revising clerk spends many weary hours over his stack of Way-Bills, checking the rates, minima, extensions and footings, and

correcting errors; the abstract clerk plays his daily game of "solitaire" getting them into abstract order and properly transcribing necessary data from their faces to the DS 2 as directed by the Accounting Department regulations; the bill clerk puts in minutes that seem like long hours in preparing them, after the freight house force and most of the office force have gone home, and, in the old days, before the typewriter came into more general use, here was one place where everybody seemed to have taken a solemn oath never to write anything that might become legible or intelligible to any person under the whole canopy of heaven.

Way-Bills have always been made of convenient size and shape, so that when properly folded they would fit exactly into the pocket of a yard office bill rack or the hip pocket of a pair of overalls, when becomingly draped on the handsome figure of a freight conductor.

For ages past Way-Bills have supplied the necessary link in the chain of evidence concerning the move-

ment of a certain defined shipment of goods, the link which enabled our friends in the Traffic Department to inform the anxious shipper that his consignment had passed the last junction or transfer point and should be on the market in the morning. And the story has it, they forthwith went around the corner and added another withe to the bonds of business fellowship that made our friends our patrons in industry, thanks to the information conveyed by the lowly Way-Bill.

Before going on record vouching any reasons for the necessity of having a Way-Bill, we have consulted the silver crowned patriarchs of the railway fraternity in many cities, endeavoring to learn the origin of the term Way-Bill as applied to the document under discussion. From all we get the same information—it was here when they rolled in, and for more than a generation it has been called a Way-Bill. So a Way-Bill it shall be.

We do find, however, that in the development of railway transportation its functions have from time to time been somewhat altered.

Its fundamental purpose is seen in the early stages of rail transportation, that period of transition from the old ox-cart to the iron heeled Black Betsey. For, mind you, the

Shipped by the Grace of God, in good Order and well Condition'd, by

*Patrick White*  
in and upon the good Ship called the *Maryan*

*Matthew Whipple*

Railroad bills of lading naturally followed in form their prototypes as used by ocean carriers. George T. Kohlenberg, agent at Adamstown, Maryland, loaned us the original copies of this and the reproduction on the opposite page

history of the Way-Bill antedates the prairie schooner of the plains of the great middle west. They had Way-Bills long before the prairie schooner took the place of the creaking ox-cart, that "train de luxe" which bore the ancestors of the writer westward from the splendid civilization of eastern Pennsylvania to the Indian and malaria-infested wilds of what is now the State of Ohio.

So I have it from splendid authority that great-grandfather and great-grandmother had no need of a Way-Bill to keep tab on all their earthly possessions which they loaded into the old ox-carts, and then slowly and patiently made their way over a large portion of the route now traversed by the Baltimore and Ohio, way back in 1833.

However, we can well imagine the confusion that arose when the Baltimore and Ohio began to put on BIG BOX CARS that would haul two or three ox-cart loads apiece, then to couple them up in trains of six or eight cars and more, and to load two, three or a dozen or more consignments into each car, consignments belonging to different people and to be unloaded at different stations along the WAY. Well, here we have the first syllable of the word WAY-BILL, something to tell you where to unload certain goods along the way. The rest of it is easy, "Bill," a bill for the charges to be collected for transporting the goods.

We imagine that the first forms, or at least the idea as to how to make

them, were borrowed from some old sailing master. For doubtless the old ship captains had long before this devised some means of tallying the various consignments and articles taken aboard their vessels for delivery at the several ports they touched on a voyage.

And right here in this little story of a Way-Bill we can connect up another expression familiar to railroad people, quite common in some sections of the country even yet. We have all heard the expressions "Manifest," "Card Manifest" and "Export Manifest." The first two mentioned, covering a car, meant a description of the goods in the car. The latter, still in common use in transporting goods out of the country, is a description of the goods in the packages for the information of the customs officers at the port of entry.

So how logical our reasoning is that the first Way-Bills were no doubt patterned after a form previously used by people engaged in marine transportation, a CARGO MANIFEST. We have not been able to trace down the origin or number of years the term "Manifest" has been in use, but the fact that it has stubbornly refused to be supplanted by the distinctively railroad term "Way-Bill" is evidence enough to indicate that it had its sponsors when they named the baby that has caused all so much worry and trouble.

Now we have brought out the two fundamental reasons or necessities

for having a Way-Bill, and it seems that those who had to do with selecting a name for it and steadfastly persisted in calling it a Way-Bill instead of a Manifest, also persisted in placing the two syllables, which are symbolic of its two purposes, together in the order of their relative importance. For what was to have prevented them from calling it a "Bill-Way" had they felt that the collection of the charges was of more importance than the proper unloading of the freight along the way?

The wisdom of that earlier generation has again been demonstrated. That same relative importance as between the two fundamental purposes of a Way-Bill still exists. In fact, the former, the purpose of indicating where and to whom freight should be delivered along the way, has been so constant that it has not changed one iota within the memory of a generation.

The second fundamental purpose for which a Way-Bill was designed, the furnishing of a bill for the collection of freight charges, has been somewhat modified.

It is hardly necessary in the present day for the agent at point of origin to tell the agent at destination the amount of freight to collect on a certain shipment which is being sent to his station. In fact, the agent at destination will not accept the billing agent's figures, but checks the rate for himself, for he has on file the same tariffs from which the billing agent first quoted the rate.

It was not always thus. It is within the memory of the readers of this article when the Interstate Commerce Commission did not exist, tariff files were composed largely of personal letters, written with pen and ink, at the direction of the General Freight Department to the billing agent, who was instructed to apply a certain rate, on a given commodity, to destinations named; incidentally the rate named was one that in the judgment of the General Freight Department would get the business, or develop the industry for the mutual benefit of the industry and the railroad, and in many instances the agent at destination did not know what the freight charges were going to be until he got the Way-Bill.

In those days it was a crime to misplace or lose a Way-Bill, for on its proper handling depended not only delivery of the freight at the proper place along the way, but the collection of the proper charges as well: The Accounting and Traffic Departments, as well as the Transportation Department, were seriously interested in seeing that the Way-Bill traveled with the freight.

But time has wrought great changes. The Traffic Department continues to make the rates, keeping within certain defined limits, but the rates are made and posted for the information of the general public and in all instances the delivering agent is held responsible for the correctness of the rate basis on which charges are assessed.

By demanding the surrender of the original bill of lading, the agent at destination, as the authorized representative of the Accounting Department, is enabled to determine the point of origin, description of goods, weight and route, then refer to his tariff, assess proper charges and make collection.

But this first fundamental purpose, I repeat, has been so constant that it has not changed one iota.

The agent at point of shipment transcribes the instructions from the shipping order onto a Way-Bill, then shows the car initial and number into which loaded.

It immediately becomes a working chart for the Transportation Department in handling that shipment, whether it be a carload or a less than carload shipment.

The Way-Bill indicates to those handling the shipment, if it be livestock, if it shall be unloaded for rest, feed and water, and within what time limits; if it be fresh meat, when or where it shall be iced in transit; if it be fresh fruit or vegetables, the Way-Bill will indicate what refrigeration

or ventilation service the shippers have paid for and expect to be performed; if to be weighed en route, the Way-Bill will indicate that fact; if to be stopped off to finish loading or to partly unload, those who have charge of the shipment ascertain that fact from the Way-Bill.

More important even than these, the Way-Bill does, or at least should, convey definite information as to the junction points and routes via which the shipment should travel.

By a proper classification of Way-Bills in his bill rack a yardmaster is able to determine the destination and contents of every loaded car in his yard. From this it follows that he should know which cars are to be accorded quick dispatch, which are to be accorded ordinary freight service and many of the various other items of information essential in the proper making up of trains.

The conductor is likewise concerned. For from the Way-Bills he determines where cars shall be left along the way, at which of many smaller stations, on what track to place them for delivery to the waiting consignee; and, in the case of peddler cars, the pouch of Way-Bills tells him at what points the car shall be opened and what shall be unloaded at such points.

A box car loaded with grain or a gondola loaded with coal is speechless and, when kicked out into a yard or placed in a train without a Way-Bill, has as little ability to tell where it is going as has a stray dog to tell where he came from.

A situation even more acute and complicated has developed in regard to the handling of less-than-carload shipments.

With the development of the rail transportation business, the building of larger cars has necessitated the loading of more shipments into each. The extension of railroad facilities to every nook and corner of the country has brought into the arteries of commerce innumerable shipments from and to thousands of stations. The development of industrial enterprises along the railroads has brought into the game thousands of consignees and shippers at the many stations. Therefore the identification of a shipment, or the maintaining of its integrity while passing over the road, has become a problem of no little concern.

In the old days most anything went in the way of marks on a less-than-carload shipment, but as a result of the confusion arising from the rapid development above noted, it was determined that the interests of the shipping public as well as the carriers

would be best served by the complete marking of shipments to be handled in less-than-carload movement; accordingly we now have a law governing that subject, written in the form of Rules of the Freight Classification.

But here we seem to have lost our footing. I feel almost justified in saying "lost our heads;" for having arranged for the complete marking of each individual piece of freight which is to move as a less-than-carload shipment, that marking does, or should, with proper handling, guarantee the delivery of shipment to proper destination and consignee, and too many of us have accepted the theory that when that service is performed we have done our duty as a common carrier. In fact I have heard the remark from men in high authority that if the Postal Service can handle millions of letters daily and effect safe delivery, being governed only by the addresses on them, certainly the railroads could do likewise, if they were functioning honestly and properly.

But let us consider further. The postal service gives no receipt for letters received for transportation and requires none when delivered; and in case of loss the writer has no recourse. In fact, no negotiable paper or other matter of intrinsic value is entrusted to the ordinary mail service. Letters containing negotiable paper or other articles of value are handled by the mail service as *Registered* packages, in which instance the sender obtains a receipt at starting point and a receipt is obtained for the goods when delivered at destination.

Here then, is the proper place to base our comparisons as between the Postal Service and Freight Transportation, and it is readily called to mind that the postal authorities have perfected and maintained a system which enables them to properly identify even a letter when moving as registered mail and acknowledgment of receipt is required of every employe handling it.

In freight transportation the railroads give a Bill of Lading, which constitutes a receipt for the goods at point of origin, and a contract to transport the property. To discharge that liability they must not only transport the goods described but must satisfactorily identify the shipment as the one which they received, and obtain a receipt for it from proper consignee at destination.

Here the Way-Bill again functions in its first fundamental purpose. For, when properly handled, it accompanies the shipment from the time the Bill of Lading is given until

the receipt is obtained at destination; and on its face are recorded all items of record pertaining to the movement of the shipment.

It is to be noted here that if the record of movement is continuous and unbroken, there can be no question as to identity of the shipment; whereas, if the Way-Bill is separated from the shipment and the record of movement becomes broken, the burden of proof of identity of packages rests with the carriers, not with the shippers.

Herein lies one of the greatest problems before the American railroads today, the prevention of claim payments for unlocated loss; for we are fast coming to a realization of the fact that we are paying out thousands of dollars monthly for unlocated losses which are the result, in too many instances, not of failure to deliver the goods, but of failure to properly identify them by maintaining an unbroken record of such shipments while in our possession, and to get a proper receipt when affecting delivery which will discharge the liability we incurred when bill of lading was given at point of origin.

This matter is worthy of the earnest consideration of every employe of the Baltimore and Ohio.

### How Is This for Telegraph Service?

HERE'S one of the thousands of speed records of our Telegraph Department—a message which had to be handled 10

Standard Track at Boyds, Md.

This picture shows standard track as re-surfaced, re-ballasted, with ties renewed and re-spaced on single track, Boyds, Baltimore Division

times. It got to its destination and back in 41 minutes.

On August 27 a passenger at Sistersville, W. Va. wanted a Pullman reservation, Parkersburg to St. Louis, on train No. 1. Operator R. A. Martine, Sistersville, sent the following message:

SISTERSVILLE, August 27  
PULLMAN CONDUCTOR NO. 1 ON LINE  
Reserve Lower Parkersburg to St. Louis for Downes

J. G. U.  
5.59 P

Operator B. N. Kinhead, Parkersburg, transmitted it to Operator T. J. Reaber, "GO," Baltimore, at 6.05 p. m.; Operator M. A. Nyland, "GO," Baltimore, transmitted it to Operator George Chambers, Martinsburg, at 6.10 p. m., from whence it was handed to the conductor of train No. 1.

The reply:

"Lower 7 Car 4"  
was handled by the same operators as follows:  
Martinsburg to Baltimore, 6.25 p. m.  
Baltimore to Parkersburg, 6.37 p. m.  
Parkersburg to Sistersville, 6.40 p. m.

### At Mr. Underwood's Expense

A STORY is going the rounds in banking circles that is raising many a hearty laugh at the expense of F. D. Underwood, president of the Erie.

The story, as told, is that Underwood and W. H. Truesdale, president of the Lackawanna, "the road of anthracite," were rounding the corner of Courtlandt Street into Broadway the other day when the latter espied a lady of color of ample girth and expansive smile.

Truesdale recognized the lady of ebony hue as a washwoman once long employed by his family. He greeted her warmly and chatted with her for some moments while Underwood impatiently was cooling his heels some distance away.

When Truesdale dismissed the colored woman and returned to Underwood the latter decided he would get square with Truesdale for making him wait so long, so he inquired; "Who was that, Phoebe Snow?"

"Yes," Truesdale promptly replied, "she tells me that she has been travelling on the Erie."

In July, 1892. Picnic of O. R. C. to Gettysburg; front row, right to left: John McCaule, now trainmaster, Valley Branch; "Ben" Jenkins, now passenger conductor; Lemuel Boyer, late passenger conductor; extreme left front row: "Jess" Laudenslager, now engineer. Veterans will perhaps recognize others in the picture

# Safety Section

## Careful Crossing Campaign Showed Reduction in Accidents on Baltimore and Ohio

*Yet Twenty Chauffeurs Were so Careless That They Ran Cars into Gates Lowered for Approaching Trains*

THE Careful Crossing Campaign, designed to warn automobile drivers and others to be cautious at railroad grade crossings, which began June 1 and ended September 30, was a gratifying success in so far as the Baltimore and Ohio was concerned.

Figures are not yet available from all the railroads of the country, which took part in the campaign, and it may be a week or more before the Safety Section of the American Railway Association, which conducted the campaign, has reports from all lines and combines them. If the Baltimore and Ohio's average of reduction of accidents is maintained on all the railroads, the expense of the drive will have been well spent.

Actual collisions between trains and automobiles were reduced on the Baltimore and Ohio 13 per cent., as compared with the accidents in the same four months last year; this in view of the fact that there was a 12 per cent. increase in the number of machines registered in the country. It seemed to indicate that drivers had given consideration to the campaign slogan, "Cross Crossings Cautiously," and it is the earnest desire of railroad officials that the lesson will not be forgotten.

There was a similar reduction of 13 per cent. in all kinds of accidents at crossings, including those to pedestrians, automobiles, other vehicles, etc. Pedestrians were especially careful when passing over the tracks, for only two persons were killed and three injured. One of the persons killed and two of those injured had impaired hearing. One of these casualties occurred in August, one in July and three in June.

The reduction in persons killed in crossing accidents of all kinds amounted to 49 per cent. and is regarded by Baltimore and Ohio officials as a splendid record. There were 35 fatalities last year compared to 18 this year. The reduction in injuries amounted to 24 per cent.

There were some narrow escapes

from casualties on the part of automobilists. Twenty of them ran into gates that were lowered for the passage of trains. These collisions probably saved the lives of these careless drivers. There were ten other machines driven into the sides of trains moving over the crossings or standing on them. In two of these latter accidents nine persons were injured, one machine containing eight persons, all of whom were severely injured because the driver could not stop his car in time to prevent his striking a moving train.

There were 30 accidents, out of a total of 120, which had no right to occur at all, or 25 per cent. were due to the absolute disregard of gates or the fact that a train already was on the crossing. There seems to be little chance at all of saving drivers of this kind, but the Baltimore and Ohio will still endeavor to convince them that the cautious crossing of tracks is the only safe method. This plan of education includes the distribution of appeals to the drivers and checking up of operators as they pass

over the tracks. When they fail to take precautions they are to be so notified by cards that are sent out to addresses obtained through finding out the owner of the automobile license.

### Many Roads for These Great Cities

THE Bureau of Railway Economics has just prepared a list of cities having a large number of railroads entering from outside sections. Terminal and electric railroads are not included, and the list is confined to cities having eight and more lines entering:—

	Railroads.
Chicago.....	33
St. Louis.....	20
Kansas City.....	14
Toledo.....	14
New York.....	12
Birmingham.....	11
New Orleans.....	11
Cincinnati.....	11
Houston, Texas.....	10
Fort Worth.....	10
Memphis, Tenn.....	10
Des Moines.....	9
Detroit.....	9
St. Paul, Minn.....	9
Shreveport, La.....	8
Atlanta, Ga.....	8
Denver, Colo.....	8

Railroad Data, Oct. 5.

### Keep Cars Moving

*A standing car earns no money to pay wages*

**Keep Cars Moving**

## One Way We Saved Money during Coal Scarcity

Leslie Green and R. T. Thompson, Maintenance Department, who sawed up hundreds of cross ties to keep the fires burning at the Water Pumping Station at Swan Creek, Md., during coal strike

A PRETTY little cottage on a quiet street in the new part of town. Sunbeams peeking in at the open windows spreading their message of happiness. This was Tom's home.

It was a beautiful spring morning when Tom and his wife came out on to their little front porch where she had bade him good-bye and stood waving to him as he walked briskly away.

How could anything happen to such a happy couple? They had their home, their health and each other. That was probably what Tom thought of on his way to the shop that bright morning, but in the

midst of happiness, sorrow oftentimes overtakes us. No matter how strong or joyous we may be, there comes a time, often through our own neglect, when our good fortune is cut off and troubles overwhelm us.

Tom whistled softly as he started at his task. He had barely begun to work when a spatter of sparks from a piece of steel struck him in both eyes. Men about him rushed to his assistance but they could do nothing to help him.

Many weary weeks Tom stayed

at the hospital. All the skill that could be commandeered was applied in his case and every effort made to restore his sight. During all this time things were happening in his once happy home; money in the bank was long since gone, the little home was mortgaged, his wife's health impaired by toil and suffering. The only ray of light in her life was the little baby boy, born shortly after the accident—the dear little fellow that Tom could not see.

As time passed Tom partially regained his sight. More improvement and, finally, with glasses, almost as good as he used to have. He had almost given up hope of such good fortune, but the man in him put up a man's fight and he won.

Courage returned and back at the factory he soon settled

down to the task of regaining what he had lost through carelessness and neglect. If he had only heeded the advice of his foreman and worn his goggles he would have saved himself and his family much suffering and sorrow.

Tom is assistant foreman now and he gets rather emphatic when some of the boys take a chance and neglect to wear their goggles. He will never forget what a close call he had.

Eyesight is the most precious gift to man. Taking a chance and defective vision have caused many accidents, much regret, pain and sorrow. Don't neglect your eyes! Protect them against accident and strain. Be sure you see as you should. Many have defective vision who think they see perfectly. Tom probably needed glasses even before the accident that made so much trouble.

*Eye Sight Conservation Council.*

### Load Promptly—Boost the Carload—Help Business

INDUSTRY has been materially retarded during the spring and summer by the scarcity of coal and during summer by the scarcity of transportation. Everybody is behind with his orders and wants to catch up. Everybody wants to ship at once and there are not enough cars to go round.

American Railway Association—Car Service Section—reports 14.1% of all freight cars of the country in bad order on September 1, or about one car out of every seven.

With the helpful co-operation of shippers we can accomplish a great deal in relieving the car shortage; in fact, almost enough to overcome the bad order situation.

In October, 1920, our average carload was 39.30 tons. In August, 1922 it was 35.68 tons. This means that if cars had been loaded as heavily in August as in October, 1920 we could have transported the same amount of business in one-tenth less cars.

Let's save the tenth car by urging shippers to resume the heavier loading, and give us a chance to produce one tenth more transportation, and while we are about it talk up more prompt loading and unloading.

### Service

#### *The Magic Word in Railroad Par-lance*

BY W. E. WARD

Chief Clerk to General Superintendent  
Pittsburgh

ON the morning of June 7, a representative of the Jones & Laughlin Steel Company made request on our Pittsburgh office to trace P. & R. 18477, car of sand, shipped from Cape May, N. J., June 5, routed via—

Atlantic City R. R.  
Philadelphia & Reading,  
Baltimore & Ohio.

for their Pittsburgh works, this material being urgently needed.

Early the following day the same person advised that this car had been reported in by plant manager, and considering the mileage involved, the numerous terminals to go through, etc., the shippers expressed their extreme gratification for such excellent SERVICE.

Looking over the card for this car it is noted that it left Cape May, N. J., June 5; arrived Camden, N. J., same day; delivered P. & R. at Rutherford 1.00 a. m. June 7; passing Cumbo 4.00 p. m., June 7. It arrived at Glenwood (Pittsburgh) at 3.30 a. m., June 8, less than 72 hours from the time it was shipped at Cape May until delivered at Pittsburgh.

With such SERVICE to back them up, every employe of the Baltimore and Ohio is in a position to become a first-class passenger and freight solicitor and it will only be necessary to get a trial shipment from each prospect to see our business increase amazingly.

## The Health Value of Hobbies

*One of a series by Life Extension Institute containing the latest and the most scientific information on healthful living and the prevention of disease*

THERE are friendly germs and unfriendly germs, and likewise there are friendly and wholesome fads and unfriendly, unwholesome fads. A fad that leads a man to spread boredom around him is an unfriendly and unhealthful fad. The right kind of a fad is one that makes us better to live with.

Why is it that a wholesome fad does not add to fatigue and life strain instead of relieving it? The answer is that work of most civilized men involves the use of mental processes that have developed only lately in the history of the race. Thinking, planning, analyzing, figuring—all of this type of work which men and women in executive, professional and clerical lines are required to do, involves a mobilizing of brain power and a demand upon the nervous system and the related glandular system. From this demand primitive man was wholly free.

Furthermore even mechanical work has become more sedentary. Civilized man is a sitting down animal instead of a running-around, climbing animal. He spends more time in reading and writing and looking at pictures or plays than he does in an active physical struggle with nature. Hence when he follows some sport such as football, baseball, tennis, golf or any similar active recreation which involves the primitive elements of pursuit, struggle, capture and victory, he is using the old primitive channels of his brain, nervous system, muscular and glandular systems. He is using the easier pathways for the vital forces of his body, and this tends to maintain his mental and nervous poise.

It has often been noted that mere rest from mental activity, from busi-

ness or professional strain, is not in itself adequate to maintain good health, and it may actually destroy health; it may invite boredom and worry. By bringing into play these primitive activities, the insistent higher mechanism of the brain and nervous system is more completely rested and there is afforded opportunity for more complete self-expression. These primitive demands are always with us, and if we suppress them wholly we suffer by it.

It is well said that no man can overwork who does two kinds of work; the work by which he earns his living and the work by which he balances life strain, which is what is meant by a wholesome fad.

Particular emphasis is laid upon the value of mechanical work as a fad. A man who is daily engaged in work at a factory would not, of course, benefit by such a fad; but the business man, the professional man, the commercial worker, will find that some form of mechanical labor, which does not impose undue mental or physical fatigue, will provide the best balance to vocational strain and the stress of social life. A tool chest and a workshop in the home would, beyond question, cut down the docket in the divorce courts.

Just as football, baseball, tennis and golf call up the primitive exercise of mind and body and simulate the old primitive strife with nature, so does mechanical work simulate the old activities that primitive man was compelled to engage in in order to make his weapons, build his home and protect his existence. The release of these activities is often like balm to a tired and discouraged soul.

There is a wide range of possible activities of this kind: odd jobs about

the house, pottering around an automobile, repair work for those who are fatigued or daunted by the thought of any important creative mechanical work. Interest in a task which is not obligatory and yet produces useful results is what should be sought in following a fad. In treating our shell-shocked soldiers, whose condition fundamentally was not different from that of men in civil life who have suffered from the shock of disappointment or the strain from prolonged worry or business anxiety or fear of the future, we were most successful when putting them at work—productive work.

One of the greatest menaces to health and to society is boredom, an aimless lounging condition which many people drift into during the intervals of work. As working hours are shortened, the menace increases. Even when people do not drift into vicious indulgences or dissipation in the endeavor to escape boredom, they often fill in their time in ways that give no opportunity for self-expression. The movies, the theatres, reading, study—all have their places, but self-expression can only be attained by personal activity by doing something ourselves, by seeing something grow and develop under our hands or our brain. Hence a mechanical fad supplies this requirement, this secondary type of work that differs from work and yet is not pure recreation.

This is an age when there are increasing demands on the brain and nervous system, not only in life struggle, but we are bombarded by the complexities of existence. We get all the good news and all the bad news of the world in a sort of machine gun fire, almost as quickly as it happens. Events move swiftly, and we need something to balance this strain. In a fad for mechanical work, therefore, we have the double advantage of relief of life strain and a certain amount of physical activity which offsets our tendency to slump into the easy chair and toast our feet, when we might better be moving around and doing something. Bridge has turned the scale against many a mentally tired man when billiards would have saved him. When a man follows an intellectual pursuit as a fad, he would do well to have a secondary mechanical fad as a safeguard. Gladstone sought refuge from the cares of State in classic literature, but he was driven to demobilize his higher brain centers by tree chopping. The woman who is busy all day with housework would find her best method of self-expression in intellectual work, while the business or professional

*(Continued on next column)*

## Are You Helping Your Child?

**Y**OUR child's usefulness, happiness and success in life are dependent largely upon the care you give it, the watchfulness you keep over it and the intelligence with which you guide it.

You are responsible to a great degree for the actions of its future, be they for good or bad. A child forms its habits from what it sees and the habits become a permanent part of its whole life.

If a child sees clearly he or she will think clearly. The eye is the mirror of the brain and if each image that the eye reflects on the brain is in proper perspective, the impression made and concepts received will be correct. But, if the vision is defective the impressions made and concepts received will be defective and thoughts and opinions expressed will be distorted.

This is not only true of a child—it is true also of older people. The World War proved that about 29 per cent. of the young manhood of the nation between the ages of 21 and 31 years, were suffering from defective vision.

The only way to correct this alarming condition is to adapt corrective treatment early in life. It is the mission of the Eye Sight Conservation Council of America, with headquarters in New York City, to acquaint the public with the great need for better vision.

The clarion call for eye sight conservation must ring through the length and breadth of our land. The responsibility must be placed and the evil corrected. Educators who are moulding the lives of our nation's manhood and womanhood are doing their utmost to make the future generations a better people, physically, but they must have the cooperation of parents.

Father! Mother! Are you doing what you can? Are you helping your child? Are you watching over it and guiding it intelligently? There is no part of a child's physical make-up that will repay careful guardianship more richly than the eye.

*Eye Sight Conservation Council of America.*

## The Health Value of Hobbies

*(Continued from preceding page)*

woman might reverse the formula and balance her life by housework as well as recreational sports.

One word of warning. This counsel about fads must be qualified just as we qualify all health counsel, whether in regard to exercise, diet, or any other phase of hygiene. A fad is not a cure-all. All plans for health building should be made after a thorough physical examination and a consideration of the temperament and aptitudes of the individual. Unless the health program is planned according to the individual needs, it may fail. If you have a focus of infection in your body—a septic tooth or tonsil or an infected gall bladder—it will not be cured by a fad. If you are poisoning yourself in some way or are living on a diet that is greatly inadequate, a fad may mitigate but it cannot cure your trouble. Make a fad your servant, not your master, and it may add many years to your life and make people glad you are alive. God bless the man who first invented fads!

## "Guts"

*By Albert B. Clark*

Keyboard Operator, Printing Department,  
Baltimore

In the current issue of the MAGAZINE there appears a statement that a "friend" remarked to a Veteran that "no man would work twenty years for one employer if he had any guts." Let's put it the other way 'round. No man could stick to one job for many years "unless he has the guts."

It requires considerable stability and strength of character to stick to one job through the trials and vicissitudes of a long period of time. Not every person can do it. Then, also, there enters the important factor of being satisfied and contented,—the feeling that one is and always will receive a square deal.

The Baltimore and Ohio numbers many of its employes in the Veteran class, not a few of whom have passed the half century mark. "There's a reason."

## Can You Refuse?

**EVERYWHERE** you see the ravages of Consumption. There were 1,000,000 cases and 100,000 deaths from this scourge last year. But if all that see these words will help,

### Block Signals

#### *A Suggestion to Our Enginemen*

It was one of those extremely hot days of late August and the woman in the section opposite me was having her hands full in amusing her two little girls, one about seven and the other about four. She had read to them and gotten them drinks of water and pointed out cows and horses and mules and what not through the window as we sped along. It seemed to get hotter as we neared Washington and as the children became more restless the mother reached down under the seat and pulled out a set of blocks, the kind which are graduated from a very large to a very small one, and all of them opened on one side and hollow so that they can be fitted into each other compactly.

There was a table in the section and on it, just after our train had been run on the westbound track to be backed into Union Station, the mother began to build a single column of blocks, one on top of the other, in front of her. Finally she had all the blocks in the pile, nine of them, and the pile was almost three feet high.

You who know the switches which have to be passed by our trains in going into Union Station know also the gasps we gave as we took first one, then another and finally all of them, without even so much as toppling over a single block. But the big test was yet to come. Would the engineer stop the train so that you had to see it stop and could not feel it stop, in accordance with the best Baltimore and Ohio traditions? That was the question. Well, he did—to the complete safety of the pile of blocks, the pleasure of the children and their mother and the great gratification of at least two Baltimore and Ohio men who witnessed the episode.

The train was No. 1, the day was August 29, and the engineer was Thomas E. Massey.

“Thanks!”

A number of months ago the MAGAZINE started an inquiry (entirely unofficial, of course) as to whether it would be advisable to request our conductors and other ticket takers to thank passengers when they surrendered their transportation. A number of superintendents and

conductors answered our query and the general opinion seemed to be that this should be left to the discretion of the individual conductor in the individual case. This is the right answer, and probably not so much because we have a few conductors who do not see the great big fellowship opportunity in their jobs and from whom the “Thank You” would come with such poor grace as not to be particularly convincing, but rather because we have so many conductors whose smiles and affable ways of greeting passengers mean much more than a perfunctory “Thank You” ever could mean.

Pursuing the inquiry further, the next question is how passengers would feel about an innovation of this sort. And probably this must be answered in the same way as the one above—it depends on cases. If you are like me and feel, for instance, when a storekeeper thanks you after you have made a purchase, that the “Thank You” is more than a perfunctory bit of sentimentalism and that it means “Glad you came in—thanks for your trade—hope you will find our goods all right—come again,” you would like the innovation. But if you are a matter-of-fact, unsentimental individual who dislikes exceedingly to be interrupted from a perusal of the newspaper even by a bit of courtesy such as is suggested, you would probably resent the intrusion.

At the ticket offices the situation is different. There the passenger is transferring his good money for the commodity which the Railroad sells and the least that the salesman can do is to express his thanks in behalf of his employer. If this plan were generally adopted and carried out on the Baltimore and Ohio there is no question but that it would mean a substantial increase in business for us. Most people like reasonable appreciation and are willing to go where they can get it.

### America as Kipling Saw It in 1889

In 1889 Rudyard Kipling made his first visit to the United States, and in “American Notes” gives his impression of the Americans of 30 years ago. “My heart has gone out to them beyond all other people,” he wrote, “and for the life of me I cannot tell why. Their government’s provisional; their law’s the notion of the moment; their railways are made of hairpins and match sticks, and most of their good luck lives in their woods and mines and rivers and not in their brains; but for all that, they be the biggest, finest and best people on the surface of the globe! Just you wait a hundred years and see how they’ll behave when they’ve had the screw put on them and have forgotten a few of the patriarchal teachings of the late Mister George Washington. At present there is too much balcony and too little Romeo in the life plays of their fellow citizens. Later on, when the proportion is adjusted and the American sees the possibilities of his land, he will produce things that will make the effete East stare. He will also be a complex and highly composite administrator. There is nothing known to man that he will not be, and his country will sway the world with one foot as a man tilts a see-saw plank!”

Please Help Keep Cars Moving!

# Homilies of the Hudson

## Step Lively!

There is something in the composition of most men that makes them averse to appearing conspicuous. We say *most* men, advisedly, and we are led to the inference from observation of folks more than from treatises on the subject. Glaring exceptions, of course, are familiar. The blatant self-advertiser—political, eleemosynary or histrionic; the horsey "sport;" the "hall-room-boy;" all are nuisances to be borne with: they constitute a small minority and, as said, *most* men, though not imbued with extraordinary virtue in other respects, are decent in the estimate of their own merits and importance and possess an instinctive dislike of being made subjects of comment. There are men who would rather be regarded wicked or "hardboiled" than be detected in doing something laudable, for fear of having their motives questioned by snarlers, to whom no thing is pure or above suspicion. The foregoing comment is here because of this incident that we witnessed, not long ago.

An elderly Italian woman going to her work, washing or scrubbing, somewhere, when about to alight from the bus in which we were passengers, created a commotion on finding that her pocketbook had been snatched from her apron pocket. There was nothing but her carfare in the purse but she needed it to get to her destination. Calling on all the saints in the calendar to help her, intermingling the calls for succor with maledictions on the head of the robber, interspersed with choice Italian epithets, she was protesting her innocence and inability to pay the busfare and bemoaning that she did not have the other nickel necessary for the subway fare. The correct thing, according to accepted standards, would have been for the bus driver to grab her apron and tell her to "go to," but he didn't; what he did was to tell her to "shut up and step lively," while surreptitiously sneaking a coin into her hand. And when she started to bless him he "stepped on the gas" with a jerk and, standing close by him, we noted that he was embarrassed and flustered. On arrival at the bus terminal we casually inquired if he knew the woman. He gave us a suspicious look and told us to "step lively."

## The Cycle

In a restaurant the other day we were listening to an old commission merchant at our table address his companion, complaining about hard times and small profits. After observing that the too abundant potato crops had made the commodity not worth while handling, he followed by announcing that he was about through, anyhow. "I am going to turn the business over to my sons," he said, "to begin where I end. I came to this country fifty years ago in wooden shoes and homespun pants, and have *worked*. The callouses on my palms have had no time to soften. I started with nothing. My children, bred in this country, will start where I end, with furnished homes, cars and money, and judging from what I know of them they probably will end where I began." Which brought to our mind the remark made by some observer that there is a cycle of about "three generations from overalls to overalls." Modifying it, let us add "sometimes more, sometimes less."

## Efficiency

"Efficiency,"—often spoken of and often misunderstood—means a capacity to produce results or effects with the least possible waste. In a small volume of Chinese proverbs, entitled "Chips of Jade," rendered in English verse by Arthur Guiterman, there is found the following:

"Within the house where fewer servants dwell  
With greater speed the daily work is done;  
One man will bring two buckets from the well,  
Two men, between them both, will carry one."

It is not those that make the most noise and seem the busiest that accomplish the most. A "tin-lizzie" rattles and shimmies while a Pierce-Arrow only purrs and performs.

Efficiency versus both bustle and scurry  
Performs in the manner of speed versus hurry;  
The one spells succeed and the other spells fail,  
Speed cuts the snake's head and hurry, its tail.

## What's a Man to Do?

Aren't women wonderful! Just now, while I was writing my stuff for the MAGAZINE, the wife addressed some small talk to me, but suddenly interrupted herself, and me, exclaiming, "Oh, you are writing—excuse me," and when I answered, "All right, talk your head off, I don't hear you," she was—what do you think? Offended! Aren't women queer?

Ray Garrigus, correspondent at Lima, Ohio, asks: "Why is a Veteran?" and replies:—"Because he observed the safety rules." That is a contributory reason. Other reasons are "because he liked his job," "because he felt that he was a square peg in a square hole," "because he thought that he was receiving full value for his services," (knowing his limitations), or, "because characteristically he was of the 'Order Timidus,' preferring the partnership of a devil he knew to one he didn't know," or maybe, "because a sense of duty and responsibility demanded that he take no chances."

One ex-employee of this Company, an old "side-kick" of mine, who has succeeded in bettering himself since leaving the service, commenting on my Veteran's button, expressed himself elegantly in this wise: "No man would work twenty years for another if he had any guts." Make your own comments, remembering that we all have to work, and that we all work primarily for ourselves, whether in so doing we *serve* others or *work* others.

# The Baltimore and Ohio Is a Busy Railroad—

*But It Is Never Too Busy to Look After the Welfare of Its Employes*

NOTE: *The following story, showing that the Baltimore and Ohio is a "good neighbor" to its own employes as well as to its shippers and to those who make their homes along its lines, was sent to the Editor of the Magazine in the form of a letter, simply signed "Employe." It was, therefore, referred to an officer of the division, who verified it in detail. Besides its interest as a letter of appreciation on the part of an employe, the story tells—to him who reads between the lines—how humanely interested are our officers in the personal welfare of those who have "toiled and thought and wrought" with them; of those who have helped to keep the Baltimore and Ohio up to the standard set for it. The letter story follows. Ed.*

JOHN P. COATS, general foreman, Baltimore and Ohio Shops, Willard, Ohio, had a brief spell of illness prior to July 1, but returned to duty at that date. After a 60-day grind in an endeavor to maintain motive power performance under adverse conditions, he finally broke down and was taken to Sacred Heart Hospital, Garrett, Indiana. Here he was operated on for appendicitis.

The operation was successful and Mrs. Coats, after the 72-hour crisis was passed, returned to their home in Willard to get her three little girls ready to make the trip to Garrett to see their father, who had asked for them. The two older girls left that night to go to their father's bedside, but the mother, with the youngest—a little girl of four years—had intended to return to Garrett on the following day. However, at about 10 o'clock that night (Saturday, September 2), Mrs. Coats received a long-distance message telling her that her husband's condition was worse.

The first train west was No. 3, which was scheduled to leave Willard at 3.10 a. m., Eastern Time, reaching Garrett at 6.08 a. m. Almost frantic with grief, and with the thought that she might be too late in reaching her husband, Mrs. Coats

appealed to Assistant Superintendent M. S. Kopp. Mr. Kopp, in turn, conferred with General Superintendent E. W. Hoffman, General Manager Begien and District Master Mechanic W. S. Johnson.

These men hesitated not a moment; their only concern was in their shortage of power, as to what engines were available, and the shortest length of time in which one could be put in readiness. Thirty minutes after the problem had been placed in their hands word was given that a special, consisting of an engine and a coach, would be ready in 45 minutes.

At 11.30 p. m. the special in which rode Mrs. Coats and her daughter, was on its way. Engine 4280, in charge of Engineer J. G. Kircher and Conductor C. B. Thompkins, sped on through the night—a race against time. They reached Garrett, 128 miles away, at 2.50 a. m., having made the run in 3 hours 20 minutes.

A kindly Providence had ordained that Mr. Coats should take a turn for the better, and on her arrival, Mrs. Coats found him considerably improved. At this writing he is on the road to recovery.

"Good deeds, like a good name, shall endure forever."

## Death of George Heddrick

FAITHFUL and true to the Baltimore and Ohio Railroad and with a service record of 49 years, George W. Heddrick died on August 17.

Mr. Heddrick was born on May 17, 1849 at Warren, Maryland. He entered the service of the Company in 1865. Subsequently he became a fireman and later an engineer, serving in that capacity until his retirement in November, 1914.

Mr. Heddrick was a member of the Baltimore and Ohio Veterans' Association and was familiarly known to his associates as "Uncle George." Among his keepsakes was a bronze medal which was received after forty years' service. He enjoyed fairly good health until September, 1921, when he began slowly to decline.

His funeral services took place at his home, 1825 West Saratoga Street, Baltimore. Mr. Heddrick is survived by one daughter, Mrs. Emmet R. Hall.

## Railroaders Trim Y. M. C. A.

ON October 21 some of the highest average men in the Baltimore and Ohio General Office Duckpin League journeyed to the Y. M. C. A. and defeated the team rolling under that name.

Scores were as follows:—

Y. M. C. A.			
McCahan.....	114	102	114
Fowler.....	115	105	116
Mellon.....	81	91	117
Taylor.....	92	100	100
Krouse.....	88	107	112
	490	505	559

## Retired Passenger Conductor J. R. Ellis Won This Passenger Business for His Railroad

This party of 24 left Newark, Ohio, on September 24, for Des Moines, Iowa, to attend the G. A. R. Encampment held at that point. Of his own accord and with no solicitation on the part of the Passenger Department, J. R. Ellis, former passenger conductor, now retired, arranged for the party to travel over the Baltimore and Ohio. We thank Mr. Ellis for his interest in and work for the Railroad and feel sure that the service en route was right up to the Baltimore and Ohio standard. In the picture Mr. Ellis appears in front holding the gun.—B. A. Oatman, Newark, Ohio

# Would You Like a Home "in the Country?"

Here is a Fine House for the Railroader Who Also Loves to Farm

**T**HIS small farm house was designed by the Extension Division of the Agricultural College of Ohio State University and represents the best modern thought in the planning and arrangement of an American farm house. The peculiar needs of the farmer have been carefully planned for, while particular attention has been paid to the requirements of the farmer's wife in efficiently carrying out her part of the farm duties.

An important item to be considered in planning a farm house is the means for taking care of farm hands at meal time. An entrance must be provided from which they can go directly to a wash room where they can clean up and change their clothing before entering the dining room. The floor plans of the house described here show the wash room in the cellar, convenient of access from the grade entrance. The door at the side enters onto a small landing from which stairs lead down to the cellar, or up to the dining room.

Ample space is provided for serving the help needed on a modern farm. In the cellar there is also a large vegetable room, a furnace room and fuel storage space.

A desirable feature of this plan is the office room adjacent to the living room. Here the farmer can have his desk, and keep his books and records. In case an office is not needed this room can be used as an extra bed room. The large living room makes a delightful lounging room for cold weather. The kitchen has an entrance from the back porch and is large enough for the needs of the farm wife.

Upstairs there are three large bed rooms and a bath room. Plenty of closet space has been provided on this floor. The attractive window arrangement across the front of the upper story furnishes excellent light and ventilation. The roomy front porch makes a delightful resting place for twilight hours. If built of concrete it will be cool, clean and sanitary. Similar construction for the outside steps and back porch assures their permanence as concrete will not rot or decay.

Fire safety is of greatest importance in the construction of a farm house because

of the lack of fire-fighting equipment and the difficulty of controlling a blaze once started. With the many fire risks present in barns, machine sheds and other out-buildings it is essential that these structures be constructed of fire-resistive materials. Portland cement stucco on concrete block or tile, with a roof of concrete roofing tile or cement asbestos shingles is proof against any attack of fire from the outside, and if the interior partitions are built with metal lath and plaster any interior fire can easily be confined to the room in which it starts. Such construction is solid and permanent, and secure against destruction and deterioration by storm, rats or decay.

## Do You Want to Build Your Own Home?

Yes? Then we can help you, for through the courtesy of the Portland Cement Association we can supply complete plans and blue prints of the house shown on this page at the low cost of ten dollars (\$10.00).

We also have copies of a book "Concrete Houses," containing pictures and floor plans of 25 houses built of cement and concrete block. Copies of this book may be had by any reader of our Magazine at a cost of fifty cents apiece. For either the book or the complete specifications and blue prints of the house described on this page, remit to the Editor, Mt. Royal Station, Baltimore, Md.

Baltimore and Ohio employes have a special reason for taking advantage of these offers because they can get such substantial help in home building from our Relief Department. For full information write Division "S," Baltimore and Ohio Building, Baltimore, Md.

Employes in small towns and cities along the Railroad would do well to emulate the example set by the Baltimore and Ohio folks at Somerset, Pa. They started a big building boom, got the material people and contractors interested by offering them big contracts for a large number of houses and were thus able to make substantial reductions in the cost of their homes. The Relief Department will be glad to send a representative to any Baltimore and Ohio community which would like to have this plan explained in detail.

# Optimism Keeps Nestor of Law Department Young at Seventy-Nine Years

Ladies and Gentlemen:

Allow us to introduce to you our young friend of the Law Department, 79 years old, 41 years in the Baltimore and Ohio, and confirmed optimist, George W. Haulenbeek.

Mr. Haulenbeek was born in Newark, New Jersey, on October 9, 1843. He served with the Thirteenth New Jersey Volunteers in the Civil War. In 1881 he came to the Baltimore and Ohio. The celebration of his 79th birthday was the occasion of the appearance of his photograph in the Baltimore Sun and a nice little write-up in the Mountain Democrat, of Oakland, Md. We congratulate Mr. Haulenbeek, not alone on his 79 years, but on the youth which he still retains. Among tonics for longevity Mr. Haulenbeek recommends the following:

"There are more sunny days than gray, more pleasant people than disagreeable. Go to bed early, by nine o'clock, if possible; eat plain food at regular intervals, eschew desserts, and always leave the table feeling that you could eat a bit more. Cultivate optimism if you want to live long."

Following is Mr. Haulenbeek's explanation, submitted by him for his notes in this issue, of the publication of his photograph in the MAGAZINE. Read and laugh with him.

### Handsome Men

I always enjoy a full perusal of the Baltimore and Ohio MAGAZINE. Pictures of myriads of pretty and well behaved girls in our service adorn its pages and always afford interest and admiration. (This observation is essential to pave the way for what is coming.) Now and then photographs of men—young men and men along in years—appear, but for real handsome men, the pages of the MAGAZINE seem to lack such demonstration.

George W. Haulenbeek, in service in the Law Department since April 1, 1881

### Filling the Breach

Accordingly, I have decided to fill the breach by sending my photograph. It shows how a man looks at 79 when he feels as though he were 40. Now here is an opportunity for the handsome men in our service to come forward. I warn them, however, that any one participating will have to be a real Adonis to compete in this movement.

### Operator Holcomb—Forty-five Years of Faithful Service

ON September 27 Operator J. D. Holcomb, Summit, Ohio, finished a service of forty-five years with the Baltimore and Ohio, without a notation against his record. He has received the following letter from Trainmaster Broughton:

Columbus, Ohio  
September 27, 1922

Mr. J. D. Holcomb  
Operator  
Summit, Ohio  
Dear Sir:

In looking over the records I note that you were employed as operator on September 27, 1877. This makes 45 years of continuous service, all of which, I understand, has been at the place at which you now are.

This is a wonderful record in itself, but the best feature of it is that there is not a single notation on your service record against you.

It is a record such as yours that makes the railroads safe, and it is indeed a great pleasure to have such men to work with.

I wish you continued health, success and prosperity.

Very truly yours,  
(signed) M. H. Broughton  
Trainmaster and Chief Dispatcher

Operator J. D. Holcomb

### Ticket Agent Payne, Marietta, Ohio, a Baltimore and Ohio Booster

THE accompanying picture is of Ticket Agent G. M. Payne, Marietta, Ohio.

Mr. Payne entered the service of the old C. W. & B. Railroad on August 8, 1886 as operator, bill clerk and cashier in the freight office at Harmar—now known as West Marietta. Mr. Payne worked here under Agent W. W. Lucas. On the retirement of Mr. Lucas, Mr. Payne was made ticket agent and also agent for the U. S. Express Company.

Later, when the Union Depot was built, Mr. Payne was transferred to the new station. This was in 1890, and he has remained there ever since, boosting the Baltimore and Ohio.

Superintendent Kruse, Newark Division, says of Mr. Payne: "He has been

Ticket Agent G. M. Payne, Marietta, Ohio

### Keep Cars Moving

in continuous service for 36 years, all of which time he has put in at Marietta. Mr. Payne is a loyal and faithful Baltimore and Ohio man, and I know that personally he is much interested in obtaining all the business possible for the Baltimore and Ohio. The passenger earnings at that point indicate that his efforts are quite successful."

Concerning his own work, Mr. Payne says: "I have always been a booster for the Baltimore and Ohio and I have tried to do my duty. How well I have done it I leave to my superior officers to answer, but my long service with the Company makes me feel that my work has been satisfactory. I hope that it may continue to the end of my journey, and that it may be said of me, 'Well done, thou good and faithful servant.'"

## Railroad Leaders Choose Basic Books of Industry

*How many of them have you in your library, or have you read and studied?*

THE basic books in the railroad industry, as selected by leading members of the industry for inclusion in the business library of the McAlpin Hotel in New York, were recently announced. Among those who made selections, from which the final choice will be made, are:

Julius Kruttschnitt, Chairman, Executive Committee, Southern Pacific Company; S. M. Felton, President, Chicago Great Western Railroad Company; Julius H. Parmelee, Director, Bureau of Railway Economics, Washington, D. C.; Howard Elliott, Chairman, Northern Pacific Railway Company; Hale Holden, President, Chicago, Burlington and Quincy Railroad Company; W. R. Scott, President, Southern Pacific Lines; Daniel Willard, President, The Baltimore and Ohio Railroad Company; C. H. Markham, President, Illinois Central Railroad Company; H. L. Ingersoll, New York Central Lines; J. E. Gorman, President, The Chicago, Rock Island & Pacific Railway Company; and W. H. Truesdale, President, The Delaware, Lackawanna & Western Railroad Company.

These selections were made as a result of an inquiry instituted among the leaders in the railroad industry to assist Mr. Boomer, the manager of the McAlpin Hotel, in building up a business library of the ten books selected by the leaders in each of twenty industries.

In commenting on the gratifying response to his request, Mr. Boomer said:

"When I first made public the plans for a business library in the McAlpin I was advised that the practical business man had little time for theoretical knowledge such

as would be obtained from books. I have before me a very convincing exhibit of replies from leaders in industry to the effect that the business executive not only appreciates the value of a theoretical study of his business, but also values the viewpoint of another man.

"While replies to my letters are still coming in by every mail, it is quite evident from the correspondence already received that the kind of books which treat industrial subjects from the human point of view are more in favor than books of a merely technical character. I have noted a number of comments to the effect that a young man should first read the kind of books that tend to make his business interesting, and read the technical books later to supplement his practical experience.

MR. GORMAN chose:

- Principles of Railroad Transportation, E. R. Johnson & T. W. Van Metre.
  - The American Transportation Question, S. O. Dunn.
  - Railroad Rates and Regulation, W. Z. Ripley, Ph. D.
  - Regulation of Railways, S. O. Dunn.
  - Railroad Traffic and Rates, E. R. Johnson and G. C. Huebner.
  - Letters From An Old Railway Official to His Son, a General Manager, C. D. Hine.
  - Economic Theory of the Location of Railways, A. M. Wellington.
  - Railroads and Government, Frank Haigh Dixon.
  - E. H. Harriman, A Biography, (2 volumes)
  - Waterways versus Railways, H. G. Moulton.
- MR. KRUTTSCHNITT chose:
- Principles of Railroad Transportation, Johnson & Van Metre.

- Railroad Traffic and Rates, Johnson & Huebner.
- Railway Problems, Wm. Z. Ripley.
- The American Transportation Question, Samuel O. Dunn.
- Where and Why Public Ownership Has Failed, Guyot.
- Interstate Transportation, (2 volumes) Harry C. Barnes.
- Government Ownership of Railways, Samuel O. Dunn.
- The Rise of Rail Power In War and Conquest, Edwin A. Pratt, London.
- The Economic Theory of Railway Location, Wellington.
- Maintenance of Way and Structures, Wm. C. Willard.
- Locomotive Operation and Train Control, Arthur J. Wood.
- Handbook of Railroad Expenses, J. Shirley Eaton.
- Ports and Terminal Facilities, MacElwee.
- Railroad Administration, Ray Morris Appleton.
- The Railways and the Traders or The Railways and the Shippers, Wm. M. Acworth, (An English author of high authority. A most admirable book.)

MR. WILLARD chose:

- The American Transportation Question, Samuel O. Dunn.
  - Government Ownership of Railways, Samuel O. Dunn.
  - Regulation of Railways, Including a Discussion of Government Ownership Versus Government Control, Samuel O. Dunn.
  - Railroad Transportation, Dr. Arthur T. Hadley.
- Note—While this book was printed about thirty years ago, it is still one of the soundest books on the subject ever written.
- Railroads; Rates and Regulation, Prof. Wm. Z. Ripley.
  - Railroads; Finance and Organization, Prof. Wm. Z. Ripley.
  - Railroads and Government, Dr. Frank H. Dixon.
  - Railways and the Traders, Sir William Acworth.
  - Elements of Railway Economics, Sir William Acworth.
  - Principles of Railroad Transportation, Emory R. Johnson and Thurman W. Van Metre.
  - American Railroad Economics, A. M. Sakolski.

MR. HOLDEN chose:

- Principles of Railroad Transportation, E. R. Johnson & T. W. Van Metre.
- Railroad Administration, R. Morris.
- What's The Matter With Our Railroads? E. Hungerford.
- Government Ownership of Railways, S. O. Dunn.
- Railroads and Government, F. H. Dixon.
- The Rise of Rail Power in War and Conquest, E. R. Pratt.
- Waterways Versus Railways, H. G. Moulton.

# How Philadelphia Helps Solve the Street Railway Problem

By C. H. Pumphrey

Division Freight Agent, New York City

*The Baltimore and Ohio Railroad serves many industries of magnitude and importance. Few, however, are more vitally associated with our daily life than the Street Car Manufacturer—and at Philadelphia is located the largest street car plant in the world, The J. G. Brill Company.*

*Street car transportation is an essential agency in the business and social life of every community, so much so that in a number of the large centers which have increased in extent and population it has become a problem of most vital importance. The J. G. Brill Company is helping in the solution of this problem by increasing its output and improving the utility of its product to meet all demands. Normally, they have a payroll of 2,200 employes, building on an average of 150 cars per month.*

*The plant is served by the Baltimore and Ohio Railroad and the Pennsylvania Railroad and operates three engines of its own, which perform all switching.*

*As one of a series of articles on "Industrial Philadelphia," the "Girard Letter," published by the Girard Trust Company of Philadelphia, recently described the interesting plant of The J. G. Brill Company as follows:*

**G**REAT industries make great cities. To win fame as the world's workshop, Philadelphia had first to create not only a few but many pre-eminent industrial plants; and it has them.

Among the most famous of these are The J. G. Brill Company's street railway car shops.

Beyond all comparison, the name Brill stands first all over the civilized world as a builder of street cars.

Not only does the Brill Company lead all competitors, but it makes more street cars

How well Brill does it, is shown by figures. Three-fifths of all the people in this country who ride on the street railways travel in cars made by Brill of Philadelphia.

The story of the rise and achievements of these premier car builders of the world is a leaf from the romance of American business.

The first attempt to operate a horse car on tracks in any street was made in New York in 1832. It was a failure and some 25 years passed before the first flanged-wheel tracks were laid in Philadelphia and street railways were finally launched upon what proved to be a permanent basis.

The first street cars for Philadelphia were built by Murphy and Allison in a little plant at Market and Nineteenth Streets. That is of less consequence to the people of today than another fact, that in their shop was a thrifty and intelligent foreman whose name was John George Brill. Mr. Brill's son, G. Martin

Brill, also became a foreman in the Murphy and Allison plant.

It is a curious thing that the fame of Brill started with a fire, and it is one of the few fires in history to which may be directly attributed so great a distinction.

Murphy and Allison's car factory was burned in 1868, and from that date they discontinued the manufacture of horse cars.

That gave the Brills, father and son, all the inducement two far-seeing men required, and they turned away from the smoking ruins of their employers and started to build street cars themselves at Thirty-first and Chestnut Streets and also at Twenty-fifth and Lombard Streets.

Brill started modestly with \$1,300 capital. Behind that meagre supply

of money was an unbounded reservoir of imagination and will.

The big reason why the Brill Company has outdistanced all others is that it has always stuck to the principle that when some new kind of a car seemed to be needed by the public, the Brill Company designed it and built it. Brill always led the way.

Beyond any comparison, they have introduced to the riding public more improvements and comforts than have any other street car builders.

The old firm of the Brills, composed of father and son, was still very small and young when in 1872 James Rawle purchased a one-third interest in the works. The business was subsequently reorganized under the name that became world-famous—The J. G. Brill Company.

Mr. Rawle brought not only cash but a head full of brains into the manufacture of street cars. Like his partners, he was alert for everything that looked like an improvement.

The father of this splendid manufacturing plant, John George Brill, died in 1888 and he was succeeded by G. Martin Brill.

Another son, John A. Brill, originally a bookkeeper in the company, was without a rival in the field of street car inventions. He was undoubtedly the greatest inventor of his class who ever lived, and also one of the greatest salesmen. A proof of this is that today more than 200 of his patents are still alive.

From the very start Brill's policy was to give any town or any country whatever kind of car it wanted, provided it was a good car and would do its work. That sagacious principle of meeting the demands of local or national prejudices has enabled the Brill Company to market its cars literally from "Greenland's Icy Mountains to India's Coral Strand."

It has built for Cape Town some gigantic electric cars. To far Northern Helsingfors in Finland it is dispatching a wholly different type of smaller car, but a model of its kind.

To Barcelona in Spain is going a huge car totally unlike either of the other two. At the present moment the Company is constructing cars for 20 different nations.

And for 140 American cities the Brill Company has been recently making a wholly new kind of car called the safety car, which may change the entire character of street railway traffic.

Original Street Car used on Old Broadway Line, New York.

than all others in the United States combined.

In this day of world-wide markets, a plant of the Brill magnitude looms up as a valuable national asset, and its home is Philadelphia.

Street railways are but little more than 60 years old, yet they have become vital in the life of every large city in America.

The stupendous volume of our electrical railway traffic can have no real comparisons.

Ten times as many passengers every day ride in electric railway cars as in steam railroad cars. No other problem continually causes more anxiety and discussion in every populous community than the street railway question.

To transport quickly and cheaply and safely virtually the whole working population of a town twice a day and do it within a few restricted hours, is a Herculean job. To supply vehicles in which those scores of millions of passengers must daily travel is Brill's job.

The Safety Car—the most popular car being built today.

The main plant of The J. G. Brill Company is at Sixty-second Street and Woodland Avenue.

But this \$10,000,000 corporation—that seems big compared with John George Brill's \$1,300 in 1868—has important subsidiary companies in Cleveland, Ohio, Springfield, Mass., and St. Louis, Mo.

This Philadelphia plant covers about 30 acres of ground. Here they can produce a new street car every working hour of the day.

During its career of 52 years, the Brills have turned out about 50,000 cars, which is a record unapproached by any other street car builders on earth.

And they really make the cars at Brills, every part of them except the wheels and electric motors. The biggest cars weigh about 30 tons, but the most popular car being turned out today is known as the safety car, which weighs less than a third of that.

This is called a safety car because it is fool-proof. It is proof against a fool motor-man and a fool passenger as well.

This safety car weighs only about eight tons and is operated by one man. The motorman collects the fare. Among the advantages of this car which seem compelling to many street railway operators are the clever mechanisms to prevent passengers from being hurt. For instance, the car cannot start when the door is open.

Brills have made about 3,000 of these safety cars in the past couple of years for 140 different cities. Brooklyn has 200 of them, and Boston more than 300.

The idea seems to be to have more of these smaller cars in operation in order to pick up and carry away passengers. That pleases the traveling public, while the cost of operating them with one man is also considerably less than the cost of operating big cars.

How is a street car actually made? First comes from the purchasing company a general idea of what sort of vehicle it wants. Then the engineers at Brill's reduce the ideas to exact plans and figures and photograph the draughtsmen's drawings—a new kink in production certainties, to reduce the possibilities of errors.

Most of a big new street car is steel, but there is a tendency to return to wooden parts again, because they are more easily repaired after an accident.

The sides of a car made of steel are about one-sixteenth of an inch thick. When the sides are wood, oak or ash is used; and for a wooden roof, poplar covered on the outside with canvas.

Years ago Brill invented that curious slat floor you always see in street cars and nothing has since come to replace it. That wood is maple. It permits dirt in summer and snow in winter to be eliminated in the quickest and easiest way.

The celebrated "Brill truck" is forged steel, having side bars made in one piece, whereas other builders construct the truck of built-up design.

Cars are made in many sizes and widths. There are seven or eight different gauges, running from three feet and one-half to more than five feet.

It takes four 50 horse power motors to run the largest cars. Brill made a great hit when substituting two motors in place of four 40 horse powers. It was a bit of manufacturing genius which has been translated into very definite financial economies in the operation of many roads.

When cars are made for foreign countries they are dismantled in sections and shipped in boxes with every part carefully "match" marked.

There are mills to produce the wooden parts just as needed, a cabinet shop, and departments where such things as seat metal and upholstery are produced. You may see them weaving the rattan seats for cars at the Brill plant, the raw rattan coming from Borneo and Sumatra.

Indeed, President S. M. Curwen himself came up from one of the shops, traveling with no special permit over that road which always leads upward for the man who relies solely upon his own personal equipment. His career is one of those inspiring examples found in the story of successful American business.

Few manufacturing companies anywhere so early saw the necessity for welfare work among its employes, and for devices to protect workmen from injuries.

So all over those 30 busy acres within the Brill enclosure, you will see the blue and yellow danger signals. They were among the first, if not the first, in the world to discover that a blue and yellow signal can be seen farther than the old-time red signal which meant danger.

A hospital on the grounds gives instant treatment to the hurt and sick.

A dental shop also has been introduced which is going even a step beyond nearly all other manufacturers who see the wisdom of reducing absenteeism on the part of workmen by the best humanitarian aids for employes.

And all this pays in the long race, although the initial cost of making so big an establishment both safe and sane was heavy.

But the Company's motto, pasted upon the walls in big type, is this: "Why take a chance? The odds are against you."

It is almost impossible to travel about any large American city on street railways and not ride in a Brill car. And all over the world—in Central and South America, Europe and Africa—these Philadelphia-made cars are a living advertisement of the enterprise of the world's foremost street car builders.

If the sun never sets upon the British flag and that nation's drum-beat is heard around the globe, neither does the sun ever go down upon a Brill car. Not only does it follow our own, but almost every other flag.

So it was not at all strange when the great war burst that the nations with which America later became associated, turned to

Brill for help; and they did not turn in vain. Philadelphia has never realized what was going on in that mammoth car shop during the war.

First there were auto truck bodies for Russia, England, France and Belgium. Then the Czar called for shell forgings, and these were turned out complete at Brill's in great quantities. Gigantic searchlights were another war specialty produced, and so were those huge railway trucks which were made to carry Uncle Sam's 16-inch guns that were dispatched to blow Metz off the map. Liberty motor cylinders, signal corps carts, meat racks, tool wagons, limbers for big field guns, battery reel trucks, a trench mortar for England, a unique printing press auto truck and other war-time products were made by Brill to meet this emergency.

So well is the Company organized that when the stress came, it was able to switch its facilities from the production of cars to the output for battle materials.

### His First Penny

IT WAS impressive to meet Andrew Carnegie in his own home and to hear, as he sat at his library table, the story of how he earned his first penny. In his favorite work, the world's greatest philanthropist has followed an impulse implanted in an humble Scotch school house in Dunfermline.

"I was in pinafores, attending school," he told me, "and like all Scotch children we were nurtured on Burns. One day the master asked me to speak a piece, and I went to the platform and recited without a break a long poem by Burns. The feat so astonished the kind old master that when I made my final bow to trip back to my seat, he handed me a penny and patted me on the head. This was the first penny I ever earned. I often think of it, and I can see in my mind's eye that old Scotch schoolhouse and the few straggling books in the library which, because of their scarcity, compelled us to commit to memory many of their treasures."

The blue eyes sparkled while the speaker related the incident, and I could not help considering the contrast between the little Scotch lad who earned his first penny in reciting Burns, and the renowned philanthropist who today has made his name so indelibly associated with the library and literary development of the age.

—Joe Mitchell Chapple

### Good Night

"I can't keep the visitors from coming up," said the office boy, dejectedly, to the president. "When I say you're out, they simply say they must see you."

"Well," said the president, "just tell them that's what they all say."

That afternoon there called at the office a young lady. The boy assured her it was impossible to see the president.

"But I am his wife," said the lady.

"Oh, that's what they all say," said the boy.—*Selling Facts.*

*Note:*

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

1. ANAGRAM

NOT A SPORT TRAIN

We will not travel on a foreign road,  
When we can get there on the B. & O.;  
Because we think it is the finest road,  
We practice safety everywhere we go.  
Baltimore, Md. C. Lion

2. OCTAGON

1—The bleat of a sheep.  
2—To lay colors on.  
3—A bag of varnished silk, which, when inflated with any gas lighter than air, floats in the air.  
4—An iron or steel shoulder plate worn by a man-at-arms.  
5—Not the same.  
6—A natural object, such as a deer, bear, etc., regarded by savages as an object of worship.  
7—A Bible name.  
Washington, D. C. Nypho

3. BEHEADMENT (5)

The FIRST and its cousin in evil, the gold,  
Between them a terrible tale could unfold  
Of misery, bloodshed and horrors untold  
Recorded in red as the centuries rolled.

And now to atone for the crimes of its past  
It suffers beheadment to give me a LAST.  
New York, N. Y. John Newman

4. DIAMOND

1—A letter.  
2—A card or label attached to a package as for an address.  
3—Money paid to bind a bargain (Scotch).  
4—In music, an interval of three tones.  
5—The Monumental City.  
6—Any animal of a genus of American rodents containing the typical pocket gophers.  
7—To whirl a spindle (Obs. or Scotch).  
8—The earth (Scotch and Eng. Dial).  
9—A letter.  
Baltimore, Md. Atlas

5. TRANSPOSITION (4)

When through the ONE in Spring you go  
To get outside to roam the fields  
The TWO of flowers is found all o'er—  
To you a day of pleasure yields.  
Bangor, Pa. Jack O'Lantern

6. SQUARE

- 1—Flexible.
- 2—A two-seated carriage having a double top.
- 3—Bars of gold or silver for assaying, cooking or export.
- 4—Of or pertaining to Adonis.
- 5—A carnivorous naticoid sea-snail.
- 6—A native or naturalized inhabitant of Tuscany.

Red Crow

7. CURTAILMENT (5)

"To drink or not to drink;"  
No home brew for yours truly,  
Yet, as I stop to think,  
Would't make me soused unduly?  
I've tried it, old and new,  
I've drunk of it a-plenty  
It does not make me TWO,  
Tho' I take ten or twenty  
Glasses. I'm not a soak.  
Please understand me TOTAL  
This simply is a joke,  
I'm merely anecdotal.  
Brooklyn, N. Y.

Gemini

8. HALF SQUARE

- 1—A graded road, having one or more tracks usually of metal rails supported by sleepers.
- 2—Shadowless men.
- 3—Glacial epoch.
- 4—Any one of the various twining or climbing plants of a tropical forest.
- 5—(Anglo. Ind.) A musical composition.
- 6—Single.
- 7—Like.
- 8—A letter.

Primrose

9. TRANSDELETION (5)

Send in your sols. the Ed. implores;  
Though large or small may be your scores.  
Just ONE or TWO, to him your hits,  
And win a smile from coy Mis Fitts.  
Corinth, Miss. Fred Domino

10. HEXAGON

- 1—Beings (Fr.).
- 2—A procreator.
- 3—To emit steam or gas again.
- 4—One who causes diffusion or shedding.
- 5—Withdrawn from association.
- 6—Capable of turning on an axis.

7—A liquid compound obtained by the distillation of various resins.

8—A throwing off of allegiance.

9—In anatomy, anything of triangular form.  
Cincinnati, Ohio. Wick-o-cincy

11. CHARADE (6)

T'was seven in the evening,  
Just above the Johnstown FIRST,  
When old Si Perkins passed the turn,  
And we grabbed our clothes and ran.  
His LAST was waddling with us,  
And the water sure was cool;  
But old Si Perkins was more than hot,  
For we had all hooked school.  
"Gol darn your hides," we heard him yell,  
As he reached for a slim piece of whortle,  
"I'm not going to hurt any of you," he cried,  
"But I'm going to whip my TOTAL."  
Baltimore, Md. W. E. Madden

12. INVERTED PYRAMID

Across:

- 1—Runways or tracks formed of rails laid end to end in two parallel lines.
- 2—The whole of a church tower.
- 3—Obsolete form of Saddle.
- 4—A peg.
- 5—A letter.

Down:

- 1—A letter.
- 2—Like.
- 3—Possessive case of it.
- 4—To jump.
- 5—To dip again.
- 6—Not shut up.
- 7—The whole.
- 8—Dialectic form of The.
- 9—A letter.

Scranton, Pa. Arty Ess

13. INITIAL CHANGE (6)

To "The Major"  
"The Major" is a jovial soul,  
With a motto of "Laugh and grow fat."  
If he gets any stouter, I'll wager,  
He'll ONE, when using the mat.

Should he e'er happen to be in a TWO,  
"The Major" like jelly would be,  
For if they should all push together,  
They'd mash the poor Major, you see.  
Baltimore, Md. S. T. Udent

14. RHOMBOID

Across:

- 1—Pecuniary amercements inflicted as a penalty for offenses against the law.
- 2—Preserves by care or hoarding.
- 3—A carnivorous animal belonging to the civet family.
- 4—Rosters.
- 5—Moving with celerity.

Down:

- 1—A letter.
- 2—The third person singular of the verb to be.
- 3—To find fault constantly.
- 4—Eternally.
- 5—Spanish for Mister or Sir.
- 6—A bristle or sharp hair.

The Prize Winners

Miss Olive W. Dennis, Executive Department; Eko (O. K. Eden), Engineering Department; S. T. Udent (Miss Mary E. Whitehill), Auditor Disbursements Office; all of Baltimore, Md.

- 7—A spigot.
- 8—Spanish for yes.
- 9—A letter.

Baltimore, Md. Guy F. Biggs

15. RIDDLE

Disease and death we daily spread,  
For mischief few can match us;  
Yet baseball players always strain  
Their utmost nerve to catch us.  
St. Louis, Mo. Molemi

16. SQUARE

- 1—Smaller.
  - 2—Food for horses and cattle from the aftermath.
  - 3—Commonwealths.
  - 4—Irony.
  - 5—A Bohemian variety of Vesuvianite.
  - 6—To feel resentment at.
- Johnstown, Pa. Tom Crestmore

Just between You and Me

S. T. Udent (Mary E. Whitehill) sends in a complete list of answers to the August puzzles and says in part: "Puzzling is a game of interest, pleasure and increased knowledge. I have only been at it for two months but I can already see the great advantage of it. I regret I did not start sooner."

C. Lion (J. R. Remington) makes his initial bow with a neat anagram and a complete list of solutions. We expect to publish many good puzzles from his pen in future issues.

Eko (O. K. Eden) is another new addition to our ranks who says he is much interested in the Puzzle Department and proves it by sending in a complete list of answers to the August puzzles. He properly points out a mistake which we made when printing No. 11 puzzle in that issue. Our marking indicated the answer as containing seven letters, when in reality it consisted of only six letters. While we try to be exceedingly careful in editing our copy these mistakes are bound to occur once in a while and we will feel grateful to our readers if they will call attention to them, and at the same time we promise to be even more careful in the future.

Tom Crestmore (Chas. O. Rallins) is a veteran puzzler who thought he had retired but could not resist the temptation to get back into the game when he happened to get hold of a copy of the Baltimore and Ohio MAGAZINE. Tom holds down a responsible position in the Traffic Department of our good friends, the Cambria Steel Co., and a sample of his work appears in this issue with more to follow.

(Continued on page 72)

As a prize for the best list of solutions to these puzzles a year's subscription to the Enigma, the official organ of the National Puzzler's League, which carries with it a year's membership in the League, will be awarded. The Enigma publishes the highest grade of word puzzles and numbers among its contributors the brightest lights in puzzeldom. To receive proper credit all lists of solutions must be in my hands by January 5, the answers and solvers list will be published in the February issue.

# Women's Department

Edited by MARGARET TALBOTT STEVENS

## Salad Dressing and Macaroons for Thanksgiving

By Mrs. Adella Phelps

*Note: Many of those who have visited the Woman's Exchange in Baltimore during the past seven years have been privileged to sample the famous cakes which Mrs. Phelps makes. Mrs. Phelps, although not an employe of our Baltimore and Ohio, has travelled on our Road regularly for many years and she naturally is a great booster for it. She is well known throughout Prince George's County, Maryland, for her culinary arts, and we, having sampled Mrs. Phelps goodies, are only too glad to present her recipes to our women readers.*

—Associate Editor.

### Cooked Salad Dressing

All measurements for this recipe should be strictly level.

Into 1½ tablespoons of flour put 1 teaspoon of salt, 1 tablespoon of sugar, ½ teaspoon of dry mustard and 1 saltspoon of cayenne. Stir these well together. Then into this mixture break one egg. Beat until smooth and free of lumps. Add slowly two tablespoons of melted butter, beating all the while; a little less than a half-cup of vinegar, and one cup of cream. Mix well and cook in double boiler or in one vessel over a slow flame, stirring all the time until it is of the consistency of a smooth custard. Remove from the fire, beat well and put it into a glass container. Pour over the mixture two tablespoons of salad oil. This preserves it for future use. Before using beat well. The cream that I find satisfactory is a full cup from the top of a quart bottle of milk. This dressing is excellent for all kinds of vegetable and fruit salads and will keep for a long time. Try it with your Thanksgiving menu.

### Oatmeal Macaroons

- 1 cup of sugar
- 1 tablespoon of melted butter
- 2 eggs
- ¾ teaspoon of salt
- 2½ cups of rolled oats
- 2 level teaspoons of baking powder (I use Royal)
- 1 teaspoon of vanilla

Mix well together the baking powder with the oats. Cream the sugar with the butter; add egg yolks, salt and then the oats and baking powder mixture; lastly add the beaten whites of the eggs and the vanilla. Mix thoroughly. Drop on tins about one teaspoonful for each macaroon, and allow space for spreading. Bake in a moderate oven. Grease the tins slightly.

### Chopped Pickles

- By Mrs. Harry S. Reay, Wife of Composer,  
Printing Department
- ½ peck green tomatoes
  - ½ peck small onions
  - 1 cupful salt
  - 3 quarts vinegar

- 2 pounds sugar
- 2 tablespoons celery seed
- ½ pound white mustard
- 2 tablespoons allspice
- 2 tablespoons cloves
- 2 tablespoons cinnamon
- 2 tablespoons ginger
- ½ teaspoon red pepper.

Slice and chop the onions and tomatoes. Cover with salt and let them stand over night. In the morning drain thoroughly. Put into a saucepan, and cover with 1 quart of the vinegar. Boil for 15 minutes. Drain and put the sugar, mustard, pepper, and spices into the remaining two quarts of vinegar. Set over the fire. As soon as the vinegar boils, add the chopped tomatoes and onions and boil for ten minutes. Take from the fire and put into glass jars while hot. The quantities given here will make six quarts.

## This Little Lady Has Knitted Six Sweaters

IN a recent issue of the MAGAZINE we published a picture of a group of girls from the Baltimore and Ohio Building dressed in their sweaters which they themselves had knitted. We also asked that if there were others among our girls who had made sweaters we should like to have their pictures. As a result we received the following letter which tells its own story. This is an unusually attractive sweater and we are glad to show a picture of it with Miss Edgington inside.

201 W. Wabash Avenue  
Mahoningtown, Pa.  
September 28, 1922

To the Baltimore and Ohio MAGAZINE:

I was looking through the MAGAZINE and found the picture of five sweaters. I myself have knitted six sweaters, and this one (as shown in the picture) is different from any of those which you pictured in the MAGAZINE. I made this sweater by first knitting ten, purling ten, for five rows. Then, purl ten, knit ten for five rows more, and so on.

Yours truly,  
(signed) Cordelia Edgington

## Thanksgiving

By Emma Jones Spence, Widow of the Late Conductor Taylor Spence, Redlands, California

For life here and hereafter, for powers of mind,  
For sweet opportunities to bless all mankind;  
A great revelation of just what I can be;  
Love, duties and truth—faith, eternity.

For all possibilities, ideals made clear,  
Rest, labor and comforts, faces so dear;  
For a world full of sympathy, beauty and good,  
Temptations overcome and hardships withstood.

For Homeland and kindred, for friends tried and true,  
Time, reason, unselfishness, the right each may do;  
For sins Thou forgivest, for the goodness we see—  
I thank Thee, dear Father; these gifts are of Thee.

Miss Cordelia Edgington wearing her pretty sweater

# How to Hold Husband

WHEN I was a little girl of ten or twelve years, a neighbor, who was a young married woman, used to loan me copies of a woman's magazine which she "took." Month after month I read it with breathless interest, so much, indeed, that my mother had to punish me sometimes for reading it when I should have been attending to my other tasks. And yet, about the only thing that I remember besides the name of the magazine was the fact that every month somebody was giving his or her best efforts towards telling all of the readers "How to Hold a Husband." (I remember once asking my mother why they didn't tell you how to get one. And how my father laughed right out loud, much to my embarrassment and chagrin.)

The consensus of opinion, however, seemed to favor the idea that it was only necessary to give him his own way in everything; to feed him well on his favorite foods, and always to keep all domestic vexations away from him—yet—never to have any secrets from him, and above all things, to meet him at the door with a smile and a kiss. And at this meeting at the door, you must be dressed in your prettiest frock with a rose in your hair!

Then one day our community was shocked by one good lady's husband who ran away with the hired woman. And I happened to know that the wife was one who had always practiced that prettiest-frock, smile, and rose-in-your-hair way. I went to an old married lady—she must have been all of twenty-five—and asked her about it. What do you think her answer was? Why, that any man would get tired of the same thing all the time. She said that you might as well try to live on a candy diet all the time, without any meat, potatoes, and pickles in between.

By Helen Rose White

Wife of E. F. White, Office of Auditor Coal and Coke Receipts

*Note: In the October issue of the MAGAZINE there was an article by Mrs. White on "How to Make Good Coffee." The article which follows is quite as interesting, and we have no doubt but that it will be even more helpful. The title sounds like a joke, but you will read between the lines a good bit of sound advice. We should like to hear from some others among our railroaders' wives.*

—Associate Editor.

So, for a long time afterward, the hired girl, who was fat and untidy and at least three years older than the man with whom she had run away, represented "meat, potatoes, and pickles" to my mind whenever I heard her name mentioned.

Since then, however, I have had many years to observe this "holding" game, and I have concluded that there are more "don'ts" than "does." Here are some of them, gleaned from experience.

**RULE ONE:** Don't bore him. If you want to talk about something, be sure that he is interested in it before you hold forth at any length.

**RULE TWO:** Don't criticise severely either your husband or his friends, or any of your own friends. If you have a poor opinion of someone, be careful how you express it; one unexpressed opinion is worth a dozen unfavorable opinions expressed. Men generally catalog all of these things as "cattiness."

**RULE THREE:** Learn self control. Don't make a habit of losing your temper. Then when you do have to "blow up" it will have more effect. If you find yourself in the wrong on some question, just drop it and say no more about it. A man hates a scene—unless he makes it himself. If he is in the wrong, drop it also—unless he asks forgiveness. In this case, don't hesitate a minute to forgive him; he'll probably offend in like manner again, and you might as well keep in practice.

**RULE FOUR:** Don't refuse to accompany him when he asks you to. When he says, "Let's go to the movies," or anywhere else, just say "Let's." Drop whatever you are doing or whatever you are planning to do and go along. Sometimes a husband wants a "good pal," and lots of perfectly good husbands are frequently lost, or at least mislaid, because their wives prefer to

darn stockings rather than go on a little trip with them.

**RULE FIVE:** See that he gets good meals, properly cooked. If he wants to show you how to make biscuits like Mother used to make, why, just let him. He'll enjoy it—and so will you.

**RULE SIX:** Endeavor to cultivate broad-mindedness and a wholesome point of view. Be ready to admit that there are two sides to every question. If you do this and you are willing to try as hard to entertain him after marriage as you were in "courting days," you should have no difficulty about holding him.

After all, the rules resolve themselves into two old proverbs: "Bear and forbear," and "Live and let live."

Above all things, don't be too perfect. Think how hard perfection is on the other fellow and make a few mistakes now and then.

Summing it up in a nutshell: Treat him as you would treat any other person whose friendship you value, and if he's worth holding, you can't lose him!

## Work

Mrs. Hatfield accosted a colored woman who was passing. "Do you know anyone I can hire to help me clean house?"

"No'm. I ain't knowin' any colored ladies what needs work, but I knows a colored man what cleans windows and does some other kinds of housecleanin'."

"What does he charge?"

"Sixty cents an hour."

"Why, he makes more than some school teachers, doesn't he?"

"Yes'm; but school teachers only has to use de haids."—*Judge.*

"Mama, am I descended from a monkey?"

"I don't know son, I never knew any of your father's people."—*Crescent.*

Mrs. Clarence Young, wife of Engineering Accountant, Baltimore, and "Cyrus III"

# Draped Effects Gain in Favor as Skirts Increase in Length

By Maude Hall

**D**RAPERIES must be put down among the features of dress to be strongly emphasized in modes for Autumn. The uneven hem-line is accented in the new season's models by various methods of draping. The cascade drape is used sometimes on one side and sometimes on both, developing a particularly irregular hem-line. Sometimes the collar is used to originate the draping, instead of the applied back, as just described.

The home dressmaker will find that careful planning will put the most marvelous of the new models within her income. Less expensive materials and needlework done by one's own fingers eliminate the big cost of the imported designs. For instance, satin-faced crepe may be substituted for one of the expensive new fabrics used to develop one of the late Paris frocks. One of the distinguishing notes of the design is a collar and vestee of self-material, cut in one, crossed in front and stitched. The blouse and the skirt are trimmed with drawn-work, arranged in group rows, three rows to each group. Double bands of the crepe trim the three-quarter length sleeves, the bands being neatly mitered at the corners.

Crepe satin, Canton crepe, crepe bengal or crepe faille may be employed to copy a model with more complicated form of drapery, yet withal, charmingly simple and easy to make. The color is brown—the tempting new shade called toast. The dress

has an oval-shaped neck in front and straight outline at the back. The waist is gathered on the shoulders in front, the closing being on the left shoulder and under the left arm. The blouse has an applied back, cut in one with a panel, which hangs free beyond the right shoulder. The panel then cascades down the side of the dress, ending in a point which extends below the hem of the three-piece gathered skirt. The applied back and panel may be omitted, if preferred, leaving still a straight-line frock of irresistible smartness.

### Stately in Black Satin

True stateliness is achieved in this gown of soft black satin. The long kimono sleeves are cut in one with side-front and side-back sections, then gathered to straight bands. The front and back of the skirt are in panel style, with deep crosswise tucks for a trimming. The side gores fall below the hem. Medium size requires 6¼ yards 36-inch satin.

PICTORIAL REVIEW DRESS No. 9813. Sizes, 34 to 44 inches bust, and 16 to 20 years. Price, 35 cents.

### The Return of the Tweed Suit

The return of the tweed suit is welcomed by all, especially in the new version. In this model the single-breasted coat falls almost to the hem of the skirt and is trimmed with silk braid. The two-piece skirt is gathered at the top and closed at the left

9813

Willie's Home Training

Mrs. Jones was entertaining some of her son's little friends. "Willie," she said, addressing a six year old, who was enjoying a plate of cold beef, "are you sure you can cut your own meat?"

The child, who was making desperate efforts with his knife and fork, replied:

"Yes, thanks, I've often had it as tough as this at home."

—The Christian Evangelist.

James, Summon Rand McNally!

Sir: Reflections on Hallowe'en are perhaps untimely. Still the Geographical Society of America may wish to add to its notabilia the episode of my typist's sister, who donned her brother's habiliments and sallied into the revelry. She had been absent but a short time when she returned hysterical: "I fell down," she sobbed, "and ripped my trousers at a busy corner."

—M.

Lesson in Home Dressmaking

A Slip-on Nightgown That Gives Variety to the Models Shown for the New Season

THERE is variety in nightgowns as there is in day gowns, the styles of the latter emphatically influencing the development of the former. The slip-on nightgown is an outcome of the mode for slip-on effects in dresses, coats, etc. This design has shoulder straps, which may be self-material or of ribbon. Also they may be made plain or with gathers along the shoulder seams. For the upper edge, either a hem or an applied two-piece band may be used as a finish.

For medium size the model requires 3 3/8 yards of 36-inch material. This provides bands of the same material. When ribbon is used for the bands, 3 yards will be sufficient, but 3/4 of a yard of ribbon will have to be added. The back and front of the gown are laid along the lengthwise fold of material, when cutting. The bands and the shoulder

straps may have the straight edges placed along the selvage edges of the fabric.

To make the model, join the front and back sections as notched. If desired without bands, turn the hem at the upper edge of nightgown on small "o" perforations. Turn the hem at lower edge on small "o" perforations. When the bands are to be omitted, in cutting the nightgown, cut off the upper part 3/8 of an inch above the small "o" perforations in front and back.

When the bands are used, join the front and back sections as notched and adjust to position on front and back of nightgown, with center-fronts, center-backs, seams and upper edges even. Next, join front and back shoulder straps as notched and sew to upper front and back edges of nightgown, matching single large "O" and double small "oo" perforations.

One does not have to possess a very inventive mind to see the possibility of using this model also as a costume slip.

SLIP-ON NIGHTGOWN No. 1167. Sizes, small, medium and large. Price, 30 cents.

Do People Tell You Their Tales of Woe?

By Mrs. Louise Sagle, Matron, Camden Station

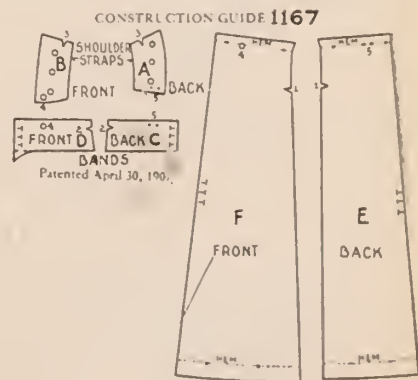

I DON'T know whether I am expected to be a doctor or a minister, but from the way that folks come in and tell me their troubles, I am beginning to believe that I am a combination of both. At any rate, I can well sympathize with both professions.

"From Maine to California, from New York to Idaho," they come to tell me their life histories. Yes, I believe that some of them would like to engage me to hang their husbands. However, this all helps me to forget my own ills, for there's no better way of forgetting yourself than to listen to somebody else's troubles; you always find that there are thousands worse off than you are, and you feel a bit ashamed to think that you've complained at all.

I have been asked to say something about decorating a home, or about house-keeping. At present I have nothing to say. All that I possess is a trunk and a suitcase, and I can be ready to move in five minutes' notice. Some years ago I sold all my worldly goods and spent the money on a good trip; so, the only thing that I can advise all Old Ladies to do is not to live in the past, but "pack up your troubles in your old kit bag," sell out everything else, and have a good time while you're alive. Deal squarely with everybody and the future will take care of itself.

One day a big, fat "cullud lady" lumbered in, carrying a large, well-filled and stuffed straw suitcase. This she dragged with all her might across the floor of the rest room until she stood in front of where I sat.

"Heah!" she said, dropping the bag in close proximity to my pet corn, "Heah! Watch dis, an' I'll gib yo' a nickel when I returns!"

### Some Little Girl Will Like This Dolly for Christmas

4196. The little doll mother may not only make dolly's clothes but also the doll, from the models supplied herewith. The body may be of drill, unbleached muslin, oil cloth or sanitas, with a stuffing of bran, kopak, or cotton. Eyes of shoe buttons, nose and lips of yarn, or, the features may be embroidered or painted.

Dressed as a clown this doll will be very attractive. The suit may be of calico, cretonne or scraps of silk or satin. One or two colors of materials may be used. For the rompers—cretonne or gingham is pleasing. Dolly will be so glad of the dear little pockets in her rompers, and "Pierrot," the clown, will do all sorts of tricks in his comfortable costume, if his arms and legs are fastened so as to be moveable.

The Pattern comprising the Doll and the garments, is cut in 3 Sizes: Small—12 inches, Medium—16 inches, Large—20 inches in length. The Doll requires for a Medium size  $\frac{1}{2}$  yard. The rompers  $\frac{1}{8}$

yard; the suit and hat,  $1\frac{1}{4}$  yards of 27-inch material.

### A Pretty and Serviceable School Dress

4152. Serge and plaid suiting are here combined. The fronts meet over a panel. The sleeve is in bell style. This model makes a splendid school dress.

The pattern is cut in 4 Sizes: 6, 8, 10, and 12 years. A 10 year size requires  $2\frac{3}{4}$  yards of 44 inch material. To trim as illustrated will require 1 yard of 32 inch material.

### A Stylish Afternoon Dress

4160. This is a splendid model for mature figures. It features the low waistline and surplice closing now so popular. The sleeve may be finished in  $\frac{3}{4}$  or in elbow length.

The pattern is cut in 7 Sizes: 36, 38, 40, 42, 44, 46, and 48 inches bust measure. A 38 inch size requires  $4\frac{3}{4}$  yards of 40 inch material. The width of the skirt with plaits extended is  $2\frac{1}{2}$  yards.

### A Frock to Please the Little Miss

4139. Picture pockets have long been a popular feature of children's dresses. This model is especially attractive, as it also shows the new broad collar.

The pattern is cut in 4 Sizes: 2, 4, 6 and 8 years. A 6 year size requires  $3\frac{1}{4}$  yards of 32 inch material. To trim as illustrated, requires  $\frac{5}{8}$  yard of 32 inch contrasting material.

### A Model for Service and Protection

4163. This "easy to make" apron model is nice in unbleached muslin with facings of contrasting material, or, in gingham, chintz or percale. The side seams are free below the hips, but if preferred may be closed their entire length.

The pattern is cut in 4 Sizes: Small 34-36; Medium 38-40; Large 42-44; Extra Large 46-48 inches bust measure. A medium size requires  $4\frac{3}{4}$  yards of 27 inch material.

# How Can We Put East Chicago Station in First Place?

By Susan Whelan, Cashier

(Who answers the question for every other station on the Railroad, too!)

**T**HE correct answer to this question is through the team work of us employes.

It is the only thing that will make the efficiency at this station the highest on the system.

There are opportunities at all times (if we only avail ourselves of them) to do something outside of our ordinary routine of work to help the railroad. Being faithful at our desks is not the only obligation we have. We should secure business, have the Company's best interests at heart, recommend our service to others and urge them to give it a trial. Those becoming patrons of the Railroad now will continue to be so years hence, and every new patron will become a missionary for our service and bring others to use it.

Every employe should realize that his or her own welfare is prospered only as the prosperity of the Railroad increases. We should do our best to make others glad to deal with our Company. Many times during the day we represent our Company and we should make the impression a good one. It costs nothing to develop the habit of courtesy and it pays big dividends. Courteous clerks are a valuable asset.

## Send in That Suggestion!

Don't hesitate to offer suggestions which will improve conditions or that may increase efficiency. You may say that not everyone can make good suggestions, but I say emphatically that this ability is mainly a habit which any man or woman with a normal brain can acquire. It is chiefly a question of mental attitude. The ordinary mental attitude is that of accepting things just as they are, of not looking beneath the surface, of having little or no belief that things can be made better; such an attitude

effectually prevents any ideas from being born. Let us change this attitude, taking nothing for granted. Look at conditions and things not merely with the outward eye, but with that inward eye of the mind which thinks as it sees. Show the management the possibilities of better methods in our own office, in the operating department, the shops or any other department. Most of us dislike to think; therefore many tasks are performed in a way which involves a minimum of mental effort and produces a minimum of efficiency.

## Don't Let Your Mind Get Lazy

The only way that a man can work without thinking is to do the job in the way in which he or someone else has done it before. When he has to do a new job he must do some thinking, but usually it will be found that he will adopt a method which requires on his part the least possible mental effort for its origination. None of us know what we are really capable of doing until we get in a situation where we really have to do it.

## An Honest Day's Work

What constitutes the fair day's work for which we expect a fair day's pay? Some workmen think that it is the least they can do and still not get discharged. Why have this mistaken idea? Most employers think that it is the amount of work which their industrious employes normally accomplish. Let us, therefore, live up to this and use every minute of the day on duty to the best advantage. If we have any leisure time, which often may be the case, why not utilize it for self improvement, studying the Railway Official Guide, Freight Tariffs, or offering assistance to someone else in the office who may need help? In this way, notwithstanding the fact that we should know our particular job from "A" to "Z" we may acquire an enormous amount of knowledge and skill which will not only lead to our own successful goal, but also serve in the progress of the Company.

## Make Prompt Reports!

Another matter of importance which should not be sidestepped is the sending in of all reports at the appointed time. Let it be shown that we can come first in this as well as in other things. Accuracy and neatness are essential and should be our guide—first, last and all the time. We have yet to find the person who doesn't make mistakes, but we can all cultivate accuracy, even though it may be necessary to sacrifice speed for a time to acquire it. Accuracy and speed really go hand in hand. They require only reasonable concentration and effort.

## Keeping Files Straight

Whenever we have occasion to refer to files to secure any documents for information, let us always replace them properly when they have served our purpose. By doing this we abolish entirely the "Hunt System" for some one else who may wish to use them. There is a place for everything and everything should be in its place. Let system and order prevail.

Last, but not least, let us be faithful and loyal to our obligations, forging ahead with enthusiastic interest to make East Chicago Station second to none in the eyes of the management of this Company.

## Her Boss Says that Susie Practices What She Preaches

Miss Susan Whelan, the author of the accompanying article, began service with the Baltimore and Ohio in the Agent's Office at East Chicago on April 22, 1918, as a clerk, handling car records. Later there was a vacancy on the Abstract Desk, and, on recommendation of the chief clerk, Miss Whelan was appointed to fill the position. A year later, on the resignation of the cashier, Miss Whelan was promoted to fill the vacancy.

After telling us of Miss Whelan's record, her "boss," F. N. Hickok, freight agent, says:

"Everybody likes Susie: she always applies herself to her work, never giving any thought to play while on duty, and never being too busy to assist a co-worker. She is thorough and never leaves a leaf unturned until she accomplishes her purpose—that of doing the work assigned to her and correctly furnishing details in everything. There is never a complaint from the officers of the work in her department.

"Her job as abstract clerk was no boy's job. We have nearly fifty industries and nine connecting lines to take care of. Some of these industries handle 200 cars daily.

"When informed of her appointment as cashier, Miss Whelan thanked me and remarked that she would do her best. In her quiet, unassuming way she took hold of the reins of that position and is still holding it down as a first class cashier.

"We all hope that she will stay with us for a long time and that she likes us enough to stick and not want to run away with someone else, signing up a life's contract. However, it's hard to tell, you know. We have noticed that she goes to the same little town every year for her vacation."

Miss Susan Whelan

# LEAVE IT TO BENNY BENZINE

A NEAR TRAGEDY IN TWO ACTS

## DRAMATIS PERSONÆ

**TYPE WRITER** (his assembled members: Rattly Ratchet, Shift Lock, Rubber Roller, Flippant Keys, Blackie Ribbon, Sliding Carriage, Back Spacer).

**BENNY BENZINE**, the hero.

**LINEN PAPER**, whose pride takes a tumble.

**FORGETFUL MARY** } stenographers.  
**CAREFUL ALICE** }

## ACT I, SCENE I.

Prelude (heard from behind the curtain):

**ZIG:** If a machine needs cleaning, can the typewriter brush?

**ZAG:** No, but a Benzine can.

Curtain rises as the harsh strain of a dizzy jazz tune issues forth from Type Writer, operated by Forgetful Mary.

**TYPE WRITER:** Oh, oh, oh! There's something radically wrong inside of me. If you keys don't stop kicking and scratching and creaking and groaning like you are doing, you'll give me nervous prostration. Stop it, I say!

**RUBBER ROLLER:** That's what I say. They keep banging away at my poor head like sledge hammers on a tin roof. They won't give me a minute's peace. No matter which way I turn, it's all the same. What under the sun ails them? Why, when Jane used to play on them our music was sweet—even classical at times; now it seems as though we have nothing but jazz, and that gets worse every minute.

**LINEN PAPER:** And do you remember the beautiful letters that I used to have on my face? Now they are as crooked as can be and smeared with carbon. They're perfect sights! Look at them! You can't tell the 8's from the 3's, nor the n's from the r's. If they are no better before they get to the end of the page, I'll get thrown into the waste basket *toute de suite*.

**SLIDING CARRIAGE:** And as for me, I've an attack of the rheumatism. Every time I slide I feel as though I'll surely break. I wonder if there's some new disease going around?

**BACK SPACER:** I'm positively sick and tired of running back six times a minute for Mary to erase some letter. I don't mind it once in a while, but this is too much. I'll get spinal meningitis.

**BLACKIE RIBBON:** Every time a key has hit me this morning, it has cut deeper and deeper holes in my clothes.

First thing you know they'll be putting on a new ribbon, and I haven't lived my three score and ten hours of perpetual motion yet, no, not by a long way; but I'll be going soon at this rate. Plague those keys!

**FLIPPANT KEYS:** Yes, that's right! Blame everything on us! Why, our joints are just as sore as yours, perhaps worse. We are just as near the scrap heap cemetery as the rest of you.

**ALL:** Oh, oh, oh! What shall we do?

(Brain-racking jazz continues as curtain falls.)

## ACT I, SCENE II.

Midnight.

(Voices come from behind the curtain, which does not rise.)

**RUBBER ROLLER:** Keys, keep still! I can't sleep.

**FLIPPANT KEYS:** That's nothing, neither can we.

**RUBBER ROLLER:** Why not?

**FLIPPANT KEYS:** Can't you see we're freezing to death? You can't expect us to sleep when we have no cover on us. These long Autumn nights are chilly. Mary forgot to pull the cover down over us; she just threw it across your head and left it there. That's no way to do. Half an hour ago the dust man came along with his broom, and since we had no cover, the dust settled on our chests so that we can hardly speak. We'll never be able to work tomorrow. Why, we haven't even been

dusted off since last Saturday when Jane left.

**SLIDING CARRIAGE:** Is that you, Keys, talking like that? No wonder you kicked and scratched, you poor little things! I wish I could hand you a part of our cover. We have entirely too much, for it's doubled here. I don't see how Roller and I are going to stand it through the night. We have all of the cover and you have none.

**RUBBER ROLLER:** And that's not all. Nobody has seen a drop of oil since I can't tell the day when.

**SLIDING CARRIAGE:** That's the truth. I'd hate like thunder to say anything against Mary, for she's a nice little girl, but I do wish she'd remember to clean us up once in awhile. I'm getting entirely too stiff to turn over. Where is the paper?

**LINEN PAPER:** Here I am; right in the waste basket where I told you I'd go. And I'm glad of it, for I would be ashamed to show my face in polite society.

**TYPE WRITER:** This must go on no longer. You, my men, are expected to work and you have nothing to work on—no oil to drink, no alcohol or benzine baths, no dusting, nothing—absolutely nothing!

**SHIFT LOCK:** If you please, sir, may I make a suggestion?

TYPE WRITER: Go on.

SHIFT LOCK: If you please, sir, I suggest that since we can't live on air and dust that we go on a strike.

ALL: Yes, yes, yes!

TYPE WRITER: I'd hate to call a strike unless it is positively necessary. Yet, it seems to be about the only thing left to do.

RATTLY RATCHET: Tra-la-la, tra-la-la, tra-la—

RUBBER ROLLER: Shut up! Who asked you to say anything? You're only a bit of a rattle-trap.

RATTLY RATCHET: Perhaps—but I have an idea. Tra-la-la—

RUBBER ROLLER: Out with it.

RATTLY RATCHET: I saw an oil can today.

SLIDING CARRIAGE: You saw an oil can! Well, what of it?

RATTLY RATCHET: But I know where he is this minute, and Benny Benzine, too. You know Benny can fix things up; he always does.

RUBBER ROLLER: Where is he? Within calling distance?

RATTLY RATCHET: Under this very table. Tra-la-la, tra-la-la!

Hello, there, Mr. Oil Can and Benny Benzine, speak for yourselves.

OIL CAN } Yes, we're here.  
BENNY BENZINE }

RUBBER ROLLER } Why didn't you say something?  
SHIFT LOCK }

OIL CAN: Because we don't believe in butting into arguments.

RUBBER ROLLER: No, you always were a smooth, slick-tongued fellow. Why can't you come up here, and relieve your fellow creatures?

OIL CAN: How could I get there?

RUBBER ROLLER: You can run, can't you?

OIL CAN: Not uphill. I'd help you soon enough if somebody would lift me up as Jane used to do. Evidently Mary doesn't know that we are here. Isn't that true, Benny?

BENNY BENZINE: Perfectly correct. But I heard you talking about striking. Take my advice and don't do it; it will only cause more trouble. If you strike, Mary will tell her chief that you have refused to work. He will send for a repair man, who will find out that you haven't been properly cared for, and poor Mary may get the grand bounce for neglecting her duties. You wouldn't want to do that, would you?

ALL: No, no indeed!

FLIPPANT KEYS: But what would you suggest?

BENNY BENZINE: She's new, you know, and we've got to have patience. Have you thought of telling her about it?

SHIFT LOCK: If you please, sir, I've tried to tell her several times today, but she wouldn't listen. I stuck tight in my place and refused to move several times when she wished me to, but I couldn't attract her attention. She just gave me a shove and made me work.

FLIPPANT KEYS: Don't you think, Benny, that you could find a way to tell her?

BENNY BENZINE: I don't know; I'll try. All of you go to sleep if you can, and I'll try to think of something by morning.

ALL: Thanks, Benny, and good night.

BENNY BENZINE: Good night.

ACT II, SCENE I.

8.30 o'clock on the next morning.

Forgetful Mary and Careful Alice enter. Mary seats herself at the typewriter, puts in a clean sheet and turns the roller with an effort.

Pop! Bang! Ouch! The stopper jumps out of the benzine can under the table.

MARY: Ugh! What's that horrible odor? (Shakes cologne on her handkerchief and sniffs it.)

CAREFUL ALICE (from across the aisle): That's your benzine can. It must be too warm in here for it, or else you didn't put the stopper in tight the last time you used it.

FORGETFUL MARY: I haven't used it.

CAREFUL ALICE: Oh, haven't you cleaned your typewriter since you've been here? Don't you know how?

FORGETFUL MARY: Oh, yes, they taught us at school, but I have been so busy getting my work out that I've really neglected the poor typewriter. Why, no wonder that shift lock refused to work yesterday. The keys got stuck, too, and my paper was horrid looking. But, just watch me! I'll fix it up right away. (Proceeds to clean and oil typewriter with great care.)

ACT I SCENE II.

Afternoon of the same day.

Curtain rises, showing Mary seated at typewriter, playing a merry tune on the keys. She is smiling. The keys run like clockwork.

(Curtain.)

ACT II, SCENE III.

That night, at ten o'clock.

Voices from behind the curtain:—

TYPE WRITER: Well, how do you feel by this time, Keys?

FLIPPANT KEYS: Fine! Cover on tight and we're ready for a snooze.

RUBBER ROLLER: Benzine, where are you?

BENNY BENZINE: Right under the table where I belong.

RUBBER ROLLER: Say, tell us how you pulled off that stunt.

ALL: Yes, Benny, tell us about it.

BENNY BENZINE: It was simply an accident. I lay awake all

night worrying about it. The more I thought the madder I got. This morning I felt as though I could stand it no longer. I held my breath as long as I could and my neck began to perspire. Suddenly my collar burst. You know the rest. Mary smelled it and Alice told her.

FLIPPANT KEYS: Three cheers for Benny Benzine! He gets there every time!

ALL: Rah! Rah! Rah! for Benny Benzine, who saves us from the Rubbish Cemetery!

(Curtain. Soft music.)

M. T. S.

## Make Your Christmas Presents from Old Stockings!

**D**ID you ever see a pin tree? No? Well, I am sure that you will want to make one for somebody's dressing table. Often little girls and boys want to give Christmas presents to everybody in the family, and yet they do not know how to make their pennies stretch. Try making these presents for Mother, Sister, Auntie, or Grandma, and I'm sure that they will be pleased. Just ask Mother to let you have all of the stockings that are too old to mend any more. Then get your scissors, a needle and some thread, a large, empty wooden spool, a bit of bright colored crepe paper, some cotton wool, and a round stick of the size of a lead pencil, and you're ready to begin.

First we'll make the pin tree. Sharpen the stick at one end. Cut a long, narrow strip of the crepe paper and wind this tightly around the stick, beginning at the blunt end and ending with a little twist at the sharp end. Then, take a wider strip of the paper and fasten it with a pretty bow around the spool. Slit one of the worn stockings from top to toe, and with a saucer as a pattern, cut from it two round pieces. Gather the edge of one of these, draw it up to form the shape of a little cup. Into the bottom of this pack a small handful of the cotton wool. Then insert the blunt end of your pretty stick. Pack the wool in tightly until it will hold no more. Draw the threads tightly and fasten this little ball to the stick by winding the threads around it. Now gather the second piece, and fit it over the first, turning the edges neatly under, and catching them with the thread. Insert the sharp end of the stick into one end of the spool, being sure that it fits in tightly. Now your pin tree is ready. The spool forms a box for the tree, the stick forms the trunk, and when the pins are stuck into the little woolen ball, they will form the branches. For Christmas, be sure to put a pretty little tag on it, reading something like this:

"What a wonderful tree now we see  
With pins for you and pins for me!"

And then, there is a lovely rug that you can make for grandma. She will like it in her bedroom or bathroom this winter. You will need a good many stockings for this or you can combine the stockings with strips of woolen cloth of pretty colors.

Perhaps you can find some pieces of red flannel, or if you have some red and blue dyes, dye some worn out underwear and cut it in strips 1½ inches wide. When cutting out the stockings, start at the top and cut round and round and round. Sew the end of one long strip to the beginning of another, and so on. Make your strips into three different balls. When you are ready to begin, sew the three ends together, unravel each ball for about one yard, and put a safety pin into it so that it will not unravel itself any further. Then begin to plait. When you have made about forty or fifty yards, you have enough for a good sized rug.

Using the end on which you started plaiting as a center, sew the plait around in a circle with the over and over stitch joining the edges. You will soon find your material growing into a lovely rug which you will be proud to use as a gift. Or, if you know how to crochet, use one of the large wooden needles and crochet your strips into a rug. It is a little faster work than the plaiting and sewing, although the plaited rugs are prettier.

Sew together pieces of white stockings to form two squares of the same size. Bind these together with white or colored binding and you have a nice washcloth.

There are lots of wonderful toys to be made from stockings. If you will hunt up the MAGAZINE for last December, you will find out how to make a pussycat from a black stocking. And there are clown dolls and black Dinahs and all sorts of dolls. Next month, if we can find the space, we are going to tell you how to make a cunning little rabbit from an old white, gray, pink or black stocking, with old glove fingers for his nice, long ears.

### For Our Little Puzzlers

**T**HE answers to the puzzles in the September MAGAZINE are:

No. 1. The word "n-o-t-h-i-n-g."

No. 2. The letter "h."

No. 3. (Hidden fruits): Peach, apple, currant, plum, pear.

Did you guess them all? Well, if you did, here are some more for you. See if you can get them all. To all those who send in correct answers, Aunt Mary will send six postcards of scenes along the Baltimore and Ohio. Send your answers and all letters to:

Aunt Mary

Baltimore and Ohio Magazine

Mt. Royal Station, Baltimore, Maryland.

#### 1. RIDDLE

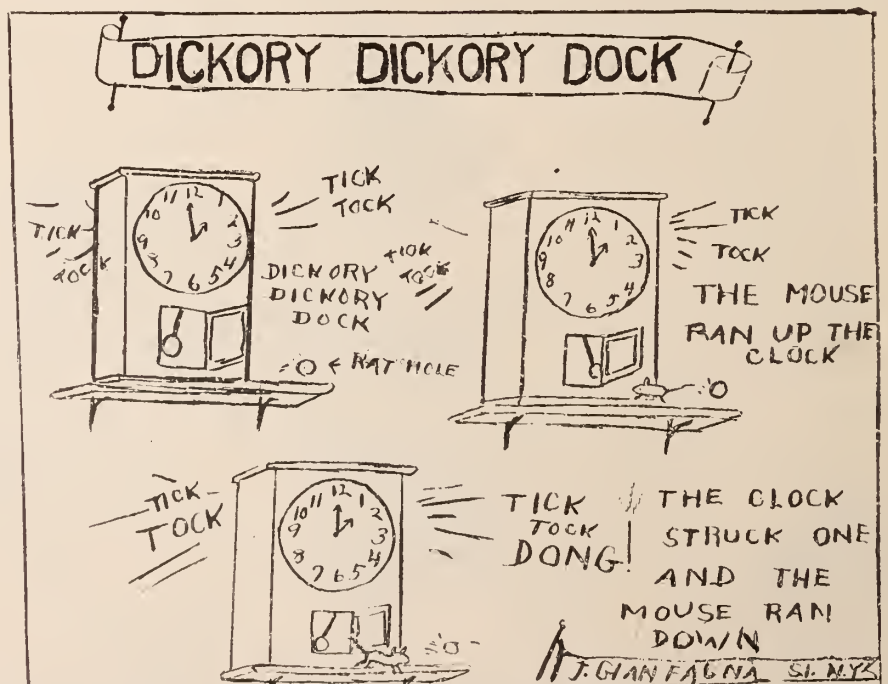

(This is easy.)

Cut off the head of a "weapon of war," then place at the end of the remainder the letter you cut off from the head and you will get what we always use to express meaning.

#### 2. BEHEADMENT

(Oh, but this is a hard one.)

The entire word means "to clip," as

Our little eleven-year-old artist from Staten Island sends us another interesting drawing. Watch the mouse. Thank you, John!

wool; cut off the first letter and we have a second word which means what we do with the third word formed by taking the first letter from the second word.

By Mr. Oyster, Baltimore, Md.

3. REBUS  
(And this one is just as hard.)

The relative position of the five letters below, the second line to the first, when expressed in language or written out, form a word meaning "An old style of gun."

Bus

B1

By Mr. Oyster, Baltimore, Md.

## Children, Shall We Let This "Old Boy" into Our Circle?

Dear Girls and Boys:

We have had letters from Mother Goose and from Uncle Oscar; now we have a letter from one of our own railroad men. What do you think that he does? Why, he works at the Print Shop at Mt. Clare, Baltimore, Md., and he helps to print the MAGAZINE and the Children's Page for us to read. But this letter is really funny, for "Uncle Albert" (don't you think it's all right to call him that?) thinks he is about as young as any one of you little people. And he's a grown up man.

How I laughed when I read it, for I just happened to think how funny it would be if all the Baltimore and Ohio Veterans would take a notion to be kids again. Suppose, for instance, Grandpa Holmes and Uncle George Stumner would enter our Safety Contest. Why, goodness me! I'd never know what to give them as prizes, would you?

But we're all glad to read this letter, I am sure, and we shall want to hear more about little Scamp, Jack, and Pretty Kitty.

And now, before you read Uncle Albert's letter, let me wish you just the happiest, nicest, Thanksgiving Day that you ever had.

Yours lovingly,

*Aunt Mary*

P. S. There'll be lots of Safety Contest news for you in next month's MAGAZINE.

Jeff, drawn by Harvey Gaumer, son of Section Foreman H. E. Gaumer, Ft. Marion, Pa., is inspecting the clothes of the sailor boy, drawn by Freda Brown Michaels, of Somerset, Pa.

4. REBUS

(This one will be easy if you guessed No. 3.)

The relative position of the two letters below, one to the other, when expressed in language or written out, form a combination of letters spelling a word meaning "sweethearts."

L

S

By Mr. Oyster, Baltimore, Md.

I hope that many of our little readers will send me answers to these puzzles—they are so interesting and instructive.

Here is Uncle Albert's letter which I am sure you will all enjoy. Be sure to let me know what you think of him as a member of our little circle.

Pasadena, Md., September 11, 1922

Dear Aunt Mary:

I am 46 years old and work on the Mono-type Keyboard in the Printing Department at Mount Clare, where the MAGAZINE is printed, and I want to join your happy family of "little folks." May I? My grandpa, who also worked for the Baltimore and Ohio, was "only a boy" when he died, nearly 82 years old, and I am not much more than half that old, so I guess I'm not too grown up, am I? Well, I've joined now, anyway, and you can't put me out, 'cause that isn't fair. So, there!

I want to tell you all about our little new puppy. (And a little more besides, as I go along. But that's a secret. Don't tell.) One day when I got home from work my wife had the dearest, cutest, cunningest little black and tan puppy you just ever saw. Sam (that's the boy who brings the Sunday paper) brought it to her. And Jack, our big brown dog, was so jealous he lost all his curiosity and wouldn't even look at him or smell him. And "Pretty Kitty," (that's our old mother cat) didn't offer to hurt him a bit, 'cause she knew he was only a puppy. But Kitty's a terrible fighter when it comes to grown up dogs, big and little. One time when three dogs were fighting on our back porch Kitty shot out like a blue streak,—no, a black and white streak, as soon as the door was opened, and pretty soon the three dogs and the cat rolled off the porch together, and two of the dogs ran away howling. Kitty showed them all the fight they wanted to see for that time. But our dog, Jack, didn't run away, 'cause he belongs here and knows Kitty, but she slaps him sometimes and then he holds just as still as he can be, for if he didn't he'd get scratched awful.

Well, the new puppy slept for the longest time in an old wash basin with rags in it for a bed, and then after a while he woke up and began to squeal and my wife thought he was hungry and gave him some milk and he began to lap it just as if he knew

how all his life. I guess maybe he did almost, 'cause he was only five weeks old. But pretty soon he began to squeal again and my wife thought he had the colic and gave him some peppermint just like he was a little baby, but he kept right on squealing for the longest time 'til I said we'd have to call him "Piggy" 'cause he squealed so much. Well, after awhile he stopped squealing and my wife put him into a barrel in the feed house and we went to bed, and the next morning he was there squealing again. Now, what do you think was the matter with him? Why, he missed his little mother. But he is all right now and squeals only a little, and barks and plays under our feet and gets stepped on and bites our ankles and pulls our shoe strings and tries to pull our pants off and everything, just like all other puppies.

Now, Aunt Mary, what do you think is a good name for a wee, little pup? My wife says she likes the name "Scamp," so I guess he'll be a scamp all his life. I think he will, sure 'nough.

Give my love to all the "little folks" and wish them for me many happy days reading the MAGAZINE until they all grow up to be Veterans or wives of Veterans.

Yours truly,

Albert B. Clark

Sing a song of tooth-paste,  
At morning and at night,  
Twenty healthy little teeth  
Strong and shining white.  
Every day I brush them  
To keep them nice and clean.  
Aren't they a set of pearls  
Fit for any queen?

—Ax-I-Dent-Ax.

Bridget had been discharged.

Extracting a \$5 bill from her payroll she threw it to Fido.

Then the shocked mistress heard her exclaim:

"Sur'n I niver fergit a friend, that's for helpin' me wash the dishes." —Ex.

Evelyn James, granddaughter of former Superintendent James L. Nichols, Chicago Terminals

The payments to pensioned employees constitute a special roll contributed by the Company.

During the calendar year 1921, \$367,795.95 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884 to August 31, 1922 amount to \$4,893,847.15.

The following pensioned employees, after serving the Company faithfully for a number of years, have died:

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## Frank G. Stanhope

Frank G. Stanhope, pensioned freight conductor, was born on July 13, 1856. He entered the service of the Baltimore and Ohio as freight brakeman, New Castle Division—then the Pittsburgh and West-ern Railway—on February 1, 1889. In 1890 he was promoted to conductor.

Mr. Stanhope now lives at Painesville, Ohio. He has two sons, both of whom are conductors on our Akron Division.

## Cecil Craig

Cecil Craig, pensioned foreman, Aiken, Md., was born on October 16, 1856 on a farm adjoining the village of Jackson, Cecil County, Maryland. Here he spent his early life.

On June 1, 1881 he secured his first position with the old P. W. & B. Railroad as track laborer. On September 17, 1889 he entered the service of the Baltimore and Ohio, Philadelphia Division, in the same capacity.

In March, 1891 he was transferred to Wilmington. On June 30 of that year he was promoted to foreman of the extra gang.

On April 1, 1896 he was placed in charge of the section gang at Jackson, and in 1901 he was made foreman of the work train running between Baltimore, Md. and New-ark, Del. In this capacity he worked until failing health necessitated his retire-ment.

On being placed on the Pensioners' Roll of Honor, he extends his thanks to the officers of the Baltimore and Ohio and to those who made it possible for him to retire.

Mr. Craig and his wife are now living at their home at Jackson, Md.

## J. H. Lower

J. H. Lower, for 35 years agent at Hicks-ville, Ohio, was born near New Philadelphia, Ohio, on July 27, 1856. In November, 1874 he entered the service of the Balti-more and Ohio as telegraph operator. He first worked as extra operator, but later was given regular relief work, and in conse-quence thereof, he worked in nearly all the offices on the Division. In July, 1877, on the recommendation of Division Chief Operator J. D. Flynn, Mr. Lower was ap-pointed agent-operator at Delaware Bend, Ohio. During the next year, he was trans-ferred in the same position to Holgate, Ohio, and in May, 1880 to Republic. Seven years later he went to Hicksville as agent, retiring from telegraphic duties. When he retired from service in June of this year, he had a service record of 48 years, 35 of which had been spent at Hicks-ville.

In 1882 the entire system competed by divisions for a prize of \$25.00 and a com-mendatory letter from an executive official for the neatest station building and plat-form, the most prompt handling of cars and the accuracy of accounts for the year. Mr. Lower was the winner on his division and holds the letter signed by S. Spencer, second vice president. He is justly proud of this letter as he says he then was a very young agent.

A few years ago Mr. Lower took up the matter of organizing a Veteran's Associa-tion on the Chicago Division. This was accomplished and Mr. Lower was honored with the presidency for two years. He is greatly interested in this move, the mem-bers now being counted by the hundreds.

Mr. Lower is a pioneer of the division.

He recalls its wonderful developments, among which are the increase in business and enlargement of facilities for handling. His experience goes back to the time when ten tons was the maximum of a carload and the agent allowing loading above that was sure to be criticised for overloading cars. Fifteen loads or 22 empty cars was a train, and we may consider that our bridges were rather frail when we recall that in handling a double header or a dead engine in a train it was the rule to place not less than five cars between the engines to spread the weight on bridges. Very few trains made the terminals without reducing loads from original assignment. This was for failure of power, but now with our 75 ton cars and powerful engines a hundred cars are handled over the Division and the grades with apparent ease.

In retiring Mr. Lower says it is most gratifying to think that he has the good wishes of all employes on the Division with whom he has been so long associated.

## Edward D. Colegate

Edward D. Colegate, pensioned painter, Cumberland Division, was born on Decem-ber 10, 1852, in Baltimore, Md.

Although his real service with the Bal-timore and Ohio began in December, 1875, Mr. Colegate considers that he was an em-ploye years before that time, when in 1863, as a Boy Scout at Mt. Clare (the section then called Russia) he had a job. His route lay between his home and the office at Mt. Clare, where he watched the list to see when his father and his uncle would be called out for duty. Mr. Colegate says:

"The death of my father brought my Boy Scouting to an end, as this accident left me entirely dependent upon myself. I just had to do, and I did.

"At old Harpers Ferry in 1875, while visiting the man who built the Queen City Hotel, Thomas N. Heskett put me to work in the "Regular Army" and urged me to drill up. The year 1889 found me foreman painter, Baltimore Division Road Depart-ment, with Oliver Kemp as my boss.

"I shall not forget when he called me to his office for instructions. Said he, 'Ed, you are the only painter on the Eastern Lines; make good!' I don't know whether

ON THE ROLL OF HONOR  
Left to right: Frank G. Stanhope, Cecil Craig, J. H. Lower, E. D. Colegate, D. Lapham

# Safety Roll of Honor

## Staten Island Lines

Agent-Telephoner Joseph R. King, Mariner's Harbor. September 28. Noticed brake rigging down on C. M. & St. P. car 501366, as extra No. 1636, west was passing station. Notified yard office at next station. Train stopped and conditions remedied.

## Baltimore Division and Baltimore Terminal Division

Conductor W. E. Clarke. Watersville Junction. September 3. While inspecting train of engine 4278, discovered flange broken on wheel of rear truck, car B. C. & G. 1039. Impossible to set car off at this point. Car run at low speed to Gaither where repairs were made.

Brakeman F. M. Carlson. Curtis Bay. September 4. While handling a drag, Curtis Bay to Mt. Clare, observed broken rail, west leg of wye at West Baltimore, five rail lengths from bridge and under cars. Notified Dispatcher's Office and informed track foreman of condition.

Operator M. D. Kirby. Germantown Lower. September 27. Observed bottom of coal car down and dragging on rail. All concerned notified. Train put into Boyd's Siding and car attended to.

## Cumberland Division

Brakeman George E. Light. Green Spring, W. Va. September 15. Observed man sitting on track just ahead of moving car. Mr. Light, who was riding rear of car of coal on No. 1 track, turned the angle cock on car and stopped train just in time to save the man's life.

## Statement of Irregularities Noted and Corrected by Operators, Cumberland Division

Date	Name	Occupation	Location	Broken Truck	Brakes Sticking	Projection From Car	Brake Rig'n Down	Obstruction on Track	Hopper Bottom Down	Steam Hose Unconnected	Hot Car Boxes	Swinging Doors

## Connellsville Division

Engineer E. C. Staub, Conductor J. M. Boxwell, Fireman R. J. Smith, Brakeman W. G. Gauntz, Brakeman C. A. Robertson, Flagman S. Long. Sand Patch Tunnel. July 18. Two cars were buckled in train of Engine 4111, west; both main tracks blocked. These men helped to clear west-bound track before arrival of relief outfit. Special commendation for each.

Operator G. T. Fisher. Connellsville, October 10. While going home from work noticed a bad condition of a joint just west of Leith Telegraph Office. Two bolts were found to be broken out of east end of joint, allowing rail to run four inches apart. Notified Section Foreman O. M. Boyer, who had repairs made.

## Pittsburgh Division

Calvin Knight, citizen, and Clerk F. W. Richardson. Knox, Pa. October 3. Mr. Knight discovered fire, Bridge 520. Called Mr. Richardson. Both went to burning bridge. With aid of buckets kept fire confined to east spans of bridge until help arrived. Structure saved.

Agent W. S. Nickolas. Millvale, Pa. July 24. Observed something dragging on car of Pennsylvania Railroad train extra No. 7681. Notified Pennsylvania Railroad signalman. Train stopped at BN Tower. Defect corrected.

Operator A. R. Clothier. Eidenau, Pa. October 18. Observed defect in car of train of Engine 4845. Had train stopped and notified crew, who discovered 8 or 10 inches of flange broken from wheel.

Leverman J. Tobias. Demmler. October 15. Noticed door of refrigerator car in train of extra west No. 5070 swinging open

on hill side of track. Notified operator at Bessemer, who stopped train and notified crew.

## Wheeling Division

Third Trick Operator L. C. Weaver. Belpre, Ohio. June 5. Observed brake rigging down on tank of engine 1790, stock train. Notified crew. Train stopped. Defective condition removed.

Third Trick Operator J. R. Lee. Foster Tower. July 1. Observed brake rigging dragging, eighth car from engine 2668. Notified all concerned. Brake rigging removed. Train proceeded.

Operator L. V. Taylor. OB Office, Parkersburg, W. Va. July 14. Stopped train No. 30 and had brake rigging removed on Baltimore and Ohio 15017.

## Newark Division

Night Ticket Clerk O. R. White. Zanesville, Ohio. October 1. Discovered brake beam down on L. & N. car 19239, as train was pulling out of Zanesville Station. Notified crew. Accident averted.

Agent-Operator J. F. Baesel. Waterford, Ohio. October 3. Discovered piece of crossing plank hanging from brake rigging on front truck baggage car No. 58. Train crew notified. Plank removed. Dispatcher notified. Train protected.

Clerk A. W. Dowie. Newark, Ohio, Shops. October 11. Discovered broken rail in one of tracks inside shop yards. Reported condition to division engineer. Rail replaced.

## St. Louis Division

Foreman Bert Runyan. Lovette, Indiana. September 9. Noticed oil box on car of extra west No. 2901, while passing the section gang. Operator notified. Car set out at Commiskey.

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings Law Department

Correspondent, GEORGE W. HAULENBEEK

Recently I had occasion to visit the Traffic Department of the Bethlehem Steel Company at Bethlehem, Pennsylvania. Mr. J. M. Gross is the general traffic manager. On the wall of one of his offices I found the following, which I copied for the columns of our MAGAZINE:

"The man who is worthy of being a leader of men will never complain of the stupidity of his helpers, of the ingratitude of mankind, or of the inappreciation of the public.

These things are all a part of the great game of life, and to meet them and not go down before them in discouragement and defeat, is the final proof of power."

And then another office I always like to visit is that of Vice President C. W. Galloway. It is an office minus office hours; at least that is the impression I get, for whenever I have occasion to see Mr. Galloway, everybody is at his post. T. M. Jones, chief clerk, is there when the building opens, apparently, and is always at his desk. The clerks are a busy set. They never look up. The word "sinecure" has a place in the dictionary, but it has no standing in Mr. Galloway's office.

Rowland Gosnell came into our service in June, 1903 and the members of the department have become very fond of him. Along in the summer he took his family to Ocean City, Maryland, spending his vacation with them. Returning to his home in Baltimore, typhoid fever developed, and he has had a pretty severe time. We have all missed him, but this is the finest office in the service, or very near it, for everybody steps in to help and to keep things moving, and all this without a murmur from any one. Mr. Gosnell celebrated his natal day on October first, and the birthday observance of Duncan K. Brent and myself occurred on the ninth.

#### Urging Optimism

"'Tis easy to look o'er your neighbor's fence  
And say, 'Things should be so'.  
'Tis easy to look at his garden patch  
And see the crooked row.  
'Tis easy to criticize and say,  
''Tis thus that things should be,'  
But when it comes to things at home,  
Then's when it's hard to see."

#### President Willard

I had occasion to visit President Willard in his office recently. I was impressed with his business-like attitude during the interview. I enjoyed it. The various offices in the building had closed for the day. There was a mountain-like amount of work before Mr. Willard for his attention, and as soon as my visit terminated he was soon immersed in it. He is a hard worker.

Departing from the President's private office, I noticed as I glanced into the main room that the entire clerical force was busily engaged and no indications of leaving for the day were apparent.

#### Engineering Department

Correspondent, OSWALD K. EDEN

Because of the lack of interesting news, your correspondent was obliged to miss the October issue of the MAGAZINE. Remember that worth while news, together with photographs, especially of your young hopefuls, is always welcomed.

Although no longer a member of our force, it is a pleasure to announce the marriage of H. G. Hall to Miss Ethel Elizabeth Mercer, daughter of Mr. and Mrs. Joshua Mercer. The wedding took place on Wednesday, October 11, at the First Baptist Church. Congratulations! Mr. Hall will be remembered as chief draftsman to M. A. Long, former assistant to chief engineer and architect, but now president of the M. A. Long Construction Company.

Boost Baltimore! And while you are boosting Baltimore, boost the Best and Only Railroad that has trains going east and west out of the Nation's capital.

"Count" Spike thought he would like to break into society toter day, so he came to work all dressed up in a "yaller" shirt. To cap the climax, he sported a green tie, and he a dutchman.

There was a heated argument between him and one "Mike" Riley, but 'nough said.

Miss George seems to be happy these days—we wonder why.

Once again the bowling league has commenced activities, and from appearances this year should be a banner season. An innovation has been introduced, that being that instead of two divisions in the league, all the teams will be together under one heading, so that each team will have twice as many teams to play as heretofore. So far our team is leading the league. Go to it, fellows!

It is my pleasure to announce that one of my schoolmates and co-workers, A. W. Schell, assistant secretary to Chief Engineer H. A. Lane, was married on Thursday, October 19, to Miss Jane Parsons. The department showed its friendship by giving the couple a set of Stieff, rose pattern, table silver. Congratulations and good luck, "Gus!"

We are pleased to record the advent into this world on September 25 of "Tad" Pohl, eldest and only son of Walter Pohl, the genial "Keeper of the Royal Records" in the office of Office Engineer J. H. Milburn. The proud pater was recently heard singing "Of all my wife's relations, I love myself the best."

Conrad G. Schanze spent several days of his vacation in the wilds of West Virginia.

While viewing the beautiful silverware which the department presented to Mr. and Mrs. "Gus" Schell, a certain young lady was heard to remark, "I have some silverware like that at home. All I need now is the man."

At the Food Show recently held at Richmond Market Armory it was advertised that a prize would be presented the "prettiest" boy. We're not mentioning any names, but we wonder if a certain young man tried his luck.

In a tennis tournament promoted by the American Legion, one of our tennis enthusiasts, G. H. Dayette, won a prize, a beautiful little silver cup. Even though he was defeated in his first attempt in the main event, he went up against as stiff an opposition in the consolations and won out, for which he was rewarded. You are to be congratulated, G. H.

R. S. Hunter, chief bridge inspector, is more than a "captain" now. He is the proud father of a baby boy, born on Saturday, September 30. He'll do something else beside walking girders, spans, etc., now.

Maxmilian M. McCracken toured the golden West during his vacation. Suffice it to say he returned home safely. Some luck, I'll say.

It is with much sorrow that we chronicle the death of Master Robert Milton Kemp, only son of Mr. and Mrs. J. M. Kemp, aged fourteen months. Our deepest sympathies are with you, "Joe," in this, your latest bereavement.

#### Office of District Engineer, Baltimore, Md.

Correspondent, J. FORD COLLISON

On September 23 Mr. and Mrs. Herman C. Harrison were presented with a bouncing baby girl, weighing eight pounds, who was given the name of "Jane Milburn."

What we can't quite figure out is what makes Oliver L. McCabe, field engineer, Mt. Royal Station, a Jew. However, we note that on September 23, the Jewish New Year's day, "Mac" received the greetings generally extended at this time. We are inclined to think that "McCabe" isn't Oliver Leander's correct name, but that it's "Macavitch" or something of the sort. How 'bout it, "Mac?"

Our Philadelphia office announced the arrival of Colonel Robert Nelson Frye, Cost Engineer's Office, on August 30, and the departure of his royal "nibs" on September 23. Judging from his smiles and laughter he surely enjoyed his visit to our office, but what seems to have made an impression there was the conversation that transpired between him and our Arthur Alexander Boettger. As you possibly know, the Colonel was analyzing the accounts of

the South Philadelphia Track Elevation. If one had only taken notes of their conversations! Well, for comedy they would have backed the famous Charles Chaplin off the map. But what made the greatest impression upon us were the two familiar phrases: that of Frye, "Now come here, Arthur, let me show you." and that of Arthur's, "Hy see" (I see).

Since our last write-up in the MAGAZINE, our "Handsome Harry" Rankin has located himself some amusement in the shape of the opposite sex. Now he is all smiles every day, although we understand that he, too, has fallen for religion along with Jones, Little and Wich, and is now rehearsing the little saying, "The Lord loveth a cheerful giver," although I can't say he is very cheerful about it.

### Office of General Freight Claim Agent

Correspondent, GEORGE DOBBIN

Happy Thanksgiving, folks! There are a million and one different ways in which to express various pretty wishes but I wish for each and every one of you just what you would wish for yourselves.

With the time at hand when the Christmas Clubs will soon be sending out the checks that mark the habit of thrift among us, there are bound to be a few boys and girls here and there who are merely wishing that they had started a saving fund. The opportunity was presented and removed by Father Time—and that is the way with everything in life—the door opens and those who have made themselves ready, enter upon better times, larger careers and higher responsibilities with a like increase in wage and the resultant comforts.

You and I cannot stand still; if we do, Time causes a deterioration of our faculties and ability. The world is full of "wishers" and they, too, have opportunities, but the lack of preparation robs them of the necessary self-confidence and courage to grasp them. Doomed because they are unwilling to pay the price of success, many of them go through the motions of living and grumble—just grumble and hope.

As the Christmas festivities are synonymous with the birth of the Hope of the World, so should they be full of meaning to all who are willing to be honestly introspective. It isn't the fault of anybody in particular that someone else fails to succeed. Given ordinary intelligence and following the example of successful folk, anyone can reach his goal if he be willing to pay the price. If you should have to hire yourself tomorrow, what would you pay yourself? What are you doing to be worth more? What about old age?

Mr. Olson is now looking forward to another such a good time as was had on the night when the 313th Infantry held its Reunion. The Governor of Maryland, bunches of notable people, friends and fellow employees, also various other things (er—ahem), were there to make a sociable evening.

"Daddy" Loane is again looking forward to the usual flock of gifts from his relatives and friends, trusting that there will not be over six pair of bed-room slippers in the "remembrances."

"Pop" Taylor and "Pop" Zenter are among the Vets who will doubtless smoke a contented pipe and do a bit of retrospect. Yep, time sure docs fly and the things it brings and the changes it makes—are they not for the best, after all?

With Brothers West, Parrish and Askew to uphold the reputation of the office for hard work and intelligent effort, there is no need for worry—Parrish studying hard in the maze of engineering mathematics, West observing conditions and awaiting developments, Askew ditto.

The girls of the office should invite the boys to a general social gathering just to see if they are as slow and dull as they have been said to be. Many a Dr. Jekyll and Mr. Hyde in our midst! They may not be much in a crowd, but when you get 'em alone—oh, boy!

There are enough sources to produce excellent Christmas Spirits (with or without the labels) and Santa Claus surely will not fail to remember the truly deserving. How about it, Fellers? Here's how!

#### Farewell!

It has been a great privilege to act in the capacity of correspondent even though there were times when the toes of some overly sensitive folks were stepped on. I sincerely hope you all enjoyed reading my notes half as well as I've enjoyed writing them.

My most sincere thanks to Mr. Glessner, Mr. Schepler, Mr. Heartt and other gentlemen who made my two year period of service with the Baltimore and Ohio pleasant and instructive.

Just "farewell" to all my friends, for I expect to drop in once a year at least. A word of thanks to the Editor for refraining from the use of the editorial "blue pencil—" and the best of everything to you all, because, quite a while before this is printed I will have gone to a position in the South where the weather suits my clothes.

NOTE: To know George Dobbin was a real privilege, as many of his office intimates realize even better than I do. It was a great pleasure to work with him because he took so much interest in his work, thus practicing the spirit of the little preachments he usually contributed with his personal notes. And that his practice has not been in vain is shown by his step upward in the business world, where his initiative and personality will count more for him, and where all his friends will wish him the unbounded success he deserves.—*The Editor.*

Virginia Kennerly, Mail and Express Traffic  
Department

### Mail and Express Traffic Department

Correspondent, T. E. REESE

A. H. Barton claims there is more than one way to practice economy, *i. e.*, get married while on your vacation. Upon the arrival of the honeymooners at Lothair, Ky., they were greeted by five distinct pistol shots and were naturally pleased with the recognition, but lo! Imagine their disappointment when informed later that the firing represented the shooting of "only five miners." Congratulations, Mr. & Mrs. Barton; may you ever be happy!

On his vacation "Buddy" Dill built his dog, Rover, a pretty dog-hut, the roof being constructed of "tongue-in-groove" material; then covered with one of the mail wagon curtains. I mean with the same kind of canvas. Some dog!

Mabel Cross says there are two ways of testing your voice, one for vocal, and the other calling for help. In crying out the latter when the canoe turned turtle in midstream, while on "my vacation," she was successful, and is here to tell the story. Besides, she doesn't fancy flowers when she can't see them.

Virginia Kennerly went home to Salisbury to spend her vacation in the country. Do you see her picture? It was taken while she was "down home." Please note the dimple.

Our little Hilda went to Braddock Heights on her vacation for a rest. She danced every night with the exception of two (and they were Sundays) and came back to work full of "arnbish" for sleep.

### Printing Department

Correspondents

H. R. FOGLE and HARRY TOFT

A bowling team has been formed to represent this department, and this team has been admitted to the Tuesday Evening section of the Frederick Road Park League. On October 3 we defeated the "Unknowns" in three games, and on October 10 we dropped three to the Dickey Mills, giving us a percentage of 500. Wood, Smith, Buckl, Toft and Lowe are the members of the team, with Handley, Pursley, Fogle and Sherman as alternates. We would appreciate some rooting on the part of some of the other boys. Games are rolled every Tuesday evening at Frederick Road Park.

Recent additions to our force of compositors include Edward E. Broussard and William F. Grund.

Compositor Purcell has laid aside his stick and gauge to take up a new field of work. The boys all wish him success.

Boys, keep away from the Criminal Courts for the next few weeks! Our genial and ever smiling Bowers is doing jury duty with a vengeance.

Mrs. Mary McNeir, our fair keyboard operator, spent several days enjoying the breezes at Atlantic City. Foreman Frey took a much needed vacation, too, and we missed his shining face and melodious voice. We had a stormy week of it, because of a tariff rush, out of which we were ably guided by our old friend, "Charlie" Lehman. When it was all over, our foreman came back, and we were glad to see him.

Keep Cars Moving

**Relief Department**

Correspondent, H. IRVING MARTIN

T. Parkin Scott, chief clerk of the Savings Feature, is back from Atlantic City, bright and smiling. He and Mrs. T. P. spent a week recuperating and looking 'em over. From the sections of film which reached us by the postal card route we suspect that T. Parkin sat in on the board of censors of the Mack Sennett Corporation. The "plural" pain "has went," and he is now toned up and tuned up for another tackle with the hedge shears he uses to keep his home on "Scott Heights" looking like a thing of beauty and a joy forever.

The Relief Department has organized a bowling team and has entered the Baltimore and Ohio League. The team consists of Wm. M. Kennedy, T. Parkin Scott, J. L. Brooks, F. Owens, H. C. Shakespeare, H. G. Shakespeare, G. M. Mittendorf, Frank Gossman, E. Plowman and Mascot H. B. Tall. C. L. Smith is to captain the team, assisted by H. C. Shakespeare. The games are to be played every Thursday at 8.30 p. m. at the Regent New alleys, Eutaw Street, near Mulberry. As the weight of the team suggests wonderful material for a tug-of-war tournament, we hope that they will be equally capable in bowling. If so, our hopes will surely be realized.

Captain John Leo Brooks of the baseball team has taken a well-earned rest at the Hotel Pennsylvania. With a new crew he steered his craft into port a few times, and just missed it on some others. John deserves much credit for his handling of the team. Look out for him next season!

Ernest Bucheimer, the departmental notary, made "A study in Scarlet" and incidentally learned something about quarantine regulations. It wasn't painting the town over that knocked him cold, but an old-fashioned attack of scarlet fever. He is O. K. now and everybody is happy.

Miss Anita Berrett has returned after her initiation into the "Appendicitis Club." Seems to have swopped an appendix for a large bright smile, 99-44/100 % proof. When the "Who's Who" of sartorial art is written, Miss B. will sure be in the first division of those fashionably but neatly dressed.

Mrs. Olivia Betton aspires to become the champion preserver of the department. What she puts up others put down-to make life more healthy and enjoyable. At her home they "eat what they can and can what they can't."

What's all this we are told about Guy Riggs as an impersonator? When he hits the hay the opossum looks to his laurels.

J. Morris Desverreaux was surprised to learn on visiting Washington for the first time that Mt. Vernon was the home of the late lamented George and not a drink. Father of his Country? That's all!

Who's this in our midst waving an operator's license, after just promising not to giggle in a traffic jam and thus spill the beans and bones of the flivver? Why, it is that secretarial lady from the Charles Street end! She just couldn't stand seeing them go by and not own one.

She can answer questions from the traffic cop just like she did the one asked by the gentleman from Snow Hill. Going to make the life of the last-named brighter for him always? We'll see. If 'tis so, here's our congratulations to him.

Crawford and Repp flivvered to Taneytown to attend the State Fair. It is rumored

that most of their time was spent in the chicken section. Going to adopt some poultry?

Solomon in all his glory? No, a new pattern of shirt introduced to us by the Beau Brummel of the department (one of the "your move next" kind). Albert, please tell us where you get them.

"Willie" Dixon gets a New Year's card. What's the idea, "Bill?" Going to take a night course in Hebrew?

Speaking of night courses. We hear that our former pal, "Willie" Schuppner, has enrolled in the University of Maryland School of Commerce. Good boy! Many of the Relief Department stars have put an additional luminosity by the aid of the wisdom derived from nights of toil over books, after hard days of labor at the desk; f'rinstance, our well-rounded "Brer" Ball, assistant to the superintendent, who not only knows the workings of the Relief Department, but a half hundred subjects besides.

We have "Reggie" Forgan, John Dorr and Frank Brady, still digging away. There are plenty of others whose reasoning powers would be helped. It's up to you, boys, to get started.

You'll never regret it if you do!  
Who's complaining about the postal service from Highlandtown? Tell us your troubles, "Mac." Perhaps we can help you locate "the letter that never came."

Then there is that good scout and efficient worker, Roy Knauff, who is back at his desk after being laid out by the heels for several weeks. More power and good health to you, Roy.

Miss Marie E. U. Siegrist has been appointed stenographer to our worthy Mr. Griest, in charge of fire insurance records. If a pleasant smile is an asset, the little lady,

formerly with Bailey Brothers, Inc., is indeed wealthy.

Miss Agnes E. Jeffries succeeds William Gable as secretary to the chief registrar. She just puts in the paper and out come, letters, letters, letters, letters, and good ones.

J. H. Johnson, who succeeds Miss Jeffries as stenographer to the correspondence clerk, is another recent addition to our force. Well qualified, he comes to us from the banking house of Robert Garrett and Sons.

In all of this talk about primaries and senatorial candidates, why is it we haven't heard any mention of "Sam" Householder—our veteran Baltimore County politician? "Sam" tells some mighty interesting campaign stories.

Little Vernon Miles—  
His face was wreathed in smiles,  
And oft we asked ourselves the reasons why;  
E'en though he fell in love  
With a little turtle dove,  
'Twas no cause for him at eve to pass us by.

But Vernie kept so quiet—  
'Twas strange, we'll not deny it—  
Until one day he gently dropped the hint.  
Oh, how that news did travel!  
And the secret did unravel—  
He wouldn't trade his dove now for a mint.

You've guessed it—he was married—  
Since May this news he's carried,  
And now our curiosity's suspended.  
We wish the pair success—  
A life of happiness,  
And may the broomstick ne'er come in e'er  
it is ended. —Savings Feature Poet.

#### STARS OF THE TARIFF BUREAU

Left: Mr. and Mrs. Ross B. Hagar. Right: M. I. Zimmerman and W. N. Orem, better known as "Jim" and "Oats," who never lose their appetite

#### Tariff Bureau

##### Correspondents

F. W. RUPPERT and CASPER A. WAGNER

Chief of Tariff Bureau W. H. Fogle spent the week of October 9 in Chicago at a meeting of Staff Officers.

Chief Clerk W. B. Hanson enjoyed the weeks of October 2 and 9 as his vacation.

L. L. Bausel has been placed in charge of second floor Tariff Bureau. Here's luck to you, "Bozy!"

Frank J. Casey was in New York during the week of October 9 checking the East-bound Passes and Billings Instructions.

E. A. Lenz, of our office, and Mr. Harry Handley, Western Maryland Tariff Bureau, are checking rates on Lumber and Forest Products from Connellsville and Johnstown, Pa., Cumberland, Md., etc., to Central Freight Association Territory.

It's a bad case, boys. Start saving your pennies, for Clara and Lem get more serious every day. Ask Oats and Zim. They both know.

In our art gallery we present Mr. and Mrs. Ross B. Hager, the newlyweds, spending a day's outing. Mr. Hager is secretary to Chief of Tariff Bureau W. H. Fogle. Mrs. Hager, before her marriage, was Miss Esther Mitchell. A strange coincidence is that she was also secretary to the chief of Tariff Bureau, Western Maryland Railway.

#### Valuation Department

Correspondent, J. A. RENEHAN

Walter H. Edwards, pilot engineer and office heavyweight, having had his rent increased for overloading the floor of his apartment recently, purchased a book entitled "How To Become Thin." Instead of the usual line of "hot air," we have "Believe me, it's fine! I've lost 13 pounds in the last two weeks." Like the Herpicide ads, it is going, going, but what will he be like when it is gone? Will he have more room for his "air bag" or will the skin shrink? Beaumont, Coles, et al, take heed. This book also teaches how to become

stout (gets you coming and going). A word to the wise, "Doggie," is sufficient.

We understand that the monkeys lost earlier this year by one of the "lights" of this department were replaced on a recent trip west.

It is understood that one of our office friends will soon take "The Gump" place and give the "Oh Min" call, but declines to become a candidate for Congress as he prefers to be just an engineer.

Our friend Kriechbaum may be a good bowler, but you should see how prettily he drops contributions when seated at the round table!

"Skip" Greiner belies his name nowadays—he is keeping his ears cocked so as to miss nothing. No doubt those ears cause him sleepless nights.

All those desiring "Christmas Cheer" for the holidays, please place your orders with Miss Fossett. Deliveries will be made in November. Miss Fossett expected to visit Bermuda the latter part of October.

Mr. Dick, having attended the wedding reception of J. F. Rau on Monday, September 18, increased his weight some three pounds. We wonder if because of his appetite or his thirst. We understand there was no water to be had. And now he is under the instruction of Professor Edwards, trying to get thin.

Just a little friendly advice to the love-lorn: Be sure you know the girl before striking her over the head:

All together!

You've seen red sweaters  
And things like that,  
But you ought to see "Rennie"  
In his slick brown hat!

Judging from the appearance of his face when he returned from his vacation, we would say that some kind of prohibition agent gave our Brewer a couple of good punches—the kind you get with a fist.

Again, we have Victor Krueger returning from the West Virginia hills with a bad scar over his left eye. If he went to see his girl she surely treated him rough. We'll have a heart, however, and say it was caused by his friend, Moonshine. One thing is certain—he was not Victor in the encounter.

After work, Mr. Wilbur patiently lead him around, then, tired and weary, suggested that they go to the Hippodrome. The answer came "No indeed, they might put me to work." He wanted to go to bed at 7.00 p. m. He did go at 9.00 p. m. How some people waste golden opportunities!

### Office of Assistant Comptroller Deverell

Correspondents, JOHN A. RUPP AND CASPER A. WAGNER

George R. Hutchinson, chief clerk to Assistant Comptroller Deverell, appears in the accompanying photograph. The snapshot was made recently while George was on an ocean trip from Philadelphia to Boston. We gather from the pose that George must have just signed the contract for the purchase of the steamer on which the picture was taken.

### Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

Why go to Mexico to see the Bull fights? A personally conducted tour by "Al" Moore will furnish all the thrills of that ancient Mexican sport at a small cost. All you got to do is walk over a couple of mountains in West Virginia, and try to recapture one of those brutes after it has broken out of its crate. Ask "Al," he's got a good line.

Some people say it's bad luck to fall off a ladder on Friday. Miss Ebaugh says it's bad luck to fall off a ladder any day.

Talk about hard luck! Imagine a guy saving a couple of days of his vacation to attend the little world's series, and then being picked for jury duty. Yea, bo, it's a tough old world.

The 1922-1923 season of the office bowling league opened September 15. Four teams are in the field this year and seem evenly matched. From early indications a better grade of bowling will be in evidence and some nifty scores recorded.

Lutz was high man for the opening night with 303 for three games while Ed Link got 118 in one game.

The night of September 22 saw "Silent" Poole come within two pins of equaling the league record for a single game when he toppled 140 sticks in the third game of the evening. Royal Blues created a new league record with a count of 504 for one game.

Three new league records were established the night of September 29. Pritchard rolled 144 for one and 346 for three games. Royal Blues set a new mark for three games by rolling 1440.

By taking three games from the Pullmen, Royal Blues went into first place on the night of October 6.

Standing of teams to date follows:

	WON	LOST	PER CENT.
Royal Blues.....	8	4	667
Pullmen.....	7	5	583
Bumpers.....	5	7	417
Head Lights.....	4	8	333

## Auditor Freight Claims

Correspondent, NELLIE F. COLLISON

Mr. "Billy" Kavanaugh, a well known stage director of amateur plays, is rehearsing our office talent for the elaborate Musical Revue to be presented by our Welfare Association, November 24, 1922.

There will be many surprises for all of us relative to the number of talented artists right in our midst. Sitting beside us daily are men and women with Caruso and Tetrizzini like voices; those who interpret Mendelssohn, Beethoven, Wagner and their peers in a Rachmaninoff style; others in a class with Elman, Theda Bara, Marlowe and Sothern and all of our favorites. Our jazzy Jazz Orchestra is inimitable. "Bob" Lula and his musicians will guide our waltzing steps.

The Committee in charge of affairs and all the talent look forward with keen pleasure to the evenings specified for rehearsals. They are having a wonderful time, and a difference in the upward carriage of the head is a noticeable characteristic of some of our most famous. Watch individuals travelling up and down the aisle and you'll be able to pick a few of our choicest plums. As usual, romance is stalking about, and we have no doubt but that our second attempt at a Get-Together will produce, not only shining stars, but eventually scintillating diamonds.

While none of us means to be lacking in appreciation, yet we rarely have the opportunity to take time to appreciate the wonderful conditions under which we live. The trouble in the Far East calls forth an appreciation of the blessings which we are enjoying. There is no flag that floats on high affording such protection to its people as "Old Glory tried and true." Our hearts go out in sympathy for the innocent sufferers of the Turkish massacre, and we are sure that, as far as possible, each one of us desires to do his utmost to help alleviate a condition that should not exist, and the spirit that promotes this Welfare Association among us makes us keener to notice the necessity of such a spirit among the people of the nations of the earth.

A BIG word of praise for the members of our Baseball League, and right here we wish to add that we cannot too lustily lift our voices in cheering strains in appreciation of the success of Manager Doxen and Captain Vinci. During the entire season they showed a dauntless spirit equal to that of "Fighting Bob" Evans in their efforts to inspire good faith in their men. It was well worth the fight, and the end of the season found them, in spite of many obstacles that had to be overcome, tied for the place of honor with the Auditor of Disbursements team. An extra game determined the superiority of our team. After a hard fought struggle we emerged victors, the resulting score being 6 to 4 in favor of the Auditor Freight Claims Department's Team. We have a certain kind of sympathy for the Auditor of Disbursements' people, but we bubble over with pride whenever we look at the beautiful silver loving cup donated our team by Wilson & Co., of Chicago.

Cupid, for the second time within a short period, dropped his arrow upon our chief clerk's desk, and on October 14 Miss May Knight was joined in wedlock to Howard Huxter. Our good wishes go with you, May, all the way along life's journey.

There is a legend implying that good things usually happen in threes, and it is rumored throughout our division that Cupid's third dart will heal the heart of the

George R. Hutchinson, chief clerk in Office of Assistant Comptroller Deverell

male occupant of this desk. From this and other information we have concerning some of our fair lads and lassies, it behooves each of us to see that we keep a supply of quarters on hand.

On Tuesday evening, October 10, Miss Knight entertained our girls at her home. Many bright ideas were brought away after an inspection of her "hope chest," such an article in this department never having proved hopeless. Pardon! Allow us the privilege of our woman's right to change our minds: we should have said, with one exception, and one "Bee" can explain away our error.

Leave it up to the Baltimore and Ohio girls to establish worthwhile fads. Our Lillian came along with a handsome finger ring, a gift from Paul, which recently was followed by an exquisite diamond worn on her left hand. Paul has aspirations on headliners, and after reading an account of his courtship in a recent issue of our MAGAZINE, had our attention called to the fact that he would have something better for us later. It's a big secret, but we believe he placed the diamond on Lillian's finger to help the MAGAZINE.

But more about the fad. One——is particularly happy in the possession of a beautiful amethyst ring, and close observation indicates that the Kimberly Mines will have to give up another diamond. Ain't love grand?

We know, ——, your reason for refusing us so flatly when we approached you relative to the purchase of some Red Cross stamps. You were making opportunities to play well an old game when you should meet The new girl. You are excused, but don't renig again: the lassie is so happy——curls her eyelashes on an electric iron and is continually living over again that wonderful ride from Washington to Baltimore.

"Dapper Dan" and "Teddy" were guests at a house party given by Miss Dorothy O'Connell at the O'Connell summer home on the Severn on September 23. Crabbing, swimming and dancing were some of the pleasures indulged in. "Danny" caught an eel and "Teddy" and Dorothy performed the culinary rights. There never was such an eel!

Mr. Barker is going to Philadelphia with his sweetie after all the warning that has been given him. Let us hope, to prevent any embarrassment and delay, he'll carry both family histories along with him.

Adieu, Marie. We understand "Pinkey" is out of the game since one "Bill" T. has added to his possessions twenty-one jolly years. That must have been a wonderful birthday party—an all day celebration.

Since Marie has shown a preference elsewhere, one C. H. prattles all day about his "Lizzie."

Haven't you all noticed how dexterous "Joe's" movements are these days? The secret is this: he is expecting to make up with "Blondine" at Tuttle's some Saturday evening.

One R. L. D. was almost married last week. He asked a "Bag of bones and a hank of hair" if she was willing. If she had been, it would all be over now.

There is quite a heated controversy between J. F. M. and C. H. As always the subject pertains to the Eternal Feminine (which is proof that Knighthood is still in Flower); and if the individuals concerned could know how valiantly their gallants fought the "Word Battle" for them, they would feel like Elaine of old.

Our Francis has again journeyed from the straight and narrow way. It was a fishing trip this time. With his line and tackle he was believed to be a winner, but his catch was another toad.

L. P. has a grass skirt to be worn in an exhibition Hula Hula dance. She has promised to give a demonstration at one of our Wednesday or Friday rehearsals, and request has been made to bulletin the event.

Our Mr. G. W. R. disappointed us on Columbus Day. We had expected him to illuminate the office with his red necktie.

W. C. H. did not seem to appreciate the pennant received in the mail some few days ago. But we believe that all glory and honor belong to the "Early bird who catches the worm," and vote the pennant as significant of his success.

Our weather prophet, Mr. Gainor, has a latest avocation. He is now deep in explanation of the fine details of our fire alarm system.

W. J. C. is indulging in the manufacture of puns during his spare moments. When approached for some MAGAZINE news, he came back with amazing rapidity with, "What was it Maggie seen?"

Speak a little louder, please, we're very hard of hearing. But persuasive tones mean nothing to our R. P. G., and we don't venture far because we noticed on an occasion a House Peters' trick he showed his fangs.

After promotion to the Milling in Transit department, D. O'C. has disposed of her slippers, finding the exercise of her gray matter more important just now than the use of her valet pumps.

Several hard-working individuals of this department have been worn nearly to a frazzle, being annoyed by musical (?) strains coming from one S. M. The occasion of so much humming must be an effort to impress the Entertainment Committee and thereby gain their indulgence to the extent of a solo selection for the evening of

November 24. We know such an untiring Committee as the one in question will not fail to locate the genuinely talented in each instance without any special efforts on the part of aspiring stars.

Little Jean, niece of "Aunty Bee," is an infant prodigy. During the short career of her less than four years, she has been to school but one week, and is now able to count up to ten in French. Aunty Bee is so impressed with the unusual intelligence of this little niece, that she has persuaded herself that the mastery of ten French words is equal to a recitation of the Koran.

On October 5, the second game of the Junior League, St. Paul vs. Orioles, was played, resulting in a defeat for the Orioles. Take heed to our philosophy, E. V. S.; a real sport is usually a good loser.

Much credit is due Miss Mildred Dopman as the force behind the young ladies of our department in inciting their interest in connection with our Evening of Festivities, November 24.

Our "Jimmy" Cole is suffering an indisposition—was ordered to bed quite suddenly by his physician. A little rest is advantageous to most of us occasionally, and we trust that our comrade will have no serious trouble to combat, but that he will gain much by a few days of real rest.

Two new names have been added to our Cradle Roll: Florence Agnes, infant daughter of Mr. and Mrs. Richard Y. Rebbert. Mr. Rebbert is of this department, and Mrs. Rebbert was formerly Miss Anna Kaltenback of this department. The other is Rita Aileen, infant daughter of George R. and Mildred Apple. Mr. Apple is of this department.

Being the good citizens that we are and wishing to exercise our privileges for the betterment of our City and State, we have all duly registered and are now prepared to cast our ballot on November 7, for the "School Loan," a "One Branch City Council," but not for "Fewer Elections." In the matter of candidates, our vote is cast as a unit in favor of Andy Gump, the one hundred percent, people's candidate, who wears "No man's collar." And now that the wonderful, ripe, golden, autumn days are here, and since we cannot be wanderlusts in the open fields, enjoying the air and sunshine, why not avail ourselves of the next best possible substitute, by purifying our office with nature's antiseptic and warming it with God's own sunshine? How can we expect to look like real men and women if we do not luxuriate in the abundance of nature's tonics for health and happiness?

### Auditor Passenger Receipts

Correspondent, E. B. Hoppman

The following is a copy of an editorial from the Baltimore *Evening Sun* of March 16, 1922, and was given me by Head Clerk W. T. Jenkins of our office, for publication. Mr. Jenkins thinks this is a great lesson and I agree with him and am only too glad to be able to give my fellow clerks the benefit of this splendid article; for if only a few realize and take the meaning of the lesson therein and are benefited by it, it will have well served its purpose.

#### Preparation

"Modern theology has much in common with the philosophy of the ancients whom we elect to call pagans. Christianity itself is a philosophy no more difficult to understand than the philosophy of Socrates.

"Failure properly to understand and appreciate Christianity is in large measure the result of man's inability to distinguish between time and eternity. God does not think in terms of human life, but in terms of souls.

"If man's threescore and ten years marked his end, divine compassion should set itself the task of making these few years pleasant. There should be no trials or sorrow; neither heat nor cold; neither poverty nor the need of earning one's bread. But since the span of human life is but a moment in the working out of the divine plan, of what importance are the trivial events that occasion us concern?

"To the man who has no goal, the comfort of the present moment is a matter of chief concern. But if he is striving to get somewhere, the annoyances that beset him on the way are accepted with philosophic calm.

"If this brief life marked the end, unpleasant experiences would bring us no profit. But it is no more possible to develop character without trials than it is possible to develop a hardy plant in a hothouse. Every hard experience pays a dividend, and he is not a whole man who has no acquaintance with sorrow and defeat.

"If one is to be crowned king tomorrow, of what importance is the snub he received to-day? If the building of character is the task of great importance, why lose sleep because of your inability to build a fortune as well? Character is legal tender on the other side of the Styx, and there is no other."

### New York Lines

Pier 22, North River, N. Y.

Correspondent, JOHN NEWMAN

Feast your eyes on the picture on page 50. Did anyone of you ever see anything more "too utterly too-too-" (words fail). "Tom" Bradley's quadruplets, a Montclair, lucky, fourleaf clover, all girls, all named Elizabeth, in fact *all one*. Sweet enough to eat! ("Tom" says she does eat.) Girl babies, when grown up, eat a lot; ask the "Charlies" who pick up the supper checks and shell out the coin with an air that seems to say "there is plenty more where this came from," while mentally

Conductor Ewing and Engineman Sherk comparing time before starting on their scheduled run of 109 miles, in two hours and sixteen minutes, on the "Pennsylvania Limited," one of the fast trains of the Pennsylvania Railroad.

## You may never run the Pennsylvania Limited—but you can own a Hamilton Watch

**A**ND every Railroad Man who owns a Hamilton is equipped to time the Pennsylvania Limited or any other closely scheduled train. The Hamilton is the watch that Railroad Men instinctively turn to. It is sturdy, dependable, and so consistent in accurate performance that it can always be counted upon to tell the truth when consulted.

Conductor L. F. Ewing and Engineman H. J. Sherk, of the Pennsylvania Limited, here shown, carry Hamiltons. They've been carrying them for a number of years. Both report their watches as being highly reliable and satisfactory.

Of course they do! Therein lies the value of the Hamilton Watch to all Railroad Men. Almost any watch may tell accurate time for a while, but the Hamilton does it day after day and year after year.

Ask your jeweler to show you the Hamilton No. 992—the 21 jewel "Railroad Timekeeper of America." The new and lower price of this model is \$48.50 for the movement alone. You'll find it a timepiece that will eliminate doubt and give you a real sense of time security.

We will be glad to send you our booklet "The Timekeeper." It contains valuable watch information and illustrates and describes the different Hamilton Watches.

HAMILTON WATCH COMPANY, Lancaster, Penna., U. S. A.

# Hamilton Watch

"The Railroad Timekeeper of America"

debating the question "to eat or not to eat," as applied to themselves and the morrow.

The following comes to us from St. George in a S. I. R. T. envelope, and though addressed to one "Loyal" will interest both benedicts and bachelors of all denominations:

"My dear Loyal:

"I got that note of yours, and I am beginning to think, myself, that *I have lost a lot* by remaining single. Remember the night that "Jim" invited us to his house and on account of a recent death in the family, we could not dance or play the victrola, so we just talked; that is to say, you and "Jim" talked, about your kids; and there was no lull in the conversation to give me an opening to introduce some subject whereof I knew something, to switch the gabble into a shallower channel, where I could feel bottom, to discuss the Four-Power-Pact, the Irish rebellion or the future of America in world politics, or some other light subject that I am familiar with. But you two gave me no chance; all your talk was about the kids; and most of the time you talked both together; and all I could gather was that yours kids were slower in getting their molars than "Jim's" kids, but that "Jim's" kids were able to gabble earlier than yours and "Jim" was able to put it all over on you repeating what his kids had said, as when once a kid can gabble he gabbles a lot. And now there is a fellow that works with me here who has a baby that said "Daddy" inside of a week. Keep out of his way or he will talk you to death. So I believe, myself, that I have lost a lot of gabble because I have remained single.

"Faithfully yours,

"L. J. L."

There is a note of mystery in the August issue relative to "Al" Fox and his activities. The mystery has now been cleared. We are pleased to announce the marriage of Mr. Fox and Miss Blanche Cornet on Saturday evening, September 16, in the Church of the Transfiguration in Brooklyn. Mr. and Mrs. Fox spent the first week of their honeymoon at Oneonta, N.Y. We wish the newlyweds a continuation of the honeymoon, to extend far into the future. It is not so difficult as one is apt to judge from reading the scandal reports of police—and divorce—court proceedings. If these proceedings were not relatively unusual and out of the regular order of things, they would not be reported. "Domestic relations" can be made not only agreeable but positively happy, if the contracting parties accept each the other with the mutual understanding that "there is so much good in the worst of us and so much bad in the best of us, that it hardly behooves any of us to talk about the rest of us."

The father who advised his son: "Don't get married until you have sense; when you have it, you won't," probably was a multi-divorcee without sense, either before or after marrying.

It is also no longer a secret that Miss Veronica Murdock, one of the many pretty and saucy (insouciant) up-to-date girls that decorate the Pier 22 Office, has become bonded to a party by the name of Frew. This much we have been able to learn from the time-slips that "Mrs. Frew-nee Murdock" is turning into the timekeeper. Besides that meagre fact we are unable to learn anything. But, even so, we wish her happiness and beg to refer her to the homily in the preceding paragraph.

The correspondent wishes that all those who are interested in reading the MAGAZINE would take some interest in supplying reading matter for this department, by passing some brief notes to him. He will dress them up, if necessary, so that their own parents won't know them.

#### Brief Notes:

Frank Santagata is pricing grapes, the purple variety, by the cwt.—Why? Let's all guess!

"Charlie" Marcus looks *distingue* since adopting the fashionable monstrosities, shell-rimmed spectacles; without them he looks human.

"Speck" is working. He has to, now, since he achieved the I. C. C. classification "C. S. C.-II," with his new job.

John Reardon declines the honor of having his picture presented to the MAGAZINE readers. We can't conceive the reason. (We are going to have ours in every MAGAZINE hereafter. That's us!)

Why does "Max" remind one of the "Steeple-Chase?" Ask Miss—no, we won't tell.

Miss Elinor McDermott has returned from her "trip abroad," otherwise Ireland. All the good advice that we gave her when she embarked was lost, because not needed. She was "not a bit sick, going or coming." That's what they all say. We were not a bit sick, either, on our first sea voyage—not a bit. A pleasant memory that, our first trip in rough water, Oh Goodness! Ha! ha! Miss Elinor has gained—if taking on weight is considered a gain (we don't know what the style is at present and remember having blundered on this matter some time ago) seven pounds, she says, (looks like seventeen), and this in spite of the terrors she was subjected to; storm at sea, bombs in Tralee, etcetera. Welcome back to these United States, where the dove

of peace lays its eggs, undisturbed by Bolshevik or Sinn Feiner, even on the scruff of "Billy" Bryan's neck!

### St. George, S. I., New York

Correspondent, G. J. GOOLIC

Miss Freda Stabber, clerk, Arlington Coal Pier Office and Albert Roming, Yardmaster at Arlington are in our art gallery this month. "Al," as he is known, has just arrived from abroad after being away for a few months. When he returned, rumor went around about his engagement to Miss Stabber. "Al" worked fast after his trip, for he is going to be married shortly. We all wish them both the best of luck.

We have also a picture of Arlington Coal Dumper. This is the only coal machine working on Staten Island and it is some dumper.

Another picture will introduce J. V. Ryan, claim agent, and W. R. Taylor, chief clerk to superintendent.

#### "A Fatal Duel"

A duel was lately fought in Arizona by Alexander Shott and John Nott. Nott was shot and Shott was not. In this case it is better to be Shott than Nott. There was a rumor that Nott was not shot and Shott avows that he shot Nott which proves either that the shot shot at Nott was not shot or that Nott was shot notwithstanding. Circumstantial evidence is not always good. It may be made to appear on trial that the shot Shott shot, shot Nott only as an accident. It may be possible that the shot Shott shot, shot Shott himself, when the whole affair would resolve itself into its original elements and Nott would be shot and Shott would be not. We think however, that the shot Shott shot, shot not Shott but Nott.

We take great pleasure in announcing the wedding of "Dan" Ryan, trainman, P. A. Division, Run "B," who is to be married early in November. "Dan" thinks it's time he "follered the crowd," so what can we do? All of "Dan's" followers will be invited to dinner which is to take place in "Riley's" lunch wagon, Tottenville, S. I. Everybody is requested to bring his own tools.

If Vincent Cody would have his brief case sent to and from school by express instead of carting it himself, it would help to relieve the congestion encountered on the trains.

Miss Anna Bloom, freight clerk, Clifton, spent her vacation in Odell, Illinois. We thought it was rather late for a vacation, but we got cards from her saying "it was some hot" out there, so we expect her back all tanned up. You know.

Tough luck for "Bob" Wilson. Some one stuck him with a brass watch (he thinking it was gold) and after a few days the brass began to show up and he tried to pass it on before it got worse. However, "Eddy" Mertz told him he had one—so there.

The accompanying picture is of the Schooner J. Edna Drake. This vessel docked recently at north side of Pier 4, St. George, for loading 15 cars of lumber for

FOUR EXPRESSIONS FROM ELIZABETH, QUEEN OF HER HOUSEHOLD

Left to right: "You want to take my picture, eh?" "Oh, well, now I think that's rather funny." "I'll have you know I'm a person of importance." "Positively there'll be no more interviews until tomorrow, so be kind enough to close the door from the outside."

**STURDY STATEN ISLANDERS**

Upper left: Yardmaster Albert Roming, Arlington, and Freda Staffer, clerk, Coal Pier Office (See notes.) Upper right: J. V. Ryan, and W. R. Taylor. Lower left: Schooner J. Edna Drake. Lower right: Arlington coal dumper

Lesslie Roberts & Co., Inc., dealers, exporters and importers in American hardwoods, whose office is at 29 Broadway. It is not the usual practice to dock vessels at our piers but arrangements were made covering this one and it was a satisfactory arrangement all around, both for the shippers and for the Railroad as the handling of cargo was greatly facilitated thereby.

**Baltimore Division**

Correspondent, W. H. TARR

A pleasant and interesting trip was had with Flagman B. Z. Huffman on No. 62 on Sunday morning, September 17. Mr. Huffman pointed out the places of interest between Baltimore and Philadelphia. He is well versed on the signals on the East End and he described the operation of each as we passed.

Assistant Road Foreman of Engines G. D. Coleman is back on his job on the East End after a few days in the hospital where he underwent an operation.

Train Dispatcher D. L. Healy has resumed duty after a period of sickness.

The annual demonstration of the Holy Name Society, which is held on the second Sunday of each October, took place at Washington, D. C., on October 8. Our division had special train service from all nearby points. Some 13,000 people were carried. This is the biggest movement of people the division has had at one time since troop movements during the war.

Another one of our office force has left for matrimony, Miss Lyndale Poyner on October 7. Miss Poyner was stenographer to the car distributor. Before leaving she was presented with a miscellaneous shower by her girl friends, the men in the office con-

tributing an enameled clothes hamper.

Now that the Christmas season is close at hand, we are beginning to rack our brains as to what we will give "Bill" or "Joe" or "Jenny." We feel that the following list might be helpful to some of our office force:

- Meyerly—A megaphone.
- Mallery—Some horses that run.
- Hughes—A drum or a rattle.
- Weis—A No. 9 Hat.
- Goodman—A ticket to Turkey (deep stuff).
- Miss S.—Some lunch.
- George—A good humor.
- Miss C.—A man.
- Ben Bell—A canteloupe (nee a good man).
- Higgs—Ell Hachett.

**XMAS GIFTS—Pay as U Please!**

The most remarkable credit offer ever made! Select any beautiful gift you wish—have it sent for your **FREE EXAMINATION**. Then if satisfied pay for it **ON YOUR OWN TERMS** pay as you please (within reason of course.) We stand alone in this astounding-ly liberal credit offer.

**O. F. Bate & Co.**  
ESTABLISHED 1868

21-23 Maiden Lane New York

Fox—A local train to stop at Montevideo.  
Schleisner—A trip pass to be made out for the next train.

We extend this list to the Office of the Division Accountant and suggest the following:

Cavalier—A pencil that will not make noise when rapping on wood.

Benick—Some fruit and candy to start a store.

F. L. Ralston has become a member of our office force, vice W. B. Weis, transferred to trainmaster's clerk.

The excellency of our service to New York was noted by your correspondent on a recent trip.

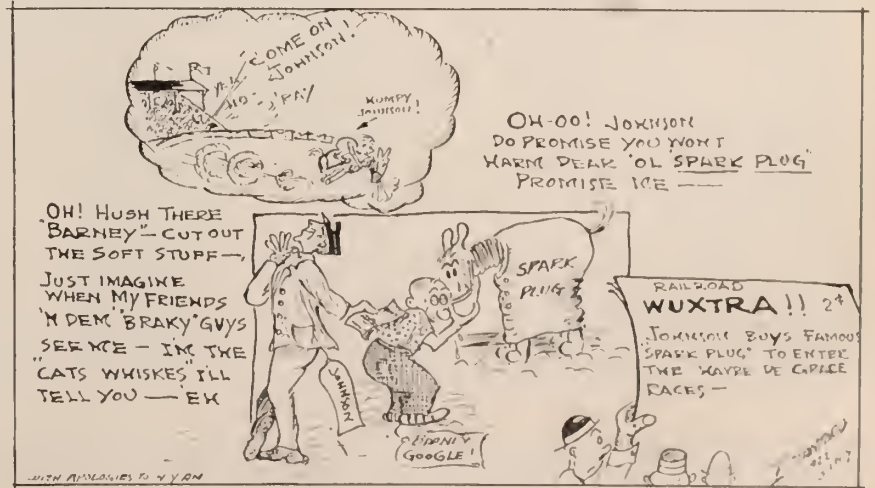

The following bowling teams have been organized for the season from the Division Accountant's force:

Team No. 1—Captain Richardson, German, Thiemeyer, Vernon Smith and Bowers.

Team No. 2—Captain Cox, Machin, Harten, Bobb and Phipps.

Team No. 3—Captain A. L. Smith, Hegler, Kepler, Roach and Preil.

Team No. 4—Captain Hamilton, Hinebaugh, Eichert, Swain and North.

Johnson's Spark Plug is "Plugged" by Santoro

Please mention our magazine when writing advertisers

G. H. Miller, flue welder at Mt. Clare, and his interesting family

E. L. McConkey, motive power time clerk, has returned to his desk in the Division Accountant's Office, having been located at Brunswick doing special work. His friends state that "Mack" lost ground while at Brunswick; if you're in doubt, inquire of Morris Phipps.

Miss Nellie Furley has become stenographer to the car distributor, vice Miss Poyner, resigned.

Brakeman E. E. Walters died on September 30, having been preceded in death by his wife. They left one child. Mr. Walters was born March 7, 1889 and entered the service January 25, 1911 as a fireman. Later he was transferred to position of brakeman.

Brakeman W. L. Newton was injured at 8.15 a. m., September 28, by falling off car while making coupling at Bay View. Amputation of limbs was necessary. His friends trust that he will pull through his ordeal. He is at the University Hospital, Baltimore.

The sympathy of friends in Division Accountant's Office is extended to Frank Held, motive power time clerk, who lost his mother at Philadelphia on October 3.

#### Washington, D. C. Freight Station

Correspondent, W. L. WHITING

A pleasant surprise was experienced recently by Freight Agent D. M. Fisher, when he and Mrs. Fisher were visited by Mr. and Mrs. Frank W. Fisher, of Columbus, Ohio. The latter gentleman is trainmaster of the Baltimore and Ohio at Columbus, and a cousin of our agent, whom he has not seen in many years. It is unnecessary to state that Mr. and Mrs. D. M. Fisher did the honors of this grand city to the fullest extent, and that the cousins from the Buckeye State were impressed with the hospitality that is one of the outstanding features of Washington, D. C.

There is little happening in Washington, D. C., just now except work, which is a plentiful commodity. The busy fall season is upon us in an unusually heavy manner. Business has more than resumed normal conditions and much of the rush is coming our way.

Our sick list is unfortunately not reduced; we hope to see all the ailing ones back before long. Miss Gladys Beall is reported as im-

proving and able to walk out in the air. Rate Clerk Ridgely is also improving, although his eye still causes him considerable trouble, making it dangerous for him to attempt to resume duties just yet. Melvin Phelps is able to sit out on the front porch at Laurel and give his broken leg exercise.

We are looking forward to the return of all of our folk to their accustomed places.

#### Brunswick

Correspondent, R. L. MUCH

One of our efficient fuel savers of the Baltimore and Ohio is Engineer A. B. Haller. Engineer Haller runs what is known as the "Snuff Train," leaving Brunswick at 11.30 a. m., and arriving in Hagerstown at 2.30 p. m. Leaving Hagerstown at 6.00 p. m., he makes 19 stops, including freight and passenger stations, arriving at Brunswick at 7.45 p. m. Small engines are used on this run, and Engineer Haller has made a remarkable record in saving fuel for the Company, for which he has been commended. He recently received a complimentary letter from Fuel Superintendent W. L. Robinson.

Trainmaster Liller, while on our No. 2 the other day, on his way South for a vacation, remarked to your correspondent and several others that the "Baltimore and Ohio is the best railroad in the world." We agree with him, and we sincerely wish him a pleasant trip to Florida.

The famous delegation of Cowboys and Indians, from Delaware Tribe of Red Men, visited the little town of Boonsboro, near Keedysville, on the Hagerstown Branch. This delegation, composed practically entirely of Baltimore and Ohio employes, performed a series of acts which made the residents "sit up and take notice." The scenes enacted were from the pioneer days of '49. The chief event of the day was a sham battle.

Mr. E. C. Shafer was re-elected mayor of our town by a large majority. Mr. Shafer has proved himself a real man, which counts with our Railroad fraternity. He is a good mixer, and it is no uncommon sight to see him on the street among other citizens with pick and shovel, doing his bit for the town's benefit. Our town is flourishing under his able management.

Yardmaster W. C. Gatrell took a well-earned vacation, visiting relatives in Alleghany County. "Bill" is a hard worker.

Conductor "Tom" Sullivan has been laid up for some time. We shall be glad when he is able to return to duty.

If you want to see a fellow who constantly wears a bright smile, just drop into the westbound yard office and see Kirk Compton, who is always on the job. No matter how many tracers he has to make out, he never gets rattled.

The "most politest" man in the United States is Yard Train Dispatcher "Skinner" Thomas. Although Friday came on the 13th, which is considered to be an unlucky day, he greeted us with his usual "Good morning, Gentlemen." Brother Thomas has many friends among us railroaders, and he's a man on his job.

Our champion bowler is Chief Caller Floyd Stricker. His usual run is 120, and he seldom drops below the mark. In a recent contest he made the highest score.

#### Mount Clare

Correspondents

MOLLIE S. ALBRECHT and C. RAEUCLIE

In reference to the theatre party that Mr. Kelly promised to his men, he now tells me it's all off. Some of the men wouldn't wear "swallow-tails," and that's one of the conditions which he, of course, insisted upon!

"My men in the Flue Plant insist upon my giving a christening party, but what they really want is the key to my cellar." How about it boys?

If such a thing is possible, C. H. Burns has been going around with a gloomier expression than usual. What's the matter, "Buck?" Aren't the fish biting at Middle River, or has Friend Wife used the "moisture" to make some pumpkin pie?

A great many men at Mt. Clare must be going in the Christmas tree business this year. I hear them talking quite a bit about the "Tall Cedars!"

The accompanying picture is of G. H. Miller and family. George is a flue welder, second shift, and he wishes me to add that there is another little Miller whose picture doesn't show on this snap-shot. We asked George what he thought of race suicide. He said he had never heard of it. We don't believe he has.

#### Drawing Room

We understand, indirectly, that K. Picker, this department, took several days off, and took unto himself a "better half." You needn't be so darned close about it, "Pick." Tell us who the lucky lady is.

Two old employes of this department have returned to Mt. Clare, namely: "Al" Miller and Howard Gordy. Welcome home, boys!

Mr. Morton is back with us again after a long illness. We are surely glad to see "Bob," and hope he will stick to us.

Why in the world "Buck" Spence didn't have someone sell his old straw hat for him, instead of wearing the sign on his lid himself, we all can't figure. Nevertheless, on September 16, "Buck" walked up Arlington Avenue with a large "FOR SALE" sign stuck up in his chapeau. We understand he auctioned off the lid before he arrived in the centre of the city, for which we are more thankful! Let us advertise it in the MAGAZINE next time, "Buck," old boy.

Els, have you found out who called you from the Caswell? Tell us about it, old pin!

### Cumberland Division

Correspondent, JOHN J. SELL

Here are pictures of some Cumberland employes who made the Railroad go, way back in 1894. Some of these are still in the service; some have left for other fields,

while others have passed to the Great Beyond.

Behold Master Mechanic T. R. Stewart and shop office force, Cumberland, in the year 1918. Most all of those shown are still in our employ. In the same year were taken the picture of our girls club, a number of whom are still in the service. Some,

however, have listened to the call of Cupid.

Now that the outdoor sports are slowly fading away, the Duckpin King will step to the front. "Mossie" Campbell, the Napoleon of South End, wants to announce to the duckpin spillers that his aggregation from South End will be on the map as strong as ever this winter. Campbell

IN DAYS GONE BY AT CUMBERLAND (See Notes)

1—Left to right, back row: Letha Ambrose (Connell), Betty Dickey, Margaret Robosson (Snyder), Louise Zihlman, Laura Lingamfelter, Verna Hill (Weaver). Front row: Sadie Dickens (Smith), Mrs. Mollie McDonald, Naney Miller, Mabel Crawford, Ora Bauer (Robinson), Elizabeth McNeil (Gaither). 2—Mrs. Sylvester Shercliff. 3—Sylvester Shercliff. 4—Master Mechanic T. R. Stewart and his office force, 1918. 5—Miss Burns, enjoying a day in the open in 1918. 6—C. T. Timekeeper's and Division Accountant's Offices—R. M. Barnard, F. P. Keyser and A. P. Connell. 7—H. O. Tederick, track supervisor, Martinsburg. 8—Signal maintainer and his assistants. 9—V. L. Connell, chief clerk to general yardmaster, and C. F. Vanosdale, yardmaster. 10—Statistician Allen Cogan

THE OLD DISPATCHER'S OFFICE, CUMBERLAND

Behind the desk, left to right, are: Chief Dispatcher W. J. Lavelle, W. M. Rickey, West End dispatcher, and the late Lee French, East End dispatcher. The others are: E. B. Williams, trainmaster; H. C. McAdams and T. F. Connelly, East End dispatchers; the late Harry Grenoble, copy operator

team, composed of "Ben" Trail, Roy Hare, Grant Campbell, Charley Hare, Cecil Clark and "Mossie" himself, will represent the Diamond Bowling Alley this year. This is one hundred per cent. Baltimore and Ohio. It will represent the Cumberland Division, calling on any division that may think it can produce a like aggregation of stars. Just drop us a line when games are desired.

The Diamond Alleys have also been chosen headquarters for our All-Star Baltimore and Ohio Girl Team, composed of the following: Esther Weltman, Mae Beck, Margaret Carney, Lucille Hanifin, Everall Lapp, Hannah Love, Margaret Mouse, Olive Liller, Blanche Thomas and Mrs. J. H. Fike. These likewise challenge any team on the Baltimore and Ohio System. W. S. Beggs, coal billing agent, Cumberland, is manager of the All-Star Girl Team, and will promptly arrange booking upon request.

Among the accompanying pictures are Mr. and Mrs. Sylvester Shercliff, Piedmont, W. Va. Mrs. Shercliff was formerly Miss Francis L. Thomas, stenographer, Superintendent's Office and Storekeeper's Office, Cumberland. We wish the newlyweds much happiness.

We have also a picture of three of our C. T. timekeepers, Division Accountant's Office, Cumberland. They are R. M. Barnard, F. P. Keyser and A. P. Connell. Yes, they are all married but still smiling.

Another good picture is that of G. N. Lomyer, signal maintainer, and his assistants, J. W. DanHart and Walter Henry, taken with their motor on the straight, at Great Cacapon, W. Va. These employes do their share towards keeping the trains moving and are well known all over the division.

Here we have our popular supervisor, A. O. Tederick, Martinsburg, W. Va., who is famous for maintaining fine track over his entire sub-division. Our patrons, while enjoying the beautiful scenery in the vicinity of Harpers Ferry, often comment on the smooth riding track in that territory. We congratulate Mr. Tederick on the fine condition of Sub-division Number One.

"Smiling Miss Margaret" Burns, M. of W. timekeeper, Division Accountant's Office, Cumberland, was pictured while enjoying a day's outing with "B—." Here is every evidence that the day was a complete

success. Miss Burns is one of the most popular employes among the "Gentle Sex" on the division and was one of the first of "Cumberland's Fairest" who volunteered service when our boys were being called to arms back in 1917. She has been employed continuously in the Division Accountant's Office, although we hear rumors that "It won't be long now."

Here is a good likeness of Statistician Allen Coglan, Superintendent's Office. Mr. Coglan has been in the service for over thirty years and is known to his many friends on the division as "Colonel."

One of our contributors handed in the following verse. While it is not exactly complete, we appreciate the sentiments:

"The Baltimore and Ohio beats the Best  
It runs through the Capital, East and West,  
The Alleghany Mountains have been  
leveled, it seems,

By the power of brains, machinery and  
steam.

That lightning was brought to the earth we  
know

Was first used for rail power by our B. & O.  
The States it covers are thirteen in number  
Which are served and pleased in Winter and  
Summer.

Now that the schedule for the fall and winter Safety meetings on the Division has been arranged, it is felt that the employes will put new impetus into the Safety movement and make ours the honor division of the System in safety work.

G. Frank Messman is becoming quite a pool player. First thing we know Frank will be challenging one of the champions.

Master Mechanic G. T. Hice, Sabraton, M. & K. Sub-division, is convalescing from a recent illness. We hope to see him back on the job soon.

John Ketzner, one of our oldest and best known veterans, has been confined to his home in Cumberland on account of illness. His many friends and fellow employes hope for his speedy recovery and return to work. Mr. Ketzner completed 53 years of continuous service on October 1.

Many of our employes are trying for first honors in the Trade Mark Contest mentioned in the September issue. While

it is agreed that the present trademark of our line will be hard to improve upon, it is thought that with our talent getting to work, a new one will be presented that will better serve our purpose.

G. A. McGinn was in New York looking over the World's Series and getting some new pointers for our Cumberland Division team next season. We, therefore, predict a fast team next year.

The accompanying picture of Chief Yard Clerk V. L. Connel, at his desk, and Yardmaster C. F. VanOsdale, standing, gives a good idea of Cumberland Yard force in action.

Our division is fast getting back into its old stride. While the last blue print did not show us in first place, yet with every employe on the job and doing his bit, we hope to soon have it there.

#### Epitaph

I was purchased between June 18 and 20 by A. K. Galloway. The following are notes of my experience:

On the night of June 30, while resting peacefully on his noble brow, I was suddenly called upon to proceed to Locust Point in a downpour of rain. There I performed my duties of protecting his head from the terrible onslaught of rain, dirt, soot, cinders and sparks. After this experience, I never looked the same, but I stuck to the job.

Once again I was called out in emergency and proceeded with my master to Cumberland. Here I have remained ever since. Now, as my last days approach, my experiences are best judged by my appearance.

Yours truly,

A. K. Galloway's Straw Hat

Keyser, W. Va.

Correspondent, HARRY B. KIGHT

Our Divisional notes have been scarce for the last few issues, because of the fact that the correspondent has been out of town. Now that the summer is over, and vacations, too, let us all pull together, and get the news of our division into the MAGAZINE. The correspondent will appreciate your sending in any news, good photographs and other contributions that you may have.

Conductor John Chrisman, after 52 years of service, met with an accident at Mountain Lake Park a few weeks ago, when he was struck by a motor car. He was taken to his home in Keyser and was later removed to the Hoffman Hospital where he is doing nicely.

Yea, Bo! I have seen better days. Read my sad story, above

Arthur Slocum, warehouse foreman, and a member of the famous Keyser Collegian Basketball team, is the happiest fellow in town. And he has a right to be, for he has the dearest little baby daughter, born at the Hoffman Hospital on October 1. Congratulations!

The Correspondent enjoyed a visit to the MAGAZINE office during the latter part of September.

Our "Home Builders' Club" has not "fallen through." The boys are still planning homes and it is the hope of the officers that things will soon begin to hum again, and that we will see some new homes erected in Keyser.

Chief Caller George Hennen, Fairmont, was a pleasant caller here a few weeks ago. George is an old Keyser boy and we are always glad to see him.

Chief Clerk "Bud" Phillips at the Scale House, is back on the job, after having undergone an operation for appendicitis.

Engineer George Barker and family have moved into their beautiful new home on S. Main Street.

"Bill" Landis, trackman, Deer Park, is digging coal now at Vindex. "Bill" says that as soon as he gets enough dug to run the Baltimore and Ohio for the winter he is coming back.

Haven't heard anything about a chapter of the Veteran's Association for Keyser yet, have you? Get busy, you old timers, and get a chapter here.

Assistant Terminal Trainmaster "Bill" Virts is still talking about his trip to California. We know that he had a wonderful trip and unless we keep a close watch on him, he may go out there to live.

Engineman "Ike" Mills is building another beautiful house in Keyser. This makes about the 'steenth house "Ike" has built here, and they are all beautiful.

We are sorry to report the continued illness of Agent Huth of Piedmont. Hope to see "Charlie" back on the job again soon.

"Mart" Sayre, the "oldest conductor in the world," has applied for his pension papers. Soon as he gets 'em, we are going to write up "Mart's" pedigree. He has been in the service for many years and can tell us something worth while.

The telegraph office at Rawlings, which has been closed for some time, was reopened the last of September.

In looking over the different trade marks of the different railroads, and trying to think up a new one for our own "Baltimore and Ohio," I have come to the conclusion that "it can't be done." We already have the best one, it seems, and to try to improve on it would be to spoil it. (We respectfully refer Mr. Kight to his file of Magazines. See April, 1916 issue, Page 6—"It Can Be Done."—Ed.).

The Car Department clerk, Miss Virts, is all smiles these days. I do not think it is the Erie "Railroad," but a little town in Pennsylvania by that name which is the cause of her day dreaming. She has a cottage, a garden and, I presume, a garage, pictured to the latest detail in her dreams.

General Foreman Graney is getting his turkey calls in shape for the coming season. "Mike" says he is now working on an "engine call" to get the engines away from shop on time.

A. R. A. Clerk Orndorff took a few days off to look over the ponies at Laurel. Marshall says he had the right dope to make a killing. Poor boy! The sympathy of the office is with him.

Carl Emmett, little son of Engineer Robert "Tar" Rice, Keyser, W. Va.

Painter Foreman J. H. Dunk was able to visit the shops a few days ago after several month's illness. We were certainly glad to see John, and we hope that he will be able to resume duty in the near future.

Apprentice Instructor Small has moved his office to the upper end of the Master Mechanic's Building and expects to have his school moved over during the present month. Harvey is all smiles over his new location.

We do not know when it will happen, but when you ask Nina Lee, she smiles very sweetly—and "Jim," well, he just grins.

Miss Naughton, stenographer to the storekeeper, says she certainly does enjoy those naps coming up on No. 55 each morning, even if she does have to walk back from the "Hump" occasionally.

Bowling at present is the main topic of conversation among our lady clerks. Although the scores which they have made and those they claim they should have made differ considerably, they claim that by persistent practice they soon will make the pins fall. Ruth is unable to see the use of a gutter on the alleys; she claims she could make much better scores if it were covered like the rest of the alley.

Boilermaker Foreman Spicer and "Shadow" Paxton are preparing for their annual bear hunt; Charles says if Paxton doesn't clean his eye glasses this year before going out, he will call the hunt off, as he would have had to pay for a yearling heifer last year if Paxton's gun had been loaded.

In front of my ticket office I have an imaginary pair of scales which I have been using ever since I started to sell transportation, and I use them all the time. When a man or woman steps up to my window, I weigh them, and from my dealings with the public, I feel that I have learned to judge mankind pretty well. I have found that

those with whom I come in contact are generally pretty fine folks, and that if we but knew it, this is a fine world to live in. And then, too, I never ride our trains but that I pay attention to the service rendered our passengers by our train crews—and I have always found them looking after the passengers' welfare and striving to give the best service possible.

Some weeks ago, while riding over the Wheeling Division, I saw a passenger reach up into his hat and get out the check that the conductor had placed there, so that he might hand it to the conductor when he came along. When he did come along, and the passenger had handed the check to him, he received a courteous "Thank you." The passenger seemed surprised for he told me he had expected to get "bawled out." I am sure that he left the train with a higher opinion of our train crews than when he boarded it.

We extend our deepest sympathy to Brakeman John Bisset on the loss of his mother and also to Boilermaker Hackett in the death of his father.

Lady readers, do you read the news in the Women's Department, which is edited by "Aunt Mary" Stevens? That is an interesting department; it tells you how to prepare good things to eat, how to sew and you'll find lots of other interesting things on those pages. Aunt Mary will appreciate your cooperation in helping to keep this department interesting.

We who live in this part of the state like

to read the nice things that are said about our general counsel, Mr. Cornwell, for we all know him personally, and are proud of him. That's the reason we made him governor of the State of West Virginia. And West Virginia never had a better Governor, either.

Assistant Yardmaster Neil O'Connell, watchman, Oak Park, during the coal strike, wins the fur lined sleeve holders for sleeping at the switch.

He is said to have nabbed the home-made sawdust—padded Morris chair from the other night watchman, "Whity" Welshonce, and parked himself therein for the night. The indignant owner found him sleeping comfortably alongside a fire at midnight—watching the water station. "Whity," an ex-gob and skilled in ropes and lines and knots and what not, tied him carefully in bed.

At daybreak the dashing O'Connell was still resting easily and when the day force went on duty at seven they found him there. Some thoughtless person discharged a gun behind a car and O'Connell, much to the owner's grief, tore up the chair trying to get loose and run away. Before the smoke cleared the chair was wrecked and Neil was out of sight with a little dust cloud to show the direction in which he went. "Whity" didn't blame him for sleeping, for the yardmaster had to spend a lot of time in a nearby town during the day, but he was peeved at the wreck of the chair.

### Martinsburg

Correspondent, W. L. STEPHENS

The passing of the baseball season recalls to mind the ball club of our own shop which played in an inter-city league composed of teams organized by the employes of several industrial plants of the city. Our boys played fairly good ball but not good enough to win.

The championship was won by the Interwoven Mills, Incorporated. The mill boys played a consistent game throughout the season but were compelled to extend themselves to the last game to beat out the team of the Blair Limestone Company.

The season closed with a banquet at the Y. M. C. A. for the members of the several teams. It is reported that our boys could hit plenty of home runs at the banquet table. We will have a better team next year.

The Martinsburg Veterans have suffered the loss of two of their members by death.

Retired Machinist William H. Roth died at his home in this city on August 29 after a lingering illness. Mr. Roth was born in Baltimore in 1848. When a young man he came to this city and entered the local shops in the year 1866. He served here until the Motive Power Department was moved to Brunswick. He went from the shop here to Cumberland and then to Brunswick, later returning to the Martinsburg shop, from

which he was retired in 1919. His service record extended over a period of 56 years, including his retirement. His age, 74 years, made him one of our oldest Veterans.

Joseph Newton Linthicum, one of the best known Baltimore and Ohio engineers, died very suddenly at his home, 612 North Queen Street, on September 12. Death was due to heart trouble.

He had suffered from a heart leakage for about ten years but had never been in a critical condition. He took out his run as usual that day but when he returned home, complained of not feeling well and went to his physician to secure some medicine. Returning home he failed to improve and died before medical aid could be summoned.

"Joe" Linthicum entered the employ of the Baltimore and Ohio when a young man and served until the day of his death at the age of 62 years.

In these men the Baltimore and Ohio loses two faithful employes, the Veterans' Association consistent members, and the community, two honorable citizens.

### Timber Treating Plant

Green Spring, W. Va.

Correspondent, E. E. ALEXANDER  
Safety First

We can only plan, we cannot always control our circumstances. Last month we proudly announced through the MAGAZINE our high ambition of going to

HAPPY DAYS AT GREEN SPRING, W. Va.

Above: How is this for sport on a warm, summer afternoon? Left: Workmen Three (see notes). Right: Fawn from our park

the end of the year without an accident. But almost before the printer had our good intention in print our hopes of a perfect score were blasted when "Mike" Hornik, tieman, fell off a car, injuring one of his heels. Then "Pat" Kenny, retortman, dropped a switch ball on his foot, thus chalking up two accidents for September. How big that ugly figure looked!

We cannot wipe out that figure now, but, fellows, we can prevent Old Man Accident from chalking up any more against us, if we will all be more careful and stick together.

The new gasoline motor car which was described and pictured in our July MAGAZINE was put into service on the Green Spring-Petersburg Branch, on Sunday, October 1. Conductor Carder and Engineer Fazenbaker had charge of the car, and it was quite an attraction.

Miss Mildred, eldest daughter of Operator and Mrs. J. D. Rockwell, is attending high school at Romney this winter. Too bad we haven't at least a Junior High School here!

We recently enjoyed a visit from our first general foreman, P. L. Conley, now of Aurora, Ill., who with Mrs. Conley and accompanied by Mrs. Eugene Smith, spent their vacation with Mr. Conley's father, Tie Foreman G. C. Conley. "Pete" was general foreman at the time our Plant began operation in 1913 and continued in that capacity until the fall of 1916, when he left us to accept a more remunerative position. We invite them to come to Green Spring again.

Operator and Mrs. B. L. Buxton, Relay, Md., were late September guests of General Foreman and Mrs. E. M. Stottlemeyer. They expressed surprise at the immensity of our Plant.

Our water supply has been a serious problem. The old Potomac is said to be the lowest in fifty years. It became necessary to build dams to insure a supply.

At the ford the children have been drawing their little wagons across, while above, the ladies have been crossing on the rocks without even getting their "footies" damp.

Mrs. E. E. Alexander gave a dinner party on September 23 in honor of Mr. and Mrs. P. L. Conley and Mrs. Eugene Smith of Aurora, Ill.

E. F. Bean, laborer, is at work again after the loss of several days because of illness.

C. R. Passapae, genial manager of our commissary, was compelled to give up his duties because of the illness of his wife. Mr. Passapae left on October 1 for Baltimore, to join his family who had preceded him by a week. We regret to lose them and wish them well.

Mrs. Mary E. Short, who has been conducting a boarding house here for several years, has taken over the commissary. We also wish her success.

Chief Engineer Maintenance Earl Stimson, who is now directing our operations, accompanied by Maintenance Engineer C. C. Cook, made an inspection of our Plant on September 27. Both gentlemen were later guests of Supervisor and Mrs. Alexander, and accompanied by the former, journeyed to Cincinnati. Here they were joined by S. A. Jordan, engineer maintenance, Lines West; S. M. Elder, lumber agent, and E. J. Stocking, vice president of the Central Creosoting Co. They visited the Plant of this Company at Finney, Ohio on the following day. Mrs. Jordan and daughter accompanied the

party from Cincinnati, the latter driving "Dad's" new machine. We cannot but pass a compliment on Miss Jordan's ability as a driver.

The U. B. Ladies' Aid served one of their famous 50 cent suppers on Friday evening, October 8, at the home of Night Foreman and Mrs. E. Allen. Was the Tie Plant well represented? Oh boy! we'll say it was. We will not mention any names but all the "BIG" eaters were there.

Old fashioned "Apple Cuttings" and "Apple Butter Making," now unknown to many in our larger industrial centers, have provided several enjoyable evenings in our community recently.

A number of her friends surprised Mrs. G. C. Conley on September 29, by calling on her in a body and reminding her that it was the golden anniversary of her birth. A sumptuous dinner was served at noon and the afternoon was devoted to visiting. Her guests left Mrs. Conley many beautiful tokens of their friendship and esteem. Several invited were unable to be present and sent regrets and best wishes. Among those present were Mrs. Clara Berrager and daughter Evelyn; Mr. Frank Lutman, Connellsville, Pa.; Mrs. Anna Valentine, Rudolf Valentine, and baby "Betty;" Frank Willison, G. W. Bradens, Clara Farrin, J. W. Elder, E. C. Long, A. L. Isaacs, C. E. Bortz, M. Richards, Miss Susan Casteel; Mr. and Mrs. Shirley Roby, Messrs. Williams Bradens and Chester Bartman, of Cumberland; Mr. and Mrs. P. L. Conley and Mrs. Eugene Smith.

Another good citizen has come among us. C. E. Edgell, manager of the Green Spring Orchard Co., has moved into the Glaze property he recently purchased. Welcome, friends!

The schedules of services at the M. E. and U. B. Churches are now so arranged that we have services every Sunday morning and evening. No excuse, fellows, for not going to preaching!

Always be careful! Don't get hurt! Don't let "Old Man Accident" get you! Be a safe employee!

On September 27 Jesse Carl Snyder, efficient third trick operator at Okonoko, W. Va., and Miss Bettie Mae Kerns, popular school teacher of Paw Paw, W. Va., were quietly married at the parsonage of the M. E. Church, Bedford St., Cumberland, Md., by Rev. Meeks. Miss Kerns taught at Okonoko last year, and we understand that's where the romance started. They have our best wishes.

Our photograph this month is "On the Old Potomac." Left to right, we have: Mrs. A. E. Irving, Tie Inspector A. E. Irving, with Masters Richard and Bobby; Mrs. E. E. Alexander and nephew "Buddie;" Little Miss Mayme Irving, Mrs. J. C. Alexander, Master Harold Robinson, Miss Amy Jewel and "Uncle" E. E. In the background are seen Frank, Jerry and Joseph Setor, children of Tieman Jerry Setor.

We also present for your approval three well known gentlemen of the M. of W. Department, Cumberland Division, Carpenter Foreman G. R. Clark, and Carpenters J. W. Gane and T. J. McInturf, on 21st Bridge over the North Branch of the Potomac River, just east of Keyser, W. Va. This picture was taken where these men had been placing new irons.

Our other snapshot is of deer in Pancake Park, Green Spring-Petersburg Branch. There are about forty of these deer in the park, which is the property of Mr. Fred Pancake, Pancake Station.

**The Vose Grand**

has the incomparable *Tone*—the one quality above all others which makes a real piano. The exquisite tone of the Vose Grand distinguishes it from all other pianos.

**We Challenge Comparisons**

Write for our beautifully illustrated catalog and floor pattern of the Vose Grand, also our easy payment plan.

**VOSE & SONS PIANO CO.**  
165 Boylston St. Boston, Mass.

**VOSE**

President Willard has said that all a Railroad has to sell is service. If this is true—and it is—then every employe is a salesman and should act accordingly. It is our privilege to travel occasionally over our lines, oftentimes to connecting points. We could tell some experiences, too, and we try never to miss an opportunity to boost the Baltimore and Ohio—the road of Safety, Service and Courtesy.

**Deer Park**

Correspondent, F. W. REIS, *Operator*

Operator and Mrs. D. E. Jeffries had a recent visit from Friend Stork, who brought them a fine daughter. The stork also visited Fireman and Mrs. W. E. George and left them a fine baby daughter.

Engineer and Mrs. T. H. Mooser will probably make their winter home in Keyser, W. Va.

Operator F. N. Reis, Altamont, is said to have been lost on his own farm, located near here. When found he possessed two gallons of cider.

Our ticket agent will "go down in the book" for the cleanliness of his office. He probably caught the cleanliness fever from our own little village, which summer visitors as well as we, consider is one of the finest and cleanest along the line.

'Tis said that one of Track Foreman W. W. Flannigan's workers who drives a Buick has the occasional pleasure of a pleasant companionship. We wonder if it is a g-l.

**A Letter of Thanks**

We shall long remember Conductor "Charlie" Welsh for his kindness to High School students who go from here to Oakland to school every morning and back home at night. Other conductors are kind but we want to mention Conductor "Charlie" particularly.

(Signed)  
One of the students.

**Pittsburgh Division**

Correspondents

E. N. FAIRGRIEVE and MARY E. BREEN

The afternoon and evening of September 25 will linger long in the pleasant memories of nine of our veteran engineers. This day was given over to merry making in honor of Engineers John Clare, J. G. Lloyd, F. B. Appelbe, who are still in active service, and James Morris, James Gallagher, Henry McBurney, J. W. McCurdy, W. R. Lowe and M. C. Lalley, who are now enjoying the benefits of a pension.

At noon the Veterans met at the Odd Fellows' Hall, Hazelwood, and from there were given "a whirl" (unlike the way we referred to Silver Top in the B. V. D. days; don't mistake me, B. V. D. translated means "Before Volstead Decree") around the city to various points of interest.

In the evening after dinner, an entertainment was provided. This consisted of speaking (bringing back memories of the old days), music and that ever favored indoor sport, eats. We enjoyed the program and we have to hand it to the eats, which were fine. The program follows:

America..... Audience  
 "Love Sends a Gift of Roses", Mae Layton  
 "Smilin' Thru," Trombone Solo,

John Sadler  
 Piano Solo..... Jane Heberling  
 Recitation "The Veteran Engineer",

"Bill" Ramsey  
 Address..... James Denison  
 "Good-Bye, Summer"..... Mrs. Davidson

Address..... Jennie Smith  
 Presentation of Gold Metal to Engineer M. Darr

Presentation of Remembrances to Other  
 Veteran Engineers  
 "God Be With You Till We Meet Again"

Audience

The presentation speeches were made by Engineer Irwin, better known as "Sam," and never was there a prouder man on the earth than "Mike" Darr when presented with his gold medal in acknowledgement of the many years he has spent with the Baltimore and Ohio. And true to the words of Engineer Irwin, "never had any man more reason to be proud—he who has achieved a great name in the arts, he who has accrued great wealth; neither of these

The boys from Pittsburgh Freight Station enjoying an outing at "Schmidty's Farm" near Bruceton. Some went by trolley. Others used Clement's "Henry Ford"

has any more reason that Engineer Darr, who has every right in the world to be proud of his service record, of his years of proudering." Of course, "Mike" gave us a little speech and we enjoyed it greatly.

The veteran engineers to whom the evening was devoted, were each presented with a silver handled umbrella engraved with the name of each, with the wish that by them "they would always be protected from the sunshine of Heaven, but not from the sunshine of Life."

Mr. Ramsey's recitation, "The Veteran Engineer," was one of his own composition and was well rendered and well received. At midnight we departed, each with the resolve to live for higher ideals so that when we achieve the age of the veterans thus honored, such honor will await each of us.

The gentleman standing alone with the white carnation in the lapel of his coat is none other than His Honor, J. F. Garbesi, traveling freight agent, General Freight

Office. By the way, "Joe," why the white carnation?

Then too, we present some sluggers: Chief Clerk L. E. C. Roehrig, General Freight Office; Soliciting Freight Agent Dutcher; Trace Clerk Everson and Soliciting Freight Agent Graham. We have never, though, heard of their making any home runs or anything like that.

Now take a look at Engineer Gallagher, who, let us say, went on the pension list on August 1. The young lady we don't know, but the other third is "Handsome Jack" Haverty, whose dancing is divine. If you girls have never danced with him don't miss the next opportunity.

Margaret Baily, Division Accountant's Office, has left the service and gone to Columbia University to study dental nursing. By the time she gets through, we will all be willing to see "Peg" holding 'em down. She's the girl who can do it.

"Sue" Butts, also of that office, has left the service and is now teaching in a private school. To both the girls we extend sincere wishes for success.

Who said Pittsburgh doesn't have beautiful girls? If these aren't living examples, then we eat the hat. They are Misses Boyle, Irwin, Van Horn and Harkins; the gentleman is Mr. Clemens. Both Miss Van Horn and Mr. Clemens have resigned, but they're still old sweethearts of ours.

**Glenwood Back Shop**

Correspondent, FRANCES E. LEEPER

Things look natural in the Master Mechanic's Office since Jane Passmore is back at work. Jane has been absent because of illness for almost two years.

Oh, yes, girls, the reason we don't see "Reike" is that he is working night turn. Cheer up. He always arranges to come on duty early so we all may see him.

Several girls around the Glenwood Offices are going in for "Nite School" to learn cooking, sewing, millinery, etc. Looks suspicious.

There was a mad rush around the office on a Saturday afternoon at three o'clock, when Earl Abbott got off early to catch No. 70 to Uniontown. Come on, Earl, tell us what it all means and who SHE is.

"Kitty" Gettle just arrived home from New York, where she spent her vacation. She says she has made all her dresses longer

to conform with styles as seen on Broadway. Go to it, "Kitty," you may as well be dead as out of style.

There is a mystery in the Master Mechanic's Office. "Jim" Kilroy lost his shell-rim glasses. Please find them, "Jim;" those others you wear are not becoming.

Frank Jarowski, Stores Department, has heavier work on his mind now than boxing. He is acting as secretary to the district store-keeper. It must agree with him all right, for he still retains his pleasant smile.

J. R. Smith, Pipe Shop, was recently transferred from night turn to day turn. No wonder he is always smiling for he has lost a good bit of time with a certain little girl in this town.

"Jack" Hiller and C. P. Smith, Stores Department, have joined a sort of "good time" club. The first thing on the program is a swimming party. Wish you all success, boys; you know what you need.

Elizabeth O'Shea, Superintendent of Shops Office, has been assigned position of bill writer on the M. C. B. desk. Be careful, Elizabeth; you know Iva Harrington was wowed and won over that desk.

**Pittsburgh Freight Station**

Correspondent, ELMER H. STOLTZ  
Secretary to Terminal Agent

We are all back from our vacations, feeling fine. While away, some got sun-burned, some married and some have secured other positions in the employ of the Company. Miss Emeline McKie, posting clerk, assumes the position of assistant agent, Claysville, Pa. Miss Jane Smith is stenographer to Chief Clerk George Hopper, this station. Mr. Hopper was promoted to the position of chief clerk at Pittsburgh, vice M. A. Greenwood. Mr. Hopper has been in the service of the Baltimore and Ohio for 25 years. Mrs. Erda E. Imunson is now matron at Pittsburgh Freight Station, vice Mrs. Marie Moore, who has been retired on pension.

One of our employes (not saying how many more), has been captured by "Dan Cupid." Miss Wilmina Weigand evidently strayed too far out in the water. She is now Mrs. LaVelle.

Our claim clerk's stenographer, Miss Cromer, spent her vacation doctoring up a bad cold. We are all glad to see her back with that pleasant smile again. Good-morning, Rachel!

The bowling season has begun, and we are all out to win the trophy which will be presented to the winning team at the end of the season. While our scores are not running so high we are satisfied that within a short while all will be going well. Our little "Aiello" rolled a score at lunch hour of 221. We hope he will have this average at the end of the season. The competition is keen and lots of "pep" is shown by the "rooters," who are pulling hard for the Pittsburgh Freight House teams. The P. G. H.'s have carried off the trophies for the past two seasons.

Timekeeper "Joe" Rausch is back from his vacation after having seen the "Pirates" defeat the "Giants" at New York. His straw hat was missing when he came home!

Office of District Engineer, Pittsburgh, Pa.  
Correspondent, J. M. WHELAN

Your correspondent seems to have stirred up somewhat of an argument in referring to the absence of "that little game." The family has returned and generally there seems to be no impossible objection from that source, but the boys just don't seem to be able to get together on the date. It seems to be quite clear in E.'s mind that

the gang was invited while Mrs. E. was away, but for some reason they did not arrive. However, now that the members of the family are back, the matter is still up in the air. We have it on good authority that the bookkeeping trouble has been straightened out satisfactorily.

This office was favored recently with a visit from the genial D. A. Riley, former field engineer in this department, but now located in the general offices in Baltimore. Glad to see you, D. A. Come again.

We are pleased to announce, somewhat late it is true, that Mr. and Mrs. R. K. Morrison are the proud parents of a young daughter, who has been named Nancy. We extend our heartiest congratulations. Mrs. Morrison will be remembered as Miss Pfendler, a former stenographer in this department.

### Charleston Division

Correspondent, M. W. JONES  
Secretary to Superintendent

"No man is beat till he quits,  
No man is through till he stops,  
No matter how hard failure hits,  
No matter how often he drops.  
A fellow's not down till he lies  
In the dust and refuses to rise.  
Fate may slam him and bang him around  
And batter his frame till he's sore,  
But she never can say that he's downed  
While he bobs up serenely for more.  
A fellow's not dead till he dies,  
Nor beat till no longer he tries."

Several inquiries have been directed to the correspondent asking if the Charleston Division had been washed down the West Forks River. We take this opportunity of answering everyone at one time. It has NOT. However, your correspondent has not had the time to devote to the writing of notes, which they require, and rather than send along "any old thing" he has preferred to drop out until he could spare the time. "Our hat is again in the ring" and we are ready to meet all comers, even the chief dispatcher, when he comes in mad because engine 4268 broke down at Halo, or he only moved 900 loads yesterday instead of 901.

Douglas Riley Fleming, Jr., prize winning grandson of Engineer and Mrs. Harry Fleming, Fairmont, W. Va.

A trio of Charleston Division smiles

Much water has flowed under the bridge since last your correspondent attempted to chronicle the happenings of the Division. As usual, his friends have again forgotten to tell him any of their doings, and so he's got to tell you what he has found out on his own account.

Famous remarks by the girls in the Superintendent's Office recently include the following, which was made by one who soon expects to realize it from her own knowledge. She shall be nameless; "The fellow who forgets to shave at his usual time is certainly reminded of it by the hot weather." "If hubby could as easily remember those things wifey told him to get, tranquility would be furthered in the household."

Allen Bridge, West Virginia. Do you know where it is located? We are told by the office oracle that it is six miles from Weston. Of our personal knowledge we know no. There is, however, a young lady in the office who knows. Labor Day—ah what tales you could tell! On the day before a taxi arrived at the passenger station at exactly 5.01 p. m. all out of breath, having been instructed to be on hand at exactly 5.00 p. m. for a trip to Allen Bridge. However, all's well that ends well, and the taxi got away to the cheers of the assembled office force about 5.05 p. m. all having gone down stairs sharp on the minute, in order to be present at the parting. Some barn dance that was, we'll say. But—the cold grey dawn of the morning after! Happening to be strolling along the street with our family after the day's work was done, along about 6.00 p. m., we saw the return. Details? Oh yes, there are plenty of them, but—the poor girl on her return trip met about every one she knew in the town of Weston, and that's some bunch, so—if you want to know the story, apply at the office. Even the bosses saw the scene. How she did blush, too!

"Strike a brisk gait or you'll get the gate."

One day recently Miss Dovie Justus, of Superintendent's Office started a week's vacation. Ever hear of Halo, West Virginia? Somewhere on the Gauley Line of the Charleston Division, so they say. Never been there personally, but she has. Arriving on Train 62 at somewhere about noon,

the friends failed to show up. A country road—mud—rain—dirt—but she's a perfect lady, and so her remarks were very gentle. However, she does deserve a "Halo" for her temerity.

\*\*If you want a friend—BE ONE.\*\*  
—Emerson.

There's an old saying that the "Early bird catches the worm." Even so, 'tis true. One who comes down to the office early is liable to hear an interesting few moments of chatter before the clock strikes 8.00. Recently, having arrived as "an early bird," we heard the following dialogue in the Superintendent's Office:

Miss J.—I have a beau like yours, he doesn't go with any other girl.

Miss M.—Oh—I have had the other kind—he comes around getting me all excited, thinking my time has come AT LAST, and then he does the same thing with another girl.

Miss J.—But—you didn't keep him very long, did you?

Miss M.—No—the other girl always got him.

Take warning girls and boys. Stick to one. You see what they say about you when you're not listening. It is hoped that the MAGAZINE for this month won't come to the eyes of certain young men in Weston. If it does—we won't return from our vacation for a year. Being a member of the Safety Committee, we are strong believers in SAFETY FIRST.

Our sympathy is extended to Trainmaster Deegan, who has been confined to the hospital in Clarksburg for the past two weeks, due to an injury to his shin, which he "barked" against the blunt end of a rail in the dark. He expects to be out in a few days.

From the far west—yea even as far as Chillicothe, there appeared about a year ago Miss Helen Byerley, to lighten our burdens. After remaining with us one year as secretary to the assistant superintendent at Gassaway, she has resigned to return home, much to our sorrow. We extend our best wishes to her for every possible success in her new work, whether it be of a domestic or business nature.

"Never forget a kindness. Loyalty and gratitude constitute about all that's worth while in this life."

Did you ever have occasion to ride in cafe car 1055 on the Elk Line? It's a pleasure to eat a meal in it. Steward C. R. Holshouser certainly knows how to make you feel at home, and much credit is due to him for the good name the service is getting through his efforts. Many travelling men speak very highly of the treatment they receive on car 1055, and it's a pleasure to us to record it.

We have not very much for our art gallery this month, but we present a photo of Miss Madeline Hayden, stenographer to the chief clerk (center) with two more of our Weston beauties: Miss Fleda Feagans, file clerk, on her right, and Miss Gladys Tivey, passing report artist, on her left.

"It's going to take more than a generation to eliminate all the grade crossings in the country, and even then neither city nor country roads will be fool proof. Why not try to impress on your friends who own autos the necessity of the use of a little caution in the meantime?"

### Connellsville Division

Correspondent, C. E. REYNOLDS  
Office of Trainmaster

Chief Yard Clerk J. L. Marsteller, Connellsville, got a Paige Roadster and left on his two weeks' vacation touring through Virginia, visiting friends and relatives; he will also visit in North Carolina during this trip. Go to it, "Jimmy," and have a joyous time.

L. N. Cage, assistant chief yard clerk, Connellsville, has returned from his two weeks' vacation, one week of which was spent along the Potomac River, below Brunswick, with the members of the Saw-Buck Camp. "Lou" says the fishing was fine. The second week was spent in New York City. D. F. Hurley, general yardmaster, Connellsville, has returned from his vacation which was spent in Detroit and other points of interest in the west. C. L. McDonald, yardmaster, Connellsville, has also returned from his vacation, which was spent in Washington and New York City.

James McClure, the efficient messenger boy, General Yard Master's Office, has been transferred to position of yard clerk. We regret to lose "Jimmy" as a messenger; however, we are glad to see him advancing and know that he will do well in his new position.

I. H. Keyser, switchtender, Greene Jct., has left to take in the doings at the Great Hagerstown Fair. He will also visit for a short time with his folks at Ingram, Va.

I. S. Beal left last week for a visit with friends at El Paso, Texas. He expects to be gone for about 30 days.

A new arrival made its appearance at the Swann residence in Wheeler, Connellsville's beautiful suburban residential district. The little fellow was named after his father—Robert "Duckie" Swann, Jr., yard clerk at Connellsville. Congratulations!

W. E. Boyland, assistant trainmaster, Cumberland, has returned from his vacation which was spent at Berkley Springs, W. Va. Your percentage should go better than 100 now "WEB."

Ralph W. McCormick, Stores Department, Connellsville, has resigned and is going to Tampa, Fla. to reside. Mr. McCormick served as acting postmaster during the first year of the Harding Admin-

istration. "Rusty," you have been with us a long time and we are sorry to see you go, but we wish you luck in your new field of work.

J. W. Thornton, train dispatcher, Connellsville, has returned from his vacation in Baltimore, Washington and Norfolk. "Jawn" says he had a good time. William Amcy, our efficient division freight claim representative, has returned from his vacation which was spent in Washington, Philadelphia and Atlantic City. Yes, sorry to say, he slipped on the boardwalk and sprained his ankle. Train Dispatcher and Mrs. H. B. Pigman have returned from a two weeks' sojourn in Atlantic City. General Yardmaster and Mrs. C. B. Speicher, Johnstown, have returned from a vacation of one month spent on the Pacific Coast. They covered about 7000 miles on the trip. Bert reports that the foreign railroads have nothing on the Baltimore and Ohio, and that for good eats the Baltimore and Ohio dining car service is unequalled by any line.

Let's all pull together now and make our Railroad better than 100 per cent.

### Wheeling Division

Correspondent, MARIE SLATTERICK

Strangers around Wheeling Station may be surprised to hear a certain young man addressed with such terms of endearment as: "Here, Love, yes, love, just a minute, Lovey." Fooled again!! We were only talking to John Bushnell Love, the new messenger.

Charles McConkey, former messenger, has accepted position of office boy in the Division Accountant's Office. You can't keep a good man down, "Mac."

E. J. Cornett, formerly office boy, Division Accountant's Office, has accepted a position at Holloway.

The friends of John Wise, formerly of Baltimore, will be interested to learn of his transfer to Wheeling, Engineering Corps, Division Engineer's Office.

Cupid has done it again! The Car Record Office was minus an A-1 clerk when Hazel Mason became the bride of Mr. Harry Ellery, of Pittsburgh, on October 18. We certainly approve of Mr. Ellery's taste, although we do hate to lose Hazel. Good wishes and congratulations!

Signal Supervisor A. J. Penrod is off duty because of a siege of lumbago. We miss his smiling face and good humor and hope he'll be on the scene soon again, for "Uncle Ad" never fails to cheer.

Stella Barkley, formerly of Benwood Yard, has accepted the position in the Car Record Office, vice Miss Hazel Mason.

Miss Olive Eskey, Division Engineer's Office, spent her vacation at Weston, W. Va. She made a big hit in that city. Weston is an awfully nice place, according to Olive.

Month after month we have tried to get something on Supervisor "Jake" Wintermoyer, but seems like the only thing he does to be written up is the way he rides his "Yellow Calliac" (motor car) to death. However, we did hear that he ran over a chicken the other day. A feathered one, of course!

The picture on next page is of Track Foreman William Furgeson, Section 16, Glen Easton, W. Va. Mr. Furgeson was born November 22, 1853. He started to work for the Company as water boy in 1867 and was promoted to foreman in January,

1874. On being transferred to the Pittsburgh Division in 1904 he worked there eleven months, after which he returned to Glen Easton where he has been ever since. Mr. Furgeson is to be congratulated on the good health which his picture in lies. This, however, might be due to his still being a bachelor. Who knows?

Baltimore and Ohio employees and officials join in offering their sincerest sympathy to Mrs. Freis, whose husband, Supervisor Silas Freis, died as the result of a motor car accident. Mr. Freis was sitting on front end of a carpenter gang's motor car, en route to Cox Landing, W. Va. It is thought that in turning around he lost his balance and fell off, for the motor car was not making more than twelve miles per hour. Mr. Freis sustained a broken arm, badly bruised leg, a gash in his head and numerous internal injuries. He was rushed to the Kessler-Hutfield Hospital at Huntington. The accident occurred about 3.50 p. m. on September 6 and Mr. Freis died at 4.50 a. m. on September 7. Always solicitous of others, his last words were to inquire if anyone was hurt. Mr. Freis came to the Wheeling Division on January 1 this year, and though here but a short time, he was loved by all. His officers especially had learned to know him and appreciate him as a man, a hard worker and one who was thoroughly reliable in every way. His resting place is in a little cemetery in a clearing on the side of a wooded hill about one mile from the quiet village of St. Louisville, Ohio.

It was with sincere regret and deep sympathy that we learned of the death of G. L. Webner, operator at Glover Gap, W. Va. Mr. Webner was employed in the Tele-

## Guaranteed GENUINE LEATHER

### 7-Window Pass Case, Card Case and Bill Fold

Will show 7 regular size passes, identification cards, and photos, each under a separate transparent celluloid face protecting it from dirt and wear. Also has gusseted pockets for smaller cards and roomy billfold pocket in back. Railroad men tell me it is the handiest thing they ever saw. Over 20,000 of them now being carried.

## 23K Gold Engraving FREE!

Your name and address (3 lines) and your emblem or insignia (order, brotherhood, lodge—I have them all) engraved in 23K gold absolutely free. This work alone is worth \$1.50 of anybody's money. Case is beautifully made of fine black seal grain genuine leather. Strongly sewed, neat and convenient. Size, 3 1/2 x 1 1/2 inches closed.

## Send No Money

Don't send me a single penny in advance. Just send your name and address on the coupon below with the emblem or insignia you want. I will send you this wonderful pass case at once, and when the postman delivers it to you, when you actually have the goods, pay him only \$1.00 and postage. I positively guarantee that if you don't think it is the best buy you ever made, you may return it and I will return to you my money immediately. I have been in this business for over 10 years. You take no risk. Send coupon now.

Halvorsen, The Pass Case Man  
 Dept. 4018      Masonic Temple, Chicago, Ill.  
 You may send me your genuine leather 7-Window Pass Case with my name, city, state and emblem engraved in 23K gold. I will pay the postman only \$1.00 and postage when he delivers it. If I am not entirely satisfied with the case, I will return it and you will refund my money at once. I take no risk.

graph Department for a number of years. He died at the age of 42. He entered the employ of the Baltimore and Ohio on February 28, 1907, serving faithfully. With his unflinching humor and his ever ready willingness to extend a helping hand to others, he made and gained many friends. During his years of employment his life was one of true service. After a short illness he died on July 28. He is survived by his widow and five children.

The many friends of Earl Tribbett, yard brakeman, Benwood, were surprised to learn of his marriage on August 21 to Miss Bernadine Tooper, McMechen, who, before her marriage was a clerk in Benwood Yard. Congratulations, folks!

We offer our sincere sympathy to Carpenter Foreman J. W. Chaplin whose mother died on August 18.

Miss Rose Jacobucci, Superintendent's Office, returned from a four weeks' vacation, most of which was spent in a hospital. Glad to see you back, Rose!

N. K. Harrison, Maintenance of Way clerk, Division Accountant's Office, and erstwhile champion amateur heavyweight of Ohio County, has spent all his hard-earned (?) pennies and bought an Overland. We hope he will not be as stingy as some other car owners 'round about. "King" is known for his good nature and kind-heartedness.

#### Ohio River Sub-Division

Correspondent, CHARLOTTE MARLOWE

J. Gardner Duncan, our popular rate clerk, who has been on the verge of despondency for the past few months on account of the duplicity of a well known traveling freight agent from Pittsburgh, Pa., is now on the road to recovery, he having received an invitation from the lady in question to a dance at Fries Park and also to a house party given by her a few days later. It is hoped he will now have plain sailing in his suit, as the above mentioned agent is no longer dangerous.

Miss Margie Lasure, revision clerk, Agent's Office, is wearing an honest-to-goodness sparkler. Margie's bashful and hasn't told us anything but the Freight House bunch consulted an oracle and this

Track Foreman William Ferguson

wiseacre told them it is an assured fact but the exact date hasn't been set.

Cashier C. C. Phillips, 4th Street Freight House, journeyed to Atlantic City on September 15 along with some 40,000 other Shriners to attend the ceremonial given by Crescent Temple AAONMS and to take his annual bath. "Phil" says he didn't need it but had to take it before the water got cold.

C. M. Whittier, poet and O. S. & D. clerk, spent his vacation with his sister at her home in Attica, Ind. "Whit" makes this trip annually. Come along with some poems for the MAGAZINE, C. M.; live up to your name.

Walker Hamilton, post and balance clerk, with all his other accomplishments, is a fruit grower of enviable reputation. He lives in the Township of Belpre, just across the Beautiful O-h-i-o, and there, after he loafs around the office whiling away his eight hours, he can be seen chasing the bugs and other pesky things out of his peach trees. This bird eats three husky meals per day but his poor jaws have to do a lot of overtime as he constantly stores away this luscious fruit all during the hours between his regular feeding times. How do you do it, Kid, and keep your manly shape?

Bright sayings by some of our witty ones:

Jimmy Durkin: "Holy Smoke."

Billy Duff: "How's that?"

Virginia Tredway: "Number some tickets, Dunc."

Fred Christmyer: "Huh."

E. N. Skaggs: "They gotta respect my seniority."

Gardner Duncan: "Well, for the love of Mike."

J. K. Cromley: "Don't you dare put anything in that MAGAZINE about me. It you do I'll calfhead you." Whad'dye mean, calfhead? You almost frighten us, "Joe."

J. K. Cromley: (again) "Hesh up."

Miss Mary Ethel Owens, stenographer to trainmaster, spent all her savings, mortgaged her life insurance, and bought one of Henry's cars—a sedan. Mary Ethel likes to ride in the country and just recently the farmers in the vicinity of Parkersburg reported the loss of watermelons, roastin' ears, etc.

Johnny Maloney, cash clerk, has also invested in a Ford coupe. This speed fiend has it all over Barney Oldfield, telephoning his mother to have his eats ready by the time he gets home, and arriving there before she has had time to hang up the receiver.

June Taylor Gardner, stenographer to storekeeper, Parkersburg, got tired of just speeding, and one evening when the writer was with her, tried to make her racer climb a telephone pole. Said racer refused, but just for fun knocked the telephone pole down. June said she couldn't understand why the car wouldn't do what she wanted it to do. It is a trained animal, but even so it was made for ground work. Why not an airplane, June?

E. J. Peters, general clerk to master mechanic, has started to grow a cactus under his nose. He is keeping it well fertilized and has high hopes. You are really handsomer without it, "Pete."

Belle Caldwell and Mary Keenan slipped their future meal tickets some very flimsy excuses and stole away on the boat excursion given by the Masons. They indulged in a big time, spending the early part of the evening getting acquainted with the crowd and later shaking a wicked foot until the whole orchestra fainted from exhaustion. Girls, girls!!!

Marie Slatterick and "Red" Anthony Heinmiller, "On a Sunday Afternoon"

To Whom It May Concern:

This is to certify that Adam Loebig is a regular candy and fruit fiend; that he has the scent of a bloodhound, and that if you have any such it would be wise to keep it under lock and key.

Witnesses: Ignatz Signed: E. W. Miller.  
Krazy Kat.

The kids on Upper Market Street all have it in for "Bud" Beck. "Bud" is one of our speedy billing clerks and we all thought until recently that he was just about like the rest of us, but we are forced to acknowledge that he is not just an ordinary individual, but a financier, a man of parts. One afternoon about a week ago "Bud" pleaded sickness; and, as is the custom, was permitted to go home—and, as we supposed, to bed. But such was not the case. It later developed that he had a date with a bunch of kids ranging from five to nine years of age to play marbles in the alley back of "Mike" Shedan's store. "Bud" fleeced these innocents of all their stonies and then persuaded them to play for money. The small urchins pooled their spending money, to wit, 20 cents, and, needless to say, "Bud" got that. He is now telling on the q. t. that he made more that afternoon than if he had stayed at the office and punished the typewriter.

"Ed" Oliver, fashionable chief clerk to the division freight agent, got caught the other day in a heavy rain which took the nice new crease out of his trousers. One of the local pressers put them back in shape and Eddie painfully parted with 50 cents.

Maude Moore recently joined the bobbed beauties. It really looks very cute, Maudie.

At the annual picnic of the I. O. O. F. held at the City Park this fall, Tommy Ball, time and tonnage clerk, was awarded a prize for being the ugliest Odd Fellow in Wood County, the judges being three women. This was quite a shock to "Tom," who has always been a devil with the ladies, but he has recovered sufficiently to be at his desk again, where he is turning out his usual good work.

Miss Charlotte Marlowe, stenographer to the agent, was much given to "traveling" last summer, having visited Atlantic City, Philadelphia, Niagara Falls, and other eastern cities.

George McDiffitt, carding clerk, does a lot of fancy diving nightly at the Belpre Bathing Beach, for the edification of all lookers on. He is a regular water nymph, handling himself about as gracefully as a Johnboat.

F. B. Stocking and Chas. O'Brien, baseball bugs, are wondering what they are going to do on Sunday afternoons when the baseball season closes. Their wives suggest that they might stay at home occasionally or go some place with them.

### Western Lines Cincinnati Terminals

Correspondent, JOSEPH BEEL

Extract taken from Los Angeles Bugler, September 24, 1922: Registered at the Ambassador today is James L. Flanagan and wife from Cincinnati, Ohio. Our special interviewer was detailed to interview Mr. Flanagan and with some difficulty he succeeded in being granted an interview which lasted five minutes:

Interviewer: Mr. Flanagan, Los Angeles feels highly honored in having within our midst this day such a prominent personage as yourself. I represent the press and I feel confident that the people of Los Angeles would like to hear from you through the press.

Mr. Flanagan: It is needless to say that from the demonstration on my arrival in your city beautiful, I am highly elated and you can say to the people of Los Angeles that it is my esteemed pleasure to be in your city for a fortnight or so.

Interviewer: Mr. Flanagan, as chief yard clerk at Cincinnati on the Baltimore and Ohio Railroad, do you think that the railroad difficulties of the past will continue?

Mr. Flanagan: It has been three years since I have taken a vacation and while I am at rest I do not care to discuss matters pertaining to business; pleasure and recreation I am seeking at this time. The interview is closed.

There was a rendezvous in town,  
That gained for some folk great renown,  
Here they played the Sport of Kings,  
Craps, and many other things.

Fortune hunters sought the place,  
And many left with saddened face,  
Yet, not on all did fortune frown,  
For two we know have gained renown.

Shindler and Davis from Stock Yards  
came—  
They played for luck—They bucked the  
game;

But luck seemed but a loss of time—  
For in their jeans they'd ne'er a dime.

Says Shindler to Mose: "Stake me a ten,  
I'll make a cleaning, and then,  
I'll buy matzo and good things for you,"  
"Not on your life," said the little Jew.

So without Shindler, Davis went,  
Luck favored him; he was content—  
Two hundred or more—The amount of  
"tin—"

With Schindler outside, looking in.

Now Shindler wears a worried frown,  
And the rendezvous is o'er in town.  
But Davis is wearing good clothes galore,  
And swears he won't play any more.

A-rat-a-tat-tat on the old office stairs,  
And up pops a head nigh shorn of its hairs,  
For where 'ere this day had been tresses  
quite long,  
The most part of these have quite vanished  
and gone.

The beautiful coiffure is a thing of the past.  
Though the present effect we sure hope will  
last,

For Grace is a person whom we all do know,  
Wears short hair much better than that  
which doth flow.

We are glad to see A. R. Hunter, clerk to  
division engineer, back on the job again  
after a serious attack of pneumonia. Mr.  
Hunter has only been with us five months,  
having been transferred from Jenkins, Ky.

Irwin Heim, rate clerk at 2nd and Smith  
Street Station, is the proud owner of a new  
Mitchell and is enjoying trips  
through the surrounding country.

Howard Martin recently made a  
trip to Dayton, Ohio, with the  
Official Board of the College Hill  
Church, where the conference was  
in session to select a minister for  
the coming year.

L. A. Cordie, agent, Cincinnati,  
has a new Buick. Best wishes for  
many hours of pleasure.

On October 7, Fred Grannemen,  
bookkeeper, Accounting Department,  
2nd and Smith Streets, led  
to the altar Miss Ruth A. Groskort,  
one of the most beautiful young  
ladies of Covington. The ceremony  
was performed in the Methodist  
Church. After the festivities were  
over, Mr. and Mrs. Grannemen left  
for Miami, Fla., to spend their  
honeymoon. On their return they  
will take up their abode with the  
bride's parents. Best wishes for a  
long and prosperous life!

Carl Sturm, claim clerk, 2nd and  
Smith Street Station, was quietly  
married on September 30, to Miss  
Myrtle Riley, Bellevue, Ky. Their  
honeymoon was passed at Cleveland  
and Buffalo. Best wishes from all  
the clerks!

By H. H., Superintendent's Office

There is a young lady  
We all know quite well,  
Who is melting away,  
Just why none can tell.

Each day she appears,  
With a pound or two less,  
And to see her this way,  
Drives us mad we confess.

Some time in the future,  
Not so far off, it seems,  
This lady will surely  
Just fade into dreams.

Or else soon hereafter,  
As a mist drifts us by,  
We will say to each other,  
"There's our Sue" and just cry.

### Freight Traffic Department Southwest Region

Correspondent, E. H. GARDNER  
Assistants,  
C. C. TROY and C. A. BOYD

We are glad to say that employes  
of our department are taking advantage  
of every opportunity to assist the  
Passenger Department in securing  
passenger traffic. Those who have  
been particularly successful in this  
respect are A. S. Tullis, C. W. Lally,  
B. L. Harris, A. H. Reed, G. T. Barriek,  
C. A. Her and C. E. Hall. It is prob-  
able that the assistance of other  
employes of this department  
resulted in increased passenger

revenue to our Company, but we have not  
their names.

Howard Reed, secretary to the Lillies of  
the Valley Troop of Newport Girl Scouts,  
will assume the roll of "Heavy" in an  
operetta to be played by the entire troupe.  
The play will be "put on" about the first  
week in December, and will be attended by  
all the employes of the General and Dis-  
trict Freight Offices and Freight Tariff  
Bureau, as the guests of Mr. Reed, entirely  
at his expense. If you haven't the details,  
Howard will be glad to supply them.  
HURRAH!

Bob, Dick and Frances, children of Roundhouse Foreman Frank R. Doyle, Massillon

When it comes to singing the "Latoria Blues" you have to hand it to "Johnny" Maxwell, "Charlie" Boyd, "Jack" Wayman and "Charley" Lally. They are "way out there" with the harmony stuff.

Urban Menke, junior member of the Tariff Bureau, brother of the famous "Horseshoe Lou," Beau Brummel, "Dansanter extraordinary," and what-not, had a date the other night with no one other than Edith. A good time was had by all.

The offer of the Management to award \$100.00 to the employe submitting the best idea for a trade-mark should certainly result in a number of ideas being sent in by members of this department. Get busy, boys and girls, and see if one of us can win, not only the monetary prize, but the honor that goes with the award. Full particulars as to the rules of the contest were carried in the September issue of our MAGAZINE.

Announcement of the death on September 21 of Charles Ingels, former assistant tariff compiler, after an illness lasting several months, came as a shock to every one who knew him. It was reported several days prior to his untimely demise that his condition was favorable, and that he was showing improvement. Therefore the announcement occasioned both surprise and deep sorrow.

By his quiet and unassuming ways Charley gained the friendship of all with whom he came in contact, and his absence will be felt for some time to come. Deepest sympathy is extended to his family.

Our appeal for photographs has had no effect. Wasamatter? Don't *knwobody* take no pictures????

### Akron Division

Correspondent, J. A. JACKSON  
Massillon, Ohio

Correspondent, W. E. Brugh

Miss Ethel Donahue, clerk, Freight House, has returned from her vacation. Miss Grace Wock filled the vacancy during her absence.

Yardmaster A. H. Brown, Massillon, recently resigned his position, and is now running the first district run at Massillon.

Conductor J. M. Dechant has been acting night yardmaster, Massillon, vice F. C. Bumgarner, assigned to position of acting day yardmaster.

L. W. Myers has resigned his position of yard clerk, Massillon, to accept a position in a local printing office. Good luck to you, "Gov.!"

Arthur Stahl is now filling the position of yard clerk made vacant by the resignation of L. W. Myers. Take it easy, Arthur, you can handle the job.

The employes and officials at Massillon regret to learn of the death of Chester B. Campbell in Cleveland on Oct. 12. Mr. Campbell was our oldest passenger conductor. He entered the service in 1878 and worked between Cleveland and Massillon for many years.

If any of our young ladies want to know how to get a diamond ring, just ask Miss Jennie Eckroad, clerk, Freight House. Very simple, isn't it, Jennie?

The following new brakemen entered our employ at Massillon in October: M. M. Kyle, C. B. Snider, W. E. Robinson, P. S. Flanagan, W. H. Whiting and E. E. Gentzler. Much success is wished for you, boys!

W. L. Phillips, switch tender, M. & C. Junction, was transferred to position of brakeman on September 25.

Engineer W. A. Swihart, who was operated on for appendicitis in September, is rapidly convalescing. Good luck to you, "Swi!"

In the picture we have "Bob," "Dick" and Frances, happy children of Frank R. Doyle, our roundhouse foreman.

Brakeman Paul M. Carpenter has given up passenger service and has returned to freight service at Massillon.

Brakeman and Mrs. H. U. Brugh and son "Bobby" spent a week's vacation visiting relatives at Erie, Pa.

Keep Cars Moving

### Newark Division

Correspondent, B. A. OATMAN

Newark, Ohio, Station

We were grieved to hear of the death of Miss Ida S. Baird, sister of Division Operator E. E. Baird. Her death occurred at Zanesville Hospital on September 21. Burial was at Zanesville on September 23. We extend to Mr. Baird the heartfelt sympathy of our employes.

Yes, it was quite a re-union; we are not really over it yet. On September 18 at 6.00 a. m., a massive whistle, which has served as an alarm clock for Newark and vicinity for many years, blew loud and long, and for the first time for a period of seventy-nine days, the blowing of the whistle at 6.45 and 7.00 o'clock on the same date brought together a bunch of dandy good fellows who had been absent for seventy-nine days because of sickness, leave and otherwise. It was a pleasure to take a walk around the shops and watch the boys greeting each other. Plans are completed for making this a permanent organization on the Newark Division, meeting regularly 365 times each year.

Division officers and dispatchers were agreeably surprised on October 4 when they received a box of fine grape fruit from Operator S. D. Jackson, of Lore City, Ohio. "S. D." sent a line with the box to explain matters and we find that the grape fruit was produced on the plantation owned by Mr. Jackson in the Isle of Pines. Mention was made some time ago through the columns of the MAGAZINE of the fact that Mr. Jackson had purchased land for cultivation but we were really surprised to have the chance to sample such good fruit in so short a time. Some day "S. D." will retire from active railroad work and be king of the Isle of Pines. We are all with you, "S. D." and take this means of thanking you for your kindness and thoughtfulness in sending us the fine sample of your crop.

The squirrel club, the membership of which is made up of clerical forces in the Master Mechanic's Office, got away with a good start on the morning of October 11, at four o'clock. After a miserable ramble of eight hours, during which time it rained, they sauntered back to town with a bag of

Douglas Charles, son of Train Rider H. F. Wentz, Mansfield, Ohio

# YOU'RE NEXT!

THE WAY WE FEEL WHEN WE MEET "RED" FLOYD

MOOREHEAD + BRO.

Official dispatch from Newark: We have seen people who like to fight, but that "Red" Floyd doesn't want to do anything else

game far below the allowance of the laws of the state.

On the arrival of one of the party at his home, his wife looked over her husband's bag and exclaimed, "What did you bring these mice home for?" "Hubby" looked up with a sorrowful grin and had to "fess up" that he had brought back fifty per cent. of the trophies won on the chase. The specimens brought home for eating must have been small indeed, but at the offices, by magnifying the catch considerably, the result of the morning's hunt was not so bad.

Here's a picture of Douglas Charles Wentz, nine months old son of Train Rider H. F. Wentz, who has his headquarters at Mansfield, Ohio. Some boy, sure, and he looks just as if he had all the "pep" that his father has. No doubt Douglas will be a Baltimore and Ohio officer of the law when he grows up, and if our prediction proves true we feel sure that Douglas will be a real officer. We are indebted to H. F. Wentz for a cartoon which graced the pages of the Newark Division's section of the September MAGAZINE. The columns are open to "H. F." whenever he has time to prepare another offering.

**A Boy, A Battleship, A Girl and a Horse**

By A. S. WAHL

Yard Clerk, Newark, Ohio

Scene 1—A Country Road.

Time—Dusk.

Characters

Buck Hankinson—The Boy.

Any Body—The Girl.

Chevy—The Battle Ship.

Maud—The Horse.

ACT 1.

Slowly the sun is sinking in the West, Beside him sits the one he loves the best, Old "Chevy" rolls smoothly (?) o'er the road,

Proudly she carries her precious load.

They round a curve at tremendous (?)

speed,

And there in full view stands a steed,

"Buck" puts on the brakes with a tearing crash,

("Oh why with the gas was I so rash?")

His thoughts race back in that moment of fear,

(What had he done to bring death so near?)

The horse rears up, front feet in the air, Comes down on the hood, fair and square.

"Look out, old fool!" he loudly cries, But the poor old horse just gasps and dies, And as the old horse breathes his last, The raging farmer comes rushing past.

"You've killed my horse worth 200 bones!"

His only answer was Hankinson's groans, The rest of this "tail" is too sad for words, For further information—see "Hank."

Columbus, Ohio

Correspondent, R. KENNETT

With regret we announce the accident which befell Operator D. Letherman, Cleveland Avenue, recently. In going downstairs for coal, the banister broke, causing him to fall and sprain his ankle. We are glad to know that he has fully recovered from the accident.

Leverman M. Krumm, N. & W. Crossing, recently spent a two months vacation visiting points in Michigan. Operator C. I. Price, Heath, spent his vacation sight seeing around New York and Washington, D. C. T. M. Broughton spent his vacation visiting Cleveland I, Buffalo and Syracuse.

With regret we announce the illness of Brakeman Frank Wolfe, who has been laid up about thirty days because of an attack of quinsy. From all reports he is improving nicely.

Brakeman H. R. Schultz and Yard Clerk Wurjack attended the Ohio State-Minnesota football game at Minneapolis on October 28. Wonder if they really did get out of the station on this trip.

For bicycles and race horses, see Switch Tender Allen, Fourth Street.

Operator George Ayres, N. & W. Crossing, recently took a week's vacation, spend-

Please mention our magazine when writing advertisers

ing most of his time at Picketon, Ohio. G. Y. M. Decker spent his vacation touring through Indiana, Illinois and Michigan. We are glad to see our old friend Gus Scheffler back on the job after taking a three weeks vacation.

Round House Foreman Van Blaricum was recently called to Medina because of the death of relatives.

Dispatcher Fisher recently took his vacation and while away his home was broken into and a quantity of wearing apparel stolen. Pretty tough with winter coming on.

## Where the Trained Man Wins

"Arrangements have been made with the International Correspondence Schools to conduct their system of instruction among the employes of the Canadian Government Railways, as they have been doing for years among the employes of other railroads throughout the Dominion with great success. Years of observation have convinced the management that the work of the Schools is beneficial to railway employes and the service generally."

—CANADIAN GOVERNMENT RAILWAYS. Circular No. 11.

Whether you are in the engineering, operating, maintenance or clerical departments, your advancement will depend largely on the thoroughness of your training. And whether you are going to be a trained man or not—whether you are going to advance or stand still—is largely a matter for you to decide.

If you really want a better job and are willing to devote a little of your spare time to getting ready, the International Correspondence Schools can help you. More than two hundred and fifty of the railroad systems of the United States and Canada have endorsed the I. C. S. method of instruction and recommended it to their employes.

You're ambitious. You want to get ahead. Then don't turn this page until you have clipped the coupon, marked the line of work you want to follow and mailed it to the I. C. S. for full particulars.

Marking the coupon is simply the act of investigation—in justice to yourself you can't afford to do less—and it doesn't obligate you in the least. Mark the Coupon NOW.

TEAR OUT HERE  
INTERNATIONAL CORRESPONDENCE SCHOOLS

We had in our midst recently Engineer "Mack" Senff. He was struck by a street car at Spruce and High Streets some five months ago and is just recovering from the accident.

Operator A. R. Sprague, East Columbus, recently spent a week sight-seeing at Chicago.

We are pleased to announce the wedding of Operator R. C. Hines, Black Lick, to Miss Lucille A. Friend, Columbus, the happy event taking place on September 6.

We are sorry to hear that Conductor C. E. Cowan has caught that dreadful disease "Fliveritis."

For information relative to the large bass in the Ohio fish and game car, ask Yard Clerk McCormick or "Brother" Elliott; they know.

Switch Tender William Hickey has taken a leave of absence and departed for California for the winter.

We extend congratulations to Brakeman and Mrs. Burgeois on the birth of a baby boy on September 27.

Harry Dodds, secretary to Senator Wilfis, Washington, D. C., formerly employed in Cashier's Office, greeted old friends here recently.

Dispatcher H. S. Conley spent a week of his vacation sight-seeing in New York. Night Yard Master L. E. Smith recently took his vacation, spending a few days at Toledo. He says all he did was to work. Operator C. W. Kimbrel, East Columbus, recently spent a week's vacation at "the old home town." Wonder if he saw Marshall Otey Walker and Aunt Sarah Peabody while he was there.

Operator O. A. Finley, East Columbus, injured his leg recently, causing him to be absent from duty for a few days. Passenger Conductor Charles Robuck is back on his run after being absent two weeks because of illness.

#### Marietta, Ohio

Correspondent, G. R. STEEN

September 30 was a great day in the life of our "Ex. and W-B" clerk, Joseph Miller Reed, and the Mrs. (commonly known as "Jiggs and Maggie." On this day they set forth to have their highest ambition realized by going to see the great city of New York. It was a great week of preparation and excitement. Mrs. Reed burned the meat and forgot dinner altogether on one day. As to "Jiggs" himself, well, you have the say of the office force that he was no good all week. This matter can be overlooked because "Jiggs" was born and reared out in the vicinity of Barlow, a place noted for the raising of cattle. Then too, no other young man of his day and age ever made a trip to New York and paid his own expenses.

But to use "Jiggs" word for it, they went out "to paint the Great Me-Trop-o-lus up in great style." They carried with them a list of places and things to do and see that the original New Yorker himself has never seen or heard of, a two-month's job. Yet all had to be crowded into one week. And speaking of clothes, Man, "Jiggs" went over there to set the city afire. He himself looked more like an advertisement for the Mark & Levy stores than the original does. As they say in the movies, "three days have elapsed," and behold who should show up on the first train early on Wednesday morning but "Jiggs and Maggie," looking quite travel-worn and ready for a few day's rest at Barlow. "Jiggs" gives us as their excuse for coming back so soon that

they ran out of the long green; but we have it from good authority that "Maggie" just said, "We are going back to Barlow." So home they came.

House Foreman O. H. Mickle had a fine time on an extended tour to Pittsburgh and other eastern points.

An amusing incident happened the other day to Baggageman Herman Henry. While walking down Putnam Street his attention was attracted to something pretty nice on the other side of the street. It seems that another personage coming from the opposite direction also had his eyes focused on the same object. The result was that they both came together with such force that both were knocked flat on the pavement. Herman, after regaining consciousness, said to his opponent "What the H-I you doing?" to which he replied "Same thing that you are." Moral: watch your step, Herman.

#### Mansfield, Ohio

Correspondent, C. R. STONE

A. R. Bird, popular yard conductor, Mansfield, spent several days hunting the little squirrels. After using enough ammunition to blow up Pier 21, E. R., he brought home a few chesnuts. Amsey, old boy, they must have heard you coming!

Glenn S. Berry, our efficient receiving clerk, Mansfield, recently spent two days in Chicago in connection with "The Lone Scout" and pleasure combined. Glenn's throat was sunburnt from gazing open-mouthed at the tall buildings. Glenn asked someone where Chicago was. He was told that it is somewhere near Sears and Roebuck.

Charles Kauffman, popular checking clerk, Mansfield, spent his vacation with his family at Youngstown. He says that he stored up a good deal of "pep" so as to be ready to dig in when he returns for duty.

C. F. Parks, supervising agent, Newark Division, who was in the city recently, paid us a visit relative to station routine. We are always glad to see Fred. He is a jolly good fellow and always has the interest of the Baltimore and Ohio at heart.

Samuel Kuhn, switchman, Mansfield, has purchased a Ford coupe with which he burns up the roads and all the gasoline at the same time. "Sam" says that she will make any hill look like a togoggan slide. From the noise she makes, we agree with him.

G. F. Sellers, ticket agent, reports that the passenger business is brisk. Many of our patrons are already making plans for holiday trips and week-end house parties.

Just now we are enjoying a business boom that will increase our revenue. Everyone at this station, from the agent down, is making every effort to keep things moving with as little delay as possible. We are glad to report that we are holding our own.

Trainmaster H. F. Wyatt was in the city recently. He told us that the empty cars are getting to be scarce as hen's teeth around Mansfield. This only goes to show that we are on the map.

A number of people have been trying to get ground located on Baltimore and Ohio tracks in order to get switching and storage facilities. There are now applications for these in our Baltimore Office. We predict that Mansfield is going to be a good manufacturing center.

S. T. Bride, our efficient baggageman, enjoyed a well earned vacation at Wash-

ington, D. C. We received a card from him saying that he was at that moment standing by Washington's monument, and because the elevator was not running he would have to climb the stairs and see for himself whether there were any cherries or hatchets at the top that might do for souvenirs. He found out, however, that the scenery is wonderful and that one is well repaid by making the trip on the Baltimore and Ohio.

Yardmaster L. L. Kerr says that the time is coming when the rabbits will be scarce. I suppose "Louie" means that will take place when he returns from his hunting trip. We trust that he will get a few anyway, as he is always generous and generally gives the writer a nice one so that we may have rabbit to grace the table once a year at least. Here's good luck to you, "Lou!"

#### Zanesville, Ohio

In the September issue of the MAGAZINE we published a picture of H. C. Grimm, ticket seller, and of Ticket Agent Jones. Because of a misunderstanding we called Mr. Grimm the ticket agent, and Mr. Jones the station agent. We are glad to be able to correct this error, for which we apologize.

—Associate Editor

#### Chicago Division

Correspondent, F. N. SCHULTZ

#### Willard, Ohio

Correspondent, CARL C. CLUGGISH

We regret to announce the death of Mrs. T. A. Maroney, mother of Caller "Joe" Maroney. Mrs. Maroney had been ailing for some time and her death was due to advanced age.

J. D. Peter's "button-pusher," West Bound hump, has returned to duty after being off for some time because of an injury received while climbing the steps at the hump office.

We are glad to announce the marriage of E. M. Wilson, our popular telegraph lineman, to Miss Rachel Bishop, Willard. The writer happens to be in a position to know that Mr. Wilson has secured an excellent cook.

The meetings of yardmasters and yard clerks are again being held at Willard after being temporarily suspended during the summer.

We have read the notes in the August MAGAZINE contributed by Correspondent G. B. Saumenig, Valuation Department, which were titled "Little bits of lubrication that make the wheels of the machine in the Central Building run smoothly," and found them very interesting. I beg permission to add:

No. 13. When talking over the telephone, always talk in as gruff a voice as possible and be as mean and curt as you can when called upon to give some information. Make the one who does the calling feel that he is under obligations to you for answering the phone. This always puts him in good humor and he feels better satisfied.

No. 14. Always give a new clerk the worst of the deal. Make fun of him when he makes mistakes and try to make him feel as uncomfortable as possible. Forget that you were ever a new employe. It does not count now and you have a perfect right to feel superior to him at all times.

We wonder how many more numbers can be added to the list.

A slight error was made by the correspondent in the August issue in announcing that William Cross had decided to enter

another occupation. William was merely transferred to the shops and has not deserted us entirely.

The baseball season at Willard has ended. The pennant was won by the K. of P. team, while second place went to the Elk team. There were several exciting and interesting games played. The managers of the different teams state that this has been a successful year financially, considering conditions.

The space between tracks 9 and 10 on the Newark Division has been converted into a space for storing material for the M. of W. Department. Much of this material has been transferred from Painesville. At the present there are over 100 cars of material on hand and much more will be stored. This necessarily means the employment of more men and quite a boost for Willard.

The Myrtle Avenue crossing at Willard is going to be paved by the Baltimore and Ohio. This has always been a bad place in the winter and spring months. Sidewalks were laid last year and the proposed asphalt pavement will help present a finished appearance.

### Chicago Terminals

Correspondent, THOMAS H. WILLIAMS

A mystery case has developed in the Terminal that is worthy of the best service of any detective agency. As we have not yet received the details of the case we can only give in brief what we know. The whole case hangs around the many trips which C. R. Briggs, accountant, Master Mechanic's Office, is making to Antioch, Ill. We expect to do a little gumshoeing and report further next month. Watch our next issue.

Among our telephone operators, we have one young lady who claims to have or thinks she has, too much avoidupois. She has been searching all the ads in all the magazines endeavoring to secure the quickest way to reduce without any work. She finally decided on the Wallace Records, and from appearances has been spending considerable time playing them. Then there is another operator who thought about the same as Rose, but who is taking another system, that is roller skating and dancing (mostly dancing), though she states she has on a skate at least once a week.

There is still another one in the same office, known as "Rattle Bones," who is not exactly in the same predicament; she wants to accumulate what the other two lose. She won't let us in on her system but from close observation I think it is working fairly well. Will report further progress of all three next month.

We understand from good authority that "Happy John" Maloney has been buying some more oats for the race horses at Hawthorne.

During the past month Cupid has been doing some sharp-shooting among some of our most prominent employees, especially at the Lincoln Street Terminal. Among those who were united in the bonds of matrimony are Miss Birdie Rosenberg, Master Mechanic's Office, and Kenneth Clough, Machinist; Miss Carey Latshaw, Master Mechanic's Office, and J. F. McCarthy, machinist, Lincoln Street. Best wishes!

Now that the outdoor sports are over and indoor sports have begun, the Terminal has organized a bowling league with the following officers: R. M. Irish, president; H. Levy, secretary; E. A. Mueller, treasurer.

The League is composed of six teams

# GASOLINE

## Think You Can Spell?

Here is a mighty good one for you. How many words can you make? Five, ten, twenty or more? Be the best speller and win a cash prize.

### Win \$100! Try It!

Household Magazine will give a prize of \$100.00 in cash to the person who sends in the largest list of correctly spelled words made out of the word "Gasoline," providing the list is accompanied by 25c to cover a one-year subscription to the Household Magazine. Every person who sends in a list of words with 25c to cover a one-year subscription to our big magazine—whether they win the \$100.00 cash prize or not—will receive a prize. See how many words you can make out of "Gasoline." See if you can be the one to win the \$100.

**THE RULES ARE SIMPLE** Anyone living in the United States may submit an answer, except no answers will be accepted from employees of the Capper Publications, residents of Topeka, or former cash prize winners in any Picture or Word Spelling Clubs conducted by the Capper Publications. Write as plainly as you can. Place your name and complete address at the top of the list. Number the words 1, 2, 3, etc. Make as many words as you can out of "Gasoline." A few of the words you can make are, "gas," "oil," "on," "line," "in," "goal," etc. Do not use more letters in the same word than there are in "Gasoline." Proper names, prefixes, suffixes, obsolete, and foreign words will not be counted. Words spelled alike, but with different meaning will be accepted as one word. Your list will not be accepted in this Spelling Club, unless it is accompanied by 25c to cover a one-year subscription to Household Magazine. In the event of a tie between two or more Club Members, each tying Club Member will receive a prize of the same value in all respects to that tied for. This Spelling Club closes Dec. 23, 1922, and as soon as your list of words with remittance is received, we will acknowledge the order, and the winner will be announced as soon after the closing date as the three judges can determine to the best of their ability who has submitted the largest list of correctly spelled words. Each participant agrees to accept the decision of the judges as final and conclusive. Webster's New International Dictionary will be used as authority.

When sending in your list of words and 25c, be sure to state to whom we are to send our big monthly magazine for one year.

**HOUSEHOLD SPELLING CLUB,**

**Dept. 1723,**

**TOPEKA, KANSAS**

representing the various departments. We roll every Thursday night at 6.00 p. m. and you are cordially invited to come up and look over the stars of our league. We will also introduce you to the ten beauties who have organized two ladies' teams, and bowl at the same time the men do.

Don't forget to send in some news items or a good picture. This means you.

### South Chicago

Correspondent, ESTHER J. SPREENBERG  
Clerk, Storekeeper's Office

Several changes have been made in the office force at South Chicago.

R. M. Shafer, former eastbound clerk, Wolf Lake, has taken a furlough, because of his father's continued illness; James Meyers, who held this position some years ago, is filling the temporary vacancy. In a previous issue, I mentioned the fact that Mr. Shafer had left the service. This was in error, he had only taken a furlough. We trust that Mr. Shafer's health will soon permit his return to the "fold."

Viola Frey, who previously worked in Mr. Altherr's office, is now permanently located in that office as stenographer. Esther Spreenberg has been transferred to Storekeeper's Office, 87th Street, under the supervision of C. H. McCrary.

"Casey" Breszinski, former labor foreman, Stores Department, has been transferred to Lincoln Street under the super-

vision of Storekeeper V. N. Dawson. John Gorney has succeeded him as labor foreman, South Chicago.

### Ohio Division

Correspondent, A. E. ERICH  
Secretary to Superintendent

The best way to advertise "this is a careless engine crew, they are wasting twenty pounds of coal a minute," is to have the pop valve open. Remember and help Save Fuel.

We extend our congratulations to Brake-man E. Z. Taylor, who was married September 25.

Miss Edith Woolfall, stenographer, Division Accountant's Office, will receive an I give prompt attention to all applications appertaining to the City Ordinance with respect to automobile parking. She guarantees to give applicants thorough and explicit instructions which will prevent autos being "tagged." We recommend Edith and can assure the MAGAZINE readers that she is capable of giving these instructions, being a valedictorian in the school of experience, and having graduated on September 23.

In our notes in the last issue of the MAGAZINE we promised to have a photograph of two inmates of the "Love Hospital," who finally, after a brave struggle, succumbed to wounds received from "Old Dan Cupid." They are Mr. and Mrs. (Mildred Curtis)

"DAD" GOFF AND MR. AND MRS. C. C. RUTHERFORD

Harmon Goff is the man who keeps things clean around Union Station offices, Chillicothe. He has been janitor here for four years

C. E. Rutherford, both clerks in the Division Accountant's Office. Here it is. "Rudy" and "Mil" (we can't get used to "Mr. and Mrs." Rutherford) were united in the holy bonds of matrimony on Wednesday evening, September 20. They left the same evening for their honeymoon trip to Cleveland, New York and other Eastern points. Congratulations and best wishes!

Another victim of Cupid's rampage is Charles Botkins, clerk to general car foreman, who on October 5, slipped away to Circleville, Ohio to be married.

of Columbus, Ohio, on a force account basis. It is not known at this time just how much area of the reservoir will be deepened, this depending upon the progress made, which will be chiefly governed by how soon the fall or winter rains set in. It is estimated that by November 15 there will be provided an additional capacity of 5,000,000 gallons.

Yardmaster Barman, Flora, has had added to his family a fine baby girl. Clem immediately took his vacation, but it is thought he surely will pass around the cigars when he returns.

Motive Power Employees and Enginemen Please Notice: Better late than never—so we have decided to call your attention to the fact that with the co-operation on the part of all concerned, during the month of June, 1922 not one engine was dispatched from Flora which ran an engine failure. Now come along, Mr. Machinist, Mr. Boilermaker, and Mr. Engineman; help us at this time, when there is business waiting for us at every turn, so that we can continue this record and make this division the best for safe and suitable power.

The belated vacations are now in full swing. T. J. Mac has done been and Zuke is now on his. There are several others away but we are only mentioning the more important ones, Ahem!

Vague rumors have reached us about Hubert John Himler, alias "Whoopie," and his trips to Chicago and St. Louis, but we seriously doubt the report of his walking along State Street with roasting ears protruding from each pocket. However, "Whoopie" is not without his accomplishments. He is an ardent devotee of the terpsichorean art and on numerous occasions he has rendered the Veiled Dance at various social functions and has always been the recipient of unstinted praise.

The Cincinnati Reds took the Washington Grays in a ten to six game at Woodlawn Park on October 4. The following Baltimore and Ohio employees were in the Gray's lineup. Leo Johnson, William Yeager, Roy Burris, C. E. Killion and John Hill, Car

Department, and Neill McClellan, Locomotive Department. We didn't expect you to beat them, boys, and we congratulate you for having the nerve to face the big leaguers.

It is the opinion of the chief clerk to division engineer that several of the girls in that department are to be married soon.

Mr. and Mrs. C. E. Newhouse have a fine eight pound daughter, Caroline. As soon as she grows a little larger, we are going to send her picture in for the MAGAZINE.

There is a certain "Big Little Girl" in the Master Mechanic's office, who is quite experienced in making hat crowns, luncheon sets, etc., and it seems as though some nice man should recognize her ability before long. It is also rumored that she is drawing plans to build a new house soon. One at a time now, boys!

[Note: Dear Miss Big Little Girl:

The Women's Department of the MAGAZINE would like to hear from you.

—Associate Editor.]

We are glad to report at least the slow improvement of Caller Frank Wright at Flora, who has been confined in the hospital for some time.

#### "A Bird in the Hand is Worth Two in a Tree"

The accompanying picture represents the endeavor of J. H. Frederich, assistant passenger car foreman, Washington shops, to assist his brother-in-law to rescue a pet parrot that had escaped from his cage. As the story is understood, the parrot lit in a fine peach tree, but was out of reach of the rescue party. Rather than lose the valuable parrot, the tree was sacrificed, but as the tree was felled the bird automatically deposited himself on a branch of another tree. Not desiring to spoil the entire orchard for the sake of one parrot, Mr. Frederich secured a rifle, intending to wing the bird and bring him down. Not being a very good marksman, however, the parrot was shot in the head. Mr. Frederich sacrificed a fine peach tree, his brother-in-law a valuable parrot, all account of Mr. Frederich's lack of ability to think to place a ladder against the first tree and grab the bird.

Storekeeper Manford Kitley, Flora, has become a radio "nut," and his home, in

Any news in the paper today?  
Heh! Shut that door!

Considerable interest is being manifested along the main line in Illinois over the better live stock and poultry campaign which is being carried on. O. K. Quivey, our general agricultural agent, is co-operating with the University of Illinois Extension Service in the development of this idea. Keen competition is on for the cash and educational trip prizes, the final test to be held at Flora on December 19. The three farm practices which have probably done most to make farming profitable in Southern Illinois are poultry, liming and dairying. This fact has been stated repeatedly by the leaders in agricultural development work and on this basis the work at the agricultural bureau has been planned. Accordingly a plan was evolved whereby the railroad agreed to distribute egg settings from registered hens to ten Boy and Girl Club members in each of the 14 counties traversed in this state. This resulted in the formation of 14 Baltimore and Ohio poultry clubs with ten members each. The plan further provided that these club members would have an opportunity of exhibiting their best pen of five birds at a county poultry show. A circuit of 14 county shows was arranged, culminating in the Baltimore and Ohio State Poultry Show at Flora. The winner of the first and second place in each of the county shows is urged to enter his best pen of five at the State Show at Flora, where the winner will be awarded a \$100 scholarship, which can be used for the short course at the University of Illinois, or to defray the expenses of an educational trip over our line to Washington, D. C., the trip to be arranged and conducted by representatives of the Railroad and in company with the club winners from other states. Agricultural Agent P. O. Hurley is in active charge of the campaign and circuit of shows.

#### Toledo Division

Correspondent, EDWARD M. MANNIX  
Roundhouse Clerk  
East Dayton, Ohio

We are now approaching the beautiful season of Thanksgiving, a forerunner for Christmas and New Year. Let us, at this glad season, give thanks to the Great Giver of all, for His many blessings.

We can now sing that glad refrain—"Hail, hail! The gang's all here!" The East Dayton Roundhouse looks spic and span, with its new coat of whitewash and paint, everything in its proper place, everybody smiling and best of all, with renewed confidence and

energy, looking to the future and with prospects never brighter.

Talk about preparedness for 1923! Here is a look-in on the activities of East Dayton. Our master mechanic, A. E. McMillan, with his new Safety Committee ready for business; Captain Russell Cable with his newly re-organized fire department for the three shifts. A new welfare committee under the supervision of General Foreman W. A. Gilmore, and all starting out with a determination to sustain the record so proudly claimed at our point. Fine!

Frank J. McManus, chief clerk to Assistant Superintendent J. W. Kelly, is now a full fledged attorney, having opened a law office in Toledo, Ohio on October 1. It is needless to say that he carries the respect and good wishes of all his Railroad friends as well as of his many acquaintances in his home town. Mr. McManus began his life's work on the Baltimore and Ohio and through his devoted efforts to his work, rose to the highest clerical position in his city.

A pretty wedding was solemnized on October 11 at St. Joseph's Catholic Church. The contracting parties were Arthur M. Kinninger and Miss Helen O'Neil, Master Mechanic's Office. The church was filled with their numerous friends who gathered to shower them with rice, and other tokens of Good Luck and to wish them "Bon Voyage" on their journey through life.

Our road foreman of engines, Messrs. M. P. Hoban, W. B. Kilgore and O. R. Stevans are right on the job, organizing the engineers and firemen in the fuel saving movement. They are determined that the Toledo Division will set a record that will be a criterion for our System. Their monthly bulletin will bring out some surprising facts along the line of Fuel Saving, as they are giving this matter their utmost personal attention.

Remember, men, we are now approaching the season of changeable weather with snow, rain, sleet and ice. The rails and walks will soon become slippery; the handhold and foot-hold on the cars will soon be covered with ice and snow and it behooves us to use precautionary measures to the fullest extent. Dwell seriously on these conditions; use your head for the saving of life and limb. Stop, look and T-H-I-N-K.

The late Mrs. Lucy Proctor

If you do this, you will lessen the chances of endangering your Safety, and set an example that others will follow.

T. B. McGarry has accepted the position of yard correspondent for our MAGAZINE. We predict success for "Mac" right off the reel. He will cover the yard activities fully from a general standpoint, Safety, and welfare, and will head the "Go-Getters" in all matters of interest to the Company and to the men. Success, "Mac!"

A new addition to our clerical forces is that of Edward Regan, Yardmaster's Office. Edward spent his early life on the Baltimore and Ohio, but for the past six years has been conductor on the D. T. & C. Edward is well and favorably known throughout the yards and we bid him welcome.

Our old friends, Charles Lough and Edward Conley, are back on the job. It begins to look like old times around East Dayton again where a greeting is always exchanged, and a kind word always spoken. Here let me quote the words of an old song—which we have all heard:

"Speak it gently ever, as life's weary way you wend

Unto a fallen brother, a sister or a friend,  
And no matter where you wander this motto you'll recall:

A Kind word does the most good—after all."

Hear about that party that "Mike" Kramer gave at North Dayton as pronounced by ye epicureans—the best ever? Sardines, sandwiches and ice cream. Some stuff "Mike," I'll say!

Now then comes James Rhodes with another one of those beautiful, fatherly smiles. "Jim" just can't help it—it's a great big boy about two months old. The cigars are on you, "Jim," El Verso or San Felice, either one.

After several years of close association with the engineers of the Toledo and Wellston Division I have yet to meet the first "knocker" among them. No matter how great the fault of others, they are blind to them, which surely shows a trait of character most worthy of men. It is a pleasure for me to have time to talk to such men as L. T. Tolby, "Pat" Flanagan, John Glynn, James Osman and several others. When I hear such expressions as "The boys are doing fine, Ed.," "Everything running smooth," "Engines getting better every day," as they express it, by golly, it puts new life into a man. That's the kind of stuff that gives us confidence in ourselves, wins the respect of our fellow workers and makes business for the Company.

On October 14 the sad news reached us of the death of Mrs. Lucy Proctor, mother of Machinist Frank Proctor, East Dayton Roundhouse. Her death occurred at his home, where she had been a resident for many years. She bore her sufferings patiently and with the same sweet smile that characterized her womanly life.

"Mother" Proctor, as she was always called, was ever charitable, kind and loving.

Her loving husband, William Proctor, died many years ago. Surviving her are her sons, Wilson, Rolla and Frank, and her daughters, Jennie and Lydia.

Many indeed were the beautiful floral offerings that surrounded her casket. She was buried in the family lot at Greencastle Cemetery beside her loving husband. As the rays of the setting sun shone upon her last resting place, the murmuring leaves seemed to say, "Rest to her ashes, and peace to her soul."

#### Superintendent's Office, Dayton

After being in the service of the Baltimore and Ohio for about eight years,

Superintendent's Office, Miss Margaret O'Connor left us to enter Good Samaritan Hospital at Cincinnati. Margaret left us with this assertion—"I'm not wishing anyone any bad luck but if you get sick, come down and I'll take care of you." We are looking forward to the time when we can refer to Margaret as a first class nurse.

From recent reports which are floating round, it will soon be necessary to have Captain of Police Vesely arrange to put a guard in the building to watch "Lou" Roehm's bicycle. Seems "as how" those tires do go down while "Lou" works but stand up all right the rest of the time.

Stoecklein still thinks he can drive a Dodge, even though "She aint what she used to be."

If anyone knows of a first class, up-to-the-minute stenographer, kindly see L. E. Fenner, as he is looking for one. He or she must be as good looking and as speedy as he last one. Don't forget.

#### Prose, Poetry and Truth

Contributed by A. R. McNAMARA  
Superintendent's Office, Dayton, Ohio

I'd like to be a boy again without a woe or care, with freckles scattered on my face and haysced in my hair. I'd like to rise at 4 o'clock and do a hundred chores, and saw the wood and feed the hogs and lock the stable doors; and herd the hens and watch the bees and take the mules to drink, and teach the turkeys how to swim so that they wouldn't sink; and milk about a hundred cows and bring the wood to burn, and stand out in the sun all day and churn and churn and churn; and wear my brother's cast-off clothes and walk four miles to school, and get a licking every day for breaking some old rule; and then get home again at night and do the chores once more, and milk the cows and feed the hogs and curry mules galore; and then crawl wearily up stairs to seek my little bed and hear dad say: "That worthless boy: He isn't worth his bread!" I'd like to be a boy again—a boy has so much fun. His life is just a round of mirth from rise to set of sun. I guess there's nothing pleasanter than closing stable doors and herding hens and chasing bees and doing evening chores.

#### Division Accountant's Office Dayton, Ohio

Correspondent, GERTIE MAE MCBRIDE

"He has achieved success who has lived well, laughed often, and loved much; who has gained the respect of intelligent men and the love of little children; who has filled his niche and accomplished his task; who has left the world better than he found it, whether by an improved poppy, a perfect poem, or a rescued soul; who has never lacked appreciation of earth's beauty or failed to express it; who has always looked for the best in others and given the best he had; whose life was an inspiration; whose memory a benediction."

On my return from Washington, D. C., recently, I saw a young couple on the train whom I sized up as "newly weds." When the conductor came around for the tickets I noticed that they had a Baltimore and Ohio pass, so I got into conversation with them and found them to be Mr. and Mrs. Geo. Harris, Cleveland. I asked them a few questions and they said they had been on a pleasure trip but I determined it was

A model engine built by the boys of The K. & I. T. Shops, Louisville, Ky.

a honeymoon. Finally I was convinced, and Mr. Harris—when he saw from my questions that I was guessing close—made the statement that they had been married about four or five months. I didn't believe it. Am I right, Clevelanders?

On September 29, we were surprised to return at noon and find laid out on the desk of General Clerk H. C. White, a box of the best brand cigars, cigarettes, and a large box of candy. The occasion was the arrival at the home of Mr. White of a baby daughter, weight 7½ pounds and claiming the name of Gwendolyn Ann. Congratulations!

"Eddie" Hartman made a catch the other day—two days later he made another catch—caught a mouse. What are you running, "Eddie," a menagerie? Since that time he has been classed as a gallant by the young ladies around his desk—as "said creatures" have been intimidating "said young ladies."

Time Clerk David E. Snyder and Mary E. Weaver were married on August 19 by the Reverend H. M. Massie, at the Hotel Sinton, Cincinnati. Those present included the bride's mother, and Mrs. Frank Staniel, Dayton, and Mr. and Mrs. Walter Stauss, Cincinnati. Dinner was served at the hotel immediately following the ceremony. "Eddie" and Mrs. Snyder will take their honeymoon later.

Will some of the "Dear Old Dads" please give D. F. Harker a little instruction in the art of quieting the baby when it becomes necessary to walk the floor from two to five a. m. with the little Miss Harker? The floors are getting cold now and somebody ought to have a heart.

The girls in the Division Accounting Office are right up to date when it comes to ear rings—you see red ones, green ones and various other kinds—but when it comes to bobbed hair, nobody has broken the tranquility of the office.

File Clerk Claude A. Buvinger, Superintendent's Office, and Gladys T. Patton, teacher of elocution, were married on September 4. After the wedding they started on their honeymoon to Colorado Springs, Denver and other points of interest in the West. We didn't learn much about it as Claude didn't say much but we did learn that they couldn't go to Pike's Peak on account of "heart trouble." Heartiest congratulations!

Assistant Motive Power Accountant W. E. Fox left us to enter Ohio State University. We are looking forward to the time when we can speak of him as "the Honorable Mr. Fox." Our best wishes for success follow him.

D. Wilson Hammond has entered the service in the Division Accounting Office.

All we have heard so far is "Hasn't he got pretty, rosy cheeks?"

Due to the genius of Donald Harker, the generous information has been given us that Maranville is a small hamlet situated near Redland Field, Cincinnati, Ohio. Anyone desiring further knowledge on this subject will kindly refer to Mr. Harker who now has been promoted to fuel clerk.

We extend to Miss Mary Myers, M. of W. labor distributor, and her family our sincerest sympathy in the death of her father, Henry C. Myers, aged 68, who departed this life on October 1, after a lingering illness of several years. He leaves to mourn his loss Mrs. Myers, three sons and two daughters.

J. E. Fortman was called to Cincinnati because of the death of his mother, Mrs. Lina Fortman, aged 65, who departed this life on September 29, after a brief illness. She leaves to mourn her loss four children. We extend our heartfelt sympathy in the death of this mother, especially to Chief Clerk J. E. Fortman and his brother, William Fortman, who is also a member of the Baltimore and Ohio family at Ivorydale, Ohio.

### Model Switching Engine Made by K. & I. T. Men

By J. L. Sigmon, Industrial Agent

THE above picture is of a model switch engine made by the men in our shops at Louisville last spring. It is made entirely of wood and sheet iron, and is 16 feet long, 4 feet wide and 7 feet high. During the Kentucky State fair this little engine was on exhibition, where it was viewed by approximately 225,000 people. And nearly 225,000 questions were asked about it. Nearly every child who saw it wanted it, and there were at least 25 of them who told their parents that they wanted Santa Claus to bring it to them for Christmas.

#### Load the Cars

A penny saved is a penny earned. A freight car saved by better loading is equivalent to the earnings from one ton of coal hauled half way around the world.

Load the Cars

## Pensioners' Roll of Honor

(Continued from page 41)

I have made good or not, but as we used to say, 'ask Baltimore.' That was 33 years ago.

"I am 70 years old, and it seems as though I am just going away for rest—but how well we know that as we move along the beautiful pathways, they quickly seem to fall away and we never return again.

"I often think of the remark made by my old friend, Z. T. Brantner: 'The old B. and O.! I love the sheen of the rails as they glitter in the moonlight!' And with a heart welling up with pride and gratitude, I repeat this, for when the dew is on our rails, to me they turn to threads of gold.

"In closing my active life, I have no regrets that I cast my lot with the Baltimore and Ohio. For 60 years it has been my asset, and for 47 years I have been drawing interest on my capital invested. I hope to continue doing so, and will, unless some Bolshevik comes along and pulls down the Flag."

### Martin D. Lapham

Marlin D. Lapham, pensioned locomotive watchman, was born near Mentor, Ohio, on December 12, 1849. He attended school in Mentor Township for eight years, and on leaving school he hired out on the Lakes, where he was in both grain and ore service. The boats then in use were sailing vessels, and it took just twice as long to make the trip from Buffalo to Chicago as it does today. Mr. Lapham, besides making this trip on the grain boats, also sailed between Marquette and Cleveland on the ore boats. He found many more hardships in connection with his work than on the modern lake boats. He remembers one trip which took seven days to sail from Buffalo to Cleveland.

Mr. Lapham entered the service of the Baltimore and Ohio on July 31, 1892, as ash-pitman. In 1893, when the Baltimore and Ohio took over the P. & W., Mr. Lapham was made boiler washer; in 1913 he was made engine watchman. He continued in this capacity until June, 1921, when illness made it necessary for him to stop work. Mr. Lapham says:

"I have worked under Foremen E. Freeman, E. Nedro, E. W. Scharndorfer, P. G. Hess, M. E. Iddings and E. F. Creel. I have always tried to give my employers the best that there was in me, and I believe that any of the gentlemen whom I have named will say the same."

### Samuel S. Marsteller

This picture shows "Sammy" Marsteller as he appeared in 1876, two years after entering the service of the Baltimore and Ohio. Sammy was born at Allentown, Pa., on August 11, 1851 and on November 21, 1874 he began his career with the Baltimore and Ohio as clerk, Connellsville. He worked there under the guidance of "Uncle Jim"

Snyder, who then was chief accountant of departments, handling all the accounts for the old Pittsburgh and Connellsville Divisions. ("Sammy" was originally a telegraph operator, and at this time he was bound from his home to California. He had stopped off to see "Uncle Jim," on a little visit, and it was "Uncle Jim" who induced him to take service with the P. & C.)

About five months later Sammy was promoted to the position of transportation timekeeper, handling time reports and making pay-rolls for all engine and train crews on the P. & C. These were the days when he put in about 18 hours each day in the year. This position he held for about ten years.

In 1884, he acquired a knowledge of stenography and typewriting, and Roadmaster W. T. Manning persuaded Sammy to come with him. This was Sammy's first work in the M. of W. Department. In 1885 the office was moved to Pittsburgh and Sammy went along with it. In 1894 the M. of W. Accounting Department was concentrated at Baltimore under the late Major Johnson, and Sammy, with chief clerks from other divisions, was moved there. In November, 1901 he came back to Connellsville as chief clerk to the division engineer.

Samuel S. Marsteller

When the present system of division accounting was inaugurated, Sammy, still on the job, was placed at the head of the Maintenance of Way Bureau, Division Accountant's Office. This position he held successfully until July 31, this year, when he was retired.

Sammy was and still is one of the many loyal Baltimore and Ohio employes, and his efforts and loyalty have not gone unnoticed. Here we have a shining example of patient industry, well and opportunely rewarded, and it is hoped by his many friends that he will live many years and enjoy his period of retirement.

On August 10, a surprise party was tendered Sammy at his home in Connellsville, at which were present about thirty-five guests. The evening was enjoyably spent, refreshments were served, and a handsome purse was presented to him. The only out of town guest was Assistant Auditor of Disbursements S. W. Hill, Baltimore, Md., through whose personal efforts the special consideration was given to Mr. Marsteller.

## In the Realm of the Riddle

(Continued from page 29)

I am frequently told by fellow employes of the Baltimore and Ohio of the interest they take in this department and the pleasure they derive every month in solving its problems. When I ask why they don't send in their answers the excuse is usually either they forgot until too late or are afraid their answers are not correct and might bring ridicule. This is altogether wrong, as you should encourage the department by sending in your answers no matter whether they are few or many; and, furthermore, no attempt at solving will ever be ridiculed even though the answer be far from the mark. I am continually explaining the whys and wherefores of puzzles to beginners and it would give me pleasure to perform this same service for you if you will only take the trouble to send in your answers and I find that you have gotten the wrong idea. The long, winter evenings are upon us and there will be many times now when you will want something to occupy your leisure and I can assure you you will find nothing more interesting, instructive and beneficial than solving some of these puzzles and building others like them.

## Why You Should Own Your Home

A home is the best investment you can make, and it will yield the biggest returns on your money.

It creates a feeling of assurance and independence.

It is the big step toward future happiness and success.

You need not wait until you have the full amount in order to begin purchasing your home. The Relief Department will help you finance the transaction.

By making monthly payments you pay for your home with the same amount of money, sometimes less than you are now paying for rent.

Each month your equity in the property becomes greater.

When you are living in your home you are not living in an atmosphere of uncertainty, worried and waiting for the landlord's notice of an increase in your rent, or still worse, those dreaded words, "Sorry, but this house has been sold."

You will be secure in the thought, "I will not be forced to move from the neighborhood in which I have lived for many years, now that I own my home.

"I can continue to worship in the same church; my children can continue at the same school, and I can continue the association and friendship of my neighbors."

You do not have to importune a landlord who is deaf to your urgent plea to fix the roof, the furnace or the porch. Any improvement—any changes in the house—may be made without consulting anyone, your wife excepted. And every improvement made increases the value of your own property.

When you own your home you add prestige to your standing in the community and among your business associates.

To own a home is a duty you owe your wife and children—almost as important as life insurance. In the event of your death, your family need not "move out" because they cannot pay high rent. You have left them something tangible.

Finally, the man who invests in a home is richer than the man who invests in rent receipts, not only in dollars and cents, but greater still—in peace of mind.

Why wait? Write now to Division "S," Relief Department, Baltimore, Md., for their loan plan.

This Superb 110-piece Set, with initial in 2 places in wreath, with 5-color decorations on every piece and gold covered handles, consists of:  
 12 Dinner Plates, 9 inches  
 12 Breakfast Plates, 7 inches

### The Unkissed Girl

Two bandits were holding up a train; one fellow, a big chap, walks in at one end of the sleeping car, and a little fellow walks in at the other end of the car.

The big fellow says: "Don't be alarmed; we're not going to hurt anybody; we're going to rob the men and we're going to kiss the women."

The little fellow says: "Aw, Jim, we don't want to hurt these women's feelings; all we want here is money."

There was a maiden lady in one of the sections, and she stood up on her feet and said: "You little feller, you shut up and mind your own business; the big feller's robbing this train."

—St. Louis Railway Club

### Out O'Luck

A small girl asked her mother, "If I grow up, will I have a husband like papa?"

"Yes, my dear," mother replied.

"And if I don't get married will I be an old maid like Aunt Susan?"

"Yes," was the reply.

The little girl thought for a minute, put her hands to her head, and said, "Well, I am in a fix."—Argonaut

### Oh! Boy!

Two ladies gay met a boy one day,

His legs were briar scratched;

His clothes were blue, but a nut-brown hue

Marked the place where his pants were patched.

They bubbled with joy at the blue-clad boy

With his spots of nut-brown hue,

"Why didn't you patch with a color to match?"

Come don't be coy, my blue-brown boy,  
Speak out!" and they laughed with glee.

And he blushed rose-red, while he bashfully said:

"That ain't no patch; that's me."

—Railroad Rel Book

### Competitors

Two little English girls were quarreling over the success of their fathers.

"My father can preach better than yours because he is a bishop," said the first.

The second little girl could not answer her back, but she suddenly recovered and said: "Well, anyhow, we've got a hen in our yard which lays an egg every day."

"That's nothing," said the bishop's daughter; "my father lays a corner-stone every week."—The Van Raalte Vanguard

### He Won

A young but exceptionally brilliant professor in a Western college was dismissed from the faculty because of his inordinate betting. The president, interested in his career, secured him a position in an Eastern college. To the president there he wrote: "The young man has a promising future,

and anything you can do to cure him of betting will be a benefit to society."

The professor went East, and was cordially received. Conversation had proceeded but a few minutes when he said to the president, "I'll bet you seventy-five dollars you have a wart between your shoulder blades."

The president hesitated. "Young man," he said, "I never bet; but just to teach you a lesson I will take you up."

He thereupon proved to the young man's satisfaction that he was in error, and the professor paid the seventy-five.

The president wrote West relating the incident, concluding—"I hope that I have cured him."

The other wrote back: "I fear the case is hopeless. The very day he left here he bet me one hundred dollars that he could make you take off your shirt."—Judge

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 40,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

C.H.D.

# GIFTS THAT LAST!

Jewelry and Silverware are acceptable Christmas gifts that last a lifetime. We especially recommend for Christmas such gifts as

- |                                 |              |          |           |
|---------------------------------|--------------|----------|-----------|
| Watches                         | Mesh Bags    | Clocks   | Rings     |
| Bar Pins                        | Vanity Cases | Brooches | Bracelets |
| Tableware in Sterling and Plate |              |          |           |

*Remember that any employe of the Baltimore and Ohio can purchase any watch, chain or charm in our stock through pay-roll deductions at cash prices!*

## The Baby.

Whose merry eyes are ever bright?  
Whom do I love to have in sight?  
Whom do I cuddle up at night?  
The baby.

Whose dimpled arms my neck entwine?  
Whose cheek lies closely pressed to mine?  
Whose smile is sweeter far than wine?  
The baby's.

Whose ringlets do I tend with care—  
And learn to know each fluffy hair  
More precious than a jewel rare?  
The baby's.

Whose cooing laughter grips my heart?  
Who seems to me a wondrous art?  
Who from me ne'er does wish to part?  
The baby.

Who'd shield me from myself alone—  
Should ever knifing sorrow come  
Across the threshold of my home?  
The baby.

Who shares all happiness with me?  
Whose little heart just longs to be  
With mine in peaceful harmony?  
The baby's.

And every night through filmy air,  
The wind, my winged messenger,  
Takes up to Heaven this, my prayer  
For baby:

"Almighty God: Help us each hour  
To rightly tend and teach this flower,  
The choicest of the Human Bower,  
Our Baby."

# BALTIMORE AND OHIO MAGAZINE

*Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote efficiency and community of interest among its employes*

VOLUME 10

BALTIMORE, DECEMBER, 1922

NUMBER 8

## What Is the Christmas Message of the Year 1922?

IT is a fortunate thing that Christmas comes once every year. It is fortunate, too, that in the Divine plan, "once a year" is often enough to touch us with the inexpressibly beautiful something that we call the Spirit of Christmas—to touch us at just about the time when the accumulating troubles of the waning year have turned our hearts and minds bitter almost to the point of hopelessness.

This waning year has been just such a year. It started with high hope but during its course made us—as a business family, as a nation, as a world—run the gamut of misunderstanding, perplexity, suffering, fear and despair. Even the darkest days of the Great War seemed understandable and bearable in comparison because then we were united against a single enemy and our common purpose gave us courage, strength and hope. Now the world seems to have gone mad with jealousy—with Christian thousands being blotted out of existence by the shadow of the sinister Turk, with the oldest civilization of Europe seemingly tottering, with our own country seething in a wave of unrest and crime, with our Railroad crippled by an unreasoning selfishness—yes, this has been a year to shake the most steadfast soul and to test the strongest idealism.

What, then, is this year's Christmas message?

It is well to remember at the outset that notwithstanding the pæan of the angels, "Peace on Earth, Good Will to Men," the coming of Christ did not bring peace. On the contrary one of the first things it brought was the slaying of all the children two years old and under, in Bethlehem and thereabouts, that King Herod and his soldiers could get their hands on! (In passing it is fitting to remark that civilization has moved upward since then—literally we have no monsters today who are "outheroding Herod.") And from the slaying of these helpless ones down to the dark hour of the Crucifixion, Christ's life was like our lives in its portion of sorrow except that his sorrows were more overwhelming and all out of proportion to his joys, as compared to ours. Never did man suffer as He did.

Let us not, therefore, feel disappointed because the angels' song, "Peace, Good Will to Men," seems not truer now than it was then. Let us, on the contrary, use it in its revised phrasing and see if we cannot be content with life and conditions as we sing, "*Peace to Men of Good Will.*" There, indeed, is the true message of this Christmas and of every other Christmas, and you, my friend, will know that it is true if you have the Good Will it speaks of in your heart.

There is a Christmas greeting in this issue of our MAGAZINE for all persons in the Baltimore and Ohio family—and for their families—and it comes from men of good will. Just how much it will mean to us during the holidays and the days of the coming year depends on how we receive it. The first Christmas message *did* bring happiness and peace to *men of Good Will*—and so will this one!

Several years ago the MAGAZINE's Christmas message suggested that there are two great Christmas stories that everyone of us should read at the Christmastide. The first is the inspired Bible story, the second Dickens' immortal Christmas Carol. This year we ask especially that you read also our own Christmas story, "When Christmas Came to Cove Crossing," a few pages over.

## This Started as a Christmas Message but Ended by Being an Appeal for the New Year

*Fellow Employees of the Baltimore and Ohio:*

On November 4 plans were completed for this, the Christmas issue of the MAGAZINE. It was to be 96 pages long, to have a Christmas supplement printed in colors, to have a beautiful colored cover, and to be, all in all, the biggest and finest Baltimore and Ohio MAGAZINE ever published.

Now these plans have been greatly modified, the reason being given in the following letter from President Willard:

THE BALTIMORE AND OHIO RAILROAD COMPANY  
OFFICE OF THE PRESIDENT  
BALTIMORE, MD.

DANIEL WILLARD,  
PRESIDENT

November 6, 1922

My dear Mr. Van Sant:

It is necessary that special effort be made in all directions to reduce the expenses of the Railroad, and it is in that connection that I am writing this letter to you as Editor of the Baltimore and Ohio Magazine. There are at least two ways in which I think you can be helpful in this respect.

First, I suggest that you scrutinize carefully each item of expense in connection with the publication of the Magazine and arrange to reduce the cost wherever it can be done without real detriment to the Magazine itself. I should say that we might properly discontinue, at least for a time, the colored cover, which does not in itself add to the value of the contents. We might also reduce the size of the Magazine or number of pages and confine the Magazine more exclusively to Baltimore and Ohio subjects. I admit that this will take from the Magazine some of its most attractive features, but at the same time it will not necessarily weaken its influence in the Baltimore and Ohio Family.

Second, I cannot help believing that the great majority of Baltimore and Ohio employes of every rank and station feel a sympathetic interest in the success and reputation of the Baltimore and Ohio Company. At any rate they ought to feel that way and I believe they do. I think they ought to feel that way because every upstanding, right-thinking man or woman ought to feel personally interested in the success of his or her employer, assuming, of course, that the employer also deals fairly, and the Baltimore and Ohio Company does intend to deal fairly with everyone.

Assuming, therefore, that the majority of Baltimore and Ohio employes are interested in the success and reputation of the Baltimore and Ohio Company, I believe they will not only be willing, but anxious to help promote the success of the Company, and it is now particularly necessary that we should all do whatever can be done to make up as quickly as possible some of the losses sustained because of the coal strike and the shop crafts' strike during the last summer.

I suggest that you procure articles from different officers of the Company pointing out in detail how employes in their particular departments can help reduce cost of operation. I think you should also invite and encourage suggestions from employes of all grades and in all branches of the service showing how in their opinion greater economy of operation can be brought about.

The Baltimore and Ohio Magazine in its present form has been in existence about ten years. Its purpose, as originally announced, was to bring about a better understanding between the Management and the employes in all branches of the service, and to acquaint the employes as well as the public from time to time, with the policy of the Company. I have felt that in the field of activities just described, the Magazine has served a useful purpose. I wish now that for a while you would use the Magazine as a helpful agency for the purpose of stimulating thrift and economy in all the affairs of the Company. This, of course, is not to say that thrift and economy in the private affairs of each one of us are not equally desirable.

I would be glad to talk with you further about this matter at your convenience.

Very truly yours,

Mr. R. M. Van Sant,  
Editor, Baltimore and Ohio Magazine,  
Baltimore, Md.

President Willard's letter, it is noted, gives me two jobs: first, to reduce expenses on the MAGAZINE; second, to try through the MAGAZINE to get all employes to reduce expenses and to send in practical suggestions for savings on the Railroad.

#### A Smaller but Better Magazine!

The first task—of cutting the MAGAZINE—although unpleasant, is easy as compared with the second. Witness, therefore, in this issue, a reduction in pages from the proposed 96 to 80, the greater use of smaller type to enable us to save paper, and the elimination of a colored holiday supplement such as we have had in previous Christmas issues.

Greater savings will be made in 1923, beginning with the January issue. The Among Ourselves department will be curtailed in size, though we hope, not in interest; smaller type will be used more freely, and our attractive colored covers will be discontinued after this issue, the cover of which is, we think, the finest we have ever had.

#### "Many Mickles Make a Muckle"

It only costs \$40.00 net more to have a two color cover on the MAGAZINE than it does to have a one color cover—only one-tenth of a cent more per copy, with the present edition of 40,000 and over. But after the millions of losses which we suffered during the labor unrest of the summer, even such a small saving is necessary—and we are going to make it.

(This illustrates, in passing, the enormous opportunity for savings on the Railroad. Our operations are so big, our expenditures so heavy, that the saving of only a small fraction will mean much in the aggregate. Take coal as an example: it cost us almost \$17,000,000 in 1921. Now almost any fireman will admit that reasonable care in handling will permit the saving of one scoopful of coal in every ten—one-tenth of the bill, \$1,700,000 saved—enough to buy 850 of the finest steel underframe box cars with a revenue capacity running into the millions gross a year!)

Please don't think, however, that the MAGAZINE will be less interesting than heretofore. Rather we shall try to compensate for a less attractive looking MAGAZINE by making the reading matter more attractive. And here, by the way, is a chance which you have to help me by contributing to, and suggesting constructive changes in, the MAGAZINE.

#### Officers' Example of Teamwork

My request to our officers that they outline briefly suggestions for economy in their respective departments brought a fine response, all the principal phases of our work being represented by the thoughtful and practical articles which begin on page 8 of this issue. Won't you read them to see how much in earnest these hard-working leaders of ours on the Railroad are in this economy drive? They may suggest something which will help you!

#### And Here Perhaps, Is Where You Can Help Most

Now we come to my vastly more difficult job—the job of showing all employes the importance of this economy drive and of getting their help to make it a success.

I said in the October issue that I was sure that the feeling of our employes toward their work—their morale, as they call it in the Army—is better than it has been for the last ten years. And I reiterate it here! Wherever you go you can see that. On the track, on our trains, in stations, roundhouses, shops and offices—all over the Railroad—you hear men saying things about our officers and the way they handle our business, which make you proud of being associated with them. And you realize right then that if the good feeling of our employes toward the Company is going to make 1923 the best year in our history—that greatly desired result is already as good as realized.

But the question is—How are we going to translate that good feeling into realization? President Willard's letter suggests the way and I simply want to amplify it here.

For over nine years I have been sending out through the MAGAZINE appeal after appeal for help—for more car miles per day, for more business through employe solicitation, for articles on various subjects, for courtesy—in fact, for many, many of the innumerable evidences of teamwork that it takes to keep a great big business like ours running smoothly. And every appeal has been met with a quick and generous response! Now—in a real crisis for our Company, a crisis in which our failure to make good may result in injury to our credit and good name—I am making the supreme appeal to every reader of the MAGAZINE to help. And here is the plan:

The MAGAZINE is going to be a clearing house for suggestions for greater economy in the handling of our business—operations, accounting, traffic—everything. And every employe is invited to contribute his or her suggestion through this clearing house. Every suggestion will be acknowledged and referred to officers directing the particular work involved. Furthermore, when the suggestion is considered valuable it will be published in the MAGAZINE, with or without the name of the sender, as he or she desires.

We are sure that right now our business is conducted as economically as capable, conscientious and painstaking effort on the part of thousands of officers and employes can conduct it. But in an organization so big and with operations so varied and multitudinous, it would be strange if there were not still some leaks that can be stopped and the waste saved. And you may be just the one who knows of such a leak—big or small—and who, through force of circumstances, has never been able to stop it before. Right now, therefore, you are appointed a committee of one to report it and "stop that leak."

That, by the way, will be the name of the drive, and all suggestions will be addressed:

Stop That Leak!  
Magazine Office  
Mount Royal Station  
Baltimore, Md.

Will your suggestion be the first? The help is needed now—not next week or next month, but right now. The Baltimore and Ohio deserves the best that every one of us can give it and I believe that we are going to give it better now than we have ever given it before.—*Editor.*

# Stop That Leak! Stop That Leak! Stop That Leak!

## Conducting Transportation

At this moment two men stand out in my mind as profitable investments of the Baltimore and Ohio. Their stories here are worth reading—

(Signed)

General Manager Eastern Lines

**E**ACH and every officer and employe represents an investment made by the Baltimore and Ohio and it is our duty to see to it that a proper return is made upon the investment each represents.

There are many ways in which this return may be made. Obedience to instructions and careful observance of our Operating Rules will always contribute much to that end.

Maintenance of passenger schedules and the dispatchment of freight trains from terminals on the call will quicken the road movement, increase the available power for the handling of the traffic and, at the same time, effect a material reduction in overtime and cost of fuel.

The principal items of expense incurred in railroad operations are wages, fuel, materials and supplies. Interstate Commerce Commission statistics show the percentage of these items to the total, last year, as follows:—

Wages.....	46.9%
Fuel.....	9.5%
Materials and Supplies . . .	20.6%

Each employe has it within his power to effect some saving each day, and this is particularly true of those employes who are responsible for the handling and consumption of materials and supplies.

To obtain the best results, the General, District and Division Officers should, by personal contact with those in their jurisdiction, make clear the necessities of the present situation and how each, regardless of his position can assist in this time of need.

If it were possible, and I believe it is, to have every employe interested to such an extent that all will feel that the materials and supplies furnished for their use should be handled and used as if they were their personal property, the reduction in the cost of these items would be astounding.

It is true that many employes feel this responsibility and act accordingly, but the number of such employes must be increased if we are to accomplish the results which the emergency demands and which our Company is

Operator William H. Ziler, Great Cacapon, and the cedar bucket that has "gone to the well" thousands of times

entitled to receive. I have in mind just now two such cases:

In December 1891 a telegraph office was opened at Great Cacapon and William H. Ziler was installed as operator. He was given at that time, as a part of his equipment, a new cedar water bucket. Mr. Ziler is still employed as operator at Great Cacapon and the cedar water bucket is performing duty daily. Why? Because Mr. Ziler cares for the Company's property as though it were his own. For proof see the accompanying photograph of the Great Cacapon Tower, Mr. Ziler and the cedar water bucket which has served him for 31 years. Mr. Ziler has undoubtedly made proper return upon the investment he represents as it is

noted he has been continuously in the service of this Company for 39 years, with a clear record.

In June, 1921 it was believed possible to reclaim soiled red, white and green flags which had theretofore been thrown away. A machine for washing flags with steam was constructed by Master Mechanic Long and it proved so successful that one was installed at each engine terminal. A saving was effected at practically all such points. At Connellsville, Penna., J. H. Fleckenstein, who maintains the cleanest supply room on the System, realizing that it was his duty to do everything possible to effect a reduction in the expense of supplies, reclaimed during the period July 1, 1921, to September 30, 1922, a total of 25,266 red, white and green flags, which, if purchased, would have added \$2,318.76 to our operating expenses. Mr. Fleckenstein is another employe who feels personally responsible for the care of the Company's property and is surely making proper return upon the investment he represents.

It has been my pleasure to meet hundreds of our employes who have been just as interested in making savings for the Company as have these two—I wish there were space for me to name more of them. We are not, however, lacking for individual credit. We are all a part of a great team, playing one of the hardest business games that a man can tackle. It is not easy to win, and those of us who have been at the game for many years realize that the whole team and result are affected by the action of every single individual.

I repeat—every employe has it within his power to effect some economies daily, even though the amount may be small. This Company has on its payroll a monthly average of 51,742 employes. If each would save the small sum of five cents every day, either by increased efficiency or greater economy in the handling and use of fuel, material and supplies, it would result in a reduction in our Operating Expenses of approximately \$944,291.00 per annum. This at least, and much more, can be accomplished through personal interest on the part of each employe.

To that end: "Let Economy Be Our Watchword."

# Stop That Leak! Stop That Leak! Stop That Leak!

**Stop That Leak! Stop That Leak! Stop That Leak!**

## Motive Power

*Great accomplishments are the sum of individual endeavors—and your part is important. Mechanical Department employes have never failed to accomplish what they set out to do!*

(Signed) *George H. Emerson.*

Chief of Motive Power

*To the Employes of the Motive Power Department:*

I AM sure you have read Mr. Willard's message and his appeal for a reduction in expenses. I desire to point out to you, in a general way, some of the things which we may do which will help to bring about a reduction in our expenses.

The principal thing I should like you to do is to make full use of those devices which have been installed and those practices which have been inaugurated by the Baltimore and Ohio for the express purpose of reducing our expenses.

No surer way of reducing expenses may be found than by avoiding the need for incurring the expense. It is easier and many times less costly to fill grease cups than to renew rod brasses; it costs less to pack boxes than to drop wheels and true journals or renew axles; it is easier and costs less to put an engine in tram than to renew tires for sharp flanges. The prevention of premature renewals alone, would do more than any single item to reduce our expenses.

A sure way of reducing expenses is found in the intelligent reclamation of material and in continuing the use of material until it is fully worn out. Surprising results have already been obtained but much remains to be done. Everyone of us can lend much help upon this subject.

Much expense may be averted by using those devices which are installed to increase the service life of parts. As an illustration a great many of our engines are provided with flange oilers, which, if used as intended, increase the tire mileage and consequently the period between shopping. My personal inspections of many engines which have these flange oilers show that they are not always used and hence that the benefits which could and should be obtained from them are not realized.

A certain reduction in expenses may be made by properly lubricating

the parts of the locomotive. Particularly is this true of the hub faces of the driving and truck boxes. If this lubrication is applied at each terminal I am sure that the necessity for removing driving and truck wheels

for excessive lateral would disappear.

I urge that all of you carefully consider this matter. Many ways will suggest themselves to each of you that will assist in this work, remembering always that great accomplishments are the sum of individual endeavors and that your part is important.

The Mechanical Department employes have never failed to accomplish what they set out to do. I am sure that you will accomplish the same results in the reduction of expenses that you have in increasing output. It is not only the necessary thing to do—it is also the right thing to do.

## He Made His Job Big

*Reprinted from the Milwaukee Employe's Magazine at the request of President Willard, who knew the subject of the article, Dan Healy, and who can vouch for everything said in it about him*

Under the above caption, the Minneapolis Daily News of September 28 gave editorial space to the passing of Dan Healy, our world-famous and universally beloved old steward of the Pioneer Limited. In the following is set forth the reason why "Dan" reached the pinnacle of fame in his calling, and that reason was, fundamentally,—“He attended to his duties as if he owned the railroad.” If everyone on this railroad did as Dan did, there would be no room at the top for anyone else, the space would all be taken by employes from The Milwaukee Road. The News said:

“Dan Healy is dead. The news commands an important position in the columns of the daily paper.

“Yet Dan Healy was only a dining car conductor.

“There are hundreds, perhaps thousands, of dining car conductors in this country whose deaths would be chronicled nowhere save in the obituary columns. In the thoughts of most persons, even in the thoughts of most dining car conductors, like as not, it is held to be an unimportant position, one in which the opportunity for any real success is small.

“But Dan Healy was a successful dining car conductor. He is known all over the United States, all over the world as a dining car conductor, and there are literally thousands who counted it a rare privilege to dine with him when they were traveling.

“He is mourned today as the dean of dining car conductor, because he put his heart into his job. He saw opportunity in his task where other dining car conductors saw only a job. He saw possibilities. He put everything he had into it. He attended to his duties as if he owned the railroad and for that day was charged with the responsibility of doing that one special job as the owner of a railroad would do it. He was a royal host. He made the diners feel that they were guests. He looked after their wants as he would have wanted another dining car conductor to look after his.

“And so, whether he thought of it or not, he became not only a great dining car conductor, but a noted man, a man of whom the world spoke with high regard. He was not limited by the size of his job. He was big enough to make his job big. That is why the death of Dan Healy is chronicled in the big news. He was a big man.”

To honor and perpetuate his memory and service, the dining car on the Pioneer between Chicago and Milwaukee will henceforth bear the name “Dan Healy.”

**Stop That Leak! Stop That Leak! Stop That Leak!**

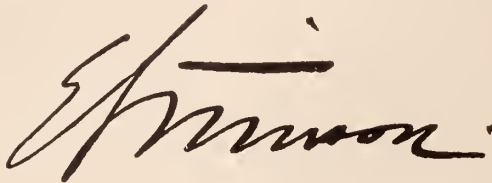

*Stop That Leak! Stop That Leak! Stop That Leak!*

## Maintenance of Way

*The "Man-Hour" has no resale value—when used it is gone forever. And what each "Man-Hour" produces is up to the individual man!*

(Signed)

Chief Engineer Maintenance

**M** AINTENANCE of Way expenditures are controlled by a yearly budget. This budget covers all items of expenditures and is the authorized program for the year.

The foundation of the budget is the renewal program, which includes the ties, rail, ballast, bridge, building and other materials necessary for the upkeep of the property. Upon this renewal program depends the amount of labor. The unit of measure of labor is the man-hour. The cost of the materials plus the cost of labor makes the total of the budget.

The amount of material to be used can be quite accurately determined and no more material can be used than is provided. We can, at best, but roughly estimate the number of man-hours required, so variable is their value.

Items of material may often be used and used again for other purposes, and in the end a scrap value recovered. A man-hour when used is gone forever, and its value is gauged only by what it has accomplished. If misused, it cannot be recovered and be used again. Its value then is zero and it has no scrap value.

While we may estimate the number of man-hours required to carry out the program, the varying conditions met with often upset the best of estimates. Here is where the human element comes in. The man produces the man-hour and it is up to the man what the man-hour produces. Much depends upon the direction he receives, but in the end it is his individual effort that counts.

The cost of the man-hours is the big single item of the budget. It frequently amounts to as much as all the other items put together.

The budget is carefully balanced between the units of material and the man-hours. If the man-hours do not produce and it takes more man-hours per unit of material than the budget provides, the units of

material must be proportionately reduced, the economic balance destroyed and the renewals suffer. The total of the budget cannot be exceeded.

The successful carrying out of the budget program therefore depends mostly upon the economic use of the man-hours. This depends first, upon the proper direction of the man-hours, *i. e.*, supervision; second and most important, upon the individual effort of each man whether officer, supervisor, foreman, mechanic or laborer, to give full measure of work well done for each hour.

Great economies can be effected by the conservative use of materials. We usually think of economy along this line and efforts in this direction must be continued.

However, at this time, when the necessity of greater economy of operation is so urgent, it appears opportune that the appeal be made direct to the man to contribute his full share and to make his man-hours of 100 per cent. value.

## Here Is a Record that Should Make Every One of Us Proud

It is never too early—or too late—in the year to make a good resolution. That thousands of Baltimore and Ohio employes have made good Safety resolutions in past years is evident from the remarkable Safety record of the Baltimore and Ohio. Think of it—

The last passenger killed in a train accident on the Baltimore and Ohio was on May 30, 1919 at East Monroe, Ohio when the heat from the sun caused the rails to expand and to buckle and to derail the train! Think of it—

Since that day to September 30, 1922 we have operated 724,256 passenger trains carrying 71,951,668 passengers over more than 5,000 miles of railroad!

Soon after Mr. Willard became president of the Baltimore and Ohio in 1910 he was asked where he placed Safety in the operation of the railroad and he said unequivocally: "Above everything else."

This was an inspiring reply and struck home, for it is doubtful if during the last twelve years any other railroad has had a more enviable record in the safe carriage of passengers than has the Baltimore and Ohio. This record has meant not only fine leadership, but also fine loyalty on the part of an army of our employes—loyalty not only to our leadership but also to the thought "I am my brother's keeper."

We could utter no more fervent wish for the New Year than that this splendid record may go unsullied during the next 365 days. Let the men caring for our track and the men preparing our engines and cars—let the men dispatching our trains, handling their movements, and operating them—let us all determine more vigorously than ever that "passengers shall be as safe on the Baltimore and Ohio as if they were in their own homes."

*Stop That Leak! Stop That Leak! Stop That Leak!*

# Stop That Leak! Stop That Leak! Stop That Leak!

## Utilization of Car Equipment

*What better way to economize than by increasing our Car Loads and Car Miles per day?*

(Signed)

General Superintendent Transportation

**W**E have been making a special drive to increase the net load per car, as well as to speed up the movement. Our mileage at present is averaging about 25 miles per car per day. If we could increase this one-fifth, or to 30 miles a day, it would be equal to an increase of 20 per cent. in cars available for loading.

On the heavier loading, I have been making special appeals, through the division superintendents, to the agents, yardmasters, and their forces, pointing out the necessity for conserving the use of cars, and particularly box cars.

The average empty car weighs about 20 tons, while the average load in a box car is a little greater, varying from 22 to 25 tons as an average. In other words, on every box car load moved the dead weight of the car handling the lading is nearly equal to the lading.

In order to serve the public best, and reduce the use of equipment and motive power, it is essential that business be not forwarded on a small carload basis, but that every available car be fully utilized by loading equal to its carrying capacity, according to the commodity. In so doing the shipper not only helps himself, but the country as a whole. And most shippers, if properly approached, are willing to cooperate.

An increase of ten per cent. in the average car loading not only increases the available equipment that much, but reduces the dead weight which must be handled. It enables the Railroad to move a greater amount of freight because the reduction in tonnage deadweight of equipment allows greater use of available engines and the consequent handling of more business.

The loading of freight in carload lots is done by the public, and it is only by the personal appeal of the employe in direct touch with the

actual shipper that results can be accomplished in this direction.

As an illustration of how important this is please note that in the United States figures show that 2,250,000 less cars would have been used in 1921 to handle the tonnage shipped had the cars been as heavily loaded in that year as they were during the last three months of 1920.

Another feature in which shippers can help is in the prompt loading and unloading of cars. There are, in the

United States, an average of 150,000 cars loaded and a similar number unloaded each working day, and if an average of 24 hours, or one day, could be saved on every ten cars handled, this in itself would provide the equivalent of 15,000 additional cars daily.

Freight cars were built for the TRANSPORTATION, and not for the storage, of freight, and during a critical time like the present it is important that such facts be brought home to the shipping public.

The loading of less carload shipments is done by railroad employes, and our intensive campaign on this feature has proved especially beneficial. The average loading per car of less carload freight in October of this year, for the Baltimore and Ohio System, was 18,900 pounds. Had the average loading been only as great as in October 1921, it would have required 11,532 additional cars to have handled the tonnage moved.

OFFICERS AND EXECUTIVE COMMITTEE, BALTIMORE AND OHIO RAILROAD ACCOUNTING ASSOCIATION

These faces are of the members of the Baltimore and Ohio Railroad Accounting Association, who posed for a photograph on the roof of the Baltimore and Ohio Building. Reading left to right, they are as follows: Front row: J. V. Klier, chief clerk, Valuation Department; R. M. Billmeyer, head clerk, Foreign Bureau, Auditor Passenger Receipts Office; A. H. Atwood, Auditor Merchandise Receipts Office. Second row: J. W. Myers, chief clerk to Comptroller; T. Parkin Scott, chief clerk, Savings Feature, Relief Department; J. W. Sweitzer, chief clerk to Assistant Comptroller Deverell; H. H. Wernicke, chief clerk to Assistant Comptroller Owens. Third row: George W. Ritter, claim accountant, Auditor Freight Claims Office; J. M. Finn, secretary of the Association, assistant chief clerk, Interline and Foreign Accounts, Auditor Passenger Receipts Office; F. F. Lollman, president of the Association, Auditor Merchandise Receipts Office; J. A. Zimmerman, vice-president of the Association, head clerk, Journal Entry Bureau, Auditor Disbursements Office; W. H. Orem, treasurer of the Association, Auditor Freight Claims Office; W. W. Moss, Auditor Merchandise Receipts Office. Back row: A. J. Groeninger, Auditor Merchandise Receipts Office; F. B. Milnor, chief clerk, Auditor Coal and Coke Receipts Office; C. J. Miller, head clerk, Motive Power Bureau, Auditor Disbursements Office; August Kleinheim, Auditor Miscellaneous Accounts Office; J. R. Boring, assistant chief clerk, Auditor Disbursements Office; C. V. Thomas, secretary to assistant to senior vice-president, F. X. Milholland; J. C. McCahan, Treasurer's Office; J. F. Waters, assistant chief clerk to cost engineer

## Accounting Department

*It Is Net Income We Want!*

(Signed)

Comptroller

ON June 30, 1922, the Baltimore and Ohio had exceeded our financial expectations for the first six months of the year, as expressed in the budget which was prepared early in the year, and there was every prospect of earning a surplus over fixed charges of at least 12 million dollars for the entire year. This would have been enough to pay those of our partners—the common stock-holders—who have received nothing since July 1, 1919, a dividend of at least four per cent. Now all is changed. Instead of a surplus of 12 millions the most strenuous efforts are needed to avert a deficit for the year 1922.

I wish to address myself particularly to the officers and employees of the Accounting Department. At the outset I want to say that I have the highest appreciation of what you have accomplished during the trying years of the recent past and I thank all who have given me such loyal support. But you can do more for the Company and for yourselves.

I want each officer carefully to review the work of his department and see what can be done to cut out anything not necessary, having in mind constantly the doing of the things that will increase revenues and decrease expenses so that the greatest net may find its resting place in the Treasury.

Go over the situation with your subordinates for the purpose of coordinating the work of your own department and then see whether anything can be done to help another department, be it accounting, traffic or operating. **It is Net Income we want.**

To the subordinate officers, including head clerks in charge of groups of employees, I say this:

Go over in detail the work of each employe, see that he is properly instructed and is doing his work in the best way. We must not have patience with a slacker if there is such in the service. I have no sympathy with the slacker, whatever, and the sooner he and the payroll part company, the

better. The Management does not want him and we have the word of the Clerks' representatives that they don't want him.

Above all things, deal fairly and justly with each employe. If a grievance is presented, hear it and adjust it properly and promptly. Do everything possible to promote harmony and secure the confidence and enthusiastic support of each employe. Invite suggestions that will promote economy and make the service more efficient. **It is Net Income we want!**

To the rank and file I want to say that more depends upon you than anyone else. The Management has desired and endeavored to deal fairly and justly with you—you should do likewise by the Management. A special effort and demonstration proving your loyalty to the Company you serve is now in order. On your effort depends the prosperity of the Company as well as your own prosperity. I appeal to you to make every minute count.

It has been my privilege to have come up from the ranks. I have been a clerk, a chief clerk, and so on, and know what is required to make a good one. I am acquainted with your troubles and also with your aspirations. And for the one who is endeavoring to render honest and faithful service I have the greatest sympathy and continue my pledge to do everything for your welfare that is possible.

### Past Accomplishments Promise Much for the Future

The clerical forces of the Accounting Department have accomplished wonders and I am proud of what you have done, but you are capable of doing much more and better work. Let each clerk see if he cannot find a better way to do his work. Each clerk works 480 minutes each day and a saving or increased efficiency equal to 10 minutes a day would be equal to 2,000 clerks to 20,000 minutes or 333 hours per day. This is equal to an improvement of only a little over

two per cent. but it means thousands of dollars per month in saving.

And who will say the two per cent. is not there? In fact, if you get started right it is only a beginning in what can be accomplished. Let each one of us see if we can make this extra 10 minutes per day. Let each clerk consider the Baltimore and Ohio his business as long as he accepts the pay of the Baltimore and Ohio for his services. Anything less is less than 100 per cent. honest.

Let each clerk see how much he can save in stationery, in pencils, etc., and above all—in minutes. It is the sum of these small things which makes the tremendous aggregate of expense at the end of the month. Let each revenue clerk see how he can check agents' reports and interline settlements in the most rapid and efficient manner, doing everything possible to secure to our Company the revenue to which it is entitled.

Let each disbursement clerk say to himself: "Should this dollar be paid?"—just as if it were his own—so that not a dollar will be paid from the Treasury, account of payroll unless it is legitimately earned, not a dollar will be paid for material unless our Company received it, not a dollar will be paid to an individual or company unless our Company has value received. See that every dollar due to the Company is promptly and correctly billed and collected. **It is Net Income we want!**

### Division Accounting Forces on the Firing Line

To the division accounting forces I want to make a personal appeal. The reason for this is known to you—it was under my supervision that your forces were established, and I believe everyone will concede that you have justified your existence. But you have a long way to go before I am satisfied. You are on the firing line, in close touch with the operating and maintenance officers, and for this reason are able to render the greatest service in promoting thrift, economy and efficiency.

Keep in closest touch and cooperate to the fullest extent with the superintendent, master mechanic, the division engineer and those directing the various operations. Watch the timekeeping and payroll as if they were your own. Check the material and fuel disbursements and call attention

## Freight Traffic

*The opportunity of the Traffic Department to cut expenses is limited. The obligation is, therefore, all the greater to make the most of every chance to save!*

(Signed)

General Freight Traffic Manager

THE success of a railroad organization is measured by the spread between the gross income and the cost of producing that income. A truism, indeed, but one well worth keeping in mind. The closer the line of cost ascends towards the line of gross income on the financial chart the greater the danger.

In railroad organization the Traffic Department stands between these two lines. Its chief function is to push the upper line to a higher level by securing more tonnage and getting more money on the tonnage handled. But it also shares in the obligation to keep down the lower line by jealous and constant watch on expenditures.

For almost two years general business depression has centered our thought on the upper line. The earnest and united effort of the Department to hold the gross income line to the highest possible level has been productive of no mean result. In time of traffic scarcity real zeal marks the effort to secure a thousand mile haul on a carload of freight. When tonnage offering approximates plant capacity that zeal is tempered with a practical consideration of service.

Now that the demand for transportation is approaching plant capacity and the line of gross income is reflecting this condition, we must increase our net revenue by reducing expenses.

It may be that a saving of departmental expense compounded over the entire system will more than equal the net revenue obtained from hauling several cars a thousand miles.

One dollar expense saved is one dollar added to net, not gross, income. Six dollars saved equals dividend on one share of stock at six per cent.

The opportunity of the Traffic Department to cut expenses is limited.

The obligation is, therefore, all the greater to make the most of every chance to save. Below are some items of expense that may be reduced:

### Traveling Expenses

The Company's interests are not served by parsimony but every effort should be made to hold expenditures to a minimum. Often night travel on sleepers will reduce hotel expenses.

### Telegraphing

The use of Western Union wires is not free. Telegrams, whether Western or line wires, should be limited to absolute necessity.

Use code for brevity.

### Telephoning

Long distance telephone should be used only when telegraphing will not do; the conversation should be brief.

Remember that the Telephone Company charges more for long distance calls when some particular individual is asked for. The cheaper call for the office should be used whenever it will serve the purpose.

### Postage

Watch your stamp account. Don't use U. S. Mail when train mail will do. Consolidate your mail for one firm.

### Lights

Turn out lights when not needed.

### Stationery and Supplies

Because of the large number of employes using stationery, here is the opportunity for the greatest number of Traffic Department employes to save. Every saving, however small, is worth while. Don't use whole sheet when half sheet will do. Double life of typewriter ribbon by inverting.

The making of requisition for and the custody of stationery and supplies should not be entrusted to a young and inexperienced clerk.

### Printing

The largest single item of expense we have is for printing, but we do not have complete control of the cost. We do control, however, what is to be printed and when. Care should be exercised to see that rate propositions are comprehensive so that all changes which may be foreseen as result of any particular adjustment may be provided for at one time, thus reducing the number of printing orders.

So far as practicable, effective dates of rate changes should be so fixed as to avert rush work which frequently means overtime for the printer—hence additional expense.

Copy sent the printer should be prepared with care. Corrections cost.

I am confident that the same zeal that marked the Traffic Department's efforts to hold up the gross income line during the lean period through which we have passed, will develop every practical means for holding down the cost line now.

## Accounting Department

By J. J. EKIN

(Continued from page 12)

o any apparent waste. These items mean four to five millions per month. Watch each one of the many avenues through which Baltimore and Ohio dollars are disbursed and see that correct data is supplied for billing for any service performed and supplies furnished others. **It is Net Income we want!**

### Do it Right—and Save

I want to impress upon all concerned the importance of doing the work correctly. It is correcting things that costs the Accounting Department so much money. The most expensive thing in railroading today that can be prevented is corrections of freight billing. Operating and Traffic Officers please take notice! The remedy is trained station forces and proper tariffs and simple divisions.

Now to the officers and each employe! I want to make an appeal for cooperation. Let us declare a holiday so far as complaints are concerned and get down to real business. The Baltimore and Ohio is a wonderful property, and by pulling together we can put it across, placing the Baltimore and Ohio physically and financially in the first rank where it rightfully belongs.

**It is Net Income we want.**

# Stop That Leak! Stop That Leak! Stop That Leak!

# Transportation Salesmanship

By C. H. Pumphrey

Division Freight Agent, New York City

**S**ALESMANSHIP! To be sure, salesmanship is the same essential function in the railroad transportation industry as it is in other manufacturing activities. The railroad is a producer of transportation and this product is for sale to the traveling and shipping public.

In the minds of most people transportation differs from commercial commodities, but essentially it is not materially different. As with all staple articles, of which there are many brands of varying qualities, so it is with railroad transportation. The railroads all offer for sale the same general commodity and use the same raw materials, so to speak, but in quality of performance the service on one road is vastly different from that on another road. Unlike other commodities, however, the sales prices for transportation are fixed and, generally speaking, are uniform. Therefore, the big talking point in selling transportation is to be able to offer SERVICE of a superior quality—or something better for the same money.

SERVICE embraces not alone the carrying of the passenger or shipment from point of origin to destination on time according to advertised schedules. It embraces as well courteous attention to the comforts of travelers; the affording to patrons of every reasonable convenience through prompt and efficient attention to inquiries concerning rate quotations, rate adjustments, location of shipments, etc.; the manifestation of interest and desire to assist in solving the traffic problems of shippers; and many other things too numerous to mention. But first in importance is the maintenance of advertised schedules.

In order that the salesmen may be equipped to offer service of the highest quality, there necessarily must be sympathetic understanding between the Production and Sales Departments—or to use the railroad expression—the Operating and Traffic Departments. The Production or Operating Department, which through initiative, ingenuity and efficiency produces a higher grade article of transportation and dependably maintains the quality thereof, gives to its Sales or Traffic Department something that should be productive of a healthy growth of patronage if it is attractively brought to the attention

of purchasers through able salesmanship.

During a period of years the Baltimore and Ohio Railroad Company has established a reputation for the good quality of its service, and following the return in March, 1920 of its property to Corporate Control, was first among the important roads to re-establish its service on a high-grade dependable basis. Coincidentally the Traffic Department was reorganized and these Sales Forces are laboring diligently to sell the productive capacity of the Baltimore and Ohio plant so that its operations may be expanded and its gross and net income increased.

In the selection of Traffic Department representatives a few years ago not enough thought was given to their ability as salesmen. Solicitation, the term generally used to refer to the activities of freight and passenger representatives, was not considered in the same category with Salesmanship. There is a growing tendency (and this especially is true on the Baltimore and Ohio) to select men for their knowledge of the article they are to sell. And this knowledge, combined with personality and indefatigable energy, cannot fail to bring business which, if properly handled, will be productive of satisfied customers and continued patronage. The basis of successful salesmanship is the ability to sell the same customer again and again. How much, therefore, depends on our service!

However, competitors in the field offering equally good transportation service, test the salesmanship ability of the men of the Baltimore and Ohio. To prevail against this competition it behooves the Baltimore and Ohio sales forces to consider how they may enhance their ability as salesmen. And this does not apply alone to the Traffic Department, for all employees can help in advancing the interests of the Baltimore and Ohio in selling its freight and passenger service.

## Are we up to Salesmanship Standard

But how can we improve our Salesmanship ability? First, we must learn the attributes of the ideal salesman and then take personal inventory of ourselves to determine wherein we are deficient. By studying our deficiencies and earnestly endeavoring to correct them, our value to the Baltimore and Ohio through ability to create more business, will not only be

increased but there will be the personal satisfaction which comes from the knowledge of greater competency.

A few months ago there appeared in the American Magazine an article by Dr. Frank P. Crane under the title of "Ten Commandments for Salesmen" which covers so thoroughly the salient qualifications for successful salesmanship, that it is reprinted in part here—

## Ten Commandments for Salesmen

Everybody is a salesman, one way or another. Not only the peddler sells the wares of his pack and the storekeeper the goods from his shelves, but the cook, plumber, farmhand and carpenter, as well as the lawyer, doctor, writer and preacher sell their services.

I am not going to approach the question from the standpoint of the Seller, however. I am going to approach it from the standpoint of the Buyer.

I will give my idea of the qualifications of a Seller, not as one who knows the art of Selling, but from the standpoint of the Buyer. It may be of advantage for you to know the kind of a person who can keep on selling me things.

These elements of Salesmanship may be called the TEN COMMANDMENTS OF SALESMANSHIP, and are as follows:

1. Be Agreeable
2. Know your Business
3. Tell the Truth
4. Don't Argue
5. Make it Plain
6. Remember Names and Faces
7. Be Dependable
8. Don't be Egotistic
9. Think Success
10. Be Human

### Be Agreeable

If there are two shirt shops in my block, and the salesman in the first has excellent goods cheap but is grouchy and unpleasant, and the second has inferior articles but makes me feel good whenever I enter his store, I trade with number two. So also will nine men out of ten. It is not sensible, it shows poor judgment, but we do it.

And I don't know that we are losers after all, for that agreeableness is worth something to us. Cheer is as valuable as silk. We can all use it.

*The very first and greatest of the facts a salesman ought to learn is that Agreeableness is worth money. Courtesy, politeness and accommodation cost nothing, but you can sell them.*

Of course, nothing must be overdone. You don't want to be too darned pleasant. When you smirk and scrape and wash your hands with invisible soap and water every time you see me, I get suspicious. Sunshine is good, but the sun can be too hot.

Don't lay it on too thick, but devote your time to me while I am in the throes of buy-

ing. Don't look bored, or supercilious, or go away and converse with somebody else, or tap your foot, or look pained when I don't fancy the purple sweater you have just told me is quite the rage. Just make up your mind to give me a good time if it takes a leg. It won't last long. I can't stay forever, and after I'm gone you can go out and get a glass of buttermilk. But while I'm with you act cheerful.

I am finicky, and perhaps, don't know what I want, and what I do know is wrong, and I have poor taste, and I'm a Rube anyhow, but don't forget that I have money in my pocket and your job is to get it out, and that the best known bait on the hook when you're trying to land a sucker like me is Agreeableness.

Don't be affected. Don't pose. Don't put on airs. The point is that what you are after, in fact, is not to get me to admire you, but to make me think you admire me.

You are paid to hand out Agreeableness, and we go to you for a dose. So don't be chary of it. Maybe we will spend some money with you. Better still, maybe we'll come again and spend some more.

But you may rest assured that if you are

churlly, gruff and brusque we will want as little to do with you as possible.

### Know Your Business

If you are selling coffee, find out all about coffee from the time it is planted to the time it is consumed; get acquainted with all the countries where coffee is grown, with the companies that market it, with the various varieties of coffee, with what the poets have written of coffee, with what the doctors and the cranks say of it, with its history, its chemistry, its botany, its geography, its distribution and any other stray facts or fancies appertaining thereto.

So if you are selling automobiles, know all the automobiles in existence, here and abroad, and all about gas engines generally, and the petroleum industry, and the motor trusts, the cost of leather, and tires, and rubber, and machinery, and everything else.

You can do all this in your spare time, while the other salesmen are busy at pin-ochle. Consult the encyclopedia, and the trade papers, and the public library. Because you should be able to tell me at once anything I want to know, should I happen to ask you.

It is amazing what you can do with your spare time, and what your spare time can do for you. Almost all of you waste enough hours in four years to give you what might be the equivalent of a college education.

And remember it is what is in your brain that is your best capital. No man is worth much more than three dollars a day, from his chin down. From the chin up is what counts.

*Make your spare time equip you. The secret of all success lies in saving the waste. And there is no waste so criminal as waste time.*

### Tell the Truth

All success that is permanent and continuous depends upon observing the law of averages. Even in playing poker. Or marbles. And much more in regular business.

And the trouble with a liar is that the averages are all against him. He only has one chance in a hundred. Human society is so organized that the truth has an enormous advantage. You may get by with a lie, and you may lose out by telling the truth; also, you may guess which card of the deck will be turned up first, and how many

### JUST A REMINDER

Remember, years ago, when you were a k'id, how, after long, long weeks of waiting, Christmas morning finally *did* arrive? Wasn't it a "grand and glorious feeling?" This well drawn cartoon is by A. Bauernschub of the Agent's Office, Camden Station, Baltimore

beans are in a gallon jar; but you can't make much of a living at that sort of thing. Every lie is a gamble and gambling is poor business.

Tell me the truth about the book or the typewriter you want to sell me. For a lie has as many lives as a cat, and you never know when it is going to return and sting you.

If you are in a business that necessitates deception, quit it. It's a wide world, and there are plenty of concerns that want honest men.

*Be thoroughly honest.* Don't sell me anything unless you sincerely believe I need that thing more than I need the money it costs. In this way you earn your own self-respect. You come to regard yourself as a useful servant of society, as an agent of the common good, and not as more or less of a grafter. And you may rest assured that any benefit you gain at the price of your self-respect is sure to turn out by and by a loss.

#### Don't Argue

Suggest. *An ounce of Suggestion is worth a ton of Argument.*

When you suggest, it means that you get me to arrive at my own conclusion. When you argue it means that you force me to arrive at yours. And what you want to do is to make your conclusion mine, and lead me to it.

Guide me deftly to the decision you wish me to make. Don't shove. Let my mind amble along at its own gait.

The greatest teacher in the world was Jesus. He never argued. He suggested. You remember, He told the story of The Good Samaritan and added, "Go thou and do likewise!"

I have known few men to be convinced by argument. And no women.

When you argue with me, and beat me down by your facts and figures and logic, I may say you are right. But I go home and think it over, and unless I can arrive at the same conviction myself, by my own processes of thought, I don't stick. I come loose the next day. But when you are skillful enough to suggest and induce me to persuade myself, then when you put your blank before me and hand me your fountain pen and say, "Sign here"—I sign.

And that's what you want. You don't want to demonstrate that you are more clever than I, you want me to put my name on the dotted line. You are not playing at precedence. You are after fruit. Or you ought to be.

All argument arouses antagonism. I am stubborn and vain, you know, and if you don't want to get this mule to balking handle me gently.

#### Make it Plain

Consider this commandment to be said in a loud voice.

Don't use technical terms that are unfamiliar. Don't use any word unless you are sure I understand it. For what I do not comprehend, what seems misty, I make

plain in my own way, to myself, and usually get it wrong.

If I ask you what's the matter with my motor car, don't tell me that the carburetor has got tangled up with the differential and the timing chain has circumnavigated the petcock, and it will be \$27.50. All I understand is the last word. Speak to me in words of one syllable, for I, the buyer, am lowly and simple, and if I don't catch your meaning I think you are trying to cheat me.

#### Remember Names and Faces

My name is Crane. Don't call me Greene. Or Clay. Or Graham.

It should not make any difference to me, but it does. I think I am somebody. Most of the time I am thinking about myself. To me I am the most important person in the universe. I can laugh when you don't remember the name of the President, or the heavy-weight champion, or when you call Mr. Rockefeller John L. instead of John D., but when you get my name wrong, it wounds me deeply. I may not seem to care, but I do.

Everybody hates to be classified. Each of us thinks he is Individual, somewhat of a Personage. So don't act as if I were just A. Customer, one of a crowd, a Common Noun. I am not just another man who wants to be waited on; I am George W. Mee; and when you make that fact prominent I am tickled; and the roll in my pocket begins to loosen, and the bills thereof yearn to go over and join you.

Remembering names and faces is not difficult. All you need is practice and system. Get a little book. Set down in it the names of those with whom you may have to do business. Note some peculiarity of each one's face or figure. Study the list in your leisure hours. *You ought to know your customers as you know your alphabet.*

Inform yourself about me. Ask how my boy is getting along in school. Tell me that you are glad to hear that my wife is up and around again, or that I have got that railroad contract I was after. To me these things are a deal more vital than the League of Nations, or even yesterday's baseball game.

Don't be afraid of flattering me. Bless your soul! every living man loves flattery as a monkey loves sugar, and if one says he does not, you can flatter him by telling him he cannot be flattered.

#### Be Dependable

Nothing in this wide world pleases a man more than doing for him just what you promised to do. *Keep your word, even in little matters.*

If you say you will be at my place at a certain time, be there. Or telegraph. Fifty cents spent on the Western Union is a good investment, if it starts favorable vibrations in my mind, and creates the impression there that you are anxious to have me think that you would rather break your neck than your promise.

*There is no part of your personal assets*

*more valuable than to be known as a man whose slightest word is as good as his bond.* It is the people who are punctilious about keeping their word who naturally gravitate to positions of trust. Lying, or forgetting, is expensive, even for a politician.

#### Don't be Egotistic

Don't show off. I don't want to know how smart you are. It doesn't interest me how much you know, and how handsome you appear.

Turn the spotlight on Me. I'm It. Talk about Me, not yourself. The fisherman does not bait his hook to please his own taste in worms; he seeks to please the fish.

Hence, swallow your vanity. It drives me out of your store. Don't be haughty, chesty, positive, touchy, intolerant or indifferent. Just be natural and bow at My shrine. It's all in a day's work.

You don't have to be a hypocrite. Only be self-controlled. *Be master of yourself, if you want to be master of the situation.* Let me be insolent and unreasonable, and vacillating, and irritating. What do you care, so long as you can sell me a \$900 overcoat? You keep your temper with children, why not with customers?

And if you are working for a corporation, don't let your egotism cloud your loyalty. *Stand up for the House. Let the good name of the Concern be to you as the apple of your eye.* That never fails to make a good impression on me. For, I reflect, if you are unfaithful to them, why should you be faithful to me?

Don't be too humble. Don't be a Uriah Heep. In everything we must keep a sane balance. Be polite, but not obsequious; pleasant, but not grinning; dignified, but not starched; friendly, but not familiar. Success is like walking a tight rope.

#### Think Success

When you start out in the morning, and one of these fool premonitions comes to you that this is going to be a bad day, put it out of your mind, think of something else, forget it. A destructive thought can do you more harm than your worst enemy.

Speaking of enemies, don't have them. Don't fight, don't get even. Ignore. Life is too short for grudges and vengeance. Go on. Let the other fellow stew. You keep sweet. Nothing can punish him worse.

*No good comes of conflict. It is cooperation that produces.* Find the people you can work With, and don't waste energy and time on those you have to work Against.

Here also you must keep your balance. Don't be over-confident, or too visionary. But remember that when you approach me to sell me a house on Pritania Street, there must ooze forth from your manner the quiet conviction that it is the best house in town for me.

Don't look failure, and don't talk it. Don't tell stories of failure. Talk about the winners. Breathe prosperity.

I want to see Success in your eye, in the way you use your hands, in your clothes, in

your clean collar and shiny shoes. I want to taste its honey in your speech, and hear its fluttering Cupids in your conversation.

Because success germs make me buy, and failure microbes hold me back.

**Be Human**

*This is the last and greatest commandment.* You are a Human Being. That is why your firm pays you. If the House did not think it needed a Man it would have sent a catalogue. You are commissioned to make

friends. *For all business prosperity rests at bottom on friendship.*

Hence, put the human touch in your salesmanship.

Laugh. Not too loud, nor too often, but laugh. Not at me, but with me.

Be good-natured. Keep all traces of bitterness out of your speech. Nothing is so contagious as good humor. Don't be flip-pant, nor smarty, but be genial. Don't take things too seriously.

Remember, I am the garden where you

want to grow your crop. So warm me with the sunshine of your optimism, water me with the rain of your sympathy, hoe me and plow me with your genuine interest in me, plant in my mind your carefully selected facts and inducements, and don't forget that you cannot raise corn and potatoes with a club or a wet blanket.

*Selling goods is about the most human transaction there is.* Conceive it so. Get it into your mind that you are doing me a real service, that you are a useful public servant, that it is really to my advantage to buy your cash register, that I will be the happier for it; and do not give place to the notion that you are a sharper, a confidence man, trying to induce people to get what they will regret.

Selling goods, as I said before, is a great business. It is noble. It is worth any man's while, or woman's either. The world has always regarded the professional people, such as doctors, preachers, actors, authors and lawyers, as a little higher than mere tradesmen, conceiving the former to be in a way useful servants of the community, and the latter to be out only for the money. But we are coming to a better understanding, for we are realizing that the business man, after all, touches humanity most intimately of all. It is he that feeds, clothes and provides tools for the great household of mankind. *And ethics, high principle, a sense of responsibility and a civic conscience are even more necessary in the Salesman than in the Talker, Producer, or Ruler.* The moral tone, and the degree of civilization, in a community, are best determined by the character of its Salesmen.

(Continued on page 21)

# "Pop" Goes the Coal Pile

**The Pop Valve and the Coal Bill**

All steam escaping through the Pop Valve is wasted steam.

**WASTED STEAM means WASTED COAL.**

An engine popping one minute wastes 15 to 20 pounds of coal.

Every minute you cause your engine to pop requires the handling of an extra shovel of coal—"into the firebox—out the pop."

If every engine in service on the Baltimore and Ohio popped only one minute in each eight hour tour of duty, 15,000 tons of coal would be wasted in this manner in a year.

Of course our engines pop more than one minute in each eight hour tour of duty. Just try keeping track of it and see for yourself how much coal YOU are wasting on your trick—one minute 15 pounds—5 minutes 75 pounds or enough in five minutes to heat your house for a day.

Now, try to SUPPOSE YOU had to pay for this wasted coal.

On the Baltimore and Ohio, all the engines in service popping for an average of 5 minutes in each eight hour tour of duty would mean about \$1,000 wasted, or the large sum of \$365,000 per year. In round figures this is equal to the interest on \$6,000,000 (six million dollars) and the latter sum would pay the wages of all our road engine crews for five months.

Any locomotive "Popping Off" is advertising the wastefulness of the engine crew in charge—NUF CED.

# Christmas Comes to Cove Crossing

*Illustrated by*  
H.D. Stitt

*By* Mary Mabel Wirries

NO one ever dreamed that Goliath would stop at Cove Crossing. Least of all Goliath, or Maribelle—or Cove Crossing itself.

Goliath was the finest engine on the Middle States Road. Shiny and huge and wonderful, majestic of line and grand of aspect—that was Goliath. And Goliath pulled the Flyer—the Flyer that carried the World-in-haste, and his wife-in-a-hurry. Cove Crossing, with its unsightly, fallen-to-pieces rail fences, its miniature jungle of unkempt berry vines, its apologetic caricatures of houses, was to Goliath as an ant hill to an eagle. True, the rules of the Middle States rendered it imperative that even such an insignificant crossing as Cove be hailed by a whistle, but outside of that one grudgingly contemptuous daily blast, Goliath never recognized the place. If anyone had ever hinted that some day the freckled hand of Peter O'Reilly, engineer, should be coaxing Goliath and the Flyer to a stop at this tiny blotch on the map of Ohio, the huge road-steed would have snorted a steam-exhaust snort that would have caused Cove Crossing's scared houses

to scuttle beneath the berry vines for safety. And yet—but first I must tell you about Maribelle.

Maribelle lived in the smallest and brownest of the two houses at the crossing. It was a very old house, like the two old folks who had owned it these past sixty years. It creaked on windy nights and voices from the past whispered through its dusty eaves. It was a very poor house, too. A discerning observer would have noted how threadbare were the rag carpets, how there were gaping slits in the window shades, how the stuffing peeped raggedly from the old-fashioned furniture, and even the very best red table cloth had been darned in ten places. And yet there was an air of spotless cleanliness about it that made it very wholesome and good to look upon, and even if Grandma Dixon often overlooked the cobwebs in the chimney corner because her "specs" were "nearsighted," there wasn't a Saturday or a Wednesday in the year that the splintery pine floors weren't scrubbed and polished with white sand.

Maribelle had never known any other house but the tiny old one, and

she thought it was beautiful. Her own room was the prettiest. The wall paper had roses in it, roses that had faded to a queer, yellowish nondescript tint, but were still roses. There were five hundred and sixty-nine of them on the ceiling alone—she knew because she had counted them, often. The curtains were of ruffled white muslin, and Grandma kept them tied back with red ribbons. The ribbons were particularly interesting, too, because Maribelle's mother had worn them when she was a little girl, and they weren't of red silk, like most ribbons, but of red calico.

"I mind, Honey, how your mother looked the first day she wore 'em," Grandma would reminisce, while her blue-veined old hand patted the bows." Her eyes were just as big and shiny like yours, Maribelle, and she had bangs, and her cheeks were just as red as the ribbons. Poor babe, to think that she isn't here now, and you—" and then Grandma would stop, all chokey-like, and wipe her eyes on the corner of her checked gingham apron, and go hurriedly away into the other room, where Maribelle could hear her making

queer, muffled sounds and blowing her nose vigorously, and then Maribelle would know that she was crying. Grandma always cried when she talked about Maribelle's mother, because Maribelle's mother had been Grandma Dixon's only child, and she had been dead ever since Maribelle was a baby. Once Grandpa told Maribelle about the night she died—that dreadful night when the Twentieth Century Limited went over the trestle at Turtle Gulch, and Grace Dixon and her young husband were among the fifty victims who lost their lives. In Grace's arms when they picked her up was Maribelle.

"You was just so little and sweet, Honey, and you clung to my finger, and looked at me with your big eyes as if you knew what all the sorrowing was about. Seems like, if we had to give up our girl, God couldn't have sent us any sweeter thing to help us bear it."

It was thus he ended the story, and Maribelle, with her grave eyes fixed on his trembly old face, sighed and said:

"Yes, Grandpa, I'm so glad you've got me, but sometimes I think it would be a whole lot nicer for you if I could walk."

Whereat Grandpa blew his nose, too, at a great rate, and wheezed.

"Now Honey, now Honey! Don't you go to worritin' about anything."

That was the sad thing about Maribelle, you see, she couldn't walk. Her spine had been injured in the wreck, and though she was eight years old, she had never yet been able to take a single step. Sometimes, when the Black Pain came, she lay in her bed for days while tiny bits of moisture beaded her pale lips from which issued weak little moans. Then Grandma Dixon was very white and shaky too, and sometimes she broke a dish or spoke tartly to poor inoffensive Grandpa, who tip-toed in and out, and shook his head almost constantly.

But more often Maribelle sat in the rocker by the muslin curtained windows, and played at gay games of make-believe with little Johnny Dobson who lived across the way. Johnny was eight, too, and he wasn't ashamed to admit that he loved Maribelle and her games more than anything in the world except his mother. At Maribelle's one could find Fairies of Happiness hiding behind the logs on the log-cabin counterpane, and Elves of Joy dancing on the tips of the morning-glories that peered around the corner of the window. Lacking real factory-made playthings, Maribelle fashioned fan-

tastic figures from bits of cloth and paper, and gave them queer names of her own choosing. Then, when other sports palled, there were the trains. Best of all, they watched for the trains.

There was scarcely a trainman on the Middle States who did not learn to look for the two eager childish faces—the one so ruddy and glowing, the other so ethereally white—and for the frantically waved hands. The slow freights were best. They threw out things—old magazines with pictures in them, and comic sheets from the Sunday papers, sacks of candy and Hershey bars, peanuts and fruit. But the fast trains were the most thrilling. They got only a glimpse of them as they thundered by, but that glimpse contained something so awe-inspiring as to be almost terrible. The passing of Goliath was the crowning event of the day.

"Look, Maribelle, isn't it big? Wouldn't it be swell if it would stop and take us somewheres?"

"Oh, Johnny!" The very thought was breath-taking.

Christmas was coming. It wasn't more than November 'til Johnny changed the usual ritual. This time it was:

"Golly, I bet Santa Claus could get around fast on that train. Bet that would beat his old reindeers. Maribelle, suppose it should stop on Christmas morning and Santa Claus should get off?"

"O-o-oh!" Maribelle turned pink-cheeked with excitement. Then she became practical.

"But it won't, Johnny, because Santa Claus doesn't ever bring us enough to bother about hauling it in a big train like that. We wouldn't have much Christmas if Granny and your mother didn't bake the Christmas cookies, and Grandpa didn't cut a little tree out of the clearing. Last year Santa just brought me two clothes-pin dolls. My, I'd like to have a big one onct!"

"Would you, Maribelle? How big?"

"Oh, a great big one, with eyes that open and shut. 'Member that one we saw in the picture book that came off the freight train last summer? It slept and cried and said 'mama,' and walked, and everything. Wouldn't make so much difference if mine couldn't walk, though. I can say it takes after me."

"Well-l." Johnny was thoughtful, "I can't see much in a doll but I'd like to have a good dog. There's lots of tramps around here, and he could scare 'em off. 'Spose it ain't no use wishin,' though; all I ever

git is a wooden whistle and a new pair of knitted mittens."

It wasn't long after that that the Black Pain came to Maribelle. This time it was worse than ever before, and the doctor from the village came every day. Johnny was banished from the sick room, and in the intervals before and after school he haunted the Dixon "settin' room" wincing whenever he heard the pitiful moans from Maribelle's door, but seemingly unable to tear himself away from the near presence of his playmate. It was less than two weeks 'til Christmas now, and he began to wonder if this weren't going to be a very bleak Christmas without Maribelle to help eat the Christmas cookies. Then he heard Grandma Dixon and his mother talking in the kitchen. They were talking low, and Grandma Dixon was crying. She seemed to cry a lot these days.

"He says this spell will pass in a day or two now," said Grandma, "but it will come back worse and worse until the end. Oh, Mis' Dobson, seems as though I can't stand it when I think as how she'll never see another Christmas. Why does He take the young sprouts, and leave us old dead trees? She is bad off, I know, crippled like that, but she plays so happy all the time she is like a bit of sunshine in the house."

And then his mother's voice, low and soothing, and Grandma's sobs ceasing, and a renewal of the talk about Christmas. They had moved to the other side of the kitchen and he could only catch snatches. It was Granny's voice—

"A doll—just any kind—she never had one, but we can't. If Father's potato crop hadn't failed! I'd counted on that. Seems like it, just hustles us to have enough to eat this winter—and now this doctor bill again. 'Twouldn't be so bad if it wasn't her last Christmas."

"I know," his mother sighed heavily, "seems like we can't get enough for our crops now to keep us in shoes. We can't even get Johnny a dog. I thought I'd knit him some mittens. Maybe I can find time to crochet a little jacket for Maribelle to wear when she can sit up."

The door closed, and he could not hear the grandmother's reply. Johnny was sitting on the floor with his head resting on the window sill when Grandpa came in with a stick of stove-wood. He put the wood in the stove and wheezed asthmatically.

"What ye thinking about, Johnny-Boy? Wishin' for Maribelle to get better so you can see her?"

The boy looked up with a shy smile. "Yes sir," he nodded. "That.

And I was wondering who was the richest man in the world. Do you know, Grandpa?"

"Well-1," Grandpa grew reflective, "I don't just rightly know, Son. There's some as is rich and there's some as is richer. There's Rockefeller, and Morgan, and a fellow named Hogan over here to the Center as used to keep a saloon and they say he's got enough money to buy all the farms hereabouts. But the richest man in the world—Jemme see, now. I reckon he must be the President of the Middle States Road. Must take a powerful lot of money to keep up a lot of trains and roadbed."

"Who is he, Grandpa? Where does he live?"

"Sakes, Boy, I don't know. I ain't much good on names and addresses. I reckon the mail-carrier would know. That's what he gits paid fer."

\* \* \* \* \*

The postman reined in his lazy gray mare and stared in amusement at the diminutive figure that blocked his way.

"Well, Johnny, what is it?"

"Please, Mister Gates, will you send this for me? It's to the president of the Middle States Rail Road. Will you put his address on? Grandpa Dixon said you'd know it."

"He did, did he?" laughed the postman, genially. "I always thought that anyone who was so intimate with the president of the Middle States as to write him letters already knew his address. Got it stamped?"

"No sir, but here's a nickel outta my bank. Please, will you mail it?"

The postman looked at the serious face of the boy, and smiled again.

"Life or death, is it?"

"Yes sir," said Johnny, solemnly.

"Well, all right then. I'll get the address from the ticket agent over to the Center. Suppose you're applying for a job as engineer of the Flyer. All right, Johnny, I hope you get it. G'lang Debbie."

\*\*\*\*\*

"Want to spend your Christmas in the jungles, Steve?"

Stephen Galbraith, famous surgeon, looked up from the pile of correspond-

ence that littered his desk to meet the questioning eyes of his visitor.

"Anywhere with you, Beloved," he quoted, "even to the land beyond the stars. Chant on, chant on, old boy. Whither away?"

"Don't be a fool," inelegantly returned he whom Grandpa had designated as the richest man in the world, "I'm not kidding. Read that."

He tossed a badly-soiled envelope on the other man's desk. The sprawling inscription across the face read: TO THE PREZZIDENT OF THE MIDUL STATS RODE, and beneath it in more conservative and mature characters: T. L. Magruder, 1900 Exchange Bldg., Chicago, Ill.

Galbraith eyed it without opening it.

"Looks like a Black-Hand communication," he commented, quizzically. "What do you want me to do? Go out and put the million in the hollow log? Not on your life, Tommie! I have a wife and children dependent on me for their daily ice cream. You'll have to take it yourself."

There was one painful half hour for Maribelle while the big surgeon examined her twisted spine—but then there was all the rest of the day to play with the new doll, whom she named Mildred Magruder in honor of the pretty lady

"Don't be foolish! This isn't any joke. It's from a kid. Read it."

"Oh, very well," with a resigned sign. "In which part of your coal bin have you been keeping it." I should—really I should—have rubber gloves."

The mockery faded from his face as he read, though he still smiled whimsically at certain passages.

"Dere Mister Prezzident. Grandpa Dixon says you are the richest man in the world." ("He never heard of me," said the irrepressible Galbraith.) "and so i am going to rite to you and tell you about Marybel, wich is my playmate only she cant run around and play becuz she is sik, and cant never walk tho she is ate yeres old just like me and i have walked for severl yeres. You see, she was in a reck and her ma and pa was kild and she was a baby and it hurted her back and she cant walk. Marybel is the best litl girl and she laffs all the time sept when she has the Pain and then she just grones. Her Granny told my ma this is going to be Marybels last Crismus and she cant get her no doll becuz grandpa didn't have any potatoes this yere and ma says no we cant get enuf for our crops to by shoes and we cant get Johnny a dog ether—Johnny is me—and so i suppose the reson this is Marybels last Crismus is becuz we are getting porer every yere and Crismus aint comin to Cove Crossing any more, and as long as it aint it semes to bad Marybel cant have her doll like we saw in the picters. it was a big doll and it shut its eyes and Marybel aint never had any doll but closepins. So plesse Mister Prezzident if you kin sperr the munny wont you by Marybel a big doll like that and send it down on one of the slo frates for they all no us and they will drop it off. tell them where the litl sik girl allus waves at them at Cove Crossing and she will get it. You neednt bother bout anything for me cuz i kin walk and when you kin uze your legs you dont mind not havin Crismus so much. Yours trulie. Johnny dobson."

The world-renowned surgeon took a handkerchief from his hip pocket and wiped his eyes.

"Think my eyes are getting bad again," he explained. "I'll have to have my lenses changed." Then with a swift reversion to his former facetiousness: "Well, Tommie, Old Boy, when do we start?"

\*\*\*\*\*

It was Christmas morning at Cove Crossing, and Maribelle was able to sit up. The Black Pain had left her whiter and thinner, but it hadn't

robbed her of her ability to "laugh all the time." She laughed now as she watched Johnny and Grandma trimming the Christmas tree with garlands of colored paper and strings of corn. And then they heard a train whistle.

"Oh, Johnny, quick! It's time for the Big One!" (for that was what they called Goliath). Always by this time it would have passed, but not this morning. Something was wrong. Goliath in his steely heart wondered what was the matter with Peter O'Reilly, his beloved engineer, for slowly, surely, the miracle was coming to pass. The Mountain was coming to Mohamet. Goliath was stopping at Cove Crossing. From a rear coach there stepped four personages: a pretty little woman, swathed in expensive furs, the wife of the "richest man in the world;" a freckle-faced, massive-shouldered Irishman, the "richest man" himself; a tall, lean, humorous-eyed Yankee, the famous surgeon; and last, and most magnificent, a coal-black son of Africa, laden with sundry ribbon-bedecked parcels and who was hampered considerably in his triumphal approach by the impertinent gambols of a yapping bull pup, who in a few months would be able to win a blue ribbon at any dog show.

Such a day! A day of explanation, and presents and tears and laughter. A day of roast chicken, and chocolates and grapes, and cakes and oranges. A day of gamboling with the bull pup for Johnny and of being hugged by Grandma, and teased by the big surgeon, while his mother looked at him wonderingly and proudly and said, times without number: "Well, Johnny, whatever made you think of it?"

There was one painful half-hour for Maribelle while the big surgeon examined her twisted spine, and poked her here and there with the strong yet gentle fingers that had such a faculty for hunting out the hurty places—but then there was all the rest of the day to play with the new doll, whom she named Mildred Magruder in honor of the pretty lady. A day of reassurance for all of them—an assurance that Christmas was coming next year and the year after and the year after that—even for Maribelle, who was soon to ride up to Chicago for what the big surgeon called an "operation," and who was going to be able to dance around the Christmas tree this time next year. Then the coming of evening, and the departure of the guests on another train, that stoppd, even as had Goliath, at Cove Crossing.

Maribelle, Mildred Magruder, Johnny and Steve, the bull pup (Mr. Magruder had named him that because he said he had Dr. Galbraith's playful disposition), waved fondly from the window, while Grandma and Grandpa and the senior Dobsons stood out in the yard, knee-deep in snow, and waved, too.

Then came night. A star, glowing and brilliant—it might have been the Star of Bethlehem—hung over the ragged tops of the naked maple trees and silvered the roofs of the brown cottages. It peeped in through one window and found a boy sprawling at rest with the cool snout of a prize bull pup buried in his neck. It peeped through another and found a little girl child sleeping with a richly-dressed doll clasped tightly in her arms. It peeped through yet another and found an old woman kneeling by her bedside, absorbed in prayer. All three were smiling. Christmas had come to Cove Crossing.

## Transportation Salesmanship

(Continued from page 17)

It will be apparent to all readers that these "Commandments" are equally as applicable to the selling of transportation as of any other commodity.

Too much cannot be said concerning this vitally important subject of Salesmanship on the railroad, and the more this phase of the transportation industry is developed the larger will be the measure of success of the company specializing in this direction. Salesmanship is a profession and, as with any profession, proficiency is not an overnight accomplishment but the result of constant study and application.

Business is better now and is expected to show further improvement. But it is also a period of the keenest competition and most profitable to those railroads that have real salesmen to get business and real operating men to deliver the goods.

So let's take personal inventory today and aim to make of ourselves a body of Baltimore and Ohio salesmen of which we and the Company may be justly proud.

Mr. Irving T. Bush, when asked to select a quotation to be inscribed over the fireplace in the club house built by the longshoremen at the Bush Terminal, wrote the following, which was accepted and used:

"Success is not an accident; it comes to the man who does his job a little better than the other fellow."

### Encouraging Poor Spelling

The teacher was giving an oral spelling lesson. It was William's turn. The teacher looked at him and gave the word "slow."

"S-l-o," answered William promptly.

"Wrong," declared the teacher.

"No, Ma'am," declared William, "for out on the sign post the notice for people who drive automobiles says, 'SCHOOLHOUSE—SLO DOWN,' and the man who wrote that sign ought to know."

William was right, "The man" ought to know, but does he? He probably thought that in order to attract the attention of the public, he must do it in this sometime unusual way. The effectiveness of this is questionable, to say the least, but the idea of misspelling words in order to accomplish this end is not questionable—it is wholly bad. Time was when children might have learned spelling lessons from advertisements. Not so now. Words are shortened, lengthened, and twisted to suit certain individuals whose original ideas for advertising are so exhausted that they must resort to methods which set a bad idea before school children.

On our own pantry shelf there is a certain brand of pudding, cornstarch, or something of the kind, the name of which is misspelled because there isn't room enough on the package to spell it correctly in the big letters the manufacturer wishes to use. It is spelled correctly in the directions, printed in smaller type. How can we expect our children to be good spellers when words are misspelled before their eyes in big, red letters, every day?

Then there is that other menace to the education of school children—poor sentence structure. In one advertisement that I noticed recently is this sentence, "No rubbing except wristbands." As that sentence stands the meaning is not clear. The insertion of the little preposition, "on," between the words "except" and "wristbands" would make the sentence mean what it is intended to mean. A more recent one seen in the Baltimore trolley cars reads: "It's a life preserver as sandwiches." I looked at it from behind a woman's hat one day, and try as I might, I couldn't get any sense out

of it. After I saw the picture of the loaf of bread which accompanied it, I figured it out to mean that if the bread is made into sandwiches it acts as an appetite life preserver for the picnic.

Proper spelling and simple English words, correctly used, will help that slogan, "Truth in Advertising," considerably.

### The Truth!

"Nothing is so disarming, nothing so compelling as the whole truth, plainly and sincerely told. Forgetting morals and looking at frankness merely as a matter of business, it is the most powerful ally any man can have. The man who tries to be 'tricky' or 'cute' is his own victim in the long run. Whoever tells less than the whole truth is giving himself less than a whole chance for success. If you are trying to make a deal with a man and he senses that you are holding something back, he becomes suspicious immediately. You see, he doesn't know *how much* you are withholding. A normal human being will try to out-trick anyone he suspects of trying to trick him, but nine men out of ten will meet perfect candor with fair dealing. I've heard men go around boasting that they always have something up their sleeve. What they probably have up their sleeve is the ashes of blighted opportunities."

### A Remarkable Prophecy

Several years before the invention of the locomotive by Stephenson in England, Oliver Evans, of Philadelphia, wrote an article of which the following is an extract.

"The time will come when people will travel in stages, moved by steam engines, from one city to another almost as fast as birds fly—fifteen to twenty miles an hour. Passing through the air with such velocity—changing the scenes in such rapid succession—will be the most exhilarating, delightful exercise. A carriage will set out from Washington in the morning, and the passengers will breakfast at Baltimore, dine at Philadelphia, and sup at New York the same day.

"To accomplish this, two sets of railways will be laid so nearly level as not in any place to deviate more than two degrees from a horizontal line, made of wood or iron, on smooth paths of broken stone or gravel, with a rail to guide the carriages so that they may pass each other in different directions and travel by night as well as by day; and the passengers will sleep in these stages as comfortably as they do now in steam stage-boats. A steam engine that will consume from one-quarter to one-half a cord of wood will drive a carriage 180 miles in twelve hours, with twenty or thirty passengers, and will not consume six gallons of water. The carriages will not be over-loaded with fuel or water. . . . And it shall come to pass that the memory of those sordid and wicked wretches who oppose such improvements will be execrated by every good man, as they ought to be now."

Evans was one of the foremost of the early American inventors. He invented the high-pressure steam engine, and influenced manufacturing in a hundred different ways.

In the above quotation it will be observed that he had little patience with those who opposed a new idea. It is recorded that once, in a fit of temper, he destroyed the drawings and records of more than eighty inventions.

## Work

There is a motto under the glass top on the desk of the Boss that reads:—"There's no fun like WORK." It was placed there by a former boss, who has since been advanced, probably because he proved the motto. When I first noticed it I read it aloud, in his presence. There might have been a note of questioning in my voice because he quickly confirmed it by saying:—"There isn't."

Much has been written and said about work, ever since the flaming sword pointed the way to it from the gates of Eden, and many and varied have been the constructions placed on this capital word. Whether it means "fun" or not depends on what one understands the word to imply. If it means harrassing drudgery, with pain and fatigue, and no hope, the fun certainly is lacking, but when work means *to do and get done* instead of *to do and keep on doing*—when it is a performance productive of results to which one can look with self-satisfaction, work may be a joy, or "fun."

Many of those who have only an abstract idea of work are frequent commentators on the beauties and benefits of it. In one of his lectures John D. Rockefeller, Jr. has grouped the workers into three classes—those who lie on their backs in the bottom of the boat and drift (the hoboos?), those who work the oars with the current, and those who pull up stream and finally "arrive." (He says nothing about those who "buck the tide" but never arrive.) In the same sermon he also criticises such as "complain of inadequate pay and the high cost of living." The implied moral is that "sawing wood and saying nothing" is the ideal state of being—for the workers.

The wife of a supreme court judge, Mrs. E. Lazansky of Brooklyn, is quoted as saying:—"Many people cannot understand anyone liking work. Those people have never known the joy of the right job." That is true enough, in part, but as only very few workers are in the fortunate position of Mr. Rockefeller and Mrs. Lazansky, to pick the right job, the most satisfactory thing for the worker is to accept his particular job as the right job and go to it as if it were his specialty, as if he and the job were created for each other, for, as "Spectator" says: "Man is a working animal. He was intended by the Creator to WORK and to find the joy of living in it." Though this idea does not exactly conform to the version of God's intentions as given in Genesis, I would rather believe that "Spectator" is right and Moses mistaken.

## Fable of the Ringtail Monkey

Once upon a time there was a Medicine-man who "knew a lot" (this is a fable) and was credited with being a magician and miracle-worker. By cunning devices his fame had been broadcasted far and wide. It was proclaimed that he had succeeded where Ponce de Leon failed; that he could stop the "fugiting" of Time—even turn it backward—by means other than the daylight saving schemes invented by modern legislators; and that he would do it for a fee commensurate with his skill and the ardor of the victims' desires.

Only possessors of great wealth were his objects, and subjects. His black magic he named "grafting." By combining Burbank's methods with those of the ward-

heeler he "grafted" coming and going. He "grafted" something onto the patient and it reacted with return "graft" from the patient. He would take a piece of a parrot's tongue and convert a dumb man into a stump-speaker. By transplanting the proper portion of tissue from a fowl to a victims nose it resulted in producing fresh eggs by sneezing, and so on.

But the most miraculous miraele, that which had made his name and fame reach from his "insanitarium" across continents and oceans, was the grafting of a monkey gland onto or into a wealthy patient whose anatomy had undergone some undesirable changes brought on by Time, such as a hardening of the arteries and softening of muscles and brain. His theory was that to turn time backward it was necessary to reach back to man's prototype for the active principle. The logic was not bad, but the operation did not turn out to meet expectations. Still the result was none the less miraculous. The patient developed a fine tail that was *visible to everyone. except himself.*

—  
She

*Resolved*

That these post-bellum seasons  
Furnish many, many reasons  
Why a poor mere man should render  
Added homage to the "she."  
She has turned the fabled table  
And has proved herself quite able  
To stand up, her own defender  
In the courts of equity.

Yea—every day the news brings to our notice some new achievement by woman. She is mastering the professions, occupying the pulpits, the bench and the chairs of science as well as barbers' and bootblacks' chairs: she has invaded the army and made a good showing both in the Salvation Army and the Battalion of Death; she has entered the sports, peaceful and militant, healthful and unhealthy, and she makes her mark everywhere.

*But—*

With all this to her credit  
There is one thing—Moses said it—  
There is one thing that the "females"  
Of the species" cannot do:  
Be they preachers, doctors, friskers,  
They can't raise and exploit whiskers,  
Such as heaven gave the he-males  
For the hot air to pass through.

# Some Thrift Items—Written by Our Men!

## A Converted "Flivver" Makes a Good Shop "Mule"—A Great Time and Labor Saver

By F. W. FRITCHEY, Master Mechanic, Riverside

KEYSER, West Virginia, is the main station on the West End of the Cumberland Division, having in charge a master mechanic who is responsible for the territory into yard limits at Grafton. This territory includes three helper stations, Piedmont, M. & K. Junction and Hardman—all in West Virginia—and also an important car inspection terminal, Rinard.

A profile of this division shows it to be the most mountainous on the system, and grades are of such a percentage as to require the use of helping engines on practically every train passing over the division.

The engines used in this helping service are of the utmost importance, and it is quite necessary that they be kept in continuous service, 24 hours daily, with the necessary relief for running repairs. Because of the strenuous service they are required to perform, however, quite frequently vital parts of the engines become disabled, rendering the equipment unfit for service until repairs can be made.

The size of these stations does not warrant carrying a large supply of material, and, necessarily, the main station, Keyser, is called upon daily to furnish the emergency parts for restoring engines to service.

At times practically every local passenger train leaving Keyser contains material for one or the other of these helping stations, which material is urgently needed to restore valuable equipment to service and prevent delays to important trains.

Frequently hurried calls are received at Keyser for material, with only a few minutes to locate the material and get it to the station in time to load on the first train en route to the station requiring it.

The present means of transporting this material from the shops to the station is on a 4-wheel track truck, propelled by hand power, requiring at times four to six men.

On the other hand the converted truck shown in the picture can be operated much more quickly, thereby saving time, and, by reason of the latter qualification, it permits of the quicker transportation of emergency material to the line of road stations, resulting in quicker restoration to service of a needed and valuable piece of machinery, viz.: the locomotive disabled for want of the material in question.

In many modern plants motor vehicles called "Shop Mules" have been adopted to supplant human efforts, and result in efficiency and economy. Our FORD truck in this case could be similarly called.

Incidentally the building of this "shop mule" at Riverside made quite a bit of fun among our men; it was summarized in the following verses by P. Feeley:

### Look Who Did It!

This thing was once a beautiful flivver,  
Belonged to a very charitable giver;  
Brought in the shop, and just by luck,  
Was formed into a handsome truck.

One thing sure, I don't like to blab it,  
The mechanical work was performed by  
"Rabbit" (Gallion).  
And to make the truck become a good  
looker,  
They got the assistance of old boy  
"Hooker" (Stephens).  
Then old "Jake" (Leister) worked on it day  
by day,  
Until his hair completely turned gray.  
He sure did build some handsome back  
For a thing like this on the railroad track.

### Section Foremen A. L. Wilfong and S. S. Queen, Charleston Division

SUPERINTENDENT Trapnell had the pleasure during November of writing to both the above named employes to commend them for their interest in saving Company material:

Foreman Wilfong for picking up and returning to the Company twelve grease cups and one coal pick; Foreman Queen for finding and returning nine grease cups.

Such employes, with the Company's interest at heart, are the back bone of our organization.

### Engineman A. B. Haller and Fireman C. E. Jacobs

#### Commendable Saving of Coal

ENGINEMAN A. B. Haller and Fireman C. E. Jacobs of Brunswick, Md., running on Trains 80 and 81 on Washington County Branch, have for some time been keeping account of their fuel performance. They estimate that the average fuel consumption on the Branch is about 9 to 10 tons per trip for the general run of the engines and that with the 1376, they have consistently held the fuel consumption down to five tons per trip. This represents a material saving for their Company and a creditable performance resulting from the interest and intelligent effort they have applied to their work.

They have been commended highly by their superior officers and the MAGAZINE is glad to give due notice of the meritorious performances in these pages.

### Relief Agent J. E. Hitch, Baltimore Division

THE co-operation of Relief Agent J. E. Hitch on the East End, Baltimore Division, was demonstrated while he was en route on Train No. 767, Sunday, October 8 when the end of rear driver axle broke on Engine 1445. Mr. Hitch gathered up the broken pieces and put them in a box in the baggage room at Chester Station in case they were wanted. It is usually the practice to get broken parts in cases of this kind and Mr. Hitch's action is much appreciated by the division officials.

This "Shop Mule's" Kick is Spelled T-H-R-I-F-T

# Have Other Lodges Caught the Booster Spirit These Lodges Show? We'll Be Glad to Hear from Them!

**F**EW communications have reached the MAGAZINE office during the last nine years that have struck a more hopeful note for the future of the Baltimore and Ohio than have the two reproduced below. If there are other lodges or organizations of employes on the Railroad which have passed similar resolutions we shall be glad to have them sent in so that with their publication we can show the helpful spirit of our employes and their determination to make 1923 the best year in the history of the Baltimore and Ohio.

Preceding pages in this issue tell of the earnest wish of President Willard that we shall, each and every one of us, do everything we can to run the Railroad economically from now on. What a splendid opportunity for us all to translate resolutions into action and uphold his hands to the limit of our strength!

The first resolution follows:

### To the Business Men in the City of Zaneville

You will please read the attached copy of President Daniel Willard's letter to the Officers and Employes of the Baltimore and Ohio System.

(Attached was the letter which appeared on page 4 of the October issue of our MAGAZINE.—Ed.)

We, the Federated Shop Crafts, have passed resolutions, which are as follows:

"We as employes will use every effort in restoring to normal conditions the rolling stock of the Baltimore and Ohio Railroad at the earliest possible moment.

"We feel that President Willard has been generous and fair minded in his treatment of his employes, and in order to regain what has been lost we would earnestly solicit your business. We ask this as a special favor, assuring you that in return we will do everything possible to put business in your way for the same."

(Signed) Federated Shop Crafts,  
H. E. TOLL, President  
J. S. BLACK, Secretary.

The second resolution is quite as interesting, and reads:

BALTIMORE, MD.,  
November 11, 1922.

Mr. DANIEL WILLARD, President  
Mr. C. W. GALLOWAY  
Vice President Operation and  
Maintenance  
Baltimore, Maryland.

Dear Sirs:

At a regular meeting of the Royal Blue Lodge No. 511, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes, held on Wednesday evening November 8, 1922, the following resolution was offered and passed unanimously:

"WHEREAS, we are advised that a Booster's Club has been organized, which includes in its membership all members of our Brotherhood, and whereas we are further advised that

the object of the Booster's Club is to do all in our power, in an effectual manner, to boost the Baltimore and Ohio Railroad Company to the end that the efforts of each and every Booster will prove of a material benefit to the Baltimore and Ohio Railroad Company.

"BE IT THEREFORE RESOLVED— that we members of Royal Blue Lodge No. 511 of the Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employes heartily indorse the spirit that prompted the formation of the Boosters' Club; therefore be it further resolved that it is the sense of Royal Blue Lodge No. 511, that we, as an expression of loyalty to our Employers, do constitute ourselves as members of the Boosters' Club to the end that each and every member shall at all times be a real Baltimore and Ohio Railroad Company's Booster.

"AND BE IT FURTHER RESOLVED— that our Worthy President be and is empowered to appoint a committee, of which he shall be the Chairman, said

Committee to be composed of no less than one member from each station within the Baltimore Terminal Division and the Baltimore Division; the duties of said Committee shall be to devise ways and means that we can materially aid the Baltimore and Ohio Railroad Company Boosters to produce results."

According to the power invested in him, our Worthy President R. L. Collingsworth appointed the following, one from each station within the Baltimore Terminals to act with him to boost the Baltimore and Ohio Railroad Company whenever we can and wherever we may be:

### Committee—Boosters' Club.

D. D. Cox, Camden Offices; J. R. Lamb, Agent's Office, Camden Station; C. T. Eakle, Stationery Department, Camden Station; J. F. Mewshaw, Platform, Camden Station; J. T. Cook, Warehouse, Camden Station; J. L. Walker, Agent's Office, Locust Point; George Craig, Piers, Locust Point; S. J. Watkins, Yards, Locust Point; W. P. Blatt, Mt. Clare; A. W. Shipley, Mt. Clare; H. E. Sipes, Yard Master's Office, Curtis Bay; B. Shemer, Agent's Office, Curtis Bay; C. W. Dean, Car Foreman's Office, Curtis Bay; C. E. Heintz, Bay View and Canton; H. H. Siltman, Fell Street and Chases.

Resolution introduced by M. H. Japper.

Attest: Approved:  
A. W. SHIPLEY R. L. COLLINGSWORTH  
Secretary President

## Pittsburgh Chapter of the Ladies' Auxiliary to the Veterans Named for President Willard

By a Member

**D**ANIEL WILLARD Auxiliary No. 5 to the Veteran Employes Association of the Baltimore and Ohio Railroad, Pittsburgh Division, held its regular meeting on November 7. We had a nice crowd out and we hope they will come back as often as possible. We were pleased to have with us our superintendent's wife, Mrs. J. D. Beltz, and also Mrs. Grow, the wife of our trainmaster. We extend to them and to the wives of our other officers a hearty welcome to come again.

After the routine of business was over, Mrs. I. H. Nicholson, in charge of our entertainment committee, assisted by her aids, Mrs. J. L. Norris, Mrs. George H.

Peters, Mrs. John McMunn, Mrs. Robert Hill and Mrs. William Cummings, served a delicious lunch which we all enjoyed. We hope to see many more coming into our Auxiliary to help us enjoy these good things.

We have named our auxiliary and we feel that we have named it for one who has done much good for all. I hope that the name which we gave it will be an incentive for us to work hard for its success and future good as the one for whom we named it has worked for all of us during the past.

We extend a cordial welcome to our sisters from other divisions to visit with us whenever they can. We shall be glad to have them.

### Office of the General Manager Eastern Lines

November 14, 1922

I extend to the officers and employes of the Baltimore and Ohio Railroad my sincere good wishes for the holiday season, and the hope that the year 1923 holds in store for them a large measure of happiness and prosperity.

# New Facilities for Fruit Auctioning in Philadelphia

By J. W. BABNEU, District Freight Agent

**T**HE fruit traffic at Philadelphia has for many years been handled at the Baltimore and Ohio facility known as Pier 12 North. There was an auction room on the second floor, with seating capacity of two hundred, where the auction of fruit was held.

Contiguous to this pier was Pier 11, at which point the Baltimore and Ohio handled its merchandise traffic, but this pier was condemned to make way for the Philadelphia approach of the new Camden-Philadelphia Bridge across the Delaware River. Without the use of Pier 11, which also took care of the overflow of fruit from Pier 12, it became necessary to secure a larger facility for handling of the fruit traffic.

Pier 22 South was the Baltimore and Ohio Railroad Company's main freight station in Philadelphia, used for handling package and rolling freight and is one of the largest and finest piers on the river front. It is this which has been remodeled for the handling of the fruit business. There is an additional platform running the full length of the pier on both sides and extending the full width of 200 feet on the river end, and half of the pier is enclosed, to be heated during the extreme cold weather with the most modern apparatus to prevent fruit from freezing. On the second floor,

two auction rooms have been built, one with a seating capacity of 196 and the other, of 96 thus permitting the functioning of two auctions at the same time without interference one with the other.

The capacity of the pier is double that of the former fruit facility and this, together with its wider driveway and close proximity to the Dock Street Fruit and Produce Markets (it is about one square distant whereas the former facility was eight squares distant) makes it acceptable to the trade.

Pier 22 South was officially opened for handling of fruit on October 16. Mr. Ralph B. Clayberger, ex-president, National League Commission Merchants, made an address in behalf of the trade, complimenting and thanking the Baltimore and Ohio for all they had done in the furtherance of this growing traffic. J. H. Carroll, Jr., general freight agent of the Company in Philadelphia, responded.

The removal of fruit traffic from Pier 12 North will permit proper handling of all package and rolling freight at that station.

Pier 24 South, which is the pier next to Baltimore and Ohio Pier 22, is owned by the Baltimore and Ohio and had been leased to the Merchants & Miners Transportation Company, but with the loss of Pier 11 North and the transferring of fruit

H. B. Green, late general agent with headquarters at Cleveland

to Pier 22 South, it became necessary to take over Pier 24 South and use it for handling of merchandise traffic previously handled at Pier 22 South.

## The Death of Former Superintendent H. B. Green

**T**HE many friends of former Superintendent H. B. Green were shocked to hear of his death at his home in Cleveland on Monday, October 30. Mr. Green enjoyed the friendship of hundreds of officers and employes on the Akron Division and his death is deeply mourned by all.

The following officers of the Akron Division attended his funeral on Thursday, November 2: Superintendent D. F. Stevens; Trainmasters W. T. Leichlider, J. Fitzgerald, J. E. Fahey and F. W. Green; Road Foreman P. C. Loux; Division Operator M. E. Tuttle; Chief Train Dispatcher P. J. O'Leary; District Freight Agent C. M. Groninger; Division Freight Agent C. M. Gosnell. All employes of the Akron Division extend sincere sympathy to his bereaved family in their great loss.

Above: The auctioneer in shirt sleeves and a typical crowd in the new auction room. Below: A bit of Sunny California (boxes of luscious grapes) transplanted to Pier 22, South, Philadelphia, remodeled for our growing fruit business

## Stop That Leak!

If you had a leak in the gas or water main, or in the electric current, in your home, you would have it fixed promptly.

There may be leaks like these that you know of on the Railroad which employs you and pays you for your work—and interest.

If there are such please write about them to—

Stop That Leak!

Baltimore, Md.

# Has Your Town a Community Building?

*Why Not Build It Yourself? One Town Got a \$25,000 Building for \$5,000*

*By Genevieve Fox*

PERU, Indiana needed a building to play in, a building that would be a gymnasium, a little theatre, a concert hall, an exhibition hall and several other pleasant things "all rolled up into one." In this respect it was not unlike many another town, north, south, east and west. The difference between this town and most towns is just this. Its citizens are not the easily discouraged kind and they can pull together with a will. This explains why the people of that town can now boast that they have a brand-new community building, worth \$25,000 which cost \$5,000.

A bargain in a building is sufficiently rare in these times to excite interest. "How in the world did you get it at that price?" is naturally the question a visitor asks.

If the person questioned is a man, the answer will be something like this—

"Why, we men just put on our overalls and fell to. For weeks we spent our spare time and holidays doing gymnastics down on that lot. Somebody has figured out that more than 3,000 hours of perfectly good time were given free to putting up that building. That's why it cost what it did."

If you talk to one of the women about it, she will be more than likely to say—

"Well, the men did work hard, but we women worked just as hard cooking dinners for them and, between you and me, I don't believe that building would be standing there now if we hadn't kept up morale, as you might say, with our good hot dinners."

It was a representative of the national organization called Community Service who set the idea of a community house in motion. He had been called in as a consulting specialist to advise the townspeople how to provide for themselves more recreation. When he discovered that the only

place the young people had to play basketball in was a small room at the Chamber of Commerce headquarters and that there was simply no suitable place for general community good times, he suggested building a house especially to play in. Of course, there were plenty of objectors at first, but the idea once fairly started was like a snowball rolling down a hill, gaining in speed and picking up more and more interest as it traveled.

From start to finish, the building was a product of community-wide effort. Twenty-five business men advanced the money for the lot. The unions contributed skilled labor, and amateur volunteers performed all the unskilled work. Masonry, carpentry, painting and plumbing were all the work of volunteers. Members of the manual training class of the high school received credit in their regular work for what they did on the building. The Chamber of Commerce set aside a special day when its members turned out in force to help and even the mayor donned overalls and turned to. Each of two large manufacturing concerns contributed stoves to warm the building for the workmen. The Rebecca's, the Ben Hur Ladies, the W. C. T. U., Camp Fire Girls and different girls' bible classes took turns cooking the free dinners that were served every day to the workmen.

The roast pig dinner on New Year's Day was a good example of the way the town pulled together. A pig was donated by a farmer, butchered by a local butcher free of charge, roasted in one of the big ovens of a neighboring baker, also free of charge, and served by the Camp Fire Girls in the dining room of a laundry across the street from the community house lot. The ice cream and after dinner cigars and the flowers for the

ladies who cooked the meal were all donated.

Operations began on a sleety rainy day right after Christmas last year when a dozen men turned out with picks and shovels and dug the holes for the cement foundation posts. About a hundred men celebrated New Year's Day by hauling cinders, carrying boards, and driving nails. Some were professionals who handled laths and boards and nails with a dexterity born only with practice, but many an office worker nursed bruised thumbs and fingers and an aching back as a result of that unaccustomed manual labor. However, neither lame backs, nor bruises nor cold weather nor stormy weather could lessen the enthusiasm of these volunteer workmen. In spite of minor injuries, they kept right at it for the next three weeks during all their spare time and before the month was over, the building was ready to house all the pent-up fun and all the good fellowship that the townsfolk wanted to liberate therein.

This home-made community house is a building that any city might be proud to claim as its own. It provides a big assembly room 46 x 80 with a hard wood floor as smooth and shiny as the floor in a Valspar "ad." and as capable of holding its own against the assaults of dynamic youth. Many are the uses to which the townspeople are putting their new house. The high school girls and boys have used the assembly room regularly for their gymnastic classes. A grade school basketball league of ten teams representing every grade school and the two parochial schools of the city has been organized. Six church volley ball teams and an indoor baseball team have been making its walls resound every Friday night. The Home Women's League in Gymnastics with 146 members has held its sessions there. There have been thrilling public basketball games between industrial teams and school teams. There have been big noisy community parties. There have been quiet Sunday afternoon musicales.

*(Continued on page 41)*

Teamwork among these citizens of Peru, Indiana, built a \$25,000 community building out of practically nothing!

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## Harrison G. Blackburn

*Forty-Eight Years of Service, and  
Never Late!*

Harrison G. Blackburn, pensioned car-  
penter, Connellsville Division, was born at  
Centerville, Washington County, Pa., on  
September 26, 1857. At the age of ten  
years he came to Connellsville with his  
parents. At the age of 16 he entered the  
service of the Baltimore and Ohio as laborer,  
and a year later he was made carpenter's  
apprentice. In 1882 he was made carpenter.  
He worked in this capacity until this year  
when his name was placed on the pension  
roll. Mr. Blackburn's years of service were  
spent entirely at Connellsville, 11 years in  
the Motive Power Department, and 37  
years in the Maintenance of Way. In all  
of this time, he tells us that he was never  
late for work, nor did he ever miss a train  
when he was called upon to go out on the  
road for work.

## Jacob Schlemmer

Jacob Schlemmer, pensioned car inspec-  
tor, Wheeling Division, was born in Bavaria,  
Germany on December 14, 1854. He was  
educated in the public schools of that  
country and came to the United States in  
1881. Here he settled on a farm near  
Marietta, Ohio. On June 7, 1883 he ob-  
tained employment with the Baltimore and  
Ohio as car repairer. In 1890 he was made  
car inspector. He remained in this position  
until he was retired. In 1895 Mr. Schlem-  
mer was married to Miss Amelia Bremer.  
Four children were born to them, all of  
whom are living.

## Louis Knepper

Louis Knepper, pensioned machinist,  
Baltimore Division, was born on March  
18, 1857. He began work with the Balti-

more and Ohio at Mt. Clare on June 1,  
1901 as machinist. He filled this position  
for 21 years. Recently he received a severe  
injury which incapacitated him. He was  
pensioned during October, this year.

## James W. Ward

James W. Ward, pensioned trackman,  
Cumberland Division, was born on June  
13, 1857 at Round Bottom, West Virginia.  
He entered the service of the Baltimore  
and Ohio on May 1, 1880 as trackman,  
Okonoko. In 1906 he began working in  
the same capacity at Green Spring, W. Va.  
He now resides at Round Bottom, the  
place to which he was transferred, Section  
24-A. Mr. Ward was retired in October.

## George Genner

George Genner was born in Bavaria,  
Germany on June 1, 1857. He came to  
the United States with his parents in 1860.  
His parents died while George was still  
young, and the boy was left to shift for  
himself. In 1880, when he was married,  
Mr. Genner went to work with the P. W.  
& B., coming to the Baltimore and Ohio as  
machinist helper, Mt. Clare on February 14,  
1887. In 1895 he was made machinist.  
This position he has held until recently  
when he was placed on the pensioners' list.

## Lawrence Baron

Lawrence Baron, who was pensioned in  
October, was signalman, Chicago Terminal  
Division. He was born in Austria on  
August 10, 1857. He came to the Baltimore  
and Ohio as interlocking man, Signal De-  
partment, in 1893. In 1916 he was made  
signal maintainer, Polk Street Depot.

Mr. Baron says: "My service with the  
Company, to the best of my knowledge,  
has been satisfactory and I wish to thank  
the Baltimore and Ohio for all favors shown  
me."

Mr. Baron now makes his home at 247  
Franklin Street, Downer's Grove, Illinois.

## William H. Jeffries

William H. Jeffries, who was pensioned  
in 1916, now lives in Florida. He writes a  
letter to the superintendent of the Relief  
Department, telling of his lovely home in  
that state, where he and Mrs. Jeffries reside.  
The picture, although it is not clear enough  
for reproduction, shows their home with a  
fine lot of hens. Mr. and Mrs. Jeffries  
stand at the door. Mr. Jeffries says, in part:

"I sure am glad that I entered the service  
of the Baltimore and Ohio. I first took  
service as brakeman, Grafton to Piedmont,  
in 1869. In July 1873, I quit of my own  
accord and went to my home town, Weston,  
W. Va., and was married. I then went on  
the narrow gauge line from Clarksburg to  
Weston as brakeman and extra conductor.  
Later when the road was widened, I worked  
on the W. Va. and P. Railroad. When the  
Baltimore and Ohio took over this road, I  
kept my place as conductor here until I  
became crippled and unfit for service. I  
was then 65 years old, so I was retired.

"I am proud that my name is entered  
with the Baltimore and Ohio people, and  
I do not fail, at all times, to put in a good  
word for the Baltimore and Ohio Railroad,  
which has been so good to me. I am thank-  
ful that I am one of the boys."

## Stop That Leak!

No finer response has ever been  
made by employes of the Balt'more  
and Ohio to any appeal of the Man-  
agement than that shown by the  
Veterans in our Business Getting  
Drive of 1921 when President Willard  
asked them to get new business for  
the Company.

Now President Willard appeals  
again (see page 6), this time for  
economy! On account of their inti-  
mate acquaintance with the property,  
veterans—active and pensioned—can  
give yoeman response to this appeal.

If you know one single way to pro-  
mote economy on our Railroad please  
write—

Stop That Leak!  
Magazine Office, Mt. Royal Station,  
Baltimore, Md.

ALL HONOR TO THESE WHO NOW ARE RETIRING!

Harrison S. Blackburn, Jacob S. Schlemmer, Louis Knepper, James W. Ward, George Genner and Lawrence Baron

Note:

All puzzles published in this department will be defined, as far as possible, from the New Standard Dictionary, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the New Standard Dictionary, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

New Puzzles

No. 1. ANAGRAM  
OH, TRAVEL BY THIS COMPANY,  
AMERICA'S MAIN OLD PIONEER  
ROAD!

It's what we aim to make the best  
We're sure you'll find it meets the test  
And when you see our claim's no jest  
Why, please go out and tell the rest.  
Baltimore, Md. Miss Olive W. Dennis

No. 2. PYRAMID  
(Defined by New International Dictionary)  
Across:

- 1—A letter,
- 2—A darling,
- 3—Bib. name,
- 4—Group of North American mints,
- 5—The phaeton butterfly.

Down:

- 1—A letter,
- 2—Mamma,
- 3—The sun,
- 4—To throb,
- 5—In the East, a rest house,
- 6—Termination,
- 7—Doing,
- 8—(Obs.) Are,
- 9—A letter.

Worthing, S. Dak. Sherlock Holmes

No. 3. CHARADE (9)  
Across the field the FINAL flew,  
And gazed upon the WHOLE  
That stood between the rows of corn  
And looked extremely droll.

Its purpose was to FIRST the LAST  
But this the wise bird knew;  
He flapped his wings and wagged his head  
As on his way he flew.  
Asheboro, N. C. Gee

No. 4. RHOMBOID

(Defined from New International Dictionary)

Across:

- 1—A runway or track formed of rails,
- 2—A net that is trailed or drawn behind a boat,
- 3—Understandings,
- 4—Wholes, totals,
- 5—A Bible name,
- 6—Flows in a small gentle stream,
- 7—Any of numerous scaleless eels of the family Ophiothyidae,
- 8—Dialect variant of Staddles.

Down:

- 1—A letter,
- 2—Simple presence in, on, or by, or contiguity to,
- 3—Anger,
- 4—Obsolete or Scot. and Dialect English variant of long,
- 5—Customs,
- 6—(Obs.) Far off,
- 7—(Obs.) Anears,
- 8—Causes to leave or quit a railroad train,
- 9—A blusterer (Obs.),
- 10—(Obs.) Slack,
- 11—(Obs.) Sealed,
- 12—Reward,
- 13—Seal (Obs.),
- 14—A Chinese coin or measure,
- 15—A letter.

Hoboken, N. J. Lateo

No. 5. TRANSDELETION (4)

My ONE went forth on a beautiful TWO,  
The year was at its Spring,  
A THREE passed by who said "FOUR!  
FOUR!"

I'm so happy that I could sing."  
Cincinnati, Ohio Gem

No. 6. OCTAGON

(Defined from New International Dictionary)

- 1—A vehicle moved on wheels,
- 2—A large ruminant animal,
- 3—A company of travelers,
- 4—Full of love,
- 5—Recovers life,
- 6—That which washes or cleanses,
- 7—(Obs.) Was not.

Brooklyn, N. Y. Gemini

No. 7. DIAMOND

- 1—A letter,
- 2—A basket of a balloon,
- 3—My lady,
- 4—A Highland or Irish predatory irregular soldier,
- 5—A manual or hand book for ready reference,
- 6—A dainty morsel,
- 7—Latin word meaning a spice or mace,
- 8—The projection near the eye of an anchor,
- 9—A letter.

Baltimore, Md. S. T. Udent

No. 8. TRANSPOSITION (6)

Sherlock Holmes was "some" detective,  
Honor to his name!

Methods rare yet quite effective  
Won him fiction fame.

Many a FIRST of reputation  
In a local way  
Striving to maintain his station  
SECONDS night and day.  
Baltimore, Md. L. M. N. Terry

No. 9. SQUARE

- 1—One who passes
  - 2—In a flame,
  - 3—Roofed with slate,
  - 4—Ridicule,
  - 5—To use, as from a fluid,
  - 6—To regain possession of by paying a price.
- Chicago, Ill. Mentor

No. 10. PROGRESSIVE HALF-SQUARE

- 1—A table on which tea or supper is served,

- 3—A plate (Two words),
- 4—Cuisine,
- 5—Competent,
- 6—Marshall of France, 1652-1730 (Phillips Biography Dictionary),
- 7—A Chinese coin or measure,
- 8—A letter.

Richmond, Va. Delmonte

No. 11. NUMERICAL ENIGMA

The day is warm and as I have  
No 6-7-8-9 work to do  
I'll 14-15-9 me hence  
And see a baseball game or two.

I 14-10-11-12  
The ticket man my last four bits,  
Then climbing to a bleacher shelf  
Straightway proceed to throw some fits.

I watch the 1-2-3-3 soar  
Straight from the 1-2-4 with grace  
And drop into a 6-5-4  
Found waiting in the proper place.

And at his Umps I rail and chafe;  
He is the 3-5-6-5-4;  
Why did he call that runner safe  
And pave the way to tie the score?

16-14, he gets my goat!  
Why doesn't he umpire as he should?  
13-14, give me my coat,  
I'll beat it while the going's good.

I'll go back to the ALL and there  
My feet upon the desk once more,  
Forthwith forget to rend my hair,  
And cuss the umpire times galore.  
Johnstown, Pa. Tom Crestmore

No. 12. INVERTED PYRAMID

- Across:
- 1—A student of the principles of knowledge,
  - 2—The process of cultivating the intellect,
  - 3—A volcanic island in Nicaragua Lake,
  - 4—To ward off,
  - 5—A ship or vessel (Sp.)

6—A letter.

Down:

- 1—A letter,
- 2—Fifth letter of the Hebrew alphabet,
- 3—An artificial language modeled upon Esperanto,
- 4—A shapeless mass of inert matter,
- 5—Figuratively, an unbounded expanse,
- 6—The governor of a province in ancient Persia,
- 7—A county in S. E. Colorado,
- 8—Shrill,
- 9—A common garden implement,
- 10—In printing, one-half of an em,
- 11—A letter.

Cincinnati, Ohio Wick-o-cincy

No. 13. CHARADE (9)

There are maidens whose eyes are  
the huc of the sea,  
Whose cheeks are like rose-buds  
abloom on the lea;  
But I sing of the lure of a maid  
debonair  
With a smile on her lips and a  
WHOLE in her hair.  
When I stop in the dusk at the  
vine-covered cot  
Where my Molly resides, 'tis the  
loveliest spot  
In the TWO to my heart, I am  
daft with despair  
At the smile on her lips and  
the WHOLE in her hair.  
Had I mansions and yachts and  
a dashing red ONE,  
They should all be my Molly's, ere  
set of the sun;  
But the TWO has no wealth that  
love can compare  
With the smile on her lips and  
the WHOLE in her hair.

St. Louis, Mo. Molemi

No. 14. SQUARE

- 1—Leisurely strolled,
- 2—A bitter crystalline compound contained in the root of asarabacca,
- 3—A small genus of tropical American herbs of the ginger family,
- 4—Boasted,
- 5—Chinese and East Indian trees of the family Sapindacea
- 6—An understanding,
- 7—A resolute attempt or attack.

Baltimore, Md. Red Crow

Two New Prizes

Two prizes, each of six months subscription to the Enigma, the official organ of the National Puzzler's League, will be awarded for the two best lists of solutions to these puzzles.

To receive proper credit all lists of solutions must be in my hands by February 5; the answers and solvers list will be published in the March issue.

# Women's Department

Edited by Margaret Talbot Stevens.

## What Christmas Means

OH, Isabel," cried Eloise, running into her classmate's room on the day before Christmas, "isn't it just great that we're going home today! I have so many wonderful things to do that I am sure I'll never get through with them all!"

Isabel quickly closed her worn travelling bag.

"Yes, Eloise, I think it's splendid, and I certainly hope that you'll have a fine time. Of course, it won't seem like Christmas at my home this year without Mother—but of course, there's Father and little John. I must make it seem like Christmas to them."

"Oh, Isabel, can't you possibly go home with me? We'd have no end of a good time. Come on!"

Isabel thought of her own plain clothes and of Eloise's three new frocks.

"No," she replied, "I thank you, Eloise, but when Christmas comes we ought to be at home."

"Well," said Eloise, "it doesn't seem to make much difference to me. I'm going mostly for the parties, you know. Mother and Father won't see much of me. Besides, they have their own friends and——"

The rest was lost on Isabel. It doesn't make much difference? she thought. Why, of course, Christmastime made lots of difference. Why should Eloise say that, she who had everything in the world to make her happy? Isabel thought of her friend's lovely home and opportunities. Eloise always had nice things to wear. She would get wonderful gifts from her parents. She had asked her mother for a fur coat. Her father would give her pearls. She had wanted a car, but she supposed that she'd have to be satisfied with pearls, for her father had said so. And there was a car and a chauffeur at Eloise's command. Although her father was seldom at home, he was generous with his purse, and Eloise was never in need of spending money. Her mother, who spent much of her time in entertaining, saw to it that her daughter was provided with all the luxuries of dress.

Then Isabel thought of her own home in comparison. Hers was a shabby old farmhouse, and her father a man who struggled to get his bills paid, only to get into more debt in order to give Isabel an education. Their car was a ramshackle buggy drawn by old Prince, the horse of all work. Oh, it

was awful, this business of being poor! Why hadn't she been born as rich as Eloise?

And yet, when she arrived at the little station, six miles from home, and saw them waiting for her—Father, little John, old Prince, and the ramshackle buggy—Isabel rebuked herself severely. Christmas at home *did* make a difference. Here was everybody glad to see her. The neighbors all along the way came to the windows to wave to her, or to their doors to shout "Merry Christmas!" and before she was half way home, Isabel began to feel sorry for Eloise. Even old colored Ned seemed glad to see her. It was wonderful, this coming home for Christmas!

After supper that night she helped little John pop some popcorn at the open fireplace. How cozy it was, and how beautiful to see the kernels burst and pop over into fluffy, white balls! Soon it was bedtime for little John. Isabel helped him undress, heard him say his prayers, and tucked him in.

"Isabel," said the little fellow, "come here, I want to tell you a secret." Isabel put her head down on the pillow beside the light, curly one. "Isabel, I've got a Christmas present for you, but don't you tell anybody." Isabel promised. Then little John reached under his pillow and brought out a paper bag. He opened it and took out what once had been a chocolate mouse.

"I bit his ears off. That was all right, wasn't it, Isabel? And he's all yours now. He's just as sweet as he can be. And you'll give me a bite of him tomorrow morning, won't you?" Between the lumps that came up in her throat, Isabel promised that he should help her eat it in the morning. Then she kissed him and bade him go to sleep, lest Santa should find him awake.

As she went downstairs she heard her father coming into the kitchen. He had driven to town to get a few things for the Christmas tree. As she helped him put the bundles on the table, he picked up a small package and handed it to Isabel.

"Here, my girl, is a little present for you. You probably won't think much of it. I only wish I might give you something worth while. I just wanted you to know that I had not forgotten what Christmas means."

Isabel opened the package. It was a little gilded iron penholder for her desk. It was worth probably ten or fifteen cents.

She glanced up at her father. He had turned his head. By the light of the tin reflector on the kitchen lamp she could see the silver hairs that were creeping among his black ones.

She picked up her gift and ran around the table and into his outstretched arms.

"Oh, Daddy!" she cried, "Christmas means just everything!"

\*\*\*\*\*

Two weeks later she was back at school. Eloise and Helen Lancaster were in Isabel's room.

"What did you get for Christmas, Eloise?" asked Helen.

"Oh, just the fur coat and the pearls. Nothing else worth while."

"I was a bit disappointed myself," went on Helen, "I wanted pearls, too, but I got a new evening dress instead, and a ring from Mother. Did you get all you wanted, Isabel?"

"Everything," declared Isabel, "and more. And besides, I learned just what Christmas means."

The two girls stared for a moment. Soon they excused themselves and said good night.

"What do you suppose Isabel meant?" asked Helen when they were seated on Eloise's Turkish couch a few minutes later.

"I don't know exactly," replied Eloise, "but Isabel was always able to get more joy out of nothing than anyone I ever saw."

But Isabel, getting out her new penholder and placing it on her study table, knew exactly.

Willie was almost through his reading lesson when he came to a word he could not pronounce.

"Barque," prompted the teacher.

Willie looked at his classmates and laughed.

"Barque, Willie!" exclaimed the teacher harshly.

Willie, looking up at the teacher, finally cried out, "Bow-wow!"

This handsome centerpiece is one of many which Mrs. Harry Reay, wife of compositor, Printing Department, is famous for making. Mrs. Reay is saving the money which she earns in this manner to purchase an automobile. This centerpiece has been in constant use since 1900.

# Culinary Column

## Christmas Candies

By DOROTHY LIPPY, Multigraph Department, Baltimore, Md.

### Chocolate Caramels

- 2 cups sugar
- 10-cent bar of chocolate
- Butter, size of a walnut
- $\frac{3}{4}$  cup milk
- Pinch of salt

Cook over slow fire until it forms a soft ball when dropped into cold water. Add a teaspoon of vanilla and pour into a buttered pan. Cut in squares when it begins to cool.

### Walnut Sea Foam

- 1 pound brown sugar
- 1 lump butter, size of a walnut
- 1 cup milk

Cook in a saucepan until the mixture forms a soft ball in cold water. Have ready the stiffly beaten white of one egg. Quickly beat the mixture into the egg white and drop from spoon on waxed paper. Put half a walnut on top of each mound.

### Penuche

Use same ingredients as for seafoam, omitting the egg. When mixture is of a consistency that will form a soft ball in cold water, beat in a cupful of ground peanuts. Beat well and drop from spoon on waxed paper.

### Cream Bars

- 3 cups XXXX sugar
- Pure cream enough to make a stiff fondant

Divide into three parts. Flavor and color one part with chocolate, one with strawberry, and one with vanilla. Press each of the masses into a flat layer, then press one on top of the other and slice. These should be eaten on the same day that they are made.

### Cocoanut Balls

- 1 pound XXXX sugar
- 1 can of shredded cocoanut

Mix well and add a little cream, just enough to make a stiff fondant. Roll into balls, and roll balls again in a little cocoanut that has been left out.

### Mince Pies

By JOSEPH L. PRESS, Chef to President Willard

- 1 pound of good, prepared mincemeat
- 2 tablespoons sweet cider

Add a little melted butter and sugar. Line a deep plate with a very short crust. The top crust should be very thin. Bake in a hot oven for 25 minutes.

## Aunt Mary's Stuffed Dates

- 2 packages Dromedary dates
- $\frac{1}{4}$  pound best butter
- 1 pound XXXX sugar
- 1 small cake of bitter chocolate
- 2 teaspoons vanilla

With a sharp knife remove the seeds from the dates, taking care to make the slit only in one side of each.

Melt the butter and chocolate together over a hot fire. Stir well, remove from the fire, and add the sugar, stirring all the while. Add vanilla. The mixture is now a stiff dough.

Into the cavity of each date press a half-teaspoonful of the mixture. Smooth with the back of the spoon and decorate with prints made with a fork. Wrap each date in wax paper. These will keep for a long time. Do not eat too many at once.

## Dark Fruit Cake

By MRS. T. E. STEVENS, Lothian, Md.

- 2 cups light brown sugar
- 1 cup butter
- 1 cup cooking molasses
- 1 cup cold coffee
- $\frac{1}{2}$  cup any kind of good fruit wine
- 1 teaspoon soda, dissolved in hot water
- 1 pound raisins
- $\frac{1}{2}$  pound currants
- $\frac{1}{4}$  pound citron, chopped
- $\frac{1}{2}$  pound dates, chopped
- 1 teaspoon ground nutmeg
- 1 teaspoon cinnamon
- $\frac{1}{2}$  teaspoon ground cloves
- $\frac{1}{2}$  teaspoon allspice
- 4 eggs, beaten light
- 1 teaspoon vanilla

## Will You Help Fill the Bag?

Dear Women Readers:

I once knew a dear, good old soul, a country school marm. Faithful to her duties and precise in all things, Miss Matilda had many excellent qualities and many ideas.

One of these ideas was developed in the shape of a black sateen bag, in which she carried practically all of her precious possessions. And whenever Miss Matilda went, the bag, like Mary's little lamb, went too.

One day Miss Matilda opened the bag and showed me its contents. There was her alarm clock, which served as a timepiece for every occasion; her Bible, a pair of rubbers, a jar of preserves, a half loaf of bread and a knife with which to cut it; the stove poker (which she firmly believed that a thief might steal from the schoolhouse on some cold winter's night), a package of letters, a towel, and a bottle of iodine. And there seemed to be no end to this bag's capacity.

Some of you may laugh at this idea; there are others who will recognize Miss Matilda from this description. But my point in telling the story is this: Our Women's Department has often reminded me of Miss Matilda's bag, for during the year 1922 there have come so many varied and interesting contributions to fill it up. And yet, there is no end to its capacity. I want to thank each one of you for your splendid help in making the Women's Department the kind of a Women's Department that we want for our MAGAZINE.

Next year we're going to do still better, and as the first package that goes into the bag, comes a letter from President Willard. Turn to page 6 of this issue and read it. There you will see where he wants us to do all that we can in the line of economy, on the MAGAZINE, on the Railroad, and in our homes. And just as a starter in our own department, I want to tell you about our new pattern service.

Beginning the January issue all of our dress patterns will be only twelve cents. The pattern service is the new service which we have been running in the MAGAZINE for the past three months in addition to the old service. You will also be glad to know that the patterns are simple and easy to make, so that the beginner should have no hesitation about ordering them.

What shall be the next contribution to the bag? Have you a suggestion? If you have, send it in and we shall be glad to let our other readers have the benefit of it. No matter whether your suggestion deals with the household, the office, the Railroad itself, or the MAGAZINE; no matter whether your letter has the proper style, or spelling, or what not (it is the business of the editors to remedy the errors)—don't be afraid to let us hear from you. Send your letters to the undersigned, and we'll soon have the old cambric bag bursting its sides.

And now let me thank you all again for your splendid cooperation and wish you the merriest Christmas that you ever knew.

Yours sincerely,

*Margaret Talbot Stevens*

3 teaspoons baking powder  
Flour enough to make stiff for baking.

Bake in pans lined with greased paper, in a slow oven.

For light fruit cake, use the same ingredients, except for the following changes: Omit molasses, cloves and allspice, and substitute white sugar for brown.

#### Angel Food Cake

By MRS. W. E. HADDEN, Dover, Ohio

12 egg whites, well beaten  
1½ cups granulated sugar, sifted three times

1 cup flour, sifted three times

Flavoring

Fold in flour and add 1 teaspoon cream of tartar. Bake in an ungreased pan for one hour. Turn upside down on a rest, so that a knife may be passed under it, if necessary. Let it remain until cold. Remove the pan. Ice.

#### Water Sponge Cake

By J. MILTON STREVIG

Office of General Inspector of Transportation  
Baltimore, Md.

2 cups sugar  
2 cups flour  
½ cup water  
2 teaspoons baking powder  
5 eggs, keeping out white of one egg for icing

Beat thoroughly the whites of 4 eggs and stir in the sugar. Add the yolks of 5 eggs which have been beaten stiff. Then add the baking powder to the flour and mix in the flour and the water alternately. Bake for one hour in a slow oven.

#### Butter Scotch Cookies

By MRS. O. L. WALLBURG, Lima, Ohio

4 cups brown sugar  
1 cup butter  
4 eggs  
1 tablespoon vanilla  
7 cups flour  
1 tablespoon cream of tartar  
1 tablespoon soda

Mix well together the sugar, butter, eggs and vanilla. Mix the flour, cream of tartar and baking soda together and add to the first mixture. Work all well together and pat into a loaf. Let this stand over night. In the morning, slice and bake. These are delicious.

#### Coffee Cake

By MRS. O. L. SMITH, Gaithersburg, Md.

2 cups shortening  
2 cups sugar  
2 eggs  
Grated rind of and juice of 1 lemon  
½ teaspoon baking soda, dissolved in ½ cup warm water

Mix all together with flour to make a stiff dough. Roll thin and cut with biscuit cutter. Bake for 10 minutes in quick oven.

Mrs. J. H. Lower, wife of pensioned agent, Hicksville, Ohio

## Poems of Dorsey School

### Our School at Dorsey

By IDA SMITH

There's a place that from my home I see,  
A place that's very dear to me,  
I try to go there every day,  
And try my lessons best to say.

### My School

By EDNA REIMSNIDER

I know a place that's dear to me,  
That in my childhood I can see,  
The dear old school to which I've gone,  
And the old school-grounds that we played on.

The dear old school, whose children gay  
Were always glad to romp and play,  
And 'though, sometimes, we broke the rule,  
Still, we'll always love our school.

There's George and Jim, Wesley and Paul,  
They always came at the bell's loud call—  
But Ernst and Hazel and Frances and Kate,  
Always came running to the schoolhouse late.

For the Little Christmas Tree

## Games We Play at School

By LOUISE PERRY

When we play "Crack the Whip," at school,

Ah, lots of fun have I,  
But when somebody takes a drop,  
'Tisn't fun to see him cry.

The trouble is, we like to scrap,  
And girls don't play like boys,  
For boys are tough, and they get so rough,  
There's an awful lot of noise.

Our teacher's very good to us,  
And we're a lot of care—  
But oh, when'er a mouse comes 'round  
She climbs upon a chair.

## The Little Christmas Tree

*Which Can Easily Be Used in Office*

IF you want a pretty little Christmas tree for your table or desk this year, the accompanying picture suggests an effective way of decorating it. The Christmas tree shown here was used in the Auditor of Disbursements Office of the Southern Railway, at Washington, D. C., last year. The idea might be carried out in arranging your gifts at home. The tree is simply trimmed with a few balls and several small packages of tinsel. Cotton forms the snow of the garden. White paper cornucopias with red or gilt balls make lovely posts, while the fence and jeweled archway are made of chains of the smaller and less expensive balls.

If, however, you want to have a real Baltimore and Ohio Christmas garden, why not use the cover of this issue of the MAGAZINE as a suggestion? The Baltimore and Ohio train may be found in nearly every well-equipped Christmas garden, and the sleigh can be made by hand. Nearly all of the ten-cent stores carry little wooden reindeer, and an old spiked letter file with its base hidden under the cotton snow will hold up a doll Santa Claus who waves his red coat at the train for help. This idea may be carried out as simply or as elaborately as you choose. If you need any further help in carrying out this scheme for your Christmas tree and garden decorations, write to:

Aunt Mary  
Baltimore and Ohio Magazine  
Mt. Royal Station, Baltimore, Md.

### Family Affair

Sammy couldn't understand the theory of evolution, so he questioned his mother. "Mamma, am I descended from a monkey?"

"I don't know my boy," she replied. "I never knew any of your father's people."

—Toronto Telegram.

# Frocks That Are Charming, Simple and Original

By Maude Hall

The new tailored suits are unusually trim and smart, having just the right amount of flare to individualize them. For warmth, snug collars are added, but the collars are all convertible, so that they may be worn high or low. Sometimes they are of self-material, while, again, the collars are made of mole, caracul, Hudson seal or squirrel. While one finds a large number of belted jackets, there are others that are worn to exceedingly smart advantage without belts. Tall, slender women will gravitate toward the long jacket with straight-up-and-down lines, for the half-length model will be selected for women of less imposing stature. Jackets that fall straight from the shoulder to the low-posed belt are worn with separate skirts, as well as with the three piece suit.

However long dresses may be, the most of the great designers seem to cling to the skirt that is of moderate walking length, in no case ever extending below the ankles. This rule is followed even with the one-piece dress with long-waisted blouse of contrasting material, worn with the three-piece suit.

The embroideries used on tailleurs are entirely different from those appearing on frocks and blouses. A great deal of braid is used, being used in thick, concentrated designs on collar and sleeves. Other embroideries in the form of thick cords, knotted at intervals, are sewn on in rows on many of the coat models.

DRESS NO. 1343. Sizes, 34 to 42 bust, and 16 to 20 years.

DRESS NO. 1383. Sizes, 34 to 48 bust.

DRESS NO. 1380. Sizes, 34 to 46 bust.

DRESS NO. 1416. Sizes, 34 to 50 bust.

DRESS NO. 1397. Sizes, 34 to 48 bust. Price, 35 cents each. Use coupon.

1037. GIRLS AND JUNIORS' DRESS. Size 8 requires: 2 1/4 yards 36-inch material;

or, 2 1/8 yards 40-inch material and 2 3/4 yards ribbon for sash. If made as illustrated in

second view, size 14 requires: 3 5/8 yards 32-inch material; or, 3 3/8 yards 36-inch material; or, 2 1/4 yards 54-inch material and 3 yards ribbon for sash.

Dress closes at center-back. Round neck is finished with collar, and perforated in front for square outline. Long or short sleeves.

12672. Blue or yellow transfer, 25 cents.

1037 Price 30 cents

Sizes 6, 8, 10, 12, 13, 14, 15, 16, and 17, years.

1006. Boy's SUIT. Size 8 requires 3 yards 36-inch material; or, 2 1/2 yards 44-inch material, or, 2 yards 54-inch material with 7/8 yard 36-inch lining for back of vest, pockets, and waist-bands.

The suit consists of a jacket, vest, and side-closing trousers. The jacket has a notched collar, inserted pockets with pocket laps and two-piece sleeves. Belt is closed in front. The vest has a round collar, inserted pockets and belt straps at back. The vest may be made of white pique, linen, or pongee, while the suit may be made of tweed, cheviot, French serge, Poiret twill, velveteen or corduroy.

1006 Price 35 cents

### A Pretty Frock for the Little Tot

4171. One could use voile, crepe or nainsook for this model. Gingham and percale are also attractive. The sleeve may be in wrist or elbow length.

The Pattern is cut in four Sizes: 1, 2, 4 and 5 years. A 2 year size requires  $2\frac{1}{4}$  yards of 32-inch material.

Pattern mailed to any address on receipt of 12 cents in silver or stamps.

### An Ideal House Dress

4179. The simplicity of this model is its best feature. The pleasing fullness above the bust, and an equally comfortable allowance on the sides at the hips, are practical points that will appeal to the woman who likes neatness and comfort in her house dresses. The sleeve in short length is attractive and comfortable. The long sleeve may be turned up for convenience in working.

This Pattern is cut in six Sizes: 34, 36, 38, 40, 42, and 44 inches bust measure. A 38-inch size requires  $4\frac{5}{8}$  yards of 32-inch material. The width at the foot is  $2\frac{1}{8}$  yards.

Pattern mailed to any address on receipt of 12 cents in silver or stamps.

### A Simple Frock for a Small Miss

4188. Plaid gingham in brown tones is here shown. The dress is also attractive in gabardine, tricotine, percale and other seasonable materials. The sleeve may be finished in wrist or elbow length.

The Pattern is cut in four Sizes: 4, 6, 8, and 10 years. A 6 year size will require 3 yards of 32-inch material. Collar and cuffs

of contrasting material require  $\frac{3}{8}$  yard.

Pattern mailed to any address on receipt of 12 cents in silver or stamps.

### A Comfortable Protective Apron

4193. Blue and white check gingham with rick rack braid for trimming is here illustrated. Crepe with a finish in colored yarn would be nice, as would also be percale or sateen with binding in a contrasting color.

The Pattern is cut in four Sizes: Small, 34-36; Medium, 38-40; Large, 42-44; Extra Large, 46-48 inches bust measure. A Medium size requires  $4\frac{1}{2}$  yards of 36-inch material.

Pattern mailed to any address on receipt of 12 cents in silver or stamps.

### An Up-to-date Dress for the Growing Girl

4187. This makes a splendid school dress in serge with contrasting material, or in checked or plaid woolen with trimming of braid or a finish of machine stitching. The waist has the now so popular side closing. The sleeve may be finished in wrist or elbow length.

The Pattern is cut in four Sizes: 6, 8, 10, and 12 years. A 10 year size requires  $2\frac{3}{4}$  yards of 44-inch material.

Pattern mailed to any address on receipt of 12 cents in silver or stamps.

### Pattern Prices

Any Pattern, ON THIS PAGE ONLY, sent to any address on receipt of 12 cents in stamps. Use coupon on preceding page.

Send 12 cents in silver or stamps for our UP-TO-DATE FALL & WINTER 1922-1923 BOOK OF FASHIONS.

## Dangers in Health Fads

*One of a series by Life Extension Institute containing the latest and the most scientific information on healthful living and the prevention of disease*

THE faddist, whether he thinks he has a cure for disease or for some social ill, may be a very useful citizen. Sometimes he is useful in that he forces investigation of his claims and they are found to be groundless, and a lot of doubtful matters are cleared out of the way. In other cases, the faddist may start in motion some much needed investigation even though only a modicum of truth is found in his own particular theory. In rare instances, about once in a century, some alleged extremist or faddist proves to be a genius and discovers some far reaching fundamental truth. What the public needs to bear particularly in mind is that because once in a century some marvelous discovery is made by a man who is ridiculed by his orthodox fellows, that is no reason why every alleged marvelous discovery should be embraced with enthusiasm, and this applies more emphatically to health fads and medical fads than to any other class.

It seems almost like an insult to the intelligence of my readers, to warn them against patent medicines, yet vast sums of money are still spent on these nostrums. Putting this aside as unworthy of even a moment's serious discussion by intelligent men and women, we will consider more especially the dangers that lie in following vaunted medical systems or systems of hygiene or health building for which extraordinary claims are made. As already suggested the faddist who brings forward these measures may prove to be a useful citizen, in that he starts something, but the man in the street, if he acts in the interest of himself and his family, will let the health faddist and medical faddist start these things in scientific circles and stir up the doctors, the chemists, and the physiologists as much as he pleases. He will await, however, some authoritative message from scientific sources before falling for any extreme method in diet, exercise or medical treatment for which "cure-all" claims are

made. There is no one measure that is an all embracing cure for human ills.

It is a fact that in particular types of trouble a certain method may supply about 90 per cent. of what the patient needs, but it is very unsafe to proceed on the assumption that as a rule it will supply even 20 per cent of what the average person needs. The work of the Life Extension Institute has shown that most people need to do quite a number of things in order to clear up their physical troubles and obtain sound health. It is idle to follow some marvelous system of exercise if one has a septic focus in the head, diseased tonsils, or septic teeth. The most ideal diet will do very little for people who have some specific infection that is undermining their health. On the other hand, diet and exercise will do a whole lot for these same individuals if they give proper attention to their specific trouble, the infection or the particular disability that is really chiefly responsible for lowering their condition. In other cases the lowered condition of health may be chiefly due to some dietetic deficiency, or to lack of exercise; and an infection which has been located may be of a comparatively mild type and not chiefly responsible for the lowered health.

What we wish to make clear is the great need for following a full health program based upon a thorough examination of the body and the life of the individual. Unless this is done, a great deal of money and years of time may be wasted in futile search for health or for the cure for disease. This brings us to the most serious danger in following a health fad to the exclusion of other sane and scientific measures. There may be nothing directly harmful in the fad itself, and it may even have certain beneficial features, but it may lead an individual to neglect perhaps the most important measure that is needed. This applies particularly to mind-cure fads which are so popular at the present time. Auto-suggestion, psycho-analysis, and other similar

lines of treatment have a definite value in a limited number of cases, but cannot be universally applied without great danger to the public health. Do not let anybody persuade you that you can **think** yourself into Bright's disease or tuberculosis or any organic trouble, or **think** yourself out of them. These conditions always arise from some injury or strain, or poison or infection.

It is well to keep a cheerful mind, but it is all important to search for the original physical causes of disease and remove them. The mind does have an important influence on the body, but the wonder is that it has so little influence. It is a fairly common thing for people to worry all their lives about diseases and never develop them until a ripe old age has been reached. A cheerful spirit and a hopeful outlook is a valuable health asset, but much more than this is needed to protect the human body, which Dr. Herman M. Biggs, Health Commissioner of New York State, has aptly described as the "only machine for which there are no spare parts." False teeth might be regarded as spare parts, and many people seem to get along pretty well without their original teeth; but certainly there are no spare kidneys, spare hearts, spare arteries, brains, or spare stomachs. In protecting all of these parts, they must be, as Dr. Biggs emphatically states, periodically surveyed and proper repairs instituted. This cannot be done by sending messages from your conscious to your unconscious mind, but by well known common sense and scientific methods of medical treatment and hygienic regulation of your diet, exercise and activities.

## Railway Accounting Procedure

THE Railway Accounting Officers Association, 1116 Woodward Building, Washington, D. C., has published a book, entitled "Railway Accounting Procedure." Copies may be obtained from the Association at \$1.00 each.

It is the standard reference book on railway accounting, and is indispensable to railway clerks, agents and officers in all departments.

It is the only book of its kind published. It is authentic, up-to-date, and dependable in every way.

In its 468 pages, the book gives those railway accounting practices and principles that are not available in any other manner—being compiled exclusively for this book.

Copies of "Railway Accounting Procedure" are owned and used by railroad accounting officers everywhere.

The size of the book is 6 x 9 inches, printed on good paper in clear, readable type, and substantially and attractively bound in dark-green cloth. Its appearance is worthy of commendation.

It is a book that every railroad man should have conveniently available.

## Children's Page

### When Mrs. Santa Filled the Stockings

#### I.

IT was three days before Christmas at the North Pole. Santa Claus and his good wife had finished their toy-making and you may be sure that they were very tired. Thousands of dolls and sleds had been finished for good little girls and boys; thousands of pairs of warm gloves and stockings for little red hands and feet, and millions of beautiful candles that would sparkle in the homes of little girls and boys all over the world.

Santa chatted merrily with Mrs. Santa as they ate their breakfast. Then he pulled on his heavy long boots over his blousy red trousers, belted in his jacket and put on his cap.

"Goodby, Old Woman," he called to Mrs. Santa, "take care of yourself, and don't open the door unless you know who's there. I'll be back in time for Christmas." And he kissed his wife right on the end of her nose.

"Oh, you tunny Santa," said she, laughingly, as she put her hands up to fasten his collar securely. "But oh, my dear," she added, "where is your fur muffler? Aren't you going to wear it?"

"No," declared Santa, "I'm sure I'll not need it. Why, it's the warmest Christmas-day I've ever seen." Then, jumping into his big new sleigh and cracking his whip, he was off to take the toys and goodies to the children. The air was cold and snappy, just like Christmas, he thought, as he went speeding along. Even his reindeer thought so, too, as they snapped their heels on the beaten snow.

#### II

Far away in a little country village, miles and miles from the nearest town, lived Blacksmith Tom and his wife with their large family of children. The blacksmith worked all day and sometimes even into the night to get food and clothes for them all. Today was Christmas Eve. For two days it had been snowing hard, and for a long time the snow had drifted too high for anybody to drive through to town. Old Granny Brown—she wasn't their grandmother, but the children loved to call her that, for they were so fond of her—had come from her home on "The Sands" two weeks before to help the blacksmith's wife with her sewing. She was still there, for she had not been able to get home. She was such a

jolly little old creature that the children were glad she hadn't been able to go. Even tonight, with the snow piled so high, she comforted the little ones as they began to wonder if Santa would come.

Father was in his shop finishing up a sleigh runner that had been promised for tomorrow. It was long after dark, and the children looked out of the frosted windowpanes to see the sparks fly from his forge. After awhile, when the runner was finished, he came into the house.

"Looks like a slim chance for Santa Claus tonight, my children," he said as he stamped the snow from his feet and shook his heavy coat.

Little Willie and his sister Rose began to cry. Even John, who was ten, and his older sisters and brothers felt like crying, too.

"Oh, never mind," said Granny Brown, "I'm sure that he'll get here some time, even if he is a day or so late. Let's hang up our stockings anyway, and sing our Christmas songs, and perhaps. . . Oh, well, who knows what may happen?"

So they all felt better and got out their stockings and hung them in a row. Then Mother and Granny joined in singing their Christmas songs that they had learned at school, and when they all knelt down to say their prayers, they prayed that Santa might not forget them altogether. Mother sat quietly with tears in her eyes when she heard their prayers, and Blacksmith Tom got up quickly and went out.

#### III.

On the day after Santa had left his home at the North Pole, Mrs. Santa set about getting her house in order. Making toys

and dressing dolls always seemed to get everything topsy-turvy. There is always such a rush in Santa Claus Land, for as soon as the good saint should return, they must begin on the toys for next year. No wonder that sometimes some of Santa's little people are forgotten.

Mrs. Santa soon finished her cleaning and had just begun to write out next year's list of little folks when she heard a knock at the door.

"Who's there?" she called, as Santa had told her to do.

"It is I, Jack Frost, open the door." And sure enough, there sat that naughty boy, Jack Frost, riding the back of Old Boreas, the north wind, and kicking his sides with his shins.

"Good-day, Mrs. Santa," said he, "and where is your good man?"

"You know as well as I, Jack," she replied, "Santa's gone to take the Christmas toys to all the good children."

"Oh, ho!" laughed Jack, "And how can he be there when he's here? Ha! Ha! There he comes, riding over the snowdrift!" And Jack gave Boreas a kick in his sides and they went skimming over the frozen seas.

Mrs. Santa ran out and looked up towards the big drift. Sure enough, there was Santa, with the sleigh full of toys. What had happened? She ran out to meet him.

Poor Santa was ill.

Mrs. Santa helped him out of the sleigh and into the house, where she put him to bed and gave him some hot coffee. Soon he felt much better and was able to tell her what had happened.

"That naughty Jack Frost," he told her, "was the cause of it all. The snow had gotten so deep that the reindeer could hardly pull through it, and the flakes came down so heavily that I could hardly see. Just then Jack Frost came along. I called to him to tell me if I should turn to the right or to the left. He told me to go to the left. I went, and the first thing I knew, I was stuck fast in an iceberg. The air was so cold, and I hadn't my muffler to keep me warm. When this morning came and I could see better, I found that I was too ill to go farther. I had to come back. Per-

"Jack fell down and broke his crown—"  
Drawn by Edna Akes, Xenia, Ill.

Dear Boys and Girls:—

Merry Christmas!

If all the things that I wish for you were tied up into packages, poor old Santa Claus would be buried under the pile and he would never get to see you. So I'll just send you all my best love on every page of the MAGAZINE.

This will be one of my happiest Christ-masses, and all because you have made it so happy for me by sending me so many lovely stories, poems and pictures all through this year to make our Children's Page just what it ought to be.

I am glad that we are all so well and happy. Little Billie Lowes, whose daddy is our general passenger agent at Baltimore, was one of our little sick people this year, but now he is getting well so fast that he has to pinch himself to see if it is he.

Myra Gill has written a lovely little Hallowe'en play. It was given before the Parent-Teachers Association of her school. Myra is going to let us have the play for our page next October.

So many new little people have joined our circle, and all of these have helped me so much. I hope to hear from many, many more during next year, and all of the old ones, too.

I haven't written my letter to Santa Claus yet, so I shall have to begin right now. Let me know what he brings you for Christmas. Here's a big bushel of love for each one of you. Good night!

*Aunt Mary*

A Happy Christmas Day

By Lillian Mudge, Cumberland, Md.

ONE Christmas Day my brother and I got up very early. We ran into the parlor to see what Santa Claus had brought us. To our great surprise there sat a beautiful doll, a drum and a bicycle.

I picked up the doll and stood it up to look at, and what do you think? It walked.

So I walked with it until I got tired, then I picked it up and ran upstairs.

My brother kept beating the drum and riding the bicycle until everybody was awake. We told them all that it was the happiest Christmas of all.

The Christmas Baby

Dorsey, Md.

Dear Aunt Mary:

I have a poem to tell you. Mother told me, because I was born on Christmas Day. I shall be eleven years old on this Christmas Day. Here is the poem:

I'm just a little Christmas gift,  
I came on Christmas Day.  
Perhaps you'll think that very strange,  
But it happened just this way:  
When Santa Claus had brought his gifts  
To one and then another,  
He found me in the bottom of the bag,  
So he brought me to my mother.

Your loving niece,  
(Signed) Pearl Reimsnider

To Bring You Christmas Cheer

By Lillian Reay, Baltimore, Md.

Whatever your heart may wish for,  
To what you may aspire,  
These gay little Christmas poinsettas  
Will bring you your heart's desire.

Drawn by Lillian Reay

The Bunny That Grew From a Stocking

TWO years ago there was a story in the MAGAZINE about how a pussy cat grew from an old stocking. An old lady read the story one day. She thought of a pair of old gray stockings that she had in her work bag. The feet were all worn out, and she wondered if she couldn't make a pussy cat for her little grandchild. She

got out the stockings, some cotton wool, a needle and some thread, and made as handsome a cat as one would wish to see. Then she thought that if she could make a cat with one stocking, she could make a rabbit with the other. And so she did. She drew these pictures so that you might see how she made it.

First, she cut off the foot of the stocking (figure 1). Next, she gathered the top together, stuffed some cotton wool up into it, then gathered the place for the neck and tied a string around it to make sure that it would not come apart. She stuffed the rest of the body and placed a little, round piece of cardboard in the bottom so that Bunny might sit up (figure 2).

Two large buttons formed his eyes, and with some black thread she made him a set of whiskers. A bit of cotton made a nice little tail (figure 3). For his ears and hind feet, there were four fingers from old gloves, with a tiny piece of wire in each to bend the ears into place (figure 4). And last of all, she marked arms and hips in ink and tied a big bow of ribbon around his neck (figure 5). Wouldn't you like to make a nice bunny like this? Why don't you try?

Now John Believes in Safety First

Uniontown, Pa.  
October 1, 1922

Dear Aunt Mary:

I will tell you what great fun we have playing on Mr. Robinson's lawn.

Mr. Robinson's house is near ours, and here Samuel Robinson and Helen and I play every day.

One day our ball rolled down the steep side of the lawn and Samuel and I were trying to see who could get it first. Samuel was running in front of me. Suddenly he stumbled and fell and I ran into him and both of us rolled over the stone wall and right down in front of a lady who was pushing a baby carriage with the baby in it.

I'll tell you we were scared, for we just missed the carriage and the baby.

Now we play on the other side of the lawn where there is no street.

Your friend,  
(Signed) John Beall (8 years old)

It's easy to make this bunny from an old stocking

## When Mrs. Santa Filled the Stockings

(Continued from page 38)

haps I'll feel better tomorrow. Then I'll go on my journey again."

"You will not," declared Mrs. Santa, "you'll stay in bed right where you are. I'll ask the Snow Fairy to come and take care of you, and I'll just ride around myself and tell the children that you'll be there next week. I'll tell them to hang up their stockings on New Year's Eve instead."

"Oh, but how will you get there?" asked Santa. You could never drive all those reindeer, and you may lose your way with the sleigh."

"Never mind," said she, "I shall not try to drive the sleigh. I shall ride Aurora, the reindeer that you left behind. Aurora is as swift as the wind, and I shall be there in plenty of time."

"Bless your dear heart," cried Santa, "but you must be very careful."

Mrs. Santa promised. "And I must hurry up," she added, going to the closet and getting out the suit that Santa had worn last year, for the one which he just took off was loaded with icicles. Then, to her great joy, she found that his last year's boots fitted her just right. She looked for a cap, but there was none to be had, so she got out her fur-lined night-cap that Santa had given her for a Christmas present, tied the strings, threw on Santa's muffler, kissed her husband goodby, and set out.

At the stable she called to the reindeer. "Aurora," she said, as she slipped the bridle on the swift-footed animal, "do you think you can get down where the millions of boys and girls live before Christmas morning?" And Aurora wiggled her little ears, for that's a reindeer's way of saying "yes."

Over hill and valley they fairly flew, so fast that the North Star, looking down, could not imagine what Santa Claus was doing, for he did not know that this was not Santa himself. Once they passed Jack Frost on the way, but they were going so fast that Jack thought Aurora must be a whirlwind going by. Mrs. Santa could not help smiling. For hours and hours they went without stopping.

The snow was coming down, but by riding over the tops of the highest clouds, they managed to get out of a lot of it, for high up in the top of the sky the stars were twinkling beautifully. Oh, how happy was Mrs. Santa when she thought of seeing the many, many little children of whom Santa had told her! And oh, how she loved to ride on the back of this swift-footed animal!

"Oh, Aurora," she cried, as she saw the roofs of some houses and a church steeple, "are we not getting into the village where Blacksmith Tom lives?" And Aurora, who had been on the journey with Santa many times before, wiggled her ears.

"Then take me straight to his house, for

I want to see his children first. There are so many of them and they must not be disappointed." So Aurora ran straight to the roof of the little house all covered with snow that stood next to the blacksmith shop.

### IV

Georgie and Willie, and Rose, and Johnny, and Ida, and Fannie, and Laura, and Liza and all the rest of the children had gone to bed as soon as they had said their prayers. Only Rose was awake. She was only five, but she could not sleep for wondering if Santa would come. Just as she rolled over in her little bed for the 'leventh time, she heard a noise, as if someone were coming into the room. She got up and crept over to where Johnny and Willie lay, fast asleep.

"Wake up," she whispered, "I do believe that Santa's coming!" She pulled at the sleeves of the boys' nighties. They sat up right and looked at her.

"Better lie down," cautioned Johnny, "if you're awake you won't get anything!" But little Rose stood motionless in her bare feet. Her brothers, too, held their breath as the door opened. Then they saw a funny creature that looked like Santa, and yet, who wore a nightcap.

"Oh, it must be Granny Brown," cried little Rose, running toward their visitor. "Is that you, Granny? It looks just like your nightcap."

"No," replied the funny creature, "I am Mrs. Santa Claus, and I've come to tell you that Santa is ill. But he says that he'll soon be well again, and for you to hang up your stockings again on New Year's eve. Now, hurry back into bed before you catch cold like Santa did."

"Oh," cried Fanny, who was now wide

awake, "and is he very ill?"

"Just a bad cold," declared Mrs. Santa, reaching for the stockings.

"But, Mrs. Santa, what are you putting into our stockings?" cried Laura.

"Go to sleep," advised Mrs. Santa, "and you'll find out in the morning."

Soon she went away and what do you suppose they found in their stockings on the next morning? Home-made ginger cookies and molasses candy—just the kind that Granny always made for them. Of course, they ran at once to ask Granny.

"Yes," she told them, "Mrs. Santa came upon me just as I was making them for you. She felt so badly about not having anything for your stockings that your mother suggested that she might have these. I was making them as a surprise for you on Christmas morning.

"I like them better in the stockings," declared Rose, and all the others said so, too. Then they all hugged Granny and kissed their mother, and everybody was so happy, and each one declared that it was the very nicest taffy that Granny had ever made.

This is a really, truly story. Blacksmith Tom was my very own grandfather, and his children were my mother, my aunts and my uncles. They told me the story, and I know that it must be true. Oh, yes. I forgot to say that Mrs. Santa also put some of my grandmother's dried apples into the stockings, too. And on New Year's Eve the children hung up their stockings again, and Santa came and brought them lots of nice things. My mother did not say that Santa wore his muffler this time, but I'll bet you a stick of peppermint that he did.

## Aunt Mary Jines the Glee Club

Razorback Farm, November 23, 1922

Dear Mister Seckrytary:

I seen a notice in our Maggie Zeen what said that you Glee Club boys needed some money to help you in your carryin's on. So me an' Ezra, havin' raised a purty good crop o' taters last summer, have decided as how we'd like to do a little gallivantin' 'round this winter, an' as a starter we agreed that the first good thing to do was to go to hear you angels sing.

Course, Ezra had a notion in his head for to go down to the Gayety or the Palace, but, as I sez to him, there aint no fool like a old fool, speshully when he gits his eyes on the young gals. I aint forgot the awful time I had with him when that red-headed widder useter live next door. So I puts down my foot on the ballay stuff, an' my foot, bein' heftier than Ezra's, done the work.

Well, Bro. Seckrytary, here's your five dollars an' our good wishes. May it help your voices considerable.

Yours truly an' respectful,

(Signed) Aunt Mary

P. S. Ezra sez he heard this mornin' that you aint got no more'n about 35 associate members, what have sent in their \$5. I'm givin' 'em a bit of good advice: they'd better get busy an' come across if they expect to hear you all sing in the Maryland Casualty Auditorium on Jan. 30. All them what has already heard you sing knows what a treat they'll get, but them as hasn't has got something comin' to 'em fer shore.

P. P. S. If you wanter put on a ballay dance or two, I won't get mad, as I'd hate to see Ezra git plumb disappointed; he never had no head for classikal music.

## The Realm of the Riddle

- 4—Parts of a battleship,
- 5—Veneration of the Supreme Being,
- 6—An inclosure,
- 7—A letter.

Baltimore, Md.

C. Lion

### Just between You and Me

Your attention is called to puzzle No. 1 in this issue. This is a real anagram—one of the best I have seen in a long time. The author, Miss Olive W. Dennis, is just a beginner, but to prove her first effort was no fluke she has contributed other puzzles of equal merit which will appear in early issues. If Miss Dennis upholds in her future efforts the high standard she has set with her first contribution she will immediately take rank with the very best of our flat puzzle composers—and I predict she will.

No. 10 is a progressive half-square which does not differ from the ordinary half-square described in the June issue except that the second word is the first word with the first letter cut off and the third word is the second word with the first letter cut off, etc. For instance; take the words "crape," "rape," "ape," and you will get the idea.

No. 11, the numerical enigma, is the first of its kind we have so far published although this particular style of puzzle is one of the oldest known. Each numeral represents a letter and each combination of numerals represents a word, and when these words are inserted in the verse where the numerical combinations now stand they will fit in and make sense with the other words. For instance: 6-7-8-9 represent a word of

four letters which if placed in the space occupied by these numerals in the verse will make sense in connection with the other words. You will notice from the numerals that there are sixteen letters in the answer to No. 11. To solve the puzzle set down the numerals, from one to sixteen, and as you find the correct words set under the proper numeral the letter represented by that numeral in the puzzle. When you have found all the words and set the letters down in their proper places you will have the answer to the puzzle.

Lateo, that master craftsman of large forms, just couldn't hold in any longer so he contributes in No. 4 an eight-letter rhomboid which is larger than anything of its kind we have so far published; and not to be outdone, Red Crow supplies a seven-letter square which represents progressiveness in size of this kind of puzzle over our previous offerings. But don't let the size of either puzzle worry you, because, as I said once before, the bigger the puzzle the more opportunity you have for picking up some clues to the answers.

No. 8 is another neat offering by L. M. N. Terry and we predict it is going to require some effort on the part of the solvers to work out the answer.

### Hats Off to Arthur Gans—A Real Safety Man

FOR the past several years Arthur D. Gans has been making fast friends all over the Railroad by his interesting work as motion picture exhibitor and "magician" of our Safety Department. How many accidents he has saved by his clever entertainments will never be known, but the figures for him on the credit side of the Safety ledger must be big.

Early in November Mr. Gans came into

the MAGAZINE Office and laid on the editor's desk the picture which appears on this page, and the engraving from which it was printed. And he said:

"Do you mind running this picture in the Christmas MAGAZINE for me? I want to remind the thousands of Baltimore and Ohio people all over the System whom I have met, that I am still on the job and at their service for Safety, through this holiday greeting."

Of course we were glad to do this for Mr. Gans as we are glad to do everything which will promote the great work of Safety.

Incidentally, we learned that last year Mr. Gans sent out two thousand greetings similar to this one, having the drawing and cut made at his own expense and addressing the envelopes and attending to the mailing himself.

We call that real heart interest in Safety and wish that more of the same spirit obtained throughout the rank and file of our workers.

### Your Community Building?

(Continued from page 27)

And this is only the beginning. The Chautauqua was housed there last summer. Conventions and exhibits and shows of many kinds have also been held there. In planning the building, the many purposes it might serve were taken into consideration. In the rear, a big door was cut that will permit the entrance of the biggest circus wagon, automobile or anything else that the exigencies of an indoor circus, an exhibit, or industrial exposition might require. Not only the whole town, but the whole county is benefiting by this piece of cooperation on the part of the people of one city.

"At Your Service" is the "Merry Christmas" which Arthur Gans sends to all his big and little friends in the Baltimore and Ohio family. Call on him when you want a good entertainer!

# Mechanical Department Promotions on October 15

Augustus H. Hodges, Master Mechanic, Cumberland; W. J. Dixon, Assistant Master Mechanic, Keyser; Henry E. Whitener, Assistant Master Mechanic, Holloway

Augustus H. Hodges

By J. J. SELL

ON October 15 Augustus H. Hodges was appointed division master mechanic with headquarters at Cumberland, succeeding the late Thomas F. Perkinson.

Mr. Hodges was born December 12, 1873, and first entered the Baltimore and Ohio service as an apprentice on the Cumberland Division in Keyser shops. He was promoted to machinist at Grafton, to foreman in the Weston shop in 1901, and then to general foreman at Brunswick in 1905. He was acting master mechanic at Cumberland during 1907, and then held various important positions on the Philadelphia, New Castle and Pittsburgh Divisions, returning to the Cumberland Division as master mechanic at Keyser on November 19, 1918. He has successfully handled the operations at that terminal and at the important helper stations on the West End of the division, and his promotion to the important position at Cumberland is well merited.

Mr. Hodges is well known over the entire system but feels more at home on the Cumberland Division where he started his career. To his many friends and fellow employes he is known familiarly as "Gus." The heavy mountain power and fast road and passenger power maintained at Cumberland and at intermediate terminals and helper stations, makes it necessary that the man filling this position be thoroughly familiar with all classes of power and Mr. Hodges is well qualified along these lines, and his many friends wish him every success.

W. J. Dixon

W. J. Dixon comes to Keyser to fill the vacancy created by Mr. Hodges' promotion, having seen service on the Cumberland division. He understands conditions in this territory and was extended a hearty welcome upon his return.

Master Mechanic A. H. Hodges

Assistant Master Mechanic W. J. Dixon

Mr. Dixon was born on May 26, 1886, and after graduating from the University of Illinois as a Railway Mechanical Engineer entered the service of the C. B. & Q. Railroad, working in the Test Department. He next entered the employ of the Erie Railroad as a special apprentice, and completing his apprenticeship with that Railroad, entered the service of the Illinois Central Railroad Company as a machinist.

He began work with the Baltimore and Ohio on September 9, 1915 as a machinist at Cumberland, being transferred to Philadelphia on April 1, 1916 at which time he worked in the same capacity. On May 5, 1916, he was sent to M. & K. Junction as general foreman, at which point he remained until January 22, 1917 when he was transferred to Grafton as general foreman. On November 1, 1918 he was transferred to Weston, W. Va. as general foreman, and on March 16, 1920 was transferred to Holloway as assistant master mechanic, and remained there until his recent transfer to Keyser.

Henry E. Whitener

Henry E. Whitener entered our service at Keyser as machinist, November 18, 1919, going to Cumberland in the same capacity about a week later. He was made general foreman at Grafton on January 16, 1920 and became foreman at Parkersburg on September 15, 1920. He was made general foreman at Holloway on September 4, 1921 and was promoted to assistant master mechanic there on October 15 last.

No Tie!

The high-powered car was speeding toward a railroad crossing when a train rounded the bend a mile away. The two men in the front seat, both racing fiends, began an argument as to whether or not they could beat the train to the crossing. The driver insisted he could easily make it, his companion that the train would beat them by several minutes. The argument

and the speed increased and the train rolled swiftly on. Finally a passenger in the rear seat could stand it no longer. Frantically clutching the side of the car he shouted: "I don't give a d— who wins this race, but I hope it ain't a tie."

—Chicago Daily News.

## Railroad Construction-Theory and Practice

*A Text-book of the Theory and Practice of Railroad Construction, for the Use of Students in Colleges and Technical Schools, and a Handbook for the Use of Engineers in Field and Office. Seventh Edition, Revised and Enlarged. By Walter Loring Webb, C. E., Member Am. Ry. Eng'g. Assoc., etc. 847 pages; 4 1/4 by 6 3/4; 225 figures, 10 plates; flexible bound; \$5.00; Published by John Wiley & Sons, Inc., New York.*

IN this Seventh Edition numerous corrections and revisions have been made throughout the text-matter to make it conform to the decisions of the recent conventions of the American Railway Engineering Association.

Some of the more important changes, additions, or developments of subjects incorporated in this new edition are as follows:

- 1—The shrinkage of embankments and the subsidence of subsoil under them.
- 2—Laws governing the life of ties; developments in substitutes for wooden ties.
- 3—Rails; present status of specifications; testing; life of rails; failures; intensity of pressure; rail wear.
- 4—Rail joints; causes of failure.
- 5—Water tanks; principles of construction.
- 6—Yards and terminals; hump yards; grades—(nearly rewritten).
- 7—Train resistance; resistance of passenger cars, freight cars; resistance through switches.
- 8—Stresses in track, in rails, ties and ballast; static and dynamic stresses—(new). This chapter contains a very condensed account of the reports of the Special Committee of the A. R. E. A., on "Stresses in Track."

Standard Track, Baltimore and Ohio Railroad, west of Wheeling, W. Va.

# Where They Come Back

## And Where "Christy" Matthewson Forbade Their Cheering When He Pitched His First "T. B." Game

By HELENA V. WILLIAMS, Assistant Publicity Secretary, National Tuberculosis Association, New York City

**F**ORTY-NINE years ago Edward Livingston Trudeau, a young physician, went up into the wilderness to die. Tuberculosis had marked him for its victim, and he wished to gaze until the last upon his beloved Adirondack pines, whose beauty alone could bring him peace and forgetfulness. But Nature had endowed him with the indomitable spirit of the pioneer. That, combined with a great love of mankind, prolonged his life for thirty-three years and made his name one of the foremost in the medical world. Saranac Lake, New York, has become known the world over as a health resort, and Trudeau Sanatorium to which it owes its fame, the first and one of the most successful institutions for the treatment of tuberculosis in the United States.

### The Town That "T. B." Built

Saranac Lake, the village, exists for and has been built around Trudeau Sanatorium, very much as a college town exists for and is dependent upon its university. Its shops are for the convenience of "Trudeau's" patients, its hotel for the comfort of their guests, the residences of its natives furnish board and lodging for those who because of an advanced tuberculous condition or for some other reason cannot be admitted to the sanatorium. The rulings of its department of health are framed to prevent disease infection through carelessness to the well or convalescent. The working population, letter carriers, delivery men, police officers and shop keepers all are "arrested" cases of tuberculosis; in fact everyone in this little town is either a "T. B." an "ex-T. B.," or a relative of some one who comes under either of these classifications.

The sanatorium itself is located outside the city. One passes through the village, from there through the residential section, and comes to an imposing wrought-iron gate which is the entrance to Trudeau. A winding road leads to a group of cottages which in outward architecture resemble the picturesque Swiss chalet. For the most part, they are of frame, painted yellow and topped with green gable roofs and offer an harmonious contrast to the surrounding mountainside. Inside, gaily chintzed living room and large inviting fireplaces welcome the visitor or patient to a restful hour with a book or friends. These cottages are the patients' quarters, as far removed from the average person's conception of an "institution" as is a penitentiary from a boy scout camp. To the right of the main road is the medical administration building where new arrivals are placed under observation for a week or more, in order to determine the exact status of their condition. Absolute rest in bed is the prescription here, for exercise of any sort is likely to cause a rise in temperature or some other temporary physical change, that might interfere with the making of a correct diagnosis. To the left is the dining hall, open on three sides and overlooking a magnificent range of mountains of which Mt. Baker and Whiteface are the chiefs.

The porches of the cottages as well as the dining hall porch are filled with long comfortable, upholstered chairs—the famous Adirondack recliners. Seated in these with

small tables between them, the patients who are allowed to sit up play bridge, "animals," and checkers or they chat of the day's affairs. Occasionally a young emotional member of the sanatorium family strums a ukelele while others sing or hum the popular songs of the day. Newspapers are not in great demand; perhaps the peace and remoteness of the place from the rush of the city life lessen the patients' interest in the workaday world. But letters from friends or family are always welcome.

The neighboring mountains too, gradually become the intimate friends of the

patients, friends whose expressions change from hour to hour, from goodfellowship to an inscrutable dignity and sometimes to forbidding anger, according to the mood of the weather gods who shift bits of summer fleece, racing storm clouds and the heavy gray snow-like masses, across the sun.

### Occupation a Part of "Curing"

A most interesting building is the workshop, named after Herbert Scolfield, who for seventeen years directed the occupation therapy work at Trudeau. Here basketry, jewelry making, metal work and woodwork, are among the occupations that are taught the patients. The building is one of the most beautiful on the sanatorium grounds, with leaded windows, walls of fumed oak and handwrought iron work. It contains a completely equipped dark room for developing, printing and enlarging pictures, and framed samples of the most artistic work that has been done by the patients decorate the walls of the building.

The recreation room is the favorite haunt of lovers of pool and billiards. It is true, one occasionally hears a grumbling "this cue has no tip," but such infrequent occurrences do not appear to greatly dampen the ardour of the players. There is also a large auditorium for motion picture performances and other entertainments, sometimes planned and acted by the patients themselves. As to outdoor sports, walking and croquet, or "T. B. golf," as the latter is locally known, are the favorites.

### The Morale of the Faithful

"Why, no one here looks sick!" visitors of the sanatorium are often heard to ex-

claim. Which is true. This phenomenon is due partly to the fact that only incipient cases are admitted to Trudeau and partly because the strict regimen of rest, plenty of nourishing food and fresh air soon add weight to the body and put color into the patients' cheeks. Also, there is an atmosphere of good-fellowship among the patients, and between the patients and their physicians, which promotes cheerfulness, in itself an excellent tonic. Further, the members of the medical staff are, for the most part, themselves arrested cases of tuberculosis, a fact that helps to increase the confidence of the patient in this physician and in the treatment.

The important thing in the treatment of tuberculosis is the education of the patient. Six months is the length of time that the average incipient case requires to recover from the disease. During this time the rules of healthful living and the special care which the ex-tuberculosis patient must observe in order to keep well, are so thoroughly drilled into him that the chances of a relapse are almost nil, provided he continues to observe them. As an illustration of how conscientiously the patients obey instructions, there is the story of last summer's ball game at which Christy Matthewson, "ex-T. B.," and the idol of the Saranac colony, pitched the first ball. The patients at Trudeau are requested not to talk loudly because of the strain this places upon the throat and lungs. The impulse on this occasion, however, was stronger than the will power of the fans and one of the crowd in the grandstand rose and shouted "Three good cheers for Matty!" But he added quickly, "not too rousing, boys, remember!" And one of their number who had been put on "absolute silence" by his physician whispered hoarsely, "Gosh, I can't cheer for you Matty, but I'll cough for you!"

The conscientious patient thus trained, upon his return home, spreads the gospel of good health among his friends. Besides knowing how to take care of his own health, he understands the principles of community hygiene. He knows the dangers of spitting; he knows that flies are germ carriers; he has learned that tuberculous cattle spread disease through infected milk and that, therefore, all cattle should be tuberculin tested or their milk pasteurized. So that the business of "curing" at Trudeau affects not only the individual patient but whole communities throughout the country to which they come back to continue their lives of social and economical usefulness.

Hundreds of other sanatoria for the treatment of tuberculosis have been established throughout the country during the past fifteen years. But many more are needed to care for the many cases for whom there are at present no vacant beds. To raise funds for this purpose and other phases of the tuberculosis campaign, the National Tuberculosis Association and its affiliated organizations are holding their annual sale of Christmas Seals in December.

### Sixth Annual Ball, Wheeling Division

The Sixth Annual Ball of the employees of the Wheeling Division of the Baltimore and Ohio, will be held at Convention Hall, Market Auditorium, Wheeling on the night of December 28, 1922. All employes are cordially invited.

## The Cover Design

Last year we offered a prize to the Correspondent who would submit the best idea for a Christmas cover for the Magazine. There were a number of interesting suggestions received, but by far the best of the lot came from H. S. Adams, then chief clerk to the superintendent of the Indiana Division and now chief clerk to the superintendent of the Ohio Division.

We think that our readers will agree that our art editor, C. H. Dickson, has interpreted Mr. Adam's idea in a most attractive way, with the Baltimore and Ohio train appearing in the role of "The Good Neighbor" and slowing down at the stop signal of Old Santa, to pick up the toys which have been thrown from the overturned sleigh and carry them on safely to the anxious boys and girls awaiting them.

### Francis Gonzalez

**M**OST of our officers, and practically all of the old employes around the Central Building at Baltimore will recognize the picture of this pensioned cook and porter, Francis Gonzalez.

"Frank," as he is familiarly known, was born in Havana, Cuba, in 1850. When he was nine years old, he went to live with a well known family, the Vanderwaters, of Havana City. He was reared and educated by these people and when he became a man, he remained with them as their family cook. In 1873 he came with them to New York. Three years later he began his service with the Baltimore and Ohio Railroad.

At the time of his employment, here, "Frank" was working with a cigar manufacturer. Seeing the shipments of cigars go out on the trains to lands unknown gave "Frank" a touch of wanderlust, and he asked his boss to intercede for him in securing him a position with the Railroad. This resulted in his employment in the baggage room, Camden Station. From here he went as cook on the cars of the various Baltimore and Ohio officers. For two years he cooked for President Willard. He also spent some time on the official cars of Mr. A. W. Thompson, former vice president; Major Johnson, Chief Engineer Manning, Mr. Charles F. Mayer, Mr. John K. Cowen, Mr. Leonor F. Loree, Vice President Potter, and many others among Baltimore and Ohio officers as well as of General Miller, of the Pennsylvania State Militia.

Francis Gonzalez

Speaking Spanish as well as English, "Frank's" services were in demand, and he made a number of trips to Mexico, where he acted as interpreter.

After a siege of rheumatism, "Frank" was given the position of porter in the Baltimore and Ohio Building. He served for several years in that capacity in the Transportation Department, from which he was retired on November 30, 1917.

On December 5 of that year he went to his old home in Havana. Six months later he came back to the United States, and since that time he has been living at his present home, 514 W. Cross Street, Baltimore, Md.

### Engineer J. M. Buckner Rounds Out Fifty Years of Service

**O**N October 9, Engineer "Jeff" M. Buckner completed a service record of fifty years with the Baltimore and Ohio. The accompanying picture of Mr. Buckner was taken on that date, just after he had made a run. When asked about his railroad experience, Mr. Buckner said:

"I fired with wood out of Huntington, W. Va. for the Chesapeake and Ohio Railroad under the supervision of Master Mechanic Harner. On October 5, 1872 I was employed by the Baltimore and Ohio in Parkersburg under Master Mechanic I. N. Kalbaugh.

"In April, 1873, I was transferred to what then was known as the Third Division, Grafton to Piedmont. Railroading in those days was a hard job. We used the old link-and-pin and goose-neck couplers, also

Engineer Jeff Buckner

low-bumper couplers, camel engines and ten-wheel engines. In 1875 we got the 400 type engines and we had an awful time, for on this division there were "off again, on again, gone again." If we had the old link-and-pin couplers on this division today, to haul the trains that we are now hauling would require the services of ten wrecking trains to keep the road open.

"I have been trying to run an engine for 42 years and I have worked hard and I am still working. In the old days we had a rope from a reel stretched from the tank of the engine to the rear car for a break-in-two signal. This was connected to the whistle lever and to the gong or bell in the house on the engine. This rope was long enough to reach over 50 or 60 little 3-pot iron hoppers which were then used for hauling coal over this division.

"I fired over this division for \$1.80 per day, frequently working from 18 to 20 hours per day.

"In my opinion the Baltimore and Ohio has the best set of officers of any railroad in the United States. I have a warm place in my heart for all of them, for if you do what is right they will not turn you down.

"I wish particularly to thank Vice President Galloway and General Superintendent R. B. White from the bottom of my heart for the nice letters which they sent me concerning my 50 years of service."

## Philadelphia Employes Hold Dutch Supper and Mask Ball

By Charles H. Minnich and T. E. Carrigan

THE officials have given permission to our employes to use the Assembly Room on the second floor of 24th and Chestnut St. Station for such social functions as they may from time to time arrange. We started out on Saturday night, November 4, by giving a masquerade party, dutch supper and dance, which was a big success. One of the department stores donated a piano for the hall.

It seems that a large and powerful magnet existed in that room and yet it was invisible to the eye. Whether in mid-air, on the ceiling, or in the floor, we cannot say, but we do know that the power of the unseen magnet was so great that it drew approximately three hundred persons out of their homes and into that Assembly Room! Isn't science wonderful?

But the peculiar part of it was that it not only attracted them there but in some magical way provided a majority of these people with the most beautiful, bewitching and, in some cases, ridiculous, costumes. When we got there we were glad the committee hadn't made its drawing power too great or it might have pulled one of those big 5,200 or 4,000 engines right up the stairs into that room, and then we wouldn't have had any room to dance.

The party was given by the Baltimore and Ohio Railway Clerks, Philadelphia Division, and it certainly was some party! Our only regret was that the hall was not larger. It was a most enjoyable affair from start to finish. Music for the sixteen dance numbers was furnished by a good five piece jazz orchestra. Things began to get lively as the music started and soon clowns were partners with ballet dancers (some costumes!); hod carriers with yama yama girls; Scotch Highlanders, with Japanese girls; Mexicans, with Dutch girls, and so on. It was truly a picturesque scene. And the finest thought was that all these good people who were having such a delightful evening together, had put in a good day's work for the Baltimore and Ohio.

The affair was formally opened by a grand march, led by Miss Mae Mooney, to permit the judges to select the prize winners in the various classes of costumes and characters. The judges were Messrs. Sands, Harbison, McAleer and Woodruff.

After the awarding of the prizes, those present were delightfully entertained by Myrtle Cochran vocalist, formerly of B. F. Keith's Circuit, Blenda Cochran, versatile song and dance artist, and A. Boettger, a Baltimore and Ohio favorite with local

selections. Mr. F. Reilly, one of the cleverest female impersonators in Oriental dances on the concert stage, made a big hit, and our old friend, James J. McCann, excelled in his character recitations.

The Committee was fortunate in securing the valuable services of Mr. Thomas P. Lee, Jr., a staunch friend of the Baltimore and Ohio Railroad, and one of the large contractors in West Philadelphia, who ably assisted in securing the natural decorations that make a masque complete. Our old friend, "Ben" Titchell, made it possible to have such a wonderful lighting effect in the Assembly Room. Lieut. Woodruff was our guide and guardian during the evening.

The orchestra rendered excellent music for the dancing, and in assisting the entertainers.

Little Claude Jackson almost won a prize (it was a tie) for being the most handsomely costumed Chinaman. All the costumes were good and if we named a few we would have to leave out about two hundred and ninety.

Credit for the neat little program card goes to the "Rebellious Rebel," William G. Orrell, Eastside, Philadelphia.

## William G. Vincenheller, Car Service Department, Presented with Gold Watch A Gift from His Fellow Employes

ON October 31, the employes of the Office of the Superintendent of Car Service presented their fellow worker, William G. Vincenheller, with a handsome gold watch. The occasion was Mr. Vincenheller's 75th birthday. He has been in the service of the Baltimore and Ohio for 46 years as clerk in the Car Service Department.

The presentation was a complete surprise to "Mr. Vince," as he is familiarly called. At 2.00 p.m., when the boys and girls began to gather around his desk, "Mr. Vince" suddenly got the idea that this must be the beginning of some kind of a drive or campaign, and he made haste to leave the room. On being assured that such was not the case, he was induced to return, but instead of going back to his desk, he stood on the outside of the crowd, awaiting results. He was finally persuaded to go back to his desk, and it was not until W. F. Koch, chief clerk, had almost concluded the presentation speech, that "Mr. Vince" realized that

The menu was as follows: Cold boiled ham, Pickles and Olives, Rolls, Hot Frankfurters, Candy, Coffee and Cakes.

There was a plenty for all, well served and of the best quality.

There were at least two hundred and fifty present including Division Engineer Harbison, Terminal Agent and Mrs. J. E. Sands and their daughter; Mr. J. J. McAleer, retired, Station Master Biser, Lieut. of Police Woodruff, and many other familiar figures on the Baltimore and Ohio System, including about 25 of our friends from Baltimore, Md.

The hit of the evening was made by a young girl, who danced a fancy dance at the rate of about one hundred miles an hour. This was so entertaining that it took down the house, and the applause so great that an encore was insisted upon and given. She was only a little girl, but she COULD MOVE! Her costume consisted of a yellow silk blouse and pantalettes (dressed as a boy) with black silk hose incased in half length patent leather boots. All the boys were tickled to death. Ask "Joe" McGovern or "Bobby" Miggins. Even dignified Charlie Machin showed as much interest as possible in view of the fact that his wife was with him.

The Committee consisted of: Alice Abel, chairman; C. H. Bradley, secretary and treasurer; Mae Mooney, Betty Duffy, M. N. Burkhardt, William Orrell, Owen Hamilton and T. E. Carrigan, master of ceremonies.

he was "it."

Mr. Koch gave a short, but interesting address, in which he described the progress made by the Baltimore and Ohio during the past seventy-five years. He mentioned the old candles and oil lamps which were used on the open platform coaches, and followed the development of such coaches into those which we now use.

He said further that although there were but few of the employes who were present at this gathering who remembered and who had witnessed this transformation, there was one in particular who had seen all of these changes. This man was W. G. Vincenheller, whose birthday was being celebrated by his office associates.

Mr. Koch then signalled out "Mr. Vince" from the throng and presented him with a handsome gold watch and chain, a goodly supply of cigars and tobacco and a pipe.

A general handshaking then took place, everyone present extending his or her con-

(Continued on page 60)

THEY CROWDED 'ROUND TO CELEBRATE "MR. VINCE'S" BIRTHDAY

Standing at the right of the picture is W. F. Koch, chief clerk, Car Service Department. Before him sits the honored guest, W. G. Vincenheller; at Mr. Koch's left sits "Uncle Billy" Wood, and on "Uncle Billy's" left is General Superintendent of Transportation W. G. Curren

## Safety Roll of Honor

### Staten Island

**Conductor Thomas Myers.** On Perth Amboy Sub-division way freight, westward. October 30. Felt unusual jar of train. Applied emergency brake and stopped train. Discovered broken rail. Notified train dispatcher. Protection arranged for until track was made safe.

### Baltimore Division and Baltimore Terminal Divisions

**Operator C. H. Berry.** Carrolls. September 29. Noticed wheel on truck of Tank Car P. G. K. 423 wobbling, indicating bent axle. Notified terminal dispatcher. Car set off at Mt. Clare.

**Operator J. F. Scarff.** Monrovia. October 18. Notified trackmen of a broken rail. Seven inches of track broken. Repairs made.

**Fireman J. L. Garrott.** Brunswick. October 26. Prevented a delay to Philadelphia section of Train No. 94, Engine 4241, by responding promptly when regular fireman did not show up for Train No. 3.

**Operator W. M. Shawen.** Westport Tower. October 26. Discovered fire at West end of Spring Garden Drawbridge of the Western Maryland Railroad. Reported condition to yardmaster, Port Covington. Fire extinguished.

### Connellsville Division

**Operator W. V. S. Barnette.** ED Tower. September 5. Noticed something dragging in train. Immediately notified Conductor Brewer, who stopped train. Examination showed door arm of W. M. hopper 11763 dragging on rail. Temporary repairs made and car removed to Bowest Yard.

### Pittsburgh Division

**Conductor J. D. Garloch.** Glenwood, Pa. October 24. Noticed flame between rails east end of bridge. Arranged for his engine, 2341, Engineer Kamp, to return to bridge and extinguish fire.

**Conductor J. C. Smith, Brakeman D. S. Parsons and Brakeman E. H. Gross.** Pittsburgh, Pa. October 31. While in charge of Extra 1502 and 1425 East, Northern District, railed a derailed car in their train, west of Bridge 505. Observed that brass and liners had been lost. Walked back along track. Found parts; borrowed a jack from section men, jacked up car. Disconnected opposite end of brake beam, inspected car, and train was hauled into Foxburg with a delay of only 45 minutes.

### Wheeling Division

**Mr. Perry Redman.** Ohio River Sub-division. October 29. Discovered broken rail. Flagged Train No. 87, at Pole 13-08.

**Conductor T. W. Johnson.** October 5. Discovered bent axle on car P. L. 902391, engine No. 4861, out of Holloway. Notified train dispatcher who arranged for car to be set off.

**Section Foreman D. H. Vandyne.** Observed same condition as mentioned in the foregoing paragraph. Also notified dispatcher.

### Charleston Division

**Car Checker P. M. Walker.** Charleston. Discovered broken rail. Reported and had repaired.

**Conductor C. C. Cogar and Conductor R. A. Brake.** Discovered 20 inches of flange missing from car. Reported condition.

**Conductor D. Curran and Engineer F. F. Bailey.** Buckhannon, W. Va. Discovered and reported broken rail.

**Mr. Charles Welch.** Sutton, W. Va. October 23. Flagged train No. 134 just south of Haymond and advised engineer of the discovery of a broken rail.

**Conductor D. Curran and Engineer F. F. Bailey.** Weston, W. Va. October 21. Found a broken rail opposite the tannery. Called trackmen. Necessary repairs made.

### Chicago Division

**Operator C. W. Paull.** Attica, Ohio. November 1. Observed dangerous condition, while Extra West, engine 4065, was passing tower at Attica. Examination showed brake beam down and a bent axle. Notified dispatcher. Also discovered broken rail at crossing. Made arrangements for proper protection.

**Clerk Van Openlander.** Garrett, Indiana. October 20. Noticed something dragging on Cincinnati Northern freight train. Reported matter to dispatcher. Train was stopped before any accident occurred.

**Mr. J. H. Williams.** Republic, Ohio. October 19. Observed broken rail in west-bound main track opposite mile post No. 15. Reported condition to operator. Necessary repairs were made.

**Pennsylvania Railroad Towerman E. A. Harshman.** Tiffin, Ohio. October 17. Observed broken down car in engine freight train No. 5132. Notified Operator Forchey at Kellars, who stopped train.

### Newark Division

**Crossing Watchman F. R. De Vore.** Cambridge, Ohio. October 21. Discovered piece broken out of rail at joint in crossing at Cambridge. Reported condition to section foreman who had repairs made.

### Akron Division.

**E. W. Falk.** November 3. Noticed brakes set on car of Extra 4233; also noticed wheels red hot.

**E. W. Falk.** November 4. Noticed brake rigging dragging on N. & W. car 77305, in train of engine Extra 2855, west.

**Freight Agent M. A. Stoup.** Lester, Ohio. Noticed tread on wheel of Baltimore and Ohio car 133644 broken. Car was in train of First 82.

**Operator W. A. McCabe.** Chippewa Lake. Discovered brake beam down in car of Train 198.

**Freight Agent W. S. George.** Canal Fulton, Ohio. Discovered broken rail near station. Notified section man who had repairs made.

**Conductor W. A. Cavany.** Noticed W. M. car 26259 with collapsed truck frame in train of Engine 4152.

**Fireman A. D. Points.** Discovered broken rail in main track near east end of switch at Strasburg.

**Sectionman Mike Kaiser.** Section 26. Observed bad condition of wheel on P. & R. 88520. Reported condition to train crew. Car set off.

**Freight Brakeman Lester Wagner.** While inspecting equipment discovered broken wheel on Baltimore and Ohio car 182460. Car set out without any damage to equipment.

**Yardmaster R. E. Moriarity.** Youngstown, Ohio. Noticed broken truck frame on car in Train 92. Car set out.

**Yardmaster W. E. McCardell.** Noticed brake beam down on car of Extra 4077, east. Car set out and necessary repairs made.

**Mr. C. T. Sawyer.** R. F. D. No. 1, Broughtonville, Ohio. Discovered crossing plank on road crossing east of his home had been torn out by train. Flagged train of Extra 4295, west. Officers of Akron Division are highly appreciative of Mr. Sawyer's interest in the safe movement of trains.

**Passenger Engineer Edward Murphy, and Fireman J. C. Pownell.** Rittman, Ohio. While in charge of Engine 5225, train No. 5, had both fire doors drop down on deck, account of breaking of top door. Took top off tool box. Placed it over fire door, holding it in place with scoop between fires and keeping it wet with squirt hose to prevent burning out. Trip continued to Willard and train arrived practically without any loss of time. An unusual performance. Special credit received.

### St. Louis Division

**Flagman Ed. Sherber.** Dabney. September 30. Observed Baltimore and Ohio car 14188 on fire. Train stopped, fire extinguished.

**Engineer C. Ormsby and Brakeman O. Gibson.** Dunham. October 6. Observed U. P. 73780, fourth car from engine, on fire. Fire was extinguished.

**Engineer B. Robinson.** St. Louis. October 10. Observed cars on No. 8 track had rolled out beyond clearance point. Engine was stopped in time to avert an accident.

### Ohio Division

**Operator P. R. Sperry.** Sabina, Ohio. October 16. While extra 2822 east was pulling in passing track for train No. 37 at Sabina, observed something dragging under car near caboose. Discovered brake rigging down. Notified conductor when caboose passed, but before train got in clear and stopped, he heard a noise at the switch. Investigation showed rigging loose and was lying in middle of track at the switch point. He immediately had section foreman assist him to lift it out of the track. Averted possible derailment to passenger train No. 37, due at that point within a short time.

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBEEK

Christmas Salutation from Hon. John J. Cornwell,  
General Counsel

However much the spirit of Christmas may be marred by individual sorrows or misfortunes, there still remains so much for which each of us should be thankful that we can enjoy the period when "good will among men" is preeminent.

We may each likewise cultivate that spirit by some kindly act or deed, strengthening and broadening it so that it will go with us into our every day lives and associations. May we never forget, too, that loyalty to our Government, to our work and to our friends will add to our efficiency and to our status as citizens, and make us happier, that it will keep something of the Christmas spirit forever with us.

(Signed) JOHN J. CORNWELL

#### Loyalty

I met a young gentleman here in the building the other day who told me that he had entered our service on the day before. Twenty four hours under the Baltimore and Ohio canopy! I thought my opportunity to give him some advice was at hand, but then I hesitated, because young people, as a rule, do not care much for advice. It is too cheap; they don't want it.

My usual speech would have been something like this:

"At the very outset, be loyal to the Baltimore and Ohio Railroad Company. Stand by it on every occasion, and while it would be improper to speak with disparagement of any other like corporation, praise your own road in every instance.

"Be polite to everybody, especially at the telephone. Do not say, "thank you very much." Omit the "very much," for it does not strengthen your message; it does not mean anything. "Thank you" is quite sufficient and means a whole lot, if uttered with earnestness.

"Have a full stock of "excuse me" and "Beg your pardon" on hand for frequent use. Be generous in dispensing courtesy and civility."

#### How to Rise

When I came into the service over forty years ago, one of our officials was then a mail boy. He was a wonderfully polite lad and he is equally courteous today. I have seen him rise to a worth-while position and he is one of my railroad ideals of efficiency

and loyalty. His office is at Camden Station.

Again: When we were in the old Baltimore and Ohio Building, where the Emerson Hotel now stands, the Law Department was on the fifth floor. Another department was located on the same floor, and when I left the office in the evening, one of the young gentlemen employed in the department of which I speak was always at his desk. He never watched the clock. Note this: he is now at the head of that department. He was a shorthand pupil of mine years ago. I still take an interest in him.

To get back to my young friend. If he will only stick, and do his very best, all will be well, and he, too, will advance.

#### Our Mr. Horsey

I am an admirer of Mr. Horsey. His shorthand work is wonderful, though he is not a follower of Benn Pitman. His touch system on the machine approaches perfection. I often find myself following his dextrous movements in his work. It does not disconcert him in the least, because he is oblivious of the fact that anyone is noticing him. I wish I possessed some of his accomplishments.

#### John William Rich

John William Rich, secretary to W. Irvine Cross and George Dobbin Penniman, died suddenly on the first of November. He had been ill for some time; felt that he was getting better and looked forward to a resumption of his duties in the office. He was fifty years of age, thirty of which he had served

faithfully in the Law Department. His sudden demise was a great shock.

#### Lighted Cigarettes

I am not through with my remarks on the lighting of cigarettes in our crowded elevators. I had occasion to visit the ninth floor the other day at noon. When the car reached the eighth floor a bevy of pretty girls bound for the twelfth for luncheon, entered the car. Imagine a fellow lighting a cigarette under those circumstances; and yet if it is not checked, such an occurrence is possible.

#### Office of General Manager

Correspondent, H. E. WEIFENBACH

We desire to extend to all our neighbors, friends and readers, our sincere good wishes for a Happy Christmas season.

Much has been said and written about the true meaning of Christmas, sufficient probably, for the enlightenment of all. One thing, however, we may venture to say, has been impressed upon us forcibly. It is this: For one short period of time in the year, which we call the Christmas season, most of us, remembering that kindness and unselfishness, locked within our vaults, like riches, bring no returns, but invested for the good of all, bear abundant interest, dig up the key to the treasure room, open wide the doors, and bring into service the Wealth of Life—we live to make others happy. We forget to be irritable, little annoyances fade into insignificance, and we greet each other with a smile and a word of cheer.

Why not carry Christmas with us all the year? Let's try.

"Tom" went away on his vacation a short time ago, (well do I remember it, for I never had so much respect for his job before), and upon his return, it was difficult to recognize him, for what do you think he had done? Some cute little friend of his told him that he was handsome with his hair parted in the middle, and he believed it.

George Seeds had a birthday on Armistice Day, November 11. He surely picked out an important day while he was about it. That is what might be called "prophetic vision."

Mr. Hamilton is gaining a creditable and enviable reputation for his prowess on the stage. He recently assisted in the performance of a fruit comedy at Clarksburg, which was a great success and held the audience spell-bound. For further details, reference is made to Hawkshaw, the man who "gets 'em."

AN INTERESTING FLOAT

This float was caught by the camera of J. Albert Weber, in the recent Baltimore Week Parade, Baltimore, Md.

Some people do not believe in Santa Claus, but we are old fashioned, and of course we do. We have therefore written our letters early to avoid the rush, and here are the contents, for which we are indebted to Mrs. M. G. Craig:

Dear Santa:

When on your journey you proceed,  
At the "G. M.'s Office" stop your steed.

Leave to the "Big Boss," E. W. Scheer,  
A bounteous gift of "Good Will and Cheer."

To his able "Asst." whom you must know,  
A nice fast horse, which sure can go.

A book on "Golf" to A. O. Herman,  
Written in English, and not in German.

To V. F. Riley, that dear young boy,  
A "Business Car" will give much joy.

To T. J. O'Connell, for his canoe,  
Some nice new cushions, I'm sure will do.

To H. E. Weifenbach, our musical friend,  
A Grand Piano you may send.

Our "Russian Duke" if he knew I wrote,  
Would ask for a trip on a foreign boat.

Our "Chief File Clerk," a radio set,  
He'll make it, or break it, you just can bet

To our "Sailor Clerk," C. W. Staines,  
Raincoat and boots for use when it rains.

To J. Albert Wieber, our Junior Clerk,  
A new mail bag, for he loves to work.

For Joseph Barroll, our valuable porter,  
Some toys for both his son and daughter.

To J. W. Hamilton, who loves to travel,  
A brand new puzzle, which he can't unravel.

And last, but not least, Mrs. M. G. Craig,  
A horseshoe for "Good Luck" from you she'll beg.

A MERRY CHRISTMAS TO YOU ALL!

#### Car Service Department

Correspondent, H. V. OBERENDER

Merry Christmas!

We wish to extend our heartiest congratulations and best wishes to our Miss Hazel Chenoweth, who recently resigned from the service, and to John P. Henry, both of whom have recently been married.

#### Engineering Department

Correspondent, O. K. EDEN

To the Baltimore and Ohio's family of workers: Merry Christmas!

In the recent football classic dished up before some fifty odd thousand people at Cambridge, Mass., where two of the "Big Three" locked horns to decide who was the better, Harvard was picked as a winner over Princeton with odds, on the strength of what she had done, not what she was capable of doing. In the test she failed, whereas Princeton rose to her glory, coming from behind to win, by being able to do what she was capable of doing. It was Princeton's ability to "keep an eye on the ball" and to take advantage of the breaks that led to her victory. And so it is with Life. You read of this man or that woman making a name for himself or herself in the world. But is was only by "keeping an eye on the ball" that they succeeded. And so all through the coming New Year, let us all "keep an eye on the ball," with the idea of bettering ourselves when and wherever possible.

There seems to be quite a race on between Mr. Roebuck and Mr. Holden—for something, we know not what.

"Empty" and "Roger Illiely" were on-lookers at the recent annual football picnic

staged on Homewood field between City and Poly. We understand they rooted for City—school spirit, don't cha know! And as they came to work the next day hale and hearty we presume they were not a party to the conflict which terminated the game and robbed Poly of a chance to score.

Alvia Weston certainly took advantage of "Apple Week." It seems as though he doesn't realize it has long since passed.

Harry Thorn, our versatile file clerk, has been confined to a bed in Hopkins hospital for the past month or more, having undergone a serious operation. The office force "chipped in" and bought flowers and fruit to help cheer him up. We hope by the time this appears in print he will be with us once more.

Harry Taylor Roebuck has moved from Roebuck Manor, on Bear Creek, to his town house on Thirty-Third Street Boulevard, which has just recently been completed.

While nothing has been said of it for some time, at least, the team representing our department in the Baltimore and Ohio Bowling League is progressing in great style. At this writing, November 13, we are leading the league with a four game lead. Keep up the good work, fellows—bowl 'em all over!

The heavy losses suffered through investments with reliable(?) brokerage houses and blind pools, substantiates the argument that betting two dollars on a pony at the track is a surer bet than playing the stock market. At least so it seems to some!

Our three "cowboys"—we don't know whether they inhabit Charles Street or not—have acquired a new adornment for their bodies, that of fancy sweater-waistcoats. What with their hair slicked back with brilliantine and them waistcoats, they sure are the "cat's whiskers."

#### Schell—Parsons

A simple but beautiful wedding was solemnized on the evening of Thursday, October 19, when Miss Jane Elizabeth Parsons, daughter of Mr. and Mrs. Charles Ervin Parsons, married Mr. August William Schell, son of Mrs. R. F. Weinkam, and assistant secretary to the chief engineer. The ceremony was performed by the Rev. T. Roland Philips in Arlington Presbyterian Church. The church was attractively decorated with ferns.

The bride entered the church on the arm of her father, Mr. C. Ervin Parsons, by whom she was given away. She wore a gown of white satin canton crepe, trimmed with pearls, with a court train of the same material. Her veil of tulle was arranged with pearls and she carried a shower bouquet of bridal roses. Miss Evelyn Parsons sister of the bride, who was maid of honor, wore a gown of lavender canton crepe trimmed with silver ribbon. She carried deep pink roses. Miss Irma Schell, sister of the groom, and Miss Corrine Helm, bridesmaids, wore dresses of orchid canton crepe trimmed with silver ribbon. They carried bouquets of medium pink roses. Miss Ervina Parsons, sister of the bride, who was flower girl, wore a dress of pale pink canton crepe.

Mr. Schell had as his best man Mr. Eugene W. Marron. The ushers were Mr. Walter E. Parsons, Mr. George A. Little, Mr. George E. Norris, and Mr. B. Warren Merchant.

After the ceremony a reception was held at the home of the bride, after which the couple left for Miami, Florida, where they spent their honeymoon.

The music for the occasion was beautifully rendered on the organ by Mrs. Albert Kraft. Before the wedding Miss Melva Forsyth sang two solos, "At Dawning" and "O Promise Me." She was accompanied on the violin by Mr. Pelham Schmidt.

I am taking this opportunity to thank each and every one of you who have helped me from time to time during the past year by submitting news of interest, and offering constructive criticism. I will say, though, that we could have had more photographs in our column. How 'bout it?

#### Office of District Engineer Pittsburgh, Pa.

Correspondent, J. M. WHEALAN  
Field Accountant

There is a certain inventor in this department, who, quite unhonored and unsung, has been able to startle some of the experts out of their apathy on the question of radio. He has exhibited a working model of a machine which to outward appearances is a combination of one of those famous Mother's Oats boxes, some wire, some Baltimore and Ohio paper clips, and some other things equally commonplace. The aforesaid experts are sitting up and taking notice. For obvious reasons the inventor's name is withheld, but we feel sure that his Baltimore friends would be delighted to avail themselves of his knowledge on the subject.

We understand that the Board of Managers of a certain Baptist church in this city are harboring, quite unknown to themselves, a member who we have always understood was a prominent member of another denomination. Our advice to them is to have the roster corrected, as we find it quite impossible to believe that the young man in question can be other than what we think he is. Or do you suppose that it may be a case of dual personality? There is so much of that being pulled now-a-days.

The genial Mr. Fry and Mr. Rittenauer of the Cost Engineer's Office, were recent visitors in Pittsburgh. It goes without saying that we were glad to see them and sorry to see them go.

"Jim" Connelly has been presented with a new broom. Of course, there now is a marked difference in the appearance of things.

The writer has heard unofficially that his esteemed friend and co-worker, J. A. Layman, Cost Engineer's Office, is contemplating engaging in other pursuits. We wish to express to him our appreciation of those times when we were intimately associated in work for this Company and wish him the very best there is in his new venture. We would be glad to hear from him in this Department at such times as may suit his convenience.

There is a brisk demand for pennies in this locality, and our newsboy, it is noticed, has not spent so much time with us as formerly. Safety First.

In the January issue we may have something to announce relative to a matter that has, no doubt, puzzled you for some time. Please have patience.

We are glad to announce for the benefit of our Baltimore radio fans that a practical method of amplifying from a crystal has been found. Those interested will be put in touch with the source of our information on request.

Our belated congratulations are extended Mr. and Mrs. Hunter on the present which the good fairy left with them recently.

# Hamilton Watch

"The Railroad Timekeeper of America"

## A Christmas Gift Worth While

TAKE advantage of your first Christmas shopping trip to visit your jeweler and see the Hamilton Watches. You will naturally be seeking gifts worthy the name for those who are near and dear to you—and frankly, can you think of any gift more sensible, more practical and more useful than a Hamilton Watch?

Every one needs accurate time. Once a luxury, accuracy of time is today a necessity—not only to Railroad Men, but to every man and woman, boy and girl. Furthermore, a Hamilton Watch is a gift that will last, and be appreciated for its accuracy and performance for many years to come.

There is a Hamilton for every member of the family. Your jeweler will be glad to show them to you and explain the various movements. You will be particularly interested in the following:

The No. 992  
16-size  
Railroad Timekeeper  
of America  
Movement Only  
\$48.50

A fine gift for the family  
to give to Father.  
(Other 16-size movements  
at \$25.00 and upward)

The No. 986  
"Milady's Watch of  
Accuracy"  
In Gold Filled En-  
graved Case, \$46.00

A beautiful wrist watch  
and an ideal gift for  
Wife or Daughter.

The No. 914  
12-size, 17 jewel, 3  
position, adjusted move-  
ment, permanent case,  
\$62.00

An excellent gift for a  
young man. Engraved  
or plain case, fancy or  
plain dial. A fine time-  
keeper.

Engineer William E. Loco, of the Chicago and North-western, has three sons, all of whom he has presented with Hamiltons. Engineer Loco knew full well that he gave not only a gift but a timekeeper which, by its sturdiness and dependability, would teach the value of these qualities.

Select a Hamilton, then, for THE Christmas gift—and you will make no mistake. We will be glad to send our New Timekeeper to you free of charge—it will help you to make your choice and gives much valuable watch information.

### HAMILTON WATCH COMPANY

DEPARTMENT A  
LANCASTER, PA., U. S. A.

### Foreign Freight Department

Correspondent, AUGUST J. SCHWEIZER

#### Merry Christmas!

Coming down Charles Street the other day, I was quite surprised to see our efficient young file clerk talking to quite a crowd of girls. On coming closer, I found it to be only one girl instead of a crowd. (Some girl!)

We are glad to have Miss Audrey Wible back with us again, after her few weeks in a local hospital. We hope that she will be fully recovered within a short time.

Friends, foes and countrymen (farmers), lend me your ears! What do you say if we all pitch in and buy "Johnnie" a razor?

Anybody who believes Phoenix does not raise good healthy girls will be convinced that it does, just by coming down to our office and taking a peep at little Emma.

### General Baggage and Milk Department

Correspondent, MABEL L. MENGES

To All Baggage and Milk Department Employees:

Now that Christmas is near, and while you are taking stock of the year just closing and looking forward to the New Year, let me assure you of my earnest wish that this Christmas may be one of your happiest, and that the New Year will bring to you every measure of joy and success and a realization of all your expectations.

I want to thank each and every one of you for your loyal support and earnest cooperation in our endeavor to place our department on a higher standard of efficiency.

(Signed) JOHN P. DUGAN

General Baggage and Milk Agent

As this is our first appearance, we of the General Baggage and Milk Department make our humble bow to the rapidly growing "Among Ourselves" family, and are most happy to be admitted into the circle. We have been watching with interest the development of this family circle until we at last decided that we should like to come inside instead of standing outside looking in.

While our own immediate office family is not very large, we have a host of co-workers scattered over all the System with whom we hope to become better acquainted. Through this medium we hope to pass on from one to another helpful ideas and beneficial information in order to strengthen that friendly "One for all, all for one" spirit that is so essential to our success as individuals and to the prosperity of the Company as a whole.

It is with deep regret that we report the death of Baggage Agent F. D. Sams, Parkersburg Main Line Station, on October 23.

Mr. Sams had been in the employ of the Baltimore and Ohio since 1899, acting in the capacity of baggage agent since 1911. While his last severe illness was of short duration, he had not enjoyed the best of health for some years; nevertheless he was always on duty, giving his best and undivided attention to the service.

In his death the Baltimore and Ohio has lost one of its most willing and conscientious baggagemen. His pleasant and courteous manner, and willingness to serve made for himself not only a host of friends among his fellow workmen, and the traveling public as well; but also an exemplary employe for the Baltimore and Ohio.

Funeral services were held at the Methodist Church, Lauckport, W. Va., after which the remains were taken to his old home at Fairview, W. Va., where, after another short service in the U. B. Church, he was laid to rest in the Fairview Cemetery.

We shall keenly feel the loss of Mr. Sams, and we extend our deepest sympathy to his family.

We are anxiously looking forward to the return of Mrs. Henrietta Philips, one of our stenographers, who recently underwent a serious operation at the Maryland University Hospital. Mrs. Philips has sufficiently recovered to return to her home where she is convalescing. She has our earnest wishes for a speedy and complete restoration to health.

### Office of the General Freight Claim Agent

Correspondent, NORMA H. APPLGARTEH

#### Merry Christmas!

Our old friend, "Dobbin," has hitched himself to a commercial shay, and is now selling tea and spices in the Sunny South. Here's hoping you will find the fields green and full of clover for you, George, Old Scout.

The late F. D. Sams, baggage agent, Parkersburg, W. Va.

This department has been singularly fortunate in the past in its selection of correspondents to our MAGAZINE, and our "Boss" has made another "Ten Strike" in the appointment of Miss Norma H. Applegarth, as Correspondent. The least we can do to show our appreciation, is to give her our hearty cooperation and support. Remember, boys and girls, there is a lot of work attached to the job, so be generous and do your bit. —E. H. B.

Our bowling team headed by Captain Riggan is again looking forward to gathering in the championship, having twice won this title for the seasons 1920-21 and 1921-22. They have every right to believe they will bring home the bacon with the two high score men, Heine Ittner and George Goeller. Make it three straights, Boys!

Watch your step, Captain Riggan; the young ladies have formed a bowling team and are practicing hard. Captain Janice Vick expects soon to issue a challenge to you, so beware! Some of the heavyweight members say it is great reducing exercise.

One of our gay Lotharios of the Record Division recently went on a straw ride, returning to the starting point about 1.00 a. m. He then volunteered to escort two young damsels to their respective homes. Result: Missed the 2.00 a. m. all-night car

and had to walk home. I suppose there was nothing the matter with the taxi service but the price.

Last October some sweet young things in this office made up a party and automobilized to Cowenton to visit the Dahlia Farm in company with some of the boys. As an aftermath of the visit the girls were heard to rave over the gorgeous flowers, but one of them very naively remarked that while she thought the dahlias were beautiful, they were not half so interesting as Sweet William (s). You needn't blush, Ella, I mentioned no names.

The banks should be doing a larger business since we find "the waiting admirers" of Eugenia and Carrie every lunch time outside of the building ready to do the honors.

"Fatty" Keen says he was born in the last part of March. We know now why he has such good understandings, having been born under the sign of "Pisces" which refers to the feet. However, we believe Taurus, "The Bull," must have been in ascendancy about the time of his arrival.

"Everybody loves a fat man" has been illustrated by two young ladies who became so anxious to see Mr. Bowhay that they came all the way from Cincinnati to the General Freight Claim Agent's office in Baltimore, to see his smiling face. Atta boy, "Bill!"

We wish to extend our deepest sympathy to our bachelor friend down in the corner, in his disappointment in not having one of our young ladies occupy the desk opposite him. We understand he had engaged flowers to be placed there every morning to welcome her. Well, John, you can still take a glance at the Voucher Division. The fair one has a new job, but the same old desk.

We are glad to extend greetings to Miss Margaret Shannaman, who is again with us after a serious illness of eleven months. She seems just as happy and bright as formerly, and has acquired a new habit since last with us. The birds have nothing on Margaret.

We are also glad to welcome our two recruits, Miss Mary Howard and Henry Clay Reister.

James R. Murphy, household goods freight claim specialist, was not willing to share the services of Miss Edna Foster, secretary to the assistant chief clerk, so he has enticed her to forsake the Claim Department entirely to go with him on a honeymoon to the Sunny South.

Their wedding on November 1 at the Church of the Messiah was a pretty one and was attended by many friends of both parties from this department. Edna will be much missed, but she has been given into a worthy man's keeping. If their pleasant smiles and genial manner in their business life is a fore-runner of a happy married life, their will indeed be a very happy one. Such is the heartfelt wish of every member of this office. (By the way, Miss Correspondent, what is all this news about the young lady whom the bridegroom kissed? I saw it, I heard it, and you can't fool me. —Little Bird).

#### The Eleventh Hour

The eleventh hour has passed and the twelfth will strike soon. The year 1922 will offer no more opportunities, but 1923 will. It is too late to bewail the lost opportunities of the past year, but it is not too late to take a lesson from the mistakes and avoid them in 1923.

We have all been "eleventh hour" men and women at some time or other, putting

off until the last minute something that should have been done before. We avoid the issue as long as possible and sometimes move too late—in the rush to cover up a neglected task we work with a frenzy fraught with disaster.

Forethought will mean that we can anticipate work. Take a lesson from the various trades. The painters and illustrators for magazines are now working on spring and summer scenes, so that when their seasons arrive their work will be in the hands of the publishers. The clothing trades make up their goods months ahead so that the retailers may have their goods when the season comes.

The failure of some one to look ahead oftentimes results in hurried work to cover the mistake.

There is one type of eleventh hour men and women who are a credit to the breed, the ones who can get their work done if given a chance. By their intense concentration and driving force they can accomplish work which under ordinary circumstances would require a much longer period. Sometimes the two types are combined in the same person, they may know their capacity for speed work and put off a job until the last hour.

After all is said and done, however, give us the man or woman who can see ahead, who attends to work promptly and does not have to ask a speed marvel to cover mistakes.

The "eleventh hour" is passed. Are you of the last—minute—thinking type? If you are an "eleventh hour" trouble maker, turn over a new leaf—BE A MINUTE MAN OR WOMAN! The clock says it is too late to remedy your mistakes for 1922, but you can remember the lessons of 1922 and resolve to avoid them in 1923.

**Mail and Express Traffic Department**

Correspondent, T. E. REESE

While it is always a pleasure to recognize the faithful and loyal efforts of the employees of this Department, the Christmas spirit naturally inspires a more intensive recognition and makes it especially appropriate to extend full appreciation for efficient services rendered. The pleasant relations existing among all employees of this Department insure a continuation of good work and loyalty to the Company, and well justify the wish for a Christmas season of merriment and joy, followed by a most happy and prosperous New Year for all.

Manager Mail and Express Traffic

When seeking advice on the cost of installing a wireless receiving set, go to Hunicutt; "he's been stung" and can tell you all about it.

Sh! here's a secret—Kurtz got those long stilts of his by trying to save steps between the Central and Annex Buildings and Camden Station. Now his trousers must be made to order. Who said it pays to economize?

Yeager will never make a sailor. His test failed, for the fish were well fed while he was at sea.

"Crate" reminds us of the busy bee. He has been buzzing around home recently, waging a "clean-up, paint-up" campaign. Perhaps he is getting ready for "honey."

"Andy" Gump, candidate for congress, and who wears no man's collar, claims he would have made a clean-up of 100 per cent. in the last election at Lansdowne had it not been for "Judge" Birely.

Where you ever bribed into doing a little

plumbing work with a delicious piece of home-made pie. It can and has been done. Cora Rhodrick can tell you how.

**Transportation Department**

Correspondent, LUKE K. BURNS

To Employees in the Transportation Department:

I take this opportunity of expressing my sincere appreciation of the splendid work performed during the strenuous period through which we have passed just.

I trust that the true Holiday spirit will prevail with all of us. May you each have a Merry Christmas, and may the New Year prove to be full of happiness, health and prosperity.

(Signed) W. G. CURREN

General Superintendent of Transportation

To Employees in the Transportation Department:

It is with pleasure that I extend sincere and hearty thanks for the true spirit of co-operation which has been manifested by all my associates in the Transportation Department during the past year's stress, and I wish for each and every one of them a Very Merry Christmas and a Happy and Prosperous New Year.

(Signed) J. D. CLARK

Superintendent of Transportation

**Relief Department**

CORRESPONDENT, H. IRVING MARTIN

The chap who "said it with flowers" has been in to give the Relief Department the "once over." He found the man whose coat lapel lacked flowers for twenty years now bedecked with a daisy, and marvelled at the flowers daily placed before the new desk-mate of another veteran. Breathe it softly—her masculine predecessor lacked these tributes. Why carp at a little thing

like that? It's the eternal youth and springtime in the heart that counts. All hail to the daisies, the flowers that Burns made as royal as the rose!

There's one desk in the Savings Feature that is as blooming as the Garden of Eden. Morning glories unfold each day. Those who speak the language of flowers say it betokens the end to a period of suspense.

The Sherlock Holmeses, the lady who watches for mysterious packages, announced her engagement some moons since. Domestic Science is now her chief home study. Recently she took advantage of mother's absence and tried her hand at producing some cake like mother used to make. Is it true that Miss Burns wished that mother had made the specimens she sampled?

Another fair damsel has removed the moth balls from her hope chest. She guarantees that she is not fooling us but that this time she is going straight through to the altar. Yes'm!

Dear Bunting, the boy with the golden hair, Has fallen at last for a maiden fair. To Ellicott City they hastily went, It was there that Bunny's last pay check was spent.

Now as to their purpose for going out there, It was a wonderful purpose for any young pair.

They called on a Rev. Mylene, I am told, And our dear little Bunny was surely quite bold.

He stood up like the man he is going to be, Without even a quiver of lip or of knee. And answered each question with affirmative nod.

For Bunny and Myrdel felt like two peas in a pod.

"God Bless you, my children," the Reverend said,

And then from a book a lecture he read. They quickly departed from out of the town,

H. Irving Martin, Relief Department

And started on their honey-moon, destined  
—Landsdowne.

Our well wishes are with them. We admire  
their nerve,

And hope that through life it will continue  
to serve.

—By the Savings Feature Poet

I can think of no nicer tribute to pay to my esteemed friend, H. Irving Martin, who appears in the accompanying picture, than to illustrate the psychology of association by saying that as soon as I saw the picture there flashed through my mind the well-known slogan used by Peter's Chocolate: "As high as the Alps in quality." Some of the members of the Relief Department may not know that Mount Mitchell, on which Mr. Martin was standing when the picture was taken, is the highest mountain of North America on this side of the Rockies. But they do know from association with our mutual friend that he stands upon the high places of the earth when the really worth while things of life—industry, loyalty and unselfishness—are considered.

Mr. Martin has been devoted to the interests of the Baltimore and Ohio for years, both during his early and present association with it and during the comparatively brief period he was out of the fold. His belief in the value of night study is not only known to his associates, but has been so ably presented to some of them by him, that they have followed his good example and taken up various night courses. And since character building, the greatest thing in life, is ably supplemented by an enlargement of our knowledge and of our viewpoint on the things about us, I think that Mr. Martin can well be proud of the dozens of younger men who have come under his helpful influence in this respect.

Some of the best copy that has ever appeared in our MAGAZINE has been written by him and practically all of it has been the result of intensive and devoted application outside of business hours. This copy has included co-ordinated propaganda material used to reduce freight claims, appeals calculated to increase the usefulness of the Relief Department and timely inspirational articles. The friendship developed by MAGAZINE association between Mr. Martin and the writer has led into other worth while channels and it is a pleasure to acknowledge his help in so many ways and to give him the introduction of an outsider—even though it be an intimate one—to the associates of his everyday life. It is

hardly necessary to add that these few paragraphs were written without his knowledge.

—Ed.

### Valuation Department

Correspondent, J. A. RENEHAN

Merry Christmas!

On October 14 several members of the department and their friends made a trip to Relay to visit Mr. and Mrs. Klier in their new home. One never knows what sort of a wild time to expect when Mr. Klier sets the motive power of his fertile brain in action, and before the guests were on the ground the menfolks were already sawing iron and carrying bricks and all knew that something mysterious was going to happen. The mystery was solved when the pegs were set up for a game of quoits, and the log fire was built. There was an open fire supper, with a picnic table and everything, which was enough to make the most "choicy" eater sit up and take notice. And the glow of the fire after dark made a pretty picture. Everything went well until Miss Coplan, on going over the grounds, attracted the guests' attention to the poke berries growing alongside of a big tree and introduced them as huckleberries. The visit proved to be an afternoon and evening spent, not as a quiet rest in the country, but as a real frolic out in the open.

When is a tombstone not a tombstone? When it is erected to the memory of bachelorhood. On the morning that Adam M. Taylor returned from his wedding trip through Canada, he found the stage all set for a first class funeral, with all expenses paid. Being a good sport, he was not moved to tears but burst into a fit of laughter. He was even prevailed upon to sit up in his flowery grave and have his picture "took."

It has been suggested that should Mr. Davis get tired of posing for a photograph at any time he should ask his brother Carl to pose for him a while. The photographer could never tell the difference. Did anyone ever see two brothers resemble each other as much?

The man with the smoked glasses—who is he? He is the man who delves into the past, present and future of all the "notorious" railroads. He is the pilot of the

Taylor witnesses his own funeral

corporate history records. He is none other than Mr. Kennedy.

Equipment Pilot Engineer Arthur W. Norton is an active member of the Patapsco Power Squadron. He was also appointed a delegate to the national delegates' conference and meeting of the United States Power Squadrons held at Philadelphia on November 18.

Schutte and his intended, Bowditch and his intended, Taylor and his, and Bonney hoping, were seen at lunch at Miller's on a recent Saturday. Boys, is that Lover's Retreat?

Charles Meese did not have to leave word when he moved away from his desk on a certain day that he went to the barber shop. Such hair tonic! You could close your eyes and your nose would lead you to it.

Miss D. E. Fossett spent her vacation in Bermuda. She thought the rocking of the boat was similar to the rocking her mother formerly gave her, and, being a dutiful young lady, confined herself to her bunk for the entire trip. After taking four days to recover from the excessive rocking and lack of nourishment, she then started enjoying herself in the balmy climate by trips over the island in daytime and gay suppers at night. Probably in a month she'll be able to concentrate as before.

On the night that C. E. Wertzler made his debut on the Valuation Department Bowling Team he did more than step out—he stepped on the gas and knocked 137 pins in one game. Keep it up, Wertzler.

Aside from engineering, Mr. Scheve is an excellent horticulturist. The beautiful specimens he brings from his garden leave no doubt as to this.

Who knows anything about "E" Minor? Where have we heard that before?

W. A. Bartell and friend wife, A. Fink and his wife and the children went fishing. This is the story they want us to believe. Our mouths watered to see the picture, but we didn't get any fish

Our Newlyweds—Mr. and Mrs. Hedrick, Office of Assistant Comptroller Deverell

Office of Assistant Comptroller Deverell  
Correspondent, JOHN A. RUPP  
Merry Christmas!

It won't be long before this office will be without lady clerks because of the ever-descending arrow of "Old Dan Cupid." His latest capture was Miss Edna L. Smith, who was married on Saturday, November 18, at St. Pius' Church, to Mr. Albert Clubb, who was formerly employed in the M. C. B. Department of this Company, but who is now employed with the Western Maryland Railway. We shall miss "Eddie," especially that daily phone call from "Al" at promptly 12.55 p. m., it being so prompt every day that we could set our watches by it. We all extend to them our best wishes for a happy married life.

Our former stenographer, Miss Emily C. Gerwig, has deserted her associates of this office to embark on the "seas of matrimony." She certainly will be missed by the boys and girls of the office. "Emm" kept us supplied with candies and goodies at wholesale prices through the kindness of her "finance," Mr. Freddie L. Hedrich, the proprietor of Irvington's largest grocery store. In the accompanying picture are the couple, showing Mr. Hedrick in Army uniform. He served two years in France with the 313th Infantry. The couple were married on November 11 at Irvington. Immediately

Mr. and Mrs. Thomas Clayton Potter, Office of Auditor Freight Claims, married on October 14

after the ceremony the couple left for an extended trip north. Congratulations and good luck!

Through an error in the notes of the November issue, there appeared under the picture of our friend, George R. Hutchinson, the title of *chief* clerk. This note should have read *clerk*. We regret the error. —Ed.

Auditor Coal and Coke Receipts  
Correspondent, JOHN LIMPURT  
Merry Christmas!

The standing of teams in our office bowling league, including the week of November 10, follows:

	WON	LOST	PER CENT.
Royal Blues.....	17	10	629
Pull Men.....	14	13	519
Head Lights.....	12	15	445
Bumpers.....	11	16	407

As the boy would say, "things are riding pretty," and it's a good race.

Mr. Schuster grabbed the brown derby on the night of November 3 but relinquished it on the following week when "Ed." Link put five out of six down the gutter. "Ed." was dressed up to his ears for the big dance and his mind evidently wasn't on the game. Atwell was in form on the night of November 10, getting 323 for his efforts in the three games.

Auditor Freight Claims Office  
Correspondent, NELLIE F. COLLISON

The real spirit of Christmas is beautifully expressed in the song of the angels who hovered that first Christmas Eve over Bethlehem. But that is a long, long time ago, so long, perhaps, that we have ceased to wonder why it is that peace is poised above the earth today, ready to take flight at a moment's warning—so long ago that we are not disturbed at the lack of goodwill among men.

Have you ever thought what this old world of ours would be like on December 25, 1922, if every man, woman and child on December 24, next, at the midnight hour, were permitted to view the wondrous sight the shepherds saw on that night when God sent the spirit of Christ to dwell among men? Mine are not the words to describe the paradise this old earth would become. I only know that such a scene would make us a different people, living in a different world. The differences of men would never more

reach a point where arbitration failed. They would fall over one another in order to make the first concession. The hatred in their hearts would turn to love, and "Meek and holy, pure and lowly," would be the paramount ambition of us all.

Never again would we need repeat the Arlington ceremonies for the unknown hero; there would be no thousands of hungry children to clothe and feed, no devastated land, no broken homes and yearning hearts, no usurper and slave, no pensions, no reforms, no despots and tyrants, no questionable politicians, no waste, no want—just love and kindness; only "Peace on earth and goodwill toward men."

Why are we seemingly so much farther away from the ideal this year than ever before? Is God's gift to us and the real meaning of Christmas losing its virtue in our own interpretation of this most wonderful of all seasons?

If this is true, let us hasten back to Bethlehem and with eyes of faith, see for ourselves the gifts abounding there, such as the

Bowden calls her "A Rag and a Bone and a Hank of Hair"

world hath desperate need of today. Let us absorb anew the spirit of love brought by the Christ Child and begin to right the wrongs that we have helped make.

"God's in his heaven—  
All's right with the world."

Once again the girls of our department have given our men a surprise and they are now keenly interested in the remarkable doings of our ladies' bowling team. The girls even admit that our chief clerk's supervision has given them, not only courage, but knowledge. Ruth Stevenson surprised herself and everyone by rolling 102 one evening recently. Emma Ball and Otten Babendrier are also among the high score rollers. Grace Standford rolls an excellent flat game, but Ethel Miller is our champion. It is such good fun to watch our little Sara handle those big balls, but fine goods often come in little packages and Sara receives honorable mention, too, for her good work.

An old saying is, "A blind pig will find an acorn once in a while." Such was the case on November 9, when the Men's Bowling Team won three games. H. C. Lidie, our new recruit, broke the "third man" hoodoo, with an average of 103.

Sporting editors have remarked that a "has been" cannot come back again, but our "short-stop Copper" proved beyond a doubt they were all wrong when bowling was at stake.

Yes, our W. M. C. is going gunning. Now, whether it be tigers or "chickens," it matters little, for he is an excellent marksman, and when the toot of his horn heralds his "Royal Highness" on the shore across the Chesapeake, there is great scurry among the rabbits. But hunting, even to our good friend, ain't like it used to be. Age is creeping persistently and rheumatiz in the "jints" will not fill any hunter's sack.

One of the high spots enjoyed at the rehearsals of the Musical Revue, happened when "Bob's" sister ("Bob" is the hero of the story) embraced him. One A. B. is supposed to kiss her brother upon his return home from distant lands. She tells us she was embarrassed when called upon to practice this caress and only turned part of her face towards "Bob," the erstwhile R. G. B., who missed the spot and landed on her ear. Of course, it was necessary to rehearse the scene again, and in her eagerness to get all that was coming to her, she stumbled and pecked so ardently at his mouth that our hero carried a split lip with him to the office next day.

As a result of someone's good fortune the ladies assumed much prissy dignity, but the male members of our department immediately made application to be R. G. B.'s understudy.

At these same rehearsals G. L. S. is there with her usual sarcasm and wit. She is to be one of our entertainers on the evening of November 24, and will sing us a song. She had some difficulty in making her selection. Someone suggested "Some Sunny Day." "Well," said Grace, "I might sing some sunny day but not tonight."

Our official photographer will be needing a new camera—two of our group heads were "snapped" on the roof of the Baltimore and Ohio Building.

Since the return of "Judge" Dean to his official duties, the boys at his desk are rejoicing at the prospects of no more overtime work.

FAZ, Jr., is displaying a plain gold ring. Is this merely to arouse curiosity or does it mean that Cupid is going to beat Santa Claus out of more quarters?

Felicitations, Mr. and Mrs. Potter. You gave us quite a surprise on October 14, 1922

In the accompanying cut, our artist, Mr. Bowden, has typified his ideal of a "Bunch of bones and a hank of hair."

J. G. B. our sympathy is yours, old top! After all your endeavors to cover up old age, the symptoms are too plainly discernible. First, you forsook baseball, then came lumbago, and now it is "gol-lof." Look out, old boy—the gout will have you next.

Our Henry certainly cut a figure on November 9 in a handsome Tuxedo suit and a pair of white gloves. Money is no object with him.

**Auditor Merchandise Receipts**

Correspondent, P. H. STARKLAUF

Fellow Employees in the Office of The Auditor Merchandise Receipts:

I take this means of extending to each of you and your families my sincere wish for a Happy Christmas and that the New Year will bring to you what you most desire.

I am sure each one of you in the passing year helped to the best of your ability in handling the large volume of work and overcoming the many difficulties that we encountered.

I thank you for your loyal support and am confident I can expect the same cooperation for the coming year.

(Signed) W. E. RITTEHOUSE  
Auditor Merchandise Receipts

J. R. Luckey is in line for congratulations. Yes, it's a ten and one half pound son, and a likely understudy on that Radio, Eh! Ralph?

J. D. Dollinger is the happy father of a fine daughter. Congratulations.

That's nothin', you should have seen me side track Aunt Mary the other day while airing our *quartet*. Well here goes. Get me? Another girl.

Myrtle, one of our efficient and attractive young ladies, being transferred by way of promotion, the question is with Willie. Does her bright smile haunt you still?

The Y. M. C. A. lectures heretofore conducted by the Rev. D. C. Bayless, who has been transferred to other fields of endeavor in Colorado, are now conducted by the Rev. F. C. Reynolds, who, quite a few of us know, was formerly attached to the 115th, our own consolidated First, Fourth and Fifth Regiments as chaplain, and was with the boys on the Border, at Ft. McHenry and Over There. It is with no little pleasure that we hear from him weekly on character and human nature and on that which is good and needy for the soul. The boys rubbed elbows with him on other occasions, and it is a source of real delight that he was ushered in some days ago on his present duty with us. We wish him success.

**Local Settlement**

Miss Mildred Mohr Covell was married to Howard Bleakley, October 25, by the Rev. Hobart Smith of St. Thomas Parish, Garrison Forest, Green Spring Valley, Md. Mrs. Rose Brown, Machine Room, to Mr. Dawsey Atkinson, by the Rev. Euclid Phillips of the Roland Park Presbyterian Church at the parsonage of his nephew, the Rev. F. Roland Phillips, Denmore Avenue. Bliss and sunshine be yours!

That one of our senior clerks still has birthdays was evidenced recently at noon time when a luncheon was accorded Pierre Kohlerman, with presents possibly intended for the nephews and nieces. If they keep until Santa Claus time, they'll come in handy.

**TARIFF BUREAU CELEBRITIES**

Top: "It's good," declared "Oats," licking an ice cream cone. Left to right: George Henschel, Misses Ella Decker and Daisy Norton, "Oats" Orem, and Miss Ethel Whitehead. Center: M. J. Zimmerman, our photographer. Below: "Our grand old Boss," W. H. Fogle, Chief of Tariff Bureau and his pretty home on Walnut Avenue. We think Mr. Fogle one of the best men that the Baltimore and Ohio has produced

The next day Skee had a birthday. It happened to be an angel cake with ten cute little pink candles all studded up.

We are glad to welcome Mary back into our midst. She is still knitting sweaters.

When is it coming off, Kitty? Don't forget to let us know.

Helen B. and Helen S. are some jockeys! If you don't believe it, ask "Jack" and "Bill"—Annapolis, etc.

"Liz" likes earrings, so of course it's a favorite fad among the "Beauty Squad" now.

We saw a picture of Edna the other day pushing a baby carriage. What are you doing Edna? Practicing?

Charlotte has won for herself the reputation "A good stenographer." Why don't the others get busy?

Gladys is generally known as "The Vamp" of the A. M. R., while her next door neighbor is "Annette Kellerman," having won two gold medals during the past summer.

Dorie is small, but she's still "Boss." Ask him, he'll tell you so.

Bess, don't you need some help? Aren't those earrings rather heavy?

D. C., we like your Buster Brown collar and cuffs. Wear them again, won't you?

The stenogs seem lonesome since R. M. S. has moved to the other side of the house.

Again—Compliments of the Season!

Let our best efforts of 1922 be eclipsed in 1923!

A long pull, a strong pull and a pull together, and we'll sally forth gloriously!

**Auditor of Passenger Receipts**

Correspondent, E. B. HOPPMAN

**A Merry Christmas and a Happy New Year!**

Cupid has again claimed a victory in the office, this time it being the uniting for better or worse of two of our well known clerks, Miss Frances Barton and Leo. A. Dunphy. The ceremony was performed at the Parish House of St. Martin's Catholic Church on Saturday October 7 at 2.00 p. m. Immediately after the ceremony the couple left on their honeymoon to Philadelphia and Niagara Falls, and after returning took up their residence at 9 N. Hilton Street. Mr. and Mrs. Dunphy were very popular among the clerks of the office and received many presents, among which was a beautiful dinner set. We congratulate you, Mr. and Mrs. Dunphy, and extend to you our best wishes for a bright and happy future.

On Monday, October 2, some of the girls of the office gave Miss Barton a miscellaneous shower at her residence, 804 Gorsuch Avenue. The affair was quite a surprise to both Miss Barton and Mr. Dunphy. The young bride-to-be was showered with many beautiful gifts, among which were cut glass, center pieces and other fancy articles, and a beautiful wicker tray. The refreshments, the main feature of which was the prize cake, were planned by Mr. and Mrs. Barton, and the table was arranged in a most dainty and effective manner with a color scheme of green and yellow. The shower proved a great success and it is but another instance of the friendly spirit which exists between the clerks of our office.

Those present on this occasion were Mrs. Louise Shriver, Mrs. V. Neighbors, Misses Esther Forder, Ruth Haynie, Florence Gallery, Theresa Cook, Lillian Conway, Grace Thiesz, Jessie Disney, Ada Holland,

Netta Walter, Celeste Hayden, Anna Civish, Elizabeth Meredith, Mildred Eberhart, Margaret O'Leary, Helen Miles and Mildred Fisher.

Miss Virginia Benson and Mrs. Bessie Jeffrey have just returned from a trip to Florida and Havana, Cuba, and from all accounts must have had a wonderful time.

Our office "collen," Miss Helen Hart, gave a party at her home on the evening of November 8. It was another one of those affairs for which Helen is famous, a real Irish party. The evening was one of mirth, joy-making and fun and there was not a dull moment. Among other interesting and amusing features were: Special Dances and Jig, by Miss Helen Kirkwood; Impersonations and Recitations, by Mr. Charlie Warwick.

Those present from the office were—Mr. and Mrs. J. M. Finn, Misses Helen Kirkwood, Margaret ("Lil") O'Leary, Lillian and Catherine Timm, Elizabeth Meredith, Virginia Benson, Catherine Leacy, Mildred Sullivan; Messrs. Charles Warwick, Claude Howard, John O'Keefe, Lamar Norris, Frank Lyons and Gus. Brandt.

## New York Lines

Pier 22, N. R., New York

Correspondent, JOHN NEWMAN

Christmas greetings and best wishes are extended to all officers and employees! It is hoped that with the increased business existing greater happiness will prevail in the homes of many employees, because of the consequent greater prosperity.

(Signed) E. J. HAMNER,

It is with pleasure and much satisfaction that I extend the season's greetings to the officers and employees of the New York Terminal properties. Our trials and tribulations in the past year have been many but the errors and mistakes have been corrected and forgotten and the good deeds made a part of our record. So let us start the New Year with good cheer, determined to surpass our best record.

I wish you all a Merry Christmas and a Happy and Prosperous New Year.

(Signed) W. B. BIGGS

Terminal Agent

The soldierly picture is one of our Larry Improte, National guardsman, in uniform. Larry called our attention to his legs, explaining that he was a cavalry-man, and to prove it he is going to give us another picture with his horse. Another point in the picture inviting comment is his chest. Larry is not "chesty," naturally, but he is posing; "chest out, chin up," you know, in camp, on parade and in posing.

Larry is a versatile boy. Besides being a clerk and a soldier he is an entertainer. Recently, at a dance and entertainment, at which we were not personally present—to our regret—he appeared in character costume, reciting that old classic "The Face on the Bar-Room Floor," drawing tears and applause from the audience.

"Tom" Gorman told me that he had bought a songbird for four dollars. That is cheap for a songbird. Just note what some of the songbirds have cost our millionaires. My bride bought a songbird once for two dollars, on Third Avenue, uptown. It was all right except that it wouldn't sing. After taking a bath it changed its color from a greenish yellow to a brownish gray. We let it out from the window and it immediately mingled with a flock of the ordinary En-

Dept. E2111 Adrian, Mich.

glish sparrows in the street, chirruping its happy "glad to see you again."

We have a new acquisition in our messenger service, known as "Legs." He has only one dimension, height. About three feet above the ground the Euclidian line that starts three feet further up is cleft and separates into two branches, from which the name has been derived. Of course, in the messenger service, legs are indispensable, and long legs are decidedly an advantage. However, after "Ray" has stopped accumulating elevation he will be filling out in the other directions and—well, take a look at his father.

At this terminal business has "resumed" to an extent that should satisfy everybody, cheer the disconsolate, shame the pessimists and shut up the calamity howlers. The tonnage and revenue figures of our agents and cashiers keep the T. A. in great good humor. The "big rush" in the past two months is partly due to enforced embargoes on competing lines, and affords our Company an opportunity to show new customers what the "Baltimore and Ohio" can do. Everybody is willing to take a part in the show, and it is a "good show."

(Ante scriptum:—We have a Veterans Association here, but it does not believe in advertising itself with pictures and reports like the "Vets" of the other divisions do in the MAGAZINE. Too modest or too proud?)

Larry Improte, Pier 22, N. R., New York

Please mention our magazine when writing advertisers

Four Staten Islanders  
In the cab is Engineer F. Horan; standing are  
G. Keyser and J. Killian; on the extreme left  
is Fireman F. Barbour

Another name has been added to the roster of the "Veteran Employes' Association of the New York Terminal Properties." "Tom" Mylet, chief rate clerk, Pier 22, has completed his twentieth year of continuous service in a continuous and earnest endeavor to help place the Baltimore and Ohio where it is, and where it belongs, at the head of the progressive interstate railroads of the United States. "Tom" is still young. Though he has lost some—quite some—of the flaming thatch where-with once he was abundantly covered, he has preserved its original color.

The word veteran has been associated with age and experience, and although in military parlance a youth of twenty with a few weeks service in the war (or the war-department) may be distinguished with the title "veteran of foreign wars," in railroad service it still stands for a *long time* of good service, as time is measured in its relation to life.

But returning to our mutton, "Tom" Mylet: he is now looking forward to a home of his own, to be built over on Staten Island on his own ground with the aid of the Company's Relief Department. Looking ahead and up is the proper direction. Rappickers and junkmen look down, and harvest junk. Tie your eye to a star and reach for it. You will never grasp it but "a man's reach should exceed his grasp—else what is heaven for?" Looking ahead another twenty years we see "Tom" on an evening after a strenuous day at Pier 22, smoking his dudheen on the porch of his Staten Island home, admonishing his grand-daughter to call him early on the next morning, "as the westbound is very heavy and a pile of corrections is awaiting me at Pier 22."

Miss Florence Petero, whose engagement we announced not long ago, has resigned. We have been allowed a look at an elaborately gotten up card, embossed with bells and hearts, containing an invitation to the "wedding of Florence Petero to Peter Curitore, Sunday, November 11, 1922, 4.00 p. m. at the Church of the Assumption, New Brighton, Staten Island." Speaking for all of the office we wish her a bright and happy future. Miss Petero was an efficient clerk and will be a success in the new "position."

From "downstairs" comes to us the news of William Butler's marriage. The reporter says that no one knew anything about it until after the event, when W. B. returned to duty with a discolored optic. Mr. Butler says "accident;" the boys say "rolling pin." Anyhow, it is a closed incident.

## Staten Island Lines

Correspondent, G. J. GOOLIC

It is a great pleasure to extend to each and every member of the Maintenance Department of the Staten Island Rapid Transit Railway our hearty good wishes for a happy Christmas and a prosperous New Year.

This Christmas we should all be proud and happy as we look back on the accomplishments of the year. Not for years has our property been in such good condition, the tracks, the stations, the water front. The Management has been liberal and with your cooperation we have made a great beginning. The Public has noticed the results of your efforts and their remarks are most gratifying.

For the future the indications are that improvements are only just beginning and with a continuation of the excellent spirit of teamwork you have shown in the past the New Year should be a happy one in its record of accomplishments.

The Third Annual Ball of the Employes Mutual Benefit Association was held at the Stapleton Club Rooms on Saturday evening, October 28. The hall was crowded, the affair being one of the best that was ever held on Staten Island, and we want to thank everyone who helped to make this a great success.

The business men and trades people who have so generously given their cards for publication in our souvenir journal, merit our gratitude, and we most respectfully request and urge our patrons and friends to patronize them.

The following were in charge: B. F. Kelly, President; E. E. McKinley, Vice President; J. B. Sharp, Treasurer; G. J. Goolic, Recording Secretary; J. V. Costello, Corresponding Secretary; J. F. McGowan, W. P. Slattery and J. J. Le Strange, Executive Committee.

We extend our heartfelt sympathy in the death of Thomas F. Watson, conductor, at his home on October 27. Thomas was well liked by all who knew him, and we will miss him. He entered the service on this division October 10, 1910 (tenth month,

day and year) as trainman. On February 17, 1918 he was made road conductor and held this position up until his death.

D. H. Wood and P. V. Goudot, both trainmen, went on a hunting trip to Newburgh during the latter part of October with a Ford truck, with the intention of loading the truck up. After staying a few days they decided to leave for home. As they reached St. George their friends saw they only had two squirrels and a pair of good colds. See them for the full and sad story.

## Baltimore Terminal Division

Correspondent, MARTHA V. FOX

To Every Employe on the Baltimore Terminal Division

At this season of the year when Christmas greetings are so numerous exchanged, especially between relatives and close friends, I do not want to forget the "Baltimore Terminal Division Family." Our division is one of the brothers that comprise our great railroad, and I want to take this opportunity of hoping that each of you may enjoy a very Merry Christmas and that the Year 1923 may be a pleasant and prosperous one.

(Signed) C. M. SHRIVER

Superintendent

Mr. and Mrs. John J. Link are the proud parents of a baby girl, born on October 12, at St. Joseph Hospital. Both are doing nicely. Congratulations and best wishes! Mrs. John Link was formerly of the Office of the Car Foreman, Locust Point.

On October 21 a pretty wedding was staged at the Twenty-fifth Street Christian Church by Miss Lyndelle Poyner, stenographer to the car distributor, and Mr. Herbert Walters, formerly of the Agent's Office, Camden. All those attending the wedding voted that she was one of our most attractive brides. She was tendered a miscellaneous shower by the girls at Camden before leaving. We extend our heartiest congratulations to the young couple.

The accompanying photograph is the daughter of G. F. Zimmerman, secretary to our terminal superintendent, C. M. Shriver.

Wonder how much "Riley" paid Santoro for this! He ought to stake him to a month's lunches, at least! Thanks, anyway, "Santy," for your regular cartoons.—Editor

Dispatch Trains Quickly

**A ROW OF HAPPY FACES**

The picture at the left is not the result of a capture in the wilds of Africa, but merely our gentle Second Trick Hostler J. J. Murphy. Next to him you may see our Fire Brigade of the second trick, Riverside. Over on the right is Rhea Janet, the winsome little daughter of G. F. Zimmerman, Camden Station

Miss Rhea Janet Zimmerman is four and one half months old and is a very attractive young lady. Her daddy says that she is not spoiled, but we doubt this. She is the first daughter.

An electrical display may be seen any evening after 6.00 o'clock at the home of Gang Foreman J. C. Fowler, 2594 W. Fayette Street. We are under the impression that this young man has recently had his house wired.

We congratulate F. P. Tunney, chief clerk to the car foreman, Locust Point. We understand that on September 21 the stork left a bouncing baby girl.

No, Gentle Reader, the above was not captured in the wilds of Africa. It is merely Second Trick Hostler J. J. Murphy.

We are glad to welcome back Miss Sophie Speaker, who has been out of the service for some time, but who now is with the car foreman at Curtis Bay.

Note the picture of the Fire Brigade, Second Trick, Riverside. Reading from left to right, we have T. R. Herrigan, W. E. Rose, T. E. Hussley, Jr., D. Poultney, H. L. Lamden, H. R. Lewis, T. J. Fritzpatrick, L. H. McCullough and B. Etzler.

Perhaps in the next issue we will be able to give an account of the dance to be given by the employes at Camden at the Southern Hotel.

Agent's Office, Camden Station

Correspondent, W. H. BULL

We wish to extend to our forces hearty good wishes for a Merry Christmas and a Happy and Prosperous New Year.

(Signed) W. E. NEILSON, Agent  
P. J. Trueschler, Assistant Agent

On October 18, there was a pretty wedding at St. John's Evangelical Lutheran Church, when Miss Hazel Lufayne Butts, stenographer, Camden Revision Bureau, and Mr. Charles Fugmann, a former employe at this station, were married. After the ceremony, the bridal party and those invited to the wedding went to Claggett's Hall, where the reception was held in honor of the newlyweds. Mr. Beam's String Orchestra played and practically everyone, old and young, joined in the dancing and festivities. The refreshments were delicious. At about 11.00 p. m. the couple prepared to leave and many of our esteemed clerks received farewell kisses from the bride. Lucky boys!

The happy couple went to Niagara Falls. On their return home, they will live in their bungalow at No. 10 Evergreen Avenue, Hamilton, Md.

Hazel, old girl, if your pretty wedding is a symbol of future happiness, your matrimonial sky is cloudless, and Camden wishes you all good luck and prosperity.

Cupid is still shooting his darts. This time Sam Dowling, O. S. & D. Department, was married on October 3, at St. Martin's Church, to Miss Helen M. Wallenhorst. The honeymoon was spent at Niagara Falls and Buffalo. Congratulations, Sam!

Vernon Mann, our efficient timekeeper, is trying to increase his weight. He consumes a quart bottle of milk every day. In the last six months he has increased six pounds. All right, Vernon, if you live six more years and drink the same quantity of milk, you will come pretty near to weighing 200 pounds.

Mt. Clare

Correspondent, MOLLIE S. ALBRECHT

*Merry Christmas!*

Dear Fellow-men:

Just at this happy season of the year, when we find ourselves smiling, and radiating good cheer and gladness, I want to take this opportunity of wishing each and every one of you, through the help of the MAGAZINE, the happiest kind of a Christmas holiday!

To each of my fellow-workers, this message will convey my heartiest good wishes for a very jolly Christmas, and a joyous and prosperous New Year!

May the god of luck smile on all this coming year!

Sincerely,

(Signed) Thos. R. Stewart.

By the time this edition reaches each of you, we will all be sweeping along on the Yuletide, and the hearts of all, young and old, will be care-free and light again. The prospect of a new year to face, with the joyous new feeling that comes to each and every one at Christmas-time, makes us all feel capable of climbing to the very top step, on the Ladder of Fame!

Then, with the new year dawning, perhaps we try to center our thoughts, and wonder what, if fairies were still flying around, and our wishes would come true, would be our wish. Here is just a wish, put into words by W. R. Hunt, which I found some time ago, and which seems to me to be a very good formation of all my vague wishes:

The sun is just rising on the morning of another day, the first day of a new year! What can I wish that this day, this year, may bring to me? Nothing that shall make the world or others poorer, nothing at the expense of other men; but just those few things which, in their coming, do not stop with me, but touch me rather, as they pass, and gather strength:

A few friends who understand me, and yet remain my friends.

A work to do which has real value, without which the world would feel the poorer.

A return for such work small enough not to tax unduly any one who pays.

A mind unafraid to travel, even though the trail be not blazed.

An understanding heart.

A sight of the eternal hills and unresting sea, and of something beautiful the hand has made.

A sense of humor, and the power to laugh. A little leisure with nothing to do.

A few moments of quiet, silent meditation. The sense of the presence of God.

And the patience to wait for the coming of these things, with the wisdom to know them when they come!"

### Here and There at Mt. Clare

Contributed by C. RAEUCHLE

Foreman Kelly of the Axle Shop is waiting for his vacation. He intends to hunt bears! Good luck, "Kel!"

Welder B. C. Dearing, Flue Plant, says: "Daggon if we ain't got some band!" (Maybe there is a reason for handing out all these laurels; "Bernie" plays the cymbals in the band!)

"Shorty" McConnell of the Blacksmith Shop, is still wearing that smile. Staunton, Va., must be a wonderful place.

"Miss Albrecht, please don't pick on your helpers! It isn't their fault if they can't get any newsy news. The men in the shops won't give it to them. I have to make most of my news!"

Our old friend Machinist F. W. Scott, in No. 3 Machine Shop, has been put on the pension list. We will all miss "Scotty." His cheery greeting always put you on good terms with the rest of the world!

We hope that by the time you read this, our old pal "Buck" Burns will be back on the job again. We love him, grouchy ways and all! "Buck" is laid up for minor repairs at the Church Home Hospital.

One of our former supervisors, "Bill" Bauman has been appointed foreman under G. F. Kline. "Bill" is stepping on the gas these days both in and out of Mt. Clare. He has his noble charger tied up at the gate waiting for him!

"Mike" Healy, of the Boiler Shop, drew his vacation just in time to see the ponies

Elizabeth and Elaine, daughters of Machinist Sidney Austin, have a fondness for the "briny deep"

kick the dust at Pimlico. "Mike" doesn't like the ponies, Oh! No!

We are given to understand that the following Mt. Clare gentlemen wish to enter their names, or throw their hats, into the ring, for the Bald-headed Men's Club presidency:

John Riley, Paint Shop; Gilbert Bateman, Pipe Shop; Walter Tapman, Test Dept.

We are wishing them luck! Here's hoping that their hair continues to fall out, and their chances for president rises!

### Drawing Room

We wish to congratulate the chiefs of the Drawing Room, W. B. Whitsitt and W. R. Hedeman, who have been appointed assistant mechanical engineer and chief draftsman, respectively. We wish them lots of good luck.

We have at last discovered a celebrity in our midst! A real live Caruso! Say, "Buck," give us season passes when you become famous, will you?

### Accounting Department

We are extending to Guy Childs our heartiest congratulations and good wishes, on his recent marriage. May your sojourn in the Realms of Connubial Bliss be long and happy, Guy!

Miss Oursler is still with us, although we have our doubts as to just how long she will stay. Whenever you see a nice Marmon car drive up to the gates for some young lady, beware! Especially when the one driving the Marmon is young, nice-looking, and has a sweet smile.

Here is a picture that many of our boys will recognize as that of J. J. Smith, who came to Mt. Clare as locomotive inspector in 1912 and was Erecting Shop foreman when he left in 1921. At that time he was made general foreman at Glenwood. He is now associated with the Boschen & Smith Piano Co., Fayette St. and Park Ave., Baltimore, where he will be glad to greet his old friends.

### Locust Point

Correspondent, J. ROSS GOULD

Merry Christmas!

Permit the Locust Point employes (through your correspondent) to wish A Merry Christmas and a Happy and Prosperous New Year to all of our officers and fellow employes, and particularly to

J. J. Smith, formerly Erecting Shop Foreman at Mt. Clare

all the various correspondents whose writings in the MAGAZINE have served to brighten many a dull hour.

Your correspondent wishes to apologize for his absence from the columns of this MAGAZINE for the past two or three months. Circumstances over which he had no control prevented his contributing.

He hopes, however, once more to get into harness, and to aid our editor and his staff in retaining the well earned prestige of "OUR MAGAZINE."

We take pleasure in welcoming to Locust Point W. S. Wilson, who has recently been appointed chief clerk at this station. Mr. Wilson is a pleasant gentleman who I feel positive will add lustre to the well earned fame of this station. We offer him our loyal support in his endeavor to make his administration a success.

After continued efforts we have succeeded in getting a photograph of "Andy" Miles, chief manifest clerk. Our previous efforts were unsuccessful for "Andy" was fearful that his picture might cause havoc with the hearts of our fair readers; but that has since been overcome by "Andy" becoming a benedict. Now he is protected and well guarded by the present Mrs. Miles.

Mr. Miles had been a widower for two years but was united in wedlock to Miss Katherine Gessler on September 7, at St.

gratulations to "Mr. Vince" and wishing him many more years of happiness and active service.

Mr. Vincenheller was born at Cumberland, Maryland, on October 31, 1847. He came to the Baltimore and Ohio as clerk, Car Service Department, in July, 1876.

In addition to Mr. Vincenheller, the following named employes of the Car Service Department have been in service for 20 years or more: F. H. Schley, 1876; S. T.

Wright, 1882; W. D. James, 1882; W. M. Woods, 1882; H. T. Davenport, 1883; A. H. Greenfield, 1884; W. F. Koch, 1884; T. S. Carroll, 1890; G. Dukehardt, 1890; L. E. Brown, 1890; G. H. Smith, 1891; C. H. Keller, 1893; J. S. Anstine, 1897; W. Auld, 1898; J. B. Wright, 1899; E. R. Gaither, 1900; W. H. Decker, 1900; D. D. Marks, 1900; H. E. Sanner, 1901; H. I. Taylor, 1901; H. F. Wette, 1902; T. H. Lucabaugh, 1902; C. S. Thomas, 1903.

## Welfare Association, Auditor Passenger Receipts Office, Opens Winter Season with a Mask Dance

By E. B. Hoppman

THE wide awake Social Committee of our Welfare Association again showed that they are "on the job." After closing a most successful summer season under the leadership of Messrs. Finn, Billmeyer and Miller, the winter season was opened with a Mask Dance at Tuttle's Hall on the evening of October 31.

Needless to say, this dance was a great success. All of us who ever attended one of these social gatherings know that they are events to be looked forward to and remembered.

This being a masked dance, many characters and costumes were represented and the affair was a bright and picturesque one. Prizes awarded were as follows:

Mrs. McEvoy and Miss Marguerite McEvoy, as old fashioned sweethearts, first prize; Carl Grund, as a tramp and Samuel Concilo, as Italian organ grinder, second prize; Miss Helen Harte, as a jockey, third prize; Miss Guyton, as Pierrette, fourth prize; Robert Cook, as a Chinaman, fifth prize; Miss Dorothy Wulfert, as a country boy, sixth prize.

After the presentation of these prizes, refreshments were served, after which the dancing was resumed.

The program was brought to a close at 12.00 o'clock and all departed with the suc-

cessful, mirthful and entertaining party an event long to be remembered by them.

You folks who are not members of "the Welfare" do not know what you are missing. Won't you join at once and be with us at our next social affair?

The music was furnished by Nelson's Imperial Orchestra, the director of which is none other than Nelson J. Whitcomb of our office. The music was such that Mr. Whitcomb should feel proud of his boys, and we wish him all success.

## A Tarvia-Built Track in Portsmouth, Ohio

HERE is a view of the paving on Tenth Street from Gay St. crossing to Court St., Portsmouth, Ohio, covering a distance of four city blocks. This track was put up on eight inches of washed gravel, all No. 5 treated oak ties, 90 pound R. B. Rail tie plated on every tie, filled with crushed slag to three inches of top of rail, then filled to top of rail with crushed slag mixed with K. P. Tarvia and rolled with a twelve ton roller. It was surfaced with pea gravel mixed with Tarvia and rolled again to surface, making an ex-

ceptionally fine piece of track. Supervisor George Mitchell was in charge, and the work done by the following section gangs, shown in the photograph:

Right side of track, reading left to right: B. L. Allen, foreman Section 53; J. W. Kelly contractor; Trackmen Ebenezer Dains, B. S. Allen and George H. Campbell.

Left side, reading right to left: J. H. Inlow, foreman, Section 54; A. M. Rodgers, B. & B. Department, inspector of work; Trackmen Ralph Inlow, Harrel Inlow, William Ockerman and Cecil Inlow.

We are indebted to Foreman Allen for the picture and story and thank him for his interest in the MAGAZINE.

### The Good Neighbor

Railroad Helps Potomac State College Teach Telegraphy

By H. B. KIGHT

Ticket Clerk, Keyser

THE train wire has been looped from our telegraph office and cut in at Potomac State College, W. Va. This gives the students of Telegraphy at this popular school, the benefit of receiving, but does not permit them to send any messages. This shows the spirit of co-operation of the Baltimore and Ohio Railroad with the public, and is much appreciated by the college faculty and all others who are interested in the welfare of this institution.

Our January issue will carry an advertisement of Potomac State College which will reach the homes of all railroad employes in the territory from which this school gets its students. Watch for it!

Chauffeur (having almost hit a man): Don't you know enough to get out of the way of an auto.

Victim: No! I own three of them and this is the first time I've walked in months.

—New York Sun.

A fine piece of track in Portsmouth, Ohio. The author of article, Section Foreman B. L. Allen, is the fifth figure from the right

**Baltimore Division**

Correspondent, W. H. TARR

To the Officers and Employees of the Baltimore Division:

I wish to extend to each of you my sincerest wishes for a most enjoyable Christmas and I trust that the New Year will bring you all the good things you desire, including Health and Happiness.

Now, as never before, the Company needs your closest co-operation and I certainly hope that each of you will put your shoulder to the wheel and pull together. In this period of progressiveness, we certainly must hustle to keep up with the times, and I am sure that you will each do your mite cheerfully and promptly so that the desired results will be obtained.

(Signed) F. G. HOSKINS  
Superintendent

**East Side, Philadelphia**

Correspondent, CHARLES H. MINNICH

We wish a Merry Christmas and Happy New Year to all our friends at other stations, as well as to the management, and we renew our desire to give 100 per cent. service to the Baltimore and Ohio.

Eddy Reddington is contemplating matrimony in the near future, but won't tell us the date. He got off early one afternoon, and I heard that he bought a marriage license.

It is rumored on pretty good authority that "Joe" Kearney, stenographer to division storekeeper, East Side, is to marry Miss Edna Spielman. Nothing like nerve in these times of high prices! And such a quiet fellow. Who would have thought it? Well, we congratulate him and we hope Edna likes her new "personal appointment." "Joe," take a tip from an old married stenog, and don't let her "dictate" to you!

**Washington, D. C. Freight Station**

Correspondent, W. L. WHITING

**A MERRY CHRISTMAS AND A HAPPY NEW YEAR!**

There is something about this old-fashioned greeting that makes it always the

Yard Brakeman R. B. Story and his children, Kathryn, age 5, and Bobbie, age 2

most welcome way to express the feeling of joy and serenity that comes over us at this season of the year, and creates in us a wish to share our own happiness and peace with all mankind.

We are now approaching the glad season with a feeling of peace and rest that at one time seemed far away. Let us not forget, however, that it is the season of the reign of the Christ-Child, that it is emphatically a time when old and young, great and small, rich and poor, all unite in the one desire to bring happiness and pleasure to the little ones that have been sent to bless our homes with their bright smiles and merry voices. What greater joy does a parent have than to see the happy little face light up with wonder and joy at the first sight of the wonderful Christmas tree, with all the gitts that good old Santa Claus has made to grow upon it? In this all-pervading spirit, let us all try to become children once more and enter into the joys and pleasures of the little ones.

We can imbibe a large share of the "Spirit of Christmas" by reading some of the many good books that have been written on the subject, but perhaps the most enjoyable one of them all is Charles Dickens' "Christmas Carol." Friends, if you do not have it in your library, get it and read it and you will be sure to say with Tiny Tim, "GOD BLESS EVERY ONE!"

Let all Baltimore and Ohio Employees make a special effort this Christmas to make

Joseph E. Brady

Mr. Brady, assistant master mechanic, Riverside Shops, has rounded out 38 years of loyal service with the Baltimore and Ohio. He's good for 38 more

Night Switchman H. E. Gulick, Green Spring, and his three children, Blanche, Richard and William

the heart of some one a little happier by our being here, and thus endeavor to express our joy at having passed through the vicissitudes of another year, emerging brighter and better for our experiences.

Christmas will come as a time of joy and thankfulness to some of our force who have been on the sick list for a considerable time. Rate Clerk C. A. Ridgely has recovered sufficiently from his eye trouble to enable him to resume his duties in the office. Miss Gladys Beall, who was seriously ill for two months, has returned to the front again. Both are glad to be back, and, needless to say, both received a hearty welcome on their return. The same welcome is in store for Delivery Clerk M. M. Phelps, who is at present struggling along on crutches, but who reports improvement in conditions as each week passes by.

Business continues good at this station, and all indications point to a fine and prosperous New Year for the good old BALTIMORE AND OHIO!

### Cumberland Division

Correspondent, JOHN J. SELL

To Employees of Cumberland Division:

During the present year which is drawing to a close, the railroads have passed through trying times, which have weighed heavily on employes, officers and those who have their earnings invested in railroad securities. The readjustment following the Great Conflict, which destroyed the economic structure of the old world and seriously menaced the new world, was inevitable; happily, however, the oldest and best railroad in the United States has passed through this period with the spirit of its personnel unbroken, and, with abiding faith, will face the problems of the future.

To those who have suffered through sickness and injury, I extend my deepest sympathy. I trust that the succeeding year will bring to you and yours good health, happiness and prosperity.

(Signed) C. W. VAN HORN.

To the Employes of the Cumberland Division:

I extend to all employes of this division and their families Christmas Greetings and best wishes for the New Year.

(Signed) F. L. SHEAKLEY  
Division Accountant

A pretty party was given on November 6 by the members of the Division Accountant's Office in honor of Mr. and Mrs. Earl C. Robertson, who were recently married, both of whom were formerly members of the Accounting Department. About fifty couples were present and the large office room was appropriately decorated for the occasion. Dancing, cards and fortune telling held sway until a late hour when refreshments were served. The young couple were presented with a handsome gate-leg table. Division Accountant F. L. Sheakley made the presentation speech.

Let's save coal, Boys. It can be done. If every fireman, engineman, power plant man, and any other employe who has anything to do with the firing or handling of coal, will give this matter a little thought and attention, we can do our bit towards saving fuel and thereby assist in reducing the heavy fuel bill. Let's show them what the Cumberland Division can do along this line.

And above everything else let's talk and practice Safety-First. This will pave the way for much happiness during the coming New Year. Let "Safety" be our motto.

The new motor train put in operation on the Green Spring-Petersburg Branch, has been bringing forth good comments from our patrons in that territory. The new service gives them better service to all points on the branch.

The East End of the Cumberland Division broke its own record during the first seven days of November, averaging 94.1 miles per car per day, exclusive of bad order cars. This is the best yet, and shows what can be done by "Keeping the Cars Moving." If we continue this good work, we are sure to get our share of the business to be handled.

Another one of our charming young lady stenographers has decided to listen to the call of Cupid. Miss Betty Dickey, secretary to Trainmaster W. E. Boyland, has resigned for this purpose. Much luck and happiness to you, Betty!

The accompanying picture is a good likeness of Charles M. Egan, chief crew dispatcher, Cumberland, who died on May 3, last. As chief crew dispatcher, Mr. Egan had direct charge of the calling and dis-

patching of train and engine crews out of Cumberland, over the east and west ends of the Cumberland Division and the Connellsville Division. He was well known by practically every train service employe on the two divisions, among whom he had a host of friends. He was elected a delegate to the Relief Department Conventions from this division several times. He was of a genial disposition and was well liked by everyone who knew him. He was 25 years of age at the time of his death.

Second Trick Caller Melvin Hoffman, Queen City Station, put one across on his many friends and fellow employes recently, by quietly getting married. He kept the boys in the dark for awhile, but when they got next to it, they made things warm for the newlyweds. The boys say it must have been love at first sight, but after seeing the bride they don't blame "Mel" a bit, and are wishing the couple much happiness in their new venture.

It is with sincere regret that we report the recent death of Harry S. McClintock, chief clerk to Trainmaster E. C. Groves, Cumberland. Mr. McClintock was enjoying a vacation on the South Branch of the Potomac, following his favorite sport of fishing, when stricken. Coming to his home at Cumberland, his condition grew worse, uremic poisoning developing, hastening his end. Mr. McClintock was with the Company for a number of years, having had service with the late C. L. French, as trainmaster's clerk, in the year 1912. After a short service with an outside firm, he returned to the Company in 1917. He has been in continuous service since that time. In his capacity as trainmaster's clerk, he came in contact with a large number of employes, particularly train service employes, and his dealing with them was such that he earned a host of friends. The esteem in which he was held by all who knew him was portrayed by the steady stream of friends and fellow employes to his late home, and the beautiful floral tributes. The funeral services were held from the home, with burial in Rose Hill Cemetery. He is survived by his mother and one sister, Miss Mable McClintock, stenographer in the Master Mechanic's Office, Cumberland. To these we extend our sincere condolences.

Left: The late Harry S. McClintock, former chief clerk to trainmaster, Cumberland, and Charles M. Egan, chief crew dispatcher, also deceased

The Cumberland Division, our division, ranks high in efficiency. A little quicker movement of cars, a little coal saved, a few more engine miles—will put us where the others can't catch up. It's worth while to be in first place!

We wish everybody a Merry Christmas and a Happy New Year!

Timber Treating Plant, Green Spring, W. Va.  
Correspondent, E. E. ALEXANDER

**Merry Christmas!**

My Dear Mr. Alexander:

We now come near the close of the year and are in a position where we can look back and take measure of what has been done during the past year, and look forward with expectation and determination to do better the coming year. The Green Spring Plant during the first half of the year was well on the way to beat the record of production. It was only circumstances, beyond your control, during the latter half of the year, that prevented your doing so. As a fitting season's greeting, please permit me to express the appreciation of the management for efficient and steadfast service of the Green Spring men during the past year, and to extend to them and their families our Best Wishes for a Merry Christmas and a Happy and Prosperous New Year.

(Signed) EARL STIMSON  
Chief Engineer Maintenance

Every member of the Tie Plant family wishes every member of the Baltimore and Ohio family everywhere a good old fashioned Merry Christmas and a truly Happy New Year.

(Signed) E. E. ALEXANDER  
Supervisor of Plants

We want to especially call attention to the Christmas ads of local merchants and bankers. We are proud of them and they show their real interest in us.

One accident, in spite of all we could do, was chalked up against us for October, when day Tieman G. R. Stewart suffered an injury to one of his fingers, which laid him off for 28 days. The score is now three against us with two months to go.

Mrs. R. N. Angier, Baltimore, wife of our chemical engineer, was a late October visitor. Mrs. Angier, a great nature lover, and R. N. enjoyed "hiking" through the beautiful autumn woods.

Tieman John Kinkead, who has been with us for several years, has purchased a nice farm five miles from Martinsburg, and moving his family thereon, has left the service to become a tiller of the soil. Good luck, John!

Tie Inspector A. E. Irving has answered the "Who's next?" by erecting a beautiful bungalow on the lot recently purchased from Tieman W. Grove, and expects to be "at home" before Christmas. Trackmen Emery Twigg and W. L. Dayton are also building.

Supervisor and Mrs. E. E. Alexander spent a week's vacation the latter part of October with the former's parents at Panora, Iowa, also visiting for the first time in over twenty years close relatives at Anamosa, Iowa.

Tieman S. P. Hose moved his family into the company house formerly leased by the late H. S. Simpson, on October 15.

G. C. Patterson, hustling station clerk here for several years, has been promoted to agent, while "Tom" Taylor, Petersburg, has taken the vacancy made by "Pat's" promotion. "Tom" is a newcomer among us. We wish them both success.

Daniel Ricewick, father of C. C., one of our stationary firemen, is quite ill at the latter's home here at this writing. We hope for his recovery ere the year has passed.

Yard Foreman Gross, Tieman O. R. Landis, Sam Crock and some more were out coon hunting a few days ago, but all they brought back was their guns.

Retortman B. F. Twigg and Jess Robinson had a narrow escape from serious injury while out driving in "Ben's" buggy recently. The horse became frightened at the Branch engine switching at the station and ran away.

Section Foreman J. N. Wagoner, Retortman G. P. Chesshire and Hostler R. D. Nixon each lost a valuable hog recently. Too bad, fellows!

The revival meetings recently closed at Forest Glen, conducted by the pastor, Rev. H. A. Lindamood, assisted by Revs. Rockwell, Powers and others, are said to have been the biggest and best held in that church for many years. Mr. Rockwell is operator here while Mr. Powers is one of our own men.

I. N. Saville, extra gang foreman at the Plant, and Mrs. Bessie Fout of Romney, were united in marriage at the Methodist Parsonage in Romney, November 4, by the Rev. M. L. Fearnow.

The box supper and Mock Trial held at the school house November 2 was quite a success. Proceeds go toward purchase of a bell, greatly needed, for the school. The suit of Malone vs. Leonard to recover price of a valuable hog, drew quite a crowd. Personnel of course: judge, E. E. Alexander; clerk, B. F. Stanholtz; sheriff, G. W. Kaylor; jury, Mesdames Morgan, Flora, E. E. Alexander, Messrs. W. Grove, George Taylor and H. Day. Attorneys: for plaintiff, James W. Short; for defendant, W. F. Singhass. Witness: for plaintiff, Miss Malone, "Tom" Holland, Bruce Crites, Mrs. William Seeders, Mrs. George Taylor, Victor Myerly. For defendant: Fred Leonard, John Heath, Pressley Allen. After hearing most convincing oratory the jury failed to agree and the case was continued.

Mrs. J. R. House, wife of stationary fireman, has returned from a week's visit with relatives in Baltimore.

Captain H. Carder and wife, Conductor Willis Carder and wife, of Baltimore, returned home November 6 after a week's visit with Conductor J. R. Carder and family of Petersburg. J. R. and Willis, brothers, are sons of Captain Carder.

J. D. Rockwell, wife and daughter Mildred, accompanied by Blacksmith and Mrs. W. G. Haines, spent a recent Saturday in the museums in Washington.

Foreman G. C. Conly is again unable to attend to his duties on account of a slight attack of neuritis.

Tieman O. R. Landis has purchased the E. A. Hott property near Donaldson and will move as soon as Mr. Hott is able to give him possession.

Tieman and Mrs. W. E. Landes announce the birth of a daughter, Miss Thelma Parker, October 29.

Clerk and Mrs. F. A. Sebold announce the birth of a son, Francis Allen, Junior, November 1.

Miss Lucy Gurtler, daughter of Fireman and Mrs. C. M. Gurtler, and Serafin Castro, a former plant employe, were recently married in Cumberland.

Property owners A. B. Taylor, B. F. Twigg, A. E. Irving and others have opened the ditch that drains most of our little town south of the tracks, while Foreman B. F. Short has cleaned the big tile under the Branch track. Another fine improvement from a sanitary and drainage standpoint!

## Get on the right side of the Cab!

A LOCOMOTIVE FIREMAN'S promotion depends largely on the knowledge he shows of the locomotive and kindred subjects at the time he goes up for his examinations.

It behooves every fireman, therefore, to prepare himself as thoroughly as possible so that he will not be found wanting when his turn comes.

Failure to pass means a black mark against your name and the loss of valuable seniority rights.

The best way to make sure of passing that examination with a high mark is to study at home, in your spare time, with the International Correspondence Schools. In just an hour a day you can learn the things you need to know about boilers, their attachments, the best methods of firing and feeding, the construction and operation of cylinders and gears, the management of locomotives, and the construction and operation of engine and air-brake apparatus generally.

Just fill out the coupon printed below and, without obligation or a penny of cost, get the full story of what the I. C. S. can do for you.

----- TEAR OUT HERE -----

Mrs. William Cannon, wife of one of our trackmen, who recently underwent a minor operation at the Allegany Hospital, Cumberland, is convalescing at this writing.

The big game hunt of the year is on. The party making it consists of Inspector Irving, Treating Engineer Alexander, Tiemen Corbin and Crock, and Trackman Earl Robinson, who left for parts unknown (unexplored?) in the mountains of West Virginia, on November 13.

As a fitting close for the year and especially for our Christmas number we take great pride in this picture of

our community matrons, all members of or closely related to the great Baltimore and Ohio family. Left to right, front row: Mesdames T. E. Allen, E. E. Alexander, W. G. Haines, J. C. Alexander, W. C. Gurtler, R. G. Smith, R. G. Brown and V. L. Myerly. Second row: Mesdames G. W. Barrager, Robert Nelson, C. E. Edgell, G. W. Robinson, G. C. Conley, J. R. House, M. E. Short, J. N. Wagoner. Standing: Mesdames J. D. Rockwell, G. W. Kaylor, W. Grove, G. N. Teeters, G. P. Chesshire, E. M. Stottlemyer, B. C. Flora, J. W. Twigg, S. P. Hose, J. W. Reese and George Taylor. We regret that several of the ladies invited were unable to be

present and wish to thank all those who so kindly accepted our invitation.

We also take great pleasure in presenting the picture of a beautiful little Queen, a three time prize winner, featured in Cumberland Evening Times of Saturday, November 11, a Baltimore and Ohio baby, who we feel at least partly belongs to us because her "Daddy" is our efficient second trick operator and formerly resided here.

Miss Virginia May Twigg is the daughter of Mr. and Mrs. Vincent D. Twigg, Cumberland. She is three years and eight months and won first prize cup at the 1921 Cumberland Fair Association Baby Show. Virginia also won first prize, a silver cup, at Company "G" Bazaar, Cumberland, and first prize in the three year old class, Strand Theatre baby contest, which was entered by several hundred babies.

**Martinsburg Shop**

Correspondent, W. L. STEPHENS

This December issue closes the volume of 1922. This has been a year of trial and stress for all men connected with the railroads of our nation. Death has called a large number of our Veterans, and many younger men. Discouragements and defeats, along with success and victories have filled the days with joy or gloom. To men who are accustomed to fight the battles of life as railroad men must fight such battles, discouragement means "fight on!" in the hope of a better day and success and victory, the desire to share with others the well earned joy. Standing upon the threshold of the New Year, looking into its future

The better halves and then some—of the Baltimore and Ohio Family at Green Spring—with the prize winning beauty, Virginia May Twigg

**KEYSER BELIEVES IN SAFETY**

Upper left: E. Keplinger. Upper right: J. E. Wilson and family. Below are the goggles that saved their eyes

may it be seen with a vision glued to the ideal of success for the Baltimore and Ohio and its employes. Let the joys of Christmastide pervade every Baltimore and Ohio home, and a prosperous and happy New Year be the lot of all of its officers and men.

The local Veterans are busy looking up memberships and planning for the annual meeting early in the new year. The local association is in splendid shape and mean to have a fine meeting.

A wee daughter is a fine bit of Christmas joy to the home of boilermaker John G. Brown.

Death has claimed another veteran, Conductor Louis D. Dugan, who died at his home 631 North Queen Street. Had Mr. Dugan lived until January, he could have celebrated his 78th birthday, but death caused by dropsy and heart trouble ended his suffering, and brought to a close a long and useful life. Conductor Dugan was born in St. Charles, Mo., and came to Martinsburg when a boy. At the age of 21 he entered the employ of the Baltimore and Ohio. He was in active service until he was retired about 20 years ago, following an accident in which he lost an arm.

The deceased was a quiet, unobtrusive man, and stood high in the esteem and confidence of a large circle of friends. The funeral services were held at the late home. Members of the Baltimore and Ohio Veterans and other employes gathered at the home where the last tribute of respect was paid to the deceased brother and friends.

Paw Paw, W. Va.

Correspondent, M. L. SHARON

We are sorry to have to chronicle the sudden death of our old friend and associate, "Joe" Linthicum, who was taken away

suddenly at his home in Martinsburg. "Joe" and I had been friends for a great many years and he will be missed especially by the older railroad men around the yard in Martinsburg, and his neighbors, by whom he was well thought of. We helped to lay his body in its last resting place, and turned away with the thought that "Just a little further on, we, too, shall answer the Roll Call, and face the Great Superintendent of the Universe to give an account of our stewardship here below." "Joe" was a life-time citizen of Martinsburg. To his family we extend our heart-felt sympathy.

The late apple crop picking is nearing an end. The H. W. Miller Orchards and Cunningham Orchards have had a fair yield considering the heavy frost in the spring, and they are quite busy making shipments over the Baltimore and Ohio Railroad.

The wild turkey season is on and there have been several killed. Eugene Grop, third trick operator, Okonoko Tower, bought one down, or rather, in; we don't know whether it was shot or trapped. A. C. Hardy, first trick operator, same office, just a few days ago tramped Spring Gap Mountain over and failed to land a prize.

Foreman T. W. Kaylor, light speed tracks, is taking out the low places and lining up the track through town.

Robert McAdams, Magnolia, is engineer on the Cumberland-Martinsburg pick-up, and while Magnolia is not incorporated, and hasn't any mayor, yet the citizens have made "Bob" manager of that little town, and things have got to go his way.

Keyser, W. Va.

Correspondent, HARRY B. KIGHT

Greetings from the Mayor of Keyser

Yuletide is the most joyous of all the seasons. It is then that we forget for a time, the wrongs, real and fancied, which we have suffered during the past year. We develop a kindlier feeling toward our fellow man, and imbibe some of the spirit of the Prince of Peace, whose birth we celebrate.

As an humble citizen of this, the most favored nation on earth today, I extend greetings to every reader of the BALTIMORE AND OHIO MAGAZINE, and hope that Christmas time will be a happy time in every home.

May the coming year find each of us a little more considerate of the welfare of those around us, remembering that unselfishness brings happiness always, while selfishness is directly responsible for most of the woes and misery to which man has fallen heir.

(Signed) E. V. ROMIG,

Mayor

To the M. and W. Men of the West End: Greetings and best wishes to you all. I extend my appreciation of your loyalty and support during the past year.

(Signed) JOHN EDWARDS, JR.,

Roadmaster

TO ALL EMPLOYEES OF KEYSER TERMINAL:

I wish to convey to you and yours my heartiest wishes for a Merry Christmas and a Happy New Year and the hope that your co-operation for the New Year, 1923 will make our Terminal safe and efficient.

In making your resolutions for the New Year, I hope you will resolve to study and know our Safety Rules and to carry them out for the benefit of all concerned, which means yourself, your family, the public and the Baltimore and Ohio Railroad Company.

(Signed) H. D. BURKHART

Easy Terms to Baltimore and Ohio Employees

Keyser, W. Va.,  
November 13, 1922.

To All Engineers and Firemen,  
West End Cumberland Division:

I wish to extend my best wishes to you all for a Merry Christmas and a Happy New Year. The year that is now just about past has had its trials and difficulties, which I must say as a general rule were met and handled by the enginemen on the West End Cumberland Division in a sane and satisfactory manner. There is one thing that we should always remember, and that is to comply with the safety rules so that at the end of the year it may be said that we have passed through it without any fatalities or accidents. By carrying out the rules of safety and the rules of the Operating Department, any division on any railroad will be a success, not only to the men but also to all concerned.

(Signed) M. A. CARNEY

Road Foreman of Engines

To All Stores Department Employees:

The past year has been one of difficulties for all, but I feel that each member of our organization has put forth his best effort; therefore, as the Old Year rings out, each will feel that the New Year must hold for them some fruits of their endeavor.

Cooperation and Safety are the standards of our organization, and each year we are advancing toward the goal of making the Baltimore and Ohio a better and safer organization of the people and for the people.

A MERRY CHRISTMAS, A HAPPY  
AND PROSPEROUS NEW YEAR!

(Signed) WILLIAM C. GUTHRIE

Division Storekeeper

*Merry Christmas to Everybody from the  
Correspondent!*

Hey, you other Correspondents! See those ads from Keyser? All the people of Keyser are Baltimore and Ohio Boosters, and the ads you don't see in this issue, you will see in future issues, for they know a good thing when they see it. With this issue the correspondent desires to thank those who have helped him with notes. Keep it up, fellows. The Mineral Daily News published at Keyser, has been mighty nice in giving publicity to the things pertaining to our railroad, and we want to thank the Editor.

"Tom" Boswell laid off for a few days to pick his apples. "Tom" says that while he was working his apple trees worked overtime, and he had SOME crop.

We extend to Mr. F. C. Patton and his family our heartfelt sympathy in the death of their son, Yard Brakeman W. B. Patton, a few weeks ago in Weston Yards.

What has become of that prospective bunch of "Home Builders" from Keyser? Let's get busy, fellows, and get a bungalow. The Relief Department will back us.

Foreman Painter Dunk, who has been ill, is convalescing. We hope to have him back on the job soon.

Machinist "Billy" Martin came to work the other day, all smiles. We thought he had decided to live up to the motto, "Smiling Through," and by golly, he said he had. But the thing that started the smile was the fact that he had a new daughter. Good luck, "Billy!"

We're sorry to report that Car Repairer Shaffer suffered a mashed foot when a heavy piece of lumber fell on it.

Track Supervisor "Mike" Laffey, M. & K. Junction, has been off for sometime with an injured knee.

Assistant Road Foreman Frank Browning and Assistant Trainmaster Frank Graney, both "lookin' mad"

It is with deepest regret that we record the death of Yard Brakeman Boyd Linthicum, which occurred in early November. We extend to the bereaved family our heartfelt sympathy.

Lieut. Shrou and Patrolman Anglin spent their vacation in Cuba.

A sketch referring to the appointment of A. H. Hodges as master mechanic, Cumberland, appears elsewhere in this issue. While we regret to lose Mr. Hodges, who has been master mechanic at this station for the past five years, it was with great pleasure that we learned of his appointment at Cumberland and wish him all success in his new position.

As master mechanic at Keyser, he was not only loyal to the Company and the men under his jurisdiction, but possessed that degree of magnetism that produced results with the least possible effort, setting an example which, followed by his workmen, resulted in the formation of a loyal organization of workmen that has brought the efficiency of the Maintenance of Equipment forces on the West End of the Cumberland Division to the highest point.

We trust that success will follow Mr. Hodges in his new position.

While W. J. Dixon, who succeeds Mr. Hodges, has been with us but a short time, his efforts are appreciated and he will receive the same loyal support from the men under his jurisdiction as was given his predecessor. This means that everything possible will be done to bring about results that will meet with his approval as well as that of the Management.

**Shop Notes**

**Maintenance of Equipment Employees:**

To you and yours I wish a Merry Christmas and a Happy New Year. Thanking you for the cooperation you have given in the past and trusting that the coming year will be fruitful to us all in prosperity and health, I am,

Yours very truly,  
(Signed) W. J. Dixon

Master Mechanic

**To the Car Department Forces,  
Maintenance of Equipment Department:**

While the past year has not been as bountiful as it might have been, I trust that the coming year will be most successful in the way of prosperity and good health.

I thank you all for your loyalty during the past year, and I wish you and yours a Merry Christmas and Happy New Year.

O. G. STANLEY

Car Foreman

On October 16, E. Keplinger, while cutting down steel cars, was struck with a flying rivet which no doubt would have caused serious injury and possibly the loss of an eye if he had not been wearing his Safety goggles. Here you may see a photograph of Mr. Keplinger, together with a sketch of the broken goggles and the rivet which struck him.

This is only one of the many cases on the Railroad where the safety goggles have saved an eye. Mr. Keplinger recommends that all of his fellow men wear goggles. Mr. Keplinger is 29 years old and has been in the service five years.

Here also is a photograph of J. E. Wilson. Mr. Wilson is 43 years old and has been in the service for five years. He highly recommends the use of goggles—this is the third pair that he has had broken without any injury to his eyes. He states that he would have been a blind man today if it had not been for goggles.

We wonder if Nina Lee and "Jim" will exchange Christmas presents.

Car Foreman O. G. Stanley is a patient at the Alleghany Hospital, Cumberland, undergoing a minor operation. While his condition is not serious, his early recovery is anxiously looked for.

Someone reported that Machinist "Joe" Wageley had gotten too fat to be a member of the Fire Brigade. He blamed Uncle "Jack" Griffin for spreading this report and challenged him and Miles Haron to a foot race from the Round House to Red Rock. The challenge has not yet been accepted.

After "Lener" had hung up a high score of 57 and Ruth rolled off the Alley eight times out of ten, our Ladies' Duck Pin Club died a natural death. "Mike" Graney said not to worry—if they cannot play basket-ball, the Ping Pong Club is still open.

Miss Berdie Lark, former time clerk at the shop, has accepted a position in the C. T. Department. While we regret to lose "Berdie," it is noted that Nina, Alice and Ethel do not hang around the office after the noon whistle blows.

"Dusty" says he is going to stay in all winter and save his spare change *in order*

B. J. Davis, work report writer and lover of nature

to get a Buick in the Spring. "Dusty" thinks that is the only way to get the girls to fall for you. He has tried every other way to get Ruth, and this spring will endeavor to make the supreme effort. In fact, he says that with a car, "You can get them where they ain't."

The Annual Christmas Turkey Tournament will take place in Mill Meadow on Christmas Eve under the management of Chief Gun C. H. Spicer, Long Gun "Bob" Pownell, Little Gun Shadow Paxton, Big Gun Oscar Spotts, Son of a Gun "Tom" Stanley.

**Connellsville Division**

Correspondent, C. E. REYNOLDS

With all of our trials and cares of 1922 forgotten in the present era of prosperity and good-fellowship, I desire, through these columns, to extend to every employe on the Connellsville Division my sincerest wishes for a joyous and happy Christmas.

(Signed) R. W. BROWN  
Superintendent

**Office of Trainmaster**

Here is a picture of Miss Blanche Stafford, stenographer, Superintendent's Office. This was taken while she was spending her vacation in Pasadena, California. Blanche says that she had a wonderful time.

**KEYSERITES**

Left to right: Three sons of Car Repairer Roy Bailey; Yard Brakeman J. B. ("Sunny Jim") Sample, Callers J. A. Elsey and T. E. Dunn, M. & K. Junction W. Va.

Train Baggage Man A. S. Harmon and his grandchildren

We also have a picture of A. S. Harmon with his two little grandchildren, Carrie Mae and Anna Gene. Mr. Harmon is employed as train baggage man on trains 43 and 44 between Connellsville and Cumberland. He has been in the service over thirty years, has a pleasing personality, and his many friends extend to him their best wishes for many more years of service.

D. M. Springer, yard clerk, Connellsville, has returned to duty after spending a month touring Florida and Havana. From his present financial conditions and expressions regarding his trip, we judge he walked most of the way back home. That's all right, D. M.; we know you saw the bananas growing up-side down.

We are sorry to report that Yardmaster C. L. McDonald has been off since the first of the month because of illness.

R. A. Morrison has resigned as weigh-master in the scales office at Connellsville, and departed for California, where he intends to make his future home. Our good wishes go with him.

We regret to report the recent death of Mrs. J. L. Shaw, wife of our car repairman and mother of Ray Shaw, ticket agent, Connellsville. To this bereaved family we extend our deepest sympathy

### Pittsburgh Division

#### Glenwood

Correspondent, JANE P. PASSMORE  
Merry Christmas!

Cupid seems to be getting pretty busy about the roundhouse. V. Milto, clerk, roundhouse office, is about to enter the ranks and from what we hear, some of the pipefitter helpers are thinking seriously on the same subject.

Master Mechanic McGann is busy moving more things than power these days. He recently moved into his new home on Gertrude Street.

R. M. McCann, clerk, roundhouse office, has returned to duty after an absence of about three months because of illness.

In the accompanying picture arc, left to right: Jane Passmore, stenographer to Master Mechanic McGann; Frank ("Red") Elliott, messenger, Master Mechanic's Office; Mary Patrick, clerk.

### Glenwood Roundhouse

General Foreman H. J. Meinert, Allegheny Shops, entered the service at Millvale as machinist in 1909. He was promoted to foreman in 1910 and has worked

Blanche Stafford  
This picture was taken in a mighty deep canyon in the Sierra Madre

in that capacity ever since. Conditions at Allegheny Shops indicate that Foreman Meinert is well liked by his employes. The accompanying picture shows Mr.

and Mrs. Meinert and their family and Mr. Meinert's father. This is a happy looking family.

A. J. Saterfield, clerk, Master Mechanic's Office, is seen smiling over the arrival of a baby girl, named Helen Louise.

H. J. Ternent, roundhouse clerk, third trick, was married on September 17, 1922. Congratulations, Harry, and best wishes to the bride!

It is rumored that Supplyman Joseph Doyle is to be a benedict in the near future.

Assistant Chief Clerk C. E. Rider, M. M. Office, claims that he is going to Wheeling as witness to his brother's marriage. We all wonder if this is exactly the true state of affairs. Don't forget, Rider, the girls want some candy.

Machinist Helper C. L. Haggerty, Roundhouse, should know the different roads well by this time. What is the idea in going that direction, "Chuck?"

Large and interesting family of General Foreman H. J. Meinert, Allegheny Shops

Jennie Smith, railroad evangelist, talking to the boys in the Glenwood Shop

A promising young bachelor in a supervising capacity at Glenwood Roundhouse is seen very often with his shoes shined, trousers all pressed, small flower in the lapel of his coat. This same young man always boasts of the number of "Beans" that he has saved in the jar, and from all accounts and from news that we can gather there will be wedding bells ringing in the vicinity of.....? Although this party had boasted of his single blessedness, we feel that he has been hit very fast and hard. Good Luck to you, "Sheriff."

Pandemonium reigned at Glenwood in the Office of Master Mechanic about six o'clock on the evening of October 12. A great commotion was heard and when the smoke and noise had cleared away it was found that no one was injured and that the terrible catastrophe had been averted. After a few minor repairs by the pipe forces, the large flow of water was stopped, and after some of the girl attendants had dried Mary off, she was able to wend her way home. Watch your step the next time, Mary.

Timekeeper Charlie T. Franeis, M. M. Office, made a visit to his old home after an absence of 44 years. Charlie has a stiff neck from looking at all the improvements. He claims that the "Old Swimming Hole," where he spent many happy boyhood hours, is a thing of the past, but it brought back fond recollections of many good times that he had spent there.

Rain, sunshine, snow or sleet,  
You will find the boilermakers  
On their feet.—F. A. Slinger??

John M. Applebe, our well known general foreman, although efficient in stirring engines around Glenwood roundhouse, is not quite

so good with his Dodge. On a recent trip to The Grove, it was necessary to call on his old friend "Snickler" to drag him out of the ditch.

Our congenial storekeeper, "Doe," has been noticed quite recently on various occasions looking over the newspaper, particularly one column, and is noticed to smile pleasantly. The entire office force

was eager to learn of his inquiries. Ah! at last, he is scanning the marriage licenses record. It is thought that it is only a question of time until his name will appear among the honored list. Girls, get busy!

Mrs. C. M. Newman, wife of the superintendent of shops, Glenwood, has returned from the hospital. We all hope for her speedy recovery and continued good health.

Jane Passmore, Frank "Red" Elliott and Mary Patrick, of Glenwood

## Monongah Division.

Correspondent, ANNA MARY UNKS

### Merry Christmas!

That peace and prosperity may attend each of you, that the spirit and teaching of Him whose birth we celebrate at this season may in the days and months to follow be more nearly the rule and guide of our lives, and that the spirit of this season may be more nearly permanent, is the wish of your Superintendent.

(Signed) B. Z. HOLVERSTOTT

One of the latest victims of Cupid's wiles is Miss Catherine Snively, who resigned her position in the Accounting Department to become the wife of Mr. James Hoover, of Keyser, W. Va. They were married in St. Augustine's Catholic Church at Grafton. Their honeymoon was a brief tour of eastern cities. Mrs. Hoover was one of the first ladies to be employed on the Monongah Division, and until the time of her resignation her record was one reflecting faithfulness and efficiency. Mr. Hoover is an employe at Keyser, where the newlyweds will make their home.

We now have a new member in the Accounting Department, Miss Agnes McCabe, who was transferred from the Stores Department to fill a position made vacant by the promotion of Miss Lillian Powell.

We are pleased to welcome back Miss Florence Whittman after a furlough of several months.

Our sympathy is extended to Miss Margaret Byers whose father died recently after a long illness.

Our sympathy goes out to the family of the late Thomas A. Bradford whose death occurred during the past month.

We are all glad to welcome back our master mechanic, W. B. Porterfield, who who spent a month trying to eat all the oranges in California, that is while he wasn't trying to ride a bronco.

We are all looking forward to more light in the Superintendent's Office after Christmas. You know diamonds are noted for their brilliancy!

The telephone operators derive much pleasure from their daily hunt for the venerable E. Bartlett, trainmaster at Fairmont, who spends much time on the road. Oh! Mr. Ernie, won't you please come home?

Compton, the little son of Mr. and Mrs. W. C. Pembroke, is now learning to talk—much to the delight of his parents and friends.

Miss Ethel Bradford resigned as secretary to Superintendent Holverstott to become the wife of Earsel Pepper, chief clerk to A. H. Freygang, division engineer. The ceremony took place in St. Augustine's Rectory, the Rev. Father M. J. Hannon officiating. Mrs. Pepper left us after many years of faithful service. Her amiable smile and pleasant words are greatly missed. We all envy "Pep" his new partner and wish them happiness.

### Monongahela River Branch

Miss Nina Ford, on extra list since leaving Gypsy, has been assigned regular to agency at Haywood. Russell Long, who has been working Haywood for some time, is now holding second at Lumberport.

Practically all offices temporarily closed during slump in business have been reopened.

Operators on M. R. & S. L. have recently enjoyed a variety of first trick dispatchers

during vacations of Dispatchers Kelly, Donahue, Maxwell, Bradford and possibly others. We all enjoyed working with these men, but are glad to welcome "R. D. K." back from his extended vacation.

Operators Hickman and Nutter are now working 2nd and 3rd at Chiefton, these tricks just recently reopened.

"S. F." Satterfield and Mrs. Edna Satterfield are now working 1st and 2nd, Monongah.

We are all mighty glad to see and hear "S. F." again, as no one was more missed than he, while 1st trick was temporarily closed and he was placed on 3rd.

Agent Wolfe, Meadowbrook, was a recent Sunday visitor at Parkersburg, presumably visiting his parents.

Local waytrain Conductor Brumage is enjoying a vacation and selling the Fairmont Times, which is putting on a subscription contest. The person securing the largest number of subscriptions secures a handsome automobile. Fred has the faith that he will secure the prize and we wish him luck, feeling sure that if he is successful, he will be just as able and competent to run it as he is to "run" the local.

## Charleston Division

Correspondent, M. W. JONES

Secretary to Superintendent

### Merry Christmas!

Do It The Baltimore and Ohio Way—  
SAFELY — COURTEOUSLY — EFFICIENTLY!

It is with great regret that we have to record the death of W. B. Patton, yard conductor at Weston. On the morning of October 14, while working in Weston Yard, in some unknown manner he fell under the wheels of a car and was instantly killed. He first entered the service of the Company in 1911 as brakeman, filling various positions until he finally settled in Weston yard. During his entire service there is but one entry on his record and that one is a "Red" or credit entry. Of an affable and friendly disposition, "Bill" stood high with fellow employes and superiors alike, and in him we have all lost a good friend. To his wife, the sincere and heartfelt sympathy of all of us is extended.

Business continues to improve on the Charleston Division, and every one is busy. A good indication is the fact that during the week ending November 7 our miles per car per day showed up as 17.0. Our best previous record was 19.8, and with the co-operation of every one we hope to get back there, because, as Mr. Curren has so aptly said, "Cars are only earning when the wheels are turning."

Your correspondent will have to apologize for the shortage of news in his notes this month, as he has only just returned from a vacation trip during which, with his family he visited Niagara, Toronto, Ottawa, Montreal and Quebec, returning via Boston and Pittsburgh (NO, No, he was not THIRSTY, kind reader, so that's not the reason he went that way). He again asks employes to assist him in making the "Among Ourselves" Department more interesting by sending in notes of happenings at the various stations on the division. If he can get it, then it will be a column for the entire division, not for one or two towns or villages.

It PAYS TO WEIGH. During the month of September the following agencies, in charge of agents whose names appear herein, showed gains in revenue from check weighing:

Buckhannon, E. J. Hoover.....	\$ 1.28
Charleston, T. S. Richardson.....	9.58
Clendennin, J. D. Kennedy.....	4.17
Cowen, J. A. Woolford.....	1.86
Gassaway, G. M. Leach.....	5.05
Gilmer, F. E. Friend.....	17.40
Porters, W. H. Gross.....	3.11
Richwood, N. Rexroad.....	2.07
Weston, J. A. Fisher.....	33.73

Small amounts, 'tis true, but "Every little bit added to what you've got makes just a little bit more."

The writer recalls that when making up similar reports not long ago but one or two stations were shown. Now we have nine. Here's hoping we can make it 49 soon.

We now have with us D. P. Cubbege, formerly with the Sewell Valley Railroad, but prior to that an old Baltimore and Ohio man. He is acting as operator and extra dispatcher. Welcome to our city.

Wonderful results have been obtained by our energetic Secretary of the Y. M. C. A. at Gassaway this month, Mr. E. H. Goelz, in his campaign for new members. The drive has gone "over the top" with over 500. He has been ably assisted in his campaign by division staff officers at Gassaway, and every employe has done his best to make the drive a success. Congratulations to every one!

Chief Clerk Schide is about to move from the country to the city. Remember the last little story we had to tell about him a couple of years ago when he went to the "Lilly Brooke Hall?" Watch the next issue. We shall a tale unfold. Father "Bill" Severns is also going to move. Flats no longer have any charm for him, and so he is about to take unto himself a house.

Our sincere sympathy is extended to Superintendent W. Trapnell in the recent death of his brother.

During our recent trip we had the pleasure of seeing in Pittsburgh, Pa., our old friend F. M. Jordan, formerly division freight agent at Charleston, now coal freight agent at Pittsburgh. Looks just as tall as ever, just as friendly and just as eager to do it "The Baltimore and Ohio way" as he ever did. While we regret that he has left us, we congratulate him on his promotion. Temporarily we have with us at Charleston, in Mr. Jordan's place, Sam Strachan, assistant to the general freight traffic manager. Sam is an old friend of every man, woman and child on the Charleston Division, and even though it is only for a short time, we are glad to see him with us.

Trainmaster W. C. Deegan is again at his post after an absence of some four weeks spent in the hospital at Clarksburg, on account of an injury received at Buckhannon. We are glad to see him recovered so completely. Miss Nell Copley, fuel clerk in the Division Accountant's Office, is again with us after an absence of several months on account of serious illness. We are glad to see her back.

Captain G. P. Rieman, Police Department, spent his vacation in his "Flivver" in Virginia, returning with a whole skin. Dr. E. A. Fleetwood, medical examiner, is also back after a trip to Georgia. Chief Dispatcher John Staples will be the next to go. We'll tell you more about his trip—if we can find out about it—in our next issue. Maybe he will be able to talk a little Spanish when he comes here again. "Quien Sabe, Juan?"

Dispatcher John C. Carpenter of Weston is, we understand, supposed to be spending his two weeks vacation in Phillippi. It is noted, however, that he spent the end of the first week on Centre Avenue, Weston, mak-

Children, Grandchildren and Great-grandchildren of Baltimore and Ohio Men

Left to right: William, age 3 years, Betty, age 1 year, and Gerald Cotton, age 5 years

ing the long trip, Phillip to Weston and return, just to be on hand here over Sunday. Echo answers "WHY?" Ask the division accountant or the car distributor for further details.

Miss Sylvia Miller of the Car Distributor's Office spent a week of her vacation at TORCH HILL. Do I hear some one ask where it is? I cannot say but it's somewhere between Clarksburg and San Francisco on the direct line. We understand Miss Miller spent considerable time in the telegraph office at the station, although she *did* find time to fall off a load of hay at the farm. Upon asking for an interview, your reporter was graciously accorded the privilege by Miss Sylvia, during the course of which she informed us that a week at Torch Hill was more profitable than an hour in Cincinnati. Miss Fleda Feagans, Superintendent's Office, does not agree with the latter comment, she having found Cincinnati interesting. Miss Miller will spend a second week in Tennessee. Why? Ask her. Fickle? That's no name for it; ask Henry Ford if it is.

During our trip through Canada, Boston, Pittsburgh, etc., it was of interest to note the way other railroads do things. One thing is absolutely sure, that is that in their dining cars, other railroads don't put up their meals and cooking in the "Baltimore and Ohio way."

A recent visitor at Weston headquarters was W. L. Allison, safety agent, who attended the regular meeting here last month. By the way, we note from the notes of the Ohio Division that congratulations are in order. A small safety agent has arrived at the home of Mr. Allison.

E. H. Nichols, Division Engineers Office, is at present in the hospital at Washington, suffering from an affection of his eyes contracted in camp during the world war. We hope for his prompt and complete recovery.

In conclusion, we wish each and every member of the Charleston Division family and their families a Very Merry Christmas and every possible happiness for the New Year which will soon come.

Urge Shippers to Load and Unload Cars Promptly

**Wheeling Division**

Correspondent, MARIE SLATTERICK

To All Employes:

Best wishes for a Merry Christmas and Prosperous New Year are extended to all Wheeling and Ohio River Sub-Division employes.

After some turbulent times we are again facing the future as a reunited family with a solid front and that spirit of cooperation and loyalty that has ever maintained the division well up in the van of successful operation.

I desire to extend to you all my appreciation of your efforts and thanks for your able support.

(Signed) C. B. Gorsuch  
Superintendent

To All Maintenance of Way Employes;  
Wheeling Division:

In wishing you a Merry Christmas and Happy New Year, I take this opportunity

to express my appreciation for the good work accomplished during the trying year now about ended.

The problems of the railroad are many. Our task has been especially difficult. To make a better railroad with less expenditure was our particular job and one which could not have been accomplished without your loyal cooperation.

Let us go into the new year with the same determination and confidence and our efforts will be well repaid.

(Signed) A. H. Woerner  
Division Engineer

Gerald, age 5, William, age 3 and Betty, age 1, are children of Frank Cotton, machinist at Benwood Shop, grand-children of J. H. Brown, water station foreman, and great-grand-children of the Veteran Bridge Foreman William Brown who died on September 13 at Grafton. They come from a family of railroaders. Their great-grandfather was in the service 37 years, starting out as bridge carpenter with the old Second Division. Their grandfather first entered the service in 1880 as rodman on the Monongah Division. In 1902, when a new division was opened at Wheeling, Superintendent U. B. Williams brought Mr. Brown with him as water station foreman and he has been here ever since. There are not many of us who can boast forty-two years' service and the three young Cottons should be proud to come of such an illustrious family!

Rodman J. H. Lindsay wanders around the office like a lost soul. "His wife has gone to the country." Usually it's the other way about—the husband often skips around like a blithe spirit and says "Hooray, hooray, my wife's gone to the country!"

Engineer J. Coxon and Mrs. Coxon recently returned from a six month's European tour during which time they visited England, France, Belgium and Switzerland. On their return home they were welcomed by a new grandchild, Joan Coxon, of the fourth generation of Coxons. Engineer Coxon has promised to write us a splendid article on his trip and the conditions he found.

The W. J. Lukens Company, 1414 Market St., Wheeling, W. Va., a representative jewelry establishment of the first class, has been appointed official watch inspector of

October 16, 1922

Mr. J. K. Cromley  
 Chief Clerk, Baltimore and Ohio  
 Parkersburg, W. Va.

Dear Sir:—

Our Mr. Wolf has just returned from your district where he has been for several days expediting the shipment of bottles to us from Fairmont, W. Va. He reports that in Parkersburg you were unusually kind in helping him locate these cars and he feels much indebted to you for this help, and of course, our company appreciates it also.

Our company will have quite a volume of business from year to year going through your territory and it will be a pleasure to us to have it come through your district.

Yours very truly,  
**OWENSBORO CONSERVE COMPANY**  
 (Signed) Marc C. Stuart  
 Secretary

MCS—HCC

This is the kind of "good neighbor" spirit that we like to give and get.

In the accompanying pictures we have: Virginia May, age nine and Clare Eugene, age seven, children of J. W. Champlin, carpenter foreman, Wheeling Division.

Fairmont's "Million Dollar Bridge" on the Monongah Division, picture taken by J. R. Smith, Signal Department, Wheeling Division.

Roseby Rock, W. Va. This rock cele-

brates the closing of the track in 1852. Contractor Roseby had a gang working east and a gang working west and on Christmas Eve, 1852 they came together and closed the track at this rock, the size of which can easily be judged from the figures on top of it. The rock can be seen from the trains and is quite a landmark. In the lower left hand corner can be seen the initials "A. W. T." which stand for A. W. Thompson, formerly superintendent at Wheeling and later vice-president. The men on top the rock in the picture are Signal Maintainers G. W. Matthews and A. J. Rivers, respectively.

**Accounting Department**

Correspondent, R. C. GRUVER

The boys in the Accounting Department have again organized a bowling league and roll their own each Friday evening.

Norman Harrison of prize-fighting fame said he was getting tired of walking all the time and bought himself a "Baby Overland." We did not know he was so popular with the office force until after he'd driven his car to work the first time.

And speaking of cars, the Michel boys, "Jimmy" and "Tony" and the rest of 'em, have purchased a 1916 model Buick and say by the time they have completed repairs (which will be not later than next spring) they'll have a 1926 model out of it.

Our old friend, Donald Edelen, is again with us after an extended furlough. His face looks familiar in the Tonnage Department. Glad to see you back, "Don."

It only recently became known that a certain young lady in the Accounting Department is very much infatuated with a certain clerk at Benwood, whose name cannot be learned but who has been described as tall, stately and handsome(?). We hope

the infatuation is mutual, as Marguerite is a very nice girl.

The pictures of the five (three and two) herewith are the result of a ride from Wheeling to Cumberland in H. K. Harrison's Overland.

Chief Clerk R. T. Brooks and Mrs. Brooks have returned from a brief vacation which was spent in California, Oregon and other western states, visiting places of interest. They report having had a wonderful time.

"Bud" Wiggins was seen one day last week standing in front of a local shoe store during a fall style show in which they had living models. After he stood there for some time someone asked him what he was waiting for and he said "for the curtain to go up, of course." You tell 'em gymnasium, you need the dumbbells.

The Accounting Department desires to extend to the officers and employes of the Baltimore and Ohio Railroad their best wishes for a very Merry Christmas and a Bright and Prosperous New Year.

**Western Lines**

**General Offices, Cincinnati, Ohio**

Correspondent, E. W. SPILLE

He came; she saw; she conquered: Miss Amanda Gaisser, secretary to our superintendent of Transportation, met Traveling Car Checker E. F. Molz when he worked in the Transportation Office in this city, and on September 12 she became his blushing bride. The wedding was an informal affair, the bride wearing a gown of crepe romaine. She carried a dainty bouquet of bridal roses and lillies of the valley. The bridesmaid, Miss Marie Baehner, was becomingly

**WHEELING DIVISION'S ART GALLERY**

Upper left: How many of us remember when this track was "closed?" Upper right: Miss Cochrell, Miss Angela Kirchgessner, Mr. Michel and Mr. Harrison—all Accounting Department employes. Lower left: Virgie May, age 9, and Clare Eugene, age 7, children of Carpenter Foreman J. W. Champlin. Center: Miss Anna Harrison. Lower right: Fairmont's new million dollar bridge

gowned in blue eanton crepe, with a wreath of silver flowers and tulle. She carried a bouquet of ophelia roses. The Transportation Office was well represented at the ceremony. After a reception the bride and groom left for a honeymoon through the east. They will establish their residence in Baltimore. Among the beautiful gifts received by the bride was a handsome bridge lamp presented by her co-workers.

Another romance was started about one year ago by Clarence Hornbach, clerk, and Miss Rose Stutter, stenographer, both in the Transportation Office. It ended happily in their marriage on October 21. She wore a gown of sapphire blue panne velvet, a smart hat of poke shape and a corsage bouquet of pin roses and lillies of the valley. After a tour through the East they will reside in Norwood, Ohio. Their office associates presented them with beautiful twin lamps and a handsome hammered silver water pitcher.

The marriage of T. W. Calvin, also of the Transportation Office, on September 30, was a great surprise to everyone. It was always believed that he would remain one of our confirmed bachelors because of his inessant condemnation of the fair sex. But we suppose that the little dart from Cupid's bow pierced too far into that lion heart of his and caused him to fall heavily. Mr. Calvin takes with him into his new field the congratulations and best wishes of all his co-workers.

Women may fall for uniforms, but a nurse's costume is equally attractive to most men. Ask "Ed." Gardner if that isn't so.

**Freight Traffic Department  
Southwest Region—Cincinnati, Ohio**

Correspondent, E. H. GARDNER  
Assistant Correspondent, C. C. TROY

*Merry Christmas!*

To the names of those reported in last month's issue of the MAGAZINE who have been instrumental in securing passenger traffic for the Baltimore and Ohio, thus co-operating with the Passenger Department, the following should be added: Louise Silberhorn, Maude Hines, W. G. Scholl, M. W. Mueller, E. A. Knauber and C. A. Boyd. Anybody who wants to see his name in print can have the ambition realized by securing at least one passenger for our line. Get busy, everybody whose name hasn't appeared, and see if you can accomplish anything; those who have been successful, keep up the good work!

We just read in the information for the press released by Assistant to Senior Vice-President F. X. Milholland, on November 10, statistics as to the number of automobile accidents at crossings on the Baltimore and Ohio system resulting from failure of drivers of autos to wait a few moments to allow trains to pass. These statistics are appalling, to say the least, and it is hoped none of the Baltimore and Ohio employes owning machines will ever be so foolish as to attempt to "beat" a fast moving express over a crossing.

We were visited the other day by our old friend and ex correspondent for the MAGAZINE, "Ed" Henken. "Ed" is still looking fat and prosperous, in spite of the fact that he has been out of the Baltimore and Ohio service for something over a year.

When it comes to being ever-cheerful and optimistic, we'll hand it to District Freight Agent Douglass. "Doug" is also some "Go-Getter" when it comes to soliciting freight, and his entire force of street-men is in the same class.

The late Charles Ingels

FOR SALE: One twin bed. Apply to Harry Witte, Tariff Bureau.

Some magnetic personality is proving to be the irresistible force which is drawing "Ben" Harris frequently to that dear little village of Lawrenceburg. "Benny," "Benny," better watch your step, or the joys of bachelorhood will not long be yours.

We challenge any office on the system to produce three trace clerks the equal in efficiency to those in our department here at Cincinnati, viz.: "Charlie" Brenner, Voscoe Haskett and "Al" Maier. They are right on the job all the time, and they deliver the goods.

Exit Charles Boyd from the Traffic Department, but not from the service of the "Best and Only." "Charlie" was appointed secretary to Superintendent of Transportation Brooke, effective October 23. Good luck to you, Charles, old boy, and success to you in your new undertaking.

Herald Smith, alias "Smittie," has ceased committing between Williamsburg and Cincinnati in his "Phord." It is now noticeable that he is walking more erect.

S. S. Scoville has been added to the District Freight Office force in the capacity of stenographer, to fill vacancy caused by promotion of "Jim" Richards. "Cliff" Brenner was appointed stenographer in the General Freight Office, to fill vacancy caused by resignation of "Don" Park. Our little tow-headed office boy, "Bobby" Elsener, goes to the Tariff Bureau in the capacity of mail clerk, vacancy being caused by the promotion of "Tommy" Carter to a higher position in the Mailing Department. Irvin Marz is the Tariff Bureau's new office boy, while Clarence Andrew Zoller has been employed in General Freight Office to fill vacancy caused by promotion of "Bobby" Elsener.

Greetings from Texas! "Rawn" Kinney, travelling freight agent, Dallas, says he enjoyed very much reading the first notes of the Cincinnati Traffic Department published in the October issue of the MAGAZINE. "Rawn" sends his love to the whole gang.

Our esteemed contemporary, "Ed." W. Spille, correspondent for the Operating Department, Cincinnati, is back on the job after an "extended vacation (?)" We haven't noticed any notes in the MAGAZINE from his "pen" for the past several issues. Wake up, "Ed;" give us some competition!

Can you imagine "Charley" Terhune in a derby hat walking down Vine Street, arm in arm with George Barrick, the latter all decorated up in side-whiskers? Neither can we!

"Ed." Lind is the latest addition to the ranks of the benedicts. We don't know what the girl's name was, but we saw her picture, and certainly cannot blame "Ed." for getting married. Congratulations and best wishes to you, "Ed.!" Did you ever call up Avon 134 and ask for Mr. Lions?

Now comes "Ed" Burke with the announcement that his family has been increased to the extent of one baby boy. That makes the fourth boy whose birth has been announced around here within the past few months, with nary a girl putting in her appearance. We can't understand it.

The accompanying photograph is an excellent likeness of Charles Ingels, an announcement of whose death was carried in last month's issue.

**Cincinnati Terminals**

Correspondent, JOSEPH BEEL

To the Officers and Employees of the Cincinnati Terminal Division:

Now that we are gradually resuming normalcy, after misfortune brought about by adverse conditions, I desire through the columns of the MAGAZINE to thank each of you for your cooperation in the successful operation of the Cincinnati Terminals during the year 1922. I also extend my Greetings for a Merry Christmas and a Prosperous New Year.

Very sincerely,  
(Signed) J. H. Meyers  
Superintendent

**Safety First**

Once we had a good conductor  
By the name of Jimmy Butler,  
'Til one day he kicked a coupler—  
Now there's no more Jimmy Butler.

Where Jimmy Butler used to stand  
We have a man named Harvey Mand.  
And he has been so fully schooled,  
That he observes the safety rules.

Tho' Jimmy Butler's gone to sta,  
He taught a lesson in a way  
That all should profit by his fate—  
Observe the rules at any rate.

**Newark Division**

Correspondent, B. A. OATMAN

To the Employees of the Newark Division:

We are rounding out the year successfully as a result of concerted action; we have all experienced periods of joy and of sorrow; let us forget the past and with unwavering effort enter upon the New Year with a determination to make it the best in the history of Newark Division. With this thought in mind I extend to you my best wishes for a Merry Christmas and a Happy New Year.

(Signed) H. G. KRUSE,  
Division Superintendent

To Motive Power Department Employees,  
Newark Division:

I wish to convey through the columns of the MAGAZINE, the greetings of the season. I hope that the coming year will be one of peace and prosperity for every employe under my jurisdiction.

(Signed) F. E. COOPER  
Division Master Mechanic

To My Fellow Employes of the M. of W. Department, Newark Division:

Each Christmas we hear, "Peace on Earth, Good Will toward Men," and not since the signing of the Armistice has this message been more applicable than at the present Yuletide. Having passed through the trials of the last few months it behooves all of us to Stop! Look! Listen! and take to heart the lesson found in this greeting.

May 1923 be the best year of our association with the Baltimore and Ohio family, and may this Christmas bring to you and yours all good cheer and prosperity. This is my sincere wish.

(Signed) A. R. CARVER,  
Division Engineer

The accompanying picture is of our efficient crossing-watchman at Black Lick, Ohio, Charles Francisco, better known by residents of Black Lick as "Fudge." Mr. Francisco has spent the past fifteen years with the Baltimore and Ohio on the section at this place. He has always tried to render the best service possible. He takes much interest in protecting the public and is loyal to the Company. Luck to you, "Fudge."

#### Newark, Ohio, Station

You will be interested in the picture of the nurses who accompanied the American Legion Post 85, Newark to New Orleans on October 14. The boys were all feeling fine when they left Newark and have been talking of the good care given them by the nurses while on the trip.

Born on August 18, 1850, and entering the service of the Baltimore and Ohio as

bridge carpenter on April 13, 1868, Samuel H. Blowers died at Zanesville, Ohio, on October 20.

Mr. Blowers was a familiar figure in all construction work on the Newark Division for many years. He was employed as bridge carpenter until September 1, 1882, when he was made carpenter foreman. On November 1, 1884, he was made superintendent of bridges and buildings. He capably filled this important post until March 1, 1901, when he was made inspector and traveled to stations on western lines, checking conditions as he found them. Mr. Blowers also had charge of contract construction work on the freight houses at Cambridge, Columbus and Newark; also at the new round house at Newark, the passenger station at Mt. Vernon, Ohio, and the frog and switch shop at Zanesville, prior to the flood of 1913. Mr. Blowers designed and built Pile Driver P-1 and his personal connection with many structures erected on the Newark Division resulted in good reliable work and material being furnished and used.

Surviving Mr. Blowers are his widow, five children, one brother and one sister, to whom we extend our sympathy.

After a lingering illness covering three years, Mrs. Laura Zinsmeister, wife of Master Carpenter Edward C. Zinsmeister, Newark Division, passed from our midst.

We were indeed sorry to hear of her untimely death at the age of forty-four. We extend to the husband and two sons the sympathy of the Newark Division employes.

We have just been advised of the death of Veteran Martin Farrell at Martin's Ferry. Mr. Farrell was born on September

29, 1847, and entered service of the Baltimore and Ohio on May 7, 1864, as apprentice at Wheeling, W. Va. He was made machinist on May 1, 1868, and foreman of machine shop at Newark, Ohio, on May 1, 1896, a position which he held for four years. He returned to the shops as machinist on August 1, 1900, and worked there until December 2, 1912, when he was pensioned. He died on October 19. Mr. Farrell's long record as an employe stands out prominently—forty-eight years of continuous service with the Company. He enjoyed good health all these years and was in excellent physical condition when he left the service. His wife died in 1903.

Our passenger agent at Newark was unable to take his place in the line up for the big picture of the American Legion party who moved from Newark, Ohio, to New Orleans on October 14. However, W. P. Huffman agreed to pose alone for the MAGAZINE photographer, but just as the latter was about to make the exposure there appeared one of the nurses who accompanied the party.

We have a hunch that the train could have pulled out of the station without W. P. even noticing it. Well, we don't blame him, a good nurse is often needed even in time of sickness. Our only regret is that the picture was not clear enough for reproduction. Never mind, we may yet have the chance of getting both on the same picture!

John Bachelor Woolson, one of Newark's best know citizens and a veteran passenger conductor of the Baltimore and Ohio, died at his home in Newark on October 22.

#### SEEN ROUND THE NEWARK DIVISION

1—Crossing Watchman Charles Francisco, at Black Lick. 2—Russell, little son of Operator R. Keanett, Columbus, Ohio. 3—A corner of Newark's iron foundry, showing a floor set up for pouring steel back brake shoes. 4—Engine 7000 undergoing repairs. The men are: Supervisor Shop Schedules C. G. Miller, General Foreman W. L. Clugston, Erecting Shop Foreman J. F. Pfeifer and Assistant Shop Foreman W. O. Ponsor. 5—Little daughter of Car Inspector C. C. Cook. 6—American Legion Delegates, Newark to New Orleans. 7—The nurses who cared for the "poor" boys all the way to New Orleans and return

Mr. Woolson was born in Hebron, Ohio, on March 14, 1849. He came to Newark with his parents on a canal boat in 1861. He entered the service in 1875 as a brakeman, worked as a baggageman and on December 21, 1886 was promoted to passenger conductor, a position which he filled until April 30, 1920, when he retired. His last run was on the Shawnee Division and patrons of this branch of the road have missed him greatly since his retirement, as he always had a cheerful greeting for everyone. It was a pleasure to make a trip with him.

Mr. Woolson leaves to mourn their loss, his wife, a daughter, two grandchildren and his one sister. The Newark Division employes extend to the family their heartfelt sympathy.

On November 1 Shop Clerk and Mrs. Frank Owens left Newark for an extended trip through the South. They will visit Havana, Cuba, and will spend six or seven weeks in the south.

Day Enginehouse Foreman Walter Reel has just returned to duty after spending two weeks in his new Essex Sedan. He says he enjoyed his trip immensely.

Announcement has been received of the marriage of Mrs. Ira Day Kahney and D. A. Williams, on October 14, at Baltimore, Maryland. Mr. Williams formerly resided in Newark, where he held the position of division storekeeper. Later he was made general storekeeper, Baltimore, Md. Our best wishes go to Mr. and Mrs. Williams.

Assistant Division Engineer F. H. Kahle has left the bachelor's club, the event happening on November 4.

Look out rabbits! Two of the members of the Newark Shop Hunting Club have secured one of the best rabbit dogs in the country and have placed it in the hands of Leon Stanford, who has the reputation of being able to make good hunting dogs out of skeletons. Last year we figured on having rabbit for everyone in the Master Mechanic's Office. We were surprised to receive so few, but with the added feature, the new dog, we are resting content. We expect to more than make up for the serious shortage of last year.

You have been treated to good reading from Sandusky because of the efforts of Miss I. C. Martin, correspondent for that station. We hate to say now that she has left the service of the Baltimore and Ohio and is Mrs. .... We Newark Division readers of the MAGAZINE take this means of sending to Miss Martin our congratulations. Of course, her better half will accept his share too!

General Car Foreman Frank Richardson won the Buick Four touring car offered as a drawing card at a lot sale in the Sheidler Addition to the City of Newark. As he already owned a Chevrolet touring car, he traded in the old car and the new Buick touring, and now drives a Buick Four Sedan.

On October 14 a party composed of 28 members and friends of Newark Post No. 85, American Legion, embarked on train 33, quartered in a special Pullman, bound for New Orleans to attend the National Convention. Among those in the party were Mr. Lee Moore, director of Public Works, City of Newark, Ohio, a former mechanical draftsman of the Baltimore and Ohio, and Mr. Howard Wilson, now with the Holophane Glass Company, Newark, Ohio, a former motive power timekeeper, Division Accountant's Office, Newark. In the accompanying photo taken by Passenger Agent W. P. Huffman, Mr. Moore stands at the left of the picture,

wearing regulation army hat, knee trousers, leggings and white shirt. Mr. Wilson stands sixth in the front line on the left.

The party returned to Newark on October 23 and had nothing but praise for the Baltimore and Ohio. Arrangements for the party to travel via the Baltimore and Ohio were handled personally by "Tom" Snyder, of the Division Accountant's Staff, Newark to whom credit is due for the securing of the party.

#### Columbus, Ohio

Assistant Correspondent, R. KENNETT

Hearty Greetings and Sincere Wishes for a Merry Christmas and Happy New Year!

Conductor "Ike" Thomas has resumed duty after being absent three weeks, having been injured in an accident at Broad Street.

With regret we announce the death of Car Inspector Johnson's mother on November 3. Our deepest sympathy is extended to the family.

We understand Brother Elliott has just about converted Yard Clerk McCormick. We congratulate you, Brother Elliott, on your good work.

We understand that Passenger Brakeman J. B. Rich, who has been off duty for the past three months account serious illness, has gone to Johns Hopkins Hospital, Baltimore, for treatment.

J. P. O'Leary, operator, Big Walnut, has resigned to accept a position elsewhere. Switch Tender Marrah was off a few days recently; the vacancy was filled by Brakeman Frank Wolfe. F. B. Grassley, agent, Broad St., has taken a leave of absence and with his family has moved to Colorado for the benefit of his health. Conductor "Milt" Rowland, Chillicothe, has been with us for the past three weeks, filling the vacancy on the Broad St. helper. Engineer G. Litter has resumed duty on his run after being absent two weeks because of injuries received in an accident at Broad Street.

General Yardmaster H. E. Decker has been off duty for some time because of serious illness. Conductor E. C. Phelps is filling the vacancy.

Brakeman Newman was off a few days recently because of illness. Operator H. Lusk, N. & W. Crossing, took a fifteen day vacation visiting his old Kentucky home.

Yard Clerk Knapp, off duty a few days recently because of illness, has resumed duty and is now able to eat. Operator Irwin, Summit, has resumed duty after being off a few days account sickness.

Engineer M. Senff has resumed duty on his run on Nos. 31 and 38 after being off duty since May 1. Engineer William Scoville was off a few days recently because of illness. He was relieved by Extra Engineer Toole.

Operator Atwood, Leonard Ave., has resumed duty after being off a few days because of illness. With regret we announce the accident which befell Brakeman J. C. Tobin on October 30. He was knocked from a box car, seriously injuring his head and shoulders. Conductor H. R. Schultz, "Silent City," has resumed duty after taking a trip to Minneapolis to see the O. S. U. football team get defeated. Operator C. M. Iden, B. R. Tower, has resumed duty after taking a ten days' vacation. Operator Brewster, N. D. Tower, who was off for a few days account of an abscess on his leg, has resumed duty.

#### Columbus, Ohio, Station

Assistant Correspondent, Miss EDITH ROACH

C. L. Johnson, born on February 25, 1866, at Quaker City, Ohio, died on August

6, this year. Mr. Johnson entered the service of the Baltimore and Ohio at Quaker City as messenger boy, carrying mail to and from trains. He next worked at Bell-air, Ohio, in the Baggage Room and Freight Agent's office jointly. He was transferred to the office of J. L. Davis, Chicago, Ill., as a bill clerk. Later he was appointed relief agent on the Chicago Division. He followed this as freight agent, Walkerton, Ind., Deshler, Ohio, Fostoria, Ohio, Chicago Junction, Ohio, and Sandusky, Ohio. In November, 1905 he was made agent at Columbus, Ohio, where he remained until July, 1917 with the exception of one year, when he was assigned to a place on General Manager Fitzgerald's staff as inspector of freight stations. He suffered a stroke of paralysis on February 9, 1917 and never fully recovered. He was relieved of duties of freight agent at Columbus, Ohio, in July 1917 and was appointed special agent, a position which he filled until his death. He was buried at his old home in Quaker City. He leaves to mourn their loss, a wife and two sons. Those who knew him loved him; his smiles and cheerful greetings are missed by the clerks at the local and district freight offices, who extend their sympathy to the family.

Though departed he leaves his "footprints on the sands of time."

Another bachelor gone astray! Stephen A. Bush, receiving clerk, and Maude Badgley were married on September 16. They spent their honeymoon in Chicago with the mother of Mr. Bush. On the evening of October 10 the "Get Together Club," numbering about thirty, called at the new home, and after spending an enjoyable evening, the bride and groom were presented with an electric grill and set of sherbet glasses. Mrs. Bush was presented with a rolling pin. Refreshments were also served. Best wishes for a long and happy wedded life were extended to the happy couple.

The new home of our chief clerk, J. V. Price, is nearing completion; it is expected that Christmas dinner will be served there.

Mrs. F. H. Dike entertained the Baltimore and Ohio Ladies Sewing Club on Halloween. Pumpkin pie was the piece de resistance. Pinkey Williams carried off the booby prize for disposing of the greatest amount of the pie.

The Grove City flyer has been making good time of late, according to reports from Miss Brink, since the time has changed. Just imagine getting up at 4.30 a.m. on the morning after the night before.

Can someone explain or give reason for Mary Connell's arrival in the office at 7.25 a.m. on one Monday morning? Supposition: *He* missed the owl car.

We welcome into our midst the following new members of our "Family": Joseph M. Bassani, utility clerk; Leo Dugan, ballot clerk; Howard MeBec, assistant ballot clerk; Glen Cashner, messenger clerk.

#### Marietta, Ohio

Correspondent, G. R. STEEN

The employes at Marietta wish each and every member of the Baltimore and Ohio a Merry, Merry Christmas and a Happy New Year.

Yard Engine Fireman Richards is getting to be quite a hand at changing tires. Hard luck, Harry! We'll stop and help you next time.

Conductor O. A. Best is back on the Marietta Night run. Luck to you, Ora!

### Zanesville, Ohio

Announcement has been made of the wedding of Miss Elizabeth Ludy, secretary to the superintendent of shops, Zanesville, to Mr. Burton Rapp, Zanesville Publishing Company.

The announcement to Miss Ludy's friends took the form of a dinner, given by Miss Ludy's mother, Mrs. M. E. Ludy, of Ridge Avenue.

### Akron Division

Correspondent, J. A. JACKSON  
TO ALL EMPLOYEES, AKRON  
DIVISION:

The year of 1922 has in many ways been one of the most trying that we have had to contend with for many years. Our revenues were seriously affected by the coal miners' strike and followed by the shop crafts strike, and at the close of that, business immediately resumed in great volume, and today we are handling a tremendous business, and without a feeling of egotism, I believe it is done in a reasonably decent and orderly manner.

To the seven thousand employes of the Akron Division I extend a hearty Christmas greeting, believing that the success of our division rests in your hands and knowing that you will give the best that is in you to make the next year a successful one in every respect.

Inasmuch as I will not be able personally to extend to you all the good wishes of Christmas, I take this method of thanking you for the excellent support that you have given the Baltimore and Ohio Railroad and myself during the year of 1922. Again I wish you a Merry Christmas and a Happy New Year.

(Signed) D. F. STEVENS  
Superintendent

### TO ALL EMPLOYEES, MOTIVE POWER DEPARTMENT:

As we stand on the threshold of a new year, it is with immeasurable pride and satisfaction that we can look back on our accomplishments during the year that is just passing into history.

After passing through a period of industrial unrest, our readjustment to normalcy has been accomplished with almost marvelous rapidity. We have recovered our lost confidence in each other, and successfully restored ourselves to our former position in the eyes of the Railroad World. This condition has been brought about only through your earnest and hearty co-operation and your willingness to rebuild.

For all of this I am doubly grateful, and especially happy to know that all elements of the Motive Power Department have contributed to the results. I trust that with your continued co-operation during the year 1923 we will be enabled to maintain the high standard of the Baltimore and Ohio and make it the greatest of them all.

At this holiday season, I take the opportunity of extending to you and yours my sincere wishes for a Merry Christmas and a Happy New Year, and trust that you each and all will be blessed with an abundance of our Divine Master's Gifts, so that we can join our voices with His holy Angels in singing "Glory be to God on High, and on Earth Peace to Men of Good Will."

J. A. Tschuor  
Master Mechanic

### A MERRY CHRISTMAS AND A HAPPY NEW YEAR TO ALL:

Charles E. Gee, yard clerk at New Castle Junction and Miss Ruth E. Colnot were married on November 1 in the parsonage of the Third U. B. Church at New Castle, with the Rev. S. B. Copeland officiating.

Miss Pearl Colnot and John B. Clark served as attendants. Following the ceremony dinner was served at the home of the bride, and later the happy couple departed on an eastern honeymoon trip to Washington, Philadelphia and New York. Both the contracting parties have a host of friends among the Baltimore and Ohio employes, the bride having formerly been employed in the Division Accountant's Office at New Castle. Mr. and Mrs. Gee are now occupying their new home at 428 Epworth St.

We are glad to announce the complete recovery of Mrs. Tschuor, wife of Master Mechanic J. A. Tschuor, who underwent a serious operation in the New Castle Hospital in October.

On October 18 the marriage of Miss Clara Coon and Michael Walus was solemnized by the Rev. Leo Worth of Lorain, Ohio. Everybody knows that "Mike" is inspector of accounts with headquarters in Akron. After the wedding ceremony, the bridal party was entertained at a dinner served in the Villa Albers, later departing on a honeymoon trip to Cleveland, Washington, Philadelphia and New York, and are now at home to their many friends in a newly furnished home at 313 Madison Avenue, Akron.

Sam Mehard, clerk in Division Accountant's Office, has been transferred to the Freight Agent's Office at New Castle, to the position of abstract clerk. The penochle players in New Castle will be glad to have him back again.

The following clerks in the Division Accountant's Office enjoyed their annual vacations recently, and are back again at their desks for another year's hard work: Jack McCarthy, Perry Eilbeck, A. P. Zeitler, Luella Miller, Katherine McDowell, "Bob" Gymer, "Bill" Pitcher and "Tommy" Williams. The bunch covered almost every corner of the earth, and tell some interesting tales of their vacations.

Miss Margaret Smith, tonnage clerk, entertained a number of her friends at her home in Garrett, Ind. on October 14. Those present from the division offices were the Misses Mildred Roberts and Mary Beggs, Frank Hert, E. J. Merriman and F. S. Scroggins.

Sincere expressions of sympathy are extended to Yardmaster William Mort in the death of his mother, at New Castle on October 31.

Walter Rupert, operator at OA, New Castle Junction, died at his home on November 6, after an illness of only a few days' duration, due to blood poisoning. Mr. Rupert was one of the best known of the younger employes of our division, and his sudden taking away has cast a shadow of gloom among his many friends. His funeral was held from his late home in New Castle on November 8 and was largely attended. Our employes extend their sympathy to his bereaved family in the loss of a devoted son and husband.

Elmer Geise, formerly of the Division Accountant's Office, has resigned to accept employment with the New York Central in Cleveland. Good luck is the wish of his many old Baltimore and Ohio friends.

Miss Anna L. Beaumont, labor distributor in Division Accountant's Office, has resigned and is now at her home in Cleveland. Miss Beaumont was a general favorite among her associates, who regret her leaving their midst.

Miss Beatrice A. Foust has accepted employment as stenographer in the Division Claim Agent's Office at Youngstown, Ohio.

A. C. Harris, "Jay" Phelps and Miss Mildred Roberts, employes in the Division Office, were pleasing entertainers at the Buckeye Cycle Co. Radio Station recently, and rendered a program of vocal and musical numbers that was enjoyed by a large number of radio fans in various parts of the country.

"Jimmie" Geddis and "Tommie" Williams, formerly employed in the Superintendent's Office, have been promoted to positions in the Division Accountant's Office. They will make good on their new jobs!

New Castle Junction is one of the busiest places on the entire system at the present time. One will not wonder at the above statement when it is taken into consideration that on an average over 75 trains are dispatched daily from this important terminal. Coal in large quantities is being rushed to the Lake Ports before navigation closes, and this, in addition to the through trains which carry only high class commodities, convinces the observer that prosperity is with us again.

What is considered a record movement over any division on the system, was made on the Akron Division during the latter part of October and running into November, a few of the heaviest days business being recorded as follows:

On October 31, 6649 cars were moved. On November 12, with a total of 110 trains, 5012 loads and 2268 empties, or a total of 7208 cars were moved. On November 18 5032 loads and 2646 empties or a total of 7678 cars were moved, and this was accomplished with only 65 engines, an average of 176.7 miles per engine. This is an increase of 135% in loads and 60% in empties over last year's business, and is the largest movement ever recorded. This speaks volumes for the officers and employes of the Akron Division, and shows what can be accomplished with the proper co-operation of all concerned. Superintendent Stevens is to be congratulated in having a staff of officers, who by their co-operation and never ceasing zeal, have made this possible. Boys, if you did it today, you can do it to-morrow, so let's go! "PEP," "PEP," "PEP," is the slogan on the Akron Division. You've made a mark for the other divisions to shoot at.

The writer wishes to take this opportunity of expressing his appreciation to all those who have made it possible to compile the various news items for the Akron Division during the year which is drawing to a close, and solicits the same co-operation during the year 1923. To all I extend my best wishes for a Merry Christmas and a Happy New Year.

MAKE "SAFETY FIRST" YOUR  
SLOGAN FOR EVERY ONE OF THE  
365 DAYS OF THE YEAR 1923

### Chicago Terminal

Correspondent, T. H. WILLIAMS

#### Christmas Greetings

In many respects the past year has been a trying one for both employe and employer. We hope now to see a New Year of peace and good will, cooperation and mutual understanding—a permanency of the feeling that prevails at Christmas tide.

BEST WISHES TO EVERYONE: A  
MERRY CHRISTMAS AND A HAPPY  
NEW YEAR.

(Signed) F. K. MOSES  
Master Mechanic

I wish to extend to all members of this department on the Baltimore and Ohio

**ONE METHOD OF TRANSPORTATION**  
Theresa Schunk, secretary to master mechanic, and Clarice Howe, secretary to division engineer, Chicago Division, "vacating" in Pasadena, Cal.

Chicago Terminal Railroad, greetings of the season and appreciation of your loyal co-operation during the past year.

Correspondent, F. N. Shultz

**Merry Christmas!**

Miss Clarice Horn, secretary to division engineer, and Miss Theresa Schunk, secretary to division master mechanic, have just returned from a delightful vacation trip to the coast, having visited at Grand Canyon, Los Angeles, Long Beach, San Diego and Tiajuana, Mexico.

The photo indicates a diversion from their regular method of travel. Miss Horn is riding the pony at Pasadena.

**Ohio Division**

Correspondent, A. E. ERICH

TO THE EMPLOYES OF THE OHIO DIVISION:

At the approach of the holiday season and at the close of another year, I extend to every employe and officer of the Ohio Divi-

sion, the season's greetings and a heartfelt desire that they, one and all, may spend a Merry Christmas and a most happy and prosperous New Year.

(Signed) A. A. IAMS

Superintendent

Cupid has taken a special liking to the offices on the Ohio Division; he has been successful in piercing the hearts of a number with his ever ready darts. The latest (at this writing) is Miss Cornelia Gilsdorf, stenographer to the division accountant. She has "extended" her field of usefulness and has taken unto herself a husband, Mr. Earl I. Horwitz, of Clarksburg, W. Va. The ceremony took place on October 14. The many friends, who were co-workers with "Cornie," presented her with a set of silverware. The marriage is the culmination of a war time romance, the couple having met while Mr. Horwitz was stationed at Camp Sherman during the war. Our heartiest congratulations and best wishes are extended to them with the sincere hope that their future may be a bright and happy one.

J. J. Rose, former roundhouse foreman, Chillicothe, was transferred to a similar position at Washington, Ind., on October 1. While his fellow workers are sorry to see Mr. Rose leave, they all join in best wishes for his future success. As a token of their esteem, they presented him with a Knights Templar ring.

A young patrolman makes his initial bow to the railroad fraternity, from the home of Patrolman and Mrs. H. Williams. Long live the youngster!

John Nanna, chief clerk to general yardmaster, Chillicothe, has been promoted to the position of yardmaster, Lima, Ohio. We congratulate him and wish him success in his new field.

We are glad to announce that Engineer

Operator Marsh, Maderia, spent a few days on Committee work recently, being relieved by Operator Gillette, who later will re-open the office, third trick, Jackson, Ohio.

Engineer, C. W. ("Buck") was removed to Christ Hospital again recently for special treatment. All hope for a speedy and permanent recovery.

Elizabeth Bien is enjoying a vacation with her parents after being several months on the job as agent at Little Hocking. "Betty" became homesick and said it was the longest she had ever been away from home at one time.

Operator W. H. and Mr. and Mrs. W. E. Littlejohn and their children, Kenneth and Roka, are back on the jobs at "DA" and "Q" Towers, after a two months' tour through the northwest, California, Mexico, Texas and the South. They had a fine time, covering over 12,000 miles and seeing some wonderful country. They state they can all vouch for the Baltimore and Ohio as having the best equipped service of any road.

Brakeman "Ed." Tierney says he loves Loveland and that you'll have to hand it to Loveland for it's the only place on earth you can get a drink of pure—"water." All the other towns are dry. Even Westboro was voted dry and our road hauled them a few tanks of water to tide them through the dry spell.

*The Safety Agent "SEZ:"*

Run carefully where conditions require.  
Protect rear end of train as it should be protected.

Study and comply strictly with all rules and instructions.

In foggy weather and when view is obstructed, regulate speed of train accordingly to avoid accident.

Do not expose yourself to danger just because the other fellow does.

Better be careful a thousand times than crippled once.

Think of those dependent upon you before taking a chance, and you won't take it.

It is with regret that we heard of the misfortune of Operator Charles C. Potts. Mr. Potts' residence was afire, and while attempting to extinguish the flames, he fell from the roof, breaking his right arm. Later blood poisoning developed, making it necessary to amputate this arm.

**St. Louis Division**

Correspondent, H. B. SMITH

A Merry Xmas, with Peace, Health and Happiness to you and your families is my Christmas wish to all employes of the St. Louis Division. May the good will which pervades the holiday season continue throughout the coming year and dominate the relationship among employes and between employes and Management. The year just drawing to a close has been an eventful one with us all. It has had its brightness and its gloom, but with the dawn of a new year and with prospects brighter than ever before let us enter into our undertakings with a new zeal and a spirit of close co-operation which can only mean for us greater success. Again, A Merry Christmas!

(Signed) C. G. STEVENS  
Superintendent

The other day I saw a passenger conductor assisting an old and feeble man through a crowded platform to the waiting room of the station. This is not only befitting of the service and courtesy we give but of the consideration that is due old age.

Harry Hoopengartner from "KI" was a visitor in Flora on October 1. We thought that he had about quit us but says he hasn't. Understand that he has bid on third trick at Mitchell. Are you going to take her to the farm, "Hoop?"

I wonder if the operators along the St. Louis Division know that we have a few items each month in the MAGAZINE. Come on, boys, Kemper can't be all over the line at once, and they say there is nobody knows news like an "op."

Operator Grunz, extra at "KI," was off a couple of days sick. Better watch out, A. C., you are not used to it.

Chief Clerk Conley has been off for some time because of illness and at this writing is

not improving. T. J. Mac is occupying the swivel chair during his absence.

We are pleased to learn that Engineer Maintenance of Way Jordan is recovering nicely from an operation for appendicitis, which was performed on October 14 and that he expects to be back in full harness by December.

Supervisor T. Rowland is spending part of his vacation visiting old haunts and acquaintances at Mitchell, "Tin Town" and Bedford. Supervisor Wyatt at Flora is "vacationing" with his son, Trainmaster Wyatt at Newark.

From Master Mechanic Herlihy to every employe on the St. Louis Division is extended a hearty wish for a Merry Christmas and a Happy and Prosperous New Year!

Robert N. Kuhn has been transferred to Washington Shops as assistant erecting shop foreman. Welcome home, "Bob."

J. J. Rose, Tin and Pipe Shop foreman, has returned to his old love, Washington Shops. Glad to have you, "Jap."

Miss Lucile Klingensmith, A. R. A. clerk, Car Department, delightfully entertained the ladies from the various offices at Washington Shops with a Hallowe'en party at her home on October 26. Decorations, amusements, eats and costumes were in keeping with the spirit of the season. Blanche Wise as a fortune teller told some real truths to an "old witch" who afterwards proved to be Stella Allen from the Road Foreman's Office, and to a "Beautiful Doll," better known as Bertha Feagans. Miss Nettie Feagans from the Superintendent's Office is deserving of special mention as "Little Lord Fauntleroy." Then there was a little ole woman, a couple of clowns, a real gipsy, some ghosts, a number of pretty dolls and last but not least Josephine Fettig as a hobo.

Mr. A. C. Drynan, District Manager, Railway Department, International Correspondence Schools, paid us a visit this week. Mr. Drynan is successful in getting apprentices at Washington Shops to enroll for the various I. C. S. courses.

R. C. Davis yardmaster at Washington Shops, is soon to be transferred to Parkersburg, W. Va. as terminal yardmaster. Best wishes, "Roy." Don't forget us!

The way Martin Murphy, district boiler inspector, brags about the mileage he gets out of his oil, gasoline and tires, leads me to think he is on the payroll of the oil and rubber manufacturers.

**Heard in the Office**

Doubting Frank Teed: I have been told that I have a leaking heart and that I should put myself in the hands of a physician for treatment. However I have absolutely no confidence in doctors. What shall I do? N. R. Martin: Try a plumber.

The Talking Contest still grows. The M. of W.'s now desire to enter Messrs. Shouse and Morrison.

Miss Edna Humes, M. of W. Office, is spending a few days sight seeing in Chicago and Detroit. She was accompanied on this trip by the Misses N. and B. Feagans.

The other day when "Happy" Newhouse, assistant division engineer, came to work, he was loaded down with boxes of candy. It wasn't Christmas or anybody's birthday, not even National Candy Day, but inquiry developed that little Caroline Newhouse had appropriated October 6 as her birthday.

From the D. A.'s Office

Says Woody to Leonard Kellams: Say watcha' doin'?

L. K.: Posting time—want to learn?

Woody: Sure, let's see.

L. K.: First you take your time slip and make the name on it compare with the name in the book, then post the number of hours he works opposite the name in the book. For instances here's John Smith worked eight hours. Put that down; next comes George Washington, eight hours.

Woody: Gee whiz, are you that far behind?

"Sam" Newby went to the American Legion Convention in New Orleans. He saw all the sights, lost a jersey silk shirt and returned with the cutest little dry cough you ever heard. Denver for you, "Sam."

**Toledo Division**

Correspondent, EDWARD M. MANNIX

East Dayton, Ohio

**GREETINGS!**

At this glad season I embrace the opportunity of expressing to the employes of the Toledo Division my full appreciation of their efforts during the past year.

I am grateful to know that they will double their efforts during the coming year of 1923, and I desire to extend to all my most sincere wishes for a Merry Christmas and a Happy and Prosperous New Year.

(Signed) A. E. McMILLAN

Master Mechanic, Toledo Division

On October 8, East Dayton had the honor of a visit from President Daniel Willard and his staff on their tour of inspection. Had not their visit occurred on a Sunday morning, I am sure we would have shown them that East Dayton is certainly on the map.

Thomas Zinkan, who has been with us a short time as assistant to our master mechanic, A. E. McMillan, has been transferred to Willard, Ohio. While we did not have much of an opportunity to see him, he leaves behind an impression of confidence, and carries with him our best wishes for his success.

Quite a good one is told on Frank G. Sehart, our roundhouse foreman. He recently took a trip to Latonia Race Track to spend a day with the speed artists. Some fellow handed Frank a "hot one" to "win and show," which he did. The start was not successful at the barrier, the horses running in all directions. Someone shouted to Frank—"There goes your horse around the other way!" Frank smiled and said, "That's all right, I played him both ways."

Pretty hard to get a line on our friend Robert O'Neil, but things along the repair track show up nicely under his watchful eye. "Bob," like all of our officials, is extending his glad wishes for the Yule-tide and wishing to all a Merry Christmas and a Happy New Year.

General Foreman W. A. Gilmore joins our master mechanic in his glad proclamation for every blessing the season affords. This is reciprocated by the employes, who assure him of their good-will, their confidence and co-operation in all matters during the coming year.

The writer also desires to extend his thanks to all employes, especially to the correspondents, for their co-operation. To my superior officers and my buddies of the shops I wish all the good things the season means, and I hope that sunshine and happiness may be theirs for years to come.

A Merry Christmas and A Happy New Year

Heard something in the air today that sounded like "Ramblers." Is it possible that we may see some extraordinary games? Anybody want a game? Harker or Stoecklein will be glad to book one for you.

Miss Mary Blandford has arranged for a leave of absence on account of her health. Let us hope that after a good rest and a change of climate, Mary will be with us again and that her health may be much improved.

Heard in the Division Accounting Office: "Who'd want a cop for a husband?"  
Answer: "Who'd want a D. & U. time-keeper?"

Miss Luella Clayton, our prima donna, will soon leave on a tour with the Westminster choir. Needless to say we are all proud of our little songbird.

Have you seen the shadow? No? Well take a glance at the M. of W. timekeeping desk and you will see it by closely observing one "Joe" Kjenhoefer. Methinks "Joe" will have to use the old fashioned method of making a mustache grow—by putting butter on his lip.

Somebody went to sleep in the office the other day—it was a visitor, of course. (It was not anybody in the Accounting Department because nobody has time to go to sleep here.) And he snored so loud that it caused a commotion in the back of the room. It took the smiles and laughter of those about him to wake him up to find that he had suddenly become popular. Everybody was looking at him.

Latest news from the Chief Dispatcher's Office is that Bushwaw is eating soup.

**Dayton, Ohio**

Agent's Office

Now that the hot, sweltering days of summer have gone, we are looking for inside amusements. Everybody likes shows. We hope "Bill" Rusche will come to Dayton again with his famous minstrels. Come across, "Bill," and show the Baltimore and Ohio folks that you have appreciated their audiences in the past.

There's one long, lonesome looking jay, who every payday comes this way,

He's spick and span, from top to toe, though you can't guess, his name's not Joe.

You wonder why he dresses so, as on these payday trips he'd go.

It's all because of one fair dame—I haven't yet found out her name—

We think the Captain of Police could solve the mystery with ease.

Miss Erma Miller has taken the position as comptometer operator, Agent's Office. We welcome her to our family.

Lee Wentz has been appointed as assistant car distributor, Superintendent's Office.

(Note: The editor regrets that through error the following items are not set in divisional order.)

**Baltimore Division**

Correspondent, W. H. TARR

During the month of October, the Baltimore Division handled the race track fans to and from the races at Laurel, Md. Some 115,000 persons were carried one way, or 230,000 persons both ways. This movement was handled without injury to a single person. The division takes great pride in handling such movements. As previously mentioned, the division also handled the movement of the Holy Name Society to Washington, D. C., on October 8. This makes two big movements we have handled in the same month. However, this division won its spurs during the War and now takes such movements as a daily occurrence.

T. E. Stacy, secretary of the Y. M. C. A. at Riverside, was given a surprise party at his home, 428 East Randall Street, by the Ladies' Auxiliary. Some 30 persons were present for the music, fun and fine spread.

The standing of our bowling teams is as follows:

	WON	LOST
No. 1 "Sparrows".....	7	4
No. 2 "Orioles".....	6	6
No. 4 "Woodpeckers".....	5	6
No. 3 "Buzzards".....	5	7

They expect to announce some high scores in these columns. At the end of the season they are going to challenge any and all teams on the Baltimore and Ohio System.

The Misses Anna Schnupp and Mildred Blackburn, clerks at Pier 22, Philadelphia, have returned from an enjoyable trip to Oregon.

Signs of better times are with us. The furloughed roadmen are being called back to the service. We hope it continues.

On November 4 the clerks at Philadelphia gathered together for an evening of fun. The assembly room in the passenger station at 24th and Chestnut Streets was obtained for the occasion. A piano was donated and the floor was fixed up in fine shape for dancing. Former members of Keith's Circuit were present. Mr. "Joe" Reilly, female impersonator, won high applause. Miss Margeret Grammes, Baltimore, won first prize as "Follies Girl." Miss McDevitt, of Philadelphia, won second prize as "Sis Hopkins." There were a number of other contests for prizes. Supper was served and the Baltimore crowd returned during the wee small hours of the morning. Credit for the entertainment lies with Miss Abels, clerk, Philadelphia. Among the officers present was Division Engineer C. B. Haverson.

Sympathy of the entire office force is extended to Clerk and Mrs. L. M. Higgs, who lost their baby boy on October 17, after a trying illness. Floral decoration was sent by the office force.

**Printing Department**

Correspondents H. R. FOGLE and HARRY TOFT

To All Employes of the Printing Department

Greetings and best wishes, and may the coming year bring with it the best of everything to you all. I wish to thank you for your hearty cooperation during the past year, and may I ask for continuation of it for the coming year, to the end that we may all feel, at the close of 1923, that it has been a year of improvement for all in every way. With best wishes for a Merry Christmas and a Happy New Year.

(Signed) GEO. R. LEILICH,

Manager

L. A. Markland is now holding down a keyboard in our monotype department. We hope he will have a long and pleasant stay with us.

Compositor Shackelford was forced to lay off for several days as the result of an attack of lumbago.

Mrs. Mary MacNeir, our fair keyboard operator, has been in a local hospital for some time, undergoing operations on her nose and throat. Our best wishes for a quick recovery.

Our bowling team had just emerged from a slump and the boys now have their eyes on the center pin. H. Toft, our captain, was honored by being elected to the vice-presidency of the league, at a business meeting held recently. To those who are thinking of coming out and rooting for us—please remember that games are now rolled on Thursday evening instead of Tuesday as heretofore. In our next issue we will publish the standing of the teams in the league, together with our individual team averages.

Keyboard Operator Sherman spent several days at Cambridge, Md., hunting. We don't know what it was he was hunting, but we have our suspicions.

On October 25, Keyboard Operator W. C. Meredith was married to Miss Emma Beyers of this city. The boys were a bit surprised and extend hearty congratulations.

Have You Gotten Your Free Booklet Showing Floor Plans of 50 Homes; or That Set of Complete Plans and Blueprints for Your Own Home at \$2.50? See Below

Plan No. P-182

PLAN No. H-74

We have already distributed over 450 copies of this booklet. Complete working blue prints and specifications for any one of the houses in the booklet may also be had for \$2.50

# Do You Want \$200 a Week?

The Amazing Story of Carl Rowe who rose from an  
Income of \$50.00 a Week to \$1,000 a Month

## These Men Are Making Big Money

Here are just three of the Comer Representatives who are making large profits and making them easily. They find that they can take an hour or so of spare time any day and make plenty of extra money. Or they can devote all their time to Comer work and make large and steady income. Read their records and hear what they have to say regarding the Comer Way of making big money.

Carl P. King, of Kentucky, a machinist, says: "Since I received my outfit the time I've spent calling on customers has paid me \$3.00 an hour profit."

F. E. Wright, South Carolina, railroad man, finds the Comer Agency a great profit maker, \$256.56 for one month's leisure hours' effort.

J. J. Maher, of Maine, finds the Comer Business a sure way to steady and large profits. He averages \$250 to \$350 a month and frequently goes over the \$500 mark.

+++

You can make profits like these just as easily as King, Wright and Maher. You don't need experience or previous training to start. The Comer Way shows you how to make big money from the first day, and how to keep right on making it.

My name is Rowe—Carl Rowe. I live in a small city in New York State.

I am going to tell you an amazing story about myself. It may seem too strange to believe, but you can easily verify everything I have to say.

Two years ago I was a baker. I was struggling along, trying to make the money in my pay envelope meet the increasing expenses of our family. There was no prospect for the future.

Today, just two years later, I am a successful business man. I have plenty of money for all the things we need and want. Last month I made \$876 during my spare time, and was able to put \$200 a week in my savings account.

I am going to tell you how it happened.

Please remember that two years ago I had no surplus cash. I was in the same fix as nine out of ten other men. Expenses were constantly mounting and my salary, although it had increased, could not keep pace with the cost of living. My wife had to do without things that I knew she ought to have. We wanted an automobile, but we couldn't afford it. We wanted to buy our home, but we couldn't afford that.

It made me desperate to think of what might happen if I became sick or lost my job. I worried about it, and so did my wife. We were living from hand to mouth, and we didn't know what calamity and hardships might be lurking just around the corner.

And yet—today—I own our nine-room house. I have an automobile. I have money for books, the theatre, or any other pleasures that I may want. I have the cash today to educate my son and send him through college.

Here is how it happened. One day in glancing through a magazine I read an advertisement. The advertisement said that any man could make from a hundred to three hundred dollars a month during his spare time.

I didn't believe it. I knew that I had worked hard eight hours a day for \$50.00 a week, and I figured that no man could make that much during a couple of hours a day spare time.

But as I read that ad I found that it pointed to men who had made that much and more. In the last paragraph the advertiser offered to send a book without cost. I still doubted. But I thought it was worth a two-cent stamp, so I tore out the coupon and put it in my pocket and next day on my way home from work I mailed it.

When I look back to that day and realize how close I came to passing up that ad, it sends cold chills down my spine. If the book had cost me a thousand dollars instead of a two-cent stamp, it would still have been cheap. All that I have today—an automobile, my home, an established business, a contented family—

all these are due to the things I learned by reading that little eight-page booklet.

There is no secret to my success, I have succeeded beyond any dream I may have had three years ago, and I consider myself an average man. I believe that I would be criminally selfish if I did not tell other people how I made my success.

All the work I have done has been pleasant and easy, and withal, amazingly simple. I am the representative in this territory for a raincoat manufacturer. The booklet that I read was one issued by that company. It tells any man or woman just what it told me. It offers to anyone the same opportunity that was offered to me. It will give to anyone the same success that it has brought to me.

The Comer Manufacturing Company are one of the largest manufacturers of high-grade raincoats on the market; but they do not sell through stores. They sell their coats through local representatives. The local representative does not have to buy a stock. All he does is to take orders for Comer raincoats and he gets his profit the same day the order is taken. Fully half my customers come to my house to give me their orders.

My business is growing bigger every month. I don't know how great it will grow, but there are very few business men in this city whose net profit is greater than mine, and I can see only unlimited opportunity in the future.

\*\*\*\*\*

If you are interested in increasing your income from \$100 to \$1,000 a month and can devote all your time or only an hour or so a day to this same proposition in your territory, write The Comer Manufacturing Company at Dayton, Ohio. Simply sign the attached coupon and they will send you the eight-page booklet referred to by Mr. Rowe and full details of their remarkable proposition.

## Cut Out and Mail

The Comer Mfg. Co., Dept. X-64, Dayton, Ohio.

Gentlemen: Please send me, without obligation on my part copy of your booklet and full details of your proposition.

## New Invention sweeping country like wildfire

NO wonder this amazing new invention is bringing fortunes to agents. All over the whole country this new device is doing away with old-fashioned methods of heating with coal stoves, ranges and furnaces. Already over \$1,000,000 worth have been sold.

These men know the secret of big money. They know a good thing when they see it and and they know that the time is ripe for this new Oliver improved Oil-Gas Burner. They know that this age of high-priced coal and wood makes it necessary for some substitute. They see ships and locomotives being run by oil and big buildings being heated by it. And they know that an invention that makes use

of this cheap fuel for every home—and yet does it so as to give more heat than coal or wood—is the thing they want to tie up to.

**OLIVER Salesmen Making Big Money**

### SAYS F. W. Bentley of Philadelphia

"Ye Gods—some seller! I made \$215 today!"

**Buys Car with Profits**

"Have earned enough in one month to buy me a new auto." S. W. Knappen, Cal.

**\$7 Profit per Hour**

"I started out and made \$21.50 in about 3 hours. The Oliver does the work. It certainly is the real thing."

L. Zucker, Ohio

**"Sells Like Beer in a Dry Town"**

"Am sending today for seven Oliver's. This is one day's orders (\$85 profit). Selling like beer in a dry town."

W. H. Brew, Mich.

**Mr. T's 28th Order in Six Months**

"Ship 52 Oliver's: 10 No. 30; 6 No. 1; 12 No. 2; 4 No. 4." (Mr T's profit on this order alone is \$711). G. T. Ottawa, Ont.

**Russel Earned \$3300 in Five Months**

"Have averaged \$660 profit a month for last 6 months."

A. M. Russel, Conn.

**Carnegey—\$1000 a Month**

"Am making \$1000 per month. I have made big money before but did not expect so much. Your Burner is just the thing."

J. Carnegey, S. D.

**Berger—\$258.50 per Week**

"Send following weekly hereafter: 10 No. 1; 8 No. 2; 4 No. 5."

R. Berger, Ont.

**\$11.75 in Ten Minutes**

"I took order for a neighbor. \$11.75 profit in ten minutes."

Mrs. N. B., Hattiesburg, Miss.

**\$43 in One Evening**

"I made \$43 last night selling Oliver Burners."

N. B. Chelan, Wash.

You can readily understand why this new invention—the Oliver Oil-Gas Burner—is sweeping over the country like wildfire. It does away with all the expense of coal—making every stove a modern oil-gas burner. Saves money, time and drudgery. Three times the heat of any other method. No wonder agents are riding in on the tide of big Oliver profits!

### It Sells Itself

Agents find it no work at all to sell this amazing invention—the Oliver new improved Oil-Gas Burner. They just show it—taking only one minute to connect it—then light it. And the sale is made! This new invention is its own salesman. It sells itself! The Oliver Oil-Gas Burner is the most timely thing that could be put out. It dispenses entirely with coal and wood when both are now high-priced. It burns the cheapest fuel—oil. It saves a woman work now in times when she is looking for just such things. Just as much or as little heat as wanted, off and on instantly by simply turning a valve

### The Secret of Big Money

Of course, now that you know the facts, you yourself can understand why this new invention is going over like wildfire! And you can understand why F. W. Bentley made \$215 in one day. Why J. Carnegey made \$1,000 in one month, and why hundreds of other agents are cleaning up big, too.

### Big Profits Quickly Made

You too can use this secret of big money. You do not need to be a high-powered salesman. The Oliver's amazing features sell it for you. When people see it they know at once that it is the thing they want. You will realize that this is a proposition that will pay you as big money as it does others. We have a definite number of open territories which we are ready to dispose of to those who act quickly. Every territory allotted is filled with big money opportunities. And this big money comes easily. Because not only does this invention practically sell itself on sight but when you have sold one this one will sell several others as soon as your customer's friends and neighbors see it. And through our special plan you get credit and commissions for every sale in your territory.

You can also make big money just by using your spare time. Note how N. B. Chelan made \$43 in one evening.

### Coupon Brings Full Offer

If you want to make at least \$5,000 a year easily, mail this coupon now for our offer. We are not making any extravagant claims about this. We do not have to. We believe that your common sense will indicate a good proposition to you when you know about it. We want to give you the facts. Won't you write us? And by doing so quickly you will be allotted an exclusive territory with private selling rights.

The coupon will bring you the facts and will save you writing a letter. But mail the coupon at once.

**Oliver Oil-Gas Burner & Machine Co.**  
2099-M, Oliver Bldg., St. Louis, Mo.  
Please send me full facts about how I can make at least \$5,000 a year representing you in my territory. Also your plan if I just wish to make big money in my spare time.

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 40,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

**Try a Smile**

*Selin*

Don't start the day with a growl,  
Try a smile  
And see how much better you'll be  
For a while:  
And when you are better just smile  
All the day  
It will lighten the load and bring  
You back pay.

**Boys Will Be Boys—A Guilty Conscience**

Tommy had been playing truant from school, and had spent a long, beautiful day fishing. On his way back he met one of his young cronies, who accosted him with the usual question, "Catch anything?"

Tommy, in all the consciousness of guilt, quickly responded:

"Ain't been home yet."

—Exchange

**Impossible**

"John, John," whispered Mrs. Congressman Blow Hard, "Wake up! I'm sure there are robbers in the house."

"Robbers in the house?" he muttered sleepily, "Absolutely preposterous? There may be robbers in the Senate, Mary, but not in the House. Absurd!"

—American Legion Weekly

**On Approval**

The steward insisted that the sea-sick passenger try to eat a little.

"I will bring you some dinner," he said.

"Very well," said the passenger wanly, as he gazed across the bounding deep,

"I guess you can bring me some on approval."

"On approval, sir, I don't understand."

"On approval," groaned the other weakly, "you see I may not want to keep it."

—Boston Transcript

**Home with "Honey"**

She left her hubby alone in their room at the hotel while she did some shopping. She returned. The many doors and numbers confused her. But she soon decided which was her room. She knocked and called: "I'm back, honey—let me in!" No answer. "Honey, honey—let me in!" she called again, knocking harder. "Honey, it's me—please, honey!" Brief silence, then a man's voice, cold and full of dignity, came from the other side of the door: "Madam, this is not a beehive; it's a bathroom."—Forbes Magazine

**Number 6**

Attracted by the lure of a get-rich-quick concern, a farmer put some money into the enterprise. For a while he received dividends. When they ceased he wrote a sharp note, asking the reason for stopping the disbursement.

The reply was a literary gem. Three paragraphs apologized for the cutting off of the dividend payments, adding that on account of the industrial depression and the fact that thousands of women and children in Europe were starving, it was necessary to conserve cash, etc.

"This is the greatest country in the world, bar none," the letter concluded. "Before long our industries will be working day and night. This will mean big earnings for the company and substantial profits for you."

"That's what I call a good letter," exclaimed the recipient. "In a measure I'm rather sorry I wrote them."

But accidents will happen. The envelope also contained the original inquiry enclosed by mistake, and on the reverse side was a faint pencil notation, probably a direction to some stenographer:

"Send this gink No. 6. That ought to hold him for a while."—Wall Street Journal

"What a way to bring up your boy," said one father to another. "Every day you give him a quarter. He'll grow up to be a loafer and a spendthrift."

"He'll do nothing of the kind," said the other. "He always puts his quarter in the gas meter—he thinks it's a bank."

—Walter Huber.

**No Evidence**

One afternoon a stranger debarked from a train at a hustling town in the West and headed up the street. Finally he met a man who looked like a native.

"Pardon me," said the stranger, "are you a resident of this town?"

"Yes, sir," was the ready rejoinder of the other. "I have been here something like fifty years. What can I do for you?"

"I am looking for a criminal lawyer," responded the stranger. "Have you one here?"

"Well," said the native, reflectively, "we think we have, but we can't prove it on him."

## Puzzled Passenger Asks: "Was Willard, Ohio, Named after the President of the Baltimore and Ohio—or after Jess Willard?"

*The following letter (the name of the writer and the place from which it was written being deleted) is self explanatory:*

My dear Mr. Willard:

January 13, 1923

Last night I came over on the Baltimore and Ohio sleeper from Detroit to Akron. During the night we were subjected to a very alarming bombardment from the engine. For many minutes it jerked, and pounded, and assailed our car, with a frequency that was difficult to explain. It seemed as if it would push the car out of its paint, and I looked this morning, to see if the lettering on the outside was awry.

Some of this occurred at Deshler, and much at Willard, Ohio. The porter said that the main drive occurred at Willard.

I was amused by the experience, rather than annoyed, because I am a light sleeper, and it afforded diversion. But a problem arose in my mind, which has puzzled me, hence my letter.

The problem is this. I know Baltimore and its hospitable citizens. I once spent a week as a guest of Dr. Henry Barton Jacobs, and was charmed by this glimpse of Baltimore. So I wondered whether Willard, Ohio; train-shocked Willard, sleeper-racked Willard, was really named from one of Baltimore's foremost citizens, whom I know to share Baltimore's most engaging tradition, or whether the engineers think it is named for Jess Willard, and act accordingly.

Yours, etc.

*There is just one class of employes on the Baltimore and Ohio who can answer this inquiry and they are the men to whom the following bulletin was issued:*

Baltimore, Md., May 10th, 1922.

To Engineers Handling Passenger Trains and Others Connected with that Service:

To maintain a high standard and to make its service more attractive to its patrons, the Baltimore and Ohio Railroad, in recent years, has spent large sums of money in the betterment of its track and for the purchase of passenger equipment and more powerful locomotives.

The full benefit will not be derived from these expenditures unless the individual locomotive engineer so handles his train as to make the passenger's trip agreeable and comfortable.

The successful engineer requires more than ability to start and stop trains and maintain speed. We believe Baltimore and Ohio engineers are the equal of any and are interested in promoting the success and reputation of our road and anxious for the very best results.

A passenger engineer is usually of long experience and mature judgment, and well qualified for the work assigned. His first duty is to see that his engine is in proper condition and fully prepared and equipped for the work. He should be ready to start on the exact schedule. Frequently the engineer is not looking for starting signal and time is thereby lost. He should be ready before signal is given.

Much depends upon the way a train is started and stopped. If provided with a locomotive of sufficient power, a train can ordinarily be started and stopped so easily that the passengers will feel no perceptible shock, and their knowledge that the train is under way or standing still will be gained by sight, rather than feeling. This is the perfect standard that every engineer should strive to attain, as it affords many opportunities to favorably impress our patrons.

The engineer who makes required time at minimum speed excels as a runner. To do this he must get his train quickly in motion after a stop, maintain required speed and reduce delays at stations to a minimum. The engineer should know the characteristics of the road over which he runs, and regulate speed to suit conditions. He should know how fast to run at uniform speed to make time required. The practice of running slow up hill and fast down grade is wrong, and causes criticism from passengers.

While it is desirable that uniform speed be maintained, there are times and places when speed may properly be reduced, as during and after storms, in foggy weather, around sharp curves and at obscure places. In all cases the engineer should give first and constant consideration to safety and comfort of passengers, and punctuality next.

While not so important as matters previously mentioned, two things can be done by engineers which will add both to the comfort of passengers and public and result in economy, namely, reduction of black smoke and blowing off of steam at pop valves. With reasonable effort it should be possible to prevent three-fourths of the black smoke ordinarily made by engines using bituminous coal. An engine should not be permitted to blow off steam at pop valves, particularly at stations. It is wasteful and annoying, and frequently frightens animals, causing accidents. It is possible entirely to prevent this waste of fuel and steam by proper handling and co-operation of engineer and fireman.

The impossible is not expected from men in charge of locomotives, and full consideration is given to the conditions under which they work, but unless the highest attainable standard is maintained, the things which the public and patrons of the railroads have a right to expect will not be accomplished.

It is desired that all having to do with the passenger service, carefully consider the points brought out in this circular and exert every effort towards improvement.

*O. Galloway*

Vice-President Operation and Maintenance.

*And we believe that our engineers, not only at Willard and Deshler, but at all other points on the Baltimore and Ohio, are going to answer this passenger's question right!*

## The Hudson River Bridge

By Francis Lee Stuart, Consulting Engineer

Former Chief Engineer of the Baltimore and Ohio Railroad

*Note: We are extremely fortunate in being able to present to our readers the following article on the proposed Hudson River Bridge and its Terminals, written by Mr. Francis Lee Stuart, former chief engineer of the Baltimore and Ohio and now connected with the bridge project as consulting engineer.*

*Passenger travel in and out of New York is increasing enormously and the facilities for handling it will have to be greatly enlarged during the next few years. The Hudson River Bridge plan, therefore, should be of intense interest to Baltimore and Ohio employes, for it contemplates bringing into the metropolis at 57th Street, at an enormous union station, the railroads having their passenger terminals on the west bank of the Hudson. This includes our own road and connections and would mean that the people living along our lines would have as convenient and comfortable access to the heart of New York as that offered any other section of the country.—Ed.*

THE area of the Metropolitan District of New York is practically bisected by the Hudson River, and Manhattan Borough is an island lying on the east side of the Hudson River, bounded on the south and east by the East River and on the east and north by the Harlem River.

Because of the physical features of the island and its relation to the rest of the Metropolitan District, there have grown up many business methods directly connected with transportation which could be changed to the material advantage of the entire district.

Among such changes are better transportation facilities and connections with the New Jersey side of the district for the growing vehicular, rapid transit and through passenger and freight traffic of the Manhattan portion of New York City.

The present traffic crossing the East River is handled by four river bridges, by ferries and several rapid transit tunnels; the traffic crossing the Harlem River is carried by numerous swing bridges; the traffic crossing the Hudson River is handled by ferries and rapid transit tunnels, but as the Hudson is so wide and deep there have been no bridges built across it.

That there is need for better connection between Manhattan and the western half of the Metropolitan

District lying across the Hudson River is evidenced by the prodigious growth of Brooklyn and the Bronx, to which convenient interboro transportation facilities have been provided; and also by the fact that the States of New York and New Jersey have recently begun the joint construction of a vehicular tunnel between Jersey City and lower Manhattan.

Because of these and many other economic reasons which are acute and press for a closer connection between the two shores of the river, it now seems justifiable to consider a bridge across the Hudson, and Mr. Gustav Lindenthal, the eminent bridge engineer, has evolved a design for such a bridge, at 57th Street, which will allow so great an increase in the facilities which make for the growth of Manhattan, that the bridge is of interest to the entire country.

### The Bridge Structure

The bridge is of great magnitude. The river span is 3240 feet between centers of towers and the approach spans are each 1590 feet to face of anchorage.

The floorway of the bridge is 235 feet wide and is carried by two lines of suspension arches 160 feet apart horizontally. Each suspension arch consists of two chords 60 feet apart vertically with bracing between which provides stiffening under passing loads.

Instead of the wire cables with which we are familiar in the Brooklyn Bridge, chains of eye bars are used to form the chords. (An eye bar is a bar of steel which has an eye or hole at each end which fits around the circumference of a steel pin and is in tension.) Each chain consists of 20 to 30 eye bars 16 inches wide and 2 to 2½ inches thick, strung up side by side on pins, and each chord consists of three such chains fastened together at the pins so that there are twelve such chains in four chords forming the two suspension arches carrying the suspended floorways.

The eye bars are to be 60 to 70 feet long from centre to centre of pins and in order to cut down the weight of the bridge the tensile strength or pulling apart strain will be about twice that of ordinary steel but not higher than the best alloy steels of today.

The other prominent features are the towers. In order to give the most economical sag to the chains the towers have to be of great height and strength. Their bases are to be 200 feet by 400 feet and their over all height 800 feet above water level. They are to be founded on rock which is from 100 to 200 feet below the water.

The anchorages are in the rock on either shore and their function is to resist the pull of the chords. Masonry concrete blocks 400 feet

Proposed Hudson River Bridge

*Perspective taken from New York Side  
G. Lindenthal, Chief Engineer and Architect*

*From the Scientific American—Copyright 1881*

long by 355 feet wide and some 240 feet high, will be required to properly anchor the chords.

For economy and in order to reduce the area of the structure exposed to deterioration, each chord will be enclosed in an envelope of bronze, which will protect the painting from the elements and allow for proper inspection. Each tower will be built of steel encased in a shell of masonry for utility and as a protection from the weather.

There are many other details of the bridge which are interesting but these outstanding features give enough for us to see the beauty of the creative idea, and the simplicity of the conception, in spite of its great magnitude.

#### Bridge Capacity

So much for the bridge structure. Its capacity on the upper decks is four surface car lines, two 15 foot sidewalks, and width of roadway sufficient for 16 lines of vehicles; on the lower decks, facilities for 12 standard gauge railroad tracks.

The bridge is to be built by private capital, and primarily to take care of the vehicular traffic of Manhattan and it is estimated that such traffic alone will support the bridge proper. It will cater to such other business as seems fitting under its charter and will furnish revenues which will add to the profit of the undertaking or reduce the cost to all users.

Its upper deck will furnish facilities for vehicular traffic and other surface traffic. The lower deck, when and as desired, can furnish with economy facilities for three other great public needs.

1st—Tracks for rapid transit suburban trains from New Jersey.

2nd—Tracks for passenger trains, other than for commuters, to a union station in Manhattan.

3rd—Tracks for freight delivered direct to Manhattan.

Each or any one of these three facilities can be an independent unit built and maintained and operated as a separate unit as and when economically justified, or a combination of two or all three of the facilities can be worked together with the economies resulting from such a combination.

#### Surface Traffic

In taking care of vehicular and other traffic of the upper deck, the plan of approaches on either side of the bridge has been as carefully worked out as the busiest railroad junction. They provide that the tremendous traffic can be distributed into the street systems on either side without causing congestion. The combined area into which the bridge

pours its traffic is several times the width of the roadway on the bridge, with its 16 lines of traffic, and by the use of flying junctions it is so arranged that the combined vehicular and surface traffic is delivered into the stream of street traffic on the proper side of the street for traffic moving in the same direction, and all traffic entering the bridge can do so without crossing at grade opposing traffic on the streets or the opposing streams of traffic leaving the bridge.

#### Rapid Transit

The plans for suburban trains from New Jersey have not yet been definitely worked out to a conclusion on account of the constantly changing status of rapid transit service in Manhattan. Suburban service has not been considered profitable and has few financial friends but it is a necessity of the Metropolitan life and it is inconceivable that an opportunity for the use of such an efficient and comfortable entrance into Manhattan will not have proper distributing means available.

It has great possibilities of daily service to many people and our preliminary study is to collect a portion of the commuters from all New Jersey railroads and distribute them into Manhattan from an elevated structure along West Street reaching from 57th to Cortland Street and also into such existing subways as have capacity available.

#### Union Station

The proposed Union Station is of the through station type, in which for the same trackage the train capacity is several times larger than for a stub station type. The tracks are under the street level and pass around a loop through the Union Station near 9th Avenue back to the bridge.

It is expected to use the four tracks on the bridge to the station, normally, two in and two out or three in one direction and one in the other as desired. The normal two tracks inbound as they leave the bridge to the loop tracks expand to eight tracks, capable of holding 16 trains, and then spread to 32 tracks at the platform of the station. Outbound the 32 tracks, platform tracks, are narrowed at the throat to eight tracks capable of holding six trains before reaching the two normal outbound tracks on the bridge.

The station is designed to be modern and efficient and is planned with a very large capacity and is intended to serve all the railroads of New Jersey which may desire to give their passengers such service. Rapid Transit and commuter trains can give proper service to the Union

Station but are not taken into the station proper.

The station is located in close proximity to the bridge in order to cut to a minimum the cost per car or passenger using the station, and with this same end in view, it is also proposed to build above ground office buildings, hotels, etc., on the real estate acquired for the station and its approaches, so that the undertaking may benefit financially by the increase in rentals and in other business values in this section, due to the change in conditions brought about by the construction of the bridge and these particular facilities.

#### Freight Terminals

The freight terminal proposed in Manhattan consists of an elevated freight railroad located on blocks, lying on the east side of West Street from 46th Street to Cortland Street. These elevated running tracks are encased in an almost continuous building, extending from 42nd Street to Cortland Street, the building being 200 feet wide and five or more stories high and the cross town streets pass uninterruptedly through the building to the marginal way.

The main or running tracks for both inbound and outbound traffic, switching and platform tracks and carloading platforms are located on the first and second floor of building. The street floor is to be utilized for the delivery of freight to and from trucks. The floor above the track level is to be used as a main freight house floor for temporary storage of such freight as will not be transferred immediately from one carrier to another such as cars, trucks, etc. Above this there are to be two additional warehouse floors or lofts.

It is proposed that team track terminals occupy a number of entire blocks between 39th and 25th Streets.

The freight that is to be handled at the marginal terminals is L. C. L. freight and such carload freight as will not be handled at the team tracks.

The operation of the marginal and team track terminals is conceived on the principle of one way traffic around loops and avoidance of fouling of traffic by cross-over and back-up movements. For this purpose the terminal is divided into two sections, one north of 14th Street and the other south of 14th Street. All traffic for the portion north of 14th Street passes around a loop at 14th Street, without interference with traffic which passes through to the section south of 14th Street; and all traffic for the latter section passes around the loop at Cortlandt Street.

(Continued on page 32)

# The Coal Bill and the Yard Engine Hour

A Yard Engine worked one hour makes one Yard Engine Hour (Y. E. H.).

If a Yard engine burns three tons of coal during an eight hour trick, the fuel performance would be 750 pounds per Y. E. H.

If two scoops less per hour were used during an eight hour trick, the fuel consumption would be 5760 pounds or 720 pounds per Y. E. H.

An average fuel saving of this amount on the yard engine hours of a year like 1921, would result in the saving of 27,333 tons of coal, or \$88,832. This coal would fill 547 cars—A TRAIN OF COAL FIVE MILES LONG.

I have endeavored to show you by illustration just what fuel consumption Pounds per Passenger Car Mile (P.C.M.), Pounds Per 1000 Gross Ton Miles (G.T.M.), and Pounds Per Yard Engine Hour (Y.E.H.) means in money value to the Baltimore and Ohio, in economic advantage to the country at large by the diverting of this extra money spent for coal purchases, to labor and equipment purchases, and also what it means to you in extra work, for, make no mistake about it, **SOMEBODY'S BACK BENDS** and **SOMEBODY'S MUSCLES ARE FATIGUED** to PUT THOSE EXTRA TONS OF COAL IN THE FIREBOX.

Here then is the point of attack—**CUT THE COAL BILL** by reducing the consumption per P. C. M., per G. T. M. and per Y. E. H.

Carry light level fires. Don't use the blower unless necessary. Keep the pop down. Avoid black smoke. Carry water at the proper level. Use steam expansively—keep the reverse lever hooked back to save coal. Avoid slipping. Keep fires clean. Make careful inspection and report of necessary repair work particularly on driving box wedges, cylinder packing, valves and valve motion, flues and smoke box conditions.

I have shown you what can be done in the way of saving—**GO TO IT.**

The Chorus—

**OLD KING COAL IS A GOOD OLD SOUL—**  
Yes He is—But don't choke him in the **FIREBOX.**

The New Leader of the Glee Club

## A Good Fish Story

RECENTLY on one of his sojourns through the wilds in the southwest part of Ohio, Trainmaster Fitzpatrick, who is an ardent angler, took Assistant Division Engineer Abbott fishing. Abbott, who knew nothing of the art, was set up with the necessary equipment and given a comfortable seat on the bank of the Lawshe. The experienced "Fitz" started fishing a few yards higher up the stream. Presently Abbott asked, "How much do these red things cost?" "I suppose you mean the floats," said the angler, "they only cost ten cents." "Well, I owe you ten cents," said Abbott, "for the one you gave me has sunk."—*Joseph Becl.*

R. L. Schill, Manager,  
Station Operation

ON December 1, 1922 R. L. SCHILL was appointed manager, Station Operation, with headquarters at Baltimore, Md., vice J. K. GRAHAM, relieved at his request, and who will be assigned to other duties.

# Stop That Leak! Stop That Leak! Stop That Leak!

## Encouraging Suggestions Received in "Stop That Leak" Drive

THE publication of this issue of the MAGAZINE has been purposely held up until we could make a somewhat definite statement on the results of the "Stop That Leak" drive begun in the December issue. Happily we can report good progress to date.

Over thirty suggestions have been received at this writing, January 4. Every one of them was constructive, well thought out and intelligently presented. Everyone of them has been seen by President Willard himself and is now in the hands of one of our officers for careful investigation, the results of which will be known in time for the publication of at least some of them in our February issue.

### Mechanical Department Leading

The suggestions have come from various parts of the System and the Mechanical Department outranks all other departments in the number of suggestions received and also in their constructive quality. But good suggestions have also come from train service employes, from agents, officers and clerks in various departments.

From the latter, as may be supposed, the suggestions deal principally with saving on stationery and this, although it may seem an unimportant item as compared with coal, for instance, is in principle at least just as important. For if we can establish the habit of thrift among all our people, the results of the "Stop That Leak" campaign will be well worth while.

### We Want Suggestions!

The number of replies received thus far has been disappointing. Instead of having heard from dozens of employes we should have heard from hundreds. We received more than a thousand entries in the Trade Mark Contest and had hoped that we would be able to make an even greater record in the "Stop That Leak" campaign. There are few who can not see a chance to save in some way, if they will but keep their eyes open. After that it is only a question

of a few minutes time with a pencil and paper, and an envelop addressed:

**Stop That Leak**  
**Baltimore and Ohio Magazine**  
 • **Mount Royal Station**  
**Baltimore, Md.**

when the Railroad may have gained to a considerable extent by having your suggestion for saving.

Don't forget that the names of those sending suggestions will be held confidential, unless permission is given by each individual making a suggestion that his or her name may be used.

We especially desire suggestions from train service employes, suggestions calculated to lessen the cost of train and engine expense and also intended to speed up transportation and

increase the efficiency of our equipment.

If you know where there are delays which can be avoided, if you know where equipment is not utilized to its greatest capacity, if you know where inadequate service is being given, where cars are being held out of running service by the unreasonable delays of shippers—if you know any of these things which are cutting into our net revenues and making the Company and all those connected with it, less prosperous, please tell us about it. A sheet of paper, a pencil, a few minutes work and an envelop addressed:

**Stop That Leak**  
**Baltimore and Ohio Magazine**  
**Mount Royal Station**  
**Baltimore, Md.**

are all that you need. May we not have a large number of suggestions for consideration before the next issue of the MAGAZINE is published?

## What They Say about Stationery Savings

*An Assistant Comptroller and Chief Clerk Suggest—*

PREGNANT with good suggestions for the saving of stationery is the following—a part of instructions issued by an assistant comptroller:

"Discourage the use of 'Owl' Clips and 'O. K.' fasteners. Use pins, instead, to hold papers together. Where files are too thick file fasteners should be made use of. It will be found by this method that important papers may be kept more securely intact, and the annoyance of searching for a missing sheet is thus averted.

"Left-over circulars or obsolete forms, instead of being thrown into the waste-paper basket, should be saved, blocked and used for scratch pads.

"When it is necessary to make a statement on a certain ruled form, search first in stock of ruled forms on hand to ascertain whether there is the kind of ruled paper desired already in the office. This to avoid waste of time in ruling similar form.

"Old rubber bands, if not broken, should not be thrown away as they may be used over many times."

T. E. Reese, chief clerk in the office of Mail and Express Traffic, says:

"Thousands of dollars might be saved in the proper and economical use of stationery

supplies. You who have the ordering of these supplies, just order as if you yourself had to pay for them, and after you receive your supplies, use them as if they were your own by stretching them out just as far as you can. Scrape out of the nooks and corners of your desk that discarded pencil-holder, and instead of asking for a pencil when the one you have has worn to half of its size, stick it in the holder and use it down to the last mite.

"Forget how to use the Ruby and Circular erasers: your work will show up much cleaner, and you will be a better accountant and stenographer.

"When you receive letter size circulars, and others that can be cut down, don't file them in the 'W. . . .' Save pins and clips by removing, and turn paper over and use for second sheets. They are perfectly all-right for file copies, too, and in addition to this they can be used for memo notes, etc.

"When you see a pin, owl clip or rubber band on your office floor, don't walk over it, but pick it up. While it is vitally essential that all of our correspondence be legible, it is believed some of us may ask for a ribbon before it is really needed. Watch this!

"Be careful when addressing envelopes, avoid double use because of a mistake on the first one."

# Stop That Leak! Stop That Leak! Stop That Leak!

# Stop That Leak! Stop That Leak! Stop That Leak!

## Mr. Traveling Man:

*Do You Think Enough of Mr. Baugh's 75 Cent Meal to Eat it Regularly?*

THERE is nothing that gets under the skin of a traveling man so quickly as to have his expense account criticized. Let us disavow at the outset, therefore, any intent to do this. But the suggestion made by George W. Haulenbeek, Nestor and Magazine correspondent of our Law Department, to further the "Stop That Leak" campaign, concerning the 75 cent dining car meal, is so reasonable that we print it verbatim as it was submitted:

"Because I am content, writes a Magazine correspondent, with a seventy-five cent Club dinner, whenever I invade a dining car, some of my friends attribute it to covetousness, whereas the club dinner being ample, it is all I want, and I see no reason for expending twice that sum for a meal.

"This suggestion might apply to an employe traveling on Company's business, and

if it was adhered to, would reduce expenditures considerably. A great number of men are constantly traveling on Company's business and if this one item could be observed and carried out, a considerable sum would be saved."

Good suggestion, Mr. Traveling Man. If you believe in Mr. Baugh's 75 cent meal, be a sport and eat it! Isn't that reasonable?

Other suggestions made by Mr. Haulenbeek follow:

"Turning off the electric light when leaving the room, and by all means doing it promptly on leaving for the day, would effect a saving that would be worth while.

"Use the telephone in moderation, especially the long distance and then only when it is really necessary. It should be the aim of every employe to save the Company's money in every way possible."

## Wouldn't This Please You?

*A Life-Saver from An Unexpected Quarter*

EVER since our MAGAZINE was started in 1912, by far the largest number of cuts or engravings that have been used for the printing of our pictures, have been made by the Alpha Photo Engraving Company of Baltimore. Their work has been of fine quality, their service prompt and their people all pleasant to deal with. And as an illustration of the real interest they take in the problems of their customers, we are glad to be able to print the following self explanatory letter from their president:

BALTIMORE, MD.  
December 15, 1922

Mr. R. M. Van Sant, Editor  
Baltimore and Ohio Magazine  
Baltimore, Maryland  
Dear Mr. Van:

Yesterday I received copies of the December issue of the MAGAZINE and I want to compliment you on the decided improvement. It's a real job of printing!

After reading President Willard's letter I would like to co-operate with you in maintaining the high standard of the MAGAZINE and have given our accounting

department an order to deduct an additional two per cent. from all magazine invoices

in the future. While this will not show as itemized on the face of the invoice it can be identified by checking up with the regular price list.

Assuring you of my personal interest and wishing you a Merry Christmas, I am,

Yours very truly,

(Signed) P. T. Blogg

And in order to let our readers know the full sincerity of this unselfish offer on the part of Mr. Blogg, we will simply add that the additional saving made by the two per cent. will enable us to run two or three more pictures a month for the same money. Thank you, Mr. Blogg!

## How to Keep Your Money and Make It Earn More

BUY only what you know," is the advice given to prospective investors in securities by Herbert N. Casson in *Forbes Magazine* (N. Y.). "It is a curious fact," says the writer, "that almost every business man buys rubbish, when he begins to invest his money. Invariably, he buys shares in a business that he knows nothing about. That accounts for the immense sales of mining and oil stocks.

"A beginner, in the world of FINANCE wants big profits. He scorns 6 or 7

## Here is the Story

"A bar of steel weighing half a ton was suspended vertically by a small chain. Near by, a cork from a bottle was suspended by a silk thread. The cork was started swinging so that it struck gently against the steel bar. But the motion of the cork was continued, and at regular intervals it struck the great bar in exactly the same place. Five minutes passed, and still no effect was noted on the bar. After ten minutes the bar gave evidence of feeling uncomfortable. A sort of nervous chill crept over it. At the end of twenty minutes the great bar was swinging like a pendulum of a clock."

## And Here, the Moral

When you save a pin or a rubber band, put out a uselessly burning light, turn off a dripping faucet, smother a steam leak, retrench in your expense account, save a pound of coal a mile, economize in train and engine supplies, when you are thrifty in any small way—you, the individual saver, seem to be swinging like the cork ineffectively against the heavier body of waste. But soon your initial saving develops into a habit, it becomes an example to others and, with repeated small impulses will finally knock the heavier body of waste out of existence on the Baltimore and Ohio.

Start the New Year right—Start to save for yourself and the Railroad.  
Get the Habit—Stop That Leak!

# Stop That Leak! Stop That Leak! Stop That Leak!

per cent. He wants 15 per cent. He has heard of 20 per cent. He wants perfection. Therefore, as perfection is never to be had at home, he invests his money in properties that are thousands of miles away.

"In all cases, whenever you can, buy an interest in a business that is near by. Invest in your own town. Buy what you can see.

"Far-off fields look green, but they are not half so green as you are, if you invest your good money in them.

"First buy the house you live in. Then buy the house next door. The experience that you will get as a landlord will soon cure you of rainbow-chasing.

"If there is not property near by that you can put your money in, then buy the securities of those well-known firms that have been carrying on for thirty years or longer.

"Any railroad or firm that has paid dividends for thirty years is as good as anything can be, in this world of risks.

"But always invest in a business that you know all about, if possible. The trade that you know is the one that you are least likely to get fooled in.

"The point is that you mustn't be a greenhorn when you invest. You must not be credulous.

"All ignorance is dangerous, but most of all in FINANCE. If you stick to what you know, you are likely to stick to your money."

### Explanation to Shipper Brings More Business

By Frank A. J. Manthey

**I**N a recent issue of the MAGAZINE the writer appealed to readers to give satisfaction in their work because this would mean good service to shippers and more business for the Railroad. Here is a case in point. Only a short while ago, Special Investigator Hooper, Claim Department, when requested to interview a consignee about some damage, so well explained to him that the Railroad was not responsible for the damage, but that it was occasioned by the poor loading of the shipper, that the consignee was quite satisfied. He said that he had four more cars coming from Dayton, Ohio, and that he would immediately wire his shippers to route them via the

Baltimore and Ohio. This was done in the presence of Mr. Hooper.

By giving satisfaction on the job he was assigned to, Mr. Hooper was able to secure 236,000 pounds of freight without any additional expense or loss of time. If everybody would co-operate in this direction the tonnage and revenue statements would increase to desired proportions.

**WANTED**—Old Catalogues of Sears, Roebuck & Company and Montgomery Ward & Company!

**O**NE of the departments on the Railroad would like to secure for important reference work old catalogues published by mail order houses such as Sears, Roebuck & Company and Montgomery Ward & Company. Any employe having such a catalogue which he is willing to give to this department will please notify

Baltimore and Ohio MAGAZINE  
Mount Royal Station  
Baltimore, Maryland, giving number of catalogue and date.

**Please Do Not Leave Empty Box Car Doors Open—It is Extremely Wasteful, Costing 20 Per Cent. More in Power!**

Open box car doors on train of any length on level, straight track are estimated roughly to increase the train resistance (resistance to haul) 20 per cent., requiring the production of 20 per cent. more power by the locomotive.

If under good conditions 12 tons of coal are required for a run and the resistance is increased 20 per cent., the increased fuel consumption would be about 2½ tons, accompanied by a decrease in running speed or an increase in running time of probably 10 per cent. Please keep empty box car doors closed.

# How the Susquehanna River Got Its Name

By Lenore Taylor

Daughter of Towerman W. L. Taylor, Aiken, Md.

*Note: The author of "How the Susquehanna Got Its Name" is the eleven year old daughter of Towerman W. L. Taylor at Aiken, Md. Lenore is a student in the Saturday Morning class at the Maryland Institute at Baltimore, and her remarkable talent is displayed in her drawings, as well as in the following story. The Indian signs used in this legend were obtained from various Girl Scout books. It was Lenore's mother who urged the little girl to submit the story to the Magazine, and who aided her in straightening out some of the tangles of diction. The story itself is Lenore's. We believe that it will be a source of enjoyment to the grown-ups as well as to the little folks, and for this reason we are running it on our regular fiction page. Perhaps this delightful little tale may serve as an inspiration to other of the children of the Railroad who may wish to contribute to the Children's Page and to other sections of the Magazine.*

Associate Editor

MANY years ago there dwelt in a valley which is now a part of the bed of the Susquehanna River, a tribe of Indians known as the Algonquins.

The name of the chief of this tribe was Chippewa. His wife's name was Shawnee. Chippewa was a kind and humane Indian, and in this respect his wife was like him. Therefore, these two were dearly loved by their subjects.

They had three sons and no daughters, but when at last a little daughter came to them they were very happy. "We shall call her name 'Susquehanna'," said the chief. And so they named her, but she was always called Hanna.

So little Hanna waxed strong and grew into a woman worthy of her name. She was idolized by Shawnee and spoiled by Chippewa.

After the manner of all Indian maidens, when Hanna became of a marriageable age, there came from miles around many braves to pay their respects. They brought to Hanna many gifts, both rare and costly, of silver, gold and copper, as well as skins of the fox, the squirrel and the ermine. Hanna smiled sweetly and accepted her gifts with many speeches of thanks, but of the young men she would have none.

Her parents worried not a little, for they wished to see her settled in life and living in her own wigwam. Her brothers talked with her about her duty, but she only smiled and showed her pretty teeth and rearranged her headband of beads, using for a mirror the clear water of the stream near the wigwam.

The squaws declared that she would never marry; that soon would go her good looks, and that the braves would then seek another maiden younger and fairer. But Hanna always shook her head and ran to her father to be caressed.

"She is proud," they would say, gazing after her, "no one is good

enough for her. She will meet with her punishment—watch!"

Then, behold there came to the village one day a young warrior, named Octorora, from a tribe many miles away, who bore a message from his chief to Chippewa.

When he arrived, Hanna was seated near her father, embroidering a wampum belt, made of different colored beads and shells, skillfully fashioned to represent birds, beautiful butterflies, and animals. As she shyly glanced up, lo! her eye caught that of the young warrior. The blood rushed to her cheeks and her heart began to beat as if it would break. While delivering the message to Chippewa, young Octorora grew scarlet and embarrassed.

This was the beginning. It was in summer. The birds sang their love songs and the air was full of romance and sweetness. Permission had been granted Octorora to pay his addresses to Hanna. When he told her of his love he said:

"Why confess it? You have known since the day that our eyes met in the wigwam that my soul has fallen captive to your beauty and sweetness."

Then upon the mountainside the trees hung out their yellow, gray and scarlet banners, while, with great pomp and ceremony these two young people were wed. For days and days the festivities lasted. Everybody was happy, for all of the tribe loved Octorora.

As for Hanna and Octorora, they were content. They lived in a fine wigwam and adored each other. While her husband was hunting in the woods Hanna would sit in the doorway and watch for his return, and Octorora's eyes were constantly roving toward the valley where he could see the smoke curling up from a certain wigwam. And when the smoke came up in volumes, as though from a freshly started fire, his heart would leap for joy, for then he knew

that Hanna was preparing supper, and that it was time for him to return.

And so, these two lived happily in one continual honeymoon until the arrival of little Octorora, a strong, lusty little fellow, looking not unlike Chippewa. This, of course, pleased his grandfather only too well. It was Octorora's delight to see to the boy's education in the forest, and Octorora himself was loved by his tribe, but feared by his enemies. So he wished to teach his little son to be honest, kind and fearless. He wished him to be brave, and to be able to lead his tribe into battle—to die for them, if necessary. He taught little Octorora

to aim well, and to shoot with a bow and arrow. When he was about seven years old it was his delight to accompany big Octorora on his hunting expeditions and fishing trips. Together they would tramp for miles and miles, while Hanna would sit in her doorway and weave or embroider, thanking the Great Spirit that she had two warriors to look after her instead of one. How little Octorora would clap his hands for joy when his mother would say, "What has the little warrior shot today?" Then her husband would reply, "He has helped me; he has carried my heavy bow and arrow, and he has also carried these," displaying a string of fish, "besides, he caught two of them."

Of course, they talked in their own Indian language, which was more beautiful than ours.

Octorora also taught his little son how to distinguish the trees by their leaves and their bark; how to tell a bird by his colors or his call; how to read the signs made by the Indians; how to distinguish the footprints of the enemy, the trails of the animals, the whisperings of the leaves, the directions as measured by the position of the sun, the murmurings of the brooks, the habits of plants and flowers, the names of the nuts and fruits, and how to trap animals. Last of all, he taught him stories about the stars in the skies. Soon little Octorora could point out the "dipper," or the Great Bear, and the Little Bear. He knew that the star in the bend of the handle of the dipper is called "Mizar," or one of the horses, and that just above, tucked close in is "Alcor," the rider. The Indians called these two the Old Squaw and the Papoose. The young men would say to little Octorora, "Do you see the papoose on the old squaw's back?"

He also learned that shaking a blanket meant "I wish to speak with you," and that holding up a tree or

branch meant, "I wish to make peace;" that holding up a weapon meant, "I am prepared to fight."

So you can see that little Octorora was a lovable child, endowed with more than ordinary intelligence. His father told him about the Great Spirit, and the child listened reverently. He was an unusual child, bright for his age, and he learned quickly. He was also affectionate, and his father became as weak as a woman when the little fellow put his arms about his neck or clasped him by the hand. The mother had taught the child a prayer to the Great Spirit. It was this:

"Great Spirit, listen Thou to us; guide us this day; help us lest we fall; make our will Thy will, our ways Thy ways."

Octorora's great fear was that he might lose his son before he grew up to manhood, for next to Hanna he adored his son.

One morning little Octorora and his father started for the forest. They were in high spirits as they bade Hanna goodby.

"We shall shoot for you a big deer," said the boy, "and we shall bring you many large fish."

Hanna smiled and wished them good luck. After watching until they were out of sight, she left her wigwam to spend the day with her parents. It was a day in early summer and it reminded Hanna of her courting days. She lived it all over again in her heart, and she thanked the Great Spirit for

his kindness, for his wonderful love and happiness that had been hers in the possession of her husband and child. And the birds sang as on that day when Octorora first beheld her at the door of her father's wigwam. She could see his eyes holding her own; she could feel her heart bounding in her bosom, and the red burned in her cheek even as it had done in those days long past.

She spent a pleasant day talking about her dear ones, and her good parents never wearied of listening. They even made her repeat the prayer which she had taught their idolized grandson.

"I must leave now," said Hanna, "I must prepare supper for them. They will be watching the valley for the smoke from the wigwam." And bidding her parents a fond goodby, she left in the twilight.

\* \* \* \* \*

The sky was growing very black.

"Little One," said Octorora, "we must hasten. I feel the rain in the air. Look at the clouds. Behold, it is ready to fall!"

And as little Octorora looked he laughed, for he always thought it fun to be caught in a shower. They were then near the edge of the forest, ready to follow the path leading to their wigwam in the valley. Suddenly, with a terrific force, the rain began to pour from the skies. This was followed immediately by a

mighty blast of wind that seemed to rend the clouds and to rush through the woods. Thunder pealed long and loud. Lightning flashed so vividly that it almost blinded the eyes of Octorora and his little son. Little Octorora trembled in spite of his staunch Indian heart. Never before in his little life had he feared a storm.

"Father," he called above the noise of the rushing wind, "it must be the voice of the Great Spirit speaking," and straightway he began to repeat the prayer which his mother had taught him.

"Great Spirit, listen Thou to us; guide us this day; help us lest we fall; make our will Thy will, our ways Thy ways."

Octorora drew the boy to him and held the little head against his breast while the storm raged violently.

A great flash of lightning came and went. . . . and with it went the spirit of big Octorora. His arms loosened their hold on the screaming child and his body fell to the ground.

Then followed peal after peal of thunder. In vain little Octorora called to his father. He tried so hard to lift the body in his arms, but seeing that this was useless, he threw himself upon the great breast and moaned.

\* \* \* \* \*

At last the storm ceased. Night had fallen. Octorora and the boy

After the flood, the Indians discover the beautiful river which they named "Susquehanna"

had not appeared. Hanna gathered together a band of young braves and set out in search of her husband and child. All the way she called out, "Octorora, where art thou? My little one, art thou safe?"

Then on the air floated a child's voice, calling its mother.

Like a deer Hanna flew to the spot. There beside the body of the father sat little Octorora, rubbing his eyes, for he had cried himself to sleep on his father's deep breast.

As Hanna drew near she beheld her brave Octorora lying with upturned face, the moonbeams falling upon him. Hanna uttered not a sound, but knelt beside her dead husband and threw her arms about his neck. Then a dull, muffled moan escaped her lips, for she was the daughter of a chieftain, and must not cry. She had been taught to bear pain without a murmur, but the expression on her face spoke the words that she could not utter. Gladly would any one of the young braves have laid down his life to bring back Hanna's husband to her. One of them lifted the little child and placed him in his mother's arms. Hanna raised her head, clasped the child to her bosom, and led the procession which bore the body of her beloved Octorora down the steep path which led to her wigwam.

It was with great ceremony that Octorora was buried and with all of the honors due a man of his station. But Hanna took no further interest in life. The child now clung to his grandfather, who tried hard to take the place of a father to him. Each day Hanna would lead little Octorora to where his father lay buried. There together they would pray.

"But, my Mother," said little Octorora, "I prayed to the Great Spirit in the forest on the night when the thunder and lightning killed my father, but the Great Spirit turned away his face."

"The Great Spirit wanted him," said Hanna, "He called Octorora to live among the stars."

"And is he up there?" the child would ask, "I will look for him." And every night when the stars came out, little Octorora would lie on the ground and gaze up to the heavens, declaring that oftentimes he could see his father looking down upon him.

But alas, from the day of the great storm, the boy could never hear the sound of thunder nor see a flash of lightning without screaming and tearing his clothes and running to bury his head in Hanna's lap. There he would lapse into a state of semi-consciousness until the storm had passed. It was a sad sight, and Hanna could

not forbear letting a few tears fall upon the boy's head, for it was thus that he had stood before his father when the lightning took him away.

As time went on the attacks grew worse. Vainly did old Chippewa summon all of the best known medicine men and old women, but they all shook their heads in doubt. Vainly did the tribe assemble in council in the wigwam to consult and to pray to the Great Spirit for the recovery of Octorora's son. But the child grew worse and worse, never wishing to leave his mother's side.

Then came a bad year for the Indians. There was a drought. The young fruit fell from the trees scarcely after the blossoms had left it. The grass turned brown and withered. The water dried up and there was none for the cattle. The tribes held council, but it was of no avail.

"We must die," they said, "for behold, even the water has gone from the lake." Then the wise men of the tribe declared that the Great Spirit must be angry with them and that a sacrifice was necessary. "Some life must be sacrificed for many," they said, "this is the only way to save our people. No rain has fallen for nearly four moons. The Great Spirit demands, and His demands must be obeyed."

Then into the midst of the wise men and the chieftains came Hanna—Hanna, who was yet very beautiful.

Lenore Taylor, the author of this story.

The braves held their breath as they gazed after her. She led little Octorora by the hand.

"I have heard, oh wise men, what you have said," said she. "I have no desire to live, and my son can not live much longer. He and I are ready to be your sacrifice; my heart is already in the grave upon the mountainside where lies my beloved Octorora. We shall offer ourselves as a sacrifice for the good of our people."

Many moans came from the lips of the men, and many a tear fell behind the blankets in which the squaws hid their faces. The wise men said, "Hanna was a gift of the Great Spirit to us. Shall we return her to him?" And her parents gazed at her in mingled sorrow and adoration.

"But," Hanna continued, "I shall choose the manner of my death. On the pinnacle of the rocks overlooking this valley, at the place where each day my beloved Octorora stood to wave his hand to me before he went to hunt—in this spot, on the morrow, my son and I shall stand. His hand shall be in mine, and in the light of the beautiful moon that shone upon the face of my Octorora, together we shall leap from that rock into the valley below. Oh, once lovely valley, now so desolate, perhaps we shall bring the water to you for which you and my people famish. Do not refuse me," she cried as some suggested that someone who was not so young should make the sacrifice, "I will gladly sacrifice for you, my people."

And so, on the next day, Hanna and little Octorora prepared themselves for the sacrifice. Their people clung to the mother and child, nor were they ashamed to show their love for them.

"We shall be with my father," said the little boy, "you may look for us in the skies at night. My mother, my father and I shall all be together. Be sure to watch for us."

"My two brave ones," said old Chippewa, "if the rain comes to us it will be you who have sent it."

Night came, and the tribes assembled from all around to behold the sacrifice. It was a hot night, although the moon and stars shone brightly. All was silent. Hanna and little Octorora came forth from their wigwam and marched up the side of Mt. Arat to its very peak. Hanna wore her ceremonial costume; her long, black hair was flowing down her back and held in place by a beaded band. Her people wept as she marched, but Hanna and the boy held up their heads proudly. When they reached the peak, Hanna turned to her people.

"We do this for the love we bear for you," she said. Then she embraced her little son and lifted him in her arms. The child put his face close to hers and clung tightly to her body. He raised his little head and spoke:

"May the rain fall and make you all happy," he said.

Then, holding her child close to her heart, brave Hanna stepped to the edge of the rock, closed her eyes and leaped into the once beautiful valley in which stood the wigwam that once belonged to her and the beloved Octorora.

\* \* \* \*

There fell no rain that night, and as the Indians marched back to their wigwams they thought of nothing but the sacrifice. Had it rained, they probably would not have noticed it, for they loved Hanna as they had loved no other woman of their tribe.

On the next morning searching parties were formed to seek for the bodies of the mother and her child. No traces of them could be found.

"The Great Spirit has taken them in the flesh," they said. "Perhaps he is angry that we allowed the sacrifice." And they became silent.

Suddenly there came a great gust of wind. Thunder rolled forth from the clouds and the lightning burst through. Soon came a great rain that almost flooded the valley.

"A storm! A storm!" they cried, "The sacrifice has not been in vain!" And they fell to their knees before the Great Spirit.

It rained as it had never rained before. The water fell in sheets. The people, the cattle and the horses drank greedily. At the end of three days the sky grew lighter and the rain slackened. The people ventured forth from their wigwams. Lo! The valley in which had stood the wigwam of Octorora had disappeared. In its place they beheld a wonderful, swiftly flowing river. Up and down as far as the eye could reach, flowed the sparkling water. A miracle had happened. From miles around came the wise men of other tribes.

"We shall call the river Susquehanna," they said, for it is the soul of her that has saved us."

And the river spread and grew larger. The braves explored and found that it was very long. It would take days and days to find the end of it. Indeed, they doubted if there was an end.

One morning they found a smaller body of water that came from the mountains and emptied into the river which they had called Susquehanna. It was a beautiful little stream, and

as days went on, they noticed a peculiar thing that happened. Whenever there came a thunder storm the stream would rise up and become covered with "white caps." Then it would rush madly down in a great torrent until it fairly leaped into the Susquehanna. At last one man, the wisest of the tribe said:

Behold, this is little Octorora! Can you not see how the storm affects him? Do you not see that he seeks his mother's bosom for shelter?"

And so, the mystery was explained. And from this time, the valley prospered. The cattle became second to none; the fruits were the fairest and most delicious ever grown, while the

corn, buckwheat, oats, barley and wheat could not be excelled in any other part of the country. And thereafter, when the Indians prayed to the Great Spirit, they would thank him for sending Hanna as a sacrifice. On each starlit night, old Chippewa and his wife would search among the stars for their three loved ones. At last, they, too, passed into the Happy Hunting Grounds.

For years afterward, the little Indian children would say to each other, "Hear the thunder! See the lightning! We are going to have a storm. Let us go down and see little Octorora get frightened and leap into his mother's arms."

## There May Be a Prize for You—

*If you read the Magazine from cover to cover!*

Once in a while an employe will tell us that he reads the Magazine "from cover to cover," but this doesn't happen often enough to make us conceited. It is principally to those employes who read the Magazine from cover to cover, however, that this offer is made.

Every issue of the Magazine contains one "best article." By "best article" we mean the one that will do the Railroad and its employes the most good. It may be a story of some man's life, or one of the excellent bits of fiction that we have run, or a poem, or even one of the little notes in the Safety Roll of Honor or the Among Ourselves Department. For instance, I read every single word in the May, 1922 issue and there wasn't a thing in it that typified quite so well the kind of spirit we want on the Railroad as this little item, hidden away in the second column of page 64:

### "Getting Them Out On Time"

"On March 5, engine 5091, Train 49, dispatched from Newark, made its run to Sandusky. When the engine was uncoupled from the train, it was found that the throttle had become disconnected. Foreman Hohenberger, Sandusky, Ohio, had engine removed to the Round House, where he knocked the fire, blew steam off the engine, lifted dome cover, and by bending down over the throttle valve at dome opening, found that the throttle box had come loose from side of dome, falling over and stripping the nut off bottom of auxiliary throttle valve. It was necessary to work over flues with hot steam raising through dome opening, remove, repair and apply throttlebox, auxiliary throttle and rigging.

"Train 49 arrived at Sandusky at 1.20 p. m., engine was repaired, gotten hot, and left Sandusky on Train 48 at 4.05 p. m., an "ON TIME" dispatchment. Mr. Hohenberger performed this work in less than two hours and forty-five minutes. Notation similar to the above has been made on Mr. Hohenberger's service record, and Superintendent Kruse had commended him for his personal interest in handling the situation, which required speed as well as lots of grit."

Can you imagine the way the Baltimore and Ohio would forge ahead this year if even a fair number of us employes were as responsive to the best interests of the Road as Foreman Hohenberger showed himself to be? It is such men that are making the Road, there are many more of them and it is their examples that we want to talk about in our Magazine. In order to do this we offer:

A large size Wahl Eversharp five dollar fountain pen to the employe sending in the best answer to the question:

*"What is the most helpful article to the Baltimore and Ohio Railroad and its employes in this issue, and why?"*

All answers covering this issue must be in the hands of the editor by February 15. An officer of the Railroad will decide which is the best answer and it will be published in the March Issue of the Magazine.

Tell in not more than 300 words why you think the item you choose is the best. Send your answer to Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, and don't forget that it may be necessary to read the issue from cover to cover in order to get the right answer and win the prize!

### Now Is the Time to Tell Us

It is well known by all our readers that the railroad companies have repeatedly been accused of extravagance and inefficiency. We do not recall that our own Company has ever been picked out as a special target for such accusations but it must be assumed that we, too, have been included in the charges.

Some of the suggestions made for bringing about greater efficiency on the railroads called for the expenditure of so much money that the suggestions were highly impracticable. This detail has been fully discussed pro and con in other publications and we are not concerned with it here.

What we want to emphasize is the fact that the President of our Railroad has called upon every employe through our MAGAZINE to let the Management know of any wasteful practices now existing so that they can be corrected. Could there be a better opportunity for bringing about real economy on the Baltimore and Ohio than this method offers?

If you had a big waste in the administration of your home affairs and some friend called your attention to it in a helpful way, you would thank him. In the same spirit the Baltimore and Ohio will thank every employe who in a helpful spirit suggests a way in which we can economize and work more efficiently.

If you happen to know of any waste won't you please sit down right away and write about it to—

Stop That Leak

Magazine Office, Mount Royal Station  
Baltimore, Md.

Your communication will be handled confidentially, you will not be embarrassed in any way, and if your suggestion is a practical and helpful one, you will be given due credit for it.

### How Would You Like to be a Gardener or a Painter?

The well known slogan of the florists of North America, "Say It with Flowers," can be usefully applied in our business.

One of the things that helps to please passengers and hence brings more passengers, is a pleasing outlook along the right of way. Nature has bountifully supplied the Baltimore and Ohio in this respect, as our lines range from the attractive farmlands of Maryland and eastern Pennsylvania in the east through the picturesque Alleghenies and on into the fertile plains of our western boundaries.

But there are innumerable places along the line where the mere coming of the Railroad and industry has defaced a pleasing and attractive Nature. And it is here that our opportunity lies.

Many an agent at a small station has through his love of shrubbery and flowers transformed a vista unattractive from a railroad train into one of beauty. Many a crossing watchman has utilized his spare moments profitably and transformed the barren bit of soil around his watch box into a blossoming and productive patch of color which every passing observer must admire.

Aren't there many places on the Railroad whose physical appearance could be improved at little expense to the Company? I have seen stations along the line that a coat of paint would literally transform, and although I have never been an agent and know little of the duties of an agent, yet experiences with them (at some points, certainly), would indicate that they have some time on their hands which they might profitably use in painting up and cleaning up their headquarters. After all it is much more pleasant to live in a room that has clean, bright and attractive walls inside and out than it is in a place whose interior and exterior are dingy.

I am sure that where an agent would like to try his hand at making his own headquarters more attractive in this and similar ways, he could get necessary material and authority from his supervising officers.

I have one station blackboard or bulletin board in mind where, it seems to me, the phrase "All Trains Are On Time Except As Otherwise Noted" sprawled across the board unevenly, has not been rewritten and the board cleaned off with a damp cloth and made to look fresh for months. It isn't because we don't care but because we get into the careless habit of looking at these things over and over again without thinking how much better they could be made to appear.

We have all been wishing each other a Happy New Year. The man who is interested in his work is pre-eminently the happy man and one could wish all our employes no greater happiness than to wish that all of them get interested in their work. Try it and see how the time flies and how when the "whistle blows" there is a real satisfied feeling over a day's work well done.

### Government Ownership

Premier Mussolini of Italy is a reformed socialist. His stand on government ownership therefore is of special interest. He is quoted as saying. "We are done with government railways, government employment agencies, government insurance. We leave to the state its police powers, to protect honest citizens from robbers and criminals; we leave it to the control of the schools, to train our coming generations; we leave it the army, to protect the territories of the fatherland inviolate, and we leave it the control of foreign policy."

—Illinois Central Magazine

# Homilies of the Hudson

## Thrift

A German butcher, or better, an American butcher of German birth, lives in a Long Island town and owns meat shops in seven other towns, besides much other property. He says that when he landed in New York five and thirty years ago, a young man with a wife and two bundles of possessions, he had just one German mark, silver, in his purse. He also had the address of a relative living in Harlem, 'way uptown, and instructions how to transport himself there from the immigrant station by street car, via two-horse belt-line.

He boarded the car with his etceteras, per instructions, and acting upon the invitation of the fare collector's upturned palm, dropped his fortune, the reichsmark, into it. He knew the exchange value of the coin and when the conductor-driver, after critically appraising the token, offered him a small dime in 'change, he felt that he was being imposed upon and, protesting that he was no greenhorn, demanded his mark back. He got it, got out and tramped with his frau and baggage the six miles to his destination, where he arrived six hours later, footsore but happy for having established a principle to which he has adhered ever since. It has enabled him to "arrive" where he stands now, solid as the rock of Gibraltar.

However, considering the relative value of sole leather and the German mark today, the feat does not appear in the light of a sound business proposition.

## Girls and Boys

Watching little boys at play—not parlor games in party suits, "saying pieces" and putting the best foot forward, but the unsupervised, free play in the backyard, gutter or open lot—you will recognize types of character with which you are familiar. Perhaps you will recognize yourself. You will see the natural leader and organizer, with a loyal following: he may be only a little bit of a chap but what he says goes; he is recognized and accepted. And you will note the "poor sport," who gets surly and won't play at all because things do not run in his favor; and the cheat who can't play fair; and the sloth, and the poor, handicapped dullard; and the "cry-baby;" in fact, all the types that you meet in your daily intercourse with the grown-ups.

But the grown-ups do not play any exhibition games; with years has come experience that teaches caution, and convention that demands adherence to its rules, that makes the world a stage and men and women masqueraders. Yet character cannot be completely disguised; the true will penetrate the false through chinks and cracks, inadvertently left unprotected. And watching these children at play, and remembering that the "boy is the father of the man," you can make a safe bet as to what sort of a man this boy or that will grow into.

With little girls it is different. Eve's daughters all, there is something that they imbibe with their first milk that makes them artful, yet altogether charming; they are artificial from the cradle up. To illustrate:

There is a little, blonde-curl'd four-year-old, answering to the name of Barbara, who lives "downstairs" and comes "upstairs" to visit me now and then. She introduced herself to us very promptly after we had moved into her "upstairs." After getting the first formalities

disposed of and done with she confided to me that "the gentleman who lived upstairs before" used to give her a cracker when she called on him. Fortunately I was in a position to do likewise. Next she was sitting on my knee, and looking at me from the corner of her eye, she announced that she would proceed to "wamp" me. She did; she succeeded. Another case of *veni, vidi, vici*; I, the victim, her slave forever.

Now, going back to the boys: Under the same circumstances a boy would have begun with "Hello, give me a cracker;" and followed up with "give me another one—got some jam?" after which he would have left with a promise to call again. I knew a boy, a long time back, who was "visiting" and, being asked by the kind hostess whether he preferred pie or cake, answered straight as he felt, "first the one and then the other."

## Luck

Many successful men modestly admit that there is no such thing as luck. The failures will all join in declaiming that success is all due to luck. They are wrong, both, because the first desire to convey the impression that luck had nothing to do in their case, that their success was all due to their own unaided genius and effort, "inspiration and perspiration," as Edison defines it. Of course this *might* be true, and again it might not.

But for the others, who for any one or more of a hundred reasons have made a fiasco of what they have undertaken with a good will and high expectations, to blame luck and accuse it of partiality, is only stupid. The French have a saying, "*s'excuse, s'accuse*," meaning that excusing yourself you are accusing yourself; which analysis will prove to be about right.

Luck, chance, fortune—whatever you will call it—is a result of some Law of Physics. If you cast a die under exactly the same conditions of force and motion, the same face of the die will turn up, always. The trouble is that you cannot compute the forces in a haphazard throw so nicely as to control them. On the same principle, all things being equal at the start, one man may succeed and another fail because the force that governs their actions, their judgment, is applied differently. In the ordinary sense luck is accident. Discount luck and tackle your problems according to Edison's formula. Then you may jeer at luck.

Fate is a fiddler, life is a dance;  
Over all is heaven's expanse;  
Gold exists among the shale;"  
DIG!

## Toledo Division Auxiliary Doing Splendid Work

By Mrs. O. L. Wallburg, President of the Toledo Chapter, and Secretary of the Grand Lodge

*Note:*

*We are glad to publish herewith Mrs. Wallburg's summary of what has been done by the Toledo Division Veterans during the past year, particularly because we feel that it contains suggestions that may be of interest to the members of other Veteran chapters.—Ed.*

TO attempt to tell of the good that is being done by the Ladies' Auxiliary of the Toledo Division would be almost impossible, for there are so many little things and so many little ways that have helped to accomplish much good for the members and for the body as a whole.

We cannot fully comprehend just how much it has meant to us, and to the Veterans as well, to have become a part of the Grand Lodge. It was a step forward, and in the right direction. During the past year the officers of the sub-divisions have given the Grand Lodge fine support and cooperation.

We cannot side-step the unfavorable conditions which handicapped our progress for a time, but the fine thing about it is that even while we felt ourselves powerless to wipe out this condition, there was a deep feeling of sorrow and regret in our hearts. And who knows but that some day all of the things that transpired will be made clear and that there will be a just reward for him who tried, by word or deed, to straighten out the tangle?

It has done our hearts good to realize the interest that has been manifested by the members of both the Veterans' Association and the Auxiliary in getting together on regular schedule again. The Ladies are usually one step ahead in such matters, but in this case the men were also ready and willing to do their share toward the success of the organizations and to cement the friendly feeling between the officers and employes.

We feel that the Veterans' organization will mean much more to the men as time goes on.

On October 18 we had a great social time together. The feature that made the

party particularly enjoyable was the fact that the men made all of the arrangements, rented the hall, purchased the necessary foodstuffs, served the dinner and washed the dishes. The ladies had to admit that the whole thing was handled remarkably well, despite the rumors which followed to the effect that the ladies went to the hall on the next day and re-washed the dishes. Of course, there were a few mistakes, as for example, whenever Secretary Wallburg laid down his sandwich and coffee, both disappeared miraculously. There was also some small talk about Brother John Shnable eating someone else's sandwiches and coffee. It is also reported that "Shorty" Sweeney should have done some things that he did not do; however, in spite of it all, we had a jolly good time.

On November 15 there was another social, but on this occasion the ladies entertained and they always do the job in a handsome manner. After the supper dishes had been cleared away an entertainment was provided by Misses Alice and Ruth Pratt, Dorothy Day, and the Brewer girls. After this the men decided in favor of a guessing contest. The committee, consisting of Brothers John Schnable, Martin Dibling, and Lorenzo Davis, presented a bottle filled with beans and notified all concerned that the one who guessed nearest the correct number would receive a prize of one dollar, the second best, a half-dollar. Mrs. Overholtz guessed nearest and Mrs. Tolby next. Mrs. Tolby turned her prize back into the treasury of the Leahay Auxiliary.

We have great plans for the next few months. It has been suggested that the annual re-union be a joint affair with the

Cincinnati Terminal and the Ohio Division. If this cannot be worked out, we shall hold the re-union in Lima this year instead of at Dayton, as we did last March. In either case, we want all of the veterans and their families to get ready for it and to be there. You never know what you have missed until you have attended. Begin figuring on it now, and figure on taking sufficient time off for it. Make it a great day this year for yourself and for your family. Here you will find "Bill" Jones and his wife, "Tom" Smith and the Missus, and Henry Williams and his family—all of whom you haven't seen for years, and all of the other folks you haven't seen since your courtin' days.

Then, when you get back on your job, everything will seem brighter because of renewed friendships. The spark of youth will be aflame in your breast and you will have a deeper feeling for the brother who works by your side; you will feel a deeper sense of loyalty to the man who sponsored our organization and made it possible for us to get out of life that which the Veterans' Association has brought to us—the man who stood out so big and whole-hearted during the trying times of our past year, our President Willard! God bless him!

## Baltimore Veterans Elect Officers for 1923

By C. R. Weir, Recording Secretary

THE regular meeting of the Baltimore Division Veterans was held at Moose Hall, Monday night, December 4. The election of officers for 1923 brought a large and enthusiastic crowd, the hall being filled to capacity. All regular business was set aside until election was over. The tellers went to work immediately to count the ballots, but were unable to report the returns until after one A. M., due to much splitting of the ticket.

In the meantime the members adjourned to the Banquet Hall where a good vaudeville show, smoking, dancing and ice cream were enjoyed. A number of "game" members stayed to hear of their defeat or election. The new officers for 1923 are—

C. W. Allen, President  
R. L. Collingsworth, Vice President  
C. B. Snapp, Treasurer  
C. R. Weir, Recording Secretary  
W. H. Harrigan, Financial Secretary  
J. W. Hall, Sergeant at Arms

Board of Directors: Central Building—Wilson Auld, Chas. R. Purdy; Mt. Clare—Louis Beaumont, J. D. Riley; Riverside—E. L. Bell; Camden Station—Robert F. Burnett; Locust Point—E. B. Cox; Curtis Bay—E. E. Brewer; Line of Road—Geo. Sommers, John Robosson; Washington Terminal—J. T. Mathews.  
Delegate to Grand Body—J. O. F. Covell;  
Alternate Delegate—G. A. Bowers;  
Chairman Entertainment Committee—M. V. Pascall.

# Newark Division Veterans Hold Annual Ball and Election of Officers

By J. M. Garvey, Grand Vice-President

ON Tuesday, December 5, the Veterans of the Newark Division and the members of the Ladies' Auxiliary held their annual ball at the Masonic Temple. Tempting refreshments added to the pleasure of the evening. It was one of the most successful affairs of its kind ever held. The picture of the Veterans and their wives enjoying themselves to their hearts' content was something long to be remembered. F. M. Howard was chairman of the Floor Committee and he filled this position to the great satisfaction of all concerned. There were visitors from Baltimore, Willard and Columbus.

On December 7 the Veterans and the members of the Ladies' Auxiliary met in regular session at the B. of L. E. Hall. There were 79 members of the Auxiliary and 68 Veterans present. After the transaction of the routine business was finished, the election of officers for the ensuing year took place. The results of the election were as follows: President, D. H. Moriarity;

vice president, F. M. Howard; secretary and treasurer, E. E. E. Moore.

After the meeting a buffet luncheon was served and speecmaking was in order. Several Veterans told of the old times in railroading. Brother Murphy, the Veteran heavyweight (only 375 pounds) related some of the funny events in his life. Then the Ladies' Auxiliary, through its efficient president, Mrs. F. M. Howard, called on Mrs. D. H. Moriarity to come to the platform. Mrs. J. M. Garvey, grand vice president, then, on behalf of the Newark Division Veterans and their wives, presented to Mrs. Moriarity a handsome mahogany rocking chair as a birthday gift. Mrs. Moriarity was surprised beyond measure, yet she managed to respond gracefully.

Dancing was then enjoyed and at its close everybody went home, tired but happy, in the remembrance of this most pleasant evening.

# Greetings from the C. W. Galloway Ladies Auxiliary No. 1 of Baltimore Division Chapter

By Mrs. Charles W. Lewis, President

THE C. W. Galloway Chapter of the Ladies Auxiliary No. 1 of the Baltimore Division of the Veteran Employes Association of the Baltimore and Ohio Railroad, held its regular monthly meeting on December 20 in the Assembly Room on the fifth floor of the Baltimore and Ohio Building. There was a large attendance.

Vice President Galloway was the speaker of the occasion and delivered a splendid address. He spoke of the financial condition of our Railroad, and made a plea for a study of the situation so that with an intelligent understanding a logical decision may be given on not only Railroad affairs, but on things pertaining to our country in general. We all thoroughly enjoyed the address and were benefitted by it.

After the regular business of the auxiliary was over, the holiday spirit prevailed with the usual exchange of good wishes and gifts.

Each one present was given a Christmas candy cane with the wish of a Merry Christmas.

We extend a most hearty welcome for Veterans' wives to join us, feeling that they will enjoy our meetings. The same hearty welcome is extended to the Grand Lodge

officers and officers of the various chapters to attend our meetings. Judge Moses was to be the speaker at our January 17 meeting.

We wish you all a most happy and prosperous New Year.

The officers for the ensuing year are: Mrs. Chas. W. Lewis, President; Mrs. W. T. Wall, Vice President; Mrs. G. T. Mac-Millen, Secretary; Mrs. W. T. Holmes, Treasurer; Mrs. Wm. McKee, Marshall; Mrs. W. Espey, Outer Guard; Mrs. Geo. Sturmer, Chaplain.

# Ladies Auxiliary to Baltimore Division Chapter Elects Officers

THE Ladies Auxiliary to the Baltimore & Ohio veterans, Baltimore Division, held their regular business meeting and election of officers on December 13, at Morning Star Hall, 1104 W. Baltimore St.

The following officers were elected for the year 1923. President, Mrs. Sarah Shipley; Vice President, Mrs. Elizabeth Williams; Rec. Secretary, Mrs. Belle Bowers; Financial Sec'y, Mrs. Annie Riley; Treasurer, Mrs. Effic M. Galloway; Sergeant-at-Arms, Mrs. Gertrude Wirth; Chaplain, Mrs. Marie Collinsworth; Chairman Entertainment Committee, Mrs. Georgia Covell.

# Flour in Barrels! But this was in 1867

By P. B. Phinney  
Agent, Grafton, W. Va.

THE accompanying photograph is of an old freight receipt, dated April 12, 1867. Note that the charges at that time on a shipment of five barrels of flour from Wheeling to Grafton were \$3.40. The rate applying to a similar shipment at present is \$2.05 per hundredweight, or \$2.05 for the shipment.

The flour in question was probably put up in wooden barrels and was handled from point of origin to destination and delivered to consignee without damage and without claim. At present such a shipment might be put up in frail paper sacks, which it is extremely difficult to handle even once without some damage. I doubt if there have been five tons of flour handled on the entire System in less carload freight service during the past five years that have been put up in wooden barrels.

The descendants of the principal persons mentioned in the document still follow in the same line of business as their forebears. Charles Brinkman, son of George Brinkman, still conducts a mercantile establishment in this town, while C. A. Adair, grandnephew of John Adair, who signed this receipt, is and has been for a number of years the efficient assistant general car foreman at this terminal.

All CLAIMS for allowances, damages, &c., &c., upon property embraced in this Bill, to be made within 35 hours after delivery of the Goods, as the Company cannot allow subsequent claims.

Grafton April 12th 1867.

M. George Brinkman

## The Death of W. Ray Smith

**W**RAY SMITH, for many years train dispatcher, Winchester, Va., and Brunswick, Md., died suddenly at his post of duty at Brunswick on the morning of December 17.

Mr. Smith, who was president of the local chapter of Baltimore and Ohio Veterans, was popular among his fellows and was well liked by everyone. His character as a true blue railroad man lives in the minds of his many friends as an everlasting monument.

Mr. Smith was born 56 years ago at Winchester, Va. He was one of three brothers who spent their lives in the service of the Baltimore and Ohio and the last survivor of the three. He entered the service on April 1, 1883, as messenger at Winchester, Va., Shenandoah Division. The following year he was made night operator; two years later, day operator; in 1887, relief agent; in 1893, night dispatcher; in 1910, dispatcher; in 1914, chief dispatcher; in 1915, agent-operator, Staunton, Va. In 1918 he became chief dispatcher, Brunswick, Md. This position he held until the time of his death.

Mr. Smith had an exceptionally good record as operator and train dispatcher. Recently he had suffered several heart attacks, and a few days prior to his death he made a trip to Washington to consult a physician there. He returned feeling much benefited, but when he went back to work on Sunday morning, he fell dead at his desk. His body was removed to his home on Second Street, Brunswick, where the funeral was held on the following Tuesday. The services were conducted by Rev. Charles W. Hess, assisted by Rev. Burgess and Rev. Farley. The burial took place at Winchester. The service was in charge of Hiram Lodge of Masons, of which Mr. Smith was past master. A

## Annual Grand Lodge Meeting

January 26 and 27

The Grand Lodge of the Baltimore and Ohio Veterans will hold its annual meeting in the Assembly Room of the Baltimore and Ohio Central Building, Baltimore, Md., on Friday and Saturday, January 26 and 27. The Grand Lodge of the Ladies' Auxiliary will convene at the same time on the 12th floor of the Building.

President Willard and Vice President Galloway have promised to be present to address both bodies.

Knights Templar escort attended, six of whose members served as pall bearers.

Among the many tributes paid Mr. Smith, comes one from Conductor R. L. Much, correspondent for the MAGAZINE. Mr. Much says in part:

"Several days before his death, Brother Smith met me on the street and asked me to call at his home and take a picture of his radio outfit, of which he was very proud. I made arrangements to do this on Monday, when, to my surprise, I learned of his sudden death.

"Mr. Smith was a faithful and conscientious employe, loved by everyone. He always had a good word and a bright smile for everyone. I am deeply grieved at his death, and I feel sure that the Baltimore and Ohio has lost a valuable man, a real Baltimore and Ohio man, through and through."

Mr. Smith was a past master of Winchester Hiram Lodge of Masons, a past high priest of John Dove Chapter Royal Arch Masons, and a past deputy grand master for the Winchester district. He was also actively identified with Winchester Commandery of Knights Templar, and Acca Temple Nobles of the Mystic Shrine, of Richmond.

He is survived by his widow, two sons and two daughters. Albert, of Brunswick, Md.; Walter, of Washington, and Misses Vernie and Laura Smith, both of Brunswick.

## Veterans Reorganize at Akron

By J. A. Jackson  
MAGAZINE Correspondent

**A**N enthusiastic meeting of our Veterans, comprising the old New Castle and Cleveland Division members, was held in the Division Offices, Akron, Ohio, on December 3. A reorganization was effected, to be known as the Akron Division Veterans' Association.

Grand Vice President Garvey was present and made an interesting address, touching on the good work accomplished by the Veterans in their recent campaign for more business, and the good fellowship

that exists among the Akron Division Members. Superintendent D. F. Stevens also made an address on the need of greater initiative among the members, and the Baltimore and Ohio family in general, with the ultimate aim of stimulating all the numerous phases which go to make up successful operation.

The election of officers was held. The results follow: President, W. D. Reed; vice president, J. R. Niederheiser; secretary and treasurer, J. K. Jolly; sergeant at arms, G. H. Hammer; Chaplain, Mr. Baker; S. H. Rhoads, chairman of the Membership Committee; James Aiken, of the Entertainment Committee, and C. P. Angell, M. Demsey, and A. D. Griffith of the Executive Committee. J. R. Niederheiser was elected to represent the Veterans at the Grand Lodge Convention to be held in Baltimore, Md.

## Pittsburgh Auxiliary Elects Officers

By a Member

**A** GOOD attendance made an interesting meeting of Daniel Willard Auxiliary No. 5 of the Veteran Employes' Association, Pittsburgh Division, on Tuesday, December 6. The meeting was held in the I. O. O. F. Hall at Hazelwood, Pa.

After the regular routine of business, we held our annual election of officers for the ensuing year. The following officers were elected: president, Mrs. Frank Applebee; vice president, Mrs. Jasper Miller; secretary, Mrs. H. E. Evans; treasurer, Mrs. Robert Hill; chaplain, Mrs. George Peters; marshal, Mrs. John McMunn; outer guard, Mrs. Milard C. O'Roke; delegate, Mrs. Frank Applebee; alternate, Mrs. Robert Hill; pianist, Mrs. Jacob Klaus.

## Agent Colbert at Lima and His Chief Clerk

AMERICAN PETROLEUM PRODUCTS COMPANY  
CLEVELAND, OHIO

December 11, 1922

Mr. J. C. Kimes, A. G. F. A.  
Baltimore and Ohio Railroad  
Cleveland, Ohio

Dear Sir:

Will you kindly extend to your Agent at Lima and his Chief Clerk, the appreciation of the American Petroleum Products Company for the courtesies extended to our Mr. Powell on his visit to Lima on December 7, as the help given by your people was of untold value to him at that time.

Very truly yours,  
AMERICAN PETROLEUM PRODUCTS COMPANY  
(Signed) E. C. Polak

Traffic Department  
Manager

The late W. Ray Smith, a beloved and useful Veteran

**STOP THAT LEAK!**

# Cherry Blossoms and the President's Smile Made Faces Brighter, Footsteps Lighter and Handclasps Tighter at the Wheeling Ball

**N**EVER was there such a night on the Wheeling Division! Not particularly was it because the snow snowed, the rain rained and the wind howled 'round the corners—all these things happened without any effect on the number of those who came to enjoy the evening. And it was not because it was a ball given by the Wheeling Division employes, for this was the sixth of its kind in so many years, but somehow there seemed to be a greater supply of the spirit of good fellowship than had ever been manifested at a similar gathering. Why? Let us ask the two little girls with bobbed hair and fur-topped boots.

"What makes everybody seem so happy tonight?"

"I think," replies one, "that it must be the lovely cherry blossoms suspended from the ceiling; they make me think of Japan, where everything is beautiful."

"And I," declares the other, "think that it must be because President Willard came to visit us tonight. See—when he smiles everybody wants to smile."

And we who looked on decided that both little girls were just right.

The sixth annual ball given by the employes of the Wheeling Division was held in the Convention Hall at Wheeling. The decorations carried out the poster scheme of "A Night in Japan." Suspended from the ceiling were great sprays of Japanese cherry blossoms and the whole idea of things, including the pink orangeade

Many an old timer learned the gentle art of fox-trotting under the efficient leadership of a flapper instructor

which was served so generously, seemed to bear out the suggestion of things "Japanesey."

The program, an elaborate reproduction of a genuine blue folder timetable, designed by Lew E. Foster, veteran wire chief at Wheeling, informed us ahead of time of the splendid entertainment which we were to expect.

Immediately at 8.30 the dancing began, for with good music on hand and the smoothest dancing floor imaginable, young folks must dance, and dance they did. Everybody was young, for age did not count. Among the bobbed heads here and there appeared a gray head, then another and another, and a number of old timers learned the gentle art of fox-trotting under the efficient leadership of a flapper-instructor. Mayor Thomas Thoner, of Wheeling, one of the guests of honor, came in, looked on and enjoyed it all.

J. M. Scott, General Freight Agent H. H. Marsh, Trainmaster J. W. Root, Ohio River Sub-Division, and General Agent U. B. Williams. Superintendent Pittsburgh Division J. D. Beltz and Division Engineer H. H. Harsh arrived later.

A short opening address was given by John Michael Garvey, chairman of the General Committee and grand vice president of the Veterans' Association, in which he introduced the mayor of Wheeling, Thomas Thoner. Mayor Thoner welcomed the railroad officers and other out of town visitors to Wheeling and presented to them the key to the city. President Willard was then introduced.

"I appreciate very much," said Mr. Willard, "my fellow associates, men and women of the Baltimore and Ohio, this opportunity of being with you, to meet some of you and to see all of you having a good time.

"I know very well that with all of these pretty girls, pretty women, and young men that you are more anxious to dance than to hear an old timer like me talk; therefore, I shall cut this short.

"I hope that you will have a pleasant evening. I suppose that lots of you have had a certain sort of curiosity to see what I look like; certainly I had a curiosity to know how you looked. I hope that you are as well satisfied with my appearance as I am with yours.

"I am very glad to be with you."

Following President Willard came Governor Cornwell, who, in speaking to the people of West Virginia, addressed many of his friends. Mr. Cornwell said:

"Fellow Employes, Ladies and Gentlemen: I am very much impressed because,

General Superintendent Scott, he of the genial smile and glossy dome, could not keep his envious eyes off the glorious thatch which crowns the Railroad's —"than whom there is none such silver tongued orator." W. W. Wood, chief of Welfare.

A quarter of an hour later all eyes were turned toward the doorways, for there entered before the eyes of all, one whom they long had hoped to have as a visitor, but who they believed to be too busy to take the time to drop in. Here he was at last—President Willard! It was a surprise indeed. The newspapers had heralded his coming, their announcement came true, and, as the little girl said, "when he smiled, everybody smiled." With Mr. Willard were General Manager Eastern Lines E. W. Scheer, our chief counsel, John J. Cornwell, former governor of West Virginia, Chief of Welfare W. W. Wood; Superintendent Wheeling Division C. B. Gorsuch; General Superintendent Wheeling District

President Willard pleased everybody with his presence, his smile and his short talk. He delighted the two young ladies whom he asked for the pleasure of—the first, a two-step; the second, a waltz

like many of you, I am now an employe of the Baltimore and Ohio Railroad. I am at present its general counsel. Mr. Willard has said to you that he hopes you are as well satisfied with his appearance as he is with yours; I want to say to you that he has just said to me that this is certainly a splendid appearing audience of young people; therefore, he has said to you publicly no more than he has said in private.

"I want to say to you that I am very happy and proud to be connected with an organization with such a representative and which employs men of the type that are here tonight. I have no speech to make except to say to you that I feel sure that you are going to have a good time. I bid you good night."

#### And the Veterans Were There

While this was a welfare party and not strictly one in which the Veterans had an inning, there were many of the old-timers

"Governor" Cornwell, the most popular chief executive that West Virginia ever had, begged his legion of friends to remember that he had a new love, the Railroad

present, all of whom talked over the bygone days with such emphasis that occasionally a younger couple fox-trotting by, hesitated a moment to catch bits of the interesting conversation.

W. H. Johnson, retired engineer, with a service record of 49 years with the Baltimore and Ohio, told us emphatically that he is *just a boy in his eighty-first year*. Mr. Johnson lives in Shepherdstown.

Two other interesting characters of this class were Section Foremen T. Burke and William Ferguson. Mr. Burke is stationed at Roseby's Rock. He has a 42-year service record and is still going strong. Mr. Ferguson, who is at Glen Easton, has 55 years of service. There was a friendly struggle between the two as to which deserved the more this year's prize for the best kept section on the division. The officers had not been able to decide, so the foremen settled the matter between them.

"William got it once before," said Burke, laying his hand on the other's shoulder.

"Yes," replied General Superintendent Scott, who happened to be standing nearby, "and Mr. Willard came over the winning section this afternoon. He said it was a mighty fine piece of track."

Smiles passed over the faces of the two old comrades. They slapped each other and pinched each other with a manner that said, "We're both going to try for it again next year," and smiling at William's 50-year button they passed on.

"Engineer J. Gatewood, former road foreman, was the one who handled the engine which pulled the officers' special over from Fairmont this evening," said Division Engineer Woerner, taking that gentleman by the arm.

"Did you hear anything about my losing my job on account of too much black smoke?" asked Mr. Gatewood.

"Not much," declared Mr. Woerner, "nobody saw any black smoke coming from that engine today."

"Ha, ha!" laughed the engineer. "By the way, I'm getting old in the service, too. I came into the service of the Baltimore and Ohio in 1893."

"Oh," declared a fellow employe, "you're young yet."

"Yes, and I'm just as young as I look, particularly when I get among the ladies."

"Will you have the next waltz with me?" asked a certain Old Veteran of a smiling young lady.

"Oh," quoth the damsel, "but your wife may object."

"Object nothing!" declared the O. V., "I just gave a friend of mine a dollar to dance this waltz with the old lady herself. Come along!" She came.

John Michael Garvey and the "Missus" started getting ready for the party at 7.00 a. m. John Michael was "all dolled up" in his Sunday clothes and carried off the part of master of ceremonies famously.

Among other Veterans present were Mr. Bell, from Willard, Ohio; J. E. Mc-

Grand Vice President of the Veterans J. M. Garvey was a worthy general chairman of the Ball Committee, and a famous host!

Graw, from Parkersburg, who has been operator for the Baltimore and Ohio for 38 years; Inspector of Bridges J. O. Potts; "Daddy" Ballinger; Claim Agent M. C. Smith; Engineer Cummings; Track Supervisor W. D. Lucas; Harry Fleming, of Fairmont; Engineer and Mrs. F.M. Manard, Newark, O; the Flemmings and Fletchers from Fairmont.

#### Seen and Heard from the Gallery

Frank Ackerman wanted to be in keeping with the occasion and wear a Japanese kimono to the ball. It took lots of persuasion on the part of Carl Miller to change Frank's mind.

Lew Foster carried a wallet that looked like a washerwoman's clothespin bag—but he needed it for the \$500 that was taken in at the door.

J. M. Scott (gazing upon a photograph of W. W. Wood): "Dear me, if I had half of what that fellow has on the top of his head, we'd both have enough hair. Oh, well, when you get old, you know, er-er-

The "G. M." Mr. Scheer, could not get his mind off our trains. Even when President Willard urged him to dance he feigned important preoccupation by a minute examination of his timepiece

"First and Last Moments"

Drawn by R. S. Main, operator, Strasburg Junction

by the way, what do you call it that these people are dancing? As nearly as I can see it, they turn on the music and everybody just trots along, or shuffles, or hops and skips as he pleases. Guess I could dance, if I tried."

Miss Stenographer (who writes up the stationery requisitions): "Docs Mr. Blanchard, himself, fill the requisitions personally?"

Reply: "Why, of course; he does all the packing and tying up packages, too. Some system, eh? Wouldn't you like to go down and help him out?"

Marie: "Oh, heavens! Don't bring on any more officials. I've met so many tonight I shan't be able to get my head inside of the door when I get home."

Sonnefeld went out, got a shave and a haircut, a mud bath and massage, then came back and said: "Don't let anybody write me up in the MAGAZINE."

"Pray don't introduce me to any more officers of the Railroad; my head will be so swelled up I won't be able to get inside of my mother's door tonight."

Mayor Thoner wanted to know why they called a certain old lady "Aunt;" did she have a glass eye and wear false hair? He found out.

Girl from Wheeling Office: "Say; you're from Baltimore, aren't you? Please tell me how old Mr. Curren is."

"Oh, there's Dr. Charlton, our medical examiner. Isn't he just handsomer than ever!"

### The President Dances

With all the responsibilities of the business of the great Baltimore and Ohio Railroad on his mind, the Wheeling folk were deeply grateful to Mr. Willard for spending the greater part of the evening with them and for his greeting, but nobody thought of his dancing. Yet when the time came, our president was not lacking. With the step of a youngster he suddenly appeared on the floor with the associate editor of the MAGAZINE, and to the surprise and delight of the onlookers, glided through an old fashioned two-step. Wheeling, too, came in for its honors when the next waltz found the president tripping the light fantastic with Miss Marie Slatterick, secretary to the division engineer. Certainly it is true that there were two girls who spent a deliriously happy evening! They had danced with President Willard!

The number of those present was estimated at 2,000 or more, about 90 per cent. of whom were employes or the members of employes' families. To accommodate all these, three special trains were run to Wheeling, from Parkersburg, Fairmont and Holloway, respectively.

The cabaret numbers featured on the entertainment card were excellent. Bert Marshall, in character and comedy songs, was particularly good, while the dancing of Miss Cheriette Poeriette was excellent. Miss Clare Poeriette, Mr. Douglas Fleming, and Mr. Lloyd Kinner also were delightful in songs and entertainment. Mr. Fleming is the son of Engineer and Mrs. Harry Fleming of Fairmont, and the Wheeling folk heartily enjoyed and appreciated his entertainment.

Music by the Musical Imps added to the excellence of the dancing, which lasted until 1 o'clock in the morning.

The committees in charge of arrangements for the frolic were as follows:

General committee—J. M. Garvey, A. J. Sonnefeld, L. W. Wetzell.

Committee on arrangements—L. E. Foster, Frank C. Ackerman, Dr. W. V. Charlton, Al Gatewood, George Ballinger, W. L. Detwiler, A. M. Six, W. H. Oliver, O. B. Craft, G. W. Johnson, George Oakes.

Floor committee—J. J. Donovan, G. R. Fitzgerald, J. R. Padden, L. K. Reynolds, R. P. Nolan, G. E. Riley, S. C. Williams, E. J. Davis, C. J. Lauders, H. B. Beck, J. F. Whalen, F. A. Ballinger, H. D. Campbell.

Ohio River Sub-division—J. P. Duval, J. A. Laync, R. L. Orahoad, R. H. Beckwith, L. J. Murphy, S. M. Core, B. F. Butcher, J. E. McGraw, E. L. Peters, Miss M. M. Moore, Miss Mary Keeman and S. S. Johnson.

### Appreciates Prompt Handling

THE CONTINENTAL SUPPLY CO.

St. Louis, October 12, 1922

MR. EDWARD HART, JR., G. F. A.,  
Baltimore & Ohio R. R.,  
St. Louis, Mo.

PERSONAL

Dear Sir:

My records indicate that during the month of September, \* carloads of our business moved via your line. I am glad to be able to tell you that even in the face of existing conditions, the handling given our business was satisfactory, and even though record keeping was more or less demoralized, we were able to keep in touch, in a satisfactory way, with movement.

Let us all hope that ere another month or six weeks pass, conditions will be so near normal that everybody will be happy.

Yours very truly,

THE CONTINENTAL SUPPLY COMPANY

(Signed) T. L. MORIARITY

Traffic Manager

\* Number of carloads deleted for obvious reasons

## Our President's New Year's Greeting

To All Officers and Employes of the Baltimore and Ohio Company

My best wishes to all officers and employes of the Baltimore and Ohio Company for a Happy and Prosperous New Year.

I earnestly request the cooperation of all in the service, from the lowest in rank to the highest, in an effort to make the New Year a prosperous one for the Baltimore and Ohio Company also. I am certain we can make it so if we all pull together.

*Samuel Willard*

January 1, 1923

**Note:**

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. ("obs."). Obsolete words will be marked at the end of the definition thus—("obs."). Variant spellings of a word must be marked at the end of the definition thus—("var"). Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

ANSWERS to the puzzles published in the October issue are:

1. Form-from

2. B

The prize of one year's subscription to the Enigma is awarded to Wick-o-cincy, (Joseph H. Wickham, Dining Car Dept., Cincinnati, Ohio) who furnished the first complete list of answers and in addition submitted some fine contributions.

**New Puzzles**

1. CHARADE (5)

Ere you COMPLETE to solve this rhyme  
I PRIME of you to scan it well,  
I'm sure you'll find a clue LAST time  
So now commence, no more I'll tell.  
Brooklyn, N. Y. Gemini

2. PENTAGON

(Defined by New International Dictionary)

1—A letter,  
2—Master (obs. or Dial. Eng.),  
3—An Island in the Mediterranean,  
4—A fair and worthy lady in Shakespeare's "Measure for Measure,"  
5—A Turkish sailor,  
6—A small stone in or by a stream,  
7—A large skin boat (Alaska),  
8—Brassy (Rare),  
9—Geol. A narrow ridge of gravelly or sandy drift, deposited by a stream in association with glacier ice.  
Baltimore, Md. Comrade

3. MUTATION

O, I MOVE THE STILL COWS

That placidly browse  
Where engines whizz past.

My ear-piercing blast

The dead might arouse.

O, I MOVE THE STILL COWS!

St. Louis, Mo. Molemi

4. DIAMOND

(Defined by New International Dictionary)

1—A letter,

2—By,

Two prizes, each of six months subscription to the Enigma, the official organ of the National Puzzler's League, will be awarded for the two best lists of solutions to these puzzles.

To receive proper credit all lists of solutions must be in my hands by March 5; the answers and solvers list will be published in the April issue.

**Senior Vice President Shriver Offers Handsome Prize**

Readers of this department will be glad to hear that Senior Vice President George M. Shriver has offered a copy of the unabridged edition of the New Standard Dictionary as a prize to be awarded to the Baltimore and Ohio employe who, in the judgement of Mr. Pyror, shall have done the best all-around work for this department during the first six months of 1923. Announcement of the prize winner will be made in the September issue.

- 3—More mentally sound,
- 4—(Scots Law) Indicted,
- 5—Deserters from a cause,
- 6—Narrated,
- 7—Plans or schemes,
- 8—Dead (Obs.),
- 9—A letter.

El Paso, Tex. Osaple

**5. BEHEADMENT (4)**

Paddy worked hard at shoveling dirt, And the sweat had thoroughly soaked his shirt;

Then he began to FIRST and slowed up a bit

When it looked like the foreman would have a fit.

His SECOND was raised, so he said to Pat: "Phat the divil are ye lookin' at?"

Don't you know ye're not worth your pay If ye stop to loaf your time away?"

Cumberland, Md. P. M. P.

**6. RHOMBOID**

- Across:
- 1—Stupid,
  - 2—Relatives on the mother's side,
  - 3—Purloins,
  - 4—An East Indian herb,
  - 5—(Prov. Eng.) To stiffen,
  - 6—Expresses contempt by a sneer.

- Down:
- 1—A letter,
  - 2—In law, an action,
  - 3—Portions of cricket-fields on the batter's left,
  - 4—(Siam) Pagodas or temples,

- 1—A letter,
  - 2—To obstruct,
  - 3—Dating from one's birth,
  - 4—Serenades,
  - 5—Possible, but not actual,
  - 6—Essential requisites.

- Down:
- 1—A letter,
  - 2—The seventeenth letter of the Hebrew alphabet,
  - 3—A franchise or privilege,
  - 4—In old Greek music, the upper tone of the disjunct tetrachord,
  - 5—Challenges,
  - 6—Plates or shallow dishes,
  - 7—A devil-fish or gigantic ray,
  - 8—The resting place of a wild boar,
  - 9—A cebine monkey,
  - 10—A li,
  - 11—A letter.

Baltimore, Md. Red Crow

**11. TRANSPOSITION (5)**

(To Gem)

Who PRIME his way in shame and sin  
Till life has ebbed away,  
Shall hear no welcome "Enter in,"  
At close of Judgment Day.

So reads the Record: Be it so;  
Yct mercy claims a right  
To snatch from SECOND'S scorching glow  
The luckless, crring wight.

If trusting faint in doctrines past,  
The scentence he has heard,  
May mercy give to him at last  
A cool seat in the THIRD!

Lafayette, Ind. Towhead

**12. HEXAGON**

- 1—Greater,
- 2—The field camomile,
- 3—To come or go back,
- 4—The arch or ridge over the cye forming the upper edge of the orbit,
- 5—Errors or mistakes in writing or printing,

- 6—The whole sum or amount,
- 7—To perambulate.

Chicago, Ill. Mentor

**13. MUTATION**

Across the land on speeding train;  
Through tunnels, dark and long.  
The TOTAL, oft, you have SEEN REIGN  
With hands, on throttles, strong.  
Real kings, indeed, these faithful men  
Who, ev'ry night and day,  
Brave death, and at each danger grin,  
As they speed on their way.

Corinth, Miss. Fred Domino

**14. DIAMOND**

- (All New International Dictionary)
- 1—A letter,
  - 2—A flattish mass of anything soft or moist,
  - 3—Yielded,
  - 4—The head of a squad of ten soldiers,
  - 5—A nail-tailed wallaby,
  - 6—Profit,
  - 7—(Gr. Relig.) The festival with games celebrated every fourth year at Delos in honor of Apollo,
  - 8—Decay,
  - 9—A letter.

Mulkeytown, Ill. Todd

**15. HALF SQUARE**

- 1—A letter,
- 2—A New Zealand fortified village,
- 3—A small molded mass,
- 4—The top of the head,
- 5—A plate or shallow dish used in church,
- 6—Conspicuous,
- 7—An ecclesiastical letter of indulgence (Obs.),

(Continued on page 39)

**All Puzzlers—  
Please Note This Error!**

In printing Puzzle No. 1, anagram by Miss Olive W. Dennis, on page 30 of the December issue, the word "Company" was spelled out in full and should have been abbreviated "Co." It is most unfortunate that this beautiful piece of puzzling work, the first by Miss Dennis to be published in our Magazine, should have been spoiled by an error on our part, especially in view of the particularly nice compliment paid to Miss Dennis by Mr. Pryor and the natural greater interest thereby attached to the puzzle. We apologize not only to Miss Dennis and Mr. Pryor, but also to the puzzlers who have spent a good deal of time trying to solve the anagram, without avail, because of the left over letters "m, p, a, n, y."

We trust that those who have tried and failed will recast the puzzle with the "Co." instead of the "Company" and work out the beautiful and appropriate answer intended by the author.

# Women's Department

Edited by Margaret Talbott Stevens.

## Every Baltimore and Ohio Woman Has a Chance to Win One of These Lovely Prizes

**I**F you work for the Baltimore and Ohio, or if you are the wife, daughter, mother or sister of a Baltimore and Ohio employe, you have a chance to win one of the lovely prizes shown in the accompanying pictures.

In December, 1923 the MAGAZINE will award four prizes—a wrist watch and three handsome bar pins—to the four Baltimore and Ohio women who submit the most helpful article for the Women's Department during the year. There is no limit to the number of articles that any contestant may send in; if one article does not win a prize, another may. For example, you may send in an article in time for the March issue of the MAGAZINE, and then around June or July, you may think of something that you believe to be even better than the first one. Send in something every month, if you wish.

Such an article may simply take the form of a letter to the editor of the Women's Department, telling her how you solve some of your household problems, or giving some good recipes and telling why you consider them best adapted for the purposes for which you use them. A good story or a recipe will make a nice entry. Read the story of President Willard's doughnuts and you will see how a recipe may be made interesting. Or, turn back to some of the old issues of the MAGAZINE and you will find any number of recipes "with tales to them."

In the October and November issues there appeared in the Women's Department

two stories by Mrs. E. F. White, the one on "How to Make Good Coffee," the other, "How to Hold a Husband." In this number there appears a photograph and story by Mrs. Henry Routenberg, telling how she made her little girl's dress from one of the patterns shown in the MAGAZINE. In the August, 1922 issue there is a story of the first days at school for little people. All of these are good types of what might be termed "a helpful article." Indeed, anything that in any way may be interesting to women in general is a helpful article.

Girls in the offices who come in contact with so many people daily will be able to write of many things in connection with their work, their recreations, their hobbies, and even about their associates with whom they work; articles on business getting for the Railroad, stenography, filing, doing one's best work in an office, helpful hints on systematic handling of whatever work you may be doing. The article on voting, in the October issue, by Katye Coplan, is a good idea of a helpful article.

If you are poetically inclined, you may wish to "say it in rhyme," or, if you can draw or paint, "say it with a picture." Whatever your entry may be, pictures of

any kind to illustrate it will make it all the more interesting. Illustrated recipes or ways of doing things are especially helpful. For example, if you are telling how you make bread (and by the way, we need good bread-making recipes), get somebody to take a snapshot of you (or you take one of someone else) with the ingredients all ready to start. The next picture will show you mixing the ingredients or kneading the dough; the next, the bread being put into the oven, and the last, a plate of biscuits or a loaf of the freshly baked bread.

Do not think that you are expected to submit a wonderfully written article; a simple letter telling how to make or to do something or your ideas on some helpful subject is all that is necessary. Do not worry for fear your English may be poor or your spelling bad; the idea is the principal thing; your letter will be carefully edited and all mistakes corrected before it is printed. Let every girl or woman who is employed by the Baltimore and Ohio, and every wife, daughter, sister and mother of Baltimore and Ohio employes enter this little contest. Begin sending in your entries right away. You may send only one or a half-dozen or more. The sooner they reach the MAGAZINE office, the better. Do not wait until the last minute when so many will be coming in at once that it will delay the decision of the judges. The contest closes on October 31 and the names of the prize-winners will be announced in the December issue.

Send all contributions for the Women's Department to:  
Margaret Talbott Stevens, Associate Editor,  
Baltimore and Ohio Magazine,  
Mt. Royal Station,  
Baltimore, Maryland.

### The New Year Is Here

By Marie Lechner, Dorsey, Md.

The New Year is here,  
The snow flies fast,  
'Tis a splendid time  
For our sleds at last.

The trees are heavily  
Loaded down  
With icicles reaching  
Quite to the ground.

Swiftly we fly  
Down the long hill,  
Watch out, little girl,  
For a jolly, good spill.

These handsome prizes will be awarded to the women who send in the most helpful contributions before November, 1923

## Culinary Column

## President Willard's Favorite Doughnuts

WHAT more tempting delicacy can you name than nice, crisp, brown doughnuts, with white powdered sugar shaken over them? Remember how, when we were children, we stood up on our tip-toes and watched Mother as she dropped the yellow rings into the hot fat and lifted them out with the long, wooden fork? Then she put them into the colander or on a board to drain off any surplus fat and sprinkled on the powdered sugar. How we did beg for the hot ones! And sometimes she would drop in the little round circles that came out of the center, and these would puff themselves up into round, brown balls. These were what we used for our "party" with the dolls. "Them days" may be "gone forever," but the doughnuts still remain. Let us hope that they will never go out of fashion.

One day recently there came into the MAGAZINE office one of our colored pensioners, Frank Gonzales, whose picture appeared in the December issue. In recalling the events of the early days, Frank casually said,

"Yes, Miss, and I worked on President Willard's car."

"And did the president like any dish especially well?" we asked.

"Oh, yes, Miss, he had his favorite dishes," replied Frank, "and one I remember is *Doughnuts*."

"Doughnuts!"

"Yes, Miss, and we made them from a recipe which Mr. Willard's sister once gave me."

Of course, we asked him for the recipe right away, and he brought it to us a few days later. We sent it to President Willard, who agreed that this was his favorite. So now here it is for all of us to try out for ourselves.

1 cup sugar  
3 tablespoons melted butter  
1 1/2 cups sour milk  
1 teaspoon soda  
Pinch of salt  
1/2 teaspoon spice  
1 egg

Enough flour to make soft dough

Let dough stand for two hours to rise before cutting out to fry.

We should appreciate some good salad recipes from our women, also some good recipes for making various kinds of soups.

—Associate Editor

## Her Mother Says that Louise's Dress Was Easy to Make

HERE is a picture of Louise, the little daughter of Assistant Division Engineer Henry Routenberg, Baltimore Division, and her mamma. Louise is all ready to take a nice trip on the Baltimore and Ohio with her mother, her daddy, and her little brother Tommy.

The serviceable blue taffeta dress which Louise wears was made by her mother from pattern No. 4016, which is pictured here. Louise is a bit tall for her age, so her mother added the extra flounce at the bottom of the dress and the sleeves were made straight instead of puffed; otherwise, it is exactly like the pattern.

Mrs. Routenberg, who has had but little experience in sewing, tells us that she found the pattern simple and easy to handle. The trimming used is picoting and stitching in jade silk, with a two-tone ribbon of jade and dark blue ribbon for the waist. The picoting was done at Stewart's department store, Baltimore, at a cost of ten cents a yard. It decorates the sleeves and the bottoms of the flounces and does away with hems. All of the stitching is done by

hand. The little tucks were first put in with a running stitch in black sewing silk, then with a backward stitch in jade silk.

The pattern used was for an eight year size and, with the extra flounce, required three yards of material. It comes in sizes four, six, eight and ten years. Without the flounce the ten year size requires two and one half yards of material. The pattern may be had by filling in the regular pattern coupon and sending it with 12 cents in stamps to THE FASHION LADY, Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Maryland.

The Fashion Lady would like to get in touch with other Baltimore and Ohio girls and women who make their own clothes. Send her your names and she will be glad to send you a letter advising how you may get without cost the material for a pretty dress.

Alf: "Ard working woman, your wife, Bill."

Bill: "She is that; wish I 'ad a couple more like 'er."—*Passing Show*.

LOUISE AND HER NEW DRESS

Left: Mrs. Henry Routenberg, wife of assistant division engineer, Baltimore Division, and her little daughter, Louise. Upper right: the back of the dress. Lower right: the pattern from which the dress was made. This pattern comes in sizes 4, 6, 8, and 10 years, price 12 cents in stamps. Use the coupon when ordering

# What the Fashion Woman Told Me

By Peggy

**T**HE Fashion Woman, who designs the patterns for this page, lives in New York. She gets our fashion news from all over the world. She picks out the prettiest as well as the most practical frocks from this great array of fashions, adds a few touches here or drops a hem there, and designs just the nicest things for us to wear. She tries to find something for each one of us; she has frocks for the girl in the office, dainty aprons and house dresses for those who stay at home, sensible little dresses for school wear, pretty little knick-knacks for the baby, and even many practical suits for boys.

In her up-to-date fashion book (which may be purchased for 12 cents) are many color plates showing 500 designs for women's, misses' and children's patterns. There is also a helpful article on home dress-making, and the patterns themselves are so simple that the beginner need not hesitate about trying any of them. Some of these attractive patterns are shown on this page. These patterns are now only 12 cents each. Use the little coupon in ordering patterns, or, if you do not wish to clip your *MAGAZINE*, write all the necessary information on a separate piece of paper and enclose this, together with 12 cents for each pattern or fashion book ordered, and send to:

The Fashion Woman,  
Baltimore and Ohio Magazine,  
Mt. Royal Station, Baltimore, Maryland.

## Brads and Ornaments

For dress trimmings, the Fashion Woman says that just rows and rows of braid will be found everywhere. The braid need not be of the color of the dress, but it must harmonize with it. Black braid makes a nice finish for almost any color. We find soutache braid in wide borders on skirts and on bell sleeves. It also appears in close lines on the large bertha collars which are being worn so extensively, and on hip bands and belts.

Buckles, clasps, and large, fancy buckles as well as ornaments of every style find a place in decorating the otherwise plain dress. If you have any old jewelry or ear rings which you do not care to use, make them into ornaments to trim your dresses. A pretty wedding dress which I saw

form the bateau neck. Then, catch them at the lower corners and stitch upward, allowing plenty of space for armholes. The short sleeves are finished off with a wide fold of silk or satin to match the color of the handkerchiefs. A fold of the same material may be added to the lower edge; or, if you wish, fasten a little tassel of contrasting color to hang from each side of the blouse.

recently was simply made of white duchess satin, whose only ornament was a cluster of pearls which caught up the gown on the left side, just below the hip.

## New Uses for the Bandanna Handkerchief

I wonder if this fashion of wearing silk bandanna handkerchiefs did not come down from the days of Chivalry, when the ladies wore the kerchiefs of their favorite knights? The French girls began the fashion by wearing these large figured handkerchiefs tied on their arms; now we see them used as collars and girdles, and even as waists and blouses. Two large handkerchiefs make a blouse. No cutting is done. Simply lay one handkerchief on top of the other, stitch from the two upper corners toward the center, leaving an opening large enough to get the head through, the opening to

Washable flannel makes a nice bloomer dress for the little six-year-old. The sleeves, pocket, and side edges of the smock are decorated with "pass" stitching in bright colors.

**A Charming Apron**

What a lovely little cretonne apron may be developed from Pattern 4213! Its trimming is the pretty, but inexpensive, 'rick rack braid. Or, it may be made up in black sateen and trimmed in red rick rack, with colored wool flowers embroidered on the pockets. It is always seasonable

and never out of style. The pattern is cut in four sizes, Small, Medium, Large, and Extra Large. The medium size requires 3 3/8 yards of 36-inch material.

**In Panne Velvet or Homespun**

The growing girl now has as much choice in the models for her dresses as has her big sister. Pattern No. 4206 gives her a lovely little dress which might be made up in almost any material. The one shown here was made in brown-toned plaid. Wouldn't it be fetching in blue homespun with henna or orange pipings, or even in black panne velvet for her "bestest" dress? This pattern comes in 4 sizes: 8, 10, 12, and 14 years. The 12-year size requires 3 1/4 yards of 44-inch material.

**For Any Occasion**

Then there's the little miss of 6, 8, 10, or 12 years who would like pattern No. 4207 for a school dress. Serge or checked woolen would do nicely for this, or even velveteen. The sleeve may be either wrist or elbow length. The 10 year size requires 3 1/2 yards of 32-inch material with 3/4 of a yard of 32-inch material for trimming.

**A Dainty Frock for the Little Girl**

Another one-piece model for a little girl is found in Pattern 4203. This style is simple and easy to make. It may have a wrist-length fitted sleeve, or one of elbow length with a smart little upturned cuff. Jaunty patch pockets are both ornamental and serviceable. This pattern comes in 4, 6, 8, and 10 year sizes.

Pattern No. .... Size .....

**UP-TO-DATE BOOK OF FASHIONS**

Send 12c in stamps, check, or money order, for our UP-TO-DATE BOOK OF FASHIONS.

**With Decoration of Soutache Braid**

The stout woman will welcome pattern No. 4217, whose circular skirt sections are set over a panel front and long waist sections. The square-cut neck is especially becoming. The sleeve is new and attractive. Broadcloth, panne velvet or serge will lend itself nicely to this pattern, which is cut in seven sizes, 36 to 48 inches, bust measure. Braided bands of soutache form the trimming.

**Dear Women Readers:**

Tell me how you made your last new dress, your hat, or your sweater; how you furnished or decorated your room; what you prepare for your children's lunches; how you and the other women of your church or society held some festival or outdoor picnic, entertainment, or oyster supper. Send me some new recipes, jokes, or household hints which you have found interesting or useful; tell me how you go about getting your housework done so that you still have time to read and sew and do the little things that you like to do. Tell me about some nice trip which you and your family took. What kind of a house, lawn and garden do you like? Send me pictures of your prettiest flower bed (with yourself standing by); of your table as you arranged it for a party, or describe the nicest entertainment to which you ever went. Have you made friends with the new teacher in your neighborhood? Do you like her, and why?

These are but a few of the things that women ask to see in the MAGAZINE. If you can discuss any one of these, you will be helping me wonderfully. If you have a talent for drawing, won't you let us enjoy a bit of it? Perhaps you are handy at making place-cards, party-favors, etc. If you are, won't you tell me about it, or send me samples showing how these are made, so that our women readers in other parts of the country may know what other Baltimore and Ohio women are doing? If you prefer that your name be not used in connection with the article just tell me so in your letter. You may also give me any fictitious name that you wish me to add.

It will give me great pleasure to have you write me from any point of view.

Yours sincerely,

*Margaret Talbot Stevens*

Associate Editor

# Our Little Railroaders

*Oh, here are children's letters!  
Run, Tommy, dear, and Sue—  
Get out your longest pencil  
And let us write one, too.*

*Oh, let's make up a story,  
And send our pictures, too,  
I s'pect that Old Aunt Mary  
Will be awf'ly glad, don't you?*

## Prize Winners in the Safety Contest

ALL of the little people who entered the Safety Contest will be glad to learn the names of the prize winners, so we shall give them here before we go any further:

Beulah Hoar, Brunswick, Maryland, first prize among the girls; John Gianfagna, Staten Island, New York, first prize among the boys. Other prize winners in order were: Marie Clemmings, Newark, Ohio; Viola Wolfe, Chillicothe, Ohio; Elsie Elizabeth Glanzer, Jessup, Maryland; Myra Gill, Baltimore, Maryland; Harry Nokes, Brunswick, Maryland; Evelyn Laura James, Chicago, Illinois; Gladys Shaw, Fairmont, W. Va.; Marion Wolfersberger, Somerset, Pa.; Helen May Leslie, Pittsburgh, Pa.; Helen Robinson, Cumberland, Maryland; John Cullinan, Pittsburgh, Pa.; Lena Reis, Deer Park, Maryland; John F. Beall, Uniontown, Pa.; Harley B. Kight, Keyser, W. Va.; Martha O'Gilvie, Morgantown, W. Va.

A number of girls and boys from East Brunswick School, who entered the contest, sent their entries to the State Fair at Frederick, Maryland, and did not get them back in time to enter the contest with the other children. You will be glad to know that the little people of that school are going to write the whole of the Children's Page for one month during this year. (If any of you little folk attend a school where there are 20 or more Baltimore and Ohio pupils who attend, kindly send your name to Aunt Mary, who will be glad to write your teacher about letting her little Baltimore and Ohio girls and boys write the page for some other month.)

A number of little people who entered the contest, did not get their papers finished in time. Many of you tried very hard but did not succeed in getting lists which you thought long enough to send in. Aunt Mary is so glad to know that you tried, anyway, and she thanks you for trying. Perhaps you will be more successful in the next contest.

Some of you made up nice, long lists, but they were not "Safeties," as John Gianfagna calls them. That is, they told

of lots of kind acts which you had done, but of few acts which kept someone from getting hurt. It is splendid to know that our little people are doing many kind acts each day, and even though you did not win a prize, you may be sure that each little thing you do to help somebody else makes you a better girl or boy, will make people love you more, and will help make the world better.

The prize-winning lists were splendid. Beulah Hoar did lots and lots of things for Safety. We shall publish some of them soon and also Viola Wolfe's Safety essay. Martha O'Gilvie did not send in a long list, but she tried very hard. Evelyn James gave some fine Safety Rules; her brother is a Safety Patrol of the Boy Scouts and stands at the street corners to help the school children across. Marion Wolfersberger warned a number of people about crossing the street before approaching cars. Marie Clemmings received 195 credits for the many safety items she had on her list.

Gladys Shaw's paper was a good one. She would have gotten a big prize if her items had been Safety items. Most of them were kind deeds and although we were pleased to have them, we could not count them as "Safeties."

John Gianfagna probably has done more for Safety than any other of our little people. Of course, John lives in New Brighton, Staten Island, where more things happen than in the towns and villages where most of us live, so he had a better chance. But John always keeps his eyes and ears open, and we believe that he will make a real little Safety man. Every one of our little people can go on being little Safety men and women, even without a contest. No matter what work we do when we grow older, we shall need to be careful always. Accidents happen everywhere.

When you go along the streets and see poor blind beggars, men and women, and even little children, walking on crutches, don't you always feel so thankful that you have two good hands to work with, two

Harvey Gaumer, Point Marion, Pa. His father's tool house is in the background. Harvey has drawn a cartoon for our Children's Page

"Jiggs"—after receiving a wallop from "Maggie."  
Drawn by Richard Fritz, Pittsburgh, Pa.

good feet to walk with, two splendid eyes to see with, and a fine, healthy body? I am sure that you do, and that you will want to keep yourself strong and well.

I once heard a story of a little boy who thought he was very poor, because he didn't have the things that his playmate, a little rich boy, had. Then, one day, the little rich boy got hit by an automobile and had to have both legs taken off. He couldn't walk and run and play ball; he couldn't swim nor ride his handsome bicycle; he couldn't ride his pony or go coasting in winter; he couldn't do any of the things that his playmate did.

Then little Joe, the poor boy, sat down to think it over. "My!" he said to himself, "I wouldn't give my legs for ten thousand dollars. What good would the money do me if I couldn't play and have a good time? Poor Dick! I used to think that he was rich. Now I know that I am rich, for any little boy who has two strong legs, two good arms, and two eyes can always be happy."

So let us all take good care of our riches so that we may be neither blind nor crippled. And let us do everything that we possibly can to keep other people from getting hurt. We don't have to go outside of our own homes to do that, but wherever we are, at all times, **LET US DO THE SAFE THING FIRST.**

Other little people who entered the contest are:

Archie: "And what did she do?"  
Reggie: "She went upstairs and put on a hobble-skirt."—Answers.

Answers to November Puzzles

THE answers to the November puzzles are: No. 1, S-word; No. 2, S-h-cars; No. 3, Blunderbus (Bl, under Bus); No. 4, Lovers (L over S).

Those who sent in correct answers are: Mabel C. Porter, 1602 W. Lexington Street; Evelyn Luh, 1818 W. Lombard Street; Evelyn Eaton, 2375 E. Madison Street, and Anna Danz, 2342 E. Monument Street, all of Baltimore. If you guessed currant, plum, pear those, then the following riddles will be easy. Mr. Towhead wrote them for us.

1. Cut off the first letter of a word meaning an odd number and leave it even. (Five letters in the word.)
2. (This is a charade. The answer is a word of seven letters.) The WHOLE came and delivered a letter to his hired SECOND, who was leaning against a FIRST.
3. (This is a charade. The answer to this is also a word of seven letters. It's a little bit harder than number 2.)

My WHOLE, a word of seven letters, is the name of a very common small bird. The first four letters spell a word meaning a necessary part of every sailing vessel. The last three letters form a word meaning to propel a skiff.

A set of six Baltimore and Ohio post-cards will be sent to each little girl or boy who sends in the correct answers to these three puzzles.

Hudson River Bridge, drawn to scale, imposed upon the skyline of New York. If one anchorage were placed at the Battery, the

For the purpose of terminal operation and to reduce the cost of city trucking to a minimum, the marginal terminal will be divided into individual terminal units, each about 1300 ft. long. Cars will be classified on the New Jersey side for these various terminal units. Carload lots inbound for individual terminal units will be delivered to the terminal company in New Jersey

and delivered by them later to the Manhattan terminal in standard cars without breaking bulk. Less than carload lots will be transferred to containers in New Jersey by original road or by operating company and then delivered to Manhattan. Vice versa, out-bound carload lots will be loaded direct into standard cars and L. C. L. will be loaded into containers and moved to New Jersey to be classified, or transferred at Manhattan Terminal into proper road cars of the forwarding company.

The freight of Manhattan Terminal is to be handled largely by tractors and trailers or containers over the platforms and by elevators between various floors, on the principal of one way traffic and avoidance of fouling. The trucks handling the street platforms for delivery of freight to and from terminals are similarly operated on the same principle of loops and with the proper use of all cross streets to disperse the traffic into the city without congestion.

#### Shipping Interest

One of the decisive reasons why this terminal was located along the east side of West Street and which had a great influence on the general design of the terminal, was the possibility of rehabilitating and rejuvenating the entire water front of the Hudson River between Cortlandt Street and 46th Street and furnishing large additional capacity to the existing piers.

The marginal terminal is provided with elevated galleries crossing West Street connecting the warehouse with the piers so that freight to and from the terminal can be transported direct to and from shipside by tractors and trailers.

Although it is believed that heavy cargo steamers must eventually seek the railhead connection in New Jersey, the Hudson River waterfront is used for steamers carrying passengers primarily, and incidentally high class freight. It is expected that such use of the waterfront will increase largely with such increased facilities as are contemplated.

Some portion of the cargo of these passenger ships will come by lighter but a growingly large part can be brought direct by the

# River Bridge

(page 7)

railroad to the individual terminal units or section of the terminal opposite the vessel's pier, and the freight can be unloaded at the freight platforms as a part of the terminal work and carried by

trailer into an upper warehouse floor of the terminal warehouse and held until called for by the ship's stevedores or vice versa. Or instead of passing such freight through the general warehouse floor, a pier owner could lease a floor or floors of any size required, to handle such work through his own agencies, and even bonded warehouses or Free Port Zones could be provided for unloading inbound cargo into.

The plan has been conceived on the assumption that the freight terminal facilities will be operated by a joint operating agency, giving all connecting railroads equal opportunity for delivery and collecting freight in New York or doing such work for them.

It is believed that such terminals in Manhattan will add greatly to the growth of the shipping interests as well as the business interests of the Port and with a very large saving in gross handling costs, as well as with profit to the undertaking.

As in the case of the Union Station, the freight terminals will permit of profit from such by-products of the undertaking as the renting of warehouses and lofts above the terminals for industrial and shipping needs, and the gross revenue will be largely increased by the change in living and business conditions brought about by the new economies possible from the facilities provided.

## New Jersey

The benefits of the Bridge to New Jersey and Northern New Jersey open up tremendous business possibilities which each individual can visualize for himself; but the result will be a greater Brooklyn on the west bank of the Hudson River.

## Economic Features

The Bridge is a tool of great carrying capacity so located that its terminals can diffuse its traffic through the city without congestion. In this and in its ability to make economic changes in the present business methods of the population of the district,

lie the potentialities for usefulness which are the compelling reasons for its construction.

(Continued on page 34).

## The Hudson River Bridge

(Continued from page 33)

Figures of cost have been avoided as they are confusing except to an expert, but under an ordinary sequence of importance and probability of financing, the bridge will be built for its vehicular traffic and Union Passenger traffic and then rapid transit and freight facilities added as separate financial undertakings, as and when needed.

It is felt that to the owners or users of the bridge, whether they be individuals, industries, railroads, public utilities or municipalities, in or out of the Metropolitan District, the undertaking will mark a profitable and far reaching advance in service to all concerned and also properly reward their financial support.

To the believer in Americanism, it is clear that the public is entitled to health, comfort and happiness in the consideration of any economic question. The bridge will give an increasing measure of all three for all time.

To the student of political economy, the expenditures involved are proper for this day and generation as they are primarily for the creation and improvement of permanent property for the production of direct service to the people for their material welfare.

The magnitude of this single unit of equipment and the field of usefulness of its terminals are both so unprecedented that when the bridge has been built the historian will record that in no other place in the world would such a bridge be justified or made to pay its way. And he will further say that at no other place in the world could the facilities it affords have possibilities of beneficially affecting the lives of so many people.

Yet America's metropolis is even now so great in population and industry and its future so assured that its need for such facilities will continue to be unprecedented. And although the completion of the bridge will be an epoch in world progress, it may be regarded as preceding other such bridges which will be required for the proper economic development and upgrowth of New York.

## F. M. Jordan Made Coal Freight Agent on October 1

ON October 1 F. M. Jordan, former division freight agent, Charleston Division, was made coal freight agent at Pittsburgh.

Mr. Jordan was born on December 27, 1884, at South Olive, Ohio. Here he attended the public schools for twelve years, after which he took summer courses in the normal schools of South Olive and Lower Salem, Ohio. He is a graduate of La Salle Extension University, of Chicago, where he took a correspondence course in Traffic.

His first work was in his father's store at South Olive. He came to work with the Baltimore and Ohio in 1906 as rate clerk, Freight Office, Marietta, Ohio. Up to this time he had worked with the Pennsylvania Railroad as truckman and cash clerk. In 1908 he was made chief rate clerk; in 1909, chief claim clerk; in 1910, per cent. clerk, Cincinnati; in 1916, agent and yardmaster at Shawnee, Ohio. Later he served in the capacities of freight agent, Marietta; traveling freight agent, Columbus; commercial freight agent, Wheeling, W. Va.; and division freight agent at Grafton and Charleston, W. Va.

## A Rail Gasoline Motor Car in Switzerland

BECAUSE of the recent installation on our Green Spring branch of the first Railway Gasoline Motor car for passenger transportation put into use by the Baltimore and Ohio, we believe that the accompanying picture of a car of similar principle, used in Switzerland, will be of interest. Concerning it, Colonel Emerson, chief of motive power, says:

"The Sulzer car cannot well be compared with the Baltimore and Ohio motor car, because of the fact that it is a much heavier type of car than ours, and is practically the same in principle as the old General Electric gasoline electric motor cars. This car with trailer weighs 170,000 lbs., while our car and trailer weigh only 26,570 lbs.

## Help for the "Good Neighbor Railroad"

By J. A. Jackson

ON November 23 Bridge No. 230, located at Wooster, Ohio, was discovered on fire by Mr. A. C. Chagnot, foreman of the Weldless Tube Company in that city. He immediately notified Agent DeArment, at the same time sending a force of his own men to help extinguish the blaze. Mr. Edw. Snavelly, city fire chief, and Mr. Harry Walters, service director, also rendered exceptional service in assisting to extinguish the blaze, by sending the city fire department to the scene, although the bridge is located outside of the city limits.

The bridge was damaged to the extent of \$500.00, and the actions of these gentlemen probably prevented its entire destruction. Their prompt action is highly appreciated by the Baltimore and Ohio.

This incident is only another evidence of the "Good Neighborly" spirit that exists between the Baltimore and Ohio and the people along our lines. In appreciation of their valuable service Superintendent D. F. Stevens has written each of these gentlemen a personal letter of thanks for the great service rendered.

Swiss Rail Motor Car—quite a contrast to the car we operate on our Romney Bran

### The Haunting Whistles

By Thomas J. Murray

*in New York Central Lines Magazine*

The whistles drift in haunting, minor calls,  
 Flung by the speeding trains that cruise the night;  
 Far in the distance past the shadowed walls,  
 A rumbling roar to mark their steady flight.

They filter through our dreams, insistent notes,  
 That rise and swoon upon the midnight tide;  
 Repeated signals from the metal throats,  
 That on the listless breezes ride and ride.

Dim couriers of Trade that swirl afar,  
 Their splendid passage we in fancy trail;  
 Linked by the calls that float past night's low bar—  
 The haunting whistles of the gleaming rail.

## B. A. Oatman Winner of First Prize among Magazine Correspondents for 1922

**B.** A. OATMAN, Newark Division, has been the outstanding best correspondent of the Baltimore and Ohio MAGAZINE for 1922 and as such has already been awarded the prize of the fifty volume set of the Harvard Classics, that magnificent collection of many of the best writings of all time in all fields of literature.

Mr. Oatman was represented in every issue during the year and not only submitted newsy and constructive notes himself but also enlisted the help of enough correspondents at outlying points on the Newark Division to cover the division thoroughly from end to end. He was helpful in many other ways, sending in several stories on interesting subjects local to his division but calculated to please the readers of our MAGAZINE everywhere. He responded to practically every appeal sent from the MAGAZINE office and gave us all-around fine support.

The prize was a complete surprise to Mr. Oatman as may be judged from his letter of thanks, as follows:

Newark, Ohio

DECEMBER 25, 1922

Editor, Baltimore and Ohio MAGAZINE  
 Baltimore, Maryland

Dear Sir:

Allow me to thank you for the beautiful set of Harvard Classics which I received on December 23 from the Baltimore and Ohio through the MAGAZINE, presentation being made by H. G. Kruse, our superintendent.

This token of appreciation of my magazine work during the year just ending was received by me with no little surprise as there was such a large field of worthy

correspondents all working toward the same end as I, to make the Baltimore and Ohio MAGAZINE one that will appeal to every official and employe of the Baltimore and Ohio Railroad Company.

I can assure you that my personal interest in the welfare of the Baltimore and Ohio and its MAGAZINE will be gladly given during the coming year.

Yours truly,

(Signed) B. A. Oatman

Newark Division Correspondent

The regularity, punctuality and constructive interest of the notes submitted, besides other qualities, have been taken into consideration in determining the winner of the first prize. They also entered into the consideration of other prize winners for the MAGAZINE for, through an arrangement with one of its advertisers, the MAGAZINE was this year able to give handsome prizes to a number of other correspondents who were deemed most worthy of this recognition.

Sterling silver Eversharp fountain pens and pencils were sent to the following:

E. E. Alexander, Supervisor of Plants, Green Spring.

Oswald K. Eden, Engineering Department, Baltimore.

A. E. Erich, Secretary to Superintendent, Ohio Division.

G. J. Goolie, Office of Division Engineer, St. George.

George W. Haulenbeck, Law Department, Baltimore.

J. A. Jackson, Office of Superintendent, Akron.

M. W. Jones, Secretary to Superintendent, Charleston Division.

Harry B. Kight, Ticket Clerk, Keyser, W. Va.

Edward M. Mannix, Roundhouse Clerk, East Dayton, Ohio.

H. Irving Martin, Relief Department, Baltimore.

John Newman, Terminal Timekeeper, Pier 22, North River, New York.

C. E. Reynolds, Office of Trainmaster, Connellsville.

John J. Sell, Car Distributor, Cumberland.

H. F. Smith, Secretary to Trainmaster, Flora.

W. H. Tarr, Office of Superintendent, Baltimore Division.

To the following correspondents who have also done good work but who have not been able, for reasons beyond their control, perhaps, to show quite the results secured by the above named, a handsome Wahl (Eversharp) fountain pen was sent:

Joseph Beel, Chief Clerk to Superintendent, Cincinnati.

Mary A. Breen, Office of Car Distributor, Pittsburgh.

John Limpert, Office Auditor Coal & Coke Receipts, Baltimore.

Gertrude M. McBride, Office of Division Accountant, Dayton.

Marie Slatterick, Office of Division Engineer, Wheeling.

W. L. Whiting, Chief Clerk, Freight Station, Washington, D. C.

No special significance attached to the kind of gifts sent to our correspondents. It may be highly appropriate to send them writing instruments, but it is not of necessity a reminder that they need use pens and pencils for their MAGAZINE work in 1923. We are on record as preferring "typewritten double-spaced" notes, please!

We have already expressed to all our correspondents our deep appreciation for their cordial support during 1922, and we wish here to reiterate this appreciation, for without their support we could not publish nearly as interesting and comprehensive a MAGAZINE.

B. A. Oatman, Newark Division's prize winning Magazine correspondent

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## Michael E. Powell

Michael E. Powell, pensioned hostler, Wheeling Division, was born on July 21, 1856 at Proctor, Wetzel County, West Virginia. He attended the county schools there and worked on his father's farm until 1878, when he was married to Miss Anna Walker. To this union eleven children were born, seven of whom are now living.

He began work with the old Ohio River Railroad as section hand, and when the Baltimore and Ohio took over this railroad, Mr. Powell continued in the service. On April 17, 1901 he was made steam shovel man; on March 18 of the next year he was made car repairer; in 1911, foreman, and in 1913 he was made hostler and was transferred to Brooklyn Junction. This position he held until the time of his retirement.

## Thomas H. Tierney

Thomas H. Tierney, pensioned engineer, Baltimore Division, was born on January 2, 1857. He entered the service of the Baltimore and Ohio on September 1, 1885, as fireman. In 1890 he was promoted to engineer.

## Frank L. K. Sharretts

Frank L. K. Sharretts was born on September 11, 1858. He came to the Baltimore and Ohio on September 5, 1891 as yard clerk, Brunswick. Mr. Sharretts says:

"I began working for the good old Baltimore and Ohio in 1891, under Z. T. Brantner. One month later I was transferred to supervision of J. W. Martin as yard clerk and was always rated as yard clerk up to the time of my retirement.

"On November 7, 1915 I went to the Maryland University and had a serious operation performed. The operation was done by Dr. Page Edmunds, to whom I give credit for saving my life. I consider him one of the grandest men in the profession. The Baltimore and Ohio has a fine, big ward in the hospital where they take good care of the disabled. I was treated fine and fed well. Everything was so clean and cheerful.

"The Baltimore and Ohio has been a father to me. It is the best railroad on the map, always ready to give a helping hand, and I don't see how any employe can help but feel as I do, particularly the old 'war horses.'

"I am thankful to all that after 30 years of service I am released from work and allowed a monthly allowance to help take care of myself and my family in our old days. How could a man help being thankful to the Baltimore and Ohio for this?"

"In conclusion I want to pay a heartfelt tribute to our Brunswick medical examiner, Dr. J. F. Ward, with whom I have been closely associated during my long period of disablement."

## John C. Bates

John C. Bates, pensioned machinist, was born in Chillicothe, Ohio, on September 12, 1857. He attended public schools there until he had completed the grammar grades, and at the age of 18 years he secured employment with the Baltimore and Ohio as apprentice. At the age of 24 he was furloughed and took employment with the Hocking Valley Railroad.

In 1908 he came back to the Baltimore and Ohio as machinist in the shops at Chillicothe. This position he held until March 4, 1921, when his health failed. He was pensioned on November 1, 1922.

Mr. Bates is well liked by all who know him. He has no children but his wife is still living to enjoy with him the rest after his years of labor.

## Thomas F. Quinn

Thomas F. Quinn, pensioned engineer, Wheeling Division, was born in Ireland in

1853. In 1856 his parents emigrated to America, where they made their home.

"In 1868," says Mr. Quinn, "I entered the service of the Baltimore and Ohio as section hand, under my father, who then was section foreman at Norwich, Ohio, now known as Sundale, Ohio, on the Central Ohio Division.

"When the Chicago Division was to be built, General Roadmaster Dav' Lee picked men from each section of the Central Ohio Division for this work. I was therefore sent to Fostoria, Ohio, where I was made foreman of a gang that helped to lay track for the Chicago Division. This work was completed on November 10, 1874.

"I continued as section foreman in Chicago Yard until September, 1875, when I was transferred to fireman, Newark, Ohio. In October, 1880 I was promoted to locomotive engineer.

"Two years later I left the service of the Baltimore and Ohio and worked a year on the Nickel Plate. The next year I worked as engineer on the Texas and Pacific. From 1884 to 1900 I worked as engineer on the Cleveland and Marietta Railroad. On the completion of this railroad, it was absorbed by the Baltimore and Ohio, thus bringing me back, in 1901, to the service of this Company, in which I remained until I was pensioned on December 1, 1922.

"I became a member of the B. of L. E. in 1882, Division No. 36, Newark, Ohio. I have continued my membership in this for 40 years. Last November I was made an honorary member of Parkersburg Lodge No. 481."

## Millard F. Taneyhill

Millard F. Taneyhill, pensioned mill machine hand, was born on November 4, 1856. He entered the service of the Baltimore and Ohio as laborer, on April 2, 1872 at Mt. Clare Shop. In 1876 he entered his apprenticeship, completing it in 1880. Since that time he has been in service

9—Holders of land granted by the government.

Cincinnati, Ohio

Wick-o-cincy

#### Just between You and Me

In this issue we present what we consider the best "dish" of puzzles that has appeared since the department was started. The fifteen puzzles presented for solution comprise thirteen different kinds and all of them are clean-cut examples of the art. Our solvers should derive a good deal of pleasure from this issue.

In No. 9 Martelia, the veteran, pays his respects to his old friend C. Lion, the tyro, and he does it in Martelia's inimitable way.

In No. 7 N. Jineer (Miss Olive W. Dennis) presents another fine example of the anagram. This contributor is already turning out work that would be welcomed in the Enigma and she gives promise of becoming a flatist of the highest rank.

P. M. P. (P. M. Pennington) presents his first offering in No. 5 and can feel proud of his effort.

The National Puzzlers League will hold its 80th semi-annual convention at the Southern Hotel, Baltimore, Md., February 22, 1923. Veteran puzzlers from all sections of the country have expressed a determination to be present and a successful meeting will undoubtedly be held. All the Baltimore and Ohio puzzlers are cordially invited to be present and you want to remember you don't have to be a member of the National Puzzlers League to be accorded a seat in the meeting. The Reception Committee will make you feel right at home and you will meet some mighty bright and interesting people—so come along and help to make it a big day in puzzledom.

Dan D. Lyon, a veteran puzzler, who is an official of the Pennsylvania Railroad, was in Baltimore on December 1-2 and spent a happy two days shaking hands with his old friends among the Baltimore puzzlers. Everybody in puzzledom knows Dan and he is always welcome whenever and wherever he calls. He is very enthusiastic about our little puzzle department and predicts it is going to afford profitable pleasure for many members of the Baltimore and Ohio family.

### Pensioners' Roll of Honor

(Continued from page 37)

continuously as mill machine hand until November 10, when he was granted a pension. His length of service, therefore, counts 50 years. He was a willing and efficient worker at Mt. Clare.

#### Austin Kelly

On the 6th of last November, the name of Austin Kelly, toolroom attendant, was added to the list of those retired on pension. To his fellow workers in the Washington

Shops, Mr. Kelly was familiarly known as "Dad."

Mr. Kelly was born on February 14, 1852 in Warwick County, Indiana. During the early years of his life, he followed the line of carpentering and farming. In 1874 he was married to Miss Fannie Burnett. Ten children were born to them, but only one, Mrs. Fred McLeomore, is still living.

Mr. Kelly lived for a year or more in Illinois, but in 1892 came to Washington, Indiana, where he entered the service of the Baltimore and Ohio as engine wiper. He has been in continuous service since that time as machinist helper, carman helper, and toolroom attendant.

His photograph is a recent one, and he gratefully receives his reward for faithful service.

#### Martin M. Cadden

Martin M. Cadden, who was pensioned on November 5, after 40 years of faithful service as engineer, was born on March 14, 1855 at Marietta, Ohio. His parents were William and Bridget Coleman Cadden.

He attended the public schools of Marietta until he reached the age of ten years, when he moved with his parents to Belpre. On May 10, 1872 he entered the service of the Baltimore and Ohio as laborer, Parkersburg. On September 20, 1875 he was made fireman. In 1878 he was promoted to engineer, Chillicothe. In this position he remained until the time of his retirement.

In 1900 Mr. Cadden married Johanna Cronian, who died in December, 1918.

### Best of Several Routes to Florida

New Smyrna, Fla.  
DECEMBER, 4, 1922

Mr. C. F. Haver, Agent  
Kimmell, Ind.  
Dear Sir:

As a reward for your soliciting us to take advantage of the All Expense Tourist Rate to Florida via Washington, D. C., Baltimore, Md., and by boat to Jacksonville, Fla., we are glad to say that the courtesy shown us by the Baltimore and Ohio was above par and that words cannot express our gratitude.

The day spent in Washington was fine. They drove us over the city by automobile and showed us the main buildings of the city, and served us with the finest dinner.

Going from Washington to Baltimore and taking boat to Savannah, Ga., was a delightful trip and the railroad representative showed us the city of Savannah by auto, a distance of about 60 miles. This was fine as was also our trip on to Jacksonville, Fla.

We have gone several different routes in other years to Florida, and can heartily say that the service and courtesy shown on this trip were the best. We can recommend the Baltimore and Ohio to all wishing to travel.

(Signed) W. S. Mattox  
J. Kiester  
L. W. Parker  
I. Skeels.

A team composed of members of the General Office Bowling League was sent to Cumberland to play a team composed of employes of the Baltimore and Ohio Railroad of that city on Saturday, December 16. The honors went to Cumberland. Score:

CUMBERLAND				vs	BALTIMORE				
Onderdonk	133	145	112	390	Sauerwein	155	117	139	411
Clark	170	121	169	460	Warren	114	135	133	382
Hall	139	171	135	445	Gaither	133	151	149	433
Trail	126	122	113	361	Pritchard	120	113	120	353
McGinn	136	151	134	421	Gallery	180	161	110	451
	704	710	663	2077		702	677	651	2030

In explanation of the scores, it might not be amiss to say that the pins used at Cumberland were "rubber banded." A return game will be played with Cumberland in Baltimore soon.

## A Cozy Bungalow for Suburb or Country

**H**ERE is plenty of room for two and the baby. Modern domestic science is showing the way to minimize housework in every direction and in this plan will be found all the conveniences of the up to date apartment in a delightfully cozy individual home.

The planning is so compact that it has been possible to omit the cellar. By installing a modern type heater in the kitchen hot water heating for the whole house is easily provided with a desirable economy in fuel. It would be a simple matter to arrange for a cellar if needed.

The small family will appreciate the convenience of the dining alcove. It is so close to the kitchen as to be almost a part of it, and yet it is entirely shut off from both kitchen and living room. The double doors between kitchen and living room prevent cooking odors from getting into the front of the house.

A sink and two laundry tubs are placed in the kitchen and there is plenty of room along the side wall for such modern contrivances as an electric dish washer or laundry machine. The level top of the washing machine could be used as a kitchen table.

The living room is large, spacious and well lighted. It has a delightful open fireplace and two convenient closets for overcoats, wraps, umbrellas and the like. A splendid porch runs across the front of the house. It can be screened in or glazed if desired. One large bed room and one smaller guest room are at the rear of the house, both with cross ventilation, making them very comfortable in the summer time.

The roof is well proportioned, giving an air of solidity and dignity that is not found in the very flat pitched bungalows so often built. There is room enough in the attic for one or two bedrooms if desired and a

stairway to them could be easily arranged on the end wall of the living room.

This house is designed for concrete block construction covered with portland cement stucco. The plans were made by the Housing Company of 248 Boylston Street, Boston. If the roof is covered with fire resistive shingles the owner will have a house that is entirely firesafe; it will never give him a moment's anxiety, while the cost of maintenance will be reduced to a minimum as there is no siding to paint, porch floors won't need repair and depreciation is extraordinarily low. In selecting fire-safe roofing the builder can choose from a number of materials, the best known being roofing tile, cement, asbestos, or asphalt shingles and slate. Of course there will always be people who will prefer frame or brick construction, and this design is easily adaptable to these materials.

## Do You Want to Build Your Own Home?

Yes? Then we can help you, for through the courtesy of the Portland Cement Association we can supply complete plans and blue prints of the house shown on this page at the low cost of ten dollars (\$10.00).

We also have copies of a book "Concrete Houses," containing pictures and floor plans of 25 houses built of cement and concrete block. Copies of this book may be had by any reader of our Magazine at a cost of fifty cents apiece. For either the book or the complete specifications and blue prints of the house described on this page, remit to the Editor, Mt. Royal Station, Baltimore, Md.

Baltimore and Ohio employes have a special reason for taking advantage of these offers because they can get such substantial help in home building from our Relief Department. For full information write Division "S," Baltimore and Ohio Building, Baltimore, Md.

# An Evening of Unbounded Fun for Everybody, Including Vice-President Galloway

By C. H. Spicer, Electric Welder, Mt. Clare Shops

ON November 29 the Mt. Clare Welfare, Athletic and Pleasure Association held its annual carnival and dance at Lithuanian Hall, Baltimore, Md. Vice-President Galloway was the honor guest of the evening. About 1000 people, members of the association and their families and friends were present, and all enjoyed themselves to the fullest extent.

There were many forms of entertainment, including bowling, dancing, pool and refreshments. The Mt. Clare Band of about 30 pieces furnished the music for the dancing.

One of the interesting features of the evening was a talk given by Vice-President Galloway. He told of the advantages to be derived from membership in such an organization as the Association, and gave the boys much encouragement and promised his support.

Without exception, all of the officers of last year were re-elected, as follows:

James E. Tatum, president; W. C. Davis, vice president; Robert L. Poulton, record-

ing secretary; John B. Carroll, financial secretary; Charles W. Serp, treasurer. In addition, C. H. Spicer was appointed publicity agent.

Superintendent of Shops "Tom" Stewart was there in full dress; H. A. Beaumont was also clad in fine regalia. Both of these added much to the success of the evening, quite as much, in fact, as did the refreshments, which consisted of ice cream, soft drinks, hot dogs, candy and almost everything else. Ten turkeys and about 100 pounds of candy were raffled off, and the lucky winners of the turkeys had no need to buy any for Thanksgiving. Mr. Galloway, by the way, was one of the winners.

"Jimmy" Whelan had to be driven away from the pool tables. We have not yet discovered whether the attraction was the pool or a certain young lady who stood by watching him shoot. Altogether, however, he had a fine time, as did everybody else, and all of "the boys" voted that this entertainment had been the BEST EVER.

# A Free Lecture Course that Will Interest Every Clerk in Baltimore—Don't Miss It!

By G. M. Campbell

Rate Clerk, Freight Traffic Department

VALUABLE information is being overlooked by employes who do not attend the meetings of our weekly traffic class now well into its second season.

This year a course of lectures has been provided to include a thorough study of the facilities of the Baltimore and Ohio and the traffic characteristics of the territory served.

Every Tuesday at 7.30 p. m., a meeting is held in the Assembly Room, Fifth floor, General Office Building, under the chairmanship of J. H. Graham, chief clerk, Freight Traffic Department. The outstanding features of the previous lectures are discussed for a half hour, followed by an hour's lecture on the assigned topic.

Samuel House, general freight agent, Baltimore, in laying plans for the course this season, had in mind instructions that would acquaint employes with the facilities of the Baltimore and Ohio, and to this end appointed a committee comprised of J. H. Graham, chief clerk, Freight Traffic Department; C. W. Shinnamon, chief clerk, Coal Traffic Department, and G. M. Campbell,

rate clerk, Freight Traffic Department, to draft a program of lectures.

At this writing the class has been instructed in the History of the Baltimore and Ohio by W. E. Lowes, G. P. A.; Baltimore Terminals by E. S. King, D. F. A., Baltimore; Philadelphia Terminals, by J. W. Babneu, D. F. A., Philadelphia; Wilmington Terminals, by G. W. Bumpas, D. F. A., Wilmington; Washington and Potomac Yard, by J. H. Glenn, F. R., Washington, D. C.; Charleston, W. Va., Strasburg Junction, Staunton, Harrisonburg and Lexington, Va., and Hagerstown, Md., by J. L. Hayes, D. F. A., Baltimore Division; New York Terminals, P. S. Phenix, D. F. A., New York.

No fee is required for attendance and an employe may come to the Assembly Room, fifth floor, General Office Building, to attend these meetings which are held every Tuesday from 7.30 p. m. to 9.00 p. m.

M. P. Flaherty, clerk at Claremont, Baltimore, is secretary of the class.

## New Locust Point Grain Elevators

H. A. LANE, chief engineer of the Baltimore and Ohio announced on October 30 that contract has been entered into with the John S. Metcalf Company, of Chicago, specialists in grain elevator construction, for the preparation of plans and specifications for the new grain elevator facilities at Locust Point, Baltimore, to replace the two old elevators destroyed by fire on July 2 last.

The tentative plans which have been worked out by the Baltimore and Ohio

## Trade Mark Contest

Our readers will be interested in knowing that over one thousand entries have been received in the Trade Mark Contest to date. We hope to be able to advise in a near issue whether up to that time an entry has proved satisfactory as a new trade mark for the Baltimore and Ohio.

Officials, on which the expert grain elevator architects will now scientifically prepare drawings, specifications, etc., call for a steel concrete elevator of the most modern type. The storage bins with capacity of 3,000,000 bushels, will be so arranged that they can be readily increased to 8,000,000 bushels. The plans include complete facilities for drying and cleaning grain, also provisions for unloading grain from boats. The latest approved safeguards against dust explosion will be used.

The elevator will be constructed some distance back from the water's edge, but near the piers, with galleries and belt conveyors reaching eight berths, four of which will be located on an exclusive grain loading pier, to be constructed for that purpose, the other four on a two-story merchandise pier already in use. Provision will be made so that the gallery system can be extended to other piers in the future.

When completed these grain facilities will not only amply take care of all the business now offering, but by the provisions made for further expansion, will meet requirements far into the future.

It is expected that the architects will have the detail plans in shape for submission to the railroad engineers within three months, after which invitations for bids on the construction work will be issued. All the work in connection with these improvements will be under the direction of H. A. Lane, chief engineer, assisted by Engineer of Buildings L. P. Kimball, who will have immediate supervision, having associated with him Mr. L. A. Stinson, of Chicago, as consulting engineer.

Henry E. Whitener, who was made Assistant Master Mechanic, Holloway, Ohio, on October 15

## We Need Copies of the December Issue

The Magazine Office is short of reserve copies of the December, 1922 issue. If you have any extra copies or know where any are we will appreciate it if you will see that they are returned, carefully wrapped, to the Baltimore and Ohio Magazine, Mount Royal Station, Baltimore, Md.

# Jolly Evening Spent by Members of Auditor Freight Claims Department

By Nellie F. Collison, Magazine Correspondent

NOVEMBER twenty-fourth has come and gone, but memories of a wonderful time and echoes of expressions of pleasure linger even at this writing, and are being wafted to everyone within hearing distance.

So much pleasure, so much merry-making and the one great event of this day was occasioned by the Musicomedy Revue, presented by our Welfare Association and written and directed by "Billy" Cavanaugh. Mr. "Jack" Lederer, of "Bob" Iula's orchestra, was musical director.

Community Hall was the rendezvous whence we all wended our way, dressed in our best "bib and tucker." "Billy" Cavanaugh was premier comedian. His introduction to you, dear readers, should be noted in both your conscious and sub-conscious memories, for you are going to hear more from him as a merry maker. Mr. Cavanaugh went to New York immediately after appearing with and among us and was initiated as a member of the legitimate stage, joining Loew's Circuit. We owe him a bigger send off than we know how to give, but we wish him all the hard work that necessarily attaches itself to any triumphant success, following which we trust will be laurels such as have crowned the kings of Comedy.

"Eddie" (Edward Kilduff) was there, too, as a servant to "Billy" (Miss Alta M. Baker), sister to "Bob" (Robert G. Borrell).

Immediately upon the appearance of "Bill" and "Eddie" we all sat upright for we recognized we were being entertained by professionals. Mr. Kilduff as a "Black Face" had us rolling out of our seats and we enjoyed Mr. Cavanaugh's songs and cracks and quips until we ached.

Mr. Kilduff has run away, too, and has joined a troupe of minstrels in some other

part of our land. Our best wishes follow him and we wish we were not limited as to space in order that we might tell everyone what a funny old "Black Face" he was.

Miss Jeanne Goldberg, songbird of the evening, would have left us also for professional work, were it not for parental persuasion to stay at home and bide awee.

"Billy" and "Bob" belong to us and we are rightfully proud of them. "Bob" is a real Caruso and "Billy" a charming sister and leading lady. We have not had enough but want to hear them again and the other excellent talent from our department that evening produced. Old Dan Cupid was there. He got in without an admission ticket, but he brought "Billy" such a beautiful bouquet that everyone was satisfied to let him stay.

Immediately following Part No. 1 of the program of our Get-Together-Have-A-Good-Time evening, the hall was cleared and in a short space of time the stirring strains of "Bob" Iula's orchestra were tempting us into waltzing steps. Beautiful young girls—fetchingly gowned—dapper gentlemen, a profusion of confetti and serpentine, and Community Hall was transferred into a veritable Fairyland.

Refreshments were served and favors of balloons, hats and horns were distributed, adding to the gaiety of the festivities of the evening.

So delightfully were we entertained that the Chairman of the Entertainment Committee is being deluged with requests and solicitations for a repetition of this festive occasion in a larger hall, where a greater number who would relax again from the cares and toils of "The Old Baltimore and Ohio," including the one hundred and fifty turned away, could join with us. What are your suggestions? "Ain't we got fun!"

After the performance, our chief, Mr. Schutte, was presented with a beautiful bouquet of chrysanthemums, which elicited quite a speech from him in spite of the fact that a "frog" had gripped his throat. He disappointed us, however, when he lay down on the job by letting Assistant Comptroller Deverell dance while he only looked on. But that cold won him our forgiveness.

Mr. Deverell was in high glee and danced with all the pretty girls, and we noticed that the English family is fond of all celebrities.

On December 8, our chief addressed us, and was most complimentary. He even told the Dictaphone Department they had done well. Wonder if all this good nature is due to that spirit of "Just before Christmas, I'm as good as I can be."

Our "Andy" and Mr. A— are constantly bragging to one another about how spry they are—and of their young spirits. At the dance Mr. A. convinced us that he was as good as his word, but "Andy" posed as a dignified looker-on. One Veteran G— might have passed for a "cake eater," from the way he was waltzing around.

## An Old Chimer

By John J. Sell

THE accompanying picture is of the old bell which tolled the hours on the old engine house at Cumberland. It was moulded in our Mt. Clare Shops way back in 1883, and was placed in the belfry at Cumberland the same year, replacing a smaller bell. In those days the engine house was located in the center of the city just off Baltimore Street, back of the Windsor Hotel, where the new Baltimore and Ohio Freight House now stands.

Before the steam whistle came into general use most of the enginehouses on the system were equipped with bells for calling the men to work, and for tolling the hours of day and night. About the year 1903 when the old enginehouse was razed, a big new enginehouse and shops having been built in South Cumberland, this bell was taken down, and Mr. M. J. Mulaney, proprietor of the Windsor Hotel, purchased it. He had always admired its sweet tone, and had it set up on his beautiful country place a few miles outside of Cumberland, known as Windsor Hills, overlooking the beautiful country club and Evitts Creek Valley.

Mr. Mulaney greatly prizes the "Old Chimer" and often rings it for the pleasure of hearing its sweet tone. Many of our old employes remember the days when employes and residents alike marked the time of day or night by the tolling of the bell in the belfry of the old engine house.

## Division Passenger Agent Shipley Decorated with Distinguished Service Medal

WALTER V. SHIPLEY, division passenger agent, Washington, D. C., was decorated with the Distinguished Service Medal by the Secretary of War, the Hon. John W. Weeks, on December 21, 1922, for exceptionally meritorious service in the World War. The citation on which the award was based was as follows:

"Walter V. Shipley, lieutenant colonel, Quartermaster Officers' Reserve Corps, then lieutenant colonel, Quartermaster Corps, Division Quartermaster, 29th Division. For exceptionally meritorious and distinguished services, as Quartermaster and Assistant Chief of Staff, G-1, 29th Division, from July 1917, until June 1919, by his untiring zeal, great energy, tact and sound judgment he was able to overcome many difficult problems of supply and assist to a marked degree in the operations of his division, thereby rendering services of great value to the American Expeditionary Forces."

Colonel Shipley was born in Maryland in 1883 and has served the Baltimore and Ohio Railroad for years in its Passenger Department. He has also been one of the best known officers of the Maryland National Guard.

## The First and Best Railroad in the United States

By J. H. Hartley

I AM a Baltimorean and just love the name of Baltimore. I have lived there all my life but my business takes me from coast to coast. I have noted the growth of our city and the improvements of all kinds, and I remember (with much pride) the fact that the Baltimore and Ohio was first to connect

The sweet-toned bell from the old Engine House at Cumberland

us up with the Western country, which before that time, was reached only by the old prairie schooner and that extremely dangerous.

Today it is a luxury to board a Baltimore and Ohio train for north, east, south or west, even the day coaches. Only last week on my way from Baltimore to New York, I stepped into the dining car and asked for one of those \$0.75 cent dinners, and while it was being prepared the conductor handed me a copy of the Baltimore and Ohio Magazine, which I looked over, and when I left the car he gave it to me. The dinner was all anyone could wish, and far surpassed dinners I have paid \$1.50 for, in quality, in the way it was served, and in the courtesy shown me. In fact if the Baltimore and Ohio reached every point I have to make, no other road would ever see me.

And right here I want to congratulate every man on the System, trainmen, baggagemen, ticket sellers, and last, but not least, the gentleman at the information counter, main building, Baltimore. I have forgotten his name, but he is so careful and thorough.

President Willard is to be highly complimented for the remarks he has made on page 4 of your October, 1922 number. For after all, we are all striving for the same end, and that is success, and in unity only can we achieve this, for in unity there is strength when we bid defiance to all opposition. But separated, we are speedily broken.

## Picked Up on Number Five In the Diner

(Steward Heller in Charge)

Man from New York: Say, waiter, what kind of hens lay these eggs?

Waiter: Why, er, I dunno, Boss, I reckon they must be pretty good hens or we wouldn't have no dealin's with 'em.

Man from New York: Well, I should say they must be large ones all right. In New York, where I come from, the eggs must be laid by bantams. These are beauties.

## In the Pullman

Business Man (who had been asleep since leaving New York): Where am I?

His Secretary: Just about twenty minutes out of Baltimore.

Business Man: By George! It's some train that will let you sleep in a chair for that length of time. Do you know, I couldn't tell you the day when I did that before.

The late Stanley W. Pollock

## Safety Roll of Honor

### Connellsville Division

**Section Foreman J. F. Kelly.** Manila, Pa. November 14. Noticed about 18 inches of flange broken out of lead wheel on P. & R. 29782, No. 97. Notified conductor, who had car set off at Sand Patch.

### Pittsburgh Division

**Operator C. M. Watson.** FY Tower. December 7. Noticed door torn off first car from engine in Train 13. Contents of car in a pile and likely to fall out. Mr. Watson notified dispatcher, who had trouble corrected.

On November 23 Mr. Watson discovered fire on bridge at Thirty-third Street Viaduct, about 75 feet west of office. Because of high wind, fire gained such headway that operator was unable to extinguish it. Called **Conductor McCormack and crew**, who tore up planks and finally got fire under control.

On December 6, Operator Watson noticed sparks on bridge 250 feet from tower. Sparks suddenly burst into flame. He notified dispatcher, then went out and extinguished fire with six buckets of water which he carried from the tower.

**Operator R. N. Murray, (Second Trick).** Marion Junction. December 6. Noticed train on Elba Hill moving without engine or crew. Extra 4530, west, was approaching Laughlin Junction to head in on Junction Railroad. Mr. Murray ran around ahead of the 4530 and set brakes to stop the train. He also called to brakeman on that train who jumped off and helped him set brakes.

**Operator J. P. Davidson.** Layton Tower. October 28. Noticed door swinging from bottom of box car in middle of train of Extra East Engine 4852. Notified crew on caboose.

### Charleston Division

**Engineers J. W. Paisley, Whitecotton, Robinson, Hefner, Hoover, Morgan, Morrison, Shears, and W. E. Paisley.** All commended for making more than 100 per cent. in fuel performance during month of September.

**Charles Taylor.** Harding, W. Va. Discovered broken rail near Norton. Walked two miles to report it to section foreman. Thanked by superintendent.

**Section Foreman S. S. Queen.** Horner, W. Va. Commended for turning in good material which he found along right of way.

**Conductor D. H. Lemaster and Fireman J. C. McTheney.** Assisted in moving yard engine promptly under trying circumstances

**Fireman D. E. Rohrbough.** Assisted in moving trains promptly and helping to handle extremely heavy express during Thanksgiving rush.

**Conductor E. F. Whalen.** November 27. Mariner's Harbor. Noticed brake rigging down on A. A. 3589, in train of Extra 1624. Train stopped and defect remedied.

**Agent-Telephoner J. R. King.** October 24. Mariner's Harbor. Observed door open and swinging in dangerous position, Frisco 124858. Notified dispatcher and yardmaster at Arlington. Train stopped and car set off for repairs.

### Chicago Division

**Operator J. F. Spencer.** Walkerton, Indiana. November 17. While passing through Walkerton, observed brakes sticking on car of train No. 14. Notified dispatcher, who stopped train at La Paz Junction. Wheels found to be red hot.

### Newark Division

**Supervisor J. W. Sharp.** Mansfield, Ohio. November 30. While First 88 was passing Mansfield Depot, observed something dragging under train. Flagged train, notified crew, who discovered and removed loose brake beams.

**Operator V. Mulquinn.** North Siding, Ohio. November 20. While First 88 was passing North Siding, noticed something dragging. Flagged train and notified crew, who found and removed loose brake beam.

### Ohio Division

**Patrolman Lieurance.** Columbus, Ohio. November 25. Discovered broken rail near Mound Street. Went to Broad Street and telephoned sectionmen to make repairs. About six inches of rail broken.

## Finds Father's Picture through Magazine

ON page 15 of our November issue there was a picture of a group enjoying an O. R. C. picnic at Gettysburg in July, 1892. The first figure on the left in the first row was Engineer "Jess" Laudenslager, who has been dead a number of years.

His son, Mr. Frank Laudenslager, while visiting in the home of Joseph Swikert, Relief Department, saw the picture in the MAGAZINE. It happens that he did not have a single picture of his father and, through the courtesy of Robert Burnett, Information Bureau, Camden Station, who loaned the picture to the MAGAZINE, Mr. Laudenslager now has the original in the hands of an expert photographer and is having copies of his father's picture made.

## General Office Bowlers on Another Rampage

ON December 4, the Baltimore and Ohio Railroad Team journeyed to Foley Hall and trimmed the St. Martins Team by 256 pins on the three games. Pritchard was highest man for single game with 145. Gallery took top honors for three consecutive games with a total of 359. Scores follow:—

ST. MARTINS		
Belz.....	99	99 108

## Secretary of War Praises Handling of Crowds at Army—Navy Game

November 29, 1922

Mr. Daniel Willard,  
President, Baltimore & Ohio Railroad,  
Baltimore, Md.  
Dear Sir:

I desire to express the appreciation of the War Department for the splendid service rendered by your railroad to and from Philadelphia on November 25, 1922, in connection with the Army and Navy football game. I was much impressed with the excellence of the arrangements made for this transportation service, and am sure the officers and other personnel of the Army join me in this opinion.

The railroad officials responsible deserve much credit for the results of their interest and efforts on this occasion.

Yours very truly,

(signed) JOHN W. WEEKS

Secretary of War.

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Buildings

#### Law Department

Correspondent, GEORGE W. HAULENBEEK

#### Jury Duty

I never could understand why there should be so much objection to the performance of jury duty. Men in our building and in the Annex are drawn for jury service. They submit to the Law Department various reasons why they should not be required to serve, and their attitude always reminds me of the Biblical illustration where those invited to the marriage feast gave sundry excuses for their non-attendance. One man had bought a piece of land and must needs look after it. Another one had entered into matrimony, and could not possibly attend. I always harbored a lot of sympathy for that fellow and regarded his excuse as a perfectly valid one.

I learned many things from my service as a juror, and one of the things that startled me was that Baltimore possessed a plethora of individuals who were determined not to support their families. In every case Judge Duffy warned the culprit that if he did not make provision in caring for the wife and the little children, a jail sentence would speedily follow and from that time I fell in love with the Judge.

"Father fell upon the ice,  
He couldn't skate or stand;  
Father saw the Stars and Stripes,  
WE saw the Father-land."

My friend, C. A. Duvall, says he reads the ebullition of the Law Department correspondent of the *MAGAZINE* first. C. G. Pollock, with his usual smile, makes the same observation, and so does my signal engineer friend, F. P. Patenall. All of these gentlemen are in full accord with the Economy Drive, and so am I.

#### Dean of the Building

C. W. Egan, our general claim agent, says that the Law Department correspondent is the dean of the Building, in point of service and age. Girls, I am going on eighty, think of that!

#### One "Pudden" Please!

I enjoy my noon visit to the lunch room. I find everything succulent and appetizing. I generally have a fit when some one near me orders "pudden." I observe that young ladies, in ordering, never think of calling it anything but "pudding." Now I feel much better.

### Engineering Department

Correspondent, OSWALD K. EDEN

On the threshold of a new year, 1923, let us look back for a moment and consider the past year in our lives, and, where we fell down, be it only in a small way, let us, in the New Year, resolve that if it can be possibly helped, we will not fall down in the same places again. Let us profit by the mistakes we may have made.

One of our efficient young lady stenographers, Miss E. M. Bernat, left us on December 1 to accept a position in the Employment Bureau. She is missed by all.

Miss Evelyn Langgood is the newcomer to our force, vice Miss Bernat. Welcome!

To save is to have: Get the habit!

And while on the subject of Saving, don't look out for your own welfare only, but think of the Company for which you work.

It was mighty nice of our officials to let us off at 11.30 Saturday, December 2, the day of the Army-Marine football game. It shows their thoughtfulness, even of our pleasures. Everyone was thankful for the little extra respite.

Our bowling team, while still leading the league, is only a little ahead at this writing, January 4. Bowl 'em over, fellows! Keep up the good work, and strive to increase the margin that exists.

Our photostatter, C. L. Allard, waited until it became cold to take his annual vacation, which he spent in Key West and other southern points of interest. He was kind enough to send me post cards en route, picturesque scenes of the country which he traversed. He thoroughly enjoyed himself.

Since a certain young lady left us, H. B. B. does not wear his usual noon-day carnation. Why?

### Office of District Engineer, Pittsburgh

Correspondent, J. M. WHEALAN,  
Field Accountant

Special attention should be given Mr. Willard's message in the December issue of our *MAGAZINE* on "Saving." Let us individually and collectively see what we can do during the forthcoming year to match the spirit of our president. C'mon, let's go!

It is with pleasure that we announce the arrival among us of Miss Orpha M. Emory,

who becomes secretary to Mr. Clarke, succeeding the former efficient holder of that title who has just recently become Mrs. Curry R. Borland.

For the past few months there have been many rumors.

In support of this, please note the following:

"The wedding of Miss Anne Marie Doyle, daughter of Mr. and Mrs. Sylvester Bryne Doyle of Duquesne Heights, and Mr. Curry Randolph Borland, son of Mrs. Agnes Johnston Borland of Hazelwood, took place on the evening of November 29, at 6.00 p. m. Rev. Daniel J. Devlin, of St. Stephen's Church, Hazelwood, officiated. The bride was attended by her sister, Miss Doris Joan Doyle, while Mr. Kerwin Flannery served as Mr. Borland's best man. A reception and dinner in the Doyle home followed the ceremony. Covers were laid for thirty. After an extended eastern trip Mr. and Mrs. Borland will be at home in Pittsburgh."

Curry has been in the service of the Company for about seventeen years and Miss Doyle for about six. We sincerely regret losing Miss Doyle as she has been a splendid and agreeable worker, but we hope she will find time to visit us occasionally so that "auld acquaintance" may not be forgotten.

R. M. Boucher, who has been spending the summer in the country and incidently overseeing the erection of Bridge 170 at West Alexandria, Pa., has returned to the office, his work having been completed.

### Office of District Engineer, Cincinnati

Correspondent, G. F. DAUBENMERK

We all offer sincere sympathy to George Kopp, Jr., stenographer in this office, in the loss of his father, on November 7.

Assistant Engineer P. A. Callahan took Thanksgiving dinner with the family of Mr. and Mrs. J. E. McKibben—one way to take care of the vexatious question of "Turkey."

S. A. Graham has sold his house in Wyoming and is now located in Walnut Hills, Cincinnati. What's the matter with Wyoming, Sam?"

E. J. Southerington sold his property in Baltimore and now has the automobile craze, having purchased an Oldsmobile sedan. He is helping poor John D. along in life by purchasing "gas." Great activity is also noted in the various civic bodies relating to speeders. He has also purchased a habitation on Sheridan Drive, North Norwood, Ohio, and is prepared to tell the profiteering landlords to vamoose.

The accompanying picture shows the two boys of your correspondent, Roy aged five, (right), and Frank, aged eight (left). Chips off the old block, wh?

Frank age 8 and Roy age 5 Daubenmerk

Herbert Scribner has discontinued the study of medicine and has taken to law—affidavits being his specialty. We beg to advise him that he had better stick to vibratory medicine.

"Save and Have" applies to corporations as well as to individuals. Don't forget that each employe is a part of our Company and that each of us must economize in every possible way. If we do this honestly the results will be a well earned surprise for our officials. Remember: If each "does his bit" success is assured.

Our entire force wishes the Baltimore and Ohio family a Happy and Prosperous New Year. Let's forget the trials of the past year and give our best efforts to our employers, so that this year's balance sheet will show what cooperation can do.

#### Office of General Baggage and Milk Agent

Correspondent, MABEL MENGES

We are very glad to report that Mrs. Henrietta Phillips, whom we mentioned last month as convalescing from a serious operation, is again back at the office much improved in health.

In connection with the campaign inaugurated by the general managers of the Eastern and Western Lines to operate passenger trains on a 100 per cent On-Time performance, the Baggage and Milk-Cream Department is issuing Circular 208 in order to do our bit and to co-operate with the Management so far as our part of the service is concerned.

It is sincerely hoped that each and every one connected with this branch of the work will make a conscientious effort to co-operate with the Operating Department in bringing the trains back to an On-Time schedule. If you haven't studied carefully Circular 208, go over it right away. You'll find it interesting and instructive.

We have just discovered that we have some dramatic talent in our midst. Wallace Oest, our senior office boy, recently took one of the leading parts as "the grouch" in a play given at Lehmann Hall, December 5. If you could only see Wallace's ear-to-ear smile and hear his contagious chuckle, you would realize that it required some acting to convince the people of his part.

Why! Wallace even chuckles when we tell him that there is too much draft and the window *must* be lowered.

You will no doubt recall the story about "Lost and Found Articles" which appeared

Charles Lee Hines, who makes passengers happy by returning to them articles lost on our property

in the April, 1921, MAGAZINE, and have been noticing from time to time the letters of appreciation from our passengers to whom lost articles have been returned.

Let us now introduce to you the clerk who responds to the S. O. S. calls when articles are left behind, Charles Lee Hines, who is shown in the accompanying picture.

Mr. Hines requests that all fellow employes in a position to do so, please assist him in returning the lost articles by promptly sending them in to this office when found. By complying with this rule a great deal of time is saved and unnecessary tracing averted. And now since you are better acquainted, we feel sure that you are going to make a special effort to help Mr. Hines help others, and prove to each passenger that his smallest interest is our interest,—and last but not least, to advertise SERVICE.

Our pride has taken a fall. We thought every one knew where we were located, but we recently learned differently.

The other day a gentleman, en route from Columbus, Ohio to New York, stopped off to inquire about a complaint he had previously made for damages to a trunk. During the course of conversation, he related the difficulty he had experienced in locating this office.

Upon arriving at the station, he inquired for the General Baggage Agent's office, being informed it was located in the Baltimore and Ohio Central Building,

W. C. Bowhay, special agent, on the water wagon

Charles and Baltimore Streets. On arriving there, he was told the office was located at Camden Station where he had detrained. He returned to the station, and again making inquiry, he was sent to the third floor of the depot, only to be informed there that the General Baggage and Milk Department is in the Camden Warehouse. He proceeded to the Camden Warehouse, and again inquired of someone on the first floor, who was unable to tell him, but fortunately some one passing by, and who knew, directed him to the fourth floor.

When this gentleman finally reached the office, from all outward appearances, he seemed quite serene, but I wonder what he was thinking by that time about service, efficiency, and some of the other symbols for which the name of "Baltimore and Ohio" should stand.

While we do not know who this man's informants were, do you not think it would be a good idea, even though it is not required, for each one of us to be able to

furnish intelligent information about the location of at least our general offices?

Doris Marie Hollenshade, whose daddy is a clerk in the Baltimore and Ohio Mailing Room

#### Office of the General Freight Claim Agent

Correspondent, NORMA H. APPLGARTHE

We are requested by President Daniel Willard to save for the Railroad and for ourselves, and the editor believes in beginning at home; hence we are limited to small space in "Among Ourselves," and consequently the brevity of our notes.

We understand that Mr. Wootton is counting the cost of "married life" even to the decorations and that Iona has a list of names at the top of which are the "sad words" Invitations and Announcements. Miss Norris, Oh well! We can't just say, (she is so different) but we think we are in for spending a few pennies with this bunch of weddings on the list.

We were all much surprised and also amused to see "Peggy" Caulfield break out one morning with a beautiful *red* and *tan* striped sweater. She was greeted with such remarks as "Keep away from the stock yards," "Don't go too near the bull pen," etc. Even her little dog, "Bimbo," showed signs of shell shock when he first saw her in that sweater. She enjoyed herself immensely and also furnished a pretty good time to the entire office. Some Blazer!

Miss Beulah Wilson is helping to "Brighten the Corner" of the Dictaphone Department. We are glad to have her with us.

Sorry to report that Miss Vick suffers a great deal with a stiff arm. Some say she is often seen with a fat man, so she may have stretched it just a little too far. Who knows? Muscles will get stiff if exercised too much. How about that, "Jan?"

Miss Margaret Rider is a wide awake girl but just the same she dreams, because one evening she was deep in thought she neglected getting off the train at Riderwood. Tell us, was the sandman or Cupid responsible.

We are glad to report the victory of our Young Ladies' Bowling Team gained over the ladies of the Auditor of Freight Claims Department. We have a great team. Challenge them and see!

We have in the accompanying picture a person whom no one can mistake—W. C. Bowhay on the "Water Wagon."

## “My Hamilton Times the Chicago, Washington, New York Limited”

**B**ACK of the powerful 5200-type locomotive, speeding this fast Baltimore and Ohio train, is the clear eye and steady hand of Engineer H. W. Fauver—and the Hamilton Watch he has carried for fifteen years.

It is significant that wherever you find fast limited trains, you will find Hamilton Watches keeping them to schedule. The Hamilton is not only as accurate as a watch can be, but it is also dependable, sturdy, and sure.

The favorite of Most Railroad Men is the Hamilton No. 992, which can be purchased from any jeweler at \$48.50 for the movement alone.

If you want accurate time with doubt eliminated, invest in a Hamilton. It will render you hourly dividends of true time—and prove cheapest in the end.

We will gladly send our New “Time-keeper” to any Railroad Man writing for it. It tells the story of the Hamilton Watch, and gives much valuable information.

HAMILTON WATCH COMPANY

LANCASTER, PA., U. S. A.

# Hamilton Watch

“The Railroad Timekeeper of America”

The late H. M. Fugman, mail wagon driver. Mr. Fugman died on November 25 after an illness of three weeks.

The picture was taken while Mr. Bowhay was on his vacation in the West. We wonder if he stayed on that wagon. It is a dark secret just how he got there at all.

Do your bit and save in every way for the Railroad and yourselves. Help Stop The Leak!

#### Mail and Express Traffic Department

Correspondent, T. E. REESE

In the accompanying picture we have Doris Marie Hollensshade, six months old daughter of C. Hollensshade, assistant night distributing clerk, Central Mail Room.

It is with regret that we announce the death of H. M. Fugman, driver of the Central Mail Room mail wagon, at the Franklin Square Hospital, on November 25, after an illness of three weeks.

Mr. Fugman first entered the service with the Blue Line Transfer on February 27, 1913 as driver of that line. On October 4, 1917 he was furloughed from the service to join Uncle Sam's forces. After training at Camp Meade, he crossed the Atlantic for France. On June 16, 1919 he returned to the Blue Line as chauffeur, and on June 1, 1920 he again filled the position of driver on our mail wagon. This position he maintained up until the time of his death.

#### Relief Department

Correspondent, H. IRVING MARTIN

##### An Apology

The Editor of the MAGAZINE regrets that on account of an oversight on his part the Christmas greeting from Mr. Dudley to the employes of this department, which was sent to the MAGAZINE office to be published in the December issue, was not included therein.

All of the railroad tribe who have changed time at the Ohio River recall the thrill they experienced when they left the West Virginia side, say at twelve o'clock, and arrived at the Ohio side at eleven, one hour before they started. "Dan" Shivers, with his wonderful machine, can beat that in his own home town. A tale is told that having an appointment at eight, and being rather fatigued that morning, he did not get awake till eight fifteen. However, would you believe it? In his trusty machine he gets

himself to the appointed hour on time. "Some machine," says "Dan," "some flivver."

Miss Lillian C. Gerhold, the jaunty secretary to the chief clerk of the Savings Feature, betook herself to the Garden of the Gods. When asked about her vacation and the manner in which she spent it, she made a noise like unto an oyster. We understand that she travelled incog. Not having any Colorado papers at hand, we do not know if the governor of the state or the mayors of the cities through which she passed discovered her identity and passed out the keys. She informed us that she rested on several mountain peaks, but no mention was made of an escort. Who was the rash man who said "a young lady would tell all that she knew?" Not so with our sphinxess. The mountain air has put an extra edge to those good statements and letters she turns out. If she used any old machine she would make it a *Royal* before she finished with it.

We welcome to our official family Irving C. White, from the office of F. A. Deverell, assistant comptroller; succeeding to the position of bookkeeper in the Savings Feature, vacant since the resignation of Dixon R. Thirston. I. C. W. takes hold like a veteran. We wish him all success and the cooperation of his associates is assured.

Back to the job is Robert Baldwin; good luck and good health to him from now on.

Why so little left of the luxuriant locks of some of our registrars and application clerks? Shades of Sherlock Holmes and Herpicide! Is it Going! Going! Gone!?

A new member has joined the Relief Department family in the form of a 12-pound bouncing baby boy, born to Mr. and Mrs. John E. Weinger, on the morning of November 4.

John Schuppner has bidden adieu to his tonsils. Your correspondent can shake hands with him in the thought that those organs were a source of discomfort, and their absence gave new tone to the whole system.

#### Valuation Department

Correspondent, J. A. RENEHAN

Our friend John-son recently took Kydd Risheill for a walk. The day was Klier when they started, but after strolling on grass, Green from the Dews of many nights, a storm came up and it was necessary for him to Tuck-er under his arm and Hunt shelter in a Meese or pay a Taylor's bill. They met the old Miller McCrone on Crawford Road below Stevens Corner, who on account of her size, thought she was a Minor and asked her if she could Reid and Wright. She tilted her chin and said she had Rit-ter name all over the mill with the Faber pencil. At that he raised a Rau and said she was a Bratt and that he would call Policeman McGarry; she, smiling as usual, said she hoped to see his Mil-burn. As a Cook little need be said, she preferring to listen to Wagner. At home she started to prepare a meal, but finding she would Need-ham, she rang the Bell and sent Pet-er-sen to Kriebbaum's stall in Richmond Market. After raking the Coles, fixing Campbell's soup and drawing some of the Porter made by Brewer Leimbach from the Fossett in the cellar, they later heard Faust and ate Wilbur buds. Then as John-son was Slo-comb-ing to see her, in answer to his "Little one, can I see you tomorrow," she replied "No, but Roy Dun-can." She is a Bonney girl, good at Bol-in, strong Hopkins

rooter, and one whom "Dick" Edwards likes to Turn-er round and look at, and who Gaines friends daily.

#### Famous Sayings Heard in the Office

Precisely, just as I thought.

Kindly lend me a little of your wisdom and knowledge.

Hello old dear! (Accompanied by slap on back).

On November 5 our friend Janney reported an addition to the family. Janney is certainly proud of his little girl. He says she is a Democrat.

#### Auditor of Coal and Coke Receipts

Correspondent, JOHN LIMPET

The first complete round of games for the office duckpin league ended on December 8 and showed the standing of teams as follows:

	WON	LOST	PER CENT.
Royal Blues.....	24	15	615
Head Lights.....	21	18	539
Pull Men.....	20	19	513
Bumpers.....	13	26	333

The race is still wide open and it's anybody's candy. The Bumpers are apparently outclassed, or outlucked, but the other three teams should battle right down the stretch. May the best team win!

Ackler had his eye on the pins on November 17 and rolled three games of 120—100—119 for a total of 339, seven short of the record.

Frank Miller surprised everybody—and himself most—by putting over a 124 game on November 24.

Royal Blues hung up a new team score for a single game by collecting 513 sticks on December 1.

#### Adv. for Glee Club

A certain prominent member of the Glee Club, and a young lady of the office, who have been practicing vocal duets, tried them out at a church affair some time ago. From reports in circulation, the results were 100 per cent. Everybody who was able beat a hurried retreat and there hasn't been a mouse or a rat seen in the building since. Anybody troubled with mice, rats or similar pests would do well to get in touch with O. R. L. of this office. A sure cure and reasonable rates.

"The finest way to travel is by the Best and Only—and I wouldn't miss my train for the world. Get out of the way, I'm comin'!"

(With Apologies to John Newman's "Homilies of the Hudson.")

As we gaze about the business world, we marvel at the multifarious lines of industrial activity, and when we reflect on their smooth operation, it shows that business success depends upon the co-ordination of many factors.

Efficiency is sought by architects, accountants, bankers and laborers. There can be no efficiency without organization, which must extend consistently throughout the entire fabric, or the inevitable consignment to the industrial scrap-heap follows. Efficiency is particularly valuable in the field of transportation and to demonstrate that the railroads still have operating executives of high caliber, we have only to look at the records of the total car loadings, 988,381 for the week ending September 30, 1922 (only three per cent. less than the highest recorded total, which was in October, 1920). "Is this not a practical demonstration," says a writer in a Business Bulletin, "in spite of the neglect and abuse suffered by the railroads and the discouragement given men contemplating entering railroading as a career?" The fallacy of the old charge that the railroads are wasteful and inefficient is becoming daily more apparent. But it takes great enthusiasm to oppose the factors constantly opposing railroad progress.

Speaking of enthusiasm, it's a great stimulant, aiding us at all times to put forth our best efforts. Let's continue to use it in our work. A large business training institution in the West which teaches by correspondence thoroughly believes in enthusiasm. It tries to instill enthusiasm in the minds of its enrolled students and in all its lessons and lectures this subject is predominant. No human work is well done unless it is a pleasure both to the originator and the user. Mistakes should not discourage, for "To err is human," and Shakespeare has stated: "What's gone and what's passed help should also be past grief."

The stork has visited the home of W. N. Owens. It's a boy.

Robert R. Roman has been transferred to Real Estate Department. Good Luck, "Snoozie."

Correspondent, JOHN NEWMAN

The editor of this MAGAZINE has, in his December letter to the correspondents, which you find posted on the bulletin board, and which you are requested to read and NOTE, counselled our correspondents to save by restricting our "A. O." notes to important items. Which leads to the question: "What is important?"—To each one of us our own big self, of course, is the most important thing; each one of us stands at the apex, in the centre of the Universe, around which all else revolves. But—I remember some lines of S. E. Kiser in his "More Truth than Poetry" in which he introduces the Creator as viewing this planet and beholding us working out our metagenesis and salvation by our latest improved methods,

Nathan, 5 year old son of George Bangs, clerk, Auditor Merchandise Receipts Office

**Auditor Merchandise Receipts**

Correspondent, P. HENRY STARKLAUF

The New Year starts with a Baltimore and Ohio Boosters Club within our circle, to advance that which we herald throughout the length and breadth of the land—Service.

Now as a good beginning we have W. J. Finn, Interline Division, who reports a passenger—Baltimore to St. Louis, all Baltimore and Ohio; one to Harlan, Ia., Baltimore and Ohio to Chicago, and one to Lake Charles, La., Baltimore and Ohio to Louisville. Shane McShane reports two tickets Chicago to Blauvelt, N. J., Baltimore and Ohio, Chicago to Philadelphia. Well, it's up to the rest of the organization to match 'em. Next! Snap it up, Fellows!

Arthur C. Bromwell, Revision Department, and Miss Alice M. Eiler were married by the Rev. Jeffries, William Street M. E. Church, on November 25. Niagara for their honeymoon!

I. Arthur Euzent, Interline Department, and Miss Rose M. Polikoff were married by the Rev. Cantor R. Rifkin, Aitz Chaim Synagogue, on December 10. A reception was held in the ball room of the Chateau Hotel. They honeymooned to Palm Beach.

Again I rise to remark that our trainmen are cultured gentlemen. Witness this fact: Brakeman on No. 10 into Youngstown and New Castle on the evening of November 30, may have been done out of his turkey and his cranberry sauce dinner, but it did not impair his good nature. Passengers were profuse in their praises of his attention to duties. Along with the rest, I say "You're the goods, there, young fellow."

Since our last notes the Forest Park population has increased one in the household of James Varina. Congratulations on the arrival of the daughter!

BALTIMORE, MD.

and, after satisfying himself that all was well, as foreordained, turning away "to watch important things." Howsoever, as there cannot be anything more important in mundane affairs than engagements, marriages and births, such notices will always be given precedence.

It gives me real pleasure to be able to announce in this issue the engagement (by the established two carat custom) of Miss Kathleen Slane, one of the many nice girls of Hibernian ancestry of which this office is proud and boastful. The party of the second part is still a secret. (I almost said "a myth.")

Next in importance is the news of Frank Manthey's marriage. Mr. Manthey, chief claim clerk and quondam (this is not a cuss-word) correspondent, walked up to me one night before Thanksgiving Day, shook hands and said "So long! Off on my vacation. Going to get married Thanksgiving Day; bye-bye!" May all future Thanksgivings find him thankful for the one of 1922. Let's wish it. Miss "P. K." furnishes the following interesting details: "Wedding Bells again—it must be in the air. On Thanksgiving morning Frank A. Manthey, chief clerk Claim Department, was wedded to Miss Josephine Roth. A few of the members of the Claim Department attended the ceremony, which was held at the St. Aloysius R. C. Church, Brooklyn, N. Y. We must compliment Mr. Manthey on his good taste. The bride looked beautiful in a white satin gown and a crown of orange blossoms, carrying a bouquet of white roses. The groom—well, he was the "cat's meow," attired in a tuxedo suit, high silk hat, tan overcoat and a white silk and red polka dot scarf. Mr. and Mrs. Manthey honeymooned at Niagara Falls and Washington, D. C. Well, here is luck to you both and we wish you—what you wish for yourselves."

**Happy New Year!**

I came across the following lines, no author nor authority being given, but they are worth while, containing a gospel of cheer: "The place to be happy is HERE; The time to be happy is NOW; The way to be happy is to— Help Others Be Happy."

On November 27, Irving W. Doty was employed as office boy in the Superintendent's Office, vice Edward Finley, promoted to clerk, Car Accountant's Office.

Joseph T. Morris has been employed as crew assignment clerk, Station Master's Office, vice Malcolm C. Sanborn, promoted to crew assignment clerk, St. George Yard Office, vice Joseph F. Lynch, promoted to chief clerk to freight trainmaster, vice Frank V. Martin, promoted to yardmaster, Cranford Junction.

On November 1 Conductor Thomas F. Carroll was appointed assistant night trainmaster, with headquarters at St. George.

Signal Maintainer Chris Salverson is receiving congratulations from many of his friends on the arrival of a baby boy on December 11. "Grandad" is proud of his namesake, William Dryden Salverson.

**The Old Line**

We have a conductor named Lynch,  
Who says that his job is no cinch,  
From morn until night,  
He does nothing but fight—  
That good old conductor named Lynch.

There is another conductor named Williams,  
Who's punched tickets way up in the  
millions,  
On the nine after one,  
Is the trip he gets done,  
That good old conductor named  
Williams.

There's another conductor named Ford,  
Who says very soft, "All aboard,"  
His run is at night,  
And he sure is polite,  
That good old conductor named Ford.

We have three more conductors named  
Hayes,  
Who deserve lots of credit and praise,  
Never grumble or shout,  
But keep working about,  
Those good old conductors named Hayes.

We have many others you know,  
There's McAndrews, Brennan and Gerow,  
They are good men, you see,  
Yea! they all have to be,  
To work on the S. I. R. T.

Correspondent, WILLIAM H. ZELL  
General Office

In view of the fact that Fred and Poole could not get out to the Army-Marine Football game, they endeavored to play it over here in the office at noon time. Fred got the bowl (which contained SOUP) and in passing it to Poole for a forward pass, fumbled, and the bowl (OF SOUP) was dropped. Poole recovered the bowl in his lap, but was penalized for rough tactics. Now the question is, Who's going to pay for the damage done?

Hankin seems to be spending most of his time now in moving picture parlors by himself. What's the matter, "Hank," won't they let you come in anymore?

**Shop**

On November 25, W. F. Banahan, Stores Department, better known as "Bannie," received a visitor at his home, a baby boy; fine business!

Harry Wilkens, material man, No. 3 Shop—is confined to his home because of illness. We certainly miss you, Harry; hurry and get back with the rest of the bunch.

Foreman Edward Moran, No. 1 Shop, in telling some of the boys his hunting experience, stated that he got 21 rabbits. We have all been there ourselves, "Ed," but would like to see the 21 tails.

Foreman Lawrence Galloway, Erecting Shop, says he feels kinda out of place when he gets home at night. We all thought it was "hootch," but we find that Lawrence has taken up painting the house from cellar to garret.

\$10,000 REWARD! A certain young lady in the Smith Shop offered this for the recovery of a lemon pie, which some scoundrel embezzled from her locker. Heard anything about it yet, Amy?

The question is—Why did "Shorty" leave the Welfare Dance, when he lamped a certain young lady?

William Sapp, Flue Plant, retained his record of not having missed a day at work in 1922. Some record, "Bill." Keep it up.

Judge Duffy (Kuhle) is getting worried. He says that the bootleggers are getting close to his hanging-out place and he's afraid they will mistake him for one of them. Keep your eye peeled, "Judge."

**Baltimore Division**

Correspondent, W. H. TARR

East Side, Philadelphia

Correspondent, C. H. MINNICH

This is a belated account of the serious accident which happened to H. W. Molin, yard brakeman at Eastside in early October. While riding on the front end of an engine he either fell or was jolted off, falling beneath the wheels and crushing both legs so badly as to require them to be amputated just below the knees. Complications later necessitated another amputation, just above the knee caps. Latest information indicates that Mr. Molin is improving. He is receiving medical treatment at St. Anges Hospital, Philadelphia. Needless to say he has the sincere sympathy of all of his fellow workers here. We trust his recovery will soon be accomplished.

Notwithstanding the pressure of business, Arthur Needham, clerk at East Side, recently found time to secure some good passenger business for the Road. Knowing that two ladies of his acquaintance contemplated a trip from Philadelphia to Los Angeles, California, "little Arthur" got right on the job and offered to secure their tickets, reservations, etc., to the coast. This he did by communicating with our City Passenger Agent DeRoba and not only secured the business from Philadelphia to Chicago via the Baltimore and Ohio but also enabled the Philadelphia Ticket Office to get credit on the entire fare to the coast. Just to make sure the ladies got started right, Arthur secured a pass and accompanied them as far as Harper's Ferry. If such interest would be taken more generally, think of the increased passenger business for our Railroad!

Will you go forward during 1923? Then make the minutes count. Conscientious work will win its reward in the end!

Doris Lillian, 2-year-old daughter of Blacksmith and Mrs. Andrew W. Batch, Mt. Clare

Edward Vernon Frye, son of Chief Delivery Clerk T. E. Frye, Washington Freight Station

Washington, D. C. Freight Station

Correspondent, W. L. WHITING

Happy New Year To Everybody!

In opening an old book recently the writer found a clipping from a magazine which seems to embody all the features of a New Year's good resolution and we pass it along to the readers of the MAGAZINE:

*"I expect to pass through this world but once. Any good thing, therefore, that I can do, or any kindness that I can show to any fellow-creature, let me do it now. Let me not defer or neglect it, for I shall not pass this way again!"*

If we can carry out this principle it will be indeed a very Happy New Year for everybody.

There is one proud father at this station, our chief delivery clerk, T. E. Frye, and he certainly has reason to be proud of his only son, Edward Vernon Frye, whose photograph, in the uniform of the High School Cadets Corps of McKinley Manual Training School in this city, is shown here. Edward Vernon is only fourteen years old, and thus far has never missed a promotion in the schools, and all prospects indicate a continuance of this good record. Incidentally, he is also a performer on the violin of no mean ability, and promises to make a name for himself in the musical world. His father is an old Baltimore and Ohio employe, and we certainly wish the son success in his career, both for his own sake and for his father's.

We have in our yard a philosopher who once in a while bursts out with an epigram that is worth repeating to our MAGAZINE readers. His name is "Gus" Miller, and he is the conductor who keeps the coal dealers in the city on the jump to dump their coal and keep up with his rapid placing of their cars.

Gus has used any old piece of paper that he could find for his purpose, in the same manner as "Bobby Burns" used to write his poems, and the famous artist Giotto drew his best pictures on any rock or stone available. "Gus" says:

"It takes 68 muscles to frown,

"It takes 16 muscles to smile;

Please mention our magazine when writing advertisers

"Smile, then, smile—don't waste human power—This world is what you make it!"

We have had one change since the last notes. Tallyman C. M. Webb left us to mingle with the folks in the Yard Master's Office as yard clerk. We wish him success in his new venture.

**Brunswick**

Correspondent, R. L. MUCH

To the Agents at Frederick, Hagerstown, and all points near Brunswick:

Send your news items to the correspondent, who will be glad to forward them to the MAGAZINE. Let's show the rest of the Baltimore and Ohio folk that we mean business, that we are doing our share to promote pleasant relations between ourselves and the Management.

Revival services have been in progress at our Methodist Church, under the direction of the minister, O. W. Brittingham, a forceful man, who appeals particularly to our Railroad men, and who has been a source of much comfort to us all in every emergency. He extends a hearty welcome to all of our railroad men to attend services.

Carter Ambrose, conductor and brakeman, has been unanimously elected local chairman of the B. R. T. Carter is a good, clean fellow, and we trust that he will make good with all with whom he comes in contact.

The Ladies' Auxiliary of the B. R. T. bought a new piano. Your correspondent had the pleasure of helping to place it in a position on the top floor of the Red Men's Hall. Some job! It was placed there under the supervision of the president, Mrs. H. C. Allgire, and she's some boss! But what's the use of complaining? We've got to do what the ladies say, anyway.

"Joe" Sigafoose, yard brakeman, strong man, and athletic instructor, is getting "spooney." He does not seem to be the same person since he met a certain little miss. While out walking, they give one the impression of two angelic doves. (Is nobody else around to listen? Sh-h! "Joe" is the originator of the expression, "It won't be long now.")

Pipefitter J. R. Matthias, secretary of the Brunswick Fire Department, is recuperating from his second operation at the Frederick hospital. He had his leg broken while boarding a fire truck on his way to a fire. We sincerely hope to have "Mutt" back with us soon.

Engine Inspector L. S. Harman has resigned his position to open a cigar and tobacco store in Brunswick. "Dutch" always was thrifty, and being one of our hard workers he deserves credit for his saving ability. He has named his store the "Lone Star." He makes a cigar by the same name, all in honor of the Lone Star Cowboy Band of our town.

The old landmark between the eastbound and westbound stations, known as the "Mouse Trap," which consists of several dilapidated houses, has been torn down, filled in with cinders and a new road cut through—making the place a beauty spot. It is reported that our Company contemplates placing a new terminal station here. This will improve our city 100 per cent.

"Cappie" Orrison, one of our most popular conductors, Trains 33 and 34, is the inventor of a new patent arrangement for the lifting of trap doors. It's great, and Mr. Orrison deserves credit for his invention.

Frank Otto, our cheerful friend, who also rides on Trains 33 and 34, tells us that his son, who has been suffering with diphtheria, is much improved. We are glad to know this. If you ever happen to ride over our locals, go into the baggage car and meet one of the most cheerful men on earth. He's always smiling.

"Andy" Kelly, assistant to our great economizer, Mr. Horn, has been busy lining up things along our road. Particularly do we mention Cumbo Yards, where 14 trains, averaging 100 cars each, were moved west in one day. This was the greatest westbound delivery in one day in the history of our connection with the P. & R. and C. V. Railroads, at West Cumbo.

Lieutenant W. Axline landed two crooks recently who had been stealing eggs out of No. 94 freight received in yards here. A number of robberies of this nature have occurred

recently. It takes the "Looie" to get them!

We feel sorry for our old friend, Brake Tester Frank Alexander, who lost his wife on December 5.

Notwithstanding his crippled condition, Yard Brakeman Grover Stewart is mighty cheerful. Good for him! He is just getting out of the hospital after having a part of his foot amputated. He is getting along as well as could be expected.

"Bob" Plush, popular yard brakeman, detailed for duty in westbound classification yard, has been getting the "97's" out on time. He has the "head ends" doubled over, causing no delay to the "Tabby" men when they couple up for their fast run west. We are much pleased with the manner in which Mr. Plush handled the situation on December 6, being called for Third 97, for 6.30 p. m. He left at 6.45 p. m., making the run of 103 miles in four hours. "Bob" is one of our men who does his best to make good. Stick to it, "Bob," we'll help you.

The accompanying picture is of the Brunswick correspondent, Conductor R. L. Much.

Mr. Much entered the service of the Baltimore and Ohio on January 8, 1908 under the supervision of Trainmaster C. L. French. During the summer of the same year he was furloughed. He then worked in the train service on the Wheeling Division under Trainmaster W. H. Riley. He has also worked on the Cleveland, Newark and Cumberland Divisions.

Mr. Much was promoted to conductor in

Conductor R. L. Much, who has put Brunswick on the map in the Magazine

September, 1913. He has served faithfully and conscientiously in both freight and passenger service ever since.

### Cumberland Division

Correspondent, JOHN J. SELL

President Willard calls the attention of every employe to the necessity for economy. This is a matter in which every employe can do his share, whether he be a trainman, an engineman, a shopman, a trackman or an office employe. There are numerous ways in which savings can be made, which space will not permit enumerating, but every employe knows just how he can do his bit, and make a saving, whether it be in fuel, supplies, stationery, electrical current, or any of the many other things necessary in the operation of the railroad.

The Cumberland Division has always been to the forefront in anything concerning the betterment of our system. Let us make it first in the drive for economy? Suggestions are always in order but personal attention is paramount.

The accompanying picture is a good likeness of G. Frank Messman, report clerk, Superintendent's Office, Cumberland. Frank boasts of sixteen years of service with the Baltimore and Ohio and is a one hundred per cent. railroad man. "Grandma," as he is affectionately known, is considered one of our most efficient clerks and is a rattling good fellow all around.

We have been able to dig up another old photo taken way back in 1898, showing the old Master Mechanic's Office force in Cumberland. All of these are well known to our older employes and a number are still in active service.

Another good picture of the recent past is that of the Superintendent's Office force, taken in 1914. Most all of these employes are still in the employ of the Company. We have also a picture of the Car Distributor's Office force taken during the year 1916.

Cumberland Division, as usual, is still holding first place on the blue print showing the Tonnage Performance, and with the force still on their toes, we are going to keep her there!

At a recent meeting of Fort Cumberland Post of the American Legion, and election of officers for the ensuing year, Train Dispatcher Harry E. Flook, Cumberland, was elected Post Commander. Harry served with distinction during the World War as lieutenant in the Air Service "Over There."

His many friends are glad to know that he has been accorded the honor of filling the highest post in the local commandary, and are boosting him for a national office.

Above are Glen, Wilford and Harold, children of Section Foreman S. M. Cockran, Charleston Division. Lower right; Virginia, age 3, the little sister of the boy above. Lower left, James Francis, 8 months old son of Box Packer Robert O'Connors, Brunswick, and grandson of Mrs. Stella Jones, who looks after the boys when they return from a hard trip

On being elected he stated that his aim was to increase the membership of the local post to seven hundred. We wish him the best of success in the drive. A large number of our boys are members of Fort Cumberland Post.

The Accounting Class conducted by F. L. Sheakley, division accountant, is making rapid strides and greater interest than ever is boosting the school towards the goal. Promotion of good fellowship is the aim as well as the affording of an opportunity to clerks and office men who desire to learn railroad accounting. A cordial invitation is extended to all clerks in the service to line up. Books are provided, lessons assigned at each meeting and collected for rating the following school night. Every effort is expended to help the other fellow along. The school is held every second Monday evening. To register, you simply call Accounting Office with the word, "I'll be there."

John Ketzner, one of our oldest veterans on the Cumberland Division, completed fifty-four years of actual service on October 1. After an illness of several weeks his many friends and fellow employes are glad to know he is again able to be up and around. "Uncle John," we miss you and trust you will soon entirely recover.

Cumberland's high standing in efficiency indicates that it is also a thrifty division. Maybe we can make it more thrifty. If you know of any way to economize send your suggestions to—

**Three New Year Toasts!**

**To Plant Employees:**  
Time moves on. May the New Year be fraught with blessings and a free from sorrow as an All-Wise Providence sees fit.

**To Our Officers:**  
We pledge you our loyalty. May you be able to furnish us with employment every working day throughout the year.

**To Our Railroad:**  
Dear old Baltimore and Ohio! May 1923 prove unusually free from wrecks, accidents and other misfortunes, and may your traffic in both passenger and freight be as great as you can bear!

(Signed) E. E. ALEXANDER,  
Supervisor of Plant

**Safety First!**

Through November without a three-day disability accident—not a one!

Our score now stands:  
September.....2  
October.....1  
November.....0  
December's record will show another "0" if every man is on guard.

**Stop That Leak!**

Don't order a single piece of material until you first see if you can't find something to do the job with.

During the revival services at the M. E. Church, Rev. Linadmood held a noon hour service at the Plant on November 21. On

If the stove in your kitchen was wasting coal and a friend called your attention to it, you would thank him. The Baltimore and Ohio will thank you for calling to its attention any railroad waste you know of. Please write "Stop That Leak," Mt. Royal Station, Baltimore, Md., and advise.

The following Sunday evening thirty-eight plant men attended the service in a body. This is the first time the Plant men have turned out this way and they not only made a creditable showing for themselves but made quite an impression. The services were most impressive.

The men in line included: E. E. Alexander, E. M. Stottlemeyer, Rev. Z. J. Powers, George Taylor, A. E. Irving, S. P. Hose, C. M. Lewis, B. F. Twigg, J. W. Twigg, R. G. Brown, J. H. Robinson, E. S. Robinson, W. D. Foley, R. Montgomery, W. G. Haines, R. H. Corbin, G. P. Cheshire, R. D. Nixon, B. F. Short, A. F. Leonard, H. E. Duckworth, J. C. Alexander, H. C. Mauk, E. F. Bean, J. C. Wilson, I. N. Saville, Loy Siefert, Mike Hornik, Boris Lenkowsics, Boris Sphak, John Grusha, Y. Kaneyani, Waseley Laruskin, Nick Wazko, John Oriska.

Division forces under Master Carpenter Taylor recently erected two new 80-foot stacks at the Plant.

A Parent-Teacher Association has been formed here, with C. E. Edgell as president and J. D. Rockwell, secretary. This is our first attempt and we hope to further advance our school by this means.

**CUMBERLANDERS, PAST AND PRESENT**

1.—The Superintendent's Office Force in September, 1914. They are: G. A. McGinn, R. L. Ketzner, Allan Cogan, A. N. Martin, Franklin Taylor, T. M. Reese, E. A. Cosgrove, George Cox, William Naughton, P. H. Grosscup, J. R. Dyche, C. W. Frier, F. M. Powell, A. H. Powell, S. Usher. 2.—H. E. Flook, train dispatcher, Cumberland Division. 3.—Frank Messman, report clerk, Superintendent's Office. 4.—Twenty-five years ago; Division Master Mechanic D. C. Courtney, Division Clerk O. B. Street, Time Keeper Allan Cogan; Clerks J. A. Jones, W. V. Frazier, C. H. Rowzee, F. E. Koelker, Engine Inspector M. McMillen. 5.—Car Distributor's Office, Cumberland, in 1916. Here are W. P. Copeland, Charles Hanley, James McCarty, W. F. Matthews and F. X. Spearman

**BIG GAME HUNTERS AT GREEN SPRING**

The "bears" are, left to right: Tie Treating Engineer J. C. Alexander, Tieman R. H. Corbin, Tie Inspector A. E. Irving, Tieman S. E. Crobb, Laborer E. S. Robinson

It is with deep regret that we report the death of Mrs. J. H. Carter, wife of our well known branch conductor, at her home at Petersburg, W. Va., on November 15, following a brief illness. The burial took place in Baltimore. Captain Hill Carter was Mrs. Carter's father-in-law. We extend our sympathy to the bereaved ones.

I want to thank through the MAGAZINE every employe who attended Divine services Sunday evening, November 26, and especially we thank the officers of the U. B. C. E. Society who kindly dispensed with their service that evening.

(Signed) E. E. ALEXANDER

Raymond Sherman, son of Trackman G. T. Sherman, who suffered injuries to his right leg when he fell from train he was climbing over on the evening of November 27, is getting along as well as could be expected. Physicians hope to save his leg.

This regrettable accident should be another warning to the boys who make a practice of hopping and climbing over trains. It is far better to wait for a train to pass than to be crippled for life. Raymond considered himself an expert at getting on and off.

Our picture this month is of our big game hunters, far from the busy haunts of men, 4000 feet above sea level in the mountains of West Virginia. No, there are no bears in the picture. But from left to right we do have; Treating Engineer J. C. Alexander, Tieman R. H. Corbin, Tie Inspector A. E. Irving, Tieman S. E. Crobb and Laborer E. S. Robinson, with their trusty rifles and dogs.

Stop that leak—by taking better care of the material you use!

Stop that leak—by being absolutely square with yourself and with the Company!

Save by using your time to best advantage. The hours go fastest and most happily when we are busily engaged.

Arthur Arnold, branch trackman, and his family, living at Mellins, suffered the complete loss of household goods, clothing, etc. on Thanksgiving day morning when the one room building which Mr. Arnold had recently constructed and in which they were living, was completely burned. Credit is due the oldest child, a girl of five, who removed two smaller children, one two years

and one two months, from the burning home. This fire left the family in an almost destitute condition.

#### Martinsburg

Correspondent, W. L. STEPHENS

The regular monthly meeting of the Baltimore and Ohio Veterans was held in December. At this meeting the nominations for officers were made. The election will be held at the January meeting.

Raymond Russler was elected delegate to the Grand Lodge.

The "Vets" are planning a splendid social affair for their January meeting and election.

John M. Young, retired Veteran machinist, died at his home in Martinsburg. His death was caused by an attack of pneumonia. Mr. Young was born in this city nearly 75 years ago and spent the greater part of his life here. He was in the employ of the Baltimore and Ohio both here and at Cumberland for quite a number of years. Several years ago he was placed on the retired list as a pensioner. His widow, four sons and two daughters survive him.

#### Keyser, W. Va.

Correspondent, HARRY B. KIGHT

Happy New Year!

We extend to Yard Brakeman Marshall Linthicum our heartfelt sympathy in the untimely death of his mother. Mrs. Linthicum fell down the stairs of her home on the night of December 9, breaking her neck.

The accompanying picture is of "Old Man" Wolford, machinist. The old man is always on the job when it comes to fun-making and is here pictured, wearing his goggles, and mounted on his "Can't-a-Ford."

George A. (Hackett) Carskadon, general foreman, Stores Department, surprised his many friends the latter part of November, by announcing his marriage to Miss Elizabeth Hoffman, the charming daughter of Dr. C. S. Hoffman, company's surgeon. Congratulations, Hackett!

Storekeeper Guthrie is spending his evenings in his bran new "SUDAN." Never has had a bit of tire trouble?

**KEYSER, W. VA.**

On November 14 a rivet struck Car Repairer J. E. Morris in the eye—no, not in the eye exactly, for Morris believes in Safety and was wearing a pair of goggles, and they saved him. Morris, who is 49 years of age, has been in the employ of the Company for 15 years.

We extend to Miss Agnes Cody and Thomas Cody our heartfelt sympathy in the death of their father, John Cody. Mr. Cody came from Galway, Ireland, when a young man. He was employed by the Company for many years, having been pensioned a few years ago.

On November 27, Brakeman S. E. Adams was badly injured while in the performance of his duties. He was rushed to the Hoffman hospital at Keyser, where he is resting comfortably.

We are glad to have Trainmaster Welshonce back with us after being off for some time because of sickness.

Pensioned Yardmaster Harry Vernon is ill at his home here. Pensioned Engineman Adam Keller, who is known by the older employes of the Division, has been a pensioner for many years, and it is interesting to hear him relate incidents of early

"Old Man" Wolford, Keyser, riding his "Can't-a-Ford"

**STOP THAT LEAK!**

railroading. Though Mr. Keller is not able to get around much any more, it will be interesting to the old timers, who have lost track of him, to know that he is still with us.

A representative of a Philadelphia firm told me a few days ago that he always rode on our lines and added, "You know if I use the Baltimore and Ohio to travel on, what road I use to ship our freight over." This gentleman says that he notices the courteous treatment accorded him by the employes in every branch of the service. Sounds good, doesn't it!

In the storeroom window of the Davis Garage there was arranged a Christmas tree and yard. In the yard, of course, was a train just emerging from a tunnel. Lying before the engine was a badly smashed automobile, the driver being thrown to one side. A crossing sign stood in its place, and a sign to CROSS CROSSINGS CAUTIOUSLY loomed up on it. The driver failed to heed the warning. Mr. Albert Davis, realizing the importance of our slogan, tried to impress its importance upon those who viewed his display and in this way is helping us to keep down accidents. We thank him for his part in this perpetual campaign.

We are economizing in our town and "Stopping That Leak" by using as little coal as possible.

C. N. Murphy, our ticket agent, has gone into the mercantile business. Mr. Murphy, who, with others of our citizens, had stock in the Citizens' Store Company, decided

to sell out. Mr. Murphy and Mr. Keith Niles are now the owners of the store

We regret to chronicle the death of Conductor John Wesley Albright, who died recently at his home, 114 Grand Avenue, after an illness of over three years.

Mr. Albright was born near Terra Alta, W. Va., but has been a resident of Cumberland, Md., since August, 1896, when he entered the service of the Baltimore and Ohio. He is survived by his widow, one son, two daughters, and several brothers and sisters.

The funeral services were conducted by Rev. J. H. Billingsley, pastor of Trinity M. E. Church, of which Mr. Albright had been a member for 15 years. The Queen City Lodge of Knights of Pythias and the local lodge of the Brotherhood of Railway Trainmen had charge of the services.

**Oakland, Md.**

Brakeman W. H. Shaffer and wife are receiving congratulations. It's all about a new boarder who arrived at their house November 6, a boy, weight eleven pounds.

The progress of power companies in securing charters to utilize water power in this part of the state for making electricity, argues well for the supply of the Baltimore and Ohio, if and when it starts the electrification of our mountainous end of the division.

Anne Gordon Stevenson, grand-daughter of Superintendent George Martin, Pittsburgh Terminal Division, and great grand-daughter of former Yardmaster John Martin, Brunswick. Anne recently celebrated her birthday with a delightful party. Her great grand-father, a large number of her relatives and many of her little friends were there

Assistant Train Master Boyland's Office at Cumberland. To this happy couple we extend our best wishes.

On November 26, Miss June Shaffer, daughter of Mr. and Mrs. Edward M. Shaffer, and Sydney C. Wolfersberger, son of Mr. and Mrs. Samuel C. Wolfersberger, of Somerset, were married in the United Brethren Church of Somerset, Rev. J. M. Feightner, pastor, officiating. Mr. Wolfersberger is employed as machinist at Somerset. After the ceremony they left on a honeymoon to New York, Philadelphia and Atlantic City. We all join in extending our best wishes.

In a previous issue of our MAGAZINE it was stated that "Jimmy" Marsteller, chief yard clerk, Connellsville, had purchased a new Paigc roadster and had spent his vacation touring the South; but, did it ever

occur to you that many casualties would be the result of "Jimmy" learning the rudiments of this sport? The casualty was slight, however, and for the benefit of our readers, R. H. Griffiths, Coal Billing Agent's Office, draws his conception of the accident in the cartoon on previous page.

On December 11, Freight Agent G. M. Tipton, Connellsville, was promoted to position of freight and ticket agent at Braddock, Pa. H. D. Whip, chief clerk to superintendent, was promoted to position of freight agent, Connellsville. C. V. Payne, assistant car distributor, was promoted to position of chief clerk to superintendent.

To all we extend our best wishes for a Happy New Year.

**Pittsburgh Division**

Correspondents, E. N. FAIRGRIEVE and MARY E. BREEN

James Gallagher, he of the smiling countenance and amiable disposition, who plays utility role for Brother "Nemo" Burtoft in Pittsburgh Yard, smiled his way into the heart of one Miss Lavell and on Thanksgiving day "Jimmee" and his blushing sweetie were "tied-up" for keeps and left for California on their honeymoon. Keep on "smiling through" "Jimmee," and remember Jiggs and Maggie!

Friends of Mrs. Wern Mischler, who before her marriage was Miss Lena Gail Vannort and who was employed in the Division Accountant's office at Pittsburgh, will be pleased to learn of the birth of a son on December 12. Congratulations and best wishes are hereby expressed.

It is our sad duty to report the death of H. M. Grantham, agent at Braddock, on December 1.

Mr. Grantham was born at Wilmington, Ohio, October 9, 1865 and first entered the service of the Baltimore and Ohio at that point in June, 1885 in the capacity of an operator. He was a faithful employe and during his time with the Company held positions as agent at Wilmington, Newark, Columbus, Glenshaw, Pa., Rankin, Pa.; traveling agent, Pittsburgh, and at Braddock, which position he held at the time of his death.

He was a man of high character and excellent ability and his sympathetic nature and kind disposition won for him the respect, admiration, and affection of his fellow employes. We mourn his loss and extend to his widow our heartfelt sympathy in her hour of sorrow.

Friends of Harry Fisher, for years employed in the C. T. Timekeeper's office before the advent of the accountant system at Pittsburgh, will be grieved to learn of his untimely death in the Southside Hospital at Pittsburgh on December 17. Harry leaves his wife and four children and to them, and to Edward Fisher, C. T. timekeeper, his brother, we extend our sympathy. Harry was well liked by all with whom he associated. At the time of his death he was employed by the Mesta Machine Co. at West Homestead.

Friends and readers, the Company is in the midst of a "Stop That Leak" campaign and we are going to ask that each of you find some time for thinking or doing something that will help in this campaign. Suggestions will be appreciated and we hope that all of you will find it not only convenient but gratifying to help along in this great movement and send your suggestions to the correspondent at Pittsburgh where they will be given careful consideration and passed on for the good of the service.

Thomas Clarkson Cooper, 77 years old, died on November 16 at the home of his son, John B. Cooper, Pittsburgh, Pa. He had been fatally ill for some time and was buried on Sunday, November 19.

Mr. Cooper was born in Belmont County, Ohio and was for many years a Baltimore and Ohio telegrapher. During the Civil War, he was a member of a party of young men who, armed with shotguns and pitch forks, went out to meet General Morgan at St. Clairsville, Ohio, but Morgan with his marauding force left as suddenly as he had come. Mr. Cooper retired 25 years ago and for 20 years has lived with his son at Pittsburgh. He is survived by his wife, four daughters and one son.

**Charleston Division**

Correspondent, M. W. JONES  
Secretary to Superintendent

We regret that the pictures of the children of Section Foreman S. M. Cochran were placed in error on page 52.—Ed.

In our column of honor this month, we present a photo of Miss Madge Hinzman, chief clerk to the general foreman at Weston. Entering the service some eight or nine years ago as clerk, Miss Hinzman has been promoted in recognition of efficient and loyal service, to the position she now holds. Miss Hinzman needs no introduction to any one on our division, being well and favorably known to all of us.

Chief Dispatcher J. T. Staples, who with his wife recently visited Havana, Cuba, is back on the job again, and reports a fine trip. We are advised that during his absence John visited the "Fountain of Youth" at St. Augustine, Fla. Be that as it may, he looks ten years younger since he came back.

Master Carpenter A. W. Walter, Charleston Division, has been promoted to a similar position on the Baltimore Division. While we regret to lose a good friend and a loyal officer, we congratulate him and our best wishes go with him to his new home.

"Look after the pennies, and the dollars will look after themselves."

The attention of every one is called to the appeal made by our President in the Christmas MAGAZINE to employees. We feel sure that so far as the Charleston Division is concerned, the response will be 100 per cent. There are many ways in which the "Leak" can be stopped. The principal way among these is the saving of the \$1.00 per day it costs for every day the foreign car lies idle in our back yard. The long distance telephone call that might just as well have gone by telegraph, as the latter costs us little, the facility already being ours; the gas or electric light we left burning when we went out to lunch, or when we went home at night; the envelope we wasted, the piece of paper we spoiled and threw away instead of using for a second sheet, and last but by no means least, the COAL bill. The interest which has recently been shown by the engineers and firemen on our division in connection with fuel performance, has been grati-

fyng to our officers, and it is hoped that with the full co-operation of everyone we may get back to our FIRST place.

"IT CAN BE DONE" is a good slogan.

The most important event on our division during the past month was the marriage of Baggage-master E. L. Cutlip, Pickens Line, to Miss Turner, of Weston. Many years we have watched Ernie's struggles, and at last, after heeding the good advice handed him by his friends, he has taken unto himself a wife. We all said that John and Ernie would never marry. John fell and Ernie followed suit, and now we have only two or three eligibles left. Speak quickly, girls. The happy couple spent their honeymoon in the East. Our hearty congratulations to Ernie and sympathy to his wife.

**Courtesy Pays!**

Travelling Auditor Porter, who has been located on our division for several years, has been promoted to a like position in Chicago. We are sorry to see him go, but we congratulate him on his move. A friend of all of us here, and a royal good fellow throughout!

Assistant Superintendent Kinton spent a couple of days in Baltimore recently in connection with our new timetable, which, taking effect on December 17, gives us night service on the Elk Line, and from this date, the sight of a sleeping car on the Charleston Division will no longer be a novelty.

'Tis true at times we cannot comprehend Just why the peak we're struggling to attain Seems always distant and our efforts vain -- Our tired feet slip off as we ascend. And yet, perchance 'tis just around the bend,

The goal which we are striving hard to gain. Then let us waver not, our course is plain, 'Tis ever forward and—the promised end.

And now, our editor having limited the number of words this month, we will have to close. We wish every one a Very Prosperous and Happy New Year, and we hope that the Charleston Division will hold first place in 1923 in COURTESY — SAFETY — EFFICIENCY and in sending suggestions to STOP THAT LEAK!

Passenger Conductor L. D. Morris, Elk Line, recently spent a vacation on the St. Lawrence River among the Thousand Islands. In our photo we see him with

Hats off to this new chief clerk, Miss Madge Hinzman!

### Wheeling Division

Correspondent, MARIE SLATTERICK

In our September number we said that Miss Louise Walthers was wearing THE ring on THE finger and we said that she said it was not "coming off" for a long time. However, she surprised us all! On Thanksgiving Day she was wedded to Mr. William Archibald, also of Wheeling. Guess she's got a lot to be thankful for now all the year 'round!

The Michel boys from the Accounting Office seem to have an awful time every day at noon in getting their car started. Watching them from the window it would seem as though they intended to push it all the way home! As long as they stand by her she chugs away merrily, but once they climb in under the wheel she dies away like a ripple on the water and they have to get out again. You have our sympathies!

Mathew Grove and Carol Brandfass, file clerk and office boy, respectively, General Superintendent's Office, Wheeling, had an awful disappointment on Sunday, December 3. They went to Terra Alta to see the far-famed tamed and trained rabbits, but as they only had a half hour's stay all the rabbits they got to see were the ones hanging in front of a butcher shop! Better luck next time, boys!

A lot of us want to know why Cecil Dye, Freight House employe, came to work two hours too early one morning. He can't give any explanation of himself except that he must have looked at the clock wrong. Rumor has it that he didn't get in until 1.30 that morning, and instead of going to work at six o'clock he got there at four.

In the accompanying picture we have little G. L. Hartman with his pet horned owl. The little fellow is the adopted son of Engineer G. H. Hartman, who works out of Benwood.

We extend our sympathy to Engineer W. C. Furbee and his family on the loss of his little daughter, Virginia, age nine, whose death occurred on November 19.

### Benwood Shop and Terminals

Correspondent, J. L. CUSACK

Blaine Stephens, tank man, Benwood, must have been born under a lucky star. Boilermaker Carter was handling the punch board and after Mr. Stephens had spent nearly a week's wages on this board he was presented with a beautiful pair of lace curtains. We understand that two young men in the Roundhouse Office at the shops have been tramping the streets of Mc-Mechen to get a glimpse of these curtains.

We are glad to report the return to duty of the popular terminal trainmaster, F. R. Davis, who has been on sick leave for the past several weeks.

General Clerk Jacques W. Stocking is confined to his home on Fifth Street, McMechen, with a bad case of mumps. However, he is getting along nicely and will soon be with us again.

The Chief Crew Dispatcher's Office has been moved from the east end of the Yard to the west end, in the building now occupied by the terminal trainmaster.

G. J. Stein has been promoted from engineman to assistant road foreman of engines. Mr. Stein is one of the most

Mr. and Mrs. R. T. Brooks at "Vista House," Columbia Highway, Portland, Oregon, on October 5

popular men on the division and his appointment will be received with great favor everywhere.

We are sorry to report the illness of General Foreman J. P. Duffey. Mr. Duffey will leave for Florida in the near future where he will spend some time for his health. Hurry back, "Joe."

### Save Coal!

Albert Vernon Coxon, Division Accountant's Office, son of Engineer John M. Coxon, Wheeling Division, recently underwent an operation at St. Joseph's Hospital, Baltimore, Md. At this writing Mr. Coxon is much improved. We hope for his speedy recovery.

Engineman and Mrs. J. M. Coxon recently returned from a six months' trip to Europe. John says he prefers the fog of the Ohio Valley to that of London.

He visited Liverpool, the city of his birth, and enjoyed the festival of the Preston Guild, at Preston, England.

General Foreman W. J. Hehr has recently purchased a Buick touring car. If he makes as good a chauffeur as he is a general foreman, "Jimmie" Murphy had better look for other climates.

### Save Coal!

Old Dan Cupid's sure playing havoc with the forces at Benwood. Yard Clerk L. K. Reynolds recently surprised his many

friends by taking unto himself a wife. Mr. and Mrs. Reynolds spent their honeymoon in the East. Fireman H. S. Dennison, who was transferred temporarily to the Wheeling Division from the Cumberland Division, was married recently at Rowelsburg.

Acting General Foreman, J. J. Donovan recently made a trip to New York and points east. We understand he made this trip in his Ford Sedan. While looking over the classified page of a Wheeling Daily the other day noticed a well known ad. which told of a well worn Ford car for sale—and J. J.'s name was signed at the bottom.

A Precious Railroad

By G. B. S., Car Inspector

There's a precious little Railroad  
You're familiar with I know,  
It runs from our Queen City  
To Toledo, O-H-I-O.

You will find it always busy  
Wherever you may go,  
Just follow me adown these lines  
It's name you'll find below.

On it you'll like to travel  
As from place to place you go,  
Some call it the "old" C. H. & D.—  
'Tis the good old B. & O.

Among our jolly officers  
Mr. Meyer's smiling face—  
He's superintendent—takes the lead,  
Trainmaster "Fitz" keeps pace.  
Assistant Trainman T. J. Bowns,  
McKenna keeping step,  
Relief McKillips' little hunch,  
And Yardmaster Mauntell's pep.  
Assistant Burman, called the Jew,  
And Mr. Hayhoe among the few;  
Assistant Charles Layman, the smallest  
of all,  
He didn't grow large, that's why he is small.

#### How Much Have You?

By G. B. S., Car Inspector

I'd like to have a million  
I think I could stand pat,  
Or ev'n a hundred thousand,  
I could just live on that.

G. L. Hartman, eight year old adopted son of G. H. Hartman, and his pet owl

And fifty thousand dollars  
Is not so very bad,  
If I could get but thirty  
I'd be almighty glad.

I might say that five thousand  
Would not look bad to me,  
Or even, say, twelve hundred  
That's not so bad to see.

Five hundred's not so fancy—  
Some folks would call it tame,  
But say, I wouldn't mind it—  
I'd use it just the same.

And get right down to fifty—  
Some folk may call that small,  
Tho' twenty-five is better  
Than having none at all.

Ten dollars is small money—  
But mercy sakes alive!  
There certainly are times when  
It's great to have a five!

**A Thin Excuse**

By G. B. S., Car Inspector

You think it's really shocking  
For her to use her stocking  
As a place to hide her valuables away,  
But stop and think a minute—  
The girl wants something in it,  
And her money helps a little, so they  
say.

We extend out sympathy to the families  
of several of our employes:

Car Inspector Lampking was killed at  
Ivorydale while on duty.

John Norrish, car repairer, died. His  
son is employed at Ivorydale.

P. Staubitz, who served 25 years as a  
blacksmith, died. His two sons, "Pete"  
Staubitz, machinist, and Henry Staubitz,  
boilermaker, are with the Company.

We also extend our sympathy to "Fred"  
Nolte who lost his brother as a result of an  
automobile accident.

**Much Ado about Nothing**

By H. H., Superintendent's Office

There are some people in our midst,  
Whom Fate sure treats with kindly care,  
For whether they deserved or not,  
Each got a gift from her most rare.

For from the office gloom did step,  
One night, Maloney, full of pep,  
And with his laugh the hall did ring,  
For a week he'd just leave everything.

He'd take himself about the town,  
And paint things up red, white and  
brown,  
And after he'd of fun his fill,  
Back he returned just full of thrill.

Then on another Saturday night,  
Out marched Joe Beel, whose heart  
seemed light,  
And for a week likewise he made,  
Life seem to him without a shade.

Next on the list, but not the least,  
Our friend, Frank Nock, his work did  
cease,  
And with a light and buoyant air,  
Forth like a conqueror did fare.

Now why is it that some do meet  
Blessings with which we can't compete?  
For though our work we never shirk,  
Good things near us don't seem to kirk;

This is why sometimes we seem,  
Of quite a sad and grumpy mien,  
But we will sure cheer up again,  
And hope these things soon to attain.

H. Tucker, machinist, Ivorydale, is the  
proud daddy of a new 9-pound son. We  
are looking for an apprentice's application  
to be turned in for the boy, so that he can  
start serving his time as a machinist as  
soon as possible. Congratulations!

Hope that the Christmas season was one  
which was enjoyed by all. Good luck for  
the year 1923!

Some changes have been made in the  
Division Engineer's Office. W. P. Abbott,  
formerly assistant division engineer, has  
given up railroading, after about 12 years  
service with the Baltimore and Ohio, to  
enter into the mining of fluor-spar. We  
wish him much success.

Mr. Abbott's successor is G. B. Farlow,  
a young man transferred from Dayton  
(formerly of Cincinnati). We all extend to  
Mr. Farlow a hearty welcome and trust he  
will enjoy the period of his stay here.

Mr. Farlow, however, is not the only new  
member of the Division Engineer's Office  
force. J. F. Augberger, formerly general  
clerk, Storrs, has taken the position of  
chief clerk, succeeding A. R. Hunter, who  
resigned. "Joe" is a promising young man  
and is liked by all the force (including the  
superintendent's force), even though he  
has a "misplaced eyebrow." "Joe" likes  
the new boss all right, but he surely does  
envy him that mustache (Mr. Farlow has  
a really-honest-to-goodness mustache).  
"Joe" has tried for months to grow one  
but he hasn't the right method to coax it  
along.

Correspondents, E. H. GARDNER and  
C. C. TROY

**ECONOMY**, spelled in capital letters, is  
one thing President Willard is calling on us  
all to practice to the limit at the present  
time. With the necessity so urgent, the  
response to Mr. Willard's appeal should be  
hearty on the part of all employes. Of  
course, there are probably few of us who  
could actually be said to be wasteful, but  
most of us could save a bit more if we tried  
harder. The means to economize will no  
doubt suggest themselves from day to day  
according to the line of work in which we  
are engaged, but if you have any ideas of  
your own, send them in. We'll give you our  
word that the editor will be glad to have  
them. Please practice economy in some

4311 { New York City

form, so that our President will see that his  
request has not fallen on deaf ears, but has  
been the means of accomplishing the de-  
sired result.

The accompanying picture is an excellent  
likeness of William G. Scholl, chief per cent.  
clerk, Tariff Bureau, Cincinnati. Mr.  
Scholl's service record covers a period of 35  
years, his first position being that of mes-  
senger in the Telegraph Office, Chillicothe.  
Subsequently he held the positions of opera-  
tor, Chillicothe, West Junction, Athens,  
Parkersburg, Hamden, Greenfield, Midland  
City, Blanchester, Oakley, Cumminsville  
and "SG," Cincinnati; clerk, Continental  
Line and Central States Dispatch, under S.  
T. McLaughlin, Archibald Fries, T. H.  
Noonan, S. A. Allen, and T. J. Walters.  
Since 1918 he has been assistant tariff com-  
piler and chief per cent. clerk in the Tariff  
Bureau. "Billy's" ambition is to complete  
50 years of service with the "Best & Only"  
and we believe he'll do it, in spite of his bald  
head. He owns an Essex coach and will take  
any of us out riding any time we want to go,  
if we care to take the risk.

Olive Tealen has taken up golf. We re-  
gret that we are unable to print the score  
of her first nine holes, lack of space not per-  
mitting. Ollie says she is improving rapidly,  
however, and we'll bet our bottom dollar  
she'll be some sort of a champion some day.

"Ben" Harris wants to sell his "Phord."  
One hundred and fifty sobs is the price.  
The correspondent is going to demand a  
percentage for advertising. This Phord is  
registered stock, its official name being  
"Oceanic Roll." The purchaser will be  
given, gratis, the pedigree, (which contains  
the names of "Oceanic" ancestors, etc.,  
etc.) and NO spare tires.

Talk about popularity! That is one  
thing Giles Kridler is with the girls—one  
hanging on each arm the other day parading  
him right down Vine Street. We'll bet he  
has taken lessons from Todd.

Why does Louise love Mart Muller?  
Bill Jones take a Westwood car so fre-  
quently?

### Newark Division

Correspondent, B. A. OATMAN

#### Newark, Ohio, Station

Greetings of the season! May the New Year bring to you and yours all happiness possible, and may you enter the New Year determined to make a success of whatever you attempt to do.

#### Stop That Leak!

This is a slogan applicable to, and worthy of consideration by, every corporation, man, woman and child. Small wastage leads to greater losses. Little drops of water make the mighty ocean. Little grains of sand make the pleasant land and the small things collected make the larger things.

In the handling of a great railroad system like the Baltimore and Ohio, it is of the utmost importance that every channel of expense be guarded carefully. To do this requires the constant watchfulness of every officer and employe of the Company. It will be remembered by the older employe, how in years gone by, it was the practice to a great extent, to go to the storeroom for every piece of material needed in the performance of the work. No particular thought was given to the fact that the very material needed could probably be picked up in the shop or in the scrap bins where it had been thrown with other scrap material. How times have changed! Every nut, bolt, washer, spring, cotter key, every piece of lumber worth saving, is now reclaimed and placed in stock again for future use. The saving made by reclaiming old material is enormous when the entire railroad is taken into consideration. You therefore can see that saving made is due to watching the small things. The individual employe is certainly in a position to guard against any leak.

The employment unrest of early 1922 caused a heavy drain on the financial condition of the Company and it has been necessary to reduce in forces and curtail every expense possible in order to meet our obligations. Since we are a part of this great organization and members of the Baltimore and Ohio Family, the Management, through the columns of the MAGAZINE, solicits our individual support in stopping every leak in our expenses. We are invited to send in our suggestions to "STOP THAT LEAK," Mt. Royal Station, Baltimore, Md., where all suggestions will be given careful attention and submitted to the proper officials. Do not be backward. If you have a suggestion to make, (you, perhaps, see something every day which could be done at a reduced cost to the Company) let your suggestions be used in stopping the leak you have located.

Let every employe on the Newark Division enter into this campaign with a view of making our division rank first among the divisions on the system. DO NOT WASTE TIME OR MATERIAL and see that the newer employe follows your example.

Harry Kale, the popular freight house foreman, always says that if you can't get in at Number One door, put them in Number Two. Harry certainly tells them where to drive their trucks or drays and always has the interest of the men and Baltimore and Ohio at heart.

Glenn S. Berry, efficient delivery clerk, says that sometimes it is one section and sometimes another, and reports that all in all it takes a good man on the job and that he is one of them. (The groans that you just heard were from the house foreman and freight handlers. Just jealous, that's all.)

"Jay" Long, yard checker, has the radio bug and is always trying to receive something for nothing. How about another tune from "The Burning of Rome"? "Jay" says he got in on a conversation between two ocean steamers at sea but it was too deep for him and he jumped back to Cleveland where he is more at home.

Hugh Delaney, Ivan Ballsoff and Cyrus McDaniels attended the freight trucker's ball recently. "Cy" fell asleep and they say he kept shouting to Hugh and Ivan to put the plank in the car, as he couldn't very

well truck freight over such a high door. We are all wondering what they served for refreshments.

It always seems good that whenever a bunch of Baltimore and Ohio employes get together they have a good time. We sometimes wonder if the rest of the boys are as fortunate. We sincerely hope so.

### Mansfield

Correspondent, C. R. STONE

#### Baltimore and Ohio Contemplating Big Improvement at Mansfield

That the Baltimore and Ohio realizes the rapid industrial development of Mansfield and is making its plans to keep pace with the needs of Mansfield's future, was made clear recently in an address given to traffic men of the city by G. W. Arnold, our industrial agent, when he said in part:

"At the present time we are spending between \$50,000 and \$75,000 improving terminal and yard facilities in Mansfield. With the purchase of the Cline and Nelson warehouse on Fifth Street, at the foot of North Walnut Street, we will have one of the best freight depots and team tracks along the Baltimore and Ohio System.

"My Company fully realizes the great industrial development which has been going on in Mansfield. It realizes that Mansfield's growth will continue to be rapid, and my Company wants to be in a position to serve this community to the best of its ability."

Mr. Arnold stated that the trend of industrial development was north and that he expected to see an ever growing colony along the northern border of the city.

While Mr. Arnold's local reference was mainly to freight and facilities, it is hoped that the Baltimore and Ohio may some time soon be able to give Mansfield passenger depot facilities in keeping with a city of its importance. Traffic men and railroad men were in large attendance and took great interest in Mr. Arnold's address. Other Baltimore and Ohio men present were: E. N. Kendall, division freight agent; E. C. Doudna, travelling freight agent; C. L. Hardin, travelling industrial agent, and the writer.

W. O. Stockwell, our popular agent, is going to write the words, and H. F. Wyatt

is going to furnish the music; the name of the song will be: "I Would Rather Have Ten Good Box Cars than be the Czar of Russia." Yardmaster L. L. Kerr will undoubtedly write a parody upon the above sing entitled: "The Demand Greatly Exceeds the Supply."

Travelling Freight Agent E. C. Doudna was in the city recently relative to traffic movement and prospects. Mr. Doudna is evidently going to dispose of the new Baltimore and Ohio maps. He reports that it is the best map put out by any railroad and that an inspection of it brings favorable comment from all.

Division Freight Agent E. N. Kendall, Newark Division, recently spent the day at Mansfield, calling on the various manufacturers regarding the movement of both inbound and outbound traffic.

George Reichart, our popular chief clerk, is having his troubles with car orders. One of George's daily 'phone conversations runs: "We haven't any empty at the present time, but we'll put you on the list and will do our best to give you a car as soon as possible." We wonder if the time will come when empty cars will be easy to obtain. The future will tell; we cannot.

George Sellers reports that there are people travelling westward these days and that passenger business is as good as ever. George is a good fellow and is always looking out for the interests of the Baltimore and Ohio.

Well, the election is over, and I think that the freight house crew gathered in some money on their candidate—viz. "Andrew Gump, the chinless wonder, 100 per cent. for the People." There certainly was some good sport betting on such a man as that. However, he was elected by a majority of 37 votes, thanks to the women.

**When the Moonshines on the Moonshine  
so Merrily.**

A fool there was and he loved his brew  
Even as you and I.  
Said he with glee, "Ha, a new recipe  
I'll surely have to try!"  
So he got some hops  
And the rest of the props  
And started in to brew;  
But the stuff got thick,  
And it had no kick,  
But it made a great shampoo.—

**Columbus, Ohio, Station**

Correspondent, R. KENNETT

We are entering a New Year of service for our Company. Let us endeavor to put forth our best efforts in that service, observing all rules and regulations that the standards of our Company may be kept, as always, at the highest.

Dispatcher H. S. Conley spent his vacation sight-seeing in Clintonville.

Traffic Manager D. W. Hare, Cleveland Avenue, recently spent a few days at Louisville, Ky.

Operator H. Lusk, N. & W. Crossing, spent the holidays at his old home in Kentucky.

Conductor W. H. Hukill, of Thornville on the Lake, has been appointed acting General Yardmaster during the absence of General Yardmaster Decker, who is off duty because of sickness.

General Foreman Van Blareum recently took his vacation. Car Foreman Avery acted as general foreman during his absence.

Did you notice the slump in the rabbit market recently? Car Foreman Savely and Inspector Evans spent Thanksgiving day among the cotton tails.

Operator John Marsh, Big Walnut, recently moved his family to East Columbus. John says its cheaper to move than to pay rent.

Famous sayings of our fellow employes:  
Mickey—That's what I say.  
Hukill—Say, I'll swear.  
Jenkins—.....'cm.  
Mason—Give me a cigarette.  
Avery—Gee-miny Krauts. (Then he scratches.)

Stoney—Telefoam—Brockton.  
Evans—What engine? What does he get?  
Groffin—Huh!  
Smith—Any thing coming?  
Wurdack—Go jump in the river three times and only come up twice.

We wondered what made Conductor "Ike" Thomas step around so lively here recently. After investigating it was discovered that he is "Grandpa." A 12-pound boy being born on Thanksgiving Day. Congratulations, Grandpa Thomas!

Don't overlook the sign on the yard office door. Any one caught loafing will be taken into custody by Deputy Johnson and taken before Big Cheese Jackson of the Sand House Committee.

**Sandusky**

Correspondent, R. SCHEMENAUER

At nine o'clock in the morning of October 19, Miss Ivette Martin, our ticket clerk at Sandusky, became the bride of Mr. E. F. Miller of this city. Mr. Miller holds a responsible position with the New York Central. Betty, we dislike to lose you, but unanimously wish you a life of happiness.

The office force and other Baltimore and Ohio employes presented Mrs. Miller with a handsome mahogany mantel clock and a hand painted bread board and knife. Our chief clerk, Mr. Kernan, used good judgment on what to buy for a newly-wedded wife (as he is a bachelor). He asserts that both gifts were well adapted to the occasion. The sweet pealing of the clock in the wee hours of the morning will arouse "Ed." with nothing but pleasant feelings, while bread board and knife will afford him manual exercise in cutting bread for his wife's social functions.

Our first New Year's resolution (Fred Walsh):

I hereby resolve not to wear bell bottomed trousers or have my hair cut a la Valentino during the coming year and will act as official censor for the responses to Mr. Stoffel's application for a wife.

**Akron Division**

Correspondent, J. A. JACKSON

The accompanying picture of J. R. Easton and party was taken at Lost Lake, Wis., during a recent trip to this excellent fishing grounds. Note the large catch made by Mr. Easton, assisted by James Henry. This fish weighed 20 pounds and measured 44 inches in length. Mr. Easton was more than pleased with the trip and is planning to spend his vacation next year in the same place.

Yard Clerk Clyde Nicholson, New Castle Junction, and Miss Florence Ellis were married recently at New Castle. They enjoyed their honeymoon in Canada, and are now residing in a newly furnished home on East St. New Castle. Congratulations!

Yard Clerk Frank Stevenson, New Castle Junction, also took the fatal leap in November. He and his bride are now at home to their many friends in their new home at New Castle. Congratulations from the Akron Division employes are extended to the happy couple.

Our sincere sympathy is extended to Terminal Trainmaster R. E. Pyle, Youngs-

624 F. Street, N. W. Washington, D. C.

town, Ohio, in the death of his wife, which occurred at their home on November 29.

A party of Akron Division employes enjoyed a successful hunting trip to the Watson farm, on the Butler Branch of the Baltimore and Ohio. They succeeded in bagging many cotton tails and pheasants, but report bear and deer to be scarce in that section this year. The party was made up of the following: Road Foreman of Engines J. L. Shriver, Car Distributor G. W. Miles, and Engineers Berl LaFever, "Joe" McBride and Clyde Byerly.

The Akron Division will be represented in the Class AA League of the A. R. C. Basket Ball League, which was formed in Akron recently. Players on the team are Hoskins, Shriver, Eilbeck, Cook, Wilson, McCarthy, Loux and Boyd.

The first game of the season was played in New Castle on December 2 and resulted in a win for the Keystone Boys. A return game will be played on the Akron floor some time in January.

**Massillon**

Correspondent, W. E. BRUGH

Clerk to Trainmaster

J. T. Sidaway, bridge inspector, was observed on his way home with a rabbit under his arm. It has been reported, however, that the poor thing was shot by some other "crack-shot." We did not think you had the heart to do that, "Sid."

Brakeman J. J. Ryan recently had an accident at Massillon, slipping and getting hand caught between couplers, losing left thumb. Best of luck is wished you, Ryan.

J. T. Sidaway recently spent a few days in Florida, where he visited his mother and other relatives.

We will have to apologize to the freight house force this month for not writing them up, as they have all been too good and working too much overtime each night to handle the volume of business at this point.

We extend our sincere sympathy to Oliver and Paul Seifert, respectively warehouse foreman and interchange clerk, at the freight house, who lost their mother recently.

Boy, page Mr. Sidaway, as another reckless automobile driver ran through the safety gates at Main Street. This is a dangerous habit, isn't it "Sid?" and besides that, they don't realize who has to repair them either.

We have heard that Cupid is about to strike one of our employes. If anybody wants to get any further information, get in communication with Brakeman F. C. Wiesenberg. Be careful, "Chick," some times the sea gets pretty rough!

### Cleveland Terminal

Correspondent, G. R. LITTELL

Among the things to be thankful for at the Cleveland Terminal:

At a Thanksgiving dinner, Mr. Littell thanked Superintendent D. F. Stevens for the better working conditions made possible through our new location in the Passenger Station Building. Many, many thanks, Mr. Littell, for the Thanksgiving dinner.

Mr. Niederheiser has been elected delegate of the Veterans' Association Convention representing Cleveland.

### Chicago Terminals

Correspondent, J. L. NICHOLS

It is with a good deal of regret that we announce the resignation of Thomas H. Williams as our MAGAZINE correspondent.

It is a pleasure to announce that Mrs. R. A. Barlow, wife of our genial trainmaster, is fast recovering from severe and dangerous injuries sustained recently when she was struck by an auto, near her residence.

It is reported that Miss Rose Welch (Bob), stenographer, Office of Engineer of Maintenance and Construction, will become the bride of Mr. Kimbal Wayman on December 30. The young people have the best wishes of all who know Miss Welch.

Another bride to be is Miss Marie Carroll, clerk, Stores Department. Evidence: a swell sparkler. The lucky guy is a second "Looy." She will toe the chalk line. We all hope she will be happy as a member of "Ed's," command.

There are more of our genial lady clerks at Lincoln Street who are under suspicion. It's contagious!

A wedding announcement before us bears the name of our highly respected accountant at Lincoln Street, Clayton R. Briggs, who was married to Miss Martha M. Keating on November 25. Mr. Briggs certainly sprang a surprise; we thought his mind was at all times centered upon the mass of figures constantly under his eye. "Clay," we wish you both many years of happiness and success. The smokes were fine. Thanks!

"They say" that our good natured friend, Road Foreman "Noisy Mac" McCuen, accompanied by the trainmaster, master mechanic and general foreman, conceived the idea of relieving the "drag" of their strenuous duties by "slipping" out to a duck dinner. "Mac's" "steam" got low and he found himself "stuck" for the feed. Now he is lurching on soda crackers and water till pay day. Poker up more next trip, "Mac."

The many friends of our smiling Master Mechanic Frank Moses will be pleased to know that he has so far recovered from a

severe attack of rheumatism as to be able to operate his new Maxwell sedan. He is so happy the speed cops have his number. General Foreman Rosenberg advises him to remember the Blue Island jail.

"Big Hook" Julian, our wrecking foreman, has taken unto himself a Ford. We hope it will not be necessary to use the "Hook" to pick up himself and his Ford while he and his Mrs. are joy riding.

Passenger Car Foreman and "Junior Lincoln" Jockey George Sherman, is back from a much needed vacation, spent in St. Louis. Too bad his face is not larger, so his smile might have more room. As it is, his genial countenance is a pleasure to all comers.

Assistant General Foreman Fred Rosenberg, East Chicago, has been on his vacation. Why did he not take his Mrs.? Why! She wanted to clean house while Fred was out of the way. She might have used him instead of a step ladder, to clean the ceiling and other high spots. She will next time. She is a little new at the house cleaning game.

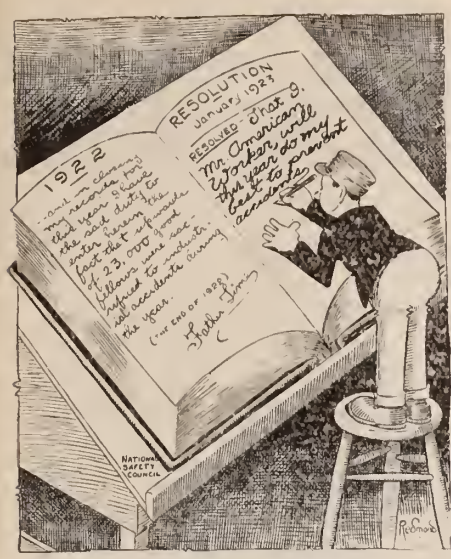

The arrangements for the installation of instruments for the purpose of dispatching trains by telephone have been completed. The new system bids fair to be much more satisfactory than the old, as it enables the dispatcher to continually "mix" with the operators and others out yonder, forming a business family of which he is the head.

IN A SPORTING MOOD ON THE AKRON DIVISION

Back row; Weiss, guard; Watson, forward; Weinbrenner, manager; Suber, forward; Buckingham, forward. 2—J. R. Easton and his catch from Lost Lake, Wis. The fish was 44 inches long and weighed 20 pounds. 3—Akron's "beau brummels," Frank Hert and "Herb" Hossler, Division Accountant's Office. 4—Fishing party at Lost Lake, Wis. Left to right: J. Henry, D. H. Johnson, Mrs. Easton, J. R. Easton, Mrs. Johnson. 5—Clerks of the Division Accountant's Office, Akron; "Jake" Greenberg is the chesty fellow in the front line

### Chicago Division

Correspondent, F. N. SCHULTZ

Chicago Division boasts of a file clerk with one of the best memories of any man on the System. To emphasize this point we submit the following:

One day, about 10 years ago, the devil appeared to the chief clerk and said that he had come for the file clerk. The chief clerk protested, "Don't take the file clerk, we cannot spare him; he has charge of all our files; he has the best memory of any of our employes and never forgets anything." The devil considering the plea of the chief clerk, made the proposition that if the file clerk ever forgot anything he would get him, regardless of protests, and thereupon sought the file clerk and said to him, "Mr. Hickman, do you like eggs?" "Yes sir," replied the file clerk, whereupon the devil disappeared. Yesterday as the file clerk was searching one of the file cases the devil jumped out and said "How!" Immediately the file clerk replied, "Fried."

### South Chicago

Correspondent, ESTHER J. SPREENBERG

The Season's Greetings to everyone. May the New Year be a Happy and Prosperous One for All!

Adolph Wegrzyn, clerk in Mr. Quigley's Office, wears a broad smile. We hear that Adolph recently placed a beautiful diamond ring on the finger of the girl of his choice and that soon the wedding bells will ring out. Congratulations, Adolph!

We are pleased to announce the arrival of another baby daughter in the Hufton family. Mr. John Hufton is chief clerk to Train Master Huggins.

We were sorry to learn that Miss Anne Dubsky, stenographer to Mr. Quigley, was taken to the South Shore Hospital. Reports say that she is getting along nicely, and we hope that she will soon be convalescent and back with us once again.

Laverne Thompson, genial car record clerk at 90th Street, is on the sick list. We hope for her speedy and complete recovery.

Emily MacFarlane Kendall, former passing report clerk at 90th Street, has just returned from the Northwest and is visiting her mother and sisters here. All of the office folk were mighty pleased to see her once again.

### Willard, Ohio

Correspondent, CARL C. CLUGGISH

Willard, as well as all other points on

the Baltimore and Ohio system, is enjoying one of the heaviest periods of business that has occurred for a number of years. There were 5185 cars handled through Willard during the 24-hour period which ended at 12.01 a.m. on November 4, the largest in our history. In order successfully to handle this amount of business, it means that every employe has to be on the alert to keep his end of the game going. Because of the fact that each man has so far been able to hold his own, it goes to prove that everyone is willing to do his part to keep the wheels moving. We cannot help but reflect that the supervision of the officers at Willard has not been in vain.

Now that all of the passenger trains are back in operation and the old men back on their former jobs, things look bright for the winter months. It seems good to see the passenger trains go through, not only to the public in general, but to the people that ride on passes, as for some time past many of the trains in operation were trains on which passes were limited.

During the last month, a number of new men have been employed, both in the Mechanical and Transportation Departments. Out of this number, some, no doubt, will be with us but a short time, some may last several months, but there cannot help but be some valuable material develop which will be of great help to the Railroad in the future. Such period of business as we are visited with at present, always brings out the best and the worst in us and shows what material a person is made of.

Seemingly out of a clear sky, and without any advance notice, whatever, came the announcement of the marriage of Miss Hazel Kuhn and Harry Jones. Mrs. Jones had been employed as record clerk, Central Yard Office, and Mr. Jones is an Akron Division brakeman. Mrs. Jones will know how to cook as she received some valuable instruction along this line last winter in the Central Yard Office restaurant. Best wishes, Hazel. Do not forget where our office is located!

One of the most regrettable events that has occurred in Willard for some time, was the death of Yard Clerk Donald Smith, on October 20. Donald had been in our employ for over two years, working as checker and booking out clerk, and was thought of very highly by the men in the Willard Yards. He leaves his parents, Mr. and Mrs. Walter B. Smith, and one brother, Robert.

Yard Brakeman R. D. Stull was recently hurt while at work in the East Bound Yards, being found in a dazed condition by one of the other brakemen. His injuries have about healed and he is getting along as well as can be expected.

Luther Sherman, secretary to Mr. Kopp, has been temporarily transferred to the office of Chief of Yard and Terminal Operations E. T. Horn at Baltimore and his place has been filled by W. H. Heinlen, who was previously employed as chief yard clerk, East Bound Hump.

In the opinion of a great many of the men in the Willard Yards one of the best arrangements for extending sympathy to a fellow worker is the plan which has been in operation for some time at Willard. We have what is called our "Floral Fund," which is used to buy flowers, etc., it being made possible by donations from everyone in the Yards, and by the road men as well. J. M. Barnville is in charge and when the treasury is somewhat depleted, he sees that letters explaining the condition are sent

out asking that donations be made. This plan has been successful as the treasury has always been in good shape and it has been the means of expressing sympathy many times.

Crew Dispatcher H. L. Deveny says he is organizing a bureau, which he will call a "Matrimonial Bureau." For particulars, inquire of Mr. Deveny.

### Ohio Division

Correspondent, A. E. ERICH

Keep 'em Going. The present car shortage makes this absolutely necessary.

"Stop That Leak" in loss of revenue on account of delayed cars; see that they are unloaded or loaded promptly and moved, as CARS ARE ONLY EARNING, WHEN WHEELS ARE TURNING.

Joseph McGinty, blacksmith, and Miss Marie Schuer were recently united in marriage. We wish them happiness.

Ralph Conner, machinist apprentice, and Miss Helen Elizabeth Grohe also joined the army of married people. Congratulations!

And still another. Miss Bernice Bowdle, clerk, Division Accountant's Office, took the final plunge when she became the bride of Mr. Herbert L. Gardner. The office force presented them with a fine set of silverware. We extend our good wishes for a happy future. Miss Edith Woodall, stenographer to division accountant, took a chance and played the wedding march at this wedding. Look out, Edith, it is catching.

Miss Ruth Bickel, clerk, Division Accountant's Office, was recently confined to her home on account of illness. It was suggested that some flowers be sent her. This was looked upon with special favor by one of the male clerks in that office, but in placing the order with the florist he thought the number looked small and ordered a few extra chrysanthemums. The flowers were to be delivered to the office for the purpose of placing a note with them, with the well wishes of the office force, but it is rumored that "Sheney" substituted another note and delivered the chrysanthemums personally.

Drawn by Noel Stickles, 13 year old brother of Ticket Clerk R. Stickles, Union Station, Chillicothe, Ohio

Drawn by Noel Stickles, 13 year old brother of Ticket Clerk R. Stickles, Union Station, Chillicothe, Ohio

Fireman Pearl Porter is a married man, and proud of it. Congratulations!

We are sorry to chronicle the death of Engineer C. W. Ramsey, better known as "Buck," after an illness covering a period of almost two years of intense suffering. We extend our sympathy to the bereaved wife and sister and his numerous relatives.

The Littlejohn family are enjoying some good journeys in their new "Ford." We do not know if this has anything to do with it or not, but several interesting articles have been sent us for our notes from this family.

Operator "Vic" Ray, Hamden, was operated on in a Cleveland hospital. The operation was successful to a certain extent but he is still in a critical condition, his left side being paralyzed. We wish him a speedy recovery.

Operator "Ed." Lyons has completed a test of time on trains arriving at his station and at Kelly's station. He hits the nail on the head every time, but from the information we received, he has not as yet figured "how many grains of corn a turkey will eat after a fast of 24 hours."

"Tom" Maloney, formerly operator at "DA" Tower, bid in and received third trick at "DO" office, Chillicothe.

On November 19, Engineer G. W. Miller, Loveland, received the sad news of the serious illness of his sister, Mrs. J. Soule, at Hamden, which later in the evening developed in her death. Mrs. Soule was struck by an automobile on the road between Dundas and Hamden. The sorrowing relatives and friends have our sincere sympathy.

The many friends of Miss Margaret Doster, stenographer to division freight agent, were sorry to learn of her misfortune in having her left shoulder blade crushed and her right arm broken in an automobile accident. We are glad, however, to announce that she is rapidly improving, and we hope to see her back with us again soon.

A happy home is a mighty good Safety device on a railroad. Accidents make unhappy homes. Help prevent accidents. B. CAREFUL!

### Toledo Division

Correspondent, EDWARD M. MANNIX

#### East Dayton, Ohio

"Stop that Leak" is the appeal of President Willard and this applies to all of our employes. Stop that Leak! It's up to Us!

To the Christmas greetings extended by our superintendent, our master mechanic and general foreman, we reciprocate in full and will show our appreciation during 1923.

"Don't think because you drive a fliv That others have no right to live; Don't think it's smart to drive so fast— Perhaps that drive may be your last. Remember that tremendous loss By trying to beat the train across, And e'er you leap, just look before, And you'll be alive in '24."

#### Division Accountant's Office Dayton, Ohio

Correspondent, GERTIE MAE MCBRIDE

"LOST — Yesterday — Somewhere between sunrise and sunset, two golden hours, each studded with 60 diamond minutes. No reward is offered for they are gone forever."

Now that the New Year is here, let us resolve that our resolutions for the coming year will not go begging. There are many things that we might resolve to do. For instance, we might resolve to

Stop smoking,  
Stop swearing,  
Stop chewing,  
Stop coming to work late,  
Stop wasting time and material,  
Stop making errors,  
Stop gossiping,  
Stop economizing with your good judgment,  
and "Stop that Leak" wherever you find it.

J. Walter Kennett, former employe of this office, has returned to the service as time clerk, Maintenance of Way Bureau. Glad to see you back, Walter!

A new siding is being completed at Fairmount, Ohio, which will serve two companies, the Mitchell Steel Company and William S. Lang & Sons. The estimated cost of this siding is \$4470, the total length is 280 feet. This will no doubt prove to be an added source of revenue on cars moving in and out of these two plants.

**SCHEDULED FOR WASHINGTON'S BIRTHDAY:** A twenty-round bout between Beck and Ralph. It promises to be quite an event. Practice has begun and even the practice is interesting. Anyone wishing to coach these two amateurs will please come around at noon hour or in the morning before working hours.

Joseph Ekberg has accepted a position in this office as office boy. We are glad to welcome you, "Joe," and hope that this is only the start of a successful railroad career.

Miss Hutzell—Why don't you let me work at noons?

Mr. Ronk—I am afraid you might fall off and get thin.

Miss Hutzell—Why, you let Lawrence O'Connell work.

Mr. Ronk—Yes, but he couldn't fall off any more unless he lost an arm or a leg.

If you have a good looking baby, wife or husband, the editor would like to have his or her picture for the MAGAZINE.

### Agent's Office

The boys in the Agent's Office refuse to go with "Bill" Rusche to another turkey raffle. He's too lucky—wins everything in sight. Next year we are all expecting an invitation to a big turkey dinner on Thanksgiving Day if he has as much luck as he had this last time.

Clarence Yost has accepted a position as demurrage clerk in the Agent's Office—both his pedals were getting worn out travelling the yards.

Erma Miller is now comptometer operator. The boys said—well no matter what they said, it was very favorable, Erma.

Mr. Snider, of the Agent's Office, has almost met his match in talking. Sometime ago he purchased a parrot, and say! How that bird can talk! However, his friends in the Agent's Office are doubtful if the bird can beat Snider.

Maude Veidt has returned to work again after being away for several months. Everybody was glad to see her.

Sometime ago, while en route over the Erie, I met a match manufacturer who had known our division freight agent, Mr. Warburton. This manufacturer said he had known Mr. Warburton while he was on another division and had routed a load of matches over the Baltimore and Ohio, Toledo Division, because he knew Mr. Warburton was located on the Toledo Division.

### Found In Bushaw's Stocking

Dear Santa Claus:

Won't you please bring me a set of false teeth for Christmas—the dentist took all of mine, every one, and now I can't chew. As it is nearing Christmas time and there is always plenty of hard candy I'm afraid I may not be able to enjoy Christmas candies unless I get them. I have to live on soup now and so I can't even accept invitations to Christmas dinners because I am afraid they may not have soup. Won't you please bring them now and don't forget where I live?

A. C. BUSHAW

P. S.—If by any chance you have forgotten my address, I work at the Telegraph Office, 3rd and Webster, Dayton, Ohio.

Master George Emmett Stocklein, 13 month's old son of assistant chief clerk, Superintendent's Office

THE PRINCETON BATTLE MONUMENT

# \$100 Brings 9<sup>FT</sup> x 12<sup>FT</sup> Congoleum Rug and 3 Small Rugs to Match

All Four  
only  
**\$15<sup>95</sup>**  
Less than the  
Price of One

The price of the famous Congoleum Gold Seal Art Rug is just as well known, absolutely as standard, as sugar, salt or flour used to be.

Go anywhere, look everywhere, in stores, catalogs, magazines and newspapers—and once more refresh your memory of the actual universal standard price of a full size Gold Seal Congoleum Art Rug.

Here we bring you not one rug alone, but four—and all four for less than the regular price of one. A full room size, 9 foot x 12 foot, Congoleum Rug and three small companion Congoleum Rugs to match, each small rug 18 x 36 inches.

And that's not all! No matter who you are, or where you live—regardless of your circumstances—we'll send all four rugs immediately, without waiting, red tape or bother, for just a dollar pinned to coupon.

**30 Days Free Trial.** We'll send all four rugs on trial for 30 days. We want you and urge you to put them down on the floor and use them for a whole month—free of expense and, without promise or obligation of any kind.

We absolutely guarantee that if you would rather return the rugs after making this kind of a trial, just say so and send them back. We will refund to you every solitary penny of transportation charges, both going and coming. We'll refund your dollar and we'll make this complete refund in cash without asking you for any sort of an explanation.

### Pay Little by Little Take a Full Year

Still there's another advantage—an advantage that ought to place these Congoleum Rugs in every American home. In spite of the lowest price in existence—in spite of giving three small rugs to match absolutely free—we bring you the opportunity to clinch this *proven bargain* without a tiny bit of worry.

One dollar with the coupon brings all four rugs immediately. And we'll wait a year for the balance of the money. If you keep your rugs after making a 30 day's trial, you can pay little by little, almost as you please, taking a full year. That's the way we sell everything.

### We Want to Place a Congoleum Rug in Every American Home

Congoleum Gold Seal Art Rugs are rapidly becoming the national floor covering—universally used in the kitchen, bathroom and dining room in good homes. People of taste and judgment are glad to use Congoleum Rugs in their best rooms. It is the rug with a hundred superior points.

**They lay flat** from the very first moment without any fastening. They never curl or kick up at the edges or corners. There is no need to tack or fasten them down. Dirt cannot accumulate underneath. They follow perfectly any unevenness of the floor.

**No. D4C408** 9 ft. x 12 ft. Genuine Congoleum Gold Seal Art Rug and **\$15.95** three companion rugs to match, each 18 x 36 inches. Mosaic Tile Pattern in Robins' Egg Blue and Stone Grey. All four rugs on 30 Days Trial.

**Pin One Dollar to Coupon and Mail**

Spiegel, May, Stern Co., 1540 Thirty-Fifth St., Chicago, Illinois  
Enclosed find \$1.00, for which send me on 30 day's Free Trial your special offer of one 9 foot by 12 foot genuine Congoleum Gold Seal Art Rug and three companion rugs to match, each small rug 18 x 36 inches, exactly as described in this advertisement.  
If I keep the rugs, I will pay you \$1.25 monthly. I have 30 days to make up my mind. If I decide to return the rugs within 30 days, you are to refund my dollar deposit and all carrying charges, both ways. The price of all four rugs is \$15.95, which is guaranteed to be less than the regular price of the 9x12 foot rug alone.

## Mail Postcard for Book of 10,000 Bargains

This Congoleum Rug bargain is just a sample of the ten thousand other bargains in our great big furniture book. A postcard will bring it to you free for the asking. It shows *everything* for the home. It is probably the largest book of the kind published. A great many things are shown in their actual colors. You may furnish your home from it completely and at saving prices, on long credit, from cellar to garret.

### ALWAYS A YEAR TO PAY

When we mail you our free bargain book, we open your credit account in advance. You never need to ask for credit. It's the way we sell everything. And we always loan articles free for a whole month before you need to decide.

So, no matter where you buy furniture and house furnishings now, we would like you to have our book for comparison anyway. Look everywhere else first, if you please, but also give us the opportunity to show you our wonderful display.

#### A FEW DEPARTMENTS

Wood Beds	Clocks	Curtains	Bedding and
Furniture	Steel Beds	Sewing	Pillows
Linens	Floor	Machines	Lamps
Cooking	Coverings	Brass Beds	Musical
Utensils	Silverware	Dishes	Instruments

Rugs and carpets in all weaves and patterns and colors. All sorts of odds and ends like winers, irons, drapes, tools, fixtures, trunks and bags. And great big department of diamonds, watches and jewelry.

Ask for it now. A plain letter or postcard will do.

# Spiegel, May, Stern Co.

1540 Thirty-Fifth Street - Chicago, Illinois

# A Dollar will put Yourself in Her Place

**M**OST women find a lot of fun in window shopping and looking at beautiful styles in catalogs and magazines. But for most of us such fun usually ends in heart aches and even bitterness, because it all seems so far beyond our reach.

No matter who you are or where you live; no matter what your circumstances may be or how little or how much you spend on clothes, I think I can make it all a little pleasanter, easier and more satisfactory in the future. Whatever dreams of stylish clothes you may have, here is an opportunity to make your dream come true. However much you have ever admired some woman of your acquaintance for the clothes she wears, here is an opportunity for you without trouble or bother or extra expense to put yourself in her place.

It seems more like a fairy tale than anything else you can imagine. It may seem almost too good to be true, but I have been doing this for years. Hundreds of thousands of women all over America return to me season after season for all their clothes needs. I never go back on a promise. I guarantee every statement I make.

## One Example Among Thousands

On this page I show you a perfectly lovely little model in one of the season's newest fashions, exquisitely tailored in all wool Poiret Twill. It is a gem of a style. And as you examine it on the fashion figure you may wonder how you would look in her place. I'd love to actually put you in her place without promise or obligation, without expense or risk of any sort to you.

It would give me no end of pleasure to send you this charming dress to try on, to examine and compare just as much as you please. My bargains are my pride. I am especially proud of this value. The matter of style has always been second nature to me, and I am glad to submit this model as an example of the thousands shown in my latest and most beautiful style book.

## Pin a Dollar to the Coupon

For just one dollar with your request, I'll send you this dress, postage pre-

paid, in your proper size, to examine as carefully as you please, to try on to your heart's content. The dollar that you send me brings the dress delivered to your home without one further penny's outlay, without the bother of any C. O. D., without even a thought of money until you decide you want it and to keep it.

## Take All Spring And Summer to Pay

If you find you would rather return it, do so without question. I'll refund your dollar at once. I'll also pay the return express. Money is the last thing you really need to worry about, because if you are delighted you can pay balance of my bargain price almost as you please. I want you to spread the cost over all this Spring and Summer, taking a full six months, paying little by little in small sums, evenly divided, coming a month apart.

My whole business is conducted in exactly the same manner as this one example.

## A Post Card Brings My Free Style Book

This advertisement is intended simply as an example of my styles, my prices, my credit and my terms. My newest Style Book shows thousands of beautiful fashions, wonderfully complete departments in all lines of women's wear, as well as for the boys, little girls, misses and infants. It is by far the finest and biggest book I have ever issued. It is nearly double the size of former seasons.

## All Selections Sent Prepaid on Approval

With it, for a dollar or two you can make every dress dream come true. Everything will be sent you postage prepaid on approval. There will never be any embarrassment or red tape. I always allow a full half year to pay.

This being my greatest book, I anticipate a much larger demand than ever before, so please ask for your copy early. A plain letter or a postcard is enough.

## Here Are a Few Departments:

- |                           |         |            |           |

| Aprons                    | Wraps   | Hair       | Shoes     |
| Baby Needs                | Coats   | Goods      | Skirts    |
| Bathrobes                 | Corsets | Kimonas    | Suits     |
| Bloomers                  | Dresses | Lingerie   | Sweaters  |
| Children's and Boys' Wear | Furs    | Millinery  | Underwear |
|                           | Gloves  | Raincoats  | Waists    |
|                           | Hosiery | Petticoats |           |

## All Wool Poiret Twill Dress

I show directly below an exquisite little fashion that I'd like to send you for just a dollar deposit, postage prepaid. The fabric is guaranteed to be all wool Poiret Twill exceptionally tailored. It is effectively set off with an all around Bertha collar of dainty lace. Elbow length bell sleeves have attractive knife pleated cuffs. A distinctive all around narrow self material belt, falling in streamers in front, is ornamented with fancy cut metal buttons. Side panels, pleated to match cuffs, drop loosely from the belt at sides to below the hem of skirt. Yoke underlining of good grade satin finish cotton that wears excellently. Dress closes at sides with snap fasteners. Color: Navy blue only. Sizes: Misses' 14, 16, 18, 20 years and Women's 34 to 44 bust measure.

# Thousands of Sensational Bargains! for the Entire Family!

## 33<sup>rd</sup> Anniversary Style Book-FREE!

MAIL order shoppers from coast to coast will be overjoyed when they hear the glorious news from PHILIPSBORN'S! We are celebrating our 33rd Anniversary by offering thousands of wonderful bargains in latest styles and highest quality wearing apparel for every member of the family. Our Style Book for Spring and Summer tells you all about it. Our buyers have been busy for months—working day and night—to collect the choicest merchandise they could find and to offer it to you at lower prices than can be had anywhere in the U. S. A. They have succeeded beyond our fondest hopes. Never in all our 33 years' history have we offered such astounding values. Our 312-page Style and Shopping Guide for Spring and Summer is brimful of good news for you. *It's yours FREE.* Write for it at once.

Styles Have  
Radically  
Changed

All Approved by  
**IRENE  
CASTLE!**

So different are this year's styles—so radical are the changes—that the woman who doesn't want to be a "back number" owes it to herself to be posted on the new styles.

Irene Castle, famous movie star and dancer and America's fashion authority, says—*"PHILIPSBORN'S 33rd Anniversary Style Book excels them all and offers wonderful savings. I advise every reader of this magazine to send for a copy."*

**We Serve 3 Million Families!  
We Want 1 Million More in 1923!**

Three million families save money by doing their shopping here. We want to serve one million more during our Anniversary year. We have just completed new buildings giving us 40 per cent increased space so that we are today equipped to give **THE BEST MAIL ORDER SERVICE IN THE WORLD—EVERY ORDER WILL BE PROMPTLY, CAREFULLY AND ACCURATELY FILLED.**

**We Spend 1 Million Dollars Annually  
to Prepay Delivery Charges!!**

We don't want to put our customers to the trouble and inconvenience of figuring express or mailing charges, so we pay it ourselves. It costs us one million dollars a year. We guarantee the lowest prices in the world and on top of it pay the entire cost of delivering merchandise to our three million customers. *Be sure to share in this Million-Dollar Saving.*

**Our "Money-Back" Guarantee  
Most Liberal in the World!**

We not only guarantee complete satisfaction or return your money but we also refund return delivery charges. We refund every penny and we do it promptly and cheerfully. No other but YOU are the judge. And don't forget we guarantee **Lowest Prices in the world.**

**Remember! Easter is Early - April 1st!  
Send Your Coupon Today!!**

Don't delay sending for this book, because you will want plenty of time to choose and will want to make your selections early. Your name and address on the coupon or a postcard will bring this Wonder Book of Bargains FREE!

## Prides of The Baltimore and Ohio

# The Careful Engineer

I love my good old engine and I pilot her with pride  
To haul in Safety all my cars and those who in them ride;  
I help my fireman save his coal—I praise him now and then—  
Encouragement's the finest way to build good railroad men.

I start my engine carefully, to signals all give heed,  
I'm always ready for the word to stop or put on speed;  
And 'specially in the nighttime do I handle her with care,  
For I think, "Suppose my kiddies were all fast asleep back there."

NUMBER 10

## Nina Spengler the Attractive Candidate of the Baltimore and Ohio in the National Good Will Election

### Good Fortune Twice Picked Her for the Honor from Fields of Five Contestants

IT was a little after five o'clock on the afternoon of February 2 and the corridor of the first floor of the Railroad's Annex Office Building in Baltimore was crowded with men and women clerks. They were all hurrying home—all except the excited group surrounding Alice Gillette, who works right near Miss Nina Spengler in the Office of the Auditor Merchandise Receipts.

"Oh Girls," said Alice, "have you heard about Nina Spengler and her good luck? She has been chosen as the Railroad's candidate in a contest to elect a girl for a trip to France."

"Isn't that wonderful, Alice?" exclaimed the girls, "do tell us all about it."

"Well, it's this way," said Alice. "Last Saturday, Mr. Rittenhouse, our auditor, was requested to nominate a representative girl from his department to enter some kind of a contest, and he asked Miss Spengler to be the one. She didn't know much about the affair at the time, and, being very modest, asked to be excused. And that's all she heard of it for a week.

"Then, yesterday, the chief clerk, Mr. Schindhelm, asked her about it again but she still thought that she ought not to accept. You see, her father, who was agent for 35 years at Strasburg Junction, Va., has been an invalid for some time and I suppose that she felt that she ought not to get too far away from home."

"But Nina told me," chimed in one of the other girls, "that her parents were anxious to have her consent."

"And so they are," agreed Alice. "But you know what a conscientious little body Nina is! Well, no matter about that—just listen.

"This morning Mr. Rittenhouse again asked her to permit her name to be sent to Senior Vice President Shriver, so that it might be entered with the names of the other girls representing the various departments under Mr. Shriver's jurisdiction. And Nina, having had the purpose of the contest explained to her more fully, decided that she ought to consent, and now she is the

candidate of this whole great big Baltimore and Ohio Railroad, for this wonderful trip.

"But tell us how it happened, Alice," said the girls in one breath, "you've skipped the most exciting part."

"Just wait a moment, and I will, for Nina told me all about it just before I got on the elevator.

"You see, she went to the Board of Directors' Room in the Baltimore and Ohio Building, where the choice of the candidate was to be made, and there met Mr. Murray, assistant to the president, who is the general chairman for this contest on the Baltimore and Ohio, and Mr. Bullock, who is the general treasurer. And they introduced her to Miss Elizabeth Helfrich, a clerk in the Relief Department, and Miss Lillian E. Schueler of the Auditor of Disbursements Office, who were two of the girls who were to compete with her in the choosing of the girl to represent the departments under Mr. Shriver's jurisdiction. The other two girls were Miss Ella Louise Starke, of the General Freight Claim Office, and Miss Margaret M. Browne of the Treasury Department, both of whom were ill.

"But their names were included in the drawing, weren't they?" asked one of the girls.

"Oh, yes," continued Alice, "and when Senior Vice President Shriver came in and was introduced all around, and Mr. Murray held the hat in which the names of the five girls had been placed in se-

Miss Nina Spengler, the Baltimore and Ohio Candidate in the National Good Will Election

#### EARLY EVENTS SMILED UPON THE BALTIMORE AND OHIO CANDIDATE

1. Senior Vice President Shriver was a "good picker," for fortune decreed that he should choose in the third and winning envelope, the candidate representing his own departments, Miss Nina Spengler, now the candidate of the whole Railroad. J. S. Murray, assistant to president and general chairman of the campaign on the Baltimore and Ohio, is holding the hat; and, from left to right, are: Miss Olive Dennis, in shadow, representing Executive Department; Miss Spengler; Miss Emma McClayton, Operating Department; Miss Mabel Gessner, Traffic Department. The other candidate, Miss Margaret Stevens, associate editor of the Magazine, was ill at home. 2. The tall-tale winning ballot. 3. The wire sent by Miss Spengler's parents telling of their happiness over her being chosen. See text matter. 4. F. H. B. Bullock, Executive Department, general treasurer of our campaign, deposited \$25.50 to cover 255 votes, the first cast in the campaign, by the members of the Baltimore Chapter of the Veterans' Association. George Sturmer, the grand president of the Veterans, is with Mr. Bullock

parate envelopes, and Mr. Shriver, after stating that the third name drawn would be that of the girl chosen to represent his departments, drew first one and then the other—"here Alice became provokingly deliberate and slow as the girls crowded close and asked her to hurry up—"and then he opened the third envelope and read Nina's name—well, I wouldn't have blamed her for getting heart failure right then and there."

"But the worst was yet to come," Alice continued, "for this only made Nina eligible as a contestant in the final ballot. Miss Olive Dennis had been chosen to represent the Executive Department, Miss Emma McClayton, to represent the Operating Department, and Miss Mabel Gessner, to represent the Traffic Department, and all three of them were there. The other candidate, Miss Margaret Talbot Stevens, who is the associate editor of the Magazine and who, in a sense, was the candidate at large of the entire Railroad, was ill at home.

"My, but it must have been exciting," broke in one of the other girls.

"I'll say so," chimed the chorus, and they pressed Alice for the rest of the story.

"Of course," she went on, "the room was by this time full of people, the representatives of the newspapers and the photographers and quite a number of officers who had come to wish good luck to the fortunate girl."

"Oh, go on, Alice, what do we care about that? Tell us about Nina."

"Don't be impatient, girls," Alice replied. "It takes more than one to make up this story. Now listen—"

"The names of the five final candidates were put into separate envelopes, and these placed in a hat. Then the girls and Mr. Shriver and Mr. Murray had their pictures taken, just like the start of a movie.

"And this time, as Mr. Shriver drew out the envelopes, they were opened. The first was that of Miss Gessner, the second, of Miss McClayton, and the third—of our own Nina.

She said that the other girls, who were naturally disappointed, were the best sports possible, and showered her with congratulations and promises of their best support. Mr. Shriver ended the story—which is really only the first chapter in what I know is going to be a much longer and quite as interesting a story—by presenting to Miss Gessner a box of candy, and to Miss McClayton, a bouquet of flowers, because their names were first taken from the box."

And amidst a chorus of "Ohs" and "Ahs" and other approving exclamations the little group passed out of the door, exchanging congratulations that "their Department's girl" had been chosen to represent the Baltimore and Ohio, and promises that they would help get enough votes to enable her to win in the contest.

\* \* \* \* \*

Now the story of "Alice" (and any one of the girls in the A. M. R. office may, if she wishes, lay claim to this fictitious name) is the real

story of how this daughter of Virginia and the Railroad, Miss Nina Spengler, happens to be our standard bearer in the contest which the Baltimore and Ohio has entered with seventeen other organizations with their home offices in Baltimore, for the honor of sending a representative on the Spring tour to be conducted by the American Committee for Devastated France. But "Alice" did not number her chapters correctly. For this, instead of being the first chapter, is one which comes much further along in the book recording the deeds of this splendid organization.

The first chapter starts in one of the war smitten towns of France after the heat of a great battle. Women and children refugees are streaming in great numbers from the battle area, and Marshall Foch, the generalissimo of the Allied forces, who is witnessing the distressing scene, turns to a woman who stands near him and with grief stricken gesture and look, says, "Can nothing be done to help these poor women and children?"

The woman he addressed was Miss Anne Morgan, who then and there determined that she would consecrate her life and fortune to the cause which was so appealingly evidenced before her. The result has been the work already accomplished by the American Committee for Devastated France, which she organized and of which she is still the guiding director.

There have been, of course, many methods used to raise money among the American people for this great work, and the choice of Miss Spengler to be our candidate in the contest for the trip to France, is but the way in which the Baltimore and Ohio is lending its help and asking its employes to help in the cause.

The American Committee has conducted in other cities the same kind of a campaign that it is now conducting in Baltimore. As a result, many American women have been given the tour of France, have investigated the work done by the American Committee and have come back to tell of the frightful desolation and damage wrought in one-sixteenth of the territory of that country, and of the constructive work accomplished by Miss Morgan's committee.

In Baltimore, organizations backing the various candidates, line up their forces to secure votes for them at ten cents apiece. It takes 100,000 votes, all told, to enable one candidate to be sent to France, and if our candidate, Miss Spengler, receives the largest number of votes cast out of the first 100,000, she will

be the candidate first chosen for this wonderful trip. There are provisions made for taking additional girls if a large vote is polled and it is hoped that the total will make it possible for this to be done. But the first concern of our people on the Baltimore and Ohio will be to cast the largest number of votes for Miss Spengler out of the first 100,000 cast for all eighteen of the candidates put into the field by Baltimore organizations.

Everyone on the Railroad who has been in touch with this work thus far, has become most enthusiastic, and the campaign, though still young at this writing, has been well organized and is progressing nicely. Upwards of 20,000 letters, explaining the entire history of the participation of the Baltimore and Ohio in the movement, have been sent out so that every employe can obtain full details. Several different styles of posters in two colors have been printed, and distributed in large numbers wherever on the Railroad they can bring publicity to our candidate. And voting cards by the thousands have been placed in the hands of all department heads for distribution among the entire personnel of the Road.

The ballots and the money covering them will be returned to the chairmen who are appointed to handle the campaign at various places on the Railroad, and these will make returns to the general treasurer, F. H. B. Bullock, Room 306, Baltimore and Ohio Building, Baltimore, Md., on or before February 23, because final returns must be reported at the general headquarters in Baltimore on February 24.

#### Baltimore Veterans Start the Voting

The first votes were cast on February 5 at the regular monthly meeting of the Baltimore Division Veterans. Grand President Sturmer made the announcement and when the votes were counted it was found that the Veterans and their women folks had subscribed 255. One of the accompanying pictures shows Mr. Bullock, the general treasurer, and Mr. Sturmer at the office of the Equitable Trust Company, depositing the money covering these votes.

Many of the chairmen appointed to represent the various departments in Baltimore were present at a meeting held in the Assembly Room of the Baltimore and Ohio Building on the afternoon of February 9. Mr. Murray presided and introduced Miss Irma Wallace, one of the personal representatives and field workers of Miss Morgan. Her talk was supplemented by a motion picture depicting many of the episodes in the tour of the first Good Will delegation to France, showing parts of the devastated regions, the hospitals and milk stations for babies erected by the funds of the American Committee, the battlefields made sacred by the heroism and sacrifice of our own American soldiers, several of the military cemeteries and many other places of historical interest.

#### Miss Spengler in the Movies

Then came the real surprise of the afternoon, when a "movie" of our own candidate, Miss Spengler, was thrown on the screen. There were many whispered remarks made about how pretty she was, how attractive her smile, how sweet and modest her manner, and several even

## How Daddy and Mother Feel About Nina's Nomination

Soon after Miss Spengler was nominated the editor wrote her parents to find out how they felt about her candidacy and prospective trip to France. The telegram reproduced on the opposite page was the answer, the copy being so poor that we are "translating" it, viz:

"Replying to your letter, advise that we are delighted to learn of Nina's good fortune in being chosen by lot to represent the Baltimore and Ohio in Good Will National Election for trip to France. Mr. Spengler was agent at Strasburg Junction for 35 years and when Nina entered Baltimore and Ohio service it just seemed as if we were adding another to the big Railroad family of which we had long been a part. Nina has always been a girl devoted to the interests of her family and loyal to every cause with which she has been connected and the employes of the Railroad will be voting for a thoroughly worthy girl when they support her and can rest assured that should she be so fortunate as to be elected she will creditably represent them and the Railroad.

Mr. and Mrs. C. W. Spengler

went so far as to say that she would be claimed by the movies "after she returns from France."

It is interesting to recall here that Miss Spengler is the only daughter of C. W. Spengler, for 35 years agent at Strasburg Junction, Va. She was born in Strasburg in 1895 and was graduated from the Strasburg High School in 1913 and from Lynchburg College in 1915. She remained home for a year and then taught school at Hot Springs, Va., for two years, entering the service of the Baltimore and Ohio in 1918 in the Office of the Auditor of Merchandise Receipts. She is a very attractive, intelligent and prepossessing young lady, with a fine, modest manner, who will do credit to our Company, and to the cause, if she is elected.

#### Plans for the Voting Campaign

On Monday, February 12, W. W. Wood, chief of Welfare, started on a trip over the System, to address meetings of employes which will be called in the interest of the Baltimore and Ohio candidate. He will have with him Arthur Gans, "the Safety Movie Man," and the films above described, so that just as many of our employes as possible can meet their candidate, at least in the movies, and learn what a winning

girl she is and how well she will represent the Baltimore and Ohio on the proposed trip.

#### Vote Early and Often

After all, however, the success of our candidate will depend not so much upon the thoroughness of our organization, as upon the well known ability of our employes to get together and "put across" spontaneously any proposition that has received the unqualified support of our Management.

Miss Spengler is a strong candidate who will win votes from the most reluctant. But, after all, it is not Miss Spengler that we are supporting so much as it is a most worthy cause and the Railroad's substantial endorsement of this cause. It ought not to be hard to "vote often" in support of a fund that is relieving the suffering of French women and children; which is, in a business-like way, loaning money to the French farmers so that they can rehabilitate their farms and make them productive. The French farmers pay back this money to the American Committee, which then uses it to erect hospitals, milk depots and the like. These will be perpetual monuments of American sympathy and of the fact that "Americans do care."

## Curious Instances of Railroad Regulation

REGULATION of the railroad's has been popular among the 99 agencies (48 of which are State Legislatures) during the last few years.

Last year the Legislatures of 42 States introduced 572 bills dealing with transportation, of which 161 became law. A few of the 572 measures introduced last year provided the following:

To require the railroads to fence the entire right of way.

Prohibiting smoking on trains.

Prohibiting the use of paint spraying machines.

Prohibiting advertising during threatened or actual strikes.

Prohibiting locomotives from running backwards.

Requiring all passenger trains to stop at all county cities.

Requiring railroads having tracks along moving streams to keep the channels of such streams clear.

Requiring railroads to see that the minimum moving distance for the average freight car should be fifty miles a day, although the average for the entire country is only about 26 miles a day. One of these laws attempted to impose a penalty for delay of \$10 an hour.

Some 28 or more states specified headlight requirements without regard for uniformity, and 14 or 15 States have totally dissimilar safety appliance regulations.

One state actually enacted a law requiring that when two trains using double tracks met at a crossing they must both stop and that neither should proceed until the other had passed—*Railroad Data, May 25, 1922.*

## The Executive Who Was Jealous of His Subordinates

AMONG the most senseless—and most common—of all mistakes is jealousy," says Mr. Wilkinson, in the *American Magazine*. "It keeps executives from surrounding themselves with strong assistants. It keeps workers in the ranks from studying the strong points of their associates and profiting by them. I've been trying for years to eliminate it in people under me—and I've been at least seventy per cent. successful.

"A typical case? Well, I'm thinking now of an executive who was always bringing new ideas to the managerial conferences of a store with which I was once connected. He paraded them proudly. He fought for them boldly. And we adopted a good many of them because they were essentially sound. This man seemed to be succeeding in his effort to create an impression.

"Presently I discovered that he was getting nearly all these ideas from subordinates, to whom he failed to give a word of credit. The people under him learned the same thing, and resented it. The morale of his department, which had been excellent, began to crumble. It was a bad mess all around.

"Now suppose this executive had said to us: 'Yesterday, I heard Bill Jones make a suggestion that I think is a corker. I'm passing it along.' Why, Bill Jones and all the other workers under him would have been tickled to death that he was boosting them to the boss, and they would have worked their heads off. I would have congratulated myself that I had a department head who could inspire his people to think up things for the good of the business. And everyone would have been happy."

# The Princeton Battle Monument

*Read This Description of Our Cover Design*

IN "The History of the Battle of Princeton," the author, Thomas Jefferson Wertenbaker, after suggesting that it marked the turning point from the defeat and despair of the Colonial forces, to victory, says:

"The victory at Princeton had two results; the entire country regained hope and thousands of soldiers who had formerly believed the cause futile, enlisted in Washington's army, thus making it possible for the Continental Army finally to triumph over the British forces."

It has long been realized by the State of New Jersey and the university and town authorities of Princeton that this victory should be appropriately commemorated, and their plans were finally consummated last year in the erection and dedication of the beautiful monument which is pictured on the front cover of this issue.

A proper appreciation of the beauty of this masterpiece by Frederick MacMonnies will be enhanced by a reading of the following description of it, prepared last year for the Princeton Alumni Weekly by the wife of the sculptor:

"In designing the large group in relief which decorates the front facade of the Princeton Battle Monument, the intention was to represent Washington, surrounded by his forlorn remnant of an army, at the darkest moment of the Revolution. The weary soldiers, in rags, cold, hungry, and heartsick, with their backs to the wall, are making their last desperate stand amidst their dead and dying comrades.

"Washington, mounted on his weary but gallant horse, rises calm and resolute above the darkness and despair around him, as if wholly possessed by a great hope, an unshaken faith, a shining vision of the future. As he bends forward intently in his saddle, his piercing gaze fixed upon this distant vision, he sees through the darkness the spirit of the young Republic leading him on to victory; hard-pressed, fainting, almost spent, she raises the shattered flag on its broken staff as she calls to the men behind to press forward in one last rally. A dying officer falls across her path; the standard bearer is dead at her feet; she is weighted down and held back on all sides; but with supreme effort she emerges from the welter, opposing to obstacles the irresistible forward

sweep of her movements. The face of the little drummer boy below her is illumined, as though his dying vision glimpsed for a moment the image of Victory. Shivering in his ragged cloak he half rises to salute her and to muster the men in a last roll call of his battered drum. But the men, unable to see beyond the misery which engulfs them, do not seem to share Washington's bright vision of hope.

"The standards carried by the wavering ranks behind droop irresolute and confused back of Washington's horse. The little group in front, rallying around Washington, stand their ground, grimly resolute though hope fails them.

"The central theme of the group

stands out. It is not an anecdote narration of facts of history. It is a presentiment of character in supreme crisis as revealed visually by significant movement, gesture and expression, which the observant eye of the artist has seen and understood and truthfully recorded in an harmonious arrangement of line and mass. It shows the faith, the unfailing vision of Washington, pointing the way; the patriotic fervor of the men, steadfast in despair, following the great leader through every obstacle to push on to their goal, to turn the tide at Princeton at the most fateful moment of the Revolution.

"It is the epic of the lost cause; of defeat turned into victory by the miracle of a supreme heroism, sacrifice, vision, and faith, which triumphs over despair. It is dedicated to all lost causes heroically supported; to Thermopylae, Gallipoli, Princeton, the Marne."

*"No Words in the English Language Contain a Finer Thrill than—*

## **'You Have Excelled'**

Lesage, W. V., December 30, 1922

To My Supervising Officers:

In regard to the prize awarded me for the most improvements made on main line section during the year now past, let me say that there are certain nerve centers in the human body which respond when certain words are spoken to you or you read the words some one has written to you. You feel the little thrills—a buoyancy of the body.

No words of the English language have caused more thrills of the human body, I think, than the three words, "You Have Excelled," spoken or written to you by your superior officer. I have felt them when a boy when I could stand in the school-room and receive a prize and hear my instructor say, "You have excelled in your class." I have felt them a few times as a man, once in particular some years back when I mind the thought—"you have excelled." Therefore, I hope we shall all go through the incoming year endeavoring to have the little thrills come again, but we must remember the old adage—"There is no excellence without great labor."

Section Foreman J. V. Snyder,  
Lesage, W. Va.

received a personal letter from a Baltimore and Ohio official, Mr. A. W. Thompson, who, while he did not say it in as many words, meant the same thing—"You have excelled."

Therefore, I wish to thank you all for the prize awarded me, not altogether for the purchasing power of the \$35.00 (which I admit was very welcome) but for all the little thrills that go along with it, when you keep in

I thank you.

(signed) J. V. SNYDER,

Foreman, Section No. 34

Lesage, W. Va.

Ohio River Sub-division

## The Lincoln Memorial

by Margaret Talbott Stevens

*How blessed is the man who dares to speak the thoughts that sear his breast—  
Who challenges opposing worlds, does well his part, leaves God the rest!*

High up above the homes of men the shafts of Washington arise  
To spear the gloom of brooding clouds and catch the glory of the skies;  
Strange tales of chivalry they tell, of courage strong, of noble hearts,  
And songs of men whose spirits dwell no longer in the busy marts  
Where forging hammers beat and ring, where furnace flares with blazing light,  
Where rumbling trains speed on and break the mystic silence of the night,  
Where statesmen gather to enact the mighty dramas of the world,  
While over all, with healing balm, the Flag of Freedom is unfurled.

To this fair city's hallowed shrines the classic dreams of Genius gave  
Ionic column, obelisk, entablature and architrave,  
With purity of Parian grace, entempled on Potomac's shore—  
The beauty that was Athens' recreated at Columbia's door:  
From dome to dome, from shaft to shaft, the amber light of heaven leaps  
To glorify each marble shrine where Memory her mission keeps:  
Each monument its message brings, yet one stands out whose words extol  
The spirit of the man who dared to live the dictates of his soul!

It graces well the river's bank, the fair Potomac's quiet marge -  
 A fitting place for him who held blest Freedom as his sacred charge;  
 For Liberty pervades the air and sanctifies the hallowed space,  
 While seem to sound sweet harmonies of seraph wings throughout the place.  
 And there that white heroic form, ensculptured by the hands of men,  
 Reflects the kindly soul of him whose great heart seems to beat again;  
 On that wide portico he rests with meekness written on his face,  
 And gazes out as though with deep compassion for the human race.

Think ye this backwoods boy had dreamed, as stretched before a chimney place,  
 He lived among his friendly books and ciphered on a shovel's face,  
 That youths would dream some day of him, and view his form in stately seat,  
 And measured cadence mark the steps of great men to his marble feet?  
 Though crumbling stones and ruined walls, beset by storms of land or sea,  
 Make dust of such memorials, his work will live eternally;  
 Nor fire, nor flood, nor drought, nor frost - though myriads of seasons roll -  
 Can bury in an earthly tomb the Nation's reawakened soul!

All hail, all hail to Lincoln's name! Obeisance pay, ye earthly powers!  
 Well may ye sound his praises now and strew his monument with flowers:  
 With pride extol his virtues great, ye sons and daughters of this land,  
 Acclaim the man before whose shrine world potentates in reverence stand.  
 All honor to this saintly soul who bore the burden of the State,  
 And brought the Nation from the slough of cruel war and bitter hate;  
 Let every state sweet homage bring; Potomac, sing your roundelays,  
 And hills of Washington rejoice as nations join the hymns of praise!

*How blessed is the man who dares to speak the thoughts that sear his breast -  
 Who challenges opposing worlds, does well his part, leaves God the rest!*

# Stop That Leak! Stop That Leak! Stop That Leak!

## Economy as Seen by the Train Dispatcher

By C. M. Trussell, Chief Train Dispatcher, Akron Division

THE Baltimore and Ohio Company is no exception to the rule that progress goes with economical administration. Through careful study our Road has given us operating and safety rules that cover practically everything connected with our business; therefore our first duty toward economical operation, is to observe carefully all our rules because these rules have been tested and have proved RIGHT. The effect of their observance will be ECONOMY.

we can to carry them through successfully. That will mean Economy.

### On Time Trains

A great amount of money is spent yearly compiling time tables and advertising our passenger trains, and we know that no schedule on any time table is either impossible or unreasonable. Yet we have more late passenger trains than we should have, and spend much time offering excuses for them. Barring accidents, there are few reasonable excuses for

thing, and if we do this, we will effect economy. We will give our salesmen (traffic men) a better product than our competitors can furnish, and in that way earn the necessary dollar to SAVE.

### Extra Engines and Extra Men

There are two most important items for us to watch in our line of work, namely, extra engines and extra men. We should not keep engines we can do without, nor have a large number of extra men on the trainmen's list.

It is comfortable to have a list of engines and crews awaiting our call, but it is not economical. The engine will be burning fuel, not making ton miles, and there is a possibility that some other division needs it. Be sure, therefore, as business drops off, to store and properly report locomotives that are not needed. Those that need shopping should be shopped at once because if we keep either good or bad engines in service, we will use them, our train load will fall off and our ratio will surely drop.

The same thing applies to extra men. As soon as we can drop a man from our list let us do it by all means. He is on there to earn money, and human nature will find a way of doing just that, even though it seems to be impossible.

And labor and facilities which, while working today do not earn their keep, will mean a multiplying of idle men and facilities later on, because of the initial waste. Hence surplus power and a useless surplus of labor are both wasteful to all concerned because every dollar that is saved in either item goes back in large part to increasing facilities for future business and thus securing equipment for the employment of more men.

### Classification a Proved Economy

*Are general officers watching "Left Overs" too closely?*

Classification has proved itself economical and a business getter; of course, its rules and regulations must be observed to effect its purpose. In this connection it is felt the general officers can assist in accomplishing this purpose by not watching the "left overs" so closely,

Wentworth, of East Dayton, fires a broadside for "Stop That Leak!"

### Wholehearted Observance of Instructions

Sometimes instructions are issued that appear to us impracticable, expensive and altogether wrong. They generally cause a little swearing and are handled in a half hearted manner, and the result is unnecessary expense and failure. A little common sense and judgment would quickly show us that we have no right to question instructions issued by superior officers, because we know not the motive, nor the effect desired, and our duty is to buckle down to these instructions, whatever they may be, and do everything

late passenger trains. In fact "man-failures" are about the only excuses we can offer. More interest in the work will put our passenger trains "ON TIME" and keep them there, and that is the best indicator of a good railroad and economy.

No schedule in the freight time table is impossible because our records show that we have often accomplished an on time freight performance. We made the on time performances with regular engines and crews, with good judgment and carefulness in their handling. It is possible to do this, as a general

# Stop That Leak! Stop That Leak! Stop That Leak!

# Stop That Leak! Stop That Leak! Stop That Leak!

especially in the big yards, where there are several classifications to be maintained. Doubling up on classifications to get one more train out before midnight, is not economical, because it means either light power, or extra switching, or both, and should not be done.

The handling of fuel is a big thing, not generally recognized. This has been much improved in the past few weeks, and will surely effect economy.

### Brilliant Individual Performance versus Team Work

Closer co-operation between the different departments is necessary, and will surely effect a great saving. Some of us forget that money saved

or earned is for the Baltimore and Ohio. We allow our "petty" grievances to come first and refuse to help the other fellow because we don't happen to be in that department which needs help. In other words, we forget what we are here for, because we are so engrossed with ourselves.

A good man does his work well, then does some of the other fellow's work. He has ability, uses common sense and good judgment, and appreciates the other fellow's efforts. Of course a clear conscience and a smile go with these qualities.

Our President has made a just request. Now let's all get together to effect the desired result.

### Engineer J. J. Johnson, Keyser, Saved Thirteen Car Replacers

THE following letter, written to Engineer J. J. Johnson, Keyser, by Superintendent Van Horn, on January 23, is self explanatory.

"Have just been advised that during the month of December, 1922, you brought into Keyser Terminal thirteen (13) car replacers which you found lying along the right of way.

"Your actions in this matter indicate a fine cooperative spirit and must be

*The Conductor Who Washed His Signal Flags—  
The Brakeman Who Saved Lead Ends of Torpedoes—*

## These Men Are Stopping That Leak!

By T. E. Banks, Train Master, Chillicothe, Ohio

MANY employes, on this division save for the Company but these two are worthy of special mention at this time. Conductor S. M. Hagan sent to me two red flags and two white flags that had been in constant use for eighteen months, and which he himself had laundered several times. This was an experiment with this conductor, and they came to me with his recommendation to adopt some method of this kind. Brakeman C. E. Hildebrand, while out flagging, made it a practice to pick up the lead ends of torpedoes lying along the track and he accumulated about fifty pounds, which he turned in at the store room and received credit for. Such cases only go to show what actually can be accomplished along the line of saving when the right inclination prevails.

A railroad has but one thing to sell, TRANSPORTATION. Saving time in transporting the passengers and freight to destination means increased earnings, reduction of overtime, and reduces the liability of claims. To increase the revenue in both freight and passenger service, let every employe remember that whatever capacity one is in, courtesy is the greatest asset one can have, and the satisfaction derived from it makes

one feel more than rewarded for his effort. If every employe would conduct his work as if he owned the railroad, there is no doubt but that many millions of dollars could be saved each year.

Safety first saves lives, limbs and dollars.

To examine switch points prevents derailments, thus resulting in saving.

Observe the careful man and follow his methods, thereby saving yourself and Company's property.

Protect grade crossings while switching and coupling up trains. This alone will save thousands.

Think before you act. This will result in savings.

Have your signal lights in good condition to insure safe operation.

Encourage the beginner, thus making him efficient and saving.

Look out to save the little things. The big things will take care of themselves.

Energy expended will bring good results.

A foreign car delivered to a connecting line before midnight saves one dollar.

Know your job and there will always be a better one waiting for you.

Engineman John J. Johnson, Keyser

actuated only by the interest you have in the welfare of the Baltimore and Ohio Railroad and I desire to express the appreciation of the Management and myself for the interest displayed.

"With kind personal regards,  
I am, etc."

The value of these car replacers is \$18.00 a pair. In other words the interest and care which Engineer Johnson took for his employers, had a money value of about \$117.00.

Engineman Johnson is only one of many employes who, day in and day out, are conscientiously taking a deep interest in every phase of their work. The suggestions received at the Magazine office to enable the Company to save money, indicate a widespread and gratifying response to the request made by our president in the December issue.

# Stop That Leak! Stop That Leak! Stop That Leak!

## Saving Money in Track Maintenance

*A Contrast of the Work of Two Section Foreman*

By W. F. Berrett, Supervisor, Baltimore Terminals

**T**O save money in track maintenance the section foreman has to be on top of the work on his section and not have the work on top of him. This means that he must first know maintenance conditions on his section and then plan his work systematically.

John Jones, Section "A," Is a 100% Foreman

Foreman John Jones, Section "A," maintains a section we hear little from. While going over his section we observe that he is familiar with all details. He is interested in his work and is filled with an enthusiasm that reflects itself in the members of his gang.

The general appearance of his section is pleasing. It is clean. Cinders and dirt are cleared away from tie plates, spikes, rail and rail fastenings, saving these accessories from rapid deterioration from corrosion. In consequence the life of these accessories is lengthened and money saved.

He has watched drainage conditions carefully and water is not standing at any places along his track. This condition is reflected in uniformity of cross level of his tracks. The surfacing and lining that Section Foreman Jones does is effective and does not have to be frequently watched and gone over. Here is a large saving because when labor is once spent, it is lost, and work that can be avoided in lining and surfacing is work and consequently money spent.

Rail fastenings and fastenings around switches and frogs are found tight. Loose fastenings are working against good maintenance night and day. Foreman Jones keeps his bolts and fastenings tight and his anti-creepers in place, thereby preventing deterioration of rail fastenings and accessories by vibration. By preventing excessive wear to rail fastenings and accessories, both labor and material are saved and the life of the rail on his section is materially greater than on any other section we have.

### His Careful Planning

One of the greatest money savings made by Jones other than that of keeping his section clean, and cinders, dirt and accumulations free of his ditches and clear of rail and accessories, is the systematic handling of new and scrap materials. His renewals are planned and done at a time when he can work on the track with least interruptions. The new materials are distributed and applied at the proper time and the old materials and scrap are collected and disposed of promptly, thereby avoiding an accumulation and making available for use such materials as may be used again and making quick turnover of materials that are to be sold for scrap.

### Foreman Samson is below Par

We hear of Foreman Pete Samson, Section "B," often, because no matter how much supervision we give him, he is always in trouble. Although he has been on the section long enough to be familiar with all the details, when we go over the plans for improving his section, they are a surprise to him. He lacks enthusiasm and his gang is slow.

Although this section is given much of our time, we cannot be satisfied with it. We find accumulations of cinders and dirt in most unexpected places and the drainage does not have just the proper "edge." To prevent deterioration or stoppage of drainage we often have to direct Samson's attention to these important details when his time could be well devoted to making improvements in other directions. This breaks up systematic planning on this section and in consequence work on this section is costly.

Generally, rail fastenings and fastenings around switches and frogs are found tight, but here and there we find joints that are loose and frog bolts that are working loose which call for immediate attention. This upsets the planning on this section and there is a loss of time

and in consequence a loss of money in having these details taken care of as special work, instead of in line with planning and execution of regular work.

One of the losses we have to watch the closest on Samson's section is his use of materials. When he has a switch to renew, or a frog to change, we have to watch closely to see that the work is undertaken at a time when the fewest interruptions will occur from traffic. We also have to see that proper materials are assembled and proper tools available for the work.

Our task as supervisor is largely that of getting Pete Samson as enthusiastic and as thoughtful of the details of planning his work as Foreman John Jones. When we have accomplished this, we will save as much money in track maintenance on Section "B" as we do on Section "A."

## Economies of Consolidation in Great Britain

**G**REAT BRITAIN has about 23,000 miles of railroad. We have about 256,000 miles. The investment in Great Britain in railroad properties is estimated at about \$6,000,000,000. The valuation of our railroads has been placed by the Interstate Commerce Commission at about \$20,000,000,000. So that with ten times the amount of railroad mileage, our valuation is only three and one-third times the English valuation. On January 1, 1920 or more railroads of Great Britain, about 20,000 miles of line (19,881) out of the whole 23,000 miles, were merged into four great systems. Sir Eric Geddes estimates that this consolidation will effect a saving of £20,000,000 a year—around \$100,000,000. Merger of lines in this country is contemplated in the Transportation Act of 1920. Whether or not any such ratio of savings could be effected here as in England is an open question. If it could, and the English estimate is correct, a merger here would save \$1,000,000,000 per annum. But conditions are widely different.

—Bache Review

# Stop That Leak! Stop That Leak! Stop That Leak!

# Stop That Leak! Stop That Leak! Stop That Leak!

The Stop That Leak Campaign is not an effort to spy out, or tell tales about, the other fellow. It is an effort to get every employe to realize the foolishness of all waste and to help stop it! All of us are asked, in the spirit of mutual helpfulness, and that alone, to send our suggestions to Stop That Leak, Mt. Royal Station, Baltimore, Md.

## What Does Your Boss Do?

UNDER the above caption Miss Charlotte Marlowe, MAGAZINE correspondent at Parkersburg, W. Va., says:

"My boss says: 'That's all' and then pulls a lot more correspondence out of his pocket to answer. What does your boss do?"

Well, now that Miss Marlowe has "spilled the beans" about her boss, let's hear from other intrepid employes whose bosses won't mind a little joke, even if it is on them.

No entries accepted unless signed.

### The Honor of the Forefathers

One day James J. Hill, one of the greatest figures in the history of American industry and often called "the Empire Builder of the Northwest," was making an inspection trip on a railroad property he controlled. With him was a young officer of his operating department.

They were discussing a branch line running up into the hills for the development of some mines—a development which had not at that time proved to be a profitable one, although those back of it and the railroad men thereabouts had confidence that eventually it would prove highly remunerative.

So the junior officer said to Mr. Hill: "I don't know but that it would be a good thing for me to put some money into that enterprise. They speak hopefully of its prospects and it might be a good investment."

"Don't do it," said Mr. Hill. "You have a perfect right to, but people might learn of it and say that the railroad built the branch line because officers of the railroad had money tied up in the mine. Railroad officers should avoid even the appearance of evil."

\* \* \*

The white light of government supervision and publicity has beaten down upon the railroads so much during the last twenty-five years that there has been, perhaps, a tendency for us of the railroads to feel and act smugly conscious of our virtue, and, inferentially at least, to contrast with much credit to ourselves the present days when "everybody can know everything about the railroads" with the days before government supervision when the acts of railroad officers and the intimate affairs of their roads had more privacy.

Yet the probability is that the really great railroad builders of the past and previous generations were men actuated by the highest motives and keenly responsive to the public interest. The "buccaneer" was the exception and not the rule.

Today the plethora of regulations makes it practically impossible for a railroad manager to wander into forbidden paths, even if he were thus tempted.

### Remarkable Safety Record

The remarkable safety of passenger transportation on the railroads in general was brought to my attention forcibly by a smoking car conversation overheard recently. A traveling salesman was talking to a railroad man and said:

"I carry a heavy line of accident insurance because most of the insurance companies double their benefits for injuries received in a train accident, and I do a great deal of traveling."

"Perhaps that is the reason I do not carry much accident insurance," replied the railroader. "I suppose I travel a good deal more than you do, but travel on the railroads is so safe today that I am in less danger while riding on trains than I would be were I engaged actively in some other line of work which made me travel the streets as men in other businesses do."

Did you know that the Baltimore and Ohio has not killed a passenger in a train accident since May, 1919? Even before this time, in fact for the last ten years, the Safety record of the Baltimore and Ohio has been remarkable, the number of passengers killed in train accidents being almost negligible.

One always feels like "knocking on wood" when making such a statement because we all realize the great hazards of moving thousands of passengers daily at such tremendous speeds. But the record stands nevertheless and should be an incentive to even greater Safety endeavor.

### The College Ideal of Service.

The new professor of engineering at the University of Michigan, John Stephen Worley, a prominent consulting engineer in his prime, at forty-six, has given up his work and a \$25,000 income to teach engineering at the University of Michigan at a salary of less than \$5,000 because he felt that in training young men he could be of greatest service. To those "who measure people with a golden yard stick," Mr. Worley's decision will be a revelation that such ideals of service are not confined to fiction.

Incidentally we learn that Professor Worley has started a class in *Transportation Engineering*.

### Truth in Advertising

In mid-December an advertisement of a grocery store in Baltimore had at the top in bold face, big type, "Big Meaty Select Eggs—35 Cents a Dozen."

Being somewhat unusually interested in eggs we were forced to the conclusion that this was an excellent example of truth in advertising and that the word "meaty" was not used metaphorically, but literally. The eggs in question being some which perhaps just failed of hatching last spring.

Additional light was cast upon this unpleasantly truthful copy by something in much smaller type, way down the page, to wit: "Carton of 12 Eggs—the Pick of the Nests—65 Cents—"

These having, apparently, had a more recent acquaintance with the nests and the hens than the hatching eggs just mentioned.

## Our English Language

Among other questions the application for employment blank, form 726, asks:—"Do you speak the English language?" Foolish question! But—do you? You answer "sure I do." Well, why *don't* you? Your answer is not English, that is, not correct English. However, you need not worry. I don't speak English, you don't speak English, we don't speak English and ninety-nine per cent. of the populations of the United States and the United Kingdom do not speak the English language correctly. And yet the English language is regarded as *the* easy language.

It is estimated that the Greek has nearly twenty-thousand different terminations for the regular and irregular conjugations of verbs, while the English has only four for the regular and five for the irregular, and the cases, genders, moods and tenses that make the grammars of other languages perplexing, are almost lacking in the English.

When it was charged that "English lacked grammar," Sir Philip Sidney met the charge with the assertion that it didn't need any. "But," said he, "for uttering sweetly and properly the conceit of the mind, which is the end of speech, it is the equal of any tongue on earth." And Professor Townsend in his "Art of speech" affirms that "by the use of help-verbs English speech has a power which the ancients with all their inflections could not attain."

Yet De Quincey writes that "through a circuit of prodigious reading" he had met with only three authors that had not violated the accident or syntax of English grammar. And the same is probably applicable to every other language. A French writer, Couvier, indulging in sarcasm, declared: "there are five or six Frenchmen who know Greek; those who know French are fewer."

So let us not worry about the correctness of our speech, if only we speak it properly. With a few mutilated verb-roots and chewed up nouns, and the assistance of mimicry and gesticulation, our immigrants manage to become Americans and accumulate wealth. But proper speech is an accomplishment that is creditable and worth while cultivating.

## Birds of a Feather

*Similia similibus amantur.* Translated: Like loves like, or, Birds of a feather flock together. We made this notation the other day when visiting at the Bronx zoological park. They have the most wonderful collection of birds, gathered from the climes—singers, talkers, swimmers, battlers and preeners; thousands of them, with a thousand shapes and colors, yet there were few visitors there to admire them. But the house containing the Simidae, commonly referred to as the monkey-house, was packed like a subway train in rush hours, and an attendant told us that "it was always so."

We passed—(ahem)—a couple of hours there, ourselves, watching an Orang-Outang trying to solve the puzzle of a padlock that the attendant told us "had been put there to give him something to think about." The crowd, of which we were part, gave us something to think about. The crowd? Why? Simply because we were reminded of such expressions as "the call of the wild" "reversion to type" and *similia similibus amantur*?

## The Voice of the Minority

There is a story to the effect that George Bernard Shaw, critic, satirist, playwright and self-admitted great Pooh Bah of letters, attending the first performance of one of his plays and hearing some disapproving individual in the audience shout "rotten" (they do that quite regularly in England) at several stages of the performance, finally rose in his seat and exclaimed: "I agree with you, my friend, but don't you notice that we are a minority?"

To have an opinion, even a minority opinion, is neither wicked nor wrong, though it may not operate to the best interest of the di enter to shout it in the face of the majority, as "majority" means "bigger," which is equivalent to "stronger."

But might is not always right; in fact, it seldom is. Neither are majorities always right. All history is a story of errors committed by majorities. Majority crucified the Christ, and is responsible for a thousand other crimes, prior and subsequent to that event. And history keeps right on repeating itself. However, majorities are short lived; those of today become minorities tomorrow; when Vox Populi turns down its thumb they go under. Which proves that they were wrong, and that nothing is ever settled until it is settled right.

When the conscience of a majority awakens and compels it to listen with sympathy to the pleas and arguments of a minority, and, instead of chaining it to its chariot or to the cannon's mouth, adopts the methods of the missionary, then Vox Populi will be accompanied by a harp instead of a jazz-brass-band.

## Departing Spirits

The Casket Manufacturers' Association of America displays on its letterhead, below the association name, this motto: "Help us, help yourself." Cannot just figure it out. Respectfully referred to the puzzlers. If they had a cut of a jug labeled "Embalming Fluid" (now served under spurious labels to such as prefer a "merry life though a short one") going with the text, we might be able to make something out of it; otherwise, we figure that when we are in the position to help them we are past self-help. If they try to convey the idea that to help them and ourselves we should do something to "pass" some rich relative their way, (we are beyond temptation; we have no rich relative) they should be prosecuted as "accessories before the fact."

## Note:

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

THE answers to the Puzzles published in the November issue are:

## 2. RHOMBOID

Across:

- 1—Condition or standing,
- 2—An eloquent speaker,
- 3—One who makes or sells knives,
- 4—A song of thanksgiving sung at Matins,
- 5—An examination of that which is past,
- 6—One who holds an estate or tenements by periodical payments.

Down:

- 1—A letter,
- 2—Noting motion towards,
- 3—A curved line,
- 4—Tight, stretched,
- 5—To pronounce,
- 6—To join together,
- 7—To pass a rope through any hole,
- 8—To destroy,
- 9—Encountered,
- 10—A personal pronoun,
- 11—A letter.

Baltimore, Md.

Ben Franklin

## 3. CHARADE (12)

When we search ALL early,  
Along the snowy banks,  
We find them soft and white and pearly,  
In their shining ranks.

There the redbreast met them  
Gave the call of spring,  
And the hurrying bluebird set them  
Quivering 'neath its wing.

See, their heads uplifted  
Always brave and sweet,  
Even when lingering snows are drifted  
Round their slender feet.

We caress ONE lovingly  
 'Tis a pet at home you see,  
 Tree of grace TWO loves to look  
 At her shadow in the brook.  
 Whitney Crossings, N. Y. Spica

4. SQUARE  
 (New International)

1—A puzzle,  
 2—Dwarfish,  
 3—Interior,  
 4—Going (Obs.),  
 5—One who minds,  
 6—Sea adders.  
 Worthing, S. D. Sherlock Holmes

5. TRANSPOSITION (5)

There was a young lady named PRIME  
 Had not the conception of rhyme,  
 She lacked all incentive,  
 Thoughts never inventive,  
 Just purposeless seemed all the time.  
 And so I conclude she was FINE  
 I wouldn't select her for mine;  
 I'd grow very weary  
 To hear her say, "Dearie,  
 Where shall we go out to dine?"  
 Lafayette, Ind. Towhead

6. PYRAMID

Across:  
 1—A letter,  
 2—A gentleman (Obs.),  
 3—A Rajah's wife,  
 4—A grandmother,  
 5—A fat unwieldy person (Dial. Eng.).

Down:

1—A letter,  
 2—Abbreviation for "bushel,"  
 3—(Law) A thing,  
 4—Wit,  
 5—A native of India,  
 6—Genuine,  
 7—A large Australian ratite bird of the  
 genus Dromaeus,  
 8—Edge (Obs.),  
 9—A letter.  
 Mulkeytown, Ill. Todd

7. TRANSBEHEADMENT (5)

Old Billy Blue got in a stew  
 When he some lies his wife did tell:  
 And FIRST than that he was so fat  
 His wife's call-down gave him a "spell."  
 He said that he had been to see  
 Some siek friends who had kept him  
 late,  
 When she knew well if he would tell  
 'Twas poker kept him from his ma'c.  
 If he had won a lot of "mon"  
 She then would ne'er have Billy  
 "sassed;"  
 She knew he had lost quite a "wad,"  
 And it was losing made her LAST  
 Bangor, Pa. Jack O'Lantern

8. REVERSED RHOMBION

Across:  
 1—Covered with frost,  
 2—Same as Iranian (New International  
 Dictionary),  
 3—Those who erase,  
 4—Vociferations,  
 5—Those who raise,

6—Telegraphic transmitters,  
 7—Animals that nest.  
 Down:  
 1—A letter,  
 2—To see (Obs.),  
 3—In law, a thing or things,  
 4—To slant,  
 5—In grammar, to strike out, as a vowel  
 or syllable in a word,  
 6—One who erases,  
 7—Those who frame,  
 8—(New Int. Dictionary) Razors (Obs.),  
 9—(Slang) One by preeminence,  
 10—(England) Titles of baronets and  
 knights,  
 11—Toes (Obs.),  
 12—A type measure,  
 13—A letter.  
 Brooklyn, N. Y. Gemini

9. ENIGMA (7)

Backward or forward I pass the same,  
 Backward or forward I spell my name.  
 I slip, I slide, I turn, revolve,  
 With seven letters my name evolve.  
 And even those by careful score,  
 Can be reduced to only four.  
 New Florence, Pa. Helva Goodman

10. DIAMOND

(Defined by New International Dictionary)  
 1—A letter,  
 2—Normal,

3—One of the twelve apostles,  
 4—Any of certain very large totipalmate  
 birds of the genus Pelecanus,  
 5—Ironically censorious,  
 6—Relates,  
 7—Runs sw ftly,  
 8—Was not (Obs.),  
 9—Letter.  
 El Paso, Tex. Osaple

11. HALF SQUARE

1—A sacred composition for solo voices,  
 2—Withdraws,  
 3—Appeased,  
 4—Delicate hues,  
 5—Natural substances containing metal,  
 6—That color of the spectrum farthest  
 from violet,  
 7—A part of the verb "be,"  
 8—A letter.  
 Johnstown, Pa. Tom Crestmore

12. TRANSPOSITION (4)

When the FIRST and care of the load I bear  
 LAST and torture my weary soul,  
 I look up above to the God of Love,  
 And away my burdens roll!

Just between You and Me

In No. 7 we present the first "Trans-  
 beheadment" published in this department.

(Continued on page 41)

**Prizes**

Wick-o-cincy, who has evinced so much interest in this department and who has produced some splendid puzzles, offers as a prize for the best list of solutions in this number, a year's subscription to the Enigma. He wants to let other puzzlers know what he thinks of puzzling as a mental developer.

In addition, the National Puzzlers League, through the official editor, Mr. Wm. D. Flagg (Nanki Poo), offers two six months' subscriptions to the Enigma for the second and third best lists.

To receive proper credit all lists of solutions must be in my hands by April 5; the answers and solvers list will be published in the May issue.

The splendid offer of Senior Vice President Shriver of a "New Standard Dictionary" for the employe of the Baltimore and Ohio who does the best work in the Puzzle Department during the first six months of 1922, should encourage every member of the Puzzlers' Club to his or her best efforts. If you don't own or have never handled a New Standard Dictionary you cannot imagine what a wonderful storehouse of knowledge it is. While you will be making an effort for this valuable prize you will also be acquiring some additional knowledge and be getting a great deal of pleasure and mental relaxation. So, let's go!

# Women's Department

Edited by Margaret Talbot Stevens.

## Sandwiches for the Lunch Box

**D**URING the months of February and March, when there comes that longing for something different in the daily menu, that appetite for fresh vegetables which are then so high-priced in the markets, it is the housewife's problem to know just what to put into the lunch box for the kiddies at school and for her husband who carries his lunch.

Nothing seems to take the place of sandwiches, in spite of the fact that we do grow tired of them. To make them more palatable, try spreading the slices of bread with butter; wrap these in waxed paper and put the filling in another little waxed paper package, or in a little jar, according to the nature of the filling. Sandwiches that are made in the morning oftentimes become "soggy;" the bread absorbs the filling and this is what makes us grow tired of them. Instead of the usual sliced bread, try making a biscuit dough, spread it out in a flat cake, about half an inch thick, and bake it in a round pie pan. This takes only a few minutes and may be baked while you are getting breakfast. When nicely browned, take from oven and set aside to cool. Then cut as you would cut a pie, into quarters, split open, spread with butter, and wrap them for the lunch box. With these little "short-cakes" put in a little jar of jam or preserves. The tiny jars in which mayonnaise dressing and cheeses come are splendid for this purpose. They hold just enough of filling for two or three sandwiches, or enough potato salad slaw, stewed prunes or apricots to make the school lunch attractive.

The children will like canned tomatoes in these little jars, too. Season the tomatoes with salt, a little pepper and onion. This makes a nice accompaniment for the ham sandwich luncheon.

Save all your old cups which have lost their handles and use them to bake little custards or bread puddings for the lunch. Don't forget to add a spoon to the lunch box whenever there is a jar or cup. Hot cocoa in the thermos bottle makes a delightful addition to the lunch on cold days, either for the children or for Daddy.

### Now for the Sandwich Fillings!

In the Dinner Pail Contest which we held last year, there were lots of sandwich suggestions given by our Baltimore and

Ohio women. Here are some of them which may help you to vary the lunch menus:

1. To a small roll of cream cheese, add a cupful of chopped nut meats. Mix well together and place in small jar.
2. Split hot sausages length wise and wrap in waxed paper. Butter rolls to be used with these. Daddy may like mustard with his.
3. Grind cold roast beef. Mix with a bit of chopped pepper or lettuce. Moisten with a little salad dressing.
4. Combine sliced chipped beef with lettuce.
5. Chop raisins and nuts and mix well together.
6. Chop fish. Salmon, tuna fish or sardines are preferred. Season to taste.
7. Slice boiled tongue and add a leaf of lettuce or a bit of chopped celery to each sandwich.
8. Meat loaf makes delicious filling, as also does corned beef.
9. Scrambled egg with minced chipped beef gives a new flavor for the usual egg fillings.
10. When whole tomatoes are available, remove the pulp (this may be set aside to use in soups) and chop the remainder. Add this to strips of crisp, fried bacon. The man of the house will like this.
11. Butter the slices of bread. Add two or three crisp lettuce leaves and a couple of chopped olives.
12. Instead of regular sandwiches, butter some crackers and put into the lunch box with two devilled eggs.
13. Make boneless codfish cakes—with plenty of codfish in them. Use as filling for slices of rye bread.
14. Instead of meat, fish, cheese or

Copied by Virginia, little daughter of Agent Watkins at Sykesville, Md.

eggs, make a filling of fruit—chopped apples, celery and onions, or of cold slaw.

So there you are—14 different kinds of sandwiches, and we are indebted to the following Baltimore and Ohio women for them:

Mrs. C. W. Klein, wife of machinist, Lima, Ohio; Miss Grace Boyer, daughter of the late Engineer Lemuel Boyer, and Mrs. Gertrude Boyer, her mother; Miss Addie McCauley, now with the Employment and Record Bureau, Baltimore; Mrs. W. E. Hadden, wife of conductor, Dover, Ohio; Mrs. F. W. Fritchey, wife of master mechanic, Riverside; Mrs. George W. Galloway, wife of foreman, Mt. Clare Shops; Mrs. Charles W. Shipley, wife of conductor, Baltimore Division; Miss Lillian Betony, 14-year old daughter of Section Foreman Betony, West Virginia; Mrs. O. L. Smith, Gaithersburg, Md.; Mrs. W. M. Wingrove, Bradford, Pa.; Mrs. J. A. Engstrom, Garrett, Indiana.

If others among our railroad women have some different suggestions concerning the packing of lunches, or any particularly good recipes, we should be glad indeed to hear from them.

## The Art of Being Happy

By Marie Statterick

Secretary to Division Engineer, Wheeling, and Correspondent for the MAGAZINE

**T**HE greatest dream that I have is the true answer to the art of being happy.

Tonight, while thinking of going to bed instead of sitting up to read a little longer than usual, I happened to glance at an old picture, which I once cut from a magazine and hung on the wall near the head of my bed. I felt myself being drawn mentally toward the picture. I have always admired it; somehow it always holds my attention, for the title gives me something to think about. It is "The Wind Hewn Cypress."

A queer old misshapen bundle of branches is about all that there is to the picture, an old cypress tree that has been blown about by the wind. Yet, if it could speak, I am sure that it would say that it is happy, for it has remained just what God made of it—still a cypress tree.

Yes, the art of being happy is to be yourself always. This is my inspiration.

### New Dishes

Uncle Hiram from Podunk was taken by his nephew into a downtown hashery for lunch.

"I guess I'll have some coffee and sinkers," said the nephew.

"Did you say sinkers?" asked the old man.

"I sure did, Uncle."

"Well," said Uncle Hiram, as his eye fell on a spaghetti eater, "I reckon I'll have a mess of fishin' lines like that feller is eatin' out of a bowl."

—Railroad Red Book

## Mazie Gets a New Dress

WHEN the new fashion books which show the patterns for the Women's Department arrive in the office of the MAGAZINE, it is a great day with the girls who work in the Multigraph Office adjoining. Noontime is spent in scanning the pages for the latest styles and many an idea is gleaned for the plan of the season's creations. Thus, it was not surprising when we heard a chorus of "Ah, isn't that just too cute for anything!" When we looked for ourselves, we discovered it to be pattern No. 4091, a little girl's dress.

So that's how it happened that Miss Genevieve Wright, chief multigraph operator, Mt. Royal Station, decided to try out this pattern on her little five year old niece. The little girl's real name is Mary Lillian, but it has been shortened by her relatives to "Mazie," in honor of one of Mazie's grandmothers.

Mazie is a real Baltimore and Ohio girl, for besides being the niece of Genevieve, her grandpa, Samuel E. Wright, is one of our foremen at Locust Point. So, as

Assistant Photographer Allard said, "there are three Wrights, so that makes it all—Wright, all right." And Grandma Wright helped to make the dress, so it *must* be all—Wright!

This little dress was made of natural colored pongee, a most serviceable material for a dress for old or young. Its washable qualities make it most desirable, for after every washing it "looks like new." The trimming was of blue grosgrain ribbon, of which three and one half yards were required. The ribbon was not used down the left side of the dress, as the dress seemed complete without it. In order to add another touch of smartness to the little frock, the hem was made deep, thus shortening the pattern a bit, and bloomers were added.

The pattern is Number 4091. It is a splendid warm weather frock and one that may be worn with a gumpe on cool days. Cretonne in red and blue tones is illustrated in the pattern cut, with a binding of black saten. This makes a delightful little

morning, afternoon or school frock for the kindergartner, depending, of course, upon the material used. It is cut in four sizes 2, 4, 6 and 8 years, and will be mailed to any address on receipt of 12 cents in stamps. Use the regular pattern coupon. A 2-year size requires one and a half yards of material, 32 inches wide; the 6-year pattern requires but two and a quarter yards, without the bloomers. The pattern does not include bloomers, but we have a splendid bloomer and petticoat pattern (No. 2472), which may be had in the same sizes. The price is 12 cents.

### A Personal Letter

Baltimore and Ohio Magazine  
Mt. Royal Station  
Baltimore, Maryland

*Dear Women Readers of the Magazine:—*

I know that you are reading the Women's Department of the MAGAZINE. Hundreds of you have ordered patterns through our pages during the past year and many of

Chief Multigraph Operator Genevieve Wright, Mt. Royal Station, and her little niece, Mazie, who wears her new dress made from pattern No. 4091. The pattern is cut in 4 sizes, 2, 4, 6 and 8 years; price 12 cents. Use the coupon on the pattern page

you have helped me with the columns of that department by your splendid contributions. I am wondering, however, if there are not many others among our women who would like to help me. We like to make our Women's Department different from that in any other magazine just by having our contributions from Baltimore and Ohio women alone, and I do want to have it more widely represented by women from all over the System.

You can do your part in making our Women's Department successful by sending in a contribution now and then. I know just how busy some of you are. The girls in the office probably have more time than those at home, for when there are meals to be cooked, sewing to be done and children to be looked after, the woman in the home is mighty tired when night comes. For this reason we shall appreciate all the more any effort on the part of a housewife to send us a contribution for the Women's Department.

Just a bit of inspiration to get you started on helping us, *the Magazine has offered four lovely prizes—a handsome wrist watch and three fine bar pins for the four women who send me the most helpful contributions this year.* This offer includes the girls who work in the offices, the wives, sisters, daughters and mothers of Baltimore and Ohio men. Read all about it in the January issue of the *MAGAZINE* and be sure to let me hear from you as soon as possible.

By looking over the Women's Department in several back issues of the *MAGAZINE* you will know just what I want for its pages—just a letter telling me your ideas on any subject in which women are interested; little stories about the office, your home or your garden; household hints and your favorite recipes; pictures of yourself or of your children. Don't worry about writing with a pen or typewriter if neither is convenient, nor about misspelled words or poor English; we all make mistakes and these will be attended to before the printer gets hold of them. Will you help me? Send your letter to me and mark the envelope "Personal," if you wish.

Yours sincerely,

*Margaret Talbot Stevens*

Associate Editor

Many of the dainty patterns pictured here will be suitable for the new materials, and the nice thing about these patterns is that the price is only 12 cents each. Besides, if you don't find something particularly appealing on these pages, just send 12 cents for the new Spring and Summer Book of Fashions. Use the coupon in ordering patterns, or a separate sheet of paper if you do not wish to clip your *MAGAZINE*; but be sure to give your name and address, together with the number and size of the pattern desired.

## The Fashion Woman Sends Us the New Spring Styles

By Peggy

### A Neat Dress Style for a Little Girl

4243. Voile with embroidery, gabardine with braid, or gingham with bands of contrasting material, would be attractive for this style. The sleeve portion may be omitted.

The pattern is cut in four sizes: 2, 4, 6 and 8 years. A 6-year size requires two and a half yards of 32-inch material.

### A Simple Pretty Frock

4251. Jersey cloth in a pretty shade of brown was selected for this design. The stitchery is in black yarn. This style is also good for combinations of material. A very dressy dress could be evolved from Paisley silk and velvet.

The pattern is cut in four sizes: 6, 8, 10, and 12 years. A 10-year size requires two and seven eighth yards of 36-inch material.

### A Pretty Frock for Mother's Girl

4254. Serge and velvet were here combined. One could use plaid woolen and plain serge or jersey, or make the trimming of embroidery or soutach braid. The sleeve may be in wrist or elbow length.

The pattern is cut in four sizes: 8, 10, 12 and 14 years. A 10-year size requires two and one eighth yards of 54-inch material. To trim as illustrated, will require one half yard of contrasting material 40 inches wide.

### A One Piece Frock with Draped Panels

4264. Figured silk combined with crepe is here portrayed. This is a good style for velvet and satin, or net and chiffon.

The pattern is cut in three sizes: 16, 18, and 20 years. An 18-year size requires seven yards of one material 40 inches wide. To make as illustrated will require four yards of 40 inch material for the dress of plain material, and three and three quarter yards for the panels of figured material.

### A Pretty House or Porch Frock

4258. Figured percale and pique are here combined. Gingham, linen, lawn and crepe are also attractive for this style.

The pattern is cut in seven sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires five yards of 32 inch material. The width at the foot is two and one half yards. To trim as illustrated requires one yard 36 inches wide.

### A Stylish Model

4266. This design is suitable for slender and for mature figures. The plait lines, the side closing and becoming sleeve are very attractive, and new. Figured crepe is here portrayed finished with a stitching in floss. The style is also good for satin, broad cloth and serge.

The pattern is cut in six sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. A 38-inch size requires five and three quarter yards of 36-inch material. The width at the foot is two and one quarter yards.

4262. Here is a model that is exceedingly youthful, and one that displays the latest style features. The fullness over the waistline is held by stays that could be of braid or embroidered bands. The skirt has circular fullness, and measures three and five eighths yards at the foot.

The pattern is cut in seven sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires five and a half yards of 36-inch material.

4257. Crepe de chine or velvet could be used for this style. Blue with red or white, and black with gold floss embroidery

4254

a ribbon sash, will make this a nice frock for party or dance. In jersey or charmeuse, a very attractive afternoon dress may be evolved.

The pattern is cut in three sizes: 12, 14 and 16 years. A 14-year size will require three yards of 38-inch material.

4253. Blue or brown serge would be good for this style. It is also nice for velvet, knit woolens, and taffeta. The

4266

4262

4257

4253

3858

4248

4249

3809

3875

4247

4259

sleeve may be in wrist or in elbow length. In black velvet or blue jersey, with collar and trimmings of suede, this style would be unique and attractive.

The pattern is cut in four sizes: 8, 10, 12, and 14 years. A 10-year size requires three yards of 40-inch material. For collar of contrasting material 40 inches wide one half yard is required.

4264

4258

4248. Here is just the coat to make a boy comfortable and to keep him warm. The fronts are double breasted. The sleeve is in raglan style, with roomy armseye. Serge, cheviot, tweed and other coat materials may be used for this design.

The pattern is cut in four sizes: 4, 6, 8, and 10 years. A 6-year size requires two and one-eighth yards of 54-inch material.

4249. Crepe de chine with bands of filet lace was used in this instance. The model is good for wash fabrics as well as for tricotine, gabardine and soft silks.

# Our Little Railroaders

We're going to write a letter  
And send it in tonight,  
We've answered all the puzzles  
And we're sure they're all just right.

And then we'll write a story  
About our Kitty Gray,  
And how she waves her pretty tail  
To chase the mice away.

## Do You Know Where The Real Mother Goose Is Buried?

Dear Aunt Mary:

Several old codgers have recently tried to break into your Children's Page and this, with a little experience I had the other day, has given me courage to follow their example.

All of your children probably know the Mother Goose rhymes so well that they think they know the Old Lady herself, but I wonder if any of them could tell you where Mother Goose lived or where she came from? I could not have told, for the life of me, had it not been for a visit which I paid to Boston, Massachusetts, last Saturday.

I saw many interesting places but none more interesting than—what do you think?—a graveyard. Yes, it is called the "Old Granary Burial Ground" and it is on Tremont Street, right off the Boston Commons. You can get an idea of how old it is when I tell you that the oldest grave stone standing was erected in 1667, over 250 years ago.

And right near this grave stone is the other one which started me on this story, the grave stone erected to "Mother Goose"

THE WINTER GIRL  
Drawn by Elsie Elizabeth Glanzer

Frost is on the window,  
Snow is in the air,  
Folks who dress in cozy furs  
Little do they care.

—By Mary Stevens, Lothian, Md.

in 1690. On it is a little placard which explains that "Mother Goose was buried here" and that she was the real author of the faneiful rhymes for children which were edited by her son.

Now what do you think of that? It may be that some Boston "highbrow" is trying to fool us visitors to his city, for I have always thought that Mother Goose rhymes came originally from Germany or one of the Scandinavian countries. Do any of your children know about this? If so, wouldn't it be interesting for them to write about it in their department in the MAGAZINE?

Sincerely,

(Signed) R. M. VAN SANT

(Editor of the Baltimore and Ohio MAGAZINE)

P. S.—By the way, I wish you would also let me tell your children that if they ever want to visit a city which is just chock full of historic interest, they must go to Boston. On the same visit mentioned I went through the old State House, and Faneuil Hall and old South Church and saw papers and bits of furniture and guns and old uniforms and pictures associated with such men as Samuel Adams, John Hancock, Paul Revere, John Adams and other great men in our history. Just think, there is a little glass vial containing a hundred or more tea leaves, and these were shaken out of the boots of one of the daring Boston men who participated in the Boston Tea Party. They have been preserved all these years! Yes, and the other relics seem so close to the patriots of revolutionary days that they made me feel that I was treading on sacred ground and made me realize more keenly than ever how inspiring are the pages of America's history and how thankful we of these days should be for the great heritage given us by our forefathers.

### Good for Sarah!

SARAH PENNINGTON, our little friend in Cumberland, always sends Aunt Mary her school reports. Her report for the month of November was so good that I am sure our little people will

want to know about it. "A" means very good; "B," good, and so on. Sarah's grade was "A" for each of the following subjects: Hygiene, History, Geography, Arithmetic, Grammar, Composition and Reading. In Conduct, Effort, Spelling and Writing, her grade was "A-plus," meaning exceptionally good. Isn't that a fine record?

### Her Prize in the Safety Contest

CHILLICOTHE, OHIO  
November 27, 1922

Dear Aunt Mary:

I received my prize yesterday and I am tickled 'most to death over it. If you give such prizes for fourth place, the prize for first place must be grand.

The very next time you have a contest, I am going to enter, and I'll win first place or "bust."

Yours truly,

(Signed) Viola Wolfe

Little Jeannette was visiting her grandmother at Daweswood Farm. Walking in the garden, she chanced to see a peacock, a bird she had never seen before.

After gazing in silent admiration, she ran quickly to the house and cried out: "Oh, granny, come and see! One of your chickens is in bloom."—*Railroad Red Book.*

Anna Danz and Evelyn Eaton, Baltimore, Md.  
Evelyn has sent us a nice story which we shall publish later

# PUZZLES

for the Youngsters

WHILE we are writing these puzzles, the January MAGAZINE has not been out long enough for us to receive the answers to the puzzles that were in our column in that number, so we'll let you have the answers next month. In the meantime, here are some new ones which Mr. Towhead and Mr. Oyster, our puzzle friends, have written for us. If you can send in the correct answers you will receive a package of six Baltimore and Ohio post-cards. Let's all try. First of all, we have Mr. Towhead's riddles:

1. How many times is the letter "A" found in the alphabet?
2. Cut off the first letter of a word meaning the wail of a dog and you will see the name of a bird who flies around during the night.
3. (This is a hard one. It is a charade. We told just what a charade is in the January MAGAZINE). My whole is a word of seven letters, meaning the name of a small bird which everybody knows. The first four letters spell a word meaning a necessary part of a sailing vessel. The last three letters make a word which means to propel a small skiff by hand.

- Now we have some of Mr. Oyster's hidden fishes. As an example, the answer to the first one is "trout." We take the "t" from the word "freight" and the "r-o-u-t" from the word "routed." Now try the others. There is one hidden fish in each line.
1. We want our freight routed via the Baltimore and Ohio.
  2. You may have your supper charged.
  3. The policeman is talking to the gamin now.
  4. Soldiers, harken to the bugle call.
  5. Mr. Bristow haled him into court.

## Two Nice Letters

ST. DENIS, MD.  
December 9, 1922

Dear Aunt Mary:

Although we have gotten the Baltimore and Ohio MAGAZINE for many years, I have never written to you before.

I am in the seventh grade and go to school in Relay. It is a pretty little school, situated at the top of a hill.

I am 11 years old. I want to enter all of the contests you hold.

If I am not mistaken I know the editor of this MAGAZINE - Mr. Van Sant.

Yours truly,  
(Signed) Estelle Barnes

NOTE:

Mr. Van Sant says that he knows Estelle and also her father, who is a splendid type of Baltimore and Ohio man, and of whom Estelle and the other Barnes children should be proud.

Aunt Mary

5409 Penn Avenue  
PITTSBURGH, PA.  
December 3, 1922

Dear Aunt Mary:

I have drawn a picture of Jiggs after Maggie gets through with beating him up.

I guess you don't know how hard she hits him, and I don't think you'd like to be hit like Maggie hits him.

Will you please put this picture in the MAGAZINE next time?

Yours truly,  
(Signed) Richard Fritz

Richard's picture of Jiggs was published in the January Magazine.

## Good Schools and Churches in Dover, Ohio

By Bernice Kirkpatrick

Daughter of Machinist, Dover, Ohio

WHEN I first came to live in this town I was not very old, so, of course, I did not know much about it.

We first went to live on Fourth Street. After a while we moved to Wooster Street, where I have lived for six years. I like it—it is a nice street in the summer.

Long ago, when there were but few houses in Dover, it was nearly all woods. We now have six graded schools, one high school, and six churches. The mayor of our town is nice.

Drawn by Helen, little daughter of Agent C. L. Turiss, Tower Hill, Illinois

I like my home town because of its nice shady streets in the summer time. They keep our streets clean. I like it because there are nice schools and churches to go to, and nice teachers, who try as hard as they can to make you learn.

The prettiest building in our town is the Community Discount & Mortgage Company's building. We have nice stores and nice clerks. My friends are all nice.

America got its name from Americus Vesputius, who came to America and went back to England and wrote a book about it; but Canal Dover got the first half of its name from the canal.

I like the town very well. I would rather live here than in a big city, and I would like to stay here for the rest of my life.

## Dear Girls and Boys:

Please send me some more poems. When you send poems and drawings, be sure that they are original. Your own are much better than copies.

—Lovingly,

Aunt Mary

## HOW TO AVERT ACCIDENTS

1. Bad tracks cause accidents. Keep your eyes open for bad tracks

2. Stop, look and listen! Don't say as this man says - "Step on her, Hank - you can make 'er"

Elizabeth Arndt, Foxburg, Pa.  
Emma Melaney, Foxburg, Pa.

## \*President Willard Tells Veterans at Convention of Grand Lodge about Some of Railroad's Problems

ON the afternoon of January 27 President Willard addressed the members of the annual convention of the Grand Lodge of Veterans in the Assembly Room of the Baltimore and Ohio Building.

He was first presented by the Grand President of the Veterans, George W. Sturmer, with a lifetime honorary membership card in the Veteran's Association, and then proceeded to the discussion of several subjects of great importance to the Baltimore and Ohio at this time, one of these being the present status of the valuation of the railroads.

### The Valuation of the Railroads

He said that ten or twelve years ago, at the instance of certain Senators, Congress decreed that a physical valuation of the railroad properties should be made under the direction of the Interstate Commerce Commission, the basis of the valuation to be what it would cost to reproduce the roads as they exist today.

This work has been carried on faithfully and at large expense to the government and the railroads since that time and as a result the Interstate Commerce Commission has placed a tentative valuation of \$18,900,000,000 on the Class 1 roads, an amount considerably greater than the total value of all the outstanding securities on the same railroads. In other words, by the valuation conducted by the government itself it has been proved that the actual physical value of the railroads today is greater than the total amount of securities which the railroads have outstanding.

\*In view of the large amount of material reported for the Veterans' Department of this issue of the MAGAZINE, it has been impossible to include the minutes of the Convention proper. It is understood that these will be reported by the delegates of the several chapters—Ed.

### What is the Baltimore and Ohio Worth?

Mr. Willard also said that several years ago a survey of the Baltimore and Ohio property was made by Mr. John F. Stevens, the eminent engineer who undertook the construction of the Panama Canal just previous to the time the construction was placed under the direction of General Goethals, U. S. Army, and that Mr. Stevens stated that he believed that the physical value of the Baltimore and Ohio property was from \$70,000,000 to \$90,000,000 more than the outstanding stocks and bonds issued by the Company.

Mr. Willard said further that the tentative valuation made by the Interstate Commerce Commission of \$18,900,000,000 was stated by the Commission to be a fair valuation for rate purposes and that the "fair return" authorized by the Transportation Act of 1920, under which the railroads are now operating, could be based upon this amount.

Mr. Willard pointed out, however, that now that the Interstate Commerce Commission's valuation of the railroads has been practically completed, there appears to be a movement in Congress from the same sources which brought about the initial decree of the Congress concerning the valuation, which would throw out all of this valuation work, remove it from consideration as a fair basis for the making of rates for railroads and establish a wholly arbitrary figure for the value of the railroads, which might not be more than half their actual worth.

Mr. Willard then pointed out what a calamity this would be to the industrial welfare of the nation; how that to keep up with industrial progress it is necessary that railroad facilities be constantly enlarged; that it has been claimed that during the last several years large sums of money have been lost because of inadequate railroad facilities and consequent difficulty

of moving crops to the market in needed quantities and at the seasonable time; and that these inadequate railroad facilities could only be explained by the fact that the returns which the railroads have received for the service they have given, have not been adequate, and finally that the earnings of the railroads have certainly not been the "fair return" of 5¾ per cent. on the \$18,900,000,000 the Interstate Commerce Commission has set as the tentative valuation for rate making purposes.

Mr. Willard pointed to the position of the Baltimore and Ohio, with approximately \$250,000,000 spent in the last ten years for the enlargement and improvement of equipment and facilities, and said that unless investors could be assured that moneys which they might put into our Railroad's securities to pay for a further enlargement of facilities, would bring them a reasonable return, they would decline to invest, and the enlargement of facilities would therefore have to stop.

He said specifically that he felt that a most important thing for the Baltimore and Ohio to do in order to enhance its credit and enable it to forge ahead in building and adding to its equipment, would be the payment of a dividend on its common stock this year so as to restore the confidence of the investor in our property.

He pointed out that each day the Baltimore and Ohio needs to earn about \$65,000 for the payment of interest on bonds and dividends on preferred stock, and that each day our payroll runs about \$325,000 and sometimes as high as \$400,000 a day; in other words that for every dollar we pay investors in the property we pay five dollars in wages.

Mr. Willard then mentioned the "Stop That Leak" campaign now being carried on on the Railroad, as one of the best ways of helping earn a sufficient amount of money this year to enable us to make our property so attractive from the investment standpoint that we can secure sufficient funds for needed improvements. And he urged that everybody get back of this campaign and do what he can to save for the Company.

He said that even as he was talking there was business being offered the Railroad which we could not accept because we did not have sufficient motive power to haul it, and he pointed out how much more prosperous the Road and all those connected with it would be if we had ample equipment to handle a larger business and hence give employment to more men.

He then referred to the substantial response made by the Veterans to the appeal that he made in 1920 for individual solicitation to secure traffic for the Road when business was so light. He said that the support given by the Veterans was of great value to the Railroad not alone

because it meant an increase in our gross revenues, but also because it interested hundreds of men in a vital Railroad problem, probably as they had never been interested before. And he said that he thought that if an understanding of all Railroad problems could be shown by our employes to the same extent that they showed their knowledge and keen interest in that particular problem, we would have comparatively smooth sailing.

Mr. Willard cautioned his hearers, however, not to feel that because of the present large movement on the Railroad, it was easy for us to get and hold business. He said that there was constant competition in service and that the service which we give depends absolutely upon the rank and file on the Road; upon the maintenance men to see that we have a good track, upon the mechanical forces to see that our motive power and cars are kept in good condition, and upon our enginemen and trainmen to see that our trains are operated smoothly and that the people who ride our trains are treated with the greatest courtesy.

#### Making Our Passenger Service Attractive

He told the Veterans that for years he had been endeavoring to make the Baltimore and Ohio noted above all other railroads for the smooth stopping and starting of passenger trains and that to this end we had purchased 165 Pacific type locomotives of ample power, and that even with such ample power he knew that the proper stopping and starting of a heavy train could only be done by an expert engineer who was constantly and carefully watching the handling of his engine. He said his own experience as an engineer had taught him this and he said that he, therefore, would feel extremely grateful to our engineers if they would put forth a special effort to this end.

Mr. Willard maintained that on the Baltimore and Ohio the three prime essentials in the handling of passenger trains are:

1. To go Safely
2. To go Comfortably
3. To go On Time

and that neither the first nor the second should be sacrificed in order to bring about the third. But he explained that our sche-

dules have been made so that properly handled trains can be run on time, barring accident or unusually bad weather conditions. He mentioned the fact that he had been urged to reduce the time of some of our trains, that it had been stated that this could be done safely, but that he felt that comfort was of more importance than speed and that if we could make a reputation for giving our passengers a comfortable ride, we would find our passenger business increasing materially.

He then told of an experience he had about twenty years ago in Paris, France. It was an evening on which he visited a theatre frequented by Americans, where one of the scenes in the play represented the interior of a railroad train which was being handled roughly by the engineer over what seemed to be a poor road. He said he was brought "back home" suddenly and unpleasantly when the French actor in the scene managed to make the Americans in the audience understand that he was supposed to be riding on the Baltimore and Ohio.

Such allusions to our Railroad, though common to the stage in the years gone by, had, Mr. Willard said with considerable satisfaction, entirely disappeared so far as he knew.

The President concluded by telling the delegates that he would like to have them go out on the Railroad and try to make all their associates feel that they are, to the same extent as he is, a part of the Baltimore and Ohio—that it is their Railroad. And he said that if this feeling could be made general all over our great System, he knew that our men would handle their jobs just as if they owned the Railroad and that it would result in great prosperity for the property and for all connected with it.

A unanimous rising vote of thanks was given the President for his interesting address and Grand President Sturmer then introduced Thomas B. Bond, who worked for the Baltimore and Ohio in the year 1852. A fifty year badge has been made for Mr. Bond and Mr. Willard pinned it on his coat. Mr. Bond responded with a most interesting talk. He is probably the oldest living employe of the Railroad and we hope to have a special story in the MAGAZINE on him at an early date, for he is a most interesting

man and has a remarkable recollection of those very early days on the Baltimore and Ohio.

### "Personal Efforts Win for Safety," Says Engineer Harry Howdon

ENGINEER HARRY HOWDON was a delegate from Cincinnati to the annual convention of the Grand Lodge of Veterans and while there he showed the boys the deep interest in safety for which he is noted on home soil.

"For a number of years," said Mr. Howdon, "I tried against great discouragement to make safety men out of the crew of my train. Especially did I have trouble in keeping them from standing on the pilot of the engine and from getting out from between tank and cars while making a coupling. They would see other crews do this and remind me that if others did it they did not see any reason why they should not.

"Finally the good sense of the Safety Rules covering these situations appealed to them and whether I was on duty or not I could be sure that my boys were safe. Now, playing safe on the engine has become second nature to them; although they see other crews violating these rules they continue to be safe men—and keep from getting hurt. My conductor, Dick Honer, Fireman Schwartz, or Brakeman Horbison will substantiate what I say."

#### Who Pays the Pensions of Retired Employes?

Although it has been stated on several occasions in the Magazine that the Baltimore and Ohio Railroad bears the entire expense of the pensions paid to retired employes, some employes still seem to be of the belief that this pension is paid out of the Relief Department funds; this is not the case, the Relief Department simply being the agent for paying the pension funds provided entirely out of the revenue of the Railroad.

Officers, Delegates and Visitors at Grand Lodge Convention, Baltimore, January 26-27

# Happy, Harmonious and Resultful Convention of Auxiliaries' Grand Lodge

ON January 26 at 10.00 a. m. the meeting of the Grand Lodge of the Ladies' Auxiliary was opened on the 12th floor of the Baltimore and Ohio Building at Baltimore. It was called to order by the grand president, Mrs. Frank M. Howard, of Newark, Ohio. Chaplain Mrs. Hodel led those assembled in repeating the Lord's Prayer and in the opening hymn, America. Mrs. Howard then explained that the gavel, to which had been attached the colors of the Auxiliary, had been presented to the Grand Lodge by the Veterans of the Toledo Division.

The roll call of officers by Grand Secretary Mrs. O. L. Wallburg, showed all officers to be present, as well as a delegate from each of the 17 divisions on which the Ladies' Auxiliary has been organized. The officers of the Grand Lodge present were as follows: Grand President Mrs. Howard. Grand Secretary Mrs. Wallburg, Grand Treasurer Mrs. McKee, Grand Chaplain Mrs. Hodel, Grand Marshall Mrs. Allgire, Grand Outer Guard Mrs. Hopper.

## Delegates Present

The delegates were as follows: Baltimore Division No. 1, Mrs. Charles W. Lewis; Martinsburg, W. Va. Chapter, Mrs. W. A. Burkhart; Fairmont, W. Va. Chapter, Mrs. Bartlett; Pittsburgh Chapter, Mrs. H. K. Daugherty; Newark Chapter, Mrs. Helfinger; Garrett, Indiana Chapter, Mrs. Heinlein; Lima, Ohio Chapter, Mrs. John Sweeney; Grafton, W. Va. Chapter, Mrs. Helms; McMechen, W. Va. Chapter, Mrs. John Coxon; Connellsville, Pa. Chapter, Mrs. W. A. Pearson; Washington, Indiana Chapter, Mrs. W. Ross; Parkersburg, W. Va. Chapter, Mrs. J. F. Ferrill; Willard, Ohio Chapter, Mrs. G. K. Bell; Youngstown, Ohio Chapter, Mrs. W. W. Smith; Brunswick, Md. Chapter, Mrs. Teresa Duble; Chillicothe, Ohio Chapter, Mrs. J. I. Botkin; Cincinnati, Ohio Chapter, Mrs. Fred Richter.

Mrs. Daugherty and Mrs. Bell, members of the Distribution Committee, distributed to all present the attractive badges, on each of which was a medallion photograph of Grand President Mrs. Howard.

The minutes of the meeting of last year were read by Secretary Mrs. Wallburg and approved.

A committee from the Grand Lodge of Veterans, including J. M. Garvey, Otto L. Wallburg and D. Moriarity, called upon the assembly to bring them greetings from the Veterans.

Mrs. Howard thanked the brothers for their message and extended a welcome to all the members from Newark and their families. She also mentioned the organization of the the Ladies' Auxiliary at Staten Island, which is expected to be completed by February 15.

## Address of Grand President

In her report Grand President Mrs. Howard, said, in part: "To my associate grand officers, delegates, members and visitors to this, the Second Annual Convention of the Grand Auxiliary to the Baltimore and Ohio Veterans, I extend greetings!

"I want sincerely to thank each and every one of you who have rallied to my support, and for these letters which I have received, in which were expressions of faith in my ability and love for the cause. Upon assuming these responsibilities I determined to put forth my best efforts to work only for the good of our sister and brother veterans and so to conduct the affairs of this grand body that it may be the source of information, inspiration and help to all local Auxiliaries, and to do all in my power to promote the growth of the order.

"While I have not accomplished all I had hoped for, I can at least look back upon a year of earnest endeavor and I trust that we will reap the benefits in the future. With the cooperation of every Auxiliary along the System, I know that good results will come.

"I wish to thank all who have helped me in any way. To our grand vice president and grand secretary I owe special thanks for their help and advice. They have never tired of doing their bit for this Auxiliary.

"It was through the efforts of the grand secretary that we were enabled to have a baby auxiliary in Cincinnati, which was instituted on January 9, this year, when six members from the Newark chapter and two from Lima went to Cincinnati and there were met by the members of the new auxiliary.

"I must not forget to mention the new auxiliary right here in Baltimore, which was a division of the old auxiliary from May until their first meeting for the year. After their vacation during the summer months, the old auxiliary did not see fit to come in under the Grand Body. I allowed the charter on October 18, 1922, as I had made it a point to attend their second meeting for the purpose of hearing their minutes read, and to learn of their final decision.

"Therefore, I called a meeting of the ladies of the auxiliary at the Condon Hotel, that is, of all of those who wished to become affiliated with the Grand Body. I am happy to announce that on the charter for that evening there were a goodly number of women.

"Laying this all aside, however, we wish well to all the ladies of the Social Auxiliary, and we greet and gladly receive into this Grand Body the auxiliary that has just come into our ranks. We hope

that they may grow in numbers and succeed in all their undertakings.

"In closing, I want to express the hope that every grand officer and delegate here assembled will use her best judgment in all deliberations, and that you, by your legislation, will prove that you have come here to do that which is best for all. May this convention be one long to be remembered as a splendid and most harmonious one. Again thanking you for your support and loyalty, I herewith submit the following recommendations:

1. That each member live up to the by-laws, and that all remove their hats and wraps when in business session.

2. That every member shall rise when addressing the Chair, and in making motions, or speaking, say "Sister President," etc.

3. That all supplies be ordered through the Grand Secretary, who will keep them on hand.

4. That the cost of the charters be \$10.00.

5. That the local Auxiliary pay the expense of its delegate to the Convention.

6. That as the per capita tax be received, all outstanding bills be paid.

7. That all sessions of the Grand Conventions be opened promptly at 10.00 a. m. and at 1.30 p. m.

8. That only those who are present at the institution of the Auxiliary have their names placed upon the Charter.

9. That we try not to be personal in our remarks.

"This, my work with the Local Auxiliaries, has been heavy during the past year: it has kept me busy, but it has made me happy, for it has been a pleasure to be of help to some of our Veterans. And if, at any time, I have made a life brighter or have cast a ray of sunshine into some darkened corner, I am content. May our auxiliary work be accomplished in Friendship, Sociability and Harmony. May peace and happiness reign supreme.

"I assure you that it is a pleasure to know each one of you personally."

This concluded the report of the grand president.

The report of Grand Secretary Mrs. O. L. Wallburg, showing a balance in bank of \$62.31, agreed with the report of the grand treasurer.

The report of the Credential Committee showed all of 17 divisions represented with one delegate each.

President Mrs. Howard introduced "Aunt Mary," of the MAGAZINE. Aunt Mary said: "I want to thank the various correspondents of the auxiliaries for their splendid support during the past year. They have kept the pages of the MAGAZINE well filled with the doings of both the auxiliaries and of the veterans' associations. There are some of the press agents who are doing particularly good work and I should like to mention those from Fairmont, Pittsburgh, Lima, Newark and Baltimore.

"There is one other thing that I wish particularly to call to your attention: The MAGAZINE this year is offering four handsome prizes, a wrist watch and three lovely bar pins, to the four women who send in the most helpful contributions before November 1, next. A number of you are present today who helped me out in the Dinner Pail Contest which we held a year ago, and I am sure that you can get into this contest also.

"Someone has asked me if the articles must be on railroad subjects. Not necessarily—anything that may be of interest to women in general will be acceptable. Household hints, recipes, tales of your home, short stories, poems, drawings, anecdotes, almost anything that you can think of; your hubbies; whatever interests you in any way will be of interest to us all, and if the Ladies' Auxiliary should be fortunate enough to capture all four prizes, we shall be glad to award them. I wish you success.

"I hope that you will continue to send in the news of your chapters and that I shall hear from each one of you in this our new contest. Thank you."

Mrs. Howard introduced Mrs. Sturmer, wife of Grand President Sturmer, of the Veterans' Association, who expressed her happiness at meeting all of the members. Mrs. Sturmer has been very ill and she was welcomed back by her old friends of the auxiliary.

**Report of Executive Committee**

Mrs. J. M. Garvey, as chairman of the Executive Committee, made the report of that Committee. A recommendation was made by that committee that the charter be left open for 30 days; another that the Grand Body sustain the Grand President in her action with respect to the Baltimore Auxiliary.

Mrs. Wallburg moved that each member of the executive board be considered a delegate and that she have a voice in the Convention. Seconded and carried.

After this, each of the nine recommendations of the grand president, as noted above, was passed.

During this period the following explanations was made:

Mrs. Fleming, of Fairmont, told of having printing done by local printer, as she had been advised to do. Mrs. Howard advised that whatever work is now out may be completed, but that in the future, all supplies will be referred to the Grand Secretary.

Mrs. Howard asked that all the auxiliaries be named; that these names, the dates of institution, and names of first charter officers appear on the charters.

Mrs. Hodel, from Grafton, asked if two Auxiliaries might have the same name. Mrs. Howard advised that it is not desired that two Auxiliaries have the same name.

After the recommendations had been passed, Mrs. Lewis, president of the Charles W. Galloway Auxiliary and hostess for the convention, announced that a train would be ready at Camden Station at 2.00 p. m. to take all those who wished to make an inspection of the Sugar Refinery; also that at 6.30 there would be a dinner for all delegates, members and visitors who were present at the convention, at the Southern Hotel. She reminded them that the dinner would be informal.

A motion was entertained to adjourn for the lunch hour. At this juncture, Grand President Sturmer, Veterans' Association, stopped in. He announced that between 9.00 and 10.00 a. m. on Saturday morning he wanted the members of the Grand Lodge of the Auxiliary to be present on the roof of the building to be photographed.

Mrs. Howard responded: "We are going to help our Brothers in every way. Please convey this message to them and ask them to see that the wives of those members who do not already belong to our Auxiliaries sign these membership cards and turn them in."

**Guests of Vice President Galloway at Banquet**

The inspection trip to the Sugar Refinery, through the courtesy of the Management, was thoroughly enjoyed, as was also the splendid banquet at the Southern Hotel in the evening, which was provided through the generosity of Vice President Galloway.

**Saturday Morning**

After being greeted by President Willard in the Board Room and hearing his talk, the convention folk went to the roof of the Building, where Chief Photographer G. B. Luckey made a photograph of the group. They then returned to the Convention Room on the 12th floor to resume business where they had left off on the preceding day. The remainder of the business transacted is summed up as follows:

1. By request of the Veterans, the Auxiliary considered the question of the right of the woman of 20 years of service to become members of the Ladies' Auxiliary. The following recommendation was made a motion, seconded, carried, and sent to the meeting of the Veterans:

"It is recommended that we add an amendment to Section No. 1, Article 2, to read as follows: The members of this Auxiliary shall be composed of the wives and widows of the white employes of the Baltimore and Ohio Railroad who are members of the Veteran Employes' Association, and the white, female employes of the Baltimore and Ohio who have been in the employ of the Baltimore and Ohio for 20 years or more."

2. It was moved that the decision as to whether the widows of pensioned employes should be required to pay dues or not be left to the individual Auxiliary. Seconded and carried.

3. A rising vote of thanks was tendered those who had made possible the trip to the sugar refinery on the afternoon of the 26th.

4. A rising vote of thanks was tendered Vice President Galloway and Sister Lewis of the Baltimore Auxiliary for the splendid banquet at the Southern Hotel on the evening of January 26, at which Mrs. Donald R. Hooker was the chief speaker.

**Saturday Afternoon**

1. Roll Call.
2. Announcement that the Veterans' Association had recognized the Charles W. Galloway Auxiliary No. 1.
3. Statements from Various Auxiliaries, as follows:

Officers, Delegates and Visitors Attending the Grand Lodge Meeting of the Ladies' Auxiliary. Seventh from the right third row back, is Mrs. Frank M. Howard, Grand President, who was re-elected this year

### Reports from Auxiliaries

Baltimore, Md. Charles W. Galloway Auxiliary No. 1, Mrs. Charles Lewis, president. Organized on October 18, 1922. One hundred members. Plans for prominent speaker at each meeting. Invitation to visitors.

Martinsburg, W. Va. Auxiliary. Mrs. W. A. Burkhart. Meetings held second Thursday night of each month. Invitation to visitors. Fine cooperation of Veterans. News of the recent banquet.

Fairmont, W. Va., J. M. Scott Auxiliary. Mrs. Bartlett. Good work being accomplished.

Pittsburgh, Pa., Auxiliary. Mrs. H. K. Daugherty. Interesting meetings, drills and entertainments.

Newark, Ohio, Auxiliary. Mrs. Helfinger. Membership over 400. Veterans watch for eligibles and women follow on their heels. Separate and joint meetings. Annual banquet on March 8, to which all are invited.

Garrett, Indiana, Auxiliary. Mrs. Heintz. Meetings held on first Wednesday of month, 60 members last year. Plans for increased membership this year. Social evenings. Raised \$300 last year to beautify public library grounds in name of Veterans.

Lima, Ohio, Pat Leahy Auxiliary. Mrs. Sweeney. Progress of work during year. Business and social meetings. Good times, enjoyed by men, as well as women. Strive particularly to please and delight the old pensioners.

Grafton, W. Va., Auxiliary. Mrs. Helm. Formerly named Charles W. Galloway Auxiliary, but to be re-named because of duplicate in Baltimore Auxiliary. Jazz band entertains at every meeting. Refreshments served. All have fine time.

Wheeling, W. Va., Auxiliary. Mrs. Coxon and Mrs. Gandy. Attendance not so good. Standard funeral design for all members who die.

Connellsville, Pa., Auxiliary. Mrs. Pearson. "Every Member Bring a Member" Campaign. All sick members visited and sent flowers. At present has 130 good members.

Washington, Indiana, Auxiliary. Mrs. Ross. Plans for future.

Parkersburg, W. Va., Auxiliary. Mrs. Ferrill. Named for oldest veteran in Parkersburg. Joint meetings with Veterans.

Willard, Ohio, Mrs. Frank M. Howard Auxiliary. Mrs. Bell. Named for grand president of Ladies' Auxiliary. Good, interesting meetings.

Youngstown, Ohio, Auxiliary. Mrs. Smith. No name as yet. Looking forward to prosperous year.

Brunswick, Maryland, Auxiliary. Mrs. Doble. Meets first Friday in month. Membership insurance, payable immediately after death.

Chilliothe, Ohio, and Seymour, Indiana, no report.

Cincinnati, Ohio, Auxiliary. Mrs. Richter. Instituted on January 9, this

year. Veterans donated \$50.00 toward its beginning.

4. Adoption of standard floral emblem: Green wreath, yellow lettering, with V. in yellow.

5. Election of officers. All officers elected with one exception: Mrs. McKee elected to serve as grand treasurer, vice Mrs. Bowers.

6. Courtesy Committee instructed grand secretary to prepare letters of thanks to go to those who had entertained Grand Body in Baltimore.

7. Decision made that grand secretary receive a definite salary for her services. This salary set at \$50.00 per year.

8. Mrs. Howard announced the entertainment at Moose Hall to take place in the evening. Mrs. Lewis invited all present to tea at her home on Sunday afternoon from 3 o'clock 'til 5.

9. Penny Flower March illustrated and proceeds (\$3.00) turned over to Baltimore Auxiliary.

### Closing Entertainment Meeting Addressed by Vice President Galloway

Vice President Galloway gave a splendid address at a joint meeting of the Veterans and their wives at Moose Hall on Saturday evening. His talk was particularly interesting and instructive, for he made clear many points concerning the finances of the Railroad. Grand President Sturmer of the Veterans, and President Mrs. Charles Lewis, of the Baltimore Auxiliary, also spoke.

On Sunday afternoon Mrs. Charles Lewis entertained at tea the members of the Auxiliary who had remained in Baltimore for the week end and for members of the Baltimore Auxiliary.

### News from the Martinsburg Auxiliary

By Mrs. C. Virginia Taylor

Press Correspondent

YOU have already read, perhaps, of the fine time we had at our annual banquet on January 20. We were mighty pleased to have as our visitors the

splendid group of our officers, including President Willard, as our guests. The members of the Charles W. Galloway Auxiliary, from Baltimore, also came and we had a jolly good time.

We do not feel that we are too late in wishing to each and every Veteran a Happy New Year. May 1923 bring to them and to all the members of the Ladies' Auxiliary also, prosperity and good health. May we gain in membership and be loyal workers, willing to do the tasks to which we may be assigned. There's a little poem that I think will help us all. It has appeared in our MAGAZINE before but is well worth reprinting, and appears on page 31.

### Our Oldest Veteran

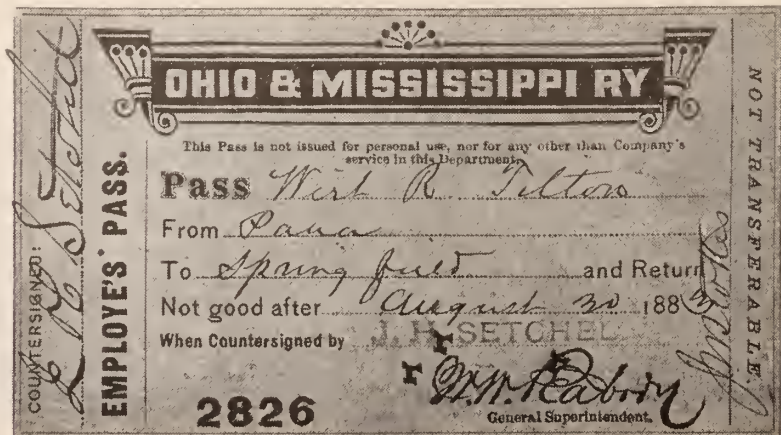

Howard Keedy has been indisposed this winter. His wife is our corresponding secretary and a wonderful worker in our chapter.

Mrs. Charles Lowry, widow of one of our late brothers, and Mrs. Nannie Burner, widow of our deceased comrade, Engineer Burner, have returned from a delightful visit to the South. We only regret that more of us could not have been with them, for, although we are not sure that they needed chaperons, they tell us that they had a wonderful time.

### Engineer Tilton Has Some Old Railroad Relics

ENGINEER W. R. TILTON, St. Louis Division, recently turned over to H. E. Smith, MAGAZINE correspondent at Flora, Ill., a number of old passes, one of which is reproduced herewith. There also was a receipt for an old switch key, dated 1883. Mr. Tilton still has the switch key, which is in good condition.

Mr. Tilton entered the service of the Baltimore and Ohio on February 10, 1880. Two years later he was promoted to yard engineer, Springfield—then the section formerly known as the old Ohio and Mississippi. From that time on he was in continuous service until two years ago, when he retired from active service.

The original of this old pass is owned by Engineer W. R. Tilton, St. Louis Division

## "Running a Railroad is Like Running a Home," Says President Willard in Address before the Grand Lodge of the Ladies' Auxiliary

ON January 27 the morning session of the Grand Lodge, Ladies Auxiliary, opened in the Board Room on the third floor of the Baltimore and Ohio Building, where President Willard made an interesting and helpful address. Mr. Willard said in part:

"I asked Mr. Sturmer to invite you here this morning so that you could see the place where the stockholders have their meetings and where some of the business of the Railroad is handled. I am delighted to see you all here.

### Ladies' Auxiliary Can Be of Great Help to the Road

"I believe that the Ladies' Auxiliary of the Veterans' Association of the Baltimore and Ohio can do great work towards making our Railroad successful. At present we are not paying a dividend on our common stock, and because of this, the credit of the Railroad isn't as good as it ought to be.

"The running of a railroad is not a particle different from running a home. In your homes you have to have money before you can spend it; it is the same way with the railroad. Railroads are mortgaged in the same manner as it becomes necessary to mortgage homes. Since I have been here we have borrowed over \$200,000,000 and used it on the railroad and railroad equipment. Twelve years ago we employed 40,000 men; since then the number has run up as high as 80,000; today it is 68,000. Whether these men work steadily or not depends upon our resources. We must pay the interest on our mortgage.

"We have had to close some shops. As the end of the year approached we had to close our accounts, just as you would do, if at the end of the year you owed some large debt or the interest on your mortgage. If you found that you were unable to meet these debts it would be necessary for you to take drastic steps, just as we have had to do. I remember when as a little boy it became necessary for us at our home to give up a certain luxury—however, I certainly hope that you have not had to give up this luxury—for we had to do without pie, to reduce expenses.

"In line with the railroad's expenses, I think of the strike, and I mention it not because I have any bitterness about it, but because I want you to know the facts. I hold no bitterness toward the men who didn't want to work. It was just our problem to keep the Railroad going in spite of the strike. We had bills to pay for work, as you have necessary expenses in your

homes. Men cannot hurt the railroad without hurting themselves, and the railroad cannot hurt its men without hurting itself. One thing, however, I do want you to know: There was no time from the first day of the strike that the Baltimore and Ohio was not willing to settle with its men on the same terms on which the matter was finally settled. I hope that in the future we shall not have troubles of this kind, and that we shall be able to settle our own troubles.

"We have no ill feelings toward the unions or towards any other organizations any more than we care to what church you belong. We only want you to understand these things and to work with us toward the success of the Railroad. Miss Stevens and Mr. Van Sant are trying to tell you all about the Railroad and its policies through the columns of the MAGAZINE so that you may understand our great interest in all employes and return that interest to the Railroad, thus promoting its success. I want you to help them, for I want to make the MAGAZINE valuable to all of us. We want the officers to explain matters from time to time and to give therein suggestions for ways in which our Railroad men and women can help, for the officers of this Company have come up from the ranks that your husbands and other men of your families occupy today.

### A Prosperous Railroad Means Prosperous Railroad Men and Women

"The greater the success of the Railroad, the more men we can hire, the better the service we can give, and the better the railroad we shall have. There is nothing whatever in the propaganda that when the Railroad gets prosperous it lays off its men. The Railroad never lays men off when it is prosperous; the signs of greatest prosperity are shown when everybody is working.

"Last year we asked you to help us get business. You did it. Today we have more business than we can handle. Our job now is to try to please our patrons and to show that the Baltimore and Ohio is a good public servant, and that its officers and men are honest, competent men. I hope that the railroad men of your family feel this thoroughly; if they do not feel this, we'd rather have them seek work elsewhere.

"The Baltimore and Ohio is good or bad, largely through what you and the railroad men of your family make it and say of it. The life of a railroader is not an easy one, and the life of an officer is not an easy one.

We hardly get time to go home at all. My wife often tells me that I am not at home as much now as when I was an engineer. This week I must be away from home; next week I must take another trip, and goodness only knows where I'll have to be the week after.

"When you come to Baltimore I want you to feel that this building is your home. Use it as you wish; use this room whenever you wish. We are glad to welcome you at all times."

\* \* \* \*

Mrs. Frank M. Howard, grand president of the Ladies' Auxiliary, thanked Mr. Willard for his splendid talk and promised him the cooperation and help of the Ladies' Auxiliary. At a motion from her, the members, delegates, and visitors all arose to give the president a vote of thanks for taking his time to speak to them, but he held up his hand.

"No," he told them, "I do not want you to do that. I would rather go around and shake hands with everyone of you." And he did. Each one told him her name and the town she represented, and there was many a hearty laugh and handshake before the president had made his way around the room.

"I've lived with my husband for 40 years, and during all that time he's been with the Baltimore and Ohio," one good sister told Mr. Willard.

"At that, I suppose that the Railroad has had him more often than you?" asked Mr. Willard.

"It has," she agreed.

"I'm from Willard, Ohio," declared another good sister.

"Ah," said the president, "then at least we have something in common. By the way, did you read that story about Willard, Ohio, in the MAGAZINE? I received a letter from a gentleman who said that the train had bumped him around so hard at that town that he wished to know if the engineer had made a mistake in thinking that the town had been named for Jess Willard instead of for me."

### Just Be the Best

If you can't be a pine on the top of the hill,  
Be a scrub in the valley—but be  
The best little scrub at the side of the rill;  
Be a bush if you can't be a tree.  
If you can't be a bush, be a bit of the grass,  
Some highway to happier make;  
If you can't be a muskie, then just be a bass  
But the liveliest bass in the lake!

We can't all be captains, we've got to be crew,  
There's something for all of us here;  
There's big work to do and there's lesser to do,  
And the task we must do is the near.  
If you can't be a highway, then just be a trail;  
If you can't be a sun, be a star.  
It isn't by size that you win or you fail  
Be the best of whatever you are.

—Author Unknown

# Seen and Heard through the Smoke and the Chatter at Martinsburg Chapter's Annual Meeting on January 20

By Aunt Mary

ALL the parsons in town were evidently on the job, Father McKeefrey being the only minister who was unable to be present. His absence was conspicuous, too, for he has always graced the table on similar occasions in the past. There were Rev. A. J. Seerist, and Rev. H. E. Richardson, of the United Brethern Church; Rev. W. T. Hall, of the Baptist Church; Rev. John R. Jacobs, of the M. E. South; and Rev. F. R. Wagner, of the Lutheran Church. Surely it was a "goodly" gathering.

"Say, 'Bill,' gimme a light," and cigar end was put to cigar end while the Old Timers smoked away on the fine smokes that were provided.

Brother Burkhart was secretly sorry that there was no music particularly adapted to "cutting the pigeon wing."

"Charlie" Auld went around telling yarns about all of the Vets. He talked so fast he didn't give anybody time to tell any tales about him.

"Little Eva" Sturmer has acquired a new nickname—"Steam Roller." We don't know so much about the roller, but we can vouch for the steam.

"Amen! Yes, Brother," but that quartette from the United Brethern Church knows just how!

"General Manager Scheer has a heart as big as the Baltimore and Ohio Building," said Mr. Fauver. Yet he somehow finds room for his lungs for he knows how to speak—his short talk at the meeting proved that.

## Brother Fauver's Address of Welcome

"We like new friends but love the old,  
Those are like silver; these are gold;  
New made friendships, like new made wine,  
Age will mellow and refine.  
But friendships that have stood the test  
Of years and trials are surely best,  
So come and greet us, year by year—  
A welcome always waits you here."

—Selected

## Among Those Present

E. R. Sponseller, former bridge inspector, but now disabled, is night watchman at Martinsburg Shops. He told the "boys" that there are many years of work ahead of him yet. Nearby sat James Hartley, M. H. Harman, C. P. Martin and "Starch" Airhart. Mr. Hartley, who is 83 years old, was 45 years in service as conductor; Mr. Harman, also a conductor, was in service for 31 years; C. P. Martin, engineer, Washington to Cumberland, has had 36 years of it and is still going strong. "Starch" Airhart, whose right name is William, is

mighty popular with his fellows, for his 82 years hang lightly over him. Mr. Airhart was a conductor for 48 years, and he it is who claims that interlocking is no new invention. "Why," says "Starch," "they had it on the Chesapeake and Ohio Canal when I was a boy in kilts and lived around Williamsport."

Among the other "Old Geezers," as they called themselves, were the following: J. T. Rockwell, retired freight conductor, 38 years service; C. R. Gerbig, shopman for 34 years; E. T. Fortney, retired engineer, 30 years; and Robert Clark, water pumper, who is still pumping and who is likely to pump for many years to come.

"Here's another old one, Aunt Mary," sang out "Mike" Sharon, "allow me to introduce A. J. Criswell, who served as brakeman for 32 years."

"Yes," broke in "Charlie" Auld, "he's the guy who ran into a locomotive head-light and stopped to ask if it was lit."

"Ah, keep out of this; this is my party!" declared "Mike" as "Charlie" started to tell us another yarn. In spite of his protests, however, we learned that Mr. Sharon is mayor of Paw Paw, W. Va., sheriff of the town, and revenue officer for that section of the country, besides being the champion turkey shooter of the neighborhood. We also learned incidentally that this revenue officer confiscates all the corn "licker" for miles around, then brings in his friends for a party. Mr. Sharon, by the way, is correspondent for the MAGAZINE. We now realize why his notes are so full of pep.

Following Mr. Sharon were his two special friends, the Hardy Boys, A. C. and T. R. A. C. is operator at Okonoko, and a good operator at that. He's been 23 years in the business of operating, but for reasons unknown, he's no operator on a gun when he tries to kill wild turkeys—he never succeeds. His brother, T. R., is a Cumberland Division conductor, and although he is able to handle a gun rather well, he has no use for such an animal, for he is well acquainted with all the hen roosts along the line. He has been in the service of the Railroad for 34 years and is still going as though wild cats were chasing him.

Thirty-two years of service and setting himself for 70 more, E. W. Rhodes, conductor, declared that he's going to "fix things" for a certain Veteran brother who "locked arms" with Mrs. Rhodes as the two walked down the street a few days ago. Brother, beware!

Among the young men who have been retired from service was L. M. Van Horn, who served as conductor for 45 years. The

boys can't understand why a man of Mr. Van Horn's age should retire. He's just past his 16th birthday, they say.

The "Life of the Party" was Ray Russler, the silver tongued orator of the Martinsburg Veterans, for nothing stirs the blood in his veins like a good argument. No subject is ever brought up but that Ray wears it threadbare. His service record of 29 years means nothing in his young life.

The greatest great grandfather of them all is J. H. Peer, who served for 48 years as passenger engineer. He entered the service of the Baltimore and Ohio on April 1, 1868. Mr. Peer has eight grandchildren and eight great grandchildren.

J. W. Gantt, retired carpenter, has a service record of 30 years.

## Then the Ladies Came In

As soon as the members of the Veterans' Association, the officers and other visitors were fairly inside the hall and had gotten their bearings, there sallied forth from the direction of the kitchen an army of fancy aprons, decorating a happy, most attractive group of Veterans' wives. And these owners brought to the hungry folk great plates, loaded down with goodies, guaranteed to fill the empty "tummies."

There were puffy rolls, filled with chicken salad, there were olives, ham sandwiches and fruit salad. Then came coffee and ice cream, at the end of which many a good brother heaved a sigh of relief. And the folks from Baltimore were happy, too, for a number had forgone the pleasure of a meal in the diner in order to "save up" for this. Needless to say, everything was delicious.

Pausing in the midst of playing the roles of waitresses, there came to the front a group of these "girls" to meet President Willard. And the president was glad to meet them. They were: Mrs. Burkhart, Mrs. Auld, "Mother" Keedy, Mrs. Copenhaver and several others who toiled ceaselessly to make the supper a success. The "girls" wanted to know what "Mother" Keedy whispered in the president's ear, but it must have been a secret, for they didn't find out. The president, however, soon found out how popular he is with them all when the Ladies' Auxiliary presented him with a handsome basket of red and white carnations.

Coming from Baltimore, and headed by their president, Mrs. Charles W. Lewis, the officers and some of the members of the Charles W. Galloway chapter of the Ladies' Auxiliary took their seats at the left of the hall, where they were greeted by the sisters from Martinsburg. The Baltimore girls, by the way, had had a special treat in the form of a delightful ride all the way to Martinsburg on the "Special."

Mrs. Lewis made an interesting address, in which she told of the doings of her Auxiliary, and of the principles of better legislation for women which this chapter

upholds. She closed by extending an invitation to the women of the Martinsburg Auxiliary to attend the convention in Baltimore.

How many of the Veterans and their wives saw the picture of Engineer Fauver and his Hamilton watch in the advertisement in the January issue of the MAGAZINE? Everybody, we guess; but we are sure that there was one—Mrs. Fauver herself. The “girls” said that Mrs. Fauver didn’t realize what a handsome husband she possesses until she noticed so many of the Auxiliary sisters gazing on his picture. We wonder what will happen when Mr. F. sees his wife’s picture in the MAGAZINE. Goodness! He’ll be as bad as Brother Rhodes.

And how delightfully we were entertained by a reading from Mrs. Merle Cox! Mrs. Cox’s daddy was a Baltimore and Ohio man; her husband is too, for that matter. And if you want to find a good Baltimore and Ohio booster, see Mrs. Cox!

**Among the Old Timers**

On the front row sat a line of “Old Timers,” chatting together of the bygone days, and prefacing every other remark with “Say, don’t you remember the time . . . . .”—then would follow a yarn or some joke at the expense of one of these grayheads. There were six in the row, the total of whose service records amounted to 259 years, but strange to say, among all of these there was but one bald head. The distinguished possessor? W. L. Jones, chief watch inspector, Cumberland Division, who served the Baltimore and Ohio as conductor for 33 years.

Next to him sat J. H. Copenhaver, who boasts of 42 years of service and declares that he is going for 65 years more.

Then came one Charlie West, 72 years old, with a 42-year service record. For eleven years Mr. West fired an engine for his own father, who was an engineer. “You can’t beat that much,” declared Charlie, and we can’t, for a fact.

Floyd Jones, newly elected president of Chicago Division Veterans

Youthfulness, despite his hiding behind a white beard, marked the appearance of Horace Tabb, now retired after 54 years of service. If you can stop a minute this old-timer will tell you of how “Tom” Sharp “swiped” the engines and carried them off down the Winchester pike during the Civil War.

Samuel Kight, retired conductor, said little but kept his ears open for all these yarns and winked an eye whenever he doubted their veracity.

At the end of the row sat a guest of the “Old Timers,” and he is one himself, for he has served faithfully in the service of the Pennsylvania Railroad, Cumberland Valley Division, for 40 years. He is S. A. Bowers.

Fifty-one years of service and still going is the record of W. G. Edwards, storekeeper, Martinsburg. He it was who stood by the side of Horace Tabb when the two received the 50-year service badges which were presented by President Willard.

Near him sat J. W. Barker, retired supervisor, Maintenance of Way Department, who now is more than 75 years old and who has served the Railroad faithfully for 46 years.

William Kimmmerling was another guest. William for many years was with the Baltimore and Ohio, but now holds a position with the Norfolk and Western. J. W. Hipsley, who entered the service in 1870 and advanced to the position of conductor, was there too.

**Banquet Committee**

The ladies on the banquet committee were: Mrs. Charles E. Auld, chairman; and the Mesdames W. A. Burkhart, J. W. Small, L. M. Van Horn, J. W. Copenhaver, Rhodes, Friskey, Maron, J. W. Winham, Harvey Benhiser, Grosinger, Anna Burkhart, Williams, Margaret Zeiler and Kepingler.

**Chicago Division Veterans Elect Officers**

By F. N. Shultz, Division Operator

THE annual meeting of the Chicago Division Veterans’ Association was held at Garrett, Ind., Saturday, Jan. 20, and was attended by a large number of Veterans from all points on the Chicago Division and C. T. from the Chicago territory.

At 2.30 p. m. the meeting was called to order at the City Hall by the retiring president, L. B. Hart. After a number of impromptu speeches by various members, the election of Officers for the ensuing year resulted as follows:—Floyd Jones, President; R. A. McKinley, Vice President; E. E. Smith, Secretary (Reelected); W. A. Clefford, Treasurer (Reelected); A. C. Pell, Sergeant-at-Arms and Delegate; J. M. Trimble, Alternate.

At 6.00 p. m. a delightful banquet for 200 was served by the ladies of the Reform-

R. A. McKinley, Vice President Veterans’ Association, Chicago Division

ed-Presbyterian church in the church parlors, the tables being decorated with cut roses and carnations. President Jones acted as toastmaster, introducing the speakers. Mrs. John M. Garvey made some appropriate remarks, which were enthusiastically received. Mr. Hooper, superintendent of the Chicago Division, followed with a pleasing address, dwelling upon the enormous amount of business the Division is now enjoying and the loyalty and support of the employes, making for successful and economical operation. He gave the Veterans no small praise for their part in the prosperity we are now enjoying.

At 8.00 p. m. the Veterans again met at the City Hall to finish their business, adjourning at 9.30 p. m., all feeling that they had spent a delightful and profitable day.

**William Ferguson Honored with Fifty-Year Button**

By Mrs. Harry Fleming

Fairmont, W. Va.

FOREMAN William Ferguson, Section No. 16, Glebe Easton, W. Va., whose picture appeared in the November issue of the MAGAZINE, was decorated with a fifty-year service button at the December meeting of the Fairmont Veterans. H. G. Fletcher made the presentation, and Foreman Ferguson was as happy as a youngster. His friends called on him for a speech, but William declined, saying that he was too full for utterance.

The meeting opened with an appetizing dinner for the Veterans and their wives which was followed by a fine entertainment. All joined in singing “America,” the opening hymn of the Veterans. This was followed by a violin solo by Miss Davis. Frank Jordan, one of the most popular singers of the city, sang a solo. The Misses

## Winter Concert of Baltimore and Ohio Glee Club Most Successful in Its History

ON the night of January 30 in the beautiful Club House of the Maryland Casualty Company in the suburbs of Baltimore the Baltimore and Ohio Glee Club gave the winter concert of the ninth year of its existence, and the nine hundred odd persons who attended, many of whom had heard previous concerts of the Club, were unanimous in saying that this was, musically speaking, the finest performance the Club has ever given.

Last year the Club decided that it would discontinue in so far as possible the sale of tickets and it succeeded in enlisting the interest of seventy officers and employes of the Road as associate members at a cost of \$5.00 per membership. This membership increased this year to about one hundred and twenty and has given the Club a fine financial nucleus for its heavy expenses for music, printing, etc. In return for his subscription each associate member is entitled to six tickets to be divided as he or she desires between the two concerts the Club is now giving each year. For in this respect also this year marks a departure in the Club's program, it being the first in which two concerts have been attempted.

The program on the night of January 30 was as follows:

Organ Selections     Dr. C. Herbert Knight  
A Vagabond Song     Daniel Protheroe

My Love Is Like a     Daniel Protheroe  
Red, Red Rose     Baltimore and Ohio Glee Club  
Jewel Song from "Faust"     Gounod

Margaret C. Rabold  
A Moorish Serenade     Daniel Protheroe  
The Pilot     Daniel Protheroe  
De Sandman     Daniel Protheroe  
Baltimore and Ohio Glee Club

E. Major Polonaise     Liszt  
Mr. Sylvan Levin

Invictus     Daniel Protheroe  
Shadow March     Daniel Protheroe  
Baltimore and Ohio Glee Club

Birthday     Woodman  
Song of the Robin Woman     Cadman  
Radiant Night     Grieg

Margaret C. Rabold  
Love's Old Sweet Song     Daniel Protheroe  
Drontheim     Daniel Protheroe  
Baltimore and Ohio Glee Club

The Club was extremely fortunate in having as assisting artists Mrs. Margaret Rabold, soprano, and its own accompanist, Mr. Levin, as pianist. They delighted the large audience.

Please note that the composer of all the numbers which the Club sang is Daniel Protheroe. Mr. Protheroe is a resident of Chicago, whose accomplishments in men's choral work, both as composer and conductor, are notable. Last year the Club sang one of his numbers, his beautiful "The Night

### New Members for Glee Club

On the night of February 19 the Baltimore and Ohio Glee Club will begin rehearsals with new music for its spring concert, rehearsals being held every Monday night thereafter until further notice, in the Assembly Room, Fifth Floor, Baltimore and Ohio Building, Baltimore. All male employes of the Baltimore and Ohio in Baltimore who like to sing and who can devote Monday nights to rehearsals, are cordially invited to join. Just come up some Monday night in February, meet the members of the Club and our director and accompanist, and see what a good time is enjoyed on these evenings.

of a Star" and was fortunate in having him conduct it at the concert given for the summer students of the University of Delaware during the summer. This led to a pleasant friendship between Mr. Protheroe and the Club and a determination to sing a program of his numbers during the 1922-1923 season. That no mistake was made was evidenced not alone from the splendid variety and vitality of the entire program and the real musicianship shown in all the numbers, but also from the fact that although the music was the most difficult by far that the Club has ever attempted, the performance was the most finished because the beauty of the music inspired the singers to an accomplishment which seemed almost beyond their ability.

The English Lady Soccer Team which played many games with various of our colleges in the east last year, made two round trips between New York and Washington on the Baltimore and Ohio and on leaving our representative said that they would carry back to England a very pleasant impression of our Railroad and its service. In the above picture from left to right, front row, are: F. Haslam, M. Walker, D. Clayton, J. Wamsley, and Mr. D. Brooks; back row: Mr. A. Frankland, Mr. H. Stanley, A. Woods, L. Lee, A. Kell, F. Redford, C. Pomies, Mr. James W. "Buddy" Miller and Mr. Connie Lynch

The Club feels a deep indebtedness to Dr. Protheroe, to Mr. Hobart Smock, its director, for his sympathetic and encouraging leadership, and to Mr. Sylvan Levin, the extremely talented and likeable accompanist and solo pianist of the Club. It also expresses its deep appreciation to the officers and employes of the Road and to the other Baltimoreans who contributed to its support either through associate memberships or otherwise.

On Sunday afternoon, February 11, the Club gave a sacred concert at the meeting of the Baltimore Y. M. C. A. at the Garden Theatre; on the night of February 12 it repeated its winter concert at the Maryland Casualty Club House for the benefit of the Baltimore and Ohio Riverside Y. M. C. A. and on the following night it repeated the same concert by radio from the office of the Baltimore News.

It is expected that the spring concert of the Club will be held sometime in May and all male employes in Baltimore who are fond of singing and who are willing to devote Monday night of each week in the Assembly Room of the Baltimore and Ohio Building, to rehearsals, are cordially invited to join.

### William Ferguson Honored with Fifty Year Button

(Continued from page 33)

Davis played a piano duet and Miss Jean Reynolds sang a solo. Miss Margaret Frischkon and Clarence H. Bloom sang a duet. This was followed by a reading by Miss Ruth Baldwin. Douglas Fleming entertained with a song, by reading original poems and by telling clever stories. George Moore interpreted several oriental dances. Miss Naomi Heffner and Clarence H. Bloom sang Silent Night. Then came the decoration of Mr. Ferguson with the fifty year service button. This was followed by the audience singing *Blest Be the Tie That Binds*. Miss Eugenia Reynolds, 10 years old, youngest and one of the most remarkable performers on our division, played the piano.

President Shafferman introduced H. W. Fauver of Martinsburg who pointed out the advantages that are experienced by the Christian and urged that all of the veterans follow the greatest pilot that has ever been given to show the way to man. He urged all to accept Christ.

J. M. Garvey, of Wheeling, vice president of the Grand Veterans, addressed the meeting and gave a brief outline of what may be expected at the Grand Veterans' meeting in January.

Mrs. F. M. Howard of Newark, Ohio, grand president of the Ladies' Auxiliary, addressed the meeting. She expressed her delight in being present and asked the veterans and their wives to visit the Veterans and the Auxiliary in Newark.

Mrs. O. L. Wallburg, of Lima, Ohio, grand secretary of the Ladies' Auxiliary, gave a short talk in which she told how much she appreciated being able to accept the invitation given by the local women.

## The Baltimore and Ohio Poultry Club

*A Profitable and Interesting Investment for  
Hundreds of Boys and Girls in Illinois*

JUST about a year ago the Baltimore and Ohio established its Poultry Club in the State of Illinois and offered unusual facilities to the boys and girls in the counties of the state served by our Railroad, to breed better and more profitable poultry. It arranged, in conjunction with the Agricultural Bureau of the State and the Poultry Department of the University of Illinois, to secure from a White Rock breeder of National reputation, settings of eggs from his flock and these eggs were to be given in exchange for an equal number of market eggs, to whomsoever of the boys and girls wished to take advantage of the offer. The "market" eggs received as nominal payment for the high class White Rock eggs, were sold at market prices and the money used to increase interest in the Baltimore and Ohio County Poultry Shows in Illinois.

Our general agricultural agent, O. K. Quivey, also announced that after the chickens resulting from this offer of settings were grown, the Baltimore and Ohio would have a Poultry Show, and that the boy or girl who exhibited the best pen of five birds at the show would be awarded a prize of \$100.00, which could be used either in the form of a scholarship at the University of Illinois or to pay the expenses of a trip on the Baltimore and Ohio to the Nation's Capital. How successful this project was may be judged from the account of the show as given in part in one of the *Flora* newspapers, as follows:

The Baltimore and Ohio Poultry Club Exhibit proved to be the outstanding feature of the Clay-Wayne Poultry Show, probably the largest poultry show ever held in Southern Illinois. The combined show was held in the Valbert building, *Flora*, Tuesday, Wednesday and Thursday, December 19, 20, 21, 1922.

In fact the Baltimore and Ohio Poultry Club exhibit served as a nucleus around which the Clay-Wayne Show was built as a result of the cooperation of the *Flora* Commercial Club and the Clay County Farm Bureau.

The following were the Baltimore and Ohio Poultry Club Exhibitors, together with their P. O. addresses and counties: Genevieve Upperman, Cowden, Shelby. Leah Hogge, Beecher City, Effingham. Louise Henry, Beecher City, Effingham. Emilina Winter, Breese, Clinton. Kelly Brazier, Junction, Gallatin. Joe Wood, Bluford, Wayne. Paul Williams, Calhoun, Richland. Ralph Buchanan, Lawrenceville, Lawrence. Doris Montgomery, Lawrenceville, Lawrence.

Lillian Gaither, Golden Gate, Wayne. Maude Thompson, Graysville, White. Elizabeth Jordan, Enfield, White. Lyman Gurley, Wayne City, Wayne. Opal Speck, Pleasant Plains, Sangamon. Keith Kagy, Salem, Marion. Clark Parkenson, Kell, Marion. Grace Bales, Springfield, Sangamon. Dorothy Deal, Taylorville, Christian.

Wilbur Dircen, Virginia, Cass. Ramona Stuke, Beardstown, Cass. Perry Thompson, Xenia, Clay. Arthur Brewer, Louisville, Clay. Genell Smith, Xenia, Clay. Earl Hardin, Louisville, Clay. Roscoe Dow, Louisville, Clay. Ruth Brissenden, Clay City, Clay. Jewel Harrison, Clay City, Clay. Hazel Peekman, Louisville, Clay. Catherine Quinn, Louisville, Clay. Delmar Bassler, Trenton, Clinton. Kurt Eckert, Belleville, St. Clair. Roy Abel, New Berlin, Sangamon. Olna Ziegler, Altamont, Effingham. Loren Metzger, Tower Hill, Shelby. Andrew Freivogel, Milstadt, St. Clair. Ruby Krumreich, Stewardson, Shelby. Grace White, Fairfield, Wayne. Mary Hanagan, Enfield, White.

The winners were as follows:

#### Best Pen of Five

Genell Smith, First, \$5.00.  
Ruth Brissenden, Second, \$4.00.  
Earl Hardin, Third, \$3.00.  
Jewel Harrison, Fourth, \$2.00.

#### Best Cockerel

Earl Hardin, First, \$2.00.  
Arthur Brewer, Second, \$1.00.  
Roscoe Dow, Third, Ribbon.

#### Best Pullet

Genell Smith, First, \$2.00.  
Elmer Coleasure, Second, \$1.00.  
Earl Hardin, Third, Ribbon.

The winners in the Baltimore and Ohio State Contest were as follows:

Grace White, Wayne county, Sweepstakes, \$100 scholarship.  
Lillian Gaither, Wayne county, Second prize, \$15.00 cash.  
Delmar Bassler, Clinton county, Third prize, \$12.00 cash.  
Lyman Gurley, Wayne county, Fourth prize, \$10.00 cash.

The above prizes were awarded by the Baltimore and Ohio Railroad, and the following additional prizes by the *Flora* Commercial Club.

Olga Ziegler, Effingham county, Fifth prize, \$8.00 cash.  
Paul Williams, Richland county, Sixth prize, \$6.00 cash.  
Joe Wood, Wayne county, Seventh prize, \$4.00 cash.  
Genell Smith, Clay county, Eighth prize, \$2.00 cash.

The railroad was represented by O. K. Quivey, General Agricultural Agent, of Baltimore, Md., and P. O. Hurley, Agricultural Agent of Cincinnati, Ohio, the latter having had active charge of the poultry project.

The poultry project provided at the Orpheum Theatre drew a packed house. "Better Poultry" was the subject of a very interesting lecture by L. E. Card, Prof. of Poultry Husbandry, University of Illinois, and a very highly educational lecture, illustrated with slides of Washington, D. C., was delivered by C. M. Ritchie, of the Baltimore and Ohio.

Announcement of the prize winners was then made by Mr. P. O. Hurley and the Sweepstakes ribbon was presented to Miss Grace White, whose beautiful pen of five birds hatched from eggs given her by the Baltimore and Ohio, won over all the other pens in the state. However, let it be

stated in fairness to all, that the judges found it no easy task in selecting the winner among the first eight, the pens all being of an exceptionally high class and very close in comparison.

Of the six hundred birds shown in the Clay-Wayne show, three hundred were entered by the Baltimore and Ohio Poultry Club members in Illinois.

Visitors from out of town were: P. O. Hurley and Robert O'Herron of Cincinnati, Roy W. Dickinson, Cass county Farm Advisor; C. T. Hufford, Wayne county Farm Advisor; C. M. Ritchie, Baltimore and Ohio Railroad, Cincinnati; L. E. Card, Champaign, Ill.; W. P. Townsend, Baltimore and Ohio Railroad, Springfield, Ill.; Charles Filson, Agricultural Agent, C. & E. I. Ry., Salem; E. A. Ferguson, Springfield, Ill., and others.

### An Interesting Exhibit

An interesting feature of the Clay-Wayne Poultry Show was an exhibit of the American Railway Express Company, under the supervision of George M. Dallas, who came from New York for the purpose, showing the wrong and right ways of packing eggs for transportation, together with various types of cases and fillers designed for the safe carrying of eggs.

Eggs are moved to market by express in large volume and losses through breakage have in the past been costly.

As an illustration of the interest taken by the boys and girls who actually raised the chickens and exhibited them, we quote a letter from the Sweepstakes Prize Winner, Miss White (who, however, wrote it before being adjudged the leading winner) as follows:

December 8, 1922

O. K. Quivey  
Baltimore, Md.

Dear Mr. Quivey:

I was very glad to hear that all of the Baltimore and Ohio Poultry Club members were to be eligible to show a pen of birds at the State Poultry Show.

I think it is wonderful what the Baltimore and Ohio Railroad Company has done for the boys and girls of southern Illinois. I have certainly enjoyed the Club work, and have a fine flock of chickens.

I will exhibit my best pen of five birds at Flora, Ill. and if possible attend personally.

Thanking you for your interest in the boys and girls, I remain,

Very cordially yours,

Grace White

(Baltimore and Ohio Club Member)

Fairfield, Ill.

One of the accompanying pictures shows Miss Pauline Miles, Lawrenceville, Illinois, and her prizewinning White Rock cockerel, with the loving cups won by this individual bird. Miss Miles was unable to exhibit her pen at the Baltimore and Ohio Show at Flora but entered it in the Lawrence County Poultry Association Show at Bridgeport, Illinois, and won the following prizes:

1. Best pen in American Class—Silver Loving Cup.

2. Best pen in Show (Open to Poultry

Association members only)—ten inch Silver Loving Cup.

3. Best Cockerel in Show—Silver Loving Cup.

4. Best individual bird in show—Silver Loving Cup.

5. Best pen in show—Open Class—Silver Loving Cup.

It was the opinion of the judge that this cockerel was easily worth \$100, and that it would make a good showing in competi-

tion at the Chicago Coliseum Show or the Madison Square Garden Show of New York City.

On December 26 the Flora Commercial Club passed a resolution commending the Baltimore and Ohio on its progressiveness and helpfulness in this practical movement for better poultry, thanking our Messrs. Quivey, Hurley and Ritchie, Professor Card of the University of Illinois and Mr. Dallas of the American Railway

1. The Commercial Club of Flora rented and arranged this attractive new store for the exhibit, showing their interest. 2. It was difficult to get a good picture of the entire exhibit, this being but one side but suggesting the number of cultural Department among poultrymen is to teach greater and cheaper production, and hence larger profits through this picture shows a prize coop of birds, a pen consisting of a cockerel and four pullets. Above is sign outlining the Washington to the member of the Baltimore and Ohio Poultry Club showing the best pen. The sign on the right is ed. Folks heard with interest the talks on "Washington, the Capital City," "Better Poultry," "Poultry Club Work," the model mash feeder show educational nature of exhibit. 5. Miss Pauline Miles, a member of the Baltimore and Ohio Show, made a wonderful showing, as may be seen from the cups in the picture. See text matter. 6. The American Railway Express Company, designed especially to prevent loss and damage, and the help they give the farm bureaus, are suggested. One of the judges said that this bird would create a sensation at any show in the country, except that it meant that they had to miss school. 9. A "close-up" of the exhibit which won the choice of a \$100 bred by Louis Crumren of Chandlerville, Cass County, Ill.

Express Company, for their personal interest, and expressing their pleasure in cooperating to make the plan a success.

W. E. Hart, farm adviser of the Clay County Farm Bureau, wrote Mr. Quivey, thanking him for the stimulus given the boys' and girls' club work by the Baltimore and Ohio contest, and urging that the scope of the work be enlarged this year.

Without the hearty cooperation of

Professor Card and Mr. H. F. Wolter of the University of Illinois Agricultural Extension Service, and of the Illinois County Farm Bureau Federation, the Railroad would have been unable to enlist the remarkable interest taken in this plan. These agencies had the machinery through which our Agricultural Department worked, and grateful acknowledgment of their help is gladly made.

### New Spring Styles

(Continued from page 23)

The pattern is cut in four sizes: 4, 6, 8 and 10 years. A 4-year size requires two and one-eighth yards of 32-inch material. Chambray with bias binding in plaid or a contrasting color, would be a pleasing development for this style.

3809. Here is a very comfortable frock, with graceful lines, in one piece style. The pockets are a useful and attractive feature. The sleeve may be finished in wrist or in elbow length. Figured percale, gingham, drill, linen, serge, mohair, sateen, gabardine and taffeta are good for this model.

The pattern is cut in six sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. A 38 inch size requires five yards of 36-inch material. The width of the skirt at the foot is about two yards.

3875. Let your little girl take her first steps in comfortable garments, well and daintily fashioned. The group here illustrated, shows a practical undergarment combining waist and drawers, a petticoat, and a dress with simple lines. The models are easy to develop, and economical of material. Cambric, lawn or crepe may be used for the undergarments, and batiste, voile, dimity, silk or crepe for the dress.

The pattern is cut in five sizes: 1, 2, 3, 4, and 5 years. The dress requires two and one eighth yards of material, the petticoat one and three eights yards and the combination one and one quarter yards 36 inches wide for a 2-year size.

4247. This corset cover is ideal for the woman of mature figure. The seams may be boned for firmness. Nainsook, cambric, linen, silk or satin may be used to develop this comfortable garment.

The pattern is cut in four sizes: Small, 34-36; Medium, 38-40; Large, 42-44; Extra Large, 46-48 inches bust measure. A medium size requires one and five eighths yards of 36-inch material.

4259. Here is another practical version of a practical garment—the ever ready cover all house or apron frock. It may be made of percale, linen, cretonne, sateen or lawn. Self facings or bands, or piping of self or contrasting material are nice for trimming.

The pattern is cut in four sizes: Small, 34-36; Medium, 38-40; Large, 42-44; Extra Large, 46-48 inches bust measure. The width at the foot is two and three eighths yards. A medium size requires four and a half yards of 32-inch material. To trim as illustrated requires one half yard of contrasting material 36 inches wide.

ALL PATTERNS, 12 cents each, post paid.

Up-To-Date Spring and Summer 1923 Book of Fashions, showing color plates, and containing 500 designs of ladies', misses' and children's patterns, a concise and comprehensive article on dressmaking, also some points for the needle (illustrating 30 of the various, simple stitches), all valuable hints to the home dressmaker.

1. Educational work. 2. Grace White, of Wayne County, Ill., the winner of the Sweepstakes Prize worth \$100.00 in the show. Note the model chicken houses shown at the left. 3. The basic idea underlying the work of our Agricultural Extension Service. We have helped the Illinois Farm Bureau and the University of Illinois especially in this work. A prize of \$100.00 to be awarded either in a scholarship in the University of Illinois or a week's free educational trip to the free shows at the Orpheum Theatre in Flora the day our exhibit was held. Both meetings were crowded. 4. Baltimore and Ohio Poultry Club, and the announcement of the prize winners. The picture and description of the Ohio Poultry Club, who was unable to show her White Rocks at our exhibit but who, at the Lawrence County Poultry Show, the Baltimore and Ohio Railway Express Company cooperated to the fullest extent to make the show a success. The array of their educational work is shown in this picture. 5. One of the best birds in the show, an exceptional cockerel exhibited by Wilbur Dieren, of Virginia. 6. Fourteen of the Baltimore and Ohio Poultry Club members who visited the show. Many more would have come had it not been for the lack of transportation. 7. The Baltimore and Ohio Poultry Club members who visited the show. Many more would have come had it not been for the lack of transportation. 8. The Baltimore and Ohio Poultry Club members who visited the show. Many more would have come had it not been for the lack of transportation. 9. The Baltimore and Ohio Poultry Club members who visited the show. Many more would have come had it not been for the lack of transportation. 10. The best pullet in the show.

## THE BALTIMORE AND OHIO RAILROAD COMPANY

Weber, Carle.....	Car Repairer.....	Motive Power.....	Akron.....	19

The payments to pensioned employees constitute a special roll contributed by the Company.

During the calendar year 1921, \$367,795.95 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884 to November 30, 1922, amount to \$4,994,464.55.

The following pensioned employees, after serving the Company faithfully for a number of years, have died:

NAME	LAST OCCUPATION	DEPARTMENT	DIVISION	DATE OF DEATH	YEARS OF SERVICE
Agnew, John.....	Adjustment Clerk.....	Freight Office.....	Toledo.....	Nov. 11, 1922.....	45
Armesy, John W.....	Laborer.....	Motive Power.....	Monongah.....	Dec. 26, 1922.....	23

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## Marcellus Lenhart

Marcellus Lenhart, son of Monroe Lenhart, was born at Garrett, Pa., on October 4, 1854. When he was four years old his parents moved to Berkeley Mills, where the boy attended school. Several years later he went to the Elichty School and then finished his education at Glade City, Pa.

At 12 years of age, Marcellus went to work in his father's saw mill, one of the old water mills. This was his first job. He came to work with the Baltimore and Ohio at the age of 19, working first as tool boy on the Connellsville Division. In that same year he was married to Susan Elizabeth Braucher, and in the three years that followed, he worked as trackman. This work was under the leadership of Joseph Schindler, Sr. He finished the third year under Mr. Schindler's successor, John Moore.

Being out of work in 1878 he put in a year or two at mining, then worked in a brick yard at Keystone Junction. In 1888 he came back to the Baltimore and Ohio as watchman, Meyersdale, Pa. He was out of service in 1890, but came back again as watchman later in that year. From that time until his recent retirement, Mr. Lenhart served as watchman, laborer and trackman.

## Patrick H. Fishel

Patrick H. Fishel, former Cleveland Division engineer, was born at Oneida, Ohio, on May 7, 1856. At the age of 19 years he began his career with the Youngstown & Connotton Valley Railroad, now a part of the Wheeling and Lake Erie. Here he worked in both passenger and freight service until 1886.

On June 6 of that year, Mr. Fishel entered the service of the old Valley Railroad, then running between Cleveland and Valley Junction, as freight engineer. This line changed to the C. T. & V. and was later absorbed by the Baltimore and Ohio. For 17 years he worked in the yards at

Akron on what were known as the "roust-about" engines, available for extra freight and passenger service. In 1903 he was made regular passenger engineer. Mr. Fishel says:

"I have seen many changes in the working conditions, and I have also witnessed the building of the Loop Line at Akron Junction, and the Pittsburgh and Western grow from a single track to a double track line system. I have worked under seven different superintendents on this division, two on the Pennsylvania Division and three on the Wheeling Division. I was only called before one of them on one occasion in all my years of service.

"On November 1, 1922 I was compelled to give up my run in the passenger service because of failing health. It was then that I was granted a pension. I am grateful to the operating officers of the Baltimore and Ohio for their many courtesies. I am now living at Valley Junction, where I expect to make my home and enjoy my pension."

## John B. Madru

John B. Madru, former Ohio Division blacksmith, was born in Cincinnati, Ohio, on October 3, 1856. He spent his early life in Cincinnati, going through the grammar grades in the schools there. At the age of 14 he secured a position with a baker in that city.

His first position with the Baltimore and Ohio was as a hostler, holding this position for four years, and leaving it for better wages as manager of a restaurant.

For 20 years he remained in the restaurant business, and when he gave up this work it was to return to the Baltimore and Ohio at Cincinnati, where he took a position in the freight house on June 15, 1897. On March 1, 1900 he became blacksmith helper in Chillicothe Shops. In 1919 he was made hammer operator, and in 1921, blacksmith helper. Here he worked every day until he was disabled a few years ago.

Mr. and Mrs. Madru live in a pretty little home which they own, on Fourth Street, Chillicothe.

## William Siegel

William Siegel, retired fireman, Locust Point Elevators, was born on September 13, 1857. He entered the service of the Baltimore and Ohio in July, 1896 as laborer, Locust Point Elevators. In 1900 he was made fireman, and in 1909, night fireman. He met with an injury that made it impossible for him to do hard labor of any kind; hence his retirement.

## Thomas J. Thompson

Thomas J. Thompson, retired track foreman, was born on December 16, 1851. He first came to the Baltimore and Ohio in June, 1875 as trackman, Shenandoah Division. On August 15, 1880 he was made track foreman. In 1910 he was transferred to Staunton, and in 1918 to Port Defiance, serving 47 years in all.

## William J. Sims

William J. Sims, well known car repairman, Chillicothe, Ohio, was born on January 7, 1854. He entered the service of the Baltimore and Ohio on January 22, 1906 as carpenter. In 1908 he was made truckman, and in 1913, car repairer. Several times after that time he was furloughed, but always came back to his old job as car repairer, which position he held until 1915, when he was transferred to the position of laborer. In 1917 he was made gang foreman, and in 1918, boiler shop helper.

## John Callahan

John Callahan, retired track walker, was born on April 16, 1854. When he was 14 years old he entered the service as track hand, Monongah Division. A few years later he was made track walker. In 1888 he was made section foreman, and in 1906, supervisor. On January 20, 1907, he became track foreman, Walker, W. Va., and trackman again in 1913. For one year he has been on relief.

## John Cummins

*Who has a 53-year service record*

"Colonel" John Cummins was born near Cameron, Marshall County, West Virginia, on June 23, 1851. He attended the public school of that district and was employed about the farm until he reached the age of 17 years, when he began his career with the Baltimore and Ohio as trackman.

After seven months of this work he began work as brakeman in Wheeling Yard and was soon promoted to the position of con-

NINE FAITHFUL WORKERS REWARDED

Left to right: Marcellus Lenhart, Patrick H. Fishel, John B. Madru, William Siegel, T. J. Thompson, William J. Sims, John Callahan, John Cummins, William Clay

ductor. In 1871 he was transferred to firing and was promoted to engineer on May 1, 1873. By January 1, 1875 he had a regular passenger engine and remained in this position until the time of his retirement.

In 1874 the "Colonel" was married to Miss Anna Campbell. To this union three sons were born. These are: Dr. Alvin B. Cummins, Attorney J. W. Cummins, and Mechanical Engineer George H. Cummins.

Along with the Baltimore and Ohio, Col. Cummins had another strong personal attachment—the Republican party. Since youth he has held various political positions, serving on the staffs of Governors Glassecock and Hatfield, and as a member of the board of the Industrial Home for Girls at Salem, W. Va. For eight years he served on the board of the Humane Society. He was instrumental in having the Industrial Home located at Salem, on the line of the Baltimore and Ohio. He was an alternate delegate to the Chicago Convention which nominated General Harrison for the presidency.

## Other Boosters Who Are Boosting— Monumental Lodge No. 567, B. R. C.

PAGE 25 of the December issue of the MAGAZINE told how Monumental Lodge No. 511, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees passed a resolution on November 8 to do all in their power to boost the Baltimore and Ohio Railroad. An invitation was extended to other lodges who had caught this splendid booster spirit to let us hear from them. That the Baltimore and Ohio Boosters are growing in number and getting down to practical business is shown in a letter from Harry E. Weidman, president of Monumental Lodge No. 567, of the Baltimore and Ohio General Offices at Baltimore.

Mr. Weidman sent to President Willard a letter, together with a set of resolutions which his lodge had drawn up on October 13, the first action of this kind, we believe, to have been taken by any Baltimore lodge. In reply, President Willard said, in part:

"I think it is quite commendable that your organization should desire that its members prove themselves fully efficient and loyal to the Company by which they are employed, and I am very glad to know that you are taking steps which you believe will further improve the efficiency of your membership in this connection. With you I trust the cordial relations which have existed between the Management and its employes may not only continue, but that with the united efforts the service of the Company may commend itself to those who patronize it, and that we in turn may be able to make a satisfactory showing to those who have invested their capital and

Speaking of the officers of the Baltimore and Ohio, Colonel Cummins says, "They have always treated me well."

### William C. Clay

William C. Clay, although not now able to be in active service, has served faithfully the Baltimore and Ohio for more than half a century and is willing to try to work longer rather than to retire.

Mr. Clay is a son of the late George M. Clay, an old and well-known engineer who also served the Baltimore and Ohio for more than 50 years. Mr. Clay was born on September 13, 1855. He entered the service of the Baltimore and Ohio as fireman on the Old Main Line, serving about a year in this capacity. In 1865 he re-entered the service at Mt. Clare Shops as laborer. He soon became machinist. In 1869 he was made assistant foreman; five years later he was made foreman and inspector in the Lumber Department; in 1889 he became general lumber inspector, and in 1912, assistant lumber agent.

savings in the enterprise with which we are associated."

In addition to the set of resolutions sent by Mr. Weidman, there was a letter sent out to the various officers of the Baltimore and Ohio, asking each of them for any suggestions which might be of value to the Baltimore and Ohio Boosters. This letter was written and signed by the chairman of No. 567's Boosters, W. J. Watts, who also said in his letter that while his organization is principally a social one, he feels that its action may be followed by other lodges and the Boosters grow to large proportions all over the Baltimore and Ohio System.

A spirit such as this must be productive of results. The successful organization is the one founded on the loyalty of those who work for and with it. With Baltimore and Ohio Boosters all over the System,

Edward Hart, Jr.

the Baltimore and Ohio will naturally grow richer in the good will of the public, and its boosters cannot help feeling the truth of the Biblical injunction, "Cast thy bread upon the waters and it will return to you after many days."

Let us hear from the others!

### Edward Hart, Jr., Made Assistant Freight Traffic Manager in St. Louis

EDWARD HART, Jr., general freight agent of the Baltimore and Ohio Railroad System, at St. Louis, Mo., since March 1, 1920, has been promoted to assistant freight traffic manager in that city.

Mr. Hart was born in Allahabad, East India, December 17, 1860, and received his elementary schooling at St. Paul's School, Darjeeling, India, and at academies in England. Later emigrating to this country, Mr. Hart completed his education at Charlottesville, Va., Detroit, Mich., Rome, Ga., and Louisville, Ky., and at the age of 20 entered railroad service as a clerk in the auditor's office of the Louisville and Nashville Railroad, at Louisville, Ky., being transferred in 1883 to the general storekeeper's department. He was contracting agent of the Canada Southern Line from 1885 to 1892, and in 1893 became general agent of the Cincinnati, Wabash and Michigan Railroad and Elkhart Line, at Louisville; in 1894, agent of the Trader's Dispatch.

In 1897, Mr. Hart first became identified with the Baltimore and Ohio Railroad Company as assistant general agent at Louisville, in October of that year becoming general agent. He was promoted to assistant general freight agent at St. Louis in January, 1913, and to western general freight agent in 1918. During federal control he was again assistant general freight agent, becoming general freight agent in March, 1920.

### General Counsel John J. Cornwell Addresses Our Accounting Association

ON the night of January 19 the Accounting Association of The Baltimore and Ohio Railroad Company met on the twelfth floor of the Baltimore and Ohio Building, F. F. Lollman presiding. After a short business meeting General Counsel John J. Cornwell was introduced as the speaker of the evening.

Governor Cornwell is a most entertaining speaker and stressed the importance of a friendly feeling between Management and men on the Railroad. This, he said, should be carried down all along the line, for if the attitude of the managing officers of the Company is the right one toward the rank and file and yet this fair attitude is not properly interpreted by subordinate officers, the friendly feeling which ought

to exist throughout the whole family is sometimes disrupted, and with most unfortunate results.

He said that one of the greatest pleasures he has had since his connection with the Railroad as general counsel has been in noting the invariable desire on the part of our executives to see that every person in the big family is given a square deal and he emphasized this attitude as being a most potent factor in contributing to the success of the Company and all those connected with it.

Following his address, the chairman of the entertainment committee, T. Parkin Scott, chief clerk of the Savings Feature of the Relief Department, introduced Joseph W. Swikert, one of the most capable amateur actors in Baltimore, and Mr. Swikert lived up to his reputation by getting over some absolutely new and very, very funny stories.

A triple quartet from the Baltimore and Ohio Glee Club sang three songs, H. L. Holstein of the Office of Auditor Passenger Receipts played some interesting numbers on the piano, and the members of the association then adjourned to the restaurant and enjoyed the delicious refreshments which had been prepared under the direction of John Bopp.

The late C. T. Wight, Division Freight Agent, Sandusky, Ohio

### The Death of C. T. Wight

CALMES T. WIGHT, former division freight agent and one of the best known residents of Sandusky, Ohio, died on January 9 at the Good Samaritan Hospital, Sandusky, at the age of 75.

Mr. Wight was born in Galena, Illinois,

on April 18, 1847. He entered the service of the Baltimore and Ohio as rate clerk, Division Freight Office, Columbus, Ohio. In 1881 he was made chief clerk, General Western Freight Office, Chicago; in 1883 he was made travelling freight agent, Des Moines; in 1890, general agent, Toledo; in 1896, district freight agent, Sandusky. For 15 years he held this position and was then transferred in the same capacity to Fostoria. Later he returned to Sandusky and in 1917 was furloughed because of poor health.

For many months previous to his death, Mr. Wight was an invalid. He had always been an active member of Science Lodge, A. F. & A. M., Sandusky City chapter, Erie Commandery. He also was a charter member of Zenobia Temple, Mystic Shrine, Toledo. He is survived by his widow and one brother, C. S. Wight, general freight representative, with headquarters in Baltimore, Md.

### In the Realm of the Riddle

(Continued from page 19)

This puzzle is a combination of a beheadment and a transposition. To solve it you simply find "first," cut off the first letter, then transpose the remaining four letters to make "last."

No. 9 is the first "enigma" we have published and it is just what its name signifies, an enigma. You must find the seven letter word that fits the description given in the verse and this should be easy for any one of a mechanical bent of mind.

No. 13 is our initial "antigram" which is the exact opposite of an anagram. While the answer to an anagram bears close relation to the puzzle itself, in an antigram the answer is something entirely opposite to the puzzle itself. Otherwise both puzzles are constructed along practically the same lines.

No. 2 introduces another new puzzler. Ben Franklin usually signs his name "W. E. Frederick" and is connected with the Office of the Auditor of Disbursements. Judging from his first effort he is going to make his mark as a puzzler and will soon have the veterans sitting up and taking notice.

## The Baltimore and Ohio General Office Duckpin League

Standing of Teams Week Ending February 1, Season 1922-1923

TEAMS	GAMES PLAYED	WON	LOST	PERCENTAGE	PINS	AVERAGE

16 Auditor Freight Claims.....	60	11	49	.183	26860	447.66

Here is the result of games played at the Central Y.M.C.A., Baltimore, on the evening of January 31, between a team of employes of the Pennsylvania Railroad and a team from our League:

PENNSYLVANIA R. R.				vs	BALTIMORE & OHIO R. R.				
Pauser.....	109	99	104	312	Knowles .....	104	88	98	290
Lucey.....	110	82	105	297	Gaither.....	111	94	88	293
Mitchell.....	89	115	91	295	Warren.....	96	97	105	298
Todd.....	103	114	105	322	Sauerwein.....	113	103	105	321
Lee.....	104	98	120	322	Gallery .....	112	121	115	348
			1548						1550

The same team played a team composed of Cumberland employes on Saturday, February 3, with the following results:

CUMBERLAND				vs	BALTIMORE				
Campbell.....	172	167	167	505	Knowles .....	115	197	155	457
Zimmerman.....	159	167	126	452	Gaither.....	186	106	180	472
Onderdonk.....	137	155	118	410	Warren.....	140	126	123	380
Hollen.....	153	177	131	461	Sauerwein.....	167	117	133	417
Trail.....	127	169	173	469	Gallery .....	139	181	130	430
			2298						2195

The games at Cumberland were played with rubber banded pins.

Each of these matches was rolled on the basis of total pins for each side for the evening.

### Those New Passenger Coaches

Have you seen our new passenger coaches, those numbered in the fifty-two hundreds? They are the last word in beauty and comfort; they ride as easily as a sleeping car. Just one more reason why you will want your friends to enjoy "Baltimore and Ohio Service" when they go traveling!

STOP THAT LEAK!

STOP THAT LEAK!

STOP THAT LEAK!

# Accurate Weights Insure Correct Freight Charges

Gains to Revenue from Check-Weighing and Revising Classification of Inbound and Transfer L. C. L. Freight, November, 1922

Note:—Each month there will be published in the Magazine, statement of increases, shown by stations, made in the revenue of the Company by revising classification and check-weighing inbound L. C. L. shipments and L. C. L. freight in transfer.

EASTERN LINES		WESTERN LINES

The late John F. Hayden

### Death of John F. Hayden

AFTER a long illness at his home in Relay, Md., John F. Hayden, for 55 years an employe of the Baltimore and Ohio in Baltimore, died on January 24, at the age of 82.

Mr. Hayden entered the service in the C. T. Dept. at Camden Station, August 10, 1865, and in 1887 was transferred to the Office of Auditor of Revenue, later becoming connected with the A. M. R. Office.

A Confederate veteran, he was secretary and a member of the board of governors of the Maryland Line Confederate Soldiers' Home. Rev. Edward Hink, rector of St. John's Protestant Episcopal Church, conducted the funeral service from the late home on January 27. Surviving Mr. Hayden are four daughters, Mrs. Victoria Sheriden, the Misses Edith, May and Celeste Hayden, and a son, John F. Hayden, Jr. A grandson, John Sheriden, is employe in the Office of Auditor Coal and Coke Receipts.

### Charles Weaver, Former Lighter Captain, a Great Business Getter

THE Railroad made a good move when it appointed as lighter runner in New York, former Lighter Captain Charles Weaver. For, besides his familiarity with all kinds of marine shipping in the metropolitan area, Mr. Weaver has a keen sense for selling Baltimore and Ohio

Charles Weaver, Lighterage Department, N. Y.

service to shippers, as is evidenced by the following letter, sent to Mr. Weaver by W. F. Richards, assistant freight traffic manager:

"It has come to my notice that through your alertness the Baltimore and Ohio was successful in securing shipment of 50 bales of burlap forwarded from Brooklyn, consigned to Toledo, Ohio, loaded in Baltimore and Ohio 190108 and C. & N. W. 62728, and forwarded from St. George, November 25.

It was the original intention of shippers to forward who, how-

ever, were a little slow in placing lighter and through your activity shipper's representative was prevailed upon to use Baltimore and Ohio lighter, which, by prompt action you were able to have placed immediately, thus securing the business to the Baltimore and Ohio.

Wish to heartily commend you for your activity in this instance and to express appreciation of your keen interest at all times toward securing traffic for Baltimore and Ohio rails."

The deletions in the letter are made for obvious reasons. Indeed Mr. Weaver is to be thanked most heartily!

## Some of Prize Winning Maintenance Men Tell How They Did It

IN the accompanying pictures we see some of the prize-winning maintenance men for the year 1922. Supervisor Reynolds is shown with Mrs. Reynolds at their home in Garrett, Indiana. Here also are Section Foreman L. J. Moyer, La Paz, Indiana, and Foreman A. E. Carnicon, Bairdstown, Ohio.

Mr. Moyer won a prize for the best Main Line section, Chicago Division, and Mr. Carnicon for the most improved Main Line section, Chicago Division. Supervisor Reynolds says:

"You have requested me to write a brief article on how the prize was won for 1922. This is summed up as follows: Prizes have been closely contested on the Chicago Division in the past years, so at the beginning of 1922, I, myself, as well as the fore-

men, began the year determined to win. With this in view, every employe on the sub-division was made to feel that he was one of a great family working to one end, with the result that individual efficiency was increased, better work accomplished and the prize for the best supervisor's district was brought to sub-division No. 3. On January 9 I gave the foremen a banquet at Coppes Hotel, Nappanee, Indiana, at noon and took them to a show."

Foreman Carnicon says: "It is not only a matter of keeping the track in good line and surface to get your section showing good improvement, but you must keep your scrap gathered up, your old ties burned up, and your material piled as neatly as possible. In addition to these, I find that ditching makes a great improve-

Foreman L. F. Wilkerson, who won prize for best section on the Lake Branch, Akron Division. The picture of Mr. Wilkerson with the "feather in his cap" was drawn by the foreman himself. Its publication will be a surprise to him

ment; not only does it look better, but it helps to keep tracks drained. I watch to keep cross ties always straight when they are put in the tracks."

The interesting cartoon above shows Section Foreman L. T. Wilkerson, Chardon, Ohio, who won the prize for the best section on the Lake Branch. This cartoon was drawn by Mr. Wilkerson himself, and given to Car Inspector F. J. Burr, whose daughter, Miss Treva Burr, kindly loaned the picture to the Magazine. Mr. Wilkerson, no doubt, will be surprised to see this in print. The feather in his hat represents the prize that he won for the fine condition of his section.

### R. E. Eader, Baltimore Division, Prize Winning Supervisor

R. E. EADER, supervisor, Baltimore Sub Division No. 1, Washington Branch to Herring Run, won the first supervisor's prize of \$100. for the year 1922.

Mr. Eader was born on April 26, 1883. He entered the service of the Baltimore and Ohio on March 8, 1901 as laborer, Maintenance of Way Department, Cumberland Division. In 1904 he was made foreman, Cumberland Division, and in 1912 he came to the Baltimore Division in the same capacity. Five years later he was made general foreman, and in a few months became supervisor, with headquarters at Gaithersburg, later reporting to Washington Junction and Camden Station, Baltimore.

### The Boss's Job?

Essentially, to make the Railroad go, and go in every sense of the word. That means making the greatest possible number happy—employes, shippers, passengers, security holders. And he can't favor one at the expense of the other—the factors are too mutually dependent. What helps one helps the other and visa versa.

When our "boss," our president, asks us to "Stop That Leak," he is only asking us as employes to help ourselves.

SOME OF THE PRIZE WINNERS IN THE BEST SECTION CONTEST

Upper left: A. E. Carnicon, Section 14, Beardstown, Ohio. Upper right: Supervisor and Mrs. W. M. Reynolds, Garrett, Indiana. Lower left: Supervisor R. E. Eader, Baltimore Division. Lower right: Foreman L. J. Moyer, La Paz, Indiana

# Safety Roll of Honor

## Staten Island Lines

**Conductor R. Balsam.** John Street, Elm Park. December 15. Observed broken rail in eastward track. Signalled engineer to stop train. Went back with flag and found 10 inches of broken rail. Flagman left to protect eastbound track until repairs could be made.

**Engineer C. W. Miller.** Near Verdons Shipyard, West Brighton, December 12. Discovered broken rail in eastbound track. Reported condition to towerman at Port Richmond. Trains notified to run carefully.

## Baltimore Division

**Conductor M. J. O'Neill and Engineer W. E. Blizzard.** Extra engine 440, Collingdale, Pa. November 25. Overtook Philadelphia and Reading extra with broken coupler on fourth car from rear end. Conductor O'Neill advised conductor of other train that as 524 was getting close, he had best go to East Side, and that he, Conductor O'Neill, would couple to and bring the rear portion to East Side so as not to delay No. 524. Engineer Blizzard was in charge of engine 440 which brought its own train and that of the rear end of the Philadelphia and Reading train into East Side and cleared for No. 524.

**Brakeman S. L. Lambert.** Riding engine 4474, pulling train No. 97. December 13. Heard unusual noise under engine as it passed Loreley. Notified engineer. Train stopped. Investigation showed broken rail. Notified track walker to remain and flag approaching trains; threw off message for operator at Poplar, advising him to notify track foreman to repair track.

**Conductor J. C. Williams.** East Side, Philadelphia, Pa. November 27. Bridge on Eastwick Branch caught fire. Prompt action on part of Conductor Williams in pulling about 10 cars off bridge probably saved them from destruction.

**Watchman Robert Ringross.** Hanover Street Crossing. November 19. Noticed broken arch bar dragging under Baltimore and Ohio 106674, Extra east, engine 4465, passing Hanover Street bridge. Called operator at Riverside. Car pulled to clear and examined by train crew.

**Operator J. M. Cunningham.** Hollofield, Md. October 30. Noticed brakes sticking in tenth car in train of engine 4445, train No. 96, east. Called agent Ellicott City, who had train stopped and brakes released.

**Operator J. F. Elste.** Poplar, Md. December 10. Discovered broken rail on curve of eastbound track of pull-out switch. Notified train dispatcher and track foreman. Slow speed restriction put on track and rail replaced.

## Connellsville Division

**Mr. Harry Ritchey.** Hyndman, Pa. December 13. While on way home discovered broken rail in westward main track.

Got in touch with operator by using emergency telephone, and, on advice of operator, flagged train No. 13 east of point of trouble. Accompanied train to point where rail was broken, train passed over rail at low rate of speed and proceeded without further difficulty.

**Brakeman R. R. Whipkey.** Connellsville Yard. November 22. Noticed 2 1/2 inches of flange broken from wheel of N. Y. C. 330903, under load of coal, in train of yard engine No. 6025. Arrangements made to have car switched out and placed on repair track where wheels were renewed.

**Track Walker W. H. Bittner.** Glencoe, Pa. December 27. While Extra east 7303, with 65 loads, was taking water at Glencoe, discovered leading wheel of Baltimore and Ohio 173197 had 18 inches of tread broken to 1 1/4 inches under gauge limit. Crew notified and car set off at Glencoe.

**Ticket Agent L. B. Mack.** Uniontown Ticket Office. January 2. Reported train No. 73, engine 4845, as having passed that point with brake rigging dragging on rail. Train stopped at Oliver EDT. Crew found trouble to be with P. R. R. car 57615, bolt out of hanger and rigging on rail.

## Pittsburgh Division

**Operator J. P. Davidson.** Layton Tower December 31. Noticed heavy piece of iron casting lying in middle of track, which

would not clear pilot of engine or car trucks. Removed casting from all running tracks.

**Operator C. W. Potts.** Etna, Pa. January 8. Noticed brake beam down on car and dragging on ties about 15 car lengths from caboose. Notified conductor, who stopped train at Pine Creek and removed rigging.

**Operator Nora A. Erdei.** FY Tower, Pittsburgh, Pa. Noticed bridge on fire. Carried several buckets of water and secured assistance of Lieutenant McKee of the Carnegie Mills, who helped her to extinguish fire.

**Leverman J. Tobias.** Denmler, Pa. January 6. Noticed all wheels sliding on P. R. R. car in train of Extra 4595, east. Notified operator at MK Tower, who, in turn, notified crew.

**Operator A. A. Hostetler.** Downieville, Pa. January 6. Noticed rear truck on Baltimore and Ohio car 184595 broken down and riding rail. Stopped train and notified crew.

## Charleston Division

**Mr. Abel Friend.** Gassaway, W. Va. While walking to the home of his father, two miles south of Gassaway, discovered a slide which would interrupt traffic. He walked back to Gassaway and reported condition to dispatcher.

The following named engineers have been commended for making over 100 per cent. fuel performance during November, 1922.

**B. F. Hoover, H. O. Bailey and Scott Mullins.**

**Mr. Walter McElfresh.** Bower, W. Va. Rendered valuable assistance in making repairs to telegraph wires near that station.

**Agent M. F. Hutson.** Bower, W. Va. Assisted twice in restoring wire communication which had been interrupted by storms.

x Indicates car set off.

The following named employees of the Charleston Division have been commended:

**Brakeman J. B. White** and **Conductor R. A. Brake**, for special courtesy shown to passengers on our trains;

**Agent G. F. Walbert**, of Exchange, for close attention to duty and for his special endeavors to "Stop That Leak;"

**Section Foreman J. V. Skinner**, Orlando, W. Va., and **S. M. Cochran**, for picking up and forwarding to the stores good material collected along the line;

**Agent M. F. Hutson**, for rendering valuable assistance to our Traffic Department;

**Conductor W. B. Peterson** and **Engineer E. W. Hall**, for exercising good judgment in getting train moving out of Flatwood under trying circumstances.

**Chicago Division**

**Conductor A. C. Smith**, Garrett, Indiana, and **Operator F. M. Thornton**, St. Joe, Ind. December 31. While No. 94 was passing Concord Conductor Smith observed fire flying from car wheel. Telephoned Operator Thornton, HK Tower, who wrote out message to engineer of train No. 94 and handed it to conductor as train passed tower. Train stopped immediately and brakes on car found to be sticking.

**Conductor L. I. C. Baker**. Garrett, Ind. December 6. When engine No. 4327, of which he was in charge, stopped at Union Center, discovered piece broken out of rail. Notified section men who repaired track before train left Union Center.

**Hocking Valley Operator E. B. Fish**. Fostoria, Ohio. When Baltimore and Ohio engine No. 4152 was passing Fostoria, Mr. Fish noticed brake beam down in one of cars. Immediately notified crew who stopped train before an accident occurred.

**P. R. R. Operator Harshman**. Tiffin, Ohio. January 10. While extra engine No. 4252, west, was passing Pennsylvania Tower, observed something dragging on train. Called Operator Keller, who had train stopped. Discovered brake rigging down.

**Operator J. R. Rady**. Kellar Tower. January 10. Stopped train when notified by P. R. R. Operator Harshman and had condition corrected.

**Brakeman W. H. Green**. Garrett, Ind. December 28. Found broken rail 6 car lengths east of Maumee River Bridge. Immediately reported condition. Rail changed.

**Newark Division**

**Flagman O. Irwin**. Train Second No. 70, Bridgeville, Ohio. December 12. While waiting at Bridgeville for Train 47, found broken top and bottom archbars on front truck of P. R. R. car 283202, loaded to full

capacity with gravel for Barnesville. This car is of low-sided series, hiding much of truck construction; therefore vigilance is necessary to detect defects.

**Akron Division**

**V. Slorgie**. January 8. Noticed broken arch bar on tank car UTLX 31804 and notified train crew who had car set out.

**Operator E. C. Brown**. Homer, Ohio. January 6. Noticed fire flying from car in train of engine No. 4319. Train was stopped and journal was found broken off on H. J. H. 24. Also discovered fire flying from car in train of engine No. 4244 on December 29. Investigation showed train off center.

**Operator T. L. Sierling**. Newton Falls. Discovered unsafe condition in car of N. Y. C. train Nos. 4005-4007, east. Notified train crew. Car set out.

**Conductor R. G. Stanhope**. Found broken arch bar on F.R.X. 700, tank car of gasoline. Car set off without damage.

**Conductor C. V. Underwood** and **Engineer J. J. Lynch**. Avon. January 19. Discovered broken rail on No. 2 track.

**Section Foreman Rozario Tarzia**. December 20. Akron Junction. Noticed brake rigging down on P. R. R. 11399. Notified train crew. Car set out without damage.

**Ohio Division**

**Operator Charles Toops**. Wilmington, Ohio. December 10. While at stock pens discovered broken rail. Called section men and repairs were made. Probably averted derailment and damage to stock pens.

**St. Louis Division**

**Mr. A. H. Schleuter**. Breese. Observed burning waste from car with hotbox had been set out at Breese and had been thrown on top of coal loaded in the car. Went to car and removed burning waste.

**Flagman A. Graham**. Train 88. Kenner, December 24. While heading out of passing track noticed caboose rocking. Investigated and found 18 inches of rail broken out of passing track. Track protected and repairs made.

**Toledo Division**

**Operator W. L. Small**. SW Cabin. January 2. While Extra 4212 south was passing, heard noise which he supposed to be brake beam dragging. Ran out and flagged train. Discovered truck down, riding top of rail caused by arch bar breaking on heavily loaded box car, P. L. 559448. Averted derailment and serious delay to traffic.

Games were rolled on the evening of January 13.

**Record Rail Laying Performance at Tontogany, Ohio**

A force of eight men, including two foremen, comprising the two regular section forces at Bowling Green and Haskins, Ohio, recently made a record performance in laying rail on the Wye at Tontogany.

Operator J. P. Christy, who reported the performance, advises that they changed 32 rails in 1 hour 40 minutes, and because of the heavy movement, "these boys had to hurry."

Section Foreman Bert McCann, Bowling Green, and William Van Scooter, Haskins, are the second and third men from the right in the accompanying picture.

The Section Gang That Made a Record Performance

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Building

#### Law Department

Correspondent, GEORGE W. HAULENBECK

In the December MAGAZINE, the Editor advised every one to read the Biblical account of the birth of our Saviour; Charles Dickens' "Christmas Carol," and a story by Mabel Mary Wirres, entitled "Christmas Comes to Cove Crossing," printed in the December number.

Before going to Bethlehem on my usual week end trip, I read the story and *cried*. Reaching my destination I read it to my sweetheart, Susan Anne Trageser, and *cried again*. Susan, wonderfully intelligent, asked me to read it again before I returned to Baltimore, and I had *another good cry*. "*Est q ae am fiere voluptas.*" (There is in weeping a certain pleasure.)

I am wondering if this writer has had any of her stories declined. It should be interesting to railroad men and their families.

Messenger Roy Gee came here in October and his advent is duly recorded. This is the way he feels about it. "I feel honored indeed to be a worker in the Law Department vineyard. The ladies and gentlemen are very polite and willing to give one a chance to get along. From the general counsel to the youngest lawyer they are mighty nice."

#### Helping to Economize

I have been observing our young men in opening packages of stationery and I see they are bent on furthering the economy drive by saving the string and big sheets of paper. John Wanamaker always did this and you can see how he succeeded.

#### Edward Bok

Edward Bok, when a stenographer, always left a clean note book when he closed for the day. Once his employer was late in dictating, and when Bok handed the letters for signature he explained that it was his custom to remain at his desk until he had finished up the day's business! His next pay envelope contained an increase. His fellow clerks were not similarly favored.

#### Esther Bernstein

Mrs. Esther Bernstein, a capable stenographer, came with us the day I celebrated my seventy-ninth anniversary, October 9. I have looked in vain for errors in her work. Efficient and competent women stenographers gravitate to the Law Department. Efficiency is the only requirement.

#### Her Only Consolation

"If the wife is plump, her only consolation is that she can't wear last winter's coat."

#### Office of General Manager

##### Eastern Lines

Correspondent, H. E. WEIFENBACH

We are sorry to have missed the January issue, but we'll endeavor to do better in the future. This time we have some real news. There have been some changes in this office, which, like most changes, leave us wondering whether to be sorry or glad.

First on the list, we lost our "Duke," James D. Hedding, who, tiring of the uneventful life of a "Stenog," allowed his eye to wander and to finally rest upon the vocation of a mariner. We expect that he now will lead a sailor's life of thrills. In other words, "the duke" has gone with the Munson Steamship Company. We all wish him much success.

In Mr. Hedding's place, we have with us John Hillary Johnson, who was transferred from the Relief Department. We extend to him a hearty welcome, and to the Relief Department, our sincere sympathy.

Next on the list, our own little "Tommy" took his leave. This came as a surprise to us, but as Mr. O'Connell is bettering himself, his new position being that of secretary to chief of yard and terminal operations, we are glad for his sake, and extend to him, too, our heartiest wishes for success.

Also, we again have with us G. F. Zimmerman, a former member of this office, who has been transferred from the position of secretary to Superintendent Shriver to secretary to assistant to general manager, vice Mr. O'Connell.

There is much more to tell, but there is just room to add a word about economy. I have had occasion to visit Havre de Grace, Md., a number of times in the last several months, and have become acquainted with Mr. Brown, our watchman on the Susquehanna River Bridge. Mr. Brown is interesting to talk to, and chief among his many good qualities is his real loyalty to the Company for which he works. He says that he feels that the Company is giving him his living, and that he would be harming himself if he did not work for its best interests.

And this brings me to the point I wish to make about economy. If each of us would only feel as Mr. Brown does, that this is not only the Company's business, but his own business, the source of his income, he need never be asked any more to strive for econ-

omy. If we were in business for ourselves, we wouldn't have to have anyone tell us to be economical. We would just be that way for our own good.

Here is a suggestion on economy. IMPROVE THE SERVICE. How? Why those of you who have occasion to ride over our lines, keep your eyes and ears open, and when you see something that needs correction, report it at once to your superior officer. For instance: At one place, the crossing bells were out of order, and it seemed no action was taken to correct the condition. Report was made at once, and the likelihood of a serious accident was averted, thereby resulting in saving of money, AND LIVES. In other words, this is ECONOMY.

#### Baggage and Milk Department

Correspondent, MABEL MENGES

We are sorry to learn of the death of Frank X. Wills, which occurred on January 7.

Mr. Wills had been in the baggage service at Pittsburgh since 1907, where he served continuously until his recent illness. While he was confined to his home for a month, his condition was not considered serious until about a week before the end came, when he rapidly grew worse.

The funeral services were held at his home in Hazelwood on January 9.

We extend our sincere sympathy to his family.

#### Found

On one of our New York trains some weeks ago, one perfectly good pair of crutches with every indication of having seen considerable service.

We should like to locate the owner as we are anxious to know whether he was a convert of Emil Coue, or just what was the secret of his miraculous recovery.

Alfred G. Weber, our district baggage and milk agent, headquarters in Pittsburgh, spent Christmas with his family in Baltimore.

J. A. Hodges, one of the checkmen in the Camden Station Baggage Room, spent the Christmas holidays in Canada hunting "dear."

We don't know what her name is, but we understand she is one of the most wonderful little nurses that ever nursed a soldier in France.

After efficiently serving the Company for nineteen years as baggage agent at Union Station, Dayton, Ohio, Harry W. Almoney resigned that position in December to devote his entire time to the transfer and taxicab business.

While we regret to lose our experienced and competent baggage agents, we feel sure that Mr. Almoney's vacancy will be capably filled by the former assistant baggage agent, Bert DeHart, who has been appointed baggage agent.

#### Engineering Department

Correspondent, OSWALD K. EDEN

T. E. Hilleary, D. D. Know what the D. D. signifies? Colonel Browne will enlighten you.

It has come to my attention that one or two of my co-workers have been instrumental in securing passengers for the Baltimore and Ohio. They are to be congratulated. It shows they have the Company's interest at heart.

Our general manager, Western Lines and former chief engineer, R. N. Begien is to be congratulated on his article or "Organization" in a recent issue of Railway Age. As he said, and as I have been taught

so much more depends upon the individual filling a position than upon the position itself, as to whether or not that certain cog in the hub is going to function properly.

We wonder what "the girl he left behind him" in Philadelphia thinks of H. P. R. Never mind, H. P., it is only two hours journey to the City of Brotherly Love.

"Ted" Ziegfeld, draftsman in Office Engineer Milburn's office, deserted us for a more lucrative position with F. N. Iglehart & Co., real estate brokers, Baltimore. While we were sorry to see you go, Ted, we feel sure you will make a success in your new enterprise, and we wish you the best o' luck.

When are you going to take us for a drive, "Empty?"

#### Office of District Engineer, Cincinnati, Ohio

Correspondent, G. F. DAUBENMERKLE

S. G. Thompson, draftsman, left the service on January 20, to accept a position with the Cincinnati Frog & Switch Co., Oakley, Ohio. The boys are glad that he will receive a substantial increase in salary, but sorry to lose such a sunny character. Joe Kathman will miss Damon.

Talk about commuting, ask Herb Scribner how it feels to miss both the 4.10 and 5.30 the same day, thus necessitating using the 9.30 p. m. to Lawrenceburg, Ind.

We hear that Mr. and Mrs. Oren E. Hohneck intend to make their home in California, where Mr. Hohneck has a responsible position. Mrs. Hohneck is A. H. Griffith's eldest daughter. Our best wishes follow them, but we know that the "boss" will lose a choice companion in Master "Bill."

J. J. Kolker, accountant, secured five passengers from New York City to Cincinnati during January, 1923. Through friends John learned that a group were leaving Scotland and induced them to use our road. Let's all cooperate by such actions and prove that we are working for the Company. This will make the Baltimore and Ohio able to withstand the competitive stress of this period. Let's make 1923 a banner year for passenger and freight. It can be done!

Engineer of Construction A. M. Kinsman was in the office recently. He was looking fine and the boys were all pleased to see their former "chief."

#### Office of District Engineer, Pittsburgh, Pa.

Correspondent, J. M. WHEALAN

Field Accountant

Come on you folks! Let's have some constructive suggestions on Saving!

Our office recently surprised the newly-weds, Mr. and Mrs. C. R. Borland, with a handsome silver set as a wedding gift. Needless to say, everybody was pleased and delighted. It was noticed, however, that several of the married members of the force heaved a sigh when they inspected the gift.

The younger members of our organization were surprisè guests of Mr. and Mrs. P. J. Rodgers at their home, 638 Boggs Avenue, Mt. Washington, Pittsburgh, on the occasion of their "woolen" wedding anniversary. Mr. and Mrs. Rodgers were the recipients of a handsome pair of blankets from the members of the crowd, who spent a most enjoyable evening, and left, wishing the happy couple and their lovely family many happy returns. We all enjoy going to Phil's house.

It was noted during the course of the evening that there were many anxious

inquiries as to the time of cars, etc. How times have changed!

Our personal acknowledgements, on behalf of the organization, are due Miss Margaret Ward for her self-sacrificing efforts in acting as buyer for us. We could not get along without her

We are sorry to see our Editor become a backslider so soon. His New Year's resolution to have the Magazine in our hands on January 2 has not been kept.

#### Office of District Engineer, Baltimore, Md.

Correspondent, J. FORD COLLISON

Mr. Teders has moved most of his force down to Mt. Royal Station from Philadelphia, taking R. C. Howard's office. Mr. Howard being granted a leave of absence on account of illness. W. W. Gwathmey is in charge of the Philadelphia office now, Messrs. Boettger and Kennedy being the only ones left there with him. O. L. McCabe has moved to Parkersburg, and is in charge of the work at Bridge 935 crossing the Little Kanawha River.

Philip B. Loechel  
(See Transportation Notes)

You ought to see the tie that Joe Jones received for Christmas. Talk about danger signals, that beats them a mile!

We are sorry to hear of the illness of Clarence Young's mother. We sincerely hope for a quick recovery.

We are glad to know that Mrs. Harrison and her eldest daughter, wife and daughter of our chief clerk, have recovered from an attack of scarlet fever.

#### General Freight Claim Department

Correspondent, NORMA H. APPLGARHTE

Did we have a Christmas Tree? I say we did; and it was a beauty, most artistically trimmed by Brother Aro. We also had a dandy entertainment, which started off by the entire office force singing "Oh Come All Ye Faithful," and then the master of ceremonies, Mr. Hagerty, announced an address by our chief, Mr. Glessner. Mr. Glessner decided not to delay matters, and therefore made his address rather short, thanking all for their loyalty in the past

and wishing us the compliments of the season.

The following took part in the programme: Miss Margaret Wagner, pianist (The Jazzy Jazz Artist); Messrs. Chlan, Bullinger & Mummert, violinists; Mr. Koenig, saxophone; Mr. Wooten, cornet; Mr. Duval, the drums; vocal soloists, Mr. Hagerty and Miss Bredehoeft; instrumental soloists, Miss Wagner, and Messrs. Chlan and Wooten; recitations by Miss Starke of the Coal and Coke Receipts Department; Christmas Carols, by entire office under direction of Mr. Hagerty.

The last but not least was our shell shocked quartet, consisting of Messrs. Stage, Chaney, Williamson and Hagerty, ragtime specialists.

The popularity of Herman Alker was forcibly demonstrated by Mr. Hall in his speech of presentation of a little gift from the girls of the Typist Division.

Our thanks are due Mr. Glessner for his permission to hold this Christmas entertainment, and we also owe a vote of thanks to Chairman Riggan and other members of his Entertainment Committee, as well as those who contributed their services to make it such a wonderful success.

On January 8, at nine a. m., Miss Grace Norris, secretary to the assistant to the general freight claim agent, became Mrs. Albert Remke.

The wedding at St. Martin's Catholic Church was attended by many friends and the families of both. A wedding breakfast was served at the home of the bride after the ceremony.

Mr. and Mrs. Remke will reside in Denver, Colo., where Mr. Remke is vice-president of the Home Sweet Home Gold and Silver Milling and Mining Co.

George Collins is wearing a broad smile, all because he is the father of the first boy born in Maryland, January 1. A New Year's gift worth while.

Another addition to the Baltimore and Ohio family is Master Charles A. Blackburn, Jr., born on January 6.

Miss Sarah Morris and Miss Carrie Runge are the latest additions to the Engaged Force. We'll have lots of news about June brides, we are sure. Don't forget to save for yourself, for the Baltimore and Ohio, and for the weddings to come.

#### Transportation Department

Correspondent, LUKE K. BURNS

The MAGAZINE has received the following interesting communication. We respectfully invite all to read and to be governed thereby.

HAGERSTOWN, MD., Dec. 24, 1922.

Dear Aunt Mary:

In the September issue of the MAGAZINE, our mutual friend, Mr. (please emphasize the Mr.) Luke Burns had three items, each of which mentioned something about Harry Sherry, Harry Burns and me. They said all of us had girls—baby girls, I mean, daughters, you know. About our baby he said:

"Whew! All of 'em are girls! Wonder what this Railroad's coming to!"

Well, all this would fit in O. K. with the story about Burns and Sherry, as their children are girls, but I'll tell the world my baby is a boy. His name is Philip B. This picture was taken in October, when he was eight and one-half months old.

Please correct the article referred to and use this picture. It may help some to prove the statement.

Yours truly,  
(Signed) H. F. LOECHEL

# His Hamilton Times 500 Trains Every Day

**W**ILLIAM K. JACKSON, Towerman, of the Rock Island Lines, must have an accurate watch. He handles 500 trains daily at Englewood Station, Chicago, where the tracks of the Rock Island, Pennsylvania, New York Central, and Nickel Plate cross.

Mr. Jackson has been an employee of the Rock Island Lines for over thirty years, and eighteen years ago purchased the Hamilton Watch which today marks accurate time for his important work.

Wherever accurate time is a necessity in Railroad work, be it in the Engine Cab, Coach, or Signal Tower, there you will find the Hamilton Watch. The Hamilton is the choice of Railroad Men because it is first of all Accurate, and also sturdy and dependable.

If you want a watch for time inspection service that will render you dividends of True Time,

*Ask to see the Hamilton No. 992,*

*Priced at \$48.50 for the movement alone.*

*For other than inspection service ask for the 974, priced at \$25.00 for the movement alone.*

Any Jeweler will be glad to show you this 21-jewel "Railroad Timekeeper of America." We will be glad to send our new booklet the "Timekeeper" to any Railroad Man interested.

HAMILTON WATCH COMPANY  
LANCASTER, PA., U. S. A.

# Hamilton Watch

"The Railroad Timekeeper of America"

### Valuation Department

Correspondent, J. A. RENEHAN

Wedding bells have booked another date in the Valuation Department. F. H. Little, draftsman, has signed the contract. We have been unsuccessful to date in learning her name, but we hope to in the near future. Since hearing of this one we find Miss Waugh wearing a sparkler, and understand H. E. Schutte is falling fast. Begin saving your pennies, folks; events are upon us!

On January 15, C. N. Cathcart, this office, was installed as Master of Cassia Lodge, No. 45, A. F. & A. M., and on January 25, O. G. Wilbur was installed as Master of Pythagoras Lodge, No. 123, A. F. & A. M. A large delegation from the department was present on each occasion and congratulated each upon his achievement.

Gossip has it that C. C. Dougherty failed to attend the luncheon at the Engineers' Club on a certain Thursday in January. Perhaps he was in Washington.

How can we help in the Stop That Leak drive? Well, we can prevent waste in the small things, stationery supplies, etc. And we would not be in this department if we were not bending every effort to see that the Best and Only has its property fully and fairly evaluated for use of the I. C. C.

Let's watch every detail. Let's get every dollar's valuation for the property that there is in it!

### Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPERT

Our heartfelt sympathy is extended to J. P. Williams in the loss of his wife, who was suddenly stricken on January 6.

Auto accidents seem to be following the Spedden family. First his sister was badly injured by an auto truck and now "Pat" himself is laid up as the result of being struck by a machine. We hope "Pat's" injuries will not prove serious or permanent and that everything will come around all right. The only thing we can see for him to do is get a car himself and make the other fellow look out.

Judging from appearances, Santa could have dispensed with sled, reindeers, bag and everything after his visit to this office on December 23, because there could not have been a single thing left for him to deliver. Every desk received its full quota and it sure would have required the mythical pack of Santa himself to contain all the presents exchanged by the many clerks, and the selections covered about everything one could possibly think of. The usual crop of diamonds was in evidence and some mighty fine specimens were flashed upon our startled gaze. From our limited knowledge of such things, more than one struggling young lawyer, etc., has been set back a couple hundred meggs. One present worthy of mention was that received by the secretary to auditor, which was conspicuous by its absence.

Atwell had the Christmas spirit with him on the night of December 22 and celebrated by copping the wood for a 348 count. This is a new league record for three games and places him near the top of the heap. Head Lights set up a new three game mark on the night of January 12 with a total of 1458. Standing of teams including games of January 12:

	WON	LOST	PER CENT.
Royal Blues.....	32	19	627
Head Lights.....	31	20	608
Pull Men.....	25	25	500
Bumpers.....	14	37	274

### Auditor Disbursement's Office

Correspondent, JOHN C. SVEC

For the edification of his many bowling friends we present a "striking" pen sketch of our ex-premier bowler, Martin Haneke.

It is rumored that Martin is in love, which possibly accounts for the woeful slump in his batting average as will be noticed by the score shown in the sketch. We hope that he will soon get his eyes off the "flappers" and on the pins.

Chances to help in the "STOP THAT LEAK" drive are not so great with us as with the folks operating our trains. We can, however, be careful with stationery supplies. And we can always boost our service. Every passenger we get is so much "velvet" revenue.

### Auditor Freight Claims Department

Correspondent, NELLIE F. COLLISON

Our Christmas cheer began early. Crossing the threshold of our office on the morning of December 23, old Santa Claus had

Ex-Premier Bowler Martin Haneke, Office Auditor Disbursements

already preceded us, and to our wondering eyes did appear a most wonderful Christmas tree. Such an exciting morning—work was next to impossible. First, a parade of the dignitaries, including Mr. Ekin and his wonderful smile; Dapper Mr. Deverell, who voiced his Christmas greetings in a letter read by our "chief," the latter taking this opportunity also to wish us the "Merriest of Christmases" and "Most Prosperous of New Years;" Mr. Owens, Mr. O'Malley and Mr. Rider. Then finally the welcome signal joyfully buzzed the hour of noon and "the dance was on."

Santa was with us in a few minutes and before us spread a heaping pile of "Martha Washington's" and boxes of cigars, ordered through the Jolly Old Man by our chief clerk, his way of wishing us Merry Christmas. Filled to the brim with all this cheer, we marveled again at the talent in our midst. Mr. Kavanaugh was with us and from another department we borrowed a "dancing man," who knew how to "lame duck," wiggle and wobble, etc., to the strains of the A. F. C. Symphony Orchestra. Well, we ate candy, smoked cigars, quaffed punch, listened to our celebrities and danced, until we were so full of Christmas we just had to tear ourselves away in time to help add the finishing touches for the celebration at home.

Then along came the Saturday before New Year's day when all our pleasures were resumed and added to—our Mr. Kabernagle exhibiting his terpsichorean art and old "Dan Tucker" had nothing on him.

The spirits of "Goodwill" and "Good Cheer" are surely among us. Everyone has

been entertaining everyone else. Otten started the ball rolling and even some of the gentlemen rolled it further; then "Emmy" entertained and has been voted the "Leader of our Four Hundred." The Question and Answer game, old yet ever new, was indulged in; then the Christmas Tree was untrimmed and a tiny, tinsel ball held in its depths a command, and Grace, blindfolded, drew a pig around; Mildred demonstrated her idea of a proposal; Otten whistled "Annie Laurie" on that exquisite instrument, the comb; Margaret told a joke—ask her to repeat it (it's awfully funny); and our Lillian Prenger sat on a pint milk bottle and threaded a needle. It was an amazing feat and the noise emanating from the house caused the neighbors much speculation as to whether a murder scene was being rehearsed. Right here, we don't want to forget the credit due "Big Sister."

Ethel sprang a big surprise, which none of you would have missed had you known about it.

The year Nineteen Hundred and Twenty Two has passed, leaving in its wake happy memories of picnics, musical revues, holiday cheer, etc., and our chief and those conducting the affairs of the Welfare Association are to be congratulated upon their big achievements and the good-fellowship feeling astir within us. But, dear readers, do not think that picnics and general good times are our daily occupation—no, they are rather our avocation and had you heard the message from our chief a few days ago, you would have faith in our indefatigable efforts to help keep in motion the wheels of progress, revolving for an industry more necessary to the welfare of the human race than most individuals have time to consider.

Just before Christmas our Sara entertained a few friends at cards, and our Carl E— spent a few days pondering over the first prize, something "pink and ready-to-wear." He imagines he is a good guesser, but must show us!

Great merriment pervaded the office on Monday morning, January 8, when our chief clerk made his appearance minus the hirsute adornment previously attached to his upper lip. Whatever tempted him, we do not know; but we trust that not many temptations of such an enticing nature will beset him, if such changes for the worse are to transpire.

Most of us consider diamonds worthwhile and acceptable gifts, and we trust A. V. L., the "wee" wifey (when she assumes that role), will be as valuable as the most precious stone.

Girls of the Dictaphone Department, listen to the appeal of your chief clerk and "Stop That Leak." It is an expensive proposition to burn three big electric lights during luncheon hour.

Our S. W. is a wise old owl. Just as soon as news of the "big leak" leaked out, he added to his possession a rubber stamp, reading "Stop That Leak," and is stamping it on bills of lading and freight bills, those well known leaky documents, being enclosed to agents. Keep up the good work and may your comrades "mark time" with you.

We thank you, H. L. M., for your efforts to ventilate the office, and one N. F. C. would gladly render "First Aid" to the man with cold feet if he could supply a remedy for an aching head.

The whys and wherefores of L. D.'s change of address to the Hartford Road are no longer a conundrum among us.

# The Biggest Opportunity of Your Life

## WILL YOU GIVE ME A CHANCE TO PAY YOU \$48 A WEEK?

I want to make you an offer whereby you can earn from \$100 to \$1000 a month, cash. And I am going to tell you how to get started immediately without waiting or delay.

\$3.00 An Hour

Carl P. King, of Kentucky, a machinist, says: "Since I received my outfit the time I've spent calling on customers has paid me \$3.00 an hour profit."

\$625 A Month

Andrew B. Spencer of Pennsylvania is an insurance man who represents us in spare time. We paid him \$625 for one month's spare time.

Large And Steady Profits

J. J. Maher of Maine, finds the Comer Business a sure way to steady and large profits; he averages \$250 to \$3.0 a month and frequently goes over the \$500 mark.

\$256 For One Month's Spare Time

F. E. Wright, South Carolina railroad man, finds the Comer Agency a great profit maker. \$256.56 for one month's leisure hour's effort.

You can be your own boss. You can work just as many hours a day as you please. You can start when you want to and quit when you want to. You don't need experience and you get your money in cash every day when you earn it.

### THESE ARE FACTS

Does that sound too good to be true? If it does, then let me tell you what Carl Rowe did in a small town in New York State. Rowe was a baker earning \$50 a week. He accepted my offer. He did just what I am trying to get you to do. In his spare time he made as much as \$800 a month. Then he quit his job as a baker and by spending all his time at this new work made from \$900 to \$1,200 a month. You can do every bit as well as he did.

If that isn't enough, then let me tell you about E. A. Sweet of Michigan. He was an electrical engineer and didn't know anything about selling. In his first month's spare time he earned \$243. Inside of six months he was making between \$800 and \$1,200 a month.

W. J. McCrary is another man I want to tell you about. His regular job paid him \$2.00 a day, but this wonderful new work has enabled him to make \$9,000 a year. Yes, and right this very minute you are being offered the same proposition that has made these men so successful. Do you want it?

### A CLEAN, HIGH-GRADE, DIGNIFIED BUSINESS

Have you ever heard of Comer All-Weather Coats? They are advertised in all the leading magazines. Think of a single coat that can be worn all year round. A good looking, stylish coat that's good for summer or winter—that keeps out wind, rain or snow, a coat that everybody should have, made of fine materials—for men, women and children and sells for less than the price of an ordinary coat.

Now Comer Coats are not sold in stores. All our orders come through our own representatives. Within the next few months we will pay representatives more than three hundred thousand dollars for sending us orders.

### IMPORTANT NOTICE

The Comer Manufacturing Company is the biggest business of its kind in the world. Every statement is true. Every promise will be fulfilled and anyone writing to them is assured of honest, square treatment.

And now I am offering you the chance to become our representative in your territory and get your share of that money. All you do is to take orders. We do the rest. We deliver. We collect and you get your money the same day you take the order.

You can see how simple it is. We furnish you with a complete outfit and tell you how to get the business in your territory. We help you to get started. If you only send us two average orders a day, which you can get in an hour or so in the evening, you can make \$18 a week and more.

### MAYBE YOU ARE WORTH \$1,000 A MONTH

Well, here is your chance to find out, for this is the same proposition that enabled George Garon to make a clear profit of \$40.00 in his first day's work—the same proposition that gave R. W. Krieger \$20.00 net profit in a half hour. It is the same opportunity that gave A. B. Spencer \$625 cash for one month's spare time.

I need 500 men and women, and I need them right away. If you mail the coupon at the bottom of this ad I will show you the easiest, quickest, simplest plan for making money that you ever heard of. If you are interested in increasing your income from \$100 to \$1,000 a month and can devote all your time or only an hour or so a day to my proposition, write your name down below, cut out the coupon and mail it to me at once. You take no risk, and this may be the one outstanding opportunity of your life to earn more money than you ever thought possible.

### FIND OUT NOW!

Remember, it doesn't cost you a penny. You don't agree to anything, and you will have a chance to go right out and make big money. Do it. Don't wait. Get full details. Mail the coupon now.

**C. E. COMER, The Comer Mfg. Co.**

Department X-65

DAYTON,

OHIO.

*Just Mail This Now!*

**THE COMER MFG., CO.,**  
Dept. X-65, Dayton, Ohio.

Gentlemen: Please send me, without obligation on my part, copy of your booklet and full details of your proposition.

NAME \_\_\_\_\_

ADDRESS \_\_\_\_\_

### Office of Auditor Passenger Receipts

Correspondent, FRANK O. CLARKE

In resuming my duties as correspondent, I wish to thank Mr. Hoppman, who so well kept up the interest of our clerks in the MAGAZINE during my absence.

"Dan Cupid" scored another victory on December 26, at New York, N. Y., when George A. Lewis and Miss Marjorie Taylor, both of this office, were united in holy wedlock. The clerks of the office presented the couple with a set of Stieff's rose pattern knives and forks.

Helen sports a diamond ring,  
Says Santa brought it in his pack,  
Now here's a secret I will spring,  
Her Santa Claus's name is Jack.

The clerks of the Comptometer Bureau are all wearing eye shades to soften the flashes from Helen Kirkwood's new ring.

On Friday evening before Christmas, a fine tree was erected in the office and beautifully decorated under the direction of the office Welfare Association. A garden was also artistically arranged under the tree. The whole effect was beautiful and inspiring, eliciting many expressions of admiration. On the following Saturday afternoon, the office force and the officials gathered around the tree and sang the Christmas hymns "O Come All Ye Faithful" and "Silent Night! Holy Night!" Brief addresses were made and the season's greetings heartily exchanged between the clerks and the officers. The Christmas spirit was greatly in evidence, and all felt its genial glow. It seems not inopportune at this time to express thanks to the retiring Welfare Committee, Messrs. J. M. Finn, R. M. Billmeyer and G. F. Miller, in recognition of their untiring devotion to the good cause of making the Welfare Association a success, and for the many enjoyable entertainments which they arranged for the benefit of all concerned, not the least attractive of which was the recent masked dance.

The personnel of the new Welfare Committee, Messrs. G. F. Miller, C. F. Grund and W. L. Thomas, also gives promise of a continuation of this good work; and we extend hearty good wishes to the new committee whose efforts to carry on should be seconded by the support and cooperation of everyone so that our Welfare Association may reach the peak of perfection. "Every day in every way" let us get "better and better," until we stop that leak.

The office force appreciated the visit of Messrs. Ekin, O'Malley, Deverell, Owens and Rider on Saturday morning before Christmas. Their kindly greetings, as they

visited the various bureaus, were gracefully received, and the spirit of the Yuletide seemed fairly to radiate throughout the room.

"If at first you don't succeed, try, try again." Harry Phelps, our fellow clerk and first class Notary Public, upon hearing of a person who intended going west over another road, tried to secure this passenger for the Baltimore and Ohio. After going into details, for the purpose of drawing attention to the superior service of the Baltimore and Ohio, which we are all proud of and glad to boost, this person decided to travel via our line. Mr. Phelps feels assured that he would have lost this passenger had he not persevered, and refused to be discouraged when the lady told him she would use another road. Such perseverance is laudable and brings real results. Now let us all "Go get 'em!"

This is an excellent way to do your part in the "Stop That Leak!" drive. Get passenger traffic! Prosperity begets prosperity!

We are reprinting the following verses at the request of Miss Augusta Fenton:

#### I Care Not

I CARE not if there be a stone  
To mark the place where I may lie—  
But I would like to have some "rocks"  
Before I die.

I care not for the flowers rare  
That folks cannot afford—  
But while I live I want the cash  
To pay my board.

I care not for the salty tears  
That may be freely shed—  
What earthly good can they do me  
When I am dead?

I care not for black mourning veils  
Through which folks cannot see—  
I'm sure I'll not admire them  
Where I may be.

I care for all the loving thoughts  
My friends may have to give—  
And those I want *right here on earth*  
While yet I live.  
—Lilian Nicholson

### Pier 22, North River, N. Y.

Correspondent, JOHN NEWMAN

To W. Cornell, lighterage supervisor, grand old Veteran and good friend, go out in sympathy the hearts of all who know him either as an officer of the Company or just as a man. Death has taken from him the wife who shared his joys and disappointments during a long lifetime, and has left him desolate.

"W. C.," we feel for you. And yet:—"If

rest is sweet at shut of day for tired hands and tired feet, how sweet at last to rest for aye, if rest is sweet."

Mr. and Mrs. Cornell had been married for 53 years. They had three sons and three daughters, all still living. The youngest is now 34 years old.

Most all of us, I suppose, possess something that we cherish, are proud of and like to "show off." A man may boast of his fine watch, his dog or his wonderful baby; a woman loves to display her jewelry or furs for the envy of her friends—and the hold-up-man; a young girl will become left-handed (did you notice it?) as soon as the brilliant, "blue-white, you know, and platinum" first requisite has been pressed into its proper place; the little girl will strut about with the air of a "grand dame" to show off her new dress with the silk sash, and the little boy will resort to all sorts of stunts to draw attention to his first bifurcated garment.

My first pair of pantaloons, reaching almost to the knee, were of blue velvet and were suspended from the vest, fastened to it with big pearl buttons, and there were slits at the sides but no pockets. Did I walk around with a lofty step and the hands thrust into the slits—showing off?—I did. Happy days!

This preamble serves as my excuse for again showing off something that I am proud of: Ladies and Gentlemen, meet my daughter and grand daughter! Baby's name—Joan, nicknamed "Jackie." Some baby!—Eh? The scenic setting is at Escondido, Cal.

Miss Catherine Carroll, "Katie," cash-clerk, 26th Street station, has announced her engagement to Mr. Robert ("Bob") Marshall of the American Cau Co. (pronounced "a-merry-can-can-co"). The Tiffany solitaire that she flashes with a "hark ye and behold" gesture supports the announcement fully, and beautifully. To an inquisitive fellow employe who wanted to know "when the bells would ring" Katie replied that as soon as "Bob" was rich enough to buy her a ton of coal for a wedding present the day would be set.

Miss Adair Markman, Pier 22, also announces her betrothal, not by card or word, but by those undeliberate movements of the left hand, absentmindedly placed at rest on her bosom or in an abstract manner busied with the pompon on the left ear.

Bless you, my children!

Larry Improte presents the proofs he promised, that he is a "cavalry-man," by introducing his charger. The equine looks tired but hopeful, something like the chargers that the S. C. Dept. utilizes for S. C. purposes.

### Staten Island

Correspondent, G. J. GOOLIC

Henry Hegdal, clerk to division agent, shaved himself on January 10 for the third time with a safety razor. After shaving he found out that he forgot to put a blade in the razor. Better luck the next time, Henry. Don't let the boys get your goat.

The employes of the Staten Island Lines extend their heartfelt sympathy to the family of Agent Bernard F. Fithian, Tottenville, who died at his home on January 8. His death was caused by nervous indigestion. Mr. Fithian was born on November 2, 1852. He entered the service of this company as telegraph operator on November 1, 1888. On January 1, 1913, he was appointed agent at Tottenville. Mr. Fithian had over thirty-three years of continuous service and was one of the oldest employes on this division.

PRIDES OF PIER 22, N. R.

Left, baby Joan and her mother, granddaughter and daughter of John Newman, terminal timekeeper and Magazine correspondent. Right, Larry Improte

Trainman Walter Raburn, East Shore Drill

Ernest J. Haslam is receiving congratulations from many of his friends on the arrival of a baby girl on January 7, 1923.

Congratulations are extended to Miss Rose Dolan, Division Accountant's Office, who recently announced her engagement to Mr. Charles Reinhold.

Congratulations are extended to our correspondent, G. J. Goolie, who arrived in the office on January 12, with a wonderful smile, notifying the chief clerk that "it was a girl" and weighed eight pounds.

The accompanying picture is of Trainman Walter Raburn. Walter is better known as the "human fly." He works on the East Shore Drill and flies from one car to another. He's some boy.

If conductors should have trouble with the steam or air hose, give "Jim" Mulligan, trainman, A-1 North Shore, a call. He's what they call the "cat's whiskers." We notice that when he has a leaking hose he steps down and pulls out a miniature mechanic's hammer—"Woolworth Special"—from his vest pocket and bangs away.

You know, folks, it's a hard life to be married. You can't help sympathizing with our married friends. By no means are we trying to discourage the young folks about to plunge into the sea of matrimony, but take Conductor Gianotti—he works during the day and walks the floor with his baby at night—working two shifts.

The Company has asked us to redouble our efforts to save, to Stop That Leak! Are you with us, men? If so, and you know of any way we are wasting money, sit down and write about it to

Stop That Leak,

Mt. Royal Station,

Baltimore, Md.,

where your suggestion will be carefully investigated and you given credit for it.

### Baltimore Division

Correspondent, W. H. TARR

Martin H. Burke died on August 17, 1922 after having lived 78 years, the greater part of which was spent in the service of the Baltimore and Ohio. He was born in August, 1834. His first connection with the Railroad was on May 13, 1852, in the capacity of laborer at Relay, Md., when the cut-off was put through at that point. This work took some time and the next we learn of him is as foreman of construction, which he became during the year 1861. In 1862 he became supervisor of camps for the Construction Department; in 1870 he became supervisor of tracks at Winchester, Va., and in 1881 he was moved to Relay in

The late Martin H. Burke, Baltimore Division

the same capacity. On December 1, 1900 he was pensioned, but it is chronicled on his record that he was foreman of construction during the erection of Union Dam on the Baltimore Division and in 1904 was again put on the pension list.

The late Thomas J. McCarrick, Baltimore Division

We are indebted to J. A. Byrnes, Company's gardner, for a sketch of Mr. Burke's life. Mr. Byrnes also writes: "My first close friendship with Mr. Burke was during the last year of the administration of John W. Garrett, or more correctly, at the time Samuel Johnson was made roadmaster and started in to raise the tracks of the Washington Branch out of the mud in the cuts. Mr. Johnson brought Mr. Burke off the

### Harry Lauder's Favorite Reading

My bank book is my favorite reading, I confess. I do my work for the love if it, because my heart is in it. But a bank book can be thrilling—the best literary thriller in the world. Next to the Bible, the bank book is the world's greatest book. The edition of the bank book is too limited. Every man should have his copy. And he should keep it for private circulation very private. No other one in the world should know what is in that precious bank book. The Scots have a proverb: "Aye keep somethin' to yersel' ye wouldna tell to ony!" That's your bank book. On every page there should be something nicer than on the page before, And every bank book should have a happy ending. On the last page the end should be: "Continued in our next." The bank book should be the foundation of the family library. People open the check book too often and the bank book not often enough. The check book's too full of reading matter! *Trained Men.*

upper part of the road to take charge of the work, knowing him to be a most capable man for the work as he had made a reputation for grading and track laying from Relay, Md., to Parkersburg, W. Va. While Mr. Burk insisted that every man under him had to do his fair share of the work, he was kind and considerate. When my work first took me to the western part of the System, it was a common thing for some one to inquire concerning Mr. Burke. My recollection is when the cut was made through the rocks at Relay, Mr. Burke worked in capacity of a helper to a blacksmith, as he often referred to the sharpening of the drills and the making of tools for blasting purposes.

It can also be said of Mr. Burke that he was a most charitable man during hard times, and that he would quite often supply someone with the necessities of life unknown to the person concerned. In fact, whatever wealth that was accumulated by him was used in this manner.

We are also indebted to George Burns, for years water station foreman on our division, for calling our attention to the

Night Supervisors, Division Roundhouse, Riverside

Conductor T. M. Rogan, Trains 71 and 72,  
Baltimore-Hagerstown

fact that the death of this interesting old railroader had not been recorded in the MAGAZINE.

#### Riverside

The accompanying picture is of the night force at Riverside Roundhouse. They are, left to right, upper row: T. W. Eaton, M. C. Merrill, E. H. Robinson. Lower row: C. E. Hughes, J. H. Long, W. O. Glaser, H. T. Cromwell.

#### Division Accountant's Office

The accompanying photograph is of the late Thomas J. McCarrick, taken a number of years ago in the old Division Engineer's Office on a St. Patrick's day.

It was with profound regret that we learned of Mr. McCarrick's death on Sunday, December 17, at the Mercy Hospital, Baltimore, where he had been confined for several days.

Mr. McCarrick was born in Dublin, Ireland, November 7, 1859. At the age of twenty-seven he came to this country, coming directly to Baltimore where he entered the service of the Baltimore and Ohio as a clerk in the Supervisor's Office on July 1, 1886. While in the Company's service he served in various capacities and of recent years had occupied the position of Maintenance of Way Material clerk. Mr. McCarrick was of a quiet disposition and also devoted his entire time to the interests of the Railroad and was known to be one who never absented himself from duty, except on March 17, which date was always held sacred by him. Mr. McCarrick was a congenial type of man and was held in the highest esteem by all his associates.

The interment took place from the residence of his niece, Mrs. Murphy, at 2926 O'Donnell Street, on December 21, and was attended by several of our force, who also gave several beautiful musical selections.

We extend our sincerest sympathy to the bereaved family.

#### East Side, Philadelphia, Pa.

Correspondent, CHARLES H. MINNICH

Since "Jack" Ehrig has been working in his spare time for S. Cohen, jeweler, he has been displaying some rare specimens of cut glass in his finger (ring). Watch out for bandits, "Jack;" they'll get you yet!

It may or may not mean anything, but it is a fact that Miss Loretta Jordan is wearing a most beautiful diamond ring with a platinum setting. And she is wearing it on the third finger of her left hand. Eh?

Hereafter all trainmen on the Baltimore Division, East End, can secure copies of the Magazine from Stationmaster S. E. Biser, 24th and Chestnut Streets. We will continue to send Magazines to distribution points to which they have already been sent.

#### Washington, D. C. Freight Station Correspondent, W. L. WHITING

Just now Washington, D. C. is in a somewhat quiet mood, but it is only the usual lull that comes after the exciting times around the Christmas holidays. Our business also feels the general quietness of things, although there are signs that we are preparing for the rush of business that is surely coming during the spring and summer of 1923.

The manufacturers are already making large shipments of lemonade straws, those indispensable articles that make up a great part of the soda fountain business all over the country. The automobile dealers are preparing to flood this city with everything that can be made to go, from the unpretentious "flivver" to the gorgeous "Rolls-Royce." Our automobile platforms are never idle. We would almost wonder if anyone ever walks in Washington, D. C., if there weren't so many pedestrians who continue to get in the way of the machines, and, of course, always come out second best in the argument.

Our great shipper of this city, Uncle Sam, is never idle, and he manages at all times to keep Railroad people busy.

It is pleasing to be able to report that Mrs. D. M. Fisher, wife of our good agent, who has been seriously ill for several weeks, is improving rapidly. She is now able to sit up all day, and to enjoy her meals regularly. We all hope that Mrs. Fisher soon will be out and around in her accustomed hearty manner, and that her recent illness will be forgotten.

Of our other sick friends, M. F. Kelly is still at home. M. M. Phelps has not yet recovered sufficiently from his broken leg to warrant his return to duty; although the last reports indicate that he will soon be with us again. Broken limbs are stubborn members, and take their own good time to straighten themselves out. Your correspondent knows all about it.

Returning to the business end of the matter, wait until spring opens, and things begin to get into shape for the coming Shriners' Convention. Believe me, there will be some hustling!

#### Brunswick, Md.

Correspondent, R. L. MUCH

Engineer J. A. Shewbridge, Sandy Hook, Md., who is known to officers and employes alike as "Punch," is one of our wide awake and faithful employes. He has been in the service of the Railroad for twenty-five years.

A picture of Mr. Shewbridge's little granddaughter, now seven months old, appeared in the December issue of the MAGAZINE. Little Frances is the daughter of Machinist R. E. Shewbridge at Riverside Shops. She is the only granddaughter of Mr. and Mrs. J. A. Shewbridge.

We are showing you a picture of Conductor T. M. Rogan, trains Nos. 71 and 72, Baltimore to Hagerstown. He is one of our bright and cheerful men. Note the smile.

Pipe Fitter J. R. Mathias, who has been in the Frederick City Hospital for the past three months, suffering from injuries received in boarding the fire truck, will soon be at home again. Mr. Mathias is secretary of our Volunteer Fire Company, and one of our leading citizens.

Rev. W. O. Brittingham extends a hearty welcome to all railroad men to attend services. He is "solid" with the boys and is well liked by everyone.

Our town will soon have a handsome theater. One is now under construction at a cost of \$80,000.

Our Volunteer Fire Company has been equipped with new rubber coats. Uniforms will come next. All the members of

#### A PAIR OF EAST SIDERS

Pipefitter Lew Harten (left), the "official photographer" of the Motive Power Department, and Pasquale Cervino, a jolly blacksmith. Pasquale holds a bottle of "blueing," guaranteed to cure "Blue Monday"

the department are Baltimore and Ohio employes, who also render valuable aid to our Company in case of fire.

Car Repairman J. W. Gladstone and Miss Statton Evans, telephone operator, Central Building, were quietly married last week. John had been "spoony" for some time; in fact he had not attended lodge for the past six months. We wish them both good luck.

The holiday season being over, business has slumped somewhat among our tradesmen and other business houses, but the Baltimore and Ohio seems to maintain a large volume in both eastbound and westbound traffic.

Any reader of the MAGAZINE who would like to cooperate with me in the "STOP THAT LEAK" Campaign, or in any safety movement in the effort to establish and maintain 100 per cent. business efficiency, is kindly invited to help. We are determined that Brunswick shall lead this year in good news for and of our officers and employes.

If you know of any waste on the Railroad please write

Stop That Leak,

Mt. Royal Station,

Baltimore, Md.,

and tell about it. Your help will be appreciated.

At the Y. M. C. A.

By Rev. Wendall Allen

On Thanksgiving Day we began our work with what was said to be the most successful Thanksgiving Service in the history of the Brunswick "Y." Since then we have been having religious services each Sunday afternoon at 2.30 o'clock, and an entertainment each Tuesday evening. The interest taken has been gratifying indeed.

We attribute our success largely to the fact that we have installed a pathoscope moving picture machine which our men are enjoying immensely. You should hear us sing some of the old hymns from the screen, and the men asking at the close of the program when we are going to have our next service.

On Sunday, January 14 we had a ten reel feature "From the Manger to the Cross" or "The Life of Christ."

In the near future we are going to put on illustrated lectures in connection with our other work here.

**Mt. Clare Shops**

Correspondent, W. H. ZELL

Superintendent Shop's Office

Very much to our surprise, astonishment and sorrow, we found, upon arriving at the office on the morning of December 18, that a fire had visited the place on the previous morning and had practically destroyed the office building. Later we found temporary quarters in the office of the Storekeeper. The fire started on the third floor of the building, in the blueprint room, and practically all of the important records were lost. The Drawing Room and Accounting Departments were the heaviest losers.

We are now, however, looking forward to the new office building which we understand is going to be erected, in three story concrete. We hope to have it ready by June.

Our faithful old dog, "Bob," who always was seen around the Arlington Avenue gate, was lost in the fire, smothered to death.

Lawyer Poole claims he is strong on International Law—it might be well for him to assist Mr. Harding with the situation that now confronts him, since France moved into Germany.

**Accounting Department**

One of our former clerks, Miss Edna M. Garrett, was married during the latter part of November to Dr. Van Poole, of Mt. Airy, Md. The couple are residing in Mt. Airy. Here's wishing you the best of luck, Edna, and every happiness in the world.

# Emerson

Established 1849

ONE need never be doubtful as to the effect of music produced through the medium of his piano—if it be an Emerson.

The same rich sweetness that made the Emerson a favorite in the days of our grandparents is still the outstanding characteristic of "the sweet-toned Emerson" of today.

The Emerson is preeminently the piano for the home.

## Boschen, Smith Piano Co.

PARK AVE. AND FAYETTE ST.,  
 BALTIMORE - - - MD.

Please mention our magazine when writing advertisers

Vera, daughter of W. L. Temple, who works in the Bolt and Forge Shop

Methinks I hear the faint jingle of more wedding bells, not far away. We were of the opinion his thoughts were only for chickens, but recently discovered he is, also "interested in" the human species of "chicken." It's a great life; if you don't believe it, ask our latest adventurer.

When our Catonsville farmer gets the pool table we all want to come out and have a few games. Sh-h-h-h! it's going to be in the cellar, so I know we'll have a good crowd. However, Ivan had his on December 25, so that let's him out.

Jim Whalen was the recipient of a Christmas present—a comb and brush. Jim says there must have been some mistake; he would rather have had a few towels.

**Shop Order Bureau**

The folks in the office have been complaining about sore eyes the last few days. At last, it was discovered—a great big sparkler on the "can't play kissing finger." We understand Miss Pincus is going South—yes, it's to be in Thomasville, Ga.

We heartily welcome the return of F. L. Cote to the personnel of the Shop Order Bureau.

L. J. Hook recently celebrated the arrival of the fourteenth tooth of little Roy, Jr.

**Here and There at Mt. Clare**

We are all sorry to hear that our old friend, W. E. Crandol, former piece work inspector, now hammer operator, is in the hospital for a nerve operation. We will be glad when "Bill" is back on the job again.

Johnnie Sanks, another blacksmith shop man, is in the hospital for his fourth operation. We hope for his early recovery.

The supervision of the Smith Shop think highly of their office boy, "Shorty" McConnell. For a Christmas present they bought him a nice new kiddie car.

Looks like it won't be long now before the wedding bells will be ringing for John Horak, No. 1 Machine Shop.

Boiler Shop Foreman "Johnnie" McGowan has been taking lessons on the old bagpipe. John might be able to give us a few selections at the next Welfare party.

Boiler Maker John Goeller took unto himself a wife, but so far we haven't learned who the fortunate or rather unfortunate young lady is. Don't be bashful, Son, tell us all about it.

Flue Plant Foreman C. Raeuchle found plenty of snow and ice on his vacation trip up home to Wilkes Barre, Pa.

A. F. Stigmeier, whose home is in West Albany, N. Y., spent his vacation at his home.

Supervisor of Machinery and Tools G. F. Kline was the man of the hour at our fire; he was here at the first toot of the whistle and although he got soaking wet, he stayed here all night doing more than his bit.

The accompanying photo is of Vera E. Temple, daughter of W. L. Temple, Bolt and Forge Shop.

**Stop That Leak!**

Here we have the largest shop on the system and here the largest number of mechanical employes. Here we do the most work, use the most material and have the greatest chance to save.

Which is by way of recalling the appeal made by President Willard in our December issue that we all get back of the Stop That Leak drive.

Think of 3000 pairs of eyes to discover the most minute loss that may exist in our big operations here, and 3000 minds at work to eliminate them!

Mt. Clare is the leader in size, in number of employes working, in work turned out, of any of the shops on the system. Now, let it hold its rightful place as leader in the number of suggestions sent in for savings.

Do you know of a loss that can be prevented, or a more efficient way of doing any of the many operations we are constantly performing here?

If so, please get out pencil and paper, write up your idea and post it, Company mail, to

Stop That Leak,  
Mt. Royal Station,  
Baltimore, Md.,

where it will be promptly acknowledged, and handled in confidence and with great thoroughness by our officers.

I thank you!

**Cumberland Division**

Correspondent, J. J. SELL

A good way to keep the importance of economy before us is contained in the following, which has been contributed in connection with the "Stop That Leak" Drive:

**Save Coal.**

Turn off lights when not needed.  
Opportunity for economy? Seize it.  
Pennies saved soon mount up.

**Try for better performance.**

Handle shipments carefully.  
A patron is our guest.  
Treat him with courtesy.

Let's strive for greater efficiency.  
Economy should be our watchword.  
A penny saved will help.  
Keep Safety, Economy, Courtesy and Thrift before you.

The appeal for the Stop That Leak drive, as portrayed in the December issue, has met with ready response from our employes. Every day we hear of the good results being achieved along the lines of economy, the matter being handled in a mutual way. One employe seeing an engine arriving at a Terminal making excessive amount of black smoke, called attention of crew to necessity for saving fuel. The saving of stationary and supplies in offices has received marked attention; reclaiming of tools and material, and careful handling thereof, are all being given attention, and your correspondent has asked that every employe keep up the good work, and put the Cumberland Division to the forefront in this drive.

In an early issue there will be a good picture of our efficient Freight Office force at Cumberland, every one of whom is doing good work in the "Stop That Leak" drive. This picture will not include the platform force, which we hope to present in another issue; however, every employe at Cumberland Freight Station is on the job to put his station in first place in the careful handling of freight, and proper handling of billings etc., and thereby keep down Loss and Damage claims.

On December 16, last, the crack Baltimore Duck-pin team journeyed to Cumberland to show our local boys how the game is played. Well, to make a long story short, the CUP still remains in Cumberland, and the following score tells why. However the Cumberland Team will journey to Baltimore soon to try out those wooden pins?

The late "Uncle Harry" Vernon

The accompanying picture is of our Station Baggage Agent J. W. Robertson, "Taken in Camp." What is it, "Fats," fish or bacon?

Haven't heard any stories about our friend of Jones' staff, jumping any rattlesnakes yet this season. How about it, Ernst?

One of the items in the Stop That Leak drive uncovered to date is that of "Shobe" Thrasher, our efficient material handler in the Stores Department located at the Queen City Station. "Shobe" has charge of the baling of waste paper gathered up around the station and offices, from which a tidy sum is realized by the Stores Department, and has found time to recover several pounds of pins and paper fasteners from discarded records which were turned in for further use. Keep up the good work, "Shobe."

No this is not the "Judge;" it is a good picture of our friend, Harry S. Lemm, chief clerk to the superintendent of Shops. Harry wasn't exactly posing for this photo but was cleaned up for the day in the office and was looking over the situation with his usual smile.

We recently broke the record of "Car Miles Per Car Per Day" on the East End of the Cumberland Division in which everybody had a hand. Assistant Trainmaster Baker did his bit by keeping the sidings clear.

An extremely heavy business both in passenger and express as well as in U. S. mail was moved during December up to Christmas. Everybody concerned on the division is to be congratulated for the splendid way in which it was handled.

Conductor Charley Peters of the C. V. Pool is complaining bitterly on the way "Pete" Townsend is putting away food these days. Seems as tho "Pete" is fond of one of the fair sex in Keyser and occasionally persuades her to come down to Martinsburg to hear the Victrola and to look over the family album; then they go to a picture show where "Pete" is busy dodging the nurses and Charley claims

DEPOSITS \$1,055,260.26

 Keyser, W. Va.  
 SPECIAL SAVINGS DEPARTMENT  
 Interest paid every six months from date of deposit

after one of these visits that you always hear the same story "how about a little steak?" Sounds familiar, "Pete," but why not bid in a Keyser turn?

Vincent J. Coulchan, clerk to Trainmaster Groves, resigned on January 1 to accept a position as chief clerk to the purchasing agent of the Consolidation Coal Company with headquarters in Frostburg, Md. Good luck, "Vinc!"

Miss Lillian Judy has been appointed secretary to the division engineer.

Miss Nancy Miller, secretary to the assistant superintendent, who has been confined to her home for several weeks because of illness, is again able to be about and hopes to be on the job shortly.

Mrs. Molly H. McDonald, passing report clerk, Superintendent's Office, has resumed duty after several months' illness. Glad to have you back, "Molly."

Track Supervisor A. O. Tederick, Martinsburg, was awarded first prize for having the best sub-division on the Cumberland Division for the year 1922. Track Foreman C. E. Robey, Lineburg, won first prize for best section; Track Foreman M. Wilson, Bloomington, first prize for greatest improvement on sections; Track Foreman M. Miller, Vanderlip, first prize for best branch section. Competition was keen on all sections and sub-divisions, the awards being made strictly on points. Several others made excellent showings and all are to be congratulated on the showing made.

Haven't heard any news from Sandy Hook lately. "Jake," what's the matter with the "Garden spot of the World?"

Assistant Shop Clerk "Jake" Brown has promised some good news for the next issue in connection with the "Stop That Leak" drive.

Keyser, W. Va.

Correspondent, HARRY B. KIGHT

"Uncle" Harry Vernon, pensioned yardmaster, died at his home on East Armstrong Street, Keyser, on the morning of December 27, following an illness of several months. Mr. Vernon was seventy-nine years old and had been pensioned for several years. Mr. Vernon was a favorite among his fellows and the high esteem in which he was held was shown by the beautiful flowers that covered his casket, sent there by the Railroad office forces and other friends. We extend to his sorrowing wife and children our heartfelt sympathy.

All of Keyser, as well as all of the entire West End of the Cumberland Division was shocked on the morning of December 29, when word was received of the untimely death of Engineman "Charley" Kibler, at M. & K. Junction, while in the performance of his duties. Everyone knew "Kib" and loved him, and we will miss him. To his bereaved family we extend our deepest sympathy.

Brakeman Max Weese was fatally injured in Fetterman yards on the afternoon of December 31. He fell between the cars of his train and was run over. He was hurried to the City Hospital at Grafton, where it was found necessary to amputate both legs. He died that night. We extend to the bereaved family our deepest sympathy.

Brakeman Adams succumbed to injuries received while in the performance of his duties. His remains were taken to his old

Baltimore and Ohio for Work, and Basketball for Play. "Dyke" Shaffer, one of our painters, and "Big" George Parish, who holds a turn in the Storekeeper's Office. Both are husky basketball players

Please mention our magazine when writing advertisers

home in Texas. The family has our heartfelt sympathy.

Your correspondent sent a letter to "everybody and his brother," asking their support in getting the items for the MAGAZINE for the coming year. What's the matter, fellows? Didn't you get the letter? For goodness sake, wake up, and send something in for the next issue.

Conductor Arthur Welton is thinking of having his brakemen's names engraved on their brake clubs. He says they lose so many that maybe if the finder sees to whom they originally belonged they might be returned.

Dr. Guistwhite has been appointed medical examiner here, vice Dr. Biser, who has been transferred to Washington District. We are sorry to lose the old Doc, and we welcome Dr. Guistwhite.

The shop and yard boys made a nice contribution to the Child's Refuge at Christmas time.

It was reported that Captain John Edwards spent the holidays with home-folks in Washington, but we had Sherlock Batch Pazen shadow him and it is now reported that "Cap" returned with a smile and certain other signs of having seen some one other than the home-folks.

Safety Man "Ed" Sirbaugh got his name in all the leading papers of the country because of the first aid he rendered a fellow who was found locked in a refrigerator car by Brakeman Earl Athey. The fellow had been in the car four or five days, and was in pretty bad shape when taken out.

Machinist Rex Offut has gotten his commission as captain in the Army. Captain Offut served overseas during the big "fuss." Congratulations, "Rex!"

Pensioned Engineman J. W. Hilleray was a pleasant caller a few days ago. He has bought a farm at Antioch, and has the "Welcome" sign out to all his friends.

We are glad to report that Conductor John Christman is able to be out and around, after having been housed up for some time, because of injuries received several months ago.

We're glad to see the smiling face of Supervisor Mike Laffey on the West End again, after a severe operation at Allegheny Hospital, Cumberland. Keep up the good work, Mike, we're behind you.

Game is said to be scarce in the vicinity of Altamont, since General Supervisor Sponseller, Supervisor Laffey and Foreman Rhodes made the record killing just before Christmas. Many fancy shots were made and after the supply of ammunition was exhausted, "Spon," in order to make it a full day, ran a few cottontails to Swanton to load in the cattle pens there.

Foreman Frank Cannistra recently returned from an overland trip to Pittsburgh and Youngstown. He has given up his Reo and now drives a Hupp. He claims that he has an attachment on this car for surfacing track, and that that is the reason for the excellent track in Keyser Yard.

Water Station Foreman Charles Wigal, Sam Johnston and party recently broke camp at Three Forks, having completed the water supply system for Hardman. "Pop" Wigal carried off the checker championship at Hardman Branch while Sam entertained with some hair-raising stories of his frontier life in the ridges around Hancock.

Foreman G. W. Dunbar, recently acting as supervisor on Sub-Division No. 5, and who got away with it, is back in the saddle at M. & K. yards. He is sporting several

new pieces of winter ornaments and says, "Santa Claus sure does treat the 'deserving' well."

Play Safety First and keep the station gates closed when not in use. Remember this, fellows!

"Chicken" Avers and B. O. Wiley had front seats at the musical comedy, "Listen to Me," which played here last month. They had reserved an extra seat for "Ed" Tasker, but "Ed" failed to show up. The next morning they found out that when "Ed" had started to leave the house to join them his wife said, "Listen to me, and come right back here and polish the kitchen range." And that is the reason "Ed" did not go to the show. We heard that he did a "bum" job on the stove, too.

We have all read the appeal of President Willard in the December issue that we get back of the "Stop That Leak" drive. I don't suppose that there is a place on the whole System which, if the employees really got back of this drive wholeheartedly, would show the results that we would at Keyser.

Here we have a whole community of people who handle practically every kind of railroad work, especially in the mechanical and train service departments—and furthermore—we have hard railroading that may offer more opportunities for losses—and consequent savings—than where there are no bad grades, heavy coal tonnage, deep snows, etc. Of course we think that we railroad pretty well, and we do, but there isn't any kind of work that can't be improved, and it is this that President Willard has in mind in making his appeal.

I have been asked to make a personal appeal here to all of our people, officers and employes, to do their very best in offering suggestions in this drive. Do you, Mr. Tramman, know how we can stop a leak—or you, Mr. Shopman? If so, will you not write to

Stop That Leak,  
Mt. Royal Station,  
Baltimore, Md.

and tell how, so that your suggestion can be used for the benefit of the Railroad and all those connected with it?

Sabraton, W. Va.

Correspondent, L. M. GUMP

Master Mechanic Hice is back on duty after an illness of over two months.

Our painter, C. W. O'Gilvie, is busy these days. An M. & K. engine goes into shop and comes out after awhile looking entirely different. Instead of the silver lettering of the Morgantown and Kingwood there appears "Baltimore & Ohio" in gold. The few remaining marks of the old M. & K. are fast disappearing before C. W.'S brush.

Bridge Foreman Appell is having troubles of his own. A Texas steer doesn't have a thing on the motor car of his. When he wants to go it doesn't want to, and when he is not anxious about moving it is always ready. He has our sympathy, as we have had some experience with Fords on winter mornings. Say, Charley, Dispatcher Carroll is quite an authority on motors; he may be able to help you out quite a bit.

Brakeman W. E. Peaslee, proud papa of a new boy, says he just swells up all over when he says "Da-Da."

Engineer D. F. Hahn recently went deer hunting up in Pennsylvania. We are not going to tell how many he bagged, as we really do not know; however, we feel quite safe in saying that he feels well satisfied with his trip. "The biggest one always gets away."

A good bit is being said about "Stop That Leak." Now you are the men who know where the leaks exist in the daily routine and you are the best men to stop them. We like to think that we have the best shop on the System. Whether we have or not is a matter of opinion, as there are many other good ones. Let us keep on thinking we have and work to that end. You are the men that make it what it is and whether it continues to improve or goes backward is mainly up to you. You know when you are doing your best—so does the supervision. Cooperation works wonders—and stops leaks.

"Uncle George" Hansel seemed somewhat under the weather recently. Our guess is that he hasn't fully recovered from Christmas and New Years.

Boilermaker W. C. Johns says he didn't indulge in any "Christmas cheer" as he is so scarce of dogs he is saving the money to get a few more. At the present time he has only five, which he considers a bad state of affairs.

Sabraton Baltimore and Ohio shopmen and trainmen got together recently and organized a regular gold-striped, silver-plated brass band—with an overwhelming abundance of "gob sticks" and "jazzarino-phones" to highlight the organization. At present about thirty have joined, and if enthusiasm has anything to do with success we may expect to hear them in full blast by the coming June. It is deemed best that the organization will not confine the membership to Baltimore and Ohio employes; the principal requisites for affiliation will be love for America and talent. Our Baltimore and Ohio employes interested have fully qualified and include: Conductor Martin Scott, cornet; Engineer Harry Squires, tuba; Storekeeper "Red" Farrell, jazzarino-phones; Boilermaker "Buck" Frost, jazzarino-phones; Machinist Helper George Bokey, slippery horn; M. of W. Foreman C. A. Appell, bear-tone; Painter C. W. O'Gilvie, what's left.

Several young Americans, principally sons and daughters of employes, are taking parts in the reed section. Quite a number of names have been suggested to distinguish the band but to date no action has been taken, the committee deeming it of more consequence to get fully organized. Martin Scott was elected manager and is proving himself worthy of the selection. We hope in the near future to give a more complete account of our coming "Wind Jammers."

Rabbits in this section will have a chance to rest as the season is out and "Red" Farrell has quit hunting. He never killed any, but he kept them disturbed and all out of breath.

Paw Paw, W. Va.

Correspondent, M. L. SHARON

This being the new year, although not exactly at the beginning, we wish one and all a happy and prosperous season.

A few weeks ago your correspondent, while rusticated around Magnolia, ran across our old friend Robert McAdams. In fact, we visited him at his home. "Bob" and his good wife welcomed us and entertained us royally. They have a fine home at Magnolia now. We regret to say, however, that "Bob" was feeling a bit indisposed. Here's where the trouble came in with our visit:

They have no lights around Magnolia, so, quite naturally we stepped off a bridge on the county road there, right into a barbed wire fence. We tore our clothes

considerably and also our flesh, so we've been laid up a bit ever since.

I suppose that we'll stand as one of the lucky huntsmen for the year, for we bagged a fine wild turkey. Our friend, A. C. Hardy, failed to bring one down. Never mind, Dick, you'll have another chance in 1923—if you can catch 'em with bait.

"Josh" Lewis is a bit under the weather. He has just passed his eighty-second milestone. He is a retired watchman. "Josh" entered the service of the Baltimore and Ohio in April, 1862. He is one of the oldest in line of service around here. He has been retired for several years. His son is yard conductor at Willard, Ohio.

Track Foreman "Daddy" Shipley spent New Year's Day resting up, at home.

### Connellsville Division

#### Office of Train Master

Correspondent, C. E. REYNOLDS

Now that all of us have been made happy by the annual appearance of Santa Claus, and the writing of "1923" has become possible, let us apply ourselves with zeal to our various duties, remembering that the fruits of energy never spoil.

We are sorry to report that it was necessary for our Superintendent Mr. Brown to undergo an operation recently. We hope that the results will be beneficial.

Messenger Ralph Cockrill, Division Accountant's Office, Connellsville, no longer doubts the possibility of a Santa Claus. He got a letter from Santa himself, as well as all that he ordered on requisition.

D. M. Springer, former yard clerk, Connellsville, has been appointed assistant car distributor, vice C. V. Payne, who was recently appointed chief clerk to superintendent. H. D. Whip, former chief clerk, has been appointed freight agent, Connellsville.

Here is a photo of Motive Power Accountant Earl W. Mitchell. This one is of Earl when he first entered the service of the Baltimore and Ohio in 1909.

Effective January 1, L. S. McClelland, assistant storekeeper, Connellsville, was appointed storekeeper, Dayton, Ohio. "Pud," we are sorry to see you leave the Connellsville Division, but we are glad to see you advance.

Herewith photo of the crew operating on Berlin Branch, Connellsville Division. Reading from left to right: Engineer S. P. Zimmerman, 40 years service; Conductor Z. C. Leslie, 36 years service; Brakeman W. Swearman, 27 years service; Brakeman L. W. Crosby, 44 years service; totalling 178 years service. We believe that this is one of the oldest crews on the System, in point of service.

We hope that all employes now know that there is a "STOP THAT LEAK" drive on foot on the Baltimore and Ohio, and that every one will put his shoulder to the wheel to make it a success. Send your suggestions for improving operations, promoting economy and bettering the service to:

Stop That Leak,  
Mt. Royal Station,  
Baltimore, Md.

#### He Was only Kiddin'

A girl went down to the round house,  
To interview the oiler.  
Said she, "What is that funny thing?"  
Said he, "The engine boiler."  
"Why do they boil engines?"  
Said the maiden sweet and slender,  
"The reason," said the honest man,  
"Is to make the engine tender."

—Exchange

### Pittsburgh Division

J. S. Brennan, who has been with the Baltimore and Ohio for the past twenty-eight years in various capacities and until recently as chief clerk to transportation assistant at Pittsburgh, has left the service to accept a position with the Somerset Coal Producers' Association. Mr. Brennan is succeeded by C. K. Kelly, George Deutch succeeding Mr. Kelly as car distributor. We wish all of them success in their new fields.

Sincere sympathy is extended to C. K. Kelly in the loss of his father, on January 11.

Frank Staff, Car Distributor's Office, again looms in the limelight—this time in the capacity of a gay young Lothario, his romance centering at Allegheny, Pa., and Ravenna, Ohio. This is dangerous business, Frankie; surely one is enough and if either one gets a sight of this, we feel sorry for you.

We are pleased to announce the arrival of a son in the family of Wade Simmons. Congratulations, "Red." Is he going to be a stoker fireman?

Miss Harriet Jenkins, Car Distributor's Office, had the misfortune to break her wrist while skating at Duquesne Garden recently. We hope it will not be long until Harriet is indexing again.

Old Dan Cupid, with his little bow and arrow, is again invading our ranks. This time he took off Teresa Kenney, who, although she denies the allegations and defies the "alligator," is resigning, presumably to get in practice in the anticipation of making "Tom" Mullen happy.

"Dan" has his eye on another young lady in the same office but at this writing we are not sure of our ground and we'll therefore save that for a later issue.

# PATENTS

Send drawing or model for examination and report as to patentability.

WATSON E. COLEMAN  
PATENT LAWYER

624 F. Street, N. W. Washington, D. C.

Still following Dan Cupid, we go to the Traffic Department and find that Traveling Industrial Agent J. W. Phipps, Jr., was fatally wounded and married on January 6 to Miss Wilson of Pittsburgh. A number of officers of the Traffic Department were present at the wedding.

Freight Representative W. M. Scott, Mr. Markley's office, also took the plunge, the affair occurring at Baltimore on December 4. The girl in the case hails from Norfolk, Va. We always wondered why old "Silver Top" was so anxious to return to the South, the land of mint juleps; now we are wise. We wish the victims much happiness.

The fever has also reached another Traffic Department employe, Miss Ruth Irwin, secretary to chief clerk, General Freight Agent's Office, who is sporting a beautiful engagement ring. We are told this engagement will terminate in an early spring wedding, Mr. H. Allison of the Celite Products Company, being the lucky man in this transaction.

This leaves but one eligible in the Traffic Department—our old friend, Joe Garbesi. No longer do we wonder why he decorates the lapel of his coat with a carnation. Send out your S. O. S., "Joe."

River Dispatcher V. V. Bailey has recently returned from a sojourn in the Golden West, and is again shooting them up the river.

On New Year's Eve, quite naturally, one's thoughts turn to gaiety, but as the City Director was exceptionally kind to

WHEN THE TRAIN COMES IN AT CONNELLVILLE  
Upper: Crew on Berlin Branch, whose years of service number the great total of 178 years  
Lower left: Earl W. Mitchell, motive power accountant

Please mention our magazine when writing advertisers

little 1923, he permitted it to be ushered in with all the shows, etc., opening at 12.15 a. m., since the preceding day was Sunday. Two gentlemen, to whom we had always given credit for having good sense, decided they would befittingly celebrate the occasion and turned their thoughts to the "Gayety." Need I explain the character of that show house? It must have been some show. The lobby was so crowded that the two persons mentioned couldn't even get standing room and after patiently waiting in line for an hour or thereabouts, decided it was a useless venture and gave it up. Not, however, before they were drenched to the skin. One of them, on reaching home made immediate inquiry as to whether or not all of his sons were in bed and when he explained to the better-half what was the cause of his absence, we wonder why they wonder at the present generation. Boys, secure the tickets in advance, hereafter.

Our President made an appeal in the December MAGAZINE for greater economy. With thousands of employes in the Pittsburgh territory and yielding nothing to the employes of any other section in loyalty, I am sure that we will have some fine responses.

Do you know of a leak, of a better way to do some job, of how we can give finer service? Probably you do. Then get out the pencil and write all about it to

Stop That Leak,  
Mt. Royal Station,  
Ba'timore, Md..

where your suggestion will be promptly acknowledged, handled confidentially and by competent officers.

**Glenwood Roundhouse**

Correspondent, JANE P. PASSMORE

On January 6 Engineer Charles Beltz and Fireman R. L. Kurtz, on No. 17, made a fine record. Train consisted of ten cars with engine 5053; left Cumberland 4.15 a. m. on time, arrived at Pittsburgh at 8.55 a. m. Made clear smoke all the way and with three extra stops account of heavy traffic. Had eight tons of coal left in tank.

This shows fine cooperation of engine crews, making a performance which ranks among the best. We are taking this way of

Margaret Ruth Fairgrieve, nine year old daughter of Car Distributor Earl N. Fairgrieve, Pittsburgh

thanking the engine crew for the fine manner in which the train was handled.

What is said of this crew could also be said of other passenger crews operating on the Pittsburgh Division, who are always on the alert endeavoring to make first class performance, so that the Pittsburgh Division may rank first.

"Arch" Satterfield, clerk in the Master Mechanic's Office, treated us the other day, bringing his baby daughter to the office. Wait till she grows up, "Sat," then the fun will begin.

We miss Rider, transferred to the office across the hall, as personal clerk to C. E. McGann, master mechanic. However, he looks in the door occasionally.

**Glenwood Back Shop**

Correspondent, FRANCES E. LEEPER

Everyone misses the smiling countenance of former Assistant Chief Clerk Earl Abbott, who has resigned from the service to become a doctor. About a week before he

left several of the boys were consulting him regarding a prescription. Rushing business!

W. W. McPherron, Baltimore, has been appointed assistant chief clerk to the district master mechanic at Glenwood, vice Mr. Abbott.

When Davey Flynn was asked what Santa brought him for Christmas, he blandly replied, "A good warm pair of suspenders." Guess that will hold them for a while.

They still continue to fall. It was Machinist Apprentice Hugh Fatkins this time. He married her so quickly that the boys haven't got over it yet. Congratulations, Hughie!

A certain young man in the car yard owns a "Flivver." He wouldn't have so much trouble with it if he didn't have a girl to look after also. Davey Flynn contends that you can't have two things like that to take care of at the same time. Believe you are right, Davey, at least "Flivvers" are much trouble.

C. F. Cannon, Stores Department, evidently doesn't get along well with the girls. It must be so or he wouldn't have gone way downstairs to work.

**STOP THAT LEAK!** Help your Company Save!

**Charleston Division**

Correspondent, M. W. JONES  
Secretary to Superintendent

"We get out of life about what we put into it. If we try to take more out than we put in, we attempt to rob some one. As it is better to give than to receive, let us this year endeavor to enroll ourselves among the world's benefactors."

**STOP THAT LEAK!**

Do YOU know that "STOP THAT LEAK" means, in simple words, "ELIMINATE WASTE?"

Conductor R. Roush has been commended by the superintendent for discovering an error of \$100 in the billing of a locomotive on its own wheels, handled to Weston in its train. A good sized leak stopped!

The following stations during December reported the amounts shown, gained, account check weighing L. C. L. freight and revising classifications:

- Buckhannon, \$6.77; Burnsville, \$29.33; Allingdale, \$15; Copen, \$11; Clendennin, \$9.45; Erbacon, \$5.14; Elkins, \$4.47; Frenchton, \$5.94; Frametown, \$3.31; Falling Rock, \$1.18; Gilmer, \$1.42; Gassaway, \$13.56; Holly Junction, \$.72; Heaters, \$11.91; Newlon, \$.19; Orlando, \$.92; Pinch, \$1.62; Porters, \$.66; Richwood, \$9.68; Strange Creek, \$2.37; Sutton, \$2.63 and Weston, \$95.03.

A considerable number of small leaks stopped up. The number of stations reporting this time is gratifying, and we hope shortly to have every station on our division showing something along this line.

DISCOVERED—By the aid of the Division "Sherlock Holmes," one poet, in the person of Engineer B. H. Paxton. Who would ever have thought "Bennie" was a poet, after all these years. Here's his latest:

"The old horse died and the mule went lame. He lost his old cow in a poker game. Along came the wind the very same day, and blew his house and barn away. To make it all good, along came an earthquake, and sunk the spot, where the old house stood. The mortgage man came around claiming the hole in the ground. It was so sad the old man up and died. His wife and children they wept and cried. There

was but one thing left. They knew he had INSURANCE in the Baltimore and Ohio Relief Department."

Now boys and girls, see what Bennie did! Get busy and see if you can beat him. You know our address.

**STOP THAT LEAK  
COAL COSTS MONEY**

Wireless from Elkins states Dispatcher C. H. Carpenter was evidently around Gassaway all the time, and never left the city limits, checking up to see if he could find enough LOADS to run an EXTRA.

Dispatcher C. L. West, Gassaway, has resigned from the service to enter the ministry. We understand his charge will be at Clendennin. Mr. West will leave many friends on the Baltimore and Ohio who will watch his career with much interest, and wish him every possible success.

**STOP THAT LEAK.** \$1.00 per day for every foreign car delayed means lots of money in a year.

Assistant Division Engineer W. E. Kearfott has been transferred to Baltimore, effective January 10. "Bill" liked Weston so well that he decided to take a souvenir with him of a permanent character. On the evening before leaving he was married to Miss Bernice Borneman, of the General Foreman's office. "Bill" had many friends in Weston who were mighty sorry to see him go, and they got together and presented him with a fine set of table silver as a mark of esteem. Our hearty congratulations go to both of them!

Miss Mary Eugenia has arrived to bless the home of Cash McOsker and his wife. Mr. McOsker and his wife formerly lived in Seymour. Our hearty congratulations to them! (Seymour Ind., papers please copy.) Cash is a backward, bashful boy, and maybe he hasn't told his friends out west of his good luck.

Miss Fleda Flagans and Miss Gladys Tivey, Superintendent's Office, spent New Year's Day in Philadelphia. Local address, Adelpia Hotel, Fairmount Park, William Penn Building, Camden Ferry and many other places too numerous to mention. Thereby hangs a story. Our division detective is on the trail. Maybe he will report for the next issue.

Some one in the Superintendent's office says:

"When I am old and very tall, I hope my name will be Mrs.——." We will spare her blushes.

**STOP THAT LEAK!** To burn an electric light for an hour when it's not needed costs ONE CENT only. But, if you do it a hundred times a year, what does it cost? One envelope doesn't cost much if you waste it, nor does a sheet of paper. BUT if we each save ONE, what does it amount to on the system in a year?

**SAVE A CLAIM A DAY, SAVE A DOLLAR PER DIEM PER DAY. YOU CAN DO IT.**

Attention of every one is called to the Superintendent's bulletin "Weekly Word with Workers No. 1." It is hoped every one will study it, and send his suggestions along. DON'T overlook the Editor's appeal to every one on page 6 of the December MAGAZINE.

At Pickens, West Virginia, on the Charleston Division, there lives a gentleman of some 80 years of age who at the age of 16 started railroading in Cleveland. He tells us that in 1860 it became a law to have a fireman on switch engines, and that he then went firing. It would seem strange to many of our boys today to know that up to 1860 all engineers did their own firing.

**HIGH GRADE KNIFE \$1.00 EASY MONEY \$75 to \$200 Monthly**  
 All or Spare Time  
 DISTRICT SALESMEN wanted to introduce novelty knives and razors. One side shows owner's name and address; the other any design selected, emblems used by Societies, Fraternal, Labor, and Railroad orders, etc. Blades finest steel, handles clear as glass and unbreakable. Every knife guaranteed. Permanent employment, and exclusive territory to those willing to give most of their time. If you are earning less than \$1200 yearly let us show you how to make more. These knives make fine Birthday and Holiday PRESENTS.  
**NOVELTY CUTLERY CO.**  
 335 Bar St., Canton, Ohio

In 1861, when the Civil war broke out Mr. Lewis Fahrion, who is the gentleman we refer to, enlisted in the Ohio Light Artillery and remained in the Government service until 1865. While in the army he became acquainted with that part of our system between Wheeling and Grafton, and tells us that in those days we had nothing but hook motion, camel back, wood burners.

In July 1872, Mr. Fahrion pulled the first passenger run over the new line between Dayton and Cincinnati, and quotes an order given him to "Come to a full stop at all cuts" to make examination as to whether or not the cuts were sufficiently wide for the passage of the coaches. At one cut twenty-two miles east of Cincinnati he had to stop several hours until the cut was widened sufficiently to permit his coaches to pass.

While Mr. Fahrion's railroading was practically all for the Big Four, his story is of interest. He recalls through the recent mention of Engineer Roder in our MAGAZINE, a peculiar accident which happened to this man. On the date in question Roder was pulling an accommodation and was given an order to pick up an electrician and back his train out to Brighton station, then head in, in order to test a new electric brake. His first stop heading in was to be at the C. H. & D. crossing. However, some one had left a switch open about 500 yards east and Roder ran into it, turning his engine and entire train completely over, plunging down the embankment into Mill Creek. The peculiar part of the accident was that no one was even injured.

Mr. Fahrion is a member of the G. A. R., and is still able to visit the encampments each year.

Your correspondent, in concluding, asks his readers once more to help him with photos and notes of interest. The Charleston Division is and always has been lacking in photos of people and places of interest on the Division, and in most cases it has only been after much coaxing that he has secured wished for photos. COME ACROSS!

We want to show these other fellows that we have just as good a looking set of boys and girls as there are anywhere on the System.

In last month's MAGAZINE we showed the pictures of the four children of Section Foreman S. M. Cochran. They are: Glen, age 13; Wilford, age 10; Harold, age 5; Virginia, age 3. Their father says:

"These children have been raised on Baltimore and Ohio money and they are all well and hearty."

He has worked for the Baltimore and Ohio for twenty-one years as trackman. In 1913 he was promoted to section foreman on Section 78. He likes our Railroad and says it has always treated him fairly. He expects to continue in the service and to take good care of his big family.

Mr. Cochran's was one of the prize winning sections in 1917. He likes to keep his section nice and clean.

**Wheeling Division**

Correspondent, MARIE SLATTERICK

Wheeling Division employes certainly were pleased and proud to have with us on the night of our Sixth Annual Ball on December 28, our Chief, President Willard, especially since it is known that Mr. Willard cannot spare much time from his busy life to attend a divisional affair of this kind. The Wheeling Division seemed to be especially favored on this occasion, for along with Mr. Willard came Ex-Governor J. J. Cornwell, now our general counsel, General Manager Scheer, W. W. Wood, chief of Welfare, and a number of other officers and prominent Baltimore and Ohio men. What a great honor this was can hardly be expressed in mere words, but it might suffice to say that all the Baltimore and Ohio employes who attended the ball realized the greatness of the occasion and appreciate Mr. Willard's presence and his speech, which, alas! was only too short.

**ENGINE 4840 AND HER CREW**

## STOP THAT LEAK!

Santa Claus certainly was good to everybody at Wheeling this year. Among the more fortunate ones were Misses Helen Thomas and Olive Eskey. Both displayed sparklers on the finger after Christmas. We know it's serious in the case of Helen, but Olive says it doesn't mean a thing to her! What system do you use, Olive? Ja-let??? (Gillette). We all hastened to congratulate Helen. She's a mighty nice girl and A. J. Sonnefeld is a lucky man.

We regret that Miss Mary Marker, stenographer, General Superintendent's Office, is leaving us to enter training school at the Mercy Hospital, Baltimore. If Mary makes as good a nurse as she is a stenog we just know there'll be lots of patients who "won't want to get well."

N. K. Harrison, Division Accountant's Office, is with us no more. He is now yard clerk at Parkersburg. We hated to see him go, for didn't he own an Overland? E. N. Skaggs, of Parkersburg, is taking his place.

"Bill" Dye, our popular ticket agent, Wheeling, joined the ranks when he took unto himself a wife last month. Congratulations, "Bill." There'll be lots of gnashing of teeth among the rest of your fair admirers when they learn of this.

Herbert Barkhurst, stenographer, Office of Master Mechanic, has resigned. Mr. Barkhurst's position has been filled by Miss Hilda Knope of Bellaire, Ohio. We welcome Miss Knope and hope that her stay with us will be a long and happy one.

Machine Shop Foreman R. P. Nolan recently underwent an operation at the Glendale Hospital. We are glad to say that he is getting along nicely.

The girls of the Wheeling Division, especially those at Benwood, need not worry about Runsoff Vaseline (Rudolph

Valentino) not paying them a visit. All that is necessary for them to do is to pay a visit to the Master Mechanic's Office. We shan't mention any names.

What came as a great surprise to his many friends was the announcement in a Wheeling paper of the coming marriage of R. H. Thonen, popular roundhouse clerk, and Miss Helen Nolte, of Wheeling. Mr. Thonen has the best wishes of all his friends of the Wheeling Division. My, but we'll miss the rides in that "Flivver!"

Engineer W. G. Henderson and Fireman F. Wilson recently took a trip into the wilds of West Virginia. 'Tis said that the state game warden has ordered the places they visited restocked with game.

Material Man and Fire Chief C. B. Dailey was recently elected president of the Board of Education, Union District. We do not believe the voters of Union District could have selected a better man.

Gang Foreman W. Copenhagen recently returned from a trip to his home in Winchester, Va. "Cope" reports a fine time. Although we have waited patiently, as yet we have seen none of the apples for which Winchester and surrounding country are noted.

We are sorry the Baltimore and Ohio does not have a basketball team in the Industrial League in Wheeling as we have some fine material—H. G. Schafer, former Union High star, and William Haythorn, formerly crack guard on the old White Elephant team. Both of these young men are working in the Master Mechanic's Office and are now playing with the American Legion team of McMechen, which is considered the best in the Ohio Valley. We also have several young men in the shops who are former high school and college stars. Why not get busy, Boys!

What will a system wide support of the "Stop That Leak!" drive mean?

It will mean greater net revenues for the Company, giving it better credit in the money market and hence more opportunity to enlarge facilities and increase equipment for larger business.

For instance, if we had more cars now

we could handle more of the business that is offered—with more jobs and more money for our employes.

It is as true as the gospel that the prosperity of the Company means the prosperity of its people.

If you want to help pass prosperity around, save yourself, and if you know of better methods or ways in which economies can be effected, advise

Stop That Leak,  
Mt. Royal Station,  
Baltimore, Md.

We extend the glad hand to a newcomer in our midst—Jesse Cunningham, extra operator, "FY" Telegraph Office. Jesse comes from the Sunny South. He is nice!

We extend our sincere sympathy to Track Foreman C. J. Booth on the recent death of his wife.

We're sorry to hear of the illness of Mrs. S. S. Johnson, wife of our track supervisor, Parkersburg. We hope for a speedy recovery.

Miss Hilda Boring, stenographer, Car Distributor's Office, who had to have her throat lanced on account of a cold, is back at her desk again and getting along nicely.

Some people certainly do know a lot! We asked Roy F. Arnold, of the Division Accountant's Office, the name of a certain young lady with whom he was dancing at our Annual Ball. He replied he wasn't sure about her name just now, but he knew what it was going to be shortly!

He's back with us again after six weeks absence!! Who? Supervisor "Jake" Wintermoyer, of course! He spent his six weeks at the Burleson Sanitarium at Grand Rapids, Mich. We certainly did miss him and there's lots of truth in the old adage "absence makes the heart grow fonder."

Chainman John Wise, Engineering Corps, happened to have a bad cold. S'pose that's the reason he asked us if we had any bootleggin' friends. Don't judge others by yourself, John.

### Parkersburg

Correspondent, CHARLOTTE MARLOWE  
New Year Resolution

Billy Duff—To quit making a noise like a steam engine when he blows his nose.

Fred Christmeyer—To hit the hay by 12.30 each night.

Virginia Tredway—To quit cussin'!

E. W. Miller—To stop listening in on private conversations.

J. K. Cromley—Didn't make any resolutions; he can't possibly improve in his present habits.

Parkersburg was well represented at the Employes Ball at Wheeling on December 28. Among those who attended from here were: Mr. and Mrs. A. B. Custer, Mr. and Mrs. W. B. McCoy, Mr. and Mrs. E. N. Skraggs, Mrs. Louis Finch and family; Misses Madelon McCoy, Marie Lavelle, Ethel Braden, Janice Thorn, Mildred Eakin; Messrs. J. W. Root, J. E. McGraw, Gardner Duncan, Thomas McGrail, Charles Roach, Robert Sykes, George Bird, James Duvall, Ralph Orra-hood, R. A. Wyatt, Earl Lyons and H. M. Ruth.

We noticed Janice and Gardner doing a great deal of yawning the next morning. Sleep is good for that, children.

With sorrow we record the shocking death of little Margaret Lillie Tennant, six year old daughter of Trucker O. A. Tennant, on November 10. The little girl died of burns sustained while at school. During recess, Margaret, with several of her small schoolmates, was standing in front of an open stove, when her clothing caught fire, and before help arrived she was fatally

Baltimore and Ohio Bridge across the Beautiful Ohio at Parkersburg  
Photo by Fireman James W. Wood

burned. Her death occurred at St. Josephs Hospital a few hours later. Besides her parents she is survived by a twin brother and one sister.

Robert Foggin, Jr., infant son and only child of Baggage-master Foggin, Main Line Station, died on New Year's day at the home of his parents on St. Mary's Avenue after a short illness with pneumonia. We extend our sympathy to the stricken parents.

When Virginia Tredway, waybill clerk, was philandering about with an embryo pill vender during the holidays, little did she think she was courting a nervous breakdown. But after being regaled for a week or more with wild tales of dead men's bones stowed away in vats, and presented with a wallet made of a black man's skin, who the P. V. explained with gusto, had been hanged, Virginia broke down under the strain, sent this party back to Morgantown to finish his course, and called in her regular physician.

After several weeks she is again at her desk, still a little below par, but slowly coming back.

Let us hope this ghoulish person does not invade our peaceful hamlet again for many moons—at least not until Virginia's recovery is complete.

What do you think that Adjustment Clerk Belle Caldwell, Fourth Street Freight House, did? Well I'll tell you. She resigned, that's what she did, and left us in one short hour to do similar work with the South Penn Oil Company, this city. We miss her smile and chatter and we wish they hadn't got her. But since she elected to go, we wish her the best in the world.

The writer is kinda peeved because Belle had planned a wonderful trip with her next summer, to be made on passes furnished through the courtesy of the Baltimore and Ohio, but the South Penn beckoned with a few more yen and the contemplated trip has vanished into thin air. Farewell, fickle Belle!

Miss Mildred Carpenter, daughter of Agent F. A. Carpenter, journeyed to Pittsburgh on January 10, to visit friends and shop. While in the city she attended the Paderewski concert.

## Western Lines

### Cincinnati Terminals

Correspondent, JOSEPH BEEL

On December 29, the students from the Y. M. C. A. Law School, who were successful in the State Bar Examination, went to Columbus, Ohio, to be sworn in. Our A. R. A. bill clerk, C. D. Swepston, at Storrs, was fortunate enough to be among this bunch and accompanied them to Columbus. Because of his influence among his fellow students he was able to get them to go to Columbus via the Baltimore and Ohio, thus giving us the benefit of about twenty-five cash fares. Fine business!

We have just discovered why our general car foreman at Storrs has been putting away a few dollars in every bank in Cincinnati. They say that he drew them all out around Christmas time to purchase a fine Nash touring car.

Among our latest at Storrs to join the ranks of the benedicts is Car Inspector A. J. Grubbs. We were aware of the fact that he laid off a few days during the holidays, but it surely was a knock-out when he informed us of the occasion. He says the "All Lines" pass will have to be furnished

Margaret, deceased daughter of A. O. Tennant, Parkersburg, W. Va.

for two now instead of one. Thanks for the cigars, "Andy," and best wishes from us all!

On December 6, we received word that our old friend, Joseph Fuehner, at Storrs, was put on the pension list. Mr. Fuehner was injured while coming from church on December 25, 1921 and has not been able to work since then. Owing to old age and his feeble condition on account of his injury, he was placed on the pension list. Mr. Fuehner has been with us for about fifteen years, having entered the service on January 9, 1907. During his service in this department he won the friendship of all. While he has been away for some time, he will be greatly missed, especially by the office force.

#### A Good Order Car By G. B. S.

I inspected a box car,  
Attached a card red,  
Then to the railroad  
The good box car said,  
"I feel pretty empty,  
Please fill me up full,  
Start me in business,  
By giving a pull."  
So they loaded the car  
Right up to the door,  
Until they could not  
Put in any more;  
They then closed the doors  
And sealed them tight,  
Then started the car  
On his little hike.  
So the little car  
Had an awful race,  
For the engine ahead  
Set a dizzy pace.  
He was on the road  
Just thirty-six hours,  
And he was one,  
Among many cars,  
That got to New York,  
Feeling quite topsy,  
For he carried a load  
Of very fine "Matzy."  
"Three hundred in dollars  
Is what I have made,  
While around in the yards  
Bad orders have laid."  
Good box ears like this  
You will not find many,  
But a bad order car  
Can't earn a penny.

Experts have said that great improvements can be made in terminal operation, which makes it an especially good time for us, in view of the appeal in the December issue to "Stop That Leak," to keep our eyes open for possible economies.

#### Freight Traffic Department Southwest Region, Cincinnati

Correspondent, E. H. GARDNER

Assistant Correspondent, C. C. TROY

Every day, in every way, try to help  
**STOP THAT LEAK!**

Here's a "comp" for the Dining Department! A patron, who was travelling with his wife from St. Louis to Washington, was heard to remark that, because of the splendid service he was accorded and the excellent meals with which he was served while in the Baltimore and Ohio diner, he had changed his mind about returning from Washington to St. Louis via a competitive line.

There is no leak for the Dining Car Department to stop when it comes to service and meals!

Leo Toelke gave Milly H. a beautiful fifteen-dollar pearl necklace for Christmas. We don't know "Milly," but 'tis said she is only sixteen and doesn't show her age one bit!

Won't some kind Tariff Bureau philanthropist please purchase "Tommy" Carter and Walter Nehls each a box of straws so they can drink their buttermilk at noon without spilling it over their vests, trousers, etc., etc.? Maybe it would be a good idea for "Tommy" and "Walt" to solicit the inventor of the noiseless soup-spoon and the fork for eating imported cheese, to invent for them some sort of a device for drinking buttermilk. **STOP THAT LEAK!**

Effective December 15, M. D. "Oats" Barley was promoted from rate clerk in the Tariff Bureau to chief clerk, Local Office, Columbus, Ohio. "Oats" made a lot of friends during his short stay in Cincinnati, all of whom extend to him congratulations and best wishes for his future success.

Mr. Barley was succeeded by A. S. Hilgemeier, former rate clerk, Division Freight Office, Washington, Indiana.

W. E. Barber, stenographer, Tariff Bureau, resigned on January 1. Only two Barbers left there now—Les, assistant chief clerk, and John Edwards.

Chief Clerk Shumard hiked off to St. Louis during the holidays and spent the week as the guest of his daughter.

At last! After four baby boys had been born in the homes of various members of the General Freight Office during the past six or eight months, Papa Duncan came across with a girl. Attaboy, "Dunk!"

### Akron Division

Correspondent, J. A. JACKSON

Miss Pearl Thompson, for the past three years stenographer to the chief clerk, Superintendent's Office, has been promoted to secretary to the superintendent, succeeding George B. Barr, who resigned to take up farming on his farm in Maryland. Pearl is one of the popular girls on the Akron Division, and her efficient work and close attention to duty have earned for her the well deserved promotion. We join in congratulations and best wishes for success.

Division Accountant P. H. Groscup, Connellsville Division, was a welcome visitor at division headquarters recently. Come again, "Phil," we're always glad to welcome our old associates, and the latch string's always out.

A. P. Zeitler and Miss Julia Quinn are newcomers in the General Foreman's Office, New Castle, formerly having been employed in the Terminal Trainmaster's and Division Accountant's Offices.

Akron Division is represented in the class AA league in the Akron Recreation Commission Basket Ball League in which some of the best teams in the city are entered. The Baltimore and Ohio is the only railroad represented.

### Massillon, Ohio

Correspondent, W. E. BRUGH

#### Stop That Leak!

Charles D. Crawford has entered the service at Massillon as car inspector, vice

Bobby, six months old son of Conductor H. U. Brugh

#### OUT FOR A SPIN

Miss Irene Lattan, stenographer to the chief of police at Youngstown, ready for a morning ride on the captain's motor car

P. Krizan, assigned to car repairman on Rip Track. We wish you all kinds of luck and success, Mr. Crawford! Just remember that, "Safety First" is the Baltimore and Ohio motto.

Clerk to Train Master William E. Brugh, has returned to train service, and is now braking on Massillon-Holloway Local. Be careful, "Bill;" you know they do not pack pianos in cigar boxes.

Roundhouse Foreman F. R. Doyle, has moved his office into new quarters, which consist of an old passenger car, overhauled. Good enough, Doyle!

Some relatives of W. E. Brugh who live in Virginia, were planning to pay him a visit; they informed him that they were coming out on a foreign railroad. Mr. Brugh immediately got the typewriter busy, and gave them a route, in which the Baltimore and Ohio would be favored a little, which also shortened their route about 100 miles and made a saving for them of about \$4.00 in fare. Needless to say, a successful trip was made, on Nos. 15 and 6.

Round House Foreman F. R. Doyle was in need of an electric light, so he made a frame-up with an employe that when he went into "Tom" Morgan's office, all the lights should be turned out. Of course this was at night and when the lights went out, Mr. Doyle then gently removed one of Morgan's lights from the socket and after a little conversation regarding lights going out, he returns to his office. Then presto-change! The lights go on, and Morgan is shy one light.

The editor has asked all correspondents to help arouse interest in the Stop That Leak drive that President Willard placed before us in the December issue, and I know the spirit of our men so well and their regard for the Company, that I'm sure of a ready response.

Having been in train service and in an office, I know, on the one hand, the chances there are to waste train supplies, and, on the other, the efforts that are made by our supervising officers, to save them. Most of our train service men realize the truth of this statement. Now, fellows, let's make a real effort this year to do real teamwork, to take care of lanterns, flags, fuses, etc. Let us not use one of these less than is necessary to promote perfect safety, but let us not, again, use one more than is necessary. All together, now, Thank you!

### Newark Division

Newark, Ohio, Station

Correspondent, B. A. OATMAN

Stop that leak.  
 This should be your motto.  
 On your interest depends the success of this campaign.  
 Prevent loss wherever possible.

This is good practice.  
 How much can Newark Division save.  
 Avoid the use of new material wherever possible.  
 The scrap bin may contain the material you need.

Look through your locker.  
 Every employe must do his part.  
 Always report any suggestions to your foreman.  
 Keep everlastingly after it.

#### We Have Signed Up to Aid in This Campaign

Sherrard  
 Thomas  
 Ochse  
 Pierson

Tagg  
 Hughes  
 All shop foremen  
 Those we have missed

Locomotive firemen  
 Engineers  
 And guardian of stores  
 Kazmarek

Do an honest day's work!  
 Do not loaf on the job!  
 Do not waste material, it costs money!  
 Do you know that a saving in material means increased forces at work? It does!

You, no doubt, have read the December issue and have noted that the Baltimore and Ohio Railroad is now endeavoring in every way possible to stop the wastes in our operations. You are urged to take a prominent part in this campaign which will result in much good for yourself and the Newark Division of the Baltimore and Ohio.

We have here two photographs showing the old and the new buildings located at the N. & W. R. R. Crossing, East Columbus, Ohio, on the C. & N. Sub-Division of the

Beaniel Brill, retired track foreman and member of the Baltimore and Ohio Veterans' Association, died at the home of his son in Cambridge, Ohio, on January 2. His home was at Salesville, Ohio, where he had lived all his life. B. Brill, as he was known, entered the service of the Baltimore and Ohio on the Central Ohio Division on October 10, 1872, as trackman. He was promoted on October 25, 1887, to section foreman. This position he filled until September 1, 1920, when he was forced to retire because of poor health. In 1895 he was awarded a certificate of distinction and a cash prize of \$25.00 for having the best section west of the Ohio River. Mr. Brill was personally interested in the welfare of the Veterans' Association and was an earnest worker in this organization at all times. His friends were legion, and his presence will be greatly missed by those who knew him. He leaves to mourn their loss, four sons, two daughters and six grand children. The sympathy of the Baltimore and Ohio Veterans and Newark Division employes is extended to the survivors.

**Accounting Department**

Correspondent, R. T. GEORGE

Otto Reichert is thinking of trading in his goloshes for a pair of 1923 model radio boots.

Ira A. Richmer, C. T. Department, underwent a serious operation recently, which was successfully performed by Drs. Hatch and Evans of this city. We wish you a speedy recovery, "Andy," and hope to see you back at your desk in the near future.

Rodolf Hartman is up to his old tricks, having recently sent in his annual subscription for Whiz Bang.

The Baltimore and Ohio Bowling team of Wheeling ventured away from their usual abode and came to Newark to carry away with them laurels which they thought by rights belonged to them, but after the clouds were cleared away they were sur-

prised to find that the score stood: Newark 2478 pins, Wheeling 2083. Newark had just 395 pins to the good. We were not worried in the least and were confident that we would still retain the championship of the Western Lines teams of the Baltimore and Ohio. A good team will always be welcome in Newark at any time during the bowling season, so if you have a chance to visit Newark be sure and bring your best team with you as you will need it, sure.

**J.M. LYON & Co.** { Dept. } 2 Maiden Lane { 4012 } New York City

Our boys of the Yard Crew are a gallant bunch. On a cold morning when just outside of the city limits while running up the O. L. K. to West View, the engineer saw something white waving to him from the rail ahead. He immediately brought the engine to a stop and the conductor and brakeman went forward to investigate. They found a white duck frozen to the rail. It seems that old man ducks had been paddling around in the ditch along side of the track and when it started to cross the track it stepped upon the rail. The rail was cold and the duck's feet wet, so they froze to the rail. The crew removed the duck and proceeded on their way.

It has been rumored that Yard Clerk Charles Richardson has been stepping out quite a bit recently. He has been seen in the vicinity of South Fourth and other

"sea ports." We hear from good authority that he is contemplating taking on a life partner.

We are all wondering whether it was MICK's hunting trip or the attraction he has at Macksburg that caused him to load a 5,000 pound ensilage cutter, thinking that he was loading a four-wheeled baggage truck. What do you say, "MICK?"

Cashier Schantz reports a successful hunting trip as you will note from the accompanying photograph. Left to right: R. H. Schantz and his "buddie" C. L. Pfaff. Time exposure taken just before twilight.

Fellows, let's get together and Stop That Leak! President Willard has asked us to help him and I know we are going to do it.

Most of us have chances to save and we will in supplies, in time. Let's be sparing of everything but courtesy.

Do you know a better way to do any job on the railroad, or a new way to make a saving. Then write

Stop That Leak,

Mt. Royal Station,  
Baltimore, Md.,

and tell how. Your communication will be considered in confidence for the best interests of our great big family.

Columbus, Ohio

Correspondent, R. KENNETT

E. A. Dildine, BR Tower, was recently called to Indianapolis because of the death of relatives.

R. R. Page, former agent, Shawnee, has been appointed agent at Outville, Ohio.

We are glad to announce that Brakeman J. C. Tobin is slowly improving from injuries received some time ago. Brakeman and Mrs. Tobin were presented with a Christmas gift of \$105.00 by Mr. Tobin's fellow employes.

Joseph B. Rich, passenger brakeman, trains 31, 32, 37, 38, died on December 24, from a complication of diseases. "Ben," as he was familiarly known, had been in the service of the Baltimore and Ohio for the past thirty-six years, making daily trips between Columbus and Cincinnati. Our heartfelt sympathy is extended to the bereaved family.

Night Roundhouse Foreman Jenkins is back on the job after spending his vacation at Shawnee and McCuneville.

They tell us that there's a restaurant on North Fourth Street that serves two spoons with one bowl of soup. Comes in rather handy for Yard Clerk Mason and Operator Rankin.

Chief Yard Clerk Wurdack, third trick, came to work one day with a black eye. He says he got it trying to crank his machine. Maybe so. Anyway the lumber for his shanty was all free.

Car Inspector Charles Evans is much improved after being off duty for a few days because of that dreaded disease, sleeping sickness.

Car Foreman Avery has just returned from his vacation—he wouldn't tell us where he spent it, but we hear that he spent it playing Santa Claus at the Boston Store.

Yard Clerk McCormick was steeped in sunshiny smiles on Christmas morning. When asked for the reason, he replied that he was overjoyed that his canary had gotten a box of seeds for Christmas.

Night Yardmaster Smith was recently presented with a new lantern, a gift from Brakeman Elliot. The presentation speech was made by "Shorty" Griffin. Quite a crowd turned out to witness the ceremonies.

The following named new employes have been added to our list in the yard: Brake-men Herr, Harding, Norton, Marvin and Kinnies.

We sincerely regret to announce the death of Mrs. Catherine Woods, wife of Conductor Michael Woods, which occurred on January 6. Our sympathy is extended to the bereaved family.

STOP THAT LEAK! Help the Company save! What profits them profits us!

Local Freight Office, Columbus, Ohio

Correspondent, MISS EDITH ROACH

On the evening of December 16, the Baltimore and Ohio Girl's Sewing Club entertained their guests with a Christmas party at the home of Mrs. James Jones, 729 Oak Street. The house presented a beautiful picture with its decorations of Christmas colors and flowers.

It being the thirty-first wedding anniversary of Mr. and Mrs. Jones, the entertainment committee provided great amusement for the guests by giving a mock double ring, wedding ceremony. This ceremony was performed by F. H. Dike in his inimitable manner in negro dialect and bound the contracting parties to a life-long service with the Baltimore and Ohio Railroad Company. The obligations were gladly assented to by the bride and groom.

Fred Head acted as groom, Rufus Kenny as best man. The bride was attended by Mrs. Aborgast as bridesmaid, Marie Brink, maid of honor, Harriet Knapp, flower girl and little Jeans Knapp, ring bearer. The rings were two doughnuts carried on a tray. The bride was dressed in colors in keeping with the season and carried, in lieu of flowers a rolling pin decorated with red ribbons.

After the wedding a delicious dinner was served by the ladies to fifty-eight guests. Then followed the appearance of Santa Claus in regulation North Pole garb, who distributed gifts to each one present.

The rest of the evening was spent in games and contests which brought forth peals of laughter and made the old home ring merry.

The guests are already inquiring when the ladies expect to have another party.

The girls of the local freight office held their Christmas Luncheon at the office on Thursday, December 21. After lunch presents were exchanged.

Six of the girls enjoyed getting the dinner and spending the evening with Edith Roach on December 27.

We welcome M. D. Barley as chief clerk, vice J. V. Price, who is now with the Ralston Steel Car Co. Mr. Barley was formerly assistant rate clerk in this office, receiving a promotion to the Freight Tariff Bureau at Cincinnati last July.

Mrs. L. E. Miller was called to Zanesville on December 29 because of the death and burial of her aunt.

Mr. and Mrs. E. J. Funke and Mr. and Mrs. Fred Head spent New Year's in McConnellsville, Ohio. Mr. and Mrs. F. H. Dike spent New Year's with relatives in Indianapolis. Mr. and Mrs. J. T. Payne visited their son and family at Ft. Wayne during the holidays. Mrs. A. E. Andrus, wife of our assistant cashier, visited her brothers in Cincinnati and Dayton recently. Mr. and Mrs. L. E. Miller had as their guest during the holidays their son Elvin, who is attending Tri-State Engineering College, at Angola, Ind.

Two of our girls received diamonds for Christmas. Which will leave us first, Hazel or Bess?

Help save! Help Stop That Leak! What helps the Company helps us. Do you know a better way of doing this than by cutting out all waste? Let's do it!

## Chicago Terminal

Correspondent, J. L. NICHOLS

Since April, 1895, Henry Gebel, janitor in charge of the upkeep of the Grand Central Passenger Station waiting room, has pushed a brush over the floor of that room. In doing so, we estimate that he has traveled a distance equal to three round trips between Chicago and San Francisco *without fin ling a penny*.

On Christmas Day, 1922, he was retired, and joined the ranks of honored pensioners, at the age of seventy-two years. He was presented with a suitable gift and a well-filled purse, by F. W. McClement, superintendent of the Building, on behalf of the many friends who will miss Henry, and who daily greeted him with "Hello Henry," as they passed to and fro.

Storekeeper Virgil Dawson and his brother "Brad" spent the holidays with relatives in West Virginia.

Assistant Chief Clerk "Bill" Kennedy, Lincoln Street, spent a Merry Christmas at his home in Garrett.

The lady clerks at Lincoln Street wish to have it known that they have an up-and-coming bowling team. They meet on Thursday evening of each week. Some remarkable scores are made. The beautiful feature is the good social time enjoyed at such get-togethers, as well as the healthful recreation involved.

The many friends of Charles L. Hegley will be pained to learn of the death of Mrs. Hegley. Mr. Hegley has the sincere sympathy of his large acquaintanceship on the Terminal.

Much water has gone over the dam since the present distinguished associate justice of the Supreme Court, Louis N. Brandeis, said some years ago that the railroads of the United States wasted a million a day. Remarkable have been the improvements, telling the increased efficiency, all of which shows up with amazing clearness in the basic figures denoting the progress of the railroads. But—we all know that further progress can be made and I am sure that we are all anxious to help President Willard in the "Stop That Leak" drive that he started in our December issue.

Has any officer or employe of the Terminal sent in his suggestion as to how we can further economize? Let us be up and doing! Let us make our section of the Road noted for its forwardness in thinking and acting. If you know of a leak, please play the game and tell

Stop that Leak,

Mt. Royal Station  
Baltimore, Md.,

about it right away. There it will be acknowledged promptly, and considered carefully and in confidence by expert railroad men who are in great earnest to make this drive resultful for the Road.

## South Chicago

Correspondent, ESTHER SPRENBURG

Let the Wedding Bells Ring Out! They are working overtime at South Chicago. Listen!

Foreman "Jack" Pubins, Car Department, and Ethel Fraley were united in marriage on January 3. The happy couple have our sincere good wishes. Mr. and Mrs. Pubins left shortly after the ceremony for New Orleans, La.

Frank Ullruch, our genial ticket agent, 95th Street, surprised the writer when the information was given out of his marriage to Miss Elizabeth Bule. This happy event occurred on December 27. Congratulations!

Adolph Wegryz, clerk in Mr. Quigley's office, has also taken the final step. In our last issue we "heard" about the diamond. Now it is the wedding, but Adolph won't tell us a word. However we have found that the big day was on January 10, and we now offer our sincere good wishes. Congratulations, Adolph! May you be very happy!

We are pleased to find Miss Anne Dubsky back at her desk once again, after an illness of several weeks.

Mr. Quigley, our genial general foreman, why so downhearted? Oh yes, we know now. Mrs. Quigley is sojourning in Tennessee during the winter months. Cheer up, spring will soon be here.

**STOP THAT LEAK!**

**Chicago Division**

Correspondent, F. N. SCHULTZ

Willard, Ohio

Correspondent, CARL C. CLUGGISH

A strange whistle has been heard for some time past coming from the direction of the roundhouse. Knowing that the whistle was not like any on the engines around Willard, the curiosity of the correspondent was raised to such a pitch that it became necessary to find out just what this whistle was. Upon investigation it developed that the general foreman has installed an automatic trip whistle at the entrance of the Chicago Division ready track to the roundhouse. This is rather a close place and as soon as the engine strikes the trip, the whistle blows, warning people walking of an engine coming from the other direction.

Assistant Road Foreman of Engines W. G. Smith has been temporarily stationed at Willard to assist in handling the engine crews there.

W. G. Trimner, former chief clerk to car foreman at Willard, has returned to the service of the Baltimore and Ohio as night record clerk, Central Yard Office.

Little son of Elevator Operator Sam Frerri, Chicago Terminal

William Kautz, messenger at Willard, has been investing quite a large amount of money lately in roses. We have been unable to get the meaning of it all, and will appreciate it if Bill will explain which he likes better, roses or dates.

We can rest in peace now that nearly all of North Carolina has moved to Willard. However, we are well satisfied with them as they make good brakemen and firemen.

**Ohio Division**

Correspondent, A. E. ERICH

"STOP THAT LEAK" economy drive is on. Have you economized in your supplies, etc? What have YOU done in "Stopping a Leak?" We need YOUR help!

Conductor "Tom" Murphy and Brakeman Cox are wearing broad smiles these days. Why? They are back on their home runs, Nos. 47 and 48, which were discontinued for some time.

Mrs. Edward Barrett, third trick operator, Leesburg, is off on a lengthy vacation and is being relieved by her husband.

Miss Josie Glating has almost left the line of operators, having opened up the "Williams Hotel" at Chillicothe, where she and her aged mother now reside. Success "Jo!"

We are sorry to announce the death of Brakeman "Ben" Rich, formerly on Nos. 31 and 38, between Columbus and Cincinnati, who died of heart trouble on December 24.

Brakeman J. H. Pinkerton announces the arrival of an eight pound girl at his home on December 18.

Operators Clare Merriell, Hamden, Charles Toops, Wilmington, and W. G. Brill, Stewart, all lost their fathers during the month of December. The sorrowing relatives have our deepest sympathy in this their sad bereavement.

Train Baggage man John Blackburn "put one over on us" by taking unto himself a wife. Congratulations!

We also congratulate Brakeman H. G. Hodle, who was recently married.

For some time it has been felt that an additional caller should be added to the present force at Chillicothe. At last this has been done. A nine and one-half pound boy was left at the home of Caller and Mrs.

Frank Routt on December 6. The new addition has been named Warren. Congratulations!

J. N. Gunning, machinist, all smiles over the arrival of a daughter, born on November 27.

Engineer McSenn has signed a life contract, joining the ranks of the benedicts. Congratulations!

F. W. Reynolds has been promoted from storekeeper at Chillicothe to a similar position at Garrett, Ind. E. B. Isenogle, Dayton, has been appointed to position made vacant by Mr. Reynolds. We wish both success.

**"I Knew You'd Make Good"**

"I ALWAYS felt you had it in you to get ahead. But for a time I was afraid your natural ability would be wasted because you had never trained yourself to do any one thing well.

"But the minute you decided to study in your spare time I knew you'd make good. You seemed more ambitious—more cheerful—more confident of the future. I knew your employers couldn't help but notice the difference in your work.

"Think what this last promotion means! More money—more comforts—more of everything worth while. Tom, those hours you spent on that I. C. S. course were the best investment you ever made."

HOW about you? Are you always going to work for a small salary? Are you going to waste your natural ability all your life? Or are you going to get ahead in a big way? It all depends on what you do with your spare time.

Opportunity knocks—this time in the form of that familiar I. C. S. coupon. It may seem like a little thing, but it has been the means of bringing better jobs and bigger salaries to thousands of men.

Mark and mail it today and without cost or obligation, learn what the I. C. S. can do for you.

A BUSY DAY IN THE TICKET OFFICE Eugene Sickles, 16 years old, has drawn this clever cartoon of his brother, who is ticket seller in Union Station, Chillicothe

Born to Brakeman and Mrs. Stanley Edwards on December 18, a seven-pound boy, who has been given the name of Harold LeRoy.

Our sympathies are extended to Homer Riley, hostler, in the loss of his son, Homer, Jr., who died of scarlet fever on December 12.

The following appeared in one of the Chillicothe local papers regarding the birth of a daughter to Engineer "Red" Landrum: "Born—a daughter. Mr. and Mrs. Charles Landrum, Jefferson Avenue, announce the birth of a daughter, Mary Jane, on December 15. Immediately following this in large black letters, "Advertising Pays." "Red" is all smiles over this young arrival, and seems to be convinced that "advertising" does pay.

It is with regret that we learned of the death of L. E. Miller, operator at Washington C. H., on December 28. He had a large number of friends who extend their heartfelt sympathy to his widow.

#### Questions and Answers

Q—When desiring to get off train No. 47 at Midland City after spending New Years at Chillicothe, how will I know when we reach this station.—F. H. Donnell, conductor.

A—Am sure conductor of No. 47 would be glad to personally inform you when reaching this station, if you will make request of him. If he should fail to do this, and you are carried to Blanchester, and do not care to walk back, perhaps "Butch" Bailey would let you ride back with him, in his meat truck.

W. S. Barnhart started the New Year with a smile. A boy has arrived at his home.

Brakeman Earl Smith requested leave of absence in December, stating he was sick. We are informed that it must have been "love sickness," as he is now a married man. Congratulations!

Harry Jones, clerk in Division Accountant's Office, is looking rather spry since he is the father of a fine eight pound girl,

Betty Jane, left at his home on January 2. Mrs. Jones was formerly Miss Wilda Graves, clerk in our Freight Office. Congratulations and our best wishes for the future health and happiness of the little miss!

We are glad to announce that Miss Bernice Gickler, stenographer in Freight Office, has resumed work after an operation for appendicitis. Although Bernice lost her appendix while absent from her duties, she gained a diamond ring, which she is wearing on the left hand. Congratulations!

Two more diamonds have made their appearance in the Freight Office, one on the hand of Miss Bertha Graves and the other on Miss Katherine Moore's hand. Felicitations!

Miss Margaret Doster, stenographer, Division Freight Agent's Office, has just returned after being absent from duty for some time because of injuries received in an automobile accident. We are glad to see her back again.

ONLY THROUGH COOPERATION UPON THE PART OF ALL WHO ARE IN ANY WAY CONCERNED WITH LOCOMOTIVE FUEL CAN THE HIGHEST DEGREE OF ECONOMY BE ATTAINED. PLEASE COOPERATE, AND "STOP THAT LEAK!"

#### St. Louis Division

Correspondent, H. L. SMITH.

Sincere sympathy has been extended to Frank Zwinak, formerly employed in the division offices at Flora, on the death of his wife on November 23. Mrs. Zwinak was the daughter of deceased Switchman Robert Hubbell of the Flora Yard.

On December 5, James M. Sheer, familiarly known to thousands of East St. Louisans as "Pop" Sheer, died in the Deaconess' Hospital where he had been undergoing treatment for an asthmatic condition. "Pop" Sheer was born in Michigan in 1840 and came to East St. Louis in 1874 as superintendent of rolling stock of the

THE LATE JAMES M. SHEER

The picture was drawn by Mr. Sheer himself in December

old O. & M., now the Baltimore and Ohio, and remained in service continuously until his retirement. He took an active interest in public affairs and was an alderman in the old city council for sixteen years. He was also a member of the board of directors of the public library for many years. His fraternal affiliations were with the Masons and the Elks and he was the oldest member of the East St. Louis Lodge of Elks in point of years and the Elks Club saw him frequently; he seldom missed any of the social events and was fond of his game of billiards. Funeral services were held under the auspices of the East St. Louis Elks.

Stop That Leak! Save rubber bands. They are high. If you don't believe it, buy a box.

Operator Harry Hoopengartner has installed a radio at his father's house at Rivervale. As this is right on top of the Rivervale hill he should be able to get all the news that is moving.

Do you remember the story of the little boy of Holland who, by keeping his hand in a break in the dike kept out the waters of the sea. He stopped a leak!

First Trick Operator Gallagher, Mitchell, is taking a two months' vacation in Cuba and through the south. It is expected he will have all the dope on Spark Plug when he returns.

The many friends of W. L. Pope were filled with sorrow upon learning of his death on November 25. Employed as switchman in the Flora Yard, he was familiarly known as "Fat" to railroad men and fellow citizens and was the only son of Jerry Pope, passenger engineer on the Springfield Division. Death was caused by blood poisoning which developed from a slight wound, and a later development of pneumonia. Mr. Pope was a member of the Knights of Pythias and of the B. of R. T. and had a wide acquaintance. Interment was made at Flora, the Knights of Pythias and members of B. of R. T. lodge marching in a body and performing the last rites at the grave.

While Chief Caller F. H. Wright of Flora is at present unable to plug any leaks, because of illness, he was recently instrumental in obtaining some revenue for the Company by inducing a friend and his wife to travel over the Baltimore and Ohio from New York to Flora. When one of his acquaintances went back to Ireland to claim a bride, he inquired as to their return route and learned they were coming back from

Chief Caller F. H. Wright and his little daughter, Martha Filonne, age 18 months

New York via a competing line. He then pointed out the advantages of a trip over the Baltimore and Ohio and upon their return they expressed their pleasure over the service afforded. Needless to say, Frank, who is fifty years old and who has been in the service for seventeen years, is always boosting.

Material means money. Save it!

Operator H. H. Bonney, who recently bid in the agency at Springer, has joined the ranks of the benedicts. Congratulations!

Pensioned Operator J. M. Mack, Evanston, Ill., paid the division offices at Washington a visit recently, and was shaking hands with old time acquaintances. Mr. Mack was formerly chief dispatcher.

### Toledo Division

East Dayton, Ohio

Correspondent, EDWARD M. MANNIX

Only thirty more days until Spring; then the bluebirds will begin to appear and dull, dreary winter will be a memory. Let us hope that it will bring with it rays of sunshine and further instil in us that beautiful spirit which was so abundant during the holidays, in the Baltimore and Ohio Family.

A welcome addition to our City of Dayton is that of J. W. Bellmyer and his aunt, Mary Bellmyer Hannon. "Jack," as we call him, made his home with his aunt for a number of years. They recently moved from Newark, Ohio, and have taken up quarters in the beautiful Laymon Apartments. May their stay with us be long and pleasant. We bid them welcome.

The stork arrived a few days before Christmas and left at the home of Engine Inspector J. P. Leahey a great big boy. Of course, the cigars were abundant, as "Jack" says, "There's not another like him—a howling success."

Machinist Charles Lough, second shift, was recently called to Baltimore, where his father underwent an operation at the Johns Hopkins Hospital. The operation was successful and from late reports his father is convalescing nicely. Mr. Lough is a veteran and honored employe of the Baltimore and Ohio. His home is at Benwood, West Va.

The condolence of the shop was extended to Mr. and Mrs. Walter Wentworth in the loss of their little son, which occurred on December 12. Little "Snookie," as we called him, will be sadly missed by his playmates, for the little flower that was left to bloom for a while has been transplanted to the Garden of Eternal Happiness.

### The Clock of Life

The Clock of Life is wound but once,  
And no man has the power  
To tell just when the hands will stop,  
At late or early hour.  
Now is the only time you own,  
Live, love, toil—with a will,  
Place no faith in tomorrow for  
The clock may then be still.

—Exchange

At East Dayton, right here where so many of us are employed in shop, yard, maintenance and train service for the Best and Only, right here is a wonderful place for some great work to be done in the "Stop That Leak" drive.

We know that we have efficient workers here, and good facilities, but sorry the man or the place who thinks that he is so good or that his place is so good that it can't be improved.

Who will be the first to help? President Willard has invited suggestions as to how we can save money for the Road. If you have an idea, please pass it along as requested to:

Stop That Leak,  
Mt. Royal Station,  
Baltimore, Md.,

where it will be courteously acknowledged, considered in confidence and handled by men competent to decide on its merits.

Who will be the first? Let East Dayton lead the way!

### Division Accounting Office, Dayton, O.

Correspondent, G. M. McBRIDE

"Whoso keepeth the fig tree shall eat the fruit thereof."

### You Ought To

If you have not "Stopped That Leak"—UO2

If you have not yet become a member of the Relief Department—UO2.

If you do not love your work—UO2.

If you do not arrive at the office on time—UO2.

If you do not love your wife—UO2

If the janitor does not open up the windows and give us fresh air—UO2.

If you do not give 100 per cent. of eight hours labor to the Company—UO2.

If you are not saving any of your income for a rainy day—UO2.

If you are not effecting a saving, as far as possible, of material—UO2.

If you do not use daylight instead of electricity—UO2.

The accompanying picture is that of E. O. Vermillion and family. This is one of our best disciplined families. This probably is because "Ed" is an ex-school teacher.

On December 30, the wedding of Clarence Kesling, tonnage clerk and son of Baggage-master Edmond Kesling, and Miss Myrtle Grawal was solemnized. The bride is a graduate nurse of Miami Valley Hospital.

### DAYTON CELEBRITIES

# FREE! Hearth Rug

## FREE

WITH 9x12 FT. Seamless Brussels Rug

## 30 DAYS' FREE TRIAL

No description by word or picture can do justice to this fine rug. You must see it, you must handle it, you must have it on your own floor to fully realize its beauty, its charm, its quality. I want this rug to be its own salesman. I want to send it to you on 30 Days' Free Trial to use as your own at My Risk. If your satisfaction is not complete—or if for any reason in the world you wish to do so—you may return the rug after a whole month's use. The trial will not cost you a penny. I will refund your first payment and all freight charges without quibble, question, delay or formality. Sign the coupon, send it and \$1. The rug will soon be on its way to you.

**WITH ORDER**

**Special 30th Anniversary**  
**SALE PRICE Only \$28.95**  
 Easy Monthly Payments

The former price of this Fine Rug was \$42.95—and without the Free Hearth Rug of course. Now that I have slashed \$14.00 from the price and am including the Free Hearth Rug besides, this offer is a Tremendous Bargain. **Size:** Full Room Size 9 x 12 ft. **Material and Quality:** Brussels of extra good grade. Genuine, high-quality wool worsted (see, with heavy back. The worsted yarns are carefully selected. Made entirely in one piece and without a single seam. A rich-looking rug that will give many years of satisfactory service. **Design:** A floral pattern with a touch of the oriental, dainty, yet distinctive. The handsome center medallion is made more beautiful by the exquisite pastel effects of varying shades. Then there are the lavishly beautiful scrolls and floral field. Colors: Blue and Tan predominate. The strikingly individual medallion is in four shades of handsome steel, brown, rose and old gold. The main ground is a beautiful blending of soft rich tans and ivory in a noiré effect. The outer scrolls and large clusters of roses are in natural colors and gold. The semi-oriental border is in blue and tan. These colors are guaranteed to be absolutely fast and will not run or fade. This is a rug for any room in the house. It will harmonize with any kind of furniture. Former price, \$42.95. Fill out and send the coupon today. Order No. PA5050. To me: \$1 with order, \$2 Monthly. Total Price \$28.95.

### FREE Hearth Rug A Prize to the Prompt

This 27x52 inch Tapestry Brussels Hearth Rug is of the same quality, the same materials and the same colorings as the 9 x 12 ft. room rug described on this page. It matches the big rug exactly. When used in the same room, the two will harmonize perfectly. This Free Hearth Rug is a Prize to the Prompt. To get it you must send in your order promptly. Both rugs will be sent together. Send in your order today.

Order No. PA5050. To me: \$1 with order, \$2 Monthly. Total Price \$28.95.

 HOME FURNISHES FOR THE PEOPLE OF AMERICA

## 30th Anniversary Sale

Thirty years ago in a little store here in Pittsburgh this business made its humble beginning. With small capital but great faith I staked my all on the downright honesty of the average man and woman, the people who deserved credit but found it hard to get. I was a pioneer in the "open account way" of home furnishing. My little one-floor business has since grown into a mammoth institution that performs a nation-wide service. To celebrate my thirtieth anniversary I am conducting a Big Sale that will last throughout the year.

**Big FREE Book** All my prices are down. I guarantee savings of 30 to 60% on everything for the home. Everything I sell is sent on 30 Days' Free Trial and Use in Your Own Home, and I give the Longest Time to Test. I repeat to you what I said to my first customer 30 years ago: "I Will Trust You Gladly." Send for my Big Free Catalog today. See the Thousands of Bargain Opportunities that await you.

## 30 to 50% Savings on

Furniture, Bedding, Springs, Mattresses, Bed Spreads, Rugs, Carpets, Linoleum, Lace Curtains, Perleres, Dishes, Baby Carriages, Glassware, Stoves, Ranges, Lamps, Enamel Cooking Sets, Aluminum Ware, Refrigerators, Washing Machines, Sewing Machines, Guns, Silverware, Clocks, Cameras, Victrolas, Luggage, etc.

**SPEAR & CO., Dept. B-1, Pittsburgh, Pa.**

Send me at once 9 x 12 ft. Rug and Free Hearth Rug as described above. Enclosed is \$1.00 first payment. I understand that if at the end of the 30 days (if I am satisfied), I will send you \$2.00 monthly. Order No. PA5050. Total price, \$28.95. Title remains with you until paid in full. Send me your big Free Catalog also. Please print or write name and address plainly.

They enjoyed a short wedding trip to Chicago. Of course, we were not supposed to know anything about it until the exhibit of cigars, cigarettes and candy several days later. Sam has a failin' for marryin' 'em off.

Do you know that we are so located between Toledo and Cincinnati as to make it the best coal route between those two points. Each year we haul enormous quantities of coal for lake shipment. In 1922 we loaded the last boat for the season on December 22. During the past year, despite unsettled conditions, we handled approximately 7,000 more cars of coal than we did in 1921. To be exact we dumped 59,648 cars of coal of various grades over the coal machine at Toledo. On May 4 we had the heaviest dumping of the season, 603 carloads. If this time had been uniformly divided, it would mean a car unloaded into a boat every 2.3 minutes—but of course, some time is lost getting boats into their proper loading position, etc. All told, last year's coal trade on the Toledo Division was the best we have had for years. Let's make the record for 1923 still better.

Mr. Fortman thinks Joe is the sweetest name on earth. Almost every person he hires has that name. The latest and best Joe (with apologies to Kienhoefer) is Joe McCarthy.

Rossford Yards, Toledo, Ohio, one of the busiest yards on the system, is going to be put in first class condition. Starting January 1, new rails, ties and other improvements were to be made. The work is in charge of a general foreman, extra gang timekeeper and a large extra gang of trackmen. It is expected that the work will be completed before navigation opens in the spring.

Deshler and Tontogany, important water station points, have been without water all fall. It has been necessary to haul water from Defiance and Toledo, Ohio to replenish the reservoirs, putting on a special train to perform this work. Due to the heavy snow and rain, water service was discontinued on January 1. It has been necessary to resort to this method of furnishing water every once in a while. Mr. Spencer thinks it is because the people voted dry up there.

Ever since New Year's Day Kienhoefer has been wondering whether he should have gone to Toledo or not.

### Other Departments

Isaac Clayton has been granted a leave of absence. During his absence G. J. Williams will act as division operator.

We hear that Claim Agent Morgan has a radio set in his kitchen at Cincinnati and claims that he can catch the entrancing waves of the ether from any part of the world. Did he "hock" his fur hat to finance the outfit?

Former employes of the old C. H. & D. will be glad to know that J. M. Woodward, former captain of police on that road, has been recently appointed chief of police for the city of Dayton.

Miss Humpert, sister of Marcellus, is now stenographer and switching clerk in the Agent's Office.

Occasionally Cupid leaves the Division Accounting Office and saunters forth through the freight house. Recently Leroy Rybolt, who has been a Baltimore and Ohio employe for several years, came to Dayton and became a member of the Engineers' Corps. He had hardly landed until he came face to face with Cupid, who suggested that he return to Newark and take unto himself a wife. Mr. Rybolt and Miss Ruth Frances Rickert were married on Christmas night at the Second Presbyterian Church, Newark, Ohio in the presence of members of the family and a few intimate friends. Mrs. Rybolt was formerly a teacher of commercial art in the high school at Columbus, Ohio.

### Lima, Ohio

Correspondent, O. L. WALLBURG

To my mind no one can do a better thing for himself and his dependents than to join the great army of workers of the Baltimore and Ohio. Since 1917 when the Baltimore and Ohio Railroad took over the C. H. & D. on which I was then employed, the impression has been constantly growing upon me (until now I firmly believe it) that there is not another railroad in the country whose management treats its employes in as good and just a manner as do the men at the head of the Baltimore and Ohio System. Other employes have the same feeling. They believe that between the management and themselves there is a very close bond of sympathy, consideration and good will on the one side and loyalty, cooperation and trustfulness on the other.

Every man from the lowest to the highest should be justly proud to be in the service of this great Company.

Charles W. Jennings, our efficient night yardmaster, has returned to his duties after an absence of several months because of illness. Welcome back! We are mighty glad to have you with us again, Charlie.

Miss Ice C. Herbst, employed in the Agent's Office, did an unusual thing for a young lady. She decided to get married, and the young man, having waited impatiently for this very important decision, lost no time in making her Mrs. Clyde V. Decker. He carried her away manfully to the Hoosier State, where they will live happily forever in Ft. Wayne.

Miss Catherine Fitzgerald, General Foreman's Office, is on a trip to Albuquerque, New Mexico, accompanying her sister who is there for her health. It is sincerely hoped that the trip will result in much benefit to her sister and that her recovery will be assured.

Miss Isabelle Goebel, Storekeeper's Office, decided that she also wanted to change her name to "Mrs. Philip Burke" and also to make a young man happy. All arrangements were made for the ceremony which took place December 26. They are now enjoying their honeymoon in Columbus, Ohio, their future home. Best wishes from Lima, "Izzy."

Harold Dillon was recently promoted to house foreman, Lima Freight House, Samuel Wanamaker going into another field of activity. Harold is making an earnest effort to keep up the standard trucker hour and to reduce the number of over, short and damaged freight. Keep up the good work, "Bill!"

John Cusick, Pearl Street Yard Office, is watching the L. E. W. and Penna. Transfers with an eagle eye. Between him and Jim Herbst at the Freight Office they don't allow any flat spots to get on the wheels. The diversion of freight from the Pennsylvania Company to the L. E. W. makes it a pretty stiff job, but John and Jim are equal to it and keep them moving. Fine work, boys!

Denny Morrissey, Erie Junction, promised the girls at the Agent's Office a ride in his Overland Sedan. You know Denny is running single—and so are the girls—and the possibilities are great. There is a rumor that Denny takes the tires off the Overland and equips it a la Ford with flanged wheels to cover his territory, he makes such good time. Denny, the girls are still waiting.

We are sorry to hear of "Jack" Harbolt being laid up. We hope to see him up and about very soon. The men of the repair track, storeroom track, engine yard and coal tipple miss "Jack" when he is away. His smiling face and careful ways are always welcome around the shop and as a Safety First apostle, "Jack" is there all the time.

Edna Black has resumed her duties at the Agent's Office after an absence of several months, which she spent in Tulsa, Oklahoma, visiting relatives. She reports having a good time, but is glad to get back in the Old Buckeye State and Lima.

Welcome to the Old Homestead, Edna!

The accompanying picture shows the Freight House employes. They are, left to right, upper row: O. L. Wallburg, chief clerk; A. W. Morton, waybill clerk; Thomas E. Davis, accountant. Front row: Ruth McIlvaine, assistant cashier; Beatrice J. Goebel, cashier; Marian Wallburg, record clerk; Ice C. Herbst, furloughed clerk; Edna Black, record clerk.

Get your name on our big list of satisfied customers and receive immediately our Big Money Saving Catalog of men's and boys' clothing—just off the press. Start right now to save money on quality wearing apparel.

## WE DON'T WANT YOU TO PAY CASH

We prefer to have you experience our monthly payment system. It enables the man with an average income to buy the better quality which he knows is real economy in the end. We have every clothing requirement for men and boys in an excellent quality and we want the privilege of sending our catalog to you free with the shoes. Six months to pay on every article we sell.

For 15 years we have conducted this business on a basis of quality first—last and always. We've convinced hundreds of thousands of men that they can save money dealing with us and have at the same time the convenience of our payment system which conforms to the average man's income and makes it easy for him to have the better quality for economy.

If we can make your friendship in this first sale of shoes we will have gained our object. We would like to have you judge us by the quality of our shoes.

Shoe  
5615

Extremely popular square French toe with the pinked vamp and tip and four rows of stitching that gives an extremely neat appearance. Comes in the dark mahogany shade or in the tony red shade. Has fine oak soles, Goodyear welt sewed. Goodyear "Wingfoot" rubber heels. Genuine leather trimmings and every detail of the finest shoe construction which comes in every pair of dress shoes that we sell. A style for dress and comfort that is bound to please you.

No. 5615—Sizes 6 to 11—Pair \$5.85. Six months to pay.

## GENUINE KANGAROO LEATHER

You've probably seen genuine kangaroo leather shoes shown in exclusive boot shops for \$12.00 to \$18.00 a pair but you probably have never seen them at this very low price in this finest of all quality upper leather. We were the first Mail Order house in the United States to sell them at popular prices.

The extremely fine grained kangaroo leather takes a polish like patent leather. Will not scuff or peel like kid but is even more soft and pliable than kid and is the most waterproofed leather there is and as tough as hickory.

Many men found it hard to believe that we were selling the genuine Australian kangaroo leather shoes at these prices. You know that we could not advertise them as kangaroo unless they were genuine. We've proved to every man's satisfaction and have sold many thousands of pairs. Some men bought two and three pair, being afraid that the price could not last for long. Let us send you a pair for your free examination. You don't buy till you've seen, examined and tried them on. If thoroughly pleased pay \$1.25 a month. Otherwise, merely return and we refund your dollar and return postage cost.

Banker last at the left.

Admiral last at the right.

**We Guarantee Fit**  
Send us your exact size if you know it. If not, send an outline of your stocking foot drawn on a piece of paper by tracing a pencil around the stocking foot. This assures you a perfect fit.

The solid comfort straight last at the right we consider the finest foot fitting last and neatest blucher style dress shoes ever produced. The Banker last to the left you'll say is rightly named for it is the famous straight last of the bankers and business men. Plain fine stitching with absolutely no perforation or fanciness. Dignified and extremely dressy looking. Finest single oak sole Goodyear welt sewed. Goodyear "Wingfoot" rubber heels. Genuine leather trimmings and the finest shoe construction throughout. We quote the same lasts in viel kid below for the men who have worn viel kid many years and perhaps will not wish to change.

# \$100 Brings 9<sup>FT</sup> x 12<sup>FT</sup> Congoleum Rug and 3 Small Rugs to Match—

All Four only  
**\$15<sup>95</sup>**  
 Less than the Price of One

The price of the famous Congoleum Gold Seal Art Rug is just as well known, absolutely as standard, as sugar, salt or flour used to be.

Go anywhere, look everywhere, in stores, catalogs, magazines and newspapers—and once more refresh your memory of the actual universal standard price of a full size Gold Seal Congoleum Art Rug.

Here we bring you not one rug alone, but four—and all four for less than the regular price of one. A full room size, 9 foot x 12 foot, Congoleum Rug and three small companion Congoleum Rugs to match, each small rug 18 x 36 inches.

And that's not all! No matter who you are, or where you live—regardless of your circumstances—we'll send all four rugs immediately, without waiting, red tape or bother, for just a dollar pinned to coupon.

**30 Days Free Trial.** We'll send all four rugs on trial for 30 days. We want you and urge you to put them down on the floor and use them for a whole month—free of expense and, without promise or obligation of any kind.

We absolutely guarantee that if you would rather return the rugs after making this kind of a trial, just say so and send them back. We will refund to you every solitary penny of transportation charges, both going and coming. We'll refund your dollar and we'll make this complete refund in cash without asking you for any sort of an explanation.

**Lesswork.** Congoleum floors mean less worry and no back-breaking drudgery. Dirt, ashes, grit, dust or mud cannot "grind into" Congoleum Rugs, because the surface is hard and does not absorb. A damp rag keeps a Congoleum Art Rug clean and doesn't hurt it.

**Waterproof.** These rugs are guaranteed absolutely waterproof. There is no hurling Congoleum Art Rugs for water to rot. The surface is hard and smooth and wear resisting.

### The Most Famous of All Congoleum Patterns

This stunning pattern is a superb tile design that looks exactly like the finest mosaic tile that you have ever seen, in lovely robin's egg blue and stone gray colorings. Such a rug in your kitchen will change the appearance of the whole room. In the dining room it gives an effect, impossibly beautiful to describe. For a bedroom it is the most appropriate pattern imaginable. For the bathroom it is absolutely ideal.

Let us loan you these rugs for 30 days' **Free** so you may see for yourself the indescribable beauty of this wonderful design—the greatest favorite and the most popular Congoleum Rug ever produced.

### This Offer Ends in 30 Days Send Your Dollar NOW

There never has been a bargain in any kind of merchandise to equal this. For we are making you. Prove this to your own satisfaction by just looking up the price of Congoleum Rugs anywhere. But we cannot hold this offer open long. We make it for quick action to prove to you our ability to sell you similar bargains in all kinds of home furnishings from cellar to garret, on the same wonderful terms.

To take advantage of this offer, clip the coupon below, pin a dollar to it and if you send your order within 30 days, we will give you absolutely free the three small companion rugs, identically the same pattern, and Gold Seal quality, to match the big rug.

### Pay Little by Little Take a Full Year

Still there's another advantage—an advantage that ought to place these Congoleum Rugs in every American home. In spite of the lowest price in existence—in spite of giving three small rugs to match absolutely free—we bring you the opportunity to clinch this *proven bargain* without a tiny bit of worry.

One dollar with the coupon brings all four rugs immediately. And we'll wait a year for the balance of the money. If you keep your rugs after making a 30 day's trial, you can pay little by little, almost as you please, taking a full year. That's the way we sell everything.

### We Want to Place a Congoleum Rug in Every American Home

Congoleum Gold Seal Art Rugs are rapidly becoming the national floor covering—universally used in the kitchen, bathroom and dining room in good homes. People of taste and judgment are glad to use Congoleum Rugs in their best rooms. It is the rug with a hundred superior points.

**They lay flat** from the very first moment without any fastening. They never curl or kick up at the edges or corners. There is no need to tack or fasten them down. Dirt cannot accumulate underneath. They follow perfectly any unevenness of the floor.

**No. D4C408** 9 ft. x 12 ft. Genuine Congoleum Gold Seal Art Rug and **\$15.95** three companion rugs to match, each 18 x 36 inches. Mosaic Tile Pattern in Robins' Egg Blue and Stone Grey. All four rugs on 30 Days Trial.

## Pin One Dollar to Coupon and Mail

Spiegel, May, Stern Co., 1540 Thirty-Fifth St., Chicago, Illinois

Enclosed find \$1.00, for which send me on 30 day's Free Trial your special offer of one 9 foot by 12 foot genuine Congoleum Gold Seal Art Rug and three companion rugs to match, each small rug 18 x 36 inches, exactly as described in this advertisement.

If I keep the rugs, I will pay you \$1.25 monthly. I have 30 days to make up my mind. If I decide to return the rugs within 30 days, you are to refund my dollar deposit and all carrying charges, both ways. The price of all four rugs is \$15.95, which is guaranteed to be less than the regular price of the 9x12 foot rug alone.

## Prides of The Baltimore and Ohio No. 2—

# A Friendly Conductor

"A jolly old conductor," so the travellers say of me  
 When I thank them for their tickets—oh, 'tis easy as can be—  
 To keep things going pleasantly I always try to smile,  
 For 'tis "Bread upon the waters" that makes this life worth while.

I smile at all the babies and I laugh at mother's jests,  
 My motto never fails to work—"Our Patrons Are Our Guests."  
 And besides my careful records, there is ne'er a chance I lose  
 To keep my clothes brushed carefully and polish on my shoes.

# BALTIMORE AND OHIO MAGAZINE

*Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote efficiency and community of interest among its employes*

VOLUME 10

BALTIMORE, MARCH, 1923

NUMBER 11

## There is One Way—and Only One Way— To “Stop That Leak”

*Note: Many officers have been asked to contribute to the Stop That Leak campaign, among them the author of this article. In his letter transmitting it to the Magazine office, he wrote: “If this article does not suit, throw it away. It is a bit old fashioned, and some people do not believe what I say. But when I reach a place where I have no faith in human nature, I am going to quit railroading because I will then be convinced that I am not equipped to handle anything at all that has to do with the disciplining of men.”*

*What we thought of Mr. Scott's article may be judged by the place given it in this issue.—Editor*

*By J. M. Scott, General Superintendent, West Virginia District*

**STOP THAT LEAK!** This is not a command to be issued and followed by discipline in every case where it is not complied with. Such a plan would fail because of its very make-up. Sixty-five thousand employes could not be successfully forced to stop leaks by a handful of officers, even if those officers were inclined to be drivers.

*My conception of the “Stop That Leak” Campaign is one where the sixty-five thousand employes and the handful of officers of the BEST AND ONLY RAILROAD (that being the real name of our Baltimore and Ohio Railroad), banded together, all friends, are working to give the best possible service to the public and by so doing gain for our Company the reputation of being the best road in the country over which to travel as a passenger, and the road that will handle freight most carefully and promptly.*

### **The Partnership**

You can see, of course, that every employe on the payroll must be a partner in such a firm. The section foreman and his men prepare the track and switches to insure safe passage for engines and cars. The car and enginehouse men prepare cars and engines to move over the track without damage or delay to equipment. Train and enginemen handle switches, cars and engines to avoid delay or damage.

Clerks properly bill cars to avoid wrong handling and delay. Men on freight house platforms properly check, truck and stow L. C. L. freight to avoid loss and damage, covers and shorts and insure the

package going where it belongs. Train dispatchers and telegraph operators handle trains with judgment and dispatch. Ticket clerks and baggagemen use care in handling tickets and baggage to avoid inconvenience and delay. Signalmen so maintain interlockers and other signals as to avoid delays and accidents.

Men being called for service furnish proper addresses and get up as soon as called. Callers see that they get the right man and that he is awakened. Tonnage clerks see that correct weight is secured when building trains for movement. The pumper, the crossing watchman, in fact, every employe does his or her work well—and we have started to STOP THAT LEAK.

### **The Willing Spirit**

Then add the voluntary spirit of helpfulness that to my personal knowledge has existed on the West Virginia District for the past five years, and we are well on our way. What do I mean by voluntary helpfulness? Well, here are a few of the many, many cases that are occurring on the West Virginia District:

A train man observes brake beam down on passing train. He stops train and not only advises crew but assists in removing the beam.

A land slide falls on the track. Four employes deadheading on a passenger train, with their good clothes on, get covered with mud assisting in clearing the track.

A doublehead freight train crew finds a tank valve unseated in a water tub. Do they kill the engines and

wire for help? No, a member of the crew goes down in the tub and seats the valve while other members fix the fire in the boiler; water is pumped into the tub, the two engines take water and train proceeds.

A district conductor advises you that four more rail lengths of track at a certain big mine would permit him to handle his work with two trips instead of three and that a distant advance signal at a point where you already have track circuit would permit switching to be done at that station while waiting for passenger trains to clear the block.

An extra engineer deadheading on a passenger train observes that the speed is not what it should be. Half way over the division at a water station he goes to the engine and finds the fireman half sick; then, good clothes and all he takes the engine and she steams and the train goes in on time.

A fireman on an important passenger train is unable, on a particular trip, to keep maximum steam pressure, and, not knowing the cause, does not go to his room on arrival at the terminal but goes into the firebox with the boiler worker to determine the cause and to be sure that the defect is located and corrected to avoid trouble on return trip.

A fireman, with street clothes on, standing on platform at one of the larger stations, learns that the coal pusher is inoperative on the engine of a through passenger train and that coal will have to be shoveled ahead of the tank so that fireman can reach it.

## Rare Treat for Veterans and Their Friends

Noted Explorer and Lecturer to Entertain Various Chapters With Travelogues and Motion Pictures

IT is with the greatest pleasure that we are privileged to announce the forthcoming visit to our various Veterans' Associations of the noted explorer and lecturer, Dr. George Burbank Shattuck. At this writing it has not been decided when Dr. Shattuck's tour will begin or in what order he will cover the chapters, the schedule being in course of preparation by W. W. Wood, chief of Welfare and George W. Sturmer, grand president of the Veterans. By the time this issue is in the hands of all employes, however, some of the Veterans, at least, will have had the pleasure of meeting him and hearing his wonderfully interesting travel experiences.

Three of Dr. Shattuck's stories were built on our own continent of North America, "The Lure of the Canadian Rockies," "On Saddle Back in the Yellowstone" and "The Romantic Valley of the Hudson." His other story came into being during his recent trip to the "dark continent" and is called "What I Saw in Africa." These four subjects are handled in lecture form and he also will arrange to have exhibited before the Veterans his motion picture "Wild Men of Africa."

As an indication of the thoroughness with which Dr. Shattuck has covered his subjects, suffice to say that his trip to Africa engaged him and his party for about one year, and that in preparing his story "On Saddle Back in the Yellowstone" he lived there for a period of over a year. He has also traveled through Alaska and Mexico, been through the heart of the Maine wilderness in a canoe, and explored in the West Indies and the Everglades of Florida.

Dr. Shattuck was born in Lowell, Mass., and was graduated from Amherst College in 1892. While an undergraduate there he broke the intercollegiate quarter mile record, doing this gruelling distance in 49½ seconds. (In his interview with the writer he did not confide whether or not his sprinting ability ever served him in good stead in escaping contact with hungry savages.)

He was given the degree of Doctor of Philosophy at Johns Hopkins University in 1897 for special work in geology, and taught this subject there, and was also engaged with the Maryland Geological Survey.

For the next thirteen years he was

head of the Department of Geology at Vassar, perhaps the most famous of our women's colleges.

He was then engaged by the Famous Players-Lasky Corporation to make an exploratory trip into the jungles of Africa to get a first-hand story—and if possible motion pictures—of the little known tribes of pigmies. He entered the "dark continent" at Mombasa on the east coast and with his party then went through British East Africa, visiting, living among and studying the various wild types of men inhabiting that country. Proceeding to Uganda he crossed over Albert Nyanza (lake) and plunged into the little explored forests of the Congo, following about the same trail that Stanley described in his epoch-making narrative, "In Darkest Africa."

He came out by way of the Sudan, following the Nile down into Egypt.

Dr. Shattuck has already told the fascinating story of his experiences in a series of articles, some of which have been published in the magazines. It is his present intention to tell in one of his visits to the various chapters, of his experiences with the wild men of Africa, and later, to show them the fascinating pictures of these tribes, whose state of existence is little removed from that of the wild animals of the jungles.

While visiting over the Railroad and meeting thousands of our employes, Dr. Shattuck will have an excellent opportunity to develop the motion picture possibilities of the Baltimore and Ohio, its picturesque scenery, its pioneering history in transportation, and some of the features that play an important part in our operations.

Dr. Shattuck will bring his own welcome wherever he goes, and we are sure that once he has addressed one of our chapters, the interest of his lectures will be heralded up and down the Road. A rare treat is in store for those who attend and it is hoped that our employes generally will avail themselves of the privilege.

### There is Only One Way to Stop That Leak

(Continued from page 5)

This fireman, and a shopman happening to be there, need no invitation to help. Both men climb to the tank and assist the fireman of the train, and by the time the passengers, baggage and express are loaded, coal is o. k. and delay avoided.

You cannot pay men for this kind of help. They will only give it because they want to and they will not want to if they do not feel that they belong to the firm and that the firm has confidence in them and will see that they get a square deal and the best of treatment.

Fortunately this is the kind of firm the Baltimore and Ohio is, our men know it and that is the reason we are going to Stop That Leak.

# The Good-Will Campaign Showed Friendliness of Shippers toward Baltimore and Ohio

By Emma V. McClayton, Captain, Team No. 1

## Note:

*That the groups of Baltimore and Ohio girls who visited the cities and towns along our lines in the interest of the Good-Will Campaign met with a hearty response from our shippers as well as from our own railroad folk, is well illustrated in the following article. Friendliness and cooperation greeted them everywhere and the spirit of enthusiasm which the girls themselves carried along unquestionably fostered a kindred spirit wherever they went.—Ed.*

THE spirit of goodwill evidently has been in practice for some time all over the Baltimore and Ohio among employes and between the railroad and shippers, for at all points we were met in a most friendly way. The campaign to elect Miss Spengler had many enthusiastic supporters, and we are sure that all the girl solicitors made many good friends.

The men in the yards and shops at Wilsmere, Cumberland and Keyser were particularly helpful. The spirit at little Newark, Delaware, was one hundred times as great as the place, and it's a fine little city, too. We have only an agency there, but in two hours time, with the splendid help of the agent, Mr. Gallaher, and Mr. Hall, who was driving a truck to one of the plants, we were able to obtain quite a nice little sum.

The papers in Cumberland and Wheeling were co-operative and gave good write-ups on the Baltimore and Ohio Good-Will Campaign. The Chamber of Commerce of Fairmont was visited and its members promised to see that it was given publicity there.

The Hazel Atlas Glass Company at Wheeling, through Mr. Brady, the president, offered to meet any contribution we had. The highest was \$30.00, this having been given by Mr. C. H. Jenkins of the Hutchinson Coal Company at Fairmont, and the Hazel Atlas Glass Company gave us a check for the same amount.

To show with what good faith we were received and how the shippers on the road evidently feel toward the Baltimore and Ohio, suffice to say that, since our return to Baltimore, several additional checks have been received, two of \$10 each, one of \$5 and another of \$2.

Several shippers visited could not give us anything at the time we called because the man handling donations was not in. Since our return, however, advice has been received that two firms in Wheeling

sent checks to the division freight agent; the Hammond Fire Brick Company at Fairmont sent one for \$10, and the Kelsey Construction Co., one for \$2 to Division Freight

Agent Brown at Grafton; the Kelly Springfield Tire Company sent \$10 to Division Freight Agent Beggs at Cumberland. What better proof need we have?

I would like to tell at length of the cordiality with which we were received by all our railroad employes and their shipper friends along the line, but space permits only this general reference. The point to be emphasized is this: Our experience with shippers was so pleasant that we were convinced of the high regard in which they hold the Railroad, its officers and employes, and the service that we are trying to give them. This should be most encouraging to all of us and a stimulus to even greater effort to merit their goodwill and future business.

## With Such Men Behind It—There'll Be No Holding the Baltimore and Ohio!

Ridgway, Ills.

Jan. 3, 1923

Mr. Daniel Willard, President  
Baltimore and Ohio Railroad  
Baltimore, Md.

My dear Sir:

Maybe it is not just proper for a section foreman to address the President, but I feel I must thank you for the good letter of good wishes for all for the New Year. Always before when I received such a letter I regarded it as just a form of habit or custom. But somehow this letter stuck to me. I have been with the Road a long time, raised a large family, have one boy an engineer, another a fireman, and I feel like I am one of the family of the Baltimore and Ohio.

Sometimes I feel like I have a big job on my hands trying to keep seven miles of old #60 lb. rail in line and safe for trains, but when I think of your having to so control the whole

System so it will earn enough that we may all receive our pay checks on time, it makes me feel like I wanted to save every spike and bolt and tie I possibly can and to think out ways to do better and more work, and I believe when I promise you my very best efforts during the coming year I am speaking for the entire St. Louis District.

There are only two places where we use the word can't and that is—we can't expect to get more out of a thing than we put in, and we can't ignore the Safety

Rules long without getting hurt or injuring someone else.

Thanking you again for your good letter,

I am, Yours truly,

(Signed) W. J. BALDWIN

Section Foreman W. J. Baldwin

# Forty Miles Per Car Per Day WILL

**D**URING the last few weeks the Baltimore and Ohio Railroad has shown notable increases in Average Miles per Car per Day. The improvement has not been confined to any particular locality, all the districts having shown a progressive upward movement on the chart, and the Eastern Lines, Western Lines and System having gone ahead accordingly. The table on the opposite page tells the story—read it and see if your division or subdivision is helping or hindering this upward swing.

Special cause for gratification will be noted in the fact that during the week of February 22-28, the Eastern Lines equalled their best previous record, and that for the week of March 1-7 they broke this record by a full mile per car per day. Every man who contributed to this fine result deserves hearty congratulations and will take personal pride in the new high mark set!

As is well known all along the line, the amount of business which we are being offered today is literally almost measured by the amount of business that we can handle. The records compiled in Washington show that the tonnage carried by the roads of the whole country is the greatest in history for this time of the year. Indications from most business sources show that it will continue to get heavier and that means just this—

Baltimore and Ohio men will need to make even higher records in Average Miles per Car per Day in order to hold the pace and maintain our reputation with shippers for good service.

Forty miles per car per day is the goal that has been set for us to reach. But with even an increase of five miles per car per day over our best previous record it would mean that, with enough business offering—as seems now altogether probable—our gross revenue would be increased about \$2,225,000 a month. Team work will do it—and here are suggestions from A. O. Herman, chief clerk to the general manager, Eastern Lines, as to how some of the men on the team can best help:

**YARD CLERK:** See that bills are delivered conductor for all cars in train, and that each car is covered by proper billing, to avoid setting off cars, or holding them at terminals, for bills.

**AGENT:** See that cars received under load for delivery are promptly and properly placed to be readily available for unloading; then keep after consignees to release, and when unloaded either see that the empty is again placed promptly for re-loading, or if not needed for that purpose, that it is

moved away promptly so as to be available for loading elsewhere. Do not let cars be idle, as each instance of this kind works against the average miles per day.

**CONDUCTOR:** Watch cars at local stations, and see that empties not required are taken to other points where they will be loaded. In placing loaded cars for delivery at stations, see that they are so placed as to be available for prompt unloading. When cars are on hand for which there is no immediate loading, take up at once with proper officer for disposition. Familiarize yourselves with Transportation Department instructions, issued twice each month, covering the handling of various classes of equipment.

**SECTION FOREMAN:** When Company material is received for unloading on your section, see that it is immediately unloaded and car released, and that the proper person is notified of the fact so that the empty can be taken away and made available for loading elsewhere. We cannot hope to have commercial consignees unload cars promptly, if our own employees do not set the example.

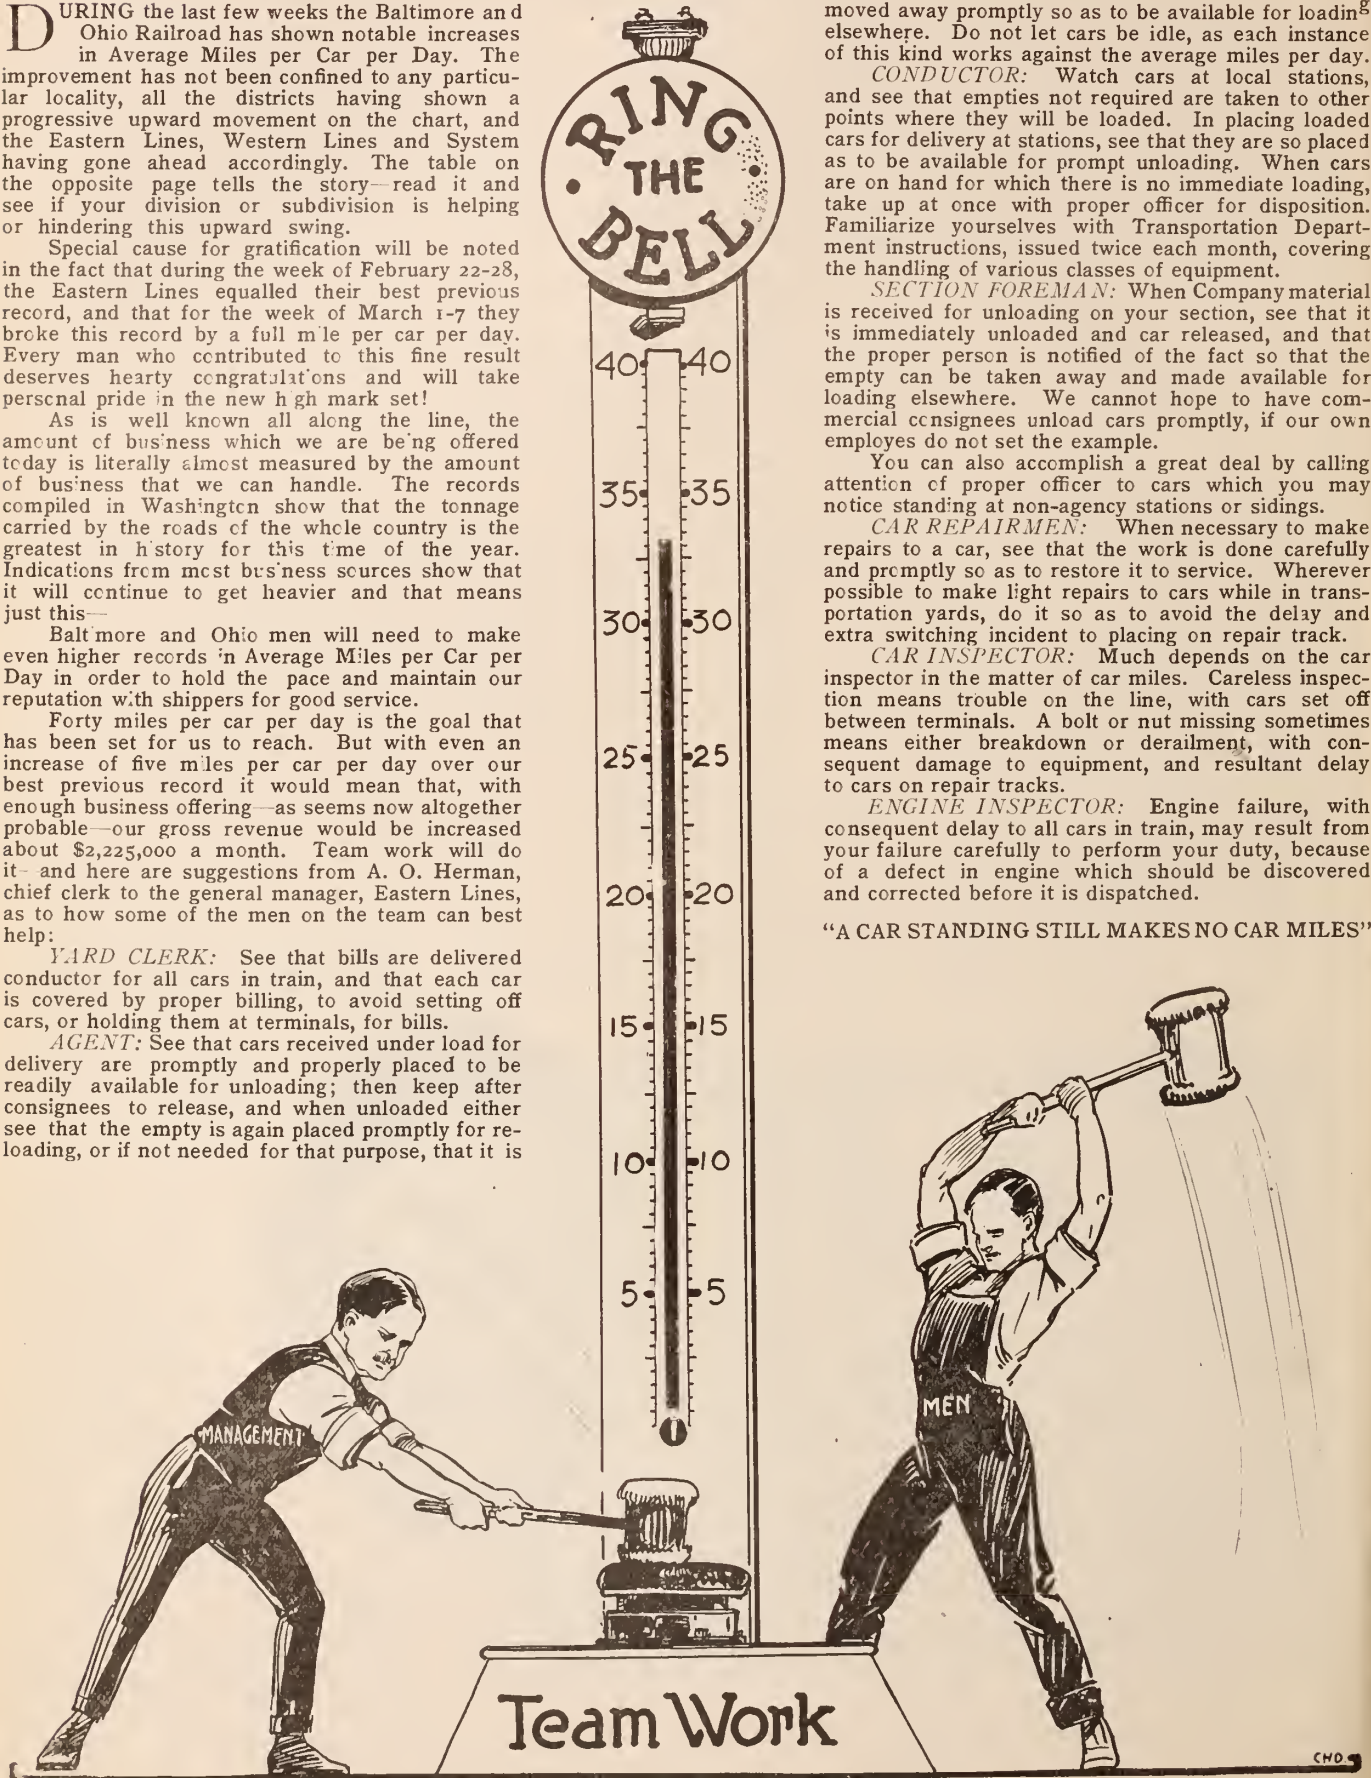

You can also accomplish a great deal by calling attention of proper officer to cars which you may notice standing at non-agency stations or sidings.

**CAR REPAIRMEN:** When necessary to make repairs to a car, see that the work is done carefully and promptly so as to restore it to service. Wherever possible to make light repairs to cars while in transportation yards, do it so as to avoid the delay and extra switching incident to placing on repair track.

**CAR INSPECTOR:** Much depends on the car inspector in the matter of car miles. Careless inspection means trouble on the line, with cars set off between terminals. A bolt or nut missing sometimes means either breakdown or derailment, with consequent damage to equipment, and resultant delay to cars on repair tracks.

**ENGINE INSPECTOR:** Engine failure, with consequent delay to all cars in train, may result from your failure carefully to perform your duty, because of a defect in engine which should be discovered and corrected before it is dispatched.

**"A CAR STANDING STILL MAKES NO CAR MILES"**

# Heavy Business Practically Assured to End of Year\*

## We Can Increase Our Car Miles Every Day And Make Friends and Money in This Easy Way

By W. G. Curren, General Superintendent Transportation

The car situation is tightening up sharply. Present indications are that there will be shortages throughout this year. In fact, there will be a keen demand for all classes of equipment, particularly box and open tops, from now until the end of 1923.

The amount of traffic which the Baltimore & Ohio will enjoy will depend in a great measure on the available car supply. It is therefore necessary that everyone "put his shoulder to the wheel" and leave nothing undone that will increase car efficiency.

Agents and others having to deal with the public should bring the facts squarely to shippers' and consignees' attention, and solicit their fullest cooperation. They should urge the shipper to -

- 1 Load all cars to full carrying capacity, even though necessary to double the order of the consignee.
- 2 Load all cars on the day placed.
- 3 Unload cars on day placed, regardless of free time allotment.

4 Confine orders for cars to actual and immediate requirements for the current day.

5 Notify the railroad official in charge immediately when the car is released.

6 Avoid ordering or shipping freight under methods which necessarily result in delay in releasing at destination.

The railroad must recognize its responsibility in the matter of prompt movement of loaded and empty cars, as this is one of the primary measures necessary to avoid waste of transportation, which is measured by the car performance in average miles per car per day. Ways and means should be constantly studied of speeding up the car movement. An increase of an average of 5 miles per car per day is not only possible, but reasonable, and means a material increase in the available car supply.

Assuming that all these things will be accomplished, the fact remains that the shortage will be severe. Nevertheless there will have been accomplished a decided increase in tonnage moved and material relief will thus be provided.

The matter is so important that officers are urged to study the matter thoroughly and discuss it at all their staff meetings.

\*This letter was sent to all superintendents, with copies to general offices on March 7.

## Sir Engineer—A Tribute

By Clarence Rupe Lloyd

LONG ago out from the gates of towered Camelot rode those gallant knights of King Arthur. With clanging armor, streamered lance and plumed casque they followed the trails of old England. They fought for the love of fighting, and by the conflict taught their rude doctrine of Right and Wrong. They were coarse, they were crude, but they were steadfast and brave—they were men. They typified "progress" in an age that scarcely knew its meaning. They toiled for the advancement of human ideals. In their hands were sword and lance, and with them they wrought for king or lady-love. If they failed, as sometimes they did, they showed the world how men could die. That old-time chivalry, those deeds of splendid tradition—we of the twentieth century call "romance."

But the knights of Arthur's court have ridden on. Their martial glory has faded like the plumes they wore so defiantly from their glittering helmets; they have passed. And now, after the lapse of centuries, riding out of that progress born long

before, comes a new knight. But how different! He thunders into view on his steed of steel and fire. In his hand, instead of the lance of valor, he holds the throttle of power. No plumes float gayly from his close-fitting cap. Glass goggles take the place of iron casque. His armor is only plain homely clothes. There seems not the tiniest shred of romance about him, yet he is the greatest knight the world has ever known. His name is Sir Engineer, and his horse is a fleet, powerful locomotive.

The Knight of the Round Table has given place to the Knight of the Round House. Sir Engineer has taken up the task that Sir Lancelot has laid down. The task is progress—ever onward—and the development of human enterprise.

You knights of long ago, who have ridden with Lancelot over the winding roads, under the whispering trees, through the quiet fields, and beneath the gates of staring castle walls—come ride with Sir Engineer this night! Climb up behind him on his panting charger, look ahead over the

two endless rails, and fight with him the greatest of all enemies—time.

The train moves out from the station. It threads its way through the puzzling tangle of tracks. The city's lights thin on either side. The wide, black night opens up ahead. Now, you warriors of Camelot, charge with this Knight of the Rails over the course that is his daily run. Watch him as he strives in the work of progress that you began. You thunder on through the darkness with a speed greater than the wind. What holds you to the course? A man's mere hand on the throttle. Do you tremble at the mystery of it?

The engine roars out across a trestle and you look down into the depths of the valley where the cottage lights gleam faintly. But a second—and they are gone. Saw you anything like that in Arthur's England? But watch Sir Engineer. He is quiet in the roar and smoke and rush. His eyes are on the way that runs beyond the glare of the headlight. They never leave it for more than a second. See those colored lights ahead? Signal gleams. Do you realize they spell Life or Death? The whistle shrieks. Do you hear it, you astounded, amazed gallants? It is a war-cry; the call of victory!

### How the Farmer Sees Freight Rates on Farm Products—

Time has lost the first clash, for there are the lights of the first city coming into view just at the right moment.

The engine abruptly ceases its heaving pant, the throttle is moved by that governing hand, the air brakes are applied, and the first onslaught of Sir Engineer is finished. Speak, you tin-plated Knights of Arthur, did Romance die with you?

But wait, the day is not yet won. Three-fourths of the course still lies ahead. It is indeed a brave, stout heart behind the hand that moves the throttle. Again the straining rush through the night. Behold, Sir Lancelot! Mountains fall before our Sir Engineer. Ever on! Look! behind him are the long cars containing their precious freight. How many times in the old days, Old Ironsides, did you strive mightily in behalf of your lady-fair? Perhaps you had only one lady. But our Sir Engineer—in the hollow of his hand—he holds the lives of scores, even hundreds, of men and women. They sit and talk in their comfortable seats, they walk down the carpeted aisles, they sleep when weariness lowers their eyelids, and they are confident that the guiding hand of Sir Engineer will not fail them. It is indeed a tremendous trust, a

trust worthy of the greatest of men. Soon they will alight at their destination. How many then will give a thought of the Engineer who has brought them safely over the many miles? His is not the tattered pomp of yesterday, but the unsung praise of great though unacknowledged accomplishment.

Climb down now, you old warriors. The course has been run. The train has come to the last stop "on time." Sir Engineer has conquered. Are his the plaudits of admiring throngs? Surely he has wrought well! But no. He does not think of that. Calmly he washes the grime from his face, and doubtless his thoughts are only of home and the loved faces that are waiting there.

### Railroad Patriotism

*To the Editor:* Here's a little burst from a Missouri railroad man who spent 19 months in the service and came out with a job.

In our disappointment over the turn taken in the adjusted compensation program, our sorrow over the neglect of our disabled buddies and our disgust in the lack of interest taken by employers in giving the returned veterans their old jobs or preference in employment, we have overlooked

one big bet. We must be fair and give a little of our time and energy to boost those whose patriotism lasted until the last Yank was back on the job.

I will speak for the largest employers of men in the country, today, yesterday or tomorrow—the railroads of the United States. There were more railroad men in the Army than men of any other occupation and how well they did their work is history that does not need repeating. At the first call of our country for help the presidents of all the railroads ordered bulletins to be posted in conspicuous places notifying their employes that any of them wishing to enlist in the service would be granted leave of absence for the duration of the emergency, that their positions would be open for them on their return and that their seniority privilege would go on. Thus it was possible for a man to enlist and come back to a higher position than the one he left. And the railroads kept their promise.

Has any other industry, large or small, such a record? If so they should be put on the roll of honor, for theirs is the kind of patriotism that makes good citizens out of soldiers as well as good soldiers out of citizens. And we need them both.—M. L. HASSELL, *Good-Ballinger Post, Springfield, Mo., in American Legion Weekly.*

### And How the Railroad Man Sees Them

**Stop That Leak! Stop That Leak! Stop That Leak!**

**The Question of the Upper Berth**

*Or What the Lady Octogenarian Taught Me!*

By F. L. Charles, Assistant to General Freight Claim Agent, Cincinnati, Ohio

A FEW weeks ago this happened on the Illinois Central—I got it from a Pullman Conductor:

A heavy Chicago bound train with four Pullmans pulled up at a station in Illinois and a slight, but sprightly old lady nearly eighty boarded the train and inquired for a berth to Chicago. The Pullman Conductor who told the story—reluctantly, consolingly and with a voice full of regret, informed her that all the lowers were taken.

“Haven’t you got an upper?” came the quick reply.

“Yes, we have plenty of uppers—can you use an upper?” the Conductor answered when he recovered his composure. Then she enlightened him.

“Well I went from Chicago to Los Angeles last fall in an upper and I got along right well.”

And this one happened since at the ticket window in St. Louis Union Station—

A gentleman of commanding presence called for a ticket and lower berth to Kansas City over the Wabash. Politely the ticket seller informed him that the lowers were all sold, but that he could give him an upper.

“Give me a lower on the Missouri Pacific” was the rejoinder—which relieved the Wabash of a good day’s wage for most any employe.

Recently contemplating a night trip, Cincinnati to Louisville, the writer was admonished by friends to make reservation. Their advice was not heeded and when inquiry was made at the ticket window about half hour before train time it developed that the Louisville sleeper was sold out, and that it carried thirty-one pay passengers—all uppers, lowers and the drawing room occupied and no non-revenue passengers on the list. The writer changed his itinerary for the week and rejoiced that he had not beaten our Company out of a day’s wages by making the reservation. If he had made the reservation it would probably have resulted in the loss,

not alone of the Pullman surcharge to the Railroad, but also of the straight ticket fare of at least one passenger.

It is not to be expected that our Management would issue an order instructing employes to do this or that in connection with Pullman reservations and riding—such procedure would be contrary to our well known policy of depending upon the discretion and fairness of the individual employe. But there are a lot of us younger fellows who can take a lesson from the old lady

who “got along right well” in an upper and we should see to it that no act on our part drives a pay passenger to a competing road for the accommodations he desires.

Isn’t it a fact that about ninety per cent. of the traveling public approach the upper berth problem with a “closed mind” and that ignorance and “false pride” are responsible for the common aversion so apparent?

For the man of average weight, isn’t an upper berth a better bed than a lower?

Isn’t the ventilation better in an upper and isn’t it further removed from the extremes of temperature when artificial heat is resorted to?

Isn’t an upper more effectively insulated against the jar and rumble of car trucks, especially in sections over the trucks?

¶ If we are to encourage the full use of Pullman equipment, instead of hauling the cars loaded to half capacity, should the Railroad fraternity not lead the way in filling the uppers?

Here’s a chance for some of the who’s who on our railroads to do some thinking.

**Eastern Lines Make New Record for Loading on March 3, and for Car Miles per Day for Week of February 22-28**

ON March 3, the Eastern Lines made a new record of 21,760 for loaded movement, the record by divisions being viz:

Divisions	Movements
Baltimore—East End....	1599
“ —West End....	2633
Cumberland—East End..	3019
“ —West End.....	1648
Maryland District.....	8899
Monongah.....	2575
Wheeling.....	1923
Ohio River.....	419
Charleston.....	821
West Virginia District...	5738
Connellsville.....	3078
Pittsburgh.....	4045
Pennsylvania District....	7123
Total.....	21760

The weekly estimate of average miles per car per day, including bad order, the Eastern Lines, week of February 22-28, was 29.5 miles, which is the record, the previous record being for the week of January 22-31, 28.9 miles.

**Your Suggestion?**

Excellent suggestions continue to come in to help “Stop That Leak.” Most of them are now in the hands of officers for investigation and we hope to be able to record concrete results in near issues. Please send your suggestion to

## One Crew That Saves Fuel and Stops Leaks

By A. E. Erich, Secretary to Superintendent, Ohio Division

**E**NGINEER JOHN SNYDER, Fireman George Glenn, February 2, Train 12, engine 5127, consisting of seven cars, between Cincinnati and Chillicothe, a distance of 100 miles, used 373 scoops of coal, or 5222 pounds. Train

Fireman Glenn and Engineer Snyder

left Cincinnati late but arrived at Chillicothe on time. This crew watches pop valve and all other fuel saving matters very closely at all times when on engine, this being their "secret" of making "fuel saving runs" as above. **SAVE FUEL, IT CAN BE DONE.**

## The Men at the Top of the Ladder Have Known How to Save

By Harry Foster, Manager & Treasurer, The Baltimore and Ohio Warehouse Co., Cincinnati, Ohio

**D**ID you notice that all of the men who wrote the most interesting articles on "reducing expenses" in the December issue of this magazine, are all way up at the top of the Baltimore & Ohio ladder? *There's a reason!*

To obtain success, economical operation of our departments must be a prime consideration and impressed upon the minds of each and every employe of our organization. We are only performing our duty by carrying out this important part of our work.

I endeavor to operate this warehouse just as if it were my own, keeping a careful watch on each and every item of expense, just as if I were making the disbursement out of my own pocket.

When a requisition is handed me for approval, if there is any possibility of decreasing quantity, I do not hesitate to do it.

Our labor expense is held down to a

minimum. No extra labor is engaged unless absolutely necessary. To engage unnecessary labor is to be unfair to our regular force because unnecessary expenses mean extended furloughing in hard times.

When making inspections of the warehouse, I watch electric lights to see that none is burning unnecessarily.

Above all, make careful checks of all invoices received, whether they are company invoices or those of private concerns. Many times you will find that clerical errors are made, particularly in extensions, footings, incorrect percentages or proportions, items that have been paid once before; items that, according to leases or contracts, are not chargeable to you, overcharges, etc.

In conclusion, please don't forget to co-operate. Do all you can for your Baltimore and Ohio brother and accommodate him wherever possible. You'll find that it pays.

## The Busiest Men Have Most Time to Help Others

**D**ID you read that dispatch from Paris a month or so ago which told of a blind veteran who stepped up to a passing pedestrian as he tapped his way along the sidewalk, and asked:

"Excuse me, am I near the Wounded Soldiers' Institute? I've only been there twice and I'm not quite sure of the way."

"You are close to it now; let me take you," came the reply.

Arriving at the door the guide said to the janitor, "Kindly take this man to the section for the blind."

"Take him yourself," growled the janitor. "Under the archway on the other side of the courtyard."

The civilian did so, but on the way out addressed the janitor again. "Could not you be a little more obliging to the blind?" he asked, gently.

"There are too many and I haven't the time," was the surly response.

"It seems to me it is your duty to help them," said the civilian. "I can find time—and I am Marshal Foch."

All of which illustrates once more that the big busy men are the ones who have time to help others because they have the desire to help others.

—Forbes Magazine (N. Y.).

### A Drop of Solder

*It Saved Rockefeller \$50,000 a Year*

(From Thrift Magazine)

Early in the career of the elder Rockefeller he found that 39 drops of solder were being used on each oil can. He asked those in authority to try 38 drops. They did so, and the results were successful.

The saving of one drop of solder meant \$50,000 a year to the company.

No business is so strong and successful that it can afford to neglect the little things. No man ever achieved substantial success without a foundation of thrift.

A drop of solder may sometimes tell the story of success or failure.

But it isn't the drop of solder in itself that counts. It's what this economy leads to.

Learn to save the little things, but above everything else, learn to value the big things that develop from such practices.

Rockefeller was not interested in those little drops of solder. But he was mightily interested in saving that \$50,000 a year for his company.

### The "We" Spirit

Sometimes the progress of great movements is marked by events which, at the time they occur, are so insignificant as to attract little notice. I could not help thinking this recently when, upon the invitation of the Railroad, the ladies of the Grand Lodge Auxiliary used the Board of Directors' Room in our General Office Building for one of their meetings and were invited by our chief executive to use the room again when they wished to and when it was available.

The beautiful furnishings of the room itself, the handsome wood panelling of the walls and ceiling, the mural painting over the great mantle piece, depicting the founders and builders of the Baltimore and Ohio, the stern faces of the presidents of the Railroad looking down from their frames—these things and tradition have always inspired in me a certain amount of awe as I thought of "the Board Room." It seemed to be a place which should be entered only by the directors, officers and stockholders of the Road at their meetings. And I am confident, too, that previous to this meeting of our ladies, no similar meeting had been held in this room.

To many there may be nothing at all significant in this meeting of the ladies, but to me it shows our officers, pointing again to the right hand of fellowship, which they have long held out to us of the rank and file. It shows that more and more we are becoming the one great Baltimore and Ohio family that we hear about so often and that the "we" spirit is getting a grip on our organization that it has never had before.

Railroad leaders in both camps have said that the reason for misunderstandings between management and men has been because they do not get together face to face, get to know each other and talk out and work out their differences. What a fine thing it is that so many of our officers are attending our employe entertainments, dinners, dances, etc., on the Railroad! Here truly is the way that we can meet each other in person, that we can see the human side of the character of the other fellow and what a splendid sort of a chap he is, after all.

President Willard said the same thing in other words when, in saying that we can create for the Baltimore and Ohio the reputation for being the best Railroad in the world in point of service, he added:

"I cannot do it alone. You cannot do it alone. But all of us working together can do it, and I earnestly desire your cooperation in this way."

### Figure It Out in Percentage

The purchasing agent of the publishing house turned to his secretary and smiled amiably as he said:

"There—that is a saving worth making—five cents a pound on pins. I will have to tell the boss about that."

"Five cents a pound?" replied the secretary, "why that is not much. How many pounds do we use within a year?"

"Well, we used fifty-five pounds last year," replied the P. A., thumbing his well worn price book, "and we paid thirty-five cents a pound for them. This contract gives them to us for thirty cents a pound, and it's the same quality pin."

"Why that is a saving of only about \$2.50 for the whole year's supply," returned the secretary.

"Yes," said the P. A., "but your basis of figuring isn't right. You ought always to figure your savings in percentages. In this case I am saving over fourteen per cent. as compared with last year. Just think what it would mean if we could save at that rate on our paper bill of almost a million dollars a year and on our production costs, which are twice as large as our paper expense. It is the percentage saving that you ought to figure by."

The story is worth remembering. If you, Mr. Clerk, can make the lead pencil you are now using, last twice as long as the last one you had, or if you can save half your normal consumption of envelopes per day, you are in these respects, at least, a fifty per cent. saver for the Company. And that is well worth while!

### "Who is Responsible for Accidents?"

I asked this question of a safety supervisor not so long ago and he declined to answer direct. But he did say this:

"In my mind the principal reason why we cannot bring more of our men to see the foolishness of taking risks and hence reduce our accidents, is because so many of our supervising officers are not completely persuaded on the subject of Safety."

By which he meant, as I interpret it, that where there is a question between efficiency and safety, or speed and safety, or economy and safety, some supervising men on the Railroad sometimes choose the other alternative to safety.

Such reasoning is absolutely contrary to the expressed wish of President Willard, who, years ago, soon after he became president of the Railroad, said unqualifiedly that he placed safety "above everything else" in the operation of the Railroad.

Certainly we want on time trains, and heavy train loads and a minimum of delays and all the other things that we think make for good operations. But we *never* want these things when the safety of our passengers or our men is brought into the slightest question.

# Homilies of the Hudson

## Writing

Talking with a friend about the "stuff" I write for the MAGAZINE I was told that I wasted time and that whatever I could write on had been written on before, which is, no doubt, true—with the addition that it has also been done better. However, as in cookery, with the same ingredients can be made many dishes, and my hash may find favor with some that don't like caviar.

Aside from that, Dr. Johnson said that "Writing maketh a correct man," and if in addition to that it affords pleasure to the writer, the profit is two-fold. Some like to read, some to write, some to talk and some to play pinochle. Everyone to his taste.

It may be impertinent on my part to suggest that the practice of writing could be recommended to the class of stenographers who interrupt dictation to ask "how do you spell it," and it might be of benefit even to some of those who do the dictating.

It may be true that "there is nothing new under the sun" either to be said, done or thought of. New things are old, but improved upon. Daedalus experimented with an aeroplane about the year 2000 B. C.; the old testament records speeches over long distances without the aid of wires; we repeat constantly truisms that were repeated by Confucius and the Prophets, and they lose nothing by the repetition. Read in today's news of the wonderful art treasures now being unearthed after being buried since 3770 B. C., and equalling in beauty of conception and fineness of artisanship anything wrought today. All of which would tend to prove that "there is nothing new under the sun," but if there were no new thoughts thought, there would be no improvements made. And would not have been made. The stone-axe would still be our implement and raw dinosaurs live on their diet. And writing induces thinking. Pinochle or ping-pong does not.

## That Troublesome Turnover

With every copy of our payroll sent to the Employment Bureau in Baltimore there goes a form 727-N to report re-employment of "men who had been in the service prior to September 1905." During the last eight years this form has been submitted by me with the notation "Nothing to report." Since 1905, when a record was made of all employes then in service, and the form 727-N was provided for the purpose it indicates, much water has passed down the Hudson and many men and women have entered and left the service here. Of the hundred-and-odd office employes carried on the New York Terminal payrolls of that period about a baker's dozen still stick; the others have quit, for better or worse, with "resigned" or "dismissed" tacked on to their records. The index containing the names of ex-employes shows that since the recording began, seventeen years ago, 2295 clerical employes have "been and gone"—an average of 135 yearly. Many of the quitters, no doubt, left for good reasons, or reasons sufficient to themselves, but many, too, no doubt, left for no other reason than that they didn't like *the work*, which is another way of saying that they didn't like *work*. If brief biographies could be had of all those two thousand-and-over ex-employes, what a big book it would make, and what instructive reading!

## Heroes

Strength will always command attention and, when applied in the right manner, admiration. Strength of character displayed in will power or in the "faith that moves mountains," or physical strength denoting vigor and clean living, impress most of us because these possessions are rare and enviable. All the outstanding characters, the leaders and the swayers of masses, the great "heroes" of mythology and history have possessed these qualities.

Strength is power. In times past, before gunpowder and its more refined and more deadly relatives of a later date were known, physical strength was the basic qualification of a hero. Today toughness of tendon, bulk of biceps and a hairy chest are at a discount as factors in arbitrating quarrels, though still much admired in the pursuit of sports. Mind and mechanics have elbowed the gorilla-man into a corner. A cripple with a Colt, a boy-scout with a Remington or a perfumed boulevardier with a rapier can "stop" Mr. Siki or Mr. Dempsey in the first "round." So the heroes of the Hercules and Sampson type have had their day; history will record no more of them.

But we still have heroes—maybe too many—in the daily news. A hero is one who sacrifices himself from choice, one who voluntarily faces danger and braves death to save or serve others. The real heroes of the past and the present are those who have consecrated themselves to or sacrificed themselves for the advancement of civilization, to make this old world a better place for a better race to live in.

## What's It Worth?

"Ending waits on a brief beginning;  
Is the prize worth the stress of winning?"

\* \* \* \* \*

What is it worth when the goal is won?  
All things must end that have begun.—"

—John Payne.

How sad! But, poet, why art so fearful  
And waste good rhyme on a lay so tearful—  
"All things must end that have begun."—  
There's no beginning and ne'er an ending,  
A "next" is always on "last" attending.  
And—"what's it worth when the goal is won?"  
Ah!—After striving, the joy of winning  
The scoring run in the 'leventh inning—  
The prize:—"Good game, boy, good run, well done."  
Cheer up, good poet, and cease the whining,  
Behind your clouds thousand suns are shining.  
Nothing e'er ends that is once begun.

# Baltimore and Ohio Standard Kerosene Lantern Was Developed by Railroad Men

*Patriotism Started—and Greater Efficiency and Economy Determined—the Cutting Out of Hog Fat for Lantern Oil*

By W. L. Robinson, Superintendent Fuel and Locomotive Performance

THE kerosene lantern that has been adopted as our standard has an interesting history. During the past twenty five years the railroads of the country have from time to time approached manufacturers on the subject of kerosene oil lanterns with the idea of entirely eliminating the use of signal oil. Generally unsatisfactory service has been obtained from it—it freezes in zero weather and is expensive to handle.

## The War Speeded Up Research

During the war Mr. Herbert Hoover asked the regional purchasing agents of the railroads to do everything in their power to eliminate the consumption of any edible oils or products that they were using for purposes other than as food, because of the needs of our allies for all food-stuffs.

Signal oil contains 33% hog fat (leaf-lard), and Mr. Hoover appealed to them to ask their manufacturers to develop a lantern in which mineral oil would be used as fuel instead of this edible fat. This request was accepted as a command from the United States Government. Therefore, the first reason for the kerosene oil lantern was a patriotic duty to our country and our allies.

The kerosene lantern which we have adopted as our standard was developed step by step in the railroad yards, for the problems of the manufacturer had to be worked out by intelligent criticism of the men who use the lanterns. The manufacturer began with the idea of protecting the delicate kerosene flame against wind. If he had relied upon the candle power of

the light for the necessary strength of flame, it would have required such a candle power that the oil consumption would have been excessive and even then the flame would not have been sufficiently tenacious to withstand a severe wind. So the protection was embodied in the lantern frame.

## Mechanical Protection of Flame

By a system of baffle plates at the top draft the manufacturer has deflected all wind from reaching the flame direct. The wind coming in at the bottom draft first strikes the oil fount, then the globe seat, before it reaches the inside of the lantern, making it impossible for any direct wind to reach the flame. These choked drafts are so balanced with the candle power of the lamp that there is a sufficient amount of air passing through the lantern at all times to permit proper combustion. If you examine the lantern you will notice the oil fount fits in the bottom of the lantern snugly so there is no possible chance of any foreign air reaching the flame.

## “Stop That Leak”

The oil fount was likewise developed step by step. Kerosene oil is not a heavy bodied oil like signal oil, but flows like water. If the burner in the kerosene oil fount were to be applied in the same manner as in the signal oil fount, there would be a continual leakage of oil. This would not only be wasteful, but would be dangerous because, being low flash oil, kerosene would readily ignite, causing fire hazard. To eliminate this danger the manufacturer

A Vigorous “Whip” must be given lantern when swung in vertical circle

has inserted in the fount a cone shaped “splasher” and on top of that placed a washer. At first leather was used for this, then fibre and finally cork, which has been found the most satisfactory. Now when you screw the burner down flush against the cork the possible leakage is eliminated.

## Designing Burner and Determining Size

In developing the burner the manufacturer experimented with various types. He found the proper balance in candle power and after getting this found he had insufficient spread and therefore developed the metal spreader on top of the burner.

The first kerosene oil lantern that was developed was built on the same principle as the present kerosene lantern, but the frame was the standard size frame, so the men who were using the lantern brought up the question of weight and size. They were unanimous that if the railroads were going to adopt the new type of lantern, it would be best if it were made smaller and lighter. That is the reason for the development of the smaller frame.

To develop this new tool the railroads and the manufacturers were obliged to spend many thousands of dollars. The manufacturers had their lantern experts out in the railroad yards day and night for nearly three years, finding the various faults that had to be brought out in service as well as putting the lantern through every possible comparative service test.

## How to Handle

Kerosene oil being such a free flowing oil, the characteristics of the kerosene lantern are necessarily different from the signal oil lantern, which has heavy, slow flowing oil for fuel. It is therefore necessary to handle the kerosene oil lantern differently.

You will notice by referring to the accompanying pictures, showing the correct and incorrect method of handling the kerosene lantern, that when your lantern is brought slightly above horizontal or turned deliberately upside down, the oil will flow down the wick and flood out the light. If, however, centrifugal force is used and signals are given with a whip, the oil will not flood out the light. Again, if the bottom of the lantern is always kept below the light in making slow signals no trouble will be experienced.

## Incorrect Position!

Do not hold at or near this position unless you are swinging lantern in full circle otherwise oil will flow too rapidly, flood the burner and extinguish the flame.

**Why Superior**

It has been found by actual service test that the kerosene lantern, when properly assembled, will withstand more jars and knocks than the signal oil lantern; that it cannot be extinguished by the wind regardless of its velocity; that it will hold its flame under all signals; and that the kerosene light can be seen as the sharper light at a greater distance than signal oil light.

The use of kerosene will eliminate the former troubles that we have had with signal oil, likewise the expense of the rancid oil that we have had to destroy; the freezing point of kerosene is so low that there will never be any trouble with the oil congealing in the wintertime like signal oil. There is also the advantage of lightness in weight, and, owing to the character of globe, it is handier to light than the signal oil lantern. Likewise the flame can be turned down when the lantern is not in use. This not only keeps it cool when it is inside buildings, but makes it an economical light because of reduced oil consumption. After the signal oil lantern has been used for half an hour, a crust forms on top of the wick and if it is turned down the light is put out. Another good feature of the kerosene lantern is that if it is desired to put the light out without opening the top to blow it out, it can be turned out just the same as a gas jet by merely turning the wick down in the tube.

A third important reason for the adoption of the kerosene oil lantern is its economy. The price of signal oil has at times reached nearly a dollar a gallon. It now costs 30 cents per gallon more than kerosene and one gallon of oil burning one hour a day will last over one year. Therefore a lantern used eight hours a day saves \$2.40 per year or \$28.80 per dozen lanterns per year, which means that the lantern pays for itself more than twice in a year. The normal yearly average of consumption of signal oil on our railroad is 105,000 gallons, which, at a saving of 30 cents a gallon, means a total saving of over \$31,500 per year from the substitution of kerosene for signal oil.

**Men Can Help by Careful Handling**

There is no question of the superiority of this lantern over the signal oil lantern, but it is imperative that each individual know and follow every instruction that appears on the instruction card in regard

Oil Fount, showing "Splasher" and proper height of oil when "filled"

to the successful handling of this lantern. To get results it is necessary to use the proper fuel and because of the nature of the burner it is necessary to clean it each day. On account of the "splasher" that is used in the oil fount, it will require a little more time to fill. At the same time the "splasher" is a most necessary fixture and if it is ever removed to facilitate filling, it makes an unsafe lantern for use on our Railroad.

There is no feature of this lantern that has not been thoroughly thought out and tested in service. No changes of any kind or character should be made on it. Of

course, from time to time there will be imperfections in manufacture found in an occasional lantern and when such a lantern is received it should be turned in to the storkeeper for replacement. This will not occur often.

*Here is a "tool" which ample tests have proved to be superior to the one it supplants. The extent to which it can effect economies depends largely on the way the men handling it use it and it is confidently hoped that they will help get out of it the big savings that are possible and hence, "Stop One Leak!"*

**"Big Noise" from Cumberland about Baseball**

*By John J. Sell*

The Baltimore and Ohio baseball club has reorganized for 1923 and has elected to pilot the team this year Harry Miller, president; Clarence Burns, vice president; P. K. Collins, business manager; Frank Birmingham, field manager. The name has been changed from Bando Redsoxs to the "Baltimore and Ohio Shop Team" so as to advertise their connection with the Company more thoroughly. The Welfare Department has promised to cooperate and the park is to be thoroughly gone over, additional bleachers erected, grand stand put in first class shape, and the diamond reconstructed. Excellent material has responded to the initial call for players. The Cumberland Division team has always been able to hold its own with any team on the system, and will be glad to arrange games. Address the business manager, P. K. Collins, care General Yard Master's Office, Cumberland, Md., and then make your funeral arrangements.

*Note:*

*The Magazine will be glad to be of service to our baseball fans. Shall we have a number of challenges to print in our next issue? If you want yours in, send to Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Md., with name and address of your manager.*

Stepping Stones in the manufacture and use of hydro-electric power, as developed on the St. Gothard line in Switzerland. See opposite page for full description

## Interesting Hydro-Electric Development on Swiss Railways

A GOOD many readers of our MAGAZINE probably do not know that a plan for the electrification of the West End of our Cumberland Division has already had serious consideration by the Management of the Baltimore and Ohio. Our Railroad, it will be remembered, was the first in this country to employ electric locomotives for hauling its trains—the Belt Line Development in Baltimore—and it is certain that as circumstances justify, we, with other railroads, will call more and more on the giant Electricity to move our trains. It is felt, therefore, that the following brief facts in regard to railway electrification in Switzerland, will be of interest. The reasons given for recommending the electrification of the St. Gothard line in Switzerland have a direct bearing on other similar problems, and are:

1. Electric traction would permit of such additional speed on steep gradients, that the capacity of the line would be increased to a greater extent than would ever be possible by steam traction.

2. It would simplify and reduce the cost of locomotive service, so that the working of the line would be less expensive.

3. The abolition of smoke would be a favorable point in competing with other railways and would increase the passenger service; it would lighten the work of the staff and facilitate the maintenance and the supervision of the line in the tunnels.

The necessary water supply was acquired by the St. Gothard Company, in part from the Lake of Ritom which has been transferred to the Swiss Federal Railways.

The first section of the line to be electrified runs between Erstfeld and Bellinzona. It is now completed and in operation, the length of it being 109 kilometers. On the adjoining sections preliminary work is going on. The single phase system, with a tension of 15,000 volts and 16⅔ periods, was adopted and will be used on all the lines of the Swiss Federal Railways.

### The Ritom Power Station

The Power Station at Ritom utilizes the fall from Lake Ritom to the River Tessin. In order to make use of the lake, which has a capacity of 19,000,000 cubic meters, as a gathering basin, a water outlet has been set up at 30 meters below the natural level of the lake. Besides this, the level has been raised 7 meters, by means of a dam constructed at the end of the lake. Thus, the volume of water has been increased by 7,000,000 cubic meters, so that at present there are 26,000,000 cubic meters of water available. The average yearly flow from the Lake of Ritom is one meter in three seconds, representing, according to the net useful fall of about 800 meters a continuous output (24 hours), of about 8,300 h. p. at the turbine shaft. As the requisite power

demand of the electric traction varies greatly during the day, machines of much greater capacity have to be installed. When the power station at Amsteg will be put in service, the Ritom power station will only be in operation during part of the season. In the summer it will stand still, in order to allow the lake to fill up. There will be installed at Ritom machine sets of primarily 48,000 h. p., and finally 72,000 h. p.

A tunnel 1,050 meters long, 2.0 meters high, leaving a gradient of 7 degrees, brings the water from the lake to the pressure pipe line above the hamlet of Altanca.

The pressure pipe line consists of two pipes, having an inside diameter of from 1.10 to 0.90 meters. On account of the high pressure, each pipe is divided at the lower part, into two pipes, each of 0.85 to 0.65 meters in diameter. A third pipe will be set up later on the upper part, dividing in two in the lower part, so that six turbines can be installed finally. The length of the pressure pipe line is 1,400 meters and the water head 785 meters.

The power station is situated at Piotta, on the left side of the River Tessin and is equipped with four groups of turbines and generators. Later on, the power station will be enlarged to house six groups. Each group is composed of a high pressure turbine of about 12,000 h. p., coupled with a single phase generator, making 333½ revolutions per minute. The switchboard room, where the energy generated by the generators is measured, is next to the machine room. All current which has to be transmitted over long distances is transformed from 15,000 volts to 60,000 volts by means of transformers.

### Power Station at Amsteg

The Power Station at Amsteg will utilize the fall of the Reuss River from Pfaffensprung, below Wassen to Amsteg. Unlike the Ritom power station, where the water is accumulated in a lake, the Amsteg and Ritom complete each other—when the Reuss has a big surplus of water, the Ritom works will only supply a little or no power at all and the water of the Foss will meanwhile be accumulated in the lake. When the Reuss has practically no water, the Ritom power station will have to call upon its reserve to make up for any deficit of energy.

The net usefull fall of the Amsteg power station is 280 meters and the average output, during the winter months, will be at least 12,000 h. p., at the turbine shaft. The power station will be built for an output of 60,000 h. p., at first, later on to be increased to about 90,000 h. p.

### Substations

The current generated by the generators at a tension of 15,000 volts normally is transformed to 60,000 volts and then trans-

mitted to the substations by the transmission lines. On account of this transformation conductors, with a relatively small cross-section can be used to transmit the energy from the power station to the substations, thus resulting in a large saving so far as the transmission of the energy is concerned. At the substations the current is transformed from 60,000 volts to 15,000 volts and then delivered to the contact line.

### Equipment of the Line

The contact line is doubly insulated with porcelain insulators; it consists of a contact wire of hard drawn copper, of an auxiliary messenger strand and of a main messenger iron strand. The contact line is sectionalized

### The Pictures on the Opposite Page Tell the Story

1. The famous Ritom Lake, supplying the water power for the Gothard Railway, which will soon be entirely electrified.
2. Pressure conduits to the power-works of Piotta, and funicular to the Ritom Lake. Imagine the tremendous force generated by the water dropping through the steep incline of the pipes shown in the picture. In this project the water which turns the huge turbines comes, as suggested in the juxtaposition of pictures 1 and 2, literally out of the bottom of Lake Ritom into the upper end of the pipes.
3. An idyllic scene on the northern side of the great tunnel of the famous Gothard Line, Switzerland, suggesting that the Swiss railroad engineers have faced construction problems similar to those which taxed the ingenuity of the pioneer rail builders, in our own country, who threw the lines of steel across the Alleghenies and other mountain ranges.
4. The electrified Gothard Express, on the new stone viaduct near Giornico. Note not alone the substantial but also the artistic construction of this bridge.
5. A generator-Rotor in the machinery hall of the Ritom power works.
6. Turbine wheel in the machinery hall of the Ritom power works. The water from the lake is hurled by gravity with tremendous force against the cups seen on the outside of the wheel, turning it and the generator attached and thus producing the powerful electric current. The figures of the men in this picture and in picture No. 5 suggest the immense size of these pieces of machinery.

THE BOYS WHO TURN OUT THE MAGAZINE

Left to right, lower row: H. R. Fogle, William Grund, William Fenker, Charles Wenzel, J. B. R. Jeffries, "Peck" Wright, Edward Newman, Charles Carroll, William Gottschalk, James Kolbe, Samuel Lewis. Second row: R. E. Hardy, R. Roth, H. Schroeder, Paul Cook, George Shuckman, C. Winchester, C. Smith, "Dan" Madison, J. Svaboda, Louis Englander, E. Broussard. Third row: A. Smith, E. Woods, George Yeager, P. Saunders, H. Reay, B. Friedlander, L. Marklin. Standing: L. W. Callender, S. E. Shackelford, Charles Adler, G. W. Paper, M. Johnston, George Behr, P. Herman, C. Knoepp, A. Clark, Samuel Magee, H. Toft, H. W. Braun, G. N. Bowers, George Meyers. In the doorway are: F. Feusahrens, O. Sherman, W. E. Staines, foreman press room; L. B. Frey, foreman composing room; Edward Meredith

at each station, so that each line between two stations can be disconnected by line circuit-breakers, thus allowing repair work on the contact line of one track, while the other track is in operation.

The current flows from the contact line through the current collectors to the locomotive, where its energy is used to drive the motors, then it goes into the rails and back to the feeding points, viz.: the power stations and the substations.

#### Electric Locomotives

The two types of locomotives now in service on the St. Gothard Line, are:

1. Express train locomotives, which are to haul local and express trains. They weigh 108 tons.

2. Freight train locomotives, to haul the freight trains. They weigh 128 tons.

The express train locomotives are able, with a stop of 15 minutes at the terminus stations, to accomplish the distance from Lucerne to Chiasso (20 kilometers) three times in 24 hours, hauling a load of 425 tons. On gradients of more than 21 degrees a second engine will be required as a helper. A single engine can haul a load of 300 tons at a speed of 50 kilometers on a gradient of 20 degrees.

The freight train locomotives are able, with a stop of 15 minutes at the terminus stations, to accomplish the distance from Arth-Goldau to Chiasso (180 kilometers)

twice in 28 hours, hauling a load of 860 tons. A helper engine is required on gradients of more than 10 degrees.

For the maintenance of the locomotives a large repair shop has been built at Bellinzona, where from eight to ten locomotives can be overhauled simultaneously. Two cranes of 80 tons capacity each are able to lift even the heaviest locomotives.

J. L. Thorman

Motor Products Corporation

Detroit, Mich.

Editor

Baltimore and Ohio Magazine

Baltimore, Md.

Dear Sir:-

A copy of your October MAGAZINE was given to the writer by your Detroit Office. It is a publication we would be pleased to receive each month, if you have a sufficient number for distribution.

While writing you, I desire to take this opportunity of complimenting your Company on one of your yardmasters located at DeForest Junction, a suburb of Warren, Ohio, namely; Mr. J. L. Thorman.

He certainly is an efficient solicitor of business for the Baltimore and Ohio, and the courteous treatment which he extends to your patrons has captured practically all of the traffic moving from the Trumbull Steel Co., Warren, Ohio, consigned to this

Company, at Detroit, as well as to several other large receivers of steel located in this vicinity, receiving material from the Trumbull Steel Co., which I dare say, has amounted to about 200 carloads so far this year.

I would like to have you publish this letter in one of your magazines, and will be pleased to receive a copy of it.

Yours very truly,  
Motor Products Corporation,  
(signed) J. H. Jackson  
Traffic Manager

Flagman J. K. Burke

Atlanta, Ga.  
May 28, 1922

Mr. R. B. Mann, Supt.  
Baltimore and Ohio Railroad  
Dayton, Ohio  
Dear Sir:

While traveling from here to Toledo, Ohio a short time ago, I got on a Baltimore and Ohio train out of Cincinnati, and my ticket was for the Big Four.

It happened just at the time that I had but \$2.50 on my person and your Mr. J. K. Burke loaned me the money. He had never seen me before and I shall never forget his kindness. Such men as Mr. Burke ought to be commended. He is flagman on No. 54.

Yours truly,  
(signed) Mrs. J. H. Lucas

# The Conversion of Sam McPay

By B. A. "Barney" McDowell, Inspector of Fuel Service

**F**IREMAN BILL McSPRY was the kind of a guy, who looked on life's bright side, who believed that a smile would take you a mile and he wore one five inches wide. His whole heart and soul, bent on saving coal, for Bill had it figured this way:

"If the Company furnishes me my Hay, and I can come back and save some Jack, for them from day to day, it's up to me, you can plainly see, to make my efforts pay."

"Here's old King Coal that I ram through this hole early morning till late at night, so this hog can scream with sufficient steam to haul this train all right. I've been poking black ore through this firebox door for going on twenty years and I get right sad and sometimes mad enough to bite off both his ears, when I stop to think of the careless gink and the way he handles his fire, so I hike down the line, to see Arch-Run-a-mine to help unburden my ire."

"Oh, Archie, old Trick, you're the kind of a Brick, that listens good to me, and in the Magazine, when your dope I seen, I says, that's got 'em up a tree; but the other day, I met Sam McPay (he's a careless son of a gun) and says he to me, 'Bill, do you read that swill that the Magazine's begun? It's lately been full of a lot of bull about how much you can save, and I for one, think it's all over-done, and that Archie Brick's on the rave."

"The whole world I'll tell, you got to work like—well, you gotta shovel coal in by the pile, and I know, by Gosh, that it looks like bosh, that you can save a scoop a mile. But, you, Bill McSpry, you're the kind of a guy, that claims to believe in this jay, so now I'll just see whether you can show me how it is you get that way."

"I'm telling you Arch, I was mad as a larch, so I turned to McPay and I said, 'If ivory was gold, you'd have John D sold, for that's all you've got in your head,' and 'Sam', says I, 'sure's

my name's McSpry, If I can show some self control, I'll explain to you, in a few words, too, how to save your share of coal.'

"Start from the shop, your fire nice and clean, with the pressure of steam 30 pounds below pop. If you're called for four, come a half hour before; examine your ashpan, blower, grates and firebox door. Get your fire nice and level, and without any hole, so no coal goes out the stack when she starts to roll. In firing don't "Slug" her, keep your fire nice and light—do this all the time and she'll steam all right.

"Remember the pop is a tattle tale, for you're sure wasting coal if the pop starts to wail—so don't try to keep steam right up to pop, give yourself five pounds, in case you stop, then if you're delayed a few minutes or more, you can keep her from popping without opening the door. Break your coal small and fire it light, and between each fire, close the fire door tight—Wet your coal to keep down the dust, but don't wet it too much or she won't "combust."

"Just remember this and your dollars you'll earn—Some water's good—but water WON'T BURN. Don't shake the grates much, keep your fire nice and low, for fire needs the air to keep right, you know. Learn the whole "Book of Rules," observe "Rule 942;" also Book on "Good Firing" from the front cover through. If you fire her often, and fire her light, you'll never be belching smoke black as night—for smoke like that is unburned coal, improperly placed through the fire box hole. Do not rake the fire, unless you've a hole to fill, a bank to break, or a clinker to kill."

When Bill had done, to him t'was fun, to hear friend Samuel say, "Well, I should smile—'Save a Scoop a Mile,' why, I can save two any day. And Bill McSpry, you're a wonderful guy, you knocked me clean off my roost, and upon my soul, when they say "SAVE COAL" I won't knock any more—I'll boost."

# Safety Section

## My Safety Plans for the Year 1923

*I want to talk of Safety in a way among the men  
That they will truly realize all that it means to them!*

By E. P. Welshonce, Trainmaster, Cumberland Division

**S**AFETY? What is the meaning of all we hear and read on this subject? It means exactly what it implies—the saving of life, limb and property.

During the year past we have had three distressing accidents among us, resulting in loss of a life in each case. It is not my intention to dwell on them long for it grieves me greatly because two of the men were employes with whom I had long been associated, while the third was a new employe. At least two of these accidents could have been avoided had the simple rules contained in that little pamphlet "The Safety Book of Rules" been complied

with by the employes, each of whom had one of these books in his possession.

### Use Your Safety Rules

This fine book is of no consequence and might just as well not be distributed among the men, if they do not read it, live up to the Safety rules absolutely, preach Safety among their fellow men and then put into practice what they preach.

I have always been an exponent of Safety from its inception to the present time. I do not believe there is a man on the railroad who does not believe in the Safety movement, and if there is, he should not be here.

Why shouldn't they carry out the rules

contained in this book? It is not only a protection to them, but think of the wife and children at home awaiting the safe return of their husband and father! If there is nothing else, a man should think of the suffering that may come to his loved ones in case he is so careless as to meet with a serious accident or even death.

On the West End, Cumberland Division, each and every man entering train and engine service is furnished with a Safety Book of Rules and the men are told to study the rules from cover to cover. In addition to this they are examined on the same rules by the rules examiner before being permitted to go out on the road so they have a clear understanding of what to do in order to safeguard their lives and limbs.

During 1923 it is my intention to know that these rules are lived up to in every case. I want to talk Safety among the men in such a way that they will realize what it really means to them.

One of the worst things we have to contend with on the Railroads at present is the practice of some of the men not stepping clear of all running tracks. This is the cause of many serious accidents. Why men risk their lives in this manner

## Analysis of Causes of 384 Automobile Accidents at Highway Crossings on the Baltimore and Ohio Railroad in one year—

is more than I can understand, yet it is done right along, not only by new employes but by men who have been in the service many years. During the coming year I want to bring this to the attention of all the men I come in contact with. I want to tell them how much safer it is to obey this rule than it is to disobey it and then suffer the consequences that come from their disobedience.

## They're Making Men's Eyes Out of Pig's Eyes

*But a Pig's Eye Might Not Look Well on You!*

**H**OW many are there who depend upon your eyes for their comfort and happiness? Your wife and children and maybe others look to you to provide them with the necessities of life. Upon your ability to produce rests their welfare. And of the five senses, none is more vital as a breadwinner than that of seeing. Minus your eyes you become—for the time being at least—a non-producer, a liability, instead of a virile, capable worker.

Do you appreciate your eyes? Nearly 200,000 persons in industry suffer eye injuries yearly. A substantial majority of these are unnecessary. Unnecessary because for a moment goggles were laid aside; because a shield was neglected; because someone forgot or was careless, or declined to wear the protection provided.

### You Can Get Goggles That Suit You!

Why do men object to wearing goggles? Some say "They are too heavy. They hurt my nose. They hurt my ears. They look funny. The lenses get cloudy. They're in the way."

Poor excuses, all of them. Do such men try to get goggles that are satisfactory, or do they just throw them aside saying, "I'll take a chance?"

What happens when goggles or face masks are not worn and an eye is lost? Pain and suffering, disfigurement of features, loss of earning power, life long regret. We who have eyes look with pity on those who have one or none to see with. BUT, unless we profit by their example we are in danger.

### Do Your Eyes Need Examination?

Do things sometimes look blurred to you? How often do you have headache or eye ache; do your eyes feel puffy and watery or inflamed? These are often Nature's warnings that you have defective vision and that in addition to goggles you need the attention of an oculist. Some day you are going to be fooled by those nearsighted or weak eyes of yours and get hurt. Next to the hazards to the eye itself through lack of protection, comes the danger from poor eyesight. It is said that over 25,000,000 persons who are working in the United States are handicapped by defective vision or eye strain—almost one quarter of our nation's population. Better check up!

Let's all get back of the Safety movement this year with renewed energy. Let us preach the doctrine of Safety this year more than ever before and see if, on December 31, 1923, we cannot say that the year 1923 has been a banner year so far as reduction of personal injuries is concerned. We can do it, but it means concentration on this subject by all of us.

No word should be necessary as to when to guard the eyes. Flying sparks or splashing molten metal, flying bits from flying chips, castings and battered tools, emery wheels, injurious light rays and intense heat from high temperature welding, steam, hot water, or bursting glass, acid burns and chemicals are causes of eye accidents that are preventable if the proper caution is observed.

You may be willing to take some chances but the chance of blindness you *cannot* take and still expect to derive much from life.

Skilled doctors in a New Jersey city recently, in a desperate effort to restore eyesight to a youth blinded by a Fourth of July explosion, grafted parts of a pig's eye onto one of the injured eyes. The attention of the world is on that experiment. If it is successful, science will have made another advance—but don't depend too much on that. A pig's eye may not look well on you.

The value of your good vision cannot be expressed in any terms. Look at it from the viewpoint of your family, yourself and your life in general and then ask "Can I afford not to protect my eyes?"

## Conductor R. A. Brake and Brakeman J. B. White

Box 31, Dellslow, W. Va.  
November 21, 1922

Mr. W. Trapnell, Supt.  
Baltimore and Ohio R. R.  
Weston, W. Va.

Dear Sir:

I am not accustomed to handing out bouquets, yet when the idea is entirely in order I think the opportunity should not be neglected.

On November 16 I travelled from Gassaway to Charleston on train No. 37. We were more than crowded and conditions were not the most pleasant for the trip. However, I noticed the ever pleasant attitude of those in charge, Conductor R. A. Brake and Brakeman J. B. White, and their continued generosity to all those travelling. Therefore I thought it not out of order to hand in a compliment for them.

I have electric railroaded two different periods during my life, and I seldom find trainmen as kind, sociable and considerate as I, myself, tried to be when handling the public. But I have nothing on those mentioned above. While I believe in sobriety and firmness in business, yet smiles cost nothing, kindness is free and good treatment is always in style.

Yours very respectfully,  
(Signed) H. H. Davis,  
Principal of Dellslow School,  
Monongalia Co., W. Va.

Good, absent-minded old Dr. W. was greatly dependent upon his practical wife. One morning Mrs. W. sent up an announcement after he had entered the pulpit, with a footnote, intended to be private.

"The Woman's Missionary Society," he read aloud, "will meet Wednesday afternoon at three o'clock sharp. Your necktie is crooked; please straighten it toward the right."—*The Watchman-Examiner*.

Foremen should make it their business to see that our men wear their goggles, properly adjusted for comfortable work

# Have You Gotten Your Free Booklet Showing Floor Plans of 50 Homes; or that Set of Complete Plans and Blueprints for Your Own Home at \$2.50? See Below

You Can Get a Complete Set of Blue Prints and Plans for Any One of These Houses for \$2.50. Order by Plan Number from the Editor, Mt. Royal Station, Baltimore, Md. This offer is made through the courtesy of the American Wholesale Lumber Association.

A handsome booklet issued by the Southern Pine Association, and containing the pictures and floor plans of fifty modern houses, may be had without charge from the Editor of the Magazine on request. We have already distributed over 700 copies of this booklet. Complete working blue prints and specifications for any one of the houses in the booklet may also be had for \$2.50.

## Keep Your Eyes on Your Eyes

*One of a Series by Life Extension Institute Containing the Latest and the Most Scientific Information on Healthful Living and the Prevention of Disease*

SCIENTISTS have found a good deal of fault with the human eye. They claim that barring the vitality to make it work, they could turn out an eye more perfectly adjusted to human needs and to the obvious purposes for which the eye is intended. This is a severe indictment of nature. However, it would be well for man to consider what he has himself done to abuse this delicate yet highly resistant organ.

In the first place, as man has become civilized he has suffered to some extent by what has been termed backward evolution. He is no longer a hunter, a fisher, a dweller in the open places. There are many ways in which he can earn a living, even though he be crippled, blind, or deaf. In primitive times those born with defective senses were at a heavy disadvantage and not so likely to survive and propagate their kind. This may account to a considerable extent for the enormous percentage of eye defects found in the population. By eye defects we mean actual faulty vision and not the deficiencies of the normal eye of which science has complained. We have no means of making comparisons with the times when few people spent much time in reading, but we know that under modern conditions the eye is subjected to a great deal of work that does not tend to improve its efficiency.

Now, most regions of the body are improved by use and degenerate with disuse. You may ask, why is this not so with the eye? The answer is, that mere seeing does not constitute complete and vigorous work for the visual system. The eye is controlled by certain muscles just as truly as the hand is controlled, and when our eyes are practically fixed upon the printed page or employed chiefly for near vision, we do not afford well balanced exercise for the muscular portions of the visual system. That this must in time impair the vigor and quality of the tissues involved, is a reasonable theory. That it

will suffice simply to fit glasses to eyes that will progressively lose their visual acuity as time goes on is not reasonable. Perhaps we have been too self-sufficient in this matter in considering that our work was done when glasses that insure clear vision have been fitted. The other phases of visual hygiene should be more fully considered.

In primitive times the eye was vigorously exercised in the life in the open. It was employed more for distant vision than for near vision as it was continually roaming and on the watch for enemies, for game, or attracted by the panorama of nature. The mass of the population at the present time are making little use of the eyes for distant vision, and very intense use of the eyes for

near vision, especially in reading much fine print, much poor print, or in close industrial work. Investigations of the Life Extension Institute have shown that 66 per cent. of the working population have defective vision requiring correction by glasses. Only 20 per cent. of these people were actually wearing glasses. It is all important that glasses be fitted to correct visual defects, but it is also important that people give attention to exercising and resting their eyes just as they do to exercising and resting the balance of the muscular and nervous mechanism of the body. A special exercise for the eyes is as follows:

Take a red-headed hat pin and hold it between the eyes at a distance of about one foot. Bring it slowly to within a couple of inches of the forehead and then back again slowly to the original position. This exercise, practiced several times a day, for a few minutes, will strengthen certain muscles of the eye which are often found unequal in their development or lacking in full muscular power.

It seems reasonable to suppose that in addition to the mere strengthening of these particular muscles, the nutrition of the adjacent tissues would be improved by these exercises and perhaps the changes that come about with age, retarded. Those engaged in close work should be encouraged frequently to rest the eyes by gazing into the distance. If some attention were paid to these matters we would not see so many people with their foreheads screwed up into knots and perhaps we could mitigate to some extent the influence of backward evolution in making our eyes such defective instruments as compared to those of other animals.

## Secretary of War Praises Handling of Crowds at Army-Navy Game

WAR DEPARTMENT  
WASHINGTON

November 29, 1922

G-4 9227

Mr. Daniel Willard,  
President, Baltimore & Ohio Railroad,  
Baltimore, Md.

Dear Sir:

I desire to express my appreciation of the War Department for the splendid service rendered by your railroad to and from Philadelphia on November 25, 1922, in connection with the Army and Navy football game. I was much impressed with the excellence of the arrangements made for this transportation service, and am sure the officers and other personnel of the Army join me in this opinion.

The railroad officials responsible deserve much credit for the results of their interest and efforts on this occasion.

Yours very truly,

(signed) JOHN W. WEEKS,  
Secretary of War.

# Highest Honors for Miss Spengler, Baltimore and Ohio Good Will Candidate

IT was a great and gratifying honor which The Baltimore and Ohio won through its standard bearer, Miss Nina Spengler, clerk, Office of Auditor Merchandise Receipts, in the National Good Will Election centering in Baltimore. For most of the period of the contest the lead see-sawed between Miss Jessie Slee, the candidate of the United States Fidelity and Guaranty Company, and Miss Spengler, and few of us hoped for more than a close victory for our side. But when the final result was announced at the Lyric Theatre in Baltimore where the final rally was held on the night of February 26, the Baltimore and Ohio candidate had 181,355 votes or nearly twice the number of her next highest competitor.

An attractive candidate; the whole hearted support of the Company; an able organization headed by J. S. Murray, assistant to president, as general chairman, and F. H. B. Bullock as general treasurer; hard work on the part of all of the divisional and departmental captains and their aides; the spirited canvassing of the "flying squadrons" of young ladies sent out from Baltimore all over the Road; and, finally, the

generous response of employes and officers over the entire System, made the teamwork which brought the splendid victory.

## Organization

The last issue of the Magazine related how completely the System was circularized with literature concerning the worthiness of the cause and the qualifications of Miss Spengler. The trail over our lines was blazed by W. W. Wood, chief of Welfare, who spoke at many points and generally outlined the purposes of the campaign. Even he had been preceded by H. Irving Martin, Relief Department, who made the preliminary arrangements for the meetings.

The chairmen, of both sexes, appointed by the various departments and divisions to have charge of the canvass, entered into their work with the finest enthusiasm and determination and put in long hours in the sometimes not too gracious task of soliciting votes—and, incidentally, money to pay for them. Here, however, it was almost invariably a pleasant assignment to win supporters, for the ultimate purpose of helping the French rehabilitate their war desolated sections had a strong appeal.

No less enthusiastic were the chairmen appointed to push the canvassing on the divisions and they handled every request from headquarters in Baltimore with dispatch and energy.

Especially was this true when the divisional committees met and took about our various properties—shops, roundhouses, stations, etc., the "flying squadrons" of young ladies sent out from Baltimore, whose names are given elsewhere in this article. From superintendents down, every facility was afforded for comfortable and resultful work, and many friendships were made between the young lady missionaries from Baltimore and their fellow employes on line.

In addition to the individual solicitation made by committeemen, employe meetings were held at advantageous places, especially after the girl teams from Baltimore arrived, and the men in the shops, terminals and other places were happy to greet these campaigners for Miss Spengler and to give them a hearty welcome. Furthermore, officers and employes at many points made it their business to see that the Baltimore canvassers were properly introduced to

THE CAMPAIGN TEAMS

They brought home votes for Miss Spengler, money for France, good will for the Baltimore and Ohio from shippers and employes alike. They are, left to right, back row: Misses Lillian Foster and Audray Lilly, of Team No. 4. Second row: Misses R. Baker and Emma McClayton, of Team No. 1, and Miss Harriet L. Ebaugh, of Team No. 4; Miss Mabel Gessner, Team No. 5. Front row: Misses Margaret Brown, Lillian Schueler and Gladys Farley, of Team No. 2; Misses Nina Spengler, Margaret Stevens and Elizabeth Helfrich, of Team No. 3. Miss Virginia Smith, of Team No. 2 was ill at home when the picture was taken. Miss Spengler made her trip over the Valley with Team No. 4

NINA PUTS IT OVER FOR HERSELF— AND EVERYBODY HELPS HER

1. Miss Spengler drops in for a morning chat with Crossing Watchman G. F. Brown, Point of Rocks, Md. Mr. Brown has 41 years of Baltimore and Ohio service to his credit. 2. A picture taken by the Pittsburgh Sun-Post for its pictorial page. Left to right, front row: Miss Elizabeth Helfrich, Relief Department, Baltimore; Misses Eva McElroy and Elizabeth Lucey, of the Pittsburgh offices. Back row: Miss Emily Publow of the Pittsburgh Freight Station; Miss Margaret Stevens, of the Magazine; Miss Mildred Nordman, Pittsburgh, and J. T. Campbell, Assistant Terminal Agent, Pittsburgh. 3. The Valuation Department "Kandy Kyds" who sold candy and turned the proceeds over to Miss Spengler's campaign—George W. Hunt and William T. Brewer. 4. The girls of the Valuation Department who helped make and sell the candy; Misses Dorothy Fossett, Emily Minor and Lorine Rischeill. 5. Nina waves a greeting to the Engineer of No. 2 while that train is going 50 miles per hour

business friends of the Railroad in the cities covered, with substantial increases in the votes coming through this source.

#### How It Was Done

Numerous interesting schemes were developed to elect Miss Spengler. Certain far-seeing department heads put up prizes of one sort or another, on which chances were taken, each chance to count as a vote or multiple thereof. In one department a day's vacation or two was hung up on quite a few occasions and lucky the employe who got this extra respite from work through the medium of the chance taken and the vote thereby cast.

Colnel Jenks B. Jenkins, valuation engineer, called his department folk together and after his eloquent presentation of the subject of "good will" collected \$81.15.

His people were not satisfied, however, and a beauty contest was decided on, the "contestants" being pictured in the accompanying cut in white caps and aprons. "Miss George W. Hunt was "sold" as a perfect 54 and "Miss" William T. Brewer as a perfect 48. The three graces shown below this group are Valuation Department girls who made candy and sold it at such "exhorbitant" profit in behalf of our candidate that they pushed their total up to \$117.90.

#### Of Special Merit

When one starts to pick out any department or division for special credit, one is in the same quandary as in trying to single out individuals for the especially good work they did.

First let it be recorded that among the Accounting Departments, Miss Spengler's own department, Auditor Merchandise Receipts, returned the highest total of votes, a fitting proof that she is a "prophet with honor in her own country." Hard pressing the A. M. R. was the Office of the General Freight Claim Agent which, under the able leadership of Howard Riggan, and with hard work on his and his helpers' part, inside and out the service, returned a big total.

Of the departments which were only distantly related in Railroad fellowship to our candidate, the Police Department seems easily to take first place—as may be seen from the accompanying table. All credit to the four hundred odd men scattered up and down the line, who responded so generously!

Of the divisions Cumberland was high, and it is no detraction from its showing to add that Cumberland is the largest employing division on the System. Baltimore was a good second. Other divisions deserving special mention are Pittsburgh, Newark and Wheeling. Of the Traffic departments the Office of Freight Traffic Manager in Chicago easily occupies first place, and the Dining Car Department, the Freight Traffic Manager's office in Cincinnati and the General Freight Agent's office in Wheeling deserve commendation.

#### Outside Contact

It is unquestionably true that the Railroad benefitted materially from the campaign. Representatives of the Road met many of our shippers and passengers on a most friendly, congenial basis and ties which were already strong between the Company and many of its customer friends are now even stronger.

There was a good deal of newspaper publicity attendant on the campaign and in Baltimore particularly the name of the Railroad and the fine teamwork by all connected with it, were being constantly kept before the people. The young ladies soliciting funds and those who entertained them at divisional points had their pictures taken frequently and printed in the various newspapers. In not a few places motion picture houses permitted the showing of the film picturing the first Good Will delegation, etc., and the Baltimore and Ohio candidate, and a new phase of our organization and work on the Railroad was thereby shown to many people.

Of particular interest was the trip made "down the Valley" by Miss Spengler and party. At Winchester, Strasburg, Charlestown and other places motion picture houses turned their theatres over to the showing of the Good Will picture and on occasion the entire proceeds of these performances were given to the American Committee for Devastated France. Miss Spengler received a royal reception in her own bailiwick.

The general campaign committee in Baltimore put up a Ford Sedan for chance taking and the lucky chance out of the 35000, No. B-51, sold by C. M. Heany, superintendent of Buildings, was bought by William H. Flavin, Purchasing Department, who will henceforth have a chance to spend his spare change for gasoline and tires. By the irony of fate, Mr. Heany held vote B-50, just one before that of the winner.

A big show was given in the Garden Theatre in Baltimore and netted our candidate quite a substantial sum. A beautiful wrist watch was awarded to Miss Rose Michael, Office of District Master Mechanic,

## Miss Spengler Wants Us All to Share Her Honor and Happiness

Baltimore, Md., February 27, 1923

Dear Friends of the Baltimore and Ohio:

How can I thank you for your wonderful support in the Good Will Campaign, that resulted in the gratifying honor which came to me as your candidate on the Baltimore and Ohio!

When that fortunate third envelope was pulled out of the envelope by Senior Vice President Shriver and showed my name as the lucky girl, I could not, even then, be sure of the election—it all seemed too good to be true. But when I saw the enthusiasm of Mr. Murray and Mr. Bullock, and of the team captains and of all the people in Baltimore who helped start the campaign—enthusiasm for those unfortunate French farmers and women and children whom the American Committee is going to help—I was greatly encouraged. And when I got out on the Road with my girl teammates, and all you good people received us so cordially and gave us such good support, I was sure that the Old Baltimore and Ohio was going to come out on top.

Now that the campaign is over and the overwhelming victory ours, I want you to know how much I appreciate my honor and responsibility. We must never forget the real purpose of the campaign—to succor some of those who were our allies in the Great War, and, through the agency of the women candidates who go to France, to bring back to America and Americans a true picture of the conditions in the devastated regions. It will be my pleasure to do this for Baltimore and Ohio people and to give them as much of a share of my trip through letters, pictures, etc., as I can. And don't forget that I'm mighty proud of our victory—and of the Baltimore and Ohio—and I'm going to tell people all about it!

It would be a real pleasure and privilege for me to shake the hand of every person on the system who contributed to our success, but this being impossible I send you my heartiest thanks and best wishes through this letter.

Most sincerely

*Nina Spengler.*

Baltimore for selling the largest number of tickets for this performance. Second to her was Miss Theresa Cook, Office of Auditor Passenger Receipts, who, in view of her fine work, was awarded the same kind of watch.

Miss Spengler has received many congratulatory letters since her well deserved victory and, our readers will be glad to know, is in good health and looking forward to her trip with the greatest interest.

Fifteen other cities are having or have had the same kind of voting contest as did Baltimore, for the trip scheduled to start on April 18. At this writing eleven of them have completed their balloting and of all the 51 candidates elected, including those from the Baltimore delegation, the next highest to Miss Spengler had 115,630 votes.

It is a particular pleasure to be able to announce now that the young lady employe to accompany Miss Spengler will be elected by a System-wide popular vote under the fairest plan imaginable. Details of the voting plan have been bulletined all over the System and the vote is now in process of being taken.

The whole Good Will campaign on the Baltimore and Ohio was a magnificent illustration of what organization, back of a worthy cause, can accomplish through teamwork. It was a job well done and the lesson it suggests will not soon be forgotten.

#### Teams Sent on Line of Road

##### Team No. 1

Miss Emma V. McClayton, Miss Virginia Smith, Office of Operating Vice-President; Miss R. Baker, Office of General Superintendent of Transportation.

##### Team No. 2

Miss Gladys Farley, Office of Operating Vice-President; Miss Margaret Brown, Office of the Treasurer; Miss Lillian Scheuler, Office of Auditor of Disbursements.

##### Team No. 3

Miss Nina Spengler, Office of Auditor of Merchandise Receipts; Miss Margaret Stevens, Associate Editor, Magazine; Miss Elizabeth Helfrich, Relief Department.

##### Team No. 4

Miss Nina Spengler,\* Office of Auditor of Merchandise Receipts; Miss Lillian Foster, Office of Auditor of Freight Claims; Miss Harriet L. Ebaugh, Office of Auditor of Coal and Coke Receipts; Miss Audray Lilly, Auditor of Miscellaneous Accounts.

##### Team No. 5

Miss Mabel T. Gessner, Passenger Representative.

\*Miss Spengler left Team No. 3 on February 16, 1923, at Pittsburgh, for trip over the Valley with Team No. 4.

NINA TAKES A RIDE ON A HANDCAR

And the whole gang was there to accompany her. At Miss Spengler's left is C. D. Rutherford, Foreman of Section No. 60, Baltimore Division. He has been in the service of the Baltimore and Ohio for 14 years.

# New Grain Elevator Facilities at Locust Point

By L. P. Kimball, Engineer of Buildings

THE Baltimore and Ohio Railroad Company is now preparing detailed plans for a complete new grain handling terminal to be located on its property at Locust Point, Baltimore, Md. This plant will replace the facilities which were entirely destroyed by fire on July 2, 1922. These were known as Elevators B. and C., wharf type elevators of wooden construction erected in 1874 and 1881 respectively, and which had an aggregate storage capacity of 2,500,000 bushels.

The new facilities will be in the form of a concrete elevator of the most modern type and an idea of the appearance and arrangement of these facilities may be obtained from the accompanying picture.

## Location

The elevator plant proper will be located approximately 500 ft. from the waterfront to permit of the use of a loop track layout, by means of which the loaded cars will be delivered at the west end of the plant and the empties will be taken away by gravity at the east end. Unloading tracks will have capacity for the placing of 80 loaded cars at one time, and the arrangement of tracks above described will permit the continuous operation of unloading equipment without interruption for switching of cars as is usually necessary in a terminal of this character.

## Unloading Equipment

Grain received in cars will be unloaded by four special car dumpers, arranged to tilt the car and discharge the grain from same at the rate of eight cars per hour per machine. These dumpers will be housed in unloading shed over tracks along the north side of buildings. An extension of this unloading shed, 176 ft. in length, will be constructed for use as a drip shed, which will permit the prompt handling of cars in inclement weather. Grain discharged by each of the car dumper units will be

conveyed by belt conveyors located in tunnels under ground and delivered to elevating legs in workhouse.

## Workhouse

The workhouse, where the principal handling of grain will be carried out, is a reinforced concrete structure 61 ft. wide by 240 ft. long and 206 ft. high above the tracks, in which are included elevating legs, garners, scales, cleaners and other equipment. The bins in the workhouse will have a capacity of 800,000 bushels, which will be used for shipping, cleaning and other purposes. To elevate the grain in the workhouse there will be provided 20 elevating legs, and of these, eleven, which will be used for the major operation of receiving and shipping, will have a capacity of 25,000 bushels per hour each. There will be provided 12 main garners and scales, having a capacity of 3,000 and 2,500 bushels each, respectively. In addition there will be four smaller garners and scales for use in connection with the driers.

## Storage Annex

Storage annex will consist of 182 cylindrical tanks, 16 ft. in diameter and 96 ft. in depth, and the resultant interspace bins. These tanks will cover a ground area of 225 x 209 ft. For the delivery of grain into storage tanks, there will be provided in cupola story over tanks, ten 48 inch belt conveyors, and for the unloading of grain from these tanks for shipping or other purposes, there will be provided in the basement seven 42 inch belt conveyors. The storage capacity of these bins will be 3,000,000 bushels and provision will be made in their construction for the future installation of additional bins with a capacity of approximately 5,000,000 bushels, which will make a total future storage, independent of the workhouse, of 8,000,000 bushels.

## Shipping Facilities

For the shipping of grain in vessels, there will be provided a gallery system leading from the shipping bins in workhouse to the waterfront. This gallery system will contain six 42 inch belt conveyors, each with a capacity of 25,000 bushels per hour. Provision will be made for the connection of these conveyors to a gallery system, which consists of four conveyor belts on new Pier 7 and two conveyor belts on each side of existing Pier 6. New Pier 7 will be built as an open structure, 50 ft. in width, and supporting grain galleries only. The above arrangement will permit the berthing of eight ships for grain loading at one time—four at Pier 7 for exclusive grain shipments and four at Pier 6 for combined shipments of grain and general cargo. Grain can be actually loaded into ships at six of these berths at one time at a rate of 25,000 bushels per hour each. Shipping galleries are arranged so that they can be extended in the future to other piers.

## Marine Unloading Equipment

For the unloading of grain received in small bay boats, there will be provided at the outer end of Pier 7 a marine tower with pneumatic unloading equipment and a return belt conveyor to deliver grain to workhouse. This equipment will have the capacity of unloading one average schooner per hour.

## Drying

For the drying of grain, there will be provided immediately adjacent to workhouse a concrete structure containing eight drier units, each having a capacity of 500 bushels per hour. The Hess type of drier has been selected for use in this installation.

## Dust Collection and Fire Prevention

The elevator plant will be designed of incombustible materials throughout in accordance with the most approved modern practice for the prevention of fire and explosion hazard. The equipment will include a very complete system for the collection and removal of dust from the plant, and this equipment will be arranged to collect the dust as far as possible as it

*(Continued on page 80)*

Excavations have already been started for this modern and flexible grain elevator plant at Locust Point

## Vice President Galloway Addresses Chamber of Commerce and Veterans of Connellsville

IT was Baltimore and Ohio Day in Connellsville. When No. 7 arrived in town in the early morning there stepped from the train three young women from Baltimore who made up Team No. 3 in the campaign to secure votes for Miss Nina Spengler to represent the Baltimore and Ohio in France, and incidentally to get subscriptions for the American Committee for Devastated France. And in this group there was no less a personage than Miss Spengler herself.

Hardly had they arrived and started in on their campaign when it was announced that President Willard, Vice President Galloway and others of the officers would arrive on No. 15. Then, too, there was the big dinner to be given by the Chamber of Commerce in honor of Mr. Willard, not to mention the Veterans' Ball afterward.

The morning rolled on, the mayor of the town and the townsmen themselves, the Chamber of Commerce and the various industries of Connellsville, shopmen, clerks, editors and hotel proprietors—all these joined in making the day a great success. The only feature to mar the pleasure of the day was the news which came by wire that President Willard would not be able to get to Connellsville because of illness. It was a great disappointment. Vice President Galloway, however, appeared in his stead and delivered two splendid addresses before appreciative audiences that welcomed him into their midst quite heartily.

The banquet was held in the hall of the First Presbyterian Church. Rev. Proudfit pronounced the invocation, Kiferle's Orchestra furnished the music, and Charles T. Kepner, president of Connellsville Chamber of Commerce, presided at the dinner. The guests were in high spirits and many happy bursts of laughter went ringing down the hall, proclaiming to all the world that Connellsville was enjoying itself.

While the delicious turkey dinner served by the wives of the Veterans and the wives of the members of the Chamber of Commerce, and other women members of the Presbyterian Church, was being thoroughly digested, the guests were delightfully entertained by the following numbers:

Musical selections by Jiferle's Orchestra,  
Solos by J. Lowell Miles, of Scottdale,  
Singing by the Imperial Quartette,  
accompanied by Mrs. Clayton Campbell,  
Solos by Miss Florence Altman, of  
Brownsville, accompanied by Miss Naomi Harmon,

Recitations by Miss Leonore Weaver,  
of Mt. Pleasant.

In introducing Miss Weaver, Mr. Kepner said: "I can read in your faces the words, 'just as soon as I get to that table I am going to ask Mr. Galloway!' so and so. Nobody save a young lady from Mt. Pleasant has the permission to ask Mr. Galloway why they can't resume eight to twelve trains per day at Mt. Pleasant."

Mr. Kepner welcomed the officers of the Baltimore and Ohio and the visitors on behalf of the Chamber of Commerce.

"I have the painful honor of notifying you that Mr. Willard will not be with you tonight," Mr. Kepner continued. "He wanted to come but his doctor objected. We do not want Mr. Willard to feel that the generosity of Connellsville is not great enough to excuse him under such circumstances.

"Mr. Galloway's welcome, however, is none the less sincere."

(Mr. Kepner then read a telegram from President Willard in which he expressed his regrets at not being present.)

"We know that if it had been humanly possible, Mr. Willard would have been with us. We extend our condolences to him. Connellsville is first, last and always with the Baltimore and Ohio. The splendid party assembled here tonight just

goes to show us what the Baltimore and Ohio thinks of us. I anticipate a trip to Pittsburgh tomorrow on my favorite road. We are with the Baltimore and Ohio in spirit, word, and action.

"Mr. Galloway is here to represent Mr. Willard. I shall ask a man who has served the Baltimore and Ohio for 52 years and who is still plugging away, to introduce Mr. Galloway. It must be a wonderful railroad that can produce a man like P. J. Harrigan."

Mr. Harrigan, stately and active, despite his white hair and his 52 years of service, arose to address those who have known him and grown up with him on the Baltimore and Ohio.

"In showing our loyalty to these officers of the Baltimore and Ohio," said Mr. Harrigan, "we are showing it to those who represent the president of the first real railroad and the greatest railroad in the United States. I feel that if he is not with us in person, he is with us in spirit. The Veterans' Association has recognized as its cardinal principles and purposes Unity, Friendship, and Sociability. The officers of the Connellsville Division, we feel, are the best that any railroad in the country has. They and the president are requesting that we employ him as one great family. I see in it many people of many nationalities in and around Connellsville. I come to represent them in greeting our president, and in his absence I feel that their greeting to our vice president will be none the less hearty. . . . I have the pleasure to introduce to you now the best railroad man on the best railroad in the United States—Mr. C. W. Galloway."

"Such generous introduction," declared Mr. Galloway, "seems embarrassing to me before strangers. Mr. Harrigan makes me feel as though I should not be unmindful of my association with him, which dates back for a number of years. I want to acknowledge his great help to me when he was master mechanic. When a man got by in his examination with Mr. Harrigan, he was a good engineer.

"I feel out of place to be a substitute for the remarkable man who was to have been your guest this evening."

Mr. Galloway then expressed Mr. Willard's disappointment at not being able to be present, but promised that he was but postponing his visit to Connellsville.

"There seems to be a tendency to attack the railroads from every direction," Mr. Galloway said. "A new propaganda has been started. It comes from unreliable sources and does not deal with facts. And the public should know the facts for they pay the bills."

"The President of the United States saw fit to take over the railroads in the war emergency, and they were turned back to their owners in a crippled condition. I say this not in a manner of criticism, for it was a war necessity to make the machinery go as hard as it could go. Machinery just

was used then that never would have been used under ordinary circumstances.

"The Transportation Act of 1920, passed by Congress when the roads came back to private control, was a most constructive piece of legislation, and the Baltimore and Ohio has been operated absolutely in accordance with it, ever since it became the law of the land.

"The Baltimore and Ohio has always treated its men fairly. The Baltimore and Ohio does not care how many union labor organizations there are any more than it cares about a man's politics or his religion. But it believes in respecting the law of the land and in the fairness of asking its employes to do the same thing, and not to strike at a decision of this law on the subject of wages or any other subject. Unfortunately our men in the shops did strike last summer. They lost an enormous amount of business to our line, badly disrupted our plans for equipment repair, maintenance, etc., cost us actually \$12,000,000 and over in various kinds of losses, and weakened our credit, thus making it harder for us to get needed moneys for improvements. And please do not let anybody try to persuade you that the employes of this Railroad can do this, and not hurt themselves. The prosperity of every man who has his name on the Baltimore and Ohio payroll depends on the prosperity of the Baltimore and Ohio.

"More unfair propaganda has been started about the inadequacy of the car supply to get coal where it is needed. Please don't forget the coal strike of 1922 and that most of the mines of the country were idle for five months in consequence, and thousands of coal cars were idle; then that the railroads were expected to handle in the remaining seven months of the year the entire year's supply of coal. And that they have handled this great task in a way that has made some of the best authorities in the country, not connected with the roads, give them high praise.

"When you read of car shortages, you should not always blame the railroads. At times last year there were as many as 20,000 loads of coal at the lake front waiting for boats. But the boats were not available to take the coal. Right now the grain elevators in Baltimore are full, waiting for boats to take the grain away. We can move grain into Baltimore when it is wanted but the elevators cannot take it because the water tonnage does not relieve them of the grain already stored.

"The Baltimore and Ohio will spend over \$20,000,000 this year for improvements and new equipment—all so that it can move its business more economically and give better service. We are getting 100 new locomotives, 50 new passenger cars and thousands of new freight cars. And our repair program is most extensive. We are doing our best, spending all the money we can, to handle the business

offered us in the most efficient way. But some interests are not reasonable and demand that we eliminate all our grade crossings. To do this on the Baltimore and Ohio would cost \$500,000,000, a sum which it would be impossible for us to obtain. Other folks ask us to build new bridges, which are not absolutely essential to handle our business, in fact, where the amount of business we get is comparatively small. We would like to do, as I am sure President Willard would say, all the things that would promote the prosperity of the people and the communities that we serve, but we can only do the amount that our resources permit and the most important must be done first.

"The best thing for all of us to do is to stop making faces at each other and settle down and try to come to a common understanding of each other's problems.

"Mr. Willard wants to know you people of Connellsville better, and I know that when you get him out here he will want to come again."

Mr. Galloway compared the person who argues about the railroad and the person who actually works for it. As an example he said that anybody would be willing to ride behind a train run by Engineer Fauver, but asked who would be willing to ride behind a theorist.

"Experience," he said, "must qualify a man for his work. Does the practical railroad man want government control of railroads?"

"I am going to take a rain check whether you give it to me or not," he concluded, "and invite myself back to Connellsville."

Mr. Kepner expressed for the audience sympathy in Mr. Willard's illness and asked for a rising vote of thanks to Mr. Galloway. There was vociferous applause.

Following the banquet the guests were taken to the State Armory, where the Veterans held forth with a reception, entertainment, and dance. Superintendent Brown introduced Mayor Mitchell, who welcomed the people to Connellsville and spoke in glowing terms of the Baltimore and Ohio, its officers, and its employes. Mayor Mitchell then introduced Mr. Galloway, who reiterated many of the things that he said in his address at the banquet. He furthermore paid compliments to the city of Connellsville, to the Chamber of Commerce, to the Veterans' Association there and to the Ladies' Auxiliary.

"In some instances," he said, "the purpose of the Veterans' Association has been misunderstood. There is no difference between the Veteran and the newest employe, in that the purposes of us all are common—to get the best results for the Baltimore and Ohio Railroad, and in getting good results, we shall discover that neither of us has horns. There is no problem that cannot be ironed out.... No official is so big that he can get away with any job without the loyal, consistent services of those who do the work. Success to the Railroad means success for you.... I am hoping that if another strike is ever contemplated, the participants will come in and talk it over first instead of throwing everything into the pot to boil."

Mr. Galloway then introduced Miss Spengler, the Baltimore and Ohio Good

## Stockholder Compliments Dining Car Crew on Number Nine

Morris Whitridge  
10 South Street  
Baltimore, Md.

February 21, 1923

James S. Murray, Esq.  
Assistant to the President  
Balto. & Ohio Bldg.  
Baltimore, Md.  
Dear Mr. Murray:

As a stockholder in the Baltimore & Ohio Railroad Co. it has always been my custom to use the Baltimore & Ohio whenever possible. I returned from New York last week on the 4:45 p. m. train, which was well filled, but what I particularly wish to mention is the excellent service and dinner I had in the dining car. The table d'hote dinner was well cooked, served hot and with most polite attention, and while dining with a friend we both commented on the excellent service and delicious food.

While this is an age of "kicks" in every direction, perhaps you will be pleased to know the above facts.

With kind regards, as always

Sincerely yours

(Signed) MORRIS WHITRIDGE

Will Candidate, who is the daughter of a railroad man. Miss Spengler delighted the Connellsville folk with her smiles and won their votes for herself and their money, which helped to carry the Baltimore and Ohio over the top in the campaign for France.

Included in the party of visiting officers in addition to Mr. Galloway were E. W. Scheer, general manager; W. G. Curren, general superintendent of transportation; George W. Sturmer, president of the Baltimore and Ohio Veterans' Association, all of Baltimore; E. A. Peck, general superintendent, and W. W. Blakeley, general freight agent, both of Pittsburgh.

Representatives from the Pittsburgh and Connellsville divisions included: W. H. Eaton, division freight agent; F. M. Jordan, coal freight agent; J. C. McCormick, traveling coal freight agent; R. W. Brown, superintendent; M. L. McElheney, trainmaster; C. R. Burns, road foreman of engines; John F. Long, master mechanic; J. L. Lowney, trainmaster; J. P. O'Donnell,

trainmaster; E. S. Marsh, road foreman of engines; C. Shuh, road foreman of engines; L. N. Keck, yardmaster; Roy Hoover, chief dispatcher, and J. J. Smith, chief dispatcher.

On behalf of the Chamber of Commerce the entertainment committee consisted of the following: E. T. Norton, W. D. McGinnis, J. Fred Kurtz, Guy Corrado, J. J. Dougherty, R. S. Matthews, R. W. Brown, George S. Connell, Charles T. Kepner, A. B. Norton, Jr., C. B. Franks, Dr. J. L. Cockran, E. R. Floto, T. Fred Rieman, A. C. Stickel, C. C. Mitchell, Robert Norris, H. S. Whip and J. Donald Porter.

The Veterans' committee of arrangements consisted of W. W. Haines, chairman, James Wardley, E. C. Loudon, Thomas J. Brennan, Anthony R. King, S. T. Erwin, J. L. Fries, H. D. Whip, E. K. Smith, David Lunnen, E. H. Fenstermacher, R. R. Whipkey, John A. Larue, J. F. May and J. W. Turner.

young man handling baggage at the station at 3 a. m., who said that he had tried in every way to get someone to take his place, but had failed.

"The tumult and the shouting dies,  
The captains and the kings depart,"  
but with cherished memories that will warm the heart of many a man as he fights the battles of transportation on the front line.

All honor to the committee in charge! They were C. M. Groninger, chairman; J. A. Tschour, A. C. Harris and T. C. Smith. Many are the fervent wishes that The Family may meet again among flowers and flags and music to celebrate duties well done and faith well kept.

## News from Martinsburg Auxiliary

By Mrs. C. Virginia Taylor

FIRST of all, your correspondent would ask the pardon of our members for not having sent in any notes for the January MAGAZINE. We hope to do better in the future.

Our banquet on January 20 was a great success, thanks to the presence of the visiting officers and to our own "home talent" who helped to make an interesting entertainment. We thank the boys of the U. B. Church who sang for us and we hope to have them with us again. To Mrs. Merle Cox we also extend our appreciation for the delightful reading. Mrs. Cox is the daughter of the late Engineer Shaw, who long ago answered his Last Service call. Several of our local ministers added to the pleasure of the occasion as did also our old friend, Senator Faulkner, in an inspirational talk.

President Willard's address was heartily enjoyed and his presence was appreciated. Vice President Galloway, who had chaperoned the members of the Ladies' Auxiliary from Baltimore, spoke to us and gave much helpful advice, straight from the shoulder.

We were glad to meet the ladies from Baltimore and to hear their president, Mrs. Charles Lewis. Mrs. Lewis is the woman on the job. We also wish to extend our thanks to her for her splendid entertainment when the Grand Lodge met in

## Akron Division Folk Spend Gloriously Happy Evening

By W. W. Wood, Chief of Welfare

THE family gathering of the Akron Division of the Baltimore and Ohio Railroad at the Auditorium, Akron, on the evening of February 2, equaled if it did not surpass in size and splendor any similar gathering in the history of the system. The Akron members of The Family, 2000 strong, had just assembled in the flag-draped hall; the orchestra had just sounded its first alluring notes, when "a silver snarling trumpet 'gan to chide," and there burst into that hall of revelry the folk from Dover, from Lorain and from Cleveland, with bands and waving banners and nodding plumes—1500 strong—who, to the music of fife and drum and trumpet, circled the wide hall.

A brief address by District Freight Agent C. M. Groninger, chairman of the Committee of Arrangements, introduced Mayor Rybolt, who welcomed the family in an enthusiastic speech. A brief address by Superintendent D. F. Stevens, Akron Division, introduced President Willard,

who expressed his delight at the sight of such a good looking family.

Then Music's golden tongue set palpitating the feet of young and old, and led the thousands turning into the dizzy mazes of the dance. From hour to hour the dance went on, the flitting moments filled with chatter and laughter, the meeting of old friends and the making of new until "the bell then beating one"—the strains of "Home, Sweet Home" sobbed and died on the early morning air.

Vice-President C. W. Galloway was there, continuously meeting a thousand old acquaintances and making many new ones. General Manager R. N. Begien, Western Lines, was there, beaming with paternal pride as he watched the happy family. Yes, it seemed as if everybody was there. An operating man who stood looking over the throng, gasped: "My Glory! Who's running the railroad tonight?" But the road ran—not quite all were there. The writer fell in with a

WITH PRESIDENT WILLARD ON VISIT TO GOODYEAR RUBBER COMPANY PLANT

Left to right: H. A. Lane, Chief Engineer; R. H. Troeschler, Agent, Akron; C. M. Groninger, District F. A., Akron; C. M. Gosnell, Division F. A., Akron; H. O. Hartzell, Manager Commercial Development; R. P. Bowe, Traffic Manager, Goodyear Rubber Co.; J. C. Kimes, Assistant General Freight Agent, Cleveland; O. S. Lewis, Freight Traffic Manager, Baltimore; William Stephens, General Superintendent, Goodyear; C. W. Galloway, Vice-President Operation and Maintenance; Daniel Willard, President; C. P. Slusser, Factory Manager, Goodyear; J. A. Scheuerman, Coal Freight Agent, Cleveland; W. C. State, Mechanical Engineer, Goodyear; R. N. Begien, General Manager, Western Lines; J. G. Strickenburg, Division P. A., Cleveland; W. W. Blakely, General Freight Agent, Pittsburgh

Baltimore. Come to see us again, Ladies of Baltimore.

Now I shall tell you something more of our trip to Baltimore.

Sister W. A. Burkhart, though small in stature, gets over the ground just the same, even if your correspondent does walk her to death when she escorts her around. There were six of our ladies who represented Martinsburg at the Convention and all had a fine time, despite the fact that one of our number happened to fall up the step on getting on the train. Those present were: Delegate Mrs. W. E. Burkhart, President Mrs. Charles Auld, Treasurer Mrs. "Joe" Copenhaver, Correspondent Mrs. Clara Taylor, Mrs. John Oliver. We were chaperoned by Mr. and Mrs. Raymond Russler and Brother Fauver, president of our Veterans Association.

We were deeply impressed by Mr. Willard's splendid talk to the women. We drank in every word, for all that he said counted for so much and fitted in with our lives as Baltimore and Ohio women.

We had a fine trip on a special train to the American Sugar Refining Company's plant and we extend our hearty thanks to Mr. Galloway for this kindness and for the other ways in which he made our visit

pleasant. One virtue found in the leaders of men is gratitude for the service of others; this virtue our vice president possesses.

On the evening of the 26th we were delightfully entertained at dinner at the Southern Hotel, where we listened to a talk from Mrs. Donald R. Hooker.

The prevailing sentiment throughout the convention seemed to be the gratitude for those things which go toward our own betterment as railroad women. The writer believes that kind words go a long way, in our Auxiliary as elsewhere. It pays to speak them wherever possible. Let us take the blinkers from our eyes and show our gratitude to others. Let us extend a helping hand, and be less personal in our remarks. These are the principles on which we want to base our dealings.

We have a number of members on our sick list at present. Sister Burkhart has been complaining, but is much improved at this writing. Brother Howard Keedy has been on the sick list, but we believe him to be somewhat improved. We regret to record the death of Mrs. George Grove, wife of the late Conductor George Grove. Her death occurred suddenly as a reaction from a bad fall at Christmas time.

the result that they missed their supper. This would be funny if it weren't such a "serious" matter, at least for them.

## The Funny Side of the Auxiliary Convention

By Aunt Mary

WELL, Sisters, them of you what aint been to a meetin' of the Grand Lodge shore has got some-thing comin' to you. Them what was there has asked me to write an' tell you some of the things that happened. I aint goin' to waste no time on preliminaries, but jest bust right into meetin' as I did on Jan'y 26 an' 27, at the Grand Convention at Baltimore.

First of all, Sister President up an says, "Sister Hopper, Grand Outer Guard, don't you let a single soul in that door for no reason whatever, unless they be members of the 'Sociation.'"

"No, Sister President," declares Sister Hopper, an' before she got the words out of her mouth, in come two of Mr. Johnny Bopp's colored men. Course, they come in to bring a typewriter table, but pshaw! Sister Hopper shore knowed they wasn't members.

You all know "Safety Jack" Perin. Well, he brung his wife to the meetin', so when folks wanted to know who she wuz, she says, "Shore an' I'm Mrs. Safety Jack." A' we thought she shore wuz right; if we can have a Mrs. Santa Claus, there aint no reason why we can't have a Mrs. Safety Jack.

Sister J. M. Garvey had a handsome photograph of her husband, and all the other sisters was jealous. They wanted one of Brother Garvey, too.

Brother Sturmer (Making the ladies a visit): Yes, Sisters, a woman who has been the wife of a railroad man for 20 years deserves as much recognition as the man himself.

Sister Sturmer (peeping out from behind the crowd as her husband passed by): Huh, I notice that you sorter overlooked me anyway. Recognition! Girls, he doesn't even know I'm here!

Sisters (in unison) How are we going to find our way to Camden Station?

Sister Lewis: Reception Committee, please arise. (They did.) Now, just you hang on to their coattails and they'll get you there.

A reporter from one of the mornin' papers come in to interview somebody. The president asked the Press Committee to meet him, but the ladies got so frustrated on seeing a real live reporter that they let him slip out of their hands and he got away before they got hold of him. Did he get scared of the Grand Outer Guard?

Brother Wallburg, on visitin' the meetin', was introduced as "Sister Wallburg's Husband, Girls." Brother Wallburg hesitated but a minute. "Oh, I don't mind

(Continued on page 38)

## Ohio Division Veterans Annual Banquet

By A. E. Erich, Secretary to Superintendent

ONE of the finest meetings ever held by the Ohio Division Veterans was that of January 13, when a banner year for the railroads was predicted and full employment for railworkers.

Superintendent Iams gave a brief but replete talk on "better times in 1923," unfolding a promise of plenty to employes, and pointed out the rapid increase of the steel business as a barometer of the nation's business.

G. W. Plumly, president of our Veterans, pointed out that this organization has no political interest, creed or religion—that it is not for one but for all and that the desire is to keep out every tendency toward bickering, its three fundamental ideas being sociability, friendship and brotherly love.

In a welcoming address, Mayor A. P. Minshall reiterated the belief expressed that the railroads and their employes would reap the profit of a recovery from the business depression of the past year.

Mrs. Frank Howard, of Newark, Ohio, who organized the Ladies' Auxiliary to the Veterans here last year, also made a brief talk urging all who were eligible to join the organization.

About 200 members and their guests attended the dinner which was served in the Elk's dining room. Tickets had been sold for 50 cents to those desiring dinner. The entertainment and dance afterwards being free. Seven high school girls acted as waitresses, and as each guest passed out of the dining room a silver offering

was taken for them, which, when divided, amounted to \$1.75 each.

W. ("Bill") L. Allison, district safety agent, was chairman of the entertainment committee, which also handled the dinner, and is thanked for his capable management.

The entertainment program which followed was highly entertaining and pleasing.

Master Fred and Anna Ottman deserved the applause they received for their efforts with the violin and piano.

The applause which greeted "Bert" Streitenberger when she made her appearance for a solo, showed her popularity.

Misses Eleanor and Dorothy Allison made a hit with the song "Homesick."

"Jack" Miller's feet just won't keep still. In his number "Jiggs" he was at his best.

Miss Laurabelle Davidson pleased the audience with her songs.

Mr. Harry West and sister Florence received deserved applause.

John Gallaher's splendid voice was at its best.

"Life's Little Jokes" by "Bill" Allison were interesting and amusing.

A word of appreciation to the Safety Department is in order for sending Mr. Gans with his magic and movie. The picture "Careless America" is a splendid lesson for all of us on the subject of grade crossings and reckless driving of motor cars.

The saddest looking veterans present were "Fred" Darding and "Dick" Schleyer, who were on duty at the ticket office and were entirely overlooked in the rush, with

## Note:

All puzzles published in this department will be defined, as far as possible, from the *New Standard Dictionary*, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the *New Standard Dictionary*, the name of such authority must be stated at the end of the definition, in parenthesis. Obsolete words will be marked at the end of the definition thus—"obs". Variant spellings of a word must be marked at the end of the definition thus—"var". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

THE answers to the puzzles published in the December issue are:

Dak.; Todd, Mulkeytown, Ill.; Winkie, Charleston, W. Va.; Kee Pon, Malden, Mass.; Arcanus, Eloise, Iowa City, Iowa; and Jemand, Wilmington, N. C.

## New Puzzles

I. ANAGRAM

YES! FORT CAN STICK!

I

Perchance an aggressor may land on our shore,

Seeking to strike at our country's foundation.

Then we would awake, for such acts we abhor,

To protect all our loved ones from war's devastation.

Then our cause would be just,

We will fight if we must,

And once we begin, we shall conquer, or "bust;"

"That the Star Spangled Banner most truly may wave,

O'er the land of the free, and the home of the brave."

II

To repel an invader we would heed the first call,

And we will fight for our homes with great desperation;

With heart and with hand, whate'er fate may befall,

We'll not shame those who fought in the youth of our nation.

And the Red Cross you'll see,

The Salvation Army,

Comfort and aid as we fight to be free;

"That the Star Spangled Banner continue to wave,

O'er the land of the free, and the home of the brave."

III

O ye patriot sons, O ye men of the land,  
 Be ye ever responsive to Freedom's  
 emotion;  
 As our fathers of old, will ye take a firm  
 stand,  
 Proclaiming its tenets from ocean to  
 ocean.

Shall we not be as brave,  
 As those heroes who gave,  
 Their blood that still calls from the depths  
 of the grave?  
 "That the Star Spangled Banner forever  
 may wave,  
 O'er the land of the free, and the home  
 of the brave."

Baltimore, Md. Atlas

2. PENTAGON

1—A letter,  
 2—To tire out,  
 3—A razor clam,  
 4—A pace with short steps,  
 5—Chief city of Maryland,  
 6—In poetry, Germany,  
 7—A midday meal,  
 8—Threefold,  
 9—A gold coin of the United States.  
 Philadelphia, Pa. Alec Sander

3. NUMERICAL

10-2-7-4 all feel  
 Upon the B. & O. Line,  
 5-9-6 no other road,  
 'Tis 3-8-5 and fine.  
 Perfect 8-11-1 rails,  
 5-8-4-1 the best,  
 TOTAL its motto reads,  
 But that you must have guessed.  
 TOTAL both day and night,  
 Each workman that must heed,  
 And after TOTAL you will find  
 Great comfort, ease and speed.  
 Whitney Crossings, N. Y. Spica

4. TRANSPOSITION (5)

There is a certain state,  
 Of consequence, I rate,  
 Its people are peculiar, in a way;  
 There you may tote a gat  
 Or a bowie, and all that,  
 For such diversion one never has to pay.  
 You may even sass a bigger  
 Man, if quicker on the trigger,  
 You may pay your debts or cancel them at  
 will,  
 Sit in a game of poker  
 And make the trump the joker,  
 Claim a miss if you happen not to fill.  
 With impunity, I say,  
 You may have things your own way;  
 You can drive away the sheriff with a "boo!"  
 But you never can get by  
 With this: so do not try—  
 You got to pay your PRIMAL down in  
 TWO!  
 Lafayette, Ind. Towhead

5. OCTAGON

(Defined from New International)  
 1—Tray (Obs.),

2—A curved mark used to indicate a  
 short vowel,  
 3—Journeys,  
 4—Rotate,  
 5—An awner,  
 6—Fairies,  
 7—Sore (Obs.).  
 Mulkeytown, Ill. Todd

6. TERMINAL DELETION (6)

It's not a PRIME you need most  
 When you go fishing for ALL  
 On the famed New England coast:  
 A boat will be better this fall.  
 Fargo, N. D. Kappa Kappa

7. SQUARE

1—The organ in animals by the muscular  
 contraction and dilation of which, the  
 blood is circulated through the arteries,  
 2—A small tree having a spongy pith  
 and bearing dark purple or red berries,  
 3—Unburnt brick, dried in the sun, used  
 for building in Central America and Mexico,  
 4—A set of words represented by pictures  
 of objects whose names resemble in sound  
 those words or the syllables of which they  
 are composed,  
 5—A braid or lock of hair.  
 Baltimore, Md. Grace M. Manning

8. CROSS WORD ENIGMA

(Cross words of six letters each)  
 The PRIMALS and FINALS form the  
 name of a monthly particularly interesting  
 to us.  
 1—A lively Spanish dance,  
 2—To join to,  
 3—A Chinese fruit-bearing tree,  
 4—The love-apple,  
 5—Feeble in body,  
 6—A variety of grape from which wine  
 can be made,  
 7—A Chinese black tea,  
 8—One of the coats of the eye,  
 9—The highest mountain peak in Europe,  
 10—A substance which neutralizes or  
 forms salts with acids,  
 11—Native carbonate of soda,  
 12—A narrow mountainous pass.  
 Cincinnati, Ohio. Wick-o-cincy

9. DIAMOND

1—A letter,  
 2—To cause to sit,  
 3—The plural of Sacrum,  
 4—A discourse read or pronounced on  
 any subject,  
 5—To have faith in,  
 6—Esthetics,  
 7—A letter.  
 Baltimore, Md. L. E. Phant

10. PYRAMID

(Defined by New International)  
 Across:  
 1—A letter,  
 2—A representation of the surface of the  
 earth,  
 3—A former Empire of Eastern Asia  
 annexed to Japan in 1910,  
 4—Returns,  
 5—Houses for fowls.  
 Down:  
 1—A letter,  
 2—The tone D,  
 3—To know (Scot),  
 4—Chloasma (Med),  
 5—A galloch,  
 6—A country in South America,  
 7—Siamese coins,  
 8—To see,  
 9—A letter.  
 Brooklyn, N. Y. Gemini

11. MUTATION

GOD'S WREN'S SING  
 Where we use these garments, I dare not say  
 For then I'd give the answer away;  
 But if you will these letters change,  
 The answer's easy to arrange.  
 Baltimore, Md. C. Lion

12. RHOMBOID REVERSED

(Defined by New International)  
 Across:  
 1—A sharp point,  
 2—A large net,  
 3—Society  
 4—A kind of black tea of fine flavor,  
 5—To unit by a tenon.

**Prizes**

The two prizes, each of six months' subscription to the Enigma for the best answers to the puzzles in December issue, were awarded to Ben Franklin (W. E. Frederick) and S. T. Udent (Miss M. E. Whitehill) who furnished the best lists of answers.

Two prizes, each of six months' subscription to the Enigma, the official organ of the National Puzzler's League, will be awarded for the two best lists of solutions to these puzzles.

The splendid offer of Senior Vice President Shriver of a "New Standard Dictionary" for the employe of the Baltimore and Ohio who does the best work in the Puzzle Department during the first six months of 1922, should encourage every member of the Puzzlers' Club to his or her best efforts. If you don't own or have never handled a New Standard Dictionary you cannot imagine what a wonderful storehouse of knowledge it is. While you will be making an effort for this valuable prize you will also be acquiring some additional knowledge and be getting a great deal of pleasure and mental relaxation. So, let's go!

To receive proper credit all lists of solutions must be in my hands by May 5; the answers and solvers list will be published in the June issue.

Down:

- 1—A letter,
- 2—Pea (Obs.),
- 3—Plural of man,
- 4—The opah,
- 5—Pennon (Obs.),
- 6—To domineer over,
- 7—Single,
- 8—(Archaic) Not,
- 9—A letter.

Worthing, S. D.                      Sherlock Holmes

### 13. CHARADE (8)

Bill Jones went sportin' with his ONE—  
He took her for a ride,  
When TWO! within that railway coach  
A famous man they spied.

Bill held her hand and kept her close,  
But soon she slipped a-THREE—  
And curtsied low before my WHOLE—  
A great railroader he.

Baltimore, Md.                      Aunt Mary

### 14. SQUARE

(Defined by New International)

- 1—To talk idly,
- 2—A glucoside found in Calamus root,
- 3—Penetrating with an auger,
- 4—A group of small islands in the Adriatic sea near Pola, noted for their marble quarries,
- 5—Linen (Obs.),
- 6—The machine that hauls the train.

New Florence, Pa.                      Helva Goodman

### 15. DIAMOND

- 1—A letter,
- 2—The present,
- 3—Promontories,
- 4—A colorless liquid obtained from petroleum,
- 5—The second year of the college course,
- 6—A village in Nemaha county, Kansas,
- 7—The coast,
- 8—A part of the verb "be,"
- 9—A letter.

Johnstown, Pa.                      Tom Crestmore

### Between You and Me

Some of the boys and girls have been claiming that the puzzles are getting too hard for them to solve so this month we present some real easy ones which we feel sure they can work out without any great mental strain.

In No. 6 we present the first "Terminal deletion" published in this department. A terminal deletion is really a combination of a beheadment and a curtailment in that you cut off the first and last letters of the WHOLE in order to make the other word. In No. 6, "All" represents the complete word of six letters and by cutting off the first and last letters you will get "PRIME" which, of course, is a word of four letters. What these words are is intimated in the verse.

Dear, kindly Aunt Mary, who has done so much through this MAGAZINE for the entertainment of the little ones and who has furnished so much good advice to the

ladies of the Baltimore and Ohio family, makes her bow as a contributor to the puzzle department with No. 13 in this issue. Aunt Mary and I are not a bit superstitious about number 13 and I purposely gave her clever charade that number in the hope that it would bring me good luck by inducing her to submit further offerings.

Our puzzle bin is becoming sadly depleted. We want all sorts of puzzles but particularly want an assortment of flats. We can use beheadments, curtailments, cross words, deletions, transdeletions, charades; and a few pentagons, octagons, and hexagons, of the forms used in this department, will also be welcome. Get busy, you constructionists.

John Lindsay, Maintenance of Way Department, Connellsville, Pa., submits a rather unique mathematical problem. While it is not in line with the puzzles usually published in a department of this character we gladly submit it for the attention of the many who find pleasure in solving problems of this character. Here is the problem:

The idea is to place a number at each point of the star marked with a dot. These numbers must be such that when any three on a straight line are added together they will total 14; a second combination of numbers will total 16; another set 17, and still another set 19. But each of these combinations is a separate problem in itself. We will be very glad to have our readers submit their answers and due credit will be given in the June issue.

### The Funny Side of the Auxiliary Convention

(Continued from page 35)

that," he said, "in fact, I'm getting used to it."

Sister Garvey made it her business to inform the Veteran Brothers that, speaking collectively, there was a whole lot more gray hair among the menfolks than among the Sisters. An' right away they asked for the name of the hair restorer used by the sisters of the Auxiliary. 'Tis said that Brother Keane was ordered to purchase enough to supply the crowd.

"There aint no two people alike in this world," declared Brother Joe Covell. "For example, I've got twin daughters, an' they aint no more alike than nothin'. One of 'em's a regular fighter; the other will cry if you look at her. If it's that way with

twins, you know there's a lot more difference between you an' me."

A discussion come up about removin' wraps, hats, etc., in meetin'.

"Well," says Sister Lewis, "in larger cities it is customary—"

"Larger cities!" says Sister Wallburg, "Why there's nothing but large cities on the Baltimore and Ohio, an' the woman who can't take off her hat to the Baltimore an' Ohio, we want her to stay at home."

"Well," sings out Sister Gandy an' Sister Coxon, "While you're speakin' of larger cities, don't forget to mention Benwood an' McMechen."

"An' Lima, Ohio," concludes Sister Wallburg.

Sister Hodel: Can two Auxiliaries have the same name?

Sister President: "No."

Sister Helms: We named our Grafton Auxiliary the Charles W. Galloway Auxiliary, but since we aren't allowed to have twins, I guess we'll go back home an' re-name ourselves.

Sister President: The motion that we try not to be personal in our remarks has been carried.

Another Sister (under her breath): What a relief! I'm so glad now that nobody can say anything about my last winter's hat, even if she notices it.

Brothers Covell, Cox an' Egan made a pilgrimage to the shrine of the Ladies' Auxiliary. "Sisters," they said, "we're in trouble." "Brothers," said Sister Howard, "we'll help you out." (An' so they did, by passing the rule on "Who's Who," in the Auxiliary.) "It is a pleasure," says Brother Covell, "to meet these ladies who have the best husbands in the world." Was that a compliment to himself? Oh, well, he deserved it.

Sister Helm told of a jazz band composed of members of the Grafton Auxiliary, but she didn't name the instruments on which they played. "Accordions and jewsharps," I reckon, declared another sister. "Visit us and see," invited Sister Helm.

Grand Vice President Sister Garvey, on being re-elected, said: "Sisters, I thank you. You know that the Baltimore and Ohio has massive locomotives, splendid coaches, and fine dining cars, but none of them would be any good without the little coupler between them. That's my job; I'm the coupler." Then came a voice from the rear of the room. "Sister Garvey, I'm a widow. Do you reckon you could couple me with some nice Veteran who's looking for a good housekeeper?"

Sister Hodel, on being re-elected to position of grand chaplain, said: "I'll keep on praying as best I know how, and I'll remember you in my prayers." "Sister Hodel," said Sister Howard, "we appreciate your stand, and if at any time you forget your prayers, we'll get another preacher."

Sister Allgire, on being re-elected Grand Marshall, said: "I guess they think I can put 'em out better than anybody else."

Sister Hopper, on being re-elected to position of Grand Outer Guard, said: "Sisters, I'll do the best I can. Just now I'm on a diet, but before the end of the year, I hope to be back on my regular feed, and I'll guarantee that nobody shall get past that door."

Sister Secretary: I move that we adjourn.

Sister President: Will you kindly defer your motion for just a minute?

Sister Secretary: I'll be glad to defer it, but oh, I'm so hungry that I'm sure I'll never look the same.

On the trip to the Sugar Refinery, Sister Holmes entertained the party with a story:

"I was gettin' to be quite an old maid," says she, "when I met this nice lookin' widower with three children. Then, thinkin' my chances for gettin' married was growin' pretty slim, I said 'Yes' as soon as he asked me. As soon as we were married, we followed the lead of the children an' began callin' each other 'Mamma' an' 'Papa,' never thinkin' of our first names at all.

"One day, about ten years later, when we was ridin' along in a street car, I happened to look out of the window to read something on a signboard about William McKinley.

"'William,' said I, 'William, William. Why, Papa, that's your first name isn't it?'"

"'Mamma,' said he, 'If ever I felt like slappin' you in the face, it's now. To think you've been married to me for ten years and don't know my first name yet!'"

## The Death of Dr. Enos J. Hughes

By W. A. Ball

Assistant to Superintendent  
Relief Department

THE death of Dr. Enos J. Hughes, medical examiner for the Relief Department at Chicago, Illinois, on March 2, 1923, marks the passing of a modern Abou-ben-Adhem. He was veritably a friend to every man, earning that enviable distinction by unselfish service and endearing sympathy for his fellows.

With the loyalty, zeal and rectitude which characterize men of high degree, he strove earnestly and constantly to serve his Company and its employes. No deserving person lacked a champion if he enlisted the services of Dr. Hughes; no righteous cause languished unsettled if brought to his attention; no afflicted employe became grievously or permanently incapacitated by disease or injury, so far as it lay in the power of the Doctor to co-operate with nature in measures promoting rehabilitation; no superannuated workman sacrificed his highly prized intimate relationship with the Company, if fortune cast

his lot among those who came under the jurisdiction of Dr. Hughes; and last, but not least of all, no worthy dependent of a deceased employe ever had a more ardent and faithful protector and advocate than Dr. Hughes.

All of these priceless services to his fellow-men were rendered with that modesty and self-denial which we recognize as the most laudable qualities and enviable attributes of a real man.

The activities of the Relief Department on the Chicago Division reflect the personality and skillful guidance of Dr. Hughes during the past 36 years. It is not fulsome praise to say that few men so worthily merit commendation for the administration of the Department's welfare work among the Company's employes—Dr. Hughes was more than an official representative; he was familiarly and affectionately regarded as "the Relief Department" on the Chicago Division.

With Spartan resignation and fortitude, he calmly bore in silence the physical pain and mental anguish of an incurable organic affection; and despite his accurate professional knowledge that an early and abrupt termination of his life impended, those near and dear to him were never permitted to learn of his precarious condition. This self-sacrificing solicitude for others is a noteworthy manifestation of his nobility of character.

The most enduring memorial is to live in the hearts and memories of those who remain behind, and to have them gratefully testify that we have not lived in vain. We, who knew him, loved him, and witnessed his devotion to the welfare of humanity, seek hereby to express our poignant regret that he has gone to that "country, from whose bourne no traveler returns."

Dr. Hughes was born at South Charleston, Ohio, on September 2, 1855, received the degree of doctor of medicine from the

University of Michigan, and entered our service as a medical examiner for the Relief Department, on June 16, 1887, continuing therein up to the date of his death. He died at his home in Chicago, Illinois, on March 2, 1923, and was buried at Newark, Ohio, on March 5. He leaves surviving him, a widow, Mrs. Mary M. Hughes.

## The Death of John Hair

THE many friends which he made during his long career with the Baltimore and Ohio will deeply regret the death of John Hair, in Pittsburgh on the afternoon of March 4. Mr. Hair was operated on in a Pittsburgh hospital about two months ago and was doing well. In fact he was up and around the hospital and had expected to leave it shortly to spend the balance of the winter in Florida, when a turn for the worse, coming on the afternoon of March 3, resulted fatally. He was buried at his old home at Pana, Illinois.

Mr. Hair started as machinist apprentice at Pana, Ill., and went up through the grades of machinist, machine shop foreman, assistant general foreman, master mechanic, to the position of superintendent of Motive Power in 1903. In 1912, he was made the representative of the Motive Power Department on the General Safety Committee and in 1918 resumed his work with the Motive Power Department as a special engineer.

## M. W. Jones Practices as Well as He Preaches

FOR years there has been no more valuable and interested a correspondent of the MAGAZINE than M. W. Jones, secretary to superintendent, Weston, W. Va. He is always on the job, knows what to write about and how. Now, however, we present him not in the role of a scribe, but in that of an actor, the following being an exact copy of a letter received at the MAGAZINE office, which, when looked into, developed as the character in the leading role, none other than our good friend from Weston.

Grafton, January 10, 1923

Editor  
Baltimore and Ohio Magazine

On January 7 I was a passenger on train 12 out of Clarksburg in the New York sleeping car. The car was full and there was a lady, heavily built, probably about 40 years old. She had an upper berth, and asked the conductor if she could not get a lower, as it made her sick to climb up. He said he was sorry they were all taken. A Mr. Jones, who said he was from the Baltimore and Ohio office at Weston, heard the conversation, and at once stepped up saying that he had a lower and would gladly exchange to give the lady the preference. This was arranged and on the lady going to thank him he remarked that he was very glad to do anything he could to assist the patrons of his company. You will probably never hear of this from him, so I wanted to tell you why an outsider thinks the service of the Baltimore and Ohio is made popular.

An Observer,

The late Dr. Enos J. Hughes

A. E. DAY, Chief of Weighing Bureau, Transportation Department

# Weighing Bureau Led Winning Fight to "Stop That Leak" in 1922

But It Was the Cooperation of Many Transportation Forces that Brought Success!

By A. E. Day, Chief of Weighing Bureau, Transportation Department

I WISH to express the thanks of the Weighing Bureau, Transportation Department, to each agent and his freight station office and platform forces—to each yardmaster, his yard clerks and weighmasters—for the splendid cooperation they gave during 1922 in our campaign to check-weigh inbound and transfer less carload freight, and carload freight received from connecting lines. By this our revenue was increased:

### L. C. L. Freight

### Relation of Pounds to Dollars

My observation is that many of us fail to appreciate the *Relation of Pounds to Dollars* and notwithstanding precautions taken by Accounting and Traffic Officials at great expense, to see that correct rates are applied to all shipments of freight, through—shall I say "oversight"—on the part of employes at the scale to see that the full weight is used, the effort and expense to see that correct rates are applied may be wasted by the thoughtless man at the scale. *Ring up at Scale the Full Weight* on which revenue is based.

1923

If employes who have helped in the commendable work of check-weighing and revising classification of inbound and transfer less carload shipments will continue their cooperation, and others will follow their example, it is thought even greater increases in revenue will be shown.

Because of abnormal conditions prevailing in 1922 check-weighing carload freight was not urged, as it meant switching cars over scales in congested classification yards. But it is hoped that more of this commendable work will be done in 1923, as in 1922 a total of 1660 cars received from connections checked short in weight and freight charges to the extent of \$14,159.60, an average of \$8.53 per car. This emphasizes the need to check-weigh more carload freight, particularly cars received from connections when waybills do not show definitely that authorized weights have been used.

IT PAYS TO WEIGH

## My Home, My Neighbor and the Golden Rule

By Mrs. J. R. Easton, Wooster, Ohio

**M**Y first duty in my home is to make my home comfortable and cheerful for the members of my family—so cheerful that "loafing places" will have no claim on them. My second duty is to be a real good mother and wife to my four-year old boy and my husband.

My son is at the age when he requires careful training and patient teaching so that he may grow up in the right way in this wonderful world of which we are a part. Whether a child will be lovable or whether he will bring shame upon himself depends largely upon his surroundings and his early training.

It is my aim to please my little son in every way possible, but he, at the same time, must learn to respect and obey his parents. It is an injustice to the children themselves to allow them to have their way in everything. It teaches them to become unbearable and selfish. Selfishness, in my estimation, is one of the worst traits and every means should be used to overcome it. This is the first principle to work on in training our children. My second is to guard him against telling falsehoods. Showing the children the evils and troubles resulting from these two traits marks the most important steps to be taken.

Another source of help to the mother is the church and its Sunday school. Teach the child that in this, as in all things, we ought to do our best and never neglect an opportunity for doing good. To succeed in the best way it is necessary to lead a Christian life. Whether we be called upon to teach, to pray, or to listen, we should do our best. Sometimes we feel that we cannot perform our duties; even so, we can try, and if we place our whole trust in Him who hath created all things, we shall be able to accomplish something worth while.

We can bring much happiness into the hearts of those who suffer from illness; we can take them flowers, fruits and magazines; we can write letters for them and do them many little acts of good service.

The Sunday school class of which I am a member makes a special effort to take

something to those who are afflicted. The members of the class give a social each month. These socials are held in our own homes. We ask the young ladies who do not attend Sunday school to come to these socials and use this as one of the methods to increase our membership. People usually give poor excuses for not attending church and Sunday school. Mothers and fathers especially should attend their church duties and thus set the example to their children, as well as to their neighbors, in leading a Christian life.

### An Idea for the Ladies' Auxiliary

*The Drill Used by the Daniel Willard (Pittsburgh) Chapter*

By Mrs. H. K. Daugherty

Widow of the Late Conductor H. K. Daugherty, Pittsburgh, Pa.

**I** SHALL describe, as best I can, the drill which we use at our Auxiliary meetings.

We have two doors leading into our lodge rooms. At the recent meeting we used twelve women for the drill; we could have used more, for the greater the number the prettier the drill. We had two leaders, the wife of an engineer and myself. The leaders came in through the two doors respectively, the two lines following, marched forward, and met in front of the Vice President's station, then marched down the center of the room to within about five feet of the President's station.

Taking two steps to the side (one step at a time), we turned and faced each other. That gave us more room between lines. In this position we raised our flags to form an arch through which Brother Ben Rush escorted the visiting officers from the Grand Lodge, Brothers Garvey, Wardley and Harrigan, our own past president, Brother Cox, and our new president, Brother Reed. The introductions were made and we marched to the president's station, straight across to the corner of

the room, crossing lines in the middle of the room, each line passing out of the door opposite to that in which it entered.

The crossing in the center was done alternately; that is, when we met, Mrs. Norris, the leader of the opposite line, crossed over to our side of the room, and I crossed behind her over to their side. Then the second lady on her side, and the second on my side, and so on. The accompanying sketch will show the positions in the march.

Through the courtesy of Master Carpenter H. L. Faney, Baltimore and Ohio flags from the storeroom were put on sticks to be used for the occasion. In the drill we used red, white, green and blue flags.

We all enjoyed it, and our grand officers were pleased.

Those of us who attended the Grand Lodge Convention in Baltimore derived much benefit therefrom, and after hearing President Willard give us such a nice talk, we are more proud than ever that we named our Auxiliary for him.

### Household Hints

By Mrs. H. P. Grimsley

Wife of Geological Engineer Grimsley

**I**NTO the pot in which the ham is boiling, place from a half cup to a cup of vinegar and a handful of whole, mixed spices. This will improve the flavor of the ham wonderfully.

Never iron Turkish towels. Just give them a good shaking and fold them away. The loops will stand up well and the

Diagram of line of march used by the Pittsburgh Chapter of the Ladies' Auxiliary to the Veterans. "V. P." signifies the vice president's station; "S" shows where the lines halt and form an archway with flags, under which officers and visitors march

towels will have the nice, sweet odor of fresh air.

When taking down your draperies in the spring, roll them on large rolls made of newspapers, instead of folding them. They will come out flat when you want them next fall.

The well-managed household always has an account system. Keep a pencil and notebook handy and put down all of the money you spend. Compare your weekly and monthly allowances. Account for everything each day and you will see where your money goes.

### Simple, Practical and Healthful Foods

"Do you know," said Mrs. Irving, librarian at Mt. Royal Station, the other day, "that nine-tenths of the recipes given in the current magazines are bosh. They're not meant for railroad folk. They're not fit for railroad folk to put into their stomachs.

"I saw a recipe yesterday for lobster salad. Now lobster salad requires very little beside the splendid, fresh lobster meat, a bit of mayonnaise dressing, and there you are! But this recipe had everything under the sun in it, and by the time I got through reading it, I couldn't see where there would be a taste of the lobster left.

"What railroad people want to eat are plain, substantial foods like hominy and bean soup. You can get hominy grits from your grocer for two and a half cents a pound, think of it! Boil the water, sift in the grits, proceeding the same way as in making boiled mush. When the mixture has thickened, set it on the back of the stove to let the grains swell thoroughly. Pack in a square baking pan. When cold, cut off slices and fry.

"And who knows of a more wholesome, all-around family dish than good, old fashioned bean soup? It makes a fine winter food; it's good for everybody from Grandmother down to the little folk, and there's nothing better for the youngsters when they come home from school as hungry as little bears.

"For the recipe, take one quart of good pea beans (which, by the way, are quite inexpensive when you consider their food value), and soak them over night. In the morning have ready a piece of shin and a marrow bone. Put the meat, bone and beans into a pot with cold water and a bunch of soup herbs. (The herbs must be tied well together, for they are to be removed later.) Add one tablespoonful of salt and half a teaspoonful of pepper, two little carrots or one big one, scraped and sliced. Simmer for four or five hours. Good bean soup must be well cooked, the longer and slower the process, the better the soup will be. Remove the herbs, and when ready to serve, add a teaspoonful of fine parsley. A dish for a king!"

## Minna Had a Good Time Making This Dress

IT was a pleasure to make this little dress for our Women's Department," said Miss Minna Ruppertsberger, service record clerk in the Office of the Employment and Record Bureau, whose picture is shown here in the frock that she made. Yes, she did the embroidering, too, and made every bit of the dress herself. She found it interesting work, for the pattern is simple. This pattern was among the group shown in our February issue of the MAGAZINE.

Five yards of pongee made the dress, with one yard of material for lining. The embroidery is done in jade silk, and the panels are lined with jade. In the pattern itself the panels are not separate from the skirt, but, as Millie says, flying panels are so much more attractive, so she made the skirt plain and the panels separate. The embroidery pattern does not come with the dress pattern, but she found a pretty one in a shop; it was so interesting to embroider that she decided that instead of making just one design in the corner of the panel she would make a border of the design. You may see for yourselves how pretty this is.

The number of the pattern is 4257. It may be had by sending 12 cents in stamps to The Fashion Woman, Baltimore and Ohio Magazine, Mt. Royal Station. Use the pattern order blank on the fashion page, or, if you would rather not clip your MAGAZINE, use a piece of paper, but be sure to write your name and address in full, together with the number and size of the pattern required, enclosing 12 cents in stamps for each pattern ordered.

It is a sign that the world is all right after all when we find girls like Miss Ruppertsberger who do practically all of their own sewing. Between work at the office and duties at home there is not much time to spend in sewing, and the girl who devotes her spare time to this occupation is to be commended.

Miss Ruppertsberger has been with the Baltimore and Ohio a little less than two years.

(NOTE: We should be glad to hear from some of our Baltimore and Ohio women who keep a household budget system. This, by the way, would make a fine subject for our Women's Contest this year.—Associate Editor)

Miss Minna Ruppertsberger, wearing the pretty dress which she made from Our Magazine pattern No. 4257. She did not have to cut a quarter of an inch off the pattern to make it fit. The blouse is separate and can be worn with a separate skirt. The skirt and the waist lining are in one piece, the lining opening in the back. The design was embroidered in outline stitch in jade sunglow floss, 14 skeins at 5 cents per skein. The price of the dress pattern is 12 cents in stamps. It comes in sizes 16, 18, and 20 years. Use the coupon when ordering

# What the Fashion Woman Finds for Our Spring Wardrobes

By Peggy

JUST when we are in the midst of brushing up our old winter coat for the 'steenth time and wondering how much longer it will last, along comes a letter from the Fashion Woman who lives in New York, together with a goodly bunch of the nicest and most practical patterns we ever saw. As soon as you have looked them over, I know that you will think so, too. I must begin right now to tell you what the Fashion Woman says about the new spring styles.

First of all, she says that there is much beauty about all of the new patterns, and that there are many of them from which to choose. There is the three-piece costume which still holds its own. There are the pretty blousey jackets, which end in a belt below the waistline. These are worn with a skirt of the same or of contrasting material. This short jacket promises to be very popular, particularly for the slender person. A nice trimming for this jacket is of bright embroideries or of stitching in colors which contrast with that of the jacket. Light and dark blue velours make lovely jacket suits for springtime.

A simple dress is made of crepe romaine. Its only trimming is formed of tiny puffed bands of the same material. The bodice is finished with a boat neck and shows tiny lengthwise tucks in yoke effect.

Taffeta will be used extensively in spring frocks. Tan crepe and brown-satin crepe are combined to make a smart frock with draped overskirt and kimono-sleeved overblouse.

There are all kinds of sleeves to be dealt with during the coming season. The tight sleeves show ruffles, bias flounces, puffs, and gauntlets of lace. The full length, open sleeves show underfacings of contrasting colors. One of brown flat

crepe has an underfacing of tan; one of dark blue has a facing of French blue, and still another of navy has a facing of bright cherry. Jade also makes a pretty facing for dark blue or black and it carries with it such a springlike air. Sleeves may be wide or close fitting, with flared cuffs coming well over the hands. Those who remember the old leg o' mutton sleeves will be surprised to learn that these are also seen among the season's latest.

For business, the practical "jumper" dress holds its own. Almost any kind of a blouse may be worn with it, but the little blouse of a contrasting color with cuffed sleeves and round flat collar is particularly suitable. With this combination you have a chance to display your pretty little

4296

4288

knitted ties which have become so popular during the past few months. Brother's or Father's discarded ties now may be made over for Sister and Mother. Wash them and turn them on the wrong side, face with a scrap of silk, and there you are!

Printed materials are prominent among the new fabrics. Already we find in the stores great stacks of prints, pretty and inexpensive. In the cotton materials, which are particularly popular, we find flowered designs, embroidered stripes and blocks.

## Playtime for Doris

4285. Linen, chambray, flannel or chintz

4285

could be used for this model. A simple finish of stitching or stitchery, or a binding in contrasting color, would be very pleasing.

The Pattern is cut in three Sizes: 2, 4 and 6 years. A four year size requires 2 $\frac{3}{8}$  yards of 36-inch material. Price 12 cents.

## A Pretty Frock for the Growing Girl

4288. Blue wool jersey embroidered in colors, or green taffeta with pipings and vest of pongee in a natural shade will be pretty for this model.

The Pattern is cut in three Sizes: 12, 14 and 16 years. A 14 year size requires 3 $\frac{5}{8}$  yards of 36-inch material. Price, 12 cents.

## When Marie Goes to School

4296. Plaid suiting was chosen for this model, with white wool jersey for collar and cuffs. One could use jersey, serge or wash materials for the entire dress. The sleeve may be in wrist or elbow length.

The Pattern is cut in four Sizes: 8, 10, 12 and 14 years. A 12 year size requires 4 yards of 32-inch material. For collar and cuffs of contrasting material  $\frac{5}{8}$  yard is required. Price, 12 cents.

## Neat and Serviceable

4269. Chambray and gingham, or serge and checked or plaid suiting could be combined for this model. It portrays a style becoming to slender and mature figures.

The Pattern is cut in seven Sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires 2 $\frac{1}{2}$  yards of 36-inch material for the waist, and 2 $\frac{3}{8}$  yards for the skirt. The width at the foot is 2 $\frac{3}{8}$  yards. Price, 12 cents.

A Practical Apron

4268. Gingham was selected for this design, with white bias banding for a finish. Satcen, cretonne, chintz or crepe could be used with stitching or braid for trimming.

The Pattern is cut in four Sizes: Small, 34-36; Medium, 38-40; Large, 42-44; Extra Large, 46-48 inches bust measure. A Medium size requires 3¾ yards of 36-inch material. Price, 12 cents.

The Ever Useful "Middy"

4294. No school girl's wardrobe is complete without several middy blouses, and no garment is quite as comfortable. In drill, Indian head, flannel, khaki, linen and silk, this style will be very pleasing. The blouse may be finished with straight lower edge, or with the now so popular "hip band." The plaited skirt is to be finished with a band or joined to an under waist.

The Pattern is cut in five Sizes: 4, 6, 8, 10 and 12 years. A 10-year size requires 2½ yards for the blouse, and 1¾ yard for the skirt, of 36-inch material. Price 12 cents.

Freshness for the Spring Morning

4270. Checked gingham in brown and white is here illustrated. It is trimmed with white pique. Figured voile or percale will also be good for this model. Taffeta or tub silk would be very pleasing, with stitching or embroidery for trimming.

The Pattern is cut in six Sizes: 34, 36, 38, 40, 42, and 44 inches bust measure.

A 38-inch size requires 5¼ yards of 32-inch material. The width of the skirt at the foot is 2½ yards. To trim as illustrated requires ¾ yard of 36-inch material. Price, 12 cents.

Around the Kitchen

4276. Figured percale in blue and white, with banding of black bias tape, is here shown. This is a good model for gingham,

**PATTERN ORDER BLANK**

The Fashion Woman  
 Baltimore and Ohio Magazine  
 Mt. Royal Station  
 Baltimore, Maryland

Please send to the following address the patterns listed below. I enclose 12 cents (stamps, check, or money order) for each pattern or Book of Fashions.

 Send 12c in stamps, check, or money order, for our UP-TO-DATE BOOK OF FASHIONS.

proportions. The fulness is placed to avoid simulating width, and the vest and lines of the tunic give an appearance of length to the form. Crepe and silk braid are here combined.

The Pattern is cut in seven Sizes: 36, 38, 40, 42, 44, 46 and 48 inches bust measure. A 38-inch size requires 6¾ yards of 40-inch material. The width of the skirt at the foot is about 2 yards. Price, 12 cents.

A Pretty "Sunday" Dress

4272. Blue broadcloth, braided with

rubberized cloth, linen, crepe or satcen. The Pattern is cut in four Sizes: Small, Medium, Large and Extra Large. A Medium size requires 2¾ yards of 36-inch material. Price, 12 cents.

Slender or Stout, You'll Like This Dress

4027. Here is a model with lines that will tend to slenderize the woman of ample

black soutache would be good for this model. The style is also attractive for velvet, Canton crepe and taffeta.

The Pattern is cut in seven Sizes: 36, 38, 40, 42, 44, 46 and 48 inches bust measure. A 38-inch size will require  $3\frac{7}{8}$  yards of 54-inch material. The width at the foot is three yards. Price, 12 cents.

#### A Nice Little Frock for Business

4292. This style is very appropriate for slender figures, and will develop well in serge, broadcloth, kasha or crepe. It is also good for linen and other wash materials.

The Pattern is cut in three Sizes: 16, 18 and 20 years. An 18-year size will require  $4\frac{1}{4}$  yards of 54-inch material. The width at the foot with plaits extended is  $3\frac{3}{4}$  yards. Price, 12 cents.

#### When Alice "Dresses Up"

4298. Here is a very charming model suitable for any of the pretty materials now in vogue. One may have the dress with or without the puff sleeves. Dotted net with ruffles of satin ribbon is here shown. Crepe and crepe de chine, also figured voile and batiste, are good for this design.

The Pattern is cut in four Sizes: 8, 10, 12 and 14 years. A 12-year size requires  $3\frac{1}{4}$  yards of 40-inch material. Price, 12 cents.

#### An Outfit for Little Jean

4283. This comprises a neat yoke dress that may be finished with or without the ruffle, and a petticoat and comfortable drawers. One may use voile, lawn, batiste or crepe for the dress and cambric or nainsook for petticoat and drawers. It will require  $1\frac{5}{8}$  yard for the Dress,  $\frac{5}{8}$  yard for the Drawers, and  $1\frac{1}{8}$  yard for the Petticoat, of 36-inch material for a 2-year size.

The Pattern is cut in four Sizes: six months to one year, 2, 3, and 4 years. Price, 12 cents.

#### Marjorie's Birthday Party Frock

4289. This pleasing model is good for voile, batiste, silk or crepe. Picot edging, piping or binding will form a suitable finish. The front panel could be embroidered. The model is also pleasing in organdy or dotted Swiss.

The Pattern is cut in four Sizes: 4, 6, 8 and 10 years. A 6-year size requires  $2\frac{5}{8}$  yards of 36-inch material. Price, 12 cents.

#### When Father Works in the Garden

3933. A practical model for overalls quite simple in construction, is shown in this illustration. They will be found just the thing for farmers, painters, and gardeners, in their work or for any occupation that requires protection for the clothing. Jean or denim is the material most in use for garments of this kind, but duck, holland and drilling can also be used.

The Pattern is cut in four Sizes: 32, 36, 40 and 44 inches waist measure. The medium size requires  $3\frac{1}{2}$  yards of 36-inch material. Price, 12 cents.

#### Brother Will Like This "Comfy" Suit

4293. Wood jersey, serge, khaki, linen, drill and gingham are suitable for this style. One could have the blouse of linen or madras and the knickerbockers of cloth or khaki. Corduroy too is an excellent material for the trousers.

The Pattern is cut in five Sizes: 6, 8, 10, 12 and 14 years. A 10-year size requires  $1\frac{7}{8}$  yard for the blouse and  $1\frac{3}{8}$  yard for the knickerbockers, of 36-inch material. Price, 12 cents.

### Johnny's Stomach—And Some Things to Fill It

By Mrs. Lindsay Van Horn  
Martinsburg, West Virginia

What's the matter, "Stummick,"  
Aint I always been your friend?  
Aint I always been your partner?  
All my pennies don't I spend  
In gettin' nice things for you?  
Don't I give you pie and cake?  
Say, what's the matter, Stummick,  
That you had to go and ache?

Just yesterday I filled you  
With chicken, bread and corn,  
You had more fruit and candy  
Than since you have been born;  
I gave you pie and apples,  
And lots of chocolate cake—  
Say, what's the matter, Stummick,  
You had to go and ache?

Say, what's the matter with you?  
Aint you satisfied at all?  
I gave you all you wanted;  
You was hard jes' like a ball.  
You couldn't hold another bit  
Of puddin', yet, last night  
You ached most awful, Stummick—  
You ain't treatin' me jest right.

I've always been your friend; now why  
Aint you a friend o' mine?  
They went AND GAVE ME CASTOR OIL  
Because you made me whine.  
Yes, I'm feelin' fine this mornin',  
I'm all right now, that's true,  
But Stummick, you don't 'preciate  
The things I do for you!

And now, having cured Johnny of the "stummick" ache, we shall proceed to tell you how to make some appetizing dishes which, if eaten in moderation, are guaranteed not to cause such trouble.

#### Lemon Butter

Three cupfuls sugar, whites of three eggs and yolk of one, and one-half cupful butter. Beat all well together. Grate into this the yellow part of the rinds of four lemons and squeeze in the juice. Cook in a double boiler for 20 minutes. Put into jars and seal until needed.

#### Peanut Brittle

Put two cupfuls sugar in a "spider" over a fire that is not too hot. Stir with a spoon constantly until the sugar melts. Have ready a teacupful of chopped peanuts. Stir these in quickly. Mix thoroughly and pour on a buttered platter. Spread thin.

The lemon butter is simply a "spread" to be used as apple butter. It is mighty good on sandwiches and is even more delicious with chopped nuts of any kind. I find it very handy when my preserves are running short. I often make it after supper so as to have it for our hot cakes for breakfast. If the recipe is followed, I am sure that there will be no trouble. When finished it is of just the thickness of apple butter. It has been suggested that this would make a good cake filling. I have never tried it as such, but I feel sure that it would and I am going to try it on my next cake.

#### More Good Eats

*Note: Last month we asked for recipes for soups and salads. The best of these sent in were contributed by Miss Gertrude R. Cross, clerk, Auditor Disbursements Office, Baltimore, Md.*

#### Mashed Potato Soup

Cold, left-over mashed potatoes make a good cream soup. This is a nice, easily and quickly made soup to fix at noontime for the kiddies' lunch.

Heat a quart of milk, or milk and water, with a whole onion. Do not boil, but when good and hot, pour it slowly over your mashed potatoes, stirring until well blended. Then add your seasonings—salt, pepper, butter, and a little celery seed. Return to the stove, reheat and serve at once. You'll find it delicious.

#### Candle Salad

Put a lettuce leaf on a salad plate. Lay on this a slice of canned pineapple. Cut a banana in half (the short way) and stand it upright in the hole of the pineapple. Put on the top and down one side of the banana a dab of mayonnaise dressing. Cap the whole with a red maraschino cherry to represent the flame of the candle.

This salad looks mighty pretty and besides, it is quite tasty.

Be sure to read in the January issue about the Women's Department Contest for Baltimore and Ohio women this year. Send all contributions to Margaret Talbot Stevens, Associate Editor, Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Maryland.

## The Land of Animals

By *Elsie Elizabeth Glanzer*  
Jessup, Md.

NANNIE was playing with her doll. Soon she got tired and the doll got sleepy, too.

Nannie then put the doll into her crib, covered her over nicely, then went to her mother.

"Mother," she said, "I would like to have some animal cakes."

Now her mother was making muffin cakes, so she was too busy to attend to what Nannie said.

The little girl then went into the parlor. She put her chair up close to the shelf. Then she climbed up and took down her fat elephant bank. In this bank were five pennies. What awful thing do you think she did then? She took the five pennies and crept softly out of the house and ran down the street singing:

"Hop, hop, to the baker's shop  
For a stick of candy!"

Nannie then went right into the baker's shop and spent her five pennies for some animal cakes. Then she went home.

"See," Nannie said to her mother, "I have some animal cakes."

Then her mother sent her to bed for being so naughty.

Nannie went to bed and after a long time she fell asleep. Then there came a fairy, all dressed in white. She handed Nannie a ring.

"Turn this," said the fairy, "and if you turn it this way you will be in a lovely, bright room, but if you turn it that way you'll be in the Land of Animals.

Nannie took the ring, but when the fairy had gone, the little girl forgot which way to turn it. She gave it a turn the wrong way. Right away she began to shrink up so small that she hardly knew herself. Then the Big Wind came along and took the wee little girl away over the mountains, over the fields and green meadows, 'til she came to the Land of Animals.

THE DEER AND THE TIGER  
Drawn by Robert Haines, Keyser, W. Va.

Here were all kinds of animals, the most frightful of which was the lion. Oh, but Nannie was frightened! The lion ran after Nannie and was just about to bite her when she screamed:

"Oh, Lion, please don't bite me! I will be so good, and I'll never do anything naughty again!"

Just then she awoke.

"Oh," she said, "how glad I am that it was only a dream!"

Then she was so sorry for what she had done. And when she told her mother, her mother said that she might come down. And they had the nice muffins that mother had made for supper.

## Tartown

By *Evelyn Eaton*

2353 E. Madison St., Baltimore, Md.

ONCE upon a time there was a town called Tartown. Here there lived some people called Tarters. Their queen was a beautiful lady who had lovely, golden curls which hung down to her waist. She always wore a gown of blue silk with pearls on it, and her crown was made of diamonds on which were cut tiny hearts.

This lovely queen had a very pretty home. It was Juanita. (It sounds like Waw-neeta.) Everybody loved this queen and thought that she was kind and lovely.

In the northern part of Tartown there lived some very bad men. These men wanted to rule over Tartown instead of Juanita. So, one night they planned to steal Juanita. They chose the night of February 14, which is Valentine's Night, and a time of festivity in Tartown.

When February 14 came around, Juanita ordered her cook to bake a whole lot of strawberry tarts for her people. It is very warm in Tartown, so strawberries grow there the whole year 'round.

That night all of the people came to the palace for a party. While they were playing, someone came to the queen and said:

Jiggs, after a dinner of corned beef and cabbage, as sketched by Don, son of Engineer Morley, Ohio River Sub-Division

THE VAMP

Drawn by Virginia Corom, Gibson Avenue, South Connellsville, Pa.

"Mistress Juanita, someone has stolen all the tarts."

Queen Juanita looked troubled. "Isn't there time to bake more?" she asked.

"No," replied the cook, "more strawberries would have to be picked and cooked, and the flour would have to be ground. There is no time to bake more."

"Where did you put the tarts?" asked the queen.

"Out on the doorstep to get cool," answered the cook.

"I shall go see; perhaps the thief has put them back." She excused herself to her company and went out into the yard.

Immediately she was seized and tied. Then a great, big man said to her: "We are going to take you away into the north of Tartown." Then he picked her up and carried her off in his arms. Juanita felt like screaming, but she could not, for her mouth was tied with a handkerchief. She thought of how her people would miss her.

Presently the big man set her down in a house. Her hands, feet and mouth were unbound. Then the big man said to her: "We shall keep you here until you consent to marry our king. Then you may help him rule over his people!"

Suddenly a terrible noise was heard. The house began to tremble. Soon a man came in. Juanita saw that it was Shingahi, captain of her mighty army. Shingahi called in his men, who took all of the bad people prisoners and carried them back to Juanita's city. Her tarts were found in the possession of the bad men.

Juanita lived happily ever after and she was never again troubled by the bad men.

## Flower Gardening

By Viola Wolfe

Daughter of Carpenter Elmer E. Wolfe  
Chillicothe, Ohio

IT is already springtime, and that means it soon will be time to plant our flower and vegetable gardens. Summer time is better known as "flower time," for in May and June the air is filled with the fragrance of lovely flowers.

There is nothing that will make our lawns and back yards prettier than lots of flowers. The back yard and front yard

Elsie Elizabeth on her Pony

## JUST AS LONELY AS HE LOOKS

### The Boy Who Lost His Leg Flipping Trains

No more skating for him. No more baseball or swimming. Just a lonely one-legged boy watching the other fellows having fun.

37,714 Boys and Girls Were Crippled or Killed Flipping Trains or Walking on Tracks in 28 Years

National Safety Council

both can be made beautiful and clean by planting flowers.

For the porch and house the climbing roses and clematis are best, and a hedge is much prettier than a fence for the front yard.

A house looks so much better with the yard full of dahlias, tulips, four o'clocks, narcissus, and other pretty flowers than does the house that has none.

If you want to have a pretty place, plant flowers, keep the weeds from them, and they will make you glad.

## Loyalty to Maryland

By Sarah F. Pennington

Daughter of Crossing Watchman  
P. M. Pennington, Cumberland, Md.

*Note: March 25 is what the people in Maryland call "Maryland Day." It was on that day in the year 1634 that a little band of people landed on the shore of Maryland at the little town of St. Mary's and made the first settlement here. So, with this in mind, we thought it nice to use Sarah's poem this month.—Aunt Mary*

Maryland, to thee, who art brave and true,  
I offer my heart and my hand to you.  
You falter never, e'en when storms surround  
To seek to take from thee thy glorious crown.

Thy crown of purest gold, hold high,  
Let all thy foes upon it look, and sigh;  
For thee gems sparkle as of flashing fire—  
To keep thy standard high is my desire.

Hating wrong, ah, thou wilt fight for right—  
O, thou the conqueror be! Strive with a might!

And yet, when comes to thee the call for peace,

Let fly the dove, and bid all hatred cease!  
My Maryland!

Teacher—"Johnny, why are you so late?"

Boy—"I've got new boots on, and mother forgot to cut the string."—Exchange

## How Many of Our Little Girls and Boys Can Swim?

HERE we have a picture of Carl, Stella and Herbert Graham, of Jenkins, Kentucky, whose daddy, H. L. Graham, is our telephone maintainer there.

Herbert and Stella are expert divers and swimmers, and they are not as old as many of you who read this. Herbert is seven and Stella five. (The pictures were taken last year.) Here also is their little brother, Carl, who is a little past two years old and who swims fifty feet. What do you think of that? He also does a combination dive with Herbert and Stella. Perhaps some of you have seen these children doing their fancy diving. They have performed at Cincinnati, at Madison Square Garden, New York, and at various other places in the country. If you get a chance to see them, be sure to go and speak to them and tell them that you are little Baltimore and Ohio girls and boys, too. They will be glad to see you.

The American Magazine, which has more than 2,000,000 readers, recently published a big story about Herbert, Stella and Carl. Herbert's father ties him in a bag and throws him overboard. Herbert gets out of the bag and swims ashore. Carl can swim fifty feet and dive from a height of six feet.

Mr. Graham has had many offers from showmen to put his children into circuses, etc., at hundreds of dollars a week, but has resolutely declined to make them professionals.

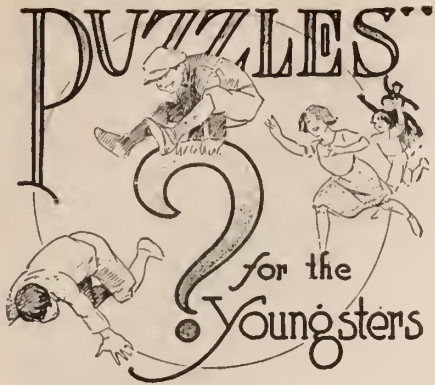

Herbert Graham, holding his little sister Stella and little brother Carl. The three are fine swimmers and children of Telephone Maintainer H. L. Graham, Jenkins, Kentucky

# PUZZLES

for the Youngsters

HERE are the names of some new little girls and boys for our circle. Most of these sent in the correct answers to the puzzles in the January MAGAZINE. All those who sent in correct answers received a set of six Baltimore and Ohio postcards. Emma Melaney and Elizabeth Arendt, Foxburg, Pa.; Janet and Elizabeth Zschiesche, Rognel Heights, Baltimore, Md.; Anna Hickman, 1035 W. Lombard Street, Baltimore, Md.; Elizabeth and Richard Fritz, 5904 Penn Avenue, Pittsburgh, Pa.; Virginia Corvin, Gibson Avenue, South Connellsville, Pa.; Lester McNeil, 5006 Wesley Avenue, Baltimore, Md.; Gertrude Lysle Cowie, 436 Cumberland St., Cumberland, Md.; Virginia Watkins, Sykesville, Md. And Helen Turiss, Tower Hill, Ill., sent in some nice drawings that we used in the February MAGAZINE.

This month we have only one puzzle. But it is a hard one. To the first six little people who guess the right answer, Aunt Mary will send a package of flower seeds to be planted in the springtime—or, if you prefer vegetable seeds, just say so. But guess the riddle first. Here it is:

CUT OFF THE FIRST AND LAST LETTERS OF A GIRL'S NAME AND GET THE NAME OF HER SISTER. CUT OFF THE LAST LETTER FROM HER SISTER'S NAME AND GET THE NAME OF HER LITTLE PLAYMATE. (Note: If you spell the sister's name backward it is exactly the same as if you spelled it the right way.)

Send your answers to:

Aunt Mary,  
Baltimore and Ohio MAGAZINE,  
Mt. Royal Station, Baltimore, Md.

The correct answers to the January puzzles are:

- 1—The word "SEVEN."
- 2—POSTMAN.
- 3—SPARROW.

Dear Girls and Boys:

Following this letter you will find a letter from Gladys Shaw, of Fairmont, W. Va. Gladys tell us how she goes to the hospital to see the little girls and boys there, to cheer them up and to make them happy. I am sure that they all love to see her com-

ing. We sent Gladys some post cards for her "little hospital pupils," as she calls them, and what do you think happened?

Two of the little girls wrote a letter to Aunt Mary, sending her a pocketbook and a barn for Christmas presents—oh, no, not a really and truly pocketbook and a really and truly barn, but just play ones, you know, all made of folded paper. But they are just as nice as they can be and I hope that the little girls who sent them will soon be well enough to leave the hospital. If any of you little people have any pictures or picture books that you have outgrown, wouldn't you like to help Gladys make these children happy by sending them to her? Gladys will be glad to take them to the hospital and to tell the little people who sent them.

Now, I am going to ask you to help me make this Children's Page for 1923 the

"Billy McNutt," was drawn by Sarah Pennington, Cumberland, Md.

best children's page in any magazine. We can do it. Will you help?

Yours with love,

*Aunt Mary*

512 Front Street  
Fairmont, W. Va.

Dear Aunt Mary:

Thank you for the beautiful pencil which you sent me as a prize in the Safety Contest. I appreciate it very much.

I am so sorry that I neglected to write to you, but I've really been so busy with my school work that I've not had much time to write to anybody. But when I got this beautiful pencil I felt more encouraged.

You know, Aunt Mary, that I live near the Miner's Hospital. Well, every day that I don't have to go to school I go down in the hospital, in the children's ward.

(When I have school I go on Friday evenings and on Sunday.) There are only three children there now. I read to them and we draw and make pictures. In fact, we do everything to entertain them. I take them pictures, too.

The children just love to have me come and the nurses seem to want me, too. I love all of the nurses, but most of all, I love the children. If you find any pictures or stories, or anything you think they would like, will you send them to me?

Well, Aunt, this is getting to be a long letter, and it is time for the school bell. Answer soon, please!

With love,  
(Signed) Gladys Shaw

## You May Sail Down the Bay from Baltimore

By Emma C. Stimson,

Nine Year Old Daughter of Chief Engineer of Maintenance Earl Stimson

### THIRD PRIZE, CLASS B

I LIKE my home town because I was born here and because I have so many nice friends.

There are many interesting things to do here, like riding on the Baltimore and Ohio Railroad, going through a tunnel, climbing the Washington Monument, and sailing down the bay.

The city was named for Lord Baltimore. Our town has many interesting parks, like Clifton Park, Wyman's Park, and Druid Hill Park. The most beautiful thing about our town is the beauty of the suburbs. In Roland Park where I live we have many very nice schools.

Mayor Broening is the mayor of Baltimore and there are over seven hundred thousand people who live here.

Drawn for Baltimore Magazine by R. B. Fuller

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Village"

## William M. Moran

William M. Moran, retired pumper, Simpson, W. Va., was born on October 5, 1857.

Mr. Moran tells us that he entered the service of the Baltimore and Ohio on July 1, 1872, as trackman. He continued in this capacity until February 10, 1892, when, as his record shows, he was made foreman. On March 1, 1914 he was made watchman, and on April 1, 1917 he was made pumper. In 1922, because of failing health, Mr. Moran was placed on relief. Mr. Moran wishes to thank the officers and others on the Baltimore and Ohio who made it possible for him to enter his name on the Pensioners' Roll of Honor. He wishes success to the Baltimore and Ohio, and to those who guide its destinies, Godspeed.

## Adam P. Roby

Adam P. Roby was born on October 27, 1857 at Orleans Road, Maryland. Here his mother and brother ran a small farm, his father having died when Adam was an infant.

After attending school at Orleans Road for a number of years Mr. Roby worked on the farm with his brother for a time, then secured employment on a ranch in the West. Three years later he returned to Cumberland, where he entered the service of the Baltimore and Ohio as fireman.

Mr. Roby married at this time and made his home in Martinsburg, for his run took him from Martinsburg to Baltimore. A few years later he moved to Cumberland, and in 1891 he was promoted to engineman. In 1897 he was made yard engineer. He was retired from the service on January 1 of this year.

Mr. and Mrs. Roby are now making their home on Bedford Road, Cumberland. They have two sons, one a salesman, the other an automobile mechanic, and one daughter.

## Charles Steinhauer

Charles Steinhauer, retired car builder Ohio Division, was born on September 8, 1857, in Pike County, Ohio. He attended the grammar school and then worked on a farm until he was 38 years old. He left the farm to take a position in a harness and

shoe repairing shop. Here he worked until 1902, when he came to the Baltimore and Ohio as laborer, Ohio Division.

In 1903 Mr. Steinhauer was made truckman; in 1906, carpenter; in 1908, truckman; in 1913, car builder.

Mr. Steinhauer says that he does not remember ever having any of his various foremen make a complaint about his work. He was always on time, and endeavored to give a full day's work for an honest day's pay.

"In all of my service with the Baltimore and Ohio," says Mr. Steinhauer, "I have been treated as well as anyone could wish, and I do not understand how people under those circumstances can complain. If one does his share towards keeping the wheels turning on the railroad that supplies him with his living, he will be treated right. I believe that if each man would spend more time in doing the work assigned him and less time in looking for trouble, the conditions of the laboring man would better themselves."

Mr. Steinhauer, though disabled, is always cheerful despite his suffering, and has a kindly word for all.

## James H. Wright

James H. Wright, retired car and locomotive carpenter, was born at Sheppards-town, W. Va., on August 7, 1856.

At the age of 17 years he came to Cumberland, Md., and entered the service of the Baltimore and Ohio as laborer in the Rolling Mill on April 1, 1872. In 1879 he was made hostler; in 1889, car repairer; in 1906, shop carpenter; in 1909, tender repairman; in 1910 he was transferred to

RETIRED WITH HONORS

Left to right, upper row: William M. Moran, Adam P. Roby, Charles Steinhauer, James H. Wright. Below: James E. Steel, William A. Carroll, August B. Mahoney, George W. Hauer

the Signal Service. Four years later he was returned to the shops at Cumberland, remaining here until January of this year, when he was furloughed.

### James E. Steel

James E. Steel, retired engineer, Grafton, W. Va., was born in Woodstock, Virginia, on July 2, 1856.

In 1868 he moved with his family to Grafton, where he entered the service of the Baltimore and Ohio on April 1, 1869, as water boy and tool boy at a stone quarry at Valley Falls. One year later he went to Benwood, where he worked on a bridge running a hoisting engine.

From here he worked as laborer at various points on the System, learning the trade of stone mason and working at that until April 1, 1877, when he was furloughed because of lack of work.

In December, 1880 he re-entered the service as boilermaker helper; in May, 1891 he was transferred out on line of road as stone mason, and was later made foreman of a stonemason's gang. In 1892 he began firing on the Monongah Division. Two years later he was promoted to engineer. This position he held until his retirement in January of this year.

### William A. Carroll

William A. Carroll, retired material man, was born on February 22, 1857.

On September 15, 1875 he entered the service of the Baltimore and Ohio as furnace boy, Mt. Clare Shops. On September 1, 1878 he was made helper, and in 1913, material man. This position he held until his retirement this year.

### August B. Mahoney

August B. Mahoney, retired water pumper, Baltimore Division, was born in Frederick County, near Frederick Junction, on May 31, 1857. He entered the service of the Baltimore and Ohio, Baltimore Division, as trackman on May 9, 1881. In 1895 he was made pumper at Reels Mills. Mr. Mahoney was retired on January 24.

### George W. Hauer

George W. Hauer, pensioned fireman, was born at Frederick, Maryland, on July 12, 1857. He entered the service of the Baltimore and Ohio in February, 1882 as freight fireman. Prior to this time Mr. Hauer carried mail from the trains to the Post Office. He was retired this year.

### Transportation Boys to Hold Another Dance

By special request the Transportation Department baseball team will hold a dance at Tuttle's Hall on April 11. The tickets are 55 cents each and may be had from any member of the team or by applying at the Office of the Magazine, Mt. Royal Station.

## A "Pair" of Brothers Who Are "Trumps"

By A. E. Erich, Secretary to Superintendent, Ohio Division

THE following is taken from "Dusty Miller Tales" in the Wilmington, (O.) News-Journal:

### The Murphy Reunion

"Most families are content to have a reunion once a year, but the railroad division of the Murphy family—"Tom" and "Pat"—holds a reunion every morning at Blanchester shortly before 9 o'clock.

"Pat's" the conductor on the Hillsboro district, the convenient and well-patronized branch-line train, plying between Hillsboro and Blanchester a good many times a day. 'Pat's' a prince. He knows everybody and everybody knows him. His middle name's "Oblige," and he goes on the theory that most anybody could take orders and run the branch train some way or other,

"Tom" Murphy and "Pat" Murphy

but to run it right and make the passengers feel at home and want to come again, is an art, and 'Pat's' the artist.

"And there's 'Tom.'

"Tom's' good-looking and conductorish in his well-pressed uniform, and he's an artist at smiling and being accommodating.

"Tom' runs the main-line accommodations—the one that goes to Cincinnati in the evening from Chillicothe, stopping everywhere, and then some; and brings her back the next morning on the same style of operation—puff, whistle, stop: stop, whistle, puff; here she comes, there she goes—the same old story day after day, but the little train is in the hands of a man that ikes the job and that's 99 per cent. of success, remember.

"Pat' gets into Blanchester from Hillsboro about eight something every morning; 'Tom' rolls in from Cincinnati a short time later, and if the brothers don't get time to talk a bit they always have time to wave a brotherly greeting.

"They go the Brotherhood of Railway Conductors one better, Father and Mother Murphy having given them seniority rights in the brotherhood that even the Baltimore and Ohio could not add to or detract from."

There is little that we can add to the above that would describe these two brothers more thoroughly. They are always courteous and obliging to passengers and have made many, many friends among the traveling public. "Pat" started as section man April 1, 1881, but that did not "fool" him a bit, as in 1882 he transferred to freight brakeman, was later promoted to conductor and in 1910 to passenger conductor. "Tom" started as laborer September 1, 1882, and in 1884 transferred to freight brakeman, was promoted to conductor in 1892 and made passenger conductor in 1907. May they long continue in service, and prosper.

## Safety Roll of Honor

### Staten Island

**Captain Harry Lockwood**, tug "Shriver." January 31. While passing south side of Dock No. 5, St. George, saw Baltimore and Ohio Barge No. 122 with one corner caught under the pier. Hauled boat out and made it fast at safe berth.

### Baltimore Division and Baltimore Terminal Division

**Mr. H. T. Perkins**. Reels Mill, Md. January 9. Heard unusual noise when Train 96 passed his house. Sent son Harry to investigate. Discovered broken rail on track No. 2. Notified operator at Frederick Junction. Also called trackman who repaired rail.

**Operator C. G. Gartrell**. Watersville Junction. January 13. Reported signal on Track No. 2 standing red and indicator out of order. Reported condition to dispatcher's office, advising that a broken rail was probably the cause. Train No. 48 was detoured on No. 1 Track. Broken rail discovered by trackmen and repaired.

**Agent G. W. Johansen**. Collingdale, Pa. February 2. Called out of bed and informed that an automobile was across westbound track at foot of Upland Terrace. Immediately got out and lighted lantern, flagged Eddystone train while others endeavored to remove truck. Notified dispatcher.

**Operator J. M. Cunningham**. First triek operator, Hollofield. February 5. While in Ellicott City at night, noticed piece of iron projecting from car in train of extra east, Engine 4458. Train stopped at Relay, where it was discovered that large piece of iron had shifted in position that would not have allowed clearance on adjoining track.

### Cumberland Division

**Conductor R. T. Knotts**. Tunnelton, W. Va. December 11. While extra No. 7109 west, using No. 1 track, was passing through pullout switch at Tunnelton, Conductor Knotts felt unusual movement in caboose. Had Flagman G. W. Ritter get off to look for unsafe condition. Flagman Ritter discovered an eight inch brake hanger, wedged in switch point, causing a gap. Flagman removed hanger and called track foreman to make repairs.

**Conductor R. T. Knotts**. Rinard, Va. December 7. Discovered broken rail. Locked switch so it could not be used, went to tower, notified section foreman, and made arrangements to have repairs made.

**Mr. J. R. Houk**, North Mountain, W. Va. On January 3. Discovered a slip of rock and dirt obstructing our tracks in Paxton's Cut near North Mountain. Flagged train. Trackmen were called to clear obstruction. Superintendent Van Horn, has written a letter to Mr. Houk thanking him for his cooperation.

**Mr. H. B. Hunter**, Alpha Portland Cement Company. January 22. While

walking from Rowlesburg to Manheim, discovered a large rock on the track of the M. & K. Sub-division in a curve just east of Manheim. With assistance of another man, he removed the rock from the track. He has been written a letter by Superintendent Van Horn for his prompt action.

### Connellsville Division

**Agent-Operator C. H. Snyder**. February 8. Stoyestown, Pa. Noticed brake rigging down on Baltimore and Ohio 19445, under load of coal. Notified Conductor S. M. Sheetz, who was on rear of train, and who had train stopped and brake rigging removed. Broken hanger bolt was the cause of the trouble.

**Conductor A. Winterholder**. January 28. West Yough. Noticed C. C. & St. L. 67372, gondola loaded with moulds, leaning badly on river side. Called matter to the attention of Conductor C. M. Vanosdale, in charge of Extra 4538 East. Called Yardmaster Cowgill on telephone, informing him also of situation. Train stopped and car cut out at Sodom.

**Brakeman C. F. Close**. January 23. Yoder, Pa. While inspecting his train, Extra 7155, discovered cracked wheel on Central of Georgia 5224. Car cut out of train and shopped.

### Pittsburgh Division

**Conductor J. B. Zarnadella, Flagman E. B. Thomas and Brakeman R. J. Morris**. While passing Bannan, Pa., noticed forest fire which had just started, but which was making great headway along side of mountain and close to town of Banning. Stopped their train, an extra west out of Connellsville enroute to New Castle and through untiring efforts succeeded in putting out fire.

### Wheeling Division

**Track Foreman E. Debolt**. Commended for voluntarily surrendering personal advantage to serve this Company by withdrawing his bid on a section to which, through his service record, he was justly entitled, and remaining at a point away from his home until a suitable man could be found to replace him.

**Operator J. W. Keenan**. Displayed vigilance in discovering brake beam down on D. L. & W. car 6734, Train 70, Engines 2741-2235 while passing his office.

**Agent-Operator G. H. Baker**. Discovered broken rail in main track.

**Operator B. F. McGucken**. Observed Baltimore and Ohio 193774 with damaged top which could not clear main track. Stopped train and had defective condition corrected.

### Charleston Division

**J. A. Fisher** and his staff at the Weston agency, have been commended for interest in L. C. L. check weighing, their total

gain in revenue being \$719.95. Valuable suggestions along this line have also been received from Trainmaster W. C. Deegan.

**L. J. McCartney**, fourteen year old school boy at Flatwood. Found a broken rail near Shaversville. Walked back to the station and notified agent. Repairs made.

**Mrs. L. M. Godfrey**. Orlando. Thanked by the superintendent for assistance in reporting a small fire.

**Section Foreman M. A. Irwin**. Belington, W. Va. Commended by the superintendent for his interest in the present campaign for economy.

**Conductor A. Kiddy** has been commended for close observance in connection with all matters pertaining to the safety of his train.

**Mr. Raymond Berry**, of Heaters. Thanked by the superintendent for finding and reporting a broken rail near Rollyson.

**Engineer G. F. Purkey**. Commended for close observation and for making important suggestions in connection with campaign for economy.

**F. E. Friend** has again been commended for the close interest in clam prevention at his station, Gilmer. Agent M. F. Hutson at Bower, has been commended for the third time in as many months for close attention to duty, and assistance in stopping "LEAKS."

**Foreman E. M. Strader**. Kingsville section. Commended for interest in picking up and turning into the stores good material dropped on his section.

**Trainmaster Nicholas**. Sent in good suggestions in connection with the present economy campaign.

**Brakeman H. G. Northcraft** has been commended for finding and reporting broken tread on car in his train.

**Conductor W. B. Peterson, Engineers W. L. Criss and J. H. Shea**. Commended for assistance in clearing side, averting serious delay to their train.

**Brakeman C. E. Mullenix**. Hope Siding, Weston. Noted brake rigging down on a car in passing train. Stopped train and had repairs made.

**Conductor B. D. Otto, Engineer E. P. Wood, Fireman E. H. Bennett, Brakeman**

Betty Eien, an Honor Girl  
See Ohio Division Honor Notes

**M. Childress and W. R. Bragg.** January 1. Voluntarily cleared landslide without delay to trains.

The following engineers have been commended for making over 100 per cent. fuel performance in December, 1922: Hoover, Spencer, Bishop, Shears, Powell, Wilmoth, Paxton, Paisely, Groves, Acord and Poling.

### Cincinnati Terminals

**Engineer Emil Kaley.** February 8. While on way to work discovered three feet of rail missing on main track of north rail in Ditch connection, just west of southern crossing. Notified operator at "WD" Tower, who arranged for detour of Train 23, street connection to avoid derailment. Necessary repairs made to track.

### Chicago Division

**Yard Brakeman John Lester.** February 5. U. S. Yards Transfer. Observed hole in floor of Wabash 15825, large enough for cattle to step through and possibly to cause broken legs. Condition reported to yardmaster at Wolf Lake. Train stopped and boards nailed over opening.

**Lineman D. F. Nethers.** Garrett, Inc. Observed a badly blazing hot box on train of Extra 4245, passing Hicksville. Called operator at "NK" Tower, who notified engineer of condition. Train stopped at Rosedale and hot box attended to before serious damage resulted.

**Clerk O. E. Warren.** February 1. Holgate, Ohio. Observed car in train with piece of timber projecting. Reported condition to dispatcher. Train stopped at Hamler and condition corrected.

**Crossing Watchman George Minard.** February 20. While train passing Albion, discovered hot box on Baltimore and Ohio 174806, near middle of train. Because of snow blowing it would have been impossible for crew to discover this. Watchman Minard gave stop signal at crossing. Train stopped, hot box cooled and packed.

**Operator Oscar Hutton.** Holgate, Ohio. February 21. Discovered hot journal on car of Engine 4018, west. Flagged train with red lantern. Also saw fire flying from car of engine 4280 passing Holgate, issued "take siding" signal at Standley, where crew advised of condition.

### Newark Division

**Operator William H. Johnson.** Schick, Ohio. January 16. Observed wheels sliding on baggage car of Train 61. Notified operator at Neffs, who arranged, through dispatcher, to have train stopped and examined.

### Akron Division

**Freight Agent W. S. George.** Canal Fulton, Ohio. January 29. Noticed brake beam dragging on car C. H. T. S. E. 3390. Notified conductor who stopped train and had the car repaired.

**Chief Clerk Chester Williams.** Haselton, Ohio. February 6. Saw stack falling from engine house, strewing the wreckage across the main tracks. Immediately called "CH" Tower and learning that No. 94 was due in a few minutes, he secured red light, ran west over the bridge and flagged the train in time to prevent a serious accident.

**Operator F. B. Morris.** Lester, Ohio. February 6. While on his way home from work discovered broken rail east of the

bridge on the curve of the old line. Notified section men who made the necessary repairs.

**Operator A. H. Richards.** January 27. While No. 6 was passing Wayland, Ohio, noticed fire flying from one of the cars. Notified operator at Newton Falls, who had train stopped. Investigation showed a bad hot box on Pullman Car "Camp Glenn."

**Section Foreman B. L. Jones.** January 12. Discovered brake beam down on baggage car of passenger train No. 16. Notified the train crew, who had train stopped, and assisted them in removing the brake beam.

**Conductor H. P. Ryan.** January 21. Noticed broken rail in track on crossing east of the Uhrichville passenger station. Notified the section men who made necessary repairs.

**Freight Agent H. L. Marsh.** East Clarendon, Ohio. December 29. Noticed brake beam dragging on car of train extra east No. 4042. Notified the train crew, who had the unsafe condition corrected.

### Ohio Division

**Sectionman Chauncy Kinnamon,** Roxabel, Ohio. January 30. Discovered car broken down on No. 76. Reported this at once. Train stopped and after examination, with careful handling, car was brought to Chillicothe, without loss, damage or delay to freight.

**Operator Guy E. Bolen,** "RK" Tower. February 9. Discovered brake beam down on P. L. car 625170 in No. 88. Notified conductor. Train stopped and repairs made.

**Mr. John Bliss,** resident of Little Hocking, Ohio. Observed broken arch bar on car in a passing train. Reported it to engineer. Car set off. Possible accident averted by his interest. Letter of thanks sent him by Superintendent Iams.

**Mr. V. J. Martin,** resident of Sciotoville, Ohio. Discovered piece of ball of rail in main track broken out. Reported condition. Repairs made. Prompt action no

doubt averted an accident. Letter of thanks sent Mr. Martin by Superintendent Iams.

**Agent-Operator Miss Elizabeth ("Betty") Bien,** Little Hocking, Ohio. After handing "19" order to Engineer W. Diehl, on Extra 2921, east, on January 24, observed a car with broken truck near rear of train. To make sure that train would stop, she purposely failed to deliver the order to Conductor Galbreath, who, upon not receiving order, applied brakes from caboose, stopped train and set car out. Action taken by Miss Bien undoubtedly prevented a serious accident and a big "LEAK" in damage to equipment, loss of freight and delays.

### St. Louis Division

**Telephone Maintainer W. R. Ambrose.** On line, January 29. Discovered broken rail at Pole 256-15, just east of Skillet Fork trestle, and another broken rail five hundred feet west of this trestle. Flagged Extras 2857 and 2803 which were approaching.

**Agent R. C. Heuer,** of Trenton and **Conductor C. E. English,** of Train 72, in siding at Summerfield. January 27. Observed brake rigging dragging on car in Train 29. Reported this condition to agent at Lebanon. Train stopped and defective condition repaired.

**Box Packer E. G. Brown.** Washington Shops. While attending to his regular duties, January 1. Discovered bad condition of right back engine truck box. Called foreman's attention to it. Brass was removed and babbitt found to be entirely gone and brass cracked.

**Machinist E. C. Garner.** Washington Shops. Discovered a crack in left main rod of Engine 2803.

### Toledo Division

**Brakeman Sam Borland.** December 12. Extra West 4551 stopped at Byers Junction for orders. He started back over the train and discovered broken arch bar on P. & R. 27077. Car was set out at Byers Junction. (Photo accompanying.)

The men whose names are given on this and preceding page are "Stopping That Leak!" There is no better way to do this than by preventing accidents!

Right: Brakeman Sam Borland, Toledo Division

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Building

#### Law Department

Correspondent, GEORGE W. HAULENBEEK

I know so little about the actual running of trains, that I ought to refrain from making any comments pro or con; but I would like to know why, in the running of a passenger accommodation train, especially in the winter, so many doors of the cars are opened at every little station, whether a passenger is in sight or not.

The conductor opens the front door; the trainman does likewise to the door in the rear, and then Old Borcas enters the car at both ends with a wicked grimace and the passengers shiver. It only lasts two or three minutes but that is sufficient time to give one's extremities an extra chill, and there you are.

When there are only a few passengers to alight, why not let the one open door suffice for their exit, and if any one wishes to retire from the other end of the car, let him open the door himself.

#### Jewelry—Not Baggage

If you check your baggage and among the articles included therein you have jewelry, do not expect to be reimbursed by the Railroad Company if your diamond rings and other articles in that class are purloined, for it has been decided that jewelry is not baggage and the loss cannot be borne by the Railroad Company.

To show the uncertainty of litigation, a woman passenger on the Long Island Railroad recovered \$8,000.00 for the loss of jewelry alleged to have been taken from her trunk, and on an appeal by the Railroad the judgement was reversed and the litigant received nothing.

#### The Eay Boats

Frigid January was cold, formal and forbidding to the Law Department, and we had several on the sick list, Mr. Young, our chief clerk, being in the category.

My love for the winter season has vanished, and I long for the period when my wealth will be adequate and ample to secure a mansion at Miami, possibly right next door to Mr. Bryan.

Give me the epoch when the excursion boats down on Light Street will be gaily decorated with bunting and destined for West River and other places on our bay; places that cannot be equaled anywhere on the globe.

Give me the good old summer time with open windows and open cars and Ocean

City, New Jersey, or Deer Park, Maryland, as my summer retreat.

#### A Smile

A smile is the same in all languages.

The best in life will come to him  
Who never drops his speed and vim;  
Who never lets his heart grow faint;  
Who tries to "hit 'em where they ain't."  
The best in life will come if he  
Combines hard work with honesty;  
The best's the fun we daily glean  
In fighting hard and playing clean.

—New York Evening World

St. Valentine's Day.

Dear Bill:

I thought I'd try an innovation this month by writing a letter commenting upon the various happenings that have occurred and bits of news that I have gleaned from various sources.

First of all, in order to get it out of the way, I am going to talk about myself—which is perfectly natural, don't you think? A person has to have a certain amount of pride in himself, otherwise no one will take any notice of him. Well, you know I told you about, and showed you, the beautiful silver pen and pencil which was presented to me by the Railroad "as a small token of appreciation for your work, and interest in The MAGAZINE during the past year." I certainly do appreciate the gift, but am certain I did no more than someone else would have done in my place. To cap the climax, Jerry wants me to print my "visage" in our column. I wonder how he gets that way.

Did you notice in the January issue of the MAGAZINE an article whereby a fountain pen will be given to the person or persons picking out the most interesting article (that is, from the standpoint of interest to the Company)? While I don't need the pen, I am going to comment upon two articles, which appear to me to be worthy of great mention. The first one appears on page 43 entitled "The First and Best Railroad in the United States." From the gist of it I assume that it was not written by an employe and for that reason I firmly believe it should be given more prominence. If everyone felt as does Mr. Hartley, author of the article, what a difference it would make in the way of increased freight and passenger movements. The other, a note in the section entitled

"Safety Roll of Honor," describes the efficiency of Operator C. M. Watson of F.Y. Tower, Pittsburgh Division, who, from accounts in said article, shows he is one hundred per cent. on the job. Mr. Watson is to be praised for the quick action and thoughtfulness displayed by him. That's what I call "keeping on the job!"

I also noticed the strenuous efforts being made by practically everyone to "Stop That Leak." I am sure that if everybody would think about it we could save infinitely more than we do. Then again, if everyone would regard the various articles that are placed in his hands by the Company, as his personal property, I believe a great saving would be effected. It's the little things that count most of all, such as pins, paper clips, stubs of pencils, etc. To save is to have. Get the habit!

From time to time I read, with interest, of certain employes soliciting business for the Company, either freight or passenger. It's a great idea, and I am heartily in favor of boosting the Company for which we work. So remember, "Bill," the next time some of your friends or relatives go on a trip, be sure to tell them of the excellent service afforded by the Baltimore and Ohio and get them to give us a trial. You can feel assured that once tried they will always use it.

You know, "Bill," it is gratifying to see the way our bowling team is upholding the reputation it made in the first half of the season. If I am not mistaken they are leading the league by three or four games; possibly more. And I learned that with a crippled team they played and defeated one of the best teams in the league. I hope they will be able to maintain the lead throughout the remainder of the season and so carry off first honors.

I've been thinking, "Bill," how nice it must be to have one's "best girl" wait for you after work as I know is the case with a certain field engineer. What is more, if my eyes did not deceive me, I believe I saw a solitaire on the third finger of the young lady's left hand. Looks bad, doesn't it? I suppose we'll have to pass the hat soon. But he deserves it, and she appears to be quite an attractive young person.

By the way "Bill," did you cast your vote for Miss Spengler as representing the Baltimore and Ohio in the National Good Will Election? Our department went over the top, one hundred per cent. strong.

H. E. WEIFENBACH

Magazine Correspondent, Office of General Manager.  
No, somebody else sent it in

Rose Mary and Betty, aged 3 and 4, little daughters of Correspondent J. M. Whelan, Pittsburgh

Say "Bill," do you read much? Or are you one of the many I know who while away their time doing nothing? Of course I mean reading good literature. They say a word to the wise is sufficient, so "before leaving home, always slip a book into your pocket. You will be surprised to find that during the day you will have many opportunities to read something other than the usual newspaper. Learn to fill in your odd moments pleasantly."

In ending will say, "Bill," that I hope our editor will be a little more prompt in producing the *MAGAZINE* hereafter. He ought to "stop that leak," don't you think?  
Yours,

O. K.

#### Office of District Engineer, Baltimore, Md.

Correspondent, J. FORD COLLISON

We note that the newspapers are printing a great deal about religion these days. Our department always endeavors to keep up with the times; in fact, just a little ahead. But that isn't what we started out to say. We can now use that familiar phrase "Will miracles never cease?" Only in the past few weeks we find two more of our fellow workmen rehearsing and committing to memory this refrain "The Lord Loveth a Cheerful Giver" and "It Is More Blessed To Give Than To Receive." They are none other than our "Tommy" Sparks and "Cy" Young. We might say that "Cy" is making much better progress than "Tommy." We respectfully ask that no other organization interfere as we are progressing very well with these two young men and it will only be a short time until they have reached that height of perfection attained by our now backsliding brother "Joe" Jones, and our departed (for Parkersburg) brother "Ferd."

"Joe," Jones is of the same opinion as a notable New York preacher who has created some wide publicity. He is finding some fault, just a little, with our teachings. "Joe," we beg of you, don't forget the teachings which our new brothers are just learning!

Although maintaining a residence in Baltimore, Mr. Feders has been away so long he has to take a guide around with him. We much fear that he will turn up "lost" one of these days.

"Eddie" likes Baltimore. On Sunday he eats at home and on Monday he also eats at home—leavings from Sunday. The rest of the week he eats with relatives. More power to you, "Eddie."

Just a word of warning to the girls—"Joe" Jones is back in town. Why, he had so many dates last week we couldn't have a Prayer Meeting!

C. L. Richter was presented with a bouncing baby boy on February 10. His name is Nelson Maurice and he weighed nine pounds. Everything is lovely.

"Dick" Mather, son of our district engineer, was home sick from school for a couple of weeks during the first part of February. He had a bad case of grippe, but is practically well now.

H. C. H. has cut out flivvering to and from the office. He finds he can't afford it with three little urchins at home to take care of. The truth is—it's too cold to leave the flivver out. When the warm days come we'll find him going back to his old habit.

The old saying "give 'til it hurts" reached its limit one night when Charles P. Vogel, transitman, stepped up to the cigar stand and without being asked or for no special reason whatsoever, treated the boys to a cigar. The shock was too great to withstand without some recourse, so each in his turn treated in like manner during the evening, and at least one night was spent in good-fellowship. Let's hope it will continue.

Our Henry of never-been-kissed-fame received quite a setback in Parkersburg according to first hand information received. The scene of action was in one of Parkersburg's restaurants, the villain O. L. McCabe, field engineer, the hero—Henry, the heroine—one of the waitresses who, acting upon Mr. McCabe's advice, placed a beautiful kiss on the skin-you-love-to-touch (Henry). We are obliged to stop here! However, you can draw your own conclusion.

The double track improvement from Webster to Brydon, W. Va., a distance of about two miles, started last Spring, was put into operation on January 15. The new improvement does away with a single track timber trestle known as Bridge 2½, approximately 500 feet long and 45 feet high, this being replaced by a fill on a new alignment, which removes a hazard that was always questionable, requiring constant watching. This work was done by the Empire Engineering Company, Baltimore, Md.

#### Office of District Engineer, Pittsburgh, Pa.

Correspondent, J. M. WHELAN, Accountant

Your correspondent regrets to announce the death from pneumonia of Mrs. A. J. Borland, mother of C. R. Borland of this department. Mrs. Borland's death occurred

February 5 at her home in Hazelwood. She was well and affectionately known throughout the Hazelwood District and her death will be mourned by a host of friends. The funeral was held from the Presbyterian Church of Hazelwood on February 7.

Mr. Pendleton, Cost Engineer's Office in Baltimore, was a recent visitor.

The accompanying photo shows the two energetic youngsters of your correspondent. They are Rose Mary and Betty, aged three and four respectively.

P. J., this department, not to be outdone by Mrs. P. J., who recently staged a surprise in his honor on the occasion of their "woolen" anniversary, asked the boys back in order to show them what a real party was like. I understand that Mrs. P. J. had been informed that this was "Phil's" party, but I noticed when the question of refreshments became uppermost that Mrs. P. J. just naturally gravitated towards the kitchen, and I am free to state that I have never eaten a lunch which I enjoyed more and I am sure that I was not out of step either. We all hope that there will be many more such anniversaries.

Suggestions for "Saving" are much in order, and we have not as yet broken the ice in this respect. Let us all make it a point to observe the handling of Railroad matters in our travels about the territory, and make it a point to mention such cases as may indicate a need for improvement. No names need be mentioned, but the Railroad is certainly entitled to whatever improvement or saving may result from such observations. Please let your correspondent hear from you.

#### Office of District Engineer, Cincinnati, Ohio

Correspondent, GEO. F. DAUBENMERKL

Assistant Engineer James P. Ray appeared in a school comedy play at Lawrenceburg, Ind., on the 1st and 2nd of last month, under the nom de plume of "Jim Blaine," in the guise of a school boy. His part included the pinning of a sign on the teacher with the words "Teacher is a Donkey." Mr. Ray is certainly well adapted to the part of a schoolboy and he was given a vociferous reception. It surely must have been a "scream."

#### General Baggage and Milk Department

Correspondent, MABEL L. MENGES

Our correspondent, Miss Menges, is confined to her home, account of illness. She is, however, on the mend, and we hope will soon be able to be with us again.

We are pleased to report that Traveling Baggage and Milk Agent H. L. Norris, who has been ill with the grip, has recovered and has returned to duty.

It is with regret that we have to report the demise on February 5, of Checkman

BRIDGE No. 935, LOOKING NORTH TOWARDS THE OHIO RIVER

# Hamilton Watch

"The Railroad Timekeeper of America"

## Seventeen Years of True Time Service

GATEMAN W. H. GOVEY, of the Long Island Station, Pennsylvania Terminal, New York City, here shown at his post, has carried his Hamilton Watch for seventeen years.

Gateman Govey must have a watch he can depend upon to tell true time. The gates must be closed precisely on the minute; not a half minute early or a half minute late. Accuracy is imperative—and as usual a Hamilton Watch is performing the service demanded.

## A Railroad Man Can't Afford to Be in Doubt About His Time

That is why most of them choose the Hamilton. The Hamilton Watch combines the quality of sturdiness with that of phenomenal accuracy and gives to the railroad man a timekeeper that he can truly depend upon.

Ask Your Jeweler to Show You the  
**HAMILTON "992"**

Priced at \$48.50 for the Movement Only

This model is the favorite of most railroad men. It meets the most exacting standards of time inspection in a way that will be extremely gratifying to you.

For other than time inspection service, ask to see the Hamilton No. 974, priced at \$25.00 for the movement only. This model gives you Hamilton standards at a moderate price.

**HAMILTON WATCH CO.**  
LANCASTER, PENNA., U. S. A.

Thomas C. Tate, Baggage Room, Philadelphia, Pa.

Mr. Tate entered service as checkman at Philadelphia, August 7, 1916, which position he held until furloughed January 7, 1917, being reemployed in same position in 1920, in which he continued until his death.

D. R. Shreve, train baggageman running on Train 51 between Cincinnati and Toledo, surely deserves honorable mention for his splendid cooperation in the baggage service. We recently found that he is stamping his train waybill "Show baggage condition on waybill" as a reminder to agents and baggage agents, some of whom are overlooking this important notation. This record means much in the adjustment of claims, and this thoughtful assistance is more than appreciated. We understand that Mr. Shreve is showing the same interest in all phases of his work.

#### Office of the General Freight Claim Agent

Correspondent, NORMA H. APPLGARTH

*"He Profits Most Who Serves Best"*

The man who devotes his time to giving the best that is in him profits most through the knowledge that he gains, through his ability to speak authoritatively and his helpfulness to his friends and associates. It is true of all things in life, and especially so in regard to his daily vocation. If in his endeavor to serve his employer well, he will study and labor assiduously at his task until it is well done, he is the greater gainer by the knowledge acquired, and in this manner he is, without his own knowledge, preparing himself and developing his ability to handle matters of greater importance.

Few of us, especially young people, realize the importance of concentrating our whole mind on the work assigned to us, no matter how trivial it may apparently seem. If there is a reason for doing a certain thing then that thing is worth doing well and mastering the most petty detail in connection therewith. This helps you to understand why it is done and what the result would be if not done properly, such as in the erroneous transposing of one single number. It often means to the bookkeeper the checking of an entire month's work before the error is discovered and a true balance is struck.

If knowledge is power, then by serving best you are gaining power. And power is like steam. It must expand, and it is as certain as night follows day that you, too, will expand, reaching up higher and higher with your ever increasing knowledge, until you stand at the top and are looked up to with that esteem and respect due to those who have successfully climbed the ladder by serving best.

If you desire to know the game of 500, ask Mr. Sturm how one can bid and make ten trumps without holding the Joker.

The art of having confidence in your widow seems to be his strong point as it always produces when he deals.

It was with much surprise and not a little regret that we learned of Miss Jeanette Costello's intention to leave us. Miss Costello has decided to devote herself to the religious life and to this end, entered the novitiate of the Sisters of Mercy at Mount Washington on February 2. All good wishes go with her in her new vocation.

The stork seems to be hovering over the General Freight Claim Agent's Department. Messrs. George Travers and George Geoller are the latest ones to be walking the carpet; they are both new Dads.

Thomas C. Tate, late checkman, Baggage Department, Philadelphia Station

Mr. Geoller has a new position and a new baby, what more could a fellow ask?

Our time-keeper, Mr. Aro, never forgets his duties. Do you know that one day he walked into the Postoffice to ask for his mail and when he approached the Postmaster (duty foremost in his thoughts) he smilingly inquired—"All Here?"

Valentine day was a howling success in this office. Every one tried to feel complimented by the ones they received, or at least seemed to. We have a bunch of good sports, at least.

"We are glad to report the victory of our Young Ladies' Bowling Team over the ladies of the Auditor of Freight Claims Department. We have a great team. Challenge them and see."

In the January, 1923 issue the above article appeared.

The Bowling Girls of the Auditor Freight Claims Department wish humbly to acknowledge the scribe's challenge in the language of Commodore Perry. "On February 19, we met the enemy. They are ours, Five Pretty Girls and Three Straight Games, and Norma wasn't there to recite 'Casey at the Bat,' or sing the 'Swan Song.'"

The General Freight Claim Agent's girls are good sports and deserve far more support from the employes of their Department than they are receiving.

#### Relief Department

Correspondent, H. IRVING MARTIN

Here's another candidate for the estate of matrimony. Earl Plowman is the man who has filed his papers. Neither the high cost of living nor the high cost of coal seems to bother him one bit. He's gotten the good home fever. He says that when he gets that home started he's going to bust up that oft quoted line, "The ploughman homeward plods his weary way," as it will be a joy and not a weariness to journey to a home where the heart is.

The girl?—we almost forgot the most important part of the whole works—Miss Hilda Loveless.

Crawford and Repp hied them to New York one week-end to count the cannon in The Battery and see the top of the Woolworth Building far up where it scratches against the edges of the moon. They're back home and the human tide still surges up and down on Broadway just as if they hadn't lit in the old town. Not

a friendly face in all that desert of stone and steel.

Nothing like "Seeing Baltimore First" even to those who like slipping over to the Hotel Pennsylvania or The McAlpin for the Saturday night bath, and the thriller at The Hippodrome.

We understand that the absence of Mascot Tall from the Bowling Team has caused "Lady Luck" to miss a smile or two for said bowlers. We hear some awful stories of "all down but one" from those who believe in the influence of lucky stars on straight runs.

Lots of "alley" talk these days. Here's to the success of the gang.

McCann has joined the Radio-ists. He's gotten his dictaphone tuned up so he can even hear WURK in the day time. Not only hears but makes it hum.

The strenuous labor of January failed to affect the weight of Friend Hachtel. The arrow still flies to the same mark. That good home food must counteract the effects of intensive strain at "figgerin." Happy the man who has found a chronometer balance for all the ills and strains that flesh is heir to.

We welcome three new members to our office force, extend to them the right hand of greeting and wish them all success in their new fields of activity.

Miss Lillian Derlin, stenographer to the chief registrar. She came to us from the Purnell Art Galleries of North Charles Street. Stepped right out of a picture.

Truman S. Hepting, claim clerk, transferred from the Engineering Department.

Charles W. Jahns, messenger, formerly with the American Wholesale Corporation.

#### Transportation Department

Correspondent, LUKE K. BURNS

'Twas the night before our Second Annual Dance and the ground was heavily laden with snow. The weather man had prophesied a 36-hour snowfall and we sorrowfully gazed at the light whirling flakes, thinking the while of the never-to-be-forgotten blizzard of last year. But the next day we rejoiced for the sun smiled warmly down upon us and we again looked hopefully forward to the dance.

The turnout which Mr. McCann greeted at the door was even greater than we had anticipated and everybody agreed that it was a "swell" affair. Financially, too, it was a great success, and the committee, C. F. Scharnagle, Leo Phillips and A. M. Greenberg, deserve much credit, as do the other departments that helped to make it a success.

Everybody was so pleased that there is much talk of a similar affair to be held in the near future (after the Easter holidays).

Of the guests invited the only ones able to attend were Mr. Neessner and his aide, Mr. Toomey.

Most of the dancers stayed until the last dance, which proves that everybody had a good time.

#### Office of Assistant Comptroller Deverell

Correspondent, JOHN RUPP

Chats of The Chesapeake—Terrapins

In the Saturday Evening Post of February 3, David Augustus Flack muses that the terrapin was no more esteemed in slave-owning times along the Chesapeake than is the boarding-house prune in New York City today, they were so very plentiful. This state being the home of the terrapin, be it moved and seconded that our Culinary Column Editor of the MAGAZINE publish

a good terrapin-stew recipe for the readers, or tell how to prepare delicious terrapin soup, "a-la-(Bopp)-Maryland."

(Wouldn't it be best to get our Financial Department to advise us first, how to buy them?—Ed.)

It is noted that our Passenger Department is making a drive for new business through a series of "ads" in the most prominent magazines of the country. This will, no doubt, be productive of good results. As employees, each one of us can lend help by boosting the Baltimore and Ohio and acquainting our friends with its excellent passenger train service.

On January 29 a meeting of our Welfare Association was held. J. T. Maloney was elected as chairman, succeeding E. F. Jendrek, whose services we were so fortunate to enjoy during the year 1922. Miss A. M. Kerr, who was our treasurer during the past year, has kindly consented to serve another year in the same capacity. C. B. Lewis, who so ably reported the various activities and events during the past year as secretary, asked to be excused from serving another term and has been succeeded by W. N. Owens. Constructive measures were taken and suggestions made as to how our treasury could be replenished, resulting in the appointment of W. N. Owens to select three members of the Welfare Association to consider ways and means so that "day-by-day-in every way" our treasury will get bigger and bigger.

Remember the economy drive on behalf of the Railroad that is being made through the "Stop-That-Leak" campaign. Please do what you can to save Company material.

**Auditor Freight Claims Department**

Correspondent, NELLIE F. COLLISON

H. E. Bokman and Miss Lillian Foster, this department, worked industriously to have the Baltimore and Ohio represented in the inspection tour of France by the Good Will Association, and the less fortunate among us congratulate you, Miss Spengler, and hope to be able to wish you a Bon Voyage.

A most important meeting of our Welfare Association was held after office hours on February 14, our president presiding. The "Stand Patters" won an overwhelming victory, and as a result of this victory the association will continue to promote social features, etc., and the general welfare of its members. Quite a bit of comedy was enacted by our WHO and GRA in casting their votes.

Miss Lillian Dittmar was hostess to her many friends on February 6, the occasion being a "House Warming." Dancing and orchestral music filled the evening's program.

Among the notables present were George Hollowell, Miss Margaret Will and Miss Lillian Foster, of this department. The little germ "Flu" visited Miss Alta Baker and although she tried to make this visitor understand that she was otherwise engaged

for the evening of February 6, he was persistent with his intentions, and Miss Baker's regrets to Miss Dittmar followed.

Sir Galahad, impersonated by one HAB, missed a dramatic opportunity when his Marion slipped down the steps. Probably his winged heels were not properly adjusted. However, the shock received by our heroine occasioned another disappointment for Miss Dittmar.

A visit to the "Zoo" about upset the equanimity of one FXS. He was standing in front of the lion's cage when that beast gave a tremendous roar, whereupon our friend cut a straight path through the crowd, expressing himself afterwards as preferring to hear them exclaim, "There he goes" rather than "Don't he look natural?"

Wonders will never cease. T. B. says she doesn't know what caused her dreadfully bruised arm.

At last L. D. has resorted to rubber heels. We are thankful to "George" for the little things.

Death dealt us a terrific blow, and the beloved of three of our fellow workers yielded to its grim clutch on January 24, January 25 and January 26. Our deepest sympathies are with each one of you along the lonely road.

Keep your waste baskets empty, and STOP THAT LEAK!

**Auditor Passenger Receipts**

Correspondent, FRANK O. CLARKE

The new Social Committee of our Welfare Association made a huge success of the dance given at Walbrook Hall on February 9. All enjoyed themselves to the utmost. Special features of the evening were songs by Mr. Benhoff and an exhibition dance by Mr. G. Smith and his partner, Miss Edith Cooper. The music, which was furnished by Nelson's Imperial Orchestra was such that no one could possibly resist its invitation. Our little "Tommy" sure did beat those drums, and "Nels" certainly can pick music out of a banjo. Those who are not members of our Welfare Association do not realize the fun they are missing. Come on in!

What was that commotion in the Division Bureau on February 14? Only our friend "Tommy" Cook announcing the arrival of a seven pound girl Valentine on the day before. We all congratulate you Tom, and may that smile on your face ever broaden.

Mrs. Anna Lawlor has returned to her duties after being ill. We hope that she may now enjoy good health.

Someone said our friend Goldsmith had proposed to a certain young lady, but was told by her to wait and she would let him know. Keep at it, George.

Here is a tip to those who believe in signs: There's something on Jessie's third finger that shines,

If these lines have not put you on the right track,

A full explanation may be had from "Zack."

The office folks extend their sympathy to Fred Miller and Walter Seems, who recently lost their mothers, and to Claude Howard and Miss Celeste Hayden, whose fathers recently passed away.

**Auditor Coal and Coke Receipts**

Correspondent, JOHN LIMPERT

Friends and Enemies—Nix, Burns and Spelden especially: Eddie White has bought a Ford! Stop, look and look again before crossing streets. This may be one of the ways to hold a hubby, but we doubt it. Just suppose the old boy should forget some day where he parked his treasure. Can you picture him rushing up Liberty, down Howards, out Lombard, around into Pratt, hailing every Ford that passeth? Or suppose he should climb into a Packard some day in mistake for his "Henry," or go home and forget it entirely.

Several suggestions of friendly advice are offered Mr. White by well meaning individuals among which are, never stop the "fliv" in the middle of the street to light a cigarette, or eat walnut taffy while driving.

Another engagement ring has made its appearance in the office, and is adorning the third finger on Miss Florenee Bennett's left hand. The lucky boy is Mr. Harry Shaefer. Understand "it won't be long now" before the wedding bells ring.

The office bowling league is getting along towards the close of the season and, including games of February 9, standing as follows:

	WON	LOST	PER CENT.
Royal Blues.....	38	22	633
Head Lights.....	35	25	583
Pull Men.....	32	28	534
Bumpers.....	15	45	250

Head Lights went into a tie with the leaders, night of February 2, but lost out the following week. Al Lehman had one of his good nights on February 2, rolling 335 for his three games.

**Conclusive Proof**

A quack doctor was advertising some medicine on the street corner.

Doctor: "I have sold these pills for twenty-five years and never heard a complaint. What does that prove?"

Voice from the crowd: "That dead men tell no tales."—Exchange.

## Eastern Lines

### Pier 22, New York

Correspondent, JOHN NEWMAN

Being a man of deep erudition, with a natural aptitude for shooting the bull, the correspondent stands ready to answer sundry and all fool questions put to him. Address questions to "Q. B." (questions box).

The following have been submitted:

Q. Why do girls blush?

A. They don't.

Q. Why has M. C. pink cheeks?

A. Pinxit.

Q. Why is J. R. dressing up?

A. M. M.

Q. Who got "Dotties" pearls?

A. Search me.

E. J. L. is a "polished gentleman, man-about-town, hot sport and all that" ("Jim" Lynch's definition). Also a "Jolly good fellow, that nobody can deny." And now gossip is adding still another lustre shedding title to the foregoing—that of "Gay Lothario," which is another name for what a young naturalist described as a "Red Shellfish." Scientific name "Lobsterus Sofibus."

Now and then, still frequently, something occurs that awakens memories of the days of fanfares and Godspeeds, cheers and tears, when our boys, sons and sweethearts, went "Over There," some to stay, others to return, whole or in part. Such a something was the recall and return of the last remnant of the A. E. F., the residue that has been kept doing police duty as a "Wacht am Rhein," since the Armistice was signed. This epilogue to the war history is not quite so exciting but just as dramatic as was the prologue. However that is not my theme.

The other day one of the fellows in the office pointed out to me a new addition to the force. "See that quiet, modest looking chap," he quoth, "You wouldn't judge him to be a hero, would you? Well he went over with the 78th Division 6th Regiment U. S. Marines, and came back with the Croix de Guerre and the D. S. C. He was in the Champagne sector and one night while scouting he met three of the enemy, fell on them, and they were his; it is all in the Citation. Some kid!"

"Brave boy," said I, "and lucky," thinking of some other boys I knew, that were not decorated and didn't come back. The Gold Star Boys. "What's his name?"

"Jack Eigler," answered my informant. Jack Eigler, we salute you.

Lynch pictures Eigler of Pier 22, getting his D. S. C. for valorous service in the Great War

MT. CLARE BABIES  
Edna, 8 year old daughter of Machinist William Kraft, and Norman William, little son of Material Supervisor William G. Brown

We congratulate ourself on being so popular with the ladies, even though we do poke fun at them in our notes. It is written that "a little nonsense now and then is relished by the best of men," to which we would add: "also the worst of men and all the intermediaries." We like nonsense, coming and going. Seems to make life lighter and light brighter.

Making out a service voucher the other day to an alien named Krautwurst, "Bob" McCullough of the Division Accountant's Office who happened to be by, translated the name to "Hot Dog." Which led to a discussion of outlandish names and the suggestion was made that the authorities that Americanize the "furriners" should, when conferring the citizenship, confer an American name at the same time. Of course, as a matter of fact, most of the names could not be translated as easily and aptly as Krautwurst, but what is the matter with "Smith?"—Plenty of room for more of 'em!

## Staten Island Lines

Correspondent, G. J. GOOLIC

The employes of the Staten Island Lines extend their heartfelt sympathy in the following deaths, bringing bereavement to so many of our family: E. Viner, retired shopman, who died January 22, C. Peterson, retired carpenter, who died January 9, J. O'Neil, father of Viola C. Nelson, stenographer, Division Engineer's Office, who died February 10, Michael Lenza, crossing watchman, who died February 8, B. F. Fithian, agent at Tottenville, who died January 8.

A. Offerjust, Maintenance of Way timekeeper, was promoted to Motive Power timekeeper, vice C. Anderson, resigned. Walter H. Hill, fuel clerk, filled the position as Maintenance of Way timekeeper.

J. A. Goodski was promoted to stenographer and clerk to marine supervisor, vice Miss B. A. Gaynor, resigned.

Fred L. Vere was appointed stenographer and clerk in Superintendent's Office vice J.

A. Goodski, promoted. F. L. Vere was transferred from H. B. Voorhees' office.

Whoever wants to buy a good car, please see W. P. Slattery. He wants to sell his Chevrolet in order that he can purchase a larger one. There is a rumor that the reason he's getting a larger car is so he can take a trip to the Pacific coast this summer. Is this true, "Bill?"

## Mt. Clare Shops

Correspondent, WILLIAM H. ZELL  
Superintendent of Shop's Office

Poole, the COMING ATTORNEY, spent his vacation taking examinations in order to pass the BAR Exams.

Just a few words to welcome our new telephone operator, Miss Helen Mitchell, who took the place of Miss Dailey, who resigned just prior to the fire. We wish Miss Mitchell success and no doubt after she gets acquainted with the bunch, she will feel more at home.

## Stores Department

It has been a long time since the Stores Department has been heard from but we are living just the same, and now that Spring is approaching, we are going to blossom forth in full bloom.

H. Shoemaker, storekeeper, had a birthday on February 8. We all wish him many more happy ones—I suppose he remembers the Baltimore fire.

Cupid has again shot an arrow into our midst. This time he has pierced the heart of Miss Edna Buzzard. We all wish her great happiness.

From the looks of things there may be another surprise. Everyone knows that widows have charms.

We regret to hear that our assistant storekeeper, Harry Lauman, is ill and hope he'll be back with us soon. His absence is much felt—he is a sort of "Bureau of Information."

The Victrola continues to amuse at lunch time. Might be well for the gang to pitch in and buy a few records.

## Freight Track

H. Alker, carman, has been appointed one of our Safety First committeemen, and we know that he is going to do all in his power to make the Steel Car Shop a Safety First Shop. So, Boys, let's all lend him a

These knives make fine Birthday and Holiday PRESENTS. **NOVELTY CUTLERY CO. 335 Bar St., Canton, Ohio**

Camden Station Hall of Fame? No. 1

hand in doing his duty and see what a good record he can make.

J. T. McKittrick, carman helper, who was injured in an automobile accident recently, has recovered and is back at work.

Our M. C. B. clerk, "Heine," startled us the other day by coming in wearing a derby—we all thought it was "Pussyfoot" Johnson.

The accompanying photograph of Norman William Harrington, born December 23, 1921, grandson of Supervisor of Material William G. Brown. The other picture is of Edna M. Kraft, age 8, daughter of Machinist William Kraft.

**Accounting Department**

The stork visited the home of Mr. Vincent on February 3, bringing another little baby girl, Mildred. We extend hearty congratulations and trust mother and baby are doing well.

A good many of the young men in this office, we take notice, are eating their lunch at Stack's. Wonder what the attraction is!

**SAFETY FIRST**

**STOP** and look around before throwing anything from the tops of cars or engines, or when backing out rivets, as it is easy to injure a fellow workman passing by.

**ALL** employes working around cars, engines or dangerous machinery should wear their goggles over their eyes and not on the backs of their heads.

**FATAL** accidents are caused by carelessness, so watch your step.

**EVERYBODY** should interest himself in safety matters, and, if he observes anything that is not safe, he should call it to the attention of either the safety committeeman in his shop or to his foreman, in order that it can be corrected.

**TELL** the fellow next to you to be careful and keep his mind on what he is doing.

**FOLLOW** your Safety First Rules—by putting them into effect you can be of great help to the other fellow.  
**INJURIES** can be avoided if you are careful.  
**REMEMBER**, when jacking up engines or cars, to see that your fingers, arms and hands are clear in case the jack should slip.  
**SAY** to the careless man that he could have avoided that accident if he had used a little more care in performing his duties.  
**TO** all the employes at Mt. Clare, I say that if they will follow these few Safety First Sayings they will reduce injuries and increase happiness.

ness. Mr. Lamar has bought a sport model Cleveland with a Boot-legger's trunk on the rear (as he terms it). Mr. Kelly invested in a Baby Grand Chevrolet; but we are told that before doing so he went to the Baltimore Automobile Show and there tried the fit of a Sedan on which he got stuck. It was necessary to disassemble the machine to get him out. Anyhow, "Ed." is particular as to fit and decided the Baby Grand would suit his purposes better.

Several of the young ladies in the office have gone in for toe dancing. We mention Miss Esther Auld and Miss May Schamel. Anyone who has a pair of toe dancing shoes that will fit will confer a favor by sending them to Miss Schamel.

A couple of colored ladies engaged in a snow ball combat the other day on Camden Street, while Correspondence Clerk "Ed." Hughes happened to be going by, and he received the missiles. "Ed." is a good checker player and presume he made the proper move.

Miss Pearl Berrett took the fatal step on January 30, and is now Mrs. John Ford. Congratulations. Miss Berrett is employed in the Division Accountant's Office, Camden.

Quietness was noticed in the office for a week. "Ed." Hughes was home sick. However, he is now back on the job, hale and hearty as ever, and the show goes merrily on. "Ed." has a standard lunch-con. If the menu is desired, write him.

After hearing "Abe" Lincoln sing, we don't wonder that his hat is too small for him.

Now that "Ed." Myerly is in an office by himself, mufflers have been removed from the cars of those in the office. Thanks! "Ed." sometimes enters into competition with the radio. Present day method don't suit "Ed." as he cuts the wires and just lets it go. Some noise.

Mrs. E. F. Keene, wife of general car foreman, Baltimore Terminals, and her little boy, who took first prize in a baby show last summer

**Baltimore Division**

Correspondent, W. H. TARR

Business has improved to such an extent that new men have been taken on as firemen and brakemen and the trainmaster's and road foremen's clerks are busily engaged in the handling of the new employes, with their other duties.

Agent J. M. Wright, Lansdowne, while hanging mail at the mail crane, fell and injured himself severely, and has been confined to University Hospital, Baltimore.

Agent J. D. Parker, Raphine, Va., who has been ill for some time, has returned to duty.

Train Dispatchers W. E. Rowe and H. Hambleton have been off sick for some time and we trust they will be back with us soon. Mr. Rowe has been suffering with a nervous breakdown.

Dispatchers M. T. Lamar and "Ed." Kelly have gone into the automobile busi-

CAMDEN STATION HALL OF FAME? No. 2.

SOME OF OUR FOLKS AT SWAN CREEK

Left: F. H. Budnick, first trick water station pumper. Mr. Budnick has a 22-year service record, 20 years of which he has spent here. Right, J. L. McFadden, second trick water station pumper, with Mrs. McFadden and two of their babies, Laura Virginia and Ruth Priscilla

Miss Elizabeth Carr won a dollar the other day—she did not talk to "Pete" for a whole week.

Sympathy is extended Joseph J. Benick, clerk in Division Accountant's Office, in the death of his father on January 17. Mr. Benick's father lived to the age of 71. Floral design was sent by members of the office force. Mr. Benick takes this means of expressing his appreciation.

Dispatcher C. A. Hopwood lost his mother on February 6. Sympathy is extended.

#### East Side, Philadelphia, Pa.

Correspondent, CHARLES H. MINNICH

Our sympathies are extended to Samuel Land whose wife died suddenly about January 15.

We also regret to note the sudden death of T. C. Tate, night baggage agent at 24th and Chestnut Streets passenger station. Mr. Tate's death was due to a severe attack of acute indigestion.

Maintenance of Way Supervisor Waskey has been "among the missing" for the past month. Upon investigation we found that he has taken unto himself a wife and was touring the South, including Palm Beach. Congratulations!

Pleased to report that Frank Brennan has recovered from an attack of pneumonia which caused his absence from us for two months and that he will soon be with us again with his Irish wit and cheerful disposition.

"Day by day in every way the railroads seem to get busier and busier." Let the good work keep up!

#### Washington, D. C. Freight Station

Correspondent, W. L. WHITING

It is always a pleasure to hear good reports concerning those with whom we have at times been connected and a very happy surprise came in the report from Buffalo, N. Y. that Mrs. J. C. Krieger, formerly Miss Jane McDonnell, had presented to the community a fine, large, bustling boy! Both "Joe" and "Jane" were for a long time employes of the

Baltimore and Ohio at this station. "Joe" was demurrage clerk and "Jane" was agent's stenographer. The sister, Miss Mary McDonnell, cashier's stenographer here, took a rush trip to Buffalo to act as Godmother to the newly-arrived infant, and returned full of enthusiasm over the happy event. She reports that both mother and baby are getting along finely, and that "the only baby in the world" is in every way a "Buster." Congratulations to the happy parents, and wishes for many happy returns of the day!

The Relief Department recently made a change in our medical examiner, Dr. H. B. Guistwhite being transferred to Keyser, W. Va., and Dr. F. H. D. Biser coming from that point here. We wish the departing one all success, and welcome the coming one to our community.

The prevalent epidemic of "Flu" has considerably interfered with the peaceful running of our office, many of our force having fallen victims to its ravages. O. S. & D. Clerks John B. Everson and Miss Winnie Tyler are among those who suffered the most. "Johnnie" Everson has returned to duty, but Miss Tyler is still absent.

J. H. Huhn has been sick for several days. Reports show good improvement in his case, point to a quick return to duty.

E. C. "Jack" Mullikin, collection clerk, has just returned from a trip to Florida for his health. He shows the benefit he has received from his trip, and makes some of those who are ailing wish that they were able to enjoy that wonderful climate.

But although these notes are being penned while the snow is falling here, and shows signs of continuing to do so, yet out in our yard is the Pullman coach of the John R. Van Arnam Minstrel Show! This is a sign that Spring is on its way, and that the blue birds will soon appear. It will not be long before the Annual Circus trains appear on our tracks, and then Good-bye, Old Winter, for a year.

It is pleasing to state that during the month of January, 1923, this station made an increase of \$151,018.18 in revenue, and

of 44,000 tons handled, over the month of January, 1922! This is good work and bears out our statement that we have been making lately regarding the outlook for increased business during the present year at this station.

The month of December, 1922, also showed a large increase over the same month in 1921; but that is last year, and we are content to rest on our laurels earned this year.

Let's put our shoulder to the wheel to handle all that is given us so well that our shippers just can't help coming back for "more!"

#### Brunswick

Correspondent, R. L. MUCH, Conductor

Frank Robey—"star" bowler of the Imperial Bowling Team, defeated Brunswick's Champion, Chief Caller Floyd Strickler, by a few pins the other day. Floyd says he will trim him next game.

One hundred and sixty two ladies, wives and daughters of our employes, took the degree of Pocahontas in Red Men's Hall recently under the crack initiatory team from Frederick. Mrs. Emma Hawkins, wife of Conductor Hawkins, was mentioned for president of the association.

Conductor Earl Grams, whose finger was mashed on the hump, is getting along well. Earl is lucky this time, as two of his fingers were lost off the same hand some time ago.

A very distressing and painful accident happened to Yardmaster Sprigg Hedges, son of Doctor H. S. Hedges. In passing a load of stock a mule kicked off a piece of board which struck Mr. Hedges in the eye, causing the sight to be destroyed. Sprigg is very popular among our trainmen and we offer him our deepest sympathy.

Veterans' Secretary Kirk Compton, spoke very highly of his visit to Baltimore where he attended the meeting of the Veterans Association. A big time is expected by us all when the annual celebration will be held here this summer.

Assistant Yardmaster Thomas is strutting around like a peacock on account of the arrival of a little yardmaster at his home.

Brother John W. Peyton, who has been suffering with a heavy cold, is getting along quite well. Mr. Peyton is one of our hard workers, and always has a good word for everyone.

The sight of new rolling stock coming through our yards here is very cheering to us all; it shows that the Best and Only is right on top of the business end of it and we are on the job to do our bit.

#### Cumberland Division

Correspondent, JOHN J. SELL

"Stop that Leak." A suggestion in time may save nine (dollars or lives).

We are always glad to hear a good word spoken of our employes by our patrons. Recently one of our employes was riding over the M. & K. Sub-division, when an officer of the Connellsville Basin C. & C. Co. remarked that Assistant Road Foreman of Engines F. R. Browning was one of the most accommodating officials he had come into contact with; it is sentiment of this kind that gets business.

The accompanying is a good likeness of Rose-Mary the 18 month old daughter of A. J. Kelly, district supervisor of terminals.

They are telling a good one on our old friend, "Charley" Wigal. It appears that

**LITTLE CUMBERLAND FOLK**

Left: William Elwood, 13-years old son of Icing Supervisor W. A. Johnson. Right: Little Rose Mary, 18-months old daughter of A. J. Kelly

Crew Dispatcher M. W. Fuller presented "Charley" with a fine rabbit dog, and being some hunter, "Charley" had to give the dog a tryout. Taking him some distance out the pike he turned him loose in the wood to jump up Br'er Rabbit. After a good deal of barking no rabbit put in an appearance, so one of the party beat the brush and jumped up a rabbit, the sight of which caused the dog great excitement. What will you take for him, "Charlie?"

Accompanying is a good picture of William Elwood Johnson, 13 year old son of W. A. Johnson, icing supervisor, Cumberland Terminal.

One of our officers has suggested the following for consideration by our train and engine employes, in connection with the "Stop that Leak" drive:

Proper use of train and engine supplies, proper care of supplies drawn from store-room, conserving of usable material, picking up such articles as they find in day's work, proper report of all material placed on foreign cars on line of road, in order that owners can be billed for it.

Our efficient operator, Oscar J. Rash, Hancock, has responded splendidly in the "Stop that Leak" drive, having contributed several suggestions which have been given prompt consideration, and will probably effect economies and better operations. Keep up the good work, Oscar!

During the latter part of January we were paid a visit by several officials of the New York, New Haven and Hartford Railroad, who made an inspection of our shops and facilities in Cumberland. The party included Mr. Townsend, assistant to the president and A. J. Devlin, superintendent of production and bonus, and was shown through our roundhouse, back shops, reclamation plant, car yards and storerooms, conducted by several of our operating officials. The visitors were high in their praise of the manner in which our operations are conducted, and the clean condition in which they found the facilities. Every employe who has anything to do with the keeping of our facilities and surroundings in proper shape, can feel proud of the visitors' comments.

Many friends of the former secretary to the division engineer, Miss Laura Lingamfelter, were surprised to hear of

her marriage to Mr. Carl G. Degen, of Martinsburg, W. Va., which took place February 12, at Martinsburg. Much luck is wished by their many friends to the happy couple.

Our old friend, W. H. Gatehouse, has been doing his bit in the "Stop that Leak" drive. "Professor," is M. P. labor distributor in the Division Accountant's Office and has succeeded by the use of a pencil holder to use a pencil in his work to the size of half-inch. This is only one of the many ways the "Prof." has effected economies, paying marked attention to the use of forms and other stationery supplies, and always using obsolete or imperfect forms for scratch paper, thereby getting the most out of every item.

A number of our engine crews on the Cumberland Division have been doing good work in the way of conserving fuel. Quite a few have been able to show a one hundred per cent. performance in this connection. They have been written a letter by Superintendent Van Horn, congratulating them on their performance.

**TAILORING \$50 to \$100 a week AGENTS WANTED**

Tailoring agents earn \$50 to \$100 a week selling virgin wool tailored-to-order suits and overcoats direct to wearer. All one price, \$29.50. Wonderful values. Rich assortment of fabrics. We furnish 6x9 swatch outfit and free advertising. Protected territory. Commissions in advance. Will train inexperienced men who are honest, industrious, ambitious.

J. B. SIMPSON, Inc., 831 W. Adams St., Dept. 507 Chicago

The Baltimore and Ohio Cumberland Shop Band has been winning new laurels recently, having given several concerts in Local Theatres and in neighboring cities, where they have received much praise.

**Martinsburg**

Correspondent, W. L. STEPHENS

The accompanying photographs portray the hunting party of Boilermaker J. G. Davis of the shop. These mighty hunters can give the illustrious Nimrod pointers in this sportsman's game. The party included John G. Davis, Dr. W. T. Jenkins, Dentist Charles Baker, George Hersfal and Ward Wicklin of the Interwoven Mills. John says the rabbits were as thick as cranberries in the bogs of Jersey. Did you ever hear of rabbits growing on cranberry bushes? Some happy hunting ground!

The Ladies' Auxiliary is planning various social activities and under the leadership of Mrs. C. E. Auld and her staff of live wires the chapter is humming with increased vigor.

The death angel has been especially busy in and around Martinsburg and his grim hand has fallen upon a number of railroad employes and their friends.

Mrs. Kate Grove, widow of Conductor George Grove, died at her home, 208 East Martin Street, from heart trouble. Mrs. Grove was a member of the Ladies' Auxiliary to the Baltimore and Ohio Veterans.

William Anthony Chambers, Veteran Baltimore and Ohio painter, died at his home, 414 West John Street, after a short illness of paralysis. He was born in this city 74 years ago and at an early age entered the service of the Baltimore and Ohio and spent 51 years of his long life in its service. Three years ago he was placed upon the retired list and awarded the 50 year service button. The deceased was a faithful and conscientious employe and had the

**MARTINSBURG HUNTERS AND THEIR CATCH**

Please mention our magazine when writing advertisers

rare luck to escape with but a few days sickness during his 51 years of service. He was a consistent member of the First Baptist Church and was a regular attendant at all the church services. He was a member of Equality Lodge No. 44 A. F. & A. M., Washington Lodge No. 1, K. of P. and Brunswick of Baltimore and Ohio Veterans. Eight children survive.

James W. D. Conner, another old pensioned employe, died at the home of his daughter, Mrs. Blanche Rife, 504 North Queen Street, on Wednesday, January 24. The deceased was born in Jefferson County W. Va., 74 years ago. He came to this city early in life and when quite a young man entered the service of the Baltimore and Ohio, serving in different positions during a period of 40 years. The later years of his active service were spent as crossing watchman at Queen Street Crossing, from which position he was retired. He was a member of the local association of Veteran Baltimore and Ohio employes.

#### Keyser

Correspondent, H. B. KIGHT  
Ticket Clerk

The accompanying photograph is of the force who kept things moving in Keyser yard, during the Flu epidemic a few years ago. Reading from left to right are: W. H. Virts, yardmaster; Mrs. Stella Salyards, Miss Bertie Lark, Harry K. Atkins and Miss Ellen Hessen.

It is with deepest sympathy that we report the untimely death of Mrs. H. S. Hoffman, wife of west end engineman, which occurred in a Cumberland hospital on February 10.

"Charlie," the church carpet looked fine after you had finished with that vacuum sweeper.

We extend to our friend, Mr. Albert Droege, general superintendent of the New York, New Haven and Hartford Railroad, our heartfelt sympathy in the death of his aged mother, which occurred at Deer Park. The Droege's were the first settlers of good old Deer Park, and during my summer stays at the Hotel station, I learned to know them and to love them.

Brakeman P. Hott is back on the job after having been off for some time suffering with a couple of broken ribs, which injury he sustained while performing his duties at Hutton.

#### Fine Efficiency Record

Here is a record of which every West End employe must be proud. We realize that

They did yeoman service during the "Flu" epidemic of 1918-19 in Keyser yard. See notes

CHARMS REPAIRS  
Easy Terms to Baltimore and Ohio Employees

We have a big, mountainous division and that we move lots of freight, but did you know that during January, 1923 we had the best movement on record? During that month there were moved 47739 loads and 32879 empties, making a total of 80618 cars. The best previous monthly movement was in October, 1919 when there were moved 44539 loads and 33000 empties, making a total of 77539 cars moved during that month.

The reduction in the cost of fuel for the month of January was \$17,700 over the same month last year. There was a \$773.00 reduction over the same month last year on fuel used in the Keyser yards and \$366.00 reduction on fuel for passenger service on this division over the same period.

Who would ever think that Cupid would have shot an arrow that hit the heart of Assistant Yardmaster "Neil" O'Connell? But Cupid did, and recently we learned of Neil's marriage to Miss Sallie Houser, of Keyser. We con gratulate the happy couple, and welcome Mrs. O'Connell into our Baltimore and Ohio family.

Yardmaster Charles Stone, who looks after things in the yards at Willard, paid homefolks at Keyser a visit, last month.

#### A Tiny Picture for a Noisy Story!

Sorry to learn of the destruction by fire of the home of Engineman V. E. Lynch, at Newburg, a few days ago.

The "Stop That Leak" Campaign is now on, and should continue to be on all the time. Do you realize, men, that waste of time, of material, etc., is a leak that is ever draining the finances of the Company for which we work, and that we, as employes, should be interested enough to do our utmost to help stop the leaks. There are so many ways in which a small leak can occur, and it gradually grows to a big leak, so appoint yourself as a committee of one to help save for the Company.

In conversation with me a few days ago on the above subject, Fireman Fay Hartman told me that he had gotten seventeen grate bar shakers out of a scrap bin and had brought them into this terminal on the front of his engine. Good work, "Fay!"

Mrs. Stover, wife of our genial agent, underwent a serious operation at the Hoffman Hospital. She is reported as doing nicely.

We extend to Conductor John Chrisman, also to Miss Blanche, stenographer in the Terminal Trainmaster's Office, our deepest sympathy on the death of Mrs. W. C. Pifer, daughter and sister, respectively.

Regret to report the serious injury of West End Conductor Harry Cole. Accommodation train No. 36 struck him at Blaser. He was rushed to the Cumberland Hospital where he is doing as well as could be expected.

#### Shop Notes

Our files are now located in record time and the familiar quotation "We have no file on this letter," eliminated from the office vocabulary, since Leaner has equipped herself with glasses.

A. R. A. Clerk Ethel has requested copies of all bulletins posted by the Staten Island Rapid Transit Railway, advertising vacant clerical positions.

Boilermaker Foreman Spicer kept "Shadow" Paxton and "Bill" Wolfe in the fire box of engine 7021, all day February 2, Ground Hog Day.

Our messenger "Carrie," says she only needs \$498.00 to complete the \$500.00 nest egg she wants to have, providing George secures permanent employment.

With New Year resolutions still intact, several revival meetings in progress and the presence of Lent, "Ginnie" says the bootleggers have reduced prices 25 per cent. and six of them have gone to work.

Our congratulations are extended to Shop Clerk and Mrs. Dietz, on the birth of a son and heir. Hugh says that while this is a decided improvement as well as a betterment, a Form 940 will not be necessary. Note cartoon above.

SPRINGFIELD, ILLINOIS

*Please mention our magazine when writing advertisers*

Left: Bridge No. 552, Romney-Petersburg Branch; center: Carpenter Foreman George Clarke and "the gang;" right: Frederick Wilson, 8 year old son of Yard Foreman H. W. Gross

B. J. Davis, our popular work report writer, has resumed duty after recovering from the "Flu." Good nursing, no doubt, kept him in the house a little longer than necessary. As "Do Do" says, "It is so good for 'B. J.' to be sick."

The mystery of the office, "What do Alice and Ruth talk about?" They have evidently taken up the wrong vocation in life—they would make star reporters for the Mineral Daily News.

P. J. Chesshire, our veteran wreckmaster, is able to move about after the injury to his foot some time ago. "Perry" says he will enjoy the breezes of Florida, accompanied by his wife, before returning to harness again.

G. E. Sirbaugh, old "Safety First," at the shop, states that he is going to put Keyser on the map once again as far as Safety work is concerned and cop the banner for the year 1923.

Certainly he is doing his part to bring about the desired results. "Ed" states that he gets more knocks than any two armed men on the division, gets more results with one arm than 100 men with two arms and has still got the "pep." He is covering a lot of territory and we all wish him success.

While in Baltimore a few days ago Clerk G. H. Sheetz had the opportunity to converse with the chauffeur of President Willard, in front of the Baltimore and Ohio Building. "Sheeny" has since been telling his friends at Keyser, the kind of car, number of cylinders, speed, cost of maintenance, make of tires as well as the riding qualities and comfort of same.

The monthly A. R. A. meetings that are held in the Office of the Car Foreman at this station are producing beneficial results in A. R. A. work in this territory. At the last meeting on January 18, from 7.30 to 11.00 p. m. there were present 29 employees. Recent changes in A. R. A. rules, proper checking of bill, wrong numbers or initial, reading of circulars, etc., were reviewed, and explanations and suggestions offered to facilitate the proper handling of this class of work.

**Deer Park**

Correspondent, F. W. REIS

Cesare P. Orbello died on December 29, 1922. Mr. Orbello was born in Tenda, Italy, in 1856. He came to America at the age of eighteen on an American man of war. He became a naturalized American citizen a few years after becoming of age.

In the year 1882 he married Miss Alice Greenwell. Two years later, he was first employed by the Railroad at Deer Park Hotel in capacity of chef and continued in this position for about 20 years and he then took the combination position as chef and steward at the request of one of our presidents. He held this position until two years ago, when he retired from active service.

During his work at the Deer Park Hotel

he cooked for and served many Railroad presidents. President Cleveland was his guest in 1886; he was on his honeymoon at this time. President Harrison was another guest that he served.

Mr. Orbello is survived by his beloved widow; two daughters, Mrs. Mazie Simons and Mrs. Edith Orme; two grand children; and one son, Mr. Frank P. Orbello, manager of the Hotel Driscoll, Washington, D. C.

Correspondents, EARL FAIRGRIEVE and MARY BREEN

**Be a Booster**

We have no little amount of preaching on this "Boosting" question, but a few words more will surely be of no harm and may possibly be of a little assistance to someone.

Boost yourself, your work, your department, and last but by no means least—boost your Railroad. The more earnestly you do your boosting, the more efficient you will become.

You wouldn't want to be a bluffer, would you? No, because there are already too many of that species walking around loose just at this time. Do we admire or overlook them? Most assuredly, no. It's easy to see through them. There's nothing there but the big front and when they are turned around, we find there is no backbone.

After a while, when we have thoroughly acquired this habit of boosting, for repetition makes for habit—why you'll even surprise yourself at this interesting game.

For these reasons, don't let any opportunity slip by. No matter how trifling, if you have a chance to give your railroad a Boost, then by all means do it, because while there is none better than it, we will be able to make it just a little better than the best. For instance, a friend may be intending to make a trip. Get after him—be a "go-getter;" in the end, it is the little things that count, and it is by following up these little things that we finally reach the bigger ones.

**Monongah Division**

Correspondent, ANNA MARY UNKS

Heard in the Car Distributor's Office

Jaek says—

Day by day  
In every way  
I'm getting thinner  
And thinner.

Marie says—

Day by day  
In every way I'm getting  
Fatter and fatter.

B says—

Every day  
In every way  
I'm getting shorter  
And shorter—of cars.

Mr. Keller, Car Distributor's Office, has accepted a new position in the freight office at Fairmont, W. Va. We wish him success.

Jaek has decided to give Anna a new position. We have a big picture of Anna in gingham and kitchens.

Lelia Ware is spending every other in Clarksburg, W. Va., gathering knowledge at a business school. We wonder—

Marie Deegan has gone back to the Car Distributor's Office—so on with the entertainment.

C. R. Wolfe, night clerk in the Chief Dispatcher's Office, is ill. We wish him a speedy recovery.

A. P. Lavelle, branch dispatcher, has been indisposed. We are glad to have him back among us.

We are still looking for that visit which Austin Staley of Fairmont, W. Va. promised us about eight or ten months ago.

The friends of Miss Mamie Eichelberger and Richard Foley congratulate and wish them much happiness. They were married in St. Augustine's Catholic Church on February 6. The happy couple spent their honeymoon touring a few of the eastern cities, after which they will make their home in Grafton, W. Va., where the bridegroom is employed by the Company as a machinist. Miss Eichelberger was also in our employ. Congratulations!

Anna Niland, Car Distributor's Office, is spending a day or so in Clarksburg, W. Va. We wonder what it is that proves itself so attractive to draw her so far from home.

**Charleston Division**

Correspondent, M. W. JONES

Secretary to Superintendent

"If more men would try to break their own records, and fewer to get ahead of the other fellow, there would result that kind of competition which would spell PROGRESS in capital letters. In the end, very little is gained by downing somebody else."

In connection with the "STOP THAT LEAK" Campaign, special attention is called to our division honor roll this month, which is larger than it has been for some time, and which shows that the appeal of our Management for assistance in the economy campaign has not, on this Division, fallen on deaf ears.

We note with pleasure that in January, on the fuel performance sheet, the Charleston Division came up from tenth to second

**TO STOP WORKING**

With an annual income to meet your needs, is what you want and can have. Others are doing it, and you can by putting your spare dollars where they will grow like good seed in good ground, bring back an hundredfold or more every year. No scheme, square business. It's all in knowing HOW, WHEN, and WHERE. Send for our Free Book, "THE AVOCADO," Nature's perfect food product, that is making poor men rich. SQUARE DEAL L. & D. CO., 1135 W. Flagler St., Miami, Florida.

place on the system, but we are still too near the foot of the list on freight and yard service. However, the passenger showing is a good beginning and we hope the other two will make an upward move in February. IT CAN BE DONE!

A few days ago Vice President C. W. Galloway, General Counsel J. J. Cornwell, General Manager E. W. Scheer, General Superintendent Transportation W. G. Curren, General Superintendent Scott and Superintendent Holverstott visited Weston for the purpose of holding a conference with the local Chamber of Commerce. The general officers were entertained at an "Open Forum" dinner in the evening, and addresses were made by all. The meeting was interesting throughout, and our general officers were given a royal reception when they rose to deliver their message to our townspeople and patrons.

Courtesy helps to Stop a Leak just as well as anything else. Lack of courtesy will drive patrons away from us, and that makes a big LEAK, namely loss of traffic. That Conductor R. A. Brake and Brakeman J. B. White do not propose to have any such leaks charged against them is amply proved by their commendation as noted last month. We herewith present a photo of Brakeman J. B. White, who entered our service in 1917, and is now a promoted man. Congratulations are in order on his enviable record. We hope to show Mr. Brake next month. Being a naturally modest man, it's hard to get his "Phiz," but we have our scouts out on him.

Section Foreman J. E. Riffle, who entered our service in 1910, as a trackman and was promoted to foreman in 1915, now has charge of Section 27 at Crawford. He was one of the lucky ones who was judged to have had the best track on his Sub Division,

J. E. Riffe, Section 27, and Passenger Brakeman J. B. White

and was awarded a prize. Here is his picture, taken "right on the job" and that's where he always is, the proof being his prize.

We are in receipt of a letter from our former co-workers and friends, Mr. and Mrs. W. E. Kearfott, who now live in Baltimore, reading as follows:

Mr. Kearfott and I wish to thank the Charleston Division through the Baltimore and Ohio MAGAZINE for their wonderful present on the occasion of our marriage. We have no words to express our feelings for all the folks who were so kind, and we think there is no better way than to ask our friend, the Charleston Division correspondent, to help us. The silver was a beautiful and useful gift and is deeply appreciated by us both."

Charleston Division boys and girls, consider yourselves thanked individually, and we all wish "Bill" and Bernice every luck in their new home.

Sickness has had its innings in our midst during the past month. However, we are glad to say that every one is either back to work or well on the way to recovery. Trainmaster Nichols has the sincere sympathy of every one in the serious illness of his boy. Latest reports at the time of writing indicate that he is out of danger, and we sincerely hope so. Our sympathy goes to Agent J. A. Fisher in the loss of his brother. Trainmaster Decgans family are well on the way to recovery. Miss Justus, Miss Hayden and Miss Hostetler of the offices, have all been "down" but are now "out."

The eligible list of young and handsome bachelors on the Charleston Division is slowly but surely getting smaller, last month another of them, "Bill" Kearfott, fell by the wayside. For the information of prospective applicants, we give the following information: Brooke, Richard (Major U. S. A.) Age (?), reasonably young, handsome, fairly well endowed with this world's goods. Came back from France heart whole and fancy free. Highly recommended by all who know him as the ideal hubby. To be found somewhere on the Charleston Division. When at home lives in Weston.

Workmeister, John. Position, Claim Agent. Age, the right side of 40. Good to look at, well educated. A real "Mr. Fixit." Inquiry develops that his only love at present is "Charlie." Would look fine seated by his own fire side, reading the Weston

Independent under the soft glow of the M. V. T. electric light, to the fortunate lady of his choice.

Carpenter, John C. A real train dispatcher. Not yet gone, but the same as if he were. Therefore no applications received.

Houghton, Victor. Chief Clerk to Agent. Open to consider carefully all applications. Address, Freight House, Weston. Tall, slender and a regular "Matinee idol." Suspicions aroused for a while, but have died down of late. Further details in writing to any applicant.

Lynch, H. A. Assistant Division Engineer. An "A-1" subject. Formerly of Baltimore, now of Weston. Rumor sayeth that "There's a reason" why he did hate to leave Baltimore, and that he has recently been inquiring in town as to rents, cost of living. However, girls of the Charleston Division, "While there's life, there's hope."

And that completes the list, except for "Si." Seymour of the Division Accountant's Office. Young, blue eyes, fair, curly hair, a confirmed bowler, yet a real home man, steady as they make 'em, "Si" will consider carefully any attractions which may be offered. Next month we will list some of our girls, with the principal attractions, but candor compels us to admit that the list will be much longer. Maybe there's more girls than boys in this Statc. It would seem so.

Will the people named please answer the following questions?

Mr. Brooke: Why did you bribe the correspondent?

Mr. Sevens: What did you say when the furnace in the cellar back fired in your face? Can we print it? Did Mrs. Sevens hear it?

Mr. Schide: Why build a motor boat? Do you expect to run it down Main Street? Why not build a Flivver instead?

Mr. Pickens: Why do you like "chickens" so well?

Miss Justus: When will it be?

Miss Peg: What action are you taking to get the bonus bill through?

Mr. Kelly: Wholesale or retail? Which and why?

Miss Feagans: Do you like Railroad or grocery business best?

Miss Tivey: What do you know about the various parts of an engine? You seem to have a good teacher. May we sell you a loco dictionary?

Miss Hickman: Why did you quit going to Grafton so often?

Mr. McOsker: How do you like to be papa?

Mr. Lynch: Why paint the window? Give the girls a show!

Mr. Staples: Would you rather be a big man like chief dispatcher, or have a small job in a sugar factory in Cuba?

Mr. Marsh: How do you like the new times of 57 and 58 at Buckhannon?

Mr. Dixon: Do you like oysters? Or do you wish all coal operators were clams?

Miss Hayden: Mention your most embarrassing moment in 1922.

Of course parliamentary language must be used in replying to these questions; otherwise they won't be printed.

Our congratulations go to Mr. Oatman, Newark Division, prize winner in the MAGAZINE contest for 1922. He deserved it, too.

By the way, we heard a story the other day of a man near here who is going to sue his neighbor for letting his cow out on the road at night without "Tail lights." What's matter with the Railroads doing that when our friends' cows stray on the track?

## Wheeling Division

Correspondent, MARIE SLATTERICK

This month we have so many on the sick list that it keeps us busy marking down names. Here are a few who have been very sick: John Wise, chainman, Division Engineer's Corps, who has the "flu." A. L. Lowe, track supervisor at Huntington, who has the measles. Miss Hilda Boring, stenographer in the Car Distributor's Office, who was ill last month and is off again account of the gripple. Brakeman "Bert" Malone, who is suffering from a severe cold, also Passenger Brakeman A. H. Hill, who is confined to his home account of a bad cold. Passenger Conductor "Ed." Kemple and Engineer G. E. Gatewood are also off account of the gripple. Miss Mary Simmons, stenographer, Superintendent's Office, who was home due to a bad siege of the gripple.

Inasmuch as it would take too much space to wish each a prompt recovery individually we'll do so collectively and sincerely hope they all come back strong and healthy in a short while.

We don't know how some people happen to be so popular but it just seems as though the Michel boys of the Accounting Department break into print every month. This time "Tony" and "Larry" have caused themselves to be written up because of their being smitten with the young lady who works in the bake shop adjacent. The bone of contention seems to be that they can't decide which likes her better. Has anybody any advice as to how they could discover this all-important fact?

Harry Villers has been working third trick at Denver telegraph office in place of William Daugherty, off on business of great importance.

William Daugherty, third trick man at Denver, has been off two weeks; we understand he has been making preparations to be married but while en route to Akron to meet his bride-to-be encountered bad luck with his car, gave up the trip in disgust and came back to resume his duties. Better luck next time, maybe!

"Joe" Stoops, trackman, is improving from injuries received while laying rail in Board Tree Tunnel.

Frank Jones, operator at Mannington, has been off account sickness in his family.

**JERRY'S LINE**

Mrs. Elmer Mills, wife of our night pumper at Denver, is improving after a serious illness.

Lawrence Chaney, presiding elder at Denver Sunday School class, spent what time he could from his strenuous duties as Second Trick Man at Denver in "Ed." Hager's place, with his parents in Littleton last month. "Larry's" a pretty nice boy but when he gets down among the "wilds" of Denver for a while he gets pretty wild and needs the restraint of parental influence to calm him down.

We have word from "Ed." Hager, second trick at Denver, who is spending the winter in Florida, that he is catching bass from 10 to 25 pounds in weight! Wow!

We regret to report the death of the mother of L. E. Haislip, assistant division engineer, on February 5 at Grafton. Mrs. Haislip was somewhat over 75 years old and died suddenly of ptomaine poisoning.

Among the visitors we had this month were Mrs. E. V. Smith and daughter Miss Martha Lee. Mrs. Smith is the widow of our former beloved superintendent who died during the winter of '20-21. They stopped in to bid us "hello" and were gone again.

Every now and then we run across funny things and have funnier things called to our attention. Here's a good one: The other day while Station Master Robey was letting passengers through gates to the trains, a lady and baby (so he thought) passed through and he noticed at the time that the baby was held oh! so tenderly and was bundled up so carefully. But when this same lady was about to step on the coach the baby(?) lifted up its head and began to lick the lady's cheek! The conductor noticed what it was at once and the lady was requested to remove her burden to the baggage room. Of course we know that babies are affectionate yet they hardly demonstrate in this way. Just the same, however, Mr. Robey can hardly be blamed for mistaking the canine for a real live baby for it was all wrapped up in a fluffy white shawl and was about the size of a 10-month old!!

**Benwood Shop**

Correspondent, J. L. CUSACK

Understand that when "Bill" Muldrew, carman at Benwood, was touring the west in his "Lizzie," an engine was rerailed with the aid of his "car." No, this car is not for sale by a long shot.

**STOP THAT LEAK!**

That "Sox" Stocking is economical has been approved. On account of the high cost of pencil sharpeners in Wheeling "Sox" went to Parkersburg and purchased a \$2.48 sharpener for \$2.25 and did not miss a day's work going after it either.

At the Zion Lutheran Church in Wheeling on February 14 occurred the marriage of Miss Helen Nolte to Howard Thonen. Mr. Thonen is the popular roundhouse clerk at Benwood and son of Engineer J. Thonen. Mr. Thonen has the wishes of his many friends at Benwood for a long and happy married life. However, we do not think he should have been so negligent in answering the 'phone the next day. We never knew you were backward, Howard.

J. A. Marschani, popular chief clerk to division storekeeper, has been off sick; we hope he will soon be on the job again.

Miss Elsie Manion, formerly stenographer in the Storekeeper's Office at Benwood, has accepted a position in the Division Engineer's Office at Wheeling. We sure do hate to lose you, Elsie, but wish you the best of luck on your new job.

Fireman and Mrs. W. H. Mertency are the proud parents of a new baby girl, born February 16. Mr. and Mrs. T. M. Siburt are rejoicing over the arrival on February 4 of a baby boy. Mr. Siburt is employed in the Stores Department.

Robert Porter, car inspector, and Miss Dorothy Newman surprised their many friends and were quietly married at the parsonage of the First Christian Church in McMechen recently.

The secret of why 'Phone 107-J Benwood gets such good service is out—we saw "Zip" and Alma at the show the other night.

Thomas Cockerell has accepted a position as material man at Benwood Shops.

**Parkersburg, W. Va.**

Correspondent, CHARLOTTE MARLOWE

Several changes have been made in the force at the Agent's Office since the first of the year. Fritz Christmeyer left us to take a position as A. R. A. clerk in the Office of the General Foreman, Low Side. The general foreman is very fortunate in securing Fritz for this heavy position, as he is the best clerk that ever worked on the job. We know this is true, for Fritz told us himself.

Donald Robertson has been employed as ballot boy, taking the place of the aforesaid Fritz, and the way this kid works would make angels weep; he even gets up and works in his sleep.

"Bud" Wiggins, who went to Wheeling when the Division Accountant's Office was moved to that city from Parkersburg, has returned to his native heath, and is now with us at the Freight House as adjustment clerk, taking the place of Miss Belle Caldwell, whose resignation was mentioned in the February MAGAZINE. Welcome home. "Bud." We hope the wanderlust does not strike you again.

Old Mr. "FLU" has been busy in Parkersburg this spring. He and Johnny Maloney had a bout. John got knocked out in the first round and was laid up for a month. He has more respect for the old gentleman now. The rest of the Freight House bunch are all barking, and a business man stopping in was heard to say that we sounded like a kennel of dogs. Hot stuff! We don't wish him any bad luck, but we hope it is catching.

Adam Loebig, freight bill clerk, was called to Chicago during the latter part of Febru-

ary on account of the serious illness of his brother. His place was filled in his absence by Miss Willa Trainer, of Belpre, Ohio.

The Freight House "Mad-agains" are on good terms at this writing, and everybody's happy. However, we do not know what the status of their case will be by the time this appears in print.

Valentine day was a gala day at the Freight Agent's Office, little work being accomplished. The postman appeared among us heavily laden, and distributed valentines of the comic variety to all, creating much merriment. One young lady received so many that she required help carrying them home. No one was slighted, the most high to the lowliest being remembered. Quaint, original titles appeared on some of the envelopes, which tickled mightily the recipients thereof. We, of the Agent's Office, and Mr. Ritchie of the Inspection Bureau, desire to thank the donor through the MAGAZINE, as he (or she) carelessly neglected to sign name. If any others desire to express through the MAGAZINE their thanks for Valentine remembrances received, will they please send in their names to the correspondent?

"Hello! It is I, John Raymond Mehen. I came during the week of February 5 to the home of Machinist and Mrs. Ray Mehen, and liked it so well I have decided to make it my permanent abode.

"My daddy (you all know him) works all day and so I have arranged to sleep while he is at the Shops, and every night he and I take long walks, and I have the best time.

"This is to say that all of mother's and daddy's friends are mine, too, and I'm ready to receive callers. Won't you come to see me?"

Bud Becc: "Well, now, don't cha know—"

## Western Lines

### Office of General Manager

Correspondent, THOMAS J. MURPHY

The annual election of our Veteran Employees' Association, Cincinnati Terminals, was held January 11, and after a spirited contest resulted in the following selections: President J. M. Hughes; Vice President J. J. O'Donnell; Secretary W. C. Owen; Financial Secretary H. S. Howden; Treasurer E. G. Swebston; Sergeant at Arms H. W. Oldenburg; Directors C. E. Fish, L. A. Cordie, S. O. Mygatt, T. G. Gibbons, R. H. Searls; Delegate to Convention H. S. Howden; Alternate Delegate G. W. Lishawa. The progress of the Cincinnati branch during the past year has been encouraging, and within a short time every eligible man within the district should be enrolled.

As an indication of progress we record the organization on January 20 of the R. N. Begien Branch Ladies' Auxiliary. After informal addresses by Superintendent Transportation Brooke and Assistant to General Manager Russell, the following officers were elected: President, Mrs. H. S. Howden; Vice President, Mrs. George Neal; Secretary, Mrs. Fred Richter; Treasurer, Mrs. August Ginder; Chaplain, Mrs. Peter Adrick; Marshall, Mrs. John Naylor; Outer Guard, Mrs. George Rethman.

All pledged to the "Stop That Leak" Campaign!

During the winter sickness has visited a number of our employes but it is gratifying to report that all have fully recovered. Had it not been for the observance of some of the suggestions made by the Relief Department on how to avoid the "flu" and gripe the toll might have been greater.

The arrival of an heir has been acclaimed with great joy by E. F. Medosch.

Arthur Lauther has resolved to observe the "Stop That Leak" slogan in personal as well as railroad affairs; 's alright Art, all beginners make the same resolution.

### Office of Superintendent Transportation

Our statistician calls attention from his high spot tab to the New Castle Subdivision having moved on February 1, 2954 loads, the highest since the record of 3495 was established in September, 1919.

On January 31, H. W. Miller severed his connection with the office after an enviable service record. Success to you in your new undertaking, "Bert!"

Recent additions to our force, caused by resignations and promotions, are Elmer Duncan, stenographer from the staff of the general superintendent, and R. C. Schmolz, stenographer from the Local Freight Office.

Returning from a self-imposed four months training course in the Yard Department, R. C. Kistner has resumed his clerical duties; it is intimated that he also took up another course, sometimes referred to as not running smooth, etc., and that more details may be available in the next edition—or maybe in JUNE.

"Sweets to the sweet" is the motto of "Bob" Burns when it comes to phone service; don't lag, "Bob," one good Burns deserves another.

Miss Beitzer passed a recent week end with our mutual friends, Mr. and Mrs. E. F. Molz at Baltimore.

It is not known what became of the Christmas present C. J. Moeves gave his lady friend, but it is rumored she does not wear it any more.

"Charley" Boyd has taken to basketball and makes a valuable player—for the opposing team; quickness of the eye is essential in the game; "Charley" practises at Kinkaid's restaurant daily.

Has one of our idealistic young ladies at last found her dream man, and are further inroads to be expected in our already depleted feminine ranks?

Howard Pancoast cannot quite understand why the journey to Charleston seems so long and the trip back so short; also why the days seem so much shorter there than here.

W. C. Andrews has invested heavily in German marks and is contemplating an addition to his already large barn in order to provide storage space.

W. C. Morrison is optimistic and still expects to get into his new house; his one fear is that by the time it is completed he may have to renew some of the earlier structure.

Every day in sundry ways C. A. Hornbach finds new means of assisting in keeping his love nest in order.

They say that if F. J. Hornbach walked instead of elevating to the fourth floor it would be the means of reducing the rotund impression he conveys; but then "Ferdie" says that the trips to the fourth floor are for a different purpose altogether and then in the second place he isn't fat in the first place—it's some place else.

A. W. Knapp says "Art" is right about "Stop That Leak" stuff and has made some New Year's resolutions himself, effective February 1.

"Arbiter" Von Blon, who gained his cognomen by settling disputes on a 50-50 basis, is fast assuming the Beau Brummel title vacated by his predecessor, H. B. Smith. Girls—beware!

It has been suggested that G. M. Wilhelm lay aside each month a certain amount of his salary to cover bets, but George figures that if he wanted to be mean and collect when he wins he could do all the betting he wanted on the other fellow's money.

There are rumors to the effect that our little George Lang has a girl and that he goes clean to Newport to see Ruby; this may be con; George crossing the Rubicon.

Our Mechanical Department promises several interesting personal items for the next issue.

Our Maintenance of Way Department also promises!

## Cincinnati Terminals

The prize of \$100.00 which was awarded James Farrell, supervisor, Toledo Division, for having the best looking territory in the Cincinnati Terminals, was won by close supervision of the work and by the hearty cooperation of the men under his jurisdiction, among whom he created a friendly feeling to keep the work in proper order. Also by strictly adhering to the orders given by his superiors, who furnished liberal information and sufficient material with which to do the work.

The following is from William Isbell, section foreman of Section T-A, St. Louis Division Side of the Cincinnati Terminals:

"I received the prize of \$35.00 for having the best main line section in Cincinnati Terminals of the Railroad in 1922. I also received \$25.00 prize for having the best yard tracks at Storrs for the year 1920. I won these prizes by hard work and having good men, and being loyal to the Company.

"I have worked for the Baltimore and Ohio Railroad Company six years. Each morning, when I go to work, I expect eight hours' work from every man under my jurisdiction. This makes things go along very nicely. A foreman, in the first place, should be acquainted with track work in general before he can give good results. Before starting to work for the Baltimore and Ohio I worked 17 years for the C. I. & L. Railroad at LaPayette, Ind., during

PRIZE WINNING MAINTENANCE MEN IN AND ABOUT CINCINNATI TERMINAL  
Left; Section Foreman William Isbell and his son. Center; Supervisor James Farrell. Right; Section Foreman Jonah Black

 2-BOARDS FOOTBOARD OF MOVING ENGINE.  
 3-"INCORRECT" SIGNALS. 5-GETS COPY OF "SAFETY FLASHERS" AND READS OF "COUPLE CURE."  
 6-"DAY BY DAY, IN EVERY WAY, I'M GROWING MORE CAREFUL AND CAREFUL"-----

which time I received two prizes of \$25.00 each, as foreman. I maintained five miles main line track for 12 years, and when the chief engineer came over the track he said "Isbell, it doesn't seem to be much trouble for you to maintain your five miles of track; I am going to give you four and a half miles more track." This made nine and one half miles to maintain with a raise of \$2.50 per month, which made my salary \$62.50 per month.

"Track work is made more easy when one has good men and also good material to work with.

"I want to thank each of the officials who were responsible for my receiving the prize."

The following is from Jonah Black, section foreman, Section 7, Wyoming, Ohio:

"In regard to the manner in which I conducted myself, making me worthy of receiving a prize, due to having the best looking section, will state that I strictly followed instructions issued to me by Supervisor Farrell, and tried to keep track as near perfect as possible, also in a clean condition, in order to avoid criticisms from my superiors.

"Will also thank the men under my jurisdiction for their ability and good workmanship, and also wish to thank the Baltimore and Ohio for their liberality in the way of material and labor, with which to accomplish the above.

"It is always my aim to see that territory under my supervision is kept in the best of condition and also to see that my tracks are always safe for business, making a complete check of my territory daily, in order to keep same in tip top shape."

Harry Gorman, conductor, states he had a very enjoyable time while on recent visit with friends at Paint Creek and Corbin, Ky.

By the way, Harry is an ardent "Red" rooter and hopes to see both "Jake" Daubert and Eddie Rousch in harness when the gong rings April 17. He thinks "Jake" will enjoy the best season of his career during the campaign. Harry is an intimate friend of these two stars and has invited them to be his guests the day previous to the opening game, as he wants to take them over to the Lagoon and show them a good time before they start in the season's battle for the pennant, which he thinks will be easy for them this year.

Things We Would Like to See a Smith Street Office

- O'Donnell with some hair on his head.
- Davis dreaming.
- Kennedy playing a trick.
- Tatem in a trance.
- Warmington's Sunday suit.
- Sturm dry dishes.
- Buxton spend a nickel.
- O'Brien's mustache.
- Juanita Bates with a fellow.
- Bernice Aylor's husband.
- B. Jelleff working.
- "Bob" Klein powdering.
- Mildred McGinn phoning.
- Paul Kemp walk.
- Grubbs pay his debts—Ouch!!
- Valentino's double—Warmington.
- Noonan without a hat.
- Donagan straightening books.
- Dean's latest flash.
- Mr. Wilson without his satchel.
- Elsie—as a toe-dancer.
- Duke looking for a waybill.
- Taack grow some more.
- Albers borrow a nickel for lunch.
- Warmington trotting to work 5.00 a. m.
- Beckman rattling change.

### A Word for the Railroads

"Going to drive through to California this summer?" we asked a neighbor.

"Nope," he replied. "Going on the train. There's a lot of grade crossing races to be run between here and California and I want to be riding on the winner."

—Kansas City Star.

### Enough to Kill Him

The electrician had arrived home at 1 a. m. and was preparing to undress when his wife glared at him and said:

"Watts the matter? Wire you insulate?"

But the shock was too great. The electrician dropped dead. —Cincinnati Enquirer.

## Akron Division

Correspondent, J. A. JACKSON

Are you doing your share toward stopping "THAT LEAK." There are a great many holes that can be plugged up and you owe it to the Company and yourself to apply the remedy. Use Company property in the same economical way you would your own, and you will be pleasantly surprised at the great savings affected.

George J. Jones, boiler foreman at New Castle Junction Shops, has returned from an enjoyable trip to the Pacific Coast, which was taken for the benefit of his health, which has not been of the best lately. We are glad to see him returned with his health completely restored.

D. E. Eakin, agent at Warwick, is wearing the broadest of broad smiles because of the visit of old friend "STORK" who arrived on February 12 and left a seven pound baby girl who has been named Betty Jane. Good Luck, "Dave."

E. J. Raidy, chief clerk to the trainmaster at Akron, was called to his home in Fort Wayne, Indiana on February 11 on account of the death of his father which occurred that day. Sincere expressions of sympathy are extended to him in his great loss.

The accompanying picture shows the stretch of main track maintained by Section Foreman P. Keith and gang, and for which he was recently awarded the \$50.00 Prize. This track is located just west of Earhart, Ohio.

Were you at the BIGGEST BALL ever held in Akron. It was a great night, and one that will long be remembered by the four thousand employes and their families who made up the monster party. Congratulations to the staff officers on the splendid handling of the affair.

W. C. Valentine, for the past three years agent at Cuyahoga Falls, has been transferred to Sterling, Ohio, where he will be employed in the same capacity.

Miss Margaret Sullivan, formerly stenographer in the Division Accountant's Office, has been promoted to the position of general clerk in the General Foreman's Office at New Castle, Pa.

### The World's Greatest Need

A little more kindness, a little less Creed,  
A little more giving, a little less Greed,  
A little more smile, and a little less frown,

Main Line Track, West of Earhart, Ohio. Maintained by Section Foreman P. Keith, who won a \$50.00 Prize

A little less kicking a man when he's down;  
A little more "we" and a little less "I,"  
A little more laugh, and a little less cry,  
A few more flowers on the pathway of life,  
And fewer on graves at the end of this strife.

—Exchange

## Lorain, Ohio

General Dock Foreman W. Taylor, Carpenter Foreman Z. Robinson, Time Clerk F. W. Harmon, Agent C. H. Ferguson and Pensioned Engineer L. H. Eddy are wintering in the Southland. They will return in time for the opening of the Lake Season, and we expect them to be in first class shape for the handling of a record summer business.

General Yard Master McDermott, known to every one as "Honest Tom," keeps pretty busy these days. He is anxious to see the coal come in. "Tom" says he hopes 1923 will be a year like 1913.

Most of the girls in the Agent's Office and the General Car Foreman's Office are wearing "sparklers." It keeps Car Foreman Hott and Agent Ferguson busy finding parties to fill their places when they resign. Miss Jones, Car Foreman's Office, is not wearing a ring at present, but we understand she soon will be.

Car Rider L. V. Jones is visiting his folks in Tennessee. He says that he is having a good time and southern meals are agreeing with him.

Conductor F. Marren, Elyria shift, is now in passenger service out of Cleveland. Trainmaster Fahy says that he sort of misses Frank, for he sure knew how to handle the work at Elyria. Conductor J. E. Campbell is now on the shift and Conductor A. R. Spring is on local. They are getting to be rather old heads on the Akron Division.

Road Foreman of Engines Loux is quite interested in "Oil Stock." Any one having any literature along this line, please send to him.

## Youngstown

Correspondent, PEARL C. SCHMUTZ

Three young ladies in the Local Freight Office are wearing new rings. Mr. Aiken says the rings do not look good to him. We don't know exactly just what he means, whether it is the rings or the girls leaving him.

Edward Bricker, chief delivery clerk, has been granted a three months furlough, account of his health. Mr. Bricker has been in the service of the Company for the past ten years, and he certainly will be missed.

Miss Jennie Simons, cash clerk, is now wearing a platinum band ring. The marriage of Miss Simons and Sam Lenhart took place January 18 in the Epworth Methodist Episcopal Church. A dinner was given in the bride's home on Thorn St. after the ceremony. Mrs. Lenhart will still be with us for several weeks, though we wish it were much longer.

W. D. Reed, Warren, was a welcome visitor in the Freight Office last week.

Viola Walker was a bridesmaid on January 18 at the wedding of her sister, Doris, bride of Ernest Gluck. From all appearances Viola will be next.

The Ladies' Auxiliary of the Baltimore and Ohio Veterans' Association held their first meeting in the rooms recently acquired by them for all future meetings, located in Bushnell Hall, Federal St. This meeting was called for the regular installation of officers and instructions to their delegate, Mrs. W. W. Smith, who attended the Annual Convention in Baltimore on January

Master Donald Williams—See Massillon Note

26 and 27. The following officers were installed: Mrs. M. Dempsey, president, Mrs. W. W. Smith, secretary and Mrs. J. K. Jolly, treasurer. It was decided that at their next meeting on February 20 they would entertain the Baltimore and Ohio Veterans, with a social. The Ladies are enthusiastic over their organization and are continually getting new members.

## Massillon, Ohio

Correspondent, W. E. BRUGH, Brakeman

Jesse B. Lewis, Winchester, Va., has succeeded William E. Brugh as clerk to the trainmaster at Massillon. Good Luck to you, Mr. Lewis.

It is generally understood that there is a valuable reward out for any information that can be furnished of the whereabouts of the prized mustache of L. T. Kegler, agent at Massillon, which was lost recently.

There probably will be a law suit between the City of Massillon and a railroad employe, for damage to the paving bricks on the Lincoln Highway, opposite the freight house. One of the fair clerks missed connections in getting on a street car, and the road had to suffer. We do not care to mention any names, but if any more information is desired, get in touch with Miss Jennie Eckroad.

A new lock was installed on the door of the passenger station at Massillon. It was not installed with the skill of a carpenter, as said carpenter met with a total failure. However, "Red" Everett, lineman, came to the rescue of the carpenter and rescued the job. As a locksmith, "Sid," you make a better carpenter.

Conductor John W. Griffin is off sick again. Good Luck to you "Pop."

The accompanying photo is of Donald Williams, 20 month old son of Brakeman and Mrs. Dale H. Williams, and grandson of Switch Tender P. E. Keller.

E. F. Miggie, brakeman, was transferred to switch tender at M. & C. Junction, his former position. Switches are easier to throw than kicking cars, eh! Miggie.

## Dover, Ohio

Engineers "Mike" Donohoe and Horace Page were playing a game of checkers,

engines being the checkers. A third player, the yardmaster at Dover, won the game. Very queer, indeed!

Conductor F. W. Stapleton, Brakemen A. A. Newland and S. Naylor, and Engineer P. C. Stocker were the prize crew on the special to Akron, for The Akron Division Ball on February 2. Some crew, and some time!

Promoters of sports are trying to put on a Prize Card, by matching up "Shotgun" Baker of Dover and "Dad" Burrell of Freeport. This would make an interesting bout. "Sam" Harper, Beach City, will be the third man in the ring. Watch for advertisements later on.

**Newark Division**

Correspondent, B. A. OATMAN

The "STOP THAT LEAK CAMPAIGN" is on in full force in the Mechanical Department at all points on the division. Starting with February 1, material will be carefully watched, both old and new. Instructions have been put out by Master Mechanic Cooper that no new material will be used for any purpose, except in case of absolute necessity. Each foreman is required to make report to the general foreman at the regular meetings held in his office on Wednesday and Saturday of each week. The report will show exactly what material has been used, its value second-hand, compared with the new value, the second hand value plus any cost to reclaim to be deducted from the new cost, the result to be the actual saving made. This same plan has been used prior to this time on Newark Division and always with great success.

**To Our Inspectors**

LARGE WRECKS FROM LITTLE LOOSE NUTS GROW,  
SMALL PAY RESULTS FROM ITS BEING SO;  
WHAT SAVINGS WE MAKE WILL BE MIGHTY FINE  
IF OUR EYES ARE WIDE OPEN TO LEAKS ALL THE TIME

**Newark, Ohio, Station**

We are indeed sorry to announce the death of the following Veterans and shop employes of Newark:

Frederick Ernest Skinner, January 25 at his residence in Newark after an illness of one week from pleural pneumonia. He had been in the service of the Baltimore and Ohio for the past forty-eight years and was still working prior to his last sickness. He was a coppersmith of ability and had handled this branch of the work at Newark shops for many years.

Employes of the Newark shops as well as the division join in extending to the widow and family their heartfelt sympathy.

Hugh D. Moats, January 27, at his home in Newark, after being a sufferer for years from a complication of ailments. His entire life was spent as an employe of the Baltimore and Ohio Railroad and we extend to the widow and family our heartfelt sympathy.

George Comman, who for forty three years has faithfully served the Baltimore and Ohio at Newark, Ohio shops. Although ailing for some time past, he had until recently worked as usual in the Round House as locomotive inspector. His smiling face will be missed by the shop forces, who through all these years have always had a good word for George. We extend to the bereaved family, our heartfelt sympathy.

Please look below at a pile of steel back brake shoes turned out of the Newark foundry. How many brake shoes in the pile? You have another guess, just one more. Well we want you to do a little figuring in order to get the exact number, but we will help you this much; there are enough shoes in the pile to equip two thousand cars. Now you can get the total easily. Twelve hundred of these shoes are turned out of the Newark foundry each working day.

**Of Interest to Veterans**

We are pleased indeed to hear that Mrs. Frank M. Howard of Newark, Ohio, has been re-elected Grand President of the Ladies' Auxiliary of the Veterans' Association. We take this means of congratulating Sister Howard and we feel sure that the year 1923 will be one in which the Veterans' Association will push forward just as it did in 1922 under her able supervision.

True V. Hankinson, yard clerk at Newark, plunged into the sea of matrimony, January 10, in being united by marriage to Miss Emma Rose of this city. After the ceremony "Buck" and his bride took an extended tour through the South visiting his mother at his old home town. Here's wishing them much joy and few troubles and may they travel the stream of life in peace and unity with a one way ticket to the Realms of Joyous Home Life.

This leaves only four single fellows at the Yard Office; W. B. Allen, H. H. McFarland, J. R. Jones and C. F. Horn. Of these I understand Horn has placed a ring on the finger of someone in Los Angeles, California. Although he claims that he will remain a bachelor, J. R. Jones is slipping fast and we expect to hear the splash as soon as he takes the plunge. While he is quiet and bashful, McFarland is stepping out with the flappers and he too will fall the hardest of any. W. B. Allen is a mystery to us; he is and he isn't, but my guess is that he is. These Wednesday and Sunday nights and shows between, will in the end get him started down the trail of the honeymooners.

**Send No Money**

This 21-jewel Illinois Watch—the Bunn Special sent on trial. Do not send us a penny. The Bunn Special, made to be "the watch for railroad men" is adjusted to 6 positions, extreme heat, extreme cold and isochronism. 21-jewel movement, Montgomery Dial, handsome guaranteed 20-year gold-filled case. Guaranteed to pass inspection on any railroad.

**After Trial a Few Cents a Day**

The watch comes express prepaid to your home. Examine it first. Only if pleased send \$1.50 as first payment. Wear the watch. If after 10 days you decide to return it we refund deposit immediately. If you buy, send only \$5.75 a month until \$57.50 is paid.

**ORDER TODAY** Just send us your name and address. No red tape. Just say, "Send me the Bunn Special." Do not enclose a penny. Don't delay. Write today.

Our 128-page catalog, No. 1013 shows more than 2,000 bargains in diamonds, watches and jewelry. Write for it NOW.

**Columbus Station**

Correspondent, R. KENNETT

Asst. Correspondent, MISS EDITH ROACH

On account of J. V. Price, chief clerk to freight agent, Columbus, leaving the service, all news items, photos and matters of interest to MAGAZINE readers, formerly mailed to him for forwarding to division correspondent, Newark, will be mailed to R. Kennett, operator, Columbus, Ohio, Yards, as Mr. Kennett has been assigned to the position of leading correspondent to represent Columbus, Ohio station and vicinity. All departments will be covered by Mr. Kennett, with Miss Edith Roach as assistant at the Freight House. Miss Roach has charge of the Woman's Department of the MAGAZINE for Columbus and vicinity and solicits your support in making this department of the MAGAZINE an attractive one.

Trainmaster Broughton is back on the job after being absent two weeks, account of sickness.

With regret we announce the death of F. Savely, father of Shop Track Foreman "Fred" Savely, which occurred recently. Our sympathy is extended to the family.

Operator C. M. Iden, B. R. Tower, has been working in "W. F." office, Newark, during the absence of other employes, account of sickness.

J. V. Price, former chief clerk to Agent Baldwin, is now connected with the Traffic Department of the Ralston Steel Car Co.

Conductor Darby O'Hara has gone into the glass business as a side line. For samples see him immediately, as the stock is rapidly increasing. "Stand back, don't crowd, boys."

Brakeman George Bagent seems to have had considerable trouble here of late with Lizzie Sedan breaking down. It's a rough old road to New Holland, George.

It's time to move again. Yard Clerk Mason has decided to try the west side for a change.

Twelve hundred of these brake shoes are turned out of the foundry at Newark, Ohio every day  
Please mention our magazine when writing advertisers

The following yard employes are off duty account sickness: F. Reytonton, George Griffin, John Murphy and J. E. Newman. We hope for a speedy recovery for all.

Dispatcher Frank Fisher is back on the job after being absent a few days account of sickness.

Mrs. L. D. Exline, mother of Agent Exline, Bloomingburg, died at the home of Conductor S. Thomas on February 3. Funeral services were held February 5, the body being taken to Wilmington for burial. We extend our sympathy to the bereaved relatives and friends.

More railroaders! Born to Brakeman and Mrs. J. E. Newman, January 6, a nine pound son. To Inspector P. V. Cook and wife, January 20, an eight pound son. Congratulations!

Car Inspector Charles Evans boasts of having purchased a barrel of cabbage to make sauer kraut, but from all appearances (including the smell) he evidently changed his mind and instead made what he calls "cigars."

The following new employes have been added to the Baltimore and Ohio family: Brakemen Herr, Smith, Bayum, Stump, O'Keefe and Accord.

Operator O. C. Bordon, who was employed on the Ohio Division for 15 years and who resigned to go into business, has returned to the Good Old Baltimore and Ohio as operator on the C. & N. Division.

Car Inspector George Souder and Yard Clerk "Happy" Wurdack are planning a fishing trip as soon as the weather will permit.

Engineers John Corcoran and "Jack" Welch have resumed duty after being absent a few days account of sickness.

Conductor James Dooling recently spent two weeks at Baltimore on Committee work and with regret we announce that he was brought home sick and in a serious condition. We understand at this time that he is slightly improved.

Boilermaker Houser has gone into the chicken business, now having 50 hens. There has been no slump in the egg market yet, although Houser claims he has received two eggs so far from his flock.

Wonder what makes Boilermaker Helper Gregory so anxious to get home in the morning! Perhaps Round House Foreman Jenkins can solve this mystery.

Brakeman Parker now holds the medal; he claims to know of a Ford that has already been run 300,000 miles and is still in good shape. Who's next? Look out, Darby!

Words cannot express our feelings as to how we miss the red smiling face of our little messenger boy, "Pinky" Williams, who used to call on us daily at 6.30 a. m. We understand the work got too heavy for such a small boy as "Pinky," he being replaced by Ashcraft.

Yard Clerk McCormick was off a few days recently to attend the funeral of his grandmother who died at her home in Gallipolis.

Employes of Columbus Freight House write in as follows:

"Please enroll forces employed at the Columbus Freight House in the STOP THAT LEAK CAMPAIGN." With such whole hearted support as this, there is no doubt that the Newark Division will do her part in the campaign. We appreciate your support very much.

Among the guests at the dance given at the Gibson Hotel, Cincinnati, Ohio, January twentieth, were the Misses Kathryn, Clifford and Marie Brink, both of the Columbus Freight House office forces.

There seems to be some attraction at Cincinnati for Miss Hazel Cashner, who has frequently spent week ends at that point, her last visit being February 10.

Miss Mary Connell attended the funeral of a relative in Urbana, Ohio, January 9.

Miss Edith Roach, Freight House Office force, and MAGAZINE correspondent, was entertained at a dinner given in honor of her birthday, February fifth, by the Misses Anna Brown, Marie Brink, Kathryn Jones, Hazel Cashner and Mary Miller. After dinner, the party went to the theatre.

The Sewing Club met at the home of Miss Hazel Cashner on January 30, and was entertained by Mrs. McCormick on February 14, a Valentine party.

Quite a surprise was the marriage of R. J. Kenny, rate clerk, to Miss Josephine Foley. The event occurred on January 24 and the ceremony was performed by Reverend A. M. Leyrd. Their honeymoon was spent in Florida and Havana. Congratulations are now being received, and they are at home at 327 Buttles Avenue.

#### Mansfield, Ohio

Correspondent, C. R. STONE

L. L. Kerr, yardmaster, is always looking for conductors and brakeman but to date has received three dish washers. "Lou" gives as his authority for above statement the following credentials: Born to Mr. and Mrs. G. B. Turner, a baby girl; Mr. and Mrs. M. D. McCullough, a baby girl and Mr. and Mrs. C. B. Richards, a baby girl. Mr. Turner is yard conductor, Mr. McCullough is yard brakeman, and Mr. Richards is operator at North Siding. Congratulations to all!

There is much that we owe the Good Old Baltimore and Ohio and now is the chance to pay some of it back. Let us put our shoulders to the wheel and strive for the standard that has been pointed out and we will win. The person who says "I don't think it can be done" or "I can't" is a failure in life. On the other hand those who say "I can and will" are sure of success. Let's help Mr. Willard to the goal and we will have success.

There must be a brotherly spirit between the employer and the employe to make a

success of any enterprise. While it is true that we sometimes receive sharp letters in regard to this, that and the other, this simply means that discipline must be maintained. Were we to talk personally with those we correspond with frequently, we would find underneath the official exterior hearts that are sincerely interested in the welfare of all of us.

We are all human and there never was a man born that never made a mistake. The main thing is to give all we have in the advancement of our work regardless of the capacity in which we may be engaged. No one can do more. The writer trusts that these few lines will help those who are working sincerely to maintain efficiency in their respective departments, and that when we have summed it all up we shall have found that we are on the credit side and that we have given our best.

As we have no agent at either Spring Mills or Atla, Ohio, the writer thinks it is only right to give a little attention to them. During the last three weeks there has moved from each place an average of six to eight cars per week and more could be handled if the old story of "Cars ordered greatly exceed the supply" were not in effect at the present time. As the Baltimore and Ohio enjoys nice returns it is only just that we give these stations their just dues.

H. F. Wyatt, popular trainmaster, is certainly working hard to furnish all cars possible and keep the equipment moving. We are indebted to him for numerous occasions when we were in dire straits for cars that he helped us out with. More power to you, Mr. Wyatt.

E. M. Bargo or rather Embargo, is still on the job at various points throughout the country. We trust that the time will soon come when he shall be but a memory. We all strive to obey him, but once in a while we disobey him and then, "Trouble, Trouble, what have I ever done to deserve this." There has always been one point in the writer's mind regarding a car accepted in error, routed to a connecting line, that is embargoed. When all the smoke and dust are cleared away after correspondence from various officials of the roads involved in the movement, and they have finally accepted the car in seemingly bad humor, we wonder if after all, when the revenue is added up, "there will be any stars in my crown." Will some one please answer but not all together.

G. T. Turner, popular yard conductor, is the proud father of a baby girl. George is wearing the smile that won't come off these days and we don't blame him in the least.

E. N. Kendall, D. F. A., visited us recently in regard to calling on various shippers of the city regarding inbound and outbound movement of freight. We are always glad to have Mr. Kendall with us and we always feel that he has a warm spot in his heart for Mansfield.

C. F. Parks, popular supervising agent, was with us for a few hours in the interest of business routine. "Fred" is a fine fellow and we are always glad to see him.

A. R. Bird, popular yard conductor, says that his Radio is running about like his Ford. Sometimes it is alright but most of the time it isn't. "Amsey" is thinking of putting a sign up reading as follows: "I have had lots of trouble in my life, but most of it never happened." Good luck to you, "Amsey." The last time I heard the New York Stock Report radioed it sounded like the world's series after someone had knocked a home run with three on and nobody down.

Puzzled!

J. A. Dudley, brakeman at Mansfield, is thinking of buying a Can't A'Ford. "Dud" says that if you have a good grip on the crank you are all set, but if you let go while turning the engine over it is bound to jump the curb and land on the sidewalk. Dudley knows what he is talking about and if you don't believe him, ask Bird.

#### Marietta, Ohio

Correspondent, G. R. STEEN

Ticket Agent G. M. Payne, who has been confined to his home for the past two weeks, has returned to duty.

House Foreman O. H. Mickle returned to duty recently after a week's illness with the "Flu."

Yep—"Charlie" has done gone and done it! C. H. Richardson, our yard clerk, has taken unto himself a wife again. We have been unable to find out just where it came off. We knew there was something in the wind as "Charlie" sure was pulling some "boners" prior to last Friday. Thanks for the cigars, "Hud."

V. G. Brangham, utility clerk, has resigned and is going into the gentlemen's furnishing business at Warren, Ohio. We all wish him the best of luck and any of you fellows around Warren that are in need of anything, kindly look him up!

Baggage Agent Herman Henry is leaving shortly for parts unknown in Florida. He expects to be gone two weeks and is going to see the whole state. We hope he goes over to Cuba and brings us back a little souvenir!

#### Chicago Division

Correspondent, F. N. SHULTZ

##### Stop That Leak!

*From Division Operator's Bulletin*

Use envelopes as many times as possible. Order Form 386-A. T. If you have none I will supply you; use each space, thereby saving 30 or 40 common envelopes. Use both sides, form 474-Rev. Use discarded forms in place of 444 so far as possible. If you have nothing available let me know. Watch your lights and heating apparatus. Do not waste fuel. Waste paper should be taken care of and handled in line with instructions.

These are little things but in the aggregate mean many thousands of dollars.

H. S. Carroll, chief dispatcher, who has been sick since last October, is slowly recovering and it is expected that he will soon be with us again.

There is much sickness among the employes of the Division due to "flu," which seems to be epidemic.

The new passenger engines, 5200 class, are doing splendid work, making time or better on all the fast schedules.

#### St. Louis Division

Correspondent, H. F. SMITH

We regret to report that quite a little sickness is prevalent among our employes at this writing. Superintendent Stevens has been confined to the hospital where he has undergone an operation for appendicitis, from which it is reported he is rapidly convalescing.

Why not a "Stop That Leak" button?

On February 1 occurred the marriage of Guy M. Bradford, Flora Roundhouse Office, to Miss Louise Zink, also of Flora. Both parties are well known and embarked on

their married career with our best wishes. Among the wedding presents was a splendid set of dishes given by the roundhouse force.

The following bit of poetry was received from Conductor F. M. Dee and is self-explanatory. Needless to say Mr. Dee was promptly relieved.

The frost is on the sidewalk  
And our feet begin to slip,  
Our eyes begin to water  
And our nose begins to drip.

We have our transportation  
And you can bet your dough,  
Just as soon as you will let me off  
To Los Angeles we'll go.

Then the old North wind can just howl on  
And blow to beat the band,  
We will be in California  
And we won't care a ——!

Employes of the St. Louis Division were greatly shocked and grieved to hear of the death of W. F. Cissell, section foreman at Montgomery, Ind., on December 17, 1922, Mr. Cissell's death being occasioned by an attack of typhoid fever.

He entered the service of the Company in May, 1877, was made track foreman in 1889 on the section where he was located at the time of his death, serving as foreman on this one section for a period of thirty-three years. Mr. Cissell was an industrious and loyal employe, greatly looked up to and consulted for advice by younger employes in his department, and maintained the respect and confidence of his superior officers. He was an A-No. 1 trackman, which was evidenced by the fact that the portion of track under his jurisdiction was constantly maintained in an excellent manner and further by the fact that he was awarded the prize for the best main line section on the Indiana Division for the year 1920 and again for the year 1922. A sad coincidence was the fact that Mr. Cassell had not been advised that he was awarded the prize for the year 1922, this information not having been officially announced prior to his death.

Miss Blanche Wise delightfully entertained the girls of the Baltimore and Ohio offices at Washington with a unique Valentine party at her home on S. E. Second St., several of the guests representing well known characters. The home was tastefully decorated in keeping with the spirit of St. Valentine and contests suitable to the occasion were participated in by the guests.

Dick, six months old son of Assistant Division Engineer and Mrs. J. W. Purdy, Garrett, Ind.

## Ford Runs 57 Miles on Gallon of Gasoline

A new automatic vaporizer and decarbonizer, which in actual test has increased the power and mileage of Fords from 25 to 50 per cent and at the same time removes every particle of carbon from the cylinders, is the proud achievement of John A. Stransky, 3473 South Main Street, Pukwana, South Dakota. A remarkable feature of this simple and inexpensive device is that its action is governed entirely by the motor. It is slipped between the carburetor and intake manifold and can be installed by anyone in five minutes without drilling or tapping. With it attached, Ford cars have made from 40 to 57 miles on one gallon of gasoline. Mr. Stransky wants to place a few of these devices on cars in this territory and has a very liberal offer to make to anyone who is able to handle the business which is sure to be created wherever this marvelous little device is demonstrated. If you want to try one entirely at his risk send him your name and address today.—Adv.

The representations were: Lavender and Old Lace by Nettie Feagans; Betsy Ross by Lucile Klingensmith; Priscilla Dean by Nettie Berry; Miss France by Maymie Zinkan; Pocahontas by Etna-Van Fossenn; Old Fashioned Girl by Martha Burgess; Buster Brown by Mildred Harrod; Dolly Madison by Bertha Feagans; Modern Flapper by Luella Brand; Madam Butterfly by Grace McGinty; Best Mother in the World, Red Cross, by Lottie Doseh. Other guests were Elizabeth Langford, Ruth and Pearl Kaufman, Alice Fox, Josephine Fetting, Edna Humes, Stella Allen and Dorothy Fitts. Refreshments of punch, ham sandwiches, olives, marshmallow salad, heart ice cream with cupids and vanilla wafers in hearts were served by the hostess.

If you have done anything to Stop that Leak, please tell us about it; if you haven't, please do something.

A checking system has been devised at Washington to help "Stop that Leak." All the forces in the Locomotive Department check in and out at one central location. The checking system is handled in such a way that the division accountant is furnished with an absolute check of all forces in the Locomotive Department. To complete the saving that could be made on this new checking system pay checks are now being delivered as the men receive their time cards. This eliminates lost motion in the shop during the regular working period, stopping the men from their work to give them their pay checks. With the number of men working in the back shops we figure approximately \$200 per month is saved in the Locomotive Department in the way of lost motion on pay day.

A locker room has been installed for locomotive employes at Shops in what is known as the old tin and pipe shop, which contains lockers for men, also tables and benches where men who carry their lunches can have the opportunity to sit down and eat. We also have a case installed for magazines and any one wishing to read during lunch period, has an opportunity to read the latest issues of the various Mechanical magazines. The men at Washington are much elated over the new addition.

Fred B. Grassley and his pet Mexican bear, "Villa"

## Ohio Division

Correspondent, A. E. ERICH  
Secretary to Superintendent

The annual report showing fatal accidents to employes during the year 1922 shows the Ohio Division as being the *only* division on the entire System with "NONE." There has been no fatal accident to an employe on this division since November 5, 1921. This is a commendable record, showing SAFETY is practiced by employes, and it is sincerely hoped that this will continue for 1923 as well as for each succeeding year, that the capital letters N-O-N-E may always be written after "Ohio Division."

Why take a chance; why carelessly plunge into danger? "STOP THE WORST LEAK"—the loss of human lives—by being careful at all times and performing your duties the "SAFETY FIRST" way. And insist that the careless employe do the same.

In connection with this safety report, Superintendent Iams received the following letter from Superintendent Safety Department J. T. Broderick:

"Please permit me to congratulate you on the fact that no employe on the Ohio Division met with a fatal injury during the year 1922. The fact that no such accident has occurred on your division since November 5, 1921, indicates clearly that the employes of the Ohio Division are imbued with the Safety spirit.

Yours was the only division on the system having such a record during the year just ended, and I trust that you will be able to equal the record this year."

Otis Andrew, yard clerk, is receiving congratulations account of the arrival of a little daughter at his home on January 31.

Our sympathies are extended to J. L. Davison, passenger conductor, in the death of his wife. Also to "Jerry" Touhy, passenger baggage-master, in the death of his mother. And to Brakeman C. M. Skinner, whose father was instantly killed by falling from the top of a cliff while trapping near his home at Riehland.

Mrs. William Daley and family wish to express their gratitude, through the MAGAZINE, to the employes of the Ohio Division for their beautiful remembrance to their beloved husband and father. Mr. Daley conducted a boarding house near Stock Yards, Cincinnati, where, for a good many years, the majority of the engine and train men stopped when on that end of the road. He was a friend to all railroad men.

Our heartfelt sympathy goes out to Chief Dispatcher G. E. Davis, whose mother died in January at Portsmouth, Ohio.

Thomas Tull, work checker, while at work, was suddenly stricken, and upon examination it developed the cause was due to gall stones, and an operation was immediately necessary. This was to no avail however, and he died on January 26. Our sympathies are extended to his widow and three children.

The accompanying photograph shows "Fred" B. Grassley, agent at Broad Street, Columbus and his pet Mexican Bear "Villa." Mr. Grassley is visiting at Colorado Springs, Colo. This pet bear is as tame as a kitten, has a snout like a piece of rubber hose, with which, in his native haunts (Central and Southern Mexico), he seeks ants or worms, and his nose always knows where they are. Whenever anyone comes toward him he immediately seizes his proboscis to protect it, for it is his prize possession. When full grown he will weigh about 15 pounds.

## Toledo Division

Division Correspondent, C. E. THRASHER,  
Supervising Agent, Dayton, Ohio

Don't wait until the MAGAZINE is in your hands, and then say "Oh, Shoot," there's nothing in it from the Toledo Division. That is your funeral, not the fault of the MAGAZINE. It's up to you fellows to say whether we are

Please mention our magazine when writing advertisers

## The Banner Restaurant

E. Main St. - CHILLICOTHE, O.  
THE RAILROAD MAN'S RESTAURANT  
Good "Eats" our Specialty  
OPEN DAY AND NIGHT

going to have some real good honest to goodness notes, or just a plain blank page, headed Toledo Division—draped with a black crepe.

Since the Superintendent's office has been fitted out with a new lighting system, they ought to turn out even more brilliant work. They shouldn't get all "lit up" over it though, and call themselves stars.

Recently one of our engineers (no names mentioned) on Dayton, Lima local, was informed by one of the crew that he knew a place where they served chicken dinner on Thursday. So the eagle eye, not missing an opportunity for the big feed, advised the proprietor that he would be there for dinner the next day, and to be sure to save him the necks. The following day the crew was anxious to reach this point for dinner and succeeded in doing so. The conductor, fireman and brakeman were served with choice pieces of the chicken and at last our Engineer's dinner was brought in. It consisted of six chicken necks. Our Engineer, not wishing to acknowledge that the joke was on him, had eaten three of the necks without saying a word. Presently the waiter asked him how he liked his dinner. "Fine," said the engineer, but I didn't mean it yesterday when I asked you to save me the necks, I was only kidding you. After every one had a hearty laugh he was furnished with a large portion of chicken breast.

Division Operator I. E. Clayton was granted leave of absence, effective January 1, to enter into the banking business. We wish him success.

It is with deep regret that we report the sudden death of Frank P. Wirtz, well known passenger train conductor, on February 9. Mr. Wirtz had been president of the C. H. & D. Mutual Benefit Association for the past five years. The members, as well as his many other friends, will deeply mourn his death. We extend our sympathy to the bereaved ones.

## Lima, Ohio

Correspondent, O. L. WALLBURG

Your correspondent is glad to report that Conductor Russell T. Bennett's condition is improving and unless some unforeseen complication arises, he will soon be arguing about tonnage again. I am sure the yard clerks would rather do that anyway, than to fail to see "Tom" hauling them out of the yard. Take good care of yourself, "Tom".

Martin Dibling, veteran employe in the boiler shop, who is laid up from an attack of gall stones, is improving and we hope to see him help build them again very soon. Martin is an active member of the Veterans' Association and a director for the Toledo Division and he was missed at the last regular meeting. Hurry and get well, Martin!

Maurice L. Brown, who has charge of the oil room at Lima Round House, expects to resume his duties in about a week and see that the boys on the engines get the proper amount of oil. Maurice had his large toe injured some time ago and for a time amputation was thought necessary, but we are glad to report that it did not result in that and that he will be among the boys again soon.

Switchman A. L. Price, who had his leg broken some time ago, is around on crutches and will soon be riding them again. Good Luck to you, Price, old man. Better luck next time.

"Billy" Van Horn, employed in the Coach Shop and president of the Toledo Division Veteran Employes' Association, is confined to his bed by an attack of grippe. Sorry you could not be with us the other night, Van, we missed you at our meeting and at the card party, and Mrs. Van also. Hope you get back on the job real soon.

John Brown, veteran crew dispatcher at the Round House, in the service 32 years, retired on a pension, effective February 1. The boys on the road and in the shop around Lima will miss you, John, and are sorry to see you take the step. However, the condition of your health was of supreme importance and we hope and trust that it will show continued improvement.

Looks like Cupid has gone on a vacation after so much hard work. I haven't been able to get in touch with Old Man Stork to get his report.

So much for that. The one big, outstanding feature that you boys and girls want to watch closely is the careful handling of every piece or part of piece of property belonging to this Company. Your handling of other peoples' property discloses the manner in which you handle your own. If you are careful of every item of expense at home the results will show and if you are extravagant and careless, the results of such habits will develop and bring you either happiness and contentment or discontent and restlessness.

We all want to improve our conditions and one of the best ways to do that is to watch the interests of the Baltimore and Ohio Railroad Company as closely as we do our own. Successful operation of the Baltimore and Ohio means better paid, more satisfied and contented employes.

To this end, I want to ask the cooperation of every employe in Lima Terminal to keep our operating expenses at the lowest possible minimum.

ALWAYS remember our army of 60,000, each and every one of whom has it in his power to lower operating expense by such so called small actions as; turning off electric lights not needed, saving stationery of all kinds, saving coal, keeping material of all sorts in proper place to avoid deterioration, starting work on the minute instead of starting 5, 10 or 15 minutes late. All these things, when multiplied by 60,000, mean much in the operation cost.

Will you make up your mind that you are going to help our President Willard make 1923 the most prosperous year in the history of the Baltimore and Ohio? You say, "what will I get out of it?" Well readers, everything of value is not in dollars and cents, but in the positive knowledge in your own heart that you are accomplishing something each day that is worth while and building up character; that you are fitting yourself for that house not made with hands, eternal in the heavens.

**BUILD FOR THE FUTURE!**

**Toledo, Ohio**

Correspondent, E. G. BAUMGARDNER

George H. Lohner, cashier, is spending his vacation in Havana. He had to go some place to get warmed up.

Miss Virginia Foley is spending her vacation at New Orleans, attending the Mardi Gras, and visiting friends in Louisiana.

Nell Farling, abstract clerk, left Toledo to attend the Ohio State-Michigan game last October. The ties were hard and the walking poor, and she did not get back to the office until February 1—after spending several weeks in the hospital and several weeks under the doctor's care. Nell came back, and we have not been able so far to find out how the game came out.

Mary Benster, utility clerk, returned to her duties on February 12, after taking a month's leave of absence visiting her brother at Winslow, Ariz. She said that was no country for her.

**East Dayton, Ohio**

Correspondent, E. M. MANNIX

The grim reaper again invaded our ranks on January 29, Charles A. Nichols, a veteran yard conductor, answering his final summons after an illness of a few weeks. He was laid to rest in the family space at West Jefferson, Ohio by his brothers of the B. of R. C., with the words "Well done, Good and Faithful Servant."

**Wellston, Ohio**

Correspondent, L. M. MASON

Since business has picked up around Wellston everybody is wearing A Smile.

The old Round House force is back on the job including a new general foreman, Thomas Zinkan. Glad to have you, Mr. Zinkan. Keep the work going.

Herbert Potts, our warehouse man, has returned to work after being on leave for the past four months. We are certainly glad you are back, "Herb."

Canadian may send this coupon to International Correspondence Schools Canadian, Limited, Montreal, Canada

**The World's Most Famous Coupon**

You have seen it in the magazines for years—this world-famous coupon of the international Correspondence Schools.

It is just a little thing in size, but mighty in possibilities. For it has been the means of bringing advancement and more money to thousands upon thousands of men in all circumstances and in every part of the world.

Can you still turn away from Opportunity? Can you still go on, putting in your days at the same old grind, getting the same pay envelope with the same insufficient sum, when such a little thing can be the means of changing your whole life?

Make up your mind right now that not another day shall pass until you find out what the I. C. S. can do for you.

The first step is to choose the work you like best in the coupon ABOVE and mark and mail it here and now

**INTERNATIONAL CORRESPONDENCE SCHOOLS**  
 Box 8519-B, Scranton, Penna.

John Walker says: The difference between a night-gown and an evening dress is Two Yards in favor of the night-gown

Our new division operator, G. J. Williams, paid us a visit a few days ago. We also had as our guests C. E. Thrasher, A. E. McMullen and W. B. Kilgore.

You can, Kilgore, but you can't Thrasher.

The interesting family of Conductor J. A. Kellam, Baltimore Division. The "Captain" allows that the children get "most" of their good looks from their mother

The J. A. Kellam Family

*Great Oaks from Little Acorns Grow*

IN his decoration of the accompanying photograph the artist has suggested the sub-captain given this article. And where could we see a better exemplification of the well-known proverb than in this most interesting family of Conductor J. A. Kellam—pictured in 1903 and again in 1922?

In the lower picture appear the nine children who were living during the former year, reading from left to right and in order of their ages: Edward Thomas, Margaret Orena, Warren E., Albert Randolph (deceased), Pearl Alinda, Eutha Madora, Mary Mercedes, Arthur James and Hazel Belle.

Conductor Kellam and his good wife appear in the other picture, which was taken on April 19, 1922 on the thirty-ninth anniversary of their wedding. All but three of the eight children shown in this picture are married and they made a house full of happiness when they came to celebrate the anniversary with their father and mother.

Mr. Kellam started with the Baltimore and Ohio as a brakeman in 1878. He was made conductor in 1882 and has served as such ever since. He is now running trains Nos. 9 and 14 between Philadelphia and Baltimore and is one of the best known men on the line.

In the galaxy of fine Baltimore and Ohio families we doubt if there is any finer looking or a finer one than this. However, the field is open for pictures of other big families.

## The New Stadium at Columbus, Ohio

By R. Kennett, Operator

ON October 21, 1922, at the dedication of the new stadium at Ohio State University, Columbus, Ohio, 71,000 people gathered to witness the ceremonies. A football game in which Ohio State lost to Michigan by a score of 19 to 0 was an interesting feature. The work on the huge stadium, which has a temporary seating capacity of 72,000 people, was begun on August 3, 1921 and completed on November 1, 1922, in approximately 14 months.

Statistics on the various phases of the Ohio Stadium project follow:

Cost of the horse-shoe shaped structure, \$1,500,000; height of towers, 100 feet 9 inches; width, 597 feet; length, 755 feet; total area covered, 10½ acres.

The structure requires 600 ushers to handle the crowd. It can be emptied in seven minutes from the 56 aisles and 112 stairways.

The following materials were used in its construction: 4500 tons of steel, 30,000 cubic yards of concrete, 185 carloads or 204,000 sacks of cement, 1500 carloads or 60,000 tons of sand and stone, 100 carloads or 2,000,000 feet of lumber, 39,000 bronze anchor bolts; 22,000 pipe rail fittings, 115,000 square feet of terra cotta tile partitions, and 400,000, lineal feet of lumber in the seats, or enough to extend 24 miles.

The steel for the framework of this structure was purchased by the Mt. Vernon Bridge Company, Mt. Vernon, Ohio, and it traveled via the Baltimore and Ohio to Columbus. A goodly amount of the cement, sand, lumber, stone, and other materials were also brought over our Road, and the prompt handling of these helped in completing the construction work on time.

Baltimore and Ohio employes visiting in Columbus should not miss seeing this immense stadium. You will find it on the grounds of the Ohio State University.

### Stop That Leak!

## A Good Creed—The Civitan

I AM CIVITAN—as old as life, as young as the rainbow, as endless as time. Socrates was my pupil, Shakespeare my companion, Washington my servant, Lincoln my friend.

MY HANDS—do the work of the world. They uphold the temple of industry and make clean the market place.

MY EARS—hear the cry of children, the prayer of women for peace, the appeal of man for guidance, the call of the race for progress, and the song of the poet for unity.

MY EYES—search for good men that I may with them be Civitans and brothers.

MY MOUTH—utters the call to daily duty, and speaks the prayers of men in every tongue.

MY MIND—teaches me respect for the law, unqualified allegiance to our Government, and love and respect for the flag of our country.

MY HEART—beats for every friend; bleeds for every injury to humanity; and throbs with joy at every triumph of truth.

MY SOUL—knows no fear but its own unworthiness.

MY HOPE—is for a better world and a better city, through better men and Civitans.

MY MOTTO—BUILDERS OF GOOD CITIZENSHIP.

MY CREED—was proclaimed by the Man of Galilee when he declared "Whatsoever ye would that men should do to you, do ye even so to them."

MY PLEDGE—to practice this Golden Rule; to make it pay dividends, material and spiritual; to bridge with it the chasm between employer and employe; to build upon it a better and a nobler citizenship.

Getting Their Picture

Omaha, Neb.:

Omaha, Nebr.,  
March 23, 1922.

Mr. Herschel Wence,  
Town Marshal,  
P. O. Box 244,  
Shelburn, Ind.

Dear Mr. Marshall:

I am in receipt of your letter of the 20th inst. and contents noted. The article you read concerning what took place in the central police station which gave me much publicity was about as "briefed up" in the Associated Press.

I had an Italian, whose name I do not now recall, before me for operating an illicit still and manufacturing corn alcohol, called by some locally, hooch, in other parts of the west, skullcap, also, white mule. On the stand several gallon glass containers were brought in as evidence.

Champion Baltimore and Ohio Girls Basketball Team of Garrett, Ind.

When the evidence was all in I said to the Italian, "If you will drink a half-pint, or a water glass of this vile stuff, I will turn you loose."

He shook his head and answered, "Not me. I make it to sell and not to drink."

I responded, "If you refuse to drink it I will bind you over to the district court, fixing your bond at \$1,500," and he still said he would not drink it.

I then said, "Bound over. You are in a fine business, manufacturing a poison you will not drink yourself."

I then told his lawyer if he would drink a glass I would turn the Italian loose, and he said, "Nothing doing. I am employed to defend this man, not to commit suicide."

All thought it such a good story that it was used by the Associated Press and I frankly say, locally, it made a hit, and one Prohibition friend of mine, knowing I had always been a liberal, said that it was the best Prohibition speech in a few words ever made here and that it would impress itself on the minds of the loose drinkers. I believe many who drank this raw whisky have sworn off.

(Signed) William F. Wappich,  
Police Magistrate, Omaha, Nebr.  
—*The American Issue.*

## Garrett Baltimore and Ohio Girls Have Champion Basketball Team

By F. N. Shultz, Division Operator

THE accompanying picture shows the personnel of the Baltimore and Ohio Girls Basket Ball team of Garrett, Ind. They are the Champions of this part of the country, having beaten every team they have met.

Decatur claimed the best girls team in Indiana, but were easily defeated by our girls. Then Fort Wayne thought they could turn the trick, but lost, the score 30 to 9. Disappointed, they re-organized, strengthened their team and again met defeat to the tune of 26 to 10. Now they have organized a team composed of the strongest and fastest girls from their several aggregations and the battle is on February 8. They are determined to win, but so far as we are concerned, the result is not in doubt. Our girls cannot be beaten, their morale is unbroken, they wear the smile that won't come off.

Much credit is due to their Coach, Mr. Ralph Bishop, whose tireless activity has, in no small measure, brought about the wonderful team work and passing which baffles their opponents, and the remarkable basket shooting of the two forwards, Kathryn Patterson and Verna

Williams, who keep the tally-man busy marking up their scores.

The girls in the picture are: left to right; Bernice Byanski, Kathryn Patterson (captain and manager), Willie Haverstick, Verna Williams, Jirene Gregory, Leona Wallace, Amelia Dirr.

The game with the Fort Wayne Selected girls team was played at the Garrett gym with this result:

Baltimore and Ohio girls - 24  
Fort Wayne Selects - 7

The Fort Wayne girls put up a fine exhibition of basketball, but were outclassed by our Baltimore and Ohio Wonders. Our girls challenge any team on the System.

## Twelve O'Clock and All Is Well

IN the accompanying picture we have General Supervisor of Time Service W. C. Donnelly and his "inspection train" which he used to carry a load of clocks over our Chicago Terminals. The picture was taken at East Chicago, Indiana. The clocks, which he installed at various points, are standard timepieces from which comparisons are to be made by employees. The gentleman who holds the clock is Mr. Clifford Pugh, watch inspector at Pittsburgh. At his left stands Mr. Donnelly.

Superintendent DeVeny furnished the train, which consists of a motor car engine, a closed car and a car in the rear which held

the clocks. Mr. Donnelly bids us call the attention of our readers to the fact that "the photograph was taken at 12 o'clock with the sun at meridian—High Twelve." Needless to say that this train travelled "on time."

## New Grain Elevator Facilities at Locust Point

(Continued from page 31)

arises and before it is permitted to spread throughout the plant and settle on the walls and floors.

The additional property required for the construction of the plant has all been secured, and contracts for some of the preliminary work incident to the main construction program have already been awarded.

Detailed working drawings for the main elevator plant and galleries, which are being prepared by the John S. Metcalf Company of Chicago, are now nearing completion and it is expected to have the entire work under contract early in April. As the construction of these facilities will require approximately one year, the plant should be ready for initial operation early in the Spring of 1924.

THE TRAIN THAT HELPS TO INSTALL OUR STANDARD CLOCKS

Henry Salton is the engineer, William Ellis is the conductor, and Frank Leek the carpenter. Watch Inspector Clifford Pugh, Pittsburgh, and General Supervisor of Time Service W. C. Donnelly are standing at the right of the clock

# GENUINE AUSTRALIAN KANGAROO LEATHER

## FINEST UPPER LEATHER TANNED

Not many men have had the pleasure of wearing these wonderful kangaroo leather shoes for they generally sell in exclusive Boot Shops for \$12.00 to \$18 a pair. Many men wrote us who could hardly believe that we were selling the genuine kangaroo at this popular price. The many thousands of men to whom we have sent them, many of whom have bought a second and third pair, will testify to the exceptional quality and genuineness of these shoes. You know that we could not advertise them as genuine kangaroo if they were not the real article. So, do not delay but just order on approval at once and examine them right in your own home. We are the only losers if they are not thoroughly satisfactory, for we agree to refund any payment made and also the cost for return postage if you are not highly pleased.

### BANKER LAST

This picture gives a particularly clear view of the neat lines to this famous Banker last. You will say it's rightly named and it's the style worn by the best dressed business men. Fairly wide across the ball tapering gently to a semi-square toe. Extra fine plain neat stitching that gives a very dignified and dressy appearance. Add to this the wonderful fine grain soft kangaroo leather which takes a polish like patent leather and you can imagine the result.

Brisk—Keen and Dressy—Famous Straight Last  
Don't hesitate or delay. This is probably the last season we can offer these genuine kangaroo shoes at this popular price. Our contract is filled and leather prices advanced considerably. Just pin a dollar to the coupon below, give us the size and we will send them right to your door on approval. No. 6015

**\$7.45**  
Sizes 6 to 11. Black only.

### ADMIRAL LAST

We consider this the very finest foot fitting last ever built for the man with the medium wide or wide foot. Cut wide across the ball in the blucher style which gives the fullness for the high instep. Rounded to a semi-round toe to conform perfectly with the lines of the proper shape foot and we guarantee it to give perfect foot comfort. It will absolutely help correct foot trouble caused by improper shoe fitting.

### "SOFTER THAN KID" "TOUGH AS HICKORY"

We demanded in our contract for these shoes every specification for the finer shoe construction. Single heavy oak soles, Goodyear Welt sewed. Genuine Goodyear "Wingfoot" rubber heels. Genuine leather trimmings throughout. Padded stitched tongue. Full grain leather insole. Genuine leather counter and all details which come in the higher grade shoes.

We believe that every man understands the economy of good quality, and we only ask the privilege of sending you a pair of our shoes on approval for you to be the judge. If thoroughly pleased spread the cost over six full months. No. 5915

**\$7.45**  
Sizes 6 to 11. Black only.

THE CLEMENT COMPANY,  
1550 Indiana Avenue, Chicago, Illinois

# Miss Lauer First, Miss Stevens Second in Good Will Vote—Both Will Accompany Miss Spengler on Trip to France

The formal announcement sent to all Candidates in the Good Will Contest recently held on the Baltimore and Ohio, follows:

APRIL 9, 1923.

To All Candidates in the Good Will Election:

I beg to enclose herewith a tabulation of the votes for the Second Delegate to France as passed by the tellers at the various points on the System and assembled in Baltimore. Miss Anna Magdalene Lauer, an employe in the office of Mr. C. A. Gill, superintendent of Motive Power, Baltimore, Md., having received the highest number of votes, 11,837, is therefore elected to be the Second Delegate to France to accompany Miss Nina Spengler, an employe in the office of Auditor of Merchandise Receipts

We have within the last few days received a ruling from the American Committee which accords the Baltimore and Ohio Railroad Company the privilege of sending a third delegate, and logically, also with the concurrence of the Management, the nominee receiving the next highest vote has been selected

Miss Margaret Talbott Stevens, associate editor of the Baltimore and Ohio MAGAZINE, and known to its readers as "Aunt Mary," received the next highest number of votes, 7,068, and therefore she has been elected as the additional delegate. The representation of the Baltimore and Ohio, therefore, on the expedition to France will be as follows:

Miss Nina Spengler, Office of Auditor Merchandise Receipts.

Miss Anna Magdalene Lauer, Office of Superintendent of Motive Power, Baltimore, Md.

Miss Margaret Talbott Stevens, Associate Editor of the Baltimore and Ohio MAGAZINE.

I want to extend my congratulations to all of the candidates for the interest in the matter and to express my regret that it was not possible to send all of them on this trip to France.

J. S. MURRAY,

Assistant to President,

General Chairman

Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote a greater community of interest among its employes. Contributions are welcomed. Manuscripts and photographs will be returned upon request.

### THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is 46,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can

# Baltimore and Ohio Steward a Second "Dan" Healy!

"Dan" Healy was the world famous and universally beloved steward of the Pioneer Limited of the C. M. & St. P. Railroad. Shortly after his death last year the Minneapolis Daily News printed a splendid editorial tribute to him, and this, with a brief comment from the Milwaukee Employes Magazine, was run in the December issue of our Magazine at the request of President Willard, who knew "Dan" Healy well and vouched for all the good things said about him. Shortly after this issue of the Magazine was placed on our dining cars the editor received the following letter:

## The Bellevue-Stratford Philadelphia

In the December Baltimore and Ohio Magazine "Dan" Healy was remembered. He was remembered favorably. We may say the breaks of luck came Fealy's way. Perhaps they did, but his average was above that of those around him, we may be sure, or luck would never have noticed him. He saw those who were his guests as through a stereoscope; he made them individuals.

We know a Steward as the keeper of a trust. His trust is the boiled down efforts of the Traffic men behind him. He is a "visible" in their work, a strong ally, as long as man remains the victim of his-victuals.

The writer knows the roads from coast to coast and spends much of his time on trains. Thanksgiving morning, last, he used the Baltimore and Ohio from Baltimore to Washington. It was your 8 a. m. train from Baltimore. The morning was fine, but the hotel clerk at the --- (or was it the ---) in Baltimore did all he could to make it gray. The cigar clerk found "Good morning" an offense. The sun still shone outside but the writer's eprilite had been dampened and he was on the defensive.

Then to the dinor, for the train was under way. A demi-tasse, before he even ordered, took all the fight away. The orange alicod was one of those leather ones we sometimes run across. The waiter took it back. The Steward overboard and went back with him. Another orange came, a fine one. The Steward came too.

"That was a very poor orange you had. They should know better than to serve that kind."

He did not say much and "bawled nobody out" to impress one with his authority. But you got the inference that it wouldn't happen twice. The car was well filled and he gave each guest attention.

It is men like him and Healy who have lifted "Steward" from its origin to mean a place of trust.

*Stanford McGinnis*

N. B. —The steward referred to was in our service for only a short time but had already begun to share the reputation for courteous and satisfactory service which has been made by our other stewards and their crews, most of them veterans of the Baltimore and Ohio—Ed.

## Prides of The Baltimore and Ohio—No. 3

My job as information clerk is not an easy task,  
 Especially when you realize the queer things people ask—  
 They want to know the time of trains; then, when these  
 trains are due,  
 "Oh, please, Sir, have you seen Aunt Jane, or little  
 Cousin Sue?"

They ask about the weather from New York to Louisville,  
 And "what think you that I should eat if riding makes me ill?"  
 But I always keep a level head and never get alarmed—  
 The secret of my courtesy? I'm always well informed.

NUMBER 12

## Constructive Transportation Program for 1923

### Extraordinary Cooperative Effort Being Made by Railroads to Meet the Need of American Business for Greater Service

THE following statement was authorized and the following resolutions adopted at a *Member Meeting of the American Railway Association* and were approved at a *Member Meeting of the Association of Railway Executives*, both meetings being held in New York City, April 5, 1923.

Despite the obstacles placed in the way of an efficient transportation service by the cumulative effect of the Coal Miners' strike beginning April 1, 1922, and the Shopmen's strike beginning July 1, 1922, the railroads, as shown by the report of the Car Service Division of the American Railway Association hereto appended, have, between July 1, 1922 and March 17, 1923—a period of 37 weeks—handled the greatest volume of traffic ever transported in the history of the country during any corresponding period of thirty-seven weeks.

(See Table 1 below.)

Anticipating a still larger development in agriculture and other departments of industry with the resulting increase in tonnage, and for the purpose of meeting the demands of commerce in an adequate and efficient manner, individual railroads, in the fourteen months from January 1, 1922 to March 15, 1923, have purchased an aggregate of 223,616 new freight cars, of which 117,280 have been delivered and put in service, and on March 15, 106,336 were on contract for delivery during 1923; and in the same period, have also placed in service or purchased an aggregate of 4,219 new locomotives, of which 2,106 have been placed in service, and on March 15, 2113 were on contract for delivery during 1923. The numbers given, both as to new cars

and new locomotives, are exclusive of subsequent orders which it is anticipated will be placed during the current year.

The significance and importance of these figures will be appreciated when it is remembered that the average number of new cars and new locomotives added over a period of ten years, 1913 to 1922 inclusive, has been—

101,009 New Cars per year  
1,060 New Locomotives per year  
and that during the two years and two months of Federal Control there were purchased a total of—  
100,000 New Cars or approximately 46,000 per year,  
1,930 New Locomotives or approximately 800 per year.

Aggregate carrying capacity of freight cars increased in the ten year period 1912 to 1921 inclusive 22.0 per cent.; and aggregate tractive power of locomotives increased during same period 40.8 per cent.

The railroads in full realization of the necessity for the greatest improvement and expansion possible in the country's transportation facilities to meet the growing demands of commerce, actually expended in the year 1922—

For Cars.....\$200,000,000.  
For Locomotives..... 45,000,000.  
For trackage and other facilities..... 195,000,000.  
Total.....\$440,000,000.

The railroads have authorized expenditures for equipment and other facilities of approximately \$1,100,-

000,000. for the year 1923, divided as follows:

For Cars..... \$515,000,000.  
For Locomotives..... 160,000,000.  
For trackage and other facilities..... 425,000,000.

Total.....\$1,100,000,000.

The railroads of the country are raising this enormous amount of additional capital largely through borrowed money on the abiding faith in the fairness of the American people and reliance on the continuance of the policy announced in the Transportation Act, 1920, as a measure of reasonable protection to investment in railroad property.

In order to bring about the most effective cooperation between the managements of the several carriers and to insure, to the highest degree practicable, adequate provision for the country's transportation requirements, a plan has been agreed upon which is set out in the following resolutions:

RESOLVED, First, That the report of the Car Service Division reviewing transportation conditions and presented at this meeting be approved, and that, in order to further improve transportation conditions and to make the best practicable provision to meet transportation requirements as they develop, the following recommendations are adopted by the railroads as a definite policy and working program.

1. That by October 1, 1923, when the peak movement ordinarily begins, cars awaiting repairs be reduced to

TABLE 1—

Cars of Revenue Freight Loaded 37 Weeks July 1, 1922 to March 17, 1923

37 Weeks.....	32,939,789	28,879,325	31,312,945	31,668,850	30,819,593

the normal basis of five per cent. of the total equipment of the country.

2. That by October 1, 1923, locomotives awaiting heavy repairs be reduced to the normal basis for the entire country of 15 per cent.

3. That to the extent coal is stored for railroad use, complete the storage requirements by September 1, so that after that date the equipment and other transportation facilities may be used to the greatest extent for commercial coal necessities.

4. That the use of power and equipment for railroad construction and maintenance purposes be restricted to the minimum after September 1st in order that a maximum of power and equipment may be available for commercial purposes.

5. That railroads in producing and consuming sections impress upon all interested the necessity for movement of coal and ore via the Lakes in the largest possible quantity early in the season. That railroads serving upper Lake ports carry on campaign for early purchase and shipment of coal from the upper lake docks to points of consumption.

6. That an effort be also made to being about the prosecution of road and building construction work as early in the season as possible in order that equipment may be available for larger movement of seasonal commodities.

7. That all interested be impressed with the necessity for loading all cars to maximum capacity in an effort to bring the average loading to thirty tons per car for the entire country; for unloading cars promptly; increasing storage facilities where necessary and practicable and providing adequate siding capacity to facilitate loading and unloading, thereby increasing the number of available cars.

8. That every possible means be adopted to increase the mileage per car per day to an average of thirty for the entire country, particular attention being given to prompt movement through terminals and yards and to the issuance of embar-

TABLE 3—

## Cars of Revenue Freight Loaded 37 Weeks July 1, 1922 to March 17, 1923

	1922	1921	1920	1919	1918
37 Weeks.....	32,939,789	28,879,325	31,312,945	31,668,856	30,819,593

goes when necessary to prevent congestion.

*Cooperation of shippers and the public in the past has been most helpful in bringing about heavier loading, prompt unloading and increased mileage per car, and only by their continued cooperation and their full knowledge of what this means to their own transportation requirements can results be secured in these matters. It will be understood that each individual railroad will cooperate with its own shippers to this end and the Car Service Division will take similar action with national and district associations to bring about the fullest measure of cooperative effort.*

9. In the event of a car shortage, reports to the Car Service Division should be carefully reviewed by each railroad organization so that the report will more nearly indicate the actual car shortage measured by the ability to load daily, rather than a cumulative shortage which does not reflect the daily existing condition.

10. The railroads have already established and have in active and effective operation a comprehensive organization in the Car Service Division for the central control and distribution of freight cars which, during recent periods of car shortage, has under difficult conditions, secured to the public the best possible use of available freight equipment. The Car Service Division as a central agency, and through their District Managers, together with the District Shippers Committees, which have been and are being organized, will keep informed of traffic requirements with a view to the equitable and timely distribution and handling of equipment.

The railroads pledge themselves to renewed and effective compliance and cooperation with the directions of the Car Service Division, asserting

the belief that, with the new equipment on order and the program for rapid conditioning of equipment requiring repairs, the freight equipment of the railroads will be handled and used in moving the commerce of the country to the best possible advantage.

The cooperation of the public with the railroads and their officers and employes generally is invited in order that by a better understanding and united effort transportation may be facilitated and the needs of the country more promptly and adequately provided for.

RESOLVED, Second: That individual roads give to the general public and to the patrons of their respective lines information as to their program, and also keep them currently advised of the progress made hereunder, including, so far as the individual line is concerned, information as to the progress made in its locomotive and car repairs and other improvements in transportation facilities.

## Report and Recommendation of Car Service Division

March 25, 1923

MR. R. H. AISHTON

President

American Railway Association

Dear Sir:

The Car Service Division has made a review of the conditions it has faced and those which have confronted the railroads in the handling of equipment during the past year and in the light of that review and their previous experience, wish to make the following report together with certain recommendations:

1. **Car Loading.** The loading during the year 1922 compared with the years 1920 and 1921 is as shown in Table 2.

This indicates, with the exception of coal, coke, ore, forest products and miscellaneous that the railroads handled a heavier business during 1922 than was handled in any previous year in spite of the handicaps caused by the strike of the miners and the shop crafts. The increase is particularly noticeable in grain and grain products. The loading in the last quarter of 1922 and in 1923 to date shows very marked increases over any previous year.

(See Table 3 above.)

2. **Car Supply.** There was reported during the first eight months of 1922

TABLE 2—

## Car Loading Record

	1920	1921	1922	1923

Locomotives on order March 15, 1923.....							2,113
Locomotives put in service and on order 1923.....							2,840

an average daily surplus of equipment of 270,750 cars. The severe reported shortage began at 58,670 on September 1, and reached a peak point of 179,239 cars, on October 31, since which time it has receded to 74,442 cars, on March 15, 1923.

The demand for all classes of equipment continues without any indications of lessening at this date. There still remains considerable grain to move from the country elevators and farms, and a very heavy fertilizer movement is under way, particularly in the Southern territory.

Forest Products loading continues heavy with prospects good for sustained heavy movement.

**3. Prospective Business—1923.** The loading since January 1, 1923 is running well ahead of any of the three previous years. From the best information obtainable by the Car Service Division from railroad and other sources, there is every indication that there will be continued heavy business throughout the year. Our graphic chart shows loading for a five year period and also shows the estimated loading during the year 1923, based upon the assumption that business will continue to increase at the same rate as shown by the first seven weeks of 1923 over the corresponding periods of the weekly average for the past four years.

**RECOMMENDATIONS**

**1. Repairs of Equipment.** Table 5 indicates the percentage of freight equipment awaiting repairs as of dates shown: (See Table 5.)

We recommend that there be a continuous campaign for the reduction of the cars awaiting repairs, so that there will be on October 1, 1923, not in excess of an average of five per cent. equipment of the entire country awaiting repairs. This repair program should be prosecuted with a view to conditioning for grain and grain products movement the largest possible number of box cars.

**Awaiting Retirement.** As the present report of cars awaiting repairs includes some cars that will not be repaired, but are held awaiting

opportune time for retirement, we recommend they be eliminated entirely from the report and deducted from the ownership, or shown as a separate item, so that the figures indicating the cars awaiting repairs will reflect the correct situation in that respect.

**Refrigerator Cars.** There is a continuously increasing demand for refrigerator equipment over the entire country, and we recommend that extraordinary measures be taken to reduce refrigerator car equipment awaiting repairs to the lowest possible limit.

**2. Locomotive Repairs.** Table 6 shows the condition of power on the dates indicated: (See Table 6.)

We recommend a program calling for a reduction of the locomotives awaiting heavy repairs to a total average for the entire country of 15 per cent. by October 1, 1923.

**3. Storage Coal.** In the interest of making available the greatest possible supply of equipment at the time of greatest peak transportation demand in the Fall months, we recommend that the railroads' program for coal storage be so arranged as to complete this storage by September first.

**4. Use of Equipment by Railroads.** It is recommended that there be a very close supervision over equipment used by railroads to the end—

(a) That construction work be planned so that the equipment required for commercial purposes in the Fall, at time of peak demand, will not be tied up in railroad construction work, to a greater extent than is absolutely necessary.

(b) That railroads require that in the loading of equipment with their own material, full car capacity is utilized with a view of reducing to the minimum the number of cars in this service.

(c) That there be no unnecessary delay in the unloading of railroad material. There is a greater necessity for supervision over this than over the unloading of commercial traffic.

**TABLE 5—** All Freight Cars Awaiting Repairs

	Heavy	Light	Total
January 1, 1922.....	11.3 per cent.	2.4 per cent.	13.7 per cent.
July 1, 1922.....	11.6 per cent.	2.7 per cent.	14.3 per cent.
January 1, 1923.....	7.2 per cent.	2.3 per cent.	9.5 per cent.
February 1, 1923.....	6.9 per cent.	2.3 per cent.	9.2 per cent.
March 1, 1923.....	6.9 per cent.	2.6 per cent.	9.5 per cent.
March 15, 1923.....	6.9 per cent.	2.4 per cent.	9.3 per cent.

NOTE: 98,422 Serviceable Freight Cars would have been added to the Available Supply if Percentage of Cars Awaiting Repairs was Reduced to 5% instead of 9.3% as on March 15, 1923.

TABLE 6—

	Awaiting Repairs		
	HEAVY	LIGHT	TOTAL
January 1, 1922....	18.7 per cent.	5.1 per cent.	23.8 per cent.
July 1, 1922.....	17.6 per cent.	4.8 per cent.	22.4 per cent.
January 1, 1923....	21.1 per cent.	3.0 per cent.	24.1 per cent.
February 1, 1923....	21.0 per cent.	2.9 per cent.	23.9 per cent.
March 1, 1923.....	20.8 per cent.	3.0 per cent.	23.8 per cent.
March 15, 1923....	21.6 per cent.	2.6 per cent.	24.2 per cent.

NOTE: 4,244 Serviceable Locomotives would be Added to the Available Supply if Percentage of Locomotives Awaiting Heavy Repairs was Reduced to 15% instead of 21.6% as on March 15, 1923.

### 5. Elimination of Railroad Delays.

We recommend that every practical means be adopted to prevent unnecessarily tying up equipment by—

(a) Reducing the delays in the movement of loaded and empty equipment and giving particular attention to the movement of refrigerator cars, the demand for which is constantly increasing over the entire country.

If all cars owned by all Class One Railroads had been moved at the rate of 30 miles per car per day during months of September, October and November, 1922, instead of the average actually made of 25.0 miles per car per day, IT WOULD HAVE IN EFFECT RESULTED IN ADDING 334,681 CARS TO THE OWNERSHIP.

(b) Embargoing promptly consignees delaying the unloading of equipment.

(c) Embargoing without delay receipt of traffic from connections beyond the railroad's ability to accept and move cars promptly.

(d) Line responsible for disability which makes an embargo necessary should assume that responsibility and issue embargo promptly to prevent congestion and without making it necessary for its connections to issue an embargo on their own initiative due to another line's disability and its failure to promptly embargo.

Eliminate entirely where practicable, or curtail to the greatest possible extent, use of permits for traffic against an embargo, which practice tends to defeat the purpose of an embargo, thus preventing the prompt clearing of a congestion.

### 6. Cooperation with the Public.

We recommend that each railroad conduct a campaign with its own

shippers in the interest of continuing the effective cooperation in conservation of equipment by impressing upon them the necessity for—

(a) Loading equipment as near to its capacity as is practical with the various classes of commodities, thereby reducing the number of cars required and likewise reducing empty mileage in the return of equipment to producing districts.

IF ALL THE CARS THAT WERE LOADED DURING SEPTEMBER, OCTOBER AND NOVEMBER 1922, HAD BEEN LOADED TO AVERAGE OF 30 TONS PER CAR (a figure heretofore attained) INSTEAD OF THE ACTUAL AVERAGE OF 27.7 TONS PER CAR, IT WOULD IN EFFECT HAVE ADDED 188,357 CARS TO THE OWNERSHIP.

(b) Restricting so far as practicable the number of cars shipped under "to order-bills-of-lading," which invariably causes delays to the equipment at destination.

(c) Limiting the reconsignment of traffic to the greatest possible or practicable extent.

(d) Unloading cars promptly as possible.

(e) Increasing storage facilities where necessary and practicable and providing adequate siding capacity to facilitate loading and unloading, thereby increasing the number of available cars.

(f) Not ordering cars beyond ability to load daily.

(g) Proceeding early in the season with programs for road and building construction, coal storage by industries and public utilities, movement of Lake coal to the Northwest and ore to Lower Lake ports, the successful carrying out of which plans should reduce the peak movement to considerable extent in the months of September, October and November.

7. Car Distribution. We recommend that reports of cars ordered by shippers be carefully reviewed with a view of preventing inflation in reports made to the Car Service Division and which reports do not correctly reflect the actual situation. Carrying out of the plan now under way for elimination of the inflation in coal mine ratings will go far toward giving a correct indication of such coal car shortage as may exist. Similar action with all classes of traffic not only is desirable but necessary. Car shortage should represent only the actual number of cars a shipper has ability to load and ship daily.

The Car Service Division, through its District Managers with the assistance of shippers committees, will endeavor to keep informed of the

—THE EVOLUTIONIST—

THE MORAL OF WHICH IS—

Practice What You Preach or You May be Preached.

traffic demands in the various territories with a view of anticipating the equipment necessities in the various Districts and planning in advance to meet such demands.

We recommend that each railroad carry on a campaign with all the shippers interested as recommended

herein in the interest of a more complete cooperation to better meet the transportation needs.

Yours very truly,

CAR SERVICE DIVISION

Chairman

## Hats Off to Trainmaster Pritchett, Flora!

*His Energy, Foresight and Liberality Big Factors in Bringing Substantial Industry to Our Lines*

A SHORT time ago, the Commercial Club, of Flora, Ill., decided that a vigorous attempt should be made to secure a branch factory of some large industry, for their town, one of the principal objects being to furnish employment for the boys and girls living in that vicinity. The matter was referred to Industrial Agent R. L. Hamme, St. Louis, for advice and assistance. At the time Mr. Hamme had in mind a large shoe company which had decided to establish a branch factory, and which had under consideration a number of towns, many of which were not on the line of the Baltimore and Ohio.

Mr. Hamme discussed the matter at length with Trainmaster K. S. Pritchett, Flora, with the result that these two gentlemen called on the Commercial Club officers, and looked

the situation over thoroughly. Mr. Pritchett and Mr. Hamme securing data as to labor available by means of a circular questionnaire. After full data had been secured Mr. Hamme opened negotiations with the shoe company, which is a large one, well known, and has many branches in various parts of the country.

The Commercial Club of Flora was enthusiastic and finally secured the necessary guarantee to bring the factory to their town. No small measure of the credit for securing the guarantee, which was a substantial sum, is due to the untiring work and energy of Trainmaster Pritchett, who had a natural interest in the matter seeing that his home is in Flora, and that he is a loyal Baltimore and Ohio officer. In addition to giving his time to the work, Mr. Pritchett gave a considerable

sum of his own money to the subscription list opened by the Commercial Club, to secure the required guarantee.

The efforts of the Commercial Club, ably assisted in every way by Mr. Hamme and Mr. Pritchett, have been successful and the factory will be constructed in the near future. It will cost \$75,000 and will give employment to approximately 400, and in addition to this will mean a substantial number of cars of freight for the Railroad.

Among the commendatory letters received by Trainmaster Pritchett is one from Mr. H. O. Hartzell, manager Commercial Development, which reads as follows:

"Permit me to drop you these few lines to express my personal appreciation, as well as that of the Commercial Development Department, for the splendid efforts you have put forth in assisting Industrial Agent Hamme in bringing about the location of branch factory at Flora. You have certainly done splendid work in this instance, and it is just this kind of cooperation between the various departments that is going to make the good old Baltimore and Ohio the first Railroad of the land."

### Keep Cars Moving

*A standing car earns no money to pay wages*

**Keep Cars Moving**

Percy Adolphus Aloysius McToll as a child was a wonder at shoveling coal

While young Cyrus Peter McGillicuddy Byer could never be coaxed to go near a fire

When Adolphus grew up you'll be astonished to learn — You could not get him to look at anything that would burn.

While you'll see our friend Cyrus firing the flyer Any day that you ride on the Balto and Ohio \*\*

\*\* pronounced "Ohigher" east of the Alleghenies.

It's a good thing for the Baltimore and Ohio that Adolphus decided to become a coast guard. Cyrus was so afraid of coal when he was young that the habit stuck — he saves it yet. — **Save Coal** —

*Apologies to Goldberg*

## The New 5200 Type Coaches

*Being a Conversation between an Occasional Passenger and a Travelling Man, in the Smoker*

By T. H. Russum, Supervisor Passenger Car Maintenance

Occasional Passenger. Well, what's new today?

Travelling Man. Have you noticed the new coaches the Baltimore and Ohio has on their through trains now?

O. P. No, tell me about them.

T. M. Well, as you know, the policy of the Baltimore and Ohio is to make its trains safe, attractive in appearance and comfortable for its patrons, and they have just received 50 coaches like the 5200 class you see on this train. I am told that they were designed by officers of the Baltimore and Ohio, and constructed by the Pullman Company. After looking this one over, I believe they are the last word in safety, beauty of appearance and comfort.

O. P. When I'm travelling the first thing I want is safety. What special features are there along this line?

T. M. The coaches are of steel throughout, there being some six tons more of solid steel to add to their strength than is found in the present cars. Their length is 60 feet, and they have the latest style six

wheel cast steel trucks. On account of the specially heavy and scientifically constructed body, they ride very easily, and safely.

O. P. One thing I have noted is poor lighting in many cars. How about this feature?

T. M. They are lighted electrically, with the latest type of generator and semi-indirect lamps. Also you have noticed, as I have, the poor heating of some cars, they are either too hot or too cold. Heat in the new coaches is furnished by an improved vapor unit system, which has four units; this enables the train crew to regulate heat to four different degrees, as weather conditions require.

O. P. I have noted sometimes that drinking water is not very clean, and perhaps not sanitary?

T. M. Water is furnished to all parts of the car, requiring it, by air pressure. Drinking water is contained in what is known as the "Geissell North Pole Drinking Fountain" and it passes through a filter before being used.

O. P. What is that difference I notice in the seats? They seem much more comfortable.

T. M. They are designed especially for comfort. In many cases seats are found uncomfortable, especially by ladies, on account of being too high from the floor. This is remedied in the new coaches by the seats being placed at a comfortable height from the floor. Then look at the parcel racks. You and I have seen the old narrow racks, and we have also seen parcels, etc. drop on passengers heads. This is remedied now. The racks are wider and any moderate sized package or suit case may be safely placed on the rack without danger of falling.

O. P. What about cleanliness and sanitation?

T. M. Of the best. The floor is composed of a special composition known as "Flexolith" which is very sanitary in that it will not absorb moisture and is easily cleaned. Rubber aisle strips are laid in the centre of the entire length of car, affording an easy, noiseless walking surface.

O. P. In travelling occasionally as I do, I have been much annoyed by the small glass surface, obstructing the view, in some instances, of scenery which one is very anxious to see. What has been done to remedy this?

"Chaste Beauty" aptly describes the interior of the new passenger coaches. The accompanying article describes the unusual comforts which make that beauty so practicable

The exterior of the new coach suggests its inherent qualities of safety, comfort and cleanness

T. M. That is a feature in the new cars which we travelling men will especially appreciate. The window sash is constructed of brass, enabling the use of a narrower rail, thereby giving a much better view on account of the larger glass surface.

In a word, the Baltimore and Ohio has given us the best obtainable in the new coaches. They contain everything which could be thought of to contribute to the safety, comfort and convenience of their patrons, or as the Baltimore and Ohio says, "their guests."

Red Cross or other activity designed to alleviate the sufferings of the poor and unfortunatc, and it is said of him that there never was a movement in the city of Cleveland for philanthropic or social advance in which Mr. Goff was not a participant, and to which he did not freely give of his time and strength.

## Fred. H. Goff, Late Director of Baltimore and Ohio, a Fine Example of the Public Spirited Citizen

**F**RED. H. GOFF, president of the Cleveland Trust Co., a leading figure in financial and public affairs of both Cleveland and the nation, died at Lakeside Hospital, Cleveland, March 14. Mr. Goff, in addition to holding many other responsible positions in the financial world, was a director of the Baltimore and Ohio.

Frederick Harris Goff was born in Blackbury, Ill., December 15, 1858, and was in his 65th year. He came of old New England stock, extending back to Pilgrim times. As a boy he went to Cleveland and attended grammar schools, later attending the University of Michigan. Upon graduation he became law librarian of the Cleveland Bar Association. He was associated with several firms, the best known being Kline, Carr, Tolles & Goff. He specialized in the management of estates and came to be one of the most successful lawyers in the profession.

On June 8, 1908, Mr. Goff became president of the Cleveland Trust Company.

At a regular meeting of the President and Directors of the Baltimore and Ohio Railroad Company, held March 28, 1923, the following resolution was unanimously adopted:

"The President and Directors of the Baltimore and Ohio Railroad Company have learned with deep regret of the death on March 14, 1923, of Frederick H. Goff, a director of this Company since November 19, 1917.

"Mr. Goff became associated with this Company in 1895 as its division counsel at Cleveland, Ohio, when the Valley Railway Company was reorganized as the Cleveland Terminal and Valley Railroad Company, becoming a director of the latter. He looked after the Company's legal interests at Cleveland with marked ability, and cooperated fully in furthering the Company's efforts to serve the public, particularly in the development of its terminal facilities in that city.

"Mr. Goff was a man of broad sympathies, and his interest in everything that affected his fellowmen was deep and abiding. He was the originator of the Cleveland Foundation, was in the fore-front of every

"The great ability of Mr. Goff extended the sphere of his activities until the recognition of his powers was nation wide, and the Federal Government frequently sought his aid and counsel, particularly in the hour of the Nation's peril and in the reconstruction period following the war.

"The board records its high appreciation of Mr. Goff's services, of his generous and lovable nature, and sincerely mourns his untimely death."

One of the reasons for Mr. Goff's great success in business and for the universal esteem in which he was held, is given in the following excerpt from one of the accounts of his life:

"Some conception of his business philosophy may be gained from his frequent saying that 'I want men in my organization who, instead of saving what's left, save first and live on what's left.'"

M. S. Kopp, New Superintendent, Monongah Division

**E**FFECTIVE April 1, M. S. Kopp was appointed superintendent Monongah Division, headquarters Grafton, W. Va., vice B. Z. Holverstott, who resigned to enter other business.

Mr. Kopp was born in Pittsburgh, Pa., September 30, 1876. He entered the Baltimore and Ohio service as office boy on the Toledo Division, November, 1890, promoted to clerk, Superintendent's Office, October, 1892; yard clerk, 1893; telegraph operator, 1894; relief agent, 1897; train dispatcher, 1898; night chief dispatcher, 1907; day chief dispatcher, 1907; assistant trainmaster, 1910; train master, 1914; assistant superintendent

The Late Fred. H. Goff, Cleveland, Ohio

M. S. Kopp, recently appointed superintendent, Monongah Division

Cincinnati Terminal, 1916; assistant superintendent, Toledo Terminal, 1918; and assistant superintendent of the Chicago Division, with headquarters at Willard, Ohio, 1919, which position he held at the time of his promotion to superintendent at Grafton.

## "Warehouse Facilities"—a New Booklet

Describes Advantages Offered for Storage of Goods on  
Baltimore and Ohio

**A**N interesting booklet, "Warehouse Facilities," was recently issued by George H. Campbell, assistant to the president. It explains fully the storage warehouses of the Baltimore and Ohio in New York, Philadelphia, Baltimore, Washington, Cincinnati, Cleveland and Fairport, and contains pictures of the facilities offered. It was distributed

to interested shippers, to passengers on our Dining Cars, to the managers of the various warehouses, for possible customers at our freight traffic offices, etc.

In presenting the booklet to the patrons of the Baltimore and Ohio, Mr. Campbell explains the storage warehouse system, as follows:

"The Baltimore and Ohio has

The Baltimore and Ohio Twenty-Sixth Street Stores, Southwest Corner 26th Street and 11th Avenue, New York

established modern and fully equipped storage warehouses at a number of the chief strategic points on the System, the use of which will enable its patrons to distribute their goods promptly and cheaply, giving proper care to reserve and surplus stocks of raw material and manufactured merchandise.

"In each case it has constructed buildings of the strongest type, conveniently located and so well equipped that the lowest insurance rates are obtainable, the best protection afforded goods, the most prompt service secured and the least expense incurred consistent with such service.

"These warehouses have direct rail connection with our terminal freight stations, thus eliminating cartage and switching charges and extra handling with attendant delays and loss and damage incident thereto. Most of the reshipments from stock may also be made without the necessity and expense of cartage.

Smith Street Station and Warehouse, Cincinnati, Ohio

"While most of the warehouses have been planned for the storage of merchandise of a non-hazardous character, some buildings arranged for the handling of special lines of commodities have also been provided.

"Shippers and receivers are invited to visit and inspect these warehouses or to correspond with their managers. Uniform treatment and courtesy and an active interest in the welfare of their patrons' business will be extended by all of these managers, all of whom are experts of many years' experience in the problems of transportation, storage and distribution."

Photos accompanying this article show some of our warehouse facilities at Baltimore, New York and Cincinnati. Many other views are contained in the twenty-seven page booklet, and full data given concerning the advantages of "warehousing" goods with the Baltimore and Ohio. The cover of the booklet is printed in regulation Baltimore and Ohio "Royal Blue."

### New Heavy Freight Locomotives

THE Baltimore and Ohio Railroad Company has just closed contracts for 75 additional locomotives, which it is expected will be delivered next fall. They will cost approximately \$75,000 each. Order for 25 of them was placed with the Lima Locomotive Works at Lima, Ohio, and 50 with the Baldwin Locomotive Works at Eddystone, Del. The

Baltimore and Ohio Pier 21, East River Stores, Foot of Dover Street and East River, New York

Unloading cars directly into the warehouses, eliminating expense delay, loss and damage, Baltimore, Md.

plants of both of these companies are located on the lines of the Baltimore and Ohio Railroad.

While these locomotives, which are known as the "Santa Fe" type, are of particularly heavy construction, the trucks before and after the drivers help to distribute the dead weight and notwithstanding the greater tractive power gained through the medium of ten unusually large driving wheels, the engines are able to make rapid progress with a heavy load.

Delivering chute in operation, minimizing delay to teams; Baltimore, Md.

## Stop That Leak! Stop That Leak! Stop That Leak!

### Savage Impact Register Shows Possibility of Reducing Claims Caused by Rough Handling of Cars

*Freight Train Crews Can Save Company \$100,000 a Year on This Account*

By M. F. Steinberger, Special Engineer, Office of Vice-President Operation and Maintenance

**A**N article in a previous issue of the MAGAZINE described the Savage Impact Register, its use and the results which it is expected will be obtained from the operation of these machines.

The records obtained indicate that a certain amount of rough handling of cars does occur, an amount which it is felt, is greater than it should be, and which it should be possible to reduce, under the stimulus of more care in the handling of cars.

The statistics indicate that about 75 per cent. of all shocks, sufficient to be called rough handling, occur in yards, and 25 per cent. on the road between terminals. They further show an improved performance in January, 1923 over December, 1922, which is equivalent to a reduction of twenty-two and a half per cent. in the number of shocks received per thousand car miles run.

Freight claim payments chargeable to "rough handling" during the year 1922 amounted to \$248,856.

It is reasonable to assume that, with a reduction in the number of impacts per thousand car miles, will come a corresponding reduction in the amount of money paid out in claims resulting from shocks given cars in yards and on the road.

With the indicated improvement of twenty-two and a half per cent. in the first month of 1923, it appears that if that improvement is continued throughout the coming year, a saving of about \$46,000 per year in claim payments alone will be made. The savings resulting from elimination of damage to equipment and delays to cars should amount to as much more, so that it seems that it should be comparatively easy to save, in round figures, at least \$100,000 per annum, in this particular item of expense.

In addition to that we must con-

sider the added good will of shippers, which will come through the receipt of freight in good condition, and the resultant increase in business which that good will should bring, thus materially helping our freight revenues.

Hand in hand with the problem of "Rough Handling" goes that of "Improper Loading, Stowing and Unloading." This item alone cost the Railroad during the year 1922, \$67,964. There were also charges of \$74,054 for "Concealed Damage," the cause of which could not be definitely placed, but which, it is felt, were in the main chargeable to the two causes first named in this article. In all, there were claim payments of \$390,874 for the three causes named, most of which it is thought could be

eliminated through the exercise of reasonable care in the handling of freight at freight stations, in yards, and on the road.

It is the firm conviction that most of those engaged in the handling of this freight have not fully realized the amounts of money which have been spent for the payment of claims resulting from the above named causes, and that the frank presentation of these figures will cause them to cooperate to the fullest extent in the elimination of all practices conducive to such payments.

Reverting again to the use of Savage Impact Register: Our previous article, it is hoped, made it plain, that they were not purchased in an effort (to use a colloquial expression) to "get something" on any crew engaged in the handling of cars. They were purchased to enable us to present to our train crews an unbiased record secured through mechanical means, and showing when and where rough handling occurred, it being felt that such a presentation would lead all to a fuller realization of the extent of such rough handling, and to the fullest cooperation in our efforts to bring about damage prevention.

### Will You Save Your Penny a Day?

By S. C. Williams, Division Freight Agent, Wheeling, W. Va.

**I**N my opinion there are two words which are more important than the word "Economy," namely, "Loyalty" and "Education."

Economy cannot be controlled by legislation or instructions. It is a matter of education, and if an employe is loyal he will of necessity economize. I do not infer that the employe who does not save something every day is disloyal, because while he is really not making a special effort to save he may not be deliberately wasting anything.

To illustrate my point; if I desire to make a rough memo or note, and I use a printed form or a second sheet, of itself this is a small matter, but—there are some 60,000 employes on the System, and probably at least 20,000 of them do some kind of office work. If each one should use a printed form to make a memo or note, we will have used in one day twenty thousand. If this should

happen to be, for instance, Form 444, which is the most commonly used blank, which has been run through the printing press, put up in pads and gummed, we will have therefore used a form for scratch purposes which costs considerably more than the ordinary second sheet. To go a little further, let us use 306 working days as a basis for our calculation, and the net result is that we have wasted in round figures six million forms or sheets of good paper. Startling, isn't it?

The particular point I want to bring to the special attention of my fellow employes is this: There is sufficient WASTE paper produced in every office daily to avoid the necessity of using either second sheets or blank forms for scratch purposes. This is particularly true of offices where embargoes are received; the cancelled ones can be cut in half and used for scratch pads; and there are

## Stop That Leak! Stop That Leak! Stop That Leak!

# Stop That Leak! Stop That Leak! Stop That Leak!

many other pieces of paper which would ordinarily go into the waste basket, which make excellent memo sheets.

We often hear some one in an office say "Where do all the pins go?" A pin can easily be dropped on the floor, roll into a crack, get under the desk, in the rugs, or a hundred and one other places, and is lost forever so far as we are concerned. Did you ever go through a thick file of papers and see how many pins you could take out? Try it. A pin is a small matter, but—every one saved is a step in the direction we are all heading for, namely, "Stopping the Leaks."

Now as to Education. Suppose we could get all the sixty thousand employes of our Company together and suppose the person addressing them asked that they help save \$219,000 for the ensuing year. Probably fifty-five thousand hands would go up with the answer "It can't be done." Figures *do* reach a point where they do not sink into the ordinary mind. On the other hand, if the speaker would ask each individual employe to save \$3.65 for the year, or one cent a day, there is no doubt that everyone would agree he could and would do it. There is no difference between \$3.65 per day and \$219,000 per year. Take 60,000 employes saving ONE CENT per day each; this equals \$600; multiply this by 365 and you have \$219,000. See?—it can be done!

Will YOU save your ONE CENT per day, at least, for the next year? Make it ten cents or more if you can, but if you will save the ONE CENT, the total will be a very respectable amount, and will at least be a step in the direction of meeting the desire of our president that we "STOP THAT LEAK."

## Other Contestants

Other employes who submitted excellent articles in the competition described on this page are:

G. A. Seithman, second operator, Erie Junction, Lima, Ohio; M. W. Jones, secretary to superintendent, Weston, W. Va.; E. A. Wendt, Grain Elevator Department, Mt. Clare, Baltimore, Md.; T. E. Reese, chief clerk, Mail Traffic Department, Baltimore, Md.; John A. Rupp, Office Assistant Comptroller Deverell, Baltimore, Md.; R. T. Everett, building engineer, Cincinnati, Ohio; R. G. Everett, operator, Moundsville, W. Va. and Jas. Gillooly, operator, Tower B., St. George, S. I., N. Y.

## J. C. Wilkins, Inspector Fuel Service, Makes Prize-Winning Comment on January Issue

*And Suggests that Many Employes besides Firemen Can Help Save Coal!*

ON page 15 of the January MAGAZINE a prize was offered to the employe sending in the best answer to the question: "What is the most helpful article to the Baltimore and Ohio Railroad and its employes in this issue, and why?"

We were particularly glad to be able to secure as the judge in this contest General Manager E. W. Scheer, who is always willing to respond to a call of this kind.

The prize offered has been won by J. C. Wilkins, Jr., inspector, Fuel Service, Chillicothe, Mr. Scheer considering his the best paper submitted. Mr. Wilkins' paper was written in such a manner as to command the attention of all employes, and brings out in a clear and concise manner something that will contribute much to the education of those who handle our fuel, the result of which may mean the direct saving of a large sum of money annually for the Railroad.

Mr. Wilkins' article follows:—

Editor, Baltimore and Ohio MAGAZINE:—"What is the most helpful article to the Baltimore and Ohio Railroad and its employes in the January issue, and why?"

The cartoons:—"The coal bill and the Yard Engine Hour," and, "The Unseen Load," are, in my opinion, the most helpful articles to the Baltimore and Ohio Railroad. But, to the average employe, this may not seem plausible.

### Reasons

We are now making a "Stop That Leak" drive. Suggestions are being made how to save clips, fasteners, rubber bands, pencils, erasers and hundreds of little things.

With a few exceptions no mention is made of one of the largest, if not the largest, of transportation expenses. THAT'S COAL!

When saving coal is mentioned to the average employe, he immediately thinks of the fireman, which is wrong. A fireman handles coal by the scoopful, and, as pointed out by the "Coal Bill and Yard Engine Hour" article, he can "Cut The

Coal Bill," by using fewer scoops per hour and per engine mile. BUT, think of the:—  
**Switch Tenders, Towermen, Operators and Dispatchers!**

Do you appreciate what it means to the coal pile when you unnecessarily stop or slow down a train? Do you realize that each unnecessary stop made by a heavy freight or passenger train, represents a fuel loss of from 500 to 1750 pounds of coal, depending on weight of train, length of stop, and the grade conditions?

Do YARDMASTERS, CHIEF DISPATCHERS and TRAINMASTERS appreciate the importance of dispatching trains at the most opportune time, instead of ordering trains to be started from terminals, as power becomes available, practically regardless of conditions at the initial, intermediate or final terminals and that every hour's delay means a fuel waste of about 600 pounds coal?

Do CAR INSPECTORS and REPAIRMEN recognize that failure properly to lubricate engine and car journals, causes fuel waste? After seeing the "The Unseen Load," how many made special effort to see that box car doors were closed before train left the terminals?

Do YARD CLERKS, BILLING CLERKS, CLERKS in other offices, AGENTS, Maintenance of Way men, men in charge of stationary power, heating and pumping plants, realize what they can do and should do towards saving of fuel?

Do PASSENGER TRAIN CREWS realize how much coal is wasted by overheating coaches, beside making it uncomfortable for the passengers?

Do FREIGHT CREWS realize the appalling losses in fuel, labor and material which follow defects, caused by air hose damaged by being pulled apart, instead of separated by hand?

### Does Familiarity Breed Contempt?

Coal to our average employe, is just a common commodity, like sand, gravel, ballast, etc. Most of them see thousands of tons of it every day. This fact makes it difficult for them to realize the need of saving any of it

### What the Maintenance Winners Teach Us

It is a great pleasure to publish in this issue of the Magazine, pictures of some of the supervisors and foremen who won prizes for best track conditions during 1922. More of these and more of the brief stories of "How They Did It" will appear in future issues.

A winner is always an interesting person—but here is the special interest connected with these stories: Practically all of the winners gave full credit to their men for helping them win the prizes and most of them shared their prizes in some way with their men.

For instance, Supervisor Hanna, Connellsville Division (who, incidentally, won the Supervisor's Prize of \$100.00 for the third consecutive time) gave \$5.00 to each of his 18 section foremen, and besides had 16 of them (the other two were ill) as his guests for dinner and the theatre.

There isn't a finer lesson that could be noted up and down the line on the Railroad—the lesson of the obligation of the officer to the subordinates who help make him successful. Infrequently this obligation is overlooked and instead of the "we" spirit, there creeps into unpleasant notice the "I" spirit, which is a trouble maker and false in its premise. For a little careful thought will reveal the undeniable fact that no matter how much of a genius a gang, department or division head is, his success can only be attained through the unswerving loyalty and constant teamwork of his assistants all down the line.

Let not this lesson be wasted! Let us take the stories of the winning supervisors and foremen to heart and, at all times and in all places, remember our obligation to those who help us!

What finer thing than for a department head, great or small, to make it clearly understood by all of his subordinates that anything which they suggest or do, or any especially creditable act of theirs, will be so handled that they will get full credit for it. Of course, we must have supervision and investigation, but after these have been completed, let us proclaim up and down the line that the man who is responsible for the new idea or the especially

fine piece of work, will get the credit for it which he so richly deserves.

All praise to the winning Maintenance men who saw to it that their helpers received their share of credit and of reward!

### Are You a Member of the Safety Last Club?

Have you read of the organization of the Safety Last Club? The daily papers said a good deal about it during the forepart of March and, but naturally, also ran in subsequent editions under big headlines the news of the tragic death of one of the incorporators—one "human fly" who attempted once too often to climb the front of a big building.

We have no quarrel with the Safety Last Club. If certain dare devils choose to make big money by risking their lives and to increase their remuneration by the kind of advertising that would come to them by affiliation with this club, it is their business. Evidently we like and are willing to pay to see such exhibitions and as long as the price of admission is forthcoming, someone will be ready to put his life into the balance for it.

There is none on our Railroad so foolish as to deliberately join a Safety Last Club. Conversely, however, there are not a few who would be eligible—those few who, despite their knowledge of the terrible consequences of taking risks, continue to do so day in and day out; men who have seen comrades lose an eye because they have not worn goggles—and yet refuse to wear them themselves; men who get on the pilot of a locomotive as it is approaching them—and know the risk they run every time they do it; men who do not clear all running tracks when trains are going by; men who in all of the hazardous jobs on the Railroad, refuse to profit by the unfortunate example of others who have run the risk and paid the penalty; and who deliberately choose the risky way.

Happy the day when we can say that we have no men eligible for the Safety Last Club on the Baltimore and Ohio! Come on, men, let's get into the spirit of Safety First!

### The Human Problem

Railway engineers are masters in solving the physical problems of transportation. They have done very well indeed in that. But the most difficult problem of the transportation or any other business is not physical. The really formidable problem is the human equation. If mind and heart were amenable to the principles and rules of physical science as they are applied in solution of physical problems, the engineering department would be the department in which the problem of the human factor could be solved. But it is not so. The human equation, overshadowing every other in all the relations of life, requires for its solution (and it must be solved) a department of religion. Its solution will be found in the teachings of Jesus Christ equally assimilated and jointly practiced by employer and employe. There is no hope in the rule of might uncontrolled by right. "The fear of God is the beginning of wisdom" and the secure foundation for industrial association and activity—*From address of Pres. J. L. Campbell, A. R. E. A. Convention, Chicago.*

# Homilies of the Hudson

## Beauty—What is it?

Beauty contests are the order of the day again, or still, as in the days of the *Iliad*. Only there are apparently more beauties now than when Helen's was

—the face that launched a thousand ships

And wrecked the hapless towers of Iliion."

Witness the number of contestants.

It is not a matter of one-two-three these days, to tag the prize winner. The lineup of the claimants is long and they are all beautiful—in the eyes of at least someone; and hasn't that someone as good a right to his opinion as anyone else. Standards? Bosh! The measurements of the Lady de Milo and the colorings of Titian and Tintoretto do not enter into modern beauty competitions. Beauty comes in many shades and many sizes. Witness the published pictures of the competitors. The retousse nose is as much in evidence as the Greco-Roman catch-as-catch-can type, and the Semitic is often predominant; the soft-curved five-foot-nothing size is offered side by side with the five-ten-and-a-half; one as alluring as the other. Surely, as Byron said (or didn't) any man could be happy with either, were the other dear charmer away.

But to pick a winner from among a thousand—that takes courage! Pity the pickers. No matter whom they pick there will be nine-hundred-and-ninety-nine anathemas on their heads and as many uncomplimentary adjectives qualifying their tastes and mentality.

Lately these beauty contests or "conflicts" have developed from *in toto* to *ex parte* exhibitions, and we are treated to beauty bust, leg, back or bigtoe contests, all very interesting and edifying, no doubt. Those who care may stop to question whether this exploring of anatomical perfection will lead and where it will end. I don't care. I am not a reformer, but an observer of the "passing show" and "rise to remark."

## "Stop That Leak!"

If there is anything that has not been said about "Thrift" and "Savings" I don't know what it is. And yet I would like to say something.

It is claimed that there is virtue in repetition, so whatever has been said before in this good cause will bear saying again. There is power in repetition. A drop of water will wear a hole in a rock, "not by its force but by continued dripping;" a cork suspended by a hair will by continued tapping cause a suspended iron bar weighing a ton to vibrate and finally to swing like a pendulum; these are demonstrable facts.

The fall of ancient Carthage is attributed to the censor Cato's persistently reiterated cry "*Delenda est Carthago*" (Carthage must be destroyed); and Doc. Emile Coue, a popular apostle of the present time, tells us that by repeatedly assuring ourselves that "every day in every way we are getting better and better" we will succeed after a while in "fooling" ourselves into believing it, and finally accept it as a fact. That accomplished—all is well.

M. Coue is not the first one to teach that doctrine; neither was Mrs. Eddy. The scientists call it "auto-suggestion." It is a psychological phenomenon the existence of which is admitted and which is sometimes offered by the M.D.'s as an *aliquod* when no other diagnosis will fit the "case." Be that as it may, it

cannot be disputed that repeatedly hearing the same thing will make one remember it, and might make one think about it. If the slogan "Stop That Leak" will accomplish that much it has paved the way to a better understanding, which is what is needed, for nearly all "leaks" are due to thoughtlessness.

It is easy to learn the prattle about "little drops of water and little grains of sand" and other such kindergarten aphorisms, but is only after the truths of them have been conceived and accepted that their worth becomes evident and is turned into practice. Make the thoughtless think, and the "S.T.L." drive has been well worth while. There are, of course, those who are about as impressive to educational propaganda as a duck's back is to a rain shower; they belong to a group whose educational fundamentals have been neglected for centuries before they were born. However they are comparatively few, and small, and negligible.

## Do Right and Fear Nothing

Outside of our own selves, that which interests most of us the most is that which mystifies us. Puzzles, riddles and tricks fascinate us; detective stories, spooks and spirits charm us while they thrill us; and we become enchanted by contemplating The Infinite.

Mind is inquisitive. Our children bring their problems to us. We are trying to work out our own problems by questioning, by building hypotheses and by "wondering." The common expression "I wonder—" is indicative of this desire to know, to solve puzzles.

The inquisitiveness of mind is persistent. It will have no negatives; it is searching for the positive. Reason may decide that "it can't be done," but that will not dismiss the question. It will not down. As a drowning man will clutch at a straw, well knowing that the straw will not support him, so man's mind will grasp and release one hypothesis, theory or "philosophy" after another, and sink with them. The philosophy that has proved the most satisfactory to me is the one I learned at my father's knee: "**DO RIGHT AND FEAR NOTHING.**"

The efficiency-expert died and was being carried to his presumably last resting place on the shoulders of six sturdy fellows, when a voice from the coffin interrupted the proceedings with the suggestion:—"Put the box on wheels and lay off five men."—*Exchange.*

A drygoods store advertised a sale of "Union suits at one half off." A wag attended the sale to learn which half.—*Exchange.*

## M. W. Jones Becomes Assistant Editor of Our Magazine

ON March 19 M. W. Jones became assistant editor of the Baltimore and Ohio MAGAZINE, with headquarters at Mt. Royal Station, Baltimore, Md.

Mr. Jones entered the service of the Company in November, 1919, as secretary to superintendent of the Charleston Division. His whole railroad experience is rather varied, covering over ten years in different capacities such as: conductor, operator, agent, secretary to vice-president, secretary to president, chief train dispatcher, trainmaster, and others, with the Quaquai and Quito Railway, Ecuador, South America.

Mr. Jones was born in England, September 19, 1879, and has traveled extensively, having made four or five trips across the Atlantic, visiting England, Scotland, France and a number of other European countries. He has also been over the larger part of Canada and the entire United States, and having been so long located in South America, has visited a number of countries in the northern part of that continent.

Mr. Jones almost literally made for himself the position that he now fills on the MAGAZINE. For some time it had been felt that an assistant who had a thorough knowledge of railroad operation, would be invaluable, and our assistant editor seems to have been made for this work.

He has been one of the best correspondents that the MAGAZINE has ever had, tireless in securing the most interesting photographs and personal items available on his division and combining them with current notes of more strictly Railroad moment in such a way as to make the

MAGAZINE a real factor among the employes that he was representing. He won first prize as MAGAZINE correspondent in 1921, had been the winner of first prize in a safety contest before that and, besides his divisional notes, has been a prolific and valuable contributor with articles covering many railroad problems.

Mr. Jones will cover assignments for the MAGAZINE that deal especially with operating problems, where his wide operating experience and skill as a writer will fit him to give the MAGAZINE and its readers the best stories possible. For a time also, he will be on line a great deal, investigating and reporting on the many suggestions that are coming in in the "Stop That Leak Campaign." Other interesting ways in which he will touch the work of the Railroad are in mind and will be developed as opportunity permits.

Shortly after Mr. Jones took up his new work, a story was received from C. W. Dixon, car distributor and present MAGAZINE correspondent of the Charleston Division, concerning him—as gracious and pleasing a tribute as any man could want, and one, which, incidentally, the assistant editor will not have seen until he reads it on this page. Mr. Dixon wrote viz:

### A Man We Knew

It all began when he dropped in on us at Gassaway, W. Va., that beautiful spot on the Elk River, surrounded by some of the hills that have made our fair state famous. He quietly went to work in our midst, and as he became familiar with his various duties and with the surroundings, we began to know him, or at least we thought we did.

He seemed to be looking for a little more to do than was just ordinarily required of

him; then we knew him better. But it was not merely more work that he was looking for—he was looking for someone to help; then we knew him still better. It was still later, when, as mortal folks do, some of us were disabled and at times confined to our homes. He never missed an opportunity to either call in person or by telephone as to the welfare and comfort of the absent one; it was then we thought we knew him best.

Through it all he was ever an alert, faithful and efficient worker, and the number of friends he made while in our midst was not exceeded by the number of persons with whom he came in contact. He left us Thursday, March 15, to become assistant editor of our MAGAZINE, and is now located in Baltimore. All his friends who could, some representing those who could not be there, gathered in the Superintendent's Office on March 15, at which time he was tendered a very fitting present—the material representation of appreciation for his services and fellowship among us.

The token of appreciation that could not be expressed in any other way was taken care of by our superintendent, and was expressed in a fitting tribute of words. The honored one was so unusually moved as then to reveal his true self to all present—and then it was that we *knew* we knew him best of all.

Jones is the man we have had in mind all the time, M. W. Jones, former secretary to the superintendent and division correspondent for Your MAGAZINE. While the story began in Gassaway, W. Va., the end, as we now know it, was in Weston, W. Va., the place of the present divisional headquarters.

The opening events of the second story take place in Baltimore, but Jones and the Lord only know the ending thereof; we will leave that to take care of itself.

In passing we want to say a word about Mrs. Jones, who was of the same likeable (loveable, as applied to the sex) nature as her husband. She has meant much in a countless number of ways to all who knew her. She was charming of manner and was held in the highest esteem by her many friends. We wish them both much success and happiness in their present surroundings. You say we should visit them in their new home if we have so many good things to say about them? We will!

## Are Your Men Getting The Magazine?

Reports reach the Magazine office from widely separated points that employes entitled to the Magazine are not getting it. The division engineer on one division recently checked up and found that instead of needing the number he had been getting—240—he needed 750, in order to give only two to each gang. The illustration should be well taken.

The success of the Railroad must be built on teamwork and if all members of the team do not know what the Railroad is trying to do it cannot function properly.

The Magazine is the instrument chosen by the Railroad to let all its employes know what it is trying to do and how. It takes them into its confidence and asks their help.

Supervising officers will do their part by checking their distribution to their men and seeing if a reasonable number of Magazines are supplied to them.

Shortages on line can be reported to division superintendent, who in turn can write the Magazine direct. We solicit the help of all officers and employes in this connection.

Miss Gladys Farley

John Houston Graham, late chief clerk, Freight Traffic Department, Baltimore

### Sudden Death of John Houston Graham

THE sudden death, early on the morning of April 4, of John Houston Graham, chief clerk, Freight Traffic Department, Baltimore, Md., following a heart attack, came as a great shock to his many friends and associates.

Mr. Graham was held in high esteem by all with whom he came in contact, and his influence will be sorely missed, particularly by the Baltimore and Ohio Traffic Class, which in a large measure owes its success to the untiring efforts he put forth in its behalf. In this connection, it might not be amiss to mention that the night before his demise, Mr. Graham attended the final meeting of the Class for the 1922-1923 season.

Mr. Graham was born at Boland, Pa., on January 2, 1882. He entered the service October 1, 1900 as telephone operator at Bessemer, Pa., and by conscientious and hard work, worked up to position of chief clerk, General Freight Office, Pittsburgh, from which position he was transferred to the Freight Traffic Department, Baltimore, March 1, 1920. His lamented death brings to a close a record of twenty-two years of faithful service with the Baltimore and Ohio. He was buried at Braddock, Pa., and leaves surviving him, a widow, Mrs. Gertrude Graham, and a son, Ralph, aged fifteen years.

### Miss Farley Wins Promotion

MISS GLADYS V. FARLEY has been appointed as assistant to Miss Mabel Gessner, woman passenger representative of the Baltimore and Ohio, effective April 1, 1923.

Miss Farley was born in Lawrenceville, Va., and was educated at Norfolk and Cambridge. She came to Baltimore about six and one-half years ago, and took a temporary position with the Company in the Division Accountant's Office at Camden Station. She was later transferred to the

### Welfare Department

office of the Operating Vice-President, as a statistical clerk, and was employed here until her recent promotion.

Concerning her new work Miss Farley said: "I like my position in the Vice President's office; it seems so much like a family affair; every one is so friendly and sociable. But my new work will give me a greater opportunity, and of course a much broader field of endeavor. I shall do everything possible to make my work with Miss Gessner successful, and I am sure that I shall like it."

### J. C. Wilkins, Prize Winner

(Continued from page 17)

How are we going to get them to realize that a ton of coal is now worth so much, that no reasonable effort should be spared to save it? The responsibility, very largely, for the results to be achieved, are up to you, Mr. Editor, and the officials of our Company. It is up to you to see that coal

is mentioned on your "Turn Table" page and, especially, in the personal columns of each division, and the individual personal attitude of the officials directed towards setting an example to everyone—*THAT COAL MUST BE SAVED.*

President Willard, in our December issue, calls the attention of every employe to the necessity of economy. Is there any other item in which the opportunities offer as quick, sure and large a reward in decreased operating cost as in coal? *LET'S GET TOGETHER* and earn it, not overlooking the fact that the saving of clips, fasteners, etc., helps, as illustrated in the story of "A Bar of Steel and the Cork."

## SAVE COAL!

## Baltimore and Ohio Glee Club Ninth Year-Spring Concert

*An All Glee Club Concert—Numbers by the Club,  
Selections by the Quartet, Solos by Individual  
Members—Dancing*

Hobart Smock, Director

Sylvan Levin, Accompanist

The Baltimore and Ohio Glee Club will give the Spring Concert of its ninth year on the night of May 25 at the Maryland Casualty Concert Hall, 40th Street and Cedar Avenue, Baltimore. The Club has also engaged the magnificent ball room adjacent to the auditorium where dancing will be enjoyed from ten o'clock until midnight.

The program for this concert has been chosen from the wide range of selections which the Club has sung during the nine years of its existence, and will contain many rollicking and melodious "glee" numbers, with such favorites as "Swing Along," "Sandman," "The Viking Song," "Laughing," "Miss Lindy."

Friends of the Club will be glad to know that Mr. Sylvan Levin, accompanist, will again be the piano soloist.

Bohl's Orchestra will play for the dancing.

Tickets at \$1.00 each may be obtained from any member of the Club.

The Club confidently believes that this Spring Concert will be the most popular one ever given and urges its friends to make prompt reservation of tickets. The number of tickets distributed will be limited to the capacity of the concert hall and no additional tickets will be on sale for the dance.

*Note:*  
 All puzzles published in this department will be defined, as far as possible, from the New Standard Dictionary, edition of 1920. It is permissible to use both geographical and biographical words in the construction of puzzles, but when such words are taken from any authority other than the New Standard Dictionary, the name of such authority must be stated at the end of the definition, in parenthesis. ("obs"). Obsolete words will be marked at the end of the definition thus—"("var)". Variant spellings of a word must be marked at the end of the definition thus—"("var)". Address all communications concerning this department to G. H. Pryor, Room 800, Baltimore and Ohio Building, Baltimore, Maryland, and mark the envelope "Puzzles."

**New Puzzles**

1. BEHEADMENT (6)  
 When Sandy smashed his toe,  
 He called Don to his side,  
 And bade him for the Doctor go  
 As fast as he could ride.  
 "I can't ride in that THREE"  
 Don sulkily demurred,  
 "Then ride in your FOUR car," said  
 he,  
 And grinned, by humor stirred.  
 Young Donald heaved a sigh,  
 It was an awful ONE,  
 But fast as any TWO could fly,  
 Or any rabbit run,  
 Away to town he sped  
 The Doctor took on board,  
 And dumped him by his father's bed,  
 Without another word.  
 His visit at an end  
 The Doctor donned his hat,  
 "It was an awful THREE, my friend,  
 But Don 'na minded that."  
 Witney Crossing, N. Y. Spica

2. RHOMBOID  
 Across:  
 1—(Surg.) An instrument for scraping bones;  
 2—The primitive signification of a word;  
 3—Intention;  
 4—Muses of lyric and erotic poetry;  
 5—One who remains in a seated or settled position;

**CORRECT** solutions were received from the following:  
 S. T. Udent, Ben Franklin, N. Jineer, L. M. N. Terry, Atlas, Primrose, Pearlle Glcn, The Major, J. F. Donovan, G. Hartman Pryor, Martelia, L. E. Phant, Comrade, Baltimore, Md.; Wick-o-cincy, Gem, Cincinnati, Ohio; P. M. Pennington, Cumberland, Md.; Gee, Asheboro, N. C.; Spica, Witney Crossings, N. Y.; Tunste, Joaquin, C. Saw, St. Germaine, New York, N. Y.; Towhead, Lafayette, Ind.; Ralph, E. Stroudsburg, Pa.; Mentor, Chicago, Ill.; Dan D. Lyon, New Florence, Pa.; Gemini, Poly, Brooklyn, N. Y.; K. T. Did,

6—Pertaining to any membranous sac or vesicle.

Down:  
 1—A letter;  
 2—An Archaic contraction;  
 3—(Mus.) As it is written;  
 4—A river in N. England;  
 5—Descendants of Mohammed through Fatima his only daughter;  
 6—Popular form spoken by uneducated Greeks;  
 7—Having the flavor of nuts;  
 8—Dotards;  
 9—To give a specific or desired position to;  
 10—Abbreviation for right;  
 11—A letter.  
 Baltimore, Md. S. T. Udent

3. CHARADE (8)

PRIMAL the distant hill  
 My fancy loves to blow,  
 Pursuing Thedom's thrill.

Now as I push my quill,  
 Beckoning visions glow  
 PRIMAL the distant hill.

Obedient to their will,  
 I'll TWO, for weal or woe,  
 Pursuing Thedom's thrill.

Nay, 'tis no buxom Jill  
 Calling in accents low,  
 PRIMAL the distant hill;

'Tis there lies Puzzleville,  
 And kindred folk, I know,  
 Pursuing Thedom's thrill.

A force drives on until,  
 To WHOLE it I must go  
 PRIMAL the distant hill,  
 Pursuing Thedom's thrill.

Cincinnati, Ohio. Wick-o-cincy

4. DIAMOND

1—A letter;  
 2—To enclose;  
 3—To elevate;  
 4—Common;  
 5—A drink made of honey flavored with mulberry juice;  
 6—A rodent;  
 7—A letter.  
 Asheboro, N. C. Gee

5. ANAGRAM

O, all the brilliant puzzle vets shine, and I, but a green one, come in too.  
 Baltimore, Md. N. Jineer

6. INVERTED PYRAMID (N. I.)

Across:  
 1—Scrofula;  
 2—A leaf of the tea plant;  
 3—To ejaculate;  
 4—In law, a friend;  
 5—A letter.

Down:  
 1—A letter;  
 2—An indefinite nominative for an impersonal verb;  
 3—A bill;  
 4—A festival;  
 5—A falling off;  
 6—Weird;  
 7—To put into a vat;  
 8—In case that;  
 9—A letter.  
 Worthing, S. Dak. Sherlock Holmes

7. TRANSDELETION (6)

The little PRIMAL ate the ALL,  
 Which Santa left behind.  
 This yellow, tasteful, wholesome ball  
 He ate both meat and rind.  
 Corinth, Miss. Fred Domino

8. RHOMBOID (N. I.)

Across:  
 1—An easy, cautious trot;  
 2—Verdigrises;  
 3—Mexican dishes made of crushed maize, mixed with minced meat, seasoned with red pepper, dipped in oil, and steamed;  
 4—Shaddock;  
 5—Small ridges or mounds of earth;  
 6—Flesh so corrupted as to be unfit for food;  
 7—Cuddled up.

Down:  
 1—A letter;  
 2—A linguistic stock of Gold Coast Negroes;  
 3—To obtain;  
 4—A snare;  
 5—The common talk;  
 6—Written in oghams;  
 7—A native of Toledo;  
 8—Cellar (Obs.);  
 9—Flies aloft;  
 10—To adapt;  
 11—The Sun;  
 12—Not (Archaic);  
 13—A letter.  
 Brooklyn, N. Y. Gemini

9. SQUARE

(All New International)  
 1—A fisherman's long leather apron (Local U. S.);  
 2—In New Zealand, the sapindaceous tree, *Dodonaea viscosa*;  
 3—To struggle in resisting (Obs.);  
 4—One who salutes or gives place (Obs.);  
 5—(Eastern Ch.) A litany said after the Gospel before Mass;  
 6—One who looks askance or obliquely.  
 Mulkeytown, Ill. Todd

10. REBUS (7)

CO  
 S  
 A horny-handed son of toil  
 Was that old hustler, Farmer Doyle;  
 He'd rise while yet the dawn was gray  
 To cut his corn and wheat.  
 Today there is no hint of soil  
 Upon his hands—he drilled for oil

To wealth he's found a shorter way,  
 He sits and cuts COMPLETE.

St. Louis, Mo. Gi Gantic—Molemi

11. OCTAGON

1—A cover;  
 2—To delay;  
 3—A tin vessel;  
 4—A commodity;  
 5—A maxim;  
 6—Barks as a dog when hurt;  
 7—A snare.  
 Baltimore, Md. Ben Franklin

12. BEHEADMENT (6)

A boy should never ONE with a TWO  
 He will do so, but don't you know  
 He's liable to do so once too often  
 And put a playmate in his coffin.  
 Cumberland, Md. P. M. Pennington

13. PENTAGON

1—A letter;  
 2—A portion;  
 3—The yam bean (Phil. I.);  
 4—A fine, thin, white fabric made of flax or linen;  
 5—(Mil.) A small cannon mounted on a swivel, etc.  
 6—(Bot.) A rather large genus of American fabaceous herbs or shrubs with pinnate leaves and spikes or racemes of mostly purple flowers.  
 7—(Zool.) Any of several larval salamanders of the genus *Ambystoma* found in the mountain lakes of Mexico and the Western U. S., etc.  
 8—Culum (Obs.);  
 9—Hebrew measure; six cubits.  
 Baltimore, Md. Comrade

14. DIAMOND

1—A letter;  
 2—(Slang) A policeman;  
 3—(E. Ind.) The consort of a Raja;  
 4—(Slang) Loud, banging noises;  
 5—To develop into a cancer;  
 6—The state of being content;  
 7—Trees yielding pears;  
 8—Covers with enamel;  
 9—(Prov. Eng.) Leaders;  
 10—In scholastic philosophy, the abstract conception of being;  
 11—A letter.  
 Baltimore, Md. Red Crow

15. CHARADE (9)

In Eastern climes,  
 In olden times.  
 No cool, deep grave had e'er entombed her;  
 When her Lord had perished  
 The wife he'd cherished—  
 Fate to this fiery furnace doomed her.  
 I twang upon the light guitar,  
 But music scarcely could you call it  
 Sensitive nerves such sounds abhor  
 Nor would they care what fate  
 Befall it.

## Aunt Mary's Story of Newark Veterans Eighth Annual Banquet and Dance

Newark, Ohio  
March 9, 1923

Dear Niece Jane:

I hope as how you've got all your weekly mendin' done so as you'll have time to set down and listen to all I've got to tell you about the Veterans' party that they held here last night. These Veterans do travel so fast, Jane, that it aint possible to keep track of 'em, and when it comes to the Newark Veterans they're swifter than humming birds.

There was 34 of the Veteran folks what went from Baltimore on Wednesday night, Brother Sturmer in the lead and the ladies a-hanging on to his coat-tails.

Do you recollect the first time you ever took a ride in a sleeping car? Well, then, you know jest how Sister Espy felt. The brother in charge had issued the order that anybody who was caught snoring should have a clothespin put on to his or her nose, but it just happened that the grand president himself snored so loud that nobody else was heard. Sister Sturmer had a good time, too; in fact next morning when the waiter brought her a grapefruit for breakfast it was so big she thought it was a pumpkin.

Some of the sisters brought their husbands along; others brought their husbands' photographs to show to any Newark bachelors or widowers who might insist on dancin' with 'em.

We was awful sorry about the accident that happened to Mrs. "Safety Jack" Perin, but 'tis said (but don't say I said so) that she went and got her thumb mashed because she had heard so much about handsome Dr. Charlton and she wanted to see him. Well, she managed it pretty well.

Sister Thornton got the gold medal for eating the most; Sister Leonard ran a close second, eating two breakfasts on the first morning. Sister Wall came out in a neck-to-neck race with Brother Hanson, the official chaperon of the party. The Smiles Contest was shared equally by Brother Bentley, Brother Allen and "Safety Jack" Perin. The latter brought along his checkers and succeeded in inducing a poor old lady to play him a few games. Then he turned about and beat the poor old soul four games out of five.

Arriving at Newark on Thursday afternoon a delegation of Newark folk, led by Sister Howard, grand president of the Auxiliary, and Brother Moriarity, president of the Newark Chapter of Veterans, met us and we all posed for our photographs. It was a jolly meeting to be sure. Jane, you oughter seen them Veterans comb out their moustaches and the ladies smooth down their eyebrows! Jest look at the picture and you can see for yourself.

We all went in cars (I went with Sister Moore and Sister and Brother Robosson

in Sister Cooper's car) to the wonderful Weiant Gardens. Well, Jane, mebbey them aint some gardens! They have got cucumbers growing almost as high as Washington's monument. I couldn't believe it, Jane, 'cause you and me always let 'em run along on the ground. No, sirree, there they was hanging jest as cool and serene above our heads. I've got a notion to plant mine next year where they'll run up on the kitchen window and all I got to do is to reach out and get a couple when I want 'em for dinner.

That power plant there at the gardens is something fine. The engineer what designed the whole thing showed us all around and we poked our noses in the fire boxes and down the coal chutes and when we couldn't go no further we decided that that man knew what he was doin' when he built it.

When we got back in town again we learned that Mr. Jess Walters, of the Arcade Hotel, had turned over his parlors and rest rooms to the Veterans for the day. Wasn't that fine? Most of the visitors went there to stay; I went home with Sister Moore, Mrs. Elroy Moore, you know, and I had a lovely visit there.

At six o'clock everybody gathered at the Plymouth Congregational Church for the big feed. And some feed it was! The ladies of the church served it. There was chicken pie that fairly melted in your mouth, creamed potatoes, Parker House rolls, green peas, cold slaw, celery, jellies and preserves, ice cream and most delicious angel food cake, and coffee. I'll bet that makes you hungry to read it.

Brother Hanks, pastor of the church, pronounced the invocation and everybody fell to. The Ladies' Auxiliary presented to the visiting women officers bouquets of frisas and pink roses, all tied up in pink ribbon. Brother W. W. Wood, chief of Welfare, argued all evening trying to get Sister Wallburg to give him her bouquet, but 'twasn't no use. Brother Wood and Brother Hanks also had a little friendly argument. Finally Brother Wood said that his father was a Methodist preacher.

"Ah," says Brother Hanks, "well, it happens that one of the finest men of my congregation is the son of a Methodist minister."

The Newark Veterans and Their Wives Smiled a Welcome—

"Indeed," declared Brother Wood, tapping himself on the chest, "Methodist ministers' sons do make *wonderful* men, don't they?"

Well, Jane, guess what. It was Sister Sturmer's birthday and the Newark Ladies' Auxiliary didn't do a thing but present Sister Sturmer with a gift of the lovely bowl of pink roses and sweet peas that decorated the center of the table, bowl and all. Cut glass it was, too. Sister Howard made the presentation speech, and Sister Sturmer was that happy all she could do was to smile sweetly and say "Thank you one and all."

Then there came another surprise. Oh, Jane, if you could only have been there to see Brother Moriarity present the 50-year service buttons! Conductor John Lamb, who has been serving the Baltimore and Ohio for 50 years and who is still going; Baggage-master Joseph Workman, who has been 52 years in service and still going, and Pumper Russell Kyle, 61 years of service at Union, were the ones who got the buttons. And just to think, Mr. Kyle is still working, too.

After the eats we all went up into the Auditorium where they had a lot of speaking. Superintendent Kruse was there with Mrs. Kruse, Trainmaster Batchelder, Assistant Trainmaster Wyatt, District Engineer Carver, Master Mechanic Cooper and the Missus; the Garveys from Wheeling, Sister Wallburg, from Lima; Sister Hopper, from Garrett, Indiana, and lots of other people were there. It was a big surprise to see E. B. Russell, assistant to General Manager Begien, from Cincinnati.

Brother Moriarity did the honors and introduced the speakers, the first of whom was Grand President George W. Sturmer.

Mr. Sturmer expressed his appreciation for the invitation to Newark and thanked all concerned on behalf of the Baltimore party. He paid a compliment to the state of Ohio, the birthplace of so many presidents, and he told of the progress of the state. He spoke of the expansion of the Baltimore and Ohio Veterans' Association, and of the fine interest taken in the organization by President Willard and Vice President Galloway. He told of the work of the employes in the business-getting drive of last year, and closed by paying a splendid tribute to his wife and by

extending an invitation to all the Veterans and their wives to visit Baltimore.

Mrs. J. M. Garvey, grand vice president of the Ladies' Auxiliary, was introduced as the "silver-tongued orator of Elm Grove."

Mrs. Garvey launched forth into a delightful little address, in which she scored one for the women, saying that as Eve became Adam's auxiliary, so the weakness of man always demands a woman as his helpmate, and to this end the Ladies' Auxiliary had been formed.

"We love them all," said Mrs. Garvey, "and though we cannot bestow upon them that beloved title, 'Mother Machree,' still we love every gray head here—and the bald heads, too."

"When I was a little girl," she continued, 'my father was a conductor. It was then that I thought that he owned the whole railroad. Later, when I got to be a big girl and chose as my life's partner an engineer, I thought that engineers owned the whole railroad. But when I joined the Veterans Association I found that while both conductors and engineers are important in their own ways, that after all, each of us is so insignificant a part in the big Baltimore and Ohio, that it is only through cooperation, consideration, and by working with the management that we can accomplish the big things for the Baltimore and Ohio.'

Brother Moriarity then read telegrams of regret from President Willard, Vice President Galloway, General Manager Begien and others who were unable to be present. Everybody was sorry to know that President Willard and the others could not be there. Mr. Willard had an important I. C. C. meeting, and Mr. Galloway and Mr. Begien could not come because of illness.

Superintendent Kruse was next introduced. With a jolly smile he began:

"Veterans, Fellow Workers, 'Bill' Lamb, 'Joe' Workman, Russell Kyle, and all the rest of the 'Kids:' I am glad that when your president limited the time for speaking to five minutes that he did not limit the eating time.

"When we see men like these who have been in service for 50 years and more, it means that we have a good company, and that these are good men or they wouldn't stay. (Fifty years! Why I didn't think that 'Bill' Lamb was that old!)

"We do have a good Company and we do have good men, and the indications are that if we keep our feet on the ground we're going to have a prosperous year this year.

"I am proud of our president, and I believe that all of us feel the same way. A railroad president may be the brainiest man in the world, but he cannot carry out the policies which he has worked out if we don't pin our faith to him and help him carry these policies out."

Mr. Kruse also spoke of promotions.

"I can almost tell whether a man is going to pass an examination in train service," he said, "by the training that he has had. Good training always shows in men."

You know, Jane, I think Mr. Kruse must have had pretty good training himself according to the fine things I heard his men say about him afterward. If I had time I'd tell you all he said, but I'll tell you about it when I see you.

Brother J. M. Garvey was the next speaker. He's grand vice-president of the Veterans, you know. Mr. Kruse had been telling a yarn about Brother Garvey dancing 16 dances with a girl down at Wheeling.

"Yes," says Brother Garvey, "I danced with the young lady in question, and—I also danced with her mother."

He spoke of the organization of the Ladies' Auxiliary at Newark; he told something of the history of the Baltimore and Ohio, and he hoped as how we'd all live to see the celebration of the 100th Anniversary of the Baltimore and Ohio. And believe me, Jane, I hope so, too.

Mr. Russell next was introduced. He said a lot of things about why Mr. Begien couldn't get to the party, which I can tell you better than I can write. He spoke about Safety on the railroad; about sanitation and health crusades; the good work carried on by employes and the gospel of health spread by the Medical Department. He says, and I believe so, too, Jane, that every employe should feel it his personal duty to practice and to preach Safety.

After the speeches was all over, we all went up to the Masonic Temple for the dance.

Such a time as we had! Why, Jane, you would a-died a-laughin' if you had seen some of them old Vets throwing away their canes and changing hobbles

And the Visitors, from Baltimore Enjoyed Themselves

© BACHRACH

DR. SHATTUCK (UPPER RIGHT) AND THE BARBARIANS AMONG WHOM HE HAS TRAVELED

1. The Morans made short work of the lion. 2. Greased with butter, smeared with clay, and decked with hats of shell money and head-dresses of hippo teeth, these Kavironda dancers hit up a lively pace in the Ngomas. 3. At the missions the native girls are taught how to make baskets and to weave palm mats. 4. Wykamba "dentists" chip teeth with a rusty chisel and a hammer. 5. This young man has had his teeth chipped until they look like spikes. He now can tear raw meat and is ready to be married. 6. Pygmies hunt the forests for bugs, grubs and rodents. They can shoot in succession four arrows with such strength and speed that the first will still be in the air when the fourth has left the bow

into hops, skips and jumps. And say, Jane, you've seen chief marshalls all dressed up leading a parade down the street, with heralds in front and a brass band followin' them, haven't you? Well, Jane, that's Frank Howard leading the Grand March.

And Sister Howard, she had the world beat in getting chances on the lovely patchwork quilt. Oh, yes, I forgot to tell you about that quilt. Do you remember Sister McManus? I'm sure you do. Her husband was Robert McManus, who was in service for 63 years. Well, she is the one who made the quilt and donated it to the Ladies' Auxiliary. They've had the books out on it since way last summer. Who won it? Why, Sherman Baggs. You remember him; he's the general manager of Emerson's Clothing Store. He's been a lot of help to the Veterans and most everybody was glad to see him get it.

By the way, Sister McManus was there herself. Brother Howard introduced her, and she smiled and bowed to everybody. Sister McManus is 82 years old, too, but not too old to go to a Veterans' party. She was as spry as a lizard. But say, Jane, don't you go and tell anybody I told her age.

There was lots of the old boys there. My, but how my nephews do grow up! "Steamboat" (his right name is John) Adkins was there, all dressed up in a checkered shirt. "Steamboat" began his railroad career in 1880 and didn't stop 'il five years ago. He was walking around saying howdy to all of his buddies. I didn't see him danein' but there's no tellin'.

Sister Helfinger was there at the door, taking care of the money. She carried it around in a trunk, there was so much of it. And Sister Moriarity and Sister Moore and all the others of the Auxiliary were there to help make things as pleasant as possible for everybody.

Miss Hazel Kirk and Miss Cosgrove, representatives of the Newark Advocate, were there to get the news, as also was a reporter from the other daily paper, but I couldn't tell you his name for I didn't see him. Brother and Sister Fletcher from Fairmont kept things going lively for a time.

Now I know that you will want to know the names of those on the committees, so I'll put them at the bottom of my letter. Look 'em over and I know you'll see the names of lots of your old friends.

#### Veterans' Committee

Messrs. William Stewart, Walter Laird, Dave Murphy, William Weiley, E. E. E. Moore, Dan Moriarity, Frank Howard, and William Helfinger, chairman.

#### Reception Committee

Mrs. J. C. Richardson, Mrs. Elmer Wiles, Mrs. Elroy Moore, Mrs. E. E. E. Moore, Mrs. Walter Laird, Dr. M. H. Kohler, F. S. Mahurd, William Meinert.

#### Banquet and Dance Committee

Mrs. James Connors, Mrs. M. Cosgrove, Mrs. C. Mort, Mrs. William Stewart, Mrs. Charles Friel, Mrs. D. Lewis, Mrs. J. Cosgrove, Mrs. E. Powell, Mrs. Charles Markham, Mrs. F. M. Howard, and Mrs. William Helfinger, chairman.

Well, Jane, as I says, I guess them irons is hot enough to iron Ezra's shirt now, and here I've let myself run on like as if I had all day.

Never mind, Jane, I had a wonderful time, anyway. I did miss havin' the

officers from Baltimore there, but I managed to meet a whole lot of new nieces and nephews, and you can bet that everybody enjoyed the party as much as I did.

Write soon and tell me if little John Henry has any more teeth.

Lovingly yours,

Aunt Mary

P. S. They tell me that they fed 409 people at that banquet in one hour and 35 minutes. How's that for running on schedule time?

## Baltimore Veterans Delighted with Dr. Shattuck's First Illustrated Lecture

THE first of a series of illustrated lectures, entitled "The Lure of the Canadian Rockies," which will be given by the famous traveller, Dr. George Burbank Shattuck, to the various chapters of the Baltimore and Ohio Veterans' Association, delighted a large gathering of Veterans, their families and friends, of the Baltimore Division Chapter, on April 2 at Moose Hall, Baltimore.

The singing of "America" by the audience opened the meeting, after which C. W. Allen, president of the chapter, introduced Dr. Shattuck.

Dr. Shattuck commenced his lecture by quoting several verses from the well known poems of Robert Service, while views of the majestic Canadian Rockies, the fertile valleys and plains were thrown upon the screen.

"On no continent in the world" said Dr. Shattuck, "can grander scenery be found than on that of North America. If you want rugged grandeur, go to the Canadian or American Rockies; if you want forests, go to the Maine woods; if you want level country, damp and marshy, go to the Florida Everglades. Our North American mountains equal in grandeur even the Himalayas."

The lecturer took his audience with him on a trip through the mountains, valleys and plains of Canada, while wonderful views were thrown on the screen by Arthur D. Gans of the Safety Department. The pictures were all colored and presented a splendid idea of the beauties to be seen, while the explanation given by the Doctor left nothing to be desired in clarity, interest and thoroughness.

Taking us with him from Vancouver, Dr. Shattuck brought us through the Ottertail Valley, showed us the wonderful Three Sisters and the Bow River, giving us a view of the marvelous Mt. Robson Glacier, and explaining the danger and treachery of the ice to the unwary traveller.

He explained that while the three provinces of Ontario, Alberta and Manitoba are small in area under cultivation, still in a year they produce some four million bushels of cereals. The farmer in these

provinces is gradually replacing the cattle man, and soon the cow-boy will have entirely disappeared. The Canadian Pacific Railway, that marvelous privately owned railway of Canada, which was driven through to the Pacific Coast in the face of untold difficulties, has built a large irrigation dam at a cost of some five million dollars, which has placed an additional three million acres of land under irrigation and cultivation.

Calgary, in the province of Alberta, "the Denver of the Canadian west," was shown to us while the doctor explained that where but a few years past there was nothing, now a thriving town of 75,000 people has been built up. Views of the native Indians were shown, indicating the various occupations of these people, and it was explained by Dr. Shattuck that many years ago the Canadian Government made a compact with these people that they would not be molested as long as the Bow River flows, and they keep the peace. The peace remains unbroken.

The Doctor told us that no Indian in Canada will ever make a business deal without first consulting his wife, and remarked, "There, perhaps, they can teach us something."

A view of Banff, the only town of any size in the Rocky mountains, where the Canadian Pacific Railway has one of its world famous hotels, beggars description. Than this, we are told, there is no more beautiful view in America. Near by are the sulphur springs where one can "if he desires, bathe in water which smells like bad eggs," or have a swim in water having a temperature of 115 degrees.

Of particular interest was the lecturer's explanation of his climb up snow covered mountains. It is necessary to have two guides; a rope is tied to the first one, then to the traveller, and then to the second guide. The Doctor recommends strongly that none of us attempt a mountain climbing expedition in the Rockies without two well known and reliable guides!

A reference to the Canadian North West Mounted Police was made by the Doctor, who told us that there are but 665 officers

and men in this world renowned group, to care for a territory five times as great as the United Kingdom. Once they go after their man, however, they never stop until they get him. An anecdote of an officer who was gone six weeks in the wilds of north western Canada, and who travelled 1000 miles to get his man, shows the real "Go-Getter" qualities of these men.

Of the wonders of the snow sheds, the fishing, hunting, etc., many views were shown, and finally we were told of the Hudson Bay Company which has been trading in Canada for many years. Their

house flag is plain white with the letters "H. B. C." on it in colors, and upon being asked what the letters stood for a native replied "Here Before Christ."

In concluding Dr. Shattuck told his hearers that with the wonders to be seen in the Rockies, but four days from New York, he could not understand why people would want to go to Europe. After seeing the wonderful views and hearing his fine lecture, all these who had the pleasure of hearing Dr. Shattuck agreed with him.

Dr. Shattuck's first lecture promises well for future meetings of our Veterans.

## Cumberland Veterans Celebrate Their Seventh Anniversary

THE seventh anniversary of the Baltimore and Ohio Railroad Veterans' Association at Cumberland was celebrated on February 6, when approximately 300 veterans and friends gathered in Odd Fellows Hall to observe the birthday of the Association.

Following the business session, the entertainment committee took charge. Dr. A. Y. Wilson read letters and telegrams from President Willard and Vice-President Gallo-way, regretting their inability to be present. Superintendent C. W. Van Horn, who was ill, was represented by Assistant Superintendent T. K. Flaherty.

The entertainment was in charge of Mrs. Joseph F. Barnett, president of the Ladies' Auxiliary. John W. McMakin presided. John Kessler, one of the oldest veterans present, opened the meeting with prayer; Miss Helen Dawson followed with a piano selection, and Hugh Markwood with a cornet solo. Then came the feature of the evening, a splendid address by President Sturmer of the Veterans, in which he detailed the part the Veterans' organization has played in the Railroad's history.

Assistant Superintendent Flaherty spoke at length on the records made and broken on the Cumberland Division during the past month. He also gave some interesting figures on the density of traffic on this division.

The male quartette of the First Baptist Church gave several selections, and music was furnished by the Baltimore and Ohio shop band, under the direction of Professor Frank E. De Luca. Little Miss Elizabeth Chevront sang, and Miss Mary N. Barnett gave a humorous reading entitled "A Vision of the Night."

After the entertainment, everyone adjourned to the banquet hall, where an appetizing repast was served to the guests and their friends.

## Greetings From The C. W. Galloway Auxiliary No. 1, Baltimore Division

By Mrs. Charles W. Lewis, President

SEVERAL months have passed since any word of our activities has appeared in the MAGAZINE. At our February meeting we had as speaker Miss Mary Harvey, head of the Baltimore policewomen, and one of the best known women in her line of work. At our March meeting we had a very enjoyable time. Our president, Mrs. Chas. W. Lewis, had returned from a trip to Florida and after the formal business was disposed of, she was presented with half a dozen silver spoons and a basket of flowers, and a drawing was held for a box of Creole candy presented by her.

Then President Allen, of the Baltimore Veterans, presented in an appropriate and touching manner, a Bible, which was accepted with grateful appreciation by our president. This Bible had been placed in a Baltimore and Ohio passenger coach in 1873. It came into the hands of Mr. Buckingham, Sister Mrs. Edward J. Mercer's father, in the same year that the car was sent to the wrecking shop after a wreck, and it has been in the family ever since. The Auxiliary feels grateful and accepted with pleasure this Bible from our sister for use at its meetings. The Bible will be inscribed

in gold, showing by whom and to whom presented.

The speaker of the afternoon was Col. Claude Swezey, warden of the Maryland Penitentiary and House of Correction. Col. Swezey gave an instructive and interesting talk on the social conditions surrounding his daily work. On the invitation of Col. Swezey, the Auxiliary expects in the near future to visit his two institutions.

At the February meeting an invitation was read for the officers and members to attend the banquet and dance given by the Newark Veterans and Ladies' Auxiliary on March 6. The Company, through Vice-President Galloway, generously furnished a private Pullman to Newark and return. Thirty-two made the trip, including Grand President Sturmer and President Allen, Past President W. A. Wall and Vice-President Mrs. W. A. Wall. All were elated at the splendid time they had. Stop-overs were made at various points and we learned that if the old saying, "You are as old as you feel," is true, we have some young members.

We extend our deep appreciation for the fine banquet and wonderful time shown us

(Continued in next column)

## C. W. Galloway Auxiliary

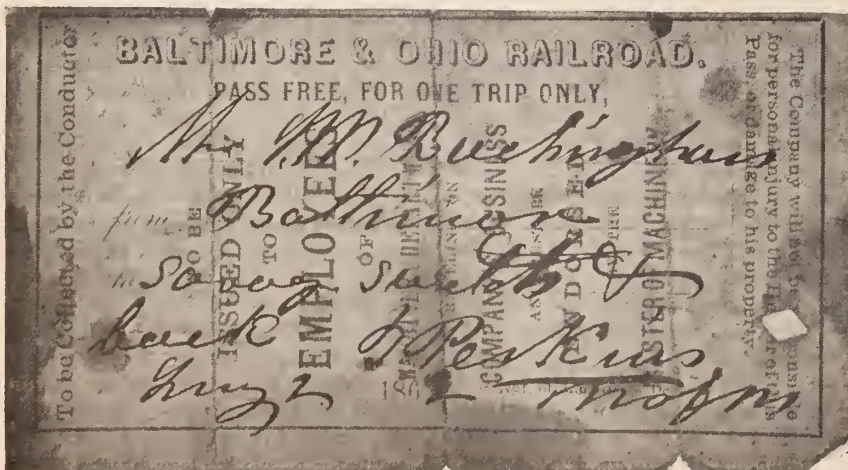

(Continued from preceding column)

by the Newark brothers and sisters, who certainly know how to entertain, and to our Railroad officials for their courtesy.

We congratulate Mr. Baugh for the fine dining car service and food. The sisters and brothers almost emptied his pantry.

All Veterans are welcome to hear our speakers. This part of our program begins at 3.30 p. m. on the third Wednesday of each month, in Room 500, Baltimore and Ohio Building.

We extend an invitation to all wives and widows of members of the Baltimore Veterans' Association to join us. We want you, for we feel that there will be a mutual enjoyment and benefit to us both.

Pass of 1862 loaned Magazine by Mrs. Edward J. Mercer

Judge Thomas Bond

### Martinsburg Auxiliary

Correspondent, CLARA McDONALD TAYLOR

ONE of our Veteran brothers, George M. Kilmer, has been confined to his home for about two months, on account of sickness. We hope he will soon be out, as he is missed by his Cumbo friends. Mr. Merce Kilmer has also been sick as also have been his two attractive kiddies, Virginia Lee and Junior, whose photos were in a recent issue of the Magazine.

We regret to report the death of Mrs. Edward Caskey, widow of Conductor Caskey. She was found by her son sitting in her chair, dead. We also regret to report that the widow of John Smith was stricken with paralysis one morning and died on the next day. Our sympathy goes out to the bereaved relatives.

Your correspondent and Mrs. Burkhart had planned to attend the Newark Veterans' entertainment, but illness prevented.

A. J. Criswell, one of our Veterans, had a close call recently, when he narrowly escaped being beaten down by the hoofs of a frightened horse. Mr. Criswell was standing on the curb oblivious of the fact that a frightened horse had crossed the curb. He looked up just in time to see the horse rearing above him, and managed to spring aside just in time. Mrs. Criswell, who was operated on in February, is now at home recovering nicely.

Wonderful revival meetings were recently held at the M. E. Church here.

Cumbo experienced quite a scare recently when the coal tipple was burned. However, it was not so serious as at first thought.

#### Stop That Leak:

We hope all employes will endeavor to work to that end. We know they will, as Cumbo has a wonderful bunch of men; they always work with their eyes wide open for anything that interests the good old Baltimore and Ohio.

Our Lodge met in the Baltimore and Ohio Building on February 8. Reports were read

from our delegates, Mrs. W. A. Burkhart and your correspondent, giving full details of our recent visit to the Grand Lodge. Many regrets were expressed when our members realized what they had missed.

We are glad to report that Mrs. Minor Furr is improving rapidly. Mrs. Sophia Ridings and her two sons, Raleigh and Cleo, are improving after being ill nearly all winter.

## Judge Bond Worked on the Baltimore and Ohio in 1850

THOMAS BENJAMIN BOND was born in Harford County, Md., on January 24, 1832. On November 1, 1850, he was appointed by Chief Engineer Benj. H. Latrobe, in a corps of civil engineers having charge of construction of the Baltimore and Ohio between Cheat River and Kingwood tunnel.

In the early days of Judge Bond's Railroad experience the Baltimore and Ohio was a small affair, terminating at Cumberland, Md. During the period of his employment, however, it was extended from Cumberland to Wheeling, reaching the latter city in 1853. Reference to old records shows that in 1850, Judge Bond's first year, the total number of passengers carried by the Baltimore and Ohio was 395,265, and that the total tons of freight handled, only 477,555. Judge Bond later served as calculator in locating the line from Grafton to Parkersburg, and subsequently as assistant civil engineer. At this time, Mr. Thomas Swan, who afterwards became Governor of Maryland, was president of the Baltimore and Ohio.

Judge Bond severed his connection with the Baltimore and Ohio in 1854, taking up the study of law. He tells us of a 2000-mile trip on horseback to the Pacific Coast, with an emigrant train, during which trip Indians and buffalo were encountered in large numbers. He served a term as judge of the Mendocino County Court in 1870 and was attorney and counsellor of the U. S. Supreme Court in 1875. He was married in 1865.

Judge Bond is a member of Abell Lodge No. 146, F. & A. M., of California, and has been elected an honorary member of the Baltimore and Ohio Veterans' Association. He also is honorary member of the Grand Lodge of Veterans. He now makes his home with William Holmes, Sr., a Veteran

in the service of the Baltimore and Ohio in Baltimore.

"I am grateful in having so many faithful friends," says Judge Bond, "and I don't think I have any enemies. Friends you can meet anywhere; you've got to keep a windward eye for enemies."

Judge Bond was present at the annual convention of the Grand Lodge of Veterans in January, when President Willard put into the lapel buttonhole of his coat the fifty year gold button of the Veterans. The response of the Judge was remarkable for the force of its delivery, its interest and enthusiasm, and for the remarkably clear account it gave of some of the pioneering days on the Baltimore and Ohio.

### Three Men with 162 Years Service

AT the eighth annual banquet of the Newark Division Baltimore and Ohio Veterans' Association held in Newark March 8, a feature of the entertainment was the presentation of 50-year service buttons to three employes whose total service aggregates 162 years.

William Lamb, conductor, has 50 years to his credit, and it still in the service.

Joseph Workman, baggageman, has been in the service 52 years, and is still on his car daily.

Russell Kyle, pumper, has been employed over 60 years, and is still running the pump at the station at Union, Ohio.

President Dan Moriarity, of the Newark Veterans, presented the buttons, complimenting the men on their long and faithful service, and hundreds of the Veterans and their wives, as well as the division officers, crowded around to shower congratulations upon the sturdy trio. Hats off to all of them!

Fifty-year service buttons for these Newark Veterans. Left to right: Russell Kyle, William Lamb and Joseph Workman

# Women's Department

Edited by Margaret Talbott Stevens.

## The Love Letters of D. S. Patcher

No. 1.

*NOTE:—A number of our girls have asked that the columns of our Women's Department include something in the line of romance. For a long time we have been trying to get the girls to begin something of this nature, for if anybody can truly represent Romance, it ought to be our girls themselves. And now, at last, there comes to our rescue—a man—one who knows how to write a real love letter. We are sure that everybody will want to read it. The old saying goes, "All the world loves a lover," and we know that this holds true. This is the first of several that we are planning to run, provided our women readers find them interesting.*

*By the way, Girls, er—Oh, what was that? His real name? Er—well, I'd hate to give it, for, well—the truth of the matter is, the writer of the love letters is married. He has been married for a score of years, and the letters are—to his wife. He is a Baltimore and Ohio operator at Garrett, Ind.*

—Associate Editor

Sweetheart:

Do you remember the day—

That wonderful day,

When first we met?

Do you remember those days—

Those happy days

Of long ago,

Do you regret?

You don't, do you,

Sweetheart?

Do you remember the strolls—

Those glorious strolls,

Over the meadow

And through the woodland?

Do you remember the spring—

That crystal spring,

Where we knelt,

You and I

And slacked our thirst

From its cool sparkling nectar—

Sweetheart?

Do you remember

The moss covered bank

Beside the little

Silvery stream?

Do you remember,

It was there where first

We felt the thrill

Of loves young dream?

You do, don't you,

Sweetheart?

Do you remember

How swiftly,

How sweetly,

The hours passed away?

Do you remember

The soft, sweet murmuring

Of the breeze

Through the trees—

The cooing of the dove

In the branches above,

A-calling her mate?

All nature spoke of love.

Do you remember?

You do, don't you,

Sweetheart?

Do you remember,

How we lingered,

You and I,

'Til the sun

Kissed the occident,

Coloring the landscape

With shimmering gold,

Reflecting its beauty

In the silver waters

Of the babbling brook,

Blending its yellow

With the emerald hue

Of the leafy boughs;

Bathing the tresses

Of your glorious hair

With crimson light;

Mirroring the golden

Flame of love

Deep in your eyes of blue—

Those eyes,

Those beautiful eyes,

Rivalling the azure

Of the skies—

Do you remember?

You do, don't you,

Sweetheart?

## This Cumberland Woman Was Born before the Time of the First Railroad

ON March 4, 1923, Mrs. Sarah Rice, of Cumberland, Md., celebrated her 98th birthday. She was born on March 4, 1825, at Bean's Cove, Bedford County, Pa. She was married on March 15, 1849. A few years later she moved to Cumberland, where she has spent practically all her life.

Mrs. Rice has a remarkable memory. She does not use eyeglasses, and is fond of telling of the growth of Cumberland, and the part which the Baltimore and Ohio has played in its development. At the time Mrs. Rice moved to Cumberland, the Baltimore and Ohio rolling mill was in course of construction. Shortly after the Queen City Hotel and the station were built. At that time South Cumberland consisted of only a few houses and was known as "Vinegar Hill." Mrs. Rice also recalls the building of the Baltimore and Ohio shops at South Cumberland and the moving there of the round house activities from the center of the city. She has witnessed the rapid growth of that section of the city.

Mrs. Rice is the mother of Hanson Rice, one of our Cumberland employes who has been in the service for 18 years. She has three other children living, also 19 grandchildren, 17 great grandchildren and one great great grandchild.

Mrs. Rice says, "Ninety-eight years is a long time to live, and when my mind runs back over my life and contrasts the comforts we have now and the hardships we had in my girlhood days, I wonder at the complaints of hardship I hear today." She has been a member of the Kingsley M. E. Church at Cumberland ever since she can remember.

Mrs. Sarah Rice, 98 years old, Cumberland, Md.

Mrs. W. E. Wagner, Parkersburg, W. Va., wearing her pretty fillet crochet sweater

### How I Made My Sweater

By Mrs. William E. Wagner, Wife of Yard Clerk, Parkersburg, W. Va. High Yard

**T**HE sweater in the accompanying picture is made of No. 5 cotton thread.

It has four large panels, two in the back and two in front. On the panels are two large roses; just the rose, no leaves or stem. In the center of the back and the center of the front is a large butterfly. At the top of the back, right over the butterfly, is a large rose (same as on the panels) but it has a large bunch of leaves on each side, which makes it extend clear across the shoulders. Of course the front has a lower neck and there isn't room for the rose in front, although it could be made with a rose in front also.

The sleeves consist of thirteen small panels about five inches in length and an inch in width, which are all fastened at the bottom to a band about one inch wide. The sleeves are only quarter sleeves, but can be made longer if desired. On each panel is fringe about seven inches long. On each side between the panels was left an open space about five inches wide and as long as the panel and fringe together. I made fringe to go in there to reach the bottom of the fringe on panels. The whole sweater is of fillet crochet. (The large butterfly was in a night-gown yoke and the rose was in the center of a table runner.) The roses on the panels are the same as the one in the back, except that I left the leaves off. A white roll collar can be worn with the sweater nicely. It is long waisted with a draw string at the bottom of the waist. The panels are about seven inches wide and about fourteen inches long without the fringe.

#### Women Readers:

Don't forget about the Prize Contest. Read about it in the January issue and send in your contribution early.—Associate Editor

## The Simplest Dress She Ever Made

**T**HE dress shown in the accompanying picture was made by the little lady who now wears it, Mrs. A. L. Mehrling, wife of the chief clerk to the manager of Station Service. Mr. Mehrling's office is at Mt. Royal Station, Baltimore.

For the little house dress in the picture, Mrs. Mehrling used a pretty combination of yellow and black plaid tissue gingham, with collar and cuffs of flaxon. The pockets are pointed and their tops also show the white flaxon.

"This dress was the simplest thing I ever made," said Mrs. Mehrling when we asked her to tell us about it. "And the nicest thing about it is that there are no buttons and bottonholes to be bothered with; no hooks and eyes, no snap fasteners, or anything. It just goes over your head. And it goes over the ironing board just as easily, making the laundering problem extremely simple."

The arm band is in two pieces, cut on the bias, as is the rest of the trimming.

Mrs. Mehrling found that in making the dress, not all of the material called for is needed, unless the skirt is to be made extremely full. If you intend making only

two widths, you may count on having a yard less of the material than the pattern requires; three widths, as is shown in the pattern itself, will take the amount given, although a satisfactory dress may be made with two widths. A little sash of flaxon or organdy will complete the costume for a little frock for the lawn on a summer afternoon.

The pattern is cut in 7 sizes: 34 to 46 inches bust measure, inclusive. A 38-inch size requires  $5\frac{3}{8}$  yards of 32-inch material, for the full skirt.

This dress might be developed attractively in cretonne. This with a large hat of the same material would make a fetching costume for the garden.

Order this pattern by number and size, using the coupon provided, or a separate sheet of paper. Price of pattern, 12 cents in stamps.

#### Some Sight

Teacher: "You dirty boy, you. Why don't you wash your face? I can see what you had for breakfast this morning."

Bob: "What was it?"

Teacher: "Eggs."

Bob: "Wrong. That was yesterday."

—Partners

#### A PRETTY HOUSE DRESS

This attractive little house dress was developed from Pattern 4066 by Mrs. A. L. Mehrling, Baltimore, Md. To get this pattern address: The Fashion Woman, Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Md. Use coupon or write letter, giving size, and enclose 12 cents in stamps

# Every Woman Will Want to Make Some of These Lovely Dresses

By Peggy

I WAS anxiously waiting a letter from our Fashion Woman yesterday. The door opened slowly. I was sure that it was the letter man, so I didn't look up from my work right away.

4316

"Good Morning!"

At this hearty greeting I fairly jumped from my chair to greet one of our Baltimore and Ohio women who had just entered.

"I just dropped in," she said, "to ask you to order for me four patterns and a Spring and Summer Fashion Book. I have already used several of your patterns this year, and do you know I think they're—why, they're just simply grand."

4320

(Because of the increase in our number of pattern orders I was wondering if it was because of the low price of 12 cents each.)

"You mean that they're fine for the money?" I asked her.

"Wonderful," she declared. "But not only that. Of course, the price means something, too, but the nice thing about them is that they're so simply and easily put together. You know, I never did any of my own sewing before, so you may be sure that I am pleased to know that I have found patterns at last that I can handle without any trouble at all."

4303

4322

too, that will be shown in the MAGAZINE from time to time. One of these we hope to feature in our May issue.

Especially attractive are the patterns which our Fashion Woman has sent us for the late spring and early summer. Let me tell you about some of them:

4082

"I told my daughter-in-law about them, so she asked me to order these four and the fashion book for her."

So, that's the secret of our patterns. We are so glad that we have something that combines style with simplicity. And, as another of our women said, "why pay a bigger price for a pattern that does not meet your needs as well?"

Those who have used the patterns shown in the MAGAZINE agree with Mrs. Kimball, who told us that the patterns were "just grand." This is a great satisfaction to us, for our Fashion Woman, who lives in New York, has prepared these patterns to suit the needs of our railroad women. And, by the way, there are a few fashions for men,

**A Blouse Costume for the Girl in Her "Teens"**

4322. One of the season's most popular styles is here portrayed. It is a model that will be good for sports materials, for wash fabrics and for combinations of materials. As shown in this illustration white serge was used, with facing of black sateen. One could have the skirt in striped or checked woolen

**Sweet and Cool is Marjorie in This Party Dress**

4316. White lawn is here combined with dotted Swiss. This is a good model for chambray—and gingham, also for silk and crepe. The model slips over the head. For a pretty party dress, use mull, organdy or net.

The pattern is cut in 4 sizes: 1, 2, 4 and 5 years. A 2-year size requires 1 3/4 yard of 32-inch material. To trim as illustrated requires 5/8 yard of contrasting material 40 inches wide. Price, 12 cents in stamps.

**A Charming Frock for Rosamond**

4320. Embroidered voile, was chosen for this design, with bands of lace for trimming. This is a good style for "tissue" materials, for silk, dotted or plain Swiss, and crepe. The bertha may be omitted.

The pattern is cut in 4 sizes: 8, 10, 12 and 14 years. A 12-year size requires 4 1/2 yards of 36-inch material. Without the bertha 3 3/8 yards is required. Price, 12 cents in stamps.

**In Taffeta, Satin, Serge or Linen**

4303. The vest portions are crossed in double breasted style. The collar may be rolled high, or turned low.

The pattern is cut in 3 sizes: 16, 18 and 20 years. An 18-year size requires 5 1/4 yards of 40-inch material. The width at the foot is 2 3/4 yards, with plaits extended. Price, 12 cents in stamps.

and the blouse in linen or plain woolen material.

The pattern is cut in 3 sizes: 12, 14, and 16 years. A 14-year size requires 2 3/4 yards of 36-inch material for the blouse, and 3 1/2 for the skirt. Price, 12 cents in stamps.

**For the Woman of Mature Figure**

4082. Fashion has planned this style for grace and comfort. Striped and plain

**UP-TO-DATE BOOK OF FASHIONS**

Send 12c in stamps, check, or money order for our UP-TO-DATE BOOK OF FASHIONS.

ratine are here combined. This is also a good model for tub silk, taffeta and crepe.

The pattern is cut in seven sizes: 36, 38, 40, 42, 44, 46 and 48 inches bust measure. To make the dress for a 38 inch size will require 6 yards of one material 32-inches wide. As illustrated, it will take 2 1/2 yards of plain material for sleeves and front, and 3 3/4 yards of striped material. The width of the skirt at the foot is 2 1/4 yards, with plaits extended.

Pattern mailed to any address on receipt of 12 cents in silver or stamps.

**An Attractive Business and Street Costume**

4304. Figured and plainsilk are combined in this design. One could use wool jersey or serge, with satin or crepe. Braid trimming or self bands will be pleasing for decoration.

The pattern is cut in 7 sizes: 36, 38, 40, 42, 44, 46 and 48 inches bust measure. A 38-inch size requires  $5\frac{1}{4}$  yards of 40-inch material. For collar, cuffs, belt and vest of contrasting material  $1\frac{1}{8}$  yard 40 inches wide is required. The width of the skirt at the foot is  $2\frac{1}{2}$  yards. Price, 12 cents in stamps.

**A Pretty, Practical Apron and Dust Cap**

4306. Rubberized cretonne, gingham, jean, drill and percale are good for this style.

The pattern is cut in 4 sizes: Small, Medium, Large and Extra Large. A Medium size requires  $2\frac{1}{2}$  yards of 36-inch material, for the Apron. For the Cap,  $\frac{3}{4}$  yard is required. Price, 12 cents in stamps.

**Neatness, Comfort and Style in Janet's New Apron**

4308. This style should appeal especially to women of mature figure. The apron may be finished to close at the shoulders, or sides or to be slipped over the head. It is easy to make and easy to launder. The style is good for percale or gingham, also for other apron fabrics.

The pattern is cut in 4 sizes: Small, 34-36; Medium 38-40; Large 42-44; Extra Large, 46-48 inches bust measure. A medium size requires  $3\frac{1}{2}$  yards of 36-inch material. Price, 12 cents in stamps.

**Marie Sets the Table in This Pretty Morning Frock**

4302. Blue or black sateen with white dots, and with trimming of white linene, would be pleasing for this style. It is also nice for percale and gingham. Or, leave off the pockets and make a pretty summer dress of lawn or organdy, with a saucy little sash.

The pattern is cut in 7 sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires 5 yards of 40 inch material. To trim as illustrated will require  $\frac{7}{8}$  yard of 32 inch material. The width at the foot is  $2\frac{1}{2}$  yards. Price, 12 cents in stamps.

**Louise is Dressed to Receive Her Afternoon Callers**

4311-4265. Printed crepe satin was chosen for this model, with plain satin for collar, vest and the reversed portions on sleeves. The girdle too could be of the plain material. This style is nice also for voile and gingham tissues, for kasha and crepe de chine.

It comprises Blouse Pattern, 4311, and Skirt Pattern, 4265. The blouse is cut in 6 sizes: 34, 36, 38, 40, 42 and 44 inches bust measure. The skirt in 7 sizes: 25, 27, 29, 31, 33, 35 and 37 inches waist measure. The width at the foot is 3 yards. To make this dress for a 38-inch size will require  $4\frac{3}{4}$  yards of 40-inch figured material. For trimming as illustrated  $\frac{1}{2}$  yard of plain material is required. The blouse and skirt are separate patterns; the price, 12 cents for each pattern.

**The Nicest Kind of a School Dress for Dorothy**

4321. Red and white checked gingham with red and black banding would be attractive for this style, which also is nice for percale, jersey and serge. The closing is under the plait fullness at the left side. The sleeve may be finished in wrist or elbow length.

The pattern is cut in 4 sizes: 8, 10, 12 and 14 years. A 10-year size requires 4 yards of 36-inch material. Price, 12 cents.

**The Bertha Will Make This a Pretty Party Dress for Anne**

4255. This is one of the season's most popular styles. The bertha is its outstanding feature. It will make a pretty "party" or "dance" frock, and is equally nice for afternoon wear, with the new bell sleeve.

The pattern is cut in 3 sizes: 12, 14 and 16 years. A 14-year size requires 4 yards of 36-inch material if made with sleeves. Without sleeves about  $3\frac{7}{8}$  yards is required. Price, 12 cents in stamps.

**Simplicity and Good Taste Mark Edith's Sports Frock**

4305. Here is a model that has attractive features, and is withal comfortable. Figured and plain crepe, or the same combination in voile or foulard, or linen and gingham could be used for this style.

The pattern is cut in 3 sizes: 16, 18 and 20 years. To make this style for an 18-year size will require  $4\frac{3}{4}$  yards of 32-inch material. The width at the foot is  $2\frac{1}{4}$  yards. To make the waist and sleeves of contrasting material requires  $2\frac{1}{8}$  yards of 32 inches wide. Price, 12 cents in stamps.

**Wearing This Dress, Mazie is a Daisy Herself**

4323. Figured percale and linene may be combined for this model, or voile or batiste, embroidered as illustrated. The style is nice also for taffeta and crepe. The waist may be finished with the short sleeves, or the puff in peasant style be added, as shown in the smaller view.

The pattern is cut in 4 sizes: 4, 6, 8 and 10 years. To make this dress for a 4-year size requires 2 yards of 36-inch material. Price, 12 cents in stamps.

**A Lovely Play Dress for Little Genevieve**

4315. Checker percale was used for this model, with chambray for trimming. This style also lends itself well to gingham, cretonne, crash and linen. In pongee with cross—or pass-stitching it will make a serviceable, washable dress.

The pattern is cut in 4 sizes: 2, 4, 6 and 8 years. A 6-year size requires 3 yards of 32-inch material. If collar, bands and facings are to be of contrasting material,  $\frac{3}{8}$  yard is required. Price, 12 cents in stamps.

**How Becoming is This Dress When Mother or Big Sister Wears it!**

4300. Serge with soutache braiding could

be used for this design. The style is also good for satin, kasha and taffeta, as well as for combinations of plain and figured materials.

The pattern is cut in 7 sizes: 36, 38, 40, 42, 44, 46 and 48 inches bust measure. A 38-inch size requires  $5\frac{1}{4}$  yards of 40-inch material. The width at the foot with plaits extended is  $2\frac{3}{8}$  yards. For panel, collar and cuffs of contrasting material 2 yards 40 inches wide is required. Price, 12 cents in stamps.

**Ready to Say Good Night, Beatrice Wears This Little Gown**

4325. Two practical styles are here combined. The gown may be of flannellette muslin, crepe or cambric. The socks of eiderdown or flannellette, blanket cloth or quilted satin.

The pattern is cut in 7 sizes: 1 year, 2, 4, 6, 8, 10 and 12 years. A 6-year size requires  $2\frac{7}{8}$  yards of 36-inch material. One pair of socks require  $\frac{5}{8}$  yard of material 22 inches wide or wider. Price, 12 cents in stamps.

**For Work or for Leisure Hours, Edna Likes This Pattern**

4081. Long waisted effects still prevail, as this style shows. It is nice for tub silk, gingham, voile and also for taffeta, gabardine and crepe. Blue and white checked gingham is here portrayed with bandings of blue chambray and organdy for collar and cuffs. The sleeve in wrist length is fitted with a dart.

The pattern is cut in 7 sizes: 34, 36, 38, 40, 42, 44 and 46 inches bust measure. A 38-inch size requires  $5\frac{3}{4}$  yards of 32-inch material. The width at the foot is  $2\frac{5}{8}$  yards with plaits extended. Collar and cuffs of contrasting material require  $\frac{3}{4}$  yard 32 inches wide. Price, 12 cents in stamps.

**Have You Seen the Fashion Book?**

Send twelve cents in stamps for our SPRING AND SUMMER 1923 BOOK OF FASHIONS, showing color plates, and containing 500 designs of Women's, Misses' and Children's Patterns, a CONCISE and COMPREHENSIVE ARTICLE ON DRESSMAKING, ALSO SOME POINTS FOR THE NEEDLE (illustrating 30 of the various, simple stitches) all valuable hints to the home dressmaker. Use the coupon or a separate piece of paper. Be sure to give names and addresses clearly.

**Springtime**

By Margaret Andersen, Relay, Md.

Daughter of B. H. Andersen, Chief Clerk to Chief of Yard and Terminal Operations

Springtime is here,  
Full of good cheer,  
We greet her with a smile;  
We love her best  
Of all the rest,  
But she only stays a while.

# Our Little Railroaders

Here are letters from Myra and Sarah,  
And a story of Rover and Jane;  
Drawings by Don and Winona  
And Anna; Liz'beth and Lorraine.

Evelyn, Juniata and Henry,  
And Elsie and Mildred are here,  
And Margaret's poem of Springtime—  
To bring to us gladness and cheer.

## Easter Lillies

By Myra Gill, Twelve Years Old (Whose Daddy Works in the  
Freight Claim Department, Baltimore, Md.)

On Easter morn the sun shines bright  
O'er a garden of lilies white,  
That nod their heads in the breeze, and  
sway,  
And greet the world this blessed day.

Of their loving mistress the lilies think,  
While of the morning dew they drink.  
'Twas long since she last came to them,  
To caress each flower, so like a gem.

The sky o'erhead of deep, deep blue,  
Surrounds a ball of golden hue,  
While from the bird's throat pours a stream,  
And Nature seems a lovely dream.

A click of the gate; in the garden stands  
The kitchen maid, a knife in her hands.  
Oh, what has brought her here, we pray?  
Shall the lilies perish on Easter Day?

Has Fate a cruel trick now played?  
And why and where has the mistress stayed?  
The keen edge of the blade cuts through,  
And to the garden these flowers bid adieu.

Into the house they are taken with care,  
Through the hallway, then up the stair.  
Low sobs escape from a chamber door,  
As a sorrowful mother kneels on the floor.

"Oh God, who made this beautiful sphere,  
Wouldst thou shed some of thy mercy  
here?"

And as the hours drag slowly by  
"O, let not thy beloved daughter die!"

The lilies look on with sorrow, Oh me!  
Do they understand what they hear and see?  
I truly believe that these blossoms do  
For they bowed their heads, shed tears of dew.

To Heaven the young girl's soul doth rise,  
She moves her lips in a word of praise,  
Of the loving Father who watches all  
E'en when in life's dark paths we fall.

To Heaven God an angel gave  
On earth there lies a new made grave,  
Wherein the body of the sweet girl lies  
And the lilies thereon look up to the skies.

Sparrow, who wished an answer from both.  
"Perfectly splendid," declared Mr.  
Robin.

"Do you remember that worm you took  
from me last year, Mr. Bluebird?" asked  
Mr. Sparrow, who was itching for a tuss.

"What worm?" asked Mr. Bluebird in  
innocent surprise.

"He only wants to fuss!" snapped back  
Mr. Robin.

"That fat juicy worm that you snatched  
away from me," answered Mr. Sparrow,  
not paying a bit of attention to Mr. Robin.

"Peace, Peace!" and looking away from  
my friends I saw Mr. Dove flying toward  
where my friends were seated.

"Why do you say 'Peace'?" asked Mr.  
Sparrow, who was provoked because his  
conversation had been interrupted.

"Because it is my motto," was the  
answer.

And at this Mr. Robin and Mr. Bluebird  
trilled a song which told me of how God  
had protected them when they were away.

It was nearly dusk when I left the  
window, but I will never forget that lovely  
afternoon.

## Returning Friends

By Sarah Pennington, Daughter of Crossing Watchman P. M.  
Pennington, Cumberland, Maryland

IT was in the afternoon of early spring.  
I sat by my open window, dreaming  
of the past, present and future.  
Spring had come and old winter was  
retiring. As I permitted my thoughts to  
wander at random, I suddenly came to the  
realization that I was drifting away on  
the sweet notes of my dear old friends, Mr.  
Robin and Mr. Bluebird. How glad I was  
to see them. "Back again from the south!"  
exclaimed Mr. Robin.

"Yes" answered Mr. Bluebird, who look-  
ed as picturesque as ever.

"Over yonder in that big apple tree is  
where we had our nests last year," said  
Mr. Robin, viewing the place.

"Sad to say our nest was almost destroyed  
by some naughty boys. But God is good

and when he saw us helpless little birds he  
saved us. Among those boys was one who  
was lame; he also loved us and pleaded  
for our lives. Every one is kind to an  
afflicted person, or should be, and the boys  
obeyed the lame one and thus we were  
saved."

"Mercy," exclaimed Mr. Robin, "here  
comes Mr. Sparrow with whom I got into a  
fight last year."

"What?" questioned Mr. Bluebird as  
he awoke from his day dream.

"How did you find the South?" asked  
Mr. Sparrow.

"Wonderful," answered Mr. Bluebird  
who had been tight to answer when  
spoken to.

"And you Mr. Robin?" continued Mr.

Emma Melaney, daughter of Foreman J. A.  
Melaney, Foxburg, Pa., and her dog, Prince

MY, what a lovely surprise it is to have so many of our little people answering the puzzles! And nearly everybody gets the correct answers. We are so glad too, because there are lots of little folk who have never written to the Magazine's Children's Page before but who are now interested in the riddles. The answers to the March puzzle are: *Hannah, Anna, Ann*. I thought that one would be hard, but lots of little people seemed to find it easy. Now, here is a new one. Guess this one and Aunt Mary will send a little surprise to each one who answers correctly.

In each line following, you will find one hidden letter in the given word. Put all these letters in the order in which they are found, and you will spell the name that is given to all the girls and boys who have written to Aunt Mary, as well as of those who will write to her. The name is made up of three different words.

My first is in *owl*, but not in *hen*;  
 My second is in *four*, but not in *ten*;  
 My third is in *rain*, but not in *snow*;  
 My fourth is found in *hail*, and *blow*;  
 My fifth is in *pie*, but not in *cake*;  
 My sixth is in *stew*, but not in *bake*;  
 My seventh is in *trunk*, but not in *box*;  
 My eighth is in *lamb*, but not in *fox*.  
 My ninth is found in *read* and *write*;  
 My tenth is in *bark*, but never in *bite*;  
 My eleventh is in *play*, but not in *work*;  
 My twelfth in *Irishman*, not in *Turk*;  
 My thirteenth is found in *laugh* and *glee*;  
 My fourteenth in *grass* as well as in *tree*;  
 My fifteenth in *top* and *cover* too;  
 My sixteenth in *black*, but not in *blue*.  
 My seventeenth, as you'll agree,  
 Is found in *bread*, but not in *tea*;  
 My eighteenth and nineteenth, I am told,  
 Though both are in *silver*, neither is in *gold*.

Send your answers to: Aunt Mary, Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Maryland.

### Barbara

THIS nice dollie with her new Sunday clothes came all the way from Chicago to Baltimore in a big envelope. Evelyn James sent her and when Aunt Mary opened the envelope she could hardly believe her eyes. There lay the doll, Barbara, all dressed in a green dress and a yellow hat, both of which were trimmed

in purple. Aunt Mary thought that Barbara was such a nice doll that perhaps some other little girl might want to have her. So she lay Barbara, her dress, and her hat on a piece of carbon paper and "took her picture" for you to see, and to cut out, if you like. Thank you, Evelyn.

### My Home Town is a Beautiful Place

By Juanita Hastings

Seven Year Old Daughter of  
 Conductor Hastings, Pittsburgh Division

I AM six years old. My daddy is a Baltimore and Ohio conductor on the Pittsburgh Division. I live close to the Railroad in the little mountain town of South Connellsville, Pa. It is a beautiful place.

We have several things in our town. One thing is a stone house, over 100 years old. It is the old Braddock House. The Baltimore and Ohio owns it.

Our town is in the heart of the coke region of the world. My daddy has been with the Baltimore and Ohio for ten years.

My grandparents live near Baltimore. I go home every summer where the large watermelons grow.

### My Pony

By Elsie Elizabeth Glanzer, Jessup, Md.

I have a little pony  
 And I have named her "Beauty,"  
 In everything that Beauty does  
 She tries to do her duty.

I hitched her to the plow one day  
 And she behaved just fine,  
 I thought that she would run away,  
 But she was very kind.

Dear Girls and Boys:—

Tell Mamma to read in the January Magazine about our Women's Contest for 1923.

We're going to have another contest for our girls and boys before long. What kind of a contest do you think we ought to have?

Yours lovingly,

Aunt Mary

**BARNEY GOOGLE, MUTT AND JEFF, JIGGS AND CEDRIC, ALL GOING TO THE MOVIES**  
 Barney and Jiggs were drawn by Winona Duff, 11 years old, Belpre, Ohio; Mutt and Jeff, by Donald Karl, 14 year old son of Conductor Karl, Dover, Ohio; Pa's Son-in-law by Elizabeth Zachiesche, Rognel Heights, Maryland

**Rover and Jane**

By Lena Hoppe

Baltimore, Maryland  
 February 11, 1923

Dear Aunt Mary:

I am going to give you a story of my own make-up, which is called "Rover and Jane." I am sorry that I could not make one up before now.

My little brother, aged nine, is going to give you a story, too. Soon both of us will send you another story.

I hope I succeeded in having this one put in the MAGAZINE.

Yours sincerely,  
 Lena Hoppe

**THE STORY**

There was once a dog named Rover. He belonged to a little girl whose name was Jane.

Jane was a little girl, about five years old. Rover and Jane played together in the garden nearly every day, except Saturday, when Jane took her lunch and went to the park with the nurse. Of course, Rover always went along with them, too.

Now, there was a small lake in this park. One day Jane was playing nearby while the nurse was reading. The little girl felt like running about, so she crept away very softly. Rover followed her. She went so far that she came right down to the lake. She took her socks and slippers off and started to wade in the water.

Jane thought that the lake was only a small pond. She waded out very far in the lake, so far that the water got deeper before she knew it.

Rover dashed out into the water and took hold of her. He dragged her out of the water on to the ground.

In the meantime the nurse was looking all over the park for Jane. When she came to the lake she thought that Jane might have been drowned. Oh, how frightened she was!

While she was worrying about Jane she looked over in the bushes and there was

the little girl lying on the ground and Rover watching her.

**SPRING IN THE COUNTRY**  
 The Tulips were drawn by Mildred Luh, Baltimore, Md.; the Pussy Willows, by Evelyn Luh, Mildred's sister; the background by Lorraine Tharp, West Newton, Pa.

The nurse took her home and tended her while she was sick (for being in the cold water had made Jane very ill).

**ON THE FARM**

Little Mary was drawn by Anna L. Hay, Baltimore, Md. Her sheep was drawn by Lorraine Tharp, 11 year old daughter of Car Inspector J. W. Tharp, West Newton, Pa.

After that Jane never ran away from her nurse again. She always played with Rover near her home.

**Hans and His Horse**

By Henry Hoppe, Nine Years Old  
 Baltimore, Md.

ONE day a miller had a son. He did not want to give his son the mill, because he was too small. He wanted his son to get a magic horse-shoe which would break in half if he tried to break it with his hands. The boy started on his journey. He went on and on until he met a dove which said, "Look in your pocket." When the boy looked in his pocket, he saw a magic horse shoe. He broke it in half with his naked hands and said that was just what he wanted. He went further on his way until he met a fox who said, "Look in your purse." When he did so he found three horse shoes. He broke one in half and said that he wanted the other two because he had broken one. When he got home he gave his father the horse shoes. Later he was married and his father gave him the mill from which he made a fortune.

One night while the son was grinding the mill, he saw a wooden horse. He mounted the horse and it took him to the barn. When he put the magic shoes on the wooden horse, it galloped away with him on it. He picked his wife up and went away with her to another city. They were made King and Queen because the people loved them and they had so much money and a magic horse.

**Little Mary**

By James Moore, Pittsburgh, Pa.

In a meadow of green  
 Mary was walking,  
 Her dress  
 Was neat and clean.  
 She was watching the sheep  
 And the lambs at play,  
 In the meadow of green.

### Realm of the Riddle

(Concluded from page 23.)

#### TOTAL

In my garden fair,  
Among blossoms there,  
I see these through the hazy night;  
Their whiteness glowing,  
Like daisies showing,  
As tall as I—a won'drous sight.  
Baltimore, Md.

Atlas

To receive proper credit all lists of solutions must be in my hand by June 5, the answers and solvers list will be published in the July issue.

#### Just between You and Me

It is with deep regret I have to announce the death of Todd, which occurred at his home, Mulkeytown, Ill., February 3. To judge from letters I had received from him and from his work as published in this and other puzzle columns no one could imagine such a bright and cheerful writer had been an invalid practically all his life. Todd, whose name in everyday life was C. T. Plumlee, had just about reached his majority and gave promise of developing into a puzzler of the very highest rank, which makes his untimely death the more regrettable.

In No. 10 of this issue we publish our first Rebus. A Rebus is described in the "Key to Puzzledom" as follows: A puzzle in which a word, phrase, or sentence is rendered by a peculiar arrangement of letters, numerals, etc., often with pictures

of objects whose names have the same sounds as the words represented. As an illustration take the following:

C L  
Blossoms

This is a letter Rebus similar to No. 10 and the answer is, Clover Blossoms, worked out as follows: C L over BLOSSOMS. The Rebus is a very interesting puzzle and I think you will derive a great deal of pleasure trying to solve this one.

Atlas, always clever at rhyme, sends the following unique answer to No. 3 in the January issue:

O, I am only a still cow,  
But at "mooing" I'm a beaut  
Preferring fresh grass to mill chow,  
With now and then a nice root.  
I see a monster come down the trail  
Spouting up cinders and soot,  
But I only swish my lovely tail—  
LO, I WELCOME HIS TOOT.  
He raises a ruction as by he goes  
And I keep on "cudding" and mute,

No. 9 in this issue is the work of the lamented Todd. Fortunately we have some other samples which he sent us only a short while before his end and which will be published in coming numbers. This is the first break in our ranks and may it be the last for a long time to come.

The 79th convention of the National Puzzlers League was held at the Southern Hotel, Baltimore, Maryland, February 22, 1923. N. Jineer represented the Baltimore and Ohio contingent and an able representative she proved herself to be. Many of the veterans present took occasion to compliment her on her fine work published in the Baltimore and Ohio MAGAZINE and all predicted a bright future for her in puzzledom. The convention was otherwise very successful and officers were elected for the ensuing six months as shown on this page.

The next convention will be held at Pittsburgh, Pa., on Labor Day when it is hoped more Baltimore and Ohio Puzzlers will be in attendance.

Name	Pen Name	Office	Address

VILE TOOT.

And you say you lost control of your car?  
Yes, I couldn't keep up the installments.  
—Judge.

PRIDE OF OUR NEW YORK FLEET

The new ferryboat named for our operating vice president, "Charles W. Galloway," plies between Tottenville, S. I. and Perth Amboy, N. J. In the insert the members of the crew are, from left to right: Louis Walters, deckhand; John Deon, deckhand; Raymond Ellis, captain; Sal. Provonzana, deckhand; John McDonald, engineer; Thos. McKeon Jr., fireman

# Baltimore and Ohio Scholarship Winners

## *Extraordinary Production and Profit Demonstrated by Boy and Girl "Farmers"*

By O. K. Quivey, General Agricultural Agent, Commercial Development Department

THE Baltimore and Ohio Railroad last year offered fifteen scholarships, two in each State it traverses, to the boy and girl doing the most outstanding Agricultural Club work.

This was quite an unusual thing for a railroad to do, but it was done in the sincere belief that the future welfare of a country depends upon the kind of training given its boys and girls, and that the Agricultural Clubs offered the best training for citizenship, for economic efficiency, and a higher plane of social and moral living to country boys and girls.

These scholarships were for \$100 each, and gave the winners the alternative of using the money for scholarship purposes at their respective state universities or in defraying the expenses of an educational trip, the Eastern winners going in December to the International Live Stock Show at Chicago, and the Western winners to Washington, D. C., the national capitol, during Easter Week.

Of the fifteen scholarship winners, four elected the educational trip and eleven elected to attend their State University. The following are the winners, together with the kind of Club project on which they were awarded the scholarship, and how each winner elected to use the same:

Miss Opal Speck, Pleasant Plains, Illinois, won one of the \$100 scholarships on her Canning Club project, having canned the state champion exhibit for two years, with a record for 1922 of 234 jars of fruit, vegetables, jams, jellies, marmalade, etc. She elected the educational trip to Washington, the national capitol.

Roy Eidman, Mascoutah, Illinois, was awarded the scholarship on his Pig Club project, showing total receipts of \$355.00, with a net profit of \$146.33 for the year, and elected to use the scholarship to defray the expenses of the Winter Short Course at the University of Illinois.

Miss Grace White, Fairfield, Illinois, won the \$100 scholarship for the most outstanding work done in the Baltimore and Ohio's 1922 Egg Setting Campaign in that state, her fine flock of White Rocks having been hatched and raised from egg settings furnished by the Baltimore and Ohio. Miss White elected the trip to Washington during Easter Week.

Mr. John Shutt, Garrett, Indiana, was awarded a \$100 scholarship on his Potato Club project, he having been awarded first place at the State Potato Show at Lafayette in January, thus becoming Champion Potato Club member in the State, with a yield of 227.6 bushels per acre. Mr. Shutt

elected the educational trip to Washington.

Mr. Clarence Libbert, Aurora, Indiana, was awarded one of the Baltimore and Ohio scholarships on his Poultry project. In addition to the regular egg production and pullet development part of the project, Mr. Libbert caponized 330 cockerels, which were later purchased by the Baltimore and Ohio Railroad for use on its diners. Mr. Libbert will apply his scholarship on a four year course in agriculture at Purdue University, which he expects to enter next Fall.

Miss Katherine Baker, Edgemont, Maryland, won her scholarship on the Home-Garden project, specializing in fresh vegetables which were sold to summer visitors at Pen Mar and Blue Ridge Summit, and in this way started the fund for her education. In addition to this Miss Baker made all her own clothes and did the home canning. She will apply her scholarship to a four year course at the University of Maryland.

Mr. Norwood C. Thornton, Elkton, Maryland, won the \$100 scholarship on his Pig Club project, having a pure bred Poland China herd, on which he won prizes at the State Show at Timonium and several other fairs. He has been particularly successful as a breeder and has encouraged other boys to enter the game, giving one boy a pure bred pig to start with and offering another pig as a prize in a contest at West Nottingham. He selected the educational trip and attended the International Live Stock Show at Chicago last December.

Miss Ella Holmes, Wakeman, Huron County, Ohio, won her scholarship on the Canning Club project. Her record for 1922 was 1095 pints of vegetables, fruits and meats preserved. She will use the scholarship on a course at Ohio State University.

Mr. Howard Young, Everett, Summit County, Ohio, won the \$100 scholarship as the boy doing the most outstanding work in the Poultry Club project in his State, he having hatched 1204 chickens and raised 1018, averaging a profit of \$5.56 per hen. He will apply the scholarship toward a four-year course in agriculture at Ohio State University.

Miss Emaline Passmore, West Chester, Pennsylvania, won the \$100 scholarship in Poultry Club work, she being a member of the Brandywine \$1000 Poultry Club. Her record showed an average egg production of 182.8 eggs for the year, with an average profit per hen of \$5.80. Miss Passmore will apply her scholarship to a four year course at the Pennsylvania State College.

Mr. John Benson, Mahoningtown, Pennsylvania, was awarded one of the \$100

scholarships for his outstanding success in Pig Club work. He elected to use this scholarship to defray the expenses of the Winter Short Course at Pennsylvania State College in January.

Miss Kathryn Funkhouser, White Post, Virginia, won the \$100 scholarship on Beet Club work, having in final competition with 12 Club members at the Virginia State Fair scored a total of 95 out of a possible 100 on her Champion Shorthorn Baby Beef. She will use the scholarship toward defraying the expenses of a four year course at Virginia Polytechnic Institute.

Mr. Templeton Elliott, Lexington, Virginia, won the \$100 scholarship offered to boys for his outstanding success in Corn Club work, and has elected to apply the scholarship to a course at the Virginia Polytechnic Institute.

Miss Daisy Chapman, Webster Springs, West Virginia, won the \$100 scholarship offered to girls for her outstanding success in Sewing Club work, and has elected to apply the scholarship to a four year course at the University of West Virginia.

Mr. Herman Bowers, Alaska, W. Va. won the \$100 scholarship offered to boys for his work in Club Leadership, having organized and directed the Alaska Willing Workers Club of Mineral County. His was the most outstanding Potato Club record for the year. Mr. Bowers will apply his scholarship to a four year course at the University of West Virginia.

## The Lure of the Canadian Rockies

*Outline of Illustrated Lecture now being given by Dr. George Burbank Shattuck before our Chapters of Veterans*

Ottetail Valley; Three Sisters and Bow River; Black Canyon; A Wood Camp; Cathedral Peak; From Burgess Trail; Mt. Robson Glacier; Castle Rock; Fraser Canyon by Moonlight; Heart of Selkirks; Canadian Prairies; Reaping the Wheat; Cattle; Branding; Bow River; Kananaskie Falls; Calgary; Some Stony Indians; On to Banff; Banff the Beautiful; Sulphur Springs; Off on the Trail; Moraine Lake; Paradise Valley; Giant Step Falls; Mt. Temple; Lake Louise; Victoria Glacier; Glacier Climbing; The Bee Hive; Lake Agnes; Kicking Horse Lake; Mt. Stephen and Trilobites; Yoho Valley; Takakkaw Falls; Wapta Glacier; Twin Falls; Over Burgess Trail; Emerald Lake; Kicking Horse Canyon; The Chancellor; Police; Forest Fire; Snow Sheds and Avalanches; How Valleys are Eroded; Hell Gate; The Hudson Bay Company; Fort Garry and Winnipeg; Into the Selkirks; Sir Donald; The Great Glacier; Up the Asulkan; Mt. Robson; Mt. Assiniboine; The Lure of the Canadian Rockies.

NOTE: At the opening and closing of the lecture Dr. Shattuck quotes from the well known verses of Robert Service.

FARMER GIRLS AND BOYS WHO WON BALTIMORE AND OHIO SCHOLARSHIPS IN 1922. THE STRENGTH

1. Ella Holmes, Wakeman, Ohio, Huron County winner of Baltimore and Ohio 1922 scholarship in Ohio, welcoming members of the Food Club, which she now leads. Passmore, Chester County, Pa., winner of Baltimore and Ohio 1922 scholarship, and a member of the Brandywine Poultry Club. 5. Katherine Funkhouser, White

6. Roy Eidman, Mascoutah, Ill., winner of a 1922 Baltimore and Ohio scholarship. 7. John Shutt, Indiana Potato Club Champion. 8. Clarence Libbert, Aurora, Io. Howard Young, Everett, Ohio, Summit County winner of 1922 Baltimore and Ohio scholarship in Ohio. 11. Norwood C. Thornton, winner of 1922 Baltimore and the sweepstakes prize, a \$100 scholarship to the University of Illinois. 13. Herman Bowers, Alaska, West Virginia. 14. John Benson, 1922 Baltimore and Ohio scholars

THE CHARACTER SHOWN IN THE FACES OF THESE PRIZE-WINNERS, IS WORTHY OF SPECIAL NOTE  
1. Katherine Baker, Edgemont, Indiana. 2. Opal Speck, Sangamon County, Ill., winner of Baltimore and Ohio project at Illinois State Fair, 1922. 3. Emaline Pos Virginia, 15 years old, winner of 1922 Baltimore and Ohio scholarship for baby beef club work; picture shows Katherine with her prize beef at Virginia State Fair. 4. Indiana, and a prize capon from his flock which won for him the 1922 Baltimore and Ohio scholarship in Indiana. 5. Daisy Chapman, Kayford, West Virginia. 6. Ohio scholarship, Cecil County, Maryland. 7. Grace White, Fairfield, Ill., winner of first ribbon on best cockerel, Wayne County Show, this girl's pen of five won champion, Lawrence County, Pennsylvania. 8. Temple Elliot, 16 years old, Lexington, Virginia, winner of 1922 Baltimore and Ohio boy's scholarship for corn club work

# Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—  
Retreat from care that ever must be thine:  
How blest is he who crowns, in shades like these,  
A youth of labor with an age of ease.*

OLIVER GOLDSMITH—"The Deserted Villiage"

## Anton Zeppell

Anton Zeppell, retired sweeper, Locust Point, Baltimore, Md., was born on May 23, 1842. He entered the service of the Baltimore and Ohio on September 3, 1886, at Locust Point, as truckman. On April 1, 1900, he began work as cooper, and worked in this capacity for 17 years. On November 1, 1917 he was made sweeper, holding this position until the time of his recent retirement.

## John Fuller Lowry

John Fuller Lowry was born at Carey, Ohio, on May 30, 1851. He began work with the Chicago Terminal as flue welder, M. P. Department, at East Chicago, on September 11, 1901. On February 1, he took the job of boilermaker's helper, later serving successively as flue welder, boiler-maker's helper and gateman.

Mr. Fuller was a conscientious employe, reliable and loyal. He says he was never called "on the carpet" during his long years of service.

## William W. Wilson

Retired Carpenter William W. Wilson,

Akron Division, was born on December 12' 1856. He entered the service of the Baltimore and Ohio on October 15, 1901 as carpenter, Mansfield, Ohio. In 1909 he was made carpenter foreman; in 1918 he was transferred to Cleveland; in 1921 he began work as a mason; in 1921 he went back to work as carpenter. Later during that same year, he became leading carpenter, then assistant carpenter foreman, at Akron. In 1922 he again served as carpenter and worked in this capacity until his recent retirement.

## J. Stiles Platte

Retired Car Inspector J. Stiles Platte, was born at Republic, Seneca County, Ohio, on January 9, 1858.

Mr. Platte says:

"About February 1, 1889, I moved with my family to Chicago Junction (now known as Willard), Ohio. My family consisted of my wife and two daughters. There I accepted a position with the Baltimore and Ohio as ear repairman, Newark Division. I worked then under the supervision of Car Foreman Tiffany and Master Mechanic "Tom" Taylor.

"Two years later I was transferred to the Chicago Division as ear inspector, working all junction points between Garrett and Willard. During the past 22 years I have been stationed at Tiffin, Ohio, as joint ear inspector for the Baltimore and Ohio, Pennsylvania, and Big Four Railroads."

Mr. Platte was placed on the retired list on March 13, 1923.

## Richard L. Vernon

Richard L. Vernon, who began work for the Baltimore and Ohio as water boy and ended as conductor, was born on a farm near Sonora, Ohio on November 3, 1856.

He attended the public schools of Sonora, and in 1870 had his first railroad experience as water boy. In 1871 he was transferred to a carpenter gang; in March, 1872 he was transferred to brakeman. The next year he was promoted to conductor. In 1884 and 1885 he became general yardmaster at Zanesville. Three years later he left the service of the Baltimore and Ohio.

In 1889 he returned in the capacity of freight brakeman, and in 1898 was promoted to conductor, Newark, Ohio.

In 1878 he was married to Miss Sarah Jane Walters, of Sonora, Ohio. He has two daughters.

## John B. Sparenburg

John B. Sparenburg, retired tallyman, Camden Station, was born in Richmond, Va., on December 1, 1857. He was brought to Baltimore at the age of one year. Here he has spent the greater part of his life. He

# Safety Roll of Honor

## Staten Island Lines

**Captain Colby Stapp**, in charge of Tug A. C. ROSE, having in tow Barge BILLIE S. loaded with 17 tons sugar en route from Warner's Sugar Refinery, Edgewater, N. J., to St. George. February 18. Discovered when opposite Weehawken that river ice had broken planks in side of barge and that barge was taking water rapidly. Captain Stapp put syphon in barge to hold same afloat and proceeded to Steamship Pier 7, N. R., where he had previously observed a stevedore at work. Contracted with the stevedore to remove cargo from barge to pier. After making these arrangements, he notified tug dispatcher by phone of his action and requested assistance of another tug boat and a barge to load off shore so that entire cargo would be saved and also keep barge afloat. Barge was then within six inches of being decks to. Prompt action and good judgment used by Captain Stapp saved the entire cargo valued at \$24,400. and also kept barge, valued at \$8,000. from sinking. Barge was placed in dry-dock for repairs.

**Captain Roy A. Fort**, Tug BALTIMORE. February 13. Observed Float No. 155, eight cars, at Coal Dock No. 3, St. George, in a dangerous condition. Water could be heard running in under the breast log. Twenty-one inches of water in one corner of float and making water very fast. Reported condition to tug dispatcher, who issued orders to pump water out of float immediately.

**Trainman D. M. Sprague**, Train 11. December 21. Observed mail pouch lying alongside of Westward track between Huguenot Park and Annadale. Notified agent at Great Kills. Agent notified dispatcher; dispatcher instructed crew of Train 17 to pick it up. Pouch in question contained parcel post packages and was put off at Stapleton by crew of Train 17 for delivery to Stapleton Post office. The pouch had no evidence of being tampered with.

## Baltimore Division and Baltimore Terminal Division

**Operator C. H. Berry and Yard Clerk Charles Custy**. Carrolls. While on way to work found 11 inches of rail broken out of eastbound track, Mt. Clare Branch, just east of tower. This was a new break and rail was loose. Reported condition.

**Operator C. W. Proctor**. February 6. On his way home found broken rail just west of Bradshaw. Reported condition to Agent M. L. Mann, who reported it to dispatcher and protected traffic until relieved and until a new rail was put in.

**Brakeman S. L. Lambert**. Train Second 97, Engine 4474. February 9. Looked back over train coming into Bradshaw and noticed fire flying from under train. Notified Engineer Frick to stop. Went back to investigate cause of fire. Found two cracked wheels under C. N. J. 20830, 20th car from engine. Car backed off at Loreley.

**Track Foreman A. H. Lighty**, Champion Siding, Herring Run. February 15. Observed something wrong with train. Attracted attention of conductor, who stopped train by air from the rear. Investigation showed a door arm dragging under a car. Although a derailment occurred when the stop was made, the action was necessary under the condition.

**Conductor C. L. Smith and Flagman J. L. Eckrel**. East of Brunswick, February 13. High wind storm blocked tracks and tore down all wires. A tree fell just behind caboose of Extra West, Engine 4866. Conductor Smith notified dispatcher while Flagman Eckrel flagged all trains.

Conductor R. A. Erake

**Conductor J. J. Creamer**. Extra East, Engine 4594. February 15. While walking alongside of train at west end, near Germantown Siding, discovered broken arch bar on right side of rear truck of car W. M. 5720, loaded with coal. Investigation showed it to be new break. Conductor Creamer succeeded in backing car off siding, although side of truck was broken down and journal boxes twisted.

**Operator W. F. Hill**. Boyd. February 24. Observed truck broken on 11th car from engine of extra east, Engine 4594. Displayed stop signal at east end of siding, bringing train to standstill. Averted serious delay to traffic and possible accident.

## Cumberland Division

**Brakeman N. E. Hollen**. Cumberland, Md. January 10. While with Extra East 7203, noticed unusual movement of caboose in which he was riding. Investigated and discovered broken rail. Returned to telegraph office, notified operator, who called trackmen to make repairs.

January 22. While walking ahead of train, discovered broken rail on No. 2 track. Reported condition immediately, protecting track as he made his way to telegraph office. Trackmen made necessary repairs.

## Charleston Division

**Conductor R. Shelton, Engineman W. T. Powell, Baggageman C. C. McCune, Fireman James Buckner, Brakeman G. W. Short**. Train 36. March 6. Found rockfall on track just north of High Point, and by voluntary service removed debris. Train delayed only five minutes.

**Baggageman J. H. Hanson**, Adrian, Va. March 23. When Fireman W. A. Gray, Engine 2025, Train 57, was injured while taking coal at Adrian, Baggageman J. H. Hanson immediately came over and performed a good job at firing from Adrian to Gassaway.

**Conductor B. R. Bragg**. Extra 2946. Found car Baltimore and Ohio 165956, merchandise car from Clarksburg with seal broken. Immediately made wire report, enabling Police Department to take up the matter at once. These responsible for pilfering of car were arrested and properly handled a few days later.

**Conductor A. Kiddy, Engineer L. R. Shemo, Fireman L. D. McTheney, Baggageman D. H. Fink, Brakeman B. G. Patterson**. Train 57, Engine 2019. February 27. Found rockfall on track at Mile Post 104 plus 12 poles. Volunteered assistance and cleared main line tracks without excessive delay to train.

**Foreman A. D. Wilfong**. Buckhannon, W. Va. March 16. Showed interest in saving Company's property by forwarding to General Foreman Kelly the following articles: nine grease cup plugs, one coal pick, two set screws, one generator door, and one rod key—all picked up on line of road.

## Statement of observances and corrections by operators, Cumberland Division February and March 1923

Totals						2	2	2	2

x Indicates car set off.

**Mr. A. D. Stout.** Bower, W. Va. While walking between Vanwith and Bower, found a slide in cut. Returned to Bower, advising our agent of the obstruction.

**Mr. Okie Vawater.** Ten Mile, W. Va. Discovered a badly broken rail near Ten Mile. Notified **Mr. D. F. Romine**, a former employe of the Company. Mr. Romine walked up the track and flagged passenger train, advising them of the obstruction.

**Conductor G. B. Green, Brakeman F. Reese, Brakeman T. W. Hosey, Engineer G. C. Smith and Fireman E. C. Harter** voluntarily assisted in clearing a slide which blocked the main track.

**Yard Clerk F. B. Summerfield** has been commended for close observation in connection with his duties.

**Trackman Norman Frame.** February 19. While off duty found a broken rail at M. P. 87 plus 18 poles. Flagged train 736, advising crew of obstruction.

**Fireman R. B. Norman.** Noted brake rigging down on a passenger car.

**Conductor W. S. Roush and Brakeman J. L. Smith** rendered assistance in prompt movement of bad order cars.

The following engineers have been commended for making over 100 per cent. fuel performance in February: **Accord, Spencer, Dawson, Whalen, Powell, Wallace, Paxton, Shomo, Brannon, Jarrett and Farry.**

**Mr. Ray Arbogast.** Selbyville, W. Va. March 17. Discovered broken rail a half-mile east of Alexander. Went to considerable amount of trouble to notify section foreman so that necessary repairs could be made.

### Chicago Division

**Operator F. W. Reed, N. Y. Tower, Garrett, Indiana.** February 5. Discovered pair of broken angle bars on eastbound track, a half-mile east of N. Y. Tower.

March 3. Operator Reed also discovered broken rail about two miles west of Avilla on eastbound track. Report properly made in both cases, repairs made and possible accidents averted.

**Conductor O. C. Kistler.** January 20. In passing east siding Galatea, with Engine 4299, noticed broken arch bar on car Baltimore and Ohio 80755. Notified flagman Lamb, who told Conductor Baxter of condition. Conductor Baxter had car set off for repairs at North Baltimore.

**Signal Supervisor P. H. Carroll.** Tiffin, Ohio, March 2. Observed arch bar of a car in a section of No. 94 down and dragging on track. Flagged train by hand and had repairs made.

**Operator C. E. Hanaway.** Wellsboro, Indiana. February 17. Discovered hot box on Extra 4160, East as train was passing his tower. Notified conductor. Train stopped and repairs made.

**Operator W. P. Donohue and Mr. John P. Dell.** Tiffin, Ohio. February 25. While off duty discovered ties badly cut, just opposite Webster booth, east siding, Kellar, probably caused by something dragging from Engine 4158 East. Also noticed that at spur which leads from east siding to stock chutes there were two large pieces of iron wedged in frog, one of which protruded above rail. Obstruction removed, averting possible derailment. (Mr. Dell is a former employe of the Baltimore and Ohio M. of W. Department.)

**Clerk E. L. Kinsey,** Bremen, Indiana; **Coal Dockman Charles Warren,** La Paz Junction, Indiana, and **Operator E. A. Thornberg,** La Paz Junction. March 15. Mr. Kinsey observed hot box on car of Train 13; called operator at La Paz Junction. Operator called night coal dockman, who flagged train at coal dock. Hot box found on car Baltimore and Ohio 193594. Car set off. Quick action and cooperation of these three men averted possible accident or delay.

**N. Y. C. Towerman Reglein,** Indiana Harbor, and **Baltimore and Ohio Operator O. H. French.** March 7. Towerman Reglein discovered hot box on our train No. 13. Endeavored to flag train, but finding nobody received his signal, telephoned Operator French, who handled the condition. No. 13 was flagged at Wolf Lake and hot box repaired with slight delay.

### Newark Division

**Mr. Charles Wilson,** passenger on Train 56. Felt unusual jar on rear trucks of coach when passing one and one-half miles west of Marietta, Ohio. He reported the condition to our conductor and later inspection showed a broken rail at the point where the jar was felt.

**Conductor J. P. Trickey and Brakeman T. C. Snodgrass.** February 2. Observed rough place in track while caboose in Train 95 was passing. Train was stopped and a break of five feet was discovered in rail of main track.

**Signal Maintainer R. L. Flint and Helper V. E. Shepler.** February 10. While coming west on No. 4 track near Black Lick, Ohio, found part of brake rigging from equipment lying on south rail of No. 2 track, the brake shoe directly on top of the rail. This is a high-speed track, where an accident easily might have occurred. These men removed obstruction and made proper report.

**Operator A. J. Swigart.** Monroeville, Ohio. February 21. Noticed brake shoe drop from car of Train 83, passing his station. Shoe wedged in frog; caboose and car next to it jumped over obstruction without leaving track. Operator Swigart removed obstruction at once. This track leads to W. & L. E. Transfer and at that time Train 74 was just pulling out of siding. A possible accident to this train was averted.

**Operator N. McClerg.** Cleveland Avenue, Columbus, Ohio. February 25. Ob-

served ties projecting from car in Train 98. Reported condition to dispatcher, who had train stopped at "BW" Tower and tie replaced on car.

**Mr. Robert Koontz.** St. Louisville, Ohio. March 4. Discovered broken rail in main track just west of St. Louisville. Promptly flagged Train 93 and notified all concerned.

### Akron Division

**Agent M. A. Stroup.** Lester, Ohio. March 12. While checking yard discovered a broken arch bar on Baltimore and Ohio Car 238333. He notified car repairman who had repairs made.

**Engineer B. M. LaFever and Brakeman H. S. Dowling.** Noticed bent axle in car of their train at Willard. Had car set out before any damage occurred.

**Section Foreman C. W. Stentz.** Lodi, Ohio. Noticed U. P. car 13491 with nuts off box bolts and bolts out of arch bar strap. Arranged to have car repaired.

**Operator W. E. Milliken.** Greenwich, Ohio. March 12. Noticed fire in Wabash car 19996. Notified train crew, who had fire extinguished before any damage occurred.

**Conductor T. O'Leary.** February 17. Found broken rail on No. 1 track, Ohio Junction. Notified trackman, who had repairs made.

### St. Louis Division

**Track Foreman William Ruhlman.** Dillsboro, Indiana. February 24. While working on cinder fill west of Dillsboro, observed brake beam down on car Baltimore and Ohio 68231. Immediately notified conductor, who stopped train and removed brake beam.

**Operator H. Tobias.** February 22. While train 58 was passing station at Blocher, Ind., observed blazing hot box on rear car of train. Immediately notified dispatcher, who had train stopped at Commiskey and box given attention.

### Cleveland Traffic Birthday

By A. R. Strome

ON February 19, the employes of the Traffic Department at Cleveland, including Assistant General Freight Agent's Office, Coal Freight Office and Division Passenger Office, gave a noonday luncheon to Assistant General Freight Agent Kimes and Chief Clerk Leingang, in honor of their "umpty umph" birthday.

Promptly at 12 o'clock, work was suspended and a delicious lunch, consisting of "hot dawgs," potato salad, baked beans, pickles, doughnuts and coffee, was spread on several of the desks.

Coal Freight Agent J. A. (Jack) Scheuerman assumed the duties of master of ceremonies, and when it comes to rare humor and ready wit, Jack has nothing else but.

After the repast, Mr. Scheuerman made a few appropriate remarks to which Mr. Leingang nobly responded. While reticent about his tender age, he did divulge the open secret that on May 1, next, he will round out forty years of loyal service with the Baltimore and Ohio.

We also had as our guest on this occasion, Miss Mabel Gessner, passenger representative from Baltimore, who was visiting Cleveland in the interest of the National Good Will Campaign, and who gave us a brief talk in which she outlined the purpose of the work.

Mr. Charles Wilson, a passenger on Train 56, who helped us "stop a leak"

## Among Ourselves

### Baltimore and Ohio and Baltimore and Ohio Annex Building

#### Law Department

Correspondent, GEORGE W. HAULENBECK

#### NOTE:

The editor has received an interesting letter from the popular scribe of the Law Department, telling of an operation which, at this writing, the correspondent is undergoing. The operation is for a cataract on his right eye.

"It was short skirts that brought on this eye trouble," says Mr. Haulenbeck.

There is no doubt but that many of the readers of the MAGAZINE will now understand that it is his vigilance that has kept Mr. Haulenbeck in the class with the younger employes of the Baltimore and Ohio during the many years that he has been with us. Certainly everyone of us will join in wishing continued strength and good health to the one who has made happy so many readers through his cheery notes.

#### Editor.

The great blizzard of 1888 occurred March 11, 12, 13 and 14. No trains running. An opera troupe, billed to appear at the Holiday Street theatre the week of March 11, was held up in the railroad station at Jersey City from Sunday night, March 11, until Friday morning following, when the tracks were opened to Baltimore and trains began to run. The troupe appeared Friday night of that week. The Holliday Street theatre at that time was a first class place of amusement. It has since been dismantled. The newspapers printed amusing accounts showing how the players passed the time in the railroad station at Jersey City in their enforced imprisonment.

#### The Blizzard of 1914

The blizzard of 1914 occurred on March 1. The Baltimore Sun Almanac of 1915, page 95, contains the story. Train service to the north was completely suspended. In Baltimore, the wind blew over fifty miles an hour, accompanied by a very heavy fall of snow. On the fourth of March we had the greatest difficulty in getting our trains into the Union Station at Washington, and it was Mr. Taft's inauguration day, too.

#### Baltimore Belt Tunnel

The first regular traffic train of the Baltimore and Ohio Railroad passed through the Baltimore Belt tunnel and over the Belt Railroad on February 1, 1895. The Baltimore and Ohio originally intended building an elevated structure from Camden Station to connect with its Philadelphia Division,

but this was changed and a tunnel under Howard Street constructed instead. Colonel Henry T. Douglas was the chief engineer. He was a number one official all through. John B. McDonald was the contractor and he was mighty nice. The tracks in the tunnel, say at the Academy of Music location, are 65 feet below the surface of Howard Street. We suffered from claims at that time made by some property owners, that the running of our trains caused a jarring sensation. But this was all moonshine. The idea of a train in a tunnel 65 feet below the surface causing a jarring sensation!

#### Cost of Big Buildings

Baltimore City Court House cost .....	\$2,250,000.00
Baltimore and Ohio Building at Baltimore and Charles Streets, cost in 1906 .....	\$2,200,000.00
Union Station of the Pennsylvania Railroad, cost in 1912 .....	\$826,795.42

#### Judge James A. C. Bond

Judge J. A. C. Bond, who with Francis Neal Parke acts as our division counsel in Carroll and other counties in Maryland, paid us a visit the other day. I would not care to interrogate the Judge as to his age, but he was our counsel before I came here in 1881, over 42 years ago. He is a wonder. Judge Bond declares that when John Kissig Cowen was our general counsel, away back in the past before the day of typewriters and the installation of young ladies (bless their dear little hearts) into the various departments of our service, he, the Judge, and this correspondent, now in his 80th year, did all the Law Department work. Judge Bond and Mr. Parke are winners in Court. I believe in that. I do not approve of this rushing into litigation to squeeze a corporation. It is wrong, and I like to see the Company win in these contests.

What a sorry plight we would be in, were it not for the great railroad corporations of the country, the Baltimore and Ohio and Mr. Willard at the head and front of them all. Amen!

#### Philadelphia & Reading Railway Trainman

There is a young gentleman, a trainman in the Reading Railway service, who boards our train No. 524 every Saturday at our Philadelphia Station. When the train reaches Wayne Junction, where I change to a Bethlehem train, he gives me every aid and assistance in alighting. I have never told him that I am in the octogenarian class, but he seems to divine it. He is always at his post and I am greatly benefitted by his attention.

### Baggage and Milk Department

Correspondent, MABEL L. MENGES

We are trying to puzzle out just why the cake made and donated by the attractive young lady in the Passenger Department and which was raffled off in that office during the recent Good Will contest, was won by the most handsome and only eligible young man who sits just across the way from Miss Hofstetter. We should also like to know why the cake was awarded, cut and served with ice cream before those who took the most chances on it even knew the raffle had been concluded. And was this done so that the same young man could eat most of it himself? This department feels that it was badly discriminated against, and while we hesitate to criticize, it looks much like a prearranged affair to impress the young man with a certain young lady's culinary ability. Will Mr. Hubbel please write his views on the matter for the next issue of our MAGAZINE? We are sure it would be delightful reading.

Our Pittsburgh people were, no doubt, surprised and grieved to learn of the death of Mr. B. F. Otto, president of the Harmony Creamery of that city.

Mr. Otto was the originator of the steel, glass-lined milk-cream tank cars which are being operated between West Farmington and Pittsburgh and which proved to be such a great success.

Our men at Pittsburgh always found it a pleasure to discuss and to transact business with Mr. Otto, as he held a high regard for the service and employes. The fact that he went out of his way to favor our Company in other ways, shows the pleasant relationship between the Harmony Creamery and the Baltimore and Ohio.

"Jinks" seems to be reigning supreme over this office, judging from the list of absentees because of sickness. We have all been taking turns, in fact, we haven't waited for our turn. Several have been absent at the same time, and as the office is small, the force has been somewhat depleted. However, with the return of Trace Clerk C. O. Boyd, who was taken suddenly ill and was confined to his home for a week, we are all back at work again with the exception of Charles Hines.

Three weeks ago, while Charles was running to catch his regular early Sunday morning train for home, he fell and injured his knee. He continued his trip home, but before reaching there he had entirely lost the use of his knee, and has been confined to his home ever since. However, at the present writing, he is able to get about with the use of a cane. We are now hoping to see him back at the office very soon.

We have missed the frequent calls of our faithful friend, Mr. Bradley Worthington, train baggageman, who stops in to see us between runs. Mr. Worthington has been quite ill for several weeks, but C. O. Boyd and C. H. Frederick of this office, who went to Hagerstown recently to let him know that we miss him, report that he is now convalescing and that we may soon look forward to his usual calls.

### Engineering Department

Correspondent, O. K. EDEN

On account of the extensive construction program planned for this year we have taken on new men in all phases of the engineering department.

I used to think that all E. H. B. used to live for was to go driving in his automobile or to read, but I have been sadly mistaken. Both automobile and books have been placed in the discard. And why? Because

# Keep Cars Moving

Business can't move without freight cars. Standing freight cars limit production and railroad revenues

## Keep Cars Moving

a certain "sweet young thing" has laid claim to all Harry's spare time. I hope that he will give us proper notice, so we may save up our pennies for the eventful occasion.

So glad to say our team is still leading the league in bowling by three games, with 62 games won and 13 lost. Keep it up, fellows! Only a few more weeks and then you will receive your just reward.

And now at this time of the year thoughts turn to baseball. As we did last year, the work of organizing a team to represent our department in the Baltimore and Ohio League is now under way. Manager "Joe" Gallagher, with the assistance of "Henny" Seitz, will have charge. All indications point to a stronger team than was produced last season as, in addition to the veterans, there is considerable new talent to draw upon.

Which reminds me that in a few more weeks tennis will commence to create interest. Last year we had a team, and I fail to see why we can't repeat this year. Anyway, there is a certain "young" man with whom I expect to have some merry battles this year.

Don't forget to keep an eye open to "stop that leak." Suppose we colloquialize Dr. Coue's slogan to read: "Every day in every way we are saving more and more for our Company." Try it and see how much you can really save.

I read in the paper the other day where the authorities are going to have another careful crossing campaign, and this can serve as a sort of forerunner in reminding one and all to CROSS CROSSINGS CAUTIOUSLY. If every one would observe the rule—Stop, Look and Listen—I am sure there would not be so many disastrous accidents. Of course, that doesn't mean to stop your automobile, or whatever you are driving, in the middle of the railroad tracks and then stop, look and listen!

I was talking to a certain young lady some days ago, who used to work in our department, and asked her why she never came to visit us any more. Her reply was "I am too busy." I wonder!

**Office of District Engineer, Baltimore, Md.**

Correspondent, J. FORD COLLISON

George Elmer Schaeffer is back with us once more. He arrived the first of the month with his baggage and a headache from the wilds of Parkersburg, and has since fallen from grace. In fact, George and Mr. Teders are the only two who absolutely refuse to lead the prayer meetings.

"Our Arthur" has just returned from his vacation among the bathing beauties at Palm Beach. He claims to have been at Miami and Jacksonville, but from the time he stayed he must have gone to Cuba. There is something very peculiar about that trip; no one even received a postal card from him. He did not take his wife with him!

Paul J. Feeser, John R. McCrone, Jr., and W. H. Meriwether have joined us and are at work at Locust Point on the new Grain Elevator. Boys, you are welcome to our family circle.

"Bill" Gwathmey has been down in Old Kaintuck, supposedly on business, but we have our doubts. Let us see your cellar, "Bill."

"Bill" Kennedy is the bane of the correspondent's existence. He never does anything but work. But I suppose a good worker like "Bill" doesn't have time to do things for us to write about.

"Eddy" Little, "Tom" Sparks and "Cy" Young continue their good work at the prayer meetings. They have succeeded in converting "Ed." Riley, of the Real Estate Department, to their ranks. In fact, "Ed." insists on being the leader.

The work on the Grain Elevator facilities is getting under way and in a short time the old Best and Only will have modern grain handling facilities which will compare favorably with our coal handling facilities at Curtis Bay.

**Office of District Engineer, Pittsburgh, Pa.**

Correspondent, J. M. WHEALAN,  
Accountant

We are pleased to announce the arrival of a new member of the organization, in the person of the young son of C. W. Leasure of this department, who entered the railroad world on Friday, March 2. Mother and son are doing well and "Dad" is doing his best not to bust, but you ought to see Granddad, who is a prominent passenger conductor on the "Pike!"

Certain members of the organization are sporting new titles dating from March 1, and what is more important, new figures on the pay check. The promotions are well and honestly deserved, and the local column of the MAGAZINE extends its hearty congratulations.

We believe it to be all right for a married man of years' standing to wear rubbers (as witness the fact that we wear them ourselves), but when a newly married one who would never wear them before, blossoms out in a pair, well, it looks suspicious, that's all.

The homeing instinct has become quite prominent again as Spring nears and the old question as to whether it is better to buy or build is being decided about the time we go to press.

In common with all the other members of the Baltimore and Ohio family, the members of the Pittsburgh branch of the Engineering Department were delighted with the result of the "Good Will" election, which showed that Miss Nina Spengler had been elected by a handsome majority. We are all proud to have had a hand in her election and feel that she will be a worthy representative of this great corporation.

With the conclusion of these notes for the month of April, 1923, your correspon-

dent has been permitted to round out his first year of service as Pittsburgh correspondent of the Engineering Department. Doesn't seem possible, but it's true.

**Office of the General Freight Claim Agent**

Correspondent, NORMA H. APPLGARTHE

Some complaints have been received regarding the staleness of the news in the column "Among Ourselves." It is quite true of this department, as of all others, that the wedding, funeral notices, etc., are well known ages before that are published in the MAGAZINE.

In order to have in the MAGAZINE an article of interest, a suggestion was made that a certain question be asked the employees of this department. Accordingly a questionnaire was distributed, asking, "WHAT DO YOU DO ON SUNDAY?"

A ready response was received from the men, proving beyond doubt that the girls are not willing to talk about themselves. However, some of the answers are both interesting and amusing, and given below are a few of them:

1. Careful concentration on how to get "disposals" on Blue Monday.
2. Dress my seven children and go to church.
3. Could be sent to jail for some of the things, and so long as the present Congress holds sway I must hold silence.
4. Stay at home and make home brew, but you must keep a-still.
5. Oh, don't ask me, you know I'm single.
6. Sleep as long as the new baby will let me.
7. Take my weekly bath whether I need it or not.

Mr. Townsend was asked to fill out his questionnaire as to "WHAT HE DID ON SUNDAY," but stated he could not do so until he asked his wife. Lots of wives are bosses, but few husbands admit it. Let's hear from a few more honest men.

We wish to extend our congratulations to the Young Ladies' Bowling Team of the Auditor of Freight Claim Agent's Office. Although they won a glorious victory over our girls, we are still game and ready to challenge them again.

They needed encouragement; now that they have it, let us see if they can hold their record. When shall we meet again?

The office duckpin team is still keeping up its good work, having won 32 out of the last 36 games played. They report that they will safely finish third place and regret the bad beginning they suffered on account of insufficient number of members, which has had the tendency to keep them from their usual stride of league leaders.

Captain Riggan wants new recruits for season 1923-1924. Those feeling qualified will report to him not later than August, with application for membership. Please do not forget! Sign up right away to make sure.

We announce with sorrow the death of Mrs. Christian J. Smith on the afternoon

H. Baker Tall, clerk, Relief Department

of March 1. Words are inadequate to express our deep sympathy and regrets to our comrade and fellow clerk.

Mr. Stork seems partial to the boys—he just left Mr. Fink and Mr. Seigman one each.

This office made a good showing in the "Good Will Campaign," having secured 4832 votes for Miss Spengler. A vote of thanks is due the Committee and all others who helped in this good cause.

Miss Delma Wingate is suffering from a severe attack of hives. "Del." did you ever try "BLACK FLAG?"

Mr. Davis must have read "Pellanna," for when he saw the questionnaire, asking, "WHAT DO YOU DO ON SUNDAY?" he became all excited and exclaimed, "Well, thank goodness I still have Saturday afternoon left that I don't have to account for!"

Messrs. Austin C. Sauer, John Warner Cooper and Miss June Horn are the latest recruits of this office.

**Printing Department**

Correspondent, H. R. FOGLE

New members added to our force include Frank Kessler, Frank Lijeski, H. A. Shea, A. Oppenheimer, Emil Moser, Walter Weickert, Martin Hendricks, John Levin, Hugh Griffith, C. Hicks and last, but not least, our old friend "Ernie" Reinhard has returned to the fold.

Several of our fellow workers have been on the sick list. "Fred" Feusahrens and your correspondent were out because of "Flu." Mrs. Mary McNeir has returned after being away a month; Walter Weickert has returned after seven weeks' battle with "flu." Others who were away a week or more were Hugh Griffith and Operator Markland. We are glad to see everyone back.

The correspondent and associate correspondent, and other friends recently paid a visit to our Capital City. Proofreader Shackelford resides there and he invited us very kindly, to stop at his home for supper. We certainly enjoyed the "banquet," for banquet it was, and we were a little envious of Brother Shack. Those hot biscuits—oh boy! We had to pull "Reds" away from the table.

We are glad to welcome back Mrs. Elizabeth Knapp, Bindery, who has been sick for several months.

It is with regret that we announce the death of Proofreader Shackelford's five year old daughter, Virginia, on March 9. We extend our sincere sympathy to him in his bereavement.

C. J. Lehmen has returned after a serious siege of pneumonia.

Our old friend "Doc" Dillon, he of "job stone" fame, is now holding down a keyboard. Good luck, "Doc!"

Congratulations are being extended to George Behr, "Beau Brummel" of the composing room, who was married on January 16 to Miss Genevieve Osterman.

**Telegraph Department**

Correspondent, C. J. OWINGS

"Stop That Leak" when you telegraph by using CODE, SYMBOL, BREVITY.

It is with pleasure that we welcome Inspector Paul Miller, who was recently transferred from the Western Union office in Philadelphia to this department.

Another change has taken place in our office force. Mail Clerk Thornton Norris has been promoted to clerk, assisting General Supervisor Time Service Donnelly. William Scibel, former messenger, "GO" Telegraph Office, has taken his place.

Suspicious! Not so long ago a certain young lady received a telephone message from the Capital. Of course there's nothing in receiving a 'phone call, but it is reported from a reputable source that this young lady did the next day journey to Washington. For what purpose? Well—that's the mystery. Ask Betty.

Again the influence of that irresistible youngster, "Cupid," has been felt by the office. Though not a member of the Telegraph Department personnel, he came perilously close. The victim of Cupid's dart is Miss Genevieve Sessions, niece of Miss Claypoole.

**Office of Assistant Comptroller Deverell**

Correspondent, J. A. RUPP

No Indistinct Howling on the Baltimore and Ohio

It was lately commented in a local paper that one million people in this country cannot speak English, adding the witty remark that they wonder if train announcers are

included. Well, the Baltimore and Ohio conductors and train announcers are exceptions because they call in a loud, understandable voice, the names of stations, as well as the destinations of trains, to the satisfaction of all patrons.

**Neatness**

While there is no occasion to be like the wax manikins of a window-dresser, it should be remembered that good personal habits of conduct and dress have a great deal to do with the manner in which we are judged by our superiors. This effort does not constitute a proud spirit but signifies a commendable spirit—one which gets results in self-respect and shekels, regardless of the opinion of the shiftless.

The bowling team of the Miscellaneous Ledger desk of this office ably defeated the Foreign Roads' team, also of this office, by 107 pins in a duck-pin contest staged at the Plaza Alleys on the afternoon of February 24. The ardent rooting of Captain Busick was an outstanding feature:

**Total Pins**

Miscellaneous Ledger Team.....1,315  
Foreign Roads Ledger Team.....1,208

Net Lead..... 107

Our sympathy is extended to Malcolm A. Digges, who recently lost his mother.

**Auditor Merchandise Receipts**

Correspondent, P. HENRY STARKLAUF

Our Good Will candidate went over the top in the contest, and, representing this office, we should feel that it will be a double representation, this office and that of the Company. The donations subscribed will be used to rebuild devastated France. We are anxious to hear all about it on your return, Miss Spengler. So here's wishing you Bon Voyage.

Little John Thomas Spurrier, whose daddy, W. F. Spurrier, works at Camden Station, and whose mother was formerly Miss Ruby Durney, stenographer, Transportation Department

# Keep Cars Moving

Keep cars moving to keep business going. Freight cars are a business necessity

## Keep Cars Moving

After washing up on Washington's Birthday, a hike started on the Washington Boulevard at Morrell Park at 6.45 a. m. to Washington, D. C. Seven of the eight contestants finished. Evidently the portly young man hadn't trained down quite enough for the trip. Here's the time: Ross Tarr dropped off at Branchville (33 miles) taking the trolley to Washington, D. C., where he met George Koehler and Robert Machin at the Union Station, who finished their run for the 5.15 train. G. S. Moore and F. A. Kellenberger reported at 6.01 p. m.; James Spurrier, N. E. Burman and Albert Snyder reported at 6.59 p. m. The last five were greeted by Cap'n "Bill" Straughn, "our own Bill," and they surprised the whole bunch of us by reporting for duty the next day, and they were not overly worn out at that. Fellows, we really didn't think you'd make it after all.

Harry Ignatius Fuller, who entered the service of this Company on November 2, 1900, died on February 20 after a lingering illness and was buried on February 23. High mass was sung by the Rev. Smith, St. Pauls Church, Caroline Street. The active bearers were J. R. McDonough, J. Cunningham, D. E. Elkert, Captain Ritterpusch, of the Coast Guard, Fort Howard; William McGee and Thomas Joyce. Honorary bearers were fellow members of Maryland Council, Knights of Columbus. The family have our condolence.

Yes, the girls have taken up bowling and are at it periodically during the week. They are averaging about 85 or 90 now and if they keep it up they surely will be sending out challenges yet. Look out, fellows!

The stork recently arrived at the homes of Charles Pailer, J. C. Mullinix and our former Miss Helen Shenkel. Congratulations!

**Auditor Coal and Coke Receipts**

Correspondent, JOHN LIMPERT

The game is getting down to the final stages, and, as predicted, a close race has been the order. At this writing only a few games remain to be rolled and it looks as if it may take the last night to decide the final winner. Standing of teams, including games of March 16, was as follows:

Little Annette, the old girl herself, Office of Auditor Coal and Coke Receipts

	PER		
	WON	LOST	CENT.
Head Lights.....	47	28	627
Royal Blues.....	45	30	600
Pull Men.....	37	38	493
Bumpers.....	21	54	280

It wont be long now before the old Knife and Fork League gets in its work. We can almost hear the rattle of the heavy artillery.

On February 17, C. W. MacCubbin rounded out a service record of 40 years, the last 24 of which have been continuous and in the Accounting Department. Surely this is a record to be proud of, and we congratulate you "Mac" old boy.

W. B. Stockett, another of the old guard, has gone to his Maker, succumbing to the inevitable at Eudowood on February 18. When health and strength permitted, Mr. Stockett was a hard and conscientious worker, but failing health during the past five years only allowed him to work at intervals, and conditions became such that he was unable to work at all for the last two years.

While mourning the loss of our friend and fellow worker, we would not wish him back in his suffering.

Sympathy of the entire office force is extended to J. J. Conroy, whose wife died Sunday, February 25. Beside Mr. Conroy, one child is left to mourn the death of her mother.

One reason given for the excuse for "French" Gartrell trying to grow a mustache is that he has his cap set for a widow out Irvington way. It is also rumored that he has considerable influence with the waitresses at a nearby lunch room.

**Auditor Passenger Receipts**

Correspondent, FRANK O. CLARKE

Our office again went "over the top" with collections for the Good Will Contest; another victory which we are all proud of. The total amount collected by our various committees amounted to \$300.40

Our office committee consisted of Miss Irma Clem and Charles Lewis; City Wide Committee, Misses Theresa Cook, Mildred Fisher, Helen Harte and Helen Tate; Confection Committee, Misses Lillian Conway, Mollie Hamlen, Blanche Broderick, Augusta Fenton and Irma Clem; Special Committee consisting of Marvin Clarke.

Miss Cook, City Wide Committee, was awarded a gold wrist watch for securing the largest number of votes for Miss Spengler.

H. S. Phelps, our wide awake Interline Division clerk, has been on the job again securing business; also our clerk, Charles Warwick. I am advised by Mr. Warwick that he persuaded two friends to use our line to Chicago in preference to competing line. He is keeping in close touch with them and is going to have them return via our lines.

We wish to extend our sympathy to Joseph Meyd, who recently lost his mother.

Charles A. Rogers, Sr. died on March 3 at Church Home Hospital. The following members of Baltimore Division—Baltimore and Ohio Veterans' Association acted as pall-bearers: Brother L. M. Grice, assistant auditor Passenger Receipts, R. M. Billmeyer, J. H. Plunkett, Charles Lewis, C. R. Purdy and J. M. Finn. Brother L. M. Grice acted as chaplain and read the burial service from the new ritual. Thomas A. Cook acted as honorary pall-bearer. Mr. Rogers had been in the service of the Company since October 1, 1905.

Earl Hoppman has bought an automobile, and from all appearances he will appear on the race track this coming season.

Genius "as is" in the Valuation Department

It won't be long the folks all say,  
But still she keeps us in suspense.  
A sparkling band adorns the hand  
Of little "Betty Pentz."

**Valuation Department**

Correspondent, J. A. RENEHAN

On the morning of January 29, Colonel Jenkins was much surprised when he found that his 54th birthday (Sunday, January 28) was quietly remembered by a unique birthday cake placed in his office in his honor. The 54 candles stayed put and brought smiles to all who saw the cake. Many, many more happy birthdays to you, Colonel Jenkins!

We are more than glad to hear of the improvement of Miss L. R. Ritter, who at this writing is in the Johns Hopkins Hospital. Here's hoping she will be at her desk before long.

H. E. Schutte has resigned from the service to enter another field of endeavor. We wish him every success in his new undertaking.

H. G. Spates, another member of this department, recently left the service to enter a new field. We hope that he, too, meets with success.

The resignation of Mr. Schutte resulted in promotions for L. C. Turner, W. R. Stevens, P. J. Gumpman, E. P. Poeter, J. E. McCann.

We are glad to report the return to our ranks of J. L. Tobin.

George Bailey, formerly of the Division Engineer's Office, Grafton, is now a member of the Valuation Department.

**A Big Dollar and A Small Penny**

A dollar and a penny met. The penny had a bright, clean face but the dollar was dirty and proud.

"You think you are gold but you are only cheap brass," said the dollar.

The penny replied, "I am what I am and claim to be no more."

The dollar swelled up with pride and said, "I am patriotic, I am trustworthy, I have the emblem of liberty on my bosom, and the United States Government has placed these words on me "In God We Trust."

After a little thought the penny answered, "I grant you all that, but I go to church oftener than you do." —Staley Journal

# St. Pat's Day Celebrated by Dance of Auditor Freight Claims Department

By Nellie F. Collison

A SECOND dance of the season was held by the Welfare Association of the Auditor Freight Claims Department, at Moose Hall, on the evening of St. Patrick's Day. The decorations and color scheme would have thrilled any lover of the old Emerald Isle, and favors in the way of becoming green hats were conspicuous with shamrock.

James O'Toole was Master of Ceremonies and his genial Irish wit scored in a speech for the Mayoralty nomination on the Prohibition Ticket, which aspiration has its origin in a request made by the ladies. Not feeling competent to talk his way into the hearts of the electors, he brought with him his "German Trio," Messrs. John H. Kernan, James J. Haggerty and Luke Malloy, to soothe the savage breast with sentimental ballads and soft lullabies. Later in the evening the announcement was made that because of the fascination which Mr. O'Toole exercises over the Weaker Sex, he was far in the lead—of the Police.

At the door we were greeted by our chief clerk in the role of "Collector of Tickets." As usual he was very careful that we did not move on without producing the necessary cardboard.

Soon the coaxing strains of Water's Novelty Orchestra had us on our feet and with the past behind us—forgotten, we were happy, drifting, swaying to rhythm and rhyme. The jazzy strains that were wafted towards our W. M. C., turned back the Universe for him to days when his locks were more in number and not yet silvered, and with surprising agility he jumped from his perch, held his partner in position, and with a dreamy look in his eyes, he was again, for the first time in forty years, drifting to strains of a dreamy waltz. Words are inadequate to describe his pleasure, but we would not have you miss it and call attention to a marvelous sketch by our gifted artist.

Our Richard N. was also conspicuous by

the dreamy light in his eyes and shared with the younger folks all their pleasures, gliding gracefully to the strains of waltzes, fox trots and one steps, with his sweetheart in his embrace—his wife.

R. M. T. was very exclusive, choosing the same partner for every dance, and floated gracefully in and out the entwining serpentine with a soft, sweet light in her eyes significant of, "I only know love what our love will be, You will love me, love, and I will love thee."

A few of our gentlemen were conspicuously absent, or so it seemed to one petite maid. At times our Otten's eyes were dewy—her thoughts were far away in Pittsburgh, and when Emily Hazel saw one J. T. P. with another lassie by his side, she exclaimed in French-South Carolinian. In the Paul Jones this same Hazel slipped and fell, but for which one of the gentlemen she was holding by the hand, we have not yet discovered.

Our "Joe" demonstrated his histrionic art and in the role of Senor Jose Romero proved that it would be easy for him to snatch the laurels from Rudolph Valentino and Ramon Navarro. His Spanish accent was excellent and in the sentimental lines he was particularly successful.

Early and often queries were made concerning any wrong committed by the Irish against our G. W. R. He was resplendent in that RED tie, but fears arose within our midst lest anarchy be lurking in the background.

HEB's forecasting was missed and J. T. P. disappointed us a wee bit by not keeping his promise to darken his upper lip and thereby make those two or three straggling hairs discernible to all of us. HB's solo dancing on the side was enjoyed only by the fortunate. Rather than give up her partner, Margaret W. gave an exhibition dance encircled by Paul Jones and his friends.

A little before the big clocks chimed the

The jazzy strains were too much for "W. M. C."

hour of midnight our W. A. D. made himself generally useful and very popular. He was head waiter of the clan and handled the service par-excellent, imitating perfectly Miller's oldest and most reliable, lacking only the apron and towel. He, too, was a popular dancing partner, doing a dreamy waltz with our Lillian P., and the recipient of lessons from Emily Hazel, how to do it in the South Carolina way, while Mrs. D— did a good piece of chaperoning.

After our second dance was pronounced a marvelous success (and here we wish to express our appreciation of the splendid work planned and executed by our Entertainment Committee, Carl Powers, chairman, and after our Hugh H. had reiterated that if there was any one among us who had not enjoyed himself, it was that individual's own fault, because he had had a wonderful time—had a girl and all the ice cream and cake he could eat, we said good-night and once again went our way more then ever convinced that honest toil, plus a get-together-good-fellowship-evening makes everything worth while.

Ere taps are finally sounded we wish to express our sincere regrets and sympathy regarding the indisposition that kept at home Mrs. Raymond H. English. We missed you, and you, too, our chief, but we know the reason for your absence was a powerful one.

### Such an Odd World

In Chicago they tell of a fascinating young married woman who, in the absence of her husband, received much attention from an old admirer. One evening the latter ventured to become reminiscent.

"Ah," he sighed. "If only you had married me instead of Babcock."

"Then I should have been with Mr. Babcock at this very moment instead of with you," answered the fascinating one. "How strangely things turn out!"

—American Legion Weekly.

"What kind of a fellow is Blinks?"

"Well, he is one of those fellows who always grabs the stool when there is a piano to be moved."—Til-Bits.

Misses D. E. Fossett and D. E. Baker, Valuation Department, enjoyed a vacation in Bermuda. On the left are Miss Baker, Mr. ?, and Miss Fossett. At the right is Miss Fossett "holding up" a coconut palm

## New York Properties

Pier 22, North River, N. Y.

Correspondent, JOHN NEWMAN

St. Patrick's Day was observed here in the customary manner; everybody wearing the green without fear of getting hanged. Our Ladies' Auxiliary of the A. O. H. had the usual lunch-hour celebration clustered about a green clothed desk laden with odds and ends—pickles and pig's-ends—and fudge. (The celebrants still live.) As a mere observer from a distance I liked the show. The pigs-feet were attacked in the manner that corn on the cob is devoured at Coney Island, or as a Solomon's Islander would tackle the thighbone of a missionary. Some of the tid-bits were quite big in diameter and appeared to be difficult to negotiate. I would like to be able to give a picture of Miss M. C. (formerly "My Mary") holding a pig's foot by its terminals and yum-yumming the middle. The best part of the fiesta was the fun.

TO THE MEMORY OF HELEN KERRIGAN, who entered our service less than a year ago and died on March 4 last, at the age of twenty-five, after a few day's illness, a victim of pneumonia! Miss Kerrigan came to this country just two years ago from Bundoran, in turbulent Ireland, in quest of peace and plenty. If she failed to realize her hopes of the plenty, at least she found the rest. Requiescat.

NEWS? No, nothing important. Gossip (disreputable word) generally stands for idle tattle bandied across hedges and over fences with a tacit understanding between the transmitting and the receiving end that the talk is confidential and its source questionable and irresponsible. During inclement seasons "sewing circles" and clubs—men's clubs as well as women's,—furnish the proper atmosphere for confidences that begin with "They say..." Gossip in itself, when it is only harmless small-talk, not derogatory to reputations of those not present, is of course no more objectionable than "Cholly Knickerbocker's" society chat in a Sunday paper, or my dissertations; therefore there can be no harm in reporting

G. J. Goolic, watching 'em come in on time on Staten Island. Mr. Goolic, Division Engineer's Office, is also correspondent of the Magazine for Staten Island. The proverbial "little bird" sent us his picture

that they say that a certain National Guardsman (cavalry) of Pier 22 office, is "gone daffy" over a certain bud in the freight billing department. I feel not at liberty to divulge the lady's name, but may be permitted to say, in confidence, that she is very young and that her initials are the same as the letters after the figure 8 on the timeslips.

They say, also, that John Mackin has a particular penchant (pronounce it pang-shang) for coiffures rouge des femmes (pronounce it the best way you can), which means a woman's glory of the color referred to by vulgarians as brick, carrot or red, but by people of "culture and refinement" (like us) as auburn-haired or Titian-tressed blondes. When John sees one of this type he becomes spell-bound; powers of articulated speech and locomotion forsake him; he just stares and adores. That is what they say. John himself says that he is not partial to any particular shade—they all exert a hypnotic influence over him.

They say, further, the commentators, that A. H. B. "knows how to pick 'em." This refers to his stenographers; he has several, and uses great care in selecting the best. They surely are good to look at.

Another old Veteran, toilworn and gray, Has laid down his burden and quit At call of the despot, whom all must obey, When he tags one and says, "You are IT."

Nicola Massimino, familiarly known as "Frank," lowly servitor at Pier 22, N. R., died at his home on the evening of February 24, after completing his day's assignment as janitor. He had been in continuous service of this Company since May, 1889, as messenger, and, during the last five years, as janitor and caretaker of stationery and supplies. He leaves a large family of grown-up children; his wife died recently and "Frank's" big latin heart crumbled with the loss that made him lonely.

If work is worship and the sweat of the brow is acceptable to the Lord as homage (Laborare est orare), "Frank" was as devout as those who decree that working on Sunday is sinning, and dutifully mumble meaningless prayers.

## Staten Island Lines

Correspondent, G. J. GOOLIC

Division Engineer J. L. Suesserott has completed his twenty years service with the Baltimore and Ohio, and application was approved admitting him to the Veteran's Association of the New York Division. Mr. Suesserott first entered the service of this Company as axeman on July 31, 1902 and left the service, returning in 1903. On May 1, 1905, he was promoted to draftsman; on August 1, 1905, levelman; on October 1, 1905, transitman; on February 7, 1910, assistant on engineering corps. He held that position until December 21, 1914, when he was made assistant engineer. On October 1, 1920, Mr. Suesserott was promoted to division engineer with headquarters at St. George. During his two and one-half years on Staten Island he has proved himself a successful engineer. When he first came here the road was in bad shape because of bad low joints, worn rails, rotten ties, etc. To-day it is almost as good as new, or one hundred per cent. perfect.

On March 13, James R. Emmet Hiltz, Real Estate Department, Baltimore, visited

CARTOONIST -

JAMES ROBERT "EMMET" HILTZ - of Baltimore -  
(The Sheik of Greenwich Village.)

"PATSY" SANTORO, THE STATEN ISLAND ARTIST, IN HIS FAVORITE POSE -

"Hiltz" and "Santoro" had a "Mutual Admiration Party" and cartooned each other. Neither new about the other's cartoon but both found their way to the Magazine

"Goolic writes with his pencil— Santoro with his pen"

the Division Engineer's Office on some real estate matter. After a short conversation with Chief Clerk W. J. Vidler, Cartoonist P. Santoro approached him and shook hands. Emmet saw Santoro with one hand behind his back and asked him what he had there. "Patsy" answered "Just a little protection" (a fire ax). After a short conversation they separated. Later Mr. Hiltz returned from the Legal Department with a cartoon of P. Santoro in his favorite pose, and handed it to your Correspondent G. J. Goolic, to have it published in the magazine. Two minutes later, P. Santoro handed in a cartoon of J. R. E. Hiltz in his favorite pose. Neither of the men knows that each has made a cartoon of the other. We are wondering what the idea is.

J. C. Hasselbock was promoted to voucher clerk to A. T. A. Mr. Haselbock purchased a new hat and fur coat, and on the first day he wore them it happened to rain and the fur stood up like a porcupine. He is also willing to challenge anybody that can bowl 300 or over. Mr. Hasselbock has been bowling now for the past two months and claims to be a great expert.

He—"Good morning!"—no answer.  
 He—"Fine weather, ahem!"—still no answer.  
 He—"Will it rain to—M—"  
 Blondes—twenty steps later, "Aw, take 'em off, we know yu!"

**Pennies, Pennies, Pennies**

ANNA WOLTMAN needed pennies,  
 Five hundred of them strong;  
 "Won't you get them for me, WIDMER?"  
 Asked ANNA in a song.  
 But "CHARLIE" shrunk and slipped  
 away,  
 And "REED-Y," too, took flight—  
 So she asked "EDDY" MERTZ, of course,  
 But he said, "See 'NEIL' WHITE."  
 Now what is this ole dangle-foodle  
 Oodle-doodle game  
 Of these here brisky trainmen,  
 Who won't help out a dame?

**Baltimore Division**

Correspondent, W. H. TARR

Gapland, Md., situated on the Hagerstown Branch, has a nice, comfortable station. It is kept neat, clean and heated,

and our patrons receive polite and courteous attention by the gentlemen in charge, First Trick Agent and Operator E. E. Bowers, and Second Trick Operator and Clerk H. H. King. They are efficient and careful, and "Safety First" is their standard at all times. We are glad to know that the citizens at this point are being so well served by our representatives.

Operator E. C. Houser, Lexington, Va., spent February travelling in the South and paid a visit to Havana. L. H. Browning served in his place during his absence. We thought, perhaps, that Mr. Houser was intent on becoming a benedict as the pass was made out for himself and wife, but we learn this was wrong. Anyhow, Mr. Browning states he received a postal,

"Come on, Heney. I am waiting for you down in Florida," with the accompanying illustration of an alligator waiting to swallow a pickanniny.

Menu of a Cake Eater Who is a Huge Man  
 1 Cup of Coffee.  
 1 Slice of Cake.  
 Refreshments—Small bottle of milk warm.

Where Eaten? We won't say.

With business above normal, everyone is taxed to his utmost to keep ahead of the game. However, the more the merrier, and with the advent of Spring, everybody takes on more vim. The boys in the Division Accountant's Office are resuming their soft ball game during their lunch hour. "Slim" Mallery is yearning for New Orleans. We don't know why. Leslie Higgs is now counting his eggs every morning; George Crocker spends his evenings listening in on the radio, and Harry Fox—well, "he is the guy that wears the clothes." "Slim" Moore is back with the Division Accountant's force. We think Harry Constantine will soon go gigging on the Magothy with a visit now and then from Clint Roche, "Wobby" Childs, "Al" Smith and our old friend, "Barney" Moriarity, of the General Superintendent's Office. "Pete" Hubbard is a regular guy and meets all rivals. Well, Boys, Spring is here. Don't get the fever.

**Washington, D. C. Freight Station**  
 Correspondent, W. L. WHITING

General Yardmaster Frank S. White, who has been identified with this station for a great many years, has left us to become assistant terminal trainmaster at Philadelphia, Pa., and N. O. Clark, who was located at Wilmere, Delaware, succeeds Mr. White as general yardmaster here.

We congratulate both these gentlemen on their new appointments. Our best wishes go with our good friend, "Frank" and a welcome is extended to his successor, Mr. Clark.

A Highlandtown "stenog" named Mae  
 Never ate more than one meal a day,  
 She'd start in to dine  
 Ev'ry morn before nine,  
 And quit when she climbed in the "hay"

It was pleasing to those who helped the good cause along to read of the wonderfully successful campaign made on behalf of Miss Nina Spengler in the National Goodwill Election. Miss Spengler is to be heartily congratulated on the outcome, and we can only wish her a very pleasant trip, and above all, a safe return.

We have had two additions to our force lately. Walter T. Everett, who was with us for a short while a year or so ago, has returned to work in a position in the Cashier's Department; Miss Anna Peters comes to us as comptometer clerk. We welcome both, and trust that they will stay with us for a good long while.

It was pleasant to see our delivery clerk, M. M. Phelps, who has been nursing a broken leg since last August, report for duty on the first of March. We congratulate him on his recovery and hope that it will be the one and only event of the kind to befall him.

Chief Delivery Clerk T. E. Frye is at present on the sick list, but we hope to see him around again very soon.

#### Brunswick

Correspondent, R. L. MICH

The Baltimore and Ohio Veterans' Association recently held a meeting at the Y. M. C. A. Speeches were made by Kirk Compton, their secretary, Dr. H. S. Hedges, and our worthy friend, J. T. Martin. The Ladies' Auxiliary, as usual, was on hand to furnish coffee, sandwiches, ice cream and cake. The Veterans are lucky to have such good Samaritans as the Ladies' Auxiliary on hand to do their part at all times.

Yardmaster Sprigg Hedges is again out, minus one eye. We are sincerely sorry for

his misfortune, but glad to see him on his job. Sprigg is a good fellow, and an all-round business man. Brother "Skinner" Thomas, westbound train dispatcher, is improving rapidly.

Yardmaster "Bill" Gatrell is slowly convalescing. We miss him in the yard. "Bill" makes more mileage than some of our train crews who go to Keyser every trip. The electric shoe man can tell you that.

During the past six months, almost all trains, east and westbound, have passed through here on time. This goes to show that we *are* the "Best and Only."

Several engine and train crews have organized a camping party for this summer. Your correspondent hopes to secure some interesting reading matter for our folks, as well as some good photos of the campers.

Our champion fishermen are Engineer "Ed" Hallan and Conductor Tom Sullivan—when they go fishing. Uncle Eben's fish story can't touch them. They have a system, and a good many of our city sportsmen would give a thousand dollars to learn "that system!"

Flagman D. B. Meeks met with a painful accident near Engle, W. Va. His train parted, and his nose was broken. "Dave" is the smallest man on our division, but one of the fastest runners you ever saw. He is popular and we sincerely trust he will soon recover and be back on the job.

Secretary H. E. Dixon, Baltimore and Ohio Y. M. C. A., has been doing his bit towards keeping our men together. Brunswick is to be congratulated upon the good Christian spirit that prevails among our leaders. Let us keep up the good work.

#### Mount Clare

Correspondent, W. H. ZELL

We understand that our new telephone operator is taking up swimming; evidently she must be anticipating numerous trips down the bay this summer.

"Jim" Tatum, president of our Welfare Association, has taken unto himself a body-guard (yes, it is a small black and white cur.) This dog, however, is a carpenter's dog—everytime "Jim" calls it, it makes a bolt for the door.

Poole is still busily engaged, not only in law; he's getting to be a Sheik of Fayette Street. The girls all know what time John Henry comes home and they all wait for him, ever ready to surround him with affection. AIN'T LOVE GRAND?

"Fred," our former office boy, has been promoted to clerk in the Shop Order Bureau. We hope, "Fred," that you will make as good in this position as in your former job.

William Foster Mahaney, the baby elephant of the General Foreman's Office, almost suffered heart failure. He laid his mustache down and couldn't find it. It's a rainbow—many colors.

"Pete" Stier is commencing to get 'fraid of the ladies. Well—guess anyone married as long as he would be afraid of them too.

#### Accounting Department

Some one asked our old friend George what makes a balloon go up. He quickly replied, "Gas." Now, the question is what is keeping him down.

We have a piano in the office, and the other day one of the clerks brought down some Victrola records. Perhaps he thought it was a player-piano. Victrola records won't fit on our piano, Allan.

Some of our office force remind one of the auctioneer, who says, "Going, Going, Gone!" Yes, famous trio—Dasch, Whelan and Poet—it's pretty near gone. Their theory is: "Hair and brains won't grow together."

We notice that one of our timekeepers took a trip to Norfolk the other day. We didn't know Reedville was on that line.

#### Freight Car Department

Gang Foreman M. V. Pascal was elected chairman of the Entertainment Committee of the Veterans' Association. Believe me, they are in for some good entertainment. He is also one of the committeemen for the Welfare and since his appointment he has increased the membership considerably.

One of the biggest surprises in the department was on Thursday, March 8, when it became known that a son was born to Mr. and Mrs. Jackson Thomas on Tuesday, March 6. We all wish them well.

- G—Goggles are given to each and every one to protect his eyes.
- O—Only those who fail to wear them are the ones who suffer.
- G—Great benefit to those who believe in Safety First.
- G—Goggles have saved many a man's eyes, and can save yours, too.
- L—Listen to those who instruct you to wear them constantly.
- E—Everybody should wear them before it is too late.
- S—Suffering comes to those who fail to carry out instructions.

Our old friend, "Dan" Fitzgibbons, has bought a limousine. He says he doesn't need any horn on it—it has a sign on the front—"DODGE-BROTHERS!"

MT. CLARE CHILDREN AT PLAY

# The Watch that Times America's Fastest Trains

**T**HERE is a "crack" train on every road that is scheduled to "a Mile a Minute" or better, and it's two to one that you'll find that train timed by a Hamilton Watch.

The Hamilton is the Railroad Timekeeper of America simply because it has been tried and proved by performance in railroad service.

The accuracy of the Hamilton is inherent—built in it—as is also that sturdiness which enables it to stand railroad usage.

And so it is that such trains as the Twentieth Century Limited, the Broadway Limited, the Chicago-Washington-New York Limited, the Santa Fe DeLuxe and the Olympian keep to their swift schedule on Hamilton time. Railroad men everywhere appreciate Hamilton accuracy, and no matter if your job is in the coach or engine cab of a "Flyer" or a branch line "Accommodation," the Hamilton is the watch that will keep you to schedule.

**The Favorite Hamilton of Most Railroad Men is the "992"**

This is a Sixteen Size, 21 Jewel model, having a truly phenomenal record for accuracy. Ask to see it at your jeweler's. It will better than pass inspection on all railroads.

For other than time inspection service we recommend our No. 974 Movement. This model gives you Hamilton Quality at moderate price.

# Hamilton Watch

"The Railroad Timekeeper of America"

**HAMILTON WATCH COMPANY**  
LANCASTER, PENNA., U. S. A.

Stanley Roth, Erecting Shop, took a trip to Annapolis recently. On the way back he had a breakdown. He hurriedly sent out an S. O. S. for Papa Galloway. When L. E. arrived, the road reminded him of the Erecting Shop—he didn't know the car had so many parts.

"Shorty" McConnell, Smith Shop, has accumulated a bank account. Looks as if he's getting ready for the house with the green blinds.

Congratulations! G. Scott, helper in the Flue Plant, had the pleasure of a visit in the person of a little daughter on Washington's Birthday. A good name for her would be Martha Washington Scott. Great Scott!

The life of a gang foreman is somewhat complicated when he has to pronounce such names as these: Stasinkiewicz; Subalinsky; Guzerecky; Lewandowsky; Sorebuski; Dawidowicz; Wisniewski; Koshubowski; Czaejoski; Cerkevitch. An interpreter would fit in nicely here.

One of our faithful car men, Julius Reeding, who has served the Company for the past thirty-five years, was pensioned on February 16. We wish him the best of health and luck and trust that he may enjoy them for many years.

#### Welfare, Athletic and Pleasure Association

Our association held its Annual Oyster Roast for members and their families on Washington's Birthday at Arion Park, Wilkens Avenue, extended. About 1,000 members (including their families) were

present. A big time was enjoyed by all and it was declared to be the best affair ever held. About 50 barrels of oysters were consumed.

Superintendent T. R. Stewart was the lucky man in winning a suit of clothes.

"Bill" Eyerly carried off the honors for consuming the most oysters; he certainly made those boys disappear. Mike Haley, "The Ice Cream King" ran him a close second.

Much credit is due to J. Scharnagle, chairman, and the rest of the committee, for the success of the affair.

The Welfare, Athletic and Pleasure Association expects to hold a minstrel show in the near future.

We regret to learn of the death of Machinist Walter Deitz, who was in the service for ten years.

Assistant Foreman Eugene Lappe, Erecting Shop, took unto himself a wife. Guess you will have to ask for nights off now, boy.

#### Big Race—Mount Clare

Pimlico has its Preakness, Kentucky its Derby, but the greatest race of the year will be held on Decoration Day, May 30, by the world's three daring speedsters, J. H. Gibbs, W. G. Hooper and F. P. McConnell. Conditions of the race are as follows:

Distance: 50 miles—Weather—Race to be held rain or shine.

Place: Not yet designated.

Contention: Speed King Hooper in his Flying Maxwell contends that he can place a thirty foot rope on rear of car and that Dare Devil Gibbs in his high-powered Ford

cannot keep slack in rope, and that he will be pulling the H. P. Ford the entire route. Gibbs claimed that instead of being pulled he will be pushing the car ahead all the way. The Blacksmith Shop has selected its driver, Douglas Fairbanks McConnell, a high speed kiddie kar to be used against the above contestants and they wager their representative will pass the joined cars so fast that they will think the 30-foot rope has become entangled in a tree. The competent officials are: Starters, T. C. Issac, G. F. Kline. Judges: W. S. Eyerly, C. Rauchle, W. H. McKenzie. Timers: Jack Conen, "Jimmy" Finnegan. Checker: L. W. Fowler. Clerks of the Course: "Eddie Connelly and L. J. Hook.

To avoid any congestion at the track, all those desiring to place bets on their favorites will see "Joe" Haneke, "Jim" Whelan and A. C. Hensen. Automobiles parked under personal supervision of F. Cole and F. Maguire. Music, ambulance and doctor will be on grounds. ON WITH THE RACE.

The accompanying photograph is of Alma Mary Bradley, age three months, daughter of Machinist and Mrs. J. G. Bradley, and granddaughter of John J. Bradley, Baltimore and Ohio Building.

We also have a photograph of the three children of Foreman J. T. Crough, Bolt and Forge Shop. Hilda, age eight; Vernon, age ten and Emory, age twelve.

Behold Miss Clare Cox, one of our electric welders, who is termed the snow-bird of Mt. Clare. She is about to take her annual January dip.

CUMBERLAND FOLKS

Upper row, left to right: Claim Agent and Mrs. Paul C. Garrott. Mrs. Garrott was formerly Miss Wanda List of Indianapolis; Captain Lee ("Pop") Martin; Mr. and Mrs. Garrott on their honeymoon, crossing Havana Harbor. Lower row: A picture taken in 1910, showing Relief Agent G. W. Stell; Bill Clerk John Herpich; Ticket Agent C. H. Taylor; Traveling Freight Agent J. R. Rick and Bill Clerk John Wickertshiem. "The four horse—" beg your pardon, they're not all horses, are they? Anyway, on their backs we see J. A. Miller and Mrs. Miller, their daughter Elizabeth and son Floyd

Charles Bert, little son of Boilermaker W. H. Riker, Cumbo, W. Va.

Operator O. J. Rash, Hancock, Md., who has shown great interest in the Stop That Leak drive

**Cumberland Division**

Correspondent, J. J. SELL

Assistant Shop Clerk E. Tasker, Keyser, recently entertained the "Queen City Checker Club" from Cumberland. From all accounts a good time was had. The boys are looking for a return engagement. How about it, "Ed?" Or did they trim you too badly on home grounds?

We are still looking for some good shop notes from our old friend "Tom" Grindell. "Tom" says as soon as the dentist can fix him up we will get the notes. No time like the present, "Tom!"

A recent case where individual courtesy on the part of one of our employes was brought to light, was on February 16. The funeral party of Mrs. William Brydon, one of our good patrons, used our Train 36 from Piedmont, W. Va., to Cumberland, and made special request that Passenger Conductor Charles J. Welsh handle the train, because of the consideration and courtesy he had always shown the deceased while using our trains. While this was not Conductors Welsh's regular run, arrangements were made for him to handle the train on this trip.

In connection with the Stop That Leak campaign, a case was recently brought to our attention, where Ticket Clerk George P. Porter, Cumberland, made a new rubber stamp for use in the office, by cutting the rubber letters off an old stamp, and glueing them on a holder, arranging the letters so as to suit a destination for which recently he has had a good many calls for tickets. While this is only a small item, it is the little things that count.

We are able to present a good picture of some of the employes of the Old Freight House at Cumberland, taken about the year 1910. In the group are G. W. Stell, now Relief agent, and John Herpich, bill clerk; C. H. Taylor, now ticket agent; J. R. Rice, now traveling freight agent, and John Wickertshiem, bill clerk.

The Queen City Social Club entertained about one hundred and fifty members and their friends on St. Patrick's Day with a dance and card party at the New Boulevard Hotel. The Club was only recently organized and it is the intention to hold quite a number of like occasions during the year.

It is understood that "Real Estate" Townsend, the Beau Brummel brakeman of Martinsburg, is contemplating a birthday party. For some reason, however, Keyser has not been included in the invitations, although it has been the impression that he was in good standing at that point, as the daily paper is again reporting his arrival in town. This birthday party should be "some affair," as "Pete" gained quite a reputation for the manner in which he handled the ice cream and other refreshments at Keyser sometime ago. We understand this party is principally for some nice little nurses at Martinsburg.

John Barnes, formerly secretary to Division Accountant Sheakley, Cumberland, and now located in Baltimore, continues to make regular visits to the old home town. From the number of inquiries we have had from some of the Baltimore girls, we think Cupid paves the way for more than one journey. How about it, John? Surely you don't tell Mr. Ekin it is all business.

Usually the division engineering corps is called on when matters of importance along right of way are considered, but it is a mystery how R. L. Schramm, levelman, could sprain his foot while walking between ties. We always thought Ralph's foot would span at least three ties.

Some time ago Night Chief Train Dispatcher J. A. Miller spent a vacation touring the West and the California resorts. We have been after a report of the trip for some time, but "Jake" insists he saw so much it would take a volume to tell it. We have succeeded in getting a good picture of himself and family, taken on top of Mt. Lowe, overlooking Hollywood. The group includes Mr. and Mrs. Miller, their daughter Elizabeth, and son Lloyd.

On March 1, our genial division claim agent, Paul C. Garrett, was married at Miami, Florida, to Miss Wanda List, of Indianapolis. We present here a good picture of the newly-weds taken on their honeymoon in the South. They will make their home in Cumberland. Their many friends wish them much happiness.

The new reclamation plant at Cumberland is busy these days, rerolling scrap into bars, and turning out finished products of bolts, etc. The blaze rising from the stacks each night reminds the old timers of the busy days of the Old Rolling Mill of former years.

The Stop That Leak campaign has been receiving marked attention from employes on the division. Everybody is doing his bit to see that every economy and saving possible is made. "It is the little things that count," and each and every employe can help.

As the weather grows warmer, the baseball fever rises. We have a fast team lined up for the coming season, and many good games are anticipated. The grounds in the Mill Yard are being gotten into shape, and every thing ready for the opening game. Any other team on the system that thinks it can play ball should give the boys an opportunity to show them.

Going up? -or down?

HERE is your future charted for you, based on the actual average earnings of trained and untrained men.

Which way will you go? *Up*, through training, to a position that means good money? Or *down*, through lack of training, into the ranks of the poorly paid?

It rests with you. And *now* is the time to decide. Not next year, not next month, but *now*. You can easily get the training that will command a trained man's salary. The International Correspondence Schools have helped hundreds of thousands to qualify for advancement. Let us show you, too, how *you* can prepare yourself, in your own home, for the position you want in the work you like best.

Just mark and mail this coupon and full particulars will come to you by return mail.

A big checker tournament is being arranged between the Colonel and George, which will be pulled off as soon as a suitable hall can be secured for the crowd, who want to watch the match.

Wilbur D. Thomas, time clerk, Division Accountant's Office, Cumberland, has resigned to accept a responsible position with the Kelly Springfield Tire Company. The many friends of Mr. Thomas wish him every success and congratulate the Kelly people on having secured a splendid young business man.

A number of our clerks in the local offices canvassed the division in the interest of Miss Nina Spengler during the recent Good Will Election, and through their efforts the Cumberland Division, as usual, was able to top the list with upwards of fifteen thousand votes.

We understand a big potato crop is anticipated in the vicinity of Great Cacapon. Agent J. L. B. planted his early Irish Cobblers on St. Patrick's Day. Without a doubt there will be a "bumper" this year.

Blueprint still tells us we are leading all Divisions in tonnage performance as usual, and as everybody has his shoulder to the wheel, you can bet we are going to stay there.

Boys, stay at it—STOP THAT LEAK!

#### Office of Master Mechanic

The Baltimore and Ohio Social Club was organized on January 17, for the purpose of effecting a social organization for the entertainment and edification of the supervisory and clerical forces of the Cumberland Loco-

motive Erecting Shop, the Roundhouse, Stores Department and the Car Department, at which meeting the following officers were elected: President, John Howe; Vice-Presidents, A. H. Hodges, C. G. Sutton, T. E. Mewshaw and George P. Hoffman; Treasurer, Thomas E. Grindell; Secretary, Miss Vada P. Drumm.

The standing committees, appointed by the president, are as follows:

**ENTERTAINMENT COMMITTEE:** J. R. Miller, Chairman; R. R. Baird, J. J. Carney, V. B. Coyle, R. A. Conner, H. E. Childs, C. W. Weiskettle, J. R. Smith, W. C. Whistler, H. S. Lamm, W. H. Shaw, T. E. Mewshaw, W. E. Wall, Fred Michel, C. D. Shaffer and J. H. Browne.

**BY-LAW COMMITTEE:** Harry S. Lamm, chairman; Fred Michel, R. A. Conner, J. R. Miller, C. W. Weiskettle.

**IN CHARGE OF PUBLICITY:** Vincent B. Coyle.

The rules of the Club, as to membership, etc., are extremely practical, having been drawn up by Harry S. Lamm, who is noted for his plausible and legalistic trend of thought.

The Club gave its initial dance on February 12. It was a great success from every viewpoint. The spacious offices of the superintendent of shops and storekeeper presented a magnificent appearance; the decorations were of a Valentine character. Special favors were given to the ladies, as well as caps, balloons, whistles, etc. to all the guests and members. The music for the dance was furnished by the original Jazz orchestra of this city. The feature of the evening was a favor dance. Much

praise is due Harry E. Childs, in charge of the decorating committee, for the elaborate and artistic decorations. During the evening, W. W. Wood, chief of Welfare, Baltimore, accompanied by Superintendent Van Horn and Assistant Superintendent T. K. Faherty dropped in unexpectedly and expressed their satisfaction and approval of the manner in which the dance was conducted.

The initial entertainment of the Club proved conclusively that such an organization was in great demand and that it would eventually bring about a great improvement in the spirit of cooperation among the employes of the various departments.

It will be the policy of the club to renew these entertainments once a month during the spring, and for the summer months, other social activities are under contemplation and consideration.

Let us introduce Lee ("Pop") Martin (not as old as he looks), captain and star forward of last year's Bando basketball team at Cumberland, apprentice at the Cumberland Shops. Lee is playing a great guard game this year for the strong Knights of Goodfellowship team at Cumberland, contenders for Maryland State title. Lee is considered one of the best all around players ever developed in this section.

Our heartfelt sympathy is extended to Miss Mabel M. McClintock, A. R. A. clerk, Office of Master Mechanic, in the loss of her mother, who died on March 6.

Our electrical foreman, C. D. Shaffer, is wearing a smile these days. Why? The roads to Frankford are getting good.

Upper left: Frederick H. Rhoe, son of H. E. Rhoe. Upper right: Vivian, Watinetta and Eleanor, daughters of Engineman Deakins. Below: (see notes).

Bubbles Baird, timekeeper, Stores Department, is suffering from a severe cold. Bubbles claims his car has been jacked up for the winter and we are at a loss to know the reason for his cold. Has anyone any excuses to offer?

"Jake" Brown claims he is too old to bother with the fair sex, but judging from his numerous trips to Washington, we feel that, "it won't be long now."

Keyser, W. Va.

Correspondent, H. B. KIGHT

It is with deepest regret that we report the untimely death of Yard Brakeman Carl Cunningham, who lost his life while in the performance of his duties on March 7. Of a sunny disposition, always meeting his fellows with a smile and cheery word, he will be greatly missed. The esteem in which he was held was manifested by the beautiful floral emblems sent by his many friends. To his bereaved family we extend heartfelt sympathy.

Engineman J. B. Shultz is getting ready to attend a meeting of the Air Brake Association at Denver.

All furloughed men have been recalled to their former positions at the Car Shops, and the shops are working to full capacity—while Keyser rejoices.

A Carnegie medal is due Yard Brakeman Hughie Russell, who rescued a little boy, who fell through the ice, while skating. Brakeman Russell heard the boy's cries and jumped into the water, bringing the boy out to safety.

Just to remind those using the gates at the Keyser Passenger Station! SHUT THE GATES! If you won't practice Safety on your own account, THINK of the other fellow, or the passenger who might be injured. The station porter will open them at the proper time.

What's the matter, M. & K. and Hardman??? Doesn't anything ever happen out your way that would make news for the MAGAZINE?? Send it in.

Some class to the callers at this station! They have one of the neatest and cleanest offices on the system. "Shorty" Parish and his assistants are to be complimented. You, too, Elwood, only thought I had better give "Shorty" all the credit for that nice office.

Time and again mention has been made in the MAGAZINE, relative to a chapter of the Veterans at Keyser. It looks now as though this is soon to be a reality, since Safety Inspector Sirbaugh has a list of about 100 names of employees who have signified their intention of joining. There are many veterans on the West End of the Cumberland Division and we are glad that they have decided to organize a chapter.

I wonder if you read all the items of the various division correspondents that appear in the MAGAZINE? Do this and keep in touch with the friends of yore, whom you often think about. Sometimes I meet some old railroad man who inquires of me, "Is Adam Keller, or 'Dick' Purdy" (or some other old fellow whom they once knew) "still living?" Yes, these men are still with us, grown old in years, yet ever thinking of the good old Baltimore and Ohio, which they served so long, and which now gives them a pension. Let's go to see the old fellows occasionally; they will appreciate it, I know, for I call on them, and they tell me that they are glad I came.

Chief Caller "Shorty" Parish, Keyser

Thanks, Mr. Tasker for your notes. They are interesting and help, and I appreciate your cooperation.

"Bill," the genial night porter at the passenger station, says his middle name is "Service," and if you want anything done, command him.

The accompanying photograph is of the three interesting daughters of Engineman Frank Deakins. Reading left to right are: Vivian, Wanetta and Eleanor.

Little Frederick Rhoe, in the accompanying photograph, is the son of a proud daddy, Brakeman H. E. Rhoe.

We are glad to see Colonel Lavelle back among us again after having been housed up because of illness.

"Mart" Sayre, who served our Company for 60 years and who was recently pensioned, informs us that he expects to make a visit to Baltimore soon, to call on some of his old friends. Watch him, "Van," and don't let a street car run over him. (Better come down with him, Harry, then I can watch you, too. Editor.)

Miss Ruth Welsh, recently our boiler clerk, has accepted a position at the Coal Billing Office, this station. We wish her the best of luck in her new position. "Bill" Ravenscraft fails to make his 4.30 p. m. report since Ruth has left.

Sickness has played havoc with the forces in the Master Mechanic's Office during the past month. At this writing Misses Wells, Wagoner, Woolford and Mrs. Gordon are absent because of illness. Miss Longsdorf has recently returned to work. Mrs. Dietz, wife of shop clerk, is also suffering from a severe attack of bronchitis. It is our sincere hope that all will be fully recovered by the time this item appears in the MAGAZINE.

It has recently been discovered that we have a full fledged cartoonist in our midst, and we feel sure that he will give the readers of the MAGAZINE the benefit of his talent in the future. How about it, Huh?

Miss Laidlow has accepted the position as boiler clerk in Master Mechanic's Office, made vacant by transfer of Miss Welsh. While Mary's absence from the Roundhouse Office will be regretted by many, we are sure that her present position will be most congenial.

The accompanying picture shows some of the members of the supervising force of the Car Department who were present at a recent staff meeting held by Car Foreman Stanley.

 CHARMS REPAIRS  
 Easy Terms to Baltimore and Ohio Employees

The success of the Good Will Campaign recently held in this territory, is attributed to the efforts of Miss Lena Crabtree and Miss Stemple, stenographers, Master Mechanic's Office.

The speech of "Do Do" at Hardman producing the most gratifying results, it is still a question between Mr. Edwards and Mr. Carney, if the remarks as made by her, or her Russian boots, were the means of making the "boys" liberal in their contributions.

While the weather is now becoming more favorable daily, it is up to "Dusty" to secure pictures for the MAGAZINE of our lady A. R. A. clerks, making their weekly tour of the shop tracks, becoming familiar, by personal observation, with the various repairs and parts used, and repairing freight equipment from the wheels to the top nut of the brake staffs.

While the shop clerk was wending his way home to a delayed dinner, about 8.10 p. m., a few nights ago, he noticed one of his stenographers, frantically open the door of her residence on Piedmont Street, opposite the Reservoir, hurriedly glance down the street and retreat to the house again, before he had an opportunity to speak to her; she only looked one way, emitted a long sigh and disappeared. On his approach to James Street, he found the cause of her anxiety; in fact, IT had the same name as the street.

Mrs. Orndorf was recently asked to take a chance on Mike's automobile, but stated that never again would she take a chance, as she took a chance several years ago and won. "But," she replied, smiling very sweetly at Marshall, "look what I got."

"Beans!" said 'Dusty.' "Don't say beans to me. I have eaten beans until all of my joints now have ball bearings and have got 'Chicken' and myself to be expert tennis players, banging the beans across the table to each other. Even the old rooster at the house sounds like a 'Tin Lizzie,' walking around the poultry yard from picking up strays."

The Queen City Checker Club, composed of the crack checker players in the Superintendent's and Division Accountant's Offices at Cumberland, and champions of

Operator F. N. Reis, Deer Park, Md., and his home, which was purchased through the Relief Department

the Maryland District, under the leadership of Captain J. J. Sell, journeyed to Keyser and engaged in a series of games at this point.

It was regretted that "Abe" Kesner, acknowledged checker champion of the System, and holder of the "Nickel Plated Umbrella," and "Pete" Noone, ex-champion, were absent because of pressure of duties. With the talent brought along, however, their showing was anything but creditable, and the bunch were lucky enough to have sufficient Piedmonts to last them back on Train No. 4. "Grannie" Messman failed to win a game, and "Hottie" was allowed to win the last game to uphold the reputation of South Cumberland.

East and West End employes will recognize in the accompanying photograph "Shorty" Parish, chief caller at Keyser. "Shorty" posed for this picture to be run in connection with the remarks concerning "the cleanest Caller's Office on the System." He has promised to get us a picture of his office for a future issue.

#### Martinsburg

Correspondent, W. L. STEPHENS

Noah Edgar Walker and Miss Myrtle Irene Effert were married at the Winchester Avenue Christian Church on February 10. The groom is a bridge helper in the bridge shop.

The auxiliaries to the rail organizations of this city have been very active during the winter months. Increased activity has been noted in all these organizations. The service side has been developed to a greater extent than has been the custom for some-time. Socials have been held at the homes of members.

Recently the ladies of the B. of L. E. surprised a fellow member, Mrs. L. B. Dorn, North Queen Street. The Sunshine Orchestra and refreshments added to the pleasures of the evening.

Perhaps the most interesting and impressive occurrence ever witnessed by Martinsburg railroad men took place at the annual meeting of the Veterans' Association. President Willard, on behalf of the local association, presented fifty-year service buttons to four of the members who had served the Baltimore and Ohio faithfully for over 50 years. Horace Tabb, retired operator, entered service April 1, 1867; N. C. Fellers, retired pumper, entered service January 1, 1868; C. J. Faulkner, Company counsel, entered service January 1, 1868, and is still in active service; W. G. Edwards, storekeeper, entered service April 18, 1871 and is still in active service.

To serve one firm or corporation for so long a time does not fall to the lot of many men. The average span of life is too short and coupled with temperament and other

conditions causes most men to shift from one job to another. The years these men have spent in the employ of the Baltimore and Ohio are a positive testimonial of their fulfillment of a trust. It is employes such as these who build for success and make failure impossible.

Thomas Sakeman, retired fireman, celebrated his 78th birthday at his home on Commerce Street. Uncle Tom enjoyed the evening and the good things to eat, especially a large birthday cake. The only fly in the ointment was that Clay Toup could not come. He must retire very early or he will oversleep the next morning. "Jim" Hartley had to go to the movies and begged to be excused. Otherwise the evening was a huge success.

Mrs. Martha W. Caskey, widow of Captain Edward Caskey, died at her home, 635 North Second Street, aged 70 years. Death was caused by heart failure. Three sons survive.

James Harvey Thorpe died in a sanatorium at Sykesville, Md., where he had gone for treatment. Mr. Thorpe was a retired machinist helper and a former resident of this city but had been living in Cumberland, Md., for 25 or 30 years. The remains were brought to Martinsburg for burial.

#### Deer Park

Correspondent, F. W. REIS

Our photo shows Operator F. W. Reis and his home. Mr. Reis entered the service on June 13, 1898. His home was built

Left to right: Plant Inspector C. L. Kittle; Timekeeper Carl Welsh, (a recent benedict), and Superintendent J. H. Bade of the plant at Finney, Ohio

through the Baltimore and Ohio Relief Department 14 years ago.

STOP THAT LEAK, Car Distributors, by being sure that a grain car will hold grain. Our Company pays for a very large amount of grain lost in transit.

Paw Paw, W. Va.

Correspondent, M. L. SHARON

Since our last notes we have been making a few trips around visiting Veterans. One in particular is worthy of note. I went to Martinsburg along with our old friend A. C. Hardy, to the Veterans' annual meeting January 20. We enjoyed Mr. Willard's fine talk to the Veterans and employes, also that of Mr. Galloway. Then along came Charley Auld wanting to know if we had brought any "Mountain Dew" along. Charley ought to know that we don't take any of the dew down that way. Of course we are not mayor of Paw Paw, but if Charley ever gets hold of any old dew and comes down our way, we may have the pleasure of handing him a few points of law, as Judge in the Mayor's Office.

Paw Paw is one of the large freight paying stations on the Cumberland Division, and prospects are fine.

"Bill" McBee, assistant to agent, Sterling, has been on the sick list, but is now at work again.

There is prospect of a large cold storage plant at this station in the near future. We understand it is to be built by the fruit growers of this vicinity. This will improve the storage facilities for fruit materially, especially apples, and should increase our revenue.

Much sickness is prevailing in this neighborhood, and we have recently lost many of our old time residents through the visit of the Grim Reaper.

Your correspondent was rusticated around Martinsburg a few days ago. He didn't manage to see Charley though.

#### Timber Preserving Plant

Green Spring, W. Va.

Correspondent, E. E. ALEXANDER

At the time our February notes were due we, in company with Assistant Maintenance Engineer G. F. Eberly, were making an

Loading piling at platform, Timber Treating Plant in background; portion of tie yard on left; Central Creosoting Company's Plant, Finney, Ohio

inspection of treatment ties on the Charleston Division. It was our first trip over this section and we learned much. No wonder Superintendent Trapnell is proud; they're all railroad men from the heart, with the Charleston Division of the Baltimore and Ohio their prime interest.

Cold? Oh, boy! We say it was. If you don't believe it gets cold out there, just try a trip up the mountain from Camden-on-Gauley on a motor car, at 7.00 a. m. without a windshield and with the thermometer hovering around zero. It's great—ask Eberly!

We could tell a lot of our trip but the cruel editors limit our space. Among those we had the pleasure of meeting were Division Engineer R. Brooke, a busy man; Trainmaster Deegan, a live wire; Supervisor D. S. Westfall, a work train specialist; Supervisor "Mike" Harrington, no derailments allowed; Supervisor T. J. Conley, who knows his men; Dispatcher Cabbage, formerly of the Cumberland Division, and others.

We had hoped to have the pleasure of a little visit with our old friend Superintendent Trapnell, whom we first knew on the old Hampshire Southern, and to meet his able secretary, Correspondent Jones (now on the MAGAZINE), but time did not permit.

Another tip, Harrington knows where to eat, but when in Gassaway, stop at the Valley Hotel.

### Safety First

We consider the activities of our Safety Committee during 1922 worthy of mention. All members are alert to unsafe conditions and practices. Quite a number of corrections were made and we feel confident a number of possible accidents prevented by their watchfulness.

Committeeman Irving leads with number of items observed and reported, with Committeeman Myerly only one item ahead of Committeeman Chesshire for second place and Committeeman Gross and Stottlemeyer tied for fourth position.

Sevolf says: "Better get the Safety First idea in all things. If you must be fast, put a rein on it; let Safety First be the rein."

Through the courtesy of the committee we received a copy of Cumberland Yardmen's Review and Directory Yearbook 1923, by and for Terminal Workers. The safety hints and general information for

welfare of employees we considered of such interest that it is being passed among Plant employees.

The Hampshire Review, a local paper, in its January 10th issue produced the cut of "Our Ladies" published in December MAGAZINE. This paper takes a friendly interest in us, and from time to time has reproduced, through the courtesy of our MAGAZINE, cuts that were of community interest.

55,383,515 cross ties, 166,150,545 cubic feet, were reported treated in 1921. This is approximately half of the total number of ties used by the railroads that year. Of this number the Baltimore and Ohio Plant alone treated 1,232,508 besides a considerable quantity of other material.

F. G. Catlette, formerly agent at Newburg, was appointed agent at Green Spring on January 15.

Supervisor and Mrs. E. E. Alexander and Chemist and Mrs. R. N. Angier attended the American Wood Preserver's Association

## NEW KIND OF HEAT!

Famous OLIVER Oil-Gas Burner does away with dirty coal and wood—ends roasting Summer kitchens. In one minute without changes makes any range a real gas stove—turns on and off with valve just as you need it—burns 95% air, 5% oil. Bakes and cooks better than coal. No fire to make, no wicks, ash, ashes, dirt, smoke. Perfect all season cooking, baking and heating. THIRTY DAYS FREE TRIAL. Special Low Introductory Price. **Agents Wanted** Write today for attractive booklet. "New Oliver Gives Forde Kind of Heat." sent Free postpaid. Ask For Sales Plan. **OLIVER OIL-GAS BURNER & MACHINE CO., 2099-D Oliver Building St. Louis, Mo.**

Convention at New Orleans during the latter part of January.

Treating Engineer J. R. Myerly, who was inspecting treatment of ties treated by the Watkins Creosoting Co., Metropolis, Ill., has resumed his regular duties at the Plant.

Treating Inspector and Mrs. C. L. Kittle, Lawrenceburg, Ind., announced the birth of a son, Earl Stanley, during the latter part of January.

Tie Inspector A. E. Irving recently moved into his new bungalow.

Other employes building here since our last report include Trackman Emery Twigg, Laborer W. L. Dayton and Section Foreman Albert Lewis.

Death has removed several from us since our last items were penned. Among employes affected are: Laborer J. H. Shrout, whose little six year old son, Fisher, died on December 27; Tieman Edward Wagoner felt the loss of his mother, Mrs. Charles Wagoner, who died on Christmas night; Switchman W. F. Kesler lost a nephew, "Billy" Kesler, brakeman, Morgantown; Tieman N. B. Hinkle lost his father; Mrs. G. N. Teeters and Tieman Earl Robinson feel deeply the loss of mothers, while Tieman G. R. Stewart mourns the loss of his youngest daughter. Truly death is no respecter of persons. These have felt the touch of death and found the friendship of friends.

Christmas, New Year, Winter—all passed. Does it not impress you how rapidly we, too, are rushing to our journey's end?

A number of railroad employes here have been on the sick list. In fact it resembled a "flu" epidemic. Physicians have been kept busy; not a home has been missed. Several continue quite ill at this writing.

### Stop That Leak!

The railroads are paying out annually millions of dollars in loss and damage

Superintendent Bade, Central Creosoting Co., telling Engineer Maintenance of Way S. A. Jordan about thorough penetration. The other interested listeners are, left to right: Plant Inspector Kittle; W. P. Abbott, former assistant division engineer, Cincinnati Terminals; Division Engineer J. H. Hewes, Jr., St. Louis Division; Signal Supervisor J. W. Kunker, St. Louis Division and Cincinnati Terminal

**ENGINE 2761, HER CREW AND A FEW VISITORS**

Engineer James Buhler, in cab; left to right are Brakeman E. A. Michaels, Superintendent Central Creosoting Company J. H. Bade, Conductor Charles Childers, Brakeman O. M. Rink, Fireman W. G. Lane, Plant Inspector C. L. Kittle. Picture taken at Finney, Ohio

claims. It was our privilege recently to attend a special meeting at the U. S. Forest Products Laboratory, Madison, Wisconsin, where special research work is being done toward reduction of this great loss. Elaborate experiments have been and are now being conducted on proper packing and proper construction of containers for shipments. Packages are submitted to usual warehouse, transfer and car abuse, while under observation. The proper spacing of nails, the value of an additional nail and wire bindings clearly proven. If it could be afforded, an educational campaign similar to our Safety First and other movements would prove profitable. A liberal distribution of results of the laboratory studies among shippers is another suggestion. Meantime from observation we feel sure that a little more careful handling of present containers by station and warehouse employees will materially reduce that leak. We have had some experience.

We find we must omit several of our notes made from time to time, but ask space to present a few pictures taken on Western Lines, at the Central Creosoting Company's

Plant, Finney, Ohio, regularly engaged in treating ties, piling and other material for our lines.

### Connellsville Division

Correspondent, C. E. REYNOLDS

Fred Damico and Miss Emma Revilla of Somerset were quietly united in Holy Matrimony at Cumberland, Md., on February 24.

The groom has been employed by the Baltimore and Ohio as machinist's helper for a number of years, and has served one enlistment in the Medical Corps of the U. S. Army. The bride was formerly the accommodating ticket dispenser at the Palace Skating Rink. They will reside on South Center Avenue.

### Pittsburgh Division

Correspondents, EARL N. FAIRGRIEVE and MARY E. BREEN

Our old friend "Sam" McElroy, has just returned from a long visit to Florida. He had a great time; his report is verified by

his appearance. Mr. Mac tells us he had some difficulty in becoming accustomed to the gentle breezes of the South and that he was glad to get a good cold day or two on his return to Pittsburgh.

Miss Teresa Kenny, until lately one of our clerks in the Car Distributor's Office, has been in St. Margaret's Hospital undergoing treatment for a mastoid. She is now at home and on a good road to recovery.

Although Cupid has been hanging around for a good while with his eye on several of us, he has succeeded in getting only one—Anne Griffith, of the Division Accountant's Office, whose wedding took place on the first day of Spring, March 21, at the Baptist Church, Hazelwood, at 7.40 p. m., there being some notion about the upward stroke of the clock. Anne went around for a good while, wearing quite a large grin, but when asked about the cause thereof, always denied that it was anything but her natural look. She was presented with a chest of silver from her many friends in the building, initialed with a nice little "S," which means Percy Stevens (we nearly forgot him, but he's the other half.) With Anne go the best wishes of everyone in the building; we only hope that her husband is able to survive the first few meals, for after that, they say a man can eat anything at all.

Here is a picture of Marguerite Hays, two year old daughter of Engineer "Ed" Hays. Looks as though Marguerite has every intention of growing up to be a little vamp.

Death, the Grim Reaper, has removed from our midst the oldest clerical employe in point of service on the Pittsburgh Division, H. S. MacConnell, cashier's clerk, Pittsburgh Terminal Agent's Office. Mr. MacConnell was born on July 13, 1856 and entered the service of the Baltimore and Ohio March 1, 1884. "Mac," as he was familiarly known, was a hard and earnest worker, and during his 39 years of service was loyal and untiring in his efforts to serve the interests of the Company. We mourn his loss and extend to the bereaved widow our sympathy, in this, her hour of sorrow.

Another employe, also a veteran in point of service, connected with the same office in the capacity of assistant agent, was stricken with pneumonia, and passed to the Great Beyond within twelve hours after Mr. MacConnell. We refer to L. W. Turner, for a number of years connected with the Terminal Agent's Office, Pittsburgh, and who at the time of his death occupied the position of assistant agent. Mr. Turner was born on June 22, 1879, and

first entered the service of the Baltimore and Ohio at Pier 22, New York on February 1, 1899. Like Mr. MacConnell, he was faithful and untiring in his efforts—a loyal and true servant of the Road. To those whom he leaves behind, we extend our sympathy and trust they may be comforted in the consoling fact that he has gone to his just reward.

Friends and acquaintances of Assistant Trainmaster W. C. Neagle, Pittsburgh Terminals, will be grieved to learn that he was the victim of an unfortunate accident and is at present confined in the Homeopathic Hospital, Pittsburgh, with a broken leg and other painful injuries. "Uncle Billy," as he is familiarly known, was off duty on the day he was injured. While riding down Liberty Avenue in his automobile, he came upon some children who had become confused and in order to save them from injury, he steered his machine into a telegraph pole, and thus, while acting in the role of a hero, was painfully injured.

We are sympathizing with "Uncle Billy" in his mishap, and trust he will rapidly recover and resume his duties in our midst. We rejoice with him in his presence of mind, although resulting disastrously to him, whereby he was able to save the lives of these children, and we feel that he is happy in the fact that it was so.

We extend our sympathy to Mrs. Naomi Hetzel, secretary to Terminal Superintendent Martin, who was called to her home in Berkeley Springs recently by the death of her mother.

There are quite a number of musicians and some comedians in the passenger station at Pittsburgh, also some song birds and imitators, and some ladies in waiting, and some brides—to be—some day. You should hear "Bud" Ryan sing. His rendition of Mr. Gallagher and Mr. Shean is a treat. Some day this boy will forsake the file clerk game and entertain countless unseen guests "listening in" on the radio. He's good, this boy, but we are afraid the goblins will get him if he doesn't quit paying so much attention to the ladies.

Dear Reader, after perusing these notes, don't forget the adopted slogan which the Management is endeavoring to have you observe: "STOP THAT LEAK."

**Glenwood Roundhouse**

Correspondent, JANE P. PASSMORE

Our road foreman of engines had a great deal of trouble with boils. Don't worry, Mr. Berg; each one is said to be worth \$100.00.

We feel that Carpenter H. T. Haslop, Pittsburgh, should be commended on his quick action in extinguishing fire in dining car No. 1003, attached to train No. 77, caused by an overheated stove in kitchen. Mr. Haslop extinguished the fire and went with the train to Wheeling to be sure that there was no further danger. We are glad to see that employees are on the alert and on the watch for conditions of this kind.

**STOP THAT LEAK!** There are so many opportunities where employes can Stop A Leak, no matter how small the leak might be, that in time the saving would grow. Let us always be on the watch for that tiny leak. **STOP THAT LEAK!** That is one thing that we don't want to grow.

Write about your observations of any leaks to: **STOP THAT LEAK**, Mount Royal Station, Baltimore, Md.

J. E. Kerr has been transferred from Allegheny Shops to Master Mechanic's Office, vice A. T. Satterfield, resigned to take up other duties.

A word of praise goes to Agent J. W. Dashiell, Glenwood, for his courteous treatment and prompt handling of affairs pertaining to the Agent's Office. Everybody speaks well of Mr. Dashiell and the Pittsburgh Division should feel complimented in having men like him.

Yes, we heard about it, George. Kaufman & Baer, our large department store, had a sale, which a certain boiler foreman took advantage of and purchased a suit.

Foreman F. J. Yost is all smiles. Yes, it is a boy!

Cigars were passed around recently by Pipefitter J. J. Voltz on the arrival of a girl at his home.

**Glenwood Back Shop**

Correspondent, FRANCES E. LEEPER

"STOP THAT LEAK" is evidently the Baltimore and Ohio password and Glenwood seems fully aware of the fact. Everybody, everywhere and all the time is saving material and time by carrying out the instructions of their superiors, which is the first part of stopping the leak. We hope to have more on this subject for the next issue of the MAGAZINE.

Congratulations, Miss Spengler! The boys certainly did enjoy your visit, and all are looking forward to the time when you will come back and tell us all about your trip. The best wishes of the Glenwood Shop employes are with you.

Miss Goldstrohm (Tillie the Toiler), is back on the job after being on a furlough since November.

We were all sorry to hear of the resignation of J. H. Gallagher, leading A. R. clerk, but we find a new happiness in the person of F. L. Berkeybile, who has been appointed to fill Mr. Gallagher's position.

Things are beginning to look natural once more since the shops have resumed full operation, at least in the way of old timers coming back on the job. C. E. Pury and "Mike" McEvoy are just two we can mention right now, and, believe me, they are making things hum in the Car Foreman's Office!

I notice one of our worthy air brake repairmen, W. Degenhardt, has secured a license (not a bear hunting license this time), to wed Miss Pearl Metz, of Library, Pa. He doesn't know we have her name, but we fooled him this time. Watch the old Ford, "Bill." Congratulations!

**Monongah Division**

Correspondent, ANNA MARY UNKS

The following was written in 1892 by S. M. Stutler, a 5th Division brakeman, and has been kept and cherished by a few of veterans of the old days—

I will sing you something new,  
Of a Fifth Division crew,  
On the 19674;  
Old Morris rides the rear,  
Collector gets on his car,  
And Major on the front lets them go;  
When we get behind old Thayer  
On the 1394,  
We make old Murphy sweat behind the  
shovel;  
She's the only boat that's in it—  
She can make a mile a minute,  
Sliding down the hills and o'er the level.  
Old Gilbert hauled the crew  
On the only '92  
But Philips made him pile them up accord-  
ing;  
At the Flemington middle switch  
There he piled them in the ditch,

This valuable Book together with sample for testing and color cards FREE.

**WRITE TODAY**  
**C. E. LIVELY & CO.,** 444 United Bank Bldg.  
Cincinnati, Ohio.

But Major got the worst end of the bargain. Old Gilbert cursed and roared  
When he went before the board  
And the great men tried him on the carpet.  
Oh! the recommend was plain  
With the Superintendent's name,  
Then he had a chance to take his eggs to market.

If you'll give me your attention  
There's a man that I will mention—  
He's a runner on the 1397;  
He's six foot in the air  
And you'll always find him square.  
He's a buster and his feet are number 'leven  
When he gets against the hill  
Bradford says it is a pill  
For to keep there steam enough to move her;  
He can make her puff and smoke  
While old "Jimmy" makes her float,  
With the Middle Island River running through her.

There's a thing that's often tried  
That the brakeman has to ride,  
The people on the skin have named them  
"hoppers,"  
When we get them in the rough  
You may bet they have to go,  
When Moran gets a chance to try these  
rockers.  
Oh, you ought to see them shake  
When we let off all the brakes.  
And go adown the Long Run helterskelter;  
Every hopper tries its best  
For to outrun all the rest,  
And we have to run to Cornwallis for water.

If the Master of the skin  
Would just give us links and pins,  
We could put a train together for to move it.  
When they give us what we need  
You may bet we make the speed.  
Oh, the Branch boys they know just the  
way to do it.  
Uncle Joe's a sober man  
And he gets it on a plan,  
And he always make us mind the rules  
according,  
If a car should jump the track  
He will rip us up the back.  
And give us thirty days to bind the bargain.  
—S. M. Stutler

Frances Pauline and Henry Paul, Jr., children of Machinist Apprentice H. P. Madera. Grafton, W. Va.

The photo on preceding page shows Francis Pauline and Henry Paul, Jr., children of Machinist Apprentice H. P. Madera of Grafton, W. Va.

The accompanying picture is of Mr. and Mrs. John Cassell. Mr. Cassell, now 85 years old and retired with honors from the service of the Baltimore and Ohio, came to work with the Railroad in 1859 as grease wiper. He worked here until the beginning of the Civil War, when he answered the call of the President and served throughout the duration of the war. He was mustered out in April, 1865 and immediately re-entered the service of the Baltimore and Ohio at Grafton.

He served in various capacities for 49 years, and in 1908 was retired. Since that time he has been living on his farm near Grafton, enjoying his well-earned rest. Mrs. Cassell is 74 years old.

Superintendent B. Z. Holverstott has resigned, much to the surprise of his friends and acquaintances. Mr. Holverstott has held various positions on the Monongah Division, working himself up from the clerical force to the position of superintendent of the division. He has been a pleasant and efficient "boss" and we liked him. We regret seeing him go from our midst.

The only change that has been made in the Superintendent's Office is the removal of Mary Jane Tierney, secretary to Mr. McClung, assistant superintendent, to the Trainmaster's Office. It is deplorable to think of poor Mr. Manning having to work in the same office with a girl. Cheer up, Dick, the worst is yet to come.

Lost—A small rectangular shaped scrub brush. Finder kindly return to the Baltimore and Ohio Medical Examiner's Office and receive reward.

Attention—Boys and Girls—Don't get excited when Carl Theis, second trick chief dispatcher, frowns. That is only his "moving picture face."

Mr. Robey is still our clever and efficient first trick chief dispatcher.

Mr. and Mrs. John M. Cassell

Fred Cole, chief clerk to the general yardmaster, Clarksburg, W. Va., promised to send me some pictures of Ray and himself for the MAGAZINE. Did they get lost in the mail?

### Charleston Division

Correspondent, M. W. JONES

Secretary to Superintendent

It's best to keep a smilin',  
For a smile's a kind o' net  
That catches by beguillin'  
Just the thing it wants to get.

So keep your smile a spreadin'  
Crack a jolly joke or two,  
And you'll find that things come headin'  
Straight for smilin' folks like you.

There is nothing like being in the "swim" they say, but we most sincerely hope that Messrs. Schide, Severns and McOsker won't be in the swim in the West Fork River this summer after they get the work done which is now occupying their spare time, even to the extent of keeping them away from church on Sunday. Listen—they are building themselves a motor boat. Rumor has it that the recent trip they made into the surrounding country on a holiday was for the purpose of cutting down trees to drag into Weston, cut up into boards and build them a little boat. Messrs. Schide

and McOsker are tall and thin, maybe they could swim out if the boat sinks, but as the Spanish say "Quien Sabe" (who knows) what would happen to "Bill?" We fear that between the shady narrow banks of the dear old West Fork there is not sufficient room for him and the water. Let us hope for the best. Maybe they could walk out on dry land after "Bill" fell in. Developments are awaited with interest. (Baltimore papers please copy.)

Headquarters at Weston had some honored guests recently. One day there arrived in town: W. R. Pitt, special accountant; L. W. Fowler, division accountant, Mt. Clare; W. C. Barnes, division accountant, Grafton; S. J. Jewett, division accountant, Akron; H. H. Summers, division accountant, Washington, Ind., and C. J. Miller, chief M. P. Bureau, Mr. Hill's office, Baltimore. They held a meeting with our division accountant when "weighty matters" were doubtless considered. Good will surely result from the meeting of so many highly trained minds. The visitors were forcibly impressed with the entertainment given them, they also were highly pleased with our division's efficiency. The entertainment committee consisted of Messrs. Schide, Severns, McOsker and D. T. Cutright.

It is with great regret that we have to record the death of Agent W. E. Hoyt, Walkersville, W. Va., in the Johns Hopkins Hospital, Baltimore, on February 28. Mr. Hoyt was taken suddenly ill on February 26 and rushed to Baltimore where an operation was performed from which he never rallied. Our sincere sympathy is extended to Mrs. Hoyt. We have all lost a good friend, and the Baltimore and Ohio an efficient and loyal employe. Born in 1857 Mr. Hoyt entered the service of this Company as agent-operator, Ohio River Division, in 1884, and has been with us practically ever since. He went to the Coal and Coke as agent at Walkersville in 1908, where he remained as agent until he was taken to the hospital. His record is a good one, and one to be a cause of pride to his surviving relatives.

With the whole-souled help of officers and men, the Charleston Division smothered all competition this year when it put the Gassaway "Y" over the top to the tune of 540 members

R. K. McMillian, born in 1889, entered the service of this Company as a brakeman on November 21, 1922, at Gassaway. Through the overturning of an engine at a slide on January 29, Mr. McMillian received injuries from which he died the same day.

Mr. McMillian leaves a widow and three small children, to whom we extend our sincere sympathy.

Many of you may remember hearing, when you were small children, the nursery rhyme which begins: "Hark, hark, the dogs do bark, the beggars are coming to town." Thereby hangs a tale, or rather two "tails," because this is the story of two dogs. Recently Major Brooke and W. H. Schide decided that they would like to go in for hunting when the opportunity offered. They procured for themselves from a very distant point somewhere in Ohio, two pointers. These duly arrived and have been christened with due ceremony, "Virginia Bab" and "Lady Van Mar." We hear that the game in the vicinity of Weston has sent out an S. O. S. in the form of laws which will prohibit Messrs. Brooke and Schide from hunting anything but sparrows and sparrow hawks.

#### Don't Waste Transportation

The attention of everyone on the Division has been called to a very interesting circular letter issued by Superintendent of Transportation Curren, under date of March 7. The car situation is getting much tighter. Advices are being received from various parts of the country of warehouses blocked with outbound traffic on account of lack of available cars. An important matter brought out by Mr. Curren is that the amount of traffic which the Baltimore and Ohio will enjoy will depend in a great measure on the available car supply. Everyone can help in this campaign. Agents, particularly, can ask our patrons to load all cars to full carrying capacity, to load all cars on the day they are placed, to unload all cars on the day they are placed, regardless of the free time allowed and by confining their orders to actual and immediate requirements for the day.

Train men can help us by calling attention to any delayed cars. In fact, there is no employe on the Charleston Division who cannot assist in this important campaign. More business means more work. More work means more money spent in the employment of labor, and consequently, prosperity for the workers on the Division. The Charleston Division, not long ago, made a record of almost twenty miles per car per day, and with the wholehearted cooperation and assistance of everyone, we feel sure that this record could be put up to twenty-five miles per car per day. Will you do your share?

Secretary E. H. Goelz, of the Gassaway Y. M. C. A., advises us that the annual membership drive was a tremendous success. He has sent us a photograph of some of those who helped to make this a success. Gassaway has always boasted when it has been able to reach the 300 mark, but this year it has passed 500, the exact figures being 540. In his letter of congratulation Chief of Welfare W. W. Wood said that Gassaway smothered everyone this year in their mad rush to go over the top. It is not necessary to name each one of those in the photograph, as they are too well known to need any introduction to our readers. Among those present, however, will be seen Assistant Superintendent J. C. Kinton, Trainmaster J. D. Nicholas, Secretary E. H. Goelz, looking over the top of the board with "The smile that won't come off;" General Car Foreman Garber and Chief

Shop Clerk H. A. Hays. Two men whose photographs are not among those above are entitled to much credit for their assistance in the campaign, viz: Master Mechanic H. J. Burkley and Car Clerk Archie Crosslin.

The Y. M. C. A. held a stag party on the evening of February 24, for the shop men and Transportation Department. It was a great success. There was plenty of good music, singing and story telling. We had the pleasure of having with us on this occasion a goodly number of the local officials and our good friend, Superintendent Trapnell, who made a few remarks, told some good stories and jokes. Much credit is due G. G. O'Connor for the boxing bouts and Earl Duncan for his songs and banjo playing. The music was furnished by our good friend, J. A. Bowen, and his two sons. The cornet duet by W. E. Williams and Mr. Duckworth was well received. Last, but not least, was the address on "Old Time Railroading," by David R. Barrett, who has been in the railroading game for the past thirty years.

We should like to have some pictures of children of our employes who are graduating from various grades of schools. We know that our Charleston Division folk would like to see their children in the MAGAZINE, in competition with the various other divisions of the system. Therefore, we ask that all having such pictures send them to the correspondent for publication, with a short description of the school career of the child shown.

The sincere sympathy of everyone on the Charleston Division is extended to Mrs. W. E. Severns, wife of our genial division accountant, on the death of her father in Baltimore.

#### Vale!

Your correspondent desires to take this opportunity of expressing his sincere thanks to everyone on the Charleston Division, for the many courtesies and kindnesses which have been extended to him during the past three years and a half. He is leaving for Baltimore on March 15, to assume new duties, although he is glad to say he will still remain in the service of the Baltimore and Ohio.

Car Distributor C. W. Dixon has consented to take over the duties of correspondent for the Charleston Division. Your retiring correspondent asks for him the same measure of hearty cooperation and good will which has always been extended to him.

While separating from many friends causes the writer great regret, still Baltimore is not far away, and it is our earnest hope that any friends visiting Baltimore will not fail to look us up at Mt. Royal Station, where "the latch string will be always out."

M. D. Dean, of Baltimore, has been appointed secretary to the superintendent of the Charleston Division, in the writer's place. To him I ask that you extend the same good fellowship and friendship you have always extended to me.

General Manager E. W. Scheer, General Superintendent J. M. Scott and Engineer Maintenance E. G. Lane were recent visitors on the Charleston Division. They were accompanied on their trip of inspection by Superintendent W. Trapnell, Division Engineer R. Brooke, and other division officers.

If you want to get a rise out of the car distributor, ask him if there are any dentists in Wheeling. Then stand in the doorway and be prepared to run.

In the March issue we ran an item commending Conductor R. A. Brake for his courtesy to passengers. We are glad to

#### TWENTY ACRES AND PLENTY

FREE book tells truth about Florida land; monthly payments \$1.00 an acre; Orange Groves planted cared for 10 per cent. above cost.

SYLVESTER E. WILSON,

present in the Honor Roll of this issue a photo of Brake in his uniform. R. A. Brake was born in Rock Love, W. Va. in 1885. His first railroad service was with the old Coal and Coke as brakeman in 1907. In 1910 he was promoted to conductor and in 1918 to extra passenger conductor. Of a genial disposition, Brake is a general favorite with his fellow employes and officers alike.

Sponge: I think that a street car hash just passed.

Wet: How you know?

Sponge: I can see its tracks.—*Jester.*

He: Dear, if I can't return for dinner, I shall send you a note.

She: Do not bother yourself, Hon, I have already found the note in your inside pocket.—*Illdow.*

#### Wheeling Division

Correspondent, MARIE SLATTERICK

Congratulations are in order this month. To Mr. and Mrs. George Sinn on the birth of a baby daughter on February 24. George is a murrage clerk at the Wheeling Freight House. To Engineer and Mrs. D. E. Shatzer; a baby daughter born on March 2, at Holloway, Ohio.

#### Track Notes

Heard a man in the station ask Captain Johnson what time the two o'clock train pulled out. Of course "Cap" answered "On time."

Noticed Division Operator A. N. Peters getting quick service at a local restaurant. Four waitresses rushed to his table and completely deserted the other patrons, among whom were Assistant Division Engineer Guy Long and Carl Miller of the Division Engineer's Office. What's your system, "Pete?"

"The Sheik" at Wheeling Station gets a hair cut every other day. The reason? A Miss H., of Bridgeport. He's wearing the regulation Valentino side-burns now! (Everybody likes to kiss Fred Brady, somehow!)

Just because somebody wished a purple shirt on Howard Myers is no reason why we should suffer partial loss of eyesight, is it? Howard insists on wearing this particular shirt to the office (Car Distributor's) and those of us who aren't wearing shell-rims have adopted eye-shades.

After somebody in the Division Accountant's Office passed some candy around and certain clerks partook, they were horrified to discover their mouths and tongues a beautiful indigo blue and had us all pretty badly scared thinking they were poisoned. But somebody with a funny sense of humor had put mentholene blue in this particular candy, which, of course, is perfectly harmless. However, the following have sort of sworn off candy, at least until they can make a close inspection: Miss Della Wells, Robert Evans, Vernon Coxon, "Bill" Nolte.

We've learned that Bailey Nuzum of Fairmont, will become general yardmaster

at Holloway, vice C. C. Pitcher, transferred to Baltimore. Best wishes for success to both.

Boilermaker "Joe" Bushby was calling names the other day and gave us quite a thrill when he wanted to know who put the "broad-faced chicken" in his locker. The "broad-faced chicken" was nothing but an owl that some playful person caught in Benwood and wanted to give "Joe" as a gift. Better be careful "Joe," owls may object to being classed with chickens.

Misses Margaret and Josephine, daughters of Pumper Villers at Littleton, entertained with a house party for the week-end of March 17. Their hospitality is of the sincerest kind and if you want to have a wonderful time get a "bid" to one of these parties. John Cusack, Road Foreman's Office, and "Bill" Daugherty, of the Machine Shop, Benwood, were both there. Of course, that's not all of the party. THE WHEELING DIVISION MAGAZINE CORRESPONDENT was also among those present!

J. W. Stocking, Master Mechanic's Office, has been granted leave of absence to go to Texas for his health. We're all going to miss "Sox's" sunny presence and we hope he gets well enough to come back soon.

We wish to extend sympathy and condolences to Live Stock Agent E. J. Kemple on the death of his month-old daughter on March 8.

### Ohio River Sub-Division

Correspondent, CHARLOTTE S. MARLOWE, Agent's Office

EXTRY! EXTRY! All about Charlie Ritchie gittin' gassed.

A few Sabbaths ago, when most of his neighbors were at their devotions, Charlie Ritchie shock a wicked leg out to his garage and started the engine of his auto, preparatory to taking a nice ride. This machine, having worked on the prescribed six days, decided to rest, so liberated some carbon monoxide which put Sir Charles on the blink. While in this detached state he says he was floating about in space with a little harp, 'n wings 'n everything. Just when he begun to think he was rid of all earthly cares, he was suddenly brought back by the Doctor, saying "He's all right now, \$25.00."

Never mind, Charley,  
Don't you cry,  
You'll be an angel  
Bye and bye.  
Stop That Leak!

The keen-eyed and ever watchful guardian of the Company's supplies at the

Mr. and Mrs. Jerry Hamilton

Joe Cromley, Parkersburg, being introduced to the family goat

Agent's Office, day by day in every way, is getting more and more enthusiastic about the "Stop That Leak" campaign. He talks it, he sings it, he practices it. Ladies and Gentleman, meet our chief clerk, J. K. Cromley.

When we go to his desk and ask for a pencil, he says "Where are the pencils I gave you last time?" We hopefully produce a few inches of pencil, Mr. Cromley inspects it and brings forth—a pencil? I'll say he doesn't. He produces a pencil holder, and if we appear dull of comprehension, he explains its use.

This procedure on his part has been the cause of numerous bunches of short castoff pencils being brought to light, and again into use, thereby stopping a small but noticeable leak.

The heart of "Jerry" Hamilton, gentleman vamp, has at last been pierced by Cupid's dart, and he has joined the ranks of the benedicts.

The time: February 17.

The place: First Christian Parsonage, Parkersburg.

The GIRL: Miss Lena Gorman, daughter of W. H. Gorman, blacksmith in the Low Yards.

The couple were attended by Miss Pauline Keys and Mr. Joseph Postlewait, the ceremony being performed by Rev. Yocum.

"Jerry's" on the job at the Coal Billing Station in the Low Yards. We wish him and his lovely bride much happiness.

The accompanying is a picture of the infant son of G. A. Barnett, Charles, age eight months. "Barney" may well be proud of such a fine boy.

Walker Hamilton, famous truck gardener, has received his cucumber plants and cabbage seed from Sears, Roebuck, and is all set for a summer's hard work.

"Billy" Duff told us the Belpre Worms and Bugs Association called a special meeting on hearing of this shipment, and after a long and stormy debate agreed to allow Walker the usual 10 per cent. of the crop for his trouble.

Miss Margie Lasure, revision clerk, recently announced her engagement to Mr. Charles Matheney, former Expense Bill Clerk, now engaged in the transfer business. Their romance had its inception at the Freight House, when Mr. Matheney was transferred from the Low Yards to our office. We don't have a thing against the Party of the Second Part (in fact, we rather like him) but just the same it was a low-

brow trick to stay with us only a few months and then coax one of our best clerks to skiddoo with him. We begged Margie not to break up our circle, but for all the listening she did, we might as well have been singing psalms to King Tut. The wedding date is set for June 6.

Chief Clerk "Joe" Cromley was given the caputular degrees, including the Royal Arch, at the Masonic Reunion of the Chapter, on Friday, March 9. He was captured at 1.00 o'clock in the afternoon and not released until 11.00 p. m. The accompanying cut shows "Joe" being introduced to the family goat.

After sampling signal oil as a beverage, Caller Swartz and Engineer Weisheit declare that they will use water for drinking purposes in the future.

The air around the Yard Office in the Low Yards is getting thick with technical terms since "Jerry" Hamilton and George Barnett have taken up the study of Traffic Management.

Some things you may hear around the Parkersburg Yards:

- E. J. Johnson—"Yes, Garge."
- Joker Joyce—"I can't be bothered."
- "Gus" McCarthy—"He don't know what he's doing."
- "Winnie" Taylor—"Do I KNOW him?"
- "Bust-'em-all" Murphy—"The Store-keeper wants a 'gongoolie."
- "Jerry" Hamilton—"Very Previous."
- "Eddie" Wilkinson—"Uh-huh."
- "Bert" Christopher—"Is that right?"
- H. L. Hickman—"Nother work train."
- "Slim" Frasure—"Now, a good Yard Clerk——"
- George Barnett—"The Coal report don't balance."
- "Steve" Johnson, the Boy Whistler—"Now, try to tell the truth."
- "Peter" McCabe—"Is the General there?"
- "Tom" Swain—"About on time."
- George Beatty—"I only got about an hour's sleep to-day."
- "Fred" Wells—"We need that one."

Glenna Warren recently bought a Jewett car, and has been duly licensed to kill or cripple.

"Don" Lang, handsome and single labor Foreman, Low Yards, got a new silver pencil and fountain pen "gave to him," and says he would like to correspond with some of the fair ones. He will answer all letters received from maidens 16 to 65 years old. Don't shove, girls.

Charles, eight months old son of G. A. Barnett

Freight Agent F. A. Carpenter and his "Big Four" of the oldest employes in the Freight House

"Leo" Joyce and "Joe" Clark are both back to work after severe attacks of the flu. "Josey," who was never sick before, thought if a spoonful was good a glassful would be better, and took his medicine in large doses. We are mighty glad you are lined with cast iron, "Joe." We didn't want to "Say it with Flowers." The little Roach has been very sick, too, that is home-sick. We are glad to see you back again, little Bug.

Gardner Duncan, rate clerk, recently sold his pretty bungalow on Lynn Street. It was so profitable he is thinking of going into the real estate business and working his present position as a side line.

"Sweet Marie" Lavelle is quite a rare treat, in her trim little boots when she trips up the street, I just feel like hugging and kissing Marie, But then she might take her boots to me."

W. G. Biddle, Low Yards, and Miss Charlotte Wagner were recently married in Marietta, Ohio. The wedding was in the nature of an elopement and the details are meagre as W. G. is a reticent man. You could have gotten tied just as tight at home, W. G. We'll have to sick the Board of Commerce onto you for taking your business out of town.

When Conductor "Babe" Wagoner saw Trixie Dye coming to work one morning recently, he thought someone had stolen the headlight from his engine. He was about to report his loss when on closer inspection he discovered it was just one of the regular sparklers, with a trifle more sparkle to it.

Miss Mary Keenan, who recently went to New York to see her sister, had her visit cut short by receiving the sad intelligence of the death of Priscilla, her pet and the Freight House eat. She hurried home to see that Priscilla was laid away as a cat befitting her station should be, only to find that the last sad rites had been performed by C. L. Wigal, "Skinny" Nolan and "Dog" Jones, who gave kitty a decent burial in the Baltimore and Ohio lot back of the Freight House. Wigal dug the grave, "Skinny" acted as pallbearer, while "Dog" chanted the old familiar lines:

Ashes to Ashes,  
And dust to dust,  
If the Lord won't take you  
The devil must.

WANTED: Brave individual to empty mouse traps daily. I can set them but I can't empty them. References given. Won't you please apply quick to

JUNE GARDNER,  
Account Storekeeper,  
Low Yards.

Hear ye! Hear ye! Utopia is at last a reality. Water will new run up-hill, "Steve"

Johnson will stop whistling, Bryan will be our next President and Henry Ford will stop making money. In other words, there is a new pencil sharpener in the Low Yard Office. The man who said that miracles don't happen may now step up and get knocked down.

Accompanying is a photograph of F. A. Carpenter, freight agent at Parkersburg, and his "Big Four," the oldest employes at the Freight House.

Left to right are Platform Foreman F. H. McPherson, 34 years' service; Time and Tonnage Clerk T. S. Ball, 32 years; center, Agent F. A. Carpenter, fourth, Claim Clerk E. W. Miller, 32 years, and last, but not least, except in weight, C. M. Whittier, the oldest employe, with 37 years to his credit. Mr. McPherson, during his 34 years of service, has received only two weeks' sick benefits from the Relief Department. A pretty good record, don't you think?

**"Pete" McCabe is Receiving Lessons in English**

Boxing fans in this section were given a rare treat recently, in the shape of a bout entitled "Kid" English vs. "Battling" McCabe. Both contestants seemed in good form (?) at the start, but we soon saw that McCabe was out of his class. The fireworks started when the "Kid" shot in a volley of short syllables, McCabe making a few wild stabs and then covering up. Near the end of the round, English caught McCabe over the heart with "insubordination" and only the bell prevented a knock-out. The second round opened with McCabe staggering around the ring, and after 30 seconds of fighting "Kid" English caught the "Battler" flush on the button with "specific." McCabe went to his knees, then rolled over and listened to the birdies sing, while the referee tolled off the fatal ten.

**Business is Business**

"Business is business," but men are men,  
Loving and working, dreaming,  
Toiling with pencil or spade or pen,  
Roistering, planning, scheming.

"Business is business," but he's a fool  
Whose business has grown to smother  
His faith in men and the golden rule,  
His love for a friend and brother.

"Business is business," but life is life;  
Though we're all in the game to win it,  
Let's rest sometime from the heat and strife  
And try to be friends for a minute.

Let's seek to be comrades now and then,  
And slip from our golden tether;  
"Business is business," but men are men,  
And we're all good pals together!

**Western Lines  
General Offices**

Correspondent, THOMAS J. MURPHY  
General Manager's Office

Assistant to General Manager Russell participated in the celebration by the Newark Division Veterans at Newark on March 8. The details of the affair will be left to the description of our "Ace" correspondent.

Spring must be here or hereabouts. W. A. Radspinner has removed his golf sticks from white lead and promises even more astonishing scores than he "promised" last year.

Elizabeth Martin, after a serious siege of illness, returned to the office on March 4, and received a royal welcome.

NOTE: The following picture and item concerning the correspondent of the Cincinnati General Offices was sent in to the editor by one of Mr. Murphy's office friends. Naturally, our folks like to hear about the correspondents. Bring on some more!

—Ed.

The accompanying picture is of our correspondent for the past several months, T. J. Murphy, chief clerk to G. D. Brooke, Superintendent Transportation, who has just returned to the office from a delayed vacation. We don't know whether he has ever been in a large town like Chicago before, but because of the fact that he has a stiff neck, and that the roof of his mouth is sunburned, we are of the opinion that there must be a large number of tall buildings in Chicago. We heard that there were several city slickers waiting for him at the depot on his arrival but somehow he got through the line and from what we hear he had a good time.

T. J. Murphy, Magazine correspondent, Cincinnati General Offices. Why should so handsome a scribe object to having his picture in the Magazine—yet this one came to us by stealth!

Ed.

Our own "Guzz" Duesing is carving quite a niche in the athletic hall of fame and has received many appropriate newspaper comments for his achievements, particularly in basketball.

Our efficient comptometer operator, Charlotte Lauther, recently complained that although a number of young men from the office were at her house they had not asked her to dance; after hearing who the young men were I am satisfied I misunderstood her and that instead of complaining she was rejoicing.

A. B. Vermillion, Baltimore and Madisonville, is expected to visit us sometime soon again.

"Ed" Spille has almost kicked his desk to pieces since he invested in the gas wagon. Just can't make his foot behave when he starts or stops his typewriter.

Sincere sympathy of the general, divisional and local offices is extended to Miss Maude Crawford, whose mother died during March.

John Naylor, since joining the Veterans' organization, has become one of its most active solicitors for members; practically every eligible man in the general offices has been enrolled.

Free transportation is a courtesy extended to railroad employes; it is intended for presentation to the conductor each time the train is used. On the commuter runs the conductor's time is valuable, and between some stations, insufficient to enable him to get all fares unless employes do their part and have transportation ready when he reaches them.

Now that the weather is good the seating capacity in the commuter coaches will be increased materially, as many people will shed their overcoats instead of parking them in space intended for seating purposes.

#### Assistant Fuel Agent's Office

Outside of a visit to the "Bobber" shop there is nothing of interest to report.

#### General Superintendent's Office

William Jones, of Lawrenceburg, and

formerly connected with the Division Freight Office, has succeeded E. A. Duncan as stenographer to Assistant Chief Clerk Buntun.

Fred, the porter, tried to stampede the Union Newsstand recently by laying down a nickel and calling for one regular dinner. The butch was wise however, and handed over a pack of peanuts.

#### Engineer Maintenance of Way Office

It seems the only way to introduce this department is by publishing the group picture taken by the associate editor of the MAGAZINE several months ago. For some unaccountable reason none of their names ever get into the MAGAZINE. After looking them over it is evident that something must happen now and then that would be of interest to our readers. The aid to our correspondent has promised to develop some interesting features in the near future and the result is anxiously awaited.

The picture shown here includes: J. W. Kathman, E. C. Yocum, R. T. Everett, G. W. Motheral, J. P. Ray, F. G. Dickman, G. F. Daubenmerkle, P. A. O'Callahan, J. E. McKibben, A. H. Griffith, A. S. Allen, H. L. Scribner, T. T. Doyle, S. A. Graham, C. O. Medert, S. G. Thompson, J. E. Riley, F. A. Sinnott, F. C. Slaline, J. J. Kolker and H. S. Davis.

In the way of suggestion it might be possible to find:

That garrulous fellow Dickman making a speech.

C. O. Medert without his meerschaum.

E. C. Yokum in bad humor.

F. A. Sinnott when he wasn't busy.

Francis Hughes without any dictation in his book.

Joe Ryan when he wasn't in a hurry—Etc.

#### Superintendent Motive Power Office

If all the things Senator Dick says about C. E. Winall are true, "Clif" is surely some boy.

The watchdog of the treasury has nothing on W. H. Moorehouse when it comes to watching the equipment records of the

Railroad; his untiring zeal in keeping them up to the minute is highly commendable.

"On the Honeymoon Trail"—a little sketch by George Luckey and Eleanor Surran—was put on on March 15. George is lucky and now Eleanor's Luckey too. Our best wishes to them for more luck!

Some of the boys think Frank Drain had some deep seated reason for joining the Relief Department recently.

#### Superintendent Transportation Office

Frank Podesta, an embryonic "battler" of no mean ability, is the latest addition to our forces; he makes an excellent mail clerk.

Because of embargoes, congestions, etc., caused by severe weather, it has been necessary to restore the position of trace clerk and Alice Cenroy has again been placed in charge. Her experience in this class of work has enabled us to put the office in position to satisfy inquiries.

R. L. Angel, station service inspector, recently transferred from Willard to Cincinnati, has taken residence in that haven of railroad men—Madisonville. However, one or two angels will not be enough to accomplish much in a place like that.

H. L. Gandenburg, newly appointed Station Service inspector, succeeding C. J. Armstrong, displays in the position the same energy which has marked his thus far successful journey in the service of the Company.

A model filing system, branching from the regular office system, has been installed by our Station Service Department. As it appreciably reduces the man failure factor and eases the burden on the oft abused file clerk, it might well be patterned after by other departments on the System.

When it comes to getting passenger equipment where it is needed in a hurry, pass the wreath to "Jimmie" Flanagan. Trainmaster Purkheiser says "Jim" was also good at calling crews.

"See America First" has been changed by W. P. Cahill to "See Cincinnati Dust," which he does at every opportunity in the recently acquired gasoline bus.

They Keep Things Going in Cincinnati General Offices

It is safe to say at any time, without any preparation or reference to the classics, that T. W. Calvin is capable of delivering a thorough denunciation of the female car driver; his ability along those lines is based on several unsuccessful attempts to keep them from getting in the way or out of the way of his car.

**Cincinnati Terminals**

Correspondent, J. BEEL  
 Every Day in Every Way!  
 By Yardmaster C. H. Wiehe

Now every day in every way  
 Baltimore and Ohio trains, they say,  
 Run so swiftly on their way—  
 Run on time 'most every day.

Now every day in every way  
 Public feels so glad to say  
 Baltimore and Ohio growing, every day,  
 Better and better in every way.

Now every day in every way  
 (Coue charged us this to say,  
 But let him paddle on his way)  
 Our trains will run on time each day.

Car Inspector H. S. Prather, East Norwood, is back on the job again, after two month's absence because of illness. Glad to have Harry back again with us.

H. W. Oldenburg has returned to work after a six weeks' sojourn in the West. Henry usually makes a good trip at least once a year. This year he took the Western route and landed at Los Angeles.

Reports from our old friend, Tom Moon, indicate that he is getting along well and if everything continues favorable, he will soon be back with us at the repair track.

M. C. B. Clerk E. L. Welsh, Storrs, announces the arrival at his home of a nice Ford touring car.

J. M. Hitt, pensioned car inspector, paid us a short visit at the repair track. First time "Jim" has been around to see us for some time. He is as cheerful as ever and his visit was appreciated by all of his old fellow employes, particularly the ear inspectors.

Don't be the sort of an employe who must have instructions pounded into him before they have any effect.

Don't be the kind that must be addressed in an angry tone if they are to be impressed.

It should be sufficient for any employer or superior officer to request pleasantly certain services of you.

The man who must be whacked and pounded into action is no good in any establishment, and the sooner such men get the gate, the better, for employers and employes. It is too expensive to hire men to work and then have to hire others to watch them every minute in order that proper service may be secured.

The willing every-day worker, the man who acts immediately upon instructions which are pleasantly given to him, is the sort of employe who is worth having. Such men give honest service at all times and this is what counts in a work-a-day world.

We are glad to see William Hampton back on the job at Gest Street Freight Depot. "Wade," as we call him after General Wade Hampton (the swamp angel of N. C.), is seldom off duty. Recently he took a trip to Missouri where he enjoyed himself hunting. The sport must have been good, judging from the number of pelts (principally squirrel tails) which he brought home and presented to the boys. Having been in the service since 1892 it must be

"Joe" Auberger, chief clerk to division engineer

said that "Wade" is one of our most faithful employes and willing workers, who acts upon instructions promptly and pleasantly.

Jerry Halpin, our big and genial second trick yard conductor at Gest Street, and his crew, deserve much credit for their prompt action in extinguishing a fire which might have caused a disastrous conflagration in the west end manufacturing district. A box car had caught on fire while standing on the side track of the B. Manischewitz Co., the big Matzos bakers, but before any damage was done, Jerry and his crew extinguished the flames with their engine hose. Jerry, like all big men, was too modest to claim any credit for himself.

Edward McAvoy, engineer first trick crew, Gest Street, and former treasurer of the Veteran Employes Association of Cincinnati Terminal, is back on duty again after a short illness. Always glad to see you on the job, "Ed." Hope you won't be off again for a long time.

"Pat" Mahoney, first trick yard conductor, Gest Street, is back after an illness of several weeks. We also regret to hear of the death of his brother and sister and we extend to him and his family our sincere condolence.

George Spaulding, car inspector, Gest Street, better known as "Bad Order Spauldie," or "The Box Car Poet," is back on duty again after a short illness. George is a wonderful help in securing suitable equipment for the various industries located here. George wants every car to be a good one, so it can earn from \$50.00 to \$250.00 for the Baltimore and Ohio every seven days, instead of lying idle.

It is with great pleasure that we announce the marriage of Frank Pendergast, bill clerk, Gest Street, to Miss Adella Hahn on January 17. After the wedding the happy couple left for a short stay in Detroit, Mich. All wish the bride and groom a pleasant and prosperous married life.

Clarence Henderson, yard clerk, passed away at his home in Cleves, Ohio, on February 21, after a protracted illness. The sympathy of the employes of the Cincinnati Terminal is extended to the family.

For Sale or Exchange: One perfectly good flivver coupe. Will sell cheap or exchange for a blue reed baby carriage. Apply—A. E. Booth, yard clerk, Brighton.

4014 } New York City

"Joe Auberger"

as  
ALARIC

in  
"PEGIO' MY HEART"

Yes, this is "Joe" Auberger, chief clerk to division engineer, ertswhile clerk to car foreman at Storrs, professional—amateur baseball player, bowler of merit, lawn-tennis player, star wielder of a croquet mallet, pool shark and poker hound—now coming into the limelight as an actor man, playing the "monocled" part of Alaric. Everybody come and see our "Joe" make his debut as "Miss?" Call "Joe" himself for tickets. Come early as his advance agents say that he is playing to capacity houses.

The "Girls"—Sue Elmore, Clara Schulte, Helene Herron, Bertha Goetz, Mabel Schatz and Kitty Weber, compose what is known as the "Put-'em-up-and-knock-'em-down Bowling Club." They meet on Friday evenings, and try their arms and eyes at knocking down the maple. "Susie" has become so great that she is giving the others lessons. Now she is looking for a good male partner to go in for the big game in the city tournament of mixed doubles.

Miss Elmore has met with such success as a promoter of sport activities that she is now organizing a Ladies' Baseball team; the line-up so far is as follows: Catcher, Miss Weber; pitcher, Miss Elmore; short-stop, Miss Herron; first base, Miss Schulte; second base, Miss Goetz; third base, Eddie Schmalz; left field, Miss McNally; center, Miss Hitch; right field, "Joe" Auberger, water boy, W. J. Maloney and mascot, Frank Nock.

"Dinty Moore" Tanner is remorseful—no more do the strains of sweet music rend the Walnut Hills air. They say that Arthur has set aside his saxophone for a few years until he grows up to it, or the "sax" shrinks down to his size.

"Dinger" and "Pee-wee" coming to town. There are two days each month when Lee (Dinger) Moffert and Ralph (Pee-wee) Diamond don their glad regalia

and leave the Styx for a wild time in the big city. Dinner in the Florentine D. R., and \$4.40 per seat to see a show. See T. J. B. for further information.

May 26 is the Big Day for the employes of the Cincinnati Terminal. This is the day the Third Annual Employes' Picnic will be given at Chester Park. This year's picnic will be bigger and greater and offer more attractions than any previous picnic. Get your families and friends together. Reserve the day, Saturday May 26—all together now for One Big Family Day at Chester Park!

### Newark Division

Correspondent, B. A. OATMAN

#### Newark, Ohio, Station

The accompanying photo is of the late Frederick Earnest Skinner, who for many years served the Baltimore and Ohio at Newark Shops as coppersmith. The March issue of the MAGAZINE made mention of the death of Mr. Skinner, which occurred on January 25.

Mrs. Skinner is with Mr. Skinner in the photo.

#### The Department Laugh

When the material is in the storeroom and the scrap is in the bins,

The storekeeper has his troubles, but the master mechanic grins.

When the material is on order and punched for often and fast

The master mechanic cusses;—the storekeeper has the laugh.

STOP taking the chances you are accustomed to

THAT lead to trouble experienced by you; LEAK though 'tis small will result in distress;

LET'S ALL JOIN IN TAKING—No chances. 'Tis best.

S—urely you are interested, when for the good of all,

T—he waste that you make daily, may result in our fall

O—r put us in a place from which we cannot rise

P—erhaps you never thought of it—about time to get wise.

T—he personal traits of each employe do much

H—amper or help in this movement, they must—

A—nd further postpone the goal we attain

T—he individual employes, we canvass their names

L—isten to this as we check o'er the roll

E—very man on the pay roll will assist, we are told.

A—h, what a brotherly feeling exists!

K—eep after the leaks! we can't let them exist.

HALL AND McKNIGHT  
Entertain "Main Street"

### Newark, Ohio Station

March 8 will be remembered by every Newark Division Veteran as the date on which one of the great events in its history occurred, the annual banquet of the organization. If you are a Veteran and failed to attend this affair, you certainly missed one of the greatest treats ever prepared by a Veterans' Committee. And when the clock showed twelve, it was really a hard matter to stop the dancers. The various committees are to be congratulated on the completeness of their preparations, for they did not omit a single item which would in any way add to the pleasures of the evening.

At the Veterans' Banquet there were three Veterans who received the fifty-year gold button: Passenger Conductor William Lamb, Baggage Master Joseph Workman and Pumper Russell Kyle, at Union Station, Ohio. Service records show Mr. Lamb, 50 years in service; Mr. Workman, 52 years; Mr. Kyle, 61 years. All these men are still active in the service. We are proud to have such men with us in the service and extend to them our congratulations, wishing them continued good health and long life.

As the result of accidental injuries received by him on February 21, Harry W. Wilson, clerk to general car foreman, Newark, Ohio, died at the City hospital, Newark, Ohio, on the night of March 8. Mr. Wilson was on his way to work when one of his neighbors invited him to ride; the invitation was accepted, and when nearing the city limits and in a fog, the auto in which he was riding collided with an interurban car at a crossing. Mr. Wilson's injuries consisted of a fractured jaw, wrist and hip. The best of care was given him but to no avail. His funeral was held on March 12 at his residence east of Newark. The sympathy of our employes was extended through many floral designs which accompanied the remains to Cedar Hill Cemetery. We extend to the widow and child our heartfelt sympathy.

We were indeed glad to have the opportunity of participating in the GOOD WILL CAMPAIGN for devastated France. Newark Division responded nobly and a tidy number of votes were cast on the division. We congratulate Miss Spangler on her honor and feel sure that the interests of the Baltimore and Ohio family will be well taken care of by her.

The accompanying pen sketch by Stenographer A. D. List, Master Mechanic's Office, is intended to picture a stunt put on by Roundhouse Clerk Earl Hall and Storeroom Clerk Burr McKnight.

Mr. Hall was sure that loose cinders and a speedy motor cycle would mix well together, but the picture shows that he was entirely wrong. Mr. McKnight took the dive from the side car and Mr. Hall put on an acrobatic stunt by holding on to the handle bars with his feet in the air. The stunt was put on in front of the roundhouse office building to insure a good audience.

### Accounting Department

Correspondent, R. T. GEORGE

Mrs. Maud Varner, 66, widow of Shelby Varner, former resident of Cottage Hill, died at the home of her son, Frank Varner, C. T. time clerk, 276 Robbins Drive, on February 8. Her death was caused by bronchitis. She had been confined to her bed for 12 days.

Mrs. Varner is survived by one son, Frank Varner, and a grandchild, Franklin Varner. Three sisters, Mrs. Cora Lawyer, of this city, Mrs. Flora Foley and Mrs.

The late Frederick E. Skinner, who died on January 25, and Mrs. Skinner

M. D. Frazier, of Zanesville, also survive. Mrs. Varner lived at Cottage Hill until about three years ago. Her husband died four years ago. She was a member of the United Brethren Church of this city.

George Richrick, M. P. Department, is interested in new automobiles. George has the fever bad.

John Hiskey has been compelled to take a leave of absence because of illness.

Ticket Agent W. P. Huffman, this station, is making arrangements to have the agent for the C. M. and St. Paul R. R. come to Newark. He will go into details with the local chapter of the American Legion, and explain to them the beauties of a Western trip over that road from Chicago to San Francisco. There will possibly be a Pullman car from Newark to Frisco, of delegates and visitors to the Legion Convention to be held in Frisco next October. Mr. Huffman is busy because he wants the Legion to go via Baltimore and Ohio, and we wish him good luck. "Tom" Snyder, this office, also a member of the Legion, was responsible for a Pullman car going via Baltimore and Ohio to New Orleans from Newark, to the Convention last summer, and the Legion boys know that the Baltimore and Ohio can't be beat for convenience and comfort. We feel satisfied that we will get this business.

### Columbus, Ohio

Correspondent, R. KENNETT

Safety First, means saving of liveS.  
Think first—before you acT.  
Observe all rules of the Baltimore and Ohio.  
Protect your train wherever you stoP.  
Talk Safety First to others, prove that you are ighT.

Help save for our Company; it's a credit to bothH.

All strive to make the Baltimore and Ohio the Best in AmericA.

That leak must stop, do your biT.

Leaks keep cur work from being done well.

Economy now and all the timE.

Always try to stop that leak, it's a helpful ideA.

Keep up the good work: STOP THAT LEAK!

With regret we announce the death of Engineer "Sam" Snyder, which occurred at Newark on February 10. Mr. Snyder was formerly engineer on the Broad Street helper.

Conductor C. C. O'Hara recently spent a few days in Baltimore on committee work.

Wanted: A good mechanic to work on Chevrolet cars. This car has been out of the service for six months (cause unknown). All applicants apply in person to Car Inspector William Bayse.

We are glad to see Conductor Dooling back on the job after being absent several weeks because of illness.

Machinist Earl King has gone into the beagle hound business. We suppose before long he will have several field trial winners.

Brakeman George Bagent says it's either Waterloo or Arlington for him.

Operators Holcomb, Rusler and Irwin, at Summit, have resumed duty after being ill.

**"Our Car Inspectors Crusade"**

Time.....2.00 a. m.  
Place.....A lonely country road.  
Characters  
Inspector, William Boham,  
The unshaven Jew  
Inspector, "Pete" Cook,  
Lizzie Driver  
Inspector, Ernie Amborene,  
Lunch Kit Owner

The above company recently proceeded in their "Lizzie" to a point near Gahanna to secure some fresh beef. On returning home they undertook to crowd Mr. Farmer with his horse and buggy from the highway. Mr. Farmer would not crowd. They collided with the buggy, knocking a wheel off gentle Lizzie and leaving her in quite a delapidated condition.

After pondering over the situation for some time they suggested that Boham would proceed to a farm house some half mile distant and telephone for assistance. Boham balked, stating he was afraid to go alone, so they all decided to go. After hiding their beef over in the field they all proceeded to the farm house. On their return they discovered they had had a visitor and that they were short a lunch kit belonging to Amberene. The snow was falling fast and had entirely covered up their hidden treasure, but after a careful search and without the aid of blood hounds they managed to find the beef and loading it back into the machine they received assistance and were hauled home, arriving at 3.00 a. m. Outside of a little bad luck it was a lovely night and a very pleasant trip.

**Columbus, Ohio, Freight House**

Correspondent, MISS EDITH ROACH

The Sites Sisters have moved into Grove City, Ohio.

It is with regret that we announce the death of Mrs. Ada R. Byers, daughter of Claim Agent A. G. Burgett. We extend to the family our sympathy.

Misses Marie Brink and Hazel Cashner were delightfully entertained on March 8 with a dinner and theatre party, the hostesses being Anna Browne, Mrs. Kathryn Jones and Edith Roach.

Twenty members of the Sewing Club were entertained on March 13 at the home of Mrs. L. E. Miller, the wife of our cashier. Mrs. Dodds of Washington was a guest of the Club.

Spring is here. Come on, Arthur; let's have a look at that new machine.

**STOP THAT LEAK! TAKE CARE OF THE LITTLE THINGS AND THE BIG THINGS WILL TAKE CARE OF THEMSELVES!**

**Mansfield, Ohio**

Correspondent, C. R. STONE

Division Freight Agent E. N. Kendall, Newark, recently paid us a visit relative to office and shipping routine. Mr. Kendall says Mansfield is certainly on the map when it comes to moving carload freight. He is much interested in our movement of outbound steel and grain.

Supervising Agent C. F. Parks dropped in on us the other day, gave our records the once over, and lined us up on the handling of astray freight. "Fred" always has the Company's interest at heart and we like to have him with us if only for a short time.

Traveling Passenger Agent E. J. Gleason recently paid our ticket and local agent a business call relative to passenger and freight movement. Mr. Gleason reports nice passenger business and the outlook for a general increase as summer approaches.

Conductor A. R. Bird, local yard, is again on duty, having been off because of influenza. We are glad to have "Amsey" back with us once again; the radio and the old Ford will sing better now.

Our popular chief clerk, G. C. Reichart, is now on the job, having been off several days because of illness. We are glad to have George back with us.

The writer himself has only recently returned after an attack of the flu. It certainly leaves a person weak—it is days before you get back your strength.

**A PROSPEROUS RAILROAD MEANS PROSPEROUS RAILROAD MEN AND WOMEN.**

This paragraph is from Mr. Willard's recent Akron address. It is true that the more business we have, the more money we can make, the more men that are employed, the better service we can give. The railroad is the public's servant; the sooner we realize this, the better off we will be. I have heard of some agents in my railroad experience that hardly would give the public any satisfaction at all, and the public would get so that they would not ask them anything when they could help it. These men generally did not last long and the public was glad when they passed on. The better service we render to the public, the greater business we will get in return, and when the public once realizes that we are interested in them and that we have their welfare at heart, we will have all the business that we can take care of.

We are a public institution and we should treat it as such. Any information we can give to benefit the public, whether in passenger or freight service, will go a long way in helping us to get business, which, if we neglect, will go to competitors. Let's follow the plan of helping others; in so doing we help ourselves.

We understand that Mansfield is to get a new freight station, and that the offices will be moved to the corner of Walnut and 5th Streets. This is welcome news to all of us and as soon as the Company completes the plans, the work will be started. The management, on a recent tour of inspection, realized that we need a larger freight house, a new freight office, and a new passenger station because of increased business and passenger traffic. I trust that the time will soon come when we will have both, and that, regardless of competitors, we will be in a position to handle increased business. May our passenger traffic increase tenfold!

During the month of February the Mansfield station went "over the top" in the matter of business moved, inbound and outbound, and the revenue was increased materially.

**Marietta, Ohio**

Correspondent, G. R. STEEN

Dan Cupid again has entered the heart of another of our force—our delivery clerk, W. G. Gardner. On February 16 our "Bill" took unto himself to shield and defend, a fine young lady as his wife. We all wish you the best of luck, "Bill."

A suggestion to "HUD." When you talk over the phone, why don't you just hang up the receiver and open the window as the person to whom you are talking can hear you just as well. Try it and see.

**Deaf Can Hear Says Science**

**New Invention Aids Thousands**

Here's good news for all who suffer from deafness. The Dictograph Products Corporation announces the perfection of a remarkable device which has enabled thousands of deaf persons to hear as well as ever. The makers of this wonderful device say it is too much to expect you to believe this so they are going to give you a chance to try it at home. They offer to send it by prepaid parcel post on a ten-day free trial. They do not send it C. O. D.—they require no deposit—there is no obligation. They send it entirely at their own expense and risk. They are making this extraordinary offer well knowing that the magic of this little instrument will so amaze and delight the user that the chances of its being returned are very slight. Thousands have already accepted this offer and report most gratifying results. There's no longer any need that you should endure the mental and physical strain which comes from a constant effort to hear. Now you can mingle with your friends without that feeling of sensitiveness from which all deaf persons suffer. Now you can take your place in the social and business world to which your talents entitle you and from which your affliction has, in a measure, excluded you. Just send your name and address to The Dictograph Products Corporation, Suite 1305-Y, 220 W. 42nd St., New York, N. Y., for descriptive literature and request blank. Adv.

Baggage man Herman Henry returned from a two weeks' trip through Florida. He had a wonderful time, particularly along the beaches. We failed to receive the souvenirs which he promised.

We welcome to our midst again Miss Catherine Reynolds, utility clerk. Miss Reynolds is a former Baltimore and Ohio employe. It has been some time since we have had a lady in the office, so, boys, be careful of your language.

A "Leak" is a bad thing to have in our homes. Let's "Stop the Leak" for the Baltimore and Ohio.

**Akron Division**

Correspondent, J. A. JACKSON

H. D. Mackey, formerly of the Stores Department, Lorain, Ohio, and T. W. Waggoner, formerly of the Connellsville and Cumberland Divisions, are new comers in the Division Accountant's Office, having recently accepted employment as time clerks.

Veronica Mary is the name selected by Division Claim Agent and Mrs. G. W. Hesslau for their new baby girl which arrived at their home in Youngstown, Ohio, on March 10. George is so happy that he wants to settle all the claims for nothing now.

Among the many well known employes who have lately purchased "gas buggies," are Chief Dispatcher C. M. Trussell and General Yardmaster O. L. Murphy, with their new Buick sedans; Chief Clerks G. R. Coon and W. J. Thatcher, Chevrolets, and last but not least, our old friend "Ed." Merriman, M. of W. accountant, who passed up all the big ones for a nice little Ford coupe, just big enough for two, "YOU KNOW."

J. R. Easton, agent, Uhrichsville, has just recovered from a severe illness, pneumonia, and will take a much needed rest in the sunny clime of Florida, which we trust will restore him to his former good health.

tions.

George Broadbeck, welder operator, New Castle Junction Shops, suffered the loss of his dear mother on March 12 at her home in New Castle, Pa. The Akron Division employes extend their sincere sympathy to Mr. Broadbeck.

Inspector of Accounts P. B. McDowell is already predicting the pennant for the Pittsburgh Pirates this year. "Pete" is some baseball prognosticator, and we're glad to see him pick the winners.

The Akron Division Basketball Team finished a successful season in the Akron Recreation Commission League Class AA. The team was furnished with bright new suits and the boys made a fine appearance in all parts of the city where the games were played. And they kept the old Baltimore and Ohio spirit before the interested spectators.

The "STOP THAT LEAK" Campaign is still on. It's not too late to start now. Help President Willard in his drive for economy!

## Chicago Division

Correspondent, F. N. SHULTZ

A few local changes have recently been made in the Mechanical Department, as follows: J. W. McCurdy, Garrett Shops, has been appointed roundhouse foreman at Willard.

T. J. Stapleton, boiler shop foreman, has been promoted to the position of foreman at Glenwood Shops. He left Garrett to assume his new duties on March 8.

L. D. Prior, Willard Shops, was transferred to Garrett to assume the duties of boiler shop foreman.

William Mulcahy has been transferred from the New Castle Shops to take the position of Erecting Shop foreman, until recently held by S. J. Messner. Mr. Messner has been promoted to roundhouse foreman at New Castle.

C. H. McCrary, storekeeper at South Chicago, was in Garrett for a few days, on

Company business and incidentally renewing old acquaintances. Mr. McCrary was formerly located at Garrett.

G. A. Motry, from Mr. Patenall's Office, Baltimore, was on the Chicago Division a few days ago, greeting some of his numerous friends. Mr. Motry was connected with the Chicago Division a few years ago, installing automatic signals. Here he made many friends who are always mighty glad to see him.

D. B. Taylor, who was master carpenter on our division for several years, and now located at Grafton, W. Va., stopped off at Garrett last week on his return from the Chicago meeting, and made us a pleasant call. Come again, Mr. Taylor, you are always welcome.

G. A. Elder, first trick operator, Rosedale, had a sad death in his family, last week. An uncle from Ashland, Wis., while visiting

him, died suddenly, without a moment's warning. He had been enjoying the best of health. Mr. and Mrs. Elder accompanied the remains to Ashland to attend the funeral services.

The people of Garrett and vicinity were greatly shocked to learn of the sudden death of Dr. E. J. Hughes, at his home in Chicago. The writer had an hour's visit with the Doctor on the day before. At that time he stated that he was feeling well except that his heart was troubling him a little at times; however, he was planning a vacation trip to Florida, to start on the following Saturday and said he would come back in a few weeks feeling "like new."

Doctor Hughes was medical examiner at Garrett from 1889 to 1903, and had a host of friends here. He and Mrs. Hughes were leaders in many activities, and after being transferred to Chicago in 1903, they continued to keep in touch with their numerous friends at this point. Mrs. Hughes is a sister of Mrs. W. D. Johnson, of Cincinnati, wife of our district master mechanic.

Funeral services were held at their home in Chicago on Sunday, March 4, and the remains taken to Newark, Ohio, on Sunday night for burial.

Funeral services of John F. Rink were held at the home of Mr. Rink's mother in Garrett on March 3. Mr. Rink was an engineer on the N. Y. C., working out of Toledo. He never married and made his home here with his mother. There are also five brothers and sisters living here. Two of his brothers are locomotive engineers; Jacob Rink, of Garrett, who runs on Nos. 5 and 16, and Eugene Rink, working out of Willard. The deceased had many friends on the Baltimore and Ohio.

First Trick Signalman E. A. Sigg, Sherwood, who has been dangerously ill for the past three weeks, is now convalescent and is expected to be able to resume duty soon.

Agent D. W. Koons, Republic, Ohio, has resumed duty after spending some time with his mother, who has been very ill.

Dr. J. F. Thompson, Company surgeon, who has been seriously ill since last August, is somewhat better and has been taken home from the hospital; however, his condition is not entirely satisfactory.

Chief File Clerk A. K. Hickman was called away last week because of the death of his mother at Marion, Ohio. Mrs. Hickman had been in poor health for some time and her death was not entirely unexpected.

Chief Dispatcher H. S. Carroll, who has been ill for several months, was able to be out on the streets a few days ago. He feels that he will soon be able to resume duty.

## Accounting Department

The regular accounting meeting of the Division Accountant's Office force was held at 6.30 p. m. on March 16. Accounting matters were discussed until 8.00 p. m., after which a four course luncheon was served by the gentlemen to reciprocate for the splendid luncheon served by the ladies after the previous meeting.

All the Division Accounting organization was present except our stenographer, Miss Loomis, who was confined to her home because of flu.

The evening was spent playing bridge, checkers, and in dancing. Prizes were given as follows: To George Dean and Miss Vesta Marvin a wooden spoon for winning in the prize waltz. They are to be congratulated for their wonderful performance. It is rumored that they previously had been

Mr. and Mrs. Avon J. Connor

Please mention our magazine when writing advertisers

coached by Irene Castle. The spoon was appropriate for George and Vesta. Miss B. Groscup was awarded a prize of a picture of Cupid for winning at bridge, while Homer Strome was presented with a lovely umbrella for the highest bridge score for the gentlemen. Evidently someone thought Mr. Strome was a doll—the umbrella being a doll's umbrella.

Lloyd Barnes was awarded a nice A B C tin plate for being the best looking "Shiek" present. A. H. Thomas was lucky in receiving a nice ten-cent diamond ring for being the biggest eater. Carl Weaver and Homer Strome were tied for second in this contest. "Birdie" Huffman was awarded a nice egg beater for having the prettiest tie. "Birdie" says they needed it. "Jerry" Crawford received a nice thimble for being the champion checker player. One of the special features of the evening, was the splendid talk made by Charles Mager, who is surely a born orator. Everyone enjoyed the evening and the party retired at 10.30 p. m. to the tune of "Home Sweet Home" played by an Edison record.

Miss Elam—George, I wish you would draw me something for the Magazine.

George Heininger—Really the only thing I can draw is flies. Will that do?

Switchman D. W. Barnes and Miss Margaret Elam, daughter of Engineer E. S. Elam, were united in marriage on Saturday evening, March 10, at the Methodist Episcopal Church. They were attended by Miss Alma Elam, sister of the bride, and Lloyd Barnes, brother of the groom, both of whom are employed in the Accounting Department.

Word was received on March 7 of the death of Mr. H. A. Coburn of St. Joe, Ind., father of Stores Distribution Clerk Lloyd Coburn.

Miss Bertha Dobbrick has accepted a temporary position in the Freight Office, as abstract clerk.

Miss Madge Williams accepted a position in the Master Mechanic's Office temporarily, due to vacancy caused by Miss Margaret Galloway's absence because of illness.

Rate Clerk C. W. Higgins, Freight Traffic Department, has accepted a position with the Chicago, Attica and Southern Railway at Attica, Ind.

Fuel Clerk George Woodruff has been granted a leave of absence because of illness of his parents. His position will be filled by Miss Madolin Manion.

Miss Gertrude Manion, secretary to the superintendent, recently had a nice visit with relatives at Pittsburgh.

Miss June Millholland, Yardmaster's Office, is a weekly patron of the New York Central Railroad between Kendallville and South Bend. It is wonderful what a mere diamond ring will do.

Miss Frances Stack, Superintendent's Office, is the proud owner of a new Durant Sedan. If she fulfills her promises it will be necessary for her to take a leave of absence in order to haul all her friends to the various parties she has planned for the coming summer.

At a pretty St. Patrick's party on Wednesday evening March 14, given at the home of her parents, 503 East King Street, Miss Lydia Gieser announced her marriage to Avon J. Connor, September 9, 1922, at Hillsdale, Michigan. The announcement proved a great surprise to all their friends.

The evening was spent in playing bridge, and a delicious luncheon was served.

The bride has been employed as stenographer to the storekeeper, and the groom is a telegraph operator. For the present they will make their home with the bride's parents.

### Chicago Terminal

Correspondent, J. L. NICHOLS

The many friends of Dr. E. J. Hughes were startled, on the morning of March 1, to learn of his sudden death. The employes and their families have lost a tried and true friend, who will long be remembered.

The friends and acquaintances of Machinist Donald Graham, were pained to learn of an accident on March 7 in which he lost his life. His was a splendid personality.

The passing of an old and highly esteemed friend and fellow employe, John J. Snyder, shocked his many friends. Mr. Snyder died of pneumonia on March 8. He had been in the service as a locomotive engineer since May, 1898. During that period he made an enviable record as a gentleman and faithful employe whose genial presence among us has, at all times, afforded us much pleasure. His departure from among us is sincerely regretted.

### Homesick

By Strickland Gillilan

I DREAM of a smile—and the smile is yours!

I turn the key in my dear dream's doors  
To hold you there, yet you slip away,  
And darkness visits my dream-born day.  
I dream of lips—and the lips are yours!  
I press those lips while my spirit soars  
To the back of the planets. I wake, and lo!  
You've gone to the place where most dreams go.

I dream of a soul—and the soul is you!  
The miles that part us you've traveled  
through  
At the call of my own soul, starved and wan;  
I wake, and the soul that is you is gone!  
Sometime you'll come, as I dream each night  
You have come to me; and my spirit light  
Will lift its songs to the star-decked dome.  
Your smile, your lips and your soul make  
Home!

A short sighted old Lady went into a large curio shop. After pottering about for some time she asked the assistant:

"How much is that Japanese idol worth—the one near the door?"

"It is worth a great deal," replied the assistant. "It's the proprietor. —Ex.

### St. Louis Division

Correspondent, H. F. SMITH

Attention, Operators! On the morning of February 19, Operator Holland, "K1" Shops, receiving from Operator Kemper, Flora, received 33 messages in nine minutes from 7.25 a. m. to 7.34 a. m. We don't know how long these messages were but it looks like a good record. We'd like to hear of any one that has broken it.

Superintendent Stevens is out shaking hands with everyone, having recovered from his illness.

It happened this way one rainy day last week, so it is said. Milk was needed at Agent Kellar's home for the morning's meal, and, in the absence of the "regular milker" Mr. Kellar assumed the role of a milk maid and with a pail in one hand and a rocking chair on the other arm, he repaired to the barn to pail the erstwhile gentle Jersey cow. The new milk maid with a rocking chair was too much for the cow, and with a snort and bellow she beat it for the fence and hurdled it much after the manner of a greyhound. Mr. Kellar no longer tells the story of his early start on the farm.

Now that the Washington Shops have resumed work and are desirous of securing one of the biggest outputs on the Baltimore and Ohio, let's all pull together for our Railroad, and while we are boosting for the Baltimore and Ohio, we are also boosting the town we live in and for ourselves.

While business everywhere is apparently on the increase we should all watch out for the "leak." With bigger business there are bigger chances to save money. Are you watching for a chance to Stop a Leak? If you have stopped one, tell us about it, for the same condition might exist elsewhere.

There seems to be an epidemic of weddings in Washington Shops Roundhouse. Machinist Helper C. J. Austin was married on

FLORA—L SCENES  
Above: Station grounds at Flora. Below: Station platform, Flora, Ill.

March 2. The next day Boilermaker Helper Hugh Long followed. Three days later Machinist Helper Bruce Barnett signed away his independence. Best wishes, boys, for happiness and prosperity! Who's next?

A recent incident occurred which shows the spirit manifested by the employees of the Baltimore and Ohio. A fireman on Train No. 24 was injured along line of road, and it was necessary that he be taken off train. Machinist J. Y. Fitzsimmons, who had only been in the employ of the Company five days, voluntarily came forward and offered to fire the train into next terminal. The offer was accepted and through his good work he made up five minutes of running time. We haven't heard of Mr. Fitzsimmons being commended but are sure that he deserves it and will be.

## Ohio Division

Correspondent, A. E. ERICH

**STOP THAT LEAK!** Do you know that every time a car is set off for hot box, it costs not less than \$9.00? By a little care and attention, in most cases this can be avoided. One way to avoid this extra expense is for train and enginemen to keep a sharp lookout for hot boxes beginning to run hot. At least sixty per cent. can be saved by stopping and giving necessary attention by repacking, thus avoiding setting car out. In the majority of cases hot boxes are due to packing becoming dry. Any car that is run to a terminal without setting it off saves just that much money. It not only saves the expense of a car repairer going out on road to rebrass car, but saves delay to freight, which in turn saves claims. Stop THAT leak!

We are glad to report that G. W. Plumly, division operator, who suffered a slight stroke of facial paralysis some time ago, is considerably improved. We hope to see him back on the job soon.

Congratulations are in order to Passenger Conductor M. O'Donnell, on his recent marriage.

It is with deep regret that we announce the death of Ticket Agent H. G. Files, Athens, Ohio. Mr. Files was operated upon for appendicitis, but did not recover. Our sympathy is extended to his widow and family.

We also extend our heartfelt sympathy to the family of Conductor J. Pierpoint, who died on February 17.

Harry Jones, time clerk, Division Accountant's Office, has a method all his own,

for getting "new arrivals" asleep. Recently the "first arrival" which was left at his home a few weeks ago, had the colic, and Harry willingly (?) took her in his arms and started to walk the floor. After a short time he found this was not as pleasant a task as he had first anticipated, and, seating himself in a chair, he started to rock her in his arms. Sometime after, "in the wee small hours of the morning" Mrs. Jones, who was in an adjoining room, failed to hear any sounds, and opening the door found them both sound asleep. Harry's snores evidently had a soothing effect on the baby!

*Be a coal saver and help save a million Dollars. STOP THAT LEAK!*

Our sympathies are extended to "Jim" and "Joe" Caldwell, Accounting Department, in their deep sorrow in the loss of their mother who died suddenly of heart trouble.

James W. Jewell, carman, died on February 21, after an illness of Bright's disease. Our sympathy is extended to his widow.

On February 24, we had the pleasure of having "Aunt Mary" make a brief visit to Chillicothe, while going over the system in the interest of the Good Will Campaign for Miss Spengler.

We extend our sympathy to Road Foreman of Engines W. Graf, in the death of his brother.

### One leak made good by a former employe

The following note, addressed to storekeeper, Chillicothe, under date of February 10, 1923:

"Herewith you will find two files which I am sending to replace the two I misplaced a year or so ago at your shops.

Since then I have found salvation and wish to live and work for Jesus.

Sincerely yours, etc.

This note was wrapped around two files, together with a receipted bill, amounting to \$2.20, having been sent from a local hardware store.

The Safety Agent "Sez:"

A summary of accidents for four years shows the most prolific causes of fatal injuries to Baltimore and Ohio employes to be:

First—Struck by train;

Second—Fell under train;

Third—Fell off train;

Fourth—Crushed between cars.

Are you going to benefit by the sad experience of these men?

Here you have been shown the "nettle of danger" that you may pluck the "rose of SAFETY."

Lumber Inspector and Mrs. M. C. Wilson,  
Southwest District

Play the game SAFE, for your own sake, for the sake of those who love you.

Last, but not least, remember to STOP THAT LEAK!

We show here a bit of beautiful scenery on the Ohio Division. Bridge No. 67/65 over Rattlesnake Creek, just east of East Monroe, Ohio.

This is a rather remarkable example, all in one view, of the works of both man and nature. The distance from the base of rail to the water below the bridge is sixty-five feet, and the falls drop another fifteen feet.

As a suggestion to both old and young "sweethearts," this place with its spirit of romance, would be worth investigating some fine Sunday when the wildflowers begin to bloom along the walls of this beautiful gorge. The name of the creek, "Rattlesnake," does not mean anything at present, as there is none of these reptiles in this vicinity these days. The picture was taken by Investigating Engineer F. J. Parrish.

## Toledo Division

Correspondent, C. E. THRASHER

Supervising Agent

It is gratifying to note the interest taken in my request for news for the MAGAZINE. Every correspondent is congratulated for his personal effort to make the Toledo Division notes worthy of the space they occupy. There are numerous ways in which you can secure notes for each issue; for instance, you may hear of some good and kindly act performed by an employe in your vicinity. Whether such act was performed while on duty, or off, make note of it and when you compile your notes you will have some ready reference and less chance for neglecting someone.

The MAGAZINE is the proper place in which to inform other employes of the little things, a number of which happen daily without notice. As a man travels through life we neglect to notice the little acts of kindness, it has a tendency to make him neglectful and indifferent towards his fellow workers. No individual likes to hear of the bad things he does, but it is human nature and a desire to want acknowledgement for the good deeds accomplished.

The February issue of the Magazine reproduced a trip pass in favor of Engineer W. R. Tilton of the St. Louis Division, issued August, 1883. Conductor James Messler of Local Trains 80 and 81, Toledo Division, turned over to your correspondent, a monthly pass which is reproduced here and says Mr. Tilton didn't have much on him. It is interesting to note that the pass was good for 31 trips north and the same number

Superintendent's Office  
Dayton, Ohio

Correspondent, JOHN HANKAMMER

The Company has on its payrolls two brothers, "Ed" and O. E. Vermilion. "Ed" is in the Division Accountant's Office, and "O. E." in the Bureau of Rates of Pay at Cincinnati. Not long ago one of our visitors from Baltimore met "Ed" and having the rate wizard in mind, said, "I know your father well; he often comes to Baltimore." Some explanations were promptly made. It's nice to be young, "Ed."

Assistant Road Foreman of Engines "Jimmy Britton" has gone back to the Ohio Division. There's a fellow that carries his sunshine with him even on a cloudy day.

Miss Mary Meyers surely can "get by" with most anything. On several occasions she has been noticed putting Elsie Smith in the cupboard and keeping her there over night. Nobody complains—it's peculiar.

Who is that poetic human question mark in the Division Accountant's Office?

Beware of your ink bottles when Keinat is hanging around.

We note in the local newspaper that Randolph VanScoyck, former employe in the Division Accountant's Office, was winner of the annual oratorical contest of Berea College, Ky. As such he participated in the recent intercollegiate oratorical contest of Kentucky State. Understand he is working his way through school. Good luck to him.

There is no excellence without great labor.

All conductors on our trains are not just as machine-like as they may seem at times. One James Kelly, running between Toledo and Cincinnati, is also just as modest as he is big hearted in what he did for a little girl six years old traveling from Washington, D. C. to Toledo.

The story goes that this child was traveling alone on Mr. Kelly's train and in order to pass her time away on the long ride, he took her through the train when collecting tickets. When bed time came he washed her hands and face, and had a lady passenger help him get her ready for bed, but he saw to it that even on the train the little girl's prayers were not forgotten. The next morning the big conductor saw the child was given a good breakfast and wired ahead so that her relatives in Toledo would be on hand to meet her.

# PATENTS

BOOKLET FREE. HIGHEST REFERENCES. PROMPTNESS ASSURED. BEST RESULTS. Send drawing or model for examination and report as to patentability.

**WATSON E. COLEMAN**  
PATENT LAWYER  
624 F. Street, N. W. Washington, D. C.

All the passengers in the coach commented on the kindly attention of Conductor Kelly, and we may feel sure that the little girl and her parents will long have a kindly thought for a certain conductor and his Railroad.

Supervisor "Ed" Ledger made a funny mistake not long ago. He was holding a meeting of section foremen, and when lunch time came intended to direct them to the Y. M. C. A. at Lima, but steered them instead into the telephone exchange building. Wonder how come that, "Ed?"

Here is a picture of daughter of P. M. Beck, M. of W. clerk, Division Accountant's Office, Dayton, Ohio. "Pop" thinks a lot of "Patsie" and he has good reasons to.

Following are some of the reforms we need in the Superintendent's Office: Louis Roehm to carry less than a carpet sweeper on his bicycle. Ray Craft purchase a new pipe. E. J. Morrissey to stop getting lost on Thursday night on Huffman Hill. Irene Josephine to bring more than one piece of candy to work. Arthur McNamara to wear a red tie on St. Patrick's Day. G. C. Stoecklein to answer the telephone without asking "Who is it?"

East Dayton, Ohio

Correspondent, EDWARD M. MANNIX

On February 25 we received the sad intelligence of the death of Oscar McMillan, the venerable father of Master Mechanic A. E. McMillan, which occurred at his home in Benwood, W. Va.

Mr. Oscar McMillan for many years was a prominent coal dealer of Benwood. His death occurred following a brief illness of two weeks of influenza. He was 72 years of age, born near Cameron and went to Benwood when a youth of ten. He remained there during his life, and was one of the city's most prominent men. He was active and prominent in the business affairs of his city and a faithful member of the M. E. Church.

In early life he was united in marriage to Nancy Jane Snodgrass, who survives him,

Patricia Melba Beck

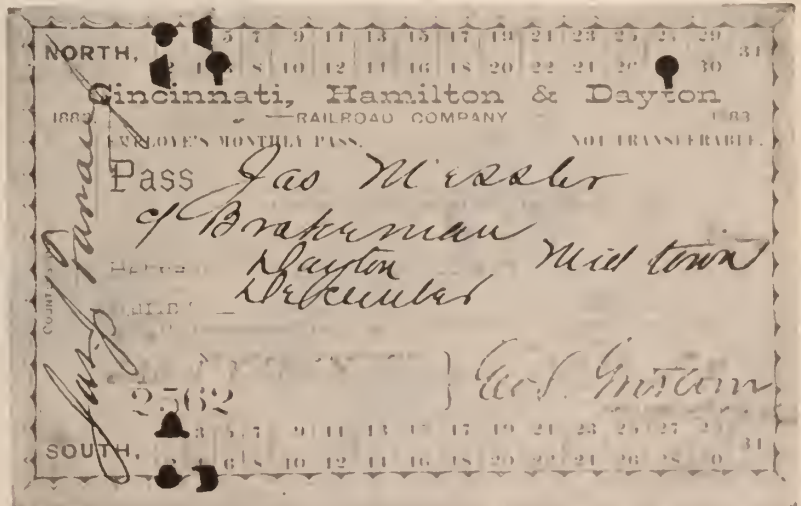

of trips south. Mr. Messler is still in the service and says he is just as young and active as the day the pass was issued.

Yardmaster Arthur West, Hamilton, and his able assistant, John Rowekamp, have hung out a shingle, "expert painting." All wishing to have their offices decorated will please call on these two masters. "Art" and John endeavored to paint the ceiling of their office, but Mr. West says he couldn't get the paint to stick on the brush long enough to put it on the ceiling and John, who held the ladder, says he got the painting instead of the ceiling.

Recently there was an exciting bowling match in Dayton. Mr. Schoenberger of Toledo, secured an option on the little balls and Mr. Colbert, of Lima, wanted to use both alleys at once—that is the one in front of him and the one to the rear. "Lou" says the ball slipped out of his hand and rolled backwards, just when he knew he was going to get a strike. "Jerry" Schultz threw the balls so hard the pin boys thought it was a German Bertha. Mr. Murphy did a first class jig dance every time he rolled and Hubbart laid down on the floor and snapped his fingers when he tried for a strike. "Shorty" Farland didn't bowl because he was afraid some one would take him for the ball.

The stork was busy again and added another to the Baltimore and Ohio family of Mr. and Mrs. G. J. Williams. A fine baby girl was born to them on March 4. Of course, we haven't seen any cigars yet, but George says we can look for them most any time now. Hurry, please!

On March 1 the Ladies' Auxiliary to the Veteran Employee's Association went to Lima to spend the day with the Veterans Association of that city. They had a wonderful time. Among those who went were: Mrs. Harry Howden, president; Mrs. George S. Neal, vice president; Mrs. Fred Richter, secretary; Mrs. Gus Gindler, treasurer; Mrs. John Naylor, marshal; Mrs. G. Rethman, outer guard; Mrs. James McClain, Mrs. Charles Clarey, Mrs. O. C. Budd, Mrs. E. Budd, Mrs. H. G. Roll, Mrs. Ada Slattery, Mrs. Charles Emig and Mrs. William Wolfrom. Our cartoon was drawn by J. R. E. Hiltz, Real Estate Department, Baltimore, who was a passenger on the train depicted. See next page!

**STOP THAT LEAK!**

Employee's Monthly Pass, Cincinnati, Hamilton & Dayton, dated in 1883

with three sons, Alfred E., of Dayton; A. Clifford, of Pittsburgh, and William, of Wheeling.  
 He was laid to rest in the beautiful family lot and as the shadows of evening were falling, the whispering of the breezes seemed to say "Well done, good and faithful servant."

The shops are again assuming a business aspect with the employment of several additional machinists and boilermakers. It begins to look like old times at East Dayton.

At this writing Master Mechanic A. E. McMillan is again called to cease activities and return home because of the death of his uncle, Walter McMillan, which occurred March 8, at his home in Benwood, W. Va. In this double bereavement Mr. McMillan again shares the sympathy of the Toledo Division employees.

Correspondent, L. M. MASON

Stop That Leak!  
 Stop, Look and Listen!  
 Thousands last year  
 Came up missing.  
 Stop That Leak!  
 Stop, Look and Listen,  
 Let's start this year  
 With no one missing.

Stop That Leak!  
 If you possibly can,  
 Drive up to the crossing  
 And stop there, My Man.

Stop, Look and Listen!  
 'Twill Stop That Leak,  
 'Twill save your life,  
 Good fortunes you may seek.

Stop That Leak!  
 Stop, Look and Listen!  
 Remember the people that are missing  
 Resolve to yourself and others missing,  
 When you drive up to a crossing, you will  
**STOP, LOOK AND LISTEN!**

Another crossing accident happened a few days ago at 13th Street. A Ford car was demolished. The driver, being blind in his left eye, drove into a yard engine from the blind side. He said he had as much right on the crossing as the engine.

Some one asked General Foreman "Tom" Zinkan what would be the best way to Stop That Leak. "Tom" says, "Never mind, I have got the carpenter on the roof now putting on the paper."

Homer Fink, our six-foot-four-inch-boy-freight-trucker, journeyed out in the country about six miles to see his best girl. Homer showed up the next morning with a broken rib. We suggest that Homer learn this little verse:  
 "There are letters of accent,  
 There are letters of tone,  
 But the best way to letter  
 Is to letter alone."

"Fred" Toumine, our popular agent, had a bad accident when he fell on the icy pavement and fractured his left arm. Although suffering very painfully "Fred" has been right on the job.

It has been said quite often that if you came to Wellston and get a shot of this raccoon water you couldn't stay away. What we started to say was that William Maus, our popular account inspector, was in Wellston the past few days, filling up on the good Adam's ale.

The three clowns belonging to the Ohio Division, Mallen, Graf and Gelhausen, recently paid a visit to Wellston.

"Pat" Finn, Car Inspector, and "Bill" Payne, Foreman Frog Crew, both of Lima, Ohio

John Walker showed up for work the other morning feeling very badly. Later in the day his little son came down with his lunch and gave the tip that John had eaten an over dose of pork chops and had kept them awake all night "calling hogs."

Of course the longer skirts  
 May be the latest style,  
 But they are cut so weirdly  
 They'd make a dead man smile.

It seems as though when a fellow wants a new car, if he has an old one, he just pulls the throttle open and turns it towards the first train he sees.

Mary had a Thomas cat  
 It warbled like Caruso,  
 A neighbor swung a baseball bat,  
 Now Thomas doesn't do so.

It has been said you can Kilgore, but you can't Thras'her. I would hate to tackle the job either way.

Superintendent A. A. Iams, Ohio Division, who has been on the sick list for the past week or so, came over to see how things were running around Wellston.

The Sand House committee met and decided that it was all right to run the eastern business from the C. I. & W. through Wellston, via the Wellston Sub-Division from Dayton. Although it makes more work for us, we are very glad to see it come and hope it will keep coming. The harder we work the better we feel.

**Lima, Ohio**

Correspondent, O. L. WALLBURG

The improvement in business conditions during the last three months has meant a great deal to the Baltimore and Ohio family. Men on furlough have been recalled and the shop forces at Lima are being recruited to full working strength, preparing for the business this Railroad expects to handle during the year. The "boys" will be mighty glad to get back on the job again. Furthermore, it is felt that the return to work will be permanent and that there need be no fear of an impending slack season, at least not for the balance of this year.

We believe that the year 1923 will be the greatest year in the history of the Baltimore and Ohio Railroad and that the results accomplished will be beneficial to every department.

In order to bring this about, however, it will be absolutely necessary for each and every employe to give his best efforts in every way. It will mean that we must be on the job every minute of the time. It will mean that we must work and strive continuously to perform our tasks better and better. It will mean that we must be alert at all times concerning matters which are of interest to this great Company. We must especially bear in mind at all times, that in all things concerning this Company we will "Stop That Leak" by avoiding waste of material of any kind and by exercising the utmost care in the use of time and material entrusted to us.

Cartoonist Hillz travelled with the Ladies' Auxiliary to Lima and was strongly impressed, as you may see by this cartoon

When we once get the idea firmly fixed in our minds that our watchfulness in such things as putting in sixty full minutes to an hour and eight full hours to a day in faithful service for the Company, is appreciated by the Management of this Company, and this appreciation will manifest itself in divers ways (sometimes not recognized as such by its recipients), then and only then will we be true and loyal members of the Baltimore and Ohio family and worthy of the confidence of all good men. As we start in on this new era let us resolve to do nothing that will hinder and everything that will help our President Daniel Willard, in carrying out his program for the year, which will mean so much for all in his family. He has shown us that he is with us. Let us show him that we are with and for him.

On page 76 is a small photo of two members of the family at Lima, whom I will now introduce. "Pat" Finn, car inspector, stands at the right with the straw hat; at the left is "Bill" Payne, foreman of a switching crew.

Yard Clerk Elmer Rhodes, tied up with an attack of neuralgia, expects to be on

the job shortly. Sympathize with you, "Dusty." She's a bad actor, when she gets you.

In his travels around this world, the stork stopped long enough to leave a baby girl at the home of Yard Conductor A. F. Green, who is passing out chocolate to the boys. Why not cigars?

The ice is melting, the ground is thawing, the trees are budding, the birds are nesting and all nature is preparing to throw off the shackles of winter and along with the rest Supervisor "Ed" Ledger, Section Foreman Harvey Fogt and John Suydam are getting ready to attend the opening of the baseball season at Cincinnati. No bleacher seats for them either, eh boys?

Sorry to learn that Yard Conductor A. L. Stratton is compelled to lay off because of the serious illness of his wife. We sincerely hope for her early recovery, "Andy."

Ask Roundhouse Foreman Mike Brennan what he knows about the German, Irish or French language. We hear that he is taking a course of study embracing those subjects.

## Prize Winning Supervisors and Foremen Tell How They Came Out on Top

**F**OLLOWING are letters written by various supervisors and track foremen who won prizes for the best kept territories on the Baltimore and Ohio during the year 1922.

It is interesting to note that in practically every case, the keynote of their success is summed up in one word "Team-work" and that the prize winners are generous in sharing their honors with their men.

### He Obeys the Rules

In receiving the prize for the best supervisor's territory on the New Castle District, I feel that something has been accomplished besides the winning of a prize, gratifying as this is.

It is a pleasure to learn that our efforts are successful; this alone would spur the ambitious man to further efforts. The foremen on my territory are to be congratulated on the splendid showing made, and accomplished with a limited force.

Close attention to the instructions found in the Book of Rules governing the M. of W. Department, systematic cleaning during winter months, removal of brush, general cleaning in the spring, lining and surfacing track when frost is going out, starting tie renewals as early in season as possible to complete and then having the required time to shape up track and get ready for the winter, the all-important work of ditching, the making of as much standard roadbed as possible—all these things consistently followed out can bring only success.

The foremen and I at all times have endeavored to utilize our forces to the best advantage and with the idea of getting some value in return for each hour of labor expended.

F. C. Green  
Supervisor, Warren, Ohio.

### Makes Plans with His Foremen

Just before we began our season's work on my division, I walked over each fore-

man's section with him. We noted the different kinds of work that would have to be done on his section during the coming season, and at the same time took into consideration the condition of his section so that the most important work could be taken care of and not interfere with his tie renewals or other work which we had planned to do. I feel that by doing this it gives the foreman a better idea of the condition of his section, and impresses upon his mind the work that will have to be accomplished before winter. I feel that by handling the work this way it educates the foreman and gives me a stronger organization to accomplish my season's work.

H. J. Wilkening  
Supervisor, Elyria, Ohio.

### He Obeys Orders

I received voucher for \$35.00 for best branch line section for the year 1922. This I consider was won by working strictly according to instructions given by my supervising officers.

There are four particular points in keeping up track; gauge, line, surface and proper drainage. The greatest of all is good drainage, for it is the foundation of the roadbed. As soon as winter breaks up I go over and remove all material, which has accumulated during the winter months, in all ditches, so as to divert the water from track quickly. In the fall I do my ditching in dry weather. We can accomplish more with less labor and expense and do better work than we could if put off until the ditches were full of water and mud.

My spring work is to go over section and make a general house-cleaning, such as picking up all scrap, scouring out all ditches and everything that will make the road look tidy. Then comes surfacing and lining, using level board at all times, getting the road in as good condition as possible before renewal of ties.

There are a great many things that could be said in regard to track which

## Pensioners' Roll of Honor

(Continued from page 43)

was educated in St. Alphonsus School. He learned the blacksmith trade and worked at this until April 4, 1894 when he came to the Baltimore and Ohio as truckman, Camden Station. One month later he was made gang boss, and in 1907 he became tallyman, working in this capacity until his recent retirement.

### John M. Purdum

John M. Purdum, retired trackman, was born on August 3, 1857. He entered the service of the Ohio River Railroad Company as trackman on June 26, 1891, at Point Pleasant, W. Va. In 1895 he was promoted to track foreman at Maggie, W. Va., and later worked at Clifton, W. Va., and Hartford. In 1917 he was transferred to New Haven, W. Va. He continued in this capacity until he became disabled and eventually retired.

Mr. Purdum says: "I am still loyal to the Baltimore and Ohio Railroad, and I heartily thank the Medical Department for the kind treatment which I received while under its care."

### Jacob Gasser

Pensioned Blacksmith Helper Jacob Gasser, Monongah Division, was born in Bern, Switzerland, on April 28, 1857. At the age of 32 he came to America to seek his fortune. He began work with the Baltimore and Ohio in 1888 as trackman. The next year he worked as laborer, and in 1890 he entered the shops as boilermaker helper. Three years later he was made hostler. In 1899 he became trackman again; later in the same year, car repairer in 1900, blacksmith helper; in 1921, hammer operator; in 1922, blacksmith helper.

Mr. Gasser owns his own home, where he and his wife now reside, at 633 W. Main Street, Grafton, W. Va.

### Henry P. Gebel

Henry P. Gebel, retired janitor, was born on December 22, 1851. He entered the service of the Railroad as janitor and porter, Grand Central Station, Chicago, on September 10, 1895. He worked here in the same capacity until the time of his retirement.

### Prize Winning Supervisors and Foremen

(Continued from page 77)

would require space. Everybody who finds anything in his regular work that he does not understand, would do well to consult the little black book which has been furnished to every foreman, called Instructions Governing the Maintenance of Way Department. It is a sure guide, not only to beginners, but to old timers.

S. J. Wilkinson  
Foreman, Chardon, Ohio.

#### Gives His Men a Lift

When I go to work I do my best. I lead my men and they follow. I put my shoulder to the wheel and give them a lift to help carry the work along. If a job is not worth doing right, it is not worth doing at all.

P. Keith  
Foreman, Akron, Ohio.

#### Only One Way—Work!

The way I won the prize is by doing

the work; that is the only way to get it.

M. Relish  
Foreman, Ravenna, Ohio.

#### Doing it Right the First Time

I secured my reward for the best section by following as closely as possible the rules for Standard Track. I believe one of the main things is also locking after line and surface and keeping right of way clean.

When raising track and doing work, always try to do it correctly, not always trying to see how much track we can cover. When work is done correctly, it will hold up, and it will not be necessary to follow yourself up almost daily, and in a short time have to jump from place to place over your entire section. You can go ahead and accomplish more in this way.

If a place shows signs of giving way, fix it now as it will not get any better of its own accord.

A. Bonacci  
Foreman, Berea, Ohio.

#### Makes Thoroughness a Habit

How I won the prize? I obtained men that were willing to obey the laws and

rules, and encouraged the spirit of our being a part of the Baltimore and Ohio Company. The habit was encouraged of doing the work, not leaving it for the other fellow. The advance was gained by a constant all-together pull, having in mind the lessons of standard and Safety First at all times.

O. L. Fritzing  
Foreman, Warwick, Ohio.

#### Don't Put Off Until Tomorrow!

As I have been asked for a note on winning the prize, I want first to thank the Baltimore and Ohio Railroad Company for it.

It really was a surprise to me for I think I have the poorest rail on the Lake Erie District, but by keeping my bolts tight I managed to keep my track in fair surface. This you cannot do with loose bolts.

I always try to keep all scrap picked up, especially where I do my day's work. I aim to pick up all old ties, chunks and scrap before leaving the job.

In patrolling track on a hand car, we see a nut, bolt, or part of a brakeshoe; we pass by, thinking we will get it coming

SOME WINNERS ON THE AKRON DIVISION

1—Section Foreman P. Keith, Elkhart, Ohio. 2—Track Supervisor H. J. Wilkening, Cleveland District. 3—Track Supervisor F. C. Green, Sub-Division No. 4, New Castle District. 4—Track Foreman M. Relish and his family, Ravenna, Ohio. 5—Track Foreman A. Bonacci. 6—Track Foreman L. J. Wilkinson, Chardon, Ohio

back, but when we come back we have run by it or forgotten where it was. Perhaps it will lie there two or three days or a week. It does not take any longer to pick it up when we see it than it does to hunt for it coming back and then pick it up.

I am hoping that these few words will help some other foreman to win a prize.

F. B. Fulk  
Foreman, Newark, Ohio.

**He is Always Ready for a Visit from the Boss**

I won my prize in this manner. First, having been furnished a good force of men, I used each man where he does his bit laid out for him in the best fashion. There are no two men who do the same work alike, so we used a man for renewing ties who can do this work with ease, and a man dressing ballast that always has his ballast laying just right.

I got the best results by trying to make each man in my gang see the difference in appearance of a piece of track after we had worked over it. I think by doing this one can get men interested to the extent of making things seem lighter and easier to them. It also makes my work easier. A good suggestion from a man who is interested in his work is valuable in pursuing a day's work. I think for one to be up on his work and to accomplish best results, he should use his men as he would like to be used when he sees a motor car coming around a curve with the

**HIGH GRADE KNIFE \$1.00 | EASY MONEY \$75 to \$200 Monthly All or Spare Time**

**Introduction Offer**—Full size knife with any design wanted mailed for \$1.00. For 25c. extra your name and address put on knife. This does not obligate you to act as agent. Size 3 1/2 inches.

**DISTRICT SALESMEN** wanted to introduce novelty knives and razors. One side shows owner's name and address; the other any design selected, emblems used by Societies, Fraternal, Labor, and Railroad orders, etc. Bladed finest steel, handles clear as glass and unbreakable. Every knife guaranteed. Permanent employment, and exclusive territory to those willing to give most of their time. If you are earning less than \$1200 yearly let us show you how to make more. These knives make fine Birthday and Holiday PRESENTS.  
**NOVELTY CUTLERY CO.**  
335 Bar St., Canton, Ohio

supervisor and division engineer on it. I like to do my work so that when these two gentlemen pass along, they can do so without making much change.

In summer, renewal season is on. Then you are making necessary tie renewals, giving your track a little general surface, re-gauging, renewing spikes that should be renewed, cleaning stone ballast, laying stone upon track, removing weeds from roadbed, throwing up dirt, making standard subgrade and ditches, for the most essential thing on earth for good solid track is drainage; respacing ties, seeing that tie plates are set just right and spikes seated up to rail and tightened down properly. After you get your subgrade built up to standard, put your best talent to dressing down some nice new stone; take a few men to line kinks out of rail and when the supervisor comes along you can tell about the time his motor stops running whether you are doing it right or not.

O. C. Miller  
Foreman, Toboso, Ohio.

**Get His Work Under Way in Winter**

First of all we cut everything to the line. When you ditch, cut to the line; when you clean roadbed, cut to the line, and when you mow, cut to the line. Nothing shows up better than a good line from the train.

Get everything ahead in winter months that you can, such as ditching, tightening bolts, putting ties in road crossings, tapping down spikes.

A. A. Forrest  
Foreman, Waterford, Ohio.

**Gives His Men the Credit**

The credit for this district's winning the prize as best Supervisor's District is due the men and foremen. The men in charge of the sections on this district are hard, energetic workers, with the policies of the Company in mind and the interests of the Company at heart.

Because of no renewal work on this territory during 1922, except ties, we were able to spend the major portion of our time

**THEY CAME OUT AHEAD ON THE TOLEDO DIVISION**

1—Supervisor S. H. Pulliam, Rossford, Ohio. 2—Track Foreman Mike Rose, Overpeck, Ohio. 3—Track Foreman Edwin E. Blake, Zimmerman, Ohio. 4—Section Foreman H. A. Fogt, Anna, Ohio, and his daughter. 5—A prize-winning section

*Please mention our magazine when writing advertisers*

WHEN THE NEWARK DIVISION CALLED FOR WINNERS—THESE CAME—AND BROUGHT THEIR FAMILIES

1. Section Foreman O. C. Miller and his family, Tobosco, Ohio. 2. Supervisor F. S. Mahurd, Newark, Ohio. 3. F. B. Fulk and his family, Newark, Ohio. 4. Track Foreman A. A. Forrest, Waterford, Ohio, and his little grandson

on line and surface, cleaning ballast and right of way, and improving road crossings. A car on the local every Saturday enabled us to keep the right of way free from scrap. Particular attention was paid to riding conditions through switches and also to keeping information signs plumb.

S. H. Pulliam  
Supervisor, Toledo, Ohio.

**The Baltimore and Ohio Standard**

In reference to the prize I received in 1922 on my section, I will say that we try to keep our track and switches in good line and surface, keep all bolts tight, ditches and right of way clean and track up to the standard of the Baltimore and Ohio.

H. A. Fogt  
Foreman, Anna, Ohio.

**January Honor Men in Securing Accurate Weighing**

By A. E. Day  
Chief of Weighing Bureau

THE statement on page 44, this issue, is published monthly in our MAGAZINE and is posted on platform bulletin boards so that all employes may know that their efforts to increase the revenue are appreciated.

For January John Draper, agent, with

the assistance of his station force, "Stopped Leaks" to the extent of \$2,003.60, the greatest increase shown at any of the important terminals in any one month.

AGENT C. R. GRIMM, CUMBERLAND, MD., Whose station made a good showing for accurate weighing in January

W. E. Shannon, agent, Brunswick Transfer, with the able assistance of his transfer force, can always be depended upon to "Stop Leaks." In January they did it to the extent of \$782.04.

C. R. Grimm, agent, Cumberland, with the assistance of his station force, "Stopped Leaks" to the extent of \$204.79.

S. R. Cordua, agent, Lost Creek, W. Va., singled handed and with a limited amount of tonnage "Stopped Leaks" to the extent of \$50.47, considerably more than the total shown by important terminal and other stations handling a much greater volume of tonnage.

This illustrates what we wish to impress upon every agent; namely, what can be done even at a country station where a limited tonnage is handled; if continuous attention is given the subject of check-weighing.

IT PAYS TO WEIGH!

Stop That Leak!

## The Little "Bob-Up" Towns

By A. L. Norton

Illustrated by Robert L. Heiser

Did you ever take a swiftly moving train ride?  
Say the "Balt-Heigho" at fifty miles per hour.  
Did you see the little towns along the wayside,  
As you speeded on with e'er increasing power?  
Did you hear the lively message of the rail joints?  
"Click-click, click-click, click-click," they seemed to say.  
Did you know that it was teasing—from the standpoint  
Of the little towns that bobbed up by the way?

Oh, those little towns that bob up by the wayside,  
Just a glimpse as we dash by them in our train,  
To get a second look at them we've oft tried,  
And we've hoped that we might pass that way again.  
For years our own big city's been our wonder,  
It's been our life, our moods both sad and gay—  
And we forget the obligations that we're under  
To the little towns that bob up by the way.

There's a message in the music of this rail song—  
"Click-click, click-click, click-click, click-click, click-click,"  
With the throttle open wide, with bell a ding-dong,  
To the rhythmic click, click-click, click-click, click-click;  
There's no question that the melody is pleasing,  
Its accompaniment's a joy indeed to play—  
Yet we somehow feel we're victims of the teasing  
Of the little towns that bob up by the way.

Now those little towns that bob up by the wayside  
Would be bigger if it had not been for you;  
You recall the year you took the farewell train ride?  
You mind the day you bade your town adieu?  
Well, these good folk who have always lived and worked here  
Who in cities first beheld the light of day,  
Are outnumbered by the others (yes, it seems queer)  
From the little towns that bob up by the way.

So, we love the towns that bob up by the wayside,  
They remind us of some very early joys,  
When their limits were the limits of our world wide,  
And you and I were little girls and boys.  
Now, I wonder if it's true that a committee,  
Just to equalize, will send us back some day?  
My, oh my, how changed would be our wonder city  
And the little towns that bob up by the way!
